With the permission of the program advisor, students may substitute 1 class that presents a topical focus on sustainable development. 2

Field Requirements
Select 3 credits from the following: 3
- ANTH 485  Special Research Project
- FWCE 450  Special Topics
- SOC 496  Internship

Total Credits: 24

1 Courses are limited in each department in order to encourage students to take classes in different disciplines and broaden their perspective.

2 Certain courses, such as SOC 489 Globalization or special topics courses may have a sustainable development focus, depending on the instructor or subheading. In these cases the student can request permission to substitute this specific course for an elective class listed above.

3 In addition, students are expected to take one class that applies the principles and concepts of sustainable development in a local, regional or international setting. Students may opt to enroll in one of the classes listed below, or they may choose to work on an independent study or internship in sustainable development. In these cases, students should seek the approval of the sustainable development committee before embarking on the field experience or internship.
