

SOCIAL WORK - ASSOCIATE OF SOCIAL WORK

Learning Outcomes

1. Demonstrate knowledge of generalist social work history, framework, values, and advocacy.
2. Examine, from a social scientific perspective, selected contemporary social issues (e.g.: racism, poverty, substance abuse, family instability).
3. Analyze orally and in writing, social science theory and research.
4. Explain the role of human diversity and intercultural difference in shaping the lives, needs, and experiences of individuals and communities.
5. Articulate the operations of human service organizations to include historical perspective, differentiation between private/public sector; and contractual entities and requirements.
6. Identify the importance of ethical practices (to include legal aspects of the social worker's code of conduct).
7. Discuss societal diversity and the needs of various subcultures this entails.
