WEB FUNDAMENTALS - CERTIFICATE OF COMPLETION

The Web Fundamentals certificate at NMSU Grants provides its graduates with a variety of foundational skills to begin their path into a career in web design. Graduates receive training in modern web design practices with a focus on building strong skillsets with HTML, CSS and other tools to create user experience oriented responsive designs. Graduates will also gain proficiency with digital media programs to aid in their design like Adobe Creative Cloud Software. This program is able to be completed entirely online with the option to utilize face to face labs as well.

This Certificate is 100% embedded and leads to the Associate of Applied Science in Creative Media Design at NMSU Grants.
