# COMPUTER SCIENCE (ARTIFICIAL INTELLIGENCE) -BACHELOR OF SCIENCE

The Bachelor of Science in Computer Science is the traditional undergraduate degree in Computer Science. It is rigorously focused on educating the student in the fundamental disciplines of Computer Science. It prepares the student for any technological field in industry, and also provides the preparation for graduate studies in Computer Science. It is the main undergraduate degree in the Computer Science department, and should be the choice of a single-major Computer Science student. This degree is accredited by the ABET Computing Accreditation Commission (CAC) under the General and Computer Science Program Criteria.

#### General Requirements Exception

A grade of at least C- must be earned in each of the courses taken to satisfy the departmental and non-departmental requirements. No course may be counted as satisfying both a departmental and a non-departmental requirement. No course taken to satisfy either a departmental or a non-departmental requirement may be taken S/U.

## Requirements

Students who plan to seek employment at the bachelor level are advised to take one of the concentration area curricula in addition to the general and departmental requirements. An elective course cannot be used for more than two focuses. A course that is required for one concentration cannot be used as an elective course of another one.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300/3000 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix	Title	Credits		
General Education Requirement				
Area I: Communications				
English Composition - L	evel 1 <sup>2</sup>	4		
English Composition - L	evel 2			
ENGL 2210G	Professional and Technical Communication	3		
Oral Communication

### Second Language Requirements: (not required)

### Electives, to bring the total credits to 120 $^{7}\,$

The specific requirements for the concentration in Artificial Intelligence are as follows:

Select 3-4 credit	s from the following:	
CSCI 3790	Algorithm Design & Implementation	
CSCI 3720	Data Structures and Algorithms	
Select 9 credits from the following:		
CSCI 4405	Artificial Intelligence I	
CSCI 4420	Applied Machine Learning I	

CSCI 4415	Introduction to Data Mining	
Total Credits		120

- <sup>1</sup> Students with Area I transfer credits may sometimes complete this requirement with 9 credits
- See the General Education (https://catalogs.nmsu.edu/nmsu/general-education-viewing-wider-world/) section of the catalog for a full list of courses
- MATH 1511G Calculus and Analytic Geometry I and MATH 1521G Calculus and Analytic Geometry II are required for the degree but students may need to take any prerequisites needed to enter MATH 1511G or MATH 1521G first.
- See the Viewing a Wider World (https://catalogs.nmsu.edu/nmsu/ general-education-viewing-wider-world/#viewingawiderworldtext) section of the catalog for a full list of courses.
- 5 A course can satisfy only one requirement.
- <sup>6</sup> Must be taken for 3 credits to count as a course.
- Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
