This course explores the relationship between human societies and the natural environment, with an emphasis on both sustainable human and environmental relationships.

Prerequisite(s): SOC 101G.

SOC 465V. Environmental Sociology**3 Credits**

Advanced examination of societal responses to environmental problems including social adjustments to natural and technological hazards, sociocultural aspects of technological risk and impact assessment, and emergence of environmental social movements.

SOC 470. Sociology of Latinos/as in the United States**3 Credits**

In-depth examination and comparative analysis of political and economic issues affecting Latino/a culture and behavior. Includes the Chicano/a and larger Latino/a movements, the border, immigration, language policies, education, religion, labor, and Latina women s issues. Recommended preparatory courses: SOC 101G, SOC 270, SOC 371, or HIST 367.

SOC 471. Advanced Race and Ethnic Relations**3 Credits**

In-depth analysis of the dynamics of prejudice, discrimination, and patterns of intergroup interaction in the U.S.

SOC 473. INTERNATIONAL MIGRATION**3 Credits**

This course examines international migration as a social process, focusing on the American experience. Students will examine historical and comparative literature on immigration that puts contemporary questions about policy and immigrant assimilation into a broader sociological perspective.

Prerequisite(s): SOC 101G.

SOC 474. Sociology of Organizations**3 Credits**

Sociological models of formal organizations relevant to business, education, government, healthcare, military, and religion. Focus on internal organizational structure and dynamics plus the reciprocal relationship between organizations and their operating environment.

SOC 477. Sociology of Education**3 Credits**

Socio-political and economic factors that shape the structure and operation of educational institutions in modern complex societies. Socio-historical development of the school as a microcosm of society, with examples from American and other school systems.

SOC 479. Sociology Perspectives on the U.S.-Mexico Border**3 Credits**

Theoretical perspectives and current research on the U.S.-Mexico border region, including topics such as migration, identity, health, gender, and environment.

SOC 480. Diversity in Alternative Families**3 Credits**

Cross-cultural examination of diversity among and within families: analysis of family diversity includes consideration of the theoretical frameworks, ideological commitments, personal experiences, and methodological approaches to examine family life.

SOC 481. Social Deviance**3 Credits**

Theoretical approaches to the study of social deviance with emphasis on critical theories. Exploration of forms of deviance in society. Examination of social construction of deviance within mass media and systems of social control.

SOC 482. Advanced Individual and Society**3 Credits**

Examines reciprocal relationship between individual and society. Topics include socialization, social influence and persuasion, group structure and performance, altruism, aggression, interpersonal attraction, group cohesion and conformity, and inter-group conflict.

SOC 486. Power and Politics in America**3 Credits**

This course provides an introduction to the study of Political Sociology with a focus on the United States. Political Sociology studies the social bases of politics and political systems and facilitates the understanding of the processes and consequences of power distributions in the United States.

Prerequisite(s): SOC 101G.

SOC 489. Globalization**3 Credits**

Analysis of the globalization process. Covers theories of globalization, the global economy, political globalization, global culture, transnational social movements, transnational migration and world labor market, global cities, and local-global linkages. Same as GOVT 469.

SOC 491. Criminological Theory**3 Credits**

Schools of thought, contrasting approaches, and contemporary efforts in theory construction relevant to adult and juvenile offenders.

SOC 496. Internship**1-6 Credits**

Supervised participation in an appropriate community setting. Taught with SOC 596. May be repeated up to 9 credits. Consent of Instructor required. S/U Grading (S/U, Audit).

SOC 501. Perspectives on Sociology**3 Credits**

Overview of the field, subfields, and faculty available for students at NMSU. Emphasis on theories and research currently being developed in the Sociology program. Graded: S/U. May be repeated up to 3 credits. Restricted to: Soc majors. S/U Grading (S/U, Audit).

SOC 509. Advanced Seminar in Community Development**3 Credits**

This is in an advanced seminar addressing a holistic view of community development with an emphasis upon how economic development efforts can become more inclusive and sustainable.

Prerequisite(s): Graduate student standing.

SOC 530. Advanced Social Movement Theory**3 Credits**

Overview of key theories in past and present social movement research. Topics include a focus on rational or spontaneous choice theories, resource mobilization, and new social movement theories. Theoretical perspectives focus on analysis of case studies including women's movement, civil rights, and environmental movements.

SOC 548. Graduate Special Topics**3 Credits**

Specific subjects to be announced in the Schedule of Classes.

SOC 549. Special Research Problems**1-3 Credits**

Individual analytic or experimental investigations. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

SOC 551. Issues in Advanced Quantitative Analysis**3 Credits**

Advanced methods of sociological analysis are examined in detail. Restricted to: SOC majors.

SOC 552. Seminar in Classical Social Theory**3 Credits**

Analysis of classical social thought within the discipline. Restricted to: SOC majors.

SOC 553. Seminar in Sociological Research**3 Credits**

Exploration of research methods, issues, and practical application. May be repeated up to 3 credits. Restricted to: Soc majors.

SOC 558. Seminar: Sociology of the Family**3 Credits**

The family in various societies; evolution of the American family.

SOC 559. Graduate Seminar in Sex and Gender**3 Credits**

Comprehensive examination of current gender identity and gender stratification issues. Same as W S 559.

SOC 560. Advanced Sociology of Religion**3 Credits**

Examination of religion in its social context to understand the intricate relations of religion, culture and U.S. society.

SOC 564. Seminar in Human Society and the Environment**3 Credits**

This is an advanced seminar exploring the relationship between human societies and the natural environment, with an emphasis on both sustainable human and environmental relationships.

Prerequisite(s): Graduate Student Status.

SOC 565. Advanced Environmental Sociology**3 Credits**

Advanced examination of societal responses to environmental problems including social adjustments to natural and technological hazards, sociocultural aspects of technological risk and impact assessment, and emergence of environmental social movements.

SOC 569. Advanced Issues in Sexualities**3 Credits**

Various issues in sexualities are addressed through a wide range of theoretical and empirical sociological literatures that involve quantitative and qualitative data. Advanced examination of the ways in which sexuality is constituted in local, cultural and institutional environments.

SOC 570. Advanced Sociology of Latinos/as in the United States**3 Credits**

In-depth examination and comparative analysis of political and economic issues affecting Latino/a culture and behavior. Topics include the Chicano/a and larger Latina/o movements, the border, immigration, language policies, education, religion, labor and Latina women's issues.

SOC 571. Advanced Race and Ethnic Relations**3 Credits**

In-depth analysis of the dynamics of prejudice/discrimination and patterns of intergroup interaction in the U.S.

SOC 572. Advanced Sociology of Medical Ethics**3 Credits**

Major issues in the roles and relationships of health care providers and consumers, problems in communication, malpractice, patients rights, and ethics. Taught with SOC 472 with additional work required at the graduate level.

SOC 574. Sociology of Organizations**3 Credits**

Sociological models of formal organizations relevant to business, education, government, healthcare, military, and religion. Focus on internal organizational structure and dynamics plus the reciprocal relationship between organizations and their operating environment.

SOC 575. Graduate Social Stratification**3 Credits**

Advanced examination of theories of stratification and current methods of stratification research. Focus on differences by ethnicity, race, class and gender.

SOC 577. Advanced Sociology of Education**3 Credits**

Socio-political and economic factors that shape the structure and operation of educational institutions in modern complex societies. Socio-historical development of the school as a microcosm of society, with examples from American and other school systems.

SOC 578. Advanced Sociology of Development and the World System**3 Credits**

Sociological approach to development and the global system. Theories of development, and underdevelopment; world poverty/inequality; Latin America; Africa and Asia in comparative perspectives; transnational borders/U.S.-Mexico border; current topics. Same as GOVT 577.

SOC 579. Advanced Sociological Perspectives on the U.S.-Mexico Border**3 Credits**

Theoretical perspectives and current research on U.S.-Mexico border region, including migration, identity, health, gender, and environment.

SOC 580. Diversity in Alternative Families**3 Credits**

Cross-cultural examination of diversity among and within families: analysis of family diversity includes consideration of the theoretical frameworks, ideological commitments, personal experiences, and methodological approaches to examine family life.

SOC 582. Individual and Society**3 Credits**

Examines reciprocal relationship between individual and society. Topics include socialization, social influence and persuasion, group structure and performance, altruism, aggression, interpersonal attraction, group cohesion and conformity, and intergroup conflict.

SOC 583. Symbolic Interaction**3 Credits**

Examination of the interaction of self and the social order including society as process, the negotiation of social order, identity as a social product, role taking and the situated self, the social construction of reality with an emphasis on phenomenology and ethnomethodology.

SOC 586. Advanced Seminar in Power and Politics in the United States**3 Credits**

This is an advanced seminar addressing the study of Political Sociology with a focus on the United States. Political Sociology studies the social bases of politics and political systems. It facilitates an understanding of the processes and consequences of power distributions in the United States.

Prerequisite(s): Graduate student standing.

SOC 587. Advanced International Migration**3 Credits**

This course examines international migration as a social process, focusing on the American experience. Students will examine historical and comparative literature on immigration that puts contemporary questions about policy and immigrant assimilation into a broader sociological perspective.

Prerequisite(s): Graduate student standing.

SOC 589. Advanced Issues in Globalization**3 Credits**

Analysis of the globalization process. Covers theories of globalization; global economy; political globalization; global culture; transnational social movements; transnational migration and world labor market; global cities; local-global linkages. Same as GOVT 569.

SOC 596. Internship**1-6 Credits**

Supervised participation in appropriate occupational setting. May be repeated for a maximum of 12 credits. Taught with SOC 496 with additional work required at the graduate level.

SOC 599. Master's Thesis**6 Credits**

Thesis. Consent of instructor required. Restricted to: Main campus only. Restricted to SOC majors.

Contemporary Social Studies - Undergraduate Minor

See requirements for this minor in the Department of History (p. 317) section.

Sociology - Bachelor of Arts

Departmental Requirements

SOC 101G	Introductory Sociology	3
SOC 351	Sociological Theory	3
SOC 352	Social Research: Methods ^{1,2}	3
SOC 353	Sociological Research: Analysis ¹	3

SOC 401	Introduction to Sociological Practice	3
Departmental Electives		
Select sufficient electives in sociology to bring total credits in major to 33, including 24 upper-division of which 6 credits must be 400 level (excluding SOC 401). ³		18
Total Credits		33

- ¹ Criminal Justice/Sociology double majors may be permitted to substitute C J 300 Introduction to Criminal Justice Research for SOC 352 Social Research: Methods and C J 301 Advanced Research Methods for SOC 353 Sociological Research: Analysis.
- ² Government/Sociology double majors may be permitted to substitute GOVT 300 Political Research Skills for SOC 352 Social Research: Methods upon approval of appropriate substitution/waiver forms.
- ³ The six credits of SOC 400 electives does not include SOC 401 Introduction to Sociological Practice. SOC 449 Directed Readings can be applied to this requirement. A maximum of six credits of SOC 449 Directed Readings is allowed. In addition, for those in the Master's Accelerated Program, SOC 500 electives can be used to meet the six credit requirement.

In addition, substitution/waivers for courses may be available upon consultation with the Department Head in the Department of Sociology. In all cases, the total number of sociology credits (courses with SOC prefix) must be a minimum of 33.

Degree Requirements

General Education Courses	35
Viewing a Wider World Courses	6
Departmental Requirements	33
Electives: to bring total to 120 credits, with 48 credits being upper-division	46
Total Credits	120

Second Language

A second language is not required.

Sociology - Master of Arts

Thesis Program Requirements

In addition to the successful completion of an acceptable master's thesis, students who choose this option will take a minimum of 36 credit hours of graduate work distributed as follows:

Requirements		
SOC 501	Perspectives on Sociology ¹	3
SOC 548	Graduate Special Topics: Qualitative Methods ¹	3
SOC 551	Issues in Advanced Quantitative Analysis ¹	3
SOC 552	Seminar in Classical Social Theory ¹	3
SOC 553	Seminar in Sociological Research ¹	3
SOC 599	Master's Thesis	6
Select an additional 15 credits from 500 level Sociology course work to be taken in consultation with the sociology graduate student's advisor.		15

Final master's oral examination covering all general coursework and the thesis.

Total Credits 36

- ¹ To be taken within the first 27 hours of graduate credit. A grade of B- or better is required to receive credit for each of these core courses.

Non-Thesis Program Requirements: Coursework Only

Students who choose this option will take a minimum of 36 credit hours of graduate work distributed as follows:

Requirements		
SOC 501	Perspectives on Sociology ²	3
SOC 548	Graduate Special Topics: Qualitative Methods ²	3
SOC 551	Issues in Advanced Quantitative Analysis ²	3
SOC 552	Seminar in Classical Social Theory ²	3
SOC 553	Seminar in Sociological Research ²	3
Select an additional 21 credits from 500 level Sociology course work to be taken in consultation with the sociology graduate student's advisor.		21
Final master's written examination covering all general coursework.		
Total Credits		36

- ² To be taken within the first 27 hours of graduate credit. A grade of B- or better is required to receive credit for each of these core courses.

Admission Requirements

To apply for admission to the Sociology MA Program and the Graduate School, applicants must meet the following criteria and submit the following through <http://prospective.nmsu.edu/graduate/apply/index.html>

- Application form and fees
- An undergraduate cumulative GPA of at least 3.0 on a 4.0 scale.
- A record of professional, ethical, and collegial behavior.
- Official undergraduate and graduate transcripts from all colleges and universities attended.
- A well written statement of purpose from the candidate addressing graduate school objectives and interests.
- Three letters of recommendation describing personal qualities and achievements that suggest the applicant will be successful in the program. We prefer that letters of recommendation come from faculty members familiar with the academic work and professional conduct of the applicant.

Failure to meet any of the above criteria may result in the student not being accepted into our program. However, in cases when an otherwise outstanding student does not meet the GPA requirements, the student may be accepted provisionally into the program.

The GRE is not required for admission. Students may be required to take prerequisites prior to gaining admission.

For priority consideration, the deadline for application is March 15 for Fall admission.

Sociology - Undergraduate Minor

Students who earn a Bachelor of Arts in Sociology may not also earn a minor in Sociology. Students earning the minor must pass 18 credits with grades of C- or higher. Students may count S grades only in courses in which all grades are S/U. Students may substitute an upper division social research methods course for the required SOC 352 Social Research: Methods from the Departments of Criminal Justice and Government. Additional research methods courses may be considered. Please contact the Department Head of the Department of Sociology for further consideration. Students making this substitution must still pass 18 total credits in Sociology in order to earn this minor.

Required Courses

SOC 101G	Introductory Sociology	3
SOC 351	Sociological Theory	3
SOC 352	Social Research: Methods	3
Additional Sociology credits, of which at least 6 are upper division		9
Total Credits		18

Theatre Arts

Undergraduate Program Information

With strong emphases in acting, musical theater, new works and design/technical theatre, the program prepares students for graduate study, life in the profession, or a myriad of related job fields. Students gain practical experience through a wide array of courses designed to expose them to the varied aspects and job positions involved in theatrical production. The faculty is augmented by nationally-renowned guest theatre artists.

A minimum of 62 credits with a grade of C- or higher in theatre arts is required for the major. Theatre Arts does not require a second language.

Students enrolled in this department's major or minor may count credits in required applied courses toward their degrees beyond the normal maximum of 9 credits allowed in the College of Arts and Sciences. However, if a student changes the major or does not complete the requirements for the minor at the time of graduation, they may only count a maximum of 9 credits of the applied credits toward graduation.

Students preparing to teach in public schools may qualify for certification by completing the Bachelor of Science in Education degree with theatre arts as a teaching field. (See curricula in the College of Education (p. 452) section).

At any time the Theatre Arts program may be undergoing curriculum changes. For the most up-to-date information about degree requirements please visit www.nmsutheatre.com (<http://www.nmsutheatre.com>) or visit the Theatre Arts Department at room 321 in the Center for the Arts Building.

THTR 101G. The World of Theatre

3 Credits

An appreciation class introducing the non-major to all aspects of theatre, including its history, literature and professionals. Students attend and report on stage productions.

THTR 105. Acting for Non-Majors

3 Credits

An introduction to basic performance techniques for non-majors.

THTR 110. Beginning Acting

3 Credits

Basic understanding of self-expression through a variety of physical exercises, improvisation, and character study, culminating in scene or monologue work. Restricted to: THTR majors.

THTR 120. Stage Movement

3 Credits

Physical techniques for the actor to develop kinesthetic awareness and skills in characterization, archetypes, and stage combat. Restricted to: THTR majors.

THTR 130. The Art of Theatre

3 Credits

This course introduces the variety and scope of theatre professions, the value and goals of the theatre major and an analysis of the art form from script to stage. Restricted to: Required for THTR majors majors.

THTR 141. Introduction to Stagecraft

3 Credits

Basic techniques used in the construction of scenery, props, and sound. Lab required. Pre/

Corequisite(s): THTR 141L.

THTR 141 L. Stagecraft Laboratory

1 Credit

Class members will assist with construction for productions in a studio environment. Pre/

Corequisite(s): THTR 141.

THTR 142. Introduction to Costume Crafts

3 Credits

Common costume production techniques, including basic stitching, use of equipment, knowledge of available materials, dyeing, and 3-D.

Prerequisite(s)/Corequisite(s): THTR 142L. Restricted to: THTR majors.

THTR 142 L. Costume Craft Lab

1 Credit

Class members will assist in construction for productions in a studio environment. Pre/

Corequisite(s): THTR 142.

THTR 149. Running Crew I

2 Credits (1+2P)

Students learn about backstage and front of house production positions and work on a technical aspect of a production in a rehearsal and performance environment.

THTR 200. Theatre Workshop I**0.5 Credits**

Required for all freshman and sophomore theatre majors, this course coordinates all processes within Theatre Arts, providing a forum for discussion and feedback. May be repeated up to 4 credits. Restricted to Las Cruces campus only.

THTR 210. Intermediate Acting: Scene Study and Monologues**3 Credits**

Monologues and scene work, using character and script analysis.

Prerequisite(s)/Corequisite(s): THTR 205. **Prerequisite(s):** THTR 110 with C- or above.

THTR 220. Vocal Production for the Actor**3 Credits**

Exploration and development of the actor's vocal instrument, including relaxation, projection, diction and articulation. May be repeated up to 3 credits. Restricted to: THTR majors.

THTR 222. Theatre Topics**1-3 Credits (1-3)**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 9 credits.

THTR 249. Running Crew II**1 Credit**

Students work on a technical aspect of a production in a rehearsal and performance environment.

THTR 250. Introduction to Design**3 Credits**

Introduction into our visual world via the language of designers, focusing on collaboration, creative thinking and presentation skills. The varied design professions in theatre and the performing arts will be explored. Restricted to: Required of all THTR Majors majors.

THTR 300. Theatre Workshop II**0.5 Credits**

Required for all junior and senior theatre majors, this course coordinates all processes within Theatre Arts, providing a forum for discussion and feedback. May be repeated up to 4 credits. Restricted to Las Cruces campus only.

THTR 303. Theatre History I**3 Credits**

History of theatre and drama from ancient Greece to the English Renaissance.

THTR 304. Theatre History II**3 Credits**

History of theatre and drama from the Restoration to the 20th century. May be repeated up to 3 credits.

THTR 306. Screenwriting I**3 Credits**

Same as CMI 309, ENGL 309. Consent of instructor required. Crosslisted with: CMI 309 and ENGL 309

Prerequisite(s): ENGL/CMI 235.

THTR 307V. Society in Style: Fashion, History and Culture**3 Credits**

History of clothing for theatrical purposes, origins and evolution of period clothing in relation to social, political, and aesthetic factors of different periods.

THTR 308. Creative Writing: Playwriting**3 Credits**

Technique of one-act playwriting, and analysis of dramatic structure.

Crosslisted with: ENGL 308

Prerequisite(s): ENGL 111G.

THTR 310. Styles in Acting**3 Credits**

Analysis of differing styles of acting through scene work representing various time periods and genres.

Prerequisite(s): THTR 210.

THTR 312. Acting Shakespeare**3 Credits**

Acting Shakespeare's tragedies and comedies, including text work, scansion, movement, scene work, and monologues.

Prerequisite(s): THTR 210.

THTR 313. Improvisation**3 Credits**

Long and/or short form improvisation techniques in addition to a variety of exercises exploring terminology, character work and the elements of comedy.

Prerequisite(s): THTR 105 or THTR 110.

THTR 314. Scene Study**3 Credits**

Studio class focusing on scene work and acting processes.

Prerequisite(s): THTR 210.

THTR 317. Musical Theatre**3 Credits**

Acting class focused on developing and refining skills necessary for performing in musicals. Pre/ May be repeated up to 9 credits.

Prerequisite(s)/Corequisite(s): THTR 210.

THTR 320. Auditioning and Marketing**3 Credits**

Techniques for choosing and preparing effective monologues, cold and prepared readings, head shots and resumes, and interview skills.

Prerequisite(s): THTR 210.

THTR 321V. Modern European Drama**3 Credits**

Masterworks of European drama from the 19th century to the present.

Crosslisted with: ENGL321V.

THTR 322. Dramatic Character**3 Credits**

How characters have been created for the stage from the beginning of theatrical performances in ancient Greece to the present day. Exploring characterization related to dramatic structure, style, and genre, and how dramatic characters differ from those in literary fiction. May be repeated up to 3 credits. Crosslisted with: ENGL 322.

THTR 323. American Drama**3 Credits**

Masterworks of American drama from the 20th century to the present.

Crosslisted with: ENGL323.

THTR 329. Studies in Drama**3 Credits**

Subtitles vary. Study of a group of related works of drama, theory, or theatre practice. Crosslisted with: ENGL329 and CMI329.

THTR 334. Introduction to Stage Makeup**3 Credits**

Basic principles of stage makeup: straight, character, and specialty. Includes study of various products, methods of application, and the effects of lighting on makeup.

THTR 337. Independent Study**1-3 Credits**

Students propose and design their own course not covered through regular course offerings under the guidance of faculty. May be repeated up to 6 credits. Consent of Instructor required.

THTR 341. Scene Painting**3 Credits**

Use of historical painting techniques in a project-driven classroom. Projects include 2-D and 3-D work, color mixing and theory, painting scenery, and the use of paint for effects.

Prerequisite(s): THTR 141.

THTR 343. Costume Patterning**3 Credits**

Basic techniques in the production of flat patterns for modern and period silhouettes including some draping techniques. Consent of Instructor required.

THTR 345. Costume Practicum**1 Credit**

A practical course intended to provide students additional experience and greater responsibility within the workings of the Costume Shop. Pre/

Corequisite(s): THTR 142.

THTR 346. Scenic Practicum**1 Credit**

A practical course intended to provide students additional experience and greater responsibility within the workings of the Scene Shop. Pre/

Corequisite(s): THTR 141.

THTR 347. Lighting Practicum**1 Credit**

A practical course intended to provide students hands-on experience executing theatrical lighting.

THTR 348. Running Crew III**1 Credit**

Students will work on a technical aspect of a production in a rehearsal and performance environment.

Prerequisite(s): THTR 149.

THTR 349. Running Crew IV**1 Credit**

Students will work on a technical aspect of a production in a rehearsal and performance environment.

Prerequisite(s): THTR 149.

THTR 352. Costume Design**3 Credits**

Basic principles of costume design, including script analysis, principles of design, drawing and painting.

THTR 353. Scene Design**3 Credits**

Design for the performing arts. Basic design skills and projects to exercise those skills, history of design in the theatre and the designer's role in the production process. Final project includes a finished scene design.

Prerequisite: THTR 141 or consent of instructor.

THTR 354. Sound Design**3 Credits**

Hands-on training in theatrical sound design and implementation.

THTR 355. Lighting Design**3 Credits**

Basic aspects of theatre lighting, including electricity, color theory, history, and types of lighting instruments.

THTR 356. Theatre Production**1-3 Credits**

Participation in the production of theatrical performances by stage managing, acting, designing, dramaturgy, or directing. May be repeated for a maximum of 6 credits. Graded S/U.

THTR 357. Computer Scenographics**3 Credits**

Project-oriented course teaching basic computer modeling skills. Projects focus on the creation of communication tools designers use in the theatrical process. Students will develop portfolios of completed projects. Consent of instructor required.

Prerequisite(s): THTR 352, THTR 353, or THTR 355.

THTR 360. Creative Drama**3 Credits (2+2P)**

Methods of developing original dramatizations. Emphasis on curriculum problems and teaching techniques in elementary and secondary schools.

THTR 366. Summer Theatre**1-3 Credits**

Experience in professional or academic summer theatre. May be repeated for a maximum of 3 credits. Graded: S/U. Restricted to THTR majors.

Prerequisite(s): Consent of department head.

THTR 384. Stage Management**3 Credits**

Study of stage management techniques and their application to play production. A working knowledge of union rules, and the procedure to facilitate these through proper communication skills.

THTR 395. Directing I**3 Credits**

Study and application of basic stage directing techniques.

Prerequisite(s): THTR 105 or THTR 110.

THTR 396. Theatre Management**3 Credits**

Study of issues related to managing a theatre company and producing plays. May be repeated up to 3 credits.

THTR 408. Shakespeare I**3 Credits**

Same as ENGL 408.

THTR 409. Shakespeare II**3 Credits**

Same as ENGL 409.

THTR 410. Advanced Acting: Contemporary Methods**3 Credits**

Acting techniques will be explored focusing on current trends in the profession, from Stanislavski, to Hagen to Meisner.

Prerequisite(s): THTR 205.

THTR 414. Collaborative Theatre-Making**3 Credits**

This course introduces students to the techniques, skills and practice of the collaborative creation of new theatrical material.

Prerequisite(s): THTR 110.

THTR 417. Musical Theatre II**3 Credits**

A continuation of THTR 317, allowing for more advanced musical theatre techniques.

Prerequisite(s): THTR 317.

THTR 430. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 9 credits.

THTR 435. Directed Reading**1-3 Credits**

Directed individualized studies. May be repeated for a maximum of 3 credits.

THTR 439. Senior Seminar**3 Credits**

Course preparing students for professions in and related to the theatre. Restricted to: THTR majors.

THTR 440. Senior Seminar Practicum**1 Credit**

Capstone course preparing students to apply knowledge of theatre arts toward advanced training or career objectives in the discipline. Consent of instructor required. Pre/ Restricted to THTR majors.

Corequisite(s): THTR 439.

THTR 450. The Michael Chekhov Acting Intensive**3 Credits**

An intensive overview of the performance techniques attributed to Michael Chekhov, applied to theatrical scenes and presentations. May be repeated up to 6 credits. Consent of Instructor required.

THTR 457. Advanced Computer Scenographics**3 Credits**

Project-oriented course for the advanced modeler. Projects focus on the creation of complex models, custom texturing and shading, virtual lighting, postproduction image work, and animation techniques. Students will develop digital portfolios.

Prerequisite: THTR 357 and consent of instructor.

THTR 535. Directed Study**1-3 Credits (1-3)**

For the highly motivated student. Independent projects and individual guidance. Graduate standing and consent of instructor required. May be repeated up to 6 credits.

THTR 323	American Drama	
Select one from the following:		3
THTR 352	Costume Design	
THTR 353	Scene Design	
THTR 354	Sound Design	
THTR 355	Lighting Design	
Select 9 credits from THTR 300/400 level courses ¹		9
Electives		
Select sufficient electives to bring total to 120, including 48 upper-division.		
Total Credits		62

¹ Courses from this category must not duplicate selections above.

² Theatre majors must enroll in Theatre Workshop each semester. THTR 200 for freshmen and sophomores and THTR 300 for juniors and seniors, 2 credits total for each course equaling a total of 4 credits.

³ Complete a minimum of 120 credits, with 48 credits at the 300 level or above, including all general education and viewing a wider world requirements.

Concentration: Musical Theatre

The musical theatre concentration is designed to provide students with training in musical theatre performance, including singing, dancing and acting.

Departmental Requirements

All courses required for the Theatre Arts major must be met, except for the requirement of 9 additional THTR courses.

Departmental Requirements

DANC 124	Jazz Technique I	1
DANC 224	Jazz Technique II	2
THTR 317	Musical Theatre	3
THTR 417	Musical Theatre II	3

Select 3 credits from the following:	3
--------------------------------------	---

DANC 127	Tap Dance I
----------	-------------

DANC 227	Tap Dance II
----------	--------------

DANC 123	Ballet Technique I
----------	--------------------

DANC 126	Modern Dance Technique I
----------	--------------------------

DANC 223	Ballet Technique II
----------	---------------------

DANC 226	Modern Dance Technique II
----------	---------------------------

DANC 323	Ballet Technique III
----------	----------------------

DANC 326	Modern Dance III
----------	------------------

Voice or Applied Music-Vocal

Select a minimum of six credits from the following: ²	6
--	---

MUS 130	Applied Music
---------	---------------

MUS 160	University Singers
---------	--------------------

MUS 161	Concert Choir
---------	---------------

MUS 162	Master Works Chorus
---------	---------------------

MUS 251	Opera Workshop
---------	----------------

MUS 351	Opera Workshop
---------	----------------

MUS 361	Concert Choir II
---------	------------------

MUS 368	University Singers II
---------	-----------------------

Total Credits	18
---------------	----

² Two of the required vocal credits may be in choral ensemble or opera workshop.

Theatre Arts - Undergraduate Minor

The Department of Theatre Arts has one minor in Theatre Arts. Students must pass a minimum of 9 lower division and 9 upper division THTR credits with grades of C- or higher to earn the minor. A student cannot earn both a BA in Theatre Arts and a minor in Theatre Arts.

COLLEGE OF BUSINESS

Dean - *James Hoffman*

Associate Dean (Academics) - *Kathleen Brook*

Associate Dean (Research) - *William Gould*

Mission of the College of Business

The College of Business transforms lives by providing highly respected programs, instruction and scholarly activities that drive economic, social, educational and community development for New Mexico's diverse population.

Requirements for the Bachelor Degrees

- Successful completion of the New Mexico General Education Common Core and NMSU Viewing a Wider World Courses.
- Successful completion of College of Business Requirements below and major requirements. For the Bachelor of Arts in Economics, see the Economics and International Business (p. 426) section for specific requirements.
- A minimum cumulative grade point average (GPA) of 2.0 in all courses taken at NMSU to meet lower and upper division business core and major requirements.
- All majors except Economics and International Business require a minimum cumulative GPA of 2.0 in all courses taken to meet the requirements of the major. For Economics and International Business majors, a minimum cumulative GPA of 2.5 is required for courses taken to meet the requirements for the major.
- A minimum of 50% of business credits required for a Bachelor of Accountancy or Bachelor of Business Administration degree or 18 business credits required for a Bachelor of Arts in Economics degree must be completed in the College of Business and a minimum of 12 credits required in the major must be completed in the College. See sections below for major-specific transfer criteria. A total of no more than six credits of courses designated as 300E may be used to satisfy the required upper division business elective, the ECON/A ST elective, and electives in the major.

The only courses that may be taken on an S/U option by students in the College of Business are those designated S/U only, general electives outside the college, and up to 9 credits of HON courses used to fulfill General Education requirements.

Before taking upper-division courses (numbered 300 or above) offered by the College of Business, students must complete all lower-division course requirements with the required minimum grades or better.

Business course credits completed more than ten years prior to the degree application will be reviewed by the course department head and dean (or a designee) to determine their continued suitability to satisfy current degree, major and minor requirements and learning objectives.

Course Requirements

General Education Requirements

35

Students are advised to take ENGL 203G as their second writing course and ECON 251G and ECON 252G to satisfy the social and behavioral science category.

Grades of C- or better are required in general education communications courses.

Foundation Requirements ¹

MATH 121G	College Algebra	3
MATH 142G	Calculus for the Biological and Management Sciences (Majors in Economics and International Business must earn a grade of at least C-)	3
A ST 251G	Statistics for Business and the Behavioral Sciences	3
or STAT 251G	Statistics for Business and the Behavioral Sciences	
or A ST 311	Statistical Applications	

Business Core: Lower Division (minimum grades of C- required)

ACCT 221	Financial Accounting (not recommended for freshman year)	3
ACCT 222	Management Accounting	3
BCIS 110	Introduction to Computerized Information Systems	3
BUSA 111	Business in a Global Society	3
ECON 251G	Principles of Macroeconomics (Credits are counted in general education)	3
ECON 252G	Principles of Microeconomics (Credits are counted in general education)	3

Business Core: Upper Division

BCIS 338	Business Information Systems I	3
BLAW 316	Legal Environment of Business	3
FIN 341	Financial Analysis and Markets	3
MGT 309	Human Behavior in Organizations	3
MGT 449	Strategic Management	3
MKTG 303	Principles of Marketing	3
BCIS 485	Enterprise Resource Planning ²	3
or MGT 344	Production and Operations Management	
or MGT 470	Project Management in Organizations	

Upper division Economics or Applied Statistics elective from the following prefixes: A ST (excluding A ST 311), ECON 3

Upper Division Business elective from the following prefixes: A ST, ACCT, B A, BCIS, BLAW, ECON, FIN, I B, MGT, MKTG (excluding A ST 311) 3

Major Courses 24-27

Viewing a Wider World

Select 6 credits from Viewing a Wider World ³ 6

Select additional credits to bring total degree credits to a minimum of 120 and upper division credits to 48. The number of general elective credits varies by student and major.

Total Credits 120

¹ Students may be required to take MATH 120, depending on their math placement. MATH 121G or MATH 142G or A ST 251G or STAT 251G fulfills the general education requirement in math.

² Management - Project Supply Change majors may not use MGT 470 Project Management in Organizations to satisfy this requirement since it is a requirement in the major; Accounting majors must take BCIS 485 Enterprise Resource Planning.

³ A description of the requirement and a listing of approved VWW courses can be found in this catalog under Required Courses (p. 47).

Associate in Prebusiness Degree

To complete the associate degree, 60 credits are required, including the General Education Requirements, College of Business Foundation and Business Core (lower division) requirements.

A minimum cumulative grade point average of 2.0 is also required. The last 15 credits towards the degree must be earned through the NMSU system.

Associate in Prebusiness (p. 414)

Minors in Business

Minors are available in

- accounting,
- advertising,
- banking and financial planning,
- business administration,
- business law,
- economics,
- enterprise systems,
- entrepreneurship and innovation,
- finance,
- information systems,
- international business,
- management,
- marketing,
- professional selling,
- risk management and insurance,
- sports marketing, and
- sustainability.

Students pursuing the Bachelor of Individualized Studies or the Bachelor of Applied Studies are not eligible for minors from the College of Business other than the minor in business administration. At least 12 credits of the minor must be completed at the NMSU College of Business.

Prelaw Students

Because the practice of law often involves business-related problems, the majors in the college provide an excellent preparation for the prelaw student. The college has attorneys on the faculty who are available as advisors. Please contact the Finance Department for more information.

Undergraduate Minor: Business Administration

This minor is available to all bachelors degree seeking students, except those seeking the *Bachelor of Accountancy* and the *Bachelor of Business Administration* degrees. It is the only minor in Business open to students in the Bachelor of Applied Studies and the Bachelor of Interdisciplinary Studies. At least 12 of the credits for the minor must be completed in the NMSU College of Business.

Minor Requirements

Choose 18 credits of coursework from these business core courses: Nine of the credits must be at the upper division level.

Lower Division

ACCT 221	Financial Accounting ¹
----------	-----------------------------------

ACCT 222	Management Accounting ¹
BCIS 110	Introduction to Computerized Information Systems
BUSA 111	Business in a Global Society
ECON 251G	Principles of Macroeconomics ¹
ECON 252G	Principles of Microeconomics
Upper Division	
BCIS 338	Business Information Systems I
BLAW 316	Legal Environment of Business
FIN 341	Financial Analysis and Markets ¹
MGT 309	Human Behavior in Organizations
MKTG 303	Principles of Marketing ¹
MGT 344	Production and Operations Management ²
or MGT 470	Project Management in Organizations
or BCIS 485	Enterprise Resource Planning

¹ Courses satisfy background knowledge requirements for the MBA program when completed with a B- grade or better.

² Only one course may be applied to this minor.

Notes: At least 9 of the 18 credits for the minor must be upper division and at least 12 of the 18 credits must be completed at NMSU. A minimum GPA of 2.0 is required in the coursework for the minor.

Several courses listed above have prerequisites. It is the responsibility of the student to determine course prerequisites and other registration requirements.

Transferring Business Courses

The following business courses have been identified as transferable from NMSU to other public two year and four year institutions in New Mexico. The equivalent course at other institutions can be identified using the common course number which appears in parentheses below. Similarly, students from other institutions can use the common course number to identify business courses that can be transferred to NMSU.

A ST 251G	Statistics for Business and the Behavioral Sciences (MATH 2313)	3
STAT 251G	Statistics for Business and the Behavioral Sciences (MATH 2313)	3
ACCT 221	Financial Accounting (ACCT 2113)	3
ACCT 222	Management Accounting (ACCT 2123)	3
BCIS 110	Introduction to Computerized Information Systems (BCIS 1113)	3
BLAW 418	Uniforms Commercial Code and Advanced Business Law Topics ¹	3
BMGT 231	Legal Issues in Business (BLAW 2113)	3
BUSA 111	Business in a Global Society (BUSA 1113)	3
ECON 251G	Principles of Macroeconomics (ECON 2113)	3
ECON 252G	Principles of Microeconomics (ECON 2123)	3
FIN 206	Introduction to Finance (FIN 2113) ¹	3
MGT 201	Introduction to Management ¹	3
BMGT 210	Marketing (MKTG 2113)	3

¹ Count as general electives in the College of Business.

Accreditation

New Mexico State University has been accredited since 1926 by the Higher Learning Commission of the North Central Association of Colleges and Secondary Schools as a degree-granting institution. The university was accredited in 1954 by the American Association of University Women.

The baccalaureate and graduate degree programs in business and accounting offered in the College of Business are accredited by AACSB International—The Association to Advance Collegiate Schools of Business.

Accounting and Information Systems Undergraduate Program Information

The Bachelor of Accountancy degree is available to students choosing accounting as a major. The curriculum is designed to prepare you for the excellent opportunities that exist in public accounting practice and in business, government and nonprofit organizations. It is also appropriate for those who may choose to seek either the Master of Accountancy or the Master of Business Administration degree after graduation.

The Information Systems program has a focus on cyber security that prepares you for a variety of administrative and technical positions associated with the security of information systems. Potential employers include information system service organizations, public accounting/consulting firms, manufacturing and merchandising business, banks and other financial institutions, government and others that rely on information systems to support their business.

Graduate Program Information

The last two decades have witnessed a tremendous expansion in the knowledge base required for accounting professionals. The business environment has become increasingly complex, as evidenced by the growth in the body of national and international accounting and auditing standards, taxation, SEC and other regulatory requirements. The accountant must also be well versed in communications and analytical skills, computer-based information systems, professional ethics and global issues.

Neither the traditional four-year accounting program nor the MBA provides the educational breadth and depth necessary to fully prepare students for the demands now imposed by many accounting careers. The major objective of the Master of Accountancy (MAcc) program

is to provide for these increased educational needs and to prepare students more adequately for careers as professional accountants in financial institutions, government, not-for-profit organizations and public practice. The program is designed to provide a technical and theoretical foundation in accountancy at the advanced level and yet allow the student to take courses to accommodate individual needs.

ACCT 101. Supplemental Instruction to ACCT 221

1 Credit

Collaborative workshop for students in ACCT 221 – Financial Accounting. Course does not count toward departmental degree requirements. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

Corequisite(s): ACCT 221.

ACCT 200. A Survey of Accounting

3 Credits

Emphasis on financial statement interpretation and development of accounting information for management. For engineering, computer science, and other non business majors. Community Colleges only.

Prerequisite: one C S course or consent of instructor.

ACCT 221. Financial Accounting

3 Credits

Interpretation and use of financial accounting information for making financing, investing, and operating decisions.

ACCT 222. Management Accounting

3 Credits

Development and use of accounting information for management decision making.

Prerequisite(s): ACCT 221.

ACCT 301. Financial Accounting I

3 Credits

Concepts, principles, and practices of financial accounting, stressing the determination of income and financial position. A student who does not pass the class within three attempts will not be allowed to take class for a fourth.

Prerequisite(s): C or better in ACCT 221 and ACCT 222.

ACCT 302. Financial Accounting II

3 Credits

A continuation of ACCT 301.

Prerequisite(s): C- or better in ACCT 301.

ACCT 351. Accounting Systems

3 Credits

Covers accounting information systems as processors of data for financial reporting and control of economic organizations.

Prerequisite(s): ACCT 221 and ACCT 222.

ACCT 353. Cost Accounting

3 Credits

The development and use of cost accounting information for inventory valuation, income determination, and cost control. A student who does not pass the class within three attempts will not be allowed to take class for a fourth.

Prerequisite(s): C or better in both ACCT 221 and ACCT 222.

ACCT 403. Federal Taxation I

3 Credits

Basic federal income tax laws; emphasis on determination of taxable income of individuals. A student who does not pass the class within three attempts will not be allowed to take class for a fourth.

Prerequisite(s): A "C" or better in ACCT 221 and ACCT 222.

ACCT 451. Auditing Theory and Practices

3 Credits

Auditing standards, audit evidence, auditors reports and opinions, and professional responsibilities.

Prerequisite(s): ACCT 351 and C- or better in ACCT 302.

ACCT 455. Federal Taxation II

3 Credits

Federal income tax laws applicable to partnerships, corporations, fiduciaries, tax research, tax planning.

Prerequisite(s): C- or better in ACCT 403 or consent of instructor.

ACCT 456. Accounting for Nonprofit Organizations

3 Credits

Control and reporting problems unique to governmental units and other nonprofit organizations. Fund accounting principles, procedures, and reports.

Prerequisite(s): C- or better in ACCT 302.

ACCT 460. Fraud Examination and Prevention**3 Credits**

Covers business fraud as it is occurring in American society. Emphasis is on occupational fraud and financial statement fraud. Examines various types of fraud, its symptoms and effective investigation techniques. Effective fraud prevention measures are discussed throughout the course. Emphasizes case studies and the application of principles to actual fraud cases.

Prerequisite(s): a C- or better in ACCT 451 or concurrent enrollment.

ACCT 490. Selected Topics**1-3 Credits**

Current topics in accounting. Prerequisites vary according to the seminar offered. May be repeated for a maximum of 12 credits under different subtitles.

ACCT 498. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with the prior approval of the department head. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

ACCT 500. Concepts in Accounting**1 Credit**

Development, interpretation, and use of accounting information for financing, investing, operating, and managerial decision making.

Prerequisite(s): Admitted to MBA program.

ACCT 503. Accounting for Managers**3 Credits**

Concepts and principles of financial and managerial accounting. Presents techniques used to measure business transactions, prepare financial statements, techniques for management decision-making, planning, and control. Not open to MAcc students.

Prerequisite(s): B or better in both ACCT 221 and ACCT 222.

ACCT 510. Technical and Professional Communication for Accountants**3 Credits**

Effective writing strategies for professional communications. Students will learn to write with a professional style and proper English usage and to work with a variety of technical and lay audiences. Emphasis on initiation, planning, composition, and evaluation of business and accounting workplace scenarios to develop communication skills used in a business environment. Restricted to: Master of Accountancy majors.

ACCT 525. Advanced Cost-Managerial Accounting**3 Credits**

Advanced cost-managerial concepts with a quantitative emphasis. Integrates cost-managerial concepts, quantitative tools, organization theory, behavioral concepts and computer methodology. Restricted to: Master of Accountancy majors.

Prerequisite(s): ACCT 353.

ACCT 530. Advanced Accounting**3 Credits**

This course is designed to provide in-depth study of current financial accounting concepts related to business combinations, financial statement consolidations, and foreign currency transactions and translations. Restricted to: Master of Accountancy majors.

Prerequisite(s): ACCT 302 with a grade of C or better.

ACCT 544. Financial Statement Analysis and Valuation**3 Credits**

Valuation of firms using financial information, financial statement analysis, and the valuation of individual assets and liabilities. Restricted to: Master of Accountancy majors.

Prerequisite(s): Acct 302; Graduate students only.

ACCT 550. Special Topics**3 Credits**

Seminars in current topics in various areas of accounting including financial, managerial, auditing, taxation, systems, and fund accounting. Prerequisites vary according to topic being offered.

ACCT 551. Advanced Auditing Theory and Practice**3 Credits**

Understanding and evaluating internal control in an EDP environment. Statistical sampling applications and current issues in auditing.

Restricted to: Master of Accountancy majors.

Prerequisite(s): ACCT 451.

ACCT 554. Accounting Theory**3 Credits**

Contemporary theoretical basis of accounting. An in-depth study of generally accepted accounting principles and current issues in accounting. Restricted to: Master of Accountancy majors.

Prerequisite(s): ACCT 302.

ACCT 555. Federal Tax Research**3 Credits**

Tax research methodology including case materials, critical judicial decisions, journal articles, and research services. Emphasis on tax planning. Restricted to: Master of Accountancy majors.

Prerequisite(s): ACCT 403.

ACCT 559. Ethics and Professionalism in Accounting**3 Credits**

Introduction to ethical reasoning, integrity, objectivity, independence, and professional accounting issues. Students will apply the concepts and theories to accounting-specific cases. Restricted to: Master of Accountancy majors.

Prerequisite(s): C or better in ACCT 451.

ACCT 560. Taxation of Corporations and Shareholders Advanced**3 Credits**

Effects of taxation on the organization, operation, and reorganization of corporations and on their shareholders. Restricted to: Master of Accountancy majors.

Prerequisite(s): ACCT 403.

ACCT 564. Financial Accounting Research**3 Credits**

Interpretation and application of accounting principles to financial reporting issues of business and nonbusiness organizations. Consent of Instructor required. Restricted to: Master of Accountancy majors.

Prerequisite(s): ACCT 302.

ACCT 570. Taxation of Partnerships**3 Credits**

Taxation of partnership contributions and distributions, transfer of partnership interests, and allocations of partnership income. Also includes taxation of S corporations. Restricted to: Master of Accountancy majors.

Prerequisite(s): ACCT 403.

ACCT 580. Professional Accountancy**3 Credits**

Prepares students for the accounting profession and professional certification through study of a wide range of topics similar to those a student might encounter in their first year of employment. Restricted to: Master of Accountancy majors.

ACCT 598. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with prior approval of the department head. A maximum of 3 credits may be earned.

Prerequisite: consent of instructor.

ACCT 599. Master's Thesis**15 Credits**

Thesis.

Department of Accounting and Information Systems

Website: <https://business.nmsu.edu/departments/accounting/>

Accounting - Bachelor of Accountancy

Every candidate for the Bachelor of Accountancy degree must fulfill the following requirements in addition to the general education common core, College of Business foundation and the business core courses, Viewing a Wider World requirements and general electives. Please see the College of Business (p. 414) section for these requirements

Requirements

These requirements combined with the accounting courses required as part of the business core courses provide a minimum of 30 credits in accounting.

Major Courses

ACCT 301	Financial Accounting I ¹	3
ACCT 302	Financial Accounting II	3
ACCT 351	Accounting Systems	3
ACCT 353	Cost Accounting ¹	3
ACCT 403	Federal Taxation I ¹	3
ACCT 451	Auditing Theory and Practices	3
Elective in business, upper-division		3
Electives in accounting, upper-division		6
Total Credits		27

¹ A student who does not pass ACCT 301 Financial Accounting I, ACCT 353 Cost Accounting, or ACCT 403 Federal Taxation I within three attempts will not be allowed to take the class for a fourth.

In order to count toward the Bachelor of Accountancy, upper-division transfer courses in accounting

1. must have been taken at an institution with AACSB Accounting accreditation or
2. be part of the New Mexico Business Articulation Matrix.

Accounting - Master of Accountancy

The MAcc program is recommended for those students wishing to fulfill the 150-hour education requirement which most states, including New Mexico, have legislated as a requirement for taking the Uniform CPA Examination.

Graduate assistantships are available for a limited number of qualified students. Interested persons are urged to apply well within the deadlines set by the Graduate School. Inquiries should be addressed to the Director.

Admission requirements of the Graduate School must be met before the applicant may be admitted to the Master of Accountancy program. Consideration for admissions to the Master of Accountancy program is dependent on an applicant's undergraduate record and score on the Graduate Management Admissions Test (GMAT). Specifically, an applicant's undergraduate GPA is multiplied by a factor of 200 and the result is added to his/her GMAT score. The required total is 1100. Applicants scoring between 1000 and 1100 will be admitted to the program only with approval of the MAcc Admissions Committee. The minimum acceptable GMAT score is 400. An acceptable score on the GMAT should be submitted at least one month prior to the student's first enrollment unless the student meets one of the GMAT waivers listed below.

In addition to the aforementioned entrance requirements, an applicant's GPA in 7 upper division accounting prerequisites must be at least 3.0. For those students not receiving their undergraduate accounting degree at NMSU, it is expected that substantially all of the accounting prerequisite classes be from an AACSB accredited business school or the application will need to be approved by the MAcc Admissions Committee. In this case the Admissions Committee may require that some of these prerequisite courses be retaken at an AACSB institution such as NMSU.

All grades, including those from the first attempt at repeated classes, will be used to compute upper division accounting prerequisite grade point averages to determine admission to the graduate program. At the suggestion of any faculty member, the MAcc Admissions Committee will review the application of a student whose potential might not be accurately reflected by this calculation.

GMAT Waivers

The GMAT requirement is waived for those who:

1. Are graduates of an undergraduate program in accounting from a US AACSB accredited business school with at least a 3.25 GPA overall and a 3.25 GPA in their eight upper division accounting courses; or
2. Are graduates of NMSU's undergraduate accounting program with at least a 3.25 GPA overall and a 3.0 GPA in six core upper division accounting classes; or
3. Hold a post baccalaureate degree (such as MBA, MS, MA, JD) from an approved, AACSB-accredited US university with a minimum 3.0 GPA in graduate course work.

Candidates for the Master of Accountancy degree who have an undergraduate degree in accounting must successfully complete a minimum of 30 graduate credits. Qualifying NMSU undergraduate accounting students can apply to have two graduate courses count for their undergraduate program as well as their graduate program. Candidates with an undergraduate degree in a field other than accounting must complete additional prerequisite work dependent upon previous

courses taken. In any case, all candidates must present or fulfill the following requirements:

Foundation Courses

These courses are required of every student unless they can be waived. As a general policy, the courses upon which waivers are claimed must have been taken within seven years of enrollment in the program with a grade of B or better. A final decision regarding a waiver is based on an evaluation of each student's total educational and professional background.

(for a description of these courses, see the New Mexico State University Catalog)

Foundation Courses

ACCT 221	Financial Accounting	3
ACCT 222	Management Accounting	3
BCIS 338	Business Information Systems I	3
BCIS 485	Enterprise Resource Planning	3
BLAW 316	Legal Environment of Business	3
ECON 251G	Principles of Macroeconomics	3
ECON 252G	Principles of Microeconomics	3
FIN 341	Financial Analysis and Markets	3
MGT 309	Human Behavior in Organizations	3
MKTG 303	Principles of Marketing	3
A ST 251G	Statistics for Business and the Behavioral Sciences	3
or A ST 311	Statistical Applications	
Total Credits		33

Accounting and Related Prerequisites (21 Credits)

In addition to the foundation requirements, each student must present or complete the equivalent of an undergraduate major in accounting. This requires, at a minimum, 21 credits of accounting above the elementary level.

No coursework applied toward the MAcc degree, including the foundation requirements and the undergraduate accounting prerequisites, may be taken on an S/U basis.

Core and Other Courses (30 Credits)

Core Courses

Each student must complete 21 credits in accounting courses numbered above 520. These courses must include a research class (either ACCT 555 Federal Tax Research or ACCT 564 Financial Accounting Research) and Ethics in Accounting (ACCT 559 Ethics and Professionalism in Accounting) unless a student has already taken an equivalent course. In addition, three of the credits may be in upper division undergraduate elective accounting courses numbered 450 or higher. Other specific courses to be completed by each candidate will be determined in the advisement process.

Other Courses

All students must complete a total of 9 additional credits in other courses. Three of the credits must be ACCT 510 Technical and Professional Communication for Accountants, and the rest must be

from the approved list of electives or a waiver must be received to take a course not on the list. Neither ACCT 503 Accounting for Managers nor any course fulfilling the foundation requirement may be included. Any student wishing to be waived from any of the above requirements may submit a petition in writing to the MAcc Director. Each request will be considered individually by the MAcc Committee.

General

The Graduate School requires that students maintain a grade-point average of at least 3.0 in all courses taken as a graduate student, as well as a 3.0 grade-point average in all graduate courses taken as a graduate student at NMSU. The Department of Accounting and Information Systems requires, in addition, that every candidate for the MAcc degree maintain at least a 3.0 grade-point average in all accounting courses used to satisfy the core and elective course requirement. MAcc students may not retake 500-level accounting courses for which they have previously received a grade without approval of the MAcc Admissions Committee.

Comprehensive Examination

Satisfactory performance on a comprehensive examination or similar assignment is required for the degree.

Thesis: No thesis is required; however, under special approval, a candidate may elect to write a thesis under ACCT 599 Master's Thesis. Up to 6 credits may be earned for the thesis.

Admission to Master of Accountancy

Class registration in any Accounting course numbered above ACCT 503 Accounting for Managers requires

1. prior full admission to the MAcc program, or
2. prior consent of the Director of the MAcc program.

Accounting - Undergraduate Minor

To obtain a minor in Accounting, a student must complete 18 or more credit hours of approved course work in Accounting (ACCT), of which at least 12 hours are in courses numbered 300, or higher. All courses for the minor must be completed with a grade of C- or better. At least 12 credits must be completed at NMSU. This minor is not open to majors in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.

Required Courses

ACCT 221	Financial Accounting	3
ACCT 222	Management Accounting	3
ACCT 301	Financial Accounting I	3
Select three from the following:		9
ACCT 302	Financial Accounting II	
ACCT 351	Accounting Systems	
ACCT 353	Cost Accounting	
ACCT 403	Federal Taxation I	
ACCT 451	Auditing Theory and Practices	
ACCT 455	Federal Taxation II	
ACCT 456	Accounting for Nonprofit Organizations	
ACCT 460	Fraud Examination and Prevention	
BCIS 485	Enterprise Resource Planning	
Total Credits		18

Of the 12 hours of upper-division Accounting classes required for the minor, a minimum of 6 must be taken at NMSU. At least 12 credit hours must be completed at the NMSU College of Business. To count toward the minor, upper-division transfer courses must have been taken at an institution with AACSB Accounting accreditation.

Enterprise Systems - Undergraduate Minor

To obtain a minor in Enterprise Systems, a student must complete 18 or more credit hours of approved course work. A cumulative grade point average of at least 2.0 over the 18 hours must be earned. At least 12 credits must be completed at NMSU. This minor is not open to majors in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.

Required Courses

ACCT 351	Accounting Systems	3
BCIS 485	Enterprise Resource Planning	3
BCIS 482	Management of Information Security	3
FIN 360	Financial Information Technology	3
Select one from the following:		3
MGT 351	Supply Chain Management	
MGT 344	Production and Operations Management	
MGT 466	Managing Electronic Commerce: A Business Models Perspective	
Select one from the following:		3
ACCT 353	Cost Accounting	
MGT 345V	Quality and Competitiveness: An International Perspective	
MGT 470	Project Management in Organizations	
I B 458	Comparative International Management	
FIN 475	International Managerial Finance	
Total Credits		18

Information Systems - Bachelor of Business Administration

Every candidate for this major must fulfill the following requirements in addition to the general education common core, College of Business foundation and business core (p. 414), Viewing a Wider World requirements and general electives.

In the upper-division core IS majors must take ECON 405 Introductory Econometrics, as their ECON or A ST elective.

Major Courses

BCIS 350	Information Systems Analysis and Design	3
BCIS 475	Database Management Systems	3
ICT 377	Computer Networking I	3
ICT 477	Computer Networking II	3
ICT 339	Introduction to Digital Forensics and Incident Response	3
BCIS 480	E-Commerce Security	3
BCIS 482	Management of Information Security	3

BCIS 490	Selected Topics	3
Total Credits		24

Please note that some of the courses listed may have a prerequisite which would require a student to take an additional course. Substitutions for some of these courses may be considered if a student makes this request to the department.

Information Systems - Graduate Minor

This minor is for master's-level students who are not in the Masters of Business Administration (MBA) program. Students in the MBA program may choose a concentration in Information Systems (see the Business Administration (p. 422) section).

To obtain a graduate minor in Information Systems (IS) students must satisfy the requirements as stated in the Graduate Catalog for a minor at the master's level. For it to appear on the transcript, the student must list the minor on the Program of Study and Committee for Master's Student (Application for Admission to Candidacy) and have it signed by the head of the department offering the minor.

Requirements

The minor requires a minimum of 9 credits of graduate work.

Requirements

BCIS 550	Information Systems Analysis and Design	3
BCIS 575	Database Management Systems	3
Select 3 credits from the following:		3
BCIS 580	E-Commerce Security	
BCIS 582	Management of Information Security	
BCIS 585	Enterprise Resource Planning & Business Processes	
BCIS 590	Special Topics	
Total Credits		9

Information Systems - Undergraduate Minor

To obtain a minor in Information Systems (IS), a student must complete 18 or more credit hours of approved coursework in IS, of which at least 12 hours are in courses numbered 300 or higher. A cumulative grade point average of at least 2.0 over the 18 hours must be earned. At least 12 credits must be completed at NMSU. This minor is not open to majors in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.

Required Courses

BCIS 338	Business Information Systems I	3
BCIS 350	Information Systems Analysis and Design	3
BCIS 482	Management of Information Security	3
Select 9 credits from the following:		9
ACCT 351	Accounting Systems	
BCIS 475	Database Management Systems	
BCIS 480	E-Commerce Security	

BCIS 485	Enterprise Resource Planning
BCIS 490	Selected Topics
Total Credits	18

Business Administration

Graduate Program Information

The Master of Business Administration (MBA) program is a professional program designed to provide students with a solid background in business practices and the problem-solving and people skills needed to become successful leaders in the global business environment. Program graduates are prepared for administrative or managerial positions in a wide variety of organizations, both private and governmental. The business and accounting programs at NMSU, including the MBA program, are accredited by AACSB International - The Association to Advance Collegiate Schools of Business. The MBA program is offered in a traditional classroom with some online delivery and in a cohort-based distance program with a synchronous online component. Details are available at <http://business.nmsu.edu/mba> (<http://business.nmsu.edu/mba>).

The Ph.D. program in Business Administration offers the opportunity to specialize in either Marketing or Management.

Degrees for the Department

Business Administration - Master of Business Administration (p. 424)

Engineering/MBA Program – Dual Degree (p. 425)

Business Administration - Doctor of Philosophy (p. 423)

R. Adkisson, Ph.D. (Nebraska)– economic development, public finance, institutional economics; T. R. Adler, Ph.D. (Cincinnati)– policy and strategy, collaborative networks, information systems; P. G. Benson, Ph.D. (Colorado State)– international human resource management, wage and salary administration; M. J. Billiot, D.B.A. (Mississippi State, C.P.A.)– managerial accounting; J. W. Bishop, Ph.D. (Virginia Tech)– human resource management and organizational behavior; L. Blank, Ph.D. (Tennessee)– micro economics, economics of regulated utilities; D. M. Boje, Ph.D. (Illinois)– organizational behavior, storytelling, organizational change; K. Brook, Ph.D. (Texas)– money and banking, macroeconomic theory; G. Clarkson, J.D., D.B.A. (Harvard)– American Indian law, tribal economic development, intellectual property strategy, business law; R. Clemons, Ph.D. (Texas A&M)– C.P.A., taxation; N. H. Compton, J.D. (Emeritus); W. Crawford, Ph.D. (Alabama)– organizational behavior, human resources; B.F. Daily, Ph.D. (Emeritus); D. L. Daniel, Ph.D. (Southern Methodist)– non parametrics; M.E. de Boyrie, Ph.D. (Florida International)– international finance and trade issues; P. W. Dorfman, Ph.D. (Emeritus); C. E. Enomoto, Ph.D. (Texas A&M)– microeconomic theory; C. A. Erickson, Ph.D. (Arizona State)– monetary theory, macroeconomics; C. Flinchbaugh, Ph.D. (Kansas)– Organizational behavior, human resources; R. D. Fortin, Ph.D. (Kansas)– corporate finance and investments; C. Gard, Ph.D. (University of Washington)– biostatistics; D. A. Gegax, Ph.D. (Wyoming)– managerial economics, microeconomic theory; W. R. Gould, Ph.D. (North Carolina State)– biological sampling, wildlife and fisheries estimation; M. Holt, J.D. (University of New Mexico)– business law, employment law; M. Hyman, Ph.D. (Purdue)– marketing theory and research; I.M. Jasso, Ph.D. (Houston)– advertising, strategy; M. Jun, Ph.D. (Georgia State)– production and operations management; J. Kreie, Ph.D. (Arkansas)– information systems; L. LaPlue, Ph.D. (Tennessee) – international

and environmental economics.; Y. F. Lee, Ph.D. (Southern Illinois-Carbondale)– international finance, international trade, international monetary system, economic development; J. Loveland, Ph.D. (Emeritus); R. Macy, Ph.D. (Oregon)– strategic management, entrepreneurship; K. J. Martin, Ph.D. (Purdue)– financial management, corporate control; R. McFerrin, Ph.D. (Texas A&M)– microeconomics, macroeconomics, economic history; J. T. McGuckin, Ph.D. (Emeritus); K. D. Melendrez, Ph.D. (Arizona)– financial accounting; S. K. Mills, Ph.D. (Emeritus); C. Mora-Monge, Ph.D. (Toledo)– supply chain management, information systems; J. A. Nelson, Ph.D. (Missouri)– information systems; M. Niculescu, Ph.D. (University of Cincinnati)– modeling consumer behavior; R. Oliver, Ph.D. (New Mexico State)– information systems; N. A. Oretskin, J.D. (Case Western School of Law)– contract law/negotiation; C. R. Payne, Ph.D. (Brigham Young)– marketing and consumer behavior; J. T. Peach, Ph.D. (Texas)– quantitative economics, economic development; R. T. Peterson (Emeritus); J. Tim Query, Ph.D. (Georgia)– insurance, finance, risk management; S. Rahman, Ph.D. (Texas-El Paso)– personal financial planning, financial analysis and markets; C. Ricketts, Ph.D. (Mississippi State)– labor, health, development; G. A. Rosile, Ph.D. (Pittsburgh)– narrative research, organizational studies; H. Sankaran, Ph.D. (Houston)– corporate finance, investments; E. T. Sautter, Ph.D. (Emeritus); E. A. Scribner, Ph.D. (Emeritus); C. Seipel, Ph.D. (Oklahoma State)– C.P.A.-financial accounting, auditing; W.L. Smith, Ph.D. (New Mexico State)– C.P.A.- taxation; C. Sroka, Ph.D. (Ohio State)–count data models; R. L. Steiner, Ph.D. (Oklahoma State)– likelihood methods, discrete distributions; J. E. Teich, Ph.D. (Emeritus) P. L. Tunnell, Ph.D. (Oklahoma State)– C.P.A.-taxation; D. M. VanLeeuwen, Ph.D. (Oregon State)– statistics; B. Widner, Ph.D. (Colorado State)– urban/regional, public finance, development; Y. Zhang, Ph.D. (Texas Tech) financial accounting

B A 104. Introduction to Business

3 Credits

Survey and integration of functions in business organizations within their social and economic environment. Community Colleges only.

B A 105. Special Topics

1-3 Credits

Current topics in business and economics.

B A 202. Small Business Enterprise

3 Credits

Appraisal of business functions within the framework of a small business organization.

B A 291. Business Administration and Economics Internship and Cooperative Education I

1-3 Credits

Introduction and applications of the principles of business administration and economics. Registration in one course allowed per co-op work phase; a minimum of 12 work weeks is required. Open only to students in the College of Business. Option of S/U or a grade. The amount of academic credit (1-3 cr.) will be determined by the academic experience, and not by the work experience.

B A 305. Leadership Training for COB Ambassadors

1 Credit

Leadership development for volunteers serving as COB student ambassadors, focusing on COB undergraduate business degree programs, NMSU student services, public speaking and public relations.

B A 391. Business Administration and Economics Internship and Cooperative Education II**1-3 Credits**

Applications of the principles of business administration and economics. Registration in one course allowed per co-op work phase; a minimum of 12 work weeks is required. Open only to students in the College of Business. Option of S/U or a grade. The amount of academic credit (1-3 cr.) will be determined by the academic experience and not by the work experience.

B A 490. Selected Topics**3 Credits**

Prerequisites vary according to the seminar being offered.

B A 498. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with the prior approval of the department head. A maximum of 3 credits may be earned.

Prerequisite: junior or above standing and consent of instructor.

B A 500. Macroeconomic Essentials**1 Credit**

Macroeconomic theory and public policy, national income concepts, unemployment, inflation, economic growth and international payment problems. Restricted to: MBA Major majors majors.

B A 501. Quantitative Tools for the MBA**1 Credit**

An overview of critical topics in math and statistics that will provide a quantitative foundation for students entering the Master of Business Administration program. Admission to the MBA program.

B A 550. Special Topics**3 Credits**

Interdisciplinary seminar in selected current business topics.

Prerequisite(s): Prerequisites vary according to the seminar being offered.

B A 590. Professional Paper/Presentation**3 Credits**

Paper written in close coordination with sponsoring professor and presented near the end of the student's final semester in the M.B.A. program. The paper will consist of a professional business report, a case study of a business or organization or a research report. Restricted to: MBA majors.

Prerequisite(s): Minimum of 3.0 average in: ACCT 503, BLAW 502, FIN 503, and MKTG 503 or AEEC 551.

B A 598. Special Research Programs**1-3 Credits**

Individual investigations either analytical or experimental. A maximum of 3 credits may be earned.

Prerequisite: consent of instructor.

B A 599. Master's Thesis**15 Credits**

Thesis.

Business Administration - Doctor of Philosophy

Concentration: Management

Phone: (575) 646-1201

<http://business.nmsu.edu/academics/graduate-programs/mgt-phd/>

The College of Business offers a program leading to a PhD in Business Administration with a concentration in Management. Our program meets the requirements of AACSB international by providing students with advanced management-related theoretical, research and applied knowledge and skills. We are committed to educating researchers, teachers, and scholars who will lead and shape business and organizational life in the decades to come. We prepare you to understand the complexities of business and its social and international contexts while you develop a specialized area of expertise. Our program is flexible in order to align programs of study with job opportunities and students' interest areas. Research skills are developed through course work and mentoring relationships, as you will work with faculty to pursue joint research according to your interest and faculty members' expertise. Our faculty prepare students for academic research and teaching careers in managerial and organizational sciences; consulting careers with industrial, governmental, health, or educational institutions; or leadership careers in organizational management and administration.

Concentration: Marketing

Phone: (575) 646-3341

<http://business.nmsu.edu/academics/graduate-programs/mktg-phd/>

The College offers a program leading to a Ph.D. degree. The faculty of the PhD Program in Business Administration is committed to training researchers and educators who will shape business scholarship, practice and pedagogy. The program emphasizes preparing candidates to understand the complexities of modern business while they develop a specialized area of expertise in marketing or management. The PhD in Business Administration provides graduates with the opportunity to pursue a variety of career paths within academia and within industry. Currently concentrations are offered in management and marketing, and each admits students independently.

Program Requirements

- demonstrate competency in statistics and research methods;
- complete studies in a major field of concentration chosen from the departments of management or marketing in the College of Business;
- complete studies in a minor field of concentration or interest area that supports the student's research, teaching and/or career goals;

- pass qualifying and comprehensive exams; and
- complete and successfully defend a doctoral dissertation.

Business Administration - Master of Business Administration

The Master of Business Administration (MBA) program is a professional program designed to provide students with a solid background in business practices and the problem-solving and people skills needed to become successful leaders in the global business environment. Program graduates are prepared for administrative or managerial positions in a wide variety of organizations, both private and governmental. The business and accounting programs at NMSU, including the MBA program, are accredited by AACSB International - The Association to Advance Collegiate Schools of Business.

The MBA program is offered in a traditional classroom with some online delivery and in a cohort-based distance program with a synchronous online component.

Details are available at <http://business.nmsu.edu/mba> (<http://business.nmsu.edu/mba>).

Admissions

Applicants must meet the basic admission requirements of the Graduate School before they are considered for admission to the MBA program. To be considered for admission to the MBA program, applicants must have:

1. completed an undergraduate degree with a GPA of at least 3.5 from an institution with business accreditation by AACSB International or ACBSP, or
2. completed the Graduate Management Admission Test (GMAT) with a minimum score of 400 and a combined GMAT score and undergraduate GPA such that $(\text{GPA} \times 200) + \text{GMAT}$ is greater than or equal to 1050, or
3. received a graduate degree from a regionally accredited U.S. college or university, or
4. completed at least four years of relevant, full-time, post-degree, professional work experience with an undergraduate GPA of at least 3.25 from an institution with business accreditation by AACSB International or ACBSP.

If required, official GMAT scores must be submitted to the MBA Program Office at least one month prior to initial enrollment in the program. A maximum of 9 credit hours of the required MBA courses may be completed prior to the student's acceptance into the MBA degree program.

Background Knowledge

Although the MBA program is designed to encourage participation by students with a variety of educational backgrounds, the curriculum is fast paced. As a consequence, a minimum level of background knowledge is expected of all entering students, and those who lack the necessary background in any of the knowledge areas will be required to make up their deficiencies early in the program. Students may complete no more than 9 credits of required MBA courses prior to completion of the background knowledge courses.

Background knowledge may be demonstrated by successful completion (with a grade of A or B) of undergraduate courses in managerial

accounting, financial accounting, macroeconomics, finance, marketing, statistics and calculus. At NMSU, the relevant courses are

ACCT 221	Financial Accounting	3
ACCT 222	Management Accounting	3
ECON 251G	Principles of Macroeconomics	3
FIN 341	Financial Analysis and Markets	3
MKTG 303	Principles of Marketing	3
A ST 251G	Statistics for Business and the Behavioral Sciences	3
or STAT 251G	Statistics for Business and the Behavioral Sciences	
or A ST 311	Statistical Applications	
MATH 142G	Calculus for the Biological and Management Sciences	3

Knowledge of each of these subjects may also be demonstrated by completing examinations as designed by the College of Business or by completing intensive one-credit courses in the summer. For more information on intensive courses and examinations, contact the MBA Office.

Program Requirements (36 credits)

The MBA program consists of twelve courses beyond the background knowledge requirements. Eleven are required courses:

Required Courses

ACCT 503	Accounting for Managers	3
BCIS 502	Business Information Systems	3
BLAW 502	Legal Environment of Business	3
ECON 503	Managerial Economics	3
FIN 503	Financial Management	3
MGT 502	Operations Management	3
MGT 503	Organizational Behavior and Management Processes	3
MGT 512	Quantitative Analysis for Business Decisions	3
MGT 590	Strategic Management	3
MKTG 503	Marketing Management	3
B A 590	Professional Paper/Presentation	3
Elective course ¹		3
Total Credits		36

¹ This elective must be selected from the approved course list on the MBA web page.

The Graduate School requires that students maintain a grade point average of at least 3.0 in all courses taken as a graduate student at NMSU. The MBA program requires, in addition, that every candidate for the MBA degree must graduate with at least a 3.0 grade point average in all courses required for the basic MBA degree.

The following course sequencing requirements must be satisfied:

1. B A 590 Professional Paper/Presentation must be completed during the final term of the student's program and is only open to students who have been accepted into the MBA degree program. Effective with students entering in summer 2011, ACCT 503 Accounting for Managers, BLAW 502 Legal Environment of Business, FIN 503 Financial Management and MKTG 503 Marketing Management must

be completed prior to enrollment in B A 590 Professional Paper/Presentation.

2. MGT 590 Strategic Management must be completed at the end of the student's program of study and is only open to students who have been accepted into the MBA degree program. All MBA coursework other than B A 590 Professional Paper/Presentation must be completed prior to or during the same term as MGT 590 Strategic Management.

Students requesting transfer credit for any graduate courses taken before admission to the MBA program must submit appropriate written justification, including course descriptions, syllabi, transcripts, etc. Up to nine credits of transfer work can be applied to meet MBA requirements if the credits were earned in a program accredited by AACSB International. Transfer credits for courses taken after admission to the program are generally not permitted, but advance approval should be requested and may be granted in exceptional situations.

Oral defense of the paper written in fulfillment of the requirements of B A 590 Professional Paper/Presentation will constitute the final examination as required by the Graduate School and will be scheduled and completed in accordance with timetables prescribed by, and other requirements of, the Graduate School. A thesis is not required. With special approval, however, a degree candidate may elect to write a thesis with a least 6 credit hours earned under B A 599 Master's Thesis in lieu of B A 590 Professional Paper/Presentation.

MBA students may elect to pursue one of several MBA specializations as described below.

Concentration: Agribusiness

Students who want to specialize in Agribusiness must take the following set of five AEEC courses in substitution of five courses included in the above list of required MBA courses.

AEEC 511	Advanced Futures and Options Markets	3
AEEC 520	International Agricultural Trade Theory and Policy	3
AEEC 526	Global Food Supply Chain Management	3
AEEC 551	Advanced Agribusiness Marketing	3
AEEC 556	Advanced Agribusiness Management	3
Total Credits		15

The five AEEC courses collectively substitute for the following five required MBA courses:

ECON 503	Managerial Economics	3
MGT 502	Operations Management	3
MGT 512	Quantitative Analysis for Business Decisions	3
MKTG 503	Marketing Management	3
Elective course (from the approved list)		3
Total Credits		15

Students in the concentration in Agribusiness who have not previously taken a course in Agricultural Policy will be required to take AEEC 545 Advanced Agricultural Policy prior to taking the five concentration courses.

Concentration: Finance

MBA students who want to specialize in Finance must complete the following four Finance courses. These courses can be used as substitutes for MGT 512 and BA 590.

Required Courses

FIN 535	Investment Concepts	3
FIN 545	Money and Capital Markets	3
FIN 555	Derivative Markets and Securities	3
FIN 566	Advanced Financial Management	3
Total Credits		12

Concentration: Information Systems

Students who want to specialize in Information Systems must take additional coursework beyond that required to complete the MBA degree program. BCIS 502 Business Information Systems is a required MBA course and a prerequisite for each of the courses in the concentration.

Any of these courses may also be used to fulfill the MBA elective requirement.

Required Courses

Select four from the following:		12
BCIS 550	Information Systems Analysis and Design	
BCIS 575	Database Management Systems	
BCIS 580	E-Commerce Security	
BCIS 582	Management of Information Security	
BCIS 585	Enterprise Resource Planning & Business Processes	
Total Credits		12

Students are encouraged to seek advising from the MBA Office or the Information Systems faculty in making course selections.

Concentration: Public Utility Regulation

The concentration in Public Utility Regulation consists of the following courses. One of these courses will serve as the elective in the MBA program and two of the courses will substitute for courses MGT 512 and B A 590 in the standard MBA program (because the learning objectives of the utility regulation courses meet the learning objectives of the two basic MBA courses).

Required Courses

ECON 571	Regulatory Policy and Industry Analysis: Electricity I	3
ECON 572	Regulatory Policy and Industrial Analysis: Water and Natural Gas	3
ECON 573	Regulatory Policy and Industry Analysis: Electricity II	3
ECON 574	Advanced Seminar Regulatory Policy and Industry Analysis	3
Total Credits		12

Engineering/MBA Program – Dual Degree

Highly motivated undergraduate engineering students who would like to apply their quantitative skills and technical expertise to the business environment should consider the dual degree program offered through the College of Engineering and the College of Business. Undergraduate students who are accepted into this program can, with full time enrollment and careful scheduling of their coursework, complete the MBA degree requirements in as little as one year beyond completion of the BS degree. Information regarding the dual degree program may be obtained from the College of Engineering or the MBA Program Office (GU 114).

Economics, Applied Statistics, and International Business

Undergraduate Program Information

The Department of Economics, Applied Statistics, and International Business offers undergraduate degrees in two majors. Students can earn a Bachelor of Business Administration (BBA) in either economics or international business. Economics majors also have the opportunity to earn a Bachelor of Arts degree. Economics majors work in business, government, and the non-profit sector. The economics major is also a good choice for students who plan to attend graduate school in economics, law, business and other areas. In addition the department teaches economics and applied statistics to support the college's business core and the university's general education requirements.

Graduate Program Information

The Department of Economics, Applied Statistics and International Business cooperates with the Department of Agricultural Economics and Agricultural Business in offering graduate programs in economics, agricultural economics and economic development. The programs are jointly administered by faculty from the two departments. The objective of the master's program is to prepare students for professional positions in business, government, or research institutions and/or for further graduate studies. The Department of Economics, Applied Statistics and International Business offers a Master of Arts in economics with concentrations in regulatory economics, policy analysis and econometrics. For more information on the Master of Science degree in agricultural economics, refer to the Agricultural Economics (p. 91) section in this catalog. The objective of the Doctor of Economic Development is to provide advanced training in applied economic development.

Graduate Study in Business Administration

The Department of Economics, Applied Statistics and International Business cooperates with other departments of the College of Business to offer a Master of Business Administration degree and a PhD in Business Administration. Within the PhD program, the department offers a minor area of study and provides statistics courses to support the doctoral program. More information about these programs is available in this catalog under College of Business (p. 414).

Degrees for the Department

Economics - Bachelor of Art in Economics (p. 432)

Economics - Bachelor of Business Administration (p. 433)

International Business - Bachelor of Business Administration (p. 435)

Applied Statistics - Master of Science (p. 431)

Economics - Master of Arts (p. 434)

Public Utility Regulation and Economics - Graduate Certificate (p. 436)

Economics - Doctor of Economic Development (p. 434)

Minors for the Department

Economics - Undergraduate Minor (p. 435)

International Business - Undergraduate Minor (p. 436)

Applied Statistics - Graduate Minor (p. 431)

Economics - Graduate Minor (p. 434)

Professor, Christopher Erickson, Interim Department Head

Department of Economics, Applied Statistics and International Business:

R. Adkisson, Ph.D. (Nebraska)– international economics, public finance, economic development; B. Bai, MS (New Mexico State University)-Applied Statistics; Larry Blank, Ph.D. (University of Tennessee, Knoxville)– microeconomic theory, managerial economics and regulatory economics; K. Brook, Ph.D. (Texas-Austin)– macroeconomic theory, monetary policy; D. L. Daniel, Ph.D. (Southern Methodist)– nonparametrics; C. Enomoto, Ph.D. (Texas A&M)– econometrics, economic theory; C. A. Erickson, Ph.D. (Arizona State)– monetary theory, macroeconomics; C. Gard, Ph.D. (University of Washington)– biostatistics; D. A. Gegax, Ph.D. (Wyoming)– public utility economics, industrial organization; K.R. Geisler, Ph.D. (Nevada)– regional, applied micro, environmental; W. R. Gould, Ph.D. (North Carolina State)– biological sampling, wildlife and fisheries estimation; L. LaPlue (Tennessee) – international and environmental economics; Y. F. Lee, Ph.D. (Southern Illinois-Carbondale)– international finance, international trade, international system, economic development; Randy McFerrin, Ph.D. (Texas A & M University)– micro theory, principles and American economic history; J. T. Peach, Ph.D. (Texas-Austin)– quantitative economics, border studies, economic development; C. Ricketts, Ph.D. (Mississippi State)– labor, health, development; C. Sroka (Ohio State) – count data models; R. L. Steiner, Ph.D. (Oklahoma State)– likelihood methods, discrete distributions; D. VanLeeuwen, Ph.D. (Oregon State)– statistics; B. Widner, Ph.D. (Colorado State)– urban/regional, public finance, development; D.L. Clason, (Emeritus) Ph.D. (Kansas State); M. Ellis (Emeritus), Ph.D. (California-Riverside); B. N. Matta, (Emeritus) Ph.D. (Texas at Austin); J. T. McGuckin (emeritus), Ph.D. (Wisconsin-Madison); A.V. Popp, (Emeritus), Ph.D., (Northern Illinois); D.B. Smith, (Emeritus), Ph.D. (Nebraska); E. S. Willman, (Emeritus) Ph.D. (Indiana)

A ST 251G. Statistics for Business and the Behavioral Sciences 3 Credits

Techniques for describing and analyzing data; estimation, hypothesis testing, regression and correlation; basic concepts of statistical inference. Same as STAT 251G.

Prerequisite: C- or better in MATH 120.

A ST 311. Statistical Applications 3 Credits

Techniques for describing and analyzing economic and biological data; estimation, hypothesis testing, regression and correlation; basic concepts of statistical inference.

Prerequisite(s): MATH 120.

A ST 450. Special Topics 1-4 Credits

Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

A ST 456. Statistical Methods and Data Analysis**3 Credits**

Methods for sampling and estimation; analysis of variance and elementary experimental designs; linear regression and correlation; multiple regression, variable selection methods and residual analysis; introduction to statistical packages.

Prerequisite(s): A ST 251, A ST 311, or equivalent.

A ST 498. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with prior approval of the department head. Maximum of 3 credits per semester and a grand total of 3 credits.

A ST 503. SAS Basics**2 Credits (1+2P)**

An introduction to the statistical software package, SAS, and its utilization in an interactive computing environment, primarily PC/SAS. Provides a fundamental understanding of the structure of SAS, its data management capabilities, and how to invoke a variety of descriptive and simple statistical SAS procedures.

Corequisite(s): A ST 505, or consent of instructor.

A ST 504. Statistical Software Applications**1 Credit**

Optional Computing course to accompany A ST 506. Computer analysis of topics covered in A ST 505 and A ST 506.

Prerequisite(s): A ST 503 or consent of instructor.

Corequisite(s): A ST 506.

A ST 505. Statistical Inference I**4 Credits (3+2P)**

A qualitative introduction to the concepts and methods of statistical inference. Sampling, frequency distributions (z , t , x^2 , F), estimation, and testing. One-way analysis of variance. Simple linear regression.

Prerequisite: consent of the instructor.

A ST 506. Statistical Inference II**3 Credits (2+2P)**

Introduction to multiple regression; the analysis of variance for balanced studies; multiple comparisons, contrasts, factorials, experimental designs through split plots.

Prerequisite: A ST 505 and the ability to use a standard computer package such as SAS (may be satisfied by A ST 503) or consent of instructor.

A ST 507. Advanced Regression**3 Credits**

Examination of multiple regression; residual analysis, collinearity, variable selection, weighted least squares, polynomial models, and nonlinear regression: linearizable and intrinsically nonlinear models.

Prerequisites: A ST 503 and A ST 505 or consent of instructor.

A ST 508. Analysis of Advanced Designs and Related Topics**3 Credits**

Complete and incomplete block designs; fixed, mixed, and random models; unbalanced data; analysis of covariance; nested experiments; fractional factorials.

Prerequisite(s): A ST 503 and A ST 506; or consent of instructor.

A ST 515. Statistical Analysis with R**3 Credits**

Introduction to R data types, basic calculations and programming, data input and manipulation, one and two sample tests, ANOVA, regression, diagnostics, graphics, probability distributions, and basic simulations in the R software environment.

Prerequisite(s): A ST 505 or equivalent with consent of instructor.

A ST 521. Sampling Methodology**3 Credits (3+2P)**

Methodology of sampling finite populations using design-based (simple random, stratified, systematic, cluster, and multistage), model-based (regression and ratio estimators), and adaptive sampling. Properties of estimators under all designs are discussed.

Prerequisite(s): Either A ST 505 or A ST 565, or consent of instructor.

A ST 522. Survey Sampling**2 Credits (3+2P)**

Techniques of survey sampling (mail questionnaire and telephone surveys) applicable to social sciences. Techniques of questionnaire preparation and methods of evaluating results are presented.

Prerequisite: A ST 521, or consent of instructor.

A ST 523. Biological Sampling (s)**3 Credits**

Methods of sampling biological populations: area frame, quadrant, line intercept, line transect, and mark-recapture. May be repeated up to 3 credits.

Prerequisite(s): A ST 505 or consent of instructor.

A ST 545. Time Series Analysis and Applications**3 Credits**

A systematic exposition of the methods for analyzing, modeling, and forecasting time series. Emphasizes underlying ideas and methods rather than detailed mathematical derivations, using SAS, BMDP, IMSL, and Fortran. May be repeated up to 3 credits.

Prerequisite(s): A ST 503 and A ST 505, or consent of instructor.

A ST 550. Special Topics**1-4 Credits**

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

A ST 551. Introduction to Statistical Consulting**1 Credit**

Consideration of published material in the consulting process. Restricted to majors. Graded S/U.

Prerequisite: consent of instructor.

A ST 552. Advanced Statistical Consulting**1 Credit**

Continuation of A ST 551 with emphasis on dealing with clients in order to identify statistically relevant features of a research study. Restricted to majors. Graded S/U.

Prerequisite: A ST 551.

A ST 553. Practicum in Statistical Consulting**1 Credit**

Supervised experience under the guidance of senior faculty. May be repeated for a maximum of 2 credits. Restricted to majors. Graded S/U.

Prerequisite: A ST 552.

A ST 555. Applied Multivariate Analysis**3 Credits**

Multivariate analysis of linear statistical models, including MANOVA and repeated measures. Analysis of correlation and covariance structures, including principal components, factor analysis, and canonical correlation. Classification and discrimination techniques.

Prerequisite(s): A ST 506 and A ST 504 or consent of instructor.

A ST 565. Statistical Analysis I**4 Credits (3+2P)**

An analytic introduction to the theory and methods of statistical inference. Sampling, frequency distributions (z, t, x², F), estimation, testing, and simulation.

Prerequisite: MATH 291G or consent of instructor.

A ST 566. Statistical Analysis II**4 Credits (3+2P)**

Continuation of A ST 565.

Prerequisite: A ST 565 or consent of instructor.

A ST 567. Applied Linear Models I**3 Credits**

The mean model, including constraints, approach to linear models; nonidentity variance-covariance matrices. Some emphasis on computational aspects and relation to statistical packages.

Prerequisite: A ST 566 or consent of instructor.

A ST 568. Applied Linear Models II**3 Credits**

The relation of full to less-than-full rank linear models; complex data structures, including messy data, empty cells, and components of variance: extensions to categorical data analysis and nonparametric methods. Continues some emphasis on computational aspects.

Prerequisite: A ST 567.

A ST 596. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with prior approval by department head. May be repeated for a maximum of 3 credits.

Prerequisite: consent of instructor.

A ST 598. Special Research Problems**1-6 Credits**

Individual analytical or experimental projects. Restricted to majors. Graded S/U.

A ST 599. Master's Thesis**1-6 Credits**

Thesis.

ECDV 550. Introduction to Local and Regional Development**3 Credits**

Serves as the introductory course in the Doctor of Economic Development program. Overview of the economic development field.

ECDV 590. Special Topics**1-3 Credits (1-3)**

Selected topics in the area of Economic Development. Subtitle reflects content. May be repeated up to 9 credits. Consent of instructor required.

ECDV 596. Individual Study**1-3 Credits (1-3)**

Individual studies directed by consenting faculty with the prior approval of the Department Head. May be repeated up to 6 credits.

ECDV 624. Seminar in Economic Development and the Public Sector**3 Credits**

Explores specific examples of the interaction of public finance and economic development. Students examine actual cases and examples of the use of public finance policy to influence economic development.

Prerequisites: AEEC 522 and AEEC 523.

ECDV 651. Economic Development Theory**3 Credits**

Builds upon a general understanding of microeconomic and macroeconomic theory to focus specifically on theories of economic development at all levels. **Prerequisites:** AEEC 501 and 502

ECDV 661. Regional Economic Modeling I**3 Credits**

Provides an introduction to the basic tools and methods of regional economic development analysis.

Prerequisite(s): AEEC 501, AEEC 502, and AEEC 540.

ECDV 662. Regional Economic Modeling II**3 Credits**

Continuation of ECDV 661 with focus on more advanced tools and methods of regional economic development analysis.

ECDV 664. Population Economics**3 Credits**

Examines the causes and consequences of demographic change. Examines theories of basic demographic processes, population projection and estimation. Consent of instructor required.

ECDV 668. Economic Development Finance**3 Credits**

Focuses on the tools and methods of economic development finance.

ECDV 670. Research in Economic Development**3 Credits**

Intense examination of the academic literature on economic development at all levels.

Prerequisites: ECDV 651, ECDV 661 and ECDV 662.

ECDV 671. Sustainable Economic Development**3 Credits**

Focuses on the interconnections between economic development and the environment. Provides a broad set of tools and ideas related to the impacts of human activities on the environment.

Prerequisites: AEEC 501, AEEC 502 and AEEC 540.

ECDV 673. Research Methods**3 Credits**

An overview of alternative research methods and tools. Students explore quantitative and qualitative research methods as alternatives and complements to statistical methods. Research design, ethics, and presentation are emphasized.

Prerequisites: AEEC 501, AEEC 502 and AEEC 540.

ECDV 681. Urban Economic Development**3 Credits**

Examines causes and consequences of economic change in urban and metropolitan areas. Covers both theory and tools for analysis.

Prerequisites: ECDV 651, ECDV 661 and ECDV 662.

ECDV 682. Rural Development**3 Credits**

Examines causes and consequences of economic change in rural areas, communities and small, open economies. Covers both theory and tools for analysis.

Prerequisites: ECDV 651, ECDV 661 and ECDV 662.

ECDV 683. Seminar in National Economic Development**3 Credits**

Explores specific examples and cases of rural and urban economic development. Involves applied analysis of specific rural and/or urban economic issues/projects.

Prerequisites: ECDV 681 and ECDV 682.

ECDV 685. Seminar in International Economic Development**3 Credits**

Explores specific examples and cases of economic development in an international context. Focuses on the application of theories and methods in prerequisite courses to the problems of nations lagging in economic development.

Prerequisites: AEEC 528, AEEC 520 or ECON 581.

ECDV 692. Seminar in Economic Development**3 Credits**

Seminars in selected topics in economic development. Subtitle reflects content. May be repeated up to 9 credits.

Prerequisite: Completion of at least nine semester hours of ECDV courses.

ECDV 694. Internship**1-9 Credits (1-9)**

Internship in Economic Development. May be repeated up to 9 credits. Restricted to: ECDV majors. S/U Grading (S/U, Audit).

Prerequisite(s): Completion of core requirements of Doctor of Economic Development.

ECDV 699. Doctoral Project**1-9 Credits (1-9)**

Doctoral Project. May be repeated up to 9 credits. Completion of all DED coursework and successful completion of comprehensive exams.

ECON 201G. Introduction to Economics**3 Credits**

Economic institutions and current issues with special emphasis on the American economy.

ECON 251G. Principles of Macroeconomics**3 Credits**

Macroeconomic theory and public policy: national income concepts, unemployment, inflation, economic growth, and international payment problems.

ECON 252G. Principles of Microeconomics**3 Credits**

Microeconomic theory and public policy: supply and demand, theory of the firm, market allocation of resources, income distribution, competition and monopoly, governmental regulation of businesses and unions.

ECON 304. Money and Banking**3 Credits**

Income measurement and determination, monetary and fiscal policies.

Prerequisite: ECON 251G or equivalent, or consent of instructor.

ECON 311. Intermediate Macroeconomic Theory**3 Credits**

Analysis of gross domestic product, the Classical, Keynesian, and Neo-Keynesian theories of income, employment, inflation and growth.

Prerequisite(s): ECON 251G or equivalent.

ECON 312. Intermediate Microeconomic Theory**3 Credits**

Contemporary economic theory with emphasis upon value and distribution.

Prerequisite(s): ECON 252G or equivalent.

ECON 324V. Developing Nations**3 Credits**

Economic analysis of problems related to development of developing nations. Issues such as growth, industrialization, poverty, population, international trade, foreign debt, and international economic relations.

ECON 325V. Economic Development of Latin America**3 Credits**

Economic analysis of problems related to development in Latin America, including the agrarian problem, debt and austerity programs, industrialization, inflation and unemployment, the drug trade, U.S.-Latin American relations, development strategies. Also individual countries problems.

ECON 332. Public Finance**3 Credits**

This course will examine the roles of government in modern, market-oriented, mixed economies. It will examine justifications for government participation in resource allocation, income distribution, and economic stabilization focusing primarily on the fiscal functions of government, taxation and public expenditure. Students will apply basic microeconomic analysis to analyze the impacts of public taxation and expenditures on economic decisions made elsewhere in the economy. In this course the emphasis will be on understanding the workings of public finance in fiscal federalist systems like the United States, but the principles taught will be applicable across other economic systems. **Prerequisites:** ECON 252

ECON 335V. Business and Government**3 Credits**

Relation of government to business through regulation; political, legal, and social implications. Crosslisted with: MGT 335G

ECON 336. Labor Economics**3 Credits**

This course aims at developing students' understanding of how the labor market works. Topics to be covered include: labor supply and demand, wage differentials, wage structure, unemployment, gender issues, labor market discrimination, and migration. May be repeated up to 3 credits.

Prerequisite(s): ECON 252G.

ECON 337V. Natural Resource Economics**3 Credits**

Same as AG E 337V.

Prerequisite: ECON 201 or ECON 252.

ECON 340. American Economic History**3 Credits**

The rise of big business and organized labor, increasing price rigidities, and growing government intervention. Same as HIST 340.

ECON 384V. Water Resource Economics**3 Credits**

Use of economic principles to evaluate current and emerging issues in water resources. Applications focus on use of economic methods of analysis to current policy decisions surrounding agricultural, municipal, industrial, and environmental uses of water. Same as AG E 384V.

Prerequisite: AG E 100 or ECON 252G.

ECON 401. Managerial Economics**3 Credits**

Application of economic theory to problems of business management.

Prerequisite(s): ECON 252G and MATH 142 or equivalent, or consent of instructor.

ECON 404. Collegiate Advisory Board, Federal Reserve**3 Credits**

Students serve on the Collegiate Advisory Board of the El Paso branch of the Federal Reserve Bank of Dallas. Guest speakers provide an overview of the Federal Reserve System, role of monetary policy, and issues facing specific industries in the local, national, and global economies. Students prepare reports, including a final paper, on an assigned industry in the regional or state economy and the current economic performance of their industry. Students must be of junior rank or higher with a GPA of at least 3.5. Consent of Instructor required.

ECON 405. Introductory Econometrics**3 Credits**

Multiple regression and correlation applied to economics and business; inference techniques; significance tests; simultaneous equations, estimation, and problems. May be repeated up to 3 credits.

Prerequisite(s): A ST 251G or STAT 251G or A ST 311 (or equivalent).

ECON 406. The Economics of Sports**3 Credits**

Applying the tools of economic analysis to a particular industry and gaining an in-depth knowledge of the interaction of professional sports teams and leagues with the economy and society. Same as AG E 406.

Prerequisites: one previous course in economics or consent of instructor.

ECON 432V. Economics of Health Care**3 Credits**

Analysis of the allocation of resources in the field of health and medical care.

ECON 449. Open Economy Macroeconomics**3 Credits**

This course studies theoretical and empirical macroeconomics in international dimension. It covers from the fundamental concepts of national income and growth, monetary/fiscal and exchange rate policies, foreign exchange markets, international trade and finance, and regionalization/economic integration to the impact analysis of these macroeconomic fundamentals in the open economy. Crosslisted with: I B 449.

Prerequisite(s): FIN 341 OR ECON 372.

ECON 450. International Economics**3 Credits**

Trade and capital flows between countries, international payments, government policy in balance-of-payments and tariff matters, international organizations. Crosslisted with: I B 450

Prerequisite(s): ECON 251G and ECON 252G.

ECON 457. Mathematical Economics**3 Credits**

Application of mathematical tools, especially the calculus, to economic theory.

Prerequisite: one upper-division economics course.

ECON 489. Senior Economics Seminar**3 Credits**

Seminar primarily for economics majors in their final semester. Provides an opportunity to apply economic theory to a broad variety of topics.

Prerequisite: ECON 371 or ECON 372.

ECON 490. Selected Topics**1-3 Credits**

Current topics in economics. Subject matter to be designated for each semester.

ECON 498. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with the prior approval of the department head. May be repeated for a maximum of 3 credits.

Prerequisite: junior or above standing and consent of instructor.

ECON 503. Managerial Economics**3 Credits**

Theory and application of microeconomics to the management of organizations.

Prerequisite(s): A ST 251G or 311 or equivalent with B or better.

ECON 545. Econometrics II**3 Credits**

Application of statistical techniques to estimation of economic relationships: demand functions, production and cost functions, and macroeconomic equations. May be repeated up to 3 credits.

Prerequisite(s): ECON 251G, ECON 252G, STAT 251G or A ST 311, and AEEC 540.

ECON 550. Special Topics**1-3 Credits**

Seminars in selected current topics in the various areas of economics. Prerequisites vary according to the topic being offered.

ECON 571. Regulatory Policy and Industry Analysis: Electricity I**3 Credits**

Regulatory policy and economic analysis related to the Electric Industry. Topics include: characteristics of a utility and legal justification for regulation; characteristics and functions of a regulatory commission; history and structure of the industry; technology and network design; revenue requirements; cost allocation; and basic retail rate design. May be repeated up to 3 credits.

Prerequisite(s): ECON 252G, FIN 341, or consent of instructor.

ECON 572. Regulatory Policy and Industrial Analysis: Water and Natural Gas**3 Credits**

Regulatory policy and economic analysis related to the Natural Gas and Water industries. Topics include: history and structure of the industry; technology and network design; revenue requirements; cost allocation; and retail rate design.

ECON 573. Regulatory Policy and Industry Analysis: Electricity II**3 Credits**

Regulatory policy and economic analysis related to the Electric industry. Topics include: optimal generation mix; ancillary services; environmental policies; rate case procedures and strategies for effective testimony; advanced retail rate design; wholesale exchanges; unbundled transmission tariffs; market institutions and how different markets function; state and federal deregulation policies; Federal Energy Regulatory Commission orders and policies; demand-side management; and regulatory treatment of non-traditional retail services. Consent of instructor required.

Prerequisite(s): ECON 571 or consent of instructor.

ECON 574. Advanced Seminar Regulatory Policy and Industry Analysis**3 Credits**

Advanced seminar and writing course specializing in regulatory policy and regulatory casework. Topics Include: special policy & regulatory issues in telecommunications, electricity, natural gas, and water; preparation of written testimony; expert witness effectiveness including cross-examination; and contested case management. This course involves extensive reading and writing assignments. Consent of instructor required.

Prerequisite(s): ECON 571 or consent of instructor.

ECON 581. International Economics**3 Credits**

Trade and capital flows between countries, international payments, government policy in balance-of-payments and tariff matters, international organizations. Recommended preparation, ECON 371 and 372. May be repeated up to 3 credits.

Prerequisite(s): ECON 251G and ECON 252G.

ECON 582. Economics of Health Care**3 Credits**

Analysis of the allocation of resources in the field of health and medical care. Taught with ECON 432V with differentiated assignments for graduate students.

ECON 596. Independent Study**3 Credits**

Individual study program. Each offering will cover a subtitle. Maximum of 3 credits in a semester and 6 credits in a program. Consent of instructor required.

I B 317. International Marketing**3 Credits**

Same as MKTG 317.

I B 351. International Business**3 Credits**

The various aspects of international business, and identification and analysis of problems encountered by multinational companies.

Prerequisite: junior standing or consent of instructor.

I B 398. International Business and Economic Environments**3 Credits**

Description and analysis of various world regions, e.g., Pacific Rim, Eastern Europe, South Asia. Region will vary from semester to semester.

I B 449. Open Economy Macroeconomics**3 Credits**

This course studies theoretical and empirical macroeconomics in international dimension. It covers from the fundamental concepts of national income and growth, monetary/fiscal and exchange rate policies, foreign exchange markets, international trade and finance, and regionalization/economic integration to the impact analysis of these macroeconomic fundamentals in the open economy. Crosslisted with: ECON 449.

Prerequisite(s): FIN 341 OR ECON 372.

I B 450. International Economics**3 Credits**

Trade and capital flows between countries, international payments, government policy in balance-of-payments and tariff matters, international organizations. Crosslisted with: ECON 450G

Prerequisite(s): ECON 251G and ECON 252G.

I B 458. Comparative International Management**3 Credits**

Cultural influences on management are examined in a global business environment with a particular emphasis on human behavior in multinational organizations and the management of human resources. Same as Mgt. 458.

I B 475. International Finance**3 Credits**

Same as FIN 475. May be repeated up to 3 credits. Crosslisted with: FIN 475 and FIN 575.

I B 489. Senior Seminar in International Business**3 Credits**

Capstone class for I B majors. Integration of previous classwork via the examination of case studies and completion of a major project.

Prerequisite: I B core.

Name:

Office Location:

Phone: (575) 646-7211

Website: <https://business.nmsu.edu/departments/economics/>

Applied Statistics - Graduate Minor

Master's level students wishing to minor in applied statistics at the master's level must have at least 10 credits of 500-level applied statistics courses. The recommended courses for a general master's-level minor are:

A ST 503	SAS Basics	2
A ST 504	Statistical Software Applications	1
A ST 505	Statistical Inference I	4
A ST 506	Statistical Inference II	3
Total Credits		10

Depending on a particular student's background, it may be desirable to substitute other A ST courses for the minor. In accordance with Graduate School requirements, doctoral students must have at least 12 credits of 500-level applied statistics courses for a minor at the doctoral level.

Students wishing to obtain the minor in applied statistics should contact an applied statistics faculty member to recommend appropriate applied statistics course work to be included in the plan of study and to serve as the graduate committee representative from the minor area.

Applied Statistics - Master of Science

Offered by the Department of Economics, Applied Statistics and International Business, the Master of Science (MS) degree in applied statistics is designed to produce graduates proficient in current practices in statistics and able to enter directly into positions in industry, government or private business. A person completing this degree will have the requisite skills to help researchers outside of statistics execute data analyses, design experiments and/or plan and analyze biological surveys or surveys obtained by mail, phone or personal interview. In addition, a person completing this degree will be familiar with the major statistical packages for computers. Students in the program will receive instruction in both theory and application of statistics, oriented strongly towards linear models and sampling, as well as extensive training and experience in statistical consulting.

The MS degree serves two basic groups of students:

1. students with degrees in areas other than mathematics who wish to strengthen their quantitative skills and
2. students with a degree in mathematics or statistics or those with a strong minor in mathematics who wish to apply statistics in one or more subject matter areas.

Admission

Requirements for regular admission to the MS in Applied Statistics include the following:

- A minimum 3.0 grade-point average overall or in the last two years of study. Complete graduate and undergraduate transcripts must be supplied.
- Three semesters of engineering calculus, equivalent to MATH 191G Calculus and Analytic Geometry I, MATH 192G Calculus and Analytic Geometry II, and MATH 291G Calculus and Analytic Geometry III at NMSU, completed with B or better grades.
- A one-semester course in introductory statistics. Students entering with only one undergraduate course in statistics will generally take A ST 505 Statistical Inference I. NOTE: A ST 505 Statistical Inference I does not carry credit toward the MS in applied statistics.
- Three letters of reference from former professors or others able to evaluate the student's academic potential.
- A one- to two-page typewritten letter of application, discussing academic objectives, and professional plans, plus giving specific reasons for selecting statistics as a field for advanced studies.

In addition to the formal requirements above, some expertise in computer use or programming experience is strongly recommended.

Applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL). Fluency in written and spoken English is essential to successful completion of the program. Further information regarding the TOEFL can be obtained from:

Test of English as a Foreign Language
 CN 6151
 Princeton, NJ 08541-6151
 USA

Course Requirements
Credit Requirements (Minimum)

Theory		
A ST 565	Statistical Analysis I	4
A ST 566	Statistical Analysis II	4
A ST 567	Applied Linear Models I	3
A ST 568	Applied Linear Models II	3
Methods		
A ST 503	SAS Basics	2
A ST 504	Statistical Software Applications	1
A ST 506	Statistical Inference II	3
Research (Research Option)		
A ST 598	Special Research Problems	4-6
or A ST 599	Master's Thesis	
Elective Requirements		
Select 6-8 credits in research option electives and 12 credits of course-only option electives		20
Consulting		
A ST 551	Introduction to Statistical Consulting	1
A ST 552	Advanced Statistical Consulting	1
A ST 553	Practicum in Statistical Consulting	1
Total Credits		47-49

Economics - Bachelor of Arts in Economics

This program is suitable for, among others, students who plan to go to graduate school in economics, law, business or other areas. It has the advantage of including a large number of general electives. This feature provides great flexibility to the student who, in addition to completing the courses for a major in economics, may wish to take a double major or take courses from a wide variety of other subjects of his or her own choosing.

Every candidate for this degree must complete the following requirements. In addition, the following courses must be completed with a grade of C- or better:

ECON 251G	Principles of Macroeconomics	3
ECON 252G	Principles of Microeconomics	3
A ST 311	Statistical Applications (or equivalent)	3
MATH 142G	Calculus for the Biological and Management Sciences	3
or MATH 191G	Calculus and Analytic Geometry I	

Economics majors must earn a minimum cumulative GPA of 2.5 in the 27 credits of departmental requirements.

General Education Common Core

The College of Business abides by the university's New Mexico General Education Common Core requirements as outlined in this catalog. To minimize the number of courses taken, students should first review the General Degree requirements listed below. Students who follow the recommendations below will satisfy the university's general education requirements.

Requirements		
Area I: Communications		
Select one from the following: ¹		
ENGL 111G	Rhetoric and Composition	
ENGL 111GH	Rhetoric and Composition Honors	
SPCD 111G	Advanced ESL Composition	
or ENGL 111 M	Rhetoric and Composition for International and Multilingual Students	
Select one from the following:		
ENGL 203G	Business and Professional Communication	
ENGL 211G	Writing in the Humanities and Social Sciences	
ENGL 218G	Technical and Scientific Communication	
ENGL 311G	Advanced Composition	
ENGL 318G	Advanced Technical and Professional Communication	
Select one from the following:		
COMM 253G	Public Speaking	
COMM 265G	Principles of Human Communication	
HON 265G	Principles of Human Communication Honors	
AXED 201G	Effective Leadership and Communication in Agricultural Organizations	

Area II: MathematicsSelect 3-4 credits from the following: ¹

A ST 251G	Statistics for Business and the Behavioral Sciences ¹	
MATH 121G	College Algebra	
MATH 142G	Calculus for the Biological and Management Sciences ^{1,2}	
MATH 190G	Trigonometry and Precalculus	
MATH 191G	Calculus and Analytic Geometry I ¹	

Area III: Laboratory Sciences

Select 8 credits with labs from the approved New Mexico General Education Common Core List 8

Area IV & V: Social Behavioral Sciences and Humanities and Fine Arts

Select a total of 15 credits combined from Areas IV and V:

Area IV: Social and Behavioral Sciences

ECON 251G	Principles of Macroeconomics ¹	
ECON 252G	Principles of Microeconomics ¹	

Area V: Humanities and Fine Arts (select 6 credits from the approved list) 6

Additional course from approved list for Area IV or V. 3

Foundation and General Program Requirements ³

ACCT 221	Financial Accounting	3
MATH 120	Intermediate Algebra ⁴	3
MATH 121G	College Algebra ⁴	3
MATH 142G	Calculus for the Biological and Management Sciences	3
ECON 251G	Principles of Macroeconomics ¹	3
ECON 252G	Principles of Microeconomics ¹	3

Select one of the following:

A ST 251G	Statistics for Business and the Behavioral Sciences ¹

Electives in Economics, Upper-Division

Select 9 credits numbered 300 or above, including at least one course from the following to bring the total upper-division credits in major to 27 9

ECON 332	Public Finance	
ECON 336	Labor Economics	
ECON 449	Open Economy Macroeconomics	
ECON 450	International Economics	

Viewing a Wider World (VWW)Select 6 credits from Viewing a Wider World (VWW) ⁶ 6**General Electives**

Select sufficient additional credits to bring total degree credits to a minimum of 120 and upper division credits to 48. 29

The number of general elective credits varies by student.

Total Credits 120

¹ Complete with a grade of C- or better.² MATH 142G Calculus for the Biological and Management Sciences: Students planning to do graduate work in mathematical economics or statistics are urged to take MATH 190G Trigonometry and Precalculus, MATH 191G Calculus and Analytic Geometry I and MATH 192G Calculus and Analytic Geometry II, rather than MATH 142G Calculus for the Biological and Management Sciences.³ 33-40 credits, dependent upon mathematics placement.⁴ A grade of C- or better required to advance to the next level.⁵ Students must earn a cumulative GPA of 2.5 in courses counted toward the economics major.⁶ A description of the requirement and a listing of approved VWW courses can be found in this catalog under Required Courses (p. 47).

Economics - Bachelor of Business Administration

This program is especially suitable for students who find economics interesting and who intend, perhaps without additional formal education beyond the Bachelor degree, to take jobs in business or government. This degree prepares you for a wide variety of jobs including those leading eventually to positions of executive responsibility. It is also appropriate for those who may choose to seek a Master of Business Administration degree after graduation.

In addition to completing general (p. 47) education common core (p. 47), College of Business foundation and business core (p. 414), Viewing a Wider World (p. 47) requirements, and general electives (see above), every candidate for this major must complete each of these courses with a grade of C- or better:

ECON 251G	Principles of Macroeconomics	3
ECON 252G	Principles of Microeconomics	3
A ST 251G	Statistics for Business and the Behavioral Sciences (or equivalent)	3
or A ST 311	Statistical Applications	
MATH 142G	Calculus for the Biological and Management Sciences	3
or MATH 191G	Calculus and Analytic Geometry I	

Every candidate must earn a minimum cumulative GPA of 2.5 in the following major course requirements:

Major Courses

ECON 304	Money and Banking	3
ECON 311	Intermediate Macroeconomic Theory	3
ECON 312	Intermediate Microeconomic Theory	3
ECON 405	Introductory Econometrics	3
ECON 489	Senior Economics Seminar	3

Electives in Economics, Upper-Division

Select at least 9 credits from 300 or 400 level economics courses including three credit hours from the following: 9

ECON 332	Public Finance
----------	----------------

ECON 336	Labor Economics	
ECON 401	Managerial Economics	
ECON 450	International Economics	
ECON 457	Mathematical Economics	
Total Credits		24

Economics - Doctor of Economic Development

The Doctor of Economic Development (DED) is a professional doctorate designed to provide advanced training for economic development professionals. It is not designed to prepare graduates for academic careers.

Requirements

Candidates for the DED enter the program with the equivalent of a master's degree. DED students must successfully complete 60 graduate credits beyond the hours required for entry. All students must meet the requirements specified in the general regulations and requirements for admission to the Graduate School and to candidacy. DED minimum admission requirements include:

1. related master's degree or equivalent coursework;
2. one course in intermediate microeconomic theory and one course in intermediate macroeconomic theory with minimum grades of B;
3. one course in college-level calculus with a minimum grade of B; and
4. one course in statistics, including simple regression with a minimum grade of B.

Additionally, students who have not completed graduate level courses in AEEC 501 Microeconomic Theory, AEEC 502 Macroeconomic Theory, AEEC 540 Econometrics I) with grades of B or better will be required to successfully complete these courses early in the DED program.

All students in the DED program must successfully complete the following:

ECDV 550	Introduction to Local and Regional Development	3
ECDV 651	Economic Development Theory	3
ECDV 661	Regional Economic Modeling I	3
ECDV 662	Regional Economic Modeling II	3
ECDV 664	Population Economics	3
ECDV 668	Economic Development Finance	3
ECDV 671	Sustainable Economic Development	3
ECDV 692	Seminar in Economic Development (take twice)	3+3
ECDV 681	Urban Economic Development	3
ECDV 682	Rural Development	3
ECDV 683	Seminar in National Economic Development	3
Specialty area (six semester hours)		6
12-15 semester hours of internship and final project		12-15
Select sufficient elective credits to fulfill the 60 hour requirement.		3
Total Credits		60

Note: Doctor of Economic Development (DED) students who enter the DED with a master's degree may, upon completion of all requirements for the MA in Economics, apply for the MA in Economics degree and count courses that overlap with the DED requirements toward the DED. Students must apply separately for the MA Econ program and master's degree must be conferred before the DED.

Comprehensive and oral exams will be given and will determine eligibility to continue in the program and/or to graduate.

Teaching and research assistantships are available to qualified applicants however admission to the program does not imply or guarantee funding.

Detailed and updated information is available on the departmental website: <https://business.nmsu.edu/academics/graduate-programs/ded/>

Economics - Graduate Minor

Graduate students wishing to earn a minor in economics must complete 12 semester credit hours, including:

Select at least two from the following:		6
AEEC 501	Microeconomic Theory	
AEEC 502	Macroeconomic Theory	
AEEC 540	Econometrics I	
ECON or AEEC 500 or higher courses (excluding ECON 503) ¹		6
Total Credits		12

¹ ECON 503 Managerial Economics cannot be counted toward the minor.

Students pursuing the economics minor must fulfill the course prerequisites before enrolling in the graduate courses.

Economics - Master of Arts

Candidates for the Master of Arts in economics must successfully complete a minimum of 30 graduate credits (concentrations may require more than 30 graduate credits). At least 12 credits beyond the core courses (AEEC 501 Microeconomic Theory, AEEC 502 Macroeconomic Theory, AEEC 540 Econometrics I) must be earned by taking courses taught by economics faculty members in the Department of Economics, Applied Statistics and International Business. At least two of the three core courses must be completed at NMSU. Twenty-one of the credits must have one of the four following prefixes: AEEC, ECON, ECDV, or AG E. At least twenty-four of the credits must be associated with courses numbered 500 or above. All students must meet the requirements specified in the general regulations and requirements for admission to the Graduate School and to candidacy. Students preparing to enter the program are encouraged to complete the following:

1. one course in intermediate microeconomic theory and one course in macroeconomic theory with minimum grades of B;
2. one course in college-level calculus; and
3. one course in statistics, including simple regression.

Those students not having completed these courses may be admitted with the requirement that the deficiencies be completed at the beginning of the graduate program. Those students interested in the concentration in regulatory economics are advised to complete two courses in college-level statistics.

All students in the program must successfully complete a minimum of 30 credits including the following:

Required Courses

AEEC 501	Microeconomic Theory	3
AEEC 502	Macroeconomic Theory	3
AEEC 540	Econometrics I	3
Electives, subject to the restrictions above.		21
Total Credits		30

Notes:

1. No more than one course with a grade less than B can be used to fulfill the requirements for the MA Econ degree.
2. ECON 503 cannot be counted toward the major in Economics.
3. A maximum of nine hours of approved transfer credit (with minimum grades of A) may be applied toward the degree.

Teaching and research assistantships are available to qualified applicants however admission to the program does not imply or guarantee funding. It is not necessary to have a degree in economics to enter the graduate program or to receive financial assistance. An application and three letters of reference are required to be considered for any available assistantships. These forms can be obtained from the department.

Concentration: Public Utility Policy and Regulation

Requirements

ECON 571	Regulatory Policy and Industry Analysis: Electricity I	3
ECON 572	Regulatory Policy and Industrial Analysis: Water and Natural Gas	3
ECON 573	Regulatory Policy and Industry Analysis: Electricity II	3
ECON 574	Advanced Seminar Regulatory Policy and Industry Analysis	3
Total Credits		12

Option: Public Policy

Requirements

AEEC 522	Public Sector Economics I	3
AEEC 523	Public Sector Economics II	3
GOVT 530	Seminar in Public Policy	3
Select one from the following:		3
GOVT 537	Issues in Public Policy	
GOVT 540	Seminar in Public Administration	
GOVT 541	Public Budgeting	
GOVT 544	Public Policy Analysis	
Total Credits		12

Option: Econometrics

Requirements

AEEC 540	Econometrics I	3
ECON 545	Econometrics II	3

Select 6 graduate credits of A ST (Applied Statistics) at the 500 level ¹	6
Total Credits	12

¹ Excluding A ST 505 Statistical Inference I, independent study, thesis, project and dissertation credits.

All students in the program must successfully complete a minimum of 30 credits including the following:

Required Courses

AEEC 501	Microeconomic Theory	3
AEEC 502	Macroeconomic Theory	3
AEEC 540	Econometrics I	3
Total Credits		9

Economics - Undergraduate Minor

A minor in economics consists of 18 or more credit hours of approved course work in economics (ECON), of which at least 12 are numbered 300 or higher, all completed with a grade of C- or higher. At least 12 credits must be completed at NMSU. This minor is not open to majors in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.

Required Courses

ECON 251G	Principles of Macroeconomics ¹	3
ECON 252G	Principles of Microeconomics ¹	3
ECON 304	Money and Banking	3
or ECON 311	Intermediate Macroeconomic Theory	
ECON 401	Managerial Economics	3
or ECON 312	Intermediate Microeconomic Theory	
Upper-division courses (300 or higher) in economics		6
Total Credits		18

¹ ECON 201G Introduction to Economics may be substituted for one of these with the approval of the Head of the Department of Economics.

International Business - Bachelor of Business Administration

This program is intended for those who plan to work for government agencies or firms with operations abroad or between the United States and foreign countries. The program prepares you for positions requiring knowledge of international payments, foreign exchange markets, world marketing techniques for products, export and import procedures, and international investments.

In addition to completing the general education common core (p. 47), College of Business foundation and business core (p. 414), Viewing a Wider World requirements, (p. 47) and general electives (to bring the total credits to 120), every candidate for this major must complete these courses with a grade of C- or better:

ECON 251G	Principles of Macroeconomics	3
ECON 252G	Principles of Microeconomics	3
A ST 251G	Statistics for Business and the Behavioral Sciences (or equivalent)	3
or A ST 311	Statistical Applications	

MATH 142G	Calculus for the Biological and Management Sciences	3
or MATH 191G	Calculus and Analytic Geometry I	

Candidates must earn a minimum cumulative GPA of 2.5 in the following major course requirements:

International Business Core Courses ¹

I B 351	International Business	3
I B 450	International Economics	3
I B 475	International Finance	3
or I B 449	Open Economy Macroeconomics	
I B 489	Senior Seminar in International Business	3
Select 3 credits from the following:		3

ECON 324V	Developing Nations	
ECON 325V	Economic Development of Latin America	
I B 398	International Business and Economic Environments	
HON 380V	Comparative Economic Systems	

Functional area in business (15 credits of upper-division courses in a single functional area of business beyond those elsewhere required for the I B major) ² 15

Total Credits 30

¹ At least 12 of the 15 credit hours counted toward the international business core courses must be earned at NMSU (not to include courses completed on study abroad).

² At least 9 of the 15 credit hours counted toward the international business functional area must be earned at NMSU (not to include courses completed on study abroad).

Other Requirements for the Major

Students must earn a cumulative GPA of 2.5 in courses counted toward the I B major (core and functional area).

Foreign language: Students must demonstrate oral and written proficiency at the intermediate mid-level according to ACTFL (American Council on the Teaching of Foreign Languages) proficiency guidelines. (Process for demonstrating proficiency to be coordinated with the NMSU Department of Languages and Linguistics. Any costs associated with proficiency demonstration will be paid by the student.)

International experience requirement: Students must partake of an international experience equivalent to a semester abroad in a university where the language of instruction is not English. The department will determine appropriateness of international experience. Study abroad programs must be pre-approved by IB advisors and Department Head.

International Business - Undergraduate Minor

A minor in international business consists of 18 or more credit hours of approved course work in the International Business core, all completed with a grade of C- or higher. At least 12 credits must be completed at NMSU. This minor is not open to majors in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.

Required Courses

I B 351	International Business	3
---------	------------------------	---

ECON/I B 450	International Economics	3
FIN/I B 475	International Managerial Finance	3
or ECON 449	Open Economy Macroeconomics	
I B 489	Senior Seminar in International Business	3
Select one from the following:		3
ECON 324V	Developing Nations	
ECON 325V	Economic Development of Latin America	
HON 380V	Comparative Economic Systems	
I B 398	International Business and Economic Environments	
Upper-division business course		3
Total Credits		18

In addition, I B minors must meet the foreign language proficiency requirement described below.

Students must demonstrate oral and written proficiency in a foreign language at the intermediate mid-level according to the ACTFL (American Council on the Teaching of Foreign Languages) proficiency guidelines. (Process for demonstrating proficiency to be coordinated with the NMSU Department of Languages and Linguistics. Any costs associated with proficiency demonstration will be paid by the student.)

Public Utility Regulation and Economics - Graduate Certificate

The certificate in Public Utility Regulation and Economics (PURE) is a professional educational program designed for post-baccalaureate students pursuing a career in the utility sector, with an electric utility company, natural gas utility, water distribution utility, or with a government agency regulating these types of companies. PURE students must meet the general regulations and minimum requirements for admission to the graduate school and complete 12 credit hours including

ECON 571	Regulatory Policy and Industry Analysis: Electricity I	3
ECON 572	Regulatory Policy and Industrial Analysis: Water and Natural Gas	3
ECON 573	Regulatory Policy and Industry Analysis: Electricity II	3
ECON 574	Advanced Seminar Regulatory Policy and Industry Analysis	3
Total Credits		12

For details see <https://business.nmsu.edu/academics/graduate-programs/certificate-public-utility/>

Finance Undergraduate Program Information

Finance is the management of money and cash flow for business organizations, government and individuals. The study of finance involves examining the theory and techniques of managing money, including analysis and management of risk. Finance students learn to apply tools and concepts from mathematics, statistics, economics and accounting to financial decision-making. With this knowledge, finance graduates are in high demand by employers and command some of the highest salaries for college graduates. Depending upon their career goals and interests,

finance majors may use the electives in the major to focus their program of study on financial management, financial planning, investments, banking, and/or risk management and insurance.

Degrees for the Department

Finance - Bachelor of Business Administration (p. 440)

Finance - Graduate Certificate (p. 441)

Minors for the Department

Finance - Undergraduate Minor (p. 441)

Banking and Financial Planning - Undergraduate Minor (p. 439)

Risk Management and Insurance - Undergraduate Minor (p. 442)

Business Law - Undergraduate Minor (p. 440)

Entrepreneurship and Innovation - Undergraduate Minor (p. 440)

Professor, Harikumar Sankaran, Department Head

Professors de Boyrie, Fortin, Martin, Oretskin; Query; Sankaran; **Associate Professors** Clarkson; **Assistant Professors** Holt, Rahman; **College Professor** Macy; **College Assistant Professor** Groves; McGonigle

FIN 206. Introduction to Finance

3 Credits

Theory and techniques of financial management for business firms. Includes application of financial analysis tools and techniques needed for business financial administration and decision making. Restricted to Community Colleges campuses only.

Prerequisite(s): BOT 106 or higher; BOT 120 or ACCT 221; ECON 201 or ECON 251.

FIN 210. Financial Planning and Investments

3 Credits

Individual financial planning and related financial markets and institutions. Community Colleges only.

FIN 303V. Personal Financial Planning and Investing in a Global Economy

3 Credits

Provides a framework for successful personal financial planning within an individual's career and income. Covers personal money management, federal and state taxation, the mathematics of finance and credit, housing, inflation, insurance, savings, and investments. Majors and minors may not use this course to satisfy their finance requirements.

FIN 311. Financial Futures Markets

3 Credits

Same as AG E 311.

FIN 322. Principles of Insurance

3 Credits

Theory and practice of insurance and its economics and social significance; review of the major lines of insurance including life, health, and property liability insurance.

FIN 323. Life/Health/Employee Benefits

3 Credits

Approaches to problems of employee security from the perspective of businesses. Topics including pensions, profit-sharing plans, 401(k) plans, group life and health plans, and flexible benefit programs. The course also addresses individual life, health, and annuity contracts within a financial planning context.

Prerequisite: FIN 322.

FIN 324. Property and Liability Insurance

3 Credits

Analysis of property and liability insurance with emphasis on handling of commercial exposures. Review of property and liability company operations including rate making and insurance accounting. Prerequisite: FIN 322

FIN 325. Real Estate Principles and Law I

3 Credits

Real estate law and the fundamental aspects of the real estate purchase transaction and the real estate lease agreement. Topics include real estate brokerage, marketing of real estate, fundamental legal aspects of real estate, present and future interests, air and water rights, methods of transfer, basics of financing and liens, and real estate leases. Same as BLAW 325.

FIN 326. Business Risk Management

3 Credits

The operational risks faced by firms and the study of various methods of handling these risks, including loss prevention, risk retention, self-insurance, corporate insurance programs, and capital markets. Prerequisites: FIN 322

FIN 327. Analysis of the Excess and Surplus Lines Insurance

3 Credits

Analysis of excess and surplus lines segment of the insurance industry, including ratemaking, pricing of insurance, regulation, marketing of insurance, reinsurance, and product development. Students groups will research and design a new insurance product as part of the class.

FIN 331. Business Creation and Valuation

3 Credits

The course is designed to provide a first look at the entrepreneurship process by focusing how the firm will/does create value in the marketplace. As such, it is designed to integrate knowledge of business functions and apply business analysis techniques to the valuation of new ventures/entrepreneurial firms.

FIN 332. Entrepreneurial Finance

3 Credits

The course is structured to provide a parallel learning experience of financing methods/theory and project work focused on financing select start-up companies. Students will learn a broad range of early stage financing techniques. In addition to explorations is class of the theory of entrepreneurial finance students will hear actual young companies from different industries present their opportunities and challenges to the class.

FIN 333. Business Analysis and Turnaround

3 Credits

This course provides students an opportunity to draw upon previous experiences and education to apply various business concepts and analytical tools to complex problems and issues in organizational settings. Business Analysis is an integrative course in two respects. First, it takes a broad view of the environment that includes competitive dynamics and macro-environmental trends and developments. Second, it takes the perspective of the firm as a whole and examines how each of the functional areas can be integrated into overall operational strategies to address the firm's key organizational issues and environmental challenges.

FIN 341. Financial Analysis and Markets

3 Credits

Financial analysis for business financing and investing decisions. Prerequisites ACCT 221, ECON 251, ECON 252, MATH 121G or 230, A ST 251 or A ST 311 or STAT 251G.

FIN 355. Investments**3 Credits**

Analysis of investment risks and rewards and of the problems of portfolio selection and management. Operation of the securities market.

Prerequisite(s): FIN 341 with a grade of C- or better.

FIN 360. Financial Information Technology**3 Credits**

Integrated use of electronic financial information resources with spreadsheet and word processing applications in investigating financial issues and solving financial problems. FIN 341 with a grade of C- or better.

Prerequisite(s): FIN 341 or consent of instructor.

FIN 385. Analysis of Financial Markets and Institutions**3 Credits**

Analysis of the financial system, emphasizing its institutions and instruments.

Prerequisite(s): FIN 341 with a grade of C- or better.

FIN 391. Finance Internship and Cooperative Education I**1-3 Credits**

Introduction and application of finance principles in a work environment. Open only to students in the finance major or minor who will be working with an approved employer in a finance related position, over a period of 12 weeks or at least 300 work hours. Consent of instructor required.

FIN 392. Insurance Internship and Cooperative Education I**1-3 Credits (1-3)**

Introduction and application of insurance principles in a work environment. Open only to students in the finance major or insurance minor who will be working with an approved employer in an insurance related position, over a period of 12 weeks or at least 300 work hours. Consent of instructor required. Restricted to Finance majors.

FIN 393. Banking Internship and Cooperative Education**1-3 Credits (1-3)**

Professional banking experience with opportunities to engage in business analysis and to observe application of business principles in the management of a banking entity or a regulatory agency with banking oversight. Open only to students in the finance major or banking minor who will be working with an approved employer in a banking related position, over a period of 12 weeks or at least 300 work hours. May be repeated up to 3 credits. Consent of instructor required.

FIN 406. Theory of Financial Decisions**3 Credits**

Contemporary financial theory. Firm valuation, investments and financing decisions, risk analysis.

Prerequisite(s): FIN 341 with a grade of C- or better.

FIN 421. Personal Financial Planning for Professionals**3 Credits**

Introduction to personal financial planning, including goal setting and fact finding, cash management, credit, housing, retirement planning, taxation and estate planning. This course is intended for those planning careers in personal financial advising in one of the various financial services environments.

Prerequisite(s): FIN 341, or consent of Instructor.

FIN 435. Investment Analysis**3 Credits**

Efficiency of capital markets, modern portfolio management, special topics of current interest to investment analysts.

Prerequisite: FIN 355.

FIN 436. Applied Security Analysis and Portfolio Management**1-3 Credits (1-3)**

Application of analytical tools to security selection and portfolio management Pre/

Corequisite(s): FIN 435.

FIN 445. Fixed Income Markets, Instruments and Derivatives**3 Credits**

Course provides a broad introduction to treasury, corporate, municipal, mortgage backed and asset backed bond markets. The analytical techniques for valuing bonds, quantifying their exposure to changes in interest rate and credit risk exposures and investment decision-making are explored.

Prerequisite(s): FIN 341.

FIN 455. Derivative Markets and Securities**3 Credits**

Institutional aspects of derivative markets and the arbitrage based pricing of derivative instruments such as stock options, interest rate options, future contracts and swaps. The applied component of the course demonstrates use of these instruments as hedge and/or investment vehicles.

Prerequisite(s): FIN 355.

FIN 466. Financial Policy Decisions**3 Credits**

Application and integration of financial theory, concepts, and practice using the case method.

Prerequisite: FIN 406 or consent of instructor.

FIN 470. Real Estate Appraisal**3 Credits (2+2P)**

This course addresses issues influencing the value of real estate with some emphasis upon rural properties. Topics include courthouse records, property taxes, appraisal methodology, expert courtroom testimony, condemnation, and legal issues. Students will take field trips and write appraisals. Course material is relevant to student in Finance, Accounting, and Pre-Law, as well as Agriculture. Accredited for hours to apply to both pre-licensing and continuing education requirements of the New Mexico Real Estate Commission for both Appraisers and Real Estate Brokers. Crosslisted with: AG E 470.

Prerequisite(s): Junior or above standing.

FIN 475. International Managerial Finance**3 Credits**

International aspects of financial transactions, decision-making, banking and financial markets. Same as I B 475.

Prerequisite: FIN 341.

FIN 480. Management of Financial Institutions**3 Credits**

Asset and liability management of financial institutions; emphasis on commercial bank management.

Prerequisite: FIN 385 or consent of instructor.

FIN 490. Selected Topics**1-3 Credits**

Current topics in finance.

Prerequisites: vary according to the seminar being offered.

FIN 498. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with the prior approval of the department head. A maximum of 3 credits may be earned.

Prerequisites: junior or above standing and consent of instructor.

FIN 500. Concepts in Finance**1 Credit**

An overview of fundamental principles of finance necessary for prospective MBA students who do not have an undergraduate background in finance. Includes: Time value of money concepts and calculations; risk and calculation of return given appropriate risk measures; bond risk characteristics and calculation of the value of a bond; calculation of the value of common stock (determination as to whether a stock is over-valued or under-valued); and calculation of the costs of capital and capital budgeting problems using the cost of capital.

Prerequisite(s): admitted to MBA Program or consent of course department.

FIN 503. Financial Management**3 Credits**

Theory and application of financial analysis to asset management, project evaluation, capital structure, and dividend policy. Interrelationships among financial and other organizational decisions.

Prerequisite(s): FIN 341 with a grade of B or better.

FIN 511. Financial Futures Markets**3 Credits**

Same as AEEC 511.

FIN 521. Personal Financial Planning for Professionals**3 Credits**

Introduction to personal financial planning, including goal setting and fact finding, cash management, credit, housing, retirement planning, taxation and estate planning. This course is intended for those planning careers in personal financial advising in one of the various financial services environments.

Prerequisite(s): FIN 503 or FIN 341 or consent of Instructor.

FIN 535. Investment Concepts**3 Credits**

Investments in common stocks and other securities. Risk and return, securities markets, portfolio theory and management.

Prerequisite(s): FIN 355 or FIN 503.

FIN 536. Applied Security Analysis and Portfolio Management**1-3 Credits (1-3)**

Application of analytical tools to security selection and portfolio management. Pre/

Corequisite(s): FIN 435 or FIN 535.

FIN 545. Money and Capital Markets**3 Credits**

Examination of financial markets and institutions. Emphasis on interest rate determinants, bond markets, and fixed income portfolio management. Same as FIN 445 with differentiated assignments for graduate students.

Prerequisite(s): FIN 503 or instructor permission.

FIN 555. Derivative Markets and Securities**3 Credits**

Institutional aspects of derivative markets and the arbitrage based pricing of derivative instruments such as stock options, interest rate options, future contracts and swaps. The applied component of the course demonstrates use of these instruments as hedge and/or investment vehicles. Same as FIN 455 with differentiated assignments for graduated students.

Prerequisite(s): FIN 503 or instructor permission.

FIN 566. Advanced Financial Management**3 Credits**

Application and integration of financial theory, concepts, and practice using the case method.

Prerequisite: FIN 503.

FIN 575. International Managerial Finance**3 Credits**

International aspects of financial transactions, decision-making, banking and financial markets.

Prerequisite(s): FIN 503 or FIN 341.

FIN 581. Management of Financial Institutions**3 Credits**

Asset and liability management of financial institutions; emphasis on commercial bank management.

Prerequisite(s): FIN 385 or FIN 503.

FIN 590. Selected Topics**1-3 Credits (1-3)**

Current topics in finance. Taught with FIN 490 with differentiated assignments for graduate students. Consent of instructor required.

FIN 598. Special Research Programs**1-3 Credits**

Directed individual reading or research.

Prerequisite: consent of instructor.

Banking and Financial Planning - Undergraduate Minor

This is an ideal minor for those seeking a career in the financial sector – banking, personal financial planning, investments, and wealth management. Money makes the world go around and in this career field, you are at the center of business and personal transactions. The courses in this minor help in gaining a broad knowledge of business activities as well as skills in financial accounting, sales and marketing, financial planning and investing. This minor is available to students in most majors (business and non-business) and provides a launch pad for what we hope will be many successful careers. Students are encouraged to pursue internships and co-op experiences in the areas of banking and financial planning.

This minor is not open to majors in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.

Requirements

Completion of the courses listed below (including any prerequisites) with a minimum cumulative GPA of 2.0 in these courses. At least twelve of the credits for the minor must be completed at NMSU.

Required Courses

FIN 341	Financial Analysis and Markets	3
FIN 385	Analysis of Financial Markets and Institutions	3
FIN 421	Personal Financial Planning for Professionals	3

FIN 480	Management of Financial Institutions	3
ACCT 301	Financial Accounting I	3
Select two upper division courses from the following:		6
ACCT 403	Federal Taxation I	
BLAW 418	Uniforms Commercial Code and Advanced Business Law Topics	
FIN 322	Principles of Insurance	
FIN 325	Real Estate Principles and Law I	
FIN 326	Business Risk Management	
FIN 355	Investments	
FIN 391	Finance Internship and Cooperative Education I	
MKTG 312	Personal Selling	
Total Credits		21

Business Law - Undergraduate Minor

In a world that is increasingly subject to laws and regulations, every business needs employees who are savvy about the laws that affect business. The Business Law minor is comprised of a series of courses designed to provide a strong background in a wide range of laws that business need to be aware of, and provide students with the ability to recognize – and avoid – legal pitfalls. Additionally, the Business Law minor will provide students with a clear understanding of how legal disputes are resolved and the ability to appreciate the cost and complexity of disputes, and enable students to reduce the costs and complexities by being able to communicate clearly with lawyers about the legal issues.

Requirements

Completion of the courses listed below (including any prerequisites) with a minimum cumulative GPA of 2.0 in these courses. At least twelve of the credits for the minor must be completed at NMSU. This minor is not open to majors in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.

Required Courses

BLAW 316	Legal Environment of Business	3
BLAW 313	Sports and the Law	3
BLAW 385V	Consumers and the Law	3
BLAW 330	Entrepreneurial Law	3
Take any 2 courses from the following:		6
BLAW 325	Real Estate Principles and Law I	
BLAW 430V	American Indian Law and Policy	
BLAW 418	Uniforms Commercial Code and Advanced Business Law Topics	
HRTM 304	Hospitality and Travel Law	
AG E 314	Agricultural and Natural Resource Law	
HON 335V	Legal Issues in Modern Society	
GOVT 391	Constitutional Law	
Total Credits		18

Entrepreneurship and Innovation (Business Cluster) - Undergraduate Minor

The Entrepreneurship and Innovation minor is designed to promote entrepreneurship to students across the NMSU campus. This minor will appeal to creative and ambitious students who envision launching and managing their own business or entering careers in innovation-driven fields. The flexible design allows students to complete a designated, approved cluster of related courses that provide a discipline-specific entrepreneurial flavor. Such clusters are under development.

Requirements

Completion of the courses listed below (including any prerequisites) with a minimum cumulative GPA of 2.0 in these courses. At least twelve of the credits for the minor must be completed at NMSU. This minor is not open to students in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.

Required Core Courses

FIN 331	Business Creation and Valuation	3
FIN 332	Entrepreneurial Finance	3
BLAW 330	Entrepreneurial Law	3
Business Cluster Courses: Choose any 3 from the following		9
B A 490	Selected Topics	
FIN 333	Business Analysis and Turnaround	
MKTG 312	Personal Selling	
MKTG 324	Product/Service Development	
Total Credits		18

Finance - Bachelor of Business Administration

Finance is the crossroads of economics, strategy and accounting, and the study of how firms and individuals allocate resources over time and under uncertain conditions. The finance curriculum provides a core foundation in corporate finance, investments, and financial institutions. The theory and concepts are then applied to problem-solving in a variety of areas including financial markets and institutions, corporate finance, international financial management, stock valuation and portfolio allocation, fixed-income markets, and derivatives.

Requirements

Completion of the courses listed below (including any prerequisites) with a minimum cumulative GPA of 2.0 in these courses. At least twelve of the credits for the major must be completed at NMSU.

Major Courses

FIN 355	Investments	3
FIN 360	Financial Information Technology	3
FIN 385	Analysis of Financial Markets and Institutions	3
FIN 406	Theory of Financial Decisions	3
Finance Electives		
Select four additional, upper division, finance courses ¹		12

Total Credit Hours	24
---------------------------	-----------

¹ Upper division Finance courses must have a number greater than 310. The following courses: FIN 331, FIN 322, and FIN 333 may not be used to satisfy this requirement.

Every candidate for this major must fulfill the general education common core (p. 47), College of Business foundation and business core (p. 414), Viewing (p. 47) a Wider World (p. 47) requirements and general electives, in addition to the requirement for the major. Given below is a suggested study plan for a student pursuing a Finance major.

Suggested Plan of Study

Course	Title	Credits
Junior		
Fall		
FIN 341	Financial Analysis and Markets	3
FIN elective ¹		3
Credits		6
Spring		
FIN 355	Investments	3
FIN 360	Financial Information Technology	3
FIN 385	Analysis of Financial Markets and Institutions	3
Credits		9
Senior		
Fall		
FIN 406	Theory of Financial Decisions	3
FIN elective ¹		3
Credits		6
Spring		
FIN elective ¹		3
FIN elective ¹		3
Credits		6
Total Credits		27

¹ Finance elective must have a number greater than 310. The following courses: FIN 331, FIN 322, and FIN 333 may not be used as electives to satisfy the requirements for the major.

Finance - Graduate Certificate

Admission requirements:

1. Completion of a Bachelors or other advanced degree with a minimum GPA of 3.0.
2. Earned a B or better in the following NMSU courses — or their equivalents — within seven years prior to acceptance into the program:

FIN 341	Financial Analysis and Markets	3
MATH 142G	Calculus for the Biological and Management Sciences	3
STAT 251G	Statistics for Business and the Behavioral Sciences	3
or A ST 251G	Statistics for Business and the Behavioral Sciences	

or

Undergraduate GPA of at least 3.25 with 2 or more years of experience ¹

¹ Two or more years of relevant, full-time, post-degree, professional work experience in the finance industry. See <http://gradfincert.nmsu.edu> for more details.

3. Please visit gradschool@nmsu.edu and submit an application online. The application fee is \$30 for U.S. residents and \$40 for International Students. International students have to submit their TOEFL scores. All applicants will be notified via email of their acceptance into the program.

Certificate Course Requirements

Students admitted into the program will receive the Graduate Certificate in Finance after the completion of any of the four courses from the list below. Courses are offered in a traditional classroom and/or online.

Choose four from the following: 12

FIN 503	Financial Management
FIN 511	Financial Futures Markets
FIN 521	Personal Financial Planning for Professionals
FIN 535	Investment Concepts
FIN 545	Money and Capital Markets
FIN 566	Advanced Financial Management
FIN 575	International Managerial Finance
FIN 581	Management of Financial Institutions

Total Credits 12

Finance - Undergraduate Minor

The minor in Finance, available to students in most majors (business and non-business), affords students the opportunity to select their minor courses to provide a focus on any one of several sub-specialties within the field of Finance. Faculty advisors in the department can assist students in selecting their Finance electives to provide a focus in financial management, financial planning, or investments. (This minor is not open to majors in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.)

Requirements

Completion of the courses listed below (including any prerequisites) with a minimum cumulative GPA of 2.0 in these courses and a minimum cumulative GPA of 2.0 in the FIN courses. At least twelve credits for the minor must be completed at NMSU.

Required Courses

ACCT 221	Financial Accounting	3
FIN 341	Financial Analysis and Markets	3
Select any three additional, upper division, finance courses ¹		9
Select any additional upper division business course		3
Select one from the following:		3
ECON 201G	Introduction to Economics	3
ECON 251G	Principles of Macroeconomics	3
ECON 252G	Principles of Microeconomics	3
Total Credit Hours		21

¹ Upper division Finance courses must have a number greater than 310. The following courses: FIN 331, FIN 322, and FIN 333 may not be used to satisfy this requirement.

Risk Management and Insurance - Undergraduate Minor

The minor in Insurance, available to students in most majors (business and non-business), affords students the opportunity to supplement their major field of study with specialized expertise in the field of insurance. Students pursuing this option will be advised by the director of the insurance studies program and will be encouraged to pursue internships and co-op experiences in the insurance industry.

Requirements

Completion of the courses listed below (including any prerequisites) with a minimum cumulative GPA of 2.0 in these courses. At least twelve of the credits for the minor must be completed at NMSU. The minor is not available to students in the Bachelor of Individualized Studies or the Bachelor of Applied Studies.

Required Courses

FIN 322	Principles of Insurance	3
FIN 341	Financial Analysis and Markets	3
or FIN 303V	Personal Financial Planning and Investing in a Global Economy	
BLAW 316	Legal Environment of Business	3
or BLAW 385V	Consumers and the Law	
Any additional upper division business course		3
FIN 323	Life/Health/Employee Benefits	3
Choose 9 upper division finance courses from the following		
FIN 324	Property and Liability Insurance	3
FIN 326	Business Risk Management	3
FIN 392	Insurance Internship and Cooperative Education I	1-3
FIN 498	Independent Study	1-3
FIN 421	Personal Financial Planning for Professionals ¹	3
Total Credit Hours		18

¹ Fin 421 cannot be taken if Fin 303V is applied toward the minor.

Management Undergraduate Program Information

The major in general business is based on a broad range of course options rather than a narrow focus on a single discipline. Graduates find careers in large and small businesses, in government agencies and in the nonprofit sector. The general business major is well suited to the part-time and working student because it allows the student to select courses that will better meet their individual schedule. The entrepreneurship concentration is ideal for a student interested in starting or acquiring a small business or entering a family business upon graduation. The curriculum provides a focus on small and new enterprises, thus reflecting the entrepreneurial nature of contemporary business in the U.S.

Every candidate for this major must fulfill the following requirements in addition to the general education common core, College of Business

foundation and business core, Viewing a Wider World requirements and general electives. Students will choose one of the three concentrations that follow.

Degrees for the Department

General Business - Bachelor of Business Administration (p. 445)

Management - Bachelor of Business Administration (p. 446)

Minors for the Department

Management - Undergraduate Minor (p. 446)

Sustainability - Undergraduate Minor (p. 446)

Professor, Carlo Mora-Monge, Interim Department Head

Professors Benson, Bishop, Boje, Elias, Hoffman, Jun, Rosile; **Associate Professors** Adler, Smith; **Assistant Professors** Flinchbaugh; Crawford

MGT 201. Introduction to Management

3 Credits

Covers the functioning and administration of different types of complex organizations. Concepts and theories of management and organizational behavior.

MGT 309. Human Behavior in Organizations

3 Credits

Interpersonal and organizational behavior, motivation, communication, team building, leadership, diversity management, legal and ethical issues, and politics in organizations. Credit may not be earned for both MGT 309 and MGT 315V.

MGT 315V. Human Relations in Organizations

3 Credits

Interactions among people and groups in societies where organizations abound. Focus on the behavior of people in organizational situations and approaches for understanding that behavior. Explores motivation, communication, leadership and team processes. Restricted to nonbusiness majors. Credit may not be earned for both MGT 309 and MGT 315V.

MGT 332. Human Resources Management

3 Credits

Survey course in human resources management. Includes recruitment, selection, equal employment opportunity, performance appraisal, training, compensation, safety, and union-management relations.

MGT 333. Training and Development

3 Credits

Training and development of human resources, including training needs assessment, training approaches and techniques, and evaluation of training effectiveness.

MGT 335V. Business and Government

3 Credits

Crosslisted with: ECON 335G

MGT 336. Management Communication

3 Credits

Communication models with emphasis on application to management problems. Management communication systems and techniques in organizations.

MGT 344. Production and Operations Management**3 Credits**

Management of physical and human resources; management information systems in operations; applications in various organizations.

Prerequisite: STAT 251G or A ST 251G or A ST 311; and BCIS 338 or BCIS 350.

MGT 345V. Quality and Competitiveness: An International Perspective**3 Credits**

Quality management and competitiveness are studied in manufacturing, services, and the public sector with an international perspective. Topics include: global history of quality, foreign competition and its impact on quality and productivity, quality management and continuous improvement, international operations management, quality assessment, and a review of the emergence of quality and competitiveness in government, education and health care.

MGT 347. Management Functions and Processes**3 Credits**

Planning, organizing, directing, and controlling operating units in an organization. Applications to a variety of types of organizations.

MGT 351. Supply Chain Management**3 Credits**

Acquisition and control and delivery of materials, parts, equipment, and services for end use in the organization. Applications to service and manufacturing industries, nonprofit, and governmental institutions.

MGT 359. The Management of Diversity**3 Credits**

Management of diversity in the workplace. Includes concepts of appreciation and management of workforce diversity, a review of research on diversity and organizational performance, individual and group-level factors in understanding diversity, and organizational context factors in managing diversity.

MGT 360V. Negotiation and Business Conflict Resolution: Theory and Practice**3 Credits**

Covers the basics of negotiation theory and practice including the use of quantitative methods and their realistic application in resolving disputes. Application of conflict resolution skills.

MGT 361. Managing a Startup**3 Credits**

Exploration of the tensions and experiences of starting and growing a new company. The course will provide students with the knowledge and experience to increase the likelihood of success whether as a principal in a new company or an investor representative.

MGT 375V. Global Environmental Assessment and Management**3 Credits**

Examines the principles of environmental assessment and management. Topics include global environmental concerns, industrial environmental management, life cycle assessment, system analysis, process improvement, and sustainable development, among others.

MGT 388V. Leadership and Society**3 Credits**

Exploration of the multifaceted nature of leadership in modern society through readings and seminar discussion.

MGT 391. Management Internship and Cooperative Education I**1-3 Credits**

Application of management skills to the work environment. Open only to students majoring or minoring in management. The amount of academic credit (1-3 cr.) will be determined by the academic experience and not by the work experience. May be repeated for a maximum of 3 credits. Restricted to majors and minors.

Prerequisites: MGT 309 and consent of instructor.

MGT 448. Business Consulting**3 Credits**

Study, analysis, and presentation of recommendations for solving significant problems confronting businesses.

MGT 449. Strategic Management**3 Credits**

Integrative approach to envisioning the future and shaping strategies for business success.

Prerequisite(s): BCIS 338 or 350; BLAW 316; FIN 341; MGT 309; MKTG 303; and one of the following: MGT 344 or MGT 470 or BCIS 485.

MGT 451. Selection, Placement, and Performance Evaluation**3 Credits**

Staffing processes for organizations and the evaluation of employee performance. Use of selection methods and measurement of work behavior.

MGT 453. Leadership and Motivation**3 Credits**

Theories of leadership and motivation. Motivational programs for complex organizations. Relationships between organizational power, authority, and management styles. Crosslisted with: I E 453

MGT 454. Work Teams in Organizations**3 Credits**

Theories of small groups and their application to the work situation. Why and how groups form, grow, communicate, and maintain themselves.

Prerequisites: senior or above standing.

MGT 458. Comparative International Management**3 Credits**

Cultural influences on management are examined in a global business environment with a particular emphasis on human behavior in multinational organizations and the management of human resources. Same as I B 458.

MGT 460. Compensation Management**3 Credits**

An overview of wage and salary administration, including job evaluation, wage and salary surveys, program administration, legal aspects of pay systems, and benefits administration.

Prerequisite(s): MGT 332 or consent of instructor.

MGT 461. New Venture Creation**3 Credits**

Via problem-based learning, teams define new business ventures to meet current market needs, develop business plans, and prepare to present to investors. SAME AS MKTG 461

MGT 465. Contemporary Issues in Human Resources Management**3 Credits**

Integrative course in human resources management, emphasizing the application of advanced concepts to complex personnel cases.

Prerequisite: MGT 332.

MGT 466. Managing Electronic Commerce: A Business Models Perspective**3 Credits**

Surveys the emerging Internet technology involving business to business, business to consumer, and consumer to consumer forms of trade. Covers quantitative decision and negotiation analysis techniques as well as auction and market trade mechanisms.

MGT 470. Project Management in Organizations**3 Credits**

Roles, responsibilities, and techniques of project managers in managing projects effectively. Preparation for professional certification.

MGT 490. Selected Topics**1-18 Credits (1-18)**

Seminars in selected current topics in the various areas of management and administration. Prerequisites vary according to the seminar being offered.

MGT 491. Management Internship and Cooperative Education II**1-3 Credits**

Covers the application of management skills to the work environment. The amount of academic credit (1-3 cr.) will be determined by the academic experience and not be the work experience. May be repeated for a maximum of 3 credits. Restricted to majors and minors.

Prerequisite: MGT 309 and consent of instructor.

MGT 498. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with the prior approval of the department head. A maximum of 3 credits may be earned.

Prerequisites: junior or above standing and consent of instructor.

MGT 502. Operations Management**3 Credits**

Systems and specialized models applied to the management of production facilities and service operations, including physical and human resources.

Prerequisite(s): Graduate students only.

MGT 503. Organizational Behavior and Management Processes**3 Credits**

Covers the theory and practice related to the successful management of human resources in organizations operating within a dynamic global environment. Course goals include developing alternative frameworks for analyzing issues related to human behavior, management science, and organizational structure and theory.

Prerequisite: graduate students only.

MGT 512. Quantitative Analysis for Business Decisions**3 Credits**

Identification, collection, and analysis of an organization's data both internal and external, and use of the resultant information in managerial decision making.

Prerequisite: graduate students only.

MGT 527. Negotiation and Business Dispute Resolution**3 Credits**

Same as BLAW 527.

MGT 545. Seminar in Human Resources Management**3 Credits**

Systems, theories, and methods of managing human resources for optimum productivity.

MGT 548. Business Consulting**3 Credits**

Study, analysis, and presentation of recommendations for solving significant problems confronting businesses. Same as MGT 448 with differentiated assignments for graduate students.

MGT 590. Strategic Management**3 Credits**

Covers the integration of functional, human, technological, and environmental aspects of business within the framework of management policy and strategy formulation. Formulate, implement, evaluate and control the various functions of the organization from a systems perspective. Understand the external environment and its impact on the organization. Restricted to majors.

Prerequisite: M.B.A. student in his or her final semester.

MGT 591. New Venture Creation**3 Credits**

Via problem-based learning, teams define new business ventures to meet current market needs, develop business plans, and prepare to present to investors. Same as MGT 461 with differentiated assignments for graduate students. Crosslisted with: MKTG 591.

MGT 598. Special Research Programs**1-3 Credits**

Individual investigations either analytical or experimental. A maximum of 6 credits may be earned.

Prerequisite: consent of instructor.

MGT 600. Doctoral Research**1-15 Credits**

This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination. Restricted to management majors.

MGT 601. Research in Management**1 Credit**

Ph.D. course provides opportunities for significant interaction between Management faculty and Management Ph.D. students. The course also provides opportunities for development of professional scholarly standards, ethics, and critiques, as well as insight into current research areas and topics supported by the Management Department and other relevant disciplinary areas. May be repeated for a maximum of 6 credits. Restricted to Ph.D. students. Graded S/U.

MGT 640. Instructional Development for Teaching Business**3 Credits**

Pedagogical issues and techniques in collegiate business education. Includes course and curriculum development, outcomes assessment, class management, and teaching techniques. Practical issues faced in college instruction. Restricted to doctoral students.

MGT 645. Seminar in Human Resources Management**3 Credits**

Seminar will address current issues in human resources management. Focus on research related to the selection, development, and effective use of human resources. Restricted to doctoral students.

MGT 650. Seminar in Organizational Behavior**3 Credits**

Seminar will include specific organizational behavior topics; motivation, leadership, group and inter-group relations, and attitude theory. Focus on current research and theory. Restricted to doctoral students.

MGT 655. Seminar in Organizational Systems and Theory**3 Credits**

Analysis of organizations from a macro perspective. Topics include organizational theory, organizational design, organizational environment, and sociotechnical systems. Restricted to doctoral students.

MGT 660. Research Design and Methodology**3 Credits**

Topics will include philosophy of science, theory building, and research methods applicable to the study of organizational behavior. Restricted to doctoral students.

MGT 661. Qualitative Research Methods**3 Credits**

In-depth coverage of selected topics in research methodology, including theory and logic of scientific investigation, grounded theory, action research, and ethnomethodology. Restricted to doctoral students.

MGT 675. Seminar in Strategic Management**3 Credits**

Survey of current and classical readings in strategy. Introduces the doctoral level student to strategic issues, strategic topics for research, and publication venues. Restricted to doctoral students.

MGT 685. Story Consulting to Organizations**3 Credits**

Apply various qualitative story and narrative research methods (plot analysis, script analysis, life history, and restoring) to action research consulting project. Students will conduct story assessment and (propose or enact) intervention with a local consenting organization. Restricted to doctoral students.

MGT 690. Special Topics**3 Credits**

Seminars in selected current topics in the various areas of management. May be repeated for unlimited credit. Restricted to doctoral students.

Prerequisite(s): Vary according to seminar being offered.

MGT 698. Special Topics**1-3 Credits**

Prerequisite: consent of instructor.

MGT 700. Doctoral Dissertation**15 Credits**

Prerequisite: advancement to candidacy.

Management - Bachelor of Business Administration

The Department of Management invites you to consider a major in management. Do you like to work with people? Need help solving people problems at work? Hope to start your own business? Want to run an environmental project, or a bank, a store, a farm or a government agency? Are you interested in how people from diverse backgrounds work together to achieve common goals? If you answered yes to any of these questions, you should consider a major in management. The mission of the department is to prepare graduates, with a Bachelor of Business Administration, for management careers in a broad spectrum of New Mexico, national and globally oriented businesses. Management graduates work in small and large agricultural, manufacturing, government, transportation, public utility, merchandising, health care, environmental and communications organizations among others.

The study of management offers the opportunity to develop skills in utilizing human, physical and economic resources to achieve organizational objectives. These are important cross-functional skills in today's competitive job market. Students will acquire the skills and knowledge to develop their potential and to lead others in a common mission. Management majors may choose from program options in human resource management, managerial leadership, project and supply chain management or small business management and entrepreneurship.

Every candidate for this major must fulfill the following requirements in addition to the general education common core, College of Business foundation and the business core, Viewing a Wider World requirements and general electives (see above). Students will choose one or more of the four options that follow.

Concentration: Human Resource Management

Major Courses

MGT 332	Human Resources Management	3
MGT 451	Selection, Placement, and Performance Evaluation	3
MGT 460	Compensation Management	3
MGT 458	Comparative International Management	3
or MGT 465	Contemporary Issues in Human Resources Management	
Electives in management, upper division		12

Marketing

Undergraduate Program Information

Marketing majors learn skills and knowledge relevant to the co-creation of goods, services and ideas that uniquely meet the needs and wants of global customer markets and society at large. Career opportunities exist in marketing management, advertising, market research, promotion management, sales and sales management, social media, distribution management, and retailing. The major is designed to allow a great deal of choice so students may emphasize any combinations of these areas.

Most marketing majors enter into careers in business firms, although some find job opportunities in governmental and other nonprofit organizations. Still others become involved in owning and managing their own companies. Opportunities in entrepreneurship and small business are expanding at a rapid pace.

Graduate Program Information

The College offers a program leading to a Ph.D. degree (Doctor of Philosophy in Business Administration) (p. 423). The faculty of the Ph.D. Program in Business Administration is committed to training researchers and educators who will shape business scholarship, practice, and pedagogy. The program emphasizes preparing candidates to understand the complexities of modern business while they develop a specialized area of expertise in marketing or management. The Ph.D. in Business Administration provides graduates with the opportunity to pursue a variety of career paths within academia and within industry. Currently a concentration is offered in marketing.

Degrees for the Department

Marketing - Bachelor of Business Administration (p. 450)

Minors for the Department

Advertising - Undergraduate Minor (p. 449)

Marketing - Undergraduate Minor (p. 450)

Professional Selling - Undergraduate Minor (p. 450)

Sports Marketing - Undergraduate Minor (p. 450)

Professor, Nancy A. Oretskin, Interim Department Head

Professors Hyman, Jasso, Plouffe, Payne; **Associate Professor** Niculescu; **College Professor** Gavin; **College Assistant Professors** Blaugrund, Holguin; **Emeritus Professors** Peterson, Sautter

MKTG 180. PGA Golf Management Freshman Orientation

3 Credits

Introduction to the Policies and Procedures of the PGA Golf Mgt. Program and the PGA of America Students will also be introduced to the Qualifying Level of the PGA's Educational Program, Rules of Golf, PGA Constitution and the History of the PAG. Additional course fee required. Consent of Instructor required. Restricted to: PGA Golf Management Students. MKTG/PGM majors.

3 Credits

Introduction of Level 1 of the PGA's Educational Program. This class will focus on Business Planning and Operations, Customer Relations, and the corresponding PGA Work Experience Activities. Additional course fee required. Consent of Instructor required. Restricted to: MKTG/PGM majors.

MKTG 203. Introduction to Marketing

3 Credits

Covers processes, functions and principles in the current marketing system. Includes role of marketing in the economy, types of markets, product development, distribution channels, pricing and promotion strategies, market research and management of the processes. Community Colleges only.

MKTG 280. Level 1, PGA's PGM Education Program (Part 2)

3 Credits

Continuation of Level 1 of the PGA's PGM Education Program. This class will focus on Tournament Operations, Golf Car Fleet Management and the corresponding PGA Work Experience Activities. Students will also be required to provide an internship evaluation report. Additional course fee required. Consent of Instructor required. Restricted to: MKTG/PGM majors.

MKTG 281. Level 1, PGA's PGM Education Program (Part 3)

1.5 Credits

Completion of Level 1 of the PGA's PGM Education Program. This class will focus on Introduction to Teaching and Golf Club Performance and the corresponding PGA Work Experience Activities. Additional course fee required. Consent of Instructor required. Restricted to: MKTG/PGM majors.

MKTG 303. Principles of Marketing

3 Credits

Process, functions, and principles in the current marketing system.

MKTG 305. Marketing Food and Agricultural Products

3 Credits

Same as AG E 305. Crosslisted with: AG E 305.

MKTG 310. Marketing Research

3 Credits

Design, collection analysis, and presentation of research data.

Prerequisites: A ST/STAT 251G or consent of instructor.

MKTG 311V. Consumer Behavior

3 Credits

The different aspects of consumer behavior and the variables affecting consumer decisions. Analysis of current concepts and models.

MKTG 312. Personal Selling

3 Credits

Implementation of the promotion process through interpersonal communications between salesperson and prospects. Serving customers by sales representatives.

MKTG 313. Retail Management**3 Credits**

Investigates retail business operations and focuses on the strategic profit model, store location, layout, display, merchandising, operations, and personnel.

MKTG 314. Advertising Strategy**3 Credits**

Utilization of advertising as a business administration function; communication with consumers as a means of attaining marketing goals.

MKTG 317. International Marketing**3 Credits**

Focuses on decisions relating to entering markets, market segmentation, marketing strategies, and tactics in the international arena. Same as IB 317.

MKTG 324. Product/Service Development**3 Credits**

Covers product innovation, development, commercialization and resource recovery, price determination and administration strategies, and complementing planning processes.

MKTG 354. Sports Marketing**3 Credits**

The application of marketing concepts to the sports industry. Topics include fans/customers, products, and promotions across a range of sports.

MKTG 357. Internet and Social Media Marketing**3 Credits**

Focuses on the consumer psychology and marketing strategies at work in advertising and selling brands via the Internet and social media networks.

MKTG 380. Level 2, PGA's PGM Education Program (Part 1)**1.5 Credits**

Introduction to Level 2 of the PGA's PGM Education Program. This class will focus on Merchandising and Inventory Management, Golf Operations and the corresponding PGA Work Experience Activities. Students will also be required to provide an internship evaluation report. Additional course fee required. Consent of Instructor required. Restricted to: MKTG/PGM majors.

MKTG 381. Level 2, PGA's PGM Education Program (Part 2)**1.5 Credits**

Completion of Level 2 of the PGA's PGM Education Program. This class will focus on Turfgrass Management, Intermediate Teaching and Golf Club Alteration and corresponding PGA Work Experience Activities. Additional course fee required. Consent of Instructor required. Restricted to: MKTG/PGM majors.

MKTG 400. Marketing Internship/Field Experience**3 Credits**

Internship of field experience in application of marketing principles. The student must accept an internship before being allowed to enroll in the course. Consent of instructor required. Restricted to MKTG majors.

MKTG 404. Business-to-Business Marketing**3 Credits**

Covers suppliers and buyers roles in industry; procurement, vendor selection, marketing research, selling techniques, sales force management; quality/quantity determination.

MKTG 414. Athletics Business Administration**3 Credits**

This course examines the marketing and operations of sports programs with emphasis on Division I Collegiate Programs. Topics include event management, ticketing, marketing, trademark and licensing, NCAA compliance, development, finance, contracts, facility maintenance, television, and the roles and responsibilities of the coaches.

MKTG 449. Promotion Management**3 Credits**

Covers concepts and problems in the use of advertising, internet marketing, social media marketing, personal selling, publicity, and other forms of promotion; planning, coordination, control, and evaluation of effectiveness.

MKTG 451. Food and Agribusiness Market Assessment and Research**3 Credits**

Same as AG E 451. Consent of Instructor required. Crosslisted with: AG E 451.

MKTG 453. Sales Management**3 Credits**

The nature of the sales management function in industry. Focuses on intra and interdepartmental sales management activities.

Prerequisite(s): MKTG 312.

MKTG 461. New Venture Creation**3 Credits**

Via problem-based learning, teams define new business ventures to meet current market needs, develop business plans and prepare to present to investors. Same as MGT 461.

MKTG 462. Advanced Sales**3 Credits**

Advanced instruction and skill development in interpersonal communication skills to broaden understanding of the professional sales role (especially in team selling situation), career management, personal productivity, negotiation, and coordination with other functional areas. May be repeated up to 3 credits.

Prerequisite(s): MKTG 312.

MKTG 480. Level 3, PGA's PGM Education Program (Part 1)**1.5 Credits**

Introduction to Level 3 of the PGA's PGM Education Program. This class will focus on Human Resource Management/Supervising and Delegating, Food and Beverage and the corresponding PGA Work Experience Activities. Students will also be required to provide an internship evaluation report. Additional course fee required. Consent of Instructor required. Restricted to: MKTG/PGM majors.

MKTG 481. Level 2, PGA's PGM Education Program (Part 2)/ Final Experience**3 Credits**

Completion of Level 3 of the PGA's PGM Education Program. This Class will focus on Advanced Teaching and Club fitting, Player Development/Teaching Business. The Final Experience and the corresponding PGA Work Experience Activities. Please note that the following are requirements for successful completion of this senior level PGA Golf Management capstone course: 16 months of internship, completion of the Qualifying Level, Level 1, Level 2, and Level 3 of the PGA's PGM Education Program and successful completion of the PGA's Playing Ability Test. Consent of Instructor required. Restricted to: MKTG/PGM majors.

MKTG 489. Strategy and Policy**3 Credits**

Techniques and analysis of marketing strategy and policy planning and formulation.

Prerequisites: senior standing or consent of instructor.

MKTG 490. Selected Topics**1-18 Credits (1-18)**

Covers materials and subjects not offered in regular Marketing courses. Students can take 18 credit hours of MKTG 490 if each class is a different subtitle. A maximum of 18 credit hours can be earned through MKTG 490.

MKTG 498. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with the prior approval of the department head. A maximum of 3 credits may be earned.

Prerequisites: junior or above standing and consent of instructor.

MKTG 500. Concepts in Marketing**1 Credit**

An overview of fundamental principles of Marketing necessary for prospective MBA students who do not have an undergraduate background in Marketing. Includes: Terminology, basic functions and responsibilities associated with practice of marketing.

Prerequisite(s): Admitted to MBA program or consent of course department.

MKTG 503. Marketing Management**3 Credits**

Analysis of marketing problems and the integration of organizational resources as well as behavioral and quantitative techniques into the development and implementation of solutions. Graduate students only.

Prerequisite(s): MKTG 303 or equivalent with a grade of B or better.

MKTG 591. New Venture Creation**3 Credits**

Via problem-based learning, teams define new business ventures to meet current market needs, develop business plans and prepare to present to investors. Same as MKTG 461 with differentiated assignments for graduate students. Crosslisted with: MGT 591.

MKTG 601. Marketing Management**3 Credits**

Covers the conceptual foundations of contemporary marketing management research, concepts, and literature. Fundamental to the understanding of contemporary marketing and the breadth of the field of marketing study.

MKTG 610. Marketing and the Scientific Method**3 Credits**

Issues related to the evolution of research philosophies and methodologies. Critical to the development of appreciation for the value of research and experimentation.

MKTG 620. Research- Theory Interface**3 Credits**

Theoretical and methodological issues involved in translating a theory into a research study. Prepares Ph.D. students to undertake dissertation research. Consent of instructor required.

MKTG 625. Consumer Behavior**3 Credits**

Extensive reading of seminal and contemporary articles on consumer behavior and developing original research to explore cross-disciplinary issues relevant to the study of marketing.

MKTG 640. Measurement and Structural Equation Modeling**3 Credits**

Explores theories of measurement that underlie all quantitative analysis, including the use of structural equation models. Contrasts classical test theory with item response theory and generalizability theory. Covers PRELIS and LISREL, and critiquing structural equation models by other researchers.

Prerequisite: MKTG 630 or equivalent.

MKTG 670. Marketing Theory**3 Credits**

The evolution, development, construction, and evaluation of the major theoretical perspectives of marketing. Fundamental to the understanding of contemporary marketing and preparation for investigations into the nature and role of theory in marketing.

MKTG 690. Special Topics in Marketing**3 Credits**

A seminar on special topics in marketing. The topic of the course will vary according to the needs of the students in the program and the instructor. Ph.D. students may repeat this course up to three times for a maximum total of 9 credits.

MKTG 698. Selected Topics**1-9 Credits (1-9)**

Materials and subjects not offered in regular marketing courses. May be repeated for a maximum of 18 credits under different subtitles.

MKTG 700. Doctoral Dissertation**15 Credits**

Prerequisite: advancement to candidacy.

COLLEGE OF EDUCATION

Dean - *Don Pope-Davis*

Associate Dean for Academic Affairs- *Enedina García Vázquez*

Interim Associate Dean for Research - *Susan Brown*

Assistant Dean for Budget and Finance - *Juanita Hannan*

Assistant Dean - *Gladys De Necochea*

General Undergraduate Requirements

1. Entering freshman with an ACT score of 17 or lower will be invited to take a study skills class to ensure a successful college experience.
2. Complete at least 120 - 132 acceptable credits, including a minimum of 48 credits in courses numbered 300 or above with a cumulative GPA of 2.5 or above.
3. Satisfy the general education requirements. Detailed programs are available in the Center for Academic Advising and Support Services (CAASS) and the Office of Teacher Candidate Preparation.
4. Students must complete all professional education courses and all courses in their teaching field or major with a grade of C- or better.
5. All students, including transfer students, must complete the last 30 semester credits required for the baccalaureate degree on the New Mexico State University campus. The four-year Servicemen's Opportunity College Program students are not exempt from this regulation.
6. All majors require a minimum 2.5 cumulative GPA to graduate, except Communication Disorders, which requires a 3.0 cumulative GPA.
7. Students in teacher preparation programs must be officially admitted to the Teacher Education Program. See requirements under Admission to the Teacher Education program and Competitive Admission Process.
8. In addition, if faculty at any time determine that a student is weak in a particular skill, the College of Education may require remedial procedures.

General Education Requirements

1. Nine to ten credits in General Education Area I (language arts); twelve to thirteen for elementary education
2. Six credits in General Education Area II (mathematics)
3. Eight credits in General Education Area III (laboratory science)
4. Nine credits from General Education Area IV (social/behavioral sciences)
5. Nine credits in General Education Area V (humanities and fine arts)

Transferring Undergraduate Courses

Certain College of Education courses have been identified as transferable from NMSU to other public two-year and four-year institutions in New Mexico. The equivalent course at other institutions can be identified using the common course number. Similarly, students from other institutions can use the common course number to identify education courses that can be transferred to NMSU.

Competitive Undergraduate Admission Process for Teacher Education Program

Applicants who successfully complete the minimum requirements for admission will be reviewed by the Teacher Education Program admission committee. The admission committee will base acceptance decisions on the applicant's academic qualifications, written communication, faculty recommendations, dispositions and the student's portfolio.

Even though students declare their majors when they enter New Mexico State University, teacher candidates are not officially admitted to the Teacher Education Program until they formally apply and meet the following requirements:

1. A cumulative grade-point average of at least 2.5.
2. Must complete 55 credit hours.
3. Complete appropriate program prerequisites. See Office of Teacher Candidate Preparation for specific program prerequisites.
4. Demonstration of competence in reading, mathematics, and composition by passing the New Mexico Teacher Assessments Basic Skills Test or the Essential Academic Skills component of the Pearson NES test.
5. Students seeking admission to TEP must purchase TK20 Assessment Tool.
6. Submit a portfolio for admission to the Teacher Education Program. The portfolio will be reviewed by faculty. Admission to TEP is contingent on faculty approval. See the Office of Teacher Candidate Preparation for further clarification.

Applicants should be aware that admission to the Teacher Education Program is competitive and is based upon available faculty resources. Posted GPA and basic skills test scores are minimums which are necessary to be considered for admission by the Teacher Education Program committee and do not ensure admittance into programs. Applicants are encouraged to develop a strong student portfolio, achieve the highest GPA possible, and present the portfolio in a professional manner.

Transfer students will have their transcripts evaluated by the Registrar's Office and must meet all basic skills requirements, as well as be admitted to the Teacher Education Program through the formal application procedures.

Students who are not admitted may not take designated professional education courses numbered above 299. Students with a bachelor's degree seeking teacher licensure must meet all admission criteria for the Teacher Education Program and be admitted to the Graduate School.

Students must be officially approved for student teaching during his/her senior year. Prior to student teaching, complete teaching field requirements, and pass the Pearson NES Assessments test.

Each student must possess the academic ability, character, and disposition suitable for teaching. A student who, in the professional judgment of the faculty and staff, does not possess these qualifications may be examined by a Selective Review Committee. The committee may recommend any of a variety of actions, ranging from remedial procedures to withdrawal from the College.

Students with a bachelor's degree seeking teacher licensure must meet all admission criteria for the Teacher Education Program and be admitted to the Graduate School.

Suggested Program of Study

Requirements of a general nature and for each endorsement are available in the Center for Academic Advising and Support Services (CAASS) and Office of Teacher Candidate Preparation. It is imperative that students, especially those new to the campus, report frequently to CAASS to have their programs carefully and continually monitored in line with newly developing requirements.

All students henceforth will pursue a baccalaureate program leading to a Level I Teaching License. All students must work with an academic advisor to ensure a complete program of study for their specific degree.

Undergraduate Students with Degrees Seeking Certification Only

All students who already have a bachelor's degree and who are seeking licensure must be admitted through a graduate licensing program. Details are available in the advisement center.

Time Limit on Undergraduate Teacher Education Courses

Any education course more than seven years old taken at NMSU or at another institution will not be counted toward the student's undergraduate program. A student may meet with the appropriate department to have the courses time limit reviewed. The department head and/or faculty may recommend accepting a course that is seven years old with approval from the Dean's office. Any course not approved must be repeated by the student.

Withdrawing Undergraduate Teacher Education Students

The College of Education reserves the right to withdraw students who are registered in 300-level or above teacher education courses who are not admitted to the Teacher Education Program.

Undergraduate Admission to Student Teaching

To be admitted to student teaching a student must:

1. Students must be officially approved for student teaching during his/her senior year.
2. Submit complete formal application to the Office of Teacher Candidate Preparation by March 9 for spring and by October 9 for fall a year prior to student teaching.
3. Maintain a cumulative grade-point average of at least 2.5 prior to beginning student teaching.
4. Complete the teaching field requirements and pass the Subject Area Assessment tests of the Pearson NES or New Mexico Teacher Assessment Content test.
5. Complete all requirements to student teaching (details available from the Office of Teacher Candidate Preparation).
6. Students must complete all professional education courses and all courses in the student's teaching field with a grade of C- or better.
7. Admission to Student Teaching is contingent upon faculty approval.

Students who do not meet all College of Education requirements for admission to student teaching will not be allowed to begin their student teaching until those requirements are met.

Student teachers can only be placed within an 80-mile radius of the campus within the state of New Mexico.

Undergraduate Student Teaching Expectations

During the senior year, students must keep their last semester free from other responsibilities so that they can fully devote their time to their student teaching responsibilities. Students are expected to follow the public school calendar rather than the university calendar. Student teachers should expect to meet all requirements of the school and school district in which they are working.

Undergraduate Licensure Requirements

In the event that state teacher licensure requirements change, students preparing for licensure to teach should keep abreast of the licensure requirements of the New Mexico Public Education Department. Copies of the rules and regulations governing licensure are available for students in the Office of Teacher Candidate Preparation. College of Education requirements meet or exceed the state licensure requirements. Whenever state licensure requirements are less than College of Education requirements, students must meet the College of Education requirements to receive a degree from or be recommended for licensure by NMSU. The College of Education reserves the right to change its requirements at any time in order to comply with changes in the regulations governing licensure.

Applying for teacher licensure is the responsibility of the student. The New Mexico Public Education Department grants licensure.

The State of New Mexico requires that all candidates for licensure take and pass the state license examination: NMTA Competency or the Pearson NES Profession Knowledge exam. In addition, for elementary education majors the NES: Essential Components of Elementary Reading Instruction is a requirement for licensure. The tests are administered throughout the year and information is available through NES website (<http://nestest.com>).

Graduate Work

The College of Education offers curricula leading to the degrees of

- Master of Arts,
- Master of Arts in Teaching (p. 463),
- Specialist in Education (p. 463),
- Doctor of Education and
- Doctor of Philosophy in Education.

Those interested in pursuing graduate degrees in education should consult the Graduate Catalog for full information. A copy may be procured by writing the dean of the Graduate School or visiting <http://gradschool.nmsu.edu>.

Bachelor Degrees

Bachelor of Applied Studies

Majors in:

- Zero to Four Non-Licensure Track (Early Childhood) (p. 463)

Bachelor of Arts in Dance (p. 488)

Bachelor of Science in Athletic Training (p. 488)

- Educational Administration (p. 481)
 - Focus in: Higher Education Administration
 - Focus in: Pk-12 School Administration
- Indigenous Ways of Knowing (p. 455)
- Integrated Behavioral Health Care (p. 455)
- Spanish Counseling (p. 455)
- Special Education (p. 508)

Accreditation

The College of Education provides undergraduate students with a broad general education and professional teacher preparation. The university's teacher preparation program, which involves several colleges and which is directed by the College of Education, was accredited in 1962 by the National Council for the Accreditation of Teacher Education. Also in the College of Education the Communication Disorders master's program in Speech-Language Pathology is accredited by the American Speech-Language-Hearing Association (CAA - ASHA), and the undergraduate Athletic Training Degree in Human Performance, Dance and Recreation is accredited by the Commission on Accreditation of Athletic Training Education (CAATE). The undergraduate and graduate programs that prepare individuals for licensure to work in public and private schools in New Mexico have been approved by the New Mexico State Board of Education.

Other programs with national recognition include the Master of Arts (MA) in Clinical Mental Health Counseling, accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP); the Specialist in Education (Ed. S.) in school psychology, accredited by the National Association of School Psychologists (NASP) and the doctoral (Ph. D.) program in counseling psychology accredited by the American Psychological Association (APA). The post-doctoral program in Clinical Psychopharmacology holds APA designation.

Counseling and Educational Psychology

Undergraduate Program Information

The BS in Counseling and Community Psychology (CCP) prepares students to work at the bachelors level with a focus on case management, interpersonal skills, understanding human behavior, multicultural awareness, awareness of mental health issues and licensure as a substance abuse counselor. The Counseling and Community Psychology undergraduate major prepares students for graduate school in order to become practitioners in the field of psychology with an additional focus on research and graduate psychology practice opportunities.

Graduate Program Information

The major thrust of the Counseling and Educational Psychology (CEP) Department is the preparation of personnel for work in counseling, educational diagnostics, school psychology, counseling psychology and related areas. Three graduate degrees are available:

1. Masters of Arts
2. Specialist in Education
3. Doctor of Philosophy

Departmental Admission Requirements

Admission requirements and procedures are specific to each degree program in the Department of Counseling and Educational Psychology. Applicants must meet the basic admission requirements of the Graduate School before they are considered for admission to CEP graduate programs. To be considered for admission to CEP Graduate Programs, application requirements include, but are not limited to the following:

1. Graduate Record Examination (GRE) scores from within the last 5 years
2. Completion and submission of NMSU on-line graduate application form and fee
3. Receipt of official undergraduate and graduate transcripts of all colleges and universities previously attended by the NMSU Admissions Office
4. Letters of recommendation from three persons familiar with the applicant's academic and/or professional record
5. Curriculum vitae or resume which includes a list of completed upper-division and/or graduate coursework related to counseling, school psychology, counseling psychology or related professions.
6. Letter of intent and/or statement of purpose
7. Interviews are required as a part of the selection process

For more information about the CEP Department, program admission procedures and requirements of degree programs, contact the department office or visit the departmental website.

Degrees for the Department

Counseling and Community Psychology - Bachelor of Science (p. 461)

Clinical Mental Health Counseling - Master of Arts (p. 460)

School Psychology - Specialist in Education (p. 462)

Pope-Davis, Ph.D. (Stanford University)–multicultural counseling, education and psychology; I. Torres-Fernandez, Ph.D. (University of Iowa)– school psychology, prevention, classroom guidance; L. L. Grayshield, Ph.D. (University of Nevada-Reno)– indigenous culture based methods in counseling & educational psychology; T. Hitter, Ph.D., (New Mexico State University)–counseling psychology, identity and self-concept, sexuality and sexual satisfaction; A. L. Lopez, Ph.D. (University of Texas-San Antonio)-multicultural counseling, social justice, immigration, bilingual counseling/supervision, eating disorders and body image; A. Pérez-Rojas, Ph.D. (University of Maryland)– psychotherapy process and outcome with emphasis on the therapeutic relationship, college student mental health, bilingualism, acculturation, Latino/a mental health, and role of culture in psychotherapy; E. Vázquez, Ph.D. (University of Iowa)– school psychology, assessment, psychoeducational interventions, acculturation, ethnic and linguistic diversity; L. Vázquez, Ph.D. (University of Iowa)– counseling psychology, multicultural curriculum development and counseling, bilingual therapy, acculturation, identity development, and phenotype research.

C EP 110G. Human Growth and Behavior 3 Credits

Introduction to the principles of human growth and development throughout the life span.

C EP 199. Academic Excellence 1 Credit

Academic curriculum of excellence that includes the development of collaborative learning and student success environment, learning diverse learning styles and multiple intelligences, and developing multi-contextual academic communication styles. Students must enroll in course for both Fall and Spring semesters. Course does not count toward CEP minor. May be repeated up to 2 credits.

C EP 210. Educational Psychology 3 Credits

Psychological foundations as they apply to the learner in the class room setting.

C EP 215. The Preschool Child**3 Credits**

Survey of psychological development from conception to age five.

C EP 240. Adolescence in School Settings**3 Credits**

Survey of psychological development during the adolescent years.

C EP 298. Exploration of Counseling & Community Psychology**3 Credits**

An exploration of careers, activities, & techniques in counseling, school, and community psychology. Course does not count towards CEP minor. May be repeated up to 6 credits.

C EP 299. Academic Excellence Classes**1-6 Credits (1-6)**

Academic curriculum of excellence that includes an in-depth understanding of the elements that promote student academic success. Students will develop leadership and presentation skills needed to forge effective student mentor relationships and conduct outreach to campus and local community leaders to cultivate a collaborative learning environment. May be repeated up to 6 credits.

C EP 300V. Human Relations Training**3 Credits**

Gain skills, knowledge, and sensitivity for living and working with others.

C EP 320. Sex Roles in Education**3 Credits**

Physiological, psychological, and political aspects of sex role socialization and the effects of these factors on personal development.

C EP 420. Introduction of Mindfulness Practice**3 Credits**

Students will learn about contemplative practices through learning and participation in various mindfulness practices. Engages students in a practice or experience that leads to reflection and, thus, acquired knowledge about themselves, others, and group functioning.

C EP 451V. Introduction to Counseling**3 Credits**

Principles of counseling for nonmajors.

C EP 455. Addictions Prevention and Recovery**3 Credits**

Understanding addictions process, prevention, and recovery, including biological, interpersonal and sociological influences, and intervention strategies. Taught with C EP 555.

C EP 461. Family Guidance**3 Credits**

Systems based guidance procedures for enhancing family strengths and development, and application of family guidance procedures for prevention and remediation of problems. Taught with C EP 561.

Prerequisite(s): C EP 110G.

C EP 495. Psychology, Multiculturalism and Counseling**3 Credits**

Understanding social identities such as race, ethnicity, sexual orientation, age, social class and spirituality as it relates to psychosocial development, academic achievement and counseling.

C EP 498. Internship in Counseling & Community Psychology**1-6 Credits (1-6)**

Students will explore in more depth the fields of counseling, community, and school psychology professions by completing an internship. Through the completion of the internship students will gain hands on work experience, enhance sensitivity for respect with working with diverse populations, and hone their interpersonal skills needed to succeed in the counseling, community, and school psychology professions. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: CCP majors.

C EP 499. Independent Study**1-6 Credits**

Individual study directed by consenting faculty.

C EP 503. Introduction to Counseling**3 Credits**

Overview of counseling theory, techniques, ethics, and professional issues. Same as C EP 451V. This course is open to all majors.

C EP 505. Appraisal of Psychoeducational Achievement in a Diverse Society**3 Credits**

Advanced theory and use of norm and criterion referenced instruments in the classroom: planning of prescriptive and educational programs. Consent of Instructor required.

C EP 511. Introduction to Inferential Statistics**3 Credits**

An introduction to the theories and techniques of inferential statistics as applied to education and psychology. Includes sampling distributions, confidence intervals, t-test, correlation, and chi-square. Intended primarily for post-baccalaureate students. Both hand calculation and computer packages will be employed. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: NURS; FCS; and all education majors.

C EP 512. Human Development**3 Credits**

Theory and research regarding cognitive, social, and emotional development across the lifespan with emphasis on enhancing human development. This course is open to all majors.

C EP 515. Learning Theory**3 Credits**

Survey and comparison of theory and research regarding human learning as they apply to development, education, and counseling. Crosslisted with: C EP 615

Prerequisite(s): C EP 512 or consent of instructor.

C EP 517. Multicultural Counseling**3 Credits**

Understanding age, gender, ethnicity, socioeconomic status and culture in relation to human development, education, and counseling.

Prerequisite(s)/Corequisite(s): C EP 512 or concurrent enrollment or consent of instructor.

C EP 519. Psychology of Social Identities**3 Credits**

Theory, research and practice from feminist and multicultural perspectives will examine the integration of social identities such as gender, sexual orientation, race, ethnicity, age, social class, spirituality, and ability in relation to counseling psychology. Same as C EP 619.

Prerequisite: C EP 512 or concurrent enrollment or consent of instructor.

C EP 520. The Art & Science of Mindfulness**1-3 Credits (1-3)**

In this course students will learn about contemplative practices by learning about and participating in various mindfulness practices for self-care and to increase well-being. Students will learn about psychological theories and research that support the use of mindfulness in helping others increase their well-being. Students will learn how to teach mindfulness to others. Taught with CEP 490.

C EP 522. Organization and Administration of School Counseling Services**3 Credits**

Procedures for establishing and maintaining counseling programs in the schools. Professional and ethical issues in school counseling and group laboratory experience to enhance self-awareness and interpersonal skills for effective professional relationships. Restricted to majors.

Prerequisite: consent of instructor.

C EP 524. Professional Issues in Mental Health Counseling**3 Credits**

History, roles, organizational structures, settings, ethics, standards, laws, and credentialing related to mental health counseling. Group laboratory experience to enhance self-awareness and interpersonal skills for effective professional relationships. Restricted to majors.

Prerequisite: consent of instructor.

C EP 529. Indigenous Counseling Theory and Practice**3 Credits**

Students will explore current uses of indigenous modes and methods of counseling and therapy that are theoretically consonant with Indigenous/Native traditions. They will examine the integration of such modes to ensure a progressive reconstruction of the counseling endeavor to include an indigenous epistemology in their work with clients. Taught with C EP 429. This course is open to all majors. Consent of Instructor required.

C EP 532. Research Methods**3 Credits**

Develop research and program evaluation including critical literature review, generating questions, quantitative and qualitative methodology, analysis, and writing proposals.

C EP 542. Appraisal Theory and Technique**3 Credits**

Selection, administration, and interpretation of tests and other assessment methods. Topics include reliability, validity, norms, cultural factors, and ethics related to appraisal. May be repeated up to 3 credits. Restricted to: C G, CEP, C EP, CMHC majors.

Prerequisite(s): C EP 512 and C EP 517, or consent of instructor.

C EP 547. Appraisal of Cognitive Functioning**3 Credits**

Selection, administration, scoring, interpretation, and report writing using individual tests of intelligence. Moderator variables, such as acculturation, ethnic identity development, and world view are also incorporated. Restricted to majors. Taught with C EP 647. Consent of instructor required.

Prerequisite(s): C EP 542 and consent of instructor.

C EP 549. Indigenous Research Methods**3 Credits**

Students will gain an understanding of ethical and respectful research practices from an Indigenous/culturally appropriate vantage. They will thoroughly examine the works of Native/Tribal and Indigenous scholarship. Additionally, safeguards for ethical research practices with native populations will be thoroughly examined with regard to intent, practice, and integration of outcome. This course is open to all majors.

C EP 550. Counseling Theory and Technique**3 Credits**

Major theories of counseling with an emphasis on development of the ability to offer theory-based counseling and consultation. May be repeated up to 3 credits. Restricted to: SPSY, CEP, C EP, C G, CMHC majors.

Prerequisite(s): C EP 512, or concurrent enrollment.

C EP 551. Diagnosis and Treatment Planning**3 Credits**

Appraisal and conceptualization of mental disorders and other problems through diagnostic interviewing using the DSM. Treatment planning for counseling with children, adolescents, and adults. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: SPSY, CEP, C EP, C G, CMHC majors.

Prerequisite(s): C EP 512 or concurrent enrollment, or consent of instructor.

C EP 552. Career/Life Planning and Vocational Assessment**3 Credits**

Vocational choice theories, relationship between career choice and life style, sources of occupational and educational information, and approaches to decision making and values clarification. Laboratory involves supervised interpretation of vocational assessment. This course is open to all majors. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

C EP 554. Counseling Theory and Techniques for School Psychologists**3 Credits**

Major theories of counseling with an emphasis on development of the ability to offer theory-based counseling and consultation. May be repeated up to 3 credits. Restricted to: CEP, SPSY, C EP, CMHC majors.

Prerequisite(s): C EP 524, or concurrent enrollment.

C EP 556. Addictions Counseling**3 Credits**

Emphasis on alcohol and other psychoactive substance abuse. Also includes eating disorders, gambling, and other addictive behaviors. Covers review of psychopharmacology, assessment, and diagnosis with the major focus on treatment and professional issues. May be repeated up to 3 credits. Restricted to: CEP, C EP, C G, SPSY, CMHC majors.

Prerequisite(s): C EP 550.

C EP 558. Child and Adolescent Counseling Theory and Technique**3 Credits**

Counseling theory and technique applied to children and adolescents from a developmental perspective in school and mental health settings. May be repeated up to 3 credits. Restricted to: C G, CEP, C EP, CMHC majors.

Prerequisite(s): C EP 550 or consent of instructor.

C EP 559. Healing Trauma, Including Historical and Intergenerational
3 Credits

Students will learn about Trauma to gain a deeper understanding of the socio-political implications of colonization on Native people groups. They will learn about incidents of physical and mental health disparities. Students will thoroughly examine the impact of the current mental health field on Native/Indigenous populations and engage the literature from Native Scholars to problem solve and create new ways to address the challenges that Native people and their communities face as members of mainstream Western society. This course is open to all majors.

C EP 562. Family Therapy Theory and Technique
3 Credits

Major theories of family therapy and associated assessment, intervention and evaluation techniques. Restricted to majors. Taught with C EP 662 except for advanced-level materials and experiential activities. Consent of instructor required.

Prerequisite(s): C EP 550.

C EP 563. Primary Care Psychology
3 Credits

Didactic and experiential learning in primary care psychology issues. Through this course students will learn about the cultural necessity of the integration of mental and physical health issues and multidisciplinary collaboration. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: SPSY, CEP, C EP, C G, CMHC majors.

C EP 566. Group Work Theory and Technique
3 Credits

Didactic and experiential learning in group theory and practice. Laboratory involves experiences in group participation and leadership. May be repeated up to 3 credits. Restricted to: C G, CEP, C EP, CMHC majors.

Prerequisite(s): C EP 550, C EP 562 or consent of instructor.

C EP 569. Indigenous Counseling Internship
1-6 Credits (1-6)

The primary purpose for this course is to provide students with the opportunity to study and practice under a well-known and recognized indigenous healing practitioner with the primary goal of affirming and activating the holistic paradigm of Indigenous knowledge into their work as practitioners in the helping professions to reveal the wealth and richness of Indigenous languages, worldviews, teachings and experiences. Consent of Instructor required.

C EP 572. Counseling Practicum
1-6 Credits

Supervised experience of counseling and consultation. Weekly individual and group supervision involves review of audio, video, and/or live sessions and case presentations. May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: C EP 662. Restricted to: C G, CEP, C EP, CMHC majors.

Prerequisite(s): C EP 550 and consent of instructor.

C EP 578. Advanced Counseling Practicum
3-6 Credits

Supervised experience of appraisal and individual, family, and/or group counseling and consultation serving child, adolescent, and/or adult clients. Weekly individual and group supervision involves review of counseling sessions and case presentations. This course will carry a subtitle to reflect the practicum setting. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: C G, CEP, C EP, CMHC majors.

Prerequisite(s): C EP 572, C EP 566, and consent of instructor.

C EP 579. Clinical Psychopharmacology
3 Credits

Basic biological aspects of psychopharmacology with applications to clinical populations and treatment implications. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: C G, SPSY, CEP, C EP, CMHC majors.

Prerequisite(s): Consent of instructor.

C EP 580. Counseling Internship
3-12 Credits

Supervised experience in a professional counselor role in a school or agency. Students perform all counselor functions including appraisal, individual/family/group counseling, consultation, administration, program development, research, and/or evaluation.

Prerequisite(s): C EP 578.

C EP 598. Special Research Programs
1-6 Credits

Individual investigations either analytical or experimental. Maximum of 6 credits per semester and total of 9 credits overall. May be repeated up to 9 credits. Restricted to: CEP, SPSY, C EP, CMHC majors.

C EP 599. Master's Thesis
15 Credits

Thesis. May be repeated up to 88 credits. Restricted to: CEP, SPSY, C EP, CMHC majors. Thesis/Dissertation Grading.

C EP 607. Curriculum-Based Assessment and Intervention
3 Credits

The study and practice of curriculum-based assessment and intervention for academic skills and problems among children and adolescents. Restricted to: SPSY majors.

C EP 608. Diagnostic Class
3 Credits

Emphasis on developing the knowledge, skills, and necessary application abilities related to diagnosis and associated interventions related to mental health and psychopathology issues that impact a student's ability to navigate the education setting.

C EP 612. Human Development
3 Credits

Same as C EP 512 with differentiated assignments for Ed.S and Ph.D. students. This course is open to all doctoral majors. Consent of Instructor required.

C EP 616. Spanish for Mental Health Professionals
3 Credits

This course emphasizes the vocabulary for Mental Health Professionals to include academic, psychological and medical terminology. Students will incorporate Spanish terms in assessment and treatment plans through role plays. Further, the course will include an overview of the use of interpreters and translators in working with culturally and linguistically diverse clientele.

Prerequisite(s): Enrolled in Bilingual School Psychology Training Grant with instructor consent.

C EP 619. Psychology of Social Identities
3 Credits

Same as C EP 519 with differentiated assignments for Ph.D. students.

C EP 622. Ethical/Professional Issues in Counseling Psychology**3 Credits**

History of counseling psychology, scientist-practitioner model, American Psychological Association's Ethical Principles of Psychologists and Code of Conduct. Focus on current ethical, professional, and scientific issues. Restricted to majors.

Prerequisite: consent of instructor.

C EP 624. Professional Issues in School Psychology**3 Credits**

History, philosophy, and orientation of school psychology. Roles, technology, credentialing, community resources, school system issues, educational and psychology delivery service models, and current professional issues.

C EP 625. Legal and Ethical Issues in School Psychology**3 Credits**

Overview of legal/ethical, and professional standards in school psychology. NASP and APA codes of ethics, NM Mental Health and Children's codes, and child abuse/neglect laws.

Prerequisite(s): C EP 624.

C EP 630. School Psychology Research and Program Evaluation**3 Credits**

Survey and analysis of research and program evaluation procedures in school psychology. Critical review of literature, formulating questions, quantitative and qualitative methodology, and data analysis as foundations for reading research literature and generating research, program evaluation, and/or grant proposals. Consent of Instructor required.

C EP 632. Counseling Psychology Research**3 Credits**

Survey and analysis of research and program evaluation procedures in counseling psychology. Critical review of literature, formulating questions, quantitative and qualitative methodology, and data analysis are covered as a foundation for reading research literature and generating research, program evaluation, and/or grant proposals.

Prerequisite: C EP major or consent of instructor.

C EP 634. Introduction to Qualitative Research**3 Credits**

This course is intended to be an introduction to qualitative research methods for persons wishing to understand, apply, and conduct qualitative studies with human subjects in the fields of counseling and psychology. This course is open to all doctoral majors. Consent of Instructor required.

C EP 636. Advanced Statistics**3 Credits**

An intermediate course focusing on more advanced theories and techniques of inferential statistics as applied to education and psychology. Includes ANOVA, planned contrasts, ANCOVA, simple regression, and non-parametrics. Both hand calculation and computer packages will be employed.

Prerequisite(s): C EP 511 or equivalent course work.

C EP 637. Multivariate Statistics**3 Credits**

Theories and techniques of multivariate statistics as applied to education and psychology. Includes multiple regression, logistic regression, MANOVA, factor analysis, and structural equation modeling. Computer packages will be the primary tool for data analysis.

Prerequisite(s): C EP 636 or equivalent course work.

C EP 647. Appraisal of Cognitive Functioning**3 Credits**

Taught with C EP 547 with differentiated assignments for doctoral students.

C EP 648. Appraisal of Personality**3 Credits**

Selection, administration, scoring, interpretation, and report writing using major objective and projective tests of personality.

C EP 649. Behavioral Assessment & Intervention**3 Credits**

The course introduces basic concepts, methods, and applications of behavioral assessment and intervention. Students will learn how to conduct functional assessments of behavior and how to write behavior intervention plans. Methods appropriate for assessment and intervention of school-age children will be emphasized. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: SPSY majors.

C EP 651. Diagnosis and Treatment Planning**3 Credits**

Restricted to majors. Same as C EP 551 with differentiated assignments for Ph.D. students.

Prerequisite: C EP 612 or consent of instructor.

C EP 652. Career/Life Planning and Vocational Assessment**3 Credits**

Same as C EP 552 with differentiated assignments for Ed.S and Ph.D. students. This course is open to all doctoral majors.

C EP 658. Child and Adolescent Counseling Theory and Technique**3 Credits**

Same as C EP 558 with differentiated assignments for Ph.D. students. Consent of Instructor required.

Prerequisite(s): C EP 550 or consent of instructor.

C EP 662. Family Therapy Theory and Technique**3 Credits**

Taught with CEP 562 with differentiated assignments for Ed.S and Ph.D. students. Consent of Instructor required. Crosslisted with: C EP 572.

Prerequisite(s): C EP 550.

C EP 670. Behavioral Health Practicum**1-6 Credits**

An intensive supervised experience in providing behavioral health services at an on or off campus interdisciplinary health setting. Supervision provided by doctoral level psychologist faculty in collaboration with other team disciplines' supervising faculty involves audio, video, and/or live observation of counseling sessions and team interventions and case presentations. Graded: S/U.

C EP 671. Consultation**3 Credits**

Didactic and experimental trainings in theory-based consultation. Supervision provided by faculty involves audio, video, and/or live observation consultation activities and case presentations. Restricted to majors.

Prerequisites: C EP 672, C EP 675, or C EP 678; and consent of instructor.

C EP 672. Practicum in School Psychology: Psychoeducational**1-6 Credits**

Supervised practicum in psychological and educational evaluation. Skill development in ecological assessment, including interviewing, observations micro-counseling, acculturation, world view, and ethnic identity formation. Graded: S/U.

Prerequisite(s): C EP 647, C EP 505 and consent of instructor.

C EP 673. Counseling Psychology Theory/Practicum**1-6 Credits**

Theories of counseling and psychotherapy and their application during supervised counseling with clients. Supervision provided by doctoral psychologist faculty involves audio, video, and/or live observation of counseling sessions and case presentations. Restricted to majors.

Prerequisite: consent of instructor.

C EP 675. Practicum in School Psychology: Psychological**1-6 Credits**

School-based supervised experience for the advanced student. Provides experiences in various roles and models of service delivery (group, multifactored, integrative, family assessments) expected of school psychologists. Restricted to majors. S/U grading option only.

Prerequisites: C EP 672 and consent of instructor.

C EP 676. Field Experience in Educational Diagnostics**1-6 Credits (1-6)**

C EP 676 is designed to provide students with supervised school-based experiences and practices. The goal of the course is for students to master the competencies required for the delivery of academic services in the educational diagnostician role. The specific emphases in this course are placed on a data-based decision-making skills, psychoeducational assessment activities, and academic interventions. Under faculty and school-system staff supervisions, students will assume service delivery responsibilities and with increasing independence will respond to the diagnostic and intervention needs of students. Restricted to: C EP Masters, C EP Ph D majors. S/U Grading (S/U, Audit).

Prerequisite(s): C EP 647, C EP 608, C EP 505, C EP 672.

C EP 677. Group Work Theory/Practicum**1-6 Credits**

Application of theory in group work with clients and in supervising group leaders in training. Supervision provided by doctoral psychologist faculty involves audio, video, and/or live observation of counseling sessions and case presentations. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: CEP, C EP majors.

Prerequisite(s): C EP 673.

C EP 678. Advanced Counseling Psychology Practicum**1-6 Credits**

Supervised counseling psychology experience including appraisal, diagnosis, case conceptualization, treatment planning, theory-based counseling and evaluation. Supervision provided by doctoral psychologist faculty involves audio, video, and/or live observation of counseling sessions and case presentations. Graded: S/U.

Prerequisite(s): C EP 677.

C EP 679. Supervision Theory and Practicum**1-6 Credits**

Didactic and experimental training in theory-based supervision. Supervision provided by doctoral psychologist faculty involves audio, video, and/or live observation of supervision sessions and case presentations. May be repeated for a maximum of 6 credits. Restricted to majors.

Prerequisites: C EP 675 or C EP 678; and consent of instructor.

C EP 680. Internship in Counseling Psychology I**1-18 Credits**

Full-time equivalent of one-half calendar year of internship preferably in an APA-approved or APA-equivalent site. Available to Ph.D. students who have successfully completed their comprehensive exams. May be repeated for a maximum of 18 credits.

C EP 682. Internship in Counseling Psychology II**1-18 Credits**

Full-time equivalent of one-half calendar year of internship preferably in an APA-approved or APA-equivalent site. Available to Ph.D. students who have successfully complete their comprehensive exams. May be repeated for a maximum of 18 credits. Restricted to majors.

Prerequisite: consent of instructor.

C EP 684. Internship in School Psychology**1-12 Credits (1-12)**

Supervised experience in school psychology. May be repeated for a maximum of 12 credits. Consent of instructor required. Graded: S/U. Restricted to School Psychology (SPSY) majors.

Prerequisite(s): C EP 672 , C EP 675.

C EP 693. Dissertation Seminar**3 Credits**

Same as EMD, EDUC, SPED 693.

C EP 698. Selected Topics**1-6 Credits**

Offered under various subtitles which indicate the subject matter covered. A maximum of 6 credits in any one semester and a total of 18 credits overall. Restricted to C EP majors.

C EP 699. Ed.S. Thesis**1-15 Credits**

Study and research at the Specialist in Education level. Each problem to be designated by a qualifying subtitle. Restricted to majors.

C EP 700. Doctoral Dissertation**15 Credits**

Dissertation. Restricted to majors.

Clinical Mental Health Counseling- Master of Arts

The CEP department offers a Clinical Mental Health Counseling program which leads to a Masters of Arts degree (M.A.). The program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). It prepares professional counselors to perform mental health counseling in agencies, hospitals, private practice and schools. Successful completion of the Clinical Mental Health Counseling program qualifies students to pursue licensure as clinical mental health counselors with the New Mexico Counseling and Therapy Practice Board and licensure as school counselors with the New Mexico Department of Education. The 60-credit counseling curriculum requires two years full-time study or three years part time study on campus, and covers the following areas: human development, appraisal; diagnosis; treatment planning; individual, family and group counseling; consultation; career/life planning; addictions; research; and professional issues. Specialized training and supervised experience is offered in mental health agencies, hospitals, and in schools.

Annual application deadline: February 1

Counseling and Educational Psychology - Undergraduate Minor

A minor in Counseling and Educational Psychology (CEP) is available to the student receiving a bachelor's degree from another department in the university. The minor in CEP is designed to be useful to the undergraduate who is preparing to enter one of the helping professions such as psychology, education, social work, criminal justice or nursing. A total of 18 credits is required to obtain the CEP minor, of which, at least 9 credits must be at 300 level or above. Contact the CEP office for more information on the minor application process.

The Department of Counseling and Educational Psychology offers three graduate programs leading to the degrees of Master of Arts, Specialist in Education, and Doctor of Philosophy. Students must be admitted by the department into a graduate program to earn a degree in

- Clinical Mental Health Counseling (M.A.)
- School Psychology (Ed.S.)
- Counseling Psychology (Ph.D.)

Students interested in earning graduate degrees should consult the Graduate School Catalog for requirements and contact the CEP department for information on admissions and application requirements.

Counseling Psychology - Doctor of Philosophy

The CEP Department offers a doctoral Counseling Psychology program that leads to a Ph.D. in Counseling Psychology. The program is accredited by the American Psychological Association. For more information on this accreditation contact

The Office of Program Consultation and Accreditation
American Psychological Association
750 1st Street, NE
Washington, DC 20002
Phone: (202) 336-5979.

The program is based on the scientist-practitioner model through which both research and service delivery skills are acquired. Graduates of the program are prepared to conduct research, provide service, teach and supervise. The program prepares students for licensure as psychologists. The three goals of the program are to

1. Produce well-trained generalists in applied psychology capable of competently utilizing a wide variety of assessments, modalities and types of interventions and in disseminating psychological information.
2. Nurture active learners and critical/scientific thinkers capable of integrative thinking, application of theory, hypothesis generation and self-reflection.
3. To develop in students a contextual understanding of psychology and the environments in which they work and live so as to produce culturally-responsive, developmentally-aware and strengths-based psychology professionals.

Annual application deadline: December 15

Program Requirements

CEP faculty conduct periodic reviews of students' progress in the programs, including their academic performance, counseling and psychoeducational skills, professionalism and ethics. Deficits identified through faculty reviews may result in recommendations that students engage in remedial work or that they pursue alternative career goals. For more information about the CEP Department and programs visit our website: <http://cep.nmsu.edu>.

Indigenous Ways of Knowing - Graduate Minor

The minor in Indigenous Ways of Knowing (IWOK), offered through the Counseling and Educational Psychology (CEP) department, is open to graduate students enrolled in CEP programs in Clinical Mental Health Counseling, School Psychology, Counseling Psychology and other related fields such as Marriage and Family Therapy.

The primary impetus underlying the promotion of IWOK as counseling praxis is intended to promote a depth of thought to our current understanding of health and well-being that promotes sustainability in multiple dimensions of one's personal life, as well as to inform their professional practice.

Students will successfully complete 9 credits of coursework specific to this program of study in order to obtain a minor in Indigenous Ways of Knowing. For application and coursework details, please contact

the CEP department office or visit the departmental website at <https://cep.nmsu.edu>.

Integrated Behavioral Health Care - Graduate Minor

The Minor in Integrated Behavioral Health Care, offered through the Counseling and Educational Psychology (CEP) department, is open to graduate students enrolled in CEP programs Clinical Mental Health Counseling, School Psychology, Counseling Psychology and to graduate students who are enrolled in Social Work, Public Health, Nursing and Marriage and Family Therapy programs.

It was established in the interest of meeting the needs of graduate students in the health professions who are receiving, or seeking training in, interdisciplinary or interprofessional collaborations with other healthcare disciplines. The provision of integrated behavioral health services fits within the university's broader goal of meeting the needs of the citizens of New Mexico and the department's commitment to graduating competent service providers who can be effective members of a health care team.

Students will successfully complete 9 credits of coursework specific to this program of study in order to obtain a Minor in Integrated Behavioral Health Care. For application and coursework details, please contact the CEP department office or visit the departmental website at <https://cep.nmsu.edu>.

Through the courses in this minor students develop knowledge and skills in the following areas:

1. Apply the biopsychosocial model of health and illness with primary care patients,
2. Apply knowledge regarding the mind-body connection to address such issues as stress management, emotion regulation and sleep medicine,
3. Apply culturally responsive behavioral assessment/interventions,
4. Demonstrate behavioral health consultation skills with other health care providers, and
5. Develop interprofessional collaboration skills that include understanding the roles of all healthcare professionals and learning how to communicate effectively in order to engage in service delivery as a team.

School Psychology - Specialist in Education

The CEP Department offers a School Psychology program that leads to a Specialist in Education (Ed. S.) degree. The program is accredited through the National Association of School Psychologists. The program provides additional education beyond the M.A. to prepare professionals for licensure as school psychologists in New Mexico and throughout the United States. The School Psychology program prepares its candidates to work with preschoolers, children, adolescents and families. The various settings where School Psychologists are employed include public schools and other organizations that require advanced assessment, counseling, consultation and other interventions. The program trains its candidates to serve students with diverse educational, psychological and emotional needs from various backgrounds. Such training also includes working with all school personnel to help make education a positive and rewarding experience for their students. Students admitted

to the School Psychology program also have the opportunity to achieve a Masters degree in Counseling and Guidance with a concentration in Educational Diagnostics on the way to obtaining the specialist degree. Students would need to complete additional curricular, field experiences and degree requirements.

Annual application deadline: January 15

Spanish Counseling - Graduate Minor

The Minor in Spanish Counseling, offered through the Counseling and Educational Psychology department is open to graduate students who are enrolled in CEP graduate programs including Clinical Mental Health Counseling, School Psychology, Counseling Psychology and also to graduate students who are enrolled in Social Work and Marriage and Family Therapy programs. It was established in the interest of meeting the needs of bilingual counseling students who seek training in the provision of Spanish language mental health services.

Students will successfully complete 9 credits of coursework specific to this program of study in order to obtain a Minor in Spanish Counseling. Courses will be taught by culturally competent faculty, adjunct professors, or community mental health professionals in the aforementioned disciplines. Students will choose one course from each of the following components:

1. Counseling language development
2. Clinical experiences
3. Sociocultural experiences.

Students must currently be enrolled in a Mental Health program as described above. They must demonstrate intermediate level Spanish language skills as evidenced by the Spanish Placement Exam and an oral interview with the program coordinator. Advanced level in Spanish counseling skills is required for the completion of the Minor. If a student feels that he/she needs to improve his/her level of academic Spanish prior to completing the required coursework, or if the program coordinator determines that it is necessary, the student has the option of taking additional Spanish courses through the Languages and Linguistics department (e.g. SPAN 312 Grammar for Heritage/Native Speakers of Spanish, SPAN 313 Spanish Grammar, SPAN 314 Spanish Composition, and SPAN 315 Composition for Heritage/Native Speakers of Spanish). Students will be required to take Spanish language courses until they have satisfied this requirement. Please note that online courses will not fulfill this requirement. For application and coursework details, please contact the CEP department office or visit the departmental website at <https://cep.nmsu.edu>.

Curriculum and Instruction

Undergraduate Program Information

Professional Education Courses

All students will take a course in developmental psychology. Field experiences will be interwoven throughout most courses. All students, during their program will complete at least three Extended Field Experiences.

Required of All Students Seeking Elementary, Secondary Licensure or Early Childhood

C EP 210	Educational Psychology ¹	3
EDLT 368	Integrating Technology with Teaching	3

EDUC 103	Internship in Bilingual Education/ESL ¹	3
EDUC 315	Multicultural Education	3
SPED 350	Introduction to Special Education in a Diverse Society	3
Student Teaching Seminar		3
Total Credits		18

¹ Early Childhood majors do not take the identified courses.

Students seeking teacher licensure must meet all Teacher Education Program requirements. Those requirements include a GPA of 2.5 for undergraduates and 3.0 for graduate students seeking a MA plus licensure, passing scores on basic and general portions of the NES Teacher Exam, and satisfying the requirements for the academic teaching field. Each student must possess the academic ability, character and attitude suitable for teaching. Students who, in the professional judgment of the faculty and staff, do not possess these qualifications may be examined by a Selective Review Committee. The committee may recommend a variety of actions, ranging from remedial procedures to withdrawal from the Teacher Education Program.

Competitive Admission Process for Teacher Licensure

Applicants who successfully meet the minimum requirements for admission will be reviewed by the Teacher Education Program admission committee. The admission committee will base admission decisions on applicants' academic qualifications, basic skills test scores, written communication, faculty recommendations for the student, dispositions and the student's portfolio.

Applicants should be aware that admission to the Teacher Education Program is competitive and is based upon available faculty resources. Posted GPA and basic skills test scores are the minimum necessary to be considered for admission to the Teacher Education Program and do not ensure admittance into programs. Applicants are encouraged to develop a strong student portfolio, achieve the highest GPA possible and present a professional portfolio.

Graduate Program Information

The Department of Curriculum and Instruction is devoted to the preparation of master educators for public, private and governmental institutions. Graduates are prepared to serve as directors of instruction and curriculum, subject matter specialists, supervisors of student teaching and college professors of curriculum and instruction.

Five degree programs are available:

1. Master of Arts (in education),
2. Master of Arts in Teaching,
3. Specialist in Education,
4. Doctor of Education in curriculum and instruction, and
5. Doctor of Philosophy in curriculum and instruction.

The Master of Arts requires a concentration in curriculum and instruction. Six areas of concentration are offered:

1. curriculum and instruction,
2. bilingual education,
3. early childhood education,
4. educational learning technologies,
5. language, literary & culture, reading, and

6. TESOL.

Coursework may be taken in elementary education, secondary education, TESOL, curriculum development, instructional techniques, instructional technology, advanced methodology, multicultural education and teaching fields or endorsement areas.

At the master's degree level, non-thesis option, the department requires a final examination. This written examination is administered once each semester (fall, spring, and summer II). Detailed information about the written exam is available in the Master's Handbook (<http://https://ci.nmsu.edu/programs/graduate-programs/candi-handbooks/>) and on the departmental webpage (<http://ci.nmsu.edu>).

The Ph.D. and Ed. D have a theoretical-research orientation. Every doctoral student (Ph.D. and Ed.D.) is required to take a 12-credit research block that includes EDUC 613 Evaluation of Quantitative Research in Education and EDUC 576 Qualitative Research. Furthermore, students enrolled in the Ph.D. program must complete 6 credits in either computer tools courses or the foreign language sequence.

A master's degree, a cumulative GPA of 3.0 or better in graduate work, and three years of teaching experience or the equivalent are required for admission to doctoral programs in curriculum and instruction. Applicants should be aware that admission to the doctoral program is competitive and based on available departmental resources and available faculty resources and interest.

Doctoral-level qualifying exams are held during the spring semester.

Particulars with regard to procedural requirements relating to the degree are available by visiting the departmental website: <https://ci.nmsu.edu/>

General Admission to Graduate Programs

The Department of Curriculum and Instruction requires graduate students who have completed 9 credits under the "undeclared" category in the Graduate School and/or nondegree status in the College of Health and Social Services to be admitted into a graduate degree program either in Curriculum and Instruction or any other graduate department in the College of Education. The department will dis-enroll any student who has not been admitted into a graduate degree program (after completing 9 credits) and additionally, will not allow them to enroll or attend in other Curriculum and Instruction coursework.

Degrees for the Department

Early Childhood - Bachelor of Science in Education (p. 474)

Elementary Education - Bachelor of Science in Education (p. 476)

Secondary Education - Bachelor of Science in Education (p. 477)

Education - Master of Arts (p. 475)

Education - Master of Arts in Teaching (p. 476)

Curriculum and Instruction - Doctor of Education (p. 472)

Curriculum and Instruction - Doctor of Philosophy (p. 473)

Minors for the Department

Early Childhood Education - Undergraduate Minor (p. 475)

Associate Professors, Elizabeth Cahill and David Rutledge, Interim Co-Department Heads

Directors: B. Araujo, *Elementary Education; Secondary Education*; B. Cahill, *Interim Co-Department Head/Early Childhood*; D. Rutledge *Interim Co-Department Head/Graduate Studies*

Professors Baptiste, Haynes Writer, A. Hernandez, Torres, Wiburg; **Associate Professors** Araujo, Cahill, Charles-Huerta, Orelus, Reyes, Rutledge, Salazar Perez; **Assistant Professors** Engledowl, Fahrenbruck, Flores Carmona, Ciblis, C. Hernandez, Koeun Kim, Lucero, Marlett, Pando, Parra, Woodley; **College Instructors** Bagwell

B. Araujo, Ph.D. (New Mexico State University) – critical pedagogy, bilingual education; H. P. Baptiste, Ed.D. (Indiana University) – science elementary; E. Cahill, Ph.D. (Kent State University) – early childhood education; C. Engledowl, Ph.D. (University of Missouri) – mathematics education; J. Flores-Carmona, Ph.D. (University of Utah) – culture and society, sociology of education; L. Cibils, Ph.D. (New Mexico State University) – TESOL, bilingual education, language teaching; M. L. Fahrenbruck, Ph.D. (University of Arizona) – language, reading & culture; J. L. Haynes Writer, Ph.D. (University of New Mexico) – critical multicultural & social justice education, Indigeneity, Native American education teacher preparation; A. Hernandez (Stanford University) – elementary literacy, sociolinguistics, biliteracy-multiliteracy, and teacher professional development; C.M. Hernandez, Ph.D. (Kansas State University) – science education; L. Huerta-Charles, Ph.D. (New Mexico State University) – multicultural/bilingual education; Koeun Kim, Ph.D. (University of Wisconsin-Madison) – early childhood education, social welfare; L. Lucero (University of Texas-El Paso) – teaching, learning, and culture, math, science, technology; R. Marlett, Ph.D. (University of Nebraska-Lincoln) – language, literacy and culture; P. Orelus, Ed.D. (University of Massachusetts-Amherst) – bilingual/ TESOL education program; M. Pando, Ph.D. (Texas Tech University) – bilingual education; J. L. Parra, Ed.D. (Pepperdine University) – online teaching & learning; technology integration; teacher/ faculty professional development, innovative & transformative education; L. V. Reyes, Ph.D. (New Mexico State University) – early childhood education and critical pedagogy; D. Rutledge, Ph.D. (University of Colorado-Boulder) – learning technologies, international education, bilingual education/ TESOL; M. Salazar Perez, Ph.D. (Arizona State University) – early childhood; M. Torres, Ph.D. (University of New Mexico) – sociocultural and psychological foundation; K. Wiburg, Ed.D. (U.S. International University) – instructional technology; X. Woodley, Ph.D. (New Mexico State University) – educational learning technology, critical pedagogy.

ECED 115. Child Growth, Development, and Learning 3 Credits

This basic course in the growth, development, and learning of young children, prenatal through age eight, provides students with the theoretical foundation for becoming competent early childhood professionals.

ECED 125. Health, Safety, and Nutrition 2 Credits

This course provides information related to standards and practices that promote children's physical and mental well being sound nutritional practices, and maintenance of safe learning environments.

ECED 135. Family and Community Collaboration 3 Credits

This beginning course examines the involvement of families and communities from diverse cultural and linguistic backgrounds in early childhood programs. Ways to establish collaborative relationships with families in early childhood settings is discussed.

Prerequisite(s): ECED 115 and ENGL 111G.

ECED 215. Curriculum Development Through Play**3 Credits**

The beginning curriculum course places play at the center of curriculum in developmentally appropriate early childhood programs. It addresses content that is relevant for children birth through age four and developmentally and culturally sensitive ways of integrating content into teaching and learning experiences. Information on adapting content areas to meet the needs of children with diverse abilities and the development of IFSP's and IEP's is included. Consent of instructor required.

Prerequisite(s): ECED 115 and ENGL 111G.

Corequisite(s): ECED 220.

ECED 220. Early Childhood Education Practicum I**2 Credits**

The beginning practicum course will provide experiences that address curriculum content that is relevant for children birth through age four in developmentally and culturally sensitive ways. Consent of instructor required.

Prerequisite(s): ECED 115 and ENGL 111G.

Corequisite(s): ECED 215.

ECED 225. Curriculum Development and Implementation II**3 Credits**

The second curriculum course focuses on developmentally appropriate curriculum content in early childhood programs, age 3 through third grade. Development and implementation of curriculum in all content areas, including literacy, numeracy, the arts, health and emotional wellness, science, motor and social skills, is emphasized. Information on adapting content areas to meet the needs of children with diverse abilities and the development of IEP's is included. Consent of instructor required.

Prerequisite(s): ECED 115, ENGL 111G.

Corequisite(s): ECED 230.

ECED 230. Early Childhood Education Practicum II**2 Credits**

The second field-based curriculum course focuses on practicing developmentally appropriate curriculum content in early childhood programs, age 3 through third grade. Consent of instructor required.

Prerequisite(s): ECED 115, ENGL 111G.,

Corequisite(s): ECED 225.

ECED 235. Introduction to Language, Literacy and Reading**3 Credits**

This course is designed to prepare early childhood professionals for promoting children's emergent literacy and reading development. Through a developmental approach, the course addresses ways in which early childhood professionals can foster young children's oral language development, phonemic awareness, and literacy problem solving skills, fluency, vocabulary, and comprehension.

Prerequisite(s): ECED 115 and ENGL 111G.

ECED 245. Professionalism**2 Credits**

This course provides a broad-based orientation to the field of early care and education. Early childhood history, philosophy, ethics and advocacy are introduced. Basic principles of early childhood systems are explored. Multiple perspectives on early care and education are introduced. Professional responsibilities such as cultural responsiveness and reflective practice are examined.

ECED 255. Assessment of Children and Evaluation of Programs**3 Credits**

This basic course familiarizes students with a variety of culturally appropriate assessment methods and instruments, including systematic observation of typically and non-typically developing children. Crosslisted with: SPED 255

Prerequisite(s): ECED 115 and ENGL 111G.

ECED 265. Guiding Young Children**3 Credits**

This course explores various theories of child guidance and the practical applications of each. It provides developmentally appropriate methods for guiding children and effective strategies and suggestions for facilitating positive social interactions. Strategies for preventing challenging behaviors through the use of environment, routines and schedule will be presented.

ECED 270. Program Management**3 Credits**

Technical knowledge necessary to develop and maintain a quality early care and education program. The course will focus on sound financial management and vision, laws and legal issues that affect programs and state and national standards including accreditation requirements.

Prerequisite: consent of instructor.

ECED 275. Curriculum for Diverse Learners and Their Families**3 Credits**

Implementation of family-centered programming that includes developmentally appropriate and culturally responsive curriculum. The course will also cover the establishment and maintenance of healthy and safe learning environments. Consent of instructor required.

ECED 276. Effective Program Development for Diverse Learners and Their Families**2 Credits**

Practical experience in observing and carrying out the role of the director/administrator in the implementation of family-centered programming that includes individually appropriate and culturally responsive curriculum in a healthy and safe learning environment. Consent of instructor required. Restricted to ECED majors.

Corequisite(s): ECED 275.

ECED 280. Professional Relationships**3 Credits**

Development of staff relationships that will foster strong professional relationships with and among families, communities and advisory boards. Issues of staff recruitment, retention, support and supervision will lay a foundation for positive personnel management. Working effectively with board, advisory groups and community members and agencies will be addressed. Consent of instructor required.

Corequisite(s): ECED 281.

ECED 281. Professional Relationships Practicum**2 Credits**

Practical experience in the development of staff relationship that will foster professional relationships with families, communities and boards. Issues of staff recruitment, retention, support and supervision will lay a foundation for positive personnel management. Consent of instructor required. Restricted to ECED majors.

Corequisite(s): ECED 280.

ECED 315. Research in Child, Growth, Development and Learning
3 Credits

This advanced course in child growth, development, and learning builds upon the foundational material covered in the basic course in child growth, development, and learning. An integration of major theories of child development is provided by focusing on contemporary research in all aspects of development, including bio-ecological, social-affective, cognitive, language, and the methodological aspects of research in early childhood development and education.

Prerequisite(s): ECED 115.

ECED 329. Early Primary Field Placement
2 Credits

The field practicum is a co-requisite course with Teaching and Learning Reading and Writing; Teaching and Learning Math and Science; Teaching and Learning Social Studies, Fine Arts and Movement. The field based component will provide experiences that address curriculum content and practice teaching that is relevant for early primary children in developmentally and culturally sensitive ways. Graded: S/U.

Corequisite(s): ECED 440, ECED 445, RDG 350.

ECED 335. Family, Language and Cultural
3 Credits

This course analyzes the interrelationships between family, language, and culture as connected to children's development and learning. In this course, language is understood as a human activity and higher mental process which build on the children's families, community and cultural background.

Prerequisite(s): ECED 135.

ECED 351. Emergent Literacy
3 Credits (2+2P)

This advanced course is designed to prepare early childhood professionals to study literacy development, specifically oral language, writing and reading. This course focuses on children from birth through age 4, including children with special needs. Through a developmental approach, the course addresses: 1) recent theory and research that translates into practical strategies, assessment materials and preparation of rich literacy environments, 2) the socio-cultural contexts in which children develop literacy, 3) culturally, linguistically and developmentally appropriate literacy curricula, 4) processes used to determine the appropriateness of various literacy strategies, 5) assessment, evaluation, and accountability and 5) literacy leadership. Crosslisted with: RDG 351.

Prerequisite(s): ECED 235.

ECED 395. Special Topics
1-3 Credits

Each course will be identified by a qualifying subtitle. A maximum of 3 credits in any one semester and a grand total of 6 credits.

ECED 420. Integrated Early Childhood Curriculum
4 Credits

This advanced course focuses on developmentally appropriate content, learning environments, and curriculum implementation for children birth through age 4. It emphasizes integration of content areas (the arts, literacy, math, health/emotional wellness, science, social studies, motor, and adaptive living skills) and the development of rich learning environments for infants, toddlers, and preschool children.

Prerequisite(s): ECED 125, ECED 215, ECED 220, ECED 225, ECED 230, ECED 245, and ECED 265.

Corequisite(s): ECED 425.

ECED 425. Integrated Curriculum Practicum
2 Credits

The advanced practicum course is a field based course that will provide opportunities for the integration of content areas (the arts, literacy, math, health/emotional wellness, science, social studies, motor, and adaptive living skills) and the development of rich learning environments for infants, toddlers, and preschool children.

Prerequisite(s): ECED 125, ECED 215, ECED 220, ECED 225, ECED 230, ECED 245, ECED 265.

Corequisite(s): ECED 420.

ECED 440. Teaching and Learning Math and Science
4 Credits (2+4P)

Standards, principles, and practices in teaching mathematics and science to young children in preschool through grade 3. An emphasis is placed on developing a content-rich integrated math and science curriculum that focuses on children's development and interests, includes appropriate content, processes, environment, and materials with an emphasis on problem-solving as the major means of constructing basic concepts. Field experience required.

ECED 443. Assessment of Children and Evaluation of Programs
3 Credits

Advanced course builds on understanding the connections among learning, teaching, and assessment and strategies for evaluating programs. Assessment, identification, and monitoring of typical and atypical development in the cognitive, motor, affective and social domains. Multiple and diverse assessment approaches, including responsiveness to cultural and linguistic differences will be emphasized. Builds upon indicators of competence established at the lower division (AA) level. For each course objective (core competency) students will demonstrate the indicators established for the bachelor's level.

ECED 452. Teaching Language Minority Children in Early Childhood Settings
3 Credits

Framework and strategies for the educational development of young language-minority children.

ECED 455. Teaching and Learning Social Studies, Fine Arts and Movement
3 Credits (2+2P)

The course focuses on the aims, scope, and integration of methods of teaching social studies, the fine arts and movement across the curriculum. This course emphasizes an integrated approach to teaching the what and why of social studies; assessing student learning; planning units, lessons, and activities; effective instructional strategies; and knowledge of social studies content. Concepts of expressive art include the visual arts, music, movement and drama.

Corequisite(s): ECED 440, ECED 329, RDG 350.

ECED 458. Field Experience (Infants Pre-K)
1 Credit

Supervised field experiences in early childhood settings: infants, toddlers, and pre-K programs. Graded S/U.

ECED 459. Field Experience (K-3)
1 Credit

Supervised field experiences in early childhood settings: public school programs K-3. Graded S/U.

ECED 465. Advanced Caregiving for Infants and Toddlers**3 Credits**

The advanced field-based course is intended to assist students to define and implement advanced elements of quality programming for all infants, toddlers in safe, healthy, responsive caring environments. The experiences in the approved setting will support strong nurturing relationships, cultural competence, diverse learning needs and styles of every child, appropriate guidance techniques and partnership with the families, cultures, and community represented. Students are assisted through the course in advancing their ability to observe, discuss, and implement elements of quality programming for infants and toddlers in home, small-group or whole-group care situations. Crosslisted with: SPED 465

ECED 470. Student Teaching/Seminar**6 Credits**

Provides student teaching experience in a variety of settings with young children ages birth 8.

ECED 479. Curriculum in Early Childhood Education**3 Credits**

Development and implementation of curriculum and materials for teaching young children.

ECED 489. Topics**3 Credits**

Offered under various subtitles which indicate the subject matter to be covered. May be repeated three times for a maximum of 9 credits.

ECED 510. Issues in Early Childhood Education**3 Credits**

Examines current trends and problems through readings of theoretical, empirical, and applied literature.

ECED 515. Working with Parents of Young Children**3 Credits**

Techniques for setting up home and classroom visitations, communicating with parents, and establishing special programs.

ECED 520. Seminar on Cognitive and Social Development**3 Credits**

In-depth study of developmental theories: Piaget, Kohlberg, Bruner, and Erikson. Implications for development of preschool programs and teaching techniques.

ECED 530. Leadership and Advocacy in Early Childhood**3 Credits**

The course explores a multidisciplinary approach to early childhood educational leadership, advocacy and change. The course focuses on leadership in its many forms: in teaching, administration, policy, research, and ethics. In addition, we will examine the theory and practice of change to gain an understanding of what contributes to advocating for policy and community change. Students will gain a deeper understanding of themselves as leaders, and ways to improve early education to promote social justice in programs and systems serving families and young children.

ECED 570. Play in the Early Childhood Curriculum**3 Credits**

Advanced exploration of the development of curriculum based on children's play. A means of exploring and learning the patterns of human living, communications, and experiences congruous with developing interests and capacities. Restricted to majors. Same as ECED 451 with differentiated assignments for graduate students.

ECED 612. History and Philosophy of Early Childhood Education**3 Credits**

Critical analysis of the historical development and philosophical underpinnings of the field of early childhood education as it relates to current practice. Restricted to doctoral-level students of any major.

ECED 614. Early Childhood, Communities, and Social Policy**3 Credits**

Early childhood politics and policy taken from a global, national, state, and community context. Restricted to doctoral-level students of any major.

ECED 633. Praxis and Reflexivity**3 Credits**

Same as BIL 633, EDUC 633, RDG 633, EDLT 633.

ECED 698. Selected Topics in Early Childhood Education**1-6 Credits**

Offered under various subtitles. May be repeated for a maximum of 6 credits. Restricted to doctoral-level students of any major.

EDUC 101. FRESHMAN ORIENTATION**1 Credit**

Introduction to the university and to the College of Education. Discussion of planning for individualized education program and field experience. Restricted to Las Cruces campus only.

EDUC 102. Internship I**3 Credits**

Supervised experience in elementary education settings.

EDUC 103. Internship in Bilingual Education/ESL**1-4 Credits**

Supervised experience in bilingual education/ESL elementary or secondary classroom settings for prospective bilingual education/ESL teachers.

EDUC 150. Math for Paraprofessionals**3 Credits**

Applied math skills for paraprofessionals working with children.

Prerequisite: CCDM 103.

EDUC 151. Math for Paraprofessionals II**3 Credits**

Applied math skills for paraprofessionals working under the direction of a teacher.

Prerequisite: EDUC 150.

EDUC 181. Field Experience I**1 Credit**

Introduction to public school teaching, school visits, classroom observations and discussion seminar.

EDUC 195. Individual Topics in Education**1-3 Credits**

Supervised study in a specific area of interest. Each course shall be designated by a qualifying subtitle. May be repeated for a maximum of 9 credits.

EDUC 202. Internship II**3 Credits**

Supervised experience in junior high settings.

Prerequisite: must be a co-op student.

EDUC 204. Foundations of Bilingual/ESL Education**3 Credits**

Explore and review the historical, legal, philosophical, theoretical and pedagogical paradigms of bilingual/ESL education.

EDUC 219. Pre-Teacher Preparation**3 Credits**

Assists students in developing the necessary competencies needed for acceptance to the Teacher Education Program. Course content includes basic skill development, test taking skills, and completion of teacher preparation packet. Maybe repeated for a maximum of 6 credits. Graded S/U. Community Colleges only.

EDUC 250. Introduction to Education**2 Credits**

An overview of the American education system with emphasis on organization, governance, law, demographics, and professional practice. Restricted to Las Cruces campus only.

EDUC 281. Introduction to Secondary Education and Youth**3 Credits**

Introductory course for students considering a career in secondary education. Includes historical, philosophical, and sociological foundations, program organization, critical dispositions, and understanding the context of schools and youth. Practicum required. Restricted to: Secondary Ed majors. Traditional Grading with RR.

EDUC 302. Internship III**3 Credits**

Student teaching in public school classroom according to major area of interest.

EDUC 303. Secondary Bilingual/ESL Field Experience**3 Credits (2+2P)**

Develop professional skills, dispositions, and understanding of secondary bilingual youth, content, and pedagogy through discussion seminar and interactions with public education mentor teachers. Focused observations, study of classroom language and culture, introduction to lesson planning and student assessment. Requires 32 hours of practicum field experience. Same as EDUC 381. Crosslisted with: EDUC 381.

EDUC 315. Multicultural Education**3 Credits (2+2P)**

The conceptual manifestations of culture, race and ethnicity, class, gender, sexual orientation, exceptionalities, language, bilingualism, and global citizenship within the schooling process. May be repeated up to 3 credits. Crosslisted with: EDUC 317V.

EDUC 317V. Multicultural Issues in Society**3 Credits**

Conceptual manifestations of culture, race, ethnicity, class, gender, exceptionalities, language, and bilingualism within and across society. Crosslisted with: EDUC 315.

EDUC 342. Sheltered English Instruction for the ESL Classroom**3 Credits**

Addresses the acquisition of English proficiency by speakers of other languages.

EDUC 343. Language, Literacy, and Culture in the ESL Classrooms**3 Credits**

Framework and strategies for developing the written abilities of second language learners.

EDUC 344. Issues in Schooling for Bilingual Learners**3 Credits**

Current thought and direction regarding bilingual education in the United States and New Mexico.

EDUC 381. Secondary Field Experience**3 Credits (2+2P)**

Develop professional skills, dispositions, and understanding of secondary bilingual youth, content, and pedagogy through discussion seminar and interactions with public education mentor teachers. Focused observations, study of classroom language and culture, introduction to lesson planning and student assessment. Requires 32 hours of practicum field experience. Same as EDUC 303. Crosslisted with: EDUC 303.

EDUC 395. Special Topics in Education**1-3 Credits**

Offered under various subtitles in the Schedule of Classes. May be taken for a maximum of 3 cr. per semester and a total of 6 credits overall.

EDUC 402. Internship IV**6 Credits**

Supervised co-teaching in educational setting according to major area of interest.

Prerequisite: must be a co-op student.

EDUC 450. Methods of Teaching Early Childhood Education**3 Credits**

Characteristics of the young child, play, guidance, communication, methods, materials, models, issues.

EDUC 451. Methods of Teaching Elementary School Science**3 Credits (2+2P)**

Methods and materials for teaching elementary school science. Includes components of lessons and the use of multimedia. Same as EDUC 551 with differentiated assignments for graduate students.

Prerequisites: 9 hours of science from biology, chemistry, physics, and earth sciences, with no more than 3 hours from any one department.

Corequisites: ECED 450, EDUC 452, and RDG 360 (Block A courses).

EDUC 452. Methods of Teaching Elementary School Mathematics**3 Credits (2+2P)**

Content, theories of cognition, and instructional approaches for the teaching of mathematics in the elementary grades. Same as EDUC 552 with differentiated assignments for graduate students.

Prerequisite: MATH 111.

Corequisites: ECED 450, EDUC 451, and RDG 360 (Block A courses).

EDUC 453. Methods of Teaching Elementary School Language Arts**3 Credits (2+2P)**

Implications of language acquisition and development for instructional practices. Focus on student-centered response to literature, writing process, whole language learning, based on socio-psycholinguistic theory and research. Same as EDUC 553 with differentiated assignments for graduate students.

Corequisites: RDG 361, EDUC 454, and EDUC 455 (Block B courses).

EDUC 454. Methods of Teaching Elementary School Social Studies**3 Credits (2+2P)**

Focus on social studies curriculum and instruction including student-centered approaches, active learning, educational technology, nontextual curriculum, integration, multicultural education, authentic assessment, and practical applications. Same as EDUC 554 with differentiated assignments for graduate students.

Corequisites: RDG 361, EDUC 453, and EDUC 455 (Block B courses).

**EDUC 460. Teaching Language Arts at the Middle and High School Level
3 Credits (2+2P)**

Implications of cognition and language development for appropriate secondary instructional practices. Focus on construction of meaning, student-centered response to literature, writing process, print and oral language development, based on socio-psycholinguistic research and theory. Practicum required. Same as EDUC 560.

**EDUC 461. Teaching Social Studies at the Middle and High School Level
3 Credits (2+2P)**

Integrating content knowledge and pedagogy for the middle and high school teacher in social studies. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of social studies. Practicum required. Same as EDUC 561.

**EDUC 462. Teaching Mathematics at the Middle and High School Level
3 Credits (2+2P)**

Integrating content knowledge and pedagogy for the middle and high school teacher in mathematics. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of mathematics. Practicum required. Same as EDUC 562.

**EDUC 463. Teaching Science at the Middle and High School Level
3 Credits (2+2P)**

Integrating content knowledge and pedagogy for the middle and high school teacher in science. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of science for students in grades 6-12. Practicum required. Same as EDUC 563.

**EDUC 464. Teaching Foreign Language at the Middle and High School Level
3 Credits (2+2P)**

Integrating content knowledge and pedagogy for the middle and high school teacher in foreign language. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of foreign language for students in grades 6-12. Practicum required. Same as EDUC 564.

**EDUC 467. Teaching Business Education at the Middle and High School Level
3 Credits (2+2P)**

Integrating content knowledge and pedagogy for the middle and high school teacher in business education. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of business education for students in grades 6-12. Practicum required. Same as EDUC 567.

**EDUC 470. Elementary Student Teaching
9 Credits (9)**

Synthesis of knowledge and skills appropriate to teaching in elementary schools. Graded S/U.

**EDUC 471. Secondary Student Teaching
9 Credits (9)**

Synthesis of knowledge and skills appropriate to teaching in secondary schools. Graded S/U.

**EDUC 475. Contemporary Issues in Education
3 Credits (2+2P)**

Discussion of contemporary issues including: classroom management, motivation, conferences, professional organizations, professional ethics, community influences, cultural pluralism, reform movements, instructional influences, and educational technology. Requires field experience component in a school or community setting. Same as EDUC 575.

**EDUC 480. International Student Teaching Seminar
1 Credit**

Preparation for students planning to teach in an international setting. **Prerequisite:** Must be scheduled one semester before graduation.

**EDUC 481. Elementary Student Teaching Seminar
3 Credits (3)**

Discussion of elementary school issues related to student teaching. Taken concurrently with EDUC 470. Graded S/U.

**EDUC 482. Middle and High School Student Teaching Seminar
3 Credits (3)**

Discussion of secondary school issues related to student teaching. Taken concurrently with EDUC 471.

**EDUC 483. Second Language Acquisition
3 Credits**

Exploring affective, cultural, linguistic, cognitive factors that influence the second-language-acquisition process with application to classroom practice. Same as EDUC 583.

**EDUC 487. Methods of TESOL
3 Credits**

Effective second language teaching approaches that provide for interactive learning situations, meaningful input language models, varied language use materials, adaptive teacher response strategies, and assessments of student processing needs.

**EDUC 489. Topics
1-3 Credits**

Offered under various subtitles which indicate the subject matter to be covered. A maximum of 3 credits in any one semester and a grand total of 3 credits.

**EDUC 495. Directed Study Courses in Education
1-3 Credits**

Each course shall be identified by a qualifying subtitle. Maximum of 3 credits in any one semester and a grand total of 6 credits.

**EDUC 501. Special Topics
1-3 Credits**

Course subtitled in the Schedule of Classes. A maximum of 3 credits per semester and a total of 6 credits overall.

**EDUC 504. Adult and Family Literacy in TESOL
3 Credits**

An exploration of the theoretical, programmatic, and curricular frameworks for English language learners and their families. Focus on the development of culturally responsive and pedagogically sound literacy programs. Same as RDG 504.

**EDUC 505. Classroom Management
3 Credits**

Strategies for managing classroom settings and determining appropriate modification of instructional approaches to meet changing classroom situations.

**EDUC 509. Teaching Methods Laboratory
3 Credits**

Practical application of previously learned content.

Prerequisite(s): Bachelors degree and admission to the Graduate School and departmental special program.

EDUC 510. Internship/Student Teaching**6 Credits**

Integrated with EDUC 509. Student is assigned to an elementary or secondary classroom for 14-16 weeks. Elementary or secondary. Graded S/U.

Prerequisite: EDUC 509.

EDUC 512. Equity Education for Mathematics Teachers**3 Credits**

This course is designed to increase teacher awareness and ability to address diverse students learning needs leading to success in mathematics. Same as EDUC 615.

Prerequisites: Have access to teach in a mathematics classroom with a diverse student population.

EDUC 515. Multicultural Education**3 Credits (2+2P)**

Conceptual manifestations of culture, race, and ethnicity, class, gender, exceptionalities, language and bilingualism within the schooling process. Same as EDUC 315 with differentiated assignments for graduate students.

EDUC 516. Curriculum and Pedagogy I**3 Credits**

Introduction, reconstruction, and other connections among historical, philosophical, sociocultural, psychological, and theoretical foundations of curriculum and pedagogy and their application to culturally and linguistically diverse teaching and learning settings.

EDUC 518. Technology and Pedagogy**3 Credits**

Critical analysis, design, and evaluation of computer-based technologies in teaching and learning for diverse communities.

EDUC 519. Research in Curriculum and Pedagogy**3 Credits**

An introduction to qualitative and quantitative designs for research in curriculum and instruction, with emphasis on action research.

EDUC 520. Action Research Projects**3 Credits**

Deeper explorations and connections among foundations of curriculum and pedagogy and their application to culturally and linguistically diverse teaching and learning settings through action research projects, approaches to assessment, and agency.

Prerequisite(s): EDUC 515, 516, 518 & 519.

EDUC 530. Exploration in Education**3 Credits (2+2P)**

Overview of elementary and secondary schooling. Includes opportunities to gain teaching experience in diverse settings.

EDUC 537. Independent Readings**1-3 Credits**

Each project will be designated by a qualifying subtitle.

EDUC 550. Methods of Teaching Early Childhood Education**3 Credits**

Characteristics of the young child, play, guidance, communication, methods, materials, models, issues. Same as EDUC 450 with differentiated assignments for graduate students.

EDUC 551. Methods of Teaching Elementary School Science**3 Credits (2+2P)**

Methods and materials for teaching elementary school science. Includes components of lessons, planning and teaching lessons in schools, and multimedia. Same as EDUC 451 with differentiated assignments for graduate students.

Prerequisites: 9 hours of science from biology, chemistry, physics, and earth science with no more than 3 hours from any one department.

Corequisites: ECED 550, EDUC 552, and RDG 560 (block A course).

EDUC 552. Methods of Teaching Elementary School Mathematics**3 Credits (2+2P)**

Content, theories of cognition, and instructional approaches for the teaching of mathematics in the elementary grades. Same as EDUC 452 with differentiated assignments for graduate students.

Prerequisite: MATH 111.

Corequisites: ECED 550, EDUC 551, and RDG 560 (block A course).

EDUC 553. Methods of Teaching Elementary School Language Arts**3 Credits (2+2P)**

Implications of language acquisition and development for instructional practices. Focus on student-centered response to literature, writing process, whole language learning, based on socio-psycholinguistic theory and research. Same as EDUC 453 with differentiated assignments for graduate students.

Corequisites: EDUC 554, EDUC 555, and RDG 561 (block B course).

EDUC 554. Methods of Teaching Elementary School Social Studies**3 Credits (2+2P)**

Focus on social studies curriculum and instruction including student-centered approaches, active learning, educational technology, nontextual curriculum, integration, multicultural education, authentic assessment, and practical applications. Same as EDUC 454 with differentiated assignments for graduate students.

Corequisites: EDUC 553, EDUC 555, and RDG 561 (block B course).

EDUC 557. Science and Math Methods: Internship**3 Credits**

Elementary alternative licensure process course designed to introduce intern licensed teachers to methods of instruction for mathematics and science. University supervision provided simultaneously with EDUC 557. Restricted to CI and HSS non-degree students.

EDUC 558. Social Studies/Language Arts Methods Internship**3 Credits**

Elementary alternative licensure process course designed to introduce intern licensed teachers to methods of instruction of social studies and language arts. University supervision provided simultaneously with EDUC 558. Restricted to CI and HSS non-degree students.

EDUC 560. Teaching Language Arts at the Middle and High School Level**3 Credits (2+2P)**

Implications of cognition and language development for appropriate secondary instructional practices. Focus on construction of meaning, student-centered response to literature, writing process, print and oral language development, based on socio-psycholinguistic research and theory. Practicum required. Same as EDUC 460 with differentiated assignments for graduate students. Prerequisite(s): TEP required EDUC 515 & EDUC 530.

EDUC 561. Teaching Social Studies at the Middle and High School Level
3 Credits (2+2P)

Integrating content knowledge and pedagogy for the middle and high school teacher in social studies. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of social studies for student in grades 6-12. Practicum required. Same as EDUC 461 with differentiated assignments for graduate students. Prerequisite(s): TEP required EDUC 515 & EDUC 530.

EDUC 562. Teaching Mathematics at the Middle and High School Level
3 Credits (2+2P)

Integrating content knowledge and pedagogy for the middle and high school teacher in mathematics. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of students in 6-12 setting settings for mathematics. Same as 462 with differentiated assignments for graduate students.

Prerequisite(s): TEP required EDUC 515 & EDUC 530.

EDUC 563. Teaching Science at the Middle and High School Level
3 Credits (2+2P)

Integrating content knowledge and pedagogy for the middle and high school teacher in science. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of science for student in grades 6-12. Practicum required. Same as EDUC 463 with differentiated assignments for graduate students.

Prerequisite(s): TEP required EDUC 515 & EDUC 530.

EDUC 567. Teaching Business Education at the Middle and High School Level
3 Credits (2+2P)

Integrating content knowledge and pedagogy for the middle and high school teacher in business education. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of business education for student in grades 6-12. Practicum required. Same as EDUC 467 with differentiated assignments for graduate students.

Prerequisite(s): TEP required EDUC 515 & EDUC 530.

EDUC 575. Contemporary Issues in Education
3 Credits (2+2P)

Discussion of contemporary issues including: classroom management, motivation, conferences, professional organizations, professional ethics, community influences, cultural pluralism, reform movements, instructional influences, and educational technology. The class will require a field experience component in a school or community setting. Taught with EDUC 475 with differentiated assignments for graduate students.

EDUC 576. Qualitative Research
3 Credits

Introduction to qualitative research methodologies from problem formulation to interpretation of results.

EDUC 583. Second Language Acquisition
3 Credits

Exploring affective, cultural, linguistic, cognitive factors that influence the second-language-acquisition process with application to classroom practice. Appropriate for public school and adult educators. Same as EDUC 483.

EDUC 587. Pedagogy of TESOL
3 Credits

Overview of approaches that provide for interactive, culturally responsive pedagogy for students acquiring English. Emphasis on development of ESL literacy. Appropriate for public school and adult educators. Same as RDG 587.

EDUC 590. TESOL Practicum
3 Credits

Classroom applications of ESL literacy development through supervised teaching experiences accompanied by a seminar. Same as RDG 590.

EDUC 595. Directed Study Courses in Education
1-3 Credits

Each course will be identified by a qualifying subtitle. Maximum of 3 credits in any one semester and a total of 6 credits overall.

EDUC 598. Special Research Programs
1-3 Credits

Individual investigations either analytical or experimental. Maximum of 3 credits per semester and a total of 6 credits overall.

EDUC 599. Master's Thesis
15 Credits

Thesis.

EDUC 600. Doctoral Research
1-15 Credits

Research.

EDUC 601. Contemporary Curriculum/Instruction Practices
1-3 Credits

Course subtitled in the Schedule of Classes. A maximum of 3 credits per semester and a total of 6 credits overall.

EDUC 602. Internship in Curriculum and Instruction
3-6 Credits

For those pursuing an advanced graduate degree to meet the requirement for field work. Each course to bear an appropriate subtitle.

EDUC 603. Curriculum for a Diverse Society
3 Credits

Builds upon knowledge of the foundations of curriculum and professional experience in an educational setting. Focus on the role of the curriculum leader in understanding curriculum theory, designing curriculum, and implementing curriculum in various settings.

EDUC 604. Pedagogy of Learning in a Diverse Society
3 Credits

Builds upon knowledge of the foundations of instruction and professional experience in teaching and learning. Focus on diverse theories of instruction with relevant practices in pluralistic settings and multicultural interactions of teaching and learning.

EDUC 605. Independent Study Topics
1-3 Credits

A problem and seminar course for those pursuing an advanced graduate degree. Course subtitled in the Schedule of Classes.

Prerequisite: EDUC 535.

EDUC 606. In-depth Interviewing: A Qualitative Research Method
3 Credits

Use of pilot research project to introduce students to in-depth interviewing techniques.

EDUC 607. Current Research in Educational Practice
3 Credits

A seminar for doctoral and education specialist students emphasizing current research and educational practices. Same as BIL 607, ECED 607, RDG 607, and SPED 607.

EDUC 608. Issues in Multicultural Curriculum and Instruction and Teacher Education
3 Credits

Builds upon multicultural theories and practices of teacher education. Restricted to doctoral-level students of any major.

EDUC 613. Evaluation of Quantitative Research in Education
3 Credits

A doctoral-level exploration of a broad range of quantitative research designs and methodologies for collection and analysis of data as applied to critical review of the literature.

Prerequisite(s): EDUC 519 or the equivalent.

EDUC 623. Curricular Mediation for Democratic Communities
3 Credits

Problematization of the various relationships, roles, and leadership considerations which emerge within educational institutions, their structures, and their culturally democratic practices in the classroom, community, and society. Restricted to doctoral-level students of any major. Same as BIL 623, ECED 623.

EDUC 630. Critical Race Theory & Storytelling in Educational Spaces
3 Credits

An upper-level doctoral course focusing on the philosophical, theoretical, and methodological origins and practices of CRT and the sister frameworks that emerged from CRT, i.e., AsianCrit, BlackCrit, FemCrit, LatCrit, QueerCrit, TribalCrit, and WhiteCrit within educational spaces.

EDUC 633. Praxis and Reflexivity
3 Credits

Same as BIL 633, ECED 633, EDLT 633, RDG 633.

EDUC 634. Research as Praxis
3 Credits

Alternative community-or-school-based research aimed at investigating and transforming educational realities, with the participants for their own benefit. Students will experience the dynamic between research theory and practice in education. Crosslisted with: BIL 634, EDLT 634 and RDG 634. Restricted to: EDUC,C I,C ID majors.

Prerequisite(s): EDUC 576 and 613.

EDUC 635. Critical Theory and Pedagogy
3 Credits

Covers the various schools of thought on pedagogy, the historical and philosophical foundations embedded in these schools, and their impact on educational settings. Restricted to doctoral-level students of any major. Same as BIL 635.

EDUC 637. Social Justice Issues in Education
3 Credits

Covers the systems of oppression located within the constructs of power and hegemony and their impact on schooling. Restricted to doctoral-level students of any major. Same as BIL 637.

EDUC 685. Practicum
2-6 Credits

Provision for field inquiries and experiences designed to prepare the doctoral student for assuming responsibilities in the areas of curriculum and instruction.

Prerequisite: post-master's standing.

EDUC 694. Dissertation Seminar: Qualitative Research Designs
1-6 Credits

Dissertation seminar course for doctoral students utilizing a qualitative research design. Restricted to College of Education students.

Prerequisite: consent of instructor.

EDUC 698. Selected Topics
1-6 Credits

Offered under various subtitles which indicate the subject matter to be covered. A maximum of 6 credits per semester and a total of 6 credits overall.

EDUC 699. Ed.S. Thesis
1-15 Credits

Offered primarily for those pursuing the research requirements for the Ed.S. degree. Course may be repeated up to a maximum allowed for this degree. Each research project will be designated by a qualifying subtitle.

EDUC 700. Doctoral Dissertation
15 Credits

Dissertation.

Name: Crystal Chavez Sambrano

Office Location: O'Donnell Hall 122

Phone: (575) 646-1652

Curriculum and Instruction - Doctor of Education

The Curriculum and Instruction Department offers two kinds of doctorates: The Doctorate of Education (Ed. D.) and the Doctorate of Philosophy (Ph. D.).

The Doctorate of Education (EdD) and the Doctorate of Philosophy (PhD) are rigorous degrees requiring an intellectual and personal commitment beyond compare. Both degrees ask for a lifelong commitment to teaching, learning and pedagogy, to research and to service in the areas of the recipient's interests and desires. The academic course of study for both degrees is the same. The EdD doctoral program of study requires a minimum of 66 credit hours (48 hours coursework and 18 hours of dissertation) to complete. The PhD doctoral program requires students to demonstrate competency in the computer tools or second language sequence. (See below in program descriptions). For both programs (EdD and PhD) 66 credit hours is only the minimum and students may be asked to complete additional hours as per their advisor and committee recommendations.

Both degrees require a dissertation based on original research, inextricably grounded with an array of primary and secondary sources. Both degrees have required courses of study, but are additionally individualized based on those scholarly and academic expectations set by the doctoral student in collaboration with their Dissertation Committee.

Focus Areas

Currently there are five Focus Areas for the Doctoral Program.

1. Bilingual/TESOL
2. Critical Pedagogies
3. Early Childhood Education
4. Educational Learning Technologies
5. Language, Literacy & Culture

Research Sequence

The Department provides doctoral students with a firm grounding in both quantitative and qualitative research methodologies, while allowing them to then additionally develop an even deeper level of understanding specifically in either methodology, or in mixed methods.

Internships/Practica

The internships and/or practica are applied experiences constructed through focused theoretical understandings. These understandings will be developed and practiced as a process through a series of interactions with the selected professor of record, research and/or leadership sites, and the intern's area(s) of continued academic engagement. The academic "habits of mind" to be honed during the internship or practicum must be inclusive of academic interests and the deepening of intellectual propinquity to those curiosities that will enable a rich doctoral experience. The extensive development of an epistemic bibliography during an internship or practicum should continue so as to enrich the doctoral student's long-term intellectual engagement while synchronically meshing with his or her doctoral plan.

Decisions about the internships/practica are to be made by the Program Chair and Program Committee, and will vary between Focus Areas.

To Apply

- Apply to the NMSU Graduate School (<http://gradadmissions.nmsu.edu>)
- Apply to C&I by sending in your Application Portfolio by December 15th
 - See the sections, "Applying to the Doctoral Program," "Doctoral Intake Application Instructions" and the "C&I Doctoral Student Checklist" in the Doctoral Handbook (<http://dept-wp.nmsu.edu/coeci/candi-handbooks>).
 - NMSU Doc Portfolio Example – C&I (<http://ci.education.nmsu.edu/files/2013/12/NMSU-Doc-Portfolio-Example-CI.pdf>) (If the Sample portfolio does not open automatically, try a different browser or try saving the portfolio to your desktop before opening it.)

NOTE: Potential students who have written successful portfolios will be invited to interview with the Doctoral Qualifying Committee (a committee of C&I faculty)

Once Applicants Are Accepted

- Attend the applicable Doctoral Orientation Meeting your first semester of classes
- Meet with your Interim Adviser during your first semester of classes
- Get to know our faculty (<http://dept-wp.nmsu.edu/coeci/faculty>)
- Read the Doctoral Handbook (<http://dept-wp.nmsu.edu/coeci/candi-handbooks>) and the sections of the NMSU Graduate Catalog that apply to you (this is your responsibility)
- Follow the Doctoral Program Checklist from the C&I Doctoral Handbook (<http://dept-wp.nmsu.edu/coeci/candi-handbooks>)

Curriculum and Instruction - Doctor of Philosophy

The Curriculum and Instruction Department offers two kinds of doctorates: The Doctorate of Education and the Doctorate of Philosophy.

The Doctorate of Education (EdD) and the Doctorate of Philosophy (PhD) are rigorous degrees requiring an intellectual and personal commitment beyond compare. Both degrees ask for a lifelong commitment to teaching, learning and pedagogy, to research and to service in the areas of the recipient's interests and desires. The academic course of study for

both degrees is the same. The EdD program of study requires a minimum of 66 credit hours (48 hours coursework and 18 hours of dissertation) to complete. The PhD program requires students to demonstrate competency in the computer tools or second language sequence. (See below in program descriptions). For both programs (EdD and PhD) 66 credit hours is only the minimum and students may be asked to complete additional hours as per their advisor and committee recommendations.

Both degrees require a dissertation based on original research, inextricably grounded with an array of primary and secondary sources. Both degrees have required courses of study, but are additionally individualized based on those scholarly and academic expectations set by the doctoral student in collaboration with their Dissertation Committee.

Focus Areas

Currently there are five Focus Areas for the Doctoral Program.

Early Childhood - Bachelor of Science in Education

General Education Courses 35

Area I: English and Communications:

ENGL 111G	Rhetoric and Composition
ENGL 211G	Writing in the Humanities and Social Sciences
or ENGL 311G	Advanced Composition
COMM 253G	Public Speaking
or COMM 265G	Principles of Human Communication

Area III: Laboratory Sciences:

Two different subjects with labs, must be G courses:

ASTR 105G	The Planets
or ASTR 110G	Introduction to Astronomy
BIOL 101G/101GL	Human Biology
BIOL 111G/111GL	Natural History of Life
BIOL 211G/211GL	Cellular and Organismal Biology
E S 110G	Introductory Environmental Science
GEOL 111G	Introductory to Geology
GEOL 212G	The Dynamic Earth
GEOG 111G	Geography of the Natural Environment
PHYS 110G	The Great Ideas of Physics
PHYS 120G	Introduction to Acoustics
PHYS 211G/211GL	General Physics I
PHYS 212G/212GL	General Physics II

Area IV: Social/Behavioral Sciences (9 credits):

C EP 110G	Human Growth and Behavior
-----------	---------------------------

Choose two courses from two different departments:

ANTH 201G	Introduction to Anthropology
ECON 201G	Introduction to Economics

ECON 251G	Principles of Macroeconomics
ECON 252G	Principles of Microeconomics
GEOG 112G	World Regional Geography
GEOG 120G	Culture and Environment
GOVT 100G	American National Government
GOVT 110G	Introduction to Political Science
SOC 101G	Introductory Sociology

Area V: Humanities and Fine Arts (9 credits):

HIST 111G	Global History to 1500
or HIST 112G	Global History Since 1500
HIST 201G	Introduction to Early American History
or HIST 202G	Introduction to Recent American History

Choose one from the following:

ART 101G	Orientation in Art
DANC 101G	Dance Appreciation
MUS 101G	An Introduction to Music
MUS 201G	History of Jazz in Popular Music: A Blending of Cultures
THTR 101G	The World of Theatre

Viewing a Wider World Courses 6

Professional Education Courses

ECED 115	Child Growth, Development, and Learning	3
ECED 125	Health, Safety, and Nutrition	2
ECED 135	Family and Community Collaboration	3
ECED 215	Curriculum Development Through Play	3
ECED 220	Early Childhood Education Practicum I	2
ECED 225	Curriculum Development and Implementation II	3
ECED 230	Early Childhood Education Practicum II	2
ECED 235	Introduction to Language, Literacy and Reading	3
ECED 245	Professionalism	2
ECED 255	Assessment of Children and Evaluation of Programs	3
ECED 265	Guiding Young Children	3
ECED 315	Research in Child, Growth, Development and Learning	3
ECED 335	Family, Language and Cultural	3
ECED 440	Teaching and Learning Math and Science	4
ECED 455	Teaching and Learning Social Studies, Fine Arts and Movement	3
RDG 350	Teaching and Learning Reading and Writing	3
SPED 450	Working with Young Children with Special Needs, Ages 3-8	3
SPED 451	Assessment of Young Children, Birth-Eight	3
ECED 329	Early Primary Field Placement	2

Electives: to bring total to 122 (48 credits must be upperdivision for university requirements) 28

Total Credits 122

Early Childhood Education - Undergraduate Minor

The primary function of the undergraduate programs in the Department of Curriculum and Instruction is the preparation of licensed teachers for early-childhood settings and elementary and secondary schools. This process includes a broad general education, professional education and teaching specializations.

Education - Master of Arts

The Department of Curriculum & Instruction in the College of Education is devoted to the preparation of teachers and teacher leaders for the public schools; directors of curriculum and instruction; subject matter specialists; teacher educators and professional development specialists; and, college professors and professors of curriculum and instruction. The College of Education is NCATE (<http://www.ncate.org>), now CAEP (<http://www.caepnet.org>) and accredited by New Mexico Public Education Department <http://www.ped.state.nm.us/ped/index.html>.

Master of Arts in Education (for licensed PK-12 teachers)

Minimum credits differ between program concentrations. Please consult the program handbook or the department for specifics.

Degree Concentration Areas

- Curriculum & Instruction
- Bilingual Education
- Educational Learning Technologies
- Language, Literacy & Culture (Reading)
- Teaching English to Speakers of Other Languages (TESOL)
- Early Childhood Education (on-line only)

Optional Endorsements for existing teaching licenses:

- Bilingual
- Technology Coordinator
- Reading
- Teaching English to Speakers of Other Languages (TESOL)

Master of Arts in Education Plus Licensure Concurrently – Students can earn a teaching license in the areas of elementary education and secondary education while earning a Master of Arts in Education degree

Remember You cannot teach in the public schools without seeking licensure and you cannot seek an endorsement without first obtaining a teaching licensure.

Master of Arts in Education (Non-Licensure)

Students can select a Master of Arts in Education (non-licensure) in one of the following concentration areas:

- Curriculum & Instruction
- Bilingual Education
- Educational Learning Technologies
- Early Childhood Education;
- Language, Literacy & Culture (Reading); or,
- Teaching English to Speakers of Other Languages (TESOL).

Students completing the following programs will not be licensed to teach PreK-12 in the State of New Mexico, nor will completion of these degree programs automatically result in a teaching field endorsement.

The Master's Degree Core – 15 (credit hours)

The faculty in the Department of Curriculum & Instruction has worked over the years to revise and update the core courses in the department to provide a strong foundation in curriculum and instruction (pedagogy) for all students studying in our master's programs. The core courses are as follows

Curriculum and Instruction Core

EDUC 515	Multicultural Education	3
EDUC 516	Curriculum and Pedagogy I	3
EDUC 518	Technology and Pedagogy	3
EDUC 519	Research in Curriculum and Pedagogy	3
EDUC 520	Action Research Projects ¹	3
Total Credits		15

¹ This course is the final core course that students are required to take. EDUC 515, 516, 518 and 519 are prerequisites to taking EDUC 520.

(Please see the Graduate Catalog for complete course descriptions: <http://catalog.nmsu.edu/>)

Checklist for the Master of Arts Program

1. **Apply** through NMSU Graduate Student Services for admission to the department (<http://prospective.nmsu.edu/graduate/apply/index.html>). "Department of Curriculum & Instruction" and the degree program/ concentration/program desired;
2. **After** you receive an acceptance letter from the Department of Curriculum & Instruction, contact your faculty advisor within the first semester of enrollment (a listing of the C&I faculty and their contact information can be located on the C&I Website: <http://education.nmsu.edu/ci/faculty.html>);
3. **Join the C&I MA Student List-serv.** at the following website, and follow the directions: <https://mailman.nmsu.edu/mailman/listinfo/candima>. It is important to regularly check your NMSU e-mail; the university sends important communications to you through that account. Also check the Department of Curriculum & Instruction Masters Website for important announcements and activities;
4. **Contact** your advisor to complete the Preliminary Program Plan (available at the in end of this handbook) and submit the plan to the Associate Department Head for Graduate Programs for review and approval within the first semester of enrollment;
5. **Complete the Program of Study and a STAR audit** (After you have completed 12 credit hours) and make an appointment with your advisor to approve and sign the form. It must be filed with the Department of Curriculum & Instruction. Find the form at: <http://prospective.nmsu.edu/graduate/forms/index.html>
6. **File the Application for Degree form** during the registration period of your final semester (<http://www.nmsu.edu/~registra/degree-app/>);
7. **Apply** to take the written Master's Comprehensive Examination early in the last semester of your coursework. The MA exam usually occurs on the second Friday of October and the second Friday of March. Announcements regarding registration, the preparation session, and the exam will be on the C&I MA Website, the MA list-serv, and in the College of Education;

8. ____ **Complete** the Final Examination paperwork; and,
9. ____ **Study** for the Final Written Examination to be successful on your exam.

Complete Department of Curriculum and Instruction Information is located at: <http://ci.nmsu.edu> (<https://ci.nmsu.edu>)

Complete NMSU Graduate School Information is available on-line (<http://gradschool.nmsu.edu>)

Education - Master of Arts in Teaching

Master of Arts in Teaching (MAT)

- This is a non-licensure degree that is intended for working teachers who already have a license but want to continue their studies, specialize in a specific teaching field and earn a master's degree. The program requires a minimum of 33 credit hours, with 15 credits in the Department of Curriculum & Instruction core courses and 18 credit hours from an area of teaching content specialization (i.e., generally in the College of Arts & Sciences) numbered 450 or above. The professional coursework must be taken in the Department of Curriculum & Instruction and culminates with a written examination over the program of study. A candidate may choose to write a thesis in place of the written exam. Please check with your faculty advisor or the Director for Graduate Programs for additional information.

C&I Core Courses

EDUC 515	Multicultural Education	3
EDUC 516	Curriculum and Pedagogy I	3
EDUC 518	Technology and Pedagogy	3
EDUC 519	Research in Curriculum and Pedagogy	3
EDUC 520	Action Research Projects ¹	3

¹ This course is the final core course that students are required to take. EDUC 515, 516, 518 and 519 are prerequisites to taking EDUC 520.

Current MAT Programs

The Department of Curriculum & Instruction currently offers the following customized MAT Programs in collaboration with colleagues from other departments.

- Master of Arts in Teaching, with a concentration in Dance (33 credits)
 - For more information, go to <http://kind.nmsu.edu/dance-main/academic-dance/masters-of-arts-in-teaching-concentration-in-dance/>
- Master of Arts in Teaching, with a concentration in Spanish (33 credits)
 - For more information, go to <http://ci.nmsu.edu>

For additional information about the MAT, please contact the Director for Graduate Programs.

Elementary Education - Bachelor of Science in Education

General education and professional education are similar for all degree programs in the College of Education. Students should meet with an advisor to plan appropriate general education courses for an elementary education major.

General Education Courses

35

Area I: English and Communication Arts

ENGL 111G	Rhetoric and Composition
ENGL 211G	Writing in the Humanities and Social Sciences
or ENGL 311G	Advanced Composition
ENGL 363	Literature for Children and Young Adults
COMM 253G	Public Speaking
or COMM 265C	Principles of Human Communication

Area II: Mathematics

MATH 111	Fundamentals of Elementary Mathematics I
MATH 112G	Fundamentals of Elementary Math II

Area III: Laboratory Science

Eight credits from the following (must be from two different subjects and G courses):

ASTR 105G	The Planets
or ASTR 110G	Introduction to Astronomy
BIOL 101G/101GL	Human Biology
BIOL 111G/111GL	Natural History of Life
BIOL 211G/211GL	Cellular and Organismal Biology
CHEM 110G	Principles and Applications of Chemistry
CHEM 111G	General Chemistry I
CHEM 112G	General Chemistry II
E S 110G	Introductory Environmental Science
GEOL 111G	Introductory to Geology
GEOL 212G	The Dynamic Earth
GEOG 111G	Geography of the Natural Environment
PHYS 110G	The Great Ideas of Physics
PHYS 120G	Introduction to Acoustics
PHYS 211G/211GL	General Physics I
PHYS 212G/212GL	General Physics II

Area IV: Social Behavioral Sciences

C EP 110G	Human Growth and Behavior
LING 200G	Introduction to Language

One from the following:

GEOG 112G	World Regional Geography
or GEOG 120G	Culture and Environment
GOVT 100G	American National Government
or GOVT 110G	Introduction to Political Science

Area V: Humanities and Fine Arts

HIST 111G	Global History to 1500
or HIST 112G	Global History Since 1500
HIST 201G	Introduction to Early American History

or HIST 202G	Introduction to Recent American History	
One from the following:		
ART 101G	Orientation in Art	
DANC 101G	Dance Appreciation	
MUS 101G	An Introduction to Music	
MUS 201G	History of Jazz in Popular Music: A Blending of Cultures	
THTR 101G	The World of Theatre	
Viewing a Wider World Courses		6
Professional Education Courses		
EDUC 343	Language, Literacy, and Culture in the ESL Classrooms	3
EDUC 451	Methods of Teaching Elementary School Science	3
EDUC 342	Sheltered English Instruction for the ESL Classroom	3
EDUC 452	Methods of Teaching Elementary School Mathematics	3
EDUC 454	Methods of Teaching Elementary School Social Studies	3
EDUC 483	Second Language Acquisition	3
RDG 360	Elementary School Literacy I	3
RDG 361	Elementary School Literacy II	3
RDG 371	Instruction for Special Reading Needs	3
SPED 360	Elementary Curriculum, Methods, and Materials for Special Education in a Diverse Society	3
Concentrations: (select one from below)		24
Electives: to bring total to 120 credits		25
Total Credits		120

Concentration: Language Arts K-8

COMM 253G	Public Speaking	3
or COMM 265G	Principles of Human Communication	
ENGL 211G	Writing in the Humanities and Social Sciences	3
or ENGL 311G	Advanced Composition	
ENGL 363	Literature for Children and Young Adults	3
LING 200G	Introduction to Language	3
LING 302V	Language and Society	3
RDG 360	Elementary School Literacy I	3
RDG 361	Elementary School Literacy II	3
RDG 371	Instruction for Special Reading Needs	3
Total Credits		24

Concentration: Math K-8

Students with consent of an advisor and the mathematics department may take higher level math classes.

Core Courses

MATH 111	Fundamentals of Elementary Mathematics I	3
MATH 112G	Fundamentals of Elementary Math II	3

MATH 215	Fundamentals of Elementary Mathematics III	3
MATH 120	Intermediate Algebra	3
MATH 121G	College Algebra	3
MATH 142G	Calculus for the Biological and Management Sciences	3
STAT 251G	Statistics for Business and the Behavioral Sciences	3
EDUC 452	Methods of Teaching Elementary School Mathematics	3
Total Credits		24

Concentration: Science K-8

SCIENCE from the general education requirements on degree plan	8
ASTR elective	3
BIOL elective	3
CHEM elective	3
GEOL or Physical GEOG elective	3
SCIENCE elective	4
Total Credits	24

Concentration: Social Studies K-8

ANTH elective		3
ECON elective		3
GEOG or GOVT elective		3
HIST 111G	Global History to 1500	3
HIST 112G	Global History Since 1500	3
HIST 201G	Introduction to Early American History	3
or HIST 202G	Introduction to Recent American History	
HIST 368	Teaching History	3
HIST elective		3
Total Credits		24

Elementary Education Endorsement Areas (24 credits)

Elementary Education majors are required to complete a teaching field (endorsement area) in an academic discipline. A list of teaching fields is available in the Center for Academic Advising and Student Support (CAASS) and the Office of Teacher Candidate Preparation.

Bilingual/TESOL Endorsement

Early Childhood, Secondary and Special Education students interested in a bilingual or TESOL endorsement should contact the advisement office. These endorsements can now be included in an undergraduate degree program without significant additional hours required.

Secondary Education - Bachelor of Science in Education

General education and professional education requirements are similar for all degree programs in the College of Education. Students should meet with an advisor to plan appropriate general education courses for a secondary education major.

Teaching Field: Language Arts

General Education

<i>Area I: English and Communication</i> ¹	
ENGL 111G	Rhetoric and Composition
<i>Area II: Mathematics</i>	
MATH 121G	College Algebra
or MATH 190G	Trigonometry and Precalculus
MATH 210G	Mathematics Appreciation
or MATH 142G	Calculus for the Biological and Management Sciences
<i>Area III: Laboratory Sciences (8 credits, with two different subject codes)</i>	
ASTR 105G	The Planets
or ASTR 110G	Introduction to Astronomy
BIOL 101G/101GL	Human Biology

Zero-to-Four (Early Childhood) - Bachelor of Applied Studies

There is an identified need for prepared educators to serve young children ages zero to four years old in settings outside of the public school in childcare centers, Head Start, and other agencies. The Curriculum and Instruction Department offers a non-licensure concentration, with the Bachelor of Applied Studies degree for the Zero to Four years old early childhood track. This non-licensure concentration serves private and public childcare, early intervention programs, and Head Start.

Educational Leadership and Administration

Undergraduate Program Information

The mission of the Department of Educational Leadership and Administration at New Mexico State University is to prepare and graduate capable, skillful and dynamic educational leaders for a diverse society. Through use of theory and practice we aim to develop change agents and role models for socially-just educational systems.

Educational Leadership and Administration

At the undergraduate level, ELA offers the following courses:

ELA 215	Multicultural Leadership in Education	3
ELA 255	Leadership and Change in Education	3
ELA 342	Current Issues In Educational Leadership	3
ELA 350V	Introduction to Educational Leadership in a Global Society	3
ELA 398	Special Topics in Education	1-3
ELA 411	Foundation for School Library Specialists	3
ELA 412	Administration of the School Library	3
ELA 413	Curriculum Role of the School Library Specialist	3
ELA 414	Collection Management and Development in School Libraries	3
ELA 440	Management of Student Services	3
ELA 450	Principles of Education Law and Policy	3
ELA 455	Principles of Education Budgeting and Finance	3
ELA 485	Elements of Research	3
ELA 499	Internship	3

Graduate Program Information

The mission of the Department of Educational Leadership and Administration at New Mexico State University is to prepare and graduate capable, skillful and dynamic educational leaders for a diverse society. Through the use of theory and practice we aim to develop change agents and role models for socially-just educational systems.

Students studying in these programs are generally interested in the following categories:

- Those seeking preparation for careers as educational leaders and administrators in Pk-12 school sectors. Positions most commonly sought are principals, superintendents, supervisors, program directors, central office staff and state education agency leaders.
- Those seeking preparation for administrative and leadership careers in higher education at the community college and university level, as well as in technical-vocational education. This particular focus can include preparation for the professoriate.
- Those seeking preparation for careers in educational research, agency and program evaluation, and educational management technology. Positions cover placement in a broad range of employment situations within school districts, community colleges, universities, government and industry.

Admission

The department requires full admission to any ELA program before starting coursework. The department will dis-enroll any student who has not been admitted to a graduate degree program and, additionally, will not allow them to enroll in other ELA coursework.

Detailed information on programs may be obtained on the website at <http://ela.nmsu.edu/> or by writing the department. For additional information on degree requirements, consult the Graduate School and College of Education policies listed in "General Information (<http://nmsu-preview.courseleaf.com/nmsu/education/educational-leadership-admin>)" section of this catalog. Specific criteria for each program are available from the Department of Educational Leadership and Administration.

Admission to ELA Classes

Admission to ELA coursework is generally done by cohort. Registration in any ELA 500-level course requires

1. full admission to the ELA department, or
2. admission to another COE graduate degree department, and
3. consent of the ELA Programs Coordinator and/or ELA Department Head.

Minimum Grade Requirement

Students must earn a minimum of a "B-" grade in all required coursework. Students who receive a grade of "C+" or below will be required to retake the course.

Graduate Assistantships

Some graduate assistantships are available in the department. Interested persons should inquire at an early date. Graduate Assistantship applications are available at <http://ela.nmsu.edu/index/student-resources/>.

Degrees for the Department

Educational Administration - Master of Arts (p. 487)

Educational Administration - Doctor of Education (p. 486) (ELDP)

Educational Administration - Doctor of Philosophy (p. 486) (ELDP)

Minors for the Department

Educational Leadership and Administration - Undergraduate Minor (p. 487)

Pk-12 School Administration - Graduate Master's Minor (p. 487)

Higher Education Administration - Graduate Master's Minor (p. 487)

Pk-12 and Higher Education - Graduate Doctorate Minor (p. 486)

Associate Professor, Azadeh F. Osanloo, Interim Department Head

Associate Professors Christman, Prentice, Williams Pichon; **Assistant Professors** Guillaume, Kew; **College Associate Professors** Hannan; **College Instructor** Rodríguez-Strawn; **Emeritus Professors** Armendáriz, Domínguez, González, Ivory, Townley

A.F. Osanloo, Ph.D., Interim Department Head (Arizona State University)– educational equality, educational leadership and policy, philosophical foundation of education, issues of race, class, and gender in civic education; D. Christman, Ed.D. (Oklahoma State University)– educational administration, higher education, educational change processes, gender and American Indian issues, multicultural leadership; R. Guillaume, Ph.D. (New Mexico State University)- student development theory, biracial/multicultural identity development, higher education administration; J.M. Hannan, Ph.D. (New Mexico State University)– distance education administration, best practices in teaching distance education, student services for distance education students; K. Kew, Ph.D. (Boston College)– educational change and reform, educational leadership, school culture, micro-politics; M. Prentice, Ph.D. (University of Texas at Austin)- community college administration, service learning issues, best practices in teaching higher education; ; D. Rodríguez-Strawn, M.A. (New Mexico State University)- higher education administration, service learning practitioner, SLED program developer, teaching higher education; H. Williams Pichon, Ph.D. (University of New Orleans)#higher education administration, access and persistence of historically underrepresented groups in higher education, college student development, research

Emeriti Professors

A. L. Armendáriz, Ph.D. (University of New Mexico - emeritus)– school administration, leadership development, organizational theory; R. Domínguez, Ph.D. (New Mexico State University - emeritus)- educational administration, higher education, community college administration, leadership development; M.L. González, Ph.D. (New Mexico State University)– leadership in public school administration, multicultural organizations; G.M. Ivory, Ed.D. (Texas Tech University)– research design and evaluation, management technology; C. T. Townley, Ph.D. (University of Michigan - emeritus)– knowledge management, higher education

ELA 215. Multicultural Leadership in Education**3 Credits**

Introduction to the social and cultural constructions of gender, class, and race. Students will critically apply theoretical constructs to everyday life and discuss the intersection of gender and race with class inequality in national and global contexts. Using a social justice framework, readings, and assignments integrate a variety of racial/ethnic groups while considering the effects of historically uneven resource distribution, unearned privilege, forms of domination and subordination, immigration status, and cultural representation and ideologies. Participants will learn how to apply the change theories and concepts introduced in the course to practice through course readings, online discussions with the instructor and colleagues, group work, active examination of daily practice in schools, and personal reflection.

ELA 255. Leadership and Change in Education**3 Credits**

This course will introduce students to the challenges and key strategies in initiating, implementing, and sustaining educational change and reform. In the first part of the course, participants will learn about the challenges of educational change in the United States and the role that they as school leaders play in facilitating change and reform. The course continues with an examination of how culture, micro-politics, and power structures support or impede national and global change initiatives. The last part of the course offers suggestions for change agents including community organizing, culture building, and embracing sustainable leadership practices. Participants will learn how to apply the change theories and concepts introduced in the course to practice through course readings, online discussions with the instructor and colleagues, group work, active examination of daily practice in schools, and personal reflection.

ELA 298. Special Topics in Education**1-3 Credits (1-3)**

Special topics course in education for undergraduate students. Course will be identified by a subtitle. May be repeated up to 12 credits. Restricted to Las Cruces campus only.

ELA 342. Current Issues In Educational Leadership**3 Credits**

This course addresses issues such as the rise in international education, education's costs, social media's role and influence, changes in state and national funding trends, student and faculty/staff diversity, among others. The focus of this course is centered on the actions and responses of administrators to the current issues they are facing.

ELA 350V. Introduction to Educational Leadership in a Global Society**3 Credits**

Multinational educational systems covered through knowledge of the U.S. system of education promoting critical leadership roles every citizen plays in the success of educational systems.

ELA 398. Special Topics in Education**1-3 Credits (1-3)**

Special topics course in education for undergraduate students. Course will be identified by a subtitle. May be repeated for a maximum of 12 credits.

ELA 411. Foundation for School Library Specialists**3 Credits**

Elements of librarianship. Introduction to the history, purpose, and role of the school library. Overview of current issues and legislation affecting school libraries. Same as ELA 511. May be repeated up to 3 credits.

ELA 412. Administration of the School Library**3 Credits**

Principles and practices related to the function, structure, and management of school libraries. Same as ELA 512. May be repeated up to 3 credits.

ELA 413. Curriculum Role of the School Library Specialist**3 Credits**

Introduction to the integration of curriculum in school library programs. Current trends in collaborative planning and teaching between the school librarians and teachers. Taught with ELA 513. May be repeated up to 3 credits.

ELA 414. Collection Management and Development in School Libraries**3 Credits**

Principles of identifying, selecting, acquiring, managing, and evaluating information for school libraries. Same as ELA 514. May be repeated up to 3 credits.

ELA 440. Management of Student Services**3 Credits**

History and overview of student services (e.g., admissions, counseling, registration, financial aid, housing, food services, student organizations) for early entry level positions. This course will provide students with an examination of foundations and principals of student services. Important theories and essential competencies needed in order to be successful will be explored through a social justice perspective of leadership.

ELA 450. Principles of Education Law and Policy**3 Credits**

Overview of the use of law and policy in schools and higher education. May be repeated up to 3 credits. Restricted to: E AD, majors.

ELA 455. Principles of Education Budgeting and Finance**3 Credits**

Analysis of budget and finance practices in education. Restricted to: EMD majors.

ELA 485. Elements of Research**3 Credits**

This course provides students with a foundation for understanding educational research. The course will also provide grounding in proper writing format for use in the education profession. Students will be introduced to various research paradigms and the symbiosis of theory and practice. Besides introducing students to the symbiosis of theory and practice, students will complete assignments and activities that demonstrate the use of that symbiosis. Ultimately, students will be able to use the knowledge they gain through the course to be able to critique educational research.

ELA 499. Internship**3 Credits**

The undergraduate Educational Leadership major requires that students complete two internships. Internships provide students with either experience working in an area of administration that is different from the student's regular job or experience conducting research for a program or project. Each internship placement site and scope of work is determined through consultation with the course instructor. Students must complete 120 hours of work with the selected internship site. May be repeated up to 6 credits. Restricted to: EL majors.

Prerequisite(s): Student must be an EL major and be within (at least) one year of graduation.

ELA 502. Special Problems.**1-3 Credits**

Offered under various subtitles which indicate the subject matter covered. May be taken for a maximum of 3 credits per semester and a total of 6 credits overall. May be repeated up to 6 credits. Consent of Instructor required.

ELA 511. Foundation for School Library Specialists**3 Credits**

Elements of librarianship. Introduction to the history, purpose, and role of the school library. Overview of current issues and legislation affecting school libraries. Same as ELA 411. May be repeated up to 3 credits.

ELA 512. Administration of the School Library**3 Credits**

Principles and practices related to the function, structure, and management of school libraries. Same as ELA 412. May be repeated up to 3 credits.

ELA 513. Curriculum Role of the School Library Specialist**3 Credits**

Introduction to the integration of curriculum in school library programs. Current trends in collaborative planning and teaching between school librarians and teachers. Same as ELA 413. May be repeated up to 3 credits.

ELA 514. Collection Management and Development in School Libraries**3 Credits**

Principles of identifying, selecting, acquiring, managing, and evaluating information for school libraries. Same as ELA 414. May be repeated up to 3 credits.

ELA 530. Management of Educational Change**3 Credits**

Leadership in implementing innovations in education. Consent of Instructor required.

ELA 531. Special Education Administration**3 Credits**

Competencies for the administration of special education programs with an emphasis upon New Mexico public school standards. Consent of Instructor required.

ELA 540. Management of Student Services in Higher Education**3 Credits**

History and overview of student services (e.g., admissions, counseling, registration, financial aid, housing, food services, student organizations) and a review of management components used in student services. Consent of Instructor required.

ELA 550. Higher Education Law**3 Credits**

This course is designed to review the impact of the legal process and the judiciary on higher education. Consent of Instructor required.

ELA 555. Higher Education Finance and Funding**3 Credits**

This course examines the impact and process of financing and funding higher education. Consent of Instructor required.

ELA 563. Higher Education Administration**3 Credits**

This course provides an overview of higher education in the United States including history, mission, and governance, in the context of organizational theory. Consent of Instructor required.

ELA 564. Internship Public Schools Part I**3 Credits**

First half of a practical internship in Pk-12 schools under supervision of school administrator. Consent of Instructor required. Restricted to: E AD majors.

Prerequisite(s): 18 cr. of ELA coursework, 3 years of Pk-12 teaching experience and consent of instructor.

ELA 565. Internship: Public Schools Part II**3 Credits**

Second half of a practical internship in Pk-12 administrative setting under supervision of experienced higher education administrator. Consent of Instructor required. Restricted to: E AD majors.

Prerequisite(s): ELA 564.

ELA 566. Internship: Higher Education Part I**3 Credits**

First half of practical internship in administrative setting under supervision of experienced higher education administrator. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: E AD majors.

Prerequisite(s): 15 credits of ELA coursework and consent of instructor.

ELA 567. Internship: Higher Education Part II**3 Credits**

Second half of a practical internship in an administrative setting under supervision of an experienced higher education administrator. Consent of Instructor required. Restricted to: E AD majors.

Prerequisite(s): ELA 566.

ELA 568. Topics in School Administration**1-3 Credits**

Designated by subtitle.

ELA 569. Basing Decision on Data: Higher Education.**3 Credits**

Analysis of accountability data and other evidence to support educational decision making. Disaggregating and interpreting assessment data to guide improvement of instruction. Moving from evidence to plans for action. Consent of Instructor required.

ELA 570. Educational Leadership, Supervision, and Evaluation**3 Credits**

Leadership, supervision, and evaluation in Pk-12 and post secondary education. Consent of Instructor required.

ELA 572. History and Philosophy of Education**3 Credits**

An overview of the historical development of the American school system and the relation of various philosophies to American education.

ELA 575. The Principalship**3 Credits**

Key issues surrounding the role of school-site leaders. Consent of Instructor required.

ELA 576. Educational Financial Management**3 Credits**

Educational finance and business applications. Consent of Instructor required.

ELA 578. Leadership and Administration of Bilingual Education**3 Credits**

Concepts and practical approaches to improving the education of English languages learners through higher education. Consent of Instructor required.

ELA 579. Public School Law**3 Credits**

Legal processes of education, major court decisions, and the legislative process will be studied. Consent of Instructor required.

ELA 580. Administration of Adult and Continuing Education**3 Credits**

Administration of programs in public schools, higher education, community and nontraditional educational settings. Consent of Instructor required.

ELA 582. Community College Administration**3 Credits**

An overview of the history, role, objectives and patterns governing the effectiveness of the community college. Consent of Instructor required.

ELA 585. Elements of Research**3 Credits**

Survey and analysis of research methods and designs focusing on sound educational research and its presentation. Consent of Instructor required.

ELA 586. Multicultural Leadership in Education**3 Credits**

Examine cultural diversity and how appropriate understanding, leadership and instructional strategies can be used to reach all learners. Enhances understanding of what it means to be an educator in culturally diverse contexts. Consent of Instructor required.

ELA 589. Evaluation Design in Education**3 Credits**

This course focuses on evaluation and accountability models; application to educational programs. Consent of Instructor required.

ELA 590. Basing Decision on Data: Pk-12**3 Credits**

Analysis of accountability data and other evidence to support educational decision making. Disaggregating and interpreting assessment data to guide improvement of instruction. Moving from evidence to plans for action. May be repeated up to 3 credits. Consent of Instructor required.

ELA 595. Current Topics**1-6 Credits**

Offered under various subtitles which indicate the subject matter covered. May be taken for a maximum of 6 credits.

ELA 598. Independent Studies**1-3 Credits**

Individual investigation in special topic areas. Requires prior approval of project advisor.

ELA 600. Doctoral Research**1-15 Credits**

Research. S/U to traditional grade options. May be repeated up to 88 credits. Consent of Instructor required. Thesis/Dissertation Grading.

ELA 620. Doctoral Seminar**1-3 Credits**

A study of current issues in educational administration at the national, state, and local levels. May be repeated up to 6 credits. Consent of Instructor required.

ELA 622. Quantitative Research I**3 Credits**

Explores quantitative research methods, the rationale and assumptions that guide statistical decisions, beginning level statistical analyses, and how all of these are applied in the field of educational leadership. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

ELA 623. Qualitative Research I**3 Credits**

Explores qualitative research methods and models and their application in the field of educational leadership. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

ELA 630. Concepts of Leadership in Education**3 Credits**

Survey of concepts of leadership in general and educational leadership in particular. Consideration of implications for practice. May be repeated up to 3 credits. Consent of Instructor required.

ELA 645. The Professoriate**3 Credits**

The purpose of this course is to explore the body of scholarly knowledge and research appropriate for the study of American higher education, the context in which teaching and learning occurs, and faculty's roles in the process. We will discuss the number, variety, and purpose of the various types of institutions; the different roles that faculty members play within these institutions; how faculty work is assessed and valued within the outside of the university; administrative regulations related to faculty work; current issues related to the general state of the professoriate; as well as how does one prepare to enter the professoriate.

ELA 650. Higher Education Law**3 Credits**

This advanced course is designed to review the impact of the judiciary on higher education. The legal standing of institutions of higher education on issues of staff rights, student rights, and tort liability will be addressed. In addition, the impact of local ordinances, state and federal laws and regulations will be examined. Consent of Instructor required.

ELA 655. Higher Education Finance and Funding**3 Credits**

This advanced course examines the impact and process of financing and funding higher education. The course is an examination of higher education finance as it relates to operational budgets, capital budgets, and policy issues which impact the financing of higher education. Consent of Instructor required.

ELA 670. Advanced Internship**1-6 Credits**

For those pursuing an advanced degree to meet the field work requirement. To bear an appropriate subtitle. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: E AD majors. S/U Grading (S/U, Audit).

ELA 671. Foundations of Educational Administration**3 Credits**

Advanced course about the political, economic, and social forces on policy making and governance of Pk-12 and postsecondary education. May be repeated up to 3 credits. Consent of Instructor required.

ELA 676. Educational Financial Management**3 Credits**

This advanced course offers an overview of economic and financial concerns relating to the public school system of the United States. Consent of Instructor required.

ELA 679. Public School Law**3 Credits**

Advanced course in which the legal processes of education, major court decisions, and the legislative process will be studied. Consent of Instructor required.

ELA 682. Quantitative Research II**3 Credits**

Intermediate quantitative methods of research, statistical analyses, and their application in the field of educational leadership. May be repeated up to 3 credits. Consent of Instructor required. Restricted to Doctoral students only.

Prerequisite(s): ELA 622.

ELA 683. Qualitative Research II**3 Credits**

Advanced qualitative methods of research and implementation in the field of educational leadership. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): ELA 622.

ELA 685. Elements of Research**3 Credits**

Advanced survey and analysis of research methods and designs focusing on sound educational research and its presentation. Consent of Instructor required.

ELA 689. Evaluation Design in Education**3 Credits**

Advanced course that focuses on evaluation and accountability models; application to educational programs. Consent of Instructor required.

ELA 693. Dissertation Seminar**3 Credits**

Same as BIL, C EP, ECED, EDUC, RDG, SPED 693. Consent of Instructor required.

ELA 698. Selected Topics**1-6 Credits**

Offered under various subtitles which indicate the subject matter covered. May be taken for a maximum of 6 credits per semester and overall total: May be repeated up to 9 credits.

ELA 700. Doctoral Dissertation**9 Credits**

Dissertation. Minimum of 3 credits per regular semester. May be taken for a maximum of 36 credits. Consent of instructor required.

Educational Administration - Doctor of Education

Educational Leadership Doctoral Program (ELDP)

The Department of Educational Leadership and Administration (ELA) offers both the Doctor of Education (Ed.D.) and the Doctor of Philosophy (Ph.D.)

The Doctor of Education is geared toward those students wishing to pursue a degree which will help them in their profession. Coursework, internships, and research are constructed to develop individuals for administrative position in Pk-12 schools in post secondary institutions.

The Doctor of Philosophy is a research-oriented degree. Coursework and internships are directed toward developing research proficiencies in educational leadership. The Ph.D. also requires additional hours of coursework in an approved cognate area.

Admission

The department requires applicants to complete a Doctoral Admissions Portfolio. Specific details and criteria are available from the Department of Educational Leadership and Administration or on the website at <https://ela.nmsu.edu/index/academics/docpage/>.

For More Information

Please do not hesitate to contact the ELA Department if you have any questions related to ELDP. Feel free to send an e-mail message to edmandev@nmsu.edu (edmandev@nmsu.edu) or call (575) 646-3825.

Educational Administration - Graduate Minor

Doctoral students who wish to earn a minor in Pk-12 school administration will need to take the following courses:

ELA 630	Concepts of Leadership in Education	3
ELA 671	Foundations of Educational Administration	3
ELA 676	Educational Financial Management	3

ELA 679	Public School Law	3
Total Credits		12

Those who wish to earn a minor in higher education administration are required to complete the following courses:

ELA 620	Doctoral Seminar	3
ELA 650	Higher Education Law	3
ELA 655	Higher Education Finance and Funding	3
ELA 671	Foundations of Educational Administration	3
Total Credits		12

Educational Administration - Graduate Minor

Master's students may earn a minor in educational administration, with a focus in Higher Education Administration, by passing **three** of the listed classes below.

Minimum Grade Requirement

Students must earn a minimum "B-" grade in all required coursework. Students who receive a grade of "C+" or below will be required to retake the course.

ELA 563	Higher Education Administration	3
or ELA 582	Community College Administration	
ELA 550	Higher Education Law	3
ELA 555	Higher Education Finance and Funding	3
ELA 540	Management of Student Services in Higher Education	3

Educational Administration - Graduate Minor

Master's level students wishing to earn a minor in educational administration, with a focus in Pk-12 Educational Administration, must pass **three** of the listed classes below.

Minimum Grade Requirement

Students must earn a minimum "B-" grade in all required coursework. Students who receive a grade of "C+" or below will be required to retake the course.

ELA 570	Educational Leadership, Supervision, and Evaluation	3
ELA 575	The Principalship	3
ELA 576	Educational Financial Management	3
ELA 579	Public School Law	3

Educational Administration - Master of Arts

Educational Administration - Master of Arts

The Master of Arts (M.A.) in educational administration focuses on two areas: Pk-12 school administration and higher education. The program of study for Pk-12 school administration includes all coursework and

internships required by the New Mexico Public Education Department for Administrative Licensure.

The department does not offer the thesis option.

Admission Application: Pk-12 School Administration

Grade point average requirements for the master's program are consistent with those of the Graduate School. However, in addition to these requirements, all master's degree applicants must provide, to the department, a one-page letter of application indicating career interests and reasons for wanting to pursue a master's degree in the department; a professional résumé; a two-page professional or academic writing sample; official document showing three years of Pk-12 teaching experience; copy of current U.S. teaching license; and three letters of recommendation. The letters of support must be mailed directly to the department from the writer. The ELA admissions committee bases admissions decisions on this portfolio and will not consider incomplete applications.

Prerequisites: Pk-12 School Administration

Students interested in the Pk-12 school administration must have a current U.S. teaching license and three years of full-time teaching experience in the Pk-12 sector.

Application Deadline: Pk-12 School Administration

This program begins in the spring semester only. All materials for this program must be received by the deadline of November 15. Admission requirements are available from the Department of Educational Leadership and Administration, or on the website at <https://ela.nmsu.edu/index/academics/mainal/>.

Admission Application: Higher Education Administration

Applicants must provide, to the ELA department, a one-page letter of application indicating career interests and reasons for wanting to pursue a master's degree; a professional résumé; a two-page professional or academic writing sample; and three letters of recommendation. The letters of support must be mailed directly to the department from the writer. The ELA admissions committee will not consider incomplete applications.

Prerequisite: Higher Education Administration

Students interested in higher education administration must have a bachelor's degree.

Application Deadline: Higher Education Administration

This program begins in the spring semester only. All materials for this program must be received by the deadline of November 15. Admission requirements are available from the Department of Educational Leadership and Administration, or on the website at <http://ela.nmsu.edu/index/academics/mainhied/>.

Educational Leadership and Administration - Undergraduate Minor

A minor in educational leadership and administration is available to a student receiving a bachelor's degree from another department in the university. The minor in educational leadership and administration is designed to be useful to the undergraduate who is preparing to work as

a teacher or staff member in educational organizations such as primary schools, community colleges and universities.

Required Courses

ELA 215	Multicultural Leadership in Education	3
ELA 255	Leadership and Change in Education	3
ELA 342	Current Issues In Educational Leadership	3
ELA 398	Special Topics in Education	3
ELA 450	Principles of Education Law and Policy	3
ELA 455	Principles of Education Budgeting and Finance	3
Total Credits		18

How To Apply

If you wish to complete a minor in Educational Leadership and Administration (ELA), you should complete the ELA minor application/verification form and return it to the Educational Leadership and Administration Department during the semester in which you will be completing your ELA minor coursework. This form notifies the registrar of your intention. It insures that if you complete the requirements for the minor, it will be officially recorded in your transcript.

Kinesiology and Dance

Undergraduate Program Information

The Department of Kinesiology and Dance provides students with the education necessary to pursue careers in allied health sciences (medicine, physician's assistant, physical therapy, occupational therapy, etc.), athletic training, physical education, dance and dance education and for a variety of careers in the fitness and wellness industry. Details of the degree programs and their respective concentrations are provided below.

The department also offers minors in dance and exercise science.

Graduate Program Information

The PhD in Kinesiology encompasses opportunities for focused study in physiological, biomechanical, psychological, and pedagogical domains of human movement. Program emphasis is placed on the acquisition of skills needed for high quality research and innovative teaching. Students are expected to become proficient in research methods within their respective areas of interests. The program prepares students for postdoctoral or faculty positions in higher education, or positions in applied sport and clinical settings. Students are expected to work with specific faculty members to explore interests in Biomechanics, Exercise Physiology, Strength & Condition, Aging, Physical Education, Dance and Sport Psychology & Motor Behavior.

Admission

The Department of Kinesiology & Dance offers a Doctorate of Philosophy (PhD) in Kinesiology. To maximize consideration for admittance (for a recommended August start date), candidates should submit applications by January 15 of that same year.

Students will be admitted to graduate study on the basis of their potential for achievement in research, scholarship and teaching. The most promising applicants will be accepted. Because the number of students that the department can successfully accommodate is limited, it will not always be possible to admit all qualified applicants. The admissions committee will consider any material that a candidate for

admission wishes to present. Application forms and instructions are available here: <http://prospective.nmsu.edu/graduate/apply/index.html>. The minimum application consists of the following:

1. A completed Graduate School admission application.
2. Complete transcripts of all college work, reflecting a bachelors and a masters degree (or 30 hours of graduate work) in a related field of study, and a minimum cumulative GPA of 3.0 in prior degree programs.
3. Scores on the Graduate Record Examination (there is no minimum requirement; however, the scores will be considered in the admission decision).
4. Three letters of recommendation from professors, employers or others qualified to evaluate your potential for graduate work.
5. A curriculum vitae or resume.
6. A personal statement explaining how graduate work at NMSU fits your educational and career goals, and,
7. An indication of the faculty members whose work is of particular interest to you, and a letter of support from at least one faculty member indicating an interest in guiding you through your program of studies.

Degrees for the Department

Dance - Bachelor of Arts in Dance (p. 503)

Athletic Training - Bachelor of Science in Athletic Training (p. 502)

Kinesiology - Bachelor of Science in Kinesiology (p. 505)

Kinesiology - Doctor of Philosophy (p. 507)

Minors for the Department

Dance - Undergraduate Minor (p. 504)

Exercise Science - Undergraduate Minor (p. 505)

Professor, Robert Wood, Academic Department Head

Professors Berning, Knapp, Oliver; **Associate Professor** Gear, Keeley, Gilpin, Post; **Assistant Professors** Aiken, An, Aranda, Lee, Meyer, O'Connell; **Instructor** Gavit

Graduate Faculty: Robert H. Wood, Department Head, PhD (Louisiana State University), Phillip G. Post, Graduate Program Coordinator, PhD (Associate Professor, University of Tennessee), Christopher A. Aiken (Assistant Professor, Louisiana State University), Yong Woo An (Assistant Professor, University of Delaware), Joseph M. Berning, PhD (Professor, University of Nebraska), William S. Gear, PhD (Associate Professor, University of Pittsburgh), Frank G. "Paco" Gilpin, MS (College Associate Professor, New Mexico State University), David W. Keeley, PhD (Associate Professor, University of Arkansas), Debra W. Knapp, EdD (Professor, New Mexico State University), Sang-Rok, Lee (Assistant Professor, Florida State University), Kimberly L. Oliver, PhD (Professor, Virginia Polytechnical Institute).

Instructional Faculty: Raquel S. Aranda, MS (College Assistant Professor, New Mexico State University), Ann N. Gavit, MS (College Instructor, New Mexico State University), Shon Meyer, MS (College Assistant Professor Instructor,, University of Idaho), Kimberly O'Connell, MS (College Assistant Professor, California University of Pennsylvania).

DANC 101G. Dance Appreciation

3 Credits

An investigation of movement, dance and choreographic work as a vehicle for understanding culture. Includes concepts in dance appreciation, themes and purposes of dance analysis of dance works, exposure to different styles of dance and understanding the roles and effects of major historical periods. Restricted to: Main campus only.

DANC 102. Introduction to Hip-Hop Dance

1 Credit

This course is an introduction to Hip-Hop dance. The movement material will cover West coast and Southern styles with the inclusion of the history and evolution of Hip-Hop dance. No previous dance experience required. May be repeated up to 4 credits. Restricted to Las Cruces campus only.

DANC 109. Argentine Tango I

1 Credit

Introduction to skills and techniques of Argentine Tango.

DANC 118. West Coast Swing I

1 Credit

Students will learn to dance the smooth style of Swing. The West Coast Swing may be danced to ANY style of music that has a beat (Country, R&B, Hip Hop, Disco, House). Also featured is the Hustle (fast paced and exhilarating). May be repeated up to 4 credits. Restricted to Las Cruces campus only.

DANC 120. Ballet Folklorico I

1 Credit

Introductory course in folklorico dances of New Mexico and Mexico. May be repeated for a maximum of 2 credits.

DANC 121. Beginning Country Western Dance

1 Credit

Beginning Country Western dance, including Country Western two-step, nightclub two-step, polka, and Country Western line dance. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

DANC 122. Introduction to Latin Social Dance

1 Credit

Introduction to Latin social dance for non dance majors. Students will learn basic Latin dance technique and partnering work. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

DANC 123. Ballet Technique I

1 Credit

Introduction to basic ballet technique, vocabulary, and history. Includes practical application of anatomical placement, posture and control through participation and academic study. May be repeated for a maximum of 2 credits.

DANC 124. Jazz Technique I

1 Credit

Introduction to basic jazz technique, styles, and history through participation and academic study. May be repeated for a maximum of 2 credits.

DANC 125. Introduction to Ballroom Dance

1 Credit

Introduction to ballroom dance for non dance majors. Students will learn basic ballroom technique and partnering work. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

DANC 126. Modern Dance Technique I

1 Credit

Introduction to and development of basic modern dance technique, history, and aesthetics through participation and academic study. May be repeated for a maximum of 2 credits.

DANC 127. Tap Dance I

1 Credit

Introduction to skills and techniques of tap dance. May be repeated for a maximum of 2 credits.

DANC 128. Latin Club Dance

1 Credit

Introduction to the most popular Latin Club Dances to include the Salsa, Merengue, and Bachata. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

DANC 129. Flamenco I

1 Credit

Introduction to skills and techniques of flamenco dance. May be repeated for a maximum of 2 credits.

DANC 151. Master Works

1 Credit

Students will engage in exploring concepts in dance appreciation, themes and purposes of dance by analyzing dance works using principles, elements, and process of compositional design. This course will require students to communicate their opinions through verbal discussions, group projects, and written assignments. Restricted to Las Cruces campus only.

DANC 200. Dance Pedagogy: Educational Theory

1 Credit

This course will examine how people learn cognitively, physically, and emotionally so that students can become better at self-teaching and self-assessment. Students will study several educational theories and how they relate to dance. Restricted to Las Cruces campus only.

DANC 202. Dance Ensemble

1 Credit

This course will include learning the elements of dance composition. The students in this course will be the dancers for the students in Dance Choreography II. This course is a requirement for freshman dance majors whose emphasis is in contemporary dance. May be repeated up to 2 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

DANC 203. Dance Production I

1 Credit

Students will learn the production process of dance events which may include performances, festivals, workshops, conferences. May be repeated up to 4 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

DANC 204. Dance Sport I

1 Credit

Performance-based, team formation dance in a variety of Latin and ballroom dances. May be repeated up to 4 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Prerequisite(s): Consent of instructor and one of DANC 121, DANC 122, DANC 125, or DANC 128.

DANC 205. Contemporary Dance Ensemble I**1 Credit**

Performance-based instruction for students pursuing a career in contemporary dance. Instruction includes contemporary dance repertory and choreography for stage, outdoor arenas, and site-specific areas. May be repeated up to 4 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

DANC 206. Spanish Dance Ensembles I**1 Credit**

Performance-based instruction for students pursuing a career in dance with an emphasis in Spanish Dance. Instruction includes dance repertory and choreography for stage, outdoor arenas, and site-specific areas. May be repeated up to 4 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

DANC 209. Argentine Tango II**1 Credit**

Intermediate study in Argentine tango. Learn advanced patterns, techniques and partnering skills. May be repeated up to 2 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Prerequisite(s): Consent of instructor.

DANC 210. Classical Spanish II**2 Credits (1+3P)**

The study of theory, techniques, and practice of Classical Spanish at the intermediate level. Includes historical and cultural contexts of this art form. May be repeated up to 8 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Prerequisite(s): DANC 129.

DANC 212. Intermediate Hip-Hop Dance**2 Credits**

This course is for students who have experience in Hip-Hop dance. The movement material will cover West coast and Southern styles with the inclusion of the history and evolution of Hip-Hop dance. May be repeated up to 8 credits. Restricted to Las Cruces campus only.

DANC 218. West Coast Swing II**2 Credits**

Students will take their West Coast Swing & Hustle to the next level. Learn Intermediate and Advanced figures and techniques in both dances. Students will also enjoy advanced study on musicality and blending to create new amalgamations as well as practice in advanced leading & following techniques. May be repeated up to 8 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Prerequisite(s): DANC 118.

DANC 221. Country Western Dance**2 Credits**

Intermediate skills in country/western two-step, nightclub two-step, polka, and Western line dances. May be repeated up to 4 credits. Restricted to Las Cruces campus only.

Prerequisite(s): DANC 121 or consent of instructor.

DANC 222. Bronze American Rhythm**2 Credits (1+2P)**

Bronze level American Rhythm patterns, techniques, and partnering with emphasis on elements of dance. Consent of Instructor required. Restricted to Las Cruces campus only.

DANC 223. Ballet Technique II**2 Credits**

Continued study of classical ballet technique, vocabulary, and history through participation and academic study. May be repeated up to 8 credits. Restricted to Las Cruces campus only.

DANC 224. Jazz Technique II**2 Credits**

Continued study of jazz technique and history through participation and academic study. May be repeated up to 8 credits. Restricted to Las Cruces campus only.

DANC 225. Bronze American Smooth**2 Credits (1+2P)**

Bronze level American Smooth patterns, technique, and partnering with an emphasis on the elements of dance. May be repeated up to 4 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Prerequisite(s): DANC 125 or consent of instructor.

DANC 226. Modern Dance Technique II**2 Credits**

Continued study of postmodern dance technique and history through participation and academic study. May be repeated up to 8 credits. Restricted to Las Cruces campus only.

DANC 227. Tap Dance II**1 Credit**

Continued study of skills and techniques of tap dance at the advanced level. May be repeated for a maximum of 2 credits.

Prerequisite: DANC 127 or consent of instructor.

DANC 229. Flamenco II**2 Credits**

The study of theory, techniques and practice of Flamenco at the intermediate level. Includes historical and cultural contexts of this art form. May be repeated up to 8 credits. Restricted to Las Cruces campus only.

Prerequisite(s): Dance 129.

DANC 232. Bronze International Latin**2 Credits**

This is the style of Latin dance that is danced around the globe and is featured in the World DanceSport Championships. Students will learn the Bronze Level figures and techniques in four (4) International Style dances: Rumba, Cha Cha, Samba & Jive and the techniques. May be repeated up to 8 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Prerequisite(s): DANC 222.

DANC 235. Bronze International Standard**2 Credits**

This is the style of Ballroom dance that is performed around the globe and is featured in the World DanceSport Championships. Learn the Bronze Level figures and techniques in five (5) International Style dances: Waltz, Tango, Viennese Waltz, Foxtrot & Quickstep. Students will focus on understanding technical Elements of Dance, memorizing and performing routines. May be repeated up to 8 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Prerequisite(s): DANC 225.

DANC 269. DanceSport Choreography I**2 Credits**

An introduction to the process and theory behind creating original choreography for both performance and competition level dance. With focus on the individual couple, gain necessary skills, knowledge and practice in choreographing Ballroom, Latin, Swing &/or Nightclub dance routines in various practical settings. Consent of Instructor required. Restricted to Las Cruces campus only.

DANC 275. Dance Studio Management**3 Credits**

The study and practice of studio management. Includes study of financial procedures, marketing, entrepreneurship, leadership, management, fund-raising and other related topics. Restricted to majors and minors.

DANC 279. Flamenco Choreography I**2 Credits**

Students develop and perform solo dance studies with an emphasis placed on the development of personal movement vocabulary, phrase building, and the exploration of choreographic tools for Flamenco on stage. Discussion, critiquing, and descriptive writing about their choreographic processes will supplement direct physical work. May be repeated up to 4 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

DANC 280. Improvisation I**1 Credit**

Introduction and development of basic movement improvisation skills.

DANC 289. Principles of Choreography I**2 Credits**

Solo dance choreography technique. Course must be passed with a grade of C or higher. Consent of instructor required. Restricted to: Main campus only. Restricted to Dance Majors Dance Minors majors.

DANC 300. Dance Pedagogy: Creative Movement**3 Credits**

Teaching methods and class planning for creative movement dance curriculum at preschool and elementary school levels. Restricted to Las Cruces campus only.

DANC 301. Flamenco Pedagogy I**3 Credits**

The methods and theory of teaching Flamenco dance forms particularly in the studio environment. Consent of Instructor required.

Prerequisite(s): DANC 229 AND DANC 206.

DANC 303. Dance Production II**1 Credit**

Students will learn the production process of dance events which may include performances, festivals, workshops, conferences.

Prerequisite(s): DANC 203.

DANC 304. Dance Sport II**1 Credit**

Advanced performance-based, team formation dance in a variety of Latin and social dances. May be repeated up to 4 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor and one of DANC 121, DANC 122, DANC 125, or DANC 128.

DANC 305. Contemporary Dance Ensemble II**1 Credit**

Advanced performance-based instruction for students pursuing a career in contemporary dance. Instruction includes contemporary dance repertory and choreography for stage, outdoor arenas, and site-specific areas. May be repeated up to 6 credits. Consent of Instructor required.

DANC 306. Spanish Dance Ensemble II**1 Credit**

Performance-based instruction for students pursuing a career in dance with an emphasis in Spanish Dance. Instruction includes dance repertory and choreography for stage, outdoor arenas, and site-specific areas. May be repeated up to 4 credits. Consent of Instructor required.

DANC 310. Classical Spanish Dance III**3 Credits**

Advanced study of Classical Spanish Dance with castanets, cultural history, and pedagogy methods. A expanded focus on integration of different classical genres with focus on solo work. May be repeated up to 12 credits. Consent of Instructor required.

Prerequisite(s): DANC 210.

DANC 322. Silver American Rhythm**3 Credits (2+2P)**

Silver level American Rhythm patterns and technique with emphasis on performance. May be repeated up to 12 credits. Consent of Instructor required.

Prerequisite(s): DANC 222.

DANC 323. Ballet Technique III**3 Credits**

Intermediate/advanced study of ballet technique, including vocabulary and history. May be repeated for a maximum of 12 credits.

Prerequisite: DANC 223 or consent of instructor.

DANC 324. Jazz Technique III**3 Credits**

Advanced study of jazz dance, including vocabulary and history. May be repeated for a maximum of 12 credits.

Prerequisite: DANC 224 or consent of instructor.

DANC 325. Silver American Smooth**3 Credits (2+2P)**

Silver level American Smooth patterns and technique with emphasis on performance. May be repeated up to 12 credits. Consent of Instructor required.

Prerequisite(s): DANC 225.

DANC 326. Modern Dance III**3 Credits**

Intermediately advanced-level modern dance technique and study of current dance aesthetics. May be repeated for a maximum of 12 credits.

Prerequisite: DANC 226 or consent of instructor.

DANC 329. Flamenco III**3 Credits**

Advanced study in flamenco dance technique, its cultural history and pedagogy methods. May be repeated up to 12 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

DANC 332. Silver International Latin**3 Credits**

Students will learn Silver Level syllabus figures in four (4) International Style dances: Rumba, Cha Cha, Samba & Jive and Bronze Level figures in Paso Doble. Continued training and practice in International Style Latin dance technique. May be repeated up to 12 credits. Consent of Instructor required.

Prerequisite(s): DANC 232.

DANC 335. Silver International Standard**3 Credits**

Learn Silver Level syllabus figures in the five (5) International Style Standard dances: Waltz, Tango, Viennese Waltz, Foxtrot & Quickstep. Students will focus on increased technical understanding to increase their ability in partnering and musicality. May be repeated up to 12 credits. Consent of Instructor required.

Prerequisite(s): DANC 235.

DANC 339. Flamenco Structure and Improvisation**3 Credits**

A Study of various elements necessary in an improvisational setting in Flamenco. Using a cross section of Flamenco forms as a format. Students study the compass of each palo, then move to several traditional letras appropriate to these forms. May be repeated up to 9 credits. Consent of Instructor required.

Prerequisite(s): DANC 229.

DANC 342. DanceSport Pedagogy: Rhythm**3 Credits**

In this teacher education course, students will begin to develop skills necessary in becoming a successful, professional Ballroom Dance Instructor. Students will gain technical mastery of Bronze level figures in four (4) Rhythm Dances to include the Rumba, Cha Cha, East Coast Swing and Mambo. Students will gain practical teacher education in the area of Private Lesson Instruction with required in class practicums. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): DANC 222.

DANC 345. DanceSport Pedagogy: Smooth**3 Credits**

In this teacher education course, students will begin to develop skills necessary in becoming a successful, professional Ballroom Dance Instructor. Students will gain technical mastery of Bronze level figures in the four (4) American Style Smooth Ballroom Dances to include the Waltz, Foxtrot, Tango and Viennese Waltz. Students will gain practical teacher education in the area of Group Class Instruction with required in class practicums. May be repeated up to 9 credits. Consent of Instructor required.

Prerequisite(s): DANC 225.

DANC 365. Dance Pedagogy: Dance in Education**2 Credits**

This course provides the student with methods and theories of dance education. This course will cover methods of teaching core curriculum subjects in an elementary school through body movement. This course will focus on the special needs of a kinesthetic learner.

DANC 369. DanceSport Choreography II**2 Credits**

Take DanceSport choreography to the next level. With focus on group formation dance, gain necessary skills, knowledge and practice in choreographing Ballroom, Latin, Swing &/or Nightclub dance routines for groups in artistic and competition settings. Consent of Instructor required.

DANC 379. Flamenco Choreography II**2 Credits**

Students develop and perform group studies with an emphasis placed on the development of ensemble movement vocabulary, phrase building, and the exploration of choreographic tools for Flamenco on stage. Discussion, critiquing, and descriptive writing about their choreographic processes will supplement direct physical work. Level II will advance to small group work as well as mentoring level I students. Consent of Instructor required.

Prerequisite(s): DANC 279.

DANC 380. Improvisation II**1 Credit**

Continued practice in movement improvisation with more complex examination of improvisational structures.

Prerequisite: DANC 280.

DANC 389. Principles of Choreography II**2 Credits**

Continued investigation of the choreographic process with an emphasis on group choreography. Course must be passed with a grade of C or higher. Consent of instructor required. Restricted to: Main campus only. Restricted to Dance majors Dance minors majors.

Prerequisite(s): DANC 289.

DANC 400. Dance Pedagogy II**3 Credits**

Teaching methods and class planning for dance curriculum at middle school and high school levels.

Prerequisite: DANC 300 or consent of instructor.

DANC 401. Flamenco Pedagogy II**3 Credits**

Advanced methods and theory of teaching Flamenco dance forms particularly in the studio environment. Includes a practicum of eight onsite teaching units in a location to be determined by the designated study. Consent of Instructor required.

Prerequisite(s): DANC 229 AND DANC 206.

DANC 411. Flamenco Practicum**1 Credit**

Directed learning experiences for careers in dance. Provides the student with actual classroom teaching experience for all ages and all levels of dance students. May be repeated up to 4 credits. Consent of Instructor required.

Prerequisite(s): DANC 301.

DANC 412. DanceSport Practicum**1 Credit**

Directed learning experiences for careers in dance. Provides the student with actual classroom teaching experience for all ages and all levels of dance students. May be repeated up to 4 credits. Consent of Instructor required.

Prerequisite(s): DANC 342 or DANC 345.

DANC 413. Dance Practicum II**1 Credit**

This course provides the student with actual classroom teaching experience for all ages and all levels of dance students. With the supervision of the instructor, students will design a practicum experience, choose a site, and implement dance lessons. Course must be passed with a grade of C or higher. May be repeated up to 2 credits. Consent of Instructor required.

Prerequisite(s): DANC 413.

DANC 422. Gold American Rhythm**3 Credits (2+2P)**

Advanced level American Rhythm dance technique and partnering work with choreography and performance emphasized. Includes cultural history and pedagogy methods. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: DANC majors.

Prerequisite(s): DANC 322.

DANC 423. Ballet Technique IV**3 Credits**

Advanced study of ballet technique including vocabulary and history. May be repeated for a maximum of 12 credits.

Prerequisite: DANC 323 or consent of instructor.

DANC 424. Jazz Dance Technique IV**3 Credits**

Advanced study of jazz dance techniques, including history and aesthetics. May be repeated for a maximum of 6 credits.

Prerequisites: DANC 324 or consent of instructor.

DANC 425. Gold American Smooth**3 Credits (2+2P)**

Gold level American Smooth technique and choreography with an emphasis on performance and competition dancing. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: DANC majors.

Prerequisite(s): DANC 325.

DANC 426. Modern Dance Technique IV**3 Credits**

Advanced study of modern technique, including history and aesthetics. May be repeated for a maximum of 12 credits.

Prerequisite: DANC 326 or consent of instructor.

DANC 432. Gold International Latin**3 Credits**

Students will complete all syllabus figures through the Gold level in the Rumba, Cha Cha, Samba, Jive and Paso Doble. Advanced training and practice in International Style Latin dance technique. May be repeated up to 12 credits. Consent of Instructor required.

Prerequisite(s): DANC 332.

DANC 435. Gold International Standard**3 Credits**

Students will learn Gold Level syllabus figures in the five (5) International Style Standard dances: Waltz, Tango, Viennese Waltz, Foxtrot & Quickstep. Students will focus on physical and cognitive mastery of standard dance technique and elements as well as high-level performance ability, musicality and choreography. May be repeated up to 12 credits. Consent of Instructor required.

Prerequisite(s): DANC 335.

DANC 442. DanceSport Pedagogy: Latin**3 Credits**

This teacher education course is designed to prepare future dance professionals in the teaching of the International Style Latin dances: Cha Cha, Samba, Rumba, Paso Doble & Jive. Gain a deep understanding of all elements and be well prepared to take the DVIDA or ISTD professional certification exams. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): DANC 232 & 342.

DANC 445. DanceSport Pedagogy: Standard**3 Credits**

This teacher education course is designed to prepare future dance professionals in the teaching of the International Style Standard dances: Waltz, Tango, Foxtrot & Viennese Waltz. Students will gain a deep understanding of all elements and be well prepared to take the DVIDA or ISTD professional certification exam. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): DANC 235 & DANC 345.

DANC 447. DanceSport Certification Preparation**3 Credits**

The Professional Certification process offers extraordinary benefits to dance teachers, deeply enriching their dancing and teaching, and greatly expanding their career opportunities. This intensive course is designed to fully prepare students in taking the DVIDA and/or ISTD exams in the Smooth, Rhythm, Standard or Latin dances depending on course offered. See subtitle for specific style being taught in schedule of classes. May be repeated up to 12 credits. Consent of Instructor required.

DANC 450. Special Topics**1-3 Credits (1-3)**

Specific subjects to be announced in the Schedule of Classes. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

DANC 451V. World Dance**3 Credits**

Examination of dance forms from a cross-cultural perspective, focusing on the role of dance in different cultures around the globe. Same as HON 347V.

DANC 460. Dance History**3 Credits**

History and development of dance forms from ancient cultures to today.

DANC 462. Flamenco Dance History**3 Credits**

An in depth study of the cross section of Flamenco and Spanish Dance traditions and genres from Spain with the influence of her colonies and the modern world from the early 1400s to Present.

DANC 465. Senior Culminating Experience**1-6 Credits (1-6)**

Exit course for graduating seniors. Students will apply comprehensive knowledge of performance and production and/or pedagogy experience, to culminate in a dance production and/or teaching project. Restricted to majors and minors. A minimum of 2 credit hours required for graduation.

DANC 466. Dance Pedagogy: Dance Technique**3 Credits**

Students will learn to develop a curriculum design, apply teaching methods, and structure lesson plans for teaching specific dance styles. Course must be passed with a grade of C or higher. Consent of Instructor required.

Prerequisite(s): DANC 300 or consent of instructor.

DANC 489. Advanced Choreographic Project**2 Credits**

Individual directed studies in choreography with a culminating performance. Consent of Instructor required.

DANC 499. Problems**1-6 Credits (1-6)**

Problems in dance education, dance pedagogy, dance performance and independent work in their solutions. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

DANC 501. Directed Studies**1-4 Credits (1-4)**

Supervised projects and/or research in theoretical studies, inclusive of community service projects. May be repeated up to 4 credits. Consent of Instructor required.

DANC 505. Dance Ensemble III**1 Credit**

Rehearsal and performance of dance repertory with emphasis on advanced understanding of musicality, dynamic phrasing, artistic expression, and athletic versatility within a broad range of styles. May be repeated up to 4 credits. Consent of Instructor required.

DANC 510. Advanced Theory of Classical Spanish Technique**1 Credit**

Advanced study of dance pedagogy and theory with practice in Classical Spanish technique May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: DANC 310.

DANC 522. Advanced Theory of American Rhythm Technique**1 Credit**

Advanced study of dance pedagogy and theory with practice in American Rhythm technique May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: DANC 322.

DANC 523. Advanced Theory of Ballet Technique**1 Credit**

Advanced study of dance pedagogy and theory with practice in ballet technique May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: DANC 423.

DANC 525. Advanced Theory of American Smooth Technique**1 Credit**

Advanced study of dance pedagogy and theory with practice in American Smooth technique May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: DANC 325.

DANC 529. ADV THRY FLAM**1 Credit**

Advanced study of dance pedagogy and theory with practice in Flamenco technique May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: DANC 329.

DANC 550. Special Topics**1-6 Credits (1-6)**

Specific subjects offered in addition to standard academic curriculum. Course title to be announced in the Schedule of Classes. May be repeated up to 6 credits. Consent of Instructor required.

DANC 551. Movement as Social Text**3 Credits**

Investigation of the meaning of movement and dance in different cultural, social, and historical contexts in both Western and non-Western dance forms. Emphasis will be placed on the nature of movement, its unique properties, the ways in which it conveys meaning, and its relationship to culture and society. Consent of instructor required.

DANC 566. Advanced Theory of Dance Pedagogy**1-6 Credits (1-6)**

Advanced study of dance pedagogy theory and practice. May be repeated up to 6 credits. Consent of Instructor required.

DANC 567. Dance Internship I**2 Credits**

Internship opportunities in either dance education, dance performance/production, or dance administration. Internship site determined by both Director of Dance Program and graduate student. Consent of Instructor required.

DANC 568. Advanced Theory of Modern Dance Technique**1 Credit**

Advanced study of dance pedagogy and theory with practice in Modern dance technique May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: DANC 426.

DANC 570. Dance Administration and Leadership**2 Credits**

The study and investigation of both management and leadership theories and how to apply these theories in practice.

DANC 599. Master's Thesis**1-6 Credits (1-6)**

This course is for graduate dance students who choose to write a thesis instead of a performance or teaching project. May be repeated up to 6 credits. Thesis/Dissertation Grading.

DANC 600. Dance Research**3 Credits**

Literature review and development of research in the field of dance.

DANC 670. Dance Internship II**3 Credits**

Internship opportunities in either dance education, dance performance/production, or dance administration. Internship site determined by both Director of Dance Program and graduate student.

DANC 700. Doctoral Dissertation**3 Credits**

This course is for graduate dance students working toward their EdD or PhD in dance. A dissertation is required. Topic and format to be determined by dissertation committee chair and graduate student. Consent of instructor required. Restricted to Graduate Dance Majors majors.

P E 102. Beginning Weight Training**1 Credit**

Introduction to basic principles and techniques of weight training.

P E 103. Beginning Weight Training for Women**1 Credit**

Introduction to basic principles and techniques of weight training as related to women.

P E 104. Military Physical Fitness**1 Credit**

Directed physical fitness activities designed to develop and maintain muscular strength/endurance, cardiopulmonary efficiency, flexibility, and coordination required for leadership roles after graduation.

P E 109. Pilates**1 Credit**

Designed exercise program involves the entire body while focusing on strengthening the core muscles of the torso. Exercises promote coordination, balance, and strength.

P E 110. Sports Conditioning**1 Credit**

Sport specific conditioning using aerobic and resistive overload training. May be repeated for a maximum of 4 credits.

Prerequisite: consent of instructor.

P E 112. Beginning Volleyball for Men**1 Credit****P E 113. Beginning Volleyball for Women****1 Credit****P E 114. Basketball for Women****1 Credit****P E 115. Basketball for Men****1 Credit****P E 117. Beginning Soccer****1 Credit**

Introduction to the basic techniques and skills of soccer.

P E 127. Cardio-Kickboxing**1 Credit**

Activities that mimic punches, blocks, and kicks which have been modified to serve the purpose of providing a cardiovascular workout.

P E 128. Aerobic Dance**1 Credit**

Designed to increase knowledge of the human body's responses to exercise, enhance the level of muscular development, and cardiovascular endurance with the use of music.

P E 129. Step Aerobics**1 Credit**

Designed to increase knowledge of the human body's responses to exercise, enhance the level of muscular development, and cardiovascular endurance with the use of music and steps.

P E 130. Beginning Swimming**1 Credit****P E 131. Aqua Aerobics****1 Credit**

Designed to increase knowledge of the human body's responses to exercise, enhance the level of muscular development, and cardiovascular endurance through exercise in water.

P E 132. Intermediate Swimming**1 Credit**

Development of fitness through participation in aquatics activities.

Prerequisite(s): Ability to swim 200 yards.

P E 134. Lifeguard Training**2 Credits**

Skills training for a nonsurf lifeguard. Course will include Standard First Aid and CPR certification.

Prerequisites: swim 500 yards, dive to 9-foot depth and retrieve a 10-pound brick, surface dive to 5 feet then swim under water 15 yards, tread water one minute.

P E 147. Beginning Tennis**1 Credit****P E 148. Beginning Racquetball****1 Credit****P E 150. Beginning Golf****1 Credit****P E 154. Personal Defense****1 Credit**

Physical conditioning and defense skills for men and women.

P E 159. Introduction to Brazilian Jiu-Jitsu**1 Credit**

Brazilian Jiu-Jitsu is primarily a ground fighting art. This course will place heavy emphasis on positional strategy and focus on the sportive aspect of the sport. A Judo/Jiu-Jitsu Gi (uniform) is required.

P E 166. Futsal (Five-A-Side Soccer)**1 Credit**

Futsal, official form of indoor soccer, approved by FIFA.

P E 173. Running Fitness**1 Credit**

Basic fitness knowledge techniques and training methods of fitness running are practiced and refined.

P E 199. Yoga**1 Credit**

A holistic approach to exercise benefiting the body, mind, and spirit.

Practices focus on alignment, strength, breath relaxation, and restoration.

P E 202. Intermediate Weight Training**1 Credit**

Intermediate training and skill techniques in weight lifting.

Prerequisites: P E 102 or consent of department head.

P E 204. Cross Training**1 Credit**

Intensive training program that incorporates both aerobic and resistive overload approaches to training.

P E 205. Walking Fitness**1 Credit**

Basic fitness knowledge techniques and training methods of fitness walking are practiced and refined.

P E 206. Beginning Physical Fitness**1 Credit**

Progressive exposure to steady state exercise tailored to individual needs for the purpose of determining, improving, and maintaining physical fitness.

P E 208. Marathon Preparation**1 Credit**

Gradual training progression for novice and experienced runners to develop and/or refine a training program enabling completion of or better personal record for the marathon. Discussions on equipment, nutrition, injury prevention and treatment.

Prerequisite: presently running three miles, three to four times per week.

P E 209. Intermediate Pilates**1 Credit**

Intermediate training and skill techniques in Pilates.

Prerequisite(s): PE 109 or consent of instructor.

P E 212. Intermediate Volleyball-Men**1 Credit**

Prerequisite: P E 112 or consent of department head.

P E 213. Intermediate Volleyball-Women**1 Credit**

Prerequisite: P E 113 or consent of department head.

P E 215. Intermediate Walking**1 Credit**

A continuation of basic fitness knowledge techniques and training methods of fitness walking are practiced and refined.

Prerequisite: P E 205 or consent of department head.

P E 216. Advanced Walking**1 Credit**

Advanced walking fitness and training techniques are presented, practiced, and refined.

P E 228. Intermediate Aerobic Dance**1 Credit**

Aerobic dance at a high intensity level with a more in-depth study of the body's physiological response to exercise.

Prerequisite: P E 128 or consent of department head.

P E 229. Intermediate Step Aerobics**1 Credit**

Step aerobic dance at a high intensity level with a more in-depth study of the body's physiological response to exercise.

Prerequisite: PE 129 or consent of department head.

P E 230. Advanced Swimming**1 Credit**

Perfection of basic strokes, survival swimming, and physical fitness.

Prerequisite(s): P E 130 or ability to swim 100 yards.

P E 247. Intermediate Tennis

1 Credit

Prerequisite: P E 147 or consent of department head.

P E 248. Intermediate Racquetball

1 Credit

Advanced skills and strategies in racquetball.

Prerequisite: P E 148 or consent of instructor.

P E 250. Intermediate Golf

1 Credit

Prerequisite: P E 150 or consent of department head.

P E 263. Outdoor Recreation Skills

1 Credit

Selected outdoor activities. Appropriate subtitles, such as hiking and backpacking, camping and survival, hunting and gun safety, casting and angling skills. May be repeated for maximum of 4 credits.

P E 264. Intermediate Cycling

1 Credit

Introduction to competitive cycling. Content includes techniques in training, riding, racing, and racing tactics.

P E 270. Special Topics

1-3 Credits

Specific subjects to be announced in the Schedule of Classes. Each offering will carry appropriate subtitle. May be repeated for a maximum of 4 credits.

P E 276. Intermediate Aqua Aerobics

1 Credit

A continuation of basic fitness to increase knowledge of the human body's responses to exercise, enhance the level of muscular development and cardiovascular endurance through exercise in water.

P E 299. Intermediate Yoga

1 Credit

Intermediate training and skill techniques in Yoga.

Prerequisite(s): PE 199 or consent of instructor.

P E 310. Advanced Weight Training: Theory and Practice

3 Credits

For men and women who wish to continue weight training and learn principles of strength training.

PE P 185. Introduction and Foundations

3 Credits

Historical and cultural foundations and vocational, scientific, and educational data on careers in health education, physical education, and recreation. Restricted to: Main campus only.

PE P 208. Fitness for Health and Sport

3 Credits

A study of the fitness needs for health enhancement and sport participation. Restricted to: P E, SP M, KIN, S ED majors.

PE P 210. Theory and Technique of Aquatics

2 Credits

Introduction to fundamental aquatics knowledge and skills.

Prerequisite(s): Ability to swim 100 yards.

PE P 296. Theory of Coaching I

3 Credits

Focus on areas of academic theory associated with coaching athletics. Orientation: theoretical and practical application.

PE P 315. Elementary School Physical Education

3 Credits (2+2P)

Methods for teaching physical education at the elementary level.

Primary focus on creating a learning environment for the acquisition and enhancement of developmentally appropriate locomotor, manipulative, and nonmanipulative skills. Field experience included. Consent of instructor required. Restricted to SED/PE P majors.

Prerequisite(s): GPA of 2.5.

PE P 319. Lifetime Activities

2 Credits

Knowledge and skills related to the lifetime activities of swimming, weight training, and other fitness promoting activities with emphasis on learning progressions.

Prerequisite(s): PE P 208.

PE P 323. Racquet Sports

2 Credits

Knowledge and skills related to the racquet sports of tennis, badminton, and pickleball with emphasis on developmental strategies and skill performance that influences pedagogical content knowledge. Administrative issues will be addressed.

PE P 363. Theory and Technique of Lifelong Outdoor Leisure Activities

2 Credits

Knowledge and skills related to lifelong outdoor leisure activities, including the examination of environmental science and awareness, kinesiology, and fundamental motor skills.

PE P 392. Theory and Technique of Sports and Games

2 Credits

Knowledge and skills related to team sports and games, with emphasis on developmental strategies and skill performance that influence pedagogical content knowledge. Administrative issues will also be addressed.

PE P 393. Theory and Technique of Dance and Rhythms

2 Credits

Knowledge and skills related to dance and rhythms, with emphasis on the analysis of dance elements and its role in physical education.

PE P 394. Designing Student Centered Afterschool Physical Activity Clubs

3 Credits

Knowledge, skills and field based practical application for creating student centered and student designed after school physical activity clubs.

PE P 455. Adapted Physical Education

3 Credits

Selection and scope of corrective activities in posture and body mechanics, and the adaptation of movement activities for the exceptional student.

Prerequisite: junior or senior standing.

PE P 465. Senior Seminar

3 Credits

Capstone course for physical education. Graded S/U.

Prerequisite: senior standing.

PE P 466. Methods of Teaching Secondary Physical Education
6 Credits

Theoretical and practical applications of curriculum, pedagogy and assessment for teaching secondary physical education. Provides the students opportunities to develop curriculum, teach, and assess student learning through a supervised practicum in both middle and high school physical education settings. Consent of instructor required.

Prerequisite(s): PE P 315 and admittance to TEP required.

PE P 499. Problems**1-3 Credits (1-3)**

Problems in physical education and recreation and independent work in their solutions. A maximum of 3 credits during any one semester. May be repeated up to 6 credits. Consent of Instructor required.

PE P 501. Special Topics**1-3 Credits (1-3)**

Offered under various subtitles that indicate the subject matter. May be repeated for a maximum of 3 credits per semester and a total of 6 credits overall. May be repeated up to 6 credits.

PE P 504. Teaching Processes in Physical Education**3 Credits**

Analysis of effective teaching and coaching. Systematic observation strategies will be employed to evaluate instructional variables such as feedback, climate, academic learning time, and styles of teaching.

PE P 515. Advanced Athletic Training Education**3 Credits**

Advanced clinical experiences and education in athletic training. Assessment of Athletic Training Program clinical proficiencies as described by the National Athletic Trainers' Association Education Council. Consent of Instructor required.

PE P 550. Advanced Topics in Physical Education**1-4 Credits**

Advanced study in teaching processes, perceptual motor development, bioenergetics, biomechanical instrumentation, psychological bases of performance, or motor control.

PE P 551. Sociology of Sports**3 Credits****PE P 555. Adapted Physical Education****3 Credits**

Selection and scope of corrective activities in posture and body mechanics, and the adaptation of movement activities for the exceptional student. Same as PE P 455 with additional requirements for graduate credit.

Prerequisite: consent of instructor.

PE P 557. Adapted Physical Education : A Practitioner's Approach**3 Credits**

Preparation for qualified physical education professionals to teach individuals with disabilities motor and fitness skills. Knowledge of the Adapted Physical Education National Standards is developed so students may become nationally certified in the field. The inclusion of disability sports into general physical education curriculum is also major emphasis of this course. Consent of Instructor required.

PE P 558. Adapted Physical Education National Standards (APENS)
Professional Preparation**3 Credits**

This distance education course is to prepare physical education teachers to pass the Certified Adapted Physical Education (CAPE) National Examination, which is based on the Adapted Physical Education National Standards (APENS). These standards were developed by professionals in the field to ensure that physical education instruction for students with disabilities is provided by qualified physical education teachers.

PE P 624. BODY IN CULTURE**3 Credits**

This course will explore how people's health and physical activity experiences and choices are often shaped by cultural narratives and expectations of the male and female body. Designed for graduate students in allied health and physical activity professions

SP M 190. Introduction to Athletic Training**3 Credits**

Introduction to the principles of athletic training.

SP M 191. Medical Terminology**3 Credits**

Study of the structure of medical language with emphasis on sports medicine-related terminology. To include analysis and interpretation of medical documentation. Restricted to: Las Cruces campus only.

SP M 200. CAREER PREPARATION**1 Credit**

From concept to implementation: Career exploration, setting up degree plans, finding graduate programs, developing professional resumes, writing letters of application, seeking letters of recommendation, and interview preparation May be repeated up to 3 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

SP M 223. Exploring Extreme Human Performance**3 Credits**

A reading, writing and documentary based course studying human's quest and the related sacrifices associated with participating in extreme performance activities such as the Olympics, wakeboarding, snowboarding, military special forces, ultra-run events, marathons, etc. Consent of Instructor required. Restricted to Las Cruces campus only.

SP M 250. Emergency Response in Sports Medicine**2 Credits**

Designed to provide knowledge and experience in emergency care procedures, blood borne pathogens, and first aid. Students will receive certification in CPR/AED for the Professional Rescuer and in First Aid, upon successful completion of course. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

Prerequisite(s): Consent of Instructor.

SP M 271. Anatomy & Physiology I**3 Credits**

Detailed study of the structure and function of the human musculoskeletal, cardiovascular, respiratory, and peripheral nervous systems. Designed specifically for students interested in allied health professions. Restricted to Las Cruces campus only.

SP M 271 L. Anatomy and Physiology Laboratory**1 Credit**

Compliment to SP M 271. Students will engage in activities designed to enhance appreciation of the anatomical structures related to the content areas for SP M 271. Restricted to Las Cruces campus only.

SP M 272. Clinical Practicum I**2 Credits**

Introduction to the clinical aspects of the athletic training education program. Must maintain at least 3.0 GPA. May be repeated up to 4 credits. Consent of Instructor required. Restricted to: SP M majors. Restricted to Las Cruces campus only.

SP M 273. Clinical Practicum II**3 Credits**

Athletic training psycho-motor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Must maintain a 3.0 GPA. Consent of Instructor required. Restricted to: SP M majors. Restricted to Las Cruces campus only.

SP M 275 L. A & P LAB PE/DANCE**1 Credit**

Practical laboratory involving the kinematic and kinesthetic aspects of Human Anatomy and Physiology as it applied to Physical Education and Dance. Restricted to: Physical Education and Dance. Not acceptable for Kinesiology Majors majors. Restricted to Las Cruces campus only.

Prerequisite(s): SP M 271.

SP M 290. General Medical Conditions**3 Credits**

Study of the recognition, evaluation, management, and treatment of non-orthopedic medical conditions that affect the physically active population. Consent of Instructor required. Restricted to: SP M and Kines Majors majors. Restricted to Las Cruces campus only.

Prerequisite(s): SP M 190, 191 and 271/271L.

SP M 303. Health and Exercise Psychology**3 Credits**

The course examines the reciprocal relationship among physical activity, exercise behavior, and psychological determinants associated with adopting and maintaining an exercise program. Topics include theories of behavioral change, exercise psychology interventions, the benefits/pitfalls of exercise, and psychological factors influencing patient rehabilitation.

Prerequisite(s): GPA of 2.75.

SP M 304. Psychology of Sport**3 Credits**

Development of coaching techniques to enhance sport performance based on understanding and use of psychological principles.

Prerequisite(s): GPA of 2.75.

SP M 305. Applied Biomechanics**3 Credits**

The application of anatomical, mechanical and electrical concepts to better understand the fundamental nature of human movement.

Prerequisite(s): SP M 271 GPA of 2.75.

SP M 305 L. Applied Biomechanics Laboratory**1 Credit**

This course serves to provide an introduction to human movement and its analysis. The conceptual framework of the course will allow for the application of anatomical, mechanical, and electrical concepts in order to better understand the fundamental nature of movement.

Prerequisite(s): SP M 271; GPA 2.75.

SP M 307. Pathophysiology and Human Function(s)**3 Credits**

Students will discuss basic concepts of pathophysiology such as inflammation & repair, infectious diseases, neoplasms, and diseases of specific physiological systems. In addition, students will discuss a variety of case studies, and in so doing will be able to relate pathophysiologic conditions to symptoms, activity restrictions and disability.

Prerequisite(s): SP M 271; SP M 271L; SP M 308, GPA 2.75.

SP M 308. Exercise Physiology**3 Credits (2+2P)**

Basic physiological principles as they apply to exercise and fitness programs. Laboratory experiences included. GPA of 2.75.

Prerequisite(s): SP M 271 or PE P 208.

SP M 309. Neurophysiology and Human Function**3 Credits**

Students will discuss neurological control of human movement. Topics will include central and peripheral nervous system functions, with particular emphasis given to somatosensory afferent and motor efferent control. In addition, students will develop an understanding of the techniques employed to assess neurologic function in various patient populations.

Prerequisite(s): SP M 271; SP M 271L; SP M 308; and GPA of 2.75.

SP M 310. Orthopedic Examination, Evaluation and Diagnosis of Lower Extremity Injuries**4 Credits**

Examines normal human anatomy, mechanisms of athletic injury, and deviation from normal anatomy following athletic injury to the lower extremity. Must maintain at least 3.0 GPA. Consent of Instructor required. Restricted to: SP M and KINES majors.

SP M 319. Lifetime Activities**2 Credits**

Knowledge and skills with weight training, cardiovascular exercise, Tai Chi, Pilates, and other lifetime activities related to the promotion of health/fitness through a lifespan.

SP M 320 L. Palpation and Anatomical Kinesiology Laboratory**2 Credits**

Practical hands-on clinical laboratory introducing techniques necessary for physiological and functional kinematic evaluation of human function. May be repeated up to 2 credits.

Prerequisite(s): SP M 271, SP M 271L, GPA 2.75.

SP M 324. Introduction to Exercise Science: Exercise Physiology and Biomechanics**3 Credits**

This course serves to provide a broad introduction to both the physiology of exercise and the mechanics of human movement. The conceptual framework of the course will allow for the development of a broad knowledge base regarding these concepts and the latter portions of the course will focus on real world application of the concepts. Consent of Instructor required.

Prerequisite(s): SP M 271 Anatomy and Physiology I.

SP M 330. Exercise Testing and Prescription**4 Credits**

This combined lecture and lab class introduces students to the scientific basis for and principles of exercise testing and prescription. The focus is on basic approaches to exercise testing and prescription for healthy adults, while application to some special populations with chronic disease will be discussed. GPA of 2.75.

Prerequisite(s): SP M 271 and SP M 308 or consent of instructor.

SP M 341. Motor Development**3 Credits**

Covers development of motor skills from infancy through maturity. Focus on the principles of motor development, early motor behavior, stage theory, and assessment. Field experiences will augment lecture and readings. May be repeated up to 3 credits. Consent of Instructor required.

SP M 342. Motor Learning**3 Credits**

An examination of the theoretical foundations and related literature that underline the learning, performing, and retention of motor skills with implications for effective teaching and coaching. May be repeated up to 3 credits.

Prerequisite(s): GPA of 2.5.

SP M 371. Anatomy and Physiology II**3 Credits**

Detailed study of the structure and function of the human endocrine, immune, digestive, reproductive, integumentary, central nervous and renal systems. Designed specifically for students interested in allied health professions. GPA of 2.75.

Prerequisite(s): SP M 271G or consent of instructor.

SP M 371 L. Anatomy and Physiology II Lab**1 Credit**

The students will develop skills in palpating various bony landmarks as well as origins and insertions of major soft tissues. In addition, problem based learning scenarios will be used to complement the SP M 371 lecture material and thereby further students understanding of certain physiologic systems including neural, digestive, reproductive, endocrine, and integumentary.

Prerequisite(s): SP M 271; SPM 271 L; GPA 2.75.

SP M 372. Clinical Practicum III**3 Credits**

Athletic training psychomotor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Must maintain a 3.0 GPA. Consent of Instructor required. Restricted to: SP M and KINES majors.

SP M 373. Clinical Practicum IV**3 Credits**

Athletic training psychomotor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Must maintain a 3.0 GPA. Consent of Instructor required. Restricted to: SP M majors.

SP M 375. Therapeutic Modalities**4 Credits**

The physiological effects, indications, contraindication, dosage, and maintenance of therapeutic modalities related to the treatment of athletic or activity-related injuries. May be repeated up to 4 credits. Consent of Instructor required. Must maintain 2.75 GPA. Restricted to: SP M, KIN majors.

Prerequisite(s): Consent of Instructor, SP M 271.

SP M 409. Clinical Biomechanics**3 Credits**

The application of biomechanical analysis of human movement as it relates to clinical proficiencies through the use of anatomical, mechanical and electrical concepts.

Prerequisite(s): SPM 271, GPA 3.0.

Corequisite(s): SP M 409 L.

SP M 409 L. Clinical Biomechanics Laboratory**1 Credit**

Laboratory experiments and biomechanical analysis of human movement as they relate to clinical proficiencies through the use of anatomical, mechanical and electrical concepts.

Prerequisite(s): SP M 271, SP M 409, GPA 3.0.

Corequisite(s): SP M 409.

SP M 410. Orthopedic Examination, Evaluation and Diagnosis of Upper Extremity Injuries**4 Credits**

Examines normal human anatomy, mechanisms of athletic injury, and deviation from normal anatom following athletic injury to the upper extremity. Must maintain a 3.0 GPA. Consent of Instructor required. Restricted to: SP M and KINES majors.

SP M 411. Pharmacology in Athletic Training**2 Credits**

An introduction to general medical conditions and pharmacological applications in the athletic training setting. Emphasis on the laws governing the development and distribution, indications, contraindications, precautions, and interactions of prescription and over-the-counter medications. Must maintain a 3.0 GPA. Consent of Instructor required. Restricted to: SP M and KINES majors.

SP M 412. Inferential Statistics in Sport and Exercise Science**3 Credits**

Statistical concepts and methods basic to experiential research to include normal distribution, z-tests, t-tests, analysis of variance and regression analysis. An understanding of sport and exercise science theory is required for students enrolling in this course Restricted to: KIN, SP M majors.

Prerequisite(s): GPA of 2.75; or consent of instructor.

SP M 413. Statistical Application in Sports and Exercise Science**3 Credits**

An introduction to descriptive statistics and the interpretation of data in the solution of problems in sport and exercise related research. GPA 2.75.

Prerequisite(s): Junior or senior standing.

SP M 415. Therapeutic Exercise**3 Credits**

The physiological effects, indications, contraindications, dosage, and maintenance of therapeutic modalities related to the treatment of athletic or activity-related injuries. Must maintain a 3.0 GPA. Consent of Instructor required. Restricted to: SP M and KINES majors.

SP M 420. Orthopedic Examination, Evaluation and Diagnosis of Core, Spine and Head Injuries**3 Credits**

Advanced clinical assessment techniques and applications. Must maintain at least a 3.0 GPA. Consent of Instructor required. Restricted to: SP M majors.

SP M 422. Clinical Practicum V**3 Credits**

Athletic training psychomotor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Must maintain a 3.0 GPA. Consent of Instructor required. Restricted to: ATEP, SP M majors.

SP M 423. Clinical Practicum VI**3 Credits**

Athletic training psycho-motor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Students might complete a general medical rotation with this course. Consent of Instructor required. Restricted to: SP M majors.

SP M 424. Clinical Practicum VII**3 Credits**

Athletic training psychomotor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Students might complete a general medical rotation with this course. Must maintain 2.8 GPA. Consent of Instructor required. Restricted to: ATEP, SP M majors.

SP M 425. Organization and Administration in Athletic Training**3 Credits**

An introduction to management, leadership, financial strategies, professional development and legal issues related to the athletic training setting. Must maintain 3.0 GPA. Consent of Instructor required. Restricted to: SP M majors.

SP M 445. Internship**6,12 Credits (6,12P)**

A full-time internship in an approved wellness, fitness, athletic or recreation program with experience in all phases of management and operation. Field instructor supervision. This internship may require relocation to a site outside of the Las Cruces area. May be repeated up to 12 credits. Consent of Instructor required. Restricted to: Kinesiology Majors majors. S/U Grading (S/U, Audit).

Prerequisite(s): Senior standing, GPA of 2.75, completion of all major courses.

SP M 451. Advanced Exercise Physiology**3 Credits**

Detailed study of the integrated response of neuromuscular, cardiovascular, and respiratory systems to acute and chronic exercise, nutrition, and environmental conditions with a strong emphasis on laboratory experiences. GPA of 2.75.

Prerequisite(s): SP M 271 and SP M 308 or consent of instructor.

SP M 456. Exercise for Special Populations**3 Credits**

Fundamentals of kinesiology adapted for adults with various diseases and disabilities. Focus will be on the application of exercise assessment and prescription for selected conditions.

Prerequisite(s): SP M 308 and SP M 330; GPA of 2.75.

SP M 458. Physical Dimensions of Aging**3 Credits**

This course introduces students to physical, physiological, social, mental, and emotional aspects of human aging. Age-related changes in human function are discussed the context of applied healthcare settings, and the implications for appropriate physical activity and functional independence. GPA of 2.75.

Prerequisite(s): SP M 308.

SP M 460. Principles of Strength and Conditioning**3 Credits**

Application of research, theory, and methods of high-intensity, resistive overload training. Performance-specific topics include management, nutrition. GPA of 2.75.

Prerequisite(s): SP M 308.

SP M 460 L. Principles of Strength and Conditioning Laboratory**1 Credit**

An applied examination of the theory, principles, rules and regulations associated with various strength and conditioning exercises to include but not limited to Olympic lifting, powerlifting, bodybuilding, plyometrics, speed, agility and speed-endurance development. Lab required for Kinesiology majors. GPA of 2.75.

Prerequisite(s): SP M 308.

SP M 465. Ethics and Legal Issues in Athletic Training**3 Credits**

Examination of the legal and ethical issues associated with the practice of athletic training and other health care fields. Must maintain a 3.0 GPA. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: SP M majors.

SP M 498. Advanced Athletic Training I**1-3 Credits (1-3)**

Advanced clinical experiences and education in athletic training. Assessment of Athletic Training Program clinical proficiencies as described by the National Athletic Trainer's Association Education Council. Consent of Instructor required.

SP M 499. Problems**1-3 Credits**

Problems in athletic training and independent work in their solutions. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): Junior or Senior status; Consent of ATEP director.

SP M 504. Psychology of Sport**3 Credits**

Development of coaching techniques to enhance sport performance based on understanding and use of psychological principles. Same as SP M 304 with additional requirements for graduate credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

SP M 508. Applied Biomechanics**3 Credits**

The application of anatomical, mechanical and electrical concepts to better understand the fundamental nature of human movement. Same as SP M 305 with additional requirements for graduate credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

SP M 509. Clinical Biomechanics**3 Credits**

The application biomechanical analysis of human movement as it relates to clinical proficiencies through the use of anatomical, mechanical and electrical concepts. Same as SP M 409 with additional requirements for graduate credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

SP M 510. Graduate Athletic Training Seminar I**1-3 Credits (1-3)**

Advanced seminar topics in athletic training. Students will explore generalized topics within the field of athletic training under the direct supervision of a Commission on Accreditation of Athletic Training Education (CAATE) accredited Athletic Training Program. Students may engage in teaching and research opportunities in unique areas. Students may explore athletic training topics within the classroom or independently through designated resources. Consent of Instructor required.

SP M 511. Graduate Athletic Training I**1-3 Credits (1-3)**

Advanced clinical experiences and education in athletic training. Students will examine topics in athletic training in conjunction with faculty members within the Commission on the Accreditation of Athletic Training Education (CAATE) Athletic Training Program at New Mexico State University. Assessment of Athletic Training Program clinical proficiencies as described by the National Athletic Trainers' Association Education Council. Consent of Instructor required.

SP M 512. Inferential Statistics in Sports and Exercise Science**3 Credits**

Statistical concepts and methods basic to experiential research to include normal distribution, z-tests, t-tests, analysis of variance and regression analysis. An understanding of sport and exercise science theory is required for students enrolling in this course. Same as SP M 412 with additional requirements for graduate credit Consent of Instructor required.

Prerequisite(s): Consent of Instructor.

SP M 513. Graduate Athletic Training Seminar II**1-3 Credits (1-3)**

Advanced seminar topics in athletic training. Students will explore more specialized topics within the field of athletic training under the direct supervision of a Commission on Accreditation of Athletic Training Education (CAATE) accredited Athletic Training Program. Students should be prepared to further explore topics previously covered in SP M 512 (Graduate Athletic Training Seminar I) Students may engage in teaching and research opportunities in unique areas. Students may explore athletic training topics within the classroom or independently through designated resources. Consent of Instructor required.

SP M 514. Graduate Athletic Training Research I**1-3 Credits (1-3)**

Advanced research topics in athletic training. Students will explore research and evidence based practices within the field of athletic training. Students will work under the direct supervision of a Commission on Accreditation of Athletic Training Education (CAATE) accredited Athletic Training Program faculty member. Students should be prepared to further explore research topics within a specific discipline with the intent of disseminating and sharing information with the athletic training community. topics previously covered in SP M 512 (Graduate Athletic Training Seminar I) Students may engage in teaching and research opportunities in unique areas Consent of Instructor required.

SP M 515. Graduate Athletic Training II**3 Credits**

Advanced clinical experiences and education in athletic training. Assessment of Athletic Training Program clinical proficiencies as described by the National Athletic Trainers' Association Education Council. Consent of Instructor required.

SP M 545. Skill Acquisition and Performance**3 Credits**

Behavioral and physiological examination factors that influence the acquisition and performance of motor skills. May be repeated up to 3 credits. Consent of Instructor required. Crosslisted with: SP M 342.

SP M 551. Advanced Exercise Physiology**3 Credits**

Detailed study of the integrated response of neuromuscular, cardiovascular and respiratory systems to acute and chronic exercise, nutrition and environmental conditions with a strong emphasis on laboratory experience. Consent of Instructor required.

SP M 556. Exercise for Special Populations**3 Credits**

Fundamentals of kinesiology adapted for adults with various diseases and disabilities. Focus will be on the application of exercise assessment and prescription for selected conditions. Taught with PE P 456 with additional work required at the graduate level. Consent of Instructor required.

SP M 558. Physical Dimensions of Aging**3 Credits**

This course introduces graduate students to physical, physiological, social, mental, and emotional aspects of human aging. Age-related changes in human function are discussed in the context of applied healthcare settings, and the implications for appropriate physical activity and functional independence. Graduate students in this course are expected to participate in organizing and leading some of the class discussions and assisting in the identification of appropriate materials for the course. Consent of Instructor required.

SP M 560. Principles of Strength and Conditioning**3 Credits**

Application of research, theory, and methods of high-intensity, resistance training. Performance-specific topics include management, nutrition, exercise prescription, periodization, lifting techniques, testing, and evaluation. Course will emphasize standards set forth by the National Strength and Conditioning Association preparing students interested in sitting for the NSCA certification examinations. Consent of Instructor required.

SP M 597. Project**1-12 Credits (1-12)**

Selected projects for doctoral students. May be repeated up to 12 credits. Consent of Instructor required.

SP M 600. Kinesiology Research**1-3 Credits (1-3)**

Research to be conducted under the direction of a Kinesiology faculty member May be repeated up to 15 credits. Consent of Instructor required.

SP M 608. Cardiovascular Physiology**3 Credits**

This graduate level course provides an in-depth study of cardiovascular structure and function. The course assumes that students have a strong background in human physiology. Topics include, but are not limited to: cellular structure of the heart and vascular system; cardiac function, including electrophysiology of the heart; vascular function; neurohumoral control of the heart and circulation, organ blood flow, exchange function of the microcirculation; the impact of common cardiovascular diseases on cardiovascular structure and function, and cardiovascular adaptations to chronic exercise.

SP M 660. Designing Resistance Training Program**3 Credits**

Detailed study of the physiological concepts associated with designing resistance-training programs for children, women, seniors, athletic performance and rehabilitation.

SP M 665. Skeletal Muscle: Structure and Function**3 Credits**

Basic muscle morphology and physiology with molecular and cellular adaptations in skeletal muscle as consequences to varying exercise regimens

SP M 700. Doctoral Dissertation**1-18 Credits (1-18)**

Doctoral Dissertation hours to be conducted under the direction of a Kinesiology Faculty. May be repeated up to 18 credits. Consent of Instructor required. Thesis/Dissertation Grading.

Name: Robert H Wood, PhD, Academic Department Head

Name: Maggie Karveller, Department Secretary

Office Location: Activity Center Room 204

Athletic Training - Bachelor of Science in Athletic Training

The New Mexico State University (NMSU) Athletic Training Bachelors Degree Program is accredited by the Commission on Accreditation of Athletic Training Education (CAATE), and has a competitive application process. The program provides a challenging didactic and comprehensive clinical educational experience, as well as, incorporates the values of a supportive academic and clinical community in order to prepare future leaders in athletic training.

Students who complete the degree requirements earn a Bachelor of Science in Athletic Training and are eligible to sit for the Board of Certification (BOC) examination. Students who pass the BOC exam are referred to as Certified Athletic Trainers (AT).

Please see the program webpage, <https://kind.nmsu.edu/training/>, for up-to-date information concerning all aspects of the Athletic Training Program (ATP).

Application Procedures for Traditional Undergraduate Students

A limited number of applicants will be admitted to the professional phase of the Athletic Training major. **A maximum of 20 students will be admitted to the program each year.** Application to the Athletic Training Program takes place during the spring semester. A second round of admissions may occur in the summer for students completing pre-requisite coursework during one of the summer terms if space is available. Interested students must meet with the Program Director prior to applying for admissions to the ATP.

Application to the Athletic Training Program requires:

1. A cumulative GPA of 2.75 or higher
2. A prerequisite GPA of 3.00 or higher
3. The following courses have specific grade requirements and are used to calculate the prerequisite GPA
 - a. SP M 190 Introduction to Athletic Training with a grade of B or better
 - b. SP M 191 Medical Terminology with a grade of B or better
 - c. SP M 271 Anatomy & Physiology I with a grade of C- or better
 - d. SP M 272 Clinical Practicum I with a grade of B or better
4. The following courses need to be in progress or completed at the time your application is submitted:

ENGL 111G	Rhetoric and Composition
-----------	--------------------------

MATH 121G	College Algebra	3
MATH 142G	Calculus for the Biological and Management Sciences	3
MATH 190G	Trigonometry and Precalculus	4
MATH 191G	Calculus and Analytic Geometry I	4
MATH 192G	Calculus and Analytic Geometry II	4
MATH 291G	Calculus and Analytic Geometry III	3

5. Submission of the following:
 - a. Program application form
 - b. Professional resume
 - c. An unofficial NMSU transcript
 - d. Submission of official transcripts of any college courses taken at a college/university other than NMSU.
 - e. Proof of current Emergency Cardiac Care (ECC) certification.
 - f. Three letters of recommendation.
 - g. Copy of physical examination completed by a licensed healthcare professional (MD/DO/PA/NP).
 - h. Copy of vaccination verification showing completion of the following:¹
 - i MMR (2 doses administered 4-8 week apart or serologic test positive for MMR antibody)
 - ii Varicella (2 doses administered 4-8 weeks apart or serologic test positive for Varicella antibody)
 - iii Tetanus-Diphtheria-Pertussis (Tdap) 1 dose within the past 10 years
 - iv Hepatitis B. (3 doses administered over a period of 4-6 months)
 - v Annual TB screening

¹ Applicants that cannot provide proof of vaccination due to religious or conscientious objection to vaccinations must meet with the Program Director.

1. A signed copy of the programs technical standards for admission form.
2. 500 word minimum essay addressing the question "Why athletic training is the correct major and career path for you".
3. Completion of 60 hours of clinical observation under the supervision of an Athletic Trainer.

Transfer Student Policy

Transfer students who meet the Application Requirements may be considered for admission into the Athletic Training Program provided there is space available. The admission of transfer students will include a careful evaluation of the student's cumulative GPA and prerequisite coursework. The Program Director will make all decisions related to the acceptance of transfer courses required for the major. Transfer students should contact the Program Director regarding program requirements and any questions regarding transfer courses. Please see the program webpage, <https://kind.nmsu.edu/training/transfer/>, for a complete description of the AT program transfer policy.

Degree Requirements

Athletic Training Courses

HNDS 251	Human Nutrition	3
----------	-----------------	---

SP M 190	Introduction to Athletic Training	3
SP M 191	Medical Terminology	3
SP M 250	Emergency Response in Sports Medicine	2
SP M 271	Anatomy & Physiology I	3
SP M 271 L	Anatomy and Physiology Laboratory	1
SP M 272	Clinical Practicum I ²	2
SP M 273	Clinical Practicum II	3
SP M 305	Applied Biomechanics	3
SP M 307	Pathophysiology and Human Function(s)	3
SP M 308	Exercise Physiology	3
SP M 310	Orthopedic Examination, Evaluation and Diagnosis of Lower Extremity Injuries	4
SP M 371	Anatomy and Physiology II	3
SP M 371 L	Anatomy and Physiology II Lab	1
SP M 372	Clinical Practicum III	3
SP M 373	Clinical Practicum IV	3
SP M 375	Therapeutic Modalities	4
SP M 410	Orthopedic Examination, Evaluation and Diagnosis of Upper Extremity Injuries	4
SP M 411	Pharmacology in Athletic Training	2
SP M 415	Therapeutic Exercise	3
SP M 420	Orthopedic Examination, Evaluation and Diagnosis of Core, Spine and Head Injuries	3
SP M 422	Clinical Practicum V	3
SP M 423	Clinical Practicum VI	3
SP M 424	Clinical Practicum VII	3
SP M 425	Organization and Administration in Athletic Training	3

Statistics Requirement

Select 3 credits from the following	3
STAT 251G	Statistics for Business and the Behavioral Sciences
STAT 271G	Statistics for Psychological Sciences
A ST 311	Statistical Applications
SP M 412	Inferential Statistics in Sport and Exercise Science

Athletic Training Electives

Select a minimum of 4 credits from the following or approved by the AT Program Director:	4
SP M 303	Health and Exercise Psychology
SP M 304	Psychology of Sport
SP M 309	Neurophysiology and Human Function
SP M 320 L	Palpation and Anatomical Kinesiology Laboratory
SP M 330	Exercise Testing and Prescription
SP M 341	Motor Development
SP M 342	Motor Learning
SP M 409	Clinical Biomechanics
SP M 409 L	Clinical Biomechanics Laboratory
SP M 451	Advanced Exercise Physiology
SP M 456	Exercise for Special Populations
SP M 458	Physical Dimensions of Aging
SP M 460	Principles of Strength and Conditioning

SP M 460 L	Principles of Strength and Conditioning Laboratory
SP M 465	Ethics and Legal Issues in Athletic Training
SP M 499	Problems

Total Credits 78

² Students interested in majoring in Athletic Training are encouraged to meet with the Athletic Training Academic Advisor prior to enrolling in SP M 272 Clinical Practicum I.

Dance - Bachelor of Arts in Dance

The Bachelor of Arts (BA) in Dance provides three concentration areas in which to pursue a dance degree. Undergraduate students can choose to focus their studies in Contemporary Dance, DanceSport or Spanish Dance. All students are required to take core dance courses as well as courses from their concentration area. This provides a variety of cross training that will benefit all dancers to be well rounded professional dancers, competitors and teachers. The B.A. also provides students with an appropriate background for the pursuit of advanced degrees in teaching, performance, choreography and other related fields.

Core Courses

All dance majors are required to take the following 26 credits from the core dance courses:

Core Courses

Select 9 credits of technique classes outside the area of concentration	9
Select 17 credits from the following:	17
DANC 151	Master Works
DANC 200	Dance Pedagogy: Educational Theory
DANC 203	Dance Production I
DANC 275	Dance Studio Management
DANC 280	Improvisation I
DANC 303	Dance Production II
DANC 451V	World Dance
DANC 465	Senior Culminating Experience
SP M 271	Anatomy & Physiology I
SP M 271 L	Anatomy and Physiology Laboratory
Total Credits	26

Concentration: Contemporary Dance

Contemporary Dance is the study of ballet, modern, jazz, and tap dance. Students are trained in dance technique, dance education (teaching) and dance production. This concentration prepares dancers for a professional performance and/or teaching career.

Requirements

Select 52 credits from the following:	52
DANC 127	Tap Dance I
DANC 202	Dance Ensemble
DANC 205	Contemporary Dance Ensemble I
DANC 212	Intermediate Hip-Hop Dance
DANC 223	Ballet Technique II

DANC 224	Jazz Technique II	
DANC 226	Modern Dance Technique II	
DANC 227	Tap Dance II	
DANC 289	Principles of Choreography I	
DANC 300	Dance Pedagogy: Creative Movement	
DANC 305	Contemporary Dance Ensemble II	
DANC 323	Ballet Technique III	
DANC 324	Jazz Technique III	
DANC 326	Modern Dance III	
DANC 365	Dance Pedagogy: Dance in Education	
DANC 380	Improvisation II	
DANC 389	Principles of Choreography II	
DANC 413	Dance Practicum II	
DANC 423	Ballet Technique IV	
DANC 424	Jazz Dance Technique IV	
DANC 426	Modern Dance Technique IV	
DANC 466	Dance Pedagogy: Dance Technique	
Total Credits		52

Concentration: DanceSport

DanceSport is the study of Ballroom, Latin, Swing and Night Club dance. Students are trained in dance technique, dance education (teaching) and dance production. This concentration prepares dancers for a professional performance, competition and/or teaching career.

Requirements

Select 52 credits from the following:		52
DANC 204	Dance Sport I	
DANC 209	Argentine Tango II	
DANC 218	West Coast Swing II	
DANC 221	Country Western Dance	
DANC 222	Bronze American Rhythm	
DANC 225	Bronze American Smooth	
DANC 232	Bronze International Latin	
DANC 235	Bronze International Standard	
DANC 269	DanceSport Choreography I	
DANC 304	Dance Sport II	
DANC 322	Silver American Rhythm	
DANC 325	Silver American Smooth	
DANC 332	Silver International Latin	
DANC 335	Silver International Standard	
DANC 342	DanceSport Pedagogy: Rhythm	
DANC 345	DanceSport Pedagogy: Smooth	
DANC 369	DanceSport Choreography II	
DANC 412	DanceSport Practicum	
DANC 422	Gold American Rhythm	
DANC 425	Gold American Smooth	
DANC 432	Gold International Latin	
DANC 435	Gold International Standard	
DANC 442	DanceSport Pedagogy: Latin	
DANC 445	DanceSport Pedagogy: Standard	

DANC 447	DanceSport Certification Preparation
<hr/>	
Total Credits	52

Concentration: Spanish Dance

Spanish Dance is the study of Flamenco and Classical Spanish dance. Students are trained in dance technique, dance education (teaching) and dance production. This concentration prepares dancers for a professional performance and/or teaching career.

Requirements

Select 52 credits from the following:		52
DANC 206	Spanish Dance Ensembles I	
DANC 210	Classical Spanish II	
DANC 223	Ballet Technique II	
DANC 226	Modern Dance Technique II	
DANC 229	Flamenco II	
DANC 279	Flamenco Choreography I	
DANC 301	Flamenco Pedagogy I	
DANC 306	Spanish Dance Ensemble II	
DANC 310	Classical Spanish Dance III	
DANC 329	Flamenco III	
DANC 339	Flamenco Structure and Improvisation	
DANC 379	Flamenco Choreography II	
DANC 401	Flamenco Pedagogy II	
DANC 411	Flamenco Practicum	
DANC 462	Flamenco Dance History	
Total Credits		52

Dance - Undergraduate Minor

The dance program also offers a minor in dance that consists of a total of 18 credit hours. Dance minors can choose from a variety of dance technique classes, as well as, dance education and dance production classes.

Required Courses

DANC 203	Dance Production I	1
DANC 280	Improvisation I	1

Elective Courses

Select 16 credits (6 credits at upper division) from the following:		16
DANC 151	Master Works	
DANC 200	Dance Pedagogy: Educational Theory	
DANC 204	Dance Sport I	
DANC 205	Contemporary Dance Ensemble I	
DANC 206	Spanish Dance Ensembles I	
DANC 209	Argentine Tango II	
DANC 210	Classical Spanish II	
DANC 218	West Coast Swing II	
DANC 221	Country Western Dance	
DANC 222	Bronze American Rhythm	
DANC 223	Ballet Technique II	
DANC 224	Jazz Technique II	
DANC 225	Bronze American Smooth	

DANC 226	Modern Dance Technique II
DANC 227	Tap Dance II
DANC 229	Flamenco II
DANC 232	Bronze International Latin
DANC 235	Bronze International Standard
DANC 269	DanceSport Choreography I
DANC 275	Dance Studio Management
DANC 279	Flamenco Choreography I
DANC 289	Principles of Choreography I
DANC 300	Dance Pedagogy: Creative Movement
DANC 301	Flamenco Pedagogy I
DANC 304	Dance Sport II
DANC 305	Contemporary Dance Ensemble II
DANC 306	Spanish Dance Ensemble II
DANC 310	Classical Spanish Dance III
DANC 322	Silver American Rhythm
DANC 323	Ballet Technique III
DANC 324	Jazz Technique III
DANC 325	Silver American Smooth
DANC 326	Modern Dance III
DANC 329	Flamenco III
DANC 332	Silver International Latin
DANC 335	Silver International Standard
DANC 339	Flamenco Structure and Improvisation
DANC 342	DanceSport Pedagogy: Rhythm
DANC 345	DanceSport Pedagogy: Smooth
DANC 365	Dance Pedagogy: Dance in Education
DANC 380	Improvisation II
DANC 389	Principles of Choreography II
DANC 422	Gold American Rhythm
DANC 423	Ballet Technique IV
DANC 424	Jazz Dance Technique IV
DANC 425	Gold American Smooth
DANC 426	Modern Dance Technique IV
DANC 432	Gold International Latin
DANC 435	Gold International Standard
DANC 466	Dance Pedagogy: Dance Technique

Total Credits

18

Exercise Science - Undergraduate Minor

Required Courses

PE P 208	Fitness for Health and Sport	3
SP M 308	Exercise Physiology	3
SP M 330	Exercise Testing and Prescription	4
Select 8 credits from the following:		8
PE P 319	Lifetime Activities	
SP M 305	Applied Biomechanics	
SP M 451	Advanced Exercise Physiology	
SP M 460	Principles of Strength and Conditioning	

SP M 460 L	Principles of Strength and Conditioning Laboratory
Total Credits	18

Note: Official minor documentation must be completed with the Department of Kinesiology and Dance.

Kinesiology - Bachelor of Science in Kinesiology

The Bachelor of Science in Kinesiology degree program consists of 15 credit hours of core coursework, plus additional coursework in one of four concentration areas: Exercise Science, Clinical Exercise Science, Performance Psychology, or Physical Education. For the required number of concentration area credit hours see the program descriptions below. Regardless of the concentration, students are required to complete 120 total semester hours for the Kinesiology degree. Additionally, students pursuing a Kinesiology degree will be responsible to ensure that they complete 48 upper division credits (300 and 400 level courses). Kinesiology students must maintain a minimum 2.75 GPA in order to enroll in most upper division SP M and PE P courses. Some courses in the Clinical Exercise Science Concentration require a minimum cumulative GPA of 3.0.

Successful completion of the Kinesiology degree will support a variety of careers in health sciences, biomedical research, and teaching. Information about Kinesiology and potential employment opportunities may be obtained at the Department of Kinesiology and Dance in the Activity Center 204, phone 646-2215.

Required General Education Courses

<i>Area I: English and Communication</i>	
Choose one from the following: (ENGL 218G or ENGL 318G recommended)	
ENGL 203G	Business and Professional Communication
ENGL 211G	Writing in the Humanities and Social Sciences
ENGL 218G	Technical and Scientific Communication
ENGL 311G	Advanced Composition
ENGL 318G	Advanced Technical and Professional Communication
<i>Area III: Laboratory Sciences</i>	
Choose one from the following:	
BIOL 111G/111GL	Natural History of Life
BIOL 211G/211GL	Cellular and Organismal Biology
Choose one from the following:	
CHEM 111G	General Chemistry I
CHEM 112G	General Chemistry II
PHYS 211G/211GL	General Physics I
PHYS 212G/212GL	General Physics II
<i>Area IV: Social and Behavioral Sciences</i>	
PSY 201G	Introduction to Psychology
Kinesiology Core	15

PE P 185	Introduction and Foundations	
PE P 208	Fitness for Health and Sport	
PE P 319	Lifetime Activities	
SP M 271	Anatomy & Physiology I	
SP M 271 L	Anatomy and Physiology Laboratory	
SP M 342	Motor Learning	
Total Credits		15

Additional coursework for individual kinesiology tracks are listed below. The various tracks require 13-20 credit hours of electives (see advisor for details).

Concentration: Clinical Exercise Science

Required Courses

SP M 308	Exercise Physiology	3
SP M 320 L	Palpation and Anatomical Kinesiology Laboratory	2
SP M 330	Exercise Testing and Prescription	4
SP M 371	Anatomy and Physiology II	3
SP M 371 L	Anatomy and Physiology II Lab	1
SP M 409	Clinical Biomechanics	3
SP M 409 L	Clinical Biomechanics Laboratory	1
SP M 445	Internship	12
SP M 456	Exercise for Special Populations	3
Select two from the following:		6

SP M 307	Pathophysiology and Human Function(s) ¹	
SP M 309	Neurophysiology and Human Function ¹	
SP M 451	Advanced Exercise Physiology ¹	
SP M 458	Physical Dimensions of Aging ¹	
Select one of the following		3
SP M 303	Health and Exercise Psychology	
SP M 304	Psychology of Sport	
Select one of the following		3
SP M 412	Inferential Statistics in Sport and Exercise Science	
A ST 251G	Statistics for Business and the Behavioral Sciences	
A ST 311	Statistical Applications	
STAT 251G	Statistics for Business and the Behavioral Sciences	
STAT 271G	Statistics for Psychological Sciences	
Electives (see advisor for details)		20
Total Credits		64

¹ This course carries a pre-requisite of a 3.0 cumulative GPA for admission

Concentration: Exercise Science

Required Courses

SP M 305	Applied Biomechanics	3
SP M 305 L	Applied Biomechanics Laboratory	1
SP M 308	Exercise Physiology	3
SP M 330	Exercise Testing and Prescription	4

SP M 371	Anatomy and Physiology II	3
SP M 371 L	Anatomy and Physiology II Lab	1
SP M 445	Internship	12
SP M 451	Advanced Exercise Physiology	3
SP M 456	Exercise for Special Populations	3
SP M 460	Principles of Strength and Conditioning	3
SP M 460 L	Principles of Strength and Conditioning Laboratory	1

Select one of the following 3

SP M 303	Health and Exercise Psychology	
SP M 304	Psychology of Sport	

Select one of the following 3

SP M 412	Inferential Statistics in Sport and Exercise Science	
A ST 251G	Statistics for Business and the Behavioral Sciences	
A ST 311	Statistical Applications	
STAT 251G	Statistics for Business and the Behavioral Sciences	
STAT 271G	Statistics for Psychological Sciences	

Electives (see advisor for details) 22

Total Credits 65

Concentration: Performance Psychology: Minor in Psychology

Required Courses

SP M 303	Health and Exercise Psychology	3
SP M 304	Psychology of Sport	3
SP M 308	Exercise Physiology	3
SP M 371	Anatomy and Physiology II	3
SP M 371 L	Anatomy and Physiology II Lab	1
SP M 445	Internship	12
Select 4 credits from the following:		4

SP M 305 & 305 L	Applied Biomechanics and Applied Biomechanics Laboratory	
SP M 409 & 409 L	Clinical Biomechanics and Clinical Biomechanics Laboratory	

Select one of the following 3

SP M 412	Inferential Statistics in Sport and Exercise Science	
A ST 251G	Statistics for Business and the Behavioral Sciences	
A ST 311	Statistical Applications	
STAT 251G	Statistics for Business and the Behavioral Sciences	
STAT 271G	Statistics for Psychological Sciences	

Psychology Minor

Select the official Psychology Minor requiring 18 credit hours in PSY¹ 18

Electives (see advisor for details) 16

Total Credits 66

¹ Courses used for PSY minor cannot also be used for credit as electives.

Note: Official minor documentation must be completed with the Department of Psychology.

Concentration: Physical Education

PE P 315	Elementary School Physical Education	3
PE P 323	Racquet Sports	2
PE P 392	Theory and Technique of Sports and Games	2
PE P 393	Theory and Technique of Dance and Rhythms	2

PE P 455	Adapted Physical Education ¹	3
PE P 466	Methods of Teaching Secondary Physical Education ^{1,4}	6
SP M 324	Introduction to Exercise Science: Exercise Physiology and Biomechanics	3
SP M 341	Motor Development	3
C EP 210	Educational Psychology ²	3
EDLT 368	Integrating Technology with Teaching ²	3
EDUC 181	Field Experience I ²	1
EDUC 315	Multicultural Education ³	3
SPED 350	Introduction to Special Education in a Diverse Society ²	3
RDG 414	Content Area Literacy ¹	3
EDUC 471	Secondary Student Teaching ¹	9
EDUC 482	Middle and High School Student Teaching Seminar ¹	3

¹ Requires admission to Teacher Ed Program (TEP)

² Pre/co-requisite to Teacher Ed program

³ Must be completed prior to Submission of TEP portfolio

⁴ Instructor signature required

Kinesiology - Doctor of Philosophy Coursework

The PhD in Kinesiology requires a minimum of 36 credit hours of formal coursework (beyond a masters degree) and an expected 24 credit hours of research and dissertation work. Thus, the minimum expected credit hour accumulation is 60 credit hours.

At least 12 credit hours must come from graduate courses in the department of Kinesiology & Dance, and the student must have at least one course in each of the foundational knowledge content areas (CA) in Kinesiology, including:

1. relationships among physical activity, health, and quality of life
2. scientific foundations for study of physical activity and human movement
3. social, cultural and historical context of the study of physical activity
4. the practice of physical activity.

At least 12 credit hours must be taken in research methodologies, at least 3 credits of which must be in experimental statistics, and at least 3 credits from a qualitative methods course(s). There are many options for these courses on the NMSU campus that will permit the student to meet this requirement.

The remaining 12 credit hours are taken at the direction of the student's advisor and committee, and agreed upon at the time of the student's qualifying exam (see below).

Examinations

Students seeking the Doctor of Philosophy degree in Kinesiology must pass a qualifying examination that must be completed before accumulating more than 24 credit hours towards their degree, a Comprehensive Exam including written and oral elements that must be completed prior to beginning a final dissertation project, and a Final Exam that features the defense of their final dissertation study.

Dissertation

The candidate for the degree of Doctor in Philosophy in Kinesiology must complete a dissertation in a focused area of study. The student and his/her committee must agree upon the dissertation topic, and approval of the dissertation requires consent of the plurality of the student's committee members. The student must complete a minimum of 18 dissertation credit hours.

Special Education/Communication Disorders

Undergraduate Program Information

The Department of Special Education/Communication Disorders offers two undergraduate programs that prepare professionals to work with exceptional populations in school, community, hospital and residential settings. The Special Education program prepares students to provide educational services to individuals with disabilities. The Communication

Disorders program provides training for students interested in speech-language pathology or audiology.

Graduate Program Information

The Department of Special Education/Communication Disorders offers programs designed for students with career goals as master special education teachers, special education consultants and directors, and speech-language pathologists, or as higher education faculty in the fields of Special Education and Communication Disorders. The program in Special Education is accredited by the National Council for Accreditation of Teacher Education (NCATE). The Council on Academic Accreditation (CAA) accredits the program in Communication Disorders.

The department offers the following programs leading to a Master's degree:

- MA in Communication Disorders
- MA in Special Education

The department offers the following programs leading to a Doctoral degree:

- Doctor of Education (Ed.D.)
- Doctor of Philosophy (Ph.D.)

For detailed information about these programs, including graduate admissions requirements, please view the degree pages in this catalog or contact the department at 575-646-2401 or <http://spedcd.nmsu.edu/>.

Professor, Robert Wood, Interim Department Head

Associate Professors: Rhein, Salas, Valdez; **Assistant Professors:** Keeley, Lehnert-Lehouillier (Interim Program Director in Communication Disorders), Mishra, Mohapatra, Potter (Program Director in Special Education), Ramdoss, Rau, Sherrow; **College Assistant Professors:** Choudhury, Cobos, Mason, Trammel-Yeboah; **Emeritus Professors:** Farmer, Gallegos, Poel

M. Choudhury, Au.D. (Arizona School of Health Sciences); A. Cobos, MA (Arizona State University) dysphagia; R. Keeley, Ph.D. (New Mexico State University) inclusive classroom interventions, high incidence disabilities, secondary special education; H. Lehnert-Lehouillier, Ph.D. (State University of New York at Buffalo) speech science, phonetics, voice & speech sound disorders; L. Mason, Ed.D. (University of Northern Colorado) visual

impairment, orientation and mobility, literacy; S. Mishra, Ph.D. (University of Southampton, U.K.) audiology, hearing science and pediatric audiology; B. Mohapatra, Ph.D. (University of Georgia) acquired neurogenic communication disorders, biofeedback training; K. Potter, Ph.D. (University of New Mexico) inclusive practices, disability studies, severe disability/complex supports; S. Ramdoss, Ph.D. (University of Texas at Austin) autism and developmental disabilities, assistive technology, AAC; A. Rau, Ph.D. (New Mexico State University) bilingual and multicultural speech-language pathology, AAC; D. Rhein, Ph.D. (University of Arizona) bilingual language assessment, literacy; L. Salas, Ph.D. (New Mexico State University)– bilingual and multicultural special education, early childhood special education; B. Sherrow, Ph.D., (University of Arizona) reading/writing interventions for students with learning disabilities or emotional behavioral disorders, high incidence disability teacher preparation, T. Trammel-Yeboah MA (New Mexico State University) childhood language and articulation; A. Valdez, Ph.D. (University of New Mexico)– educational psychology; Emeriti: S. Farmer, Ph.D.; E. Poel, Ph.D.; A. Gallegos, Ed.D.

C D 221. Introduction to Communication Disorders

3 Credits

Basic information about speech, language, and hearing disorders; orientation to the professions of speech-language pathology and audiology.

C D 301. Language Acquisition

3 Credits

This course introduces students to the study of the development of language, speech, and communication. Includes language sampling. May be repeated up to 3 credits. Crosslisted with: C D 509. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in C D 221; Cumulative GPA of 3.2 or higher.

C D 322. Anatomy and Physiology of Speech Mechanisms

3 Credits

Structure and function of systems underlying human speech sound production and processing, including respiratory, phonatory, and articulatory components. May be repeated up to 3 credits. Crosslisted with: C D 502. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in C D 221, C D 323, C D 422, C D 324, and C D 301; and minimum 3.2 GPA.

C D 323. Phonetics

3 Credits

The science of phonetics, including work with the International Phonetic Alphabet. Taught with C D 501. May be repeated up to 3 credits. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in C D 221; Cumulative GPA of 3.2 or better.

C D 324. Introduction to Speech Science

3 Credits

Basic concepts and theories in acoustics, speech production and speech perception. Includes laboratory experience with instrumental measurement and analysis of speech systems. May be repeated up to 3 credits. Crosslisted with: C D 503. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in C D 221, C D 323, C D 422; and minimum 3.2 GPA.

C D 325. Language Disorders

3 Credits

Bases, symptoms, etiologies, and treatment of language disorders. Includes review of normal language acquisition. B or better in C D 301/ C D 509,C D 302/C D 593, C D 321, C D 322/C D 502, C D 323/C D 501, and minimum 3.0 GPA. Restricted to C D majors.

Prerequisite(s): C- or better in C D 221.

C D 326. Clinical Methods and Procedures

3 Credits

Guidelines and procedures associated with the clinical and supervisory processes. Provide opportunities to complete the supervised clinical observation requirement for participation in clinical practicum. May be repeated up to 3 credits. Crosslisted with: C D 506. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in C D 221, C D 323, C D 422, C D 324, C D 301; and minimum 3.2 GPA.

C D 374. American Sign Language I

3 Credits

Introduction to the basics of ASL including questions, commands, sentence types, time, subjects and objects, classifiers, locative case, pluralization, and temporal and distributional aspects.

C D 375. American Sign Language II

3 Credits

Continuation of C D 374, ASL I. Emphasis on ASL grammar, spatial referencing, detailed descriptions, and deaf culture. Features dialogues, short stories, narratives.

Prerequisite: C D 374 or consent of instructor.

C D 421. Speech and Language Disorders

3 Credits

Bases, symptoms, etiologies, and clinical management of issues related to disorders of articulation, phonology, voice and resonance, and fluency. May be repeated up to 3 credits. Crosslisted with: C D 504. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in C D 221, C D 323, C D 422, C D 324, and C D 301; and minimum 3.2 GPA.

C D 422. Audiology

3 Credits

Anatomy and physiology of the auditory system, bases of auditory disorders, and basic audiometric procedures. May be repeated up to 3 credits. Crosslisted with: C D 507. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in C D 221, and a minimum of 3.2 GPA.

C D 423. Neural Bases of Communication Disorders

3 Credits

Study of the neuroanatomy and neurophysiology of communication and communication disorders. Includes review of the central nervous system and peripheral nervous system relationship to speech motor control, language, and hearing. May be repeated up to 3 credits. Crosslisted with: C D 510. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in C D 221, C D 301, C D 323, C D 422, C D 324, C D 421, C D 322, C D 326 and minimum 3.0 GPA.

C D 424. Aural Rehabilitation

3 Credits

Overview of hearing aids and amplification devices including cochlear implants. Review of the bases and psychosocial aspects of hearing loss. Clinical management of hearing loss consistent with ASHA's scope of practice for SLPs. May be repeated up to 3 credits. Crosslisted with: C D 508. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in C D 221, C D 323, C D 422, C D 324, C D 301, C D 421, C D 322, C D 326; and minimum 3.2 GPA.

C D 425. Professional Reasoning and Scientific Thinking**3 Credits**

Overview of constructive thinking, problem solving, and decision making theories and strategies associated with professional reasoning and scientific thinking that are to be used academically and clinically in the transition from student to scholar to professional. Taught with C D 593. May be repeated up to 3 credits. Restricted to: C DS, C D majors.

Prerequisite(s): B or better in C D 221, C D 323, C D 422, C D 324, C D 301, C D 421, C D 322, C D 326, and a minimum cumulative GPA of 3.2.

C D 476. American Sign Language III**3 Credits**

Continuation of C D 375, ASL II. Focus on more complex grammatical features. Students will comprehend and generate medium length stories, narratives, and discussions including culturally significant topics.

Prerequisite: C D 375.

C D 501. Phonetics**3 Credits**

The science of phonetics, including work with the International Phonetic Alphabet. Restricted to majors. Same as C D 390 with differentiated assignments for graduate students.

Prerequisites: a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

C D 502. Anatomy and Physiology of Speech Mechanisms**3 Credits**

Structure and function of systems underlying human speech sound production and processing including nervous, respiratory, and articulatory components. Restricted to majors. Same as C D 370 with differentiated assignments for graduate students.

Prerequisites: a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

C D 503. Speech Science**3 Credits (2+3P)**

Basic concepts and theories in acoustics, speech production, and speech perception. Laboratory experience with instrumental measurement and analysis of speech systems. Restricted to majors. Same as C D 380 with differentiated assignments for graduate students.

Prerequisites: a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

C D 504. Speech and Language Disorders**3 Credits**

Bases, symptoms, etiologies, and treatment of language disorders. Includes review of normal language acquisition. Taught C D 421.

Prerequisite(s): B or better GPA.

C D 505. Research Methods**3 Credits**

Introduction to basic qualitative, quantitative, and single subject research methodology in speech-language pathology and audiology. Restricted to majors.

Prerequisites: a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

C D 506. Clinical Methods and Procedures**3 Credits**

Guidelines and procedures associated with the clinical and supervisory processes. Provide opportunities to complete the supervised clinical observation requirement for participation in clinical practicum. Differentiated assignments for graduate students. Taught with C D 326. Restricted to: C DS, C D majors.

Prerequisite(s): B or better GPA.

C D 507. Audiology**3 Credits**

Anatomy and physiology of the auditory system, bases of auditory disorders, and basic audiometric procedures. Differentiated assignments for graduate students. Taught with C D 422. Restricted to: C D, C DS majors.

Prerequisite(s): Minimum of 3.0 GPA.

C D 508. AURAL REHABILITATION**3 Credits**

Overview of hearing aids and amplification devices including cochlear implants. Review of the bases and psycho-social aspects of hearing loss. Clinical management of hearing loss consistent with ASHA's scope of practice for SLPs. Taught with C D 424. Differentiated assignments for graduate students. Restricted to: C D, C DS majors.

Prerequisite(s): Minimum 3.0 GPA.

C D 509. Language Acquisition**3 Credits**

Normal development of communication across the age span. Includes language sampling and analysis. A minimum grade of B- in all graduate courses and a minimum overall GPA of 3.0 required. Taught with C D 360 with differentiated assignments for graduate students. Restricted to CD majors and LING majors.

C D 510. Neural Bases of Communication Disorders**3 Credits**

Study of the neuroanatomy and neurophysiology of communication and communication disorders. Includes review of the central nervous system and peripheral nervous system relationship to speech motor control, language, and hearing. Crosslisted with: C D 423. Restricted to: CD, CDS majors.

C D 521. Professional Issues and Multicultural Practices in Communication Disorders**3 Credits**

This course includes a range of topics pertinent to students entering professional practice as speech-language pathologists including current legal, cultural, ethical, and clinical service provision issues. Restricted to: C DS, C D majors.

Prerequisite(s): Minimum of 3.0 GPA.

C D 522. Interpreter Workplace Skills in Communication Studies**1 Credit**

The purpose of this course is to identify principles and procedures necessary to be an effective interpreter and to use an interpreter in the field speech, language, hearing and swallowing disorders. Students will identify the history the use of interpreters, the interpreting process, bilingual vocabulary appropriate for the scope of practice in the field, bilingual assessment principles, second language learning principles and multicultural aspects to consider in the interview and interpreting process. The students will engage in several interpreter scenarios for interview, assessment and intervention cases. Restricted to: C D majors.

Prerequisite(s): Minimum of 3.0 GPA.

C D 523. Assessment of Communication Disorders**3 Credits**

Diagnostic theories and management of communication disorders using standardized and descriptive methodology. Includes the practice of interviewing, testing, and oral and written reporting. Restricted to: C DS, C D majors.

Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

C D 525. Pediatric Language and Disorders**3 Credits**

Normal communication development of neonates, infants, toddlers, and preschoolers; etiologies, and treatment of cognitive, linguistic and social elements of communication problems in family systems. Restricted to majors.

Prerequisites: minimum grade of B- and an overall GPA of 3.0 or higher.

C D 530. School Age Language and Disorders**3 Credits**

Normal communication-learning development of elementary, secondary, and postsecondary students; etiologies, diagnosis, and treatment of interpersonal communication and language-based academic disorders. Restricted to majors.

Prerequisites: a minimum grade of B- in all graduate courses and an overall GPA of 3.0 or higher.

C D 535. Aphasia & Cognitive Linguistic Disorders**3 Credits**

Etiologies, diagnosis, assessment, and treatment of adult aphasia and cognitive-linguistic disorders. Restricted to: C DS,C D majors.

Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

C D 541. Advanced Spanish Morpho-Syntax for Education Professionals**3 Credits**

This class has been designed for Heritage Speakers of Spanish who work in educational settings. It will cover the essential linguistic theory and fundamental structures of the Spanish language. This includes, but is not limited to, verb morphology, morphosyntactic and syntactic structures.

The main goal of this course is to determine what usages fall within the norms of an individual's speech community, or if there are elements that fall outside those norms.

Prerequisite(s): Students have to be fluent in Spanish as course will be conducted in Spanish.

C D 542. Articulation and Phonological Disorders**3 Credits**

Advanced study of the symptoms, etiologies, assessment, and clinical management of articulation and phonological disorders including cleft palate and disorders of resonance. Restricted to: C DS,C D majors.

Prerequisite(s): A minimum grade of B- in all graduate courses and a minimum overall GPA of 3.0 is required.

C D 545. Introduction to Augmentative and Alternative Communication**3 Credits**

Assessment and intervention for children and adults with developmental disabilities; Alternative communication strategies and systems for individuals with severe speech and/or language impairments. May be repeated up to 3 credits. Restricted to: C DS,C D majors.

Prerequisite(s): Graduate standing; overall GPA of 3.0.

C D 547. Cognitive-Linguistic Communication Disorders**3 Credits**

Topics include attention, memory, executive function, and underlying neuropathologies, with emphasis on assessment, diagnosis, prognosis, treatment and recovery processes in cognitive communication disorders related to traumatic brain injury, dementia, and right hemisphere brain damage. May be repeated up to 3 credits. Restricted to: C DS,C D majors.

Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0.

C D 548. Best Practices in Bilingual/Multicultural Assessment for Practitioners**3 Credits**

The purpose of this course is to provide future speech-language pathologists, educational diagnosticians and special educators with a foundation for evaluating the linguistic, cognitive and academic skills of students from any cultural linguistic background. The course covers a review of the literature on best practices for working with interpreters during assessments. Practitioners will be expected to gather qualitative information about cultural/linguistic and educational histories of school-age children and integrate those results with the results of standardized tests.

Prerequisite(s): C D 594.

C D 555. Instrumentation in Communication Disorders**2 Credits**

This course will provide graduate students with information regarding the purpose and operation of a variety of perceptual assessment and instrumental tools for the evaluation and treatment of voice, fluency, and resonance disorders. Restricted to: C D majors.

C D 574. American Sign Language III**3 Credits**

Continuation of ASL II. Focus on more complex grammatical features. Students will comprehend and generate medium length stories, narratives, and discussions including culturally significant topics.

Prerequisite: C D 375 or consent of instructor.

C D 583. Dysphagia**3 Credits**

Study of the anatomy and physiology of swallowing and upper aerodigestive systems. Review of the bases and etiologies of child and adult swallowing disorders, including diagnosis, assessment, and treatment. Restricted to: C DS,C D majors.

Prerequisite(s): A course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

C D 584. Fluency Disorders**3 Credits**

Speech fluency development and the disorders of stuttering, cluttering, and neurogenic dysfluency. Restricted to: C DS,C D majors.

Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

C D 585. Motor Speech Disorders**3 Credits**

Advanced studies of dysfunction of the nervous system that affect speech. Includes evaluation, diagnosis, and treatment of speech apraxias and dysarthrias. Restricted to: C DS,C D majors.

Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

C D 586. Voice Disorders/Head and Neck Anomalies**3 Credits**

Advanced studies of anatomy and physiology of the vocal tract with emphasis on diagnosis, assessment, and treatment of voice disorders, laryngectomy, cleft palate, and other oral-facial anomalies. Restricted to: C DS,C D majors.

Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

C D 587. Cleft Palate and Syndromes**2 Credits**

An advanced study of etiology, assessment and treatment of craniofacial anomalies with a focus on the effects of clefts of the lip and/or palate on speech, resonance and velopharyngeal dysfunction. Review of the contribution of interdisciplinary cleft palate team care managing feeding, audiologic, surgical, orthodontic, and psychosocial aspects. General review of embryology and common syndromes with associated speech, language, and hearing disorders. Consent of Instructor required. Restricted to: C D,C DS majors.

Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

C D 589. Practicum in Speech-Language Pathology**1-4 Credits (1-4)**

Supervised clinical practice in a variety of speech, language, and hearing disorders. Practicum includes diagnostic, treatment, and management work through direct patient/client contact. Attendance at weekly clinical staff meetings is required. May be repeated for a maximum of 15 credits. Restricted to majors.

Prerequisite: good standing in the graduate school; a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

C D 590. Clinical Education**1 Credit**

This course is specifically designed to target the knowledge base necessary to initiate clinical practicum in the CD Program. The learning objectives are based upon the Council of Academic Accreditation in Audiology and Speech-language Pathology (CAA) standards and knowledge areas. These learning outcomes are developed to assist students in clinical practicum and are specific to the services provided to clients of the NMSU Edgar R. Garrett Speech and Hearing Center. Restricted to: C DS,C D majors.

Corequisite(s): C D 589.

C D 591. Special Topics**1-9 Credits**

Individual and/or group study of special topics identified by subtitle. May be repeated for a maximum of 9 credits.

Prerequisite: prior arrangement with faculty; a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

C D 593. Professional Reasoning and Scientific Thinking**3 Credits**

Overview of constructive thinking, problem solving, and decision making theories and strategies associated with professional reasoning and scientific thinking that are to be used academically and clinically in the transition from student to scholar to professional. Restricted to majors. Same as C D 393 except for differentiated assignments for graduate students.

Prerequisites: a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

C D 599. Master's Thesis**15 Credits**

Thesis.

C D 640. Externship in Communication Disorders**3-9 Credits (3-9)**

This course is designed to provide opportunities for the developing clinician to provide treatment to and evaluations for clients in a full term externship experience under the supervision of a licensed SLP. May be repeated up to 9 credits. Consent of Instructor required. Restricted to: C DS,C D majors.

SPED 201. Topics**3 Credits**

Offered under various subtitles that indicate the subject matter to be covered. May be repeated 3 times for a maximum of 9 credits.

SPED 202. Culture, Learning and Academic Achievement in a Diverse Society**3 Credits**

Development of culturally responsive learning strategies, skills and utilization of support services, to enhance academic achievement. Restricted to: Main campus only.

SPED 210. Introduction to Special Education**3 Credits**

For paraprofessional students who will be working with a teacher in a Special Education classroom. This class will provide an overview of characteristics of children with special needs, legal issues, framework of effective instruction and a variety of practical teaching and learning strategies that are relevant to the tasks and academic demands required in inclusive classrooms.

SPED 350. Introduction to Special Education in a Diverse Society**3 Credits**

Characteristics, identification, and educational needs of exceptional learners. Attention is given to the various types of programs serving exceptional learners. Designed for all professional personnel who work with exceptional learners.

SPED 355. Introduction to Bilingual/Multicultural Special Education**3 Credits**

Introduction to issues related to the provision of services to culturally and linguistically diverse students with exceptionalities. Same as BIL 355.

SPED 360. Elementary Curriculum, Methods, and Materials for Special Education in a Diverse Society**3 Credits**

Curriculum theory and development for special education programs. Various teaching methods utilized with elementary exceptional learners and techniques involved in identifying, adapting, and developing materials will be addressed.

SPED 406. High Incidence Disabilities in a Diverse Society**3 Credits**

Examines those areas of disability that most frequently occur in the special education population, including mental retardation, learning disabilities, communication disorders, and behavioral and emotional disorders.

SPED 407. Low Incidence Disabilities in a Diverse Society**3 Credits**

Examines those disabilities that occur less frequently in the special education population, including hearing loss, visual disorders, autism, and other severe manifestations.

SPED 409. Reading for Elementary Exceptional Learners in a Diverse Society, K-6**3 Credits**

Emphasizes reading diagnosis and materials for students with special developmental and learning problems. Taught with SPED 509.

SPED 411. Reading for Elementary Exceptional Learners in a Diverse Society, 7-12**3 Credits**

Extends information covered in SPED 509, which covers grades K 6. Strategies and materials are addressed.

SPED 450. Working with Young Children with Special Needs, Ages 3-8
3 Credits

Addresses competencies for working with young children with exceptionalities, ages three-eight, and their families. Public school, private school, Head Start and other models are included. Taught with SPED 550.

Prerequisite(s): SPED 350 or equivalent.

SPED 451. Assessment of Young Children, Birth-Eight
3 Credits

Covers instruments and procedures for assessing young children and their families in order to determine atypical development. Screening, diagnosis, program planning, placement and evaluation issues are covered. Same as SPED 551.

Prerequisite: SPED 450.

SPED 452. Foundations of Visual Impairment
3 Credits

This course provides an overview of the history and theory of teaching students with visual impairments, including those with additional disabilities. The impact of educational, legislative, and societal trends on the psychosocial adjustment, quality of life, and post-school outcomes of individuals with visual impairments is explored. Taught with SPED 532 and SPED 632. Consent of Instructor required.

SPED 453. Functional Implications of Low Vision
3 Credits

This course examines the structure and function of the visual system in relation to associated diseases and syndromes with an emphasis on measuring functional vision and determining appropriate educational adaptations. Taught with SPED 533 and SPED 633.

SPED 454. Strategies for Teaching Students with Visual and Multiple Impairments
3 Credits

This course defines the roles and responsibilities of the teacher of students with visual impairments as part of the transdisciplinary team that serves students with visual impairments and additional disabilities. Emphasis is on assessment, curricula (both academic and functional), communication, behavior management, assistive technologies, inclusion, transition, and independent living. Taught with SPED 534 and SPED 634.

Prerequisite(s): SPED 453.

SPED 455. Braille I: Literacy for Students with Visual Impairments
3 Credits

This course facilitates an in-depth study of the Uncontracted and Contracted Literary Braille codes as well as methods of teaching pre-braille, braille reading, and braille writing skills to tactile learners. Taught with SPED 536 and SPED 636.

SPED 457. Braille II: Literacy Skills for Students with Visual Impairments
3 Credits

This course facilitates an in-depth study of the Nemeth Braille Code for Mathematics and Science Notation as well as instructional strategies for using the abacus and developing numeracy. Specialized braille codes for computers, music, and foreign languages will be introduced. Taught with SPED 538 and SPED 638.

Prerequisite(s): SPED 455 or SPED 536 or SPED 636 or Consent of Instructor.

SPED 458. Intellectual Disabilities in a Diverse Society: An Introduction
3 Credits

Dealing with history, philosophy, goals and objectives, classification, and characteristics of intellectual disabilities. Taught with SPED 558 and SPED 658 with differentiated assignments. Consent of instructor required. Restricted to SPED majors.

Prerequisite(s): SPED 350 or SPED 500 or consent of instructor.

SPED 459. Classroom Management for Diverse Learners
3 Credits

Behavior-change strategies for exceptional learners.

SPED 460. Strategies for Teaching Students with Visual Impairments
3 Credits

This course covers individualized educational programming in both the core and expanded core curriculums for children and youth with visual impairments with an emphasis on assessment, curricular adaptations, IFSP/IEP/ITP planning, and evidence-based practices. Taught with SPED 539 and SPED 639. Consent of Instructor required. Restricted to: SPED majors.

Prerequisite(s): SPED 453, SPED 455, SPED 457 or Consent of Instructor.

SPED 463. Introduction to Assessment of Diverse Exceptional Learners
3 Credits

Theory and use of norm and criterion-referenced instruments and learning theories in the classroom; planning of prescriptive instructional programs.

SPED 466. The Learning Disabled Student in a Diverse Society
3 Credits

Current definitions, conceptualizations, and techniques. Taught with SPED 566 and SPED 666 with differentiated assignments. Restricted to SPED majors.

Prerequisite(s): SPED 350 or 500 or consent of instructor.

SPED 467. Behavior Disorders in a Diverse Society
3 Credits

An in-depth study of the classification, characteristics, educational needs, and professional literature regarding individuals with behavior disorders. Taught with SPED 567 and SPED 667 with differentiated assignments. Restricted to SPED majors.

Prerequisite(s): SPED 350 or SPED 500 or consent of instructor.

SPED 470. Life Span Development and Transition in a Diverse Society
3 Credits

Special problems associated with transitions over the life span, with emphasis on adolescent and adult needs. Attention to service approaches for public schools, sheltered workshops, residential hospitals, and group homes.

SPED 480. Secondary Curriculum, Methods, and Materials for Special Education in a Diverse Society
3 Credits

Curriculum theory and development for elementary special education programs. Various teaching methods utilized with secondary exceptional learners and techniques for identifying, adapting, and developing materials will be addressed. Taught with SPED 580.

SPED 481. Practicum in Education, Equity and Cultural Diversity
3 Credits

This is a supervised experience in providing special education services to local preK-12 students. In the context of the public school classroom, teacher candidates are guided to apply content knowledge from the seminar meetings and from prior coursework. Restricted to: SPED majors.

Prerequisite(s): SPED 350 and SPED 360 or consent of instructor.

SPED 482. Student Teaching SPED**12 Credits**

Supervised teaching in a special education classroom and participation in a required seminar. Restricted to: SPED majors.

Prerequisite(s): SPED 481 and admission to student teaching.

SPED 483. Early Childhood SPED Student Teaching**6 Credits**

A student teaching experience designed for students studying early childhood special education. Restricted to majors. Same as SPED 583.

Prerequisites: SPED 281 and admission to student teaching.

SPED 485. Introduction to Autism**3 Credits**

This course will provide an overview of autism spectrum disorders as a triad of impairments, including historical and theoretical perspectives, assessment issues, characteristics of autism, intervention programs, and family issues. Taught with SPED 585 and SPED 685.

SPED 486. Behavior and Autism**3 Credits**

This course will cover the first of the triad of impairments. Students will gain an understanding of the behaviors of children with autism. Students will examine several behavior management philosophies and research based interventions and how they can be applied in the educational setting. Attention will also be given to play skills. The family perspective and participation in the proactive behavior management process will be incorporated throughout the course. Taught with SPED 586 and SPED 686 with differentiated assignments.

Prerequisite(s)/Corequisite(s): SPED 485 or SPED 585 or SPED 685.

SPED 487. Social Skills and Autism**3 Credits**

This course will cover the second of the triad of impairments. As a blend of researched based models and evidenced based practical applications, students will gain an understanding of the social skill deficits often associated with autism spectrum disorders. Review a variety of social cognition theories and explore effective social skill interventions for children functioning at a variety of levels along the autism spectrum. Taught with SPED 587 and SPED 687 with differentiated assignments.

Prerequisite(s)/Corequisite(s): SPED 485 or SPED 585 or SPED 685.

SPED 488. Communication and Autism**3 Credits**

This course will cover the third of the triad of impairments. Students will gain an overview of communication characteristics and difficulties often associated with autism spectrum disorders. Review current tools and strategies used to assess speech, language, and interaction skills. Use assessment results to identify needs and implement appropriate interventions. Explore a variety of intervention strategies aimed at building receptive, expressive, and pragmatic language of children functioning at a variety of levels along the autism spectrum. Taught with SPED 588 and SPED 688 with differentiated assignments.

Prerequisite(s): SPED485 or SPED585 or SPED685.

SPED 489. Topics**3 Credits**

Offered under various subtitles which indicate the subject matter to be covered. May be repeated 3 times for a maximum of 9 credits.

SPED 495. Directed Study courses in Special Education**1-3 Credits**

Each course shall be identified by a qualifying subtitle. A maximum of 3 credits per semester and a grand total of 9 credits.

SPED 500. Introduction to Special Education in a Diverse Society**3 Credits**

This course introduces the field of special education to regular educators.

SPED 501. Topics in Special Education**1-3 Credits**

Offered under various subtitles which indicate the subject matter to be covered. Maximum of 6 credits, 3 credits per semester.

SPED 502. Problems**1-3 Credits**

Offered under various subtitles which indicate the subject matter to be covered. Maximum of 6 credits, 3 credits per semester.

SPED 503. Contemporary Development**1-3 Credits**

Offered under various subtitles which indicate the subject matter to be covered. Maximum of 6 credits, 3 credits per semester.

SPED 504. Introduction to Assessment of Diverse Exceptional Learners**3 Credits**

Required for students seeking licensure at graduate level. Theory and use of norm-and criterion-referenced instruments and learning theories in the classroom; planning of prescriptive instructional programs with differentiated assignments for graduate students. Crosslisted with: SPED 463. Restricted to: SPED majors.

SPED 506. High Incidence Disabilities in a Diverse Society**3 Credits**

Examines those areas of disability that most frequently occur in the special education population, including mental retardation, learning disabilities, communication disorders, and behavioral and emotional disorders.

SPED 507. Low Incidence Disabilities in a Diverse Society**3 Credits**

Examines those disabilities that occur less frequently in the special education population, including hearing loss, visual disorders, autism, and other severe manifestations. Taught with SPED 607 with differentiated assignments.

SPED 508. Nature and Needs of Gifted Learners**3 Credits (3)**

An introductory course in the education of gifted students. The course provides an overview of the current and historical issues in the field. The intellectual, social, emotional, development, and educational characteristics of gifted students are introduced. Appropriate educational opportunities and programming are discussed. Issues in identification of the gifted, special gifted populations, and current research are reviewed. Taught with SPED 608

SPED 509. Reading for Elementary Exceptional Learners in a Diverse Society, K-6**3 Credits**

Emphasizes reading diagnosis and materials for students with special developmental and learning problems. Taught with SPED 409.

SPED 510. Current Issues in Special Education for Teaching in Culturally Responsive Society**3 Credits**

Theoretical and empirical bases for special education practices. Skill development in critical thinking, reading, and writing in relation to contemporary problems. Taught with SPED 610.

SPED 511. Reading for Secondary Exceptional Learners in a Diverse Society, 7-12**3 Credits**

Extends information covered in SPED 509, which covers grades K 6. Strategies and materials are addressed. Taught with SPED 411.

SPED 512. Curriculum for Gifted Learners**3 Credits (3)**

This course focuses upon the development of appropriate curriculum, courses, and units for gifted learners. Taught with SPED 612.

SPED 513. Current Research in Special Education**3 Credits**

Current investigations and research techniques.

SPED 514. Twice Exceptional and Special Populations of Gifted Learners**3 Credits (3)**

This course is designed for all professional personnel who work with students who are gifted. It focuses on special populations of gifted learners who possess unique characteristics and needs. Emphases are placed on issues related to the characteristics, identification, and development of appropriate educational services for twice exceptional and special populations of gifted learners. Taught with SPED 614

SPED 516. Strategies for Teaching Gifted Learners**3 Credits (3)**

This course comprehensively reviews teaching-learning models that can be used in the development and implementation of a curriculum for gifted students. The field of gifted education has seen new program models developed, more research accomplished, and new materials published, and this class examines these changes. Taught with SPED 616

SPED 519. School Interventions and Organization in a Diverse Society**3 Credits**

Introduces public school organization and laws and the psycho-sociological perspective of education. Curriculum and theory, teaching methods and materials will be presented and operationalized through a psycho-educational point of view. Restricted to majors. Taught with SPED 619.

SPED 520. Reading Disabilities Structure of Language**3 Credits**

The purpose of this course is to introduce the student to the structure of language, including phonology, morphology, syntax, semantics, and to orthography. In addition, students in this course will study each area of language and able to use this information in analyzing the process of reading and writing.

SPED 521. Intervention Techniques for Reading Disabilities**3 Credits**

This course focuses on the systematic and explicit teaching of reading and writing skills. Included will be a summation of the most current reading research and its relevance to the field.

SPED 522. Practicum in Reading Disabilities**3 Credits**

Supervised experience in assessing a student with reading disability, developing and intervention plan, and implementing and monitoring the interventions across time.

SPED 523. Advanced Curriculum for Diverse Exceptional Learners**3 Credits**

Strategies for developing curricula appropriate to handicapped and gifted learners.

Prerequisite: SPED 360 or consent of instructor.

SPED 532. Foundations of Visual Impairment**3 Credits**

This course provides an overview of the history and theory of teaching students with visual impairments, including those with additional disabilities. The impact of educational, legislative, and societal trends on the psychosocial adjustment, quality of life, and post-school outcomes of individuals with visual impairments is explored. Taught with SPED 452 and SPED 632 with differentiated assignment.

SPED 533. Functional Implications of Low Vision**3 Credits**

This course examines the structure and function of the visual system in relation to associated diseases and syndromes with an emphasis on measuring functional vision and determining appropriate educational adaptations. Taught with SPED 453 and SPED 633.

SPED 534. Strategies for Teaching Students with Visual and Multisensory Impairments**3 Credits**

This course defines the roles and responsibilities of the teacher of students with visual impairments as part of the transdisciplinary team that serves students with visual impairments and additional disabilities. Emphasis is on assessment, curricula (both academic and functional), communication, behavior management, assistive technologies, inclusion, transition, and independent living. Taught with SPED 454 and SPED 634.

Prerequisite(s): SPED 533.

SPED 536. Braille I: Literacy for Students with Visual Impairments**3 Credits**

This course facilitates an in depth study of the Uncontracted and Contracted Literary Braille codes as well as methods of teaching pre-braille, braille reading, and braille writing skills to tactual learners. Taught with SPED 455 and SPED 636.

SPED 537. Independent Readings in Special Education**1-3 Credits**

Each course shall be identified by a qualifying subtitle. Maximum of 6 credits, 3 credits per semester.

SPED 538. Braille II: Numeracy for Students with Visual Impairments**3 Credits**

This course facilitates an indepth study of the Nemeth Braille Code for Mathematics and Science Notation as well as instructional strategies for using the abacus and developing numeracy. Specialized braille codes for computers, music, and foreign languages will be introduced. Taught with SPED 457 and SPED 638 with differentiated assignments.

Prerequisite(s): SPED 455 or SPED 536 or SPED 636 consent of instructor.

SPED 539. Strategies for Teaching Students with Visual Impairments**3 Credits**

This course covers individualized educational programming in both the core and expanded core curriculums for children and youth with visual impairments with an emphasis on assessment, curricular adaptations, IFSP/IEP/ITP planning, and evidence-based practices. Taught with 460 and SPED 639. Restricted to: SPED majors.

Prerequisite(s): SPED 533, SPED 536, SPED 538.

SPED 541. Assessment of Reading and Writing**3 Credits**

Differential diagnosis of reading and writing disabilities is the focus of this course. Students will develop competencies to diagnose different types of reading problems, including dyslexia. Students will be taught how accurate differential diagnosis leads directly to targeted intervention.

SPED 545. Technology and Exceptionality in a Diverse Society
3 Credits

This class will address the unique educational needs of learners with exceptionalities, and will provide information and practice in addressing those needs through the use of technology-based interventions. Taught with SPED 645.

SPED 548. Field Experience in Education, Equity & Cultural Diversity
3 Credits

This is a supervised experience in providing special education services to local preK-12 students. In the context of the public school classroom, teacher candidates are guided to apply content knowledge from the seminar meetings and from prior coursework. This experience is designed for both the practicing general education classroom teacher pursuing special education licensure and for graduate teacher candidates pursuing initial special education licensure. Restricted to: SPED majors.
Prerequisite(s): SPED 350 and SPED 360, or SPED 500 and SPED 523, or consent of instructor.

SPED 550. Working with Young Children with Special Needs, Ages 3-8
3 Credits

Addresses competencies for working with young children with exceptionalities, ages three eight, and their families. Public school, private school, Head Start and other models are included. Same as SPED 450 with differentiated assignments for graduate students. Same as ECED 550.

Prerequisite: SPED 500 or equivalent, or consent of instructor.

SPED 551. Assessment of Young Children, Birth Eight
3 Credits

Covers instruments and procedures for assessing young children and their families in order to determine atypical development. Screening, diagnosis, program planning, placement and evaluation issues are covered. Same as SPED 451.

Prerequisite: SPED 550 or consent of instructor.

SPED 552. Introduction to Orientation and Mobility
3 Credits

This course provides an overview of the history and theory of formalized orientation and mobility instruction as it relates to the ability to live independently. The impact of visual impairment and concomitant impairments on the development of spatial concepts and motor skills in relation to independent locomotion is emphasized. Topics covered include mobility aids; navigation, familiarization, and protective techniques; structured pre-cane assessment and instruction; the development and use of tactual maps; and the relationship of orientation and mobility to other areas of the expanded core curriculum. Consent of Instructor required. Restricted to: SPED, EDUC majors.

SPED 553. Beginning Orientation and Mobility
3 Credits

This course provides an overview of the profession of orientation and mobility and how sensory, motor, and psychosocial function affects movement and spatial orientation. Consent of Instructor required. Restricted to: SPED majors.

Prerequisite(s): SPED 552.

SPED 554. Intermediate Orientation and Mobility
3 Credits

This course focuses on strategies and methods for conducting assessments and appropriately sequencing skill acquisition for learners across the lifespan who may or may not have additional disabilities. Adaptive technology and other aids that assist with travel in a variety of environmental conditions using different mobility systems will also be covered. Consent of Instructor required. Restricted to: SPED majors.

Prerequisite(s): SPED 553.

SPED 555. Advanced Orientation and Mobility
3 Credits

This course focuses on the development and monitoring of cane skills needed for safe and efficient travel in indoor, residential, and business districts, including the use of public transportation systems. Development, administration, and supervision of orientation and mobility services is also covered. Consent of Instructor required. Restricted to: SPED majors.

Prerequisite(s): SPED 554.

SPED 558. Intellectual Disabilities in a Diverse Society: An Introduction
3 Credits

Dealing with history, philosophy, goals and objectives, classification, and characteristics of intellectual disabilities. Same as SPED 458 and SPED 558 with differentiated assignments for graduate students. Consent of instructor required. Restricted to SPED majors.

Prerequisite(s): SPED 350 or SPED 500.

SPED 559. Classroom Management for Diverse Learners
3 Credits

Behavior-change strategies for exceptional learners. Taught with SPED 459 with differentiated assignments for graduate students.

SPED 563. Assessment and Consultation for Exceptional Multicultural Populations
3 Credits

Covers formal and informal methods of assessment as well as consultation models for multicultural populations. Same as BIL 563, BIL 663, SPED 663.

SPED 566. The Learning Disabled Student in a Diverse Society
3 Credits

Current definitions, conceptualizations, and techniques. Taught with SPED 466 with differentiated assignments for graduate students. Restricted to SPED majors.

Prerequisite(s): SPED 350 or SPED 500.

SPED 567. Behavior Disorders in a Diverse Society
3 Credits

An in-depth study of the classification, characteristics, educational needs, and professional literature regarding individuals with behavior disorders. Taught with SPED 467 and SPED 667 with differentiated assignments. Restricted to SPED majors.

Prerequisite(s): SPED 350 or SPED 500 or consent of instructor.

SPED 570. Life Span Development and Transition in a Diverse Society
3 Credits

Covers special problems associated with transitions over the life span, with emphasis on adolescent and adult needs. Attention to service approaches for public schools, sheltered workshops, residential hospitals, and group homes. Taught with SPED 470.

SPED 580. Curriculum, Methods, and Materials for Secondary Special Education

3 Credits

Curriculum theory and development for elementary special education programs. Various teaching methods utilized with secondary exceptional learners and techniques for identifying, adapting, and developing materials will be addressed. Taught with SPED 480.

SPED 582. Student Teaching SPED

12 Credits

Culminating course required for graduate level students seeking initial licensure. Restricted to: SPED majors.

Prerequisite(s): Bachelor's degree, SPED 548, and admission to student teaching.

SPED 585. Introduction to Autism

3 Credits

This course will provide an overview of autism spectrum disorders as a triad of impairments, including historical and theoretical perspectives, assessment issues, characteristics of autism, intervention programs, and family issues. Taught with SPED 485 and SPED 685. Differentiated Assignments.

SPED 586. Behavior and Autism

3 Credits

This course will cover the first of the triad of impairments. Students will gain an understanding of the behaviors of children with autism. Students will examine several behavior management philosophies and research based interventions and how they can be applied in the educational setting. Attention will also be given to play skills. The family perspective and participation in the proactive behavior management process will be incorporated throughout the course. Taught with SPED 486 and SPED 686 with differentiated assignments.

Prerequisite(s): SPED 485 or SPED 585 or SPED 685.

SPED 587. Social Skills and Autism

3 Credits

This course will cover the second of the triad of impairments. As a blend of researched based models and evidenced based practical applications, students will gain an understanding of the social skill deficits often associated with autism spectrum disorders. Review a variety of social cognition theories and explore effective social skill interventions for children functioning at a variety of levels along the autism spectrum. Taught with SPED 487 and SPED 687 with differentiated assignments.

Prerequisite(s): SPED 485 or SPED 585 or SPED 685.

SPED 588. Communication and Autism

3 Credits

This course will cover the third of the triad of impairments. Students will gain an overview of communication characteristics and difficulties often associated with autism spectrum disorders. Review current tools and strategies used to assess speech, language, and interaction skills. Use assessment results to identify needs and implement appropriate interventions. Explore a variety of intervention strategies aimed at building receptive, expressive, and pragmatic language of children functioning at a variety of levels along the autism spectrum. Taught with SPED 488 and SPED 688 with differentiated assignments.

Prerequisite(s): SPED 485 or SPED 585 or SPED 685.

SPED 590. Masters Degree Seminar

3 Credits

Capstone review of current issues in special education. Each student will participate in a practice comprehensive oral exam.

SPED 598. Special Research Problems

1-3 Credits

Individual investigation either analytical or experimental. May be repeated for a maximum of 6 credits, 3 credits per semester.

SPED 599. Master's Thesis

15 Credits

Thesis.

SPED 600. Doctoral Research

1-15 Credits

Research.

SPED 605. Independent Study Topics in Special Education

1-6 Credits

A problem and seminar course for those pursuing an advanced graduate degree. Each course to bear an appropriate subtitle.

SPED 606. High Incidence Disabilities in a Diverse Society

3 Credits

Examines those areas of disability that most frequently occur in the special education population, including mental retardation, learning disabilities, communication disorders, and behavioral and emotional disorders. Taught with SPED 506. Restricted to SPED and C D majors.

Prerequisite: Master's Degree.

SPED 607. Low Incidence Disabilities

3 Credits

Examines those disabilities that occur less frequently in the special education population, including hearing loss, visual disorders, autism, and other severe manifestations. Taught with SPED 507 with differentiated assignments.

SPED 608. Nature and Needs of Gifted Learners

3 Credits (3)

An introductory course in the education of gifted students. The course provides an overview of the current and historical issues in the field. The intellectual, social, emotional, development, and educational characteristics of gifted students are introduced. Appropriate educational opportunities and programming are discussed. Issues in identification of the gifted, special gifted populations, and current research are reviewed. Taught with SPED 508

SPED 610. Current Issues in Special Education for Teaching in a Culturally Responsive Society

3 Credits

Required for students seeking the Ed.D./Ph.D. Taught with SPED 510.

SPED 612. Curriculum for Gifted Learners

3 Credits (3)

This course focuses upon the development of appropriate curriculum, courses, and units for gifted learners. Taught with SPED 512

SPED 613. Current Research in Special Education

3 Credits

Required for students seeking the Ed.D./Ph.D. Restricted to majors. Same as SPED 513.

Prerequisite: M.A. degree.

SPED 614. Twice Exceptional and Special Populations of Gifted Learners

3 Credits (3)

This course is designed for all professional personnel who work with students who are gifted. It focuses on special populations of gifted learners who possess unique characteristics and needs. Emphases are placed on issues related to the characteristics, identification, and development of appropriate educational services for twice exceptional and special populations of gifted learners. Taught with SPED 514

SPED 616. Strategies for Teaching Gifted Learners**3 Credits (3)**

This course comprehensively reviews teaching-learning models that can be used in the development and implementation of a curriculum for gifted students. The field of gifted education has seen new program models developed, more research accomplished, and new materials published, and this class examines these changes. Taught with SPED 516.

SPED 619. School Intervention and Organization in a Diverse Society**3 Credits**

Introduces public school organization and laws and the psycho-sociological perspective of education. Curriculum and theory, teaching methods and materials will be presented and operationalized through a psycho-educational point of view. Restricted to majors. Taught with SPED 519.

SPED 632. Foundations of Visual Impairment**3 Credits**

This course provides an overview of the history and theory of teaching students with visual impairments, including those with additional disabilities. The impact of educational, legislative, and societal trends on the psychosocial adjustment, quality of life, and post-school outcomes of individuals with visual impairments is explored. Taught with SPED 452 and SPED 532.

SPED 633. Functional Implications of Low Vision**3 Credits**

This course examines the structure and function of the visual system in relation to associated diseases and syndromes with an emphasis on measuring functional vision and determining appropriate educational adaptations. Taught with SPED 453 and SPED 533.

SPED 634. Strategies for Teaching Students with Visual and Multiple Impairments**3 Credits**

This course defines the roles and responsibilities of the teacher of students with visual impairments as part of the transdisciplinary team that serves students with visual impairments and additional disabilities. Emphasis is on assessment, curricula (both academic and functional), communication, behavior management, assistive technologies, inclusion, transition, and independent living. Taught with SPED 454 and SPED 534.

Prerequisite(s): SPED 633.

SPED 636. Braille I: Literacy for Students with Visual Impairments**3 Credits**

This course facilitates an in-depth study of the Uncontracted and Contracted Literary Braille codes as well as methods of teaching pre-braille, braille reading, and braille writing skills to tactile learners. Taught with SPED 455 and SPED 536.

SPED 638. Braille II: Numeracy for Students with Visual Impairments**3 Credits**

This course facilitates an in-depth study of the Nemeth Braille Code for Mathematics and Science Notation as well as instructional strategies for using the abacus and developing numeracy. Specialized braille codes for computers, music, and foreign languages will be introduced. Taught with SPED 457 and SPED 538.

Prerequisite(s): SPED 455 or SPED 536 or SPED 636.

SPED 639. Strategies for Teaching Students with Visual Impairments**3 Credits**

This course covers assessment, curricular adaptation's, knowledge of transition age, young children with multiple disabilities, and assistive technology. Taught with SPED 460 and SPED 539. Consent of Instructor required. Restricted to: SPED majors.

Prerequisite(s): SPED 633, SPED 636, SPED 638 or Consent of Instructor.

SPED 640. Internship in Special Education**1-6 Credits**

Each course bears a qualifying subtitle. Maximum of 6 credits per semester.

SPED 645. Technology and Exceptionality in a Diverse Society**3 Credits**

This class will address the unique educational needs of learners with exceptionalities, and will provide information and practice in addressing those needs through the use of technology-based interventions. Taught with SPED 545.

SPED 662. Elementary Curriculum Methods and Materials for Special Education in a Diverse Society**3 Credits**

ESL and bilingual methods applied to bilingual exceptional students. Appropriate curriculum needs and materials development are also included. Taught with SPED 360, SPED 562.

SPED 685. Introduction to Autism**3 Credits**

This course will provide an overview of autism spectrum disorders as a triad of impairments, including historical and theoretical perspectives, assessment issues, characteristics of autism, intervention programs, and family issues. Differentiated Assignments. Taught with SPED 585 and SPED 485.

SPED 686. Behavior and Autism**3 Credits**

This course will cover the first of the triad of impairments. Students will gain an understanding of the behaviors of children with autism. Students will examine several behavior management philosophies and research based interventions and how they can be applied in the educational setting. Attention will also be given to play skills. The family perspective and participation in the proactive behavior management process will be incorporated throughout the course. Taught with SPED 486 and SPED 586 with differentiated assignments.

Prerequisite(s): SPED485 or SPED585 or SPED685.

SPED 687. Social Skills and Autism**3 Credits**

This course will cover the second of the triad of impairments. As a blend of researched based models and evidenced based practical applications, students will gain an understanding of the social skill deficits often associated with autism spectrum disorders. Review a variety of social cognition theories and explore effective social skill interventions for children functioning at a variety of levels along the autism spectrum. Taught with SPED 487 and SPED 587 with differentiated assignments.

Prerequisite(s)/Corequisite(s): SPED 485 or SPED 585 or SPED 685.

SPED 688. Communication and Autism**3 Credits**

This course will cover the third of the triad of impairments. Students will gain an overview of communication characteristics and difficulties often associated with autism spectrum disorders. Review current tools and strategies used to assess speech, language, and interaction skills. Use assessment results to identify needs and implement appropriate interventions. Explore a variety of intervention strategies aimed at building receptive, expressive, and pragmatic language of children functioning at a variety of levels along the autism spectrum. Taught with SPED 488 and SPED 588 and differentiated assignments.

Prerequisite(s): SPED 485 or SPED 585 or SPED 685.

SPED 690. Doctoral Seminar**1-4 Credits (1-4)**

The seminar will engage doctoral students in scholarly dialogue and production. It will assist in preparing them for future careers in leadership roles. Same as CD 690.

SPED 698. Selected Topics in Special Education**1-6 Credits**

Offered under various subtitles which indicate the subject matter to be covered. Maximum of 6 credits, 3 credits per semester.

SPED 700. Dissertation**9 Credits**

Credit may be earned by students who have successfully completed their doctoral comprehensive exams and presented their dissertation proposals to their committees. At least 18 credits are required during the course of dissertation study. May be repeated for a maximum of 24 credits. Restricted to majors.

Name: Dr. Robert Wood, Interim Department Head

Name: Racquel Avelar, Administrative Assistant

Office Location: Speech Building

Phone: (575) 646-2402

Autism Spectrum Disorders - Graduate Certificate

The Graduate Certificate in Autism Spectrum Disorders is composed of 12 credit hours. To earn a certificate that is noted on transcripts, students must apply for admission to the certificate program through the Department of Special Education and Communication Disorders with an intended major of "Graduate Certificate" and a concentration of "Autism Spectrum Disorders." The certificate can be pursued separately or in conjunction with an MA in Special Education. Graduate students in other related programs who meet admission criteria for the certificate are encouraged to apply. Required courses include:

SPED 585	Introduction to Autism	3
SPED 586	Behavior and Autism	3
SPED 587	Social Skills and Autism	3
SPED 588	Communication and Autism	3

Communication Disorders - Bachelor of Science in Education

The Communication Disorders curriculum provides specialized preparation for students who plan to enter a graduate program in speech-language pathology or audiology. Students supplement their academic study of typical communication development, communication disorders, and clinical management with observation of the clinical experience in the department's Edgar R. Garrett Speech and Hearing Center and/or via alternative clinical education such as virtual patients. Students must maintain a B or better in all CD courses and maintain a cumulative GPA of 3.2 or higher, to remain in the program.

The undergraduate program provides approximately one-half of the academic requirements needed for certification by the American Speech-Language-Hearing Association and licensure by the New

Mexico Regulations & Licensing Department. Certification and licensure at state and national levels require completion of the master's degree. Details regarding certification are available from the American Speech-Language-Hearing Association (<http://www.asha.org/certification>) (ASHA), and the New Mexico Regulations & Licensing Department (http://www.rld.state.nm.us/boards/speech_language_pathology_audiology_and_hearing_aid_dispensing_practices.aspx).

Professional employment opportunities for speech-language pathologists and audiologists are numerous within settings such as school systems, community clinics, medical centers, hospitals, private practice, residential programs and schools for individuals with disabilities.

General Requirements

See the "General Requirements (p. 452)" in the College of Education section. A list of specific general education courses is available at the Advisement Center.

Program Requirements

Required coursework (120 credits; minimum 51 upper-division credits)

Electives to meet the 120 minimum credit hours for this degree can either come from any minor that a student chooses to pursue or any other elective courses not counting elsewhere towards the degree. Recommended minors for this degree are Linguistics, Spanish, or CEP.

General Education Courses 35

<i>Area I: English and Communication</i>	
ENGL 111G	Rhetoric and Composition
Choose one from the following:	
ENGL 203G	Business and Professional Communication
ENGL 211G	Writing in the Humanities and Social Sciences
ENGL 218G	Technical and Scientific Communication
ENGL 311G	Advanced Composition
ENGL 318G	Advanced Technical and Professional Communication
Choose one from the following:	
COMM 253G	Public Speaking
COMM 265G	Principles of Human Communication
AXED 201G	Effective Leadership and Communication in Agricultural Organizations
<i>Area II: Mathematics</i>	
MATH 121G	College Algebra ((any MATH beyond 121G))
Choose one from the following:	
A ST 251G	Statistics for Business and the Behavioral Sciences
or STAT 251G	Statistics for Business and the Behavioral Sciences
STAT 271G	Statistics for Psychological Sciences
A ST 311	Statistical Applications
<i>Area III: Laboratory Science</i>	
Choose one from the following:	
BIOL 101G	Human Biology
BIOL 110G	Contemporary Problems in Biology
BIOL 111G	Natural History of Life

BIOL 211G	Cellular and Organismal Biology
Choose one from the following:	
CHEM 110G	Principles and Applications of Chemistry
CHEM 111G	General Chemistry I
CHEM 112G	General Chemistry II
PHYS 110G	The Great Ideas of Physics
PHYS 120G	Introduction to Acoustics ((recommended))
PHYS 211G	General Physics I
PHYS 212G	General Physics II
<i>Area IV: Social and Behavioral Sciences</i>	
PSY 201G	Introduction to Psychology
SOC 101G	Introductory Sociology
or SOC 201G	Contemporary Social Problems
Choose one from the following:	
ANTH 120G	Human Ancestors
ANTH 125G	Introduction to World Cultures
ANTH 201G	Introduction to Anthropology
ANTH 202G	Introduction to Archaeology and Physical Anthropology
ANTH 203G	Introduction to Language and Cultural Anthropology
<i>Area V: Humanities and Fine Arts</i>	
Choose one from the following:	
ENGL 115G	Perspectives on Literature
ENGL 116G	Perspectives on Film
ENGL 220G	Introduction to Creative Writing
ENGL 244G	Literature and Culture
Select one additional course from the following:	
ART 101G	Orientation in Art
ART 110G	Visual Concepts
DANC 101G	Dance Appreciation
HIST 101G	Roots of Modern Europe
HIST 102G	Modern Europe
HIST 110G	Making History
HIST 111G	Global History to 1500
HIST 112G	Global History Since 1500
HIST 201G	Introduction to Early American History
HIST 202G	Introduction to Recent American History
HIST 211G	East Asia to 1600
HIST 212G	East Asia since 1600
HIST 221G	Islamic Civilizations to 1800
HIST 222G	Islamic Civilizations since 1800
MUS 101G	An Introduction to Music
MUS 201G	History of Jazz in Popular Music: A Blending of Cultures
PHIL 100G	Philosophy, Law and Ethics
PHIL 101G	The Art of Wondering
PHIL 124G	Philosophy of Music
PHIL 136G	The Quest for God
PHIL 201G	Introduction to Philosophy
PHIL 211G	Informal Logic
THTR 101G	The World of Theatre

Viewing a Wider World Courses		6

Communication Disorders - Master of Arts

Students entering the graduate program with an undergraduate major in Communication Disorders can expect to complete the program in two years and be awarded a Masters of Arts in Communication Disorders with a specialization in Speech-Language Pathology. The graduate program for students without a Communication Disorders background is generally one year longer because one year of leveling is required. Enrollment in graduate courses in Communication Disorders is limited to students who have been accepted into the graduate program in Communication Disorders. To complete this course of study, each student is expected to meet the program's academic and clinical competency criteria which are aligned with the requirements of state and national certifying bodies for licensure and clinical certification. Details regarding certification are available from the American Speech-Language-Hearing Association (<http://www.asha.org/certification>) (ASHA), and the New Mexico Regulations & Licensing Department (http://www.rld.state.nm.us/boards/speech_language_pathology_audiology_and_hearing_aid_dispensing_practices.aspx)

The Master's degree program in Speech-Language Pathology at New Mexico State University is accredited by the Council on Academic Accreditation (CAA) in Audiology and Speech-Language Pathology. Admission requirements and procedures can be found on the program website (https://spedcd.nmsu.edu/cd/graduate_general_info/graduate_admission_info).

Program Requirements

The traditional Master's degree plan requires a minimum of 54 graduate credit hours and the completion of at least 400 clinical hours.

C D 505	Research Methods	3
C D 523	Assessment of Communication Disorders	3
C D 525	Pediatric Language and Disorders	3
C D 542	Articulation and Phonological Disorders	3
C D 590	Clinical Education	2
C D 589	Practicum in Speech-Language Pathology	13
C D 535	Aphasia & Cognitive Linguistic Disorders	3
C D 586	Voice Disorders/Head and Neck Anomalies	3
C D 584	Fluency Disorders	3
C D 583	Dysphagia	3
C D 585	Motor Speech Disorders	3
C D 521	Professional Issues and Multicultural Practices in Communication Disorders	3
C D 640	Externship in Communication Disorders	6
Elective Course		
C D 547	Cognitive-Linguistic Communication Disorders	3
or C D 545	Introduction to Augmentative and Alternative Communication	
or C D 591	Special Topics	
Total Credits		54

Bilingual Program

In addition to the traditional program of study, students with proficiency in English and Spanish may pursue the bilingual program in Speech-Language Pathology, which requires the following additional coursework:

C D 541	Advanced Spanish Morpho-Syntax for Education Professionals	3
C D 548	Best Practices in Bilingual/Multicultural Assessment for Practitioners	3
Course offered through UNM online (SHS 359)		3

Leveling Program

The graduate courses to be taken during the leveling year for students without a Communication Disorders undergraduate degree are as follows:

C D 504	Speech and Language Disorders	3
C D 507	Audiology	3
C D 501	Phonetics	3
C D 502	Anatomy and Physiology of Speech Mechanisms	3

C D 506	Clinical Methods and Procedures	3
C D 510	Neural Bases of Communication Disorders	3
C D 508	AURAL REHABILITATION	3
C D 503	Speech Science	3
C D 509	Language Acquisition	3
Total Credits		27

Special Education - Master of Arts

Enrollment in graduate licensure program courses with field experiences in Special Education is limited to persons who have been accepted into the graduate program in Special Education. For other special education graduate courses, enrollment of students outside of the special education program is contingent upon meeting prerequisites and availability after enrollment of Special Education graduate students. To complete a course of study, each student must meet the program's academic and field based competency criteria, including a grade of B or higher in each course in the program of study, satisfactory evaluation in field experiences for those seeking licensure, and a passing score on the MA Comprehensive Exam. The Master of Arts in Special Education has five pathways to meet the varied needs of students pursuing graduate education and can be completed in two years for full-time students.

MA in Special Education Pathways

1. MA in Special Education (preparation for an initial license in Special Education). This route is 42 credits including student teaching and provides preparation for the New Mexico pre-K-12 Special Education license. Candidates must be admitted to the Teacher Education Program before completing practicum and student teaching experiences.
2. MA in Special Education (preparation for a second license, in Special Education, for students who already have an initial license in another area such as Early Childhood, Elementary, or Secondary Education). This route requires 30 credits of special education coursework and provides preparation for the New Mexico pre-K-12 Special Education license.
3. MA in Special Education (preparation using the Alternative Licensure process). This route includes 39 credits. It begins with completion of alternative licensure components, which includes 21 credits of state-approved coursework and two semesters of university supervision while concurrently employed as the special education teacher of record in a classroom. After completion of the alternative components, students complete the remaining coursework (18 credits) and degree requirements.
4. MA in Special Education (a Scholarly route for students who are not seeking licensure or who already have a license and are seeking additional depth of knowledge). This route requires 30 credits of special education coursework and does not lead to licensure.
5. MA in Special Education with an emphasis in Visual Impairment (preparation for licensure in teaching school-aged children/infants/toddlers and/or orientation and mobility). This route requires 30-36 credit hours in visual impairment and special education coursework. Students who meet qualifications and are interested in visual impairment may elect to pursue licensure only, rather than a master's degree, with 15-27 credits leading to a Blind and Visually

Impaired Teaching License or National Certification in Orientation and Mobility.

Admission

The Special Education Program has a "rolling admissions" procedure for MA programs. Applications are reviewed upon submission to determine if candidates meet admission requirements. Application requirements follow:

1. A completed Graduate School admission application.
2. A letter of interest explaining the applicant's goals in pursuing an MA in Special Education.
3. Complete transcripts of all college work, including notation of a BA or BS Degree and a cumulative GPA of a 3.0 or higher.
4. A curriculum vitae or resume.
5. Email addresses to contact three individuals who can provide a professional recommendation, such as professors, employers, or others qualified to evaluate potential for graduate work.
6. For alternative licensure, a letter from a school district indicating consideration for a position.
7. For international students with English language testing requirements, TOEFL test results of at least 79 iBT; 550 paper, or IELTS results of at least 6.5.

Special Education - Bachelor of Science in Education

The undergraduate special education program is an NCATE accredited program designed to prepare teacher candidates for dual licensure in special education and either elementary or secondary education. Students graduate with the preparation to teach in environments across the continuum of special education services. In addition to special education coursework, students complete an academic teaching field within their dual major (elementary or secondary).

General education requirements are similar for all degree programs in the College of Education. Students should meet with an advisor to plan appropriate general education courses for a special education major.

Requirements

Professional Education Courses

SPED 350	Introduction to Special Education in a Diverse Society	3
SPED 360	Elementary Curriculum, Methods, and Materials for Special Education in a Diverse Society	3
SPED 406	High Incidence Disabilities in a Diverse Society	3
SPED 407	Low Incidence Disabilities in a Diverse Society	3
SPED 459	Classroom Management for Diverse Learners	3
SPED 463	Introduction to Assessment of Diverse Exceptional Learners	3

SPED 481	Practicum in Education, Equity and Cultural Diversity	3
SPED 482	Student Teaching SPED	12
Options		
Select one of the following options:		48-50
Dual License in Elementary Education		
Dual License in Secondary Education		
Total Credits		81-83

Dual Majors

All special education students must choose one of the following dual majors:

Dual License in Elementary Education (48 credits)

Complete the Language Arts Teaching Field or Requirements for Elementary Education majors		24
Complete the Elementary Education Major Requirements		18
EDUC 489	Topics	1-3
RDG 371	Instruction for Special Reading Needs	3
Total Credits		46-48

Dual License in Secondary Education (45 credits)

Complete first teaching field requirements in one area (36 credits minimum)		36
EDUC 489	Topics	3
RDG 371	Instruction for Special Reading Needs	3
Select one from the following appropriate for teaching field:		3
EDUC 460	Teaching Language Arts at the Middle and High School Level	
EDUC 461	Teaching Social Studies at the Middle and High School Level	
EDUC 462	Teaching Mathematics at the Middle and High School Level	
EDUC 463	Teaching Science at the Middle and High School Level	
Total Credits		45

General Requirements

See "General Requirements" in the "College of Education (p. 452)" section. Students must be admitted to the Teacher Education Program as a condition for enrolling in courses that lead to licensure.

Special Education - Doctor of Education

The Special Education Doctorate Program is committed to preparing professionals in the areas of teaching, research, service, and leadership positions. All students within this program are trained to conduct independent research, become critical/independent thinkers, and embrace the notion of diversity. Upon completion of the doctorate the student will be able to inform policies that promote the well-being of all individuals with exceptionalities at the local, community, societal, and global levels. The Department of Special Education/Communication Disorders is pleased to offer two different, but equally rigorous, pathways (a Ph.D. or an Ed.D.). The two degrees can be differentiated in this way: a potential candidate seeks to drive educational change through either the

use of existing research (Ed.D.) or the creation of new research (Ph.D.). Additionally, there are two areas of specialization: Bilingual/Multicultural Special Education and Autism Spectrum Disorders. A student may also choose to minor in a related area such as Communication Disorders and must work carefully with an advisor to plan a program of study if a minor is desired.

Admission

Doctoral admission is competitive. To maximize consideration for admittance, applications must be submitted by February 10 for admission in the following semester. Admissions decisions are made based on evaluation of the student's potential for success in research, teaching, and service to the profession. Requirements include the following.

1. Completed Graduate school admission application.
2. Letter of Intent that explains professional goals and area of research interest.
3. Complete transcripts from all post-secondary educational experiences, with notation of a bachelor's degree, a master's degree in a related field of study, and a minimum 3.0 cumulative GPA on a 4.0 scale.
4. Scores from the Graduate Record Examination.
5. Curriculum vitae or resume.
6. Email addresses by which the graduate school application system will contact three individuals who can provide letters of professional recommendation.
7. Scholarly Writing Sample (10-15 scholarly paper following APA guidelines about a current issue in the field of Special Education).
8. A letter of support from a faculty member indicating an interest in fulfilling the role of advisor.
9. For international students with English language testing requirements, TOEFL results of at least 79 IBT; 550 PBT or IELTS scores of at least 6.5.

Coursework

60 credit hours (42 credit hours in coursework and 18 credits of dissertation research) is the minimum credit hours required for either a Ph.D. or Ed.D. The required coursework is planned with the student's committee members who take into account the student's research interest, research design, availability of coursework, and independent research study(s) which occur under the direction of the advisor of record and/or a faculty member. Additional coursework is contingent and may be recommended by the Doctoral Qualifying Committee, the advisor of record, and the student. Coursework requirements follow:

Required Core Coursework		12
SPED 523	Advanced Curriculum for Diverse Exceptional Learners	3
SPED 610	Current Issues in Special Education for Teaching in a Culturally Responsive Society	
SPED 613	Current Research in Special Education	
SPED 606	High Incidence Disabilities in a Diverse Society	

or SPED 607 Low Incidence Disabilities

Research Sequence (3 credits must be statistics based)	9+
Area of Research Interest (individually based on the student area of interest)	18+
Dissertation	18+

Examinations

Students must pass a qualifying examination (during the first year of study), a Comprehensive Exam including written electronic portfolio and oral elements (prior to beginning a dissertation), and a final dissertation defense. The doctoral handbook on the departmental website provides procedural and other details regarding each exam.

Dissertation

Every student working toward the doctoral degree will submit a dissertation embodying the results of original research. The dissertation is expected to demonstrate the student's ability in independent investigation and to be a contribution to human knowledge. The dissertation shall display a mastery of the literature of the subject field and present an organized, coherent development of ideas with a clear exposition of results, and provide a critical discussion of the limits and validity of the student's conclusions.

Special Education - Doctor of Philosophy

The Special Education Doctorate Program is committed to preparing professionals in the areas of teaching, research, service, and leadership positions. All students within this program are trained to conduct independent research, become critical/independent thinkers, and embrace the notion of diversity. Upon completion of the doctorate the student will be able to inform policies that promote the well-being of all individuals with exceptionalities at the local, community, societal, and global levels. The Department of Special Education/Communication Disorders is pleased to offer two different, but equally rigorous, pathways (a Ph.D. or an Ed.D.). The two degrees can be differentiated in this way: a potential candidate seeks to drive educational change through either the use of existing research (Ed.D.) or the creation of new research (Ph.D.). Additionally, there are two areas of specialization: Bilingual/Multicultural Special Education and Autism Spectrum Disorders. A student may also choose to minor in a related area such as Communication Disorders and must work carefully with an advisor to plan a program of study if a minor is desired.

Admission

Doctoral admission is competitive. To maximize consideration for admittance, applications must be submitted by February 10 for admission in the following semester. Admissions decisions are made based on evaluation of the student's potential for success in research, teaching, and service to the profession. Requirements include the following:

1. Completed Graduate school admission application.
2. Letter of Intent that explains professional goals and area of research interest.
3. Complete transcripts from all post-secondary educational experiences, with notation of a bachelor's degree, a master's degree

- in a related field of study, and a minimum 3.0 cumulative GPA on a 4.0 scale.
- 4. Scores from the Graduate Record Examination.
 - 5. Curriculum vitae or resume that includes at least 3 years prior (or continuing concurrent) direct and/or related teaching experience in an educational field.
 - 6. Email addresses by which the graduate school application system will contact three individuals who can provide letters of professional recommendation.
 - 7. Scholarly Writing Sample (10-15 page scholarly paper following APA guidelines about a current issue in the field of Special Education).
 - 8. A letter of support from a faculty member indicating an interest in fulfilling the role of advisor.
 - 9. For international students with English language testing requirements, TOEFL results of at least 79 IBT; 550 PBT or IELTS scores of at least 6.5.

Coursework

60 credit hours (42 credit hours in coursework and 18 credits of dissertation research) are the minimum credit hours required for either a Ph.D. or Ed.D. The required coursework is planned with the student’s committee members who take into account the student’s research interest, research design, availability of coursework, and independent research study(s) which occur under the direction of the advisor of record and/or a faculty member. Additional coursework is contingent and may be recommended by the Doctoral Qualifying Committee, the advisor of record, and the student. Coursework requirements follow:

Required core coursework:		12
SPED 523	Advanced Curriculum for Diverse Exceptional Learners	
SPED 610	Current Issues in Special Education for Teaching in a Culturally Responsive Society	
SPED 613	Current Research in Special Education	
SPED 606	High Incidence Disabilities in a Diverse Society	
or SPED 607	Low Incidence Disabilities	
Research Sequence (9 credits in quantitative research design/statistics based)		12+
Area of Research Interest (individually based on the student's area of interest)		18+
Dissertation		18+

Examinations

Students must pass a qualifying examination (during the first year of study), a Comprehensive Exam including written portfolio and oral elements (prior to beginning a dissertation), and a final dissertation defense. The doctoral handbook on the departmental website provides procedural and other details regarding each exam.

Dissertation

Every student working toward the doctoral degree will submit a dissertation embodying the results of original research. The dissertation is expected to demonstrate the student’s ability in independent

investigation and to be a contribution to human knowledge. The dissertation shall display a mastery of the literature of the subject field and present an organized, coherent development of ideas with a clear exposition of results, and provide a critical discussion of the limits and validity of the student’s conclusions.

Special Education - Graduate Minor

A minor in special education requires 9 credits of graduate coursework that carries the SPED prefix. Official minor documentation must be completed with the Department of Special Education and Communication Disorders.

COLLEGE OF ENGINEERING

Dean - Lakshmi Reddi, P.E.

Associate Dean (Academic Programs) - Sonya Cooper, P.E.

Associate Dean/Director of Engineering Research Center - Phillip DeLeon

Associate Dean (Outreach) - Patricia Sullivan

Business Manager - Monica Lopez

Communications and Special Events coordinator - Linda Fresques

Student Programs Coordinator - Elizabeth Howard

The College of Engineering comprises six departments:

- Chemical Engineering (p. 527);
- Civil Engineering (p. 539);
- Electrical and Computer Engineering (p. 549);
- Engineering Technology and Surveying Engineering (p. 572);
- Industrial Engineering (p. 590);
- Mechanical and Aerospace Engineering (p. 595).

Mission of the College of Engineering

The College of Engineering will uphold the land grant mission of NMSU through nationally recognized programs in education, research and professional & public service.

With respect to our undergraduate programs, we will accomplish our mission by focusing on the following goals:

1. To be nationally and internationally recognized for academic & research programs in Engineering & Engineering Technology.
2. Provide world-class engineers & engineering technologists for industrial, government, and academic constituents of the College of Engineering
3. To be the University of Choice for undergraduate engineering & engineering technology education in the region
4. To serve as an engine for economic development in New Mexico through the advancement of engineering and technology

Furthermore, graduates receiving baccalaureate degrees will demonstrate:

- an ability to apply knowledge of mathematics, science and engineering;
- an ability to design and conduct experiments, as well as to analyze and interpret data;
- an ability to design a system, component or process to meet desired needs;
- an ability to function on multi-disciplinary teams;
- an ability to identify, formulate, and solve engineering problems;
- an understanding of professional and ethical responsibility;
- an ability to communicate effectively;
- the broad education necessary to understand the impact of engineering solutions in a global and societal context;
- a recognition of the need for, and an ability to engage in life-long learning;

- a knowledge of contemporary issues; and
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Undergraduate Student Advisement

Starting with the Fall 2017 semester, students entering the College of Engineering will be advised by the Center for Academic Advising and Student Support (CAASS) located in Garcia Annex. Students may also change majors at the CAASS. Students uncertain about choosing a major may list themselves as undeclared in the College of Engineering and be advised by the CAASS. Undeclared students will be asked to choose a major after two semesters in the college. Students must have a declared major in order to graduate.

At the discretion of the associate dean, students who do not demonstrate satisfactory progress may be required to leave the College of Engineering.

Undergraduate General Education

With the exception of math and science, the College accepts all coursework approved for inclusion in the New Mexico General Education Common Core. Calculus I, General Chemistry I and Engineering Physics I are required to satisfy areas II and III of the common core.

S/U Coursework

The College requires most degree requirements to be taken with traditional grading. Students may take selected humanities and social science courses under the S/U option. Other exceptions are specifically noted in the program descriptions later in this catalog.

Undergraduate Math Placement

Entering freshmen are placed into an appropriate math course based upon the results of the Math Placement Exam administered regularly by the NMSU mathematics department. Students with Advanced Placement or transfer credit for mathematics will be placed accordingly. Math placement may be altered at the discretion of the associate dean.

Minors

Minors are available from most departments within the College of Engineering are outlined in the individual program descriptions.

Undergraduate Cooperative Education

After two semesters of satisfactory academic work (2.5 GPA), an engineering student may go on a work phase with one of the many companies or governmental agencies with which the university has co-op agreements. The experience obtained through alternating periods of academic and fieldwork greatly contributes to the preparation of a student for professional life. Work phases are considered to be a vital part of the educational process, and students are counseled in the selection of co-op positions that will lead to progressive learning experiences. Earnings while on work phase provide a source of financial assistance to meet educational expenses.

A significant number of undergraduate engineering students are in the cooperative education program. Students may, with the approval of their department head, earn credit while participating in a co-op work phase. Co-op credits do not normally count toward the degree requirements but do show on the transcript.

Undergraduate General Academic Requirements

For regular admission to the University and the College of Engineering, incoming freshman and transfer applicants must meet the University's qualifications for regular admission as stated in the undergraduate catalog in effect at the time of application. Students admitted to the College of Engineering will be classified by the college as a Pre-[major] until the standard requirements described below for admission to the program major are met.

Pre-[major] students will be admitted into their respective programs once they have met the following criteria:

• Earn a minimum grade of C- in all of the following courses:		
CHEM 111G	General Chemistry I	4
or CHEM 110 (engineering technology)		3
SPCD 111G	Advanced ESL Composition	4
ENGR 100	Introduction to Engineering	3
MATH 191G	Calculus and Analytic Geometry I	4
or MATH 235 (engineering technology)		3
PHYS 213	Mechanics	3
or PHYS 215G Engineering Physics I		
or PHYS 211 (engineering technology)		3

Any of the above courses with earned AP credit (minimum score of 3) is exempt from the list. Transfer students may meet this criteria with determined passing credit of equivalent courses. PRE [major] students will be advised by their EG [major] department.

NMSU College of Engineering reserves the right to independently test any student's English proficiency upon arrival, including those who have earned scores satisfying minimum admission criteria. If the demonstrated level of English proficiency is not sufficient for academic success as determined by the Center for English Language Programs, support classes may be required to improve proficiency.

Students must earn a minimum cumulative GPA of 2.0 before enrolling in engineering courses numbered 300 or above.

Students must earn a grade of C- or better in all engineering, technology, math and science courses (including associated prerequisite courses) required for the degree and also courses taken to satisfy the general education requirements for Area I-Communications, Area II-Mathematics/Algebra, and Area III-Laboratory Science. If a grade lower than C- is earned in any of these courses, the student is required to retake the course immediately during the next semester it is offered. An undergraduate student may attempt an engineering, math, or physical science course no more than three times to earn a passing grade of C- or better. Anytime a student earns less than a C-, a meeting with the appropriate Engineering academic advisor is required to develop a plan for addressing this issue. If the student fails to pass any of these courses after three attempts, then the student will not be able to continue as an Engineering major and will be counseled on other degree options.

Engineering Transfer Policy

Policy for engineering majors enrolling in courses at other institutions to meet College of Engineering Departmental Core Requirements¹.

1. NMSU Policy Manual Chapter 6, section 89, paragraph A. "The decision to award a student credit for work completed at another institution rests with the faculty."
2. NMSU main campus engineering majors may take core classes at other institutions of higher education to meet NMSU College of Engineering Departmental Core if the NMSU core course cannot accommodate any more eligible students.
3. The following conditions and restrictions apply to any course not taken on the NMSU main campus.
 - The department must approve the course prior to enrollment (student to provide course syllabus and any other documentation to department head).
 - The course must be a class in a program that is accredited by an accreditation commission of ABET, Inc. and cannot be graded S/U
 - The course must be substantially the same as the equivalent NMSU class and the student must have satisfied all NMSU prerequisite requirements.
 - The student shall provide a corresponding course syllabus and any other documentation required.
 - If NMSU prerequisite requirements are not satisfied, credit will be denied regardless of a passing grade for the course at the other institution.
4. In addition to 3 above, the following conditions apply to any on-line course not taken from the NMSU main campus.
 - Scheduled exams, if any, shall be proctored².
 - If NMSU prerequisite requirements are not satisfied, credit will be denied regardless of a passing grade for the course at the other institution.

¹ Core requirements are defined as required departmental, discipline-related, courses within the major.

² The student may choose to have NMSU proctor Exams (<http://distance.nmsu.edu/faculty/requiring-a-proctored-exam/>)

For more information about transferring to New Mexico State University from another accredited institution, visit the NMSU Transfer Center.

Requirements for Graduation

The minimum requirements for undergraduate degrees are:

1. Satisfaction of the university requirements as previously outlined in the Regulations (p. 53) section of this catalog.
2. Satisfaction of the college requirements as outlined under General Academic Requirements, above.
3. Satisfaction of the departmental rules and course requirements as outlined in the individual program descriptions.

NOTE: In order to maintain quality, remain current, and satisfy changes in accreditation criteria, requirements which have been published may be changed. Any such changes will be announced and will not be retroactive. Always consult an academic advisor before registering for classes.

Graduate Degrees

Graduate study is available in the

- Aerospace Engineering (p. 595),
- Chemical Engineering (p. 527),

- Civil Engineering (p. 539),
- Electrical Engineering (p. 549),
- Environmental Engineering (p. 539),
- Industrial Engineering (p. 590) and
- Mechanical Engineering (p. 595).

See individual program descriptions for graduate degree requirements.

Bachelor Degrees

Bachelor of Information and Communication Technology (p. 572)

Bachelor of Science in Engineering

Majors in:

- Aerospace Engineering (p. 563)
- Chemical Engineering (p. 527)
- Civil Engineering (p. 539)
- Electrical Engineering (p. 549)
- Engineering Physics (p. 563)
- Engineering Technology (p. 572)
- Geomatics (p. 572)
- Industrial Engineering (p. 590)
- Mechanical Engineering (p. 563)

Dual Degrees

Bachelor of Science/ Master of Science-Electrical Engineering (p. 549)

Masters Degree

Master of Science in Aerospace Engineering (p. 595)

Master of Science in Chemical Engineering (p. 527)

Master of Science in Civil Engineering (p. 539)

- Geotechnical Engineering
- Structural Engineering
- Water Resource Engineering

Master of Science in Electrical Engineering (p. 549)

Master of Science in Environmental Engineering (p. 539)

Master of Science in Industrial Engineering (p. 590)

Master of Science in Mechanical Engineering (p. 595)

Doctoral Degree

Doctor of Philosophy

Majors in:

- Aerospace Engineering (p. 595)
- Chemical Engineering (p. 527)
- Electrical Engineering (p. 549)
- Engineering
 - Civil Engineering (p. 539)
 - Industrial Engineering (p. 590)
 - Mechanical Engineering (p. 595)

Undergraduate Minors

- Aerospace Engineering (p. 595)
- Agricultural Engineering (p. 539)
- Biomedical Engineering (p. 527)
- Brewery Engineering (p. 527)
- Computational Engineering (p. 527)
- Computer Engineering (p. 549)
- Digital Electronic Applications (p. 572)
- Digital Forensics (p. 572)
- Electrical Engineering (p. 549)
- Entrepreneurship (p. 590)
- Geomatics (p. 572)
- Information Security Technology (p. 572)
- Manufacturing (p. 572)
- Materials Engineering (p. 527)
- Mechanical Engineering (p. 595)
- Nuclear Chemical Engineering (p. 527)
- Pre-Law in Intellectual Property (p. 527)
- Pre-Medicine Studies (p. 527)
- Renewable Energy Technologies (p. 572)

Graduate Minor

- Materials Engineering (p. 527)

Accreditation

ABET (formerly the Accreditation Board for Engineering and Technology), established in 1933 and composed of representatives from technical societies, assures professional standards by periodic evaluations of the programs in the College of Engineering. (ABET may be contacted at <http://www.abet.org>)

Continuous accreditation by the Engineering Accreditation Commission (EAC) of ABET has been in force since

- 1938 for civil, electrical, and mechanical engineering,
- 1967 for chemical engineering,
- 1971 for industrial engineering,
- 2001 for surveying engineering and
- 2005 for engineering physics.

The electronics and computer, civil, and mechanical engineering technology baccalaureate degree programs have been accredited by the Technology Accreditation Commission (TAC) of ABET since 1988.

The college is a member of the American Society for Engineering Education (ASEE).

Chemical & Materials Engineering Mission

The New Mexico State University Chemical & Materials Engineering Department strives to prepare Chemical Engineering Bachelor of Science graduates to successfully and safely practice the chemical engineering profession, to engage in life-long personal and professional development, and to contribute to the betterment of their community and society.

Undergraduate Program Information

Chemical engineers solve problems by combining the fundamentals of physical science (chemistry and physics) and life science (biology, microbiology, biochemistry) with the principles of engineering analysis, mathematics, and economics. The curriculum of study leading to the BSChE continuously builds on prerequisite knowledge. The capstone course requires completion of a series of seven prerequisite courses, each having its own prerequisites. In this manner, the BSChE produces graduates with highly developed problem-solving capabilities, strong communication and interpersonal skills, and an ability to seek out and assimilate knowledge beyond the classroom. Graduates apply these competencies to solve problems across a wide range of industries in the private and public sectors.

The work of a chemical engineer typically leads to the development of processes that convert raw materials (chemicals) into more useful or valuable products. Chemical engineers are pioneers of modern materials and associated processes that are essential to the fields of:

- nanotechnology;
- fuel cells;
- computer chip manufacture;
- environmental restoration and pollution prevention;
- biomedical, biotechnology and bioengineering;
- pharmaceutical manufacturing;
- food production;
- transportation (automotive and aerospace);
- advanced materials;
- petrochemical and refining;
- chemical synthesis and production; and
- power & energy (including the nuclear industry).

Graduates are also well-prepared to continue the study of law, medicine or advanced engineering topics at the graduate level.

Undergraduate Program Educational Objectives

The Chemical & Materials Engineering Department at New Mexico State University strives to produce undergraduates who will:

1. apply their problem-solving and communication skills to chemical engineering industries, government research labs, academia, and related fields;
2. implement safety practices in their work;
3. be on the path to leadership; and
4. build new skills sets through continuing education and professional development.

These Program Educational Objectives (PEOs), which are modified based on input from our constituencies, are consistent with the missions of NMSU, the College of Engineering and the Department of Chemical & Materials Engineering.

Graduate Program Information

The Department of Chemical and Materials Engineering offers graduate study leading to the Master of Science degree and the Ph. D. with an emphasis in chemical engineering. Admission to the program is in accord with the general regulations of the Graduate School. The Graduate

Record Examination (GRE) General Test is required for all applicants. All graduate students are required to pass all graduate engineering courses with a minimum grade of B-.

All graduate students must select a thesis or dissertation advisor by the end of their first year in the chemical engineering graduate program. Thesis/dissertation may be pursued in absentia at various industrial sites by special arrangement.

Graduate teaching and research assistantships, fellowships and traineeships are available. For consideration for financial assistance, completed applicants must be received by March 1. All support is contingent upon availability, eligibility and satisfactory progress toward the degree.

Each student admitted to the CHME grad program who has an undergraduate degree in a discipline other than chemical engineering must schedule a meeting with the CHME Department Head to define the undergraduate course deficiencies the student must take to obtain a graduate degree in chemical engineering.

Graduate Program Educational Objectives

The Chemical & Materials Engineering Department at New Mexico State University strives to produce graduate students who will:

1. design research studies to solve complex engineering problems using engineering and science fundamentals combined with statistics and economic principles to justify their technical recommendations;
2. apply their engineering knowledge to critically evaluate relevant literature and emerging technologies;
3. work independently and collaboratively;
4. apply professional and ethical responsibilities of the engineering profession;
5. evaluate the impact of their work on society;
6. effectively present engineering results in both written and oral formats; and
7. serve as effective leaders of their peers.

Degrees for the Department

Chemical Engineering - Bachelor of Science in Chemical Engineering (p. 535)

Chemical Engineering - Master of Science in Chemical Engineering (p. 537)

Chemical Engineering - Doctor of Philosophy (p. 536)

Minors for the Department

Brewery Engineering - Undergraduate Minor (p. 535)

Biomedical Engineering - Undergraduate Minor (p. 535)

Computational Engineering - Undergraduate Minor (p. 537)

Materials Engineering - Undergraduate Minor (p. 538)

Nuclear Chemical Engineering - Undergraduate Minor (p. 538)

Pre-Law in Intellectual Property - Undergraduate Minor (p. 538)

Pre-Medicine Studies - Undergraduate Minor (p. 538)

Materials Engineering - Graduate Minor (p. 537)

Professor, David A. Rockstraw¹, Department Head

Professor, Martha C. Mitchell¹, Associate Department Head

Professors Mitchell¹, Rockstraw¹; **Associate Professors**

Andersen, Houston, Luo; **Assistant Professors** Brewer, Foudazi, Manz;

Emeritus Professors Bhada, Ghassemi, Johnson, Long, Patton

Professors: M.C. Mitchell¹, Ph.D. (Minnesota) computer modeling and simulation of molecular-level phenomena, thermodynamic characterization of aerospace fuels, statistical mechanics, engineering education, diversity and inclusion in STEM; D.A. Rockstraw¹, Department Head, Ph.D. (Oklahoma) chemical process design, analysis & simulation, catalysis and reaction kinetics, activated carbon, trade secret and intellectual property litigation; **Associate Professors:** P.K. Andersen, Ph.D. (California-Berkeley) physicochemical hydrodynamics, nuclear chemical engineering, modeling and simulation, education and training; J. Houston, Ph.D. (Texas A&M) biomedical engineering, biophotonics, flow cytometry; H. Luo, Ph.D. (Tulane) nanostructured materials, thin films, photovoltaics, batteries, electrocatalysts, photocatalysts; **Assistant Professors:** C.E. Brewer, Ph.D. (Iowa State) biomass thermochemical processing, sustainable agriculture, biorenewable resources; R. Foudazi, Ph.D. (Cape Peninsula University of Technology, South Africa) soft matter, membranes, rheology of complex fluids, colloid and interface science, adsorption; U. Jena, Ph.D. (Georgia) biological and agricultural engineering; biosystems engineering, hydrothermal processing of biomass; catalysis, biofuel characterization and analysis; T.A. Manz, Ph.D. (Purdue) quantum chemistry simulations of materials, catalysis, and space physics; M. Zhou, Ph.D. (New Mexico State) gas adsorption and separation, energy storage devices, capacitive deionization.

¹ Registered Professional Engineer

CHME 101. Introduction to Chemical Engineering Calculations

2 Credits

Introduction to the discipline of chemical engineering, including: an overview of the curriculum; career opportunities; units and conversions; process variables; basic data treatments; and computing techniques including computer programming and use of spreadsheets.

Prerequisite(s)/Corequisite(s): MATH 190G. Restricted to Las Cruces campus only.

CHME 102. Material Balances

2 Credits

Perform material balances in single- and multi-phase, reacting and non-reacting systems under isothermal conditions.

Prerequisite(s)/Corequisite(s): CHEM 111G or CHEM 115. Prerequisite(s): MATH 190G, CHME 101.

CHME 201. Energy Balances & Basic Thermodynamics

3 Credits

Chemical Engineering energy balances; combined energy and material balances including those with chemical reaction, purge and recycle; thermochemistry; application to unit operations. Introduction to the first and second laws of thermodynamics and their applications. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

Prerequisite(s): CHME 102, CHEM 115 or CHEM 111G, and MATH 192G.

CHME 301. Chemical Engineering Thermodynamics I

3 Credits

Applications of the first and second law to chemical process systems, especially phase and chemical equilibria and the behavior of real fluids. Development of fundamental thermodynamic property relations and complete energy and entropy balances.

Prerequisite(s)/Corequisite(s): CHME 392 or MATH 392. Prerequisite(s): CHME 201, MATH 291G. Restricted to: CHME majors.

CHME 302. Chemical Engineering Thermodynamics II

2 Credits

Continuation of CHME 301. Restricted to: CHME majors.

Prerequisite(s): CHME 301 AND (CHME 392 OR MATH 392).

CHME 302 L. Thermodynamic Models of Physical Properties

1 Credit

Computational analysis of thermodynamic models in a chemical process simulator, and comparison to experimental data. Specification of pseudo-components. Generation of physical properties by group contribution methods.

Prerequisite(s)/Corequisite(s): CHME 302.

CHME 303. Chemical Engineering Thermodynamics

4 Credits

Applications of the First Law and Second Law to chemical process systems, especially phase and chemical equilibria and the behavior of real fluids. Development of fundamental thermodynamic property relations and complete energy and entropy balances. Modeling of physical properties for use in energy and entropy balances, heat and mass transfer, separations, reactor design, and process control. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): MATH 392. Prerequisite(s): CHME 201, MATH 291.

CHME 305. Transport Operations I: Fluid Flow

3 Credits

Theory of momentum transport. Unified treatment via equations of change. Shell balance solution to 1-D problems in viscous flow. Analysis of chemical engineering unit operations involving fluid flow. General design and operation of fluid flow equipment and piping networks.

Prerequisite(s)/Corequisite(s): CHME 392. Prerequisite(s): CHME 201, PHYS 215G, MATH 291G. Restricted to: CHME majors.

CHME 306. Transport Operations II: Heat and Mass Transfer

4 Credits

Theory of heat and mass transport. Unified treatment via equations of change. Analogies between heat and mass transfer. Shell balance solution to 1-D problems in heat and mass transfer. Analysis of chemical engineering unit operations involving heat transfer. Design principles for mass transfer equipment. Restricted to: CHME, CH E majors.

Prerequisite(s): CHME 305 and (CHME 392 or MATH 392).

CHME 307. Transport Operations III: Staged Operations

3 Credits

Theory of mass transport. Mass transfer coefficients. Analysis of chemical engineering unit operations involving mass transfer and separations. Equilibrium stage concept. General design and operation of mass-transfer equipment and separation sequences. Restricted to: CHME majors.

Prerequisite(s): CHME 302, CHME 306.

CHME 311. Engineering Data Analysis**3 Credits**

Methodology and techniques associated with analyzing engineering data. Extensive spreadsheet use to analyze data and develop statistically significant conclusions based on the data. Data sets range from single variable experiments to multifactor regression analysis.

Prerequisite(s): MATH 192.

CHME 323 L. Transport Operations and Instrumentation Laboratory I
1 Credit

Laboratory experiments demonstrate the principles of process measurement and instrumentation through the determination of thermodynamic properties, transport phenomena properties, heat transfer, and material physical properties. Treatment of data includes regression techniques, analysis of error, and statistical analysis.

Prerequisite(s)/Corequisite(s): CHME 306. Prerequisite(s): STAT 371 or CHME 311. Restricted to: CHME majors.

CHME 324 L. Transport Operations and Instrumentation Laboratory II
1 Credit

Continuation of CHME 323L. Restricted to: CHME majors.

Prerequisite(s): CHME 323L.

CHME 330. Environmental Management Seminar I
1 Credit

Survey of practical and new developments in environmental management field, hazardous and radioactive, waste management, and related health issues, provided through a series of guest lectures and reports of ongoing research. Restricted to: Main campus only. Crosslisted with: C E 330, E E 330, E S 330, E T 330, I E 330, M E 330 and WERC 330

CHME 352 L. Simulation of Unit Operations
1 Credit

Definition, specification, and convergence of basic unit operations in a process simulator. Course will cover pipe networks, pressure changers, heat exchangers, distillation columns, and chemical reactors.

Prerequisite(s)/Corequisite(s): CHME 307, CHME 441. Restricted to: CHME majors.

CHME 361. Engineering Materials
3 Credits

Bonding and crystal structure of simple materials. Electrical and mechanical properties of materials. Phase diagrams and heat treatment. Corrosion and environmental effects. Application of concepts to metal alloys, ceramics, polymers, and composites. Selection of materials for engineering design.

Prerequisite(s): (CHEM 111G or CHEM 114 or CHEM 115) and MATH 190G.

CHME 391. Industrial Employment
1-2 Credits

Employment in chemical, petroleum, food, biotechnology, materials, environmental, pharmaceutical, or other industry relevant to the discipline, with opportunity for professional experience and training in chemical engineering. Requires written report covering work period approved by employer. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: CHME, CH E majors.

Prerequisite(s): Consent of department head.

CHME 392. Numerical Methods in Engineering
3 Credits

Study and application of numerical methods in solving problems commonly encountered in engineering. The numerical methods are motivated by engineering problems rather than by mathematics. However, sufficient mathematical theory will be provided so that students can appreciate the insight into the techniques and their shortcomings of different methods. MATLAB will be used as the working environment for implementing and performing the numerical methods in computers. This course is an engineering elective open to all engineering majors. May be repeated up to 3 credits.

Prerequisite(s): MATH 392.

CHME 395V. Brewing Science and Society
3 Credits

An overview of the science of brewing and the interrelationships between society, technology, business, and the evolution of the current beer market. Topics covered are history of brewing and the interrelationships between societal attitudes, technology, and cultural preferences; beer styles and evaluation techniques; production and characteristics of ingredients used in brewing; brewing unit operations; biochemistry of malting, mashing, and fermentation; engineering in the brewery; homebrewing; and societal and health issues related to beer and alcohol. Students must be at least 21 years of age by the first day of instruction of the semester to enroll in this course.

CHME 412. Process Dynamics and Control
3 Credits

Process modeling, dynamics, and feedback control. Linear control theory and simulation languages. Application of Laplace transforms and frequency response to the analysis of open-loop and closed-loop process dynamics. Dynamic response characteristics of processes. Stability analysis and gain/phase margins. Design and tuning of systems for control of level, flow, and temperature.

Prerequisite(s): CHME 441.

CHME 423 L. Unit Operations Laboratory I
1 Credit

Experiments with chemical engineering unit operations including the use of computer data acquisition. Covers control system instrumentation and development of empirical models from process data. Includes written and oral reports. Restricted to: CHME majors.

Prerequisite(s): CHME 307, CHME 441, CHME 324L.

CHME 424 L. Process Control Laboratory
1 Credit

Experiments with chemical engineering process control including the use of computer data acquisition and closed-loop process control. Covers control system instrumentation. Includes written and oral reports. Restricted to: CHME majors.

Prerequisite(s): CHME 412, CHME 423L.

CHME 430. Environmental Management Seminar II
1 Credit

Survey of practical and new developments in environmental management field, hazardous and radioactive, waste management, and related health issues, provided through a series of guest lectures and reports of ongoing research. Restricted to: Main campus only. Crosslisted with: C E 430, E E 430, E S 430, E T 430, I E 430, M E 430 and WERC 430

CHME 441. Chemical Kinetics and Reactor Engineering**3 Credits**

Analysis and interpretation of kinetic data and catalytic phenomena. Applied reaction kinetics; ideal reactor modeling; non-ideal flow models. Mass transfer accompanied by chemical reaction. Application of basic engineering principles to design, operation, and analysis of industrial reactors.

Prerequisite(s)/Corequisite(s): CHME 307. Prerequisite(s): CHEM 313, CHME 302. Restricted to: CHME, CH E majors.

CHME 443. Industrial Catalysis**3 Credits**

Fundamentals of catalytic processes, including chemistry, catalyst preparation, properties and reaction engineering. Addresses heterogeneous catalytic processes employed by industry. Detailed analysis of existing catalysts and catalytic reactions, and process design in chemical engineering.

Prerequisite(s): CHME 441.

CHME 448. Industrial Safety**3 Credits**

An introduction to the fundamentals of chemical process safety, including toxicology, industrial hygiene, source models, fires and explosions, relief systems, hazard identification, risk assessment, environmental fate and transport, hazardous waste generation, pollution prevention, and regulatory requirements.

Prerequisite(s): CHEM 115 or CHEM 111G.

CHME 449. Intellectual Property for Engineers and Scientists**3 Credits**

An overview of intellectual property with an emphasis on patents. Terminology, patentability requirements, invention disclosures, inventorship, scope of claims, patent application content and the patent prosecution process, and post-allowance matters including infringement and enforcement. Taught with CHME 549.

Prerequisite(s): CHEM 110G, CHEM 111G, or CHEM 115G; and senior standing in engineering or a fundamental science major; or consent of instructor.

CHME 452. Chemical Process Design & Economic Evaluation**3 Credits**

Concepts in chemical engineering process design, including: capital and manufacture cost estimation; discounted cash flows; interest; taxes; depreciation; profitability analysis; project specifications. Restricted to: CHME, CH E majors.

Prerequisite(s): CHME 307, CHME 441.

CHME 452 L. Chemical Process Simulation**1 Credit**

Construction and convergence of chemical processes in a process simulator. Students will understand how to access variables, define and converge design specifications and converge tear/recycle streams.

Prerequisite(s)/Corequisite(s): CHME 452. Prerequisite(s): CHME 352L. Restricted to: CHME majors.

CHME 455. Chemical Plant Design**3 Credits**

Design and analysis of integrated process plants. Consideration given to optimizing performance, operability, reliability, safety, control, energy integration, and cost effectiveness. Requires written report covering solution of a capstone design problem. Restricted to: CHME majors.

Prerequisite(s): CHME 452.

CHME 455 L. Chemical Plant Simulation**1 Credit**

Construction, convergence, and optimization of chemical processes in a process simulator. Dynamic process simulation and control.

Prerequisite(s)/Corequisite(s): CHME 455. Prerequisite(s): CHME 412, CHME 452L. Restricted to: CHME majors.

CHME 461. Calculation of Material and Molecular Properties**3 Credits**

The aim is to describe and apply techniques for computing common properties of materials and molecules: optimized geometries, transition states, vibrational spectra, energies (electronic, internal energy, enthalpy, and Gibbs free energy), heat capacities, net atomic charges, atomic spin moments, and effective bond orders. These techniques allow one to estimate the thermodynamic properties of a chemical, as well as to compute the mechanisms and energy barriers for chemical reactions and catalytic processes, and to quantify the electronic, magnetic, and chemical ordering in materials. The theory behind these techniques will be described and students will perform hands-on computer exercises using common computational chemistry programs. Taught with CHME 561.

Prerequisite(s): CHEM 116, MATH192G, (PHYS 214 or PHYS 216).

CHME 462. MEMs, BioMEMs, and Nano Devices & Technologies**3 Credits**

Device-fabrication approaches and testing methodologies for micro-electro-mechanical (MEM) systems and nanoscale devices. Applications of such devices, and their working principles will also be part of this course. A laboratory component of this course will also be included. Taught with CHME 562. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): CH E 361, CHEM 111.

CHME 463. Soft Matter**3 Credits**

Bulk soft matter assemblies including polymers, macromolecules, colloids, gels, vesicles, emulsions, surfactants, micelles, suspensions and liquid crystals. Self-assembly including molecular self-organization, supramolecular systems, encapsulation, self-assembled films and monolayers. Biological aspects of soft matter including biomacromolecules, cells and soft tissues. Surfaces, interfaces and interactions including thin films, Langmuir monolayers and wetting/dewetting. Physiochemistry and characterization of soft matter. Taught with CHME 563. Consent of Instructor required.

Prerequisite(s): CH E 302, CH E 305, CH E 361.

CHME 464. Polymer Science & Engineering**3 Credits**

This course covers concepts in science and engineering of macromolecules, such as synthesis and chemistry, characterization of molecular weight, morphology, rheology, and mechanical behavior, structure and property relationships, and polymer processing. Taught with CHME 564. May be repeated up to 3 credits.

Prerequisite(s): CHEM 314.

CHME 465. Rheology and Viscoelasticity**3 Credits**

Navier-Stokes equation; non-Newtonian fluids; flow fields; rheometry; viscoelastic models; non-linear viscoelasticity; material functions; complex fluids, including emulsions, suspensions and nanocomposites. Taught with CHME 565. Consent of Instructor required.

Prerequisite(s): CHME 306.

CHME 467. Nanoscience and Nanotechnology**3 Credits**

This is a lecture/laboratory course designed to present the basic concepts, the techniques and the tools to synthesize and characterize nanometer scale materials, and the latest achievements in current and future nanotechnology applications in engineering, materials, physics, chemistry, biology, electronics and energy. It is intended for a multidisciplinary audience with a variety of backgrounds. This course should be suitable for graduate students as well as advanced undergraduates. Topics covered will include: nanoscience and nanotechnology, nanofabrication, self-assembly, colloidal chemistry, sol-gel, carbon nanotubes, graphene, thin film, lithography, physical vapor deposition, chemical vapor deposition, quantum dots, lithium batteries, X-ray diffraction, scanning electron microscopy, transmission electron microscopy, nanoelectronics, nanophotonics and nanomagnetism, etc. Taught with PHYS 520 and CH E 567. Crosslisted with: PHYS 520 and PHYS 467.

Prerequisite(s): (CHEM 116 or CHEM 112G), (PHYS 211G or PHYS 215G), (EH&S Safety training to include the courses: (1) Employee & Hazard Communication Safety (HazCom); (2) Hazardous Waste Management; and (3) Laboratory Standard).

CHME 468. Adsorption**3 Credits**

Introduction to adsorption science and technology, which includes adsorption equilibrium and kinetic theories, adsorbent materials and characterization, adsorption processes and design. Selected applications of adsorption processes in chemical and pharmaceutical industries and environmental protections will also be discussed. Taught with CHME 568. Restricted to: CHME, CH E majors.

Prerequisite(s): CHME 201.

CHME 470. Introduction to Nuclear Energy**3 Credits**

Atomic and nuclear structure, nuclear stability and radioactivity, nuclear reactions, detection and measurement of radiation, interaction of radiation with matter, radiation doses and hazard assessment, principles of nuclear reactors, and applications of nuclear technology.

Prerequisite(s): CHEM 111G, MATH 192G.

CHME 471. Health Physics**3 Credits**

Introduction to radiation protection, radiation/radioactivity, radioactive decay/fission, interactions of radiation and matter, biological effects of radiation, radiation measurement and statistics, sampling for radiation protection, radiation dosimetry, environmental transport, radiation protection guidance, external and internal radiation protection, and hazards analysis.

Prerequisite(s): MATH 192G, CHME 470.

CHME 472. Detection Techniques for Radionuclides and Volatile Organic Compounds**3 Credits**

Basics of analytical techniques used to detect and quantify the presence of radionuclides, with focus on lung and whole-body counting by gamma-ray spectrometry and gas chromatography/mass spectrometry techniques. Course also covers sampling techniques, chain-of-custody methods, and includes hands-on instrument experience at the Carlsbad Environmental Monitoring & Research Center (CEMRC). Course fee required for travel to CEMRC.

Prerequisite(s): CHME 470.

CHME 473. Nuclear Regulations and Compliance Practices**3 Credits**

Introduction, through the use of case studies, to the best technical compliance practices for regulations governing the siting, licensing, constructing, operating and decommissioning of nuclear fuel cycle facilities. Consent of Instructor required.

Prerequisite(s): MATH 191G, (CHEM 111G or CHEM 115), CHME 470.

CHME 474. Power Plant Design**3 Credits**

Principles of electric power generation. Review of DC and AC systems, energy sources, and prime movers. Analysis of hydroelectric, fossil fuel, nuclear, and alternative power systems. Environmental and economic considerations.

Prerequisite(s): MATH 191G, CHEM 111G.

CHME 475. Nuclear Reactor Theory**3 Credits**

An overview of the properties of nuclei, nuclear structure, radioactivity, nuclear reactions, fission, resonance reactions, moderation of neutrons, will be followed by mathematical treatment of the neutronics behavior of fission reactors, primarily from a theoretical, one-speed perspective. Criticality, fission product poisoning, reactivity control, reactor stability and introductory concepts in fuel management, slowing down and one-speed diffusion theory.

Prerequisite(s): (CHEM 112G or CHEM 116G) PHYS 215G, MATH 291G, CHME 470.

CHME 476. Nuclear Fuel Cycles**3 Credits**

Physical and chemical processes in the conventional nuclear fuel cycle: uranium mining and milling, conversion, enrichment, fuel fabrication, reactor operations, interim storage, reprocessing and recycling, waste treatment and disposal. Alternative fuel cycles and future prospects. Consent of Instructor required.

Prerequisite(s): CHME 470.

CHME 479. Corrosion and Degradation of Materials**3 Credits**

Failure of engineering materials in aggressive environments. Chemical and electrochemical mechanisms of corrosion. Influence of chemical composition and microstructure on corrosion behavior. Types of corrosion and chemical attack, including uniform corrosion, galvanic corrosion, pitting and other forms of localized corrosion, stress corrosion cracking, and corrosion fatigue. Methods of corrosion mitigation including cathodic protection, coatings, passivation, and corrosion inhibitors. Corrosion in nuclear reactors and nuclear waste repositories.

Prerequisite(s): CHME 361.

CHME 481. Biomedical Engineering and Engineering Healthcare**3 Credits**

Orientation to solving human and world health issues with biological engineering systems, tools, and analysis methods. Introduces general concepts including applied biology for engineers, biophotonics, biosensing, bioinstrumentation, tissue and biomaterials engineering, biomedical engineering research practices, and physical bioanalytical methods. Taught with CHME 581. Restricted to: CHME, CH E majors.

Prerequisite(s): CHEM 116G, CHME 201.

CHME 485. Materials from Biorenewable Resources**3 Credits**

Types, sources, composition and properties of biomass. Production, processing, and applications of biomass materials with energy, water, cost, sustainability, and waste management considerations. Taught with CHME 585. Crosslisted with: AGRO 485 and HORT 486.

Prerequisite(s): CHEM 211 or CHEM 313 or permission of instructor.

CHME 486. Biofuels**3 Credits**

Introduction to the fundamentals and applications of biofuels and bioenergy production; biomass resources and their composition; types of biofuels; conversion technologies (thermochemical and biochemical conversion processes); biodiesel production, algae to biofuels; economic and environmental assessments; term paper of selected topics relevant to biofuels. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): CHME 201.

CHME 488. Elements of XRD**3 Credits**

Introduction to x-ray diffraction and reflectivity spectra. Topics include X-ray sources and detectors, atomic spectra, characteristic x-rays, thermionic emission, synchrotron radiation, instrument components, and beam conditioners. Crosslisted with: PHYS 468.

Prerequisite(s)/Corequisite(s): . Prerequisite(s): a C- or better in PHYS 315 and PHYS 315 L.

CHME 489. Introduction to Modern Materials**3 Credits**

Structure and mechanical, thermal, electric, and magnetic properties of materials. Modern experimental techniques for the study of material properties. Crosslisted with: PHYS 489.

Prerequisite(s): PHYS 315 or engineering equivalent.

CHME 490. Senior Seminar**1 Credit**

Research seminar attended by graduate students is open to CHME undergraduates who are research active. May be repeated up to 2 credits.

Prerequisite(s)/Corequisite(s): CHME 498. Prerequisite(s): Senior Standing. Restricted to: CHME,CH E majors.

CHME 491. Special Topics**3 Credits**

Lecture and/or laboratory instruction on special topics in chemical engineering. May be repeated to a maximum of 6 credits under different subtitles listed in the Schedule of Classes. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: CHME,CH E majors.

Prerequisite(s): Consent of instructor.

CHME 495. Brewing Science & Engineering**4 Credits (3+3P)**

Details of beer production, fermentation science, brewery operation, and process design & economics. Engineering considerations including process safety, fermentation kinetics, unit operations, and economics of scale. Beer styles, recipe formulation, product quantification for tax purposes, and brew analytical methods will also be discussed. Restricted to: CHME CH E majors.

Prerequisite(s): CHME 441, CHME 452.

CHME 498. Undergraduate Research**1-3 Credits (1-3P)**

Provides an opportunity for undergraduate students to work in research or areas of special interest such as design problems and economic studies under the direction of a faculty member. Written report covering work required. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: CHME,CH E majors.

Prerequisite(s): Consent of instructor and department head.

CHME 501. Graduate Thermodynamics for Chemical Engineers**3 Credits**

Advanced applications of the first and second law to chemical process systems. The calculus of thermodynamics, equilibrium and stability criteria. Properties relationships for real fluids, both pure materials and mixtures. An introduction to molecular thermodynamics and statistical mechanics. Restricted to: CHME,CH E majors.

CHME 506. Graduate Transport Phenomena(s)**3 Credits**

Covers the analysis of simultaneous momentum, energy, and mass transport. Development of integral and local balance equations in vector-tensor form. Application of vector-tensor analysis to transport equations. Boundary layer theory and turbulence.

CHME 513. Intermediate Chemical Engineering Data Analysis (s)**3 Credits**

Intermediate topics in the design and analysis of typical chemical engineering experiments. Topics covered include: linear models, constrained experimental space, non-linear models, model discrimination, and response surface methodologies. Restricted to: CHME,CH E majors.

CHME 516. Numerical Methods in Chemical Engineering**3 Credits**

Survey of numerical methods for solving problems commonly encountered in heat and mass transfer, fluid mechanics, and chemical reaction engineering.

CHME 530. Environmental Management Seminar I**1 Credit**

Survey of practical and new developments in hazardous and radioactive waste management provided through a series of guest lectures and reports of ongoing research. Crosslisted with: C E 330, E E 330, I E 330.

CHME 541. Chemical Kinetics and Reactor Engineering**3 Credits**

Same as CHME 441 with differentiated assignments for graduate students. Consent of Instructor required.

Prerequisite(s): Consent of Instructor.

CHME 542. Graduate Reactor Analysis and Design (s)**3 Credits**

Application and analysis of equations of continuity to multicomponent reaction systems. Introduction to homogeneous and heterogeneous catalysis, single-phase combustion, and shock reaction systems.

CHME 549. Intellectual Property for Engineers and Scientists**3 Credits**

An overview of intellectual property, including patents, trade secrets, copyright, and trademark. Specialized terminology; protectable subject matter and applicable legal standards; inventorship, authorship and ownership; application content and preparation; procedural and substantive application components; and infringement and enforcement. Taught with CHME 449.

Prerequisite(s): CHEM 111G or CHEM 115.

CHME 561. Calculation of Material and Molecular Properties**3 Credits**

The aim is to describe and apply techniques for computing common properties of materials and molecules: optimized geometries, transition states, vibrational spectra, energies (electronic, internal energy, enthalpy, and Gibbs free energy), heat capacities, net atomic charges, atomic spin moments, and effective bond orders. These techniques allow one to estimate the thermodynamic properties of a chemical, as well as to compute the mechanisms and energy barriers for chemical reactions and catalytic processes, and to quantify the electronic, magnetic, and chemical ordering in materials. The theory behind these techniques will be described and students will perform hands-on computer exercises using common computational chemistry programs. Taught with CH E 461. Consent of Instructor required.

Prerequisite(s): CHEM 116, MATH 192G, and (PHYS 214 or PHYS 216G).

CHME 563. Soft Matter**3 Credits**

The physiochemistry of soft materials including gels, polymers and colloids, self-assembly, intermolecular forces, and colloidal forces.

Taught with CHME 463.

Prerequisite(s): CHME 302, CHME 305, CHME 361.

CHME 564. Polymer Science & Engineering**3 Credits**

Synthesis, structure, property relationships of synthetic polymers. Taught with CHME 464. May be repeated up to 3 credits.

Prerequisite(s): CHME 201, CHEM 314.

CHME 565. Rheology and Viscoelasticity**3 Credits**

This course is an introduction to rheology and viscoelasticity. In particular, the flow behavior of Non-Newtonian Fluids and Viscoelastic Fluids will be covered. Rheometry, the technique for characterization of fluids, will be discussed. Most of the course is quantitative and uses mathematical modeling. Taught with CHME 465.

Prerequisite(s): CHME 306.

CHME 567. Nanoscience and Nanotechnology**3 Credits**

This is a lecture/laboratory course designed to present the basic concepts, the techniques and the tools to synthesize and characterize nanometer scale materials, and the latest achievements in current and future nanotechnology applications in engineering, materials, physics, chemistry, biology, electronics and energy. It is intended for a multidisciplinary audience with a variety of backgrounds. This course should be suitable for graduate students as well as advanced undergraduates. Topics covered will include: nanoscience and nanotechnology, nanofabrication, self-assembly, colloidal chemistry, sol-gel, carbon nanotubes, graphene, thin film, lithography, physical vapor deposition, chemical vapor deposition, quantum dots, lithium batteries, X-ray diffraction, scanning electron microscopy, transmission electron microscopy, nanoelectronics, nanophotonics and nanomagnetism, etc. Taught with CHME 467.

Prerequisite(s): (CHEM 112G or CHEM 116G) and (PHYS 211G or PHYS 215G).

CHME 568. Intermediate Adsorption**3 Credits**

Introduction to the fundamentals and applications of biofuels and bioenergy produced from biomass; renewable feedstocks, their production, availability and attributes for biofuel/bioenergy production; types of biomass-derived fuels and energy; thermochemical conversion of biomass to heat, power, and fuel; biochemical conversion of biomass to fuel; biodiesel production; environmental impacts of biofuel production; economics and life-cycle analysis of biofuel; value-added processing of biofuel residues; term paper of selected topics relevant to biofuels. Taught with CHME 468.

Prerequisite(s): CHME 201.

CHME 579. Corrosion and Degradation of Materials**3 Credits**

Failure of engineering materials in aggressive environments. Chemical and electrochemical mechanisms of corrosion. Influence of chemical composition and microstructure on corrosion behavior. Types of corrosion and chemical attack, including uniform corrosion, galvanic corrosion, pitting and other forms of localized corrosion, stress corrosion cracking, and corrosion fatigue. Methods of corrosion mitigation including cathodic protection, coatings, passivation, and corrosion inhibitors. Corrosion in nuclear reactors and nuclear waste repositories. Taught with CHME 479.

Prerequisite(s): CHME 361.

CHME 581. Biomedical Engineering & Healthcare Engineering**3 Credits**

Orientation to solving human and world health issues with biological engineering systems, tools, and analysis methods. Introduces general concepts including applied biology for engineers, biophotonics, biosensing, bioinstrumentation, tissue and biomaterials engineering, biomedical engineering research practices, and physical bioanalytical methods. Taught with CHME 481.

Prerequisite(s): CHEM 116G, CHME 201.

CHME 585. Materials from Biorenewable Resources**3 Credits**

Types, sources, composition and properties of biomass. Production, processing and applications of biomass materials to fulfill food, feed, fiber, fuel and chemical feedstock needs with energy, water, cost, sustainability, and waste management considerations. Taught with CHME 485.

Prerequisite(s): CHEM 211 or 313 or consent of instructor.

CHME 586. Biofuels**3 Credits**

Introduction to the fundamentals and applications of biofuels and bioenergy production; biomass resources and their composition; types of biofuels; conversion technologies (thermochemical and biochemical conversion processes); biodiesel production, algae to biofuels; economic and environmental assessments; term paper of selected topics relevant to biofuels. May be repeated up to 3 credits. Restricted to: CHME, CH E majors.

Prerequisite(s): CHME 201.

CHME 588. Elements of XRD**3 Credits**

Introduction to x-ray diffraction and reflectivity spectra. Topics include X-ray sources and detectors, atomic spectra, characteristic x-rays, thermionic emission, synchrotron radiation, instrument components, and beam conditioners. Crosslisted with: PHYS 568.

CHME 589. Modern Materials**3 Credits**

Same as PHYS 489 with differentiated assignments for graduate students. Crosslisted with: PHYS 589.

Prerequisite(s): PHYS 455 or PHYS 554.

CHME 590. Graduate Seminar**1 Credit**

Presentations on topics of professional interest in chemical engineering. Includes seminars by faculty, graduate students, and invited speakers from academia, government, and industry. May be repeated for a total of 6 credits. May be repeated up to 6 credits. Restricted to: CHME majors.

CHME 594. Professional Communication in Chemical Engineering**2 Credits**

Connections between interpersonal relationships and the effective communication of information. Strategies for formal and informal written and verbal communication in the context of presentations, interviews, reports and publications. Factors affecting non-verbal communication.

Special focus will be given to understanding and adapting to the audience's perspective. 2 credits. Open to chemical engineering graduate students or by permission of instructor. This class will prepare you to communicate technical information effectively within a variety of contexts and to a variety of audiences. Class assignments will be partially based on current student needs such as preparing presentations for professional conferences, giving research progress reports, and writing research manuscripts. Restricted to: CHME majors.

Prerequisite(s): CHME graduate student standing.

CHME 598. Ph.D. Research- Level I**1-9 Credits (1-9)**

Individual investigations either analytical or experimental. May be repeated up to 6 credits.

CHME 599. Master's Thesis**15 Credits**

Thesis.

CHME 690. Graduate Seminar**1 Credit**

Presentations on topics of professional interest in chemical engineering. Includes seminars by faculty, graduate students, and invited speakers from academia, government, and industry. Required each semester for every Ph.D. student. All candidates for graduate degrees required to give seminar. May be repeated for a maximum of 8 credits. May be repeated up to 8 credits. Restricted to: CHME majors.

CHME 698. Ph.D. Research- Level II**1-9 Credits (1-9P)**

Advanced topics for current research. Course subtitled in the Schedule of Classes. May be repeated up to 99 credits. Consent of Instructor required.

Prerequisite(s): successful completion of Ph D qualifying exam.

CHME 700. Doctoral Dissertation**15 Credits (15)**

Individual research in selected topics of current interest in chemical engineering. May be repeated up to 88 credits. Thesis/Dissertation Grading.

Prerequisite(s): CHME 698 (9 credits) and successful completion of comprehensive exam.

Biomedical Engineering - Undergraduate Minor

The Biomedical Engineering minor-of-study is a 20-credit hour program of study designed to accomplish two objectives:

1. Require courses in basic biology, anatomy, physiology to provide students a basic understanding of life and the design and mechanics/dynamics of the human body. Also required is the only biomedical engineering course taught on the NMSU campus.
2. Permit students to select from a wide range of elective courses (<https://chme.nmsu.edu/academics/minors/biomedical-engineering>) (<https://chme.nmsu.edu/academics/minors/biomedical-engineering/>) numbered above 400 that emphasize engineering topics with application to the design and development of medical devices.

Required Courses

CHME 481	Biomedical Engineering and Engineering Healthcare	3
BIOL 211G	Cellular and Organismal Biology	3
BIOL 211GL	Cellular and Organismal Biology Laboratory	1
BIOL 353	Pre-Professional Human Anatomy	4
BIOL 354	Physiology of Humans	3
Electives		6
Total Credits		20

Brewery Engineering- Undergraduate Minor

It has long been recognized that the study of chemical engineering is appropriate to the understanding of a vast range of concepts associated with the brewing industry. In 1935, this article by M. B. Donald described many of the fundamental process steps for which the BSCE prepares a student to begin work in the industry. This 18 credit hour minor of study is designed to prepare CHME students for careers in the brewing industry or as a craft brew entrepreneur per the 4-year curriculum suggestions of the Master Brewer's Association of the Americas. Elective courses are to be selected from the lists and guidelines maintained on the Brewery Engineering minor of study webpage (<https://chme.nmsu.edu/academics/minors/brewery-engineering>).

CHME 395V	Brewing Science and Society	3
CHME 495	Brewing Science & Engineering	4
BIOL 311	General Microbiology	3
BIOL 311 L	General Microbiology Laboratory	2
BCHE 395	Biochemistry I	3
Electives		3
Total Credits		18

Chemical Engineering - Bachelor of Science in Chemical Engineering

The BS Chemical Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Requirements (Total Credits 136)

In addition to satisfying the requirements of New Mexico State University and the College of Engineering, CHME majors must pass departmental courses with a grade of C- or better.

CHME majors must have completed CHME 201 Energy Balances & Basic Thermodynamics prior to taking any 400-level CHME elective courses.

Degree requirements can also be found summarized in flow diagrams found on the CHME website (<https://chme.nmsu.edu/academics/undergrad/chme-flow-diagrams/>).

General Education

Chemical Engineering - Doctor of Philosophy

The program of study leading to the Ph.D. is available to students who have either a BS or MS in chemical engineering. Students with a BS must complete 30 course credits and 24 dissertation credits, for a total of 54 credits, including:

- required core CHME courses (14 credits);
- graduate elective courses (12 credits);
- CHME elective courses (3 credits);
- independent research as CHME 698 Ph.D. Research- Level II prior to completion of the comprehensive exam (12 credits);

- dissertation as CHME 700 after completion of the comprehensive exam (12 credits); and
- graduate seminar as CHME 690 Graduate Seminar (1 credit).

Ph.D. students must pass:

1. a qualifying examination within 24 months of starting their Ph.D. studies;
2. a comprehensive examination completed a minimum of nine months prior to the dissertation defense; and
3. an oral defense of the written dissertation before the dissertation committee.
4. PhD candidates in the College of Engineering, who have successfully completed their PhD Qualifier Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

Paper #1: An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student's doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.

Paper #2: An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for the Web of Science. Alternatively, one conference paper accepted or published in a national or international conference proceedings.

Required Core Courses

CHME 501	Graduate Thermodynamics for Chemical Engineers	3
CHME 506	Graduate Transport Phenomena(s)	3
CHME 516	Numerical Methods in Chemical Engineering	3
CHME 542	Graduate Reactor Analysis and Design (s)	3
CHME 594	Professional Communication in Chemical Engineering	2
CHME electives (select from CHME 455-CHME 589)		3
Electives ¹		12
CHME 690	Graduate Seminar	1
CHME 698	Ph.D. Research- Level II ²	12
CHME 700	Doctoral Dissertation ³	12
Total Credits		54

¹ Elective courses are intended to supplement the research work of each graduate student. These courses must be numbered 450 or above and must be approved by the dissertation advisor.

² Minimum 12 credits AFTER completion of the qualifying exam and BEFORE completion of the comprehensive exam.

³ Minimum 12 credits AFTER completion of the comprehensive exam.

Chemical Engineering - Master of Science in Chemical Engineering

The program of study leading to the MS consists of 32 credits which includes:

- required CHME core graduate courses (14 credits);
- CHME elective courses numbered 455-589 (3 credits);
- other graduate elective courses (9 credits); and
- thesis as CHME 599 Master's Thesis (6 credits).

Required Core Courses

CHME 501	Graduate Thermodynamics for Chemical Engineers	3
CHME 506	Graduate Transport Phenomena(s) (Spring semester course)	3
CHME 516	Numerical Methods in Chemical Engineering	3
CHME 542	Graduate Reactor Analysis and Design (s) (Spring semester course)	3
CHME 594	Professional Communication in Chemical Engineering	2

Electives

CHME electives (select from CHME 455-CHME 589)	3
Electives ¹	9

Master's Thesis

CHME 599	Master's Thesis (minimum 6 credit hours before the thesis defense)	6

Total Credits	32
---------------	----

¹ Elective courses are intended to supplement the research work of each graduate student. These courses must be numbered 450 or above and must be approved by the thesis advisor.

Computational Engineering- Undergraduate Minor

The minor in Computational Engineering is designed to provide students with a concentration in the broad spectrum of computations in engineering, including experience with experience with an object-oriented programming language, a background in computational math techniques, and a number of courses that develop or apply engineering software across a broad base of engineering design problems.

Electives must be taken from the list maintained on the Computational Engineering minor webpage (<https://chme.nmsu.edu/academics/minors/computational-engineering>)

I E 311	Engineering Data Analysis ((or CHME 311 or STAT 371))	3
CHME 392	Numerical Methods in Engineering ((or M E 261))	3
C S 151	C++ Programming ((or ICT 352 or E T 262 or equivalent pre-approved object-oriented programming course))	3
Electives		9
Total Credits		18

Materials Engineering - Graduate Minor

The Materials Engineering minor at New Mexico State University is part of a materials education program that addresses the growing demand for engineers and scientists with understanding of the wide range of materials, their properties and means of characterization. A student must pass 18 credits of courses with a grade C or better. The minor includes one required course (CHME 361 Engineering Materials), and the balance elective courses chosen from menus available on the Chemical and Materials Engineering website (<http://chme.nmsu.edu/academics/minors/materials-engineering/>). No courses may be taken S/U. All prerequisites for the classes must be met or consent of the instructor obtained before enrolling in class.

Required Courses

CHME 361	Engineering Materials	3
Electives		15
Total Credits		18

Materials Engineering - Undergraduate Minor

The Materials Engineering minor at New Mexico State University is part of a materials education program that addresses the growing demand for engineers and scientists with understanding of the wide range of materials, their properties and means of characterization. A student must pass 18 credits of courses with a grade C- or better. The minor elective courses are chosen from list available on the Chemical and Materials Engineering website (<http://chme.nmsu.edu/academics/minors/materials-engineering/>). No courses may be taken S/U. All prerequisites for the classes must be met or consent of the instructor obtained before enrolling in class.

Required Courses

CHME 361	Engineering Materials	3
Electives ¹		15
Total Credits		18

Nuclear Chemical Engineering - Undergraduate Minor

The Nuclear Chemical Engineering minor at New Mexico State University is part of a nuclear education program that addresses the growing demand for engineers and scientists with background in the nuclear industry. A student must pass 18 credits of elective courses with a grade C- or better. The courses are upper division courses. Three elective courses must be selected from the list maintained on the CHME website (<http://chme.nmsu.edu/academics/minors/nuclear-chemeng/>). No courses may be taken S/U. All prerequisites for the classes must be met or consent of the instructor obtained before enrolling in class.

Required Courses

CHME 470	Introduction to Nuclear Energy	3
CHME 471	Health Physics	3
CHME 476	Nuclear Fuel Cycles	3
Electives		9
Total Credits		18

Pre-Law in Intellectual Property - Undergraduate Minor

The Pre-Law Intellectual Property minor at New Mexico State University is part of a pre-law education program that addresses the growing demand for lawyers with a strong understanding of a broad cross-section of STEM subjects. A student must pass 19 credits of courses with a grade C- or better chosen from Pre-Law Intellectual Property minor (<https://chme.nmsu.edu/academics/minors/pre-law-intellectual-property-minor>) page available on the Chemical and Materials Engineering website. No courses may be taken S/U. All prerequisites for the classes must be met or consent of the instructor obtained before enrolling in class.

Required Courses

CHME 449	Intellectual Property for Engineers and Scientists	3
COMM 351	Persuasion Theory and Practice	3
BLAW 316	Legal Environment of Business	3
ENGL 311G	Advanced Composition	3
GOVT 308	Prepping for Law School Admissions Test	1
GOVT 100G	American National Government	3
PHIL 100G	Philosophy, Law and Ethics	3
Total Credits		19

Pre-Medicine Studies- Undergraduate Minor

The Pre-Medical School minor at New Mexico State University is part of a pre-medicine education program that addresses the growing demand for doctors, surgeons, and biomedical researchers with a strong understanding of a broad cross-section of STEM subjects and who model the human body as a series of interacting chemical process units. This minor of study is designed for students seeking a strong pre-med background (for both MCAT prep and program entry prereq completion) or who may be targeting a graduate degree in biomedical engineering. A student must pass 22 credits of courses with a grade C- or better. The minor includes 19 credit hours of required courses, and 3 credit hours of elective courses. No courses may be taken S/U. All prerequisites for the classes must be met or consent of the instructor obtained before enrolling in class.

CHME 305	Transport Operations I: Fluid Flow	3
BIOL 211G	Cellular and Organismal Biology	3
BIOL 211GL	Cellular and Organismal Biology Laboratory	1
BIOL 353	Pre-Professional Human Anatomy	4
BIOL 353 L	Pre-Professional Human Anatomy Laboratory	1
BIOL 354	Physiology of Humans	3
BIOL 354 L	Laboratory of Human Physiology	1
BCHE 395	Biochemistry I	3
Elective		3
Total Credits		22

Civil Engineering

Undergraduate Program Information

The curriculum in civil engineering is designed to provide a broad background and is so arranged that students may, in their senior year, specialize in one or more of the options listed or work in one or more areas of civil engineering. Students may elect to obtain more than one option in civil engineering.

Mission

The mission of the Civil Engineering Department is to offer a high quality and accredited degree that prepares our graduates for professional licensure leading to successful civil engineering careers in industry and government or for success at the graduate level. Toward this end, the Civil Engineering Department will recruit and maintain a diverse, highly skilled faculty.

Program Educational Objectives

In support of the mission, the Civil Engineering Department adopts the following program educational objectives:

1. Prepare our graduates to achieve professional engineering licensure and productivity in a civil engineering setting.
2. Prepare our graduates to be future leaders and public sector employees in civil engineering fields.
3. Prepare our graduates to pursue and complete a graduate level degree.
4. Maintain and further develop a high quality accredited civil engineering program that is competitive with comparable programs throughout the nation.

Program Criteria

The Civil Engineering curriculum is developed based on the program criteria established collaboratively by the Engineering Accreditation Commission (EAC) of ABET Inc. and the American Society of Civil Engineers (ASCE). The curriculum specifically prepares civil engineering students at the baccalaureate level to graduate with the ability to:

1. Apply knowledge of mathematics through differential equations, calculus-based physics, general chemistry, and probability and statistics to assess uncertainty.
2. Analyze and solve problems in various areas of civil engineering.
3. Conduct experiments associated with civil engineering, as well as analyze and interpret the collected data.
4. Design a system, component, or process in various civil engineering contexts considering sustainability.
5. Explain basic concepts related to project management, business, public policy, and leadership.
6. Analyze issues related to professional ethics and explain the importance of professional licensure.

In accordance with the program criteria of ABET and ASCE, the Civil Engineering faculty responsible for teaching design-oriented courses are qualified in their respective professional areas by means of licensure, or a combination of education and design experience. Furthermore, the faculty are given responsibility and sufficient authority to define, revise, implement, and achieve program objectives.

Graduate Program Information

Mission Statement

Provide research-based, post-baccalaureate programs leading to Master of Science (MS) and Doctor of Philosophy (Ph.D.) degrees for students pursuing advanced practice-oriented or academic careers in the areas of structural, geotechnical, water resources, transportation, and environmental engineering.

Vision Statement

The program goal is to enhance social well-being by modernizing civil infrastructure for improved performance, efficiency, reliability, and resilience. Through a combination of coursework plus applied and fundamental research, the program aims to produce graduates capable of developing innovative, sustainable, and cost-effective infrastructure for the next generation.

The Civil Engineering Department offers excellent opportunities for advanced study and professional training in several fields leading to the MSCE, MS ENVE, and the Ph.D. degrees. Students work closely with the faculty on contemporary issues including, but not limited to, ground stabilization, high performance materials, intelligent transportation systems, remote sensing, renewable energy, resilient infrastructure, structural health monitoring, sustainable construction, traffic modeling and simulation, and water treatment and reuse.

The department has excellent facilities including some 15 teaching and/or research laboratories with facilities for mechanical, chemical and biological research. The outstanding feature of the program is the energetic, highly motivated faculty and the low student-faculty ratio. The department currently has several ongoing research projects of various size and scope employing graduate students. Office space is normally provided for those students pursuing an advanced degree. Teaching and research assistantships are available to qualified students.

Students enrolling for graduate work in civil engineering must have received a bachelor's degree in engineering or one of the allied fields. A candidate for the master's degree may choose either a thesis or a non-thesis option. When a student enrolls for the Ph.D., a doctoral committee is formed to assist the student in planning a program appropriate to the student's background and goals and to administer the required examinations. All Ph.D. candidates in civil engineering must have a demonstrated proficiency in English and two research tools. Mutual understanding between the Ph.D. candidate and his or her doctoral committee on the final nature of these two research tools will be on an individual basis.

Combined BS/MS Program

This program option provides students the opportunity to complete a BSCE and MSCE or MS ENVE with 151 credit hours; the normal tracks require 157 credit hours (BS = 127 plus MS = 30). Students accepted into this program follow the normal Civil Engineering undergraduate curriculum during their freshmen, sophomore, and junior level semesters, and the first semester of their senior year. In their final undergraduate semester, students take two graduate courses (> 500) in place of two undergraduate electives (> 450). Alternatively, students may petition for the two undergraduate electives to be counted as substitutes for the two graduate courses. In either case, the courses must be approved by the department head and completed with at least a grade of B. At this point, students receive their BSCE degree and the MSCE or MS ENVE degree

can be completed with 24 credit hours in 2 to 3 semesters for full-time students. Students must apply for admission during the final semester of their junior year and obtain prior approval by the department head before starting this program option.

Degrees for the Department

Civil Engineering - Bachelor of Science in Civil Engineering (p. 544)

Civil Engineering - Master of Science in Civil Engineering (p. 546)

Environmental Engineering - Master of Science in Environmental Engineering (p. 548)

Engineering - Doctor of Philosophy (p. 548)

Minors for the Department

Agricultural Engineering - Undergraduate Minor (p. 544)

Professor David V. Jauregui¹, Department Head

Professor J. Phillip King¹, Associate Department Head

Professors Jauregui¹, Khandan¹, King¹, Martin¹, Newton¹, Reddi¹ (Dean of College of Engineering), Samani¹, White¹ (Emeritus); **Associate Professors** Bandini¹, Bawazir, Cortes, Papelis, Weldon, Xu; **Assistant Professors** Dehghan-Niri, Ray, Zhang¹

P. Bandini, Ph.D. (Purdue) – geotechnical engineering; A. S. Bawazir, Ph.D. (New Mexico State) – agricultural/water resources engineering; D. Cortes, Ph.D. (Georgia Tech) – geotechnical engineering; E. Dehghan-Niri, Ph.D. (SUNY-Buffalo) – structural engineering; D. V. Jáuregui, Ph.D. (Texas-Austin) – structural engineering; N. N. Khandan, Ph.D. (Drexel) – environmental engineering; J. P. King, Ph.D. (Colorado State) – agricultural/water resources engineering; P. T. Martin, Ph.D. (Nottingham, UK) – transportation engineering; C. Newton, Ph.D. (Washington) – structural engineering; L. Papelis, Ph.D. (Stanford) – environmental engineering; T. Ray, Ph.D. (SUNY-Buffalo) – structural engineering; L. N. Reddi, Ph.D. (Ohio State) – geotechnical engineering; Z. Samani, Ph.D. (Utah State) – agricultural/water resources engineering; B. Weldon, Ph.D. (Notre Dame) – structural engineering; K. R. White, Ph.D. (Texas Tech) – structural engineering; P. Xu, Ph.D. (ENGREF, Paris, France) – environmental engineering; Y. Zhang, Ph.D. (Missouri-Columbia) – environmental engineering.

¹ Registered Professional Engineer

C E 109. Computer Drafting Fundamentals
3 Credits (2+2P)

Same as DRFT 109, E T 109, SUR 109.

C E 151. Introduction to Civil Engineering
3 Credits

Problem solving and use of computer software for civil engineering applications.

Prerequisite(s): ENGR 100.

Corequisite(s): MATH 190.

C E 198. Special Topics
1-3 Credits

May be repeated for a maximum of 6 credits.

Prerequisite: consent of department head.

C E 233. Mechanics-Statics

3 Credits

Engineering mechanics using vector methods.

Prerequisites: MATH 192G and cumulative GPA of 2.0.

Corequisite: PHYS 215G.

C E 234. Mechanics-Dynamics

3 Credits

Kinematics and dynamic behavior of solid bodies utilizing vector methods.

Prerequisite(s): C E 233, MATH 192G, PHYS 215G.

C E 256. Environmental Engineering and Science

3 Credits

Principles in environmental engineering and science: physical chemical systems and biological processes as applied to pollution control.

Crosslisted with: E S 256

Prerequisite(s): CHEM 111 and MATH 191G.

C E 256 L. Environmental Science Laboratory

1 Credit

Laboratory experiments associated with the material presented in C E 256. Same as E S 256L.

Corequisite: C E 256.

C E 298. Special Topics

1-3 Credits

May be repeated for a maximum of 6 credits.

Prerequisite: consent of department head.

C E 301. Mechanics of Materials

3 Credits

Stress, strain, and elasticity of materials.

Prerequisite: C E 233.

C E 311. Civil Engineering Materials

3 Credits (2+3P)

Introduction to the structure, physical properties, testing and mechanical behavior of civil engineering materials and components made from these materials.

Prerequisite: C E 301.

C E 315. Structural Analysis

4 Credits (3+3P)

Classical analysis of determinate and indeterminate structures; introduction to modern methods of structural analysis using computer programs.

Prerequisite(s): C E 301.

C E 331. Fluid Mechanics and Hydraulics

3 Credits

Fluid Mechanics and Hydraulics. Fundamentals and theory of fluid mechanics, compressible fluids, flow of incompressible fluids in open and closed conduits. Restricted to: CE majors.

Prerequisite(s): PHYS 215, C E 233.

C E 331 L. Fluid Mechanics and Hydraulics Laboratory

1 Credit

Fundamentals and Theory of Fluid Mechanic, compressible and incompressible flow of fluids in open and closed conduits.

Prerequisite(s)/Corequisite(s): C E 331. Restricted to: C E majors.

C E 355V. Technology and the Global Environment**3 Credits**

A scientific basis for understanding changes in the global environment that result through the complex interactions of natural phenomena and the impacts of the activities of man.

Prerequisites: junior or senior standing, and the general education requirements for math and natural sciences.

C E 356. Fundamentals of Environmental Engineering**3 Credits**

Introduction to water treatment and water pollution and the analysis and design of selected treatment processes.

Prerequisite(s): C E 256.

C E 357. Soil Mechanics**3 Credits (2+3P)**

Engineering properties of soils, consolidation settlement, compaction, water flow through soils, geostatic stresses, soil shear strength, lateral earth pressure, and soil laboratory testing.

Prerequisite(s): C E 160 or GEOL 111G, and C E 301.

C E 365. Intermediate Structural Analysis**1 Credit**

Classical analysis of indeterminate structure; introduction to matrix method of structural analysis.

Prerequisite(s): C E 301 and C E 315.

C E 382. Hydraulic and Hydrologic Engineering**3 Credits**

Analysis and design of hydraulic systems, including pipe networks, open channels, regulating structures, and pumping systems. Surface water and groundwater hydrology, analysis and design. May be repeated up to 3 credits.

Prerequisite(s): C E 331 and C E 331 L.

C E 398. Special Topics**1-3 Credits**

May be repeated for a maximum of 6 credits.

Prerequisite: consent of department head.

C E 430. Environmental Management Seminar II**1 Credit**

Survey of practical and new developments in environmental management field, hazardous and radioactive, waste management, and related health issues, provided through a series of guest lectures and reports of ongoing research. Restricted to: Main campus only. Crosslisted with: CH E 430, E E 430, E S 430, E T 430, I E 430, M E 430 and WERC 430

C E 444. Elements of Steel Design**3 Credits**

Analysis and design of tension members, beams, columns, and bolted and welded connections.

Prerequisite(s)/Corequisite(s): C E 311. **Prerequisite(s):** C E 315.

C E 445. Reinforced Concrete Design**3 Credits**

Design and mechanics of structural reinforced concrete members.

Prerequisite(s)/Corequisite(s): C E 311. **Prerequisite(s):** C E 315.

C E 452. Geohydrology**3-4 Credits (3+1P)**

Origin, occurrence, and movement of fluids in porous media and assessment of aquifer characteristics. Development and conservation of ground water resources, design of well fields. Crosslisted with: E S 452 and GEOL 452.

Prerequisite(s): Junior or Senior.

C E 454. Wood Design**3 Credits**

Theory and design of wood structural members and systems subjected to gravity and lateral loads. Taught every other year, alternates with C E 455, Masonry Design.

Prerequisite(s)/Corequisite(s): C E 311. **Prerequisite(s):** C E 315.

C E 455. Masonry Design**3 Credits**

Theory and design of masonry structural members and systems subjected to gravity and lateral loads. Taught every other year, alternates with C E 454, Wood Design.

Prerequisite(s)/Corequisite(s): C E 311. **Prerequisite(s):** C E 315.

C E 457. Foundation Design**3 Credits (2+3P)**

Application of principles of classical soil mechanics to the design of shallow and deep foundations, and the fundamentals of geotechnical site investigation.

Prerequisite(s): C E 357.

C E 460. Site Investigation**3 Credits (2+2P)**

Investigation and characterization of surficial and subsurface geologic materials and ground water for civil engineering projects. Includes exploration program, drilling and sampling, rock and soil classification and logging, groundwater monitoring, profiles, and preparation of geotechnical reports. Pre/

Prerequisite(s): C E 357.

Corequisite(s): C E 457.

C E 469. Structural Systems**3 Credits**

Design of structural systems for buildings and bridges. May be repeated up to 3 credits.

Prerequisite(s): C E 444 or C E 445 or C E 457.

C E 470. Design of Municipal and Hazardous Waste Landfills**3 Credits**

Solid waste and application of geotechnical engineering principles and methods to the site selection and design of municipal and hazardous waste landfills.

Prerequisite(s): C E 357 and C E 452, or consent of instructor.

C E 471. Transportation Engineering**3 Credits**

Highway and traffic design and systems.

Prerequisite(s): MATH 291.

C E 473. Transportation Analysis**3 Credits**

Transportation Analysis of land-based transportation modes. Crosslisted with: C E 573.

Prerequisite(s): C E 471.

C E 477. Engineering Economics and Construction Management**3 Credits**

Engineering economics, construction and project management.

Prerequisite(s): STAT 371.

Corequisite(s): C E 357.

C E 479. Pavement Analysis and Design**3 Credits**

Covers stresses and deflections in pavement layers, material characterization, flexible and rigid pavement design by AASHTO, and rehabilitation concepts.

Prerequisite(s): C E 357.

C E 481. Civil Engineering Capstone Design**3 Credits**

Culminating multidisciplinary project-oriented capstone design. Ethics, professional development, global issues.

Prerequisite(s)/Corequisite(s): C E 457, C E 471, C E 477. **Prerequisite(s):** C E 356, C E 382, and either C E 444 or C E 445.

C E 482. Hydraulic Structures**3 Credits**

Engineering design of water-regulating structures. Capstone design course. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): C E 477. **Prerequisite(s):** C E 382.

C E 483. Surface Water Hydrology**3 Credits**

Hydrologic cycle and relationships between rainfall and surface water runoff.

Prerequisite: C E 331 or consent of instructor.

C E 485. Design of Earth Dams**3 Credits**

Engineering design applied to site selection, foundation inspection and treatment, hydrology and hydraulics, stability, and seepage analysis. Economic and environmental factors.

Prerequisite(s): C E 357.

C E 498. Special Topics**1-3 Credits**

May be repeated for a maximum of 9 credits.

Prerequisite: consent of department head.

C E 501. Advanced Mechanics of Materials**3 Credits**

Study of stress and strain in two and three dimensions, theories of failure, stress concentrations, unsymmetrical bending, curved beams, beams on elastic foundations, column theories, torsion, thick-wall cylinders. Same as M E 501.

Prerequisites: C E 301, MATH 392.

C E 502. Advanced Mechanics of Steel Structures**3 Credits**

Advanced structural mechanics applicable to steel structures. Includes inelastic behavior, plastic analysis, column and frame stability and torsion.

Prerequisite: C E 444.

C E 503. Special Design and Analysis Program**3-6 Credits**

Design and analysis covering subject matter of an approved 450 undergraduate departmental course plus an additional report or project. Course may be subtitled in the Schedule of Classes. May be repeated once for a total of 6 credits.

Prerequisite: consent of instructor/committee.

C E 504. Advanced Engineering Design**3 Credits**

Advanced engineering design covering subject matter of a selected capstone undergraduate design course plus an additional report or project. May be subtitled.

Prerequisite: consent of instructor/committee.

C E 505. Advanced Mechanics of Concrete**3 Credits**

Advanced structural mechanics applicable to concrete structures. Topics include: nonlinear-inelastic modeling and analysis of reinforced concrete structures, seismic behavior of reinforced concrete structures, and deformation of members under various loads. To be taught along with C E 605.

Prerequisite(s): C E 445.

C E 506. Advanced Soil Mechanics**3 Credits**

Stress and strain analyses in soil, stress paths; drained and undrained shear strengths of granular soils and clays, consolidation, liquefaction, soil improvement.

Prerequisite: C E 457 or consent of instructor.

C E 507. Design of Earth Retaining Structures**3 Credits**

Lateral earth pressure theory, soil-reinforcement interaction, and analysis and design of rigid and flexible earth retaining structures for support of fills and excavations, including retaining walls, mechanically stabilized earth (MSE) walls, sheet pile walls, anchored walls, tiebacks and soil nailing. Pre/

Prerequisite(s): C E 357.

Corequisite(s): C E 457.

C E 508. Advanced Soil Behavior**3 Credits**

The course covers particle-scale phenomena that govern the macro-scale behavior of soils. Topics covered in the class include classical concepts as well as contemporary advances in soil mechanics. The students will develop a fundamental understanding of soil-water interaction, theories of contact level deformation, and mass and energy transport through granular media. Consent of Instructor required.

Prerequisite(s): C E 357 or Instructor Consent.

C E 509. Deep Foundations**3 Credits**

Behavior, analysis and design of pile and pier foundations subjected to axial and lateral loads.

Prerequisite: C E 457 or consent of instructor.

C E 515. Finite Element Methods**3 Credits**

Introduces the finite element method. Topics may include beam, frame, plane stress, plane strain, axisymmetric, and 3-D stress elements. Includes static and dynamic analysis. Uses readily available finite-element software.

Prerequisite: graduate standing or consent of instructor.

C E 530. Environmental Management Seminar I**1 Credit**

Survey of practical and new developments in hazardous and radioactive waste management provided through a series of guest lectures and reports of ongoing research.

C E 531. Open Channel Hydraulics**3 Credits**

Theoretical and applied hydraulics of open channels, with emphasis on nonuniform flow, rapidly varied flow, and wave formation.

Prerequisite: C E 382 or consent of instructor.

C E 543. Advances in Concrete Technology**3 Credits**

Advanced topics related to concrete materials, including mixture proportioning with nontraditional admixtures, roles and side effects of concrete admixtures, durability of concrete, nondestructive testing of concrete, creep, and shrinkage.

Prerequisites: C E 311 and C E 445.

C E 544. Advanced Design of Steel Structures**3 Credits**

Connection design; beam, column, and beam-column stability and design; and seismic frame design.

Prerequisites: C E 444 and C E 468.

C E 545. Advanced Concrete Design**3 Credits**

Prestressed concrete, ultimate strength theory, design of shell structures.

Prerequisites: C E 445 and C E 468.

C E 547. Bridge Engineering**3 Credits**

Topics related to prestressed concrete, reinforced concrete and steel bridge design according to the AASHTO specifications; bridge analysis and evaluation. May be repeated for a maximum of 6 credits.

Prerequisite: C E 469 or consent of instructor.

C E 550. Environmental Management Seminar II**1 Credit**

Survey of practical and new developments in hazardous and radioactive waste management provided through a series of guest lectures and reports of ongoing research.

C E 554. Wood Design**3 Credits**

Theory and design of wood structural members and systems subjected to gravity and lateral loads. Design project required. Taught every other year, alternates with C E 555 - Masonry Design.

C E 555. Masonry Design**3 Credits**

Theory and design of masonry structural members and systems subject to gravity and lateral loads. Design project required. Taught every other year, alternates with C E 554 - Wood Design.

C E 557. Water Resources Development**3 Credits**

Students function as members of a consulting panel and prepare reports on major water resources development problems. Political, financial, and social aspects of water resources development are considered as well as scientific and technical details. Background: C E 450.

Corequisite: C E 483, or C E 482.

C E 571. Structural Dynamics**3 Credits**

Response of elastic structure to dynamic loading. Moving load, earthquake and blast loading.

Prerequisite: C E 468 or consent of instructor.

C E 572. Earthquake Engineering**3 Credits**

Earthquake characteristics; seismic loads; elastic and inelastic response; analysis and design of buildings for earthquakes.

Prerequisites: graduate standing and consent of instructor.

C E 573. Transportation Analysis**3 Credits**

Transportation analysis of land-based transportation modes. Crosslisted with: C E 473.

Prerequisite(s): C E 471.

C E 577. Advanced Pavement Analysis**3 Credits**

Review of advanced constitutive models for pavement materials and their implementation in finite element analysis.

Prerequisite(s): C E 479 and C E 515 or consent of instructor.

C E 579. Ground Improvement**3 Credits**

The objective of this course is to introduce common ground improvement techniques, including mechanical (compaction, soil reinforcement, preloading and accelerated consolidation) and chemical (cementing, ion-replacement, polymer bonding) stabilization methods, as well as seepage and dewatering. Emphasis will be placed on developing an understanding of the underlying physical and chemical processes involved in each case.

Prerequisite(s): C E 357.

C E 581. Ground Water Hydrology**3 Credits**

Mathematical treatment of water flow in porous media. Emphasis on hydraulics of water movement, including pumping and recharge wells, drainage, and water quality.

Prerequisites: MATH 392, G EN 452, and C E 382, or consent of instructor.

C E 582. Statistical Hydrology**3 Credits**

Application of statistical techniques to hydrologic data, including distributions, hypothesis testing, linear models, non-parametrics, and time-series and stochastic models.

C E 585. Slope Stability Analysis and Design**3 Credits**

Design of earth slopes, causes of instability, limit equilibrium methods, slope reinforcement (geosynthetics soil nailing, tiebacks), seismic analysis, rock slope stability. Consent of instructor required.

C E 586. Geotechnical Earthquake Engineering**3 Credits**

Earthquake origin and geology; wave propagation; dynamic soil properties; ground response analysis; local site effects; design ground motion; liquefaction assessment. Consent of Instructor required.

Prerequisite(s): C E 506 or consent of instructor.

C E 596. Special Topics**1-3 Credits**

May be repeated for a maximum of 6 credits.

Prerequisite: consent of department head.

C E 598. Special Research Programs**1-3 Credits**

Individual investigations either analytical or experimental. May be subtitled. Maximum of 3 credits per semester.

C E 599. Master's Thesis**15 Credits**

Thesis.

C E 600. Doctoral Research**1-15 Credits**

Research.

C E 604. Advanced Engineering Topics**3 Credits**

In depth study of a topic at the forefront of environmental engineering & science. Journal papers will be critically reviewed and students will be asked to write an analysis of the topic and present their thoughts orally.

C E 615. Advanced Finite Element Methods**3 Credits**

Finite element method with emphasis on stress analysis. May include development and use of plane stress, plane strain, and 3-D and shell elements. Includes static, dynamic, and nonlinear analysis.

Prerequisite: graduate standing.

C E 645. Prestressed Concrete**3 Credits**

Behavior of prestressed concrete; design of statically determinate and indeterminate structures; estimation of prestress loss; flexure and shear strength; deflections and stress control; composite behavior and design.

Prerequisites: graduate standing and consent of instructor.

C E 671. Scientific Approaches to Transportation Research**3 Credits**

This course addresses professional and ethical practices for doing, managing, and evaluating research programs and projects. Students will learn about the critical elements in the research process, turning research objectives into research hypotheses, testing of the hypotheses and evaluation of the results. The course will look at the scientific method as well as the management and handling of data as it applies to transportation research. Consent of Instructor required.

Prerequisite(s): C E 471.

C E 682. Topics in Hydrodynamics II**3 Credits**

Selected topics in flow-in open channels, flow-through porous media, and transport of sediments and contaminants. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

C E 698. Special Research Programs**1-3 Credits**

May be subtitled. May be repeated for a maximum of 9 credits.

C E 700. Doctoral Dissertation**15 Credits**

Dissertation.

Civil Engineering - Bachelor of Science in Civil Engineering Requirements (127 Credits)

In addition to the university requirements for graduation, all students including transfers must satisfy the requirements contained in the academic policies for the NMSU College of Engineering. Students must have a 2.0 grade-point average in all departmental courses and all prerequisites and co-requisites must be taken as required. If a student takes a class and a co-requisite for that class at the same time and does not achieve a grade of C- or better in the co-requisite, the student may take no further classes for which the course or the co-requisite are prerequisite. A student who completes a class three times without achieving a grade of C- or better will be dismissed from the Civil Engineering program, and not allowed to take any Civil Engineering courses from the department.

Concentrations

Select from the following concentrations:

Environmental

General	
Geotechnical	
Structural	
Water Resources	
Total Credits	127

¹ See the required courses (p. 47) section of the catalog for a full list of courses.

² Students must complete 15 total credits from Area IV and V, with at least six credits from each area, including ECON 251G Principles of Macroeconomics or ECON 252G Principles of Microeconomics as an Area IV course. In addition, students must complete 6 total credits of Viewing a Wider World (VWW) electives. See the required courses (p. 47) section of the catalog for a full list of courses.

³ Students are required to take three credits of capstone design. The required capstone design course depends on the area of concentration as follows: C E 469 Structural Systems (structural); C E 482 Hydraulic Structures (water resources); C E 485 Design of Earth Dams (geotechnical); and ENVE 456 Environmental Engineering Design (environmental). For the general option, students may take any one of the four capstone design courses.

Concentration: Environmental (9 credits)**Required Elective Courses**

Select two from the following:	6
--------------------------------	---

ENVE 450	Aquatic Chemistry
ENVE 451	Unit Processes/Operation of Water Treatment
ENVE 452	Unit Processes/ Operation of Wastewater Treatment

Civil Engineering - Master of Science in Civil Engineering

In support of the mission and vision statements for the graduate program, the Civil Engineering Department adopts the following goals for the Master of Science (MS) degree:

1. Prepare students to fulfill the academic prerequisites specified by the Americans Society of Civil Engineers (ASCE) for Licensure and Professional Practice in Civil Engineering.

2. Prepare students to attain the Body of Knowledge specified by ASCE necessary for entry into the practice of civil engineering at the professional level.
3. Prepare students in conducting applied research in areas relevant to the practice of civil engineering.
4. Prepare students for advanced graduate studies towards a terminal degree.

Students may choose from the geotechnical, structural, or water resources engineering options, requirements of which are specified below. Exceptions to these requirements must be approved by the head of the department. Further information related to the MS degree may be found under the Academic Programs of Study (p. 53) section of the catalog.

Option: Geotechnical Engineering Thesis Option

Background Courses

C E 357	Soil Mechanics
C E 457	Foundation Design
GEOL 111G	Introductory to Geology (or higher-level courses)
C E 445	Reinforced Concrete Design (or higher-level courses based on ACI)

Core Courses

C E 506	Advanced Soil Mechanics
C E 509	Deep Foundations
C E 585	Slope Stability Analysis and Design

Optional Courses

Select two from the following: ¹		6
C E 485	Design of Earth Dams	
C E 577	Advanced Pavement Analysis	
C E 581	Ground Water Hydrology	

Select two from the following:

C E 479	Pavement Analysis and Design
C E 515	Finite Element Methods (or similar course)
C E 577	Advanced Pavement Analysis
C E 586	Geotechnical Earthquake Engineering

Select 3 credits from courses outside the area or department ²

A ST 505	Statistical Inference I (or similar statistics course)
C E 543	Advances in Concrete Technology
C E 545	Advanced Concrete Design
C E 596	Special Topics
C E 503	Special Design and Analysis Program
Select 3 credits from mathematics, numerical methods, or programming (450 or higher)	

Research Credits

C E 599	Master's Thesis ³	6
Total Credits		30

¹ Can be taken as C E 503 Special Design and Analysis Program.
A maximum of 6 credits of C E 503 Special Design and Analysis Program are counted toward the Masters Degree program.

² Geological Sciences or Geophysics course (For example: GEOL 470 Structural Geology).

³ A maximum of 6 credits are counted toward the Masters Degree program.

Notes:

1. The optional courses outside the area or department should be previously approved by the academic advisor or student's Graduate Committee.
2. International students must be registered at least 9 credits per semester.
3. International students may be required to take English language courses to show proficiency in English.

Total credits needed are 24 credits of coursework and 6 credits of Master's Thesis research.

Option: Structural Engineering Thesis Option

Background Courses

C E 315	Structural Analysis
C E 444	Elements of Steel Design (based on AISC)
C E 445	Reinforced Concrete Design (based on ACI)

Core Courses 15

C E 501	Advanced Mechanics of Materials
C E 515	Finite Element Methods
C E 544	Advanced Design of Steel Structures
C E 545	Advanced Concrete Design
C E 571	Structural Dynamics

Optional Courses

Select three from the following: 9

C E 502	Advanced Mechanics of Steel Structures
C E 504	Advanced Engineering Design
C E 509	Deep Foundations
C E 543	Advances in Concrete Technology
C E 547	Bridge Engineering
C E 554	Wood Design
C E 555	Masonry Design
C E 572	Earthquake Engineering
C E 577	Advanced Pavement Analysis
C E 615	Advanced Finite Element Methods
C E 645	Prestressed Concrete

Research Credits

C E 599	Master's Thesis ¹	6
Total Credits		30

¹ A maximum of 6 credits are counted toward the Master's Degree program.

Total credits needed are 24 credits of coursework and 6 credits of Master's Thesis research.

Option: Water Resources Engineering Thesis Option

Prerequisite Courses

Core courses	12	
Statistics	3	
Area of Interest Courses	9	
C E 599	Master's Thesis	6
Total Credits		30

Non-Thesis Option

Requirements

Core courses	12
Statistics	3
Area of Interest Courses	15
<hr/>	
Total Credits	30

Foundation Requirements

1. ABET- Accredited BS in Civil, Agricultural, Geological Engineering, or closely related field or equivalent (as per existing CAGE Department regulations)
2. One course in surface water hydrology
3. One course in hydrogeology or geohydrology
4. At least three semesters of hydraulic and hydraulic design

Core Courses

Core Courses 12

C E 531	Open Channel Hydraulics
C E 557	Water Resources Development
C E 581	Ground Water Hydrology
C E 582	Statistical Hydrology

Statistics 3

A ST 505	Statistical Inference I (or advanced statistics class if student is qualified)
----------	--

Total Credits 15

Area of Interest Courses (Flexible)

Agricultural/ Civil/ Environmental Engineering

A EN 459	Design of Water Wells/Pumping Systems
A EN 475	Soil and Water Conservation
A EN 478	Irrigation and Drainage Engineering
C E 482	Hydraulic Structures
C E 483	Surface Water Hydrology
C E 485	Design of Earth Dams
C E 503	Special Design and Analysis Program
C E 504	Advanced Engineering Design
C E 682	Topics in Hydrodynamics II
ENVE 557	Surface Water Quality Modeling
ENVE 630	Fate and Transport of Environmental Contaminants
GEOG 581	System Design for Geographic Information Science and Technology (GIS &T)
SOIL 652	Advanced Soil Physics

Modeling/ Fluid Mechanics

M E 530	Intermediate Fluid Mechanics
M E 533	Computational and Theoretical Fluid Mechanics
M E 580	Engineering Analysis II

Management/Optimization

I E 533	Linear Programming
I E 534	Nonlinear Programming
I E 535	Discrete Optimization

Institutional Aspects

BLAW 527	Negotiation and Business Dispute Resolution
----------	---

Approved Electives in College of Engineering: A ST, AEEC, GEOG, GEOL, MATH, STAT, and SOIL (must be approved by the Advisor and Committee Members).

Engineering - Doctor of Philosophy

Concentration: Civil Engineering

In support of the mission and vision statements for the graduate program, the Civil Engineering Department adopts the following goals for the Doctor of Philosophy (Ph.D.) degree:

1. Prepare students to develop and conduct fundamental and applied research to generate innovative and original solutions for civil engineering problems.
2. Prepare students for research-based professional careers or academic careers in the civil engineering discipline.
3. Develop culture of research/teaching scholarship among students.

Students may specialize in environmental, geotechnical, structural, transportation, or water resources engineering. Further information related to the Ph.D. degree may be found under the Academic Programs of Study (p. 53) section of the catalog.

Additional Requirements

PhD candidates in the College of Engineering, who have successfully completed their PhD Qualifier Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

Paper #1: An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student's doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.

Paper #2: An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for the Web of Science. Alternatively, one conference paper accepted or published in a national or international conference proceedings.

Environmental Engineering - Master of Science in Environmental Engineering

Environmental engineering at New Mexico State University provides unique educational and research opportunities at the graduate level in the fields of water quality, water treatment, water pollution control, wastewater treatment reclamation and reuse, industrial, hazardous and solid waste management, groundwater treatment, air pollution control; waste minimization and pollution prevention. Therefore, course offerings have been developed to emphasize basic engineering and scientific principles, as well as design and application of environmental engineering unit operations and processes. Special problem and thesis research are closely matched with faculty expertise and the programs and professional goals of the graduate students. Study and research programs are specifically designed for individual students, taking advantage of not only the program capabilities, but complementing activities of the university as a whole, the student's professional experience and work environment.

Graduate students satisfy degree requirements in environmental engineering by completing specific core course work. Course work in the graduate program includes:

- water and wastewater treatment,
- solid and hazardous waste systems design,
- environmental chemistry,
- environmental microbiology,
- environmental contaminant analysis,
- industrial pollution control,
- fate and transport of pollutants in engineered and natural systems and water quality in surface water and groundwater systems.

Additional topics of interest to the students are covered through special topics classes and by courses taught outside of the College of Engineering.

The MS program requires either a thesis or a non-thesis practice oriented experience. The non-thesis option is designed for students that are working full time in engineering practice, but is also available to other students interested in pursuing a non-thesis option. The thesis option consists of a minimum of 30 semester credit hours, including 6 credit hours of thesis. Students who are working full time in engineering practice may apply for the non-thesis option. This option consists of 30 semester credit hours of which up to 3 credit hours can be awarded for a professional engineering design experience and up to 6 credit hours can be awarded for an engineering practicum (ENVE 598 Special Research Programs). Transfer credit for courses taken elsewhere is evaluated on an individual basis. Up to six semester hours of graduate level courses taken may be used to satisfy MS degree requirements provided that the credits were not used toward another degree.

Required Curriculum

The graduate environmental engineering program of the Civil Engineering Department expects all MS and Ph.D. students to meet certain requirements in pursuit of an advanced degree. Some of these requirements are related to the quantity, level and quality of coursework. This Graduate Catalog details what is expected as a minimum for graduation, but it is up to the student and his/her advisor and graduate committee to determine the plan of study for the student. The student and his/her advisor will create this program of study in the first semester of graduate work.

Students desiring to work toward an advanced degree in environmental engineering must have completed undergraduate preparation similar

to that required for a Bachelor of Science degree in an ABET accredited engineering program or must have adequate background, as determined by the graduate faculty of the program. The program administrator will approve exceptions to these requirements.

The environmental engineering faculty will form a committee for every entering student. The faculty will evaluate the student's record and determine which deficiencies and/or core courses, if any, are needed by the student. For all professional non-thesis programs, the department head will review the committee's decision. In order to provide consistency among plans of study for graduate students and to set a minimum set of core or pertinent courses, it is the policy of the graduate environmental engineering program that each graduate student will fulfill the following course requirements (or equivalent).

Required Background Courses

The following courses may be required if the student did not take a similar course at the undergraduate level, as negotiated with the general faculty committee.

Background Courses

C E 356	Fundamentals of Environmental Engineering
C E 382	Hydraulic and Hydrologic Engineering
ENVE 456	Environmental Engineering Design

Core Courses 12

ENVE 550	Aquatic Chemistry
ENVE 551	Unit Processes/Operation of Water Treatment
ENVE 552	Unit Processes/Operation of Wastewater Treatment
ENVE 557	Surface Water Quality Modeling

Thesis or Professional Experience for MS students 6

ENVE 598	Special Research Programs ¹
or ENVE 599	Master's Thesis

Dissertation, Research Tools for Ph.D. Students 0

Select a minimum from two research tools (3 credits each)	
Total Credits	18

¹ ENVE 598 Special Research Programs: practicum for students pursuing the non-thesis option. ENVE 599 Master's Thesis: required for students pursuing the thesis option.

Professional Development Electives for the Non-Thesis Option (Outside the College of Engineering)

MS program: A minimum of six credits hours in graduate-level communications, management, economics and/or other relevant disciplines. These courses will be selected by the student and must be approved by the environmental engineering faculty (6 credits).

Elective Courses

Select one from the following:		3
A EN 459	Design of Water Wells/Pumping Systems	
C E 557	Water Resources Development	
E S 462	Sampling and Analysis of Environmental Contaminants	

ENVE 630	Fate and Transport of Environmental Contaminants
----------	--

Total Credits	3
---------------	---

Electrical and Computer Engineering Undergraduate Program Information

The undergraduate program of the Klipsch School is accredited by the Engineering Accreditation Commission of ABET, Inc., and stresses the development of analytical tools and physical concepts required to prepare students for immediate employment or graduate study. The program is flexible, allowing students to choose elective coursework towards concentrations in microelectronics and computers, communications and signal processing, control and power, or electromagnetics and photonics.

Graduate Program Information

The Klipsch School of Electrical and Computer Engineering offers graduate work leading to the Master of Science and Doctor of Philosophy degrees. Areas of emphasis for masters and doctoral students are

- communications,
- computer engineering,
- control systems,
- digital signal processing,
- electromagnetics,
- electric energy systems,
- photonics, and
- microelectronics/VLSI.

Research in the above areas currently being conducted by the faculty ensures that doctoral candidates will work on the frontier of knowledge in these areas. The graduate programs are intended to provide broad graduate-level training in electrical engineering. In addition, appropriate courses in computer science, industrial engineering, mathematics, physics and business management may be integrated into a graduate student's program of study.

Students desiring to work toward an advanced degree in electrical engineering must have completed undergraduate preparation substantially equivalent to that required for the Bachelor of Science in Electrical Engineering degree at this institution. For students with undergraduate degrees in other disciplines, see below. For further information on the Klipsch School of Electrical and Computer Engineering, please consult the web page <http://www.ece.nmsu.edu/>.

Research Facilities and Highlights

The Center for Telemetry and Telemetering hosts the Manuel Lujan, Jr. Space Tele-Engineering Program and the Frank Carden Chair for Telemetry and Telemetering. Faculty and staff in the Center are involved in education and research programs focusing on

- telecommunications,
- communication theory,
- coding and information theory,
- wireless networks,
- digital signal processing,
- optical and radio frequency communications, and

- digital image processing.

The Center has several major research sponsors including NASA, the Department of Defense, and the National Science Foundation. The director of the Center and the Frank Carden Chair is Professor Dr. Charles Creusere.

The Advanced Speech and Audio Processing Laboratory is used for both teaching and research in digital signal processing (DSP). Current research areas include

- speaker recognition,
- signal enhancement,
- low-bit rate coding,
- embedded DSP, and
- GPU-based pattern recognition for speech processing.

Research sponsors for the laboratory include Air Force Research Laboratories, Army Research Laboratory, National Geospatial Intelligence Agency, Freescale Semiconductor, IBM, Motorola, National Science Foundation, and Texas Instruments. The director of the laboratory is Dr. Phillip L. De Leon.

The New Mexico State University R.L. Golden Particle Astrophysics Lab (PAL) is dedicated to measuring and interpreting cosmic ray spectra in an effort to better understand the structure of our universe. Recent measurements of the galactic positron and electron spectra have connections to the dark matter mystery and to the identification of sources of cosmic rays. Additional studies of solar particles (measured along with cosmic rays) will help in the understanding of how solar eruptions affect the earth. The director of PAL is Dr. Steven Stochaj.

The Electromagnetics (EM) and Microwave Laboratory is used for both teaching and research in electromagnetic fields. Current research areas include

- propagation through dispersive media (soil, seawater, foliage, biological tissues),
- UWB radar and remote sensing system analysis and design,
- antenna analysis, synthesis, and design,
- bio-electromagnetics,
- brain mapping,
- computational physics,
- electromagnetic interference and compatibility,
- high performance computing, and
- nondestructive evaluation.

Research sponsors for the laboratory include American Heart Association, Department of Defense, Los Alamos National Laboratory, NASA, NSF, National Institutes of Health, Sandia National Laboratories, and White Sands Missile Range. The Director of the Electromagnetics and Microwave Laboratory is Dr. Kwong T. Ng.

New Mexico State University's program in Electric Utility Management (EUMP) is sponsored by a group of public and private electric utility companies and industrial organizations and hosts the PNM Chair for Utility Management and The Kersting Professorship. The Master of Science in Electrical Engineering degree program includes course work in public utilities regulation and is designed to prepare the student for a future engineering management position in the electric utility industry. An industry advisory committee provides the vital connecting link between

the electric utility industry and the university, so that a coordinated effort may be achieved in realizing the following program objectives:

1. to provide a program of study at the graduate level in the planning, operation, and management of electric power generation, transmission, distribution, and utilization; and the integration of renewable energy and storage;
2. to supply the electric utility industry with the highest caliber of new engineering and management talent; and
3. to provide the university with the required financial and technical support to ensure a quality program.

In addition, faculty in EUMP work with M.S. and Ph.D. students to conduct funded research sponsored by Sandia National Laboratories, EPRI, NSF, DOE, CEC and the electrical utility industry. Much of the current research is focused on renewable energy integration, protection, advanced control and optimization, and customer driven microgrids. Laboratory facilities are available in the El Paso Electric Power Systems laboratory. The program works closely with the Institute for Energy and Environment (IEE) and with Southwest Technology Development Institute (SWTDI) which host the solar energy experiment station. The director of the EUMP and PNM Chair for Utility Management is Dr. Satish Ranade.

Faculty and students in the VLSI Laboratory are involved in the design and analysis of analog and mixed-signal microelectronic circuits and systems. Current research areas include

- wireless bio-circuits and sensors;
- green computing;
- intelligent sensing, sigma-delta sensing;
- low-voltage, low-power circuits;
- high performance operational amplifiers and operational transconductance amplifiers;
- energy harvesting and power management circuits; and
- analog machine vision and image processing.

Research sponsors include the National Science Foundation, Los Alamos National Laboratories and Agilent technologies. The director of the VLSI Laboratory is IEEE Fellow Dr. Jaime Ramirez-Angulo.

The Photonics program at NMSU offers unique opportunities to undergraduate and graduate students interested in pursuing a career in electro-optics, applied optics, photonics, or optical engineering by combining the optics resources of the Klipsch School and the Physics Department. Most of the optics classes are cross-listed in the two departments. The Klipsch School's Electro-Optics Research Laboratory (EORL) provides a variety of research opportunities in areas such as

- multispectral and polarimetric imaging,
- free-space optical communications,
- adaptive optics,
- nanophotonics and
- integrated electro-optic sensors and systems.

Sponsors include the Air Force Office of Scientific Research, Sandia National Laboratories, Air Force Research Laboratory, Army Research Laboratory, NASA, National Geospatial-Intelligence Agency and the National Science Foundation. SPIE Fellow Dr. David G. Voelz is the director of the EORL and NMSU's Photonics program.

The Computer Networking Lab (CNL) supports teaching and research in Internet and wireless sensor networks. The mission of CNL is to provide

students with the opportunity to do cutting-edge research that has high practical relevance. Currently, research projects in CNL include secure data dissemination in wireless sensor networks, solar-powered sensor networks, and RFID sensor networks. The major research sponsors of CNL include US Army, DHS, Intel, Los Alamos National Lab, and Sandia National Lab. CNL is directed by Dr. Hong Huang.

Students and faculty associated with the Performance Evaluation and Architecture Research Laboratory (PEARL) conduct research in the areas of

- performance modeling and simulation techniques,
- micro-architecture power optimization,
- performance analysis and optimization of large-scale scientific applications, and
- heterogeneous HPC computing for field-deployable systems.

PEARL sponsors include the Army Research Labs (ARL), High Performance Computing Research Center (AHPARC), Sandia National Laboratories, and Los Alamos National Laboratories. The laboratory's director is Dr. Hameed Badawy.

The Rio Grande Institute for Soft Computing (RioSoft) is committed to serving private-sector and U.S. government needs in researching and developing intelligent decision-support systems and tools that aid in many aspects of strategic decision-making. Soft computing which includes fuzzy logic, neural networks and evolutionary computation are used for modeling, analysis and control of complex dynamical processes in various software-hardware integrated architectures. In addition RioRoboLab, a NASA Ames funded laboratory, provides facilities for research and development of intelligent autonomous and semi-autonomous systems focusing on advanced concepts of energy harvesting and energy scavenging from ambient energy sources. Research sponsors include the Defense Threat Reduction Agency, Defense Advanced Research Projects Agency, Los Alamos National Laboratory and NASA. The director of RioSoft and RioRob Lab is Dr. Nadipuram (Ram) Prasad.

Support for Graduate Students

A number of teaching assistantships, research assistantships and fellowships are available. Teaching assistants are recommended by individual faculty for selection by the ECE Department's Graduate Studies Committee. International students must pass university screening prior to being eligible for selection as a TA. Nominations for new TAs are made by the advisor after a student is admitted. Research assistants are hired directly by the faculty member who has received a contract or grant for research.

The College of Engineering awards graduate scholarships and fellowships on behalf of Electrical and Computer Engineering. These include:

- the MIT/Lincoln Laboratory Fellowship,
- the Paul and Valerie Klipsch Grad Scholarship,
- the Admiral Paul Arthur Grad Scholarship, and
- the Barry Neil Rappaport Grad Scholarship.

Applications can be completed on-line at <https://scholarships.nmsu.edu/>. The priority deadline for the Scholar Dollar\$ is March 1st. The Electrical Utility Management Program has a limited number of fellowships for students interested in pursuing master's degrees in electrical energy systems.

Admission

Prospective graduate students for the Master of Science or Doctor of Philosophy in Electrical Engineering must first meet the entrance requirements of the Graduate School. The prospective US graduate student should make formal application to the Graduate Student Services office (<http://gradschool.nmsu.edu>). International graduate students must start with the Admissions Office (<http://international.nmsu.edu/admissions.html>). Official transcripts from all undergraduate and graduate institutions must be sent directly to the Graduate School. In addition, the student must arrange to have an official copy of the GRE (Graduate Record Examination) General Test scores sent to the Graduate School. International students must also submit their TOEFL (Test of English as a Foreign Language) scores. If the applicant meets the Graduate School's minimum requirements, the application is sent to the Klipsch School's Graduate Studies Committee for review. U.S. residents are given every chance of being successful in the pursuit of a graduate degree. If they do not meet the requirements of the Klipsch School, they can enter the Graduate School as "undeclared" where they must demonstrate competence in two or more graduate-level E E courses before they re-apply.

Requirements for Students Without BSEE Degree or Equivalent

Students without a BSEE degree or equivalent preparation will be expected to take classes covering the core knowledge required in our BSEE program. This includes mathematics through differential equations and basic engineering physics. The student's graduate advisor will prepare an individualized deficiency schedule, based on the student's academic background and work experience.

The following course from our undergraduate program will be considered deficiencies for students without a BSEE

E E 100	Introduction to Electrical Engineering	4
E E 112	Embedded Systems	4
E E 200	Linear Algebra, Probability and Statistics Applications	4
E E 212	Introduction to Computer Architecture and Organization	4
E E 230	AC Circuit Analysis and Introduction to Power Systems	4
E E 240	Multivariate and Vector Calculus Applications	3
E E 312	Signals and Systems I	3
E E 314	Signals and Systems II	4
E E 351	Fields and Waves	4
E E 380	Semiconductor Devices and Electronics	4

Degrees for the Department

Electrical Engineering - Bachelor of Science in Electrical Engineering (p. 559)

Electrical Engineering - Master of Science in Electrical Engineering (p. 562)

Engineering - Doctor of Philosophy (p. 561)

Minors for the Department

Computer Engineering - Undergraduate Minor (p. 559)

Electrical Engineering - Undergraduate Minor (p. 563)

The Klipsch School of Electrical and Computer Engineering

Professor, Satish Ranade, Department Head

Associate Professor, Paul Furth, Associate Department Head

Professor, Steve Stochaj, Associate Department Head

Professors Borah, Creusere, DeLeon, Ng, Ramirez-Angulo, Ranade, Stochaj, Voelz; **Associate Professors** Boucheron, Brahma, Cho, Dawood, Furth, Huang, Petersen, Prasad; **Assistant Professors** Badawy, Mitchell, Tang; **College Assistant Professors** Boehmer; **Emeritus Professors** Carden, Giles, Sheila Horan, Stephen Horan, Johnson¹, Jordan, Kersting, Ludeman, Merrill, Reinfelds, Smolleck¹, Steelman¹, Taylor

¹ Registered Professional Engineer (NM)

E E 100. Introduction to Electrical Engineering

4 Credits (3+3P)

Introduction to analog (DC) and digital electronics. Including electric component descriptions and equations, Ohm's law, Kirchhoff's voltage and current laws, ideal op-amp circuits, Boolean algebra, design of combinational and sequential logic circuits and VHDL or VERILOG.

Prerequisite(s): C- or better in MATH 190.

E E 109. The Engineering of How Things Work

4 Credits (3+3P)

This class provides Integrated Learning Community students with an introduction to various aspects of engineering.

E E 112. Embedded Systems

4 Credits (3+3P)

Introduction to programming through microcontroller-based projects. Extensive practice in writing computer programs to solve engineering problems with microcontrollers, sensors, and other peripheral devices.

Prerequisite(s): C- or better in E E 100.

E E 161. Computer Aided Problem Solving

4 Credits (3+3P)

Introduction to scientific programming. Extensive practice in writing programs to solve engineering problems. Items covered will include: loops, input and output, functions, decision statements, and pointers. Pre/

Corequisite(s): MATH 190G.

E E 162. Digital Circuit Design

4 Credits (3+3P)

Design of combinational logic circuits based on Boolean algebra. Introduction to state machine design. Implementation of digital projects with hardware description language.

Prerequisite(s): C or better in E E 161 and MATH 190G.

E E 200. Linear Algebra, Probability and Statistics Applications

4 Credits (3+3P)

The theory of linear algebra (vectors and matrices) and probability (random variables and random processes) with application to electrical engineering. Computer programming to solve problems in linear algebra and probability.

Prerequisite(s): C- or better in E E 112 and MATH 192G.

E E 201. Electric Circuit Analysis

3 Credits

Electric component descriptions and equations. Kirchhoff's voltage and current laws, formulation and solution of RLC network equations using time domain concepts. For nonmajors only. Minimum 2.0 GPA.

Prerequisite(s): C or better in MATH 192G.

E E 212. Introduction to Computer Architecture and Organization

4 Credits (3+3P)

Introduction to computer architecture and performance analysis techniques. Design and optimization of systems such as personal mobile devices and cloud computing systems.

Prerequisite(s): C- or better in E E 112 and MATH 190G.

E E 230. AC Circuit Analysis and Introduction to Power Systems

4 Credits (3+3P)

Electric component descriptions and equations; complete solutions of RLC circuits; steady-state analysis of AC circuits; introduction to frequency response techniques; introduction to power systems in the steady-state. May be repeated up to 4 credits. Restricted to: E E majors.

Prerequisite(s): C- or better in E E 100, PHYS 215G and MATH 192G.

E E 240. Multivariate and Vector Calculus Applications

3 Credits

Vector algebra, cylindrical and spherical coordinates, partial derivatives, multiple integrals. Calculus of vector functions through electrostatic applications. Divergence, gradient, curl, divergence theorem, Stokes's theorem, Coulomb's Law, Gauss's Law, electric field, electric potential. Applications in Matlab.

Prerequisite(s): C- or better in MATH 192G and E E 112.

E E 260. Embedded Systems

4 Credits (3+3P)

Applications of microcontrollers, FPGAs, interfaces and sensors. Introduction to Assembly language programming.

Prerequisite(s): C or better in E E 162.

E E 280. DC and AC Circuits

4 Credits (3+3P)

Electric component descriptions and equations; Kirchhoff's voltage and current laws; formulation and solution of network equations for dc circuits; ideal op-amp circuits. Complete solutions of RLC circuits; steady-state analysis of ac circuits, ac power; introduction to frequency response techniques.

Prerequisite(s): C or better in MATH 192G and PHYS 216G.

E E 300. Cornerstone Design

2 Credits

Application and realization of engineering principles to a guided team-based design project. Formulation and implementation of test procedures, evaluation of alternate solutions and oral and written communication of the design and test results. May be repeated up to 6 credits. Restricted to: E E majors. Restricted to Las Cruces campus only.

Prerequisite(s): C- or better in E E 212 and E E 230.

E E 310. Engineering Analysis II

3 Credits

Vector algebra, cylindrical and spherical coordinates, partial derivatives, multiple integrals. Calculus of vector functions through electrostatic applications. Divergence, gradient, curl, divergence theorem, Stoke's theorem, Coulomb's Law, Gauss's Law, electric field, electric potential. Application of Matlab. Restricted to: E E majors.

Prerequisite(s): C- or better in E E 210 and MATH 291G.

E E 312. Signals and Systems I**3 Credits**

Continuous and discrete time signals and systems. Linear, time-invariant systems. Fourier series, continuous and discrete time Fourier transforms. Time and frequency characterization of signals and systems. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 392. Prerequisite(s): C- or better in E E 210 and E E 280.

E E 314. Signals and Systems II**4 Credits (3+3P)**

Introduction to communication systems including amplitude, frequency, and pulse-amplitude modulation. Introduction to control systems including linear feedback systems, root-locus analysis, Nyquist criterion. Introduction to digital signal processing including sampling, digital filtering, and spectral analysis. May be repeated up to 4 credits.

Prerequisite(s): C- or better in E E 312 and MATH 392.

E E 330. Environmental Management Seminar I**1 Credit**

Survey of practical and new developments in hazardous and radio-active waste management provided through a series of guest lectures and reports of ongoing research. Restricted to: Main campus only. Crosslisted with: C E 330, G EN 330, I E 330, M E 330, WERC 330, A EN 330 and CH E 330

E E 351. Fields and Waves**4 Credits (3+3P)**

Static electromagnetic field. Maxwell's equation and time-varying electromagnetic fields. Generalized plane wave propagation, reflection, transmission, superposition and polarization. Transmission line theory. Extensions to optical wave propagation. Applications including Time Domain Reflectometry (TDR) and fiber optic transmission. Laboratory experience with RF/microwave test equipment and optical apparatus. Restricted to Majors: Electrical Engineering.

Prerequisite(s): C- or better in E E 310.

E E 363. Computer Systems Architecture**4 Credits (3+3P)**

Concepts of modern computer architecture. Processor micro-architectures, hardwired vs. micro-programmed control, pipelining and pipeline hazards, memory hierarchies, bus-based system architecture and memory mapping, hardware-software interface, and operating system concepts. Comparison of architectures to illustrate concepts of computer organization; relationships between architectural and software features.

Prerequisite(s): C or better in C S 273 or E E 260.

E E 380. Semiconductor Devices and Electronics**4 Credits (3+3P)**

Analysis and design of opamp circuits, diode circuits and single-transistor MOS and BJT amplifiers. Introduction to solid-state semiconductor devices. Restricted to Majors: Electrical Engineering.

Prerequisite(s): C- or better in E E 230.

E E 391. Introduction to Electric Power Engineering**4 Credits (3+3P)**

Introduction to the principles, concepts, and analysis of the major components of an electric power system. Basic electromechanics, energy conversion and source conversion, transformers, transmission lines, rectifiers, regulators, and system analysis.

Prerequisite(s): C or better in E E 280.

E E 395. Introduction to Digital Signal Processing**3 Credits**

Undergraduate treatment of sampling/reconstruction, quantization, discrete-time systems, digital filtering, Z-transforms, transfer functions, digital filter realizations, discrete Fourier transform (DFT) and fast Fourier transform (FFT), finite impulse response (FIR) and infinite impulse response (IIR) filter design, and digital signal processing (DSP) applications.

Prerequisite(s): C or better in E E 314.

E E 400. Undergraduate Research**1-3 Credits**

Directed undergraduate research. May be repeated for a maximum of 9 credits.

Prerequisite: consent of the department head.

E E 402. Capstone Design**3 Credits (2+3P)**

Application and realization of engineering principles to a significant team-based design project with significant student management and autonomy. Determination of performance requirements, including safety, economics, ethics and manufacturability; extensive communication of design choices and test results to broad audiences; and interfacing of design with other hardware and software. May be repeated up to 3 credits. Restricted to: E E majors.

Prerequisite(s): C- or better in E E 300, E E 314, E E 351, and E E 380.

E E 418. Capstone Design I**3 Credits (1+6P)**

Application of engineering principles to a significant design project. Includes teamwork, written and oral communications, and realistic technical, economic, and public safety requirements.

Prerequisite(s)/Corequisite(s): E E 461. Prerequisite(s): C or better in E E 260, E E 314, E E 351, E E 380, and E E 391.

E E 419. Capstone Design II**3 Credits (1+6P)**

Realization of design project from E E 418 within time and budget constraints.

Prerequisite(s)/Corequisite(s): E E 461. Prerequisite(s): (C or better in E E 260, E E 314, E E 351, E E 380, and E E 391) OR (C or better in E E 418).

E E 425. Introduction to Semiconductor Devices**3 Credits**

Energy bands, carriers in semiconductors, junctions, transistors, and optoelectronic devices, including light-emitting diodes, laser diodes, photodetectors, and solar cells. Taught with E E 525.

Prerequisite(s): C or better in E E 380 and E E 351.

E E 426. Introduction to Smart Grid**3 Credits**

The course will serve as an introduction to the technologies and design strategies associated with the Smart Grid. The emphasis will be on the development of communications, energy delivery, coordination mechanisms, and management tools to monitor transmission and distribution networks. Taught with E E 546. Crosslisted with: C S 494.

Prerequisite(s): C- or better in E E 280.

E E 431. Power Systems II**3 Credits**

Analysis of a power system in the steady-state. Includes the development of models and analysis procedures for major power system components and for power networks.

Prerequisites: C or better in E E 391.

E E 432. Power Electronics**3 Credits (2+3P)**

Basic principles of power electronics and its applications to power supplies, electric machine control, and power systems.

Prerequisites: C or better in E E 380 and E E 391.

Corequisites: E E 312 and E E 314.

E E 438. Mobile Application Development**3 Credits**

Introduction to mobile application development. Students will develop applications for iOS devices including iPhone and iPad. Topics include object-oriented programming using the Objective-C language, model-view-controller (MVC) pattern, memory management, view controllers, graphical user interface design, callbacks, and web services.

Corequisite(s): E E 161 or C S 172 or C S 271 or C S 450 or C S 451 or C S 452.

E E 443. Mobile Application Development**3 Credits**

Introduction to mobile application development. Students will develop applications for iOS devices including iPhone and iPad. Topics include object-oriented programming using Swift, model-view-controller (MVC) pattern, view controllers including tables and navigation, graphical user interface (GUI) design, data persistence, GPS and mapping, camera, and cloud and web services. May be repeated up to 3 credits.

Prerequisite(s): C- or better in C S 172 or C S 177 or C S 187 or C S 271 or C S 451 or C S 452.

E E 446. Digital Image Processing**3 Credits**

Two-dimensional transform theory, color images, image enhancement, restoration, segmentation, compression and understanding. Taught with E E 596. **Prerequisite(s):** E E 395

E E 447. Neural Signal Processing**3 Credits**

Cross-disciplinary course focused on the acquisition and processing of neural signals. Students in this class will learn about basic brain structure, different brain signal acquisition techniques (fMRI, EEG, MEG, etc.), neural modeling, and EEG signal processing. To perform EEG signal processing, students will learn and use Matlab along with an EEG analysis package that sits on top of Matlab. Taught with E E 597.

Prerequisite(s): C- or better in E E 314.

E E 449. Smart Antennas**3 Credits**

Smart antenna and adaptive array concepts and fundamentals, uniform and planar arrays, optimum array processing. Adaptive beamforming algorithms and architectures: gradient-based algorithms, sample matrix inversion, least mean square, recursive mean square, sidelobe cancellers, direction of arrival estimations, effects of mutual coupling and its mitigation. Taught with E E 549.

Prerequisite(s): C or better in E E 314 and E E 351.

E E 452. Introduction to Radar**3 Credits**

Basic concepts of radar. Radar equation; detection theory. AM, FM, and CW radars. Analysis of tracking, search, MTI, and imaging radar. Taught with E E 548. Restricted to undergraduate students. Pre/

Prerequisite(s): C or better in E E 210 and E E 351.

Corequisite(s): E E 496.

E E 453. Microwave Engineering**3 Credits**

Techniques for microwave measurements and communication system design, including transmission lines, waveguides, and components. Microwave network analysis and active device design. Taught with E E 521. Restricted to undergraduate students. Restricted to: Main campus only.

Prerequisite(s): C or better in E E 351.

E E 454. Antennas and Radiation**3 Credits**

Basic antenna analysis and design. Fundamental antenna concepts and radiation integrals. Study of wire antennas, aperture antennas, arrays, reflectors, and broadband antennas. Taught with E E 541. Restricted to undergraduate students. Restricted to: Main campus only.

Prerequisite(s): C or better in E E 351.

E E 460. Space System Mission Design and Analysis**3 Credits**

Satellite system design, including development, fabrication, launch, and operations. A systems engineering approach to concepts, methodologies, models, and tools for space systems.

Prerequisite: junior standing.

E E 461. Systems Engineering and Program Management**3 Credits**

Modern technical management of complex systems using satellites as models. Team projects demonstrate systems engineering disciplines required to configure satellite components.

Prerequisite(s): Junior standing.

E E 469. Communications Networks**3 Credits (2+3P)**

Introduction to the design and performance analysis of communications networks with major emphasis on the Internet and different types of wireless networks. Covers network architectures, protocols, standards and technologies; design and implementation of networks; networks applications for data, audio and video; performance analysis. Taught with E E 569.

Prerequisite(s): C or better in E E 162 and (E E 210 or STAT 371).

E E 473. Introduction to Optics**3 Credits**

The nature of light, geometrical optics, basic optical instruments, wave optics, aberrations, polarization, and diffraction. Elements of optical radiometry, lasers and fiber optics. Crosslisted with: PHYS 473

Prerequisite(s): PHYS 216G or PHYS 217.

E E 475. Automatic Control Systems**3 Credits**

Design and synthesis of control systems using state variable and frequency domain techniques. Compensation, optimization, multi-variable system design techniques.

Prerequisite(s): C or better in E E 314.

E E 476. Computer Control Systems**3 Credits**

Representation, analysis and design of discrete-time systems using time-domain and z-domain techniques. Microprocessor control systems.

Prerequisite: C or better in E E 314.

E E 478. Fundamentals of Photonics**4 Credits (3+3P)**

Ray, wave and guided optics, lasers and thermal sources, radiometry, photon detection and signal-to-noise ratio. Elements of photonic crystals, polarization, acousto-optics, electro-optics, and optical nanostructures. Taught with E E 528. Recommended foundation: E E/PHYS 473.

Crosslisted with: PHYS 478.

Prerequisite(s): PHYS 216G or PHYS 217.

E E 479. Lasers and Applications**4 Credits (3+3P)**

Laser operating principles, characteristics, construction and applications. Beam propagation in free space and fibers. Laser diode construction and characteristics. Hands-on laboratory. Taught with E E 529. Crosslisted with: PHYS 479

Prerequisite(s): C or better in E E 351 or PHYS 461.

E E 480. Introduction to Analog and Digital VLSI**4 Credits (3+3P)**

Introduction to analog and digital VLSI circuits implemented in CMOS technology. Design of differential amplifiers, opamps, CMOS logic, flip-flops, and adders. Introduction to VLSI fabrication and CAD tools. Crosslisted with: E E 510.

Prerequisite(s): C- or better in E E 260 and E E 380.

E E 482. Electronics II**3 Credits**

Feedback analysis, application of operational amplifiers, introduction to data converters, analog filters, oscillator circuits..

Prerequisite: C or better in E E 380.

E E 485. Analog VLSI Design**3 Credits (2+3P)**

Analysis, design, simulation, layout and verification of CMOS analog building blocks, including references, opamps, switches and comparators. Teams implement a complex analog IC. Taught with E E 523. Restricted to undergraduate students. Restricted to: Main campus only.

Prerequisite(s): C or better in E E 312 and E E 480.

E E 486. Digital VLSI Design**3 Credits**

An introduction to VLSI layers. Static and dynamic logic design, memory circuits, arithmetic operators, and digital phase-locked loops. Taught with E E 524. Restricted to undergraduate students.

Prerequisite(s): C or better in E E 260 and E E 380.

E E 486 L. Digital VLSI Design Laboratory**1 Credit**

Simulation, schematic capture, layout, and verification using software tools of material presented in E E 486. An introduction to measurement of digital VLSI circuits. Taught with E E 524L. Pre/

Prerequisite(s): C or better in E E 260 and E E 380.

Corequisite(s): E E 486.

E E 490. Selected Topics**1-3 Credits**

May be repeated for a maximum of 9 credits. Graduate students may not use credits of E E 490 toward an M.S. or Ph.D. in electrical engineering.

Prerequisite: consent of instructor.

E E 493. Power Systems III**3 Credits**

Analysis of a power system under abnormal operating conditions. Topics include symmetrical three-phase faults, theory of symmetrical components, unsymmetrical faults, system protection, and power system stability. Taught with E E 543. Restricted to undergraduate students. Pre/

Prerequisite(s): C or better in E E 391.

Corequisite(s): E E 431.

E E 496. Introduction to Communication Systems**4 Credits (3+3P)**

Introduction to the analysis of signals in the frequency and time domains. A study of baseband digital transmission systems and digital/analog RF transmission systems. Introduction to telecom systems as well as satellite systems.

Prerequisite(s): C or better in E E 314.

E E 497. Digital Communication Systems I**3 Credits**

Techniques for transmitting digital data over commercial networks. Topics include baseband and bandpass data transmission and synchronization techniques. Taught with E E 581. Recommended foundation: E E 496.

Prerequisite(s): E E 210 and E E 314.

E E 501. Research Topics in Electrical and Computer Engineering**1 Credit**

Ethics and methods of engineering research; contemporary research topics in electrical and computer engineering.

E E 510. Introduction to Analog and Digital VLSI**4 Credits (3+3P)**

Introduction to analog and digital VLSI circuits implemented in CMOS technology. Design of differential amplifiers, opamps, CMOS logic, flip-flops, and adders. Introduction to VLSI fabrication and CAD tools. Recommended preparation is E E 260 and E E 380 or equivalent. Taught with E E 480 with differentiated assignments for graduate students. Crosslisted with: E E 480.

E E 512. ASIC Design**3 Credits (2+3P)**

This course provides students with experiential knowledge of modern application specific integrated circuits. Topics include ASIC packaging and testing, I/O pads and ESD, Verilog programming and simulation, FPGA verification, Register-transfer level synthesis, timing and area optimization, floorplanning and routing, digital interfaces, full custom and standard cell design, post-layout simulation, and PCB schematics and layout.

Prerequisite(s): E E 486 or E E 524.

E E 514. Biosensor Electronics**3 Credits**

Course provides students with knowledge of basic integrated analog and RF blocks and how to combine these circuits into sensory systems for biomedical applications. Target areas are in physiology, brain-machine interfaces, neural recording and stimulation. Lecture includes details on amplifiers, current-mode circuits, A/D converters, low-power radio transmitters and receivers, and simulation and layout of VLSI circuits. Lectures are in the form of recent paper reviews and discussion. Includes teamwork, written and oral communication, and realistic technical requirements. Pre/

Prerequisite(s): E E 486 OR E E 524.

Corequisite(s): E E 485 OR E E 523.

E E 515. Electromagnetic Theory I**3 Credits**

Electromagnetic theory of time-harmonic fields in rectangular, cylindrical and spherical coordinates with applications to guided waves and radiated waves. Induction and equivalence theorems, perturbational and variational principles applied to engineering problems in electromagnetics. Recommended preparation is E E 351 or equivalent. Restricted to: Main campus only.

E E 516. Electromagnetic Theory II**3 Credits**

Continuation of E E 515.

E E 518. Integrated Power Management Circuits**3 Credits**

Design and analysis of power management integrated circuits, including linear voltage regulators, voltage references, buck, boost, and buck-boost DC-DC converters, and charge pumps. Extensive use of CAD tools are used to simulate these circuits. Pre/

Prerequisite(s): E E 486 or E E 524.

Corequisite(s): E E 485 or E E 523.

E E 519. RF Microelectronics**3 Credits**

Knowledge of modern Radio Frequency CMOS integrated circuits, Basic Concepts in RF Design, Communication Concepts, Transceiver Architectures, Low Noise Amplifiers, Mixers, Passive Device in RF Designs, Oscillators, Phase-Locked Loops, Frequency Synthesizers, Power Amplifiers, and State-of-the-art RF systems and applications.

Prerequisite(s): E E 485 or E E 523.

E E 520. A/D and D/A Converter Design**3 Credits**

Practical design of integrated data converters in CMOS/BJT technologies, OP-AMPS, comparators, sample and holds, MOS switches, element mismatches. Nyquist rate converter architectures: flash, successive approximation, charge redistribution, algorithmic, two step, folding, interpolating, pipelined, delta-sigma converters. Restricted to: Main campus only.

Prerequisite(s): E E 523.

E E 521. Microwave Engineering**3 Credits**

Techniques for microwave measurements and communication system design, including transmission lines, waveguides, and components. Microwave network analysis and active device design. Recommended preparation is E E 351 or equivalent. Taught with E E 453 with differentiated assignments for graduate students. Restricted to: Main campus only.

E E 522. Advanced Analog VLSI Design**3 Credits**

Design of high-performance operational amplifiers; class-AB, rail-to-rail, low-voltage, high-bandwidth, fully-differential. Design of linear operational transconductance amplifiers, high-frequency integrated filters, four-quadrant multipliers, and switched-capacitor circuits.

Prerequisite(s): E E 523.

E E 523. Analog VLSI Design**3 Credits (2+3P)**

Analysis, design, simulation, layout and verification of CMOS analog building blocks, including references, opamps, switches and comparators. Teams implement a complex analog IC. Recommended preparation is E E 312 and E E 480 or equivalent. Taught with E E 485 with differentiated assignments for graduate students. Restricted to: Main campus only.

E E 524. Digital VLSI Design**3 Credits**

An introduction to VLSI layers. Static and dynamic logic design, memory circuits, arithmetic operators, and digital phase-locked loops. Taught with E E 486 with differentiated assignments for graduate students. Recommended foundation: E E 260 and E E 380.

E E 524 L. Digital VLSI Design Laboratory**1 Credit**

Simulation, schematic capture, layout, and verification using software tools of material presented in E E 524. An introduction to measurement of digital VLSI circuits. Taught with E E 486L with differentiated assignments for graduate students.

E E 525. Introduction to Semiconductor Devices**3 Credits**

Energy bands, carriers in semiconductors, junctions, transistors, and optoelectronic devices, including light-emitting diodes, laser diodes, photodetectors, and solar cells. Recommended preparation is E E 380 and E E 351. Taught with: E E 425 with differentiated assignments for graduate students.

E E 528. Fundamentals of Photonics**4 Credits (3+3P)**

Ray, wave and guided optics, lasers and thermal sources, radiometry, photon detection and signal-to-noise ratio. Elements of photonic crystals, polarization, acousto-optics, electro-optics, and optical nanostructures. Taught with E E 478 with differentiated assignments for graduate students. Recommended foundation: (PHYS 216 or PHYS 217) and E E / PHYS 473. Crosslisted with: PHYS 528.

E E 529. Lasers and Applications**4 Credits (3+3P)**

Laser operating principles, characteristics, construction and applications. Beam propagation in free space and fibers. Laser diode construction and characteristics. Hands-on laboratory. Recommended foundation: E E 351 or PHYS 461. Taught with: E E 479 with differentiated assignments for graduate students. Crosslisted with: PHYS 529

E E 530. Environmental Management Seminar I**1 Credit**

Same as CH E 530, C E 530, I E 530.

E E 531. Power System Modeling and Computational Methods**3 Credits**

Development and analysis of fast computational methods for efficient solution of large scale power-system problems. Algorithms for constructing the bus impedance matrix; sparse matrix techniques; partial-inverse methods; compensation of mutual coupling. Pre/ Restricted to: Main campus only.

Corequisite(s): E E 543.

E E 532. Dynamics of Power Systems**3 Credits**

Transient and dynamic stability of power systems; synchronous machine modeling and dynamics; prediction and stabilization of system oscillations. Recommended preparation is E E 493 or equivalent. Restricted to: Main campus only.

E E 533. Power System Operation**3 Credits**

AGC, economic dispatch, unit commitment, operations planning, power flow analysis and network control, system control centers. Recommended preparation is E E 493 or equivalent. Restricted to: Main campus only.

E E 534. Power System Relaying**3 Credits**

Fundamental relay operating principles and characteristics. Current, voltage, directional, differential relays; distance relays; pilot relaying schemes. Standard protective schemes for system protection. Operating principles and overview of digital relays. Recommended preparation is E E 493 or equivalent.

E E 537. Power Electronics**3 Credits (2+3P)**

Basic principles of power electronics and its applications to power supplies, electric machine control, and power systems. Recommended preparation is E E 314, E E 380, and E E 391. Taught with E E 432 with differentiated assignments for graduate students.

E E 541. Antennas and Radiation**3 Credits**

Basic antenna analysis and design. Fundamental antenna concepts and radiation integrals. Study of wire antennas, aperture antennas, arrays, reflectors, and broadband antennas. Recommended preparation is E E 351 or equivalent. Taught with E E 454 with differentiated assignments for graduate students. Restricted to: Main campus only.

E E 542. Power Systems II**3 Credits**

Analysis of a power system in the steady-state. Includes the development of models and analysis procedures for major power system components and for power networks. Recommended preparation is E E 391 or equivalent. Taught with E E 431 with differentiated assignments for graduate students. Restricted to: Main campus only.

E E 543. Power Systems III**3 Credits**

Analysis of a power system under abnormal operating conditions. Topics include symmetrical three-phase faults, theory of symmetrical components, unsymmetrical faults, system protection, and power system stability. Recommended preparation is E E 431 or equivalent. Taught with E E 493 with differentiated assignments for graduate students. Restricted to: Main campus only.

E E 544. Distribution Systems**3 Credits**

Concepts and techniques associated with the design and operation of electrical distribution systems. Recommended preparation is E E 542 and E E 543. Taught with E E 494 with differentiated assignments for graduate students.

E E 545. Digital Signal Processing II**3 Credits**

Non-ideal sampling and reconstruction, oversampling and noise shaping in A/D and D/A, finite word length effects, random signals, spectral analysis, multirate filter banks and wavelets, and applications. Recommended preparation is E E 395 or equivalent. Restricted to: Main campus only.

E E 546. Introduction to Smart Grid**3 Credits**

The course will serve as an introduction to the technologies and design strategies associated with the Smart Grid. The emphasis will be on the development of communications, energy delivery, coordination mechanisms, and management tools to monitor transmission and distribution networks. Taught with E E 426. Crosslisted with: C S 514.

E E 548. Introduction to Radar**3 Credits**

Basic concepts of radar. Radar equation; detection theory, AM, FM, and CW radars. Analysis of tracking, search, MTI, and image radar. Recommended preparation is E E 310, E E 351, and E E 496 or equivalent. Taught with E E 452 with differentiated assignments for graduate students. Restricted to: Main campus only.

E E 549. Smart Antennas**3 Credits**

Smart antenna and adaptive array concepts and fundamentals, uniform and planar arrays, optimum array processing. Adaptive beamforming algorithms and architectures: gradient-based algorithms, sample matrix inversion, least mean square, recursive least mean square, sidelobes cancellers, direction of arrival estimations, effects of mutual coupling and its mitigation. Taught with E E 449. Recommended foundation is E E 314 and E E 351.

E E 551. Control System Synthesis I**3 Credits**

An advanced perspective of linear modern control system analysis and design, including the essential algebraic, structural, and numerical properties of linear dynamical systems.

E E 552. Control System Synthesis II**3 Credits**

An overview of optimal controls for linear dynamical systems, analysis and design of control systems using Lyapunov techniques, control system design using semidefinite programming. An introduction to stochastic filtering and control.

E E 555. Advanced Linear Systems**3 Credits**

Advanced level study of linear systems and associated mathematical tools including linear equations, spectral theory, normal matrices, projections, quadratic forms, discrete and continuous time dynamical systems. Recommended preparation is MATH 480 or equivalent. Restricted to: Main campus only.

E E 563. Computer Performance Analysis I**3 Credits**

Issues involved and techniques used to analyze performance of a computer system. Topics covered include computer system workloads; statistical analysis techniques such as principal component analysis, confidence interval, and linear regression; design and analysis of experiments; queuing system analysis; computer system simulation; and random number generation. Recommended foundation: E E 210 and E E 363.

E E 564. Advanced Computer Architecture I**3 Credits**

Multiprocessor and distributed computer architectures; models of parallel computation; processing element and interconnection network structures, and nontraditional architectures. Recommended preparation is E E 363 or equivalent. Crosslisted with: C S 573.

E E 565. Pattern Recognition and Machine Learning**3 Credits**

Statistical pattern classification, supervised and unsupervised learning, feature selection and extraction, clustering, image classification and syntactical pattern recognition. Recommended preparation is E E 210 or equivalent probability and statistics and linear algebra courses.

E E 567. ARM SOC Design**3 Credits**

The course aims to produce students who are capable of developing ARM-based SoCs from high level functional specifications to design, implementation and testing on real FPGA hardware using standard hardware description and software programming languages.

Prerequisite(s): C+ or higher in E E 512.

E E 569. Communications Network**3 Credits (2+3P)**

Introduction to the design and performance analysis of communications networks with major emphasis on the Internet and different types of wireless networks. Covers network architectures, protocols, standards and technologies; design and implementation of networks; networks applications for data, audio and video; performance analysis. Taught with E E 469. Recommended foundation is E E 162 and (E E 210 or STAT 371).

E E 571. Random Signal Analysis**3 Credits**

Application of probability and random variables to problems in communication systems, analysis of random signal and noise in linear and nonlinear systems.

E E 572. Modern Coding Theory**3 Credits**

Error control techniques for digital transmission and storage systems. Introduction to basic coding bounds, linear and cyclic block codes, Reed-Solomon codes, convolutional codes, maximum likelihood decoding, maximum a posteriori probability decoding, factor graphs, low density parity check codes, turbo codes, iterative decoding. Applications to data networks, space and satellite transmission, and data modems. Recommended foundation is E E 210 and E E 496.

E E 573. Signal Compression**3 Credits**

Fundamentals of information source encoding and decoding. Includes information theory bounds on source coding, lossless coding algorithms, scalar quantizing and vector quantizing.

Prerequisite: E E 571.

E E 577. Fourier Methods in Electro-Optics**3 Credits**

Linear systems theory, convolution and Fourier transformation are applied to one-dimensional and two dimensional signals encountered in electro-optical systems. Applications in diffraction, coherent and incoherent imaging, and optical signal processing. Recommended foundation: E E 312 and E E 528. Crosslisted with: PHYS 577

E E 578. Optical System Design**3 Credits**

Optical design software is used to study optical systems involving lenses, mirrors, windows and relay optics. Systems considered include camera lenses, microscopes and telescopes. Recommended foundation: E E / PHYS 473, E E / PHYS 528 and E E / PHYS 577. Crosslisted with: PHYS 578.

E E 581. Digital Communication Systems I**3 Credits**

Techniques for transmitting digital data over commercial networks. Topics include baseband and bandpass data transmission and synchronization techniques. Recommended foundation is E E 210, E E 314, and E E 496. Taught with E E 497.

E E 583. Wireless Communication**3 Credits**

Cellular networks, wireless channels and channel models, modulation and demodulation, MIMO, diversity and multiplexing, OFDM, wireless standards including LTE and WiMAX. Recommended foundation: E E 571 or equivalent.

Prerequisite(s): E E 314 or E E 571.

E E 584. Mathematical Methods for Communications and Signal Processing**3 Credits**

Applications of mathematical techniques from estimation theory, optimization principles and numerical analysis to the problems in communications and signal processing.

Prerequisites: E E 571 and E E 555 or knowledge of linear algebra.

E E 585. Telemetry Systems**3 Credits**

Covers the integration of components into a command and telemetry system. Topics include analog and digital modulation formats, synchronization, link effects, and applicable standards. Recommended preparation is E E 395, E E 496, and E E 497, or equivalent. Restricted to: Main campus only.

E E 586. Information Theory**3 Credits**

This class is a study of Shannon's measure of information and discusses mutual information, entropy, and channel capacity, the noiseless source coding theorem, the noisy channel coding theorem, channel coding and random coding bounds, rate-distortion theory, and data compression.

Restricted to: Main campus only. Crosslisted with: MATH 509

Prerequisite(s): E E 571 or STAT 515.

E E 590. Selected Topics**1-9 Credits**

May be repeated for a maximum of 18 credits.

E E 593. Mobile Application Development**3 Credits**

Introduction to mobile application development. Students will develop applications for iOS devices including iPhone and iPad. Topics include object-oriented programming using Swift, model-view-controller (MVC) pattern, view controllers including tables and navigation, graphical user interface (GUI) design, data persistence, GPS and mapping, camera, and cloud and web services. Taught with E E 443 with differentiated assignments for graduate students. Recommended foundation is C++ or Java programming course. May be repeated up to 3 credits.

E E 596. Digital Image Processing**3 Credits**

Two-dimensional transform theory, color images, image enhancement, restoration, registration, segmentation, compression and understanding. Recommended foundation is E E 571. Taught with E E 446.

E E 597. Neural Signal Processing**3 Credits**

Cross-disciplinary course focused on the acquisition and processing of neural signals. Students in this class will learn about basic brain structure, different brain signal acquisition techniques (fMRI, EEG, MEG, etc.), neural modeling, and EEG signal processing. To perform EEG signal processing, students will learn and use Matlab along with an EEG analysis package that sits on top of Matlab. Taught with E E 447.

E E 598. Master's Technical Report**9 Credits**

Individual investigation, either analytical or experimental, culminating in a technical report. May be repeated for a maximum of 18 credits. Graded PR/S/U.

E E 599. Master's Thesis**15 Credits**

Thesis.

E E 600. Doctoral Research**1-15 Credits**

Research.

E E 615. Computational Electromagnetics**3 Credits**

The numerical solution of electromagnetics problems. Topics include differential equation techniques, integral equation methods, hybrid techniques, algorithm development and implementation, and error analysis. Particular algorithms, including FEM, finite differences, direct solvers, and iterative solvers, are studied.

E E 690. Selected Topics**1-9 Credits**

May be repeated for a maximum of 9 credits.

E E 700. Doctoral Dissertation**15 Credits**

Dissertation.

Name: The Klipsch School of Electrical and Computer Engineering

Office Location: Thomas and Brown Hall, Rm 106

1125 Frenger Mall

Las Cruces, NM 88003

Website: <http://ece.nmsu.edu/>

Computer Engineering - Undergraduate Minor (26-27 Credits)

Prerequisites (All may be transferred)

MATH 191G	Calculus and Analytic Geometry I	4
MATH 192G	Calculus and Analytic Geometry II	4

Lower Division (all may be transferred)

E E 100	Introduction to Electrical Engineering	4
E E 112	Embedded Systems	4
or C S 172	Computer Science I	
E E 212	Introduction to Computer Architecture and Organization	4
or C S 273	Machine Programming and Organization	
C S 271	Object Oriented Programming	4

Upper Division (no transfer credits accepted)

E E 363	Computer Systems Architecture (EE 363 is 4 credits)	3
or C S 473	Architectural Concepts I	
C S 371	Software Development	4

C S 484	Computer Networks I	3
or E E 469	Communications Networks	
Total Credits		26

Electrical Engineering - Bachelor of Science in Electrical Engineering

Electrical Engineering Program Educational Objectives

The Klipsch School is dedicated to providing a quality, hands-on, educational experience for our students. Below are the program educational objectives (PEOs) that describe the expected accomplishments of graduate during their first few years after graduation.

1. Our graduates will obtain relevant, productive employment in the private sector, government and/or pursue an advanced degree.
2. Our graduates will be using their engineering foundation to innovate solutions to the problems of the real world.

Requirements (120 credits)**General Education****State of New Mexico Common Core***Area I: Communications*

ENGL 111G	Rhetoric and Composition	4
Written Communications Elective ¹		3
Oral Communications Elective ¹		3

Area II: Mathematics

MATH 191G	Calculus and Analytic Geometry I	4
-----------	----------------------------------	---

Area III: Natural Science

CHEM 111G	General Chemistry I	4
PHYS 215G	Engineering Physics I	3
PHYS 215GL	Engineering Physics I Laboratory	1

Areas IV & V: Social and Behavioral Sciences & Humanities and Fine Arts

Select 15 total credits from Area IV and V, with at least 6 credits from each area: ¹	15
--	----

Area IV: Social and Behavioral Sciences:

Select 6-9 credits from Economics, Political Science, Psychology, Sociology, and Anthropology electives ¹

Area V: Humanities and Fine Arts:

Select 6-9 credits from History, Philosophy, Literature, Art, Music, Dance, Theater, or Foreign Language electives ¹

Institution Specific General Education

Viewing a Wider World Electives (PHIL 323V strongly recommended) ¹	6

Total Credits		120

¹ See the required courses (p. 47) section of the catalog for a full list of courses.

² STEM Elective: Courses at the 300 level or above from E E that are not used to satisfy any other E E program requirement or courses at the 300 level or above from A E, C E, CHME, I E, M E, BIOL, CHEM, C S, MATH, ASTR and PHYS. Excluded courses include VWW courses and those which are substantially equivalent to an E E course. For a list of excluded STEM Electives, go to <http://ece.nmsu.edu/>.

³ For a list of approved E E Concentration Courses, see below.

Concentration Courses

Undergraduate students are given the opportunity to specialize in one concentration area. Once fulfilled, this concentration appears on the student's transcript. Concentrations include a minimum of 11 credits hours of coursework in:

- Communications and Signal Processing
- Computers and Microelectronics
- Control and Power
- Electromagnetics and Photonics

Alternately, students can elect to have no concentration. In this case students are required to complete 12 credits hours, which must include one required course from each of three concentrations.

Concentration Course List

Communications and Signal Processing (11 credits)

Required:

E E 395	Introduction to Digital Signal Processing	3
E E 496	Introduction to Communication Systems	4

Choose two:

E E 446	Digital Image Processing	
E E 447	Neural Signal Processing	
E E 460	Space System Mission Design and Analysis	
E E 469	Communications Networks	
E E 497	Digital Communication Systems I	

Computers and Microelectronics (11 credits)

Required:

E E 363	Computer Systems Architecture	4
E E 480	Introduction to Analog and Digital VLSI	4

Choose one:

E E 425	Introduction to Semiconductor Devices	
E E 443	Mobile Application Development	
E E 469	Communications Networks	
E E 482	Electronics II	
E E 485	Analog VLSI Design	
E E 486	Digital VLSI Design	

Control and Power (11 credits) 3

Required:

E E 431	Power Systems II	3
E E 475	Automatic Control Systems	3

Choose two:

E E 426	Introduction to Smart Grid	
E E 432	Power Electronics	
E E 476	Computer Control Systems	
E E 493	Power Systems III	

Electromagnetics and Photonics (11 credits)

Required:

E E 454	Antennas and Radiation	3
E E 473	Introduction to Optics	3

Choose two:

E E 425	Introduction to Semiconductor Devices	
E E 449	Smart Antennas	
E E 452	Introduction to Radar	
E E 453	Microwave Engineering	
E E 478	Fundamentals of Photonics	
E E 479	Lasers and Applications	

The Freshman Year

Incoming freshmen are expected to be eligible for MATH 191G Calculus and Analytic Geometry I. A typical first year of study for E E students includes the following 30 credits:

Course	Title	Credits
Freshman		
Fall		
E E 100	Introduction to Electrical Engineering	4

ENGR 100	Introduction to Engineering	3
ENGL 111G	Rhetoric and Composition	4
MATH 191G	Calculus and Analytic Geometry I ¹	4
Credits		15

Spring

CHEM 111G	General Chemistry I	4
E E 112	Embedded Systems	4
MATH 192G	Calculus and Analytic Geometry II	4
General Education Requirement from either Area I or IV		3
Credits		15
Total Credits		30

¹ Eligibility for MATH 191G Calculus and Analytic Geometry I must be established with AP Calculus credit or by taking the Math Placement Exam, administered by the Math Learning Center.

Related Areas of Study

Electrical and computer engineering students wishing to broaden their educational experience may elect to earn additional bachelor's degrees in

- Engineering Physics or Physics
- Mathematics
- Computer Science

Klipsch School students may also choose to earn a minor in one or more of the following fields:

- Computer Engineering
- Physics
- Mathematics
- Computer Science

Students must consult with an academic advisor in the offering department for specific requirements related to additional degrees and minors.

Dual Degree (BS/MS) Program

This program option is designed to provide a means for ECE undergraduates to obtain both a BSEE and a MSEE degree with 144 credit hours of coursework (normally: BSEE = 120 hours, MSEE = 30 hours; total = 150 hours). Students electing this option will follow the existing undergraduate curriculum for the first six semesters. In the final undergraduate year, two graduate courses (>500 level) will be taken in lieu of two E E concentration courses. The student receives a BSEE degree at this point. A MSEE program can be completed with 24 additional credit hours. Students must obtain prior approval of the department before starting this program option.

Transfer Credit

Credit earned at other institutions is generally accepted; however the following restrictions apply to transfer credits:

- Engineering credit must be earned at an ABET accredited school.
- Physics must be calculus based.
- If the NMSU requirement includes a lab, the transfer credit must include a lab.
- A grade of C-, or better, must have been earned.

- E E Concentration Courses, Cornerstone and Capstone courses may not be transferred.
- Upper division E E core classes can only receive transfer credit after review and approval of the course area faculty.

Electrical Engineering - Doctor of Philosophy

Requirements for Ph.D. Degree

The Program Educational Objectives for the Doctorate in Electrical Engineering are:

1. That graduates obtain relevant, productive employment performing research in academia, government or industry, and/or are teaching at institutions of higher education.
2. That graduates obtain relevant, productive employment with the private sector or in government and/or pursue additional advanced degrees.

The Ph.D. program is open to students with a master's degree.

Exceptionally well qualified students may petition for direct entry to the Ph.D. program without first obtaining a master's degree.

Option 1 - Ph.D. with Completed MS Degree

1. Complete undergraduate deficiency coursework, if the student admitted has both master's and bachelor's degrees in fields other than electrical engineering. Complete graduate deficiency coursework, which consists of three graduate core courses from three different areas of emphasis, if the student has a master's degree in a field other than electrical engineering.
2. Complete a minimum of 18 credits beyond the master's of graduate course work with the following restrictions:
 - a. E E courses must be numbered 500 or higher. Non-E E courses must be 450 or higher.
 - b. At least half of the 18 credits must be taken in the Klipsch School (E E).
 - c. At most 6 credits may be research, for example, E E 600 Doctoral Research, and E E 590 Selected Topics courses that are not listed as regular courses in the schedule.
 - d. Exclude credits of E E 700 Doctoral Dissertation.
 - e. If the MS degree is not E E, exclude credits from graduate deficiency coursework.

Option 2 - Direct Ph.D. with BSEE or Equivalent, but no MS Degree

1. Complete three graduate core courses.
2. Complete a minimum of 42 credits of graduate coursework, including the three graduate core courses with the following restrictions:
 - a. At least half of the 42 credits must be numbered 500 or higher.
 - b. At least half of the 42 credits must be taken in the Klipsch School (E E).
 - c. At most 9 credits may be research, for example, E E 600 Doctoral Research, and E E 590 Selected Topics courses that are not listed as regular courses in the schedule.
 - d. Exclude credits of E E 700 Doctoral Dissertation.
 - e. Courses excluded from the MSEE are also excluded from the Ph.D. program.

- f. At least half of the credits must be taken with other than a single professor.

Common Requirements for all Ph.D. Candidates

1. Participate in one semester of research seminars (E E 501 Research Topics in Electrical and Computer Engineering, 1 credits)
2. Take and pass the Ph.D. qualifying exam.
3. Pass a comprehensive examination. The examination must be part written and part oral. The specific format of the exam is at the discretion of the examination committee. It may cover course work, include a proposal for dissertation research, and may be preceded by a written exam.
4. Complete 18 credits of E E 700 Doctoral Dissertation.
5. Submit evidence for a minimum of two publications related to the dissertation research, one of which is submitted to an internationally-recognized journal, such as IEEE Transactions, and the second of which may be with a professional conference, such as an IEEE conference. Submissions must be completed prior to the final oral exam.¹
6. Pass a final oral exam which defends the dissertation.

Other limitations and requirements that apply to all Ph.D. degrees are described elsewhere in this catalog.

Ph.D. Qualifying Exam

The Ph.D. Qualifying Exam is typically offered on the Monday just prior to the beginning of each semester. The format is one half day written exam. The examination indicates a readiness for research at the graduate level. Students answer a total of six questions with two coming from each of three areas of emphasis. Taking three graduate core courses (listed in the MSEE program) prepares students for the Ph.D. qualifying exam.

PhD candidates in the College of Engineering, who have successfully completed their PhD Qualifier Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

Paper #1: An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student's doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.

Paper #2: An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for the Web of Science. Alternatively, one conference paper accepted or published in a national or international conference proceedings.

Electrical Engineering - Master of Science in Electrical Engineering Requirements and Options for M.S.E.E. Degree

The Program Educational Objectives for the Master of Science Program in Electrical Engineering are:

1. That graduates successfully apply advanced skills and techniques in one or more areas of emphasis.

2. That graduates obtain relevant, productive employment with the private sector or in government and/or pursue additional advanced degrees.

Three options exist for the Master of Science in Electrical Engineering degree. The requirements for each option are listed below:

1. Thesis: 24 credits of course work plus 6 credits of E E 599 Master's Thesis plus oral exam
2. Technical Report: 27 credits of course work plus 3 credits of E E 598 Master's Technical Report plus oral exam
3. Course Work Only: 30 credits of course work plus passing three graduate core courses (or two graduate core courses and one graduate breadth course) with a B- or better in each course. No oral exam is required for the course work only option.

Graduate Core Courses and Breadth Electives

The MSEE program requires students to participate in one semester of research seminars (E E 501 Research Topics in Electrical and Computer Engineering, 1 credit) and take two graduate core courses from two different areas of emphasis. In addition, either a third graduate core course OR one graduate breadth course must be taken from a third area of emphasis. If a student wishes to pursue a Ph.D., the third class should come from the core class list as preparation for the Ph.D. qualifying exam. The graduate core courses, specialty areas and credits are listed below for the Graduate Core Courses and the Graduate Breadth Electives.

Graduate Core Courses

Graduate Core Courses

<i>Electromagnetics</i>		
E E 515	Electromagnetic Theory I	3
<i>Microelectronics/VLSI</i>		
E E 523	Analog VLSI Design	3
<i>Photonics</i>		
E E 528	Fundamentals of Photonics	4
or E E 529	Lasers and Applications	
<i>Electric Energy Systems</i>		
E E 543	Power Systems III	3
<i>Digital Signal Processing</i>		
E E 545	Digital Signal Processing II	3
<i>Control Systems</i>		
E E 551	Control System Synthesis I	3
<i>Computer Engineering</i>		
E E 563	Computer Performance Analysis I	3
or E E 564	Advanced Computer Architecture I	
<i>Communications</i>		
E E 571	Random Signal Analysis	3
Total Credits		25

Graduate Breadth Electives

Graduate Breadth Electives

<i>Microelectronics/VLSI</i>		
E E 512	ASIC Design	3
<i>Electric Energy Systems</i>		
E E 537	Power Electronics	3

<i>Electromagnetics</i>		
E E 541	Antennas and Radiation	3
<i>Control Systems and Digital Signal Processing</i>		
E E 555	Advanced Linear Systems	3
<i>Communications</i>		
E E 581	Digital Communication Systems I	3

Excluded Courses

Credits from the following courses do not count toward a E E degree:

C S 450	C Programming	3
C S 451	C++ Programming	3
C S 452	Java Programming	3
C S 453	PYTHON PROGRAMMING I	3
C S 455	Internet Programming I	3
C S 458	R Programming I	3
C S 460	Computer Science I Transition	3
C S 462	Object Oriented Programming Transition	3
C S 463	Introduction to Data Structures Transition	3
C S 464	Machine Programming and Organization Transition	3
C S 465	Discrete Math for Computer Science Transition	3
C S 466	Compilers and Automata Transition	3
C S 468	Software Development Transition	3
C S 469	Data Structure and Algorithms Transition	3
COMM 485	International Teaching Assistant Development	3
E E 490	Selected Topics	1-3
SPCD 458	Advanced Speaking and Listening for International Graduate Students	3
SPCD 470	Scholarly Writing for International Graduate Students	3

Credits of E E 590 Selected Topics, are limited to a total of 9, of which at most 6 may be credits for courses that don't appear as regular classes in the printed schedule. Each area of specialization may have additional requirements for students in those areas. Other limitations and requirements that apply to all master's degrees are described elsewhere in this catalog.

Electrical Engineering - Undergraduate Minor (27 Credits)

The Electrical Engineering minor is not available to students majoring in Electrical Engineering.

Prerequisites (all may be transferred)

CHEM 111G	General Chemistry I	4
MATH 191G	Calculus and Analytic Geometry I	4
MATH 192G	Calculus and Analytic Geometry II	4
MATH 392	Introduction to Ordinary Differential Equations	3

PHYS 215G	Engineering Physics I	3
PHYS 216G	Engineering Physics II	3
Lower Division (all may be transferred)		
E E 100	Introduction to Electrical Engineering	4
E E 112	Embedded Systems	4
E E 200	Linear Algebra, Probability and Statistics Applications	4
E E 230	AC Circuit Analysis and Introduction to Power Systems	4
Upper Division (no transfer credit accepted)		
E E 312	Signals and Systems I	3
E E 380	Semiconductor Devices and Electronics	4
E E Elective ¹		4
Total Credits		27

¹ List of approved electives can be found at the ECE website (<http://ece.nmsu.edu>). Certain electives may require additional pre-requisites.

Engineering Physics

Undergraduate Program Information

The Engineering Physics program is offered jointly by the Department of Physics and the College of Engineering. The faculty is drawn from the Departments of Physics, Chemical and Materials Engineering, Electrical and Computer Engineering, and Mechanical & Aerospace Engineering.

Degrees for the Department

Engineering Physics - Bachelor of Science in Engineering Physics (p. 568)

Professor, Stefan Zollner, Department Head

Professor, Heinz Nakotte, Engineering Physics Program Head

PHYS 110G. The Great Ideas of Physics

4 Credits (3+3P)

Conceptual, quantitative, and laboratory treatments of the great ideas and discoveries that have influenced lives and changed perceptions of nature, from Johannes Kepler's laws of planetary motion and Isaac Newton's and Albert Einstein's laws of motion and gravity to the modern concepts of the quantal structure of nature and the big bang universe.

PHYS 120G. Introduction to Acoustics

4 Credits (3+2P)

Lecture, demonstration, and laboratory treatment of the general properties of waves, the production, transmission, and reception of sound waves, including musical and vocal sounds, and characteristics of the human ear and several kinds of sources.

PHYS 150. Elementary Computational Physics

3 Credits (2+2P)

Introduction to computational techniques for the solution of physics-related problems.

Prerequisite(s): a C- or better in MATH 121G.

PHYS 203. Supplemental Instruction to PHYS 213**0.5-1 Credits (.5-1)**

Optional workshop as a supplement to PHYS 213. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.

Corequisite(s): PHYS 213.

PHYS 204. Supplemental Instruction to PHYS 214**0.5-1 Credits (.5-1)**

Optional workshop as a supplement to PHYS 214. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.

Corequisite(s): PHYS 214.

PHYS 205. Supplemental Instruction to PHYS 215G**0.5-1 Credits (.5-1)**

Optional workshop as a supplement to PHYS 215G. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.

Corequisite(s): PHYS 215G.

PHYS 206. Supplemental Instruction to PHYS 216G**0.5-1 Credits (.5-1)**

Optional workshop as a supplement to PHYS 216G. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.

Corequisite(s): PHYS 216G.

PHYS 211G. General Physics I**3 Credits**

Non-calculus treatment of mechanics, waves, sound, and heat. Knowledge of simple algebra and trigonometry is required.

PHYS 211GL. General Physics I Laboratory**1 Credit**

Laboratory experiments in topics associated with material presented in PHYS 211G.

Prerequisite(s)/Corequisite(s): PHYS 211G.

PHYS 212G. General Physics II**3 Credits**

Non-calculus treatment of electricity, magnetism, and light.

Prerequisite(s): PHYS 211G or PHYS 221G.

PHYS 212GL. General Physics II Laboratory**1 Credit**

Laboratory experiments in topics associated with material presented in PHYS 212G.

Prerequisite(s)/Corequisite(s): PHYS 212G.

PHYS 213. Mechanics**3 Credits**

Newtonian mechanics. Pre/

Corequisite(s): MATH 191G.

PHYS 213 L. Experimental Mechanics**1 Credit**

Laboratory experiments associated with the material presented in PHYS 213. Science majors. Pre/

Corequisite(s): PHYS 213.

PHYS 214. Electricity and Magnetism**3 Credits**

Charges and matter, the electric field, Gauss law, the electric potential, the magnetic field, Ampere's law, Faraday's law, electric circuits, alternating currents, Maxwell's equations, and electromagnetic waves. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 192G. Prerequisite(s): a C- or better in PHYS 213 or PHYS 215G.

PHYS 214 L. Electricity and Magnetism Laboratory**1 Credit**

Laboratory experiments associated with the material presented in PHYS 214.

Prerequisite(s)/Corequisite(s): PHYS 214. Prerequisite(s): a C- or better in PHYS 213L or PHYS 215GL.

PHYS 215G. Engineering Physics I**3 Credits**

Calculus-level treatment of kinematics, work and energy, particle dynamics, conservation principles, simple harmonic motion. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in MATH 191G.

PHYS 215GL. Engineering Physics I Laboratory**1 Credit**

Laboratory experiments associated with the material presented in PHYS 215G. Students wishing to use the PHYS 215G-216G sequence to satisfy the basic natural science general education requirement must register for either PHYS 215GL or PHYS 216GL. Pre/

Corequisite(s): PHYS 215G.

PHYS 216G. Engineering Physics II**3 Credits**

A calculus-level treatment of topics in electricity, magnetism, and optics. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in PHYS 213 or PHYS 215G and MATH 192G.

PHYS 216GL. Engineering Physics II Laboratory**1 Credit**

Laboratory experiments associated with the material presented in PHYS 216G.

Prerequisite(s)/Corequisite(s): PHYS 216G. Prerequisite(s): A C- or better in PHYS 213L or PHYS 215GL.

PHYS 217. Heat, Light, and Sound**3 Credits**

Calculus-level treatment of thermodynamics, geometrical and physical optics, and sound. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in PHYS 213 or PHYS 215G.

PHYS 217 L. Experimental Heat, Light and Sound**1 Credit**

Laboratory experiments associated with the material presented in PHYS 217. Science majors.

Prerequisite(s)/Corequisite(s): PHYS 217. Prerequisite(s): a C- or better in PHYS 213L or PHYS 215GL.

PHYS 221G. General Physics for Life Sciences I**3 Credits**

This algebra-based introduction to general physics covers mechanics, waves, sound, and heat. Special emphasis is given to applications in the life sciences. This course is recommended for students in the life sciences and those preparing for the physics part of the MCAT.

Prerequisites: a C or better in MATH 120 or higher.

PHYS 221GL. Laboratory to General Physics for Life Science I**1 Credit**

Laboratory experiments in topics associated with material presented in PHYS 221G.

Prerequisite(s)/Corequisite(s): PHYS 221G. Restricted to Las Cruces campus only.

PHYS 222G. General Physics for Life Sciences II**3 Credits**

This algebra-based course covers electricity, magnetism, light, atomic physics, and radioactivity. Special emphasis is given to applications in the life sciences. This course is recommended for students in the life sciences and those preparing for the physics part of the MCAT.

Prerequisite: PHYS 211G or PHYS 221G.

PHYS 222GL. Laboratory to General Physics for Life Sciences II**1 Credit**

Laboratory experiments in topics associated with material presented in PHYS 222G.

Prerequisite(s)/Corequisite(s): PHYS 222G. Restricted to Las Cruces campus only.

PHYS 223. Supplemental Instruction to PHYS 221**1 Credit**

This optional workshop supplements Physics for Life Sciences I. The tutorial sessions focus on reasoning and hands-on problem solving.

Corequisite(s): PHYS 221G.

PHYS 224. Supplemental Instruction to PHYS 222**1 Credit**

This optional workshop is a supplement to Physics for Life Science II. The tutorial sessions focus on reasoning and hands-on problem solving.

Corequisite(s): PHYS 222G.

PHYS 280. Independent Study**1-3 Credits**

Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

PHYS 290. Special Topics**1-3 Credits**

Topics to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

PHYS 303V. Energy and Society in the New Millennium**3 Credits**

Traditional and alternative sources of energy. Contemporary areas of concern such as the state of depletion of fossil fuels; nuclear energy, solar energy, and other energy sources; environmental effects; nuclear weapons; and health effects of radiation. Discussion of physical principles and impact on society. Focus on scientific questions involved in making decisions in these areas. No physics background required.

PHYS 304. Forensic Physics**4 Credits (3+3P)**

Theories, laboratory, and field techniques in the area of forensic physics.

PHYS 305V. The Search for Water in the Solar System**3 Credits**

Examines the formation, abundance and ubiquity of water in our Solar System stemming from comets, Martian and Lunar poles, Earth's interior and into the outer reaches of the Solar System. Topics will include nuclear synthesis, Solar System formation, remote sensing, as well as past, present and future NASA missions for water.

PHYS 315. Modern Physics**3 Credits**

An introduction to relativity and quantum mechanics, with applications to atoms molecules, solids, nuclei, and elementary particles. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in MATH 291 and PHYS 214 or PHYS 216G.

PHYS 315 L. Experimental Modern Physics**3 Credits (1+6P)**

Elementary laboratory in modern physics which supports the subject matter in PHYS 315. Required for physics majors. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): PHYS 315. Prerequisite(s): a C- or better in PHYS 214L or 216GL.

PHYS 350. Special Topics**1-3 Credits**

Lectures, demonstrations, and discussions on such topics as lasers and holography, energy sources, clouds, and biophysics. May be repeated for a maximum of 12 credits under different subtitles.

PHYS 380. Individual Study**1-3 Credits**

Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

PHYS 395. Intermediate Mathematical Methods of Physics**3 Credits**

Introduction to the mathematics used in intermediate-level physics courses. Topics include vector calculus, curvilinear coordinates, matrices, linear algebra, function spaces, partial differential equations, and special functions. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 392. Prerequisite(s): a C- or better in MATH 291G.

PHYS 400. Undergraduate Research**1-3 Credits**

May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

PHYS 420. Capstone Project I**3 Credits**

Application of engineering physics principles to a significant design project. Includes teamwork, written and oral communication and realistic technical, economic and public safety requirements.

PHYS 421. Capstone Project II**3 Credits**

Continuation of PHYS 420.

PHYS 450. Selected Topics**1-3 Credits**

Readings, lectures or laboratory studies in selected areas of physics. May be repeated for a maximum of 12 credits.

PHYS 451. Intermediate Mechanics I**3 Credits**

Vector calculus, Lagrangian and Hamiltonian formulations of Newtonian mechanics. Topics include central force motion, dynamics of rockets and space vehicles, rigid body motion, noninertial reference frames, oscillating systems, relativistic mechanics, classical scattering, and fluid mechanics. Pre/

Prerequisite(s): PHYS 213 or PHYS 215G, and MATH 291G.

Corequisite(s): MATH 392.

PHYS 454. Intermediate Modern Physics I**3 Credits**

Introduction to quantum mechanics, focusing on the role of angular momentum and symmetries, with application to many atomic and subatomic systems. Specific topics include intrinsic spin, matrix representation of wave functions and observables, time evolution, and motion in one dimension. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 392 and PHYS 395. **Prerequisite(s):** a C- or better in PHYS 315.

PHYS 455. Intermediate Modern Physics II**3 Credits**

Continuation of subject matter of PHYS 454. Specific topics include rotation and translation in three dimensions, solution of central potential problems, perturbation theory, physics of identical particles, scattering theory, and the interaction between photons and atoms. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in PHYS 454.

PHYS 461. Intermediate Electricity and Magnetism I**3 Credits**

The first part of a two-course sequence in classical electrodynamics. Covered topics include static electric and magnetic fields, Laplace's and Poisson's equations, electromagnetic work and energy, Lorentz force, Gauss's, Biot-Savart, and Ampere's laws, Maxwell's equations, as well as electric and magnetic fields in matter. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 392 and PHYS 395. **Prerequisite(s):** a C- or better in PHYS 214 or PHYS 216G or equivalent and a C- or better in MATH 291G.

PHYS 462. Intermediate Electricity and Magnetism II**3 Credits**

Continuation of subject matter of PHYS 461. Covered topics include Maxwell's equations and their applications, electromagnetic waves, reflection, refraction, dispersion, radiating systems, interference and diffraction, as well as Lorentz transformations and relativistic electrodynamics. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in PHYS 461.

PHYS 467. Nanoscience and Nanotechnology**3 Credits**

See CHME 467. Crosslisted with: CHME 467.).

Prerequisite(s): CHEM 112 and (PHYS 211 or PHYS 215) and (EH&S Safety training to include the courses: (1) Employee & Hazard Communication Safety (HazCom); (2) Hazardous Waste Management; and (3) Laboratory Standard.

PHYS 468. Intermediate X-ray Diffraction**3 Credits**

Introduction to x-ray diffraction and reflectivity spectra. Topics include X-ray sources and detectors, atomic spectra, characteristic x-rays, thermionic emission, synchrotron radiation, instrument components, and beam conditioners. Crosslisted with: CHME 488.

Prerequisite(s): a C- or better in PHYS 315 and PHYS 315L.

PHYS 471. Modern Experimental Optics**3 Credits (1+6P)**

Advanced laboratory experiments in optics related to the material presented in PHYS 473.

Prerequisite(s): PHYS 315 and PHYS 315L.

PHYS 473. Introduction to Optics**3 Credits**

The nature of light, Geometrical optics, basic optical instruments, wave optics, aberrations, polarization, and diffraction. Elements of optical radiometry, lasers and fiber optics. Crosslisted with: E E 473

Prerequisite(s): PHYS 216G or PHYS 217.

PHYS 475. Advanced Physics Laboratory**1-3 Credits (1+6P)**

Advanced undergraduate laboratory involving experiments in atomic, molecular, nuclear, and condensed-matter physics. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in PHYS 315 and 315L.

PHYS 476. Computational Physics**3 Credits**

An introduction to finite difference methods, Fourier expansions, Fourier integrals, solution of differential equations, Monte Carlo calculations, and application to advanced physics problems.

Prerequisite(s): PHYS 150 or equivalent and MATH 392.

PHYS 477. Fiber Optic Communication Systems**4 Credits (3+3P)**

See E E 477 Crosslisted with: E E477.

Prerequisite(s): C- or better in E E 315 or PHYS 461.

PHYS 478. Fundamentals of Photonics**4 Credits (3+3P)**

See E E 478. Crosslisted with: E E478.

Prerequisite(s): PHYS 216G or PHYS 217.

PHYS 479. Lasers and Applications**4 Credits (3+3P)**

See E E479 Crosslisted with: E E479.

Prerequisite(s): C- or better in E E 315 or PHYS 461.

PHYS 480. Thermodynamics**3 Credits**

Thermodynamics and statistical mechanics. Basic concepts of temperature, heat, entropy, equilibrium, reversible and irreversible processes. Applications to solids, liquids, and gases.

Prerequisites: PHYS 217, PHYS 315 and MATH 291G.

PHYS 485. Independent Study**1-3 Credits**

Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

PHYS 488. Introduction to Condensed Matter Physics**3 Credits**

Crystal structure, X-ray diffraction, energy band theory, phonons, cohesive energy, conductivities, specific heats, p-n junctions, defects, surfaces, and magnetic, optical, and low-temperature properties.

Prerequisite(s): PHYS 315.

PHYS 489. Introduction to Modern Materials**3 Credits**

Structure and mechanical, thermal, electric, and magnetic properties of materials. Modern experimental techniques for the study of material properties.

Prerequisite: PHYS 315.

PHYS 491. High Energy Physics I**3 Credits**

Particle detectors, accelerators, and experimental techniques. Fundamental particles and interactions. Symmetries in particle physics. Quark model of hadrons. Electroweak theory. Strong interactions and QCD. Nuclear interactions at high energies. Grand unification. Super symmetry.

Prerequisite(s): PHYS 455.

PHYS 493. Experimental Nuclear Physics**3 Credits (1+6P)**

Selected experimental investigations in nuclear physics such as measurement of radioactivity, absorption of radiation, nuclear spectrometry.

Prerequisite(s): PHYS 315 and PHYS 315L.

PHYS 495. Mathematical Methods of Physics I**3 Credits**

Applications of mathematics to experimental and theoretical physics. Topics selected from: complex variables; special functions; numerical analysis; Fourier series and transforms, Laplace transforms.

Prerequisite(s): MATH 392 and PHYS 395.

PHYS 497. Introduction to Space Plasma Physics**3 Credits**

Properties of plasmas, especially those in the heliosphere such as the solar wind, planetary magnetospheres and ionospheres, cosmic rays, and the Sun. Topics include both independent-particle and fluid descriptions of plasmas such as magnetohydrodynamics, the solar cycle and solar flares, planetary magnetic substorms and aurorae, Van Allen radiation belts, shocks in the solar wind, and wave propagation in plasmas.

Prerequisite(s): (PHYS 461 or E E 351) and MATH 392.

PHYS 500. Special Topics Seminar**1-2 Credits**

Treatment of topics not covered by regular courses. Graded S/U. May be repeated.

PHYS 511. Mathematical Methods of Physics I**3 Credits**

Same as PHYS 495. Additional work required at a more advanced level.

PHYS 520. Selected Topics**1-3 Credits**

Formal treatment of graduate-level topics not covered in regular courses. May be repeated for a maximum of 9 credits.

Prerequisites: graduate standing, consent of instructor, and selection of a specific topic prior to registration.

PHYS 521. Individual Study**1-3 Credits**

Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.

Prerequisites: graduate standing, consent of instructor, and selection of a specific topic prior to registration.

PHYS 527. Fiber Optic Communication Systems**4 Credits (3+3P)**

Same as E E 527 Crosslisted with: E E 527

PHYS 528. Fundamentals of Photonics**4 Credits (3+3P)**

Same as E E 528. Crosslisted with: E E 528.

PHYS 529. Lasers and Applications**4 Credits (3+3P)**

Same as E E 529 Crosslisted with: E E 529

PHYS 551. Classical Mechanics**3 Credits**

Lagrangian and Hamiltonian formulation of dynamics. Advanced treatments of most topics listed under PHYS 451, plus canonical transformations and Hamilton-Jacobi theory. PHYS 451 strongly recommended.

PHYS 554. Quantum Mechanics I**3 Credits**

Wave function, indeterminacy, classical limit. Schrodinger equation. Atomic and nuclear systems. Angular momentum, intrinsic spin, identical particles. Scattering theory. Mathematical formalism, symmetry and conserved quantities. Perturbation theory. Dirac theory, introduction to quantized fields. PHYS 451 and PHYS 454 strongly recommended.

PHYS 555. Quantum Mechanics II**3 Credits**

Continuation of topics in PHYS 554.

Prerequisites: PHYS 554 or consent of instructor.

PHYS 561. Electromagnetic Theory I**3 Credits**

Detailed advanced treatments of most topics listed under PHYS 461, PHYS 462, plus multipole radiation, collisions of charged particles and bremsstrahlung, scattering, and radiation reaction. PHYS 461 and PHYS 462 strongly recommended.

PHYS 562. Electromagnetic Theory II**3 Credits**

Continuation of topics in PHYS 561.

Prerequisites: PHYS 561 or consent of instructor.

PHYS 567. Nanoscience and Nanotechnology**3 Credits**

See CHME 567. Crosslisted with: CHME 567.

PHYS 568. Elements of X-ray Diffraction**3 Credits**

Same as PHYS 468, but additional work required. Crosslisted with: CHME 588.

PHYS 571. Advanced Experimental Optics**3 Credits**

Taught with PHYS 471 with additional work required at the graduate level. Consent of Instructor required.

Prerequisite(s): PHYS 473 or PHYS 562.

PHYS 575. Advanced Physics Laboratory**1-3 Credits (1+6P)**

Selected experiments in atomic, molecular, nuclear and condensed-matter physics.

PHYS 576. Advanced Computational Physics I**3 Credits**

Advanced treatment of topics listed under PHYS 476, plus additional required work. Applications of numerical methods to complex physical systems. Recommended knowledge of Fortran or C, and MATH 377 or MATH 392. Same as PHYS 476, but additional work required.

PHYS 577. Fourier Methods in Electro-Optics**3 Credits**

Same as E E 577 Crosslisted with: E E 577

PHYS 578. Optical System Design**3 Credits**

See E E 578. Crosslisted with: E E 578

PHYS 584. Statistical Mechanics**3 Credits**

Thermodynamics review. Probability, entropy, equilibrium. Canonical and grand canonical ensembles. Classical and quantum statistics. Degenerate and classical gases. Application to the equilibrium properties of solids, liquids, and gases. Kinetic theory and transport processes.

PHYS 588. Condensed Matter Physics**3 Credits**

Same as PHYS 488, but additional work required.

Prerequisite(s): PHYS 554 or consent of instructor.

PHYS 589. Modern Materials**3 Credits**

Same as PHYS 489 with differentiated assignments for graduate students.

Prerequisite: PHYS 554 or consent of instructor.

PHYS 591. Advanced High-Energy Physics I**3 Credits**

Taught with PHYS 491 with additional work required at the graduate level.

Prerequisite(s): PHYS 555 or consent of instructor.

PHYS 592. Advanced High-Energy Physics II**3 Credits**

Continuation of topics in PHYS 591

Prerequisite(s): PHYS 591.

PHYS 593. Advanced Experimental Nuclear Physics**3 Credits (1+6P)**

Advanced experimental investigation of topics such as measurement of radioactivity, absorption of radiation, and nuclear spectrometry.

PHYS 597. Space Plasma Physics**3 Credits**

Same as PHYS 497 but with added requirements.

PHYS 599. Master's Thesis**15 Credits**

Thesis.

PHYS 600. Research**1-15 Credits**

Doctoral research. May be repeated.

PHYS 620. Advanced Topics in Physics**1-3 Credits**

Advanced formal treatment of topics not covered in regular courses. May be repeated for a maximum of 9 credits.

Prerequisite: consent of instructor.

PHYS 650. General Relativity I**3 Credits**

Basic foundations and principles of general relativity, derivation of the Einstein field equations and their consequences, the linearized theory, the Bel-Petrov classification of the curvature tensor, derivation of the Schwarzschild solution and the four basic tests of general relativity.

Prerequisite(s): PHYS 511 or PHYS 561 or consent of instructor.

PHYS 680. Independent Study**1-3 Credits**

Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: graduate standing or consent of instructor.

PHYS 688. Advanced Condensed Matter Physics**3 Credits**

Continuation of the advanced condensed matter physics presented in PHYS 588. Topics include electronic structure methods, optical, magnetic, and transport properties of solids, semiconductors, crystalline defects, nanostructures, and noncrystalline solids. PHYS 588 strongly recommended.

PHYS 689. Advanced Modern Materials**3 Credits**

Advanced topics in the physics of modern materials, such as crystalline, amorphous, polymeric, nanocrystalline, layered, and composite materials and their surfaces and interfaces.

Prerequisites: PHYS 555, PHYS 588, or consent of instructor.

PHYS 691. Quantum Field Theory I**3 Credits**

Path integrals, gauge invariance, relativistic quantum mechanics, canonical quantization, relativistic quantum field theory, introduction to QED.

Prerequisites: PHYS 555 and PHYS 562, or consent of instructor.

PHYS 692. Quantum Field Theory II**3 Credits**

QED, running coupling constant, QCD, electroweak theory, asymptotic freedom, deep inelastic scattering, basic QCD phenomenology, path integrals in quantum field theory, lattice QCD.

Prerequisite: PHYS 691 or consent of instructor.

PHYS 700. Doctoral Dissertation**15 Credits**

Dissertation.

Engineering Physics - Bachelor of Science in Engineering Physics

A strong grasp of underlying physical principles behind the development of new technologies is necessary to keep up with new developments in a high-tech world. The Bachelor of Science (BS) in Engineering Physics program is designed to provide quality education to students for immediate employment with technical jobs in private industries (especially high-tech industries), research laboratories and public sectors. The program trains students with a combination of engineering knowledge, physics principles, mathematical background, problem-solving strategies and effective communication skills. The BS in Engineering Physics also provides an excellent preparation for graduate studies in either physics or an engineering discipline.

The BS in Engineering Physics confers an engineering credential. Students in the program complete an engineering core curriculum, as well as a rigorous course of study in physics and mathematics. A strong laboratory component prepares students in experimental techniques and technology using state-of-the-art equipment.

The goals of the program are:

1. to give students a strong education in the fundamentals of physics, engineering, applied mathematics and computation;
2. to develop skill in real-world problem solving starting from fundamental physical principles;
3. to improve communication skills; and
4. to develop ability to work in a team.

The student must choose one of four concentrations in

- Aerospace Engineering,
- Chemical Engineering,
- Electrical Engineering, or
- Mechanical Engineering.

The requirements are listed below. Students must earn a C- or better in all required courses.

Concentration: Aerospace

General Education

State of New Mexico Common Core

Area I: Communications

Engineering Technology and Surveying Engineering

Undergraduate Program Information

Educational opportunities offered by the Department of Engineering Technology and Survey Engineering (<https://et.nmsu.edu>) (ETSE) in the College of Engineering (<https://enr.nmsu.edu>) place an emphasis on the *theory and practical hands-on application of engineering principles and methods*, under the motto of “*linking theory and application*”. Many ETSE graduates go on to earn advanced degrees but most typically begin their careers upon graduation and can select from public or private employment opportunities in a wide variety of fields.

Four fully ABET accredited four-year Bachelor of Science (BS) degrees in Engineering Technology are offered by the department with majors in:

- **Electronics and Computer Engineering Technology** (p. 583) (ECET) - Visit the ECET (<https://et.nmsu.edu/academics/electronics-and-computer-engineering-technology-ecet>) **web page**,
- **Information Engineering Technology** (p. 584) (IET) - Visit the (IET) (<https://et.nmsu.edu/academics/information-engineering-technology-iet>) **web site**
- **Mechanical Engineering Technology** (p. 585) (MET) - Visit the (MET) (<https://et.nmsu.edu/academics/mechanical-engineering-technology-met>) **web site or**; Want to know more? (<https://et.nmsu.edu/files/2016/10/MET-Intro.mp4>)
- **Civil Engineering Technology** (p. 581) (CET) - Visit the (CET) (<https://et.nmsu.edu/academics/civil-engineering-technology-cet>) **web site or**; (<https://et.nmsu.edu/academics/civil-engineering-technology-cet>) Want to learn more? (<https://et.nmsu.edu/files/2016/10/CET-Intro.pdf>)

A fully ABET accredited four-year Bachelor of Science (BS) degrees in Geomatics is offered by the department:

- **Geomatics or Surveying Engineering** (p. 586) (SE) - Visit the (SE) (<https://et.nmsu.edu/academics/surveying-engineering>) **web site**

A non-ABET Bachelor's degree is also offered via a two-year degree completion program which gives students having an Associate's degree the option to complete an

- **Information and Communication Technology** (p. 588) (ICT) (<https://et.nmsu.edu/academics/information-and-communication-technology-ict>) Bachelor degree completely on-line via a distance education format. All ETSE majors including ICT are accredited under the NMSU North Central accreditation (<https://accreditation.nmsu.edu>). Opportunities are available for students to concentrate in a particular area within their major or earn a Minor (<https://et.nmsu.edu/academics/degree-programs-overview>) to complement their degree.

The Mission of the ETSE Department is to provide students with a quality engineering technology or surveying education that links theory and application, provides a rigorous fundamental education, and gives students enhanced career opportunities.

The department's goals supporting this mission are:

- to provide educational and social environments that promote and facilitate student learning
- to have a highly respected and visible department
- to foster the development of the department and
- to graduate students who are competent and sought after by industry

View our Educational Objectives of our Engineering Technology Programs (<https://et.nmsu.edu/accreditation-and-assessment/outcomes>) page to see detailed information of what our students will gain upon graduating from an Engineering Technology and Surveying Engineering degree program.

Requirements Related to Transfer of Academic Credit

Students transferring to NMSU may receive transfer credit (<https://enr.nmsu.edu/course-transfer-credit>) depending on completed courses and source institutions. Articulation agreements (<https://et.nmsu.edu/academics/transfer-student-information>) exist for many New Mexico Community Colleges and represent a framework for transfer of academic credit. General degree requirements of the College of Engineering and NMSU also apply to ETSE department majors. The Engineering Transfer Policy (<https://enr.nmsu.edu/engineering-transfer-policy>) applies to any course in an ABET accredited major that is not to be completed on the NMSU main campus by a student already having official degree seeking status within the department.

- The department head must approve the course **prior** to enrollment and the course must be offered by an ABET accredited program (exceptions may be made when existing articulation agreements with NMSU are relevant). In all cases, a corresponding course syllabus and any other supporting documentation are to be submitted, together with the student's completed online request, before the course will be considered for transfer credit approval.
- To qualify for approval, the technical content and rigor must also be substantially the same as the equivalent NMSU course and the student must have satisfied all relevant university prerequisite requirements. If program co- and prerequisite requirements are not met, transfer credit will not be approved.

- **No credit for on-line courses** of another institution may be substituted to meet departmental core curriculum requirements.

To formally request approval to transfer a core course from another institution, you must complete the **Engineering Transfer Course Request Form**. (<https://enr.nmsu.edu/15466-2>)

Academic Performance Requirements

In addition to University (p. 53) and College of Engineering specific requirements (p. 525), as outlined in the NMSU General Information and College of Engineering catalog sections, departmental majors are expected to maintain a status of academic good standing and to complete degree requirements in a timely manner.

Courses in engineering, technology, math and science (and their respective pre- and corequisites) must be completed with a minimum grade of C- to be counted toward the fulfillment of degree requirements. This also includes all courses in the NM General Education Common Core Areas I, II, and III. If a grade lower than C- is earned in one of the above noted courses, the student will be required to retake that course during the first subsequent semester in which it is offered.

An ETSE student may attempt to complete core curriculum courses no more than three times for outcomes involving D or F letter grades. After this specified number of attempts without a passing grade of C- or better, the student will be prohibited from enrolling in any course offered within the college of engineering for a minimum period of one year; after which they may appeal to the college and department for re-admission into the program. Any credit earned outside the college during a period of academic suspension will not qualify for subsequent transfer credit toward core course degree requirements. Refer to the section of the catalog for university academic probation policies (p. 53).

Requirements for Graduation

The completion of ETSE undergraduate degrees are contingent upon fulfillment of

1. **University requirements** (p. 71) as outlined in relevant sections of this catalog,
2. policy expectations as outlined under **College General Requirements** (p. 525), and
3. departmental requirements, as outlined above and within the individual program descriptions of this catalog.

Degrees for the Department

Information and Communication Technology (p. 588) - Bachelor of Information and Communication Technology

Engineering Technology - Civil (p. 581) - Bachelor of Science (BS) in Engineering Technology

Engineering Technology - Electronics and Computer - (p. 583) Bachelor of Science (BS) in Engineering Technology

Engineering Technology - Information (p. 584) - Bachelor of Science (BS) in Engineering Technology

Engineering Technology - Mechanical (p. 585) - Bachelor of Science (BS) in Engineering Technology

Geomatics (p. 586) - Bachelor of Science (BS)

Minors for the Department

Digital Electronic Applications (p. 581) - Undergraduate Minor

Digital Forensics (p. 581) - Undergraduate Minor

Manufacturing (p. 589) - Undergraduate Minor

Renewable Energy Technologies (p. 589) - Undergraduate Minor

Information Security Technology (p. 588) - Undergraduate Minor

Geomatics (Surveying Engineering) (p. 587) - Undergraduate Minor

Engineer Eduardo Gamillo (<https://myaccount.nmsu.edu/phonebook?txtFirstName=ed&txtLastName=gamillo&txtEmail=&chkEmployees=Employees>)

¹ Registered Professional Engineer (NM).

² Licensed Professional Surveyor (NM).

E T 101. Introduction to Engineering Technology

1 Credit

The development of engineering technology, with an introduction to engineering technology, education, and practice. Graded S/U.

E T 104. Soldering Techniques

1 Credit

Fundamentals of soldering, desoldering, and quality inspection of printed circuit boards.

E T 106. Drafting Concepts/Computer Drafting Fundamentals I

4 Credits (2+4P)

Basic drafting skills, terminology, and visualization. Introduction to principles and fundamentals of computer-aided drafting. Community Colleges only. Same as DRFT 112.

Prerequisite: OECS 125, OECS 207, or consent of instructor.

E T 109. Computer Drafting Fundamentals

3 Credits (3+2P)

Crosslisted with: DRFT 109, C E 109 and SUR 109

E T 110. Introduction to 3-D Modeling (Solid Works)

3 Credits

Introduction to SolidWorks, a 3-D modeling software. The foundation for designing mechanical parts and assemblies. May be repeated up to 3 credits.

E T 120. Computation Software**2-3 Credits (2-3)**

The use of spreadsheet software in the field of engineering technology.

E T 125. Introduction to Renewable Energy**3 Credits**

Renewable energy systems, including topics in thermal-solar photovoltaic, wind, geothermal systems, and other current topics.

Theory, practical applications, safety considerations and the economics of alternative renewable energy systems compared to conventional systems.

E T 153. Introduction to Computer Networks**3 Credits**

Introduction to basic computer network fundamentals including International Open Systems Interconnect (OSI), the seven-layer model, and various networking hardware devices. Community Colleges only.

E T 154. Construction Methods and Communications**3 Credits**

Blueprint reading, specifications, and introduction to materials used in construction.

E T 155. Network Operating Systems I**3 Credits (3+1P)**

Introduction to a computer network operating system. May not be used as part of an E T degree program on main campus. Restricted to: Community Colleges only.

Prerequisite(s): E T 120 or E T 122.

E T 160. Basic Computer Operating Systems**3 Credits**

Basics of the most commonly used computer operating systems, command line interface, file systems, file virtualization.

E T 182. Digital Logic**3 Credits**

The use of truth tables, Boolean equations, and diagrams to define, simplify, and implement logic-valued functions.

E T 183. Applied DC Circuits**3 Credits (2+2P)**

Application of Ohm's law, Kirchhoff's laws, Thevenin's, and Norton's theorems to the analysis of DC passive circuits. Embedded Lab. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 121G.

E T 183 L. Applied DC Circuits Lab**1 Credit**

DC applied circuits lab. May be repeated up to 1 credits.

Corequisite(s): E T 183.

E T 184. Applied AC Circuits**3 Credits (2+2P)**

Application of circuit laws and theorems to analysis of AC passive circuits. Resonant circuit, polyphase circuit and magnetic circuit topics are introduced. Embedded Lab. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 190G. **Prerequisite(s):** E T 183.

E T 184 L. Applied AC Circuits Lab**1 Credit**

AC applied circuits lab May be repeated up to 1 credits.

Corequisite(s): E T 184.

E T 190. Applied Circuits**4 Credits (3+2P)**

Application of Ohm's law, Kirchhoff's laws, and Thevenin's theorems to the analysis of AC and DC passive circuits. Electronic circuit topics are introduced. Embedded lab.

Prerequisite(s)/Corequisite(s): MATH 190G.

E T 191. Applied Circuits Laboratory**1 Credit**

Applied Circuits Lab May be repeated up to 1 credits.

E T 200. Special Topics**1-3 Credits**

Directed study or project. May be repeated for a maximum of 6 credits.

Prerequisite: consent of department head.

E T 203. Computational Foundations**3 Credits**

Fundamental concepts of various proof techniques. These concepts will be applied to the use of computer algorithms, programming languages and other engineering and technology applications. May be repeated up to 3 credits.

Prerequisite(s): MATH 190G and E T 262.

E T 210. Intermediate 3-D Modeling (Solid Works)**3 Credits (2+2P)**

Intermediate 3-D modeling. Applied modeling of techniques to prepare for SolidWorks certification (CSWA). May be repeated up to 3 credits.

Prerequisite(s): E T 110.

E T 217. Manufacturing Processes**3 Credits**

Introduction to manufacturing and processing, including: casting, forming, and machining. Emphasis on creating products with the appropriate techniques. May be repeated up to 3 credits. Crosslisted with: I E 217.

Prerequisite(s)/Corequisite(s): E T 217L. **Prerequisite(s):** E T 110 and MATH 121G.

E T 217 L. Manufacturing Processes Lab**1 Credit**

Hands-on laboratory in machine shop to apply topics from E T 217, including: casting, forming, and machining. May be repeated up to 1 credits.

Prerequisite(s)/Corequisite(s): E T 217.

E T 220. Internship**1-6 Credits**

Internship requiring an approved number of hours of varied and progressive experience in the field of study. The scope and other requirements of the internship are stated in an individualized syllabus and through a memorandum of understanding between the faculty mentor and the industry partner. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): E T 283.

E T 230. Introduction to Servo Systems**1 Credit**

Introduction to Servo Systems. Topics include uses of servos in the industry, servo types, loop gains and frequency response, software control systems, damping, feedback, encoders, synchros and resolvers. Restricted to Community Colleges campuses only.

Prerequisite(s): E T 246.

E T 240. Applied Statics**3 Credits**

Fundamental topics of applied statics, including force system analysis, equilibrium, free body diagrams, methods of joints and sections, distributed loads, friction, centroids, area moments, and shear and moment diagrams. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 235G or MATH191G.

Prerequisite(s): PHYS 211G or PHYS 215G.

E T 241. Applied Dynamics**3 Credits**

The foundation for understanding particles and bodies in motion and the forces involved, including: projectile motion, Newton's Laws of Motion, conservation of energy, and impulse and momentum. May be repeated up to 3 credits.

Prerequisite(s): E T 240, (MATH 235 or MATH 191G).

E T 245. Computer Hardware Fundamentals**3 Credits (2+2P)**

Computer hardware fundamentals including architecture, interfacing, peripherals, troubleshooting, system upgrades, and maintenance. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

E T 246. Electronic Devices I**4 Credits (3+3P)**

Solid-state devices including diodes, bipolar-transistors, and field effect transistors. Use of these devices in rectifier circuits, small signal and power amplifiers. May be repeated up to 4 credits.

Prerequisite(s): E T 190 or E T 184.

E T 253. Networking Operating Systems II**3 Credits (3+1P)**

Introduction to a computer network operating system. May not be used as part of an E T degree program on main campus. Restricted to Community Colleges campuses only.

Prerequisite(s): E T 155.

E T 254. Concrete Technology**3 Credits (2+2P)**

Fundamentals of aggregates, Portland cement, and asphalt used in design and construction.

E T 255. Linux System Administration**3 Credits**

Introduction to Linux system administration.

Prerequisite(s)/Corequisite(s): E T 160.

E T 256. Networking Operating Systems III**3 Credits (3+1P)**

Introduction to a computer network operating system. May not be used as part of an E T degree program on main campus. Restricted to Community Colleges campuses only.

Prerequisite(s): E T 253.

E T 262. Software Technology I**3 Credits (2+2P)**

An introduction to computer programming concepts as applied to engineering technology. Includes basic logic design, algorithm development, debugging and documentation. History and use of computers and their impact on society. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): E T 182 or MATH 190G.

E T 272. Electronic Devices II**4 Credits (3+3P)**

Operational amplifiers, positive and negative feedback, computer aided circuit analysis. In addition circuits include integrator, differentiators and phase shift networks. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): MATH 235G or MATH 191G.

Prerequisite(s): E T 246.

E T 273. Fundamentals of Networking Communications I**4 Credits (2+4P)**

Introduction to networking basics, including computer hardware and software, electricity, networking terminology, protocols, LANs, WANs, OSI model, IP addressing, and design and documentation of basic network and structure cabling. Community Colleges only. May be repeated up to 4 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): E T 153.

E T 276. Electronic Communications**3 Credits (2+2P)**

Antennas, transmission devices, A-M and F-M transmission and detection, pulse systems, microwave systems.

Prerequisite(s): E T 246.

E T 277. Computer Networking I for IET**3 Credits (2+2P)**

Computer network design and applications for LAN to WAN, protocols, switches, bridges, routers, NT server, TCP/IP networks, network diagnostics, voice over IP, wireless networks, and the OSI layers from physical to transport. May be repeated up to 3 credits.

Prerequisite(s): E T 182.

E T 280. Introduction to Multimedia**3 Credits**

Introduction to video, audio and other digital presentation methods.

Prerequisite(s): E T 255.

E T 282. Digital Electronics**4 Credits (3+3P)**

Applications of digital integrated circuits, multiplexers, counters, arithmetic circuits, and microprocessors. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): (E T 190 or E T 184). **Prerequisite(s):** E T 182.

E T 283. Hardware PC Maintenance**3 Credits (3+1P)**

Installing, configuring, troubleshooting, and maintaining personal computer hardware components.

Prerequisite(s): E T 120 or E T 122.

E T 284. Software PC Maintenance**3 Credits (3+1P)**

Installing, configuring, troubleshooting, and maintaining personal computer operating systems.

Prerequisite(s): E T 120 or E T 122.

E T 285. Principles of Security**3 Credits**

Examines the field of information security within a real-world context of issues faced by today's IT professionals.

Prerequisite(s): E T 283 or consent of instructor.

E T 286. Fundamentals of Security**3 Credits**

An overview of general security concepts for information technology systems.

Prerequisite(s): E T 283 or consent of instructor.

E T 287. PC Disaster and Data Recovery**3 Credits**

This course provides an overview of the various causes of personal computer data failure and methods to mitigate the loss of your personal computer data. The focus is on restoring your personal computer to full PC functionality and recovering lost and damaged files after one of these unforeseen problems. In addition, the course provides a means to lessen the impact of these inevitable events with the preparation of a disaster recovery plan.

Prerequisite(s): E T 120 or E T 122.

E T 290. Networking Wireless Communication**3 Credits (3+1P)**

This course provides an introduction to wireless networking and communications. Some of the topics covered are protocols, transmission methods, and IEEE 802.11 standards. Wireless LAN (WLAN) fundamentals, devices, and security, cellular telephony, broadband, and satellite communications.

Prerequisite: E T 273.

E T 291. PC Forensics and Investigation**3 Credits**

Introduction to computer forensics and investigative fundamentals. Topics include understanding computer forensic and investigation law and requirements, processing crime and incident scenes, and the extraction, preservation, analysis and presentation of computer-related evidence.

Prerequisite(s): E T 120 or E T 122.

E T 300. Special Topics**1-3 Credits**

Directed study or project. May be repeated for a maximum of 6 credits.

Prerequisite: consent of department head.

E T 302. Manufacturing Data Analysis**3 Credits**

Methods for analyzing data collected during manufacturing processes. Emphasis placed on production control utilizing results of statistical methods and design of experiments.

Prerequisite(s): MATH 235.

E T 305. Introduction to Product Design**3 Credits (2+3P)**

The process of designing an innovative product for a real customer. Working through ideas, prototypes, 3-D models, concept validation, and entrepreneurship. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): E T 210, E T 217, and (COMM 265G or COMM 253G or AXED 201G or HON 265G). Restricted to: ET U, ET M, ET C, ET E majors.

E T 306. Fundamental and Applied Thermodynamics**3 Credits**

First and second laws, properties of substances, thermodynamic cycles including power generation and refrigeration. May be repeated up to 3 credits.

Prerequisite(s): CHEM 110G and E T 240 and (MATH 235G or MATH 191G) and ((PHYS 212G or PHYS 216G) and (PHYS 212GL or PHYS 216GL)).

E T 306 L. Thermodynamics Lab**1 Credit**

Applications of thermodynamic theory to lab devices. Practice in testing, instrumentation, and data collection. May be repeated up to 1 credits.

Prerequisite(s)/Corequisite(s): E T 306 and ((E T 184 201440) or (E T 190 201640)).

E T 308. Fluid Technology**3 Credits**

Application of basic principles of fluid mechanics to practical applied problems. May be repeated up to 3 credits.

Prerequisite(s): (MATH 235G or MATH 191G) and E T 240.

E T 308 L. Fluid Technology Lab**1 Credit**

Measurements in fluid statics, dynamics, and hydraulic systems. May be repeated up to 1 credits.

Prerequisite(s)/Corequisite(s): E T 308. **Prerequisite(s):** (MATH 235 or MATH 191G), E T 240.

E T 309V. Manufacturing: History and Technology**3 Credits**

The history of manufacturing, the technology on which it is based, and its impact on society.

E T 310. Applied Strength of Materials**3 Credits**

Application of principles of strength of materials to practical design and analysis problems. May be repeated up to 3 credits.

Prerequisite(s): (MATH 235G or MATH 191G) and E T 240.

E T 310 L. Applied Strength of Materials Lab**1 Credit**

Testing and analyzing the physical properties of materials. cursory review of Excel, PowerPoint, FEA, Instron machine, and testing standards. May be repeated up to 1 credits.

Prerequisite(s)/Corequisite(s): E T 310.

E T 312. Emergency Response to Hazardous Material Incidents**2 Credits**

Same as E S 312, WERC 312.

E T 314. Communications Systems I**3 Credits (3+2P)**

Circuits and devices used for transmission, reception, and processing of RF signals.

Prerequisite(s): E T 246 & MATH 190G.

E T 317. Advanced 3-D Modeling and Design**3 Credits**

Advanced 3-D modeling with current engineering design practices. Students will use SolidWorks add-ins such as CAMWorks, Product Data Management (PDM), and Model-Based Definition in conjunction with Geometric Dimensioning and Tolerancing (GD&T) practices. Students will have the opportunity to take the Certification SolidWorks Professional Exam (CSWP). May be repeated up to 3 credits. Consent of Instructor required. Restricted to: exclude ET U, ET M, ET C, ET E majors.

Prerequisite(s): E T 210.

E T 324. Signal Processing and Filtering**4 Credits (3+3P)**

Application of digital and analog signal conversion models. Discrete time signals and systems. Time and frequency domain concepts. Presentation of Fourier and Z transforms. Application of analog and digital signal filtering with and without feedback. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): (MATH 236G or MATH 191G) and ((PHYS 212G or PHYS 216G) and (PHYS 212GL or PHYS 216GL)).

Prerequisite(s): E T 272.

E T 328. Kinematics of Machines**3 Credits (2+3P)**

Kinematic analysis of machine elements using linkages, cams, and gears. Applied design of mechanical systems using SolidWorks simulation and Excel modeling. May be repeated up to 3 credits.

Prerequisite(s): E T 210 and E T 241.

E T 332. Applied Design of Structures I**4 Credits (3+3P)**

An introduction to structural analysis and design. Use of various building codes for development of allowable and factored loads on structures. Allowable stress and strength design concepts for structural components using concrete and steel. Required use of computer software such as spreadsheets, databases, and self-developed programs and design aids.

Prerequisite(s): E T 310.

E T 339. Introduction to Digital Forensics and Incident Response**3 Credits (2+3P)**

Introduction to the skills required to perform digital forensics and incident response on Windows operating systems. Topics include: live response, evidence acquisition, Windows operating system artifacts, documentation and reporting. May be repeated up to 3 credits.

Prerequisite(s): E T 255.

E T 344. Microcomputer Systems**3 Credits (2+3P)**

Microcomputer and/or microcontroller systems applications and architectures with a software emphasis using programming languages.

Prerequisite(s)/Corequisite(s): E T 362. **Prerequisite(s):** E T 182 and MATH 190.

E T 354. Soil and Foundation Technology**4 Credits (3+3P)**

Fundamentals of investigation of soil properties and their importance in design, construction, and testing as related to buildings, roads, dams, and other structures. Design of foundations considering slope stability, bearing capacity and settlement. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): E T 310. **Prerequisite(s):** E T 254.

Restricted to: ET U,ET E,ET M,C,E,ET C majors.

E T 355. Site/Land Development and Layout**3 Credits**

Techniques, methods, and takeoffs for infrastructure layout, site plan design, grading, earthwork, utilities, road construction. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): DRFT 143 or DRFT 153.

E T 360V. Technology in Business and Society**3 Credits (2+2P)**

Examination of how technology affects business and society with specific attention to understanding the role of technical personnel and their interaction with nontechnical personnel.

E T 362. Software Technology II**3 Credits**

A continuation of topics from E T 262 that are directed toward more advanced software development. Topics include problem analysis, object oriented, structured logic, and development concepts. May be repeated up to 3 credits.

Prerequisite(s): E T 262 and MATH 190G.

E T 365. Building Utilities**3 Credits (2+3P)**

Basic design and code applications in plumbing and electrical systems for buildings.

Prerequisites: junior standing in E T.

E T 377. Computer Networking I**3 Credits (2+2P)**

Computer network design and applications for LAN to WAN, protocols, switches, bridges, routers, TCP/IP networks, network diagnostics, voice over IP, wireless networks, and the OSI layers from physical to transport. May be repeated up to 3 credits.

Prerequisite(s): E T 182 and MATH 190G.

E T 381. Renewable Energy Technologies**3 Credits**

Renewable energy systems, including topics in thermal-solar, photovoltaic, wind, geothermal systems, and other current topics. Theory, practical applications, safety considerations and the economics of alternative renewable energy systems compared to conventional systems. Crosslisted with: WERC 381

Prerequisite(s): MATH 121G.

E T 382. Solar Energy Technologies**3 Credits (2+3P)**

Solar energy technologies, including topics in passive, solar thermal, and photovoltaic systems. Theory, practical applications, safety considerations and the economics of solar renewable energy systems compared to conventional systems. Crosslisted with: WERC 382

Prerequisite(s): MATH 121G.

E T 384. Wind and Water Energy Technologies**3 Credits**

Wind and Water energy technologies, including topics in small and large scale systems. Theory, practical applications, safety considerations and the economics of wind and water renewable energy systems compared to conventional systems. Crosslisted with: WERC 384.

Prerequisite(s): MATH 121G.

E T 386. Sustainable Construction and Green Building Design**3 Credits**

Sustainable Building materials, methods, and techniques including green architecture and design, codes, standards and specifications.

Prerequisite: MATH 121G.

E T 396. Heat Transfer and Applications**3 Credits (2+3P)**

Fundamentals of conduction, convection, and radiation heat transfer. Application of heat transfer, thermodynamics, and fluid mechanics principles to thermal system analysis and design. May be repeated up to 3 credits.

Prerequisite(s): E T 306 and E T 308 and PHYS 212G.

E T 398. Digital Systems**3 Credits (2+3P)**

Advanced analysis and design of digital systems using state machine logic, programming of logic devices, implementation and testing. Pre/

Prerequisite(s): E T 282 and MATH 190G.

Corequisite(s): E T 362.

E T 400. Special Topics**1-3 Credits**

Directed study or project. May be repeated for a maximum of 6 credits.

Prerequisite: consent of department head.

E T 401. Heating and Air-Conditioning Systems**3 Credits**

HVAC system design including heating and cooling load calculations, psychometrics, piping, duct layout, and system control. Same as M E 401.

Prerequisite: E T 306.

Corequisite: E T 396.

E T 402. Instrumentation**3 Credits (2+3P)**

Sensors/transducers, signal conditioning and transmission for measurement and control systems. Student project in an area of instrumentation and/or control is required. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): E T 396 or E T 398.

E T 410. Senior Seminar**1 Credit**

Transition from academics to business and industry. Graded S/U.

Prerequisite: senior standing in E T.

E T 412. Highway Technology**3 Credits**

Road-vehicle performance, geometric alignment, traffic analysis, highway materials, pavement design, and plan and profile development. May be repeated up to 3 credits.

Prerequisite(s): E T 354.

E T 415. Manufacturing Management and Productivity**3 Credits**

Projects incorporating concurrent engineering, total quality management, design for manufacturability/assembly, and other contemporary topics in manufacturing.

Prerequisites: senior standing in E T.

E T 418. Applied Hydraulics**3 Credits**

Introduction to hydrology, hydraulic equations, hydraulic cross-sections, control structures, and collection and distribution of water, wastewater, and storm runoff using closed conduit and open channel flow.

Prerequisite(s): E T 308.

E T 420. Senior Internship**1-6 Credits**

Internship requiring an approved number of hours of varied and progressive experience in the field of study. The scope and other requirements of the internship are stated in an individualized syllabus and through a memorandum of understanding between the faculty mentor and the industry partner. Taken in the senior year of program.

Prerequisites: Senior standing in E T.

E T 421. Senior Project**3 Credits**

Project in an area of civil engineering technology conducted under the direction of civil engineering technology faculty member. Project must be one that can be completed within a semester and of sufficient complexity for 3 credits. Taken last semester of program.

E T 426. Analysis and Design of Machine Elements**3 Credits (2+3P)**

Analysis and design of power transmission components, including: gears, sprockets, belts, chains, bearings, and shafts. Experiential design project using SolidWorks and Excel modeling. May be repeated up to 3 credits.

Prerequisite(s): E T 210, E T 241, and E T 310.

E T 432. Applied Design of Structures II**4 Credits (3+3P)**

Continuation of E T 332. Design of structural systems and study of their responses. Wood and masonry systems included. May be repeated up to 4 credits.

Prerequisite(s): E T 332.

E T 435. Senior Project**3 Credits (2+3P)**

Capstone course. Practical application of student's cumulative knowledge to an assigned design projects. Design principles, teamwork, and project management skills are stressed. Demonstration of written and oral communication skills via project documentation and presentation of results. Must be graduating senior. May be repeated up to 3 credits. Consent of Instructor required.

E T 439. Advanced Digital Forensics and Incident Response**3 Credits**

Advanced topics in digital forensics and incident response on Windows, Linux and Mac OS X and mobile devices. Topics include: Memory analysis, registry analysis, timeline analysis, malware analysis, Linux and Mac artifacts, mobile device forensics. May be repeated up to 3 credits.

Prerequisite(s): E T 339 and E T 377.

E T 440. Senior Design**2 Credits (1+2P)**

Team design of a system, mechanism, or model that will be fabricated or simulated during the following semester in E T 441. Pre/

Prerequisite(s)/Corequisite(s): E T 444 and E T 402. Restricted to: ET C,ET E,ET M,ET U majors.

E T 441. Senior Project**2 Credits (1+2P)**

Team fabrication or simulation, testing, and debugging of a system, mechanism or model designed in E T 440.

Prerequisite(s): E T 440.

E T 444. Hardware and Software Senior Design**3 Credits (2+3P)**

The design, development, implementation, documentation and formal demonstration of a microprocessor-based application to solve an engineering problem. Emphasis on microprocessor architectural concepts and software interfacing. A student project is required

Prerequisite(s): E T 344 and E T 398.

E T 454. Advanced Construction Technology**3 Credits**

Contractor design and construction methods concerning formwork, special foundations, shoring, excavations, pilings, steel erection, and various material handling components.

Prerequisite: E T 354 and E T 355.

E T 455. Cost Estimating and Scheduling**3 Credits**

Methods and techniques in construction estimating including final bid preparation, construction planning and scheduling using various network methods and other techniques.

Prerequisite: junior or senior standing in E T.

E T 456. Applied Power Technologies**4 Credits (3+3P)**

Basic elements of modern power systems, energy sources, substation configuration, load cycles, and three-phase circuits. Students will gain experience in power factor correction, transmission line configurations and impedance, voltage regulation of transformers, and the per-unit system. Study of load flow, fault analysis, and economic operations is included May be repeated up to 4 credits.

Prerequisite(s): (MATH 235 or MATH 191G) and E T 272 and ((PHYS 212G or PHYS 216G) and (PHYS 212GL or PHYS 216GL)).

E T 457. Information Security**3 Credits**

Introduction to information security concepts including penetration testing and ethical hacking.

Prerequisite(s): E T 362 and E T 339.

E T 458. Database Technology for Engineering**3 Credits**

MySQL and PHP. Data conversion using PHP, mysql and Python. Methods of transferring data from electronic boards and data feeds, into databases. Use of SQL in java programming. Remote programming of computers for running database systems in a mixed OS environment. Generation of web pages directly from Database queries.

Prerequisite(s): E T 362 and E T 160.

E T 462. Web Technologies and Multimedia**3 Credits**

Introduction to web technologies and multimedia. May be repeated up to 3 credits.

Prerequisite(s): E T 160.

E T 463. Advanced Linux and Python Scripting**3 Credits**

Advanced Linux Includes installation and maintenance of Unix/Linux/Windows versions of Python. Use of Python to solve numerous engineering problems including video and audio. Image manipulation. Using PostScript for image and typesetting development. Integration of C programming with Python.

Prerequisite(s): E T 255 and E T 362.

E T 464. Advanced Windows Server Administration**3 Credits**

Learn about configuration and maintenance of Microsoft Windows Server and related services such as DHCP, DNS, Failover Clusters, Active Directory, Group Policy, File Sharing, Microsoft SQL server, Microsoft Exchange Server, IIS, Network Load Balancing, Backups, Remote Administration, PowerShell scripting and more. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): E T 339. **Prerequisite(s):** E T 362.

E T 472. Intelligent Transportation Systems (ITS)**3 Credits**

Traffic flow theory, telecommunication and information technology application in transportation, system architecture and standards, transportation management, incident and emergency management, corridor management, dynamic route guidance, in-vehicle systems, and traffic signal timing. Consent of instructor required.

E T 477. Computer Networking II**3 Credits**

Advanced concepts in computer network design and applications including managing the campus network, virtual LANs (VLAN), network security, wireless networks, high-speed optical networks, and voice over IP. May be repeated up to 3 credits.

Prerequisite(s): E T 277 or E T 377.

E T 480. Innovation and Product Development**3 Credits**

Experiential product design and development. Students will learn about different types of innovation, business models, and methods for developing products. Students will apply the scientific method to develop a product idea of their own. Students will propose ideas, develop hypotheses, test hypotheses, and iterate until they have validated their product idea or identified a need to pivot. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s)/Corequisite(s): (COMM 265G or COMM 253G or AXED 201G or HON 265G).

E T 482. Advanced Manufacturing**3 Credits (2+2P)**

Fundamentals of computer aided manufacturing (CAM) and computer numerical control (CNC) machining. Students will learn how to program several variants of CNC machines, using both G/M code programming and computer aided manufacturing software. Emphasis will be on the effective design of parts to be made on CNC machines along with a hands on lab to give students experience on CNC machines. Students will individually design, manufacture, and keep items such as keychains, bottle openers, LED clocks, ergonomic handles, and license plates. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): E T 210 and E T 217.

E T 490. Selected Topics**1-3 Credits**

Selected topics in engineering technology and related areas.

Prerequisite: consent of instructor.

SUR 101. Introduction to Surveying Engineering**1 Credit**

Review and discussion of career paths open to surveying engineers. Restricted to: Main campus only.

SUR 201. GPS and Spatial Data Applications**3 Credits**

Overview of spatial data applications based on GPS observations. Emphasis on positioning and navigation using code-phase techniques with handheld receivers. Use of coordinate systems. Students encouraged to have their own GPS handheld unit.

SUR 222. Plane Surveying**3 Credits (2+3P)**

Theory and practice of geomatics as applied to plane surveying in the areas of linear measurements, angle measurements, area determination, differential and trigonometric leveling, and topographic mapping. May be repeated up to 3 credits. Crosslisted with: DRFT 222.

Prerequisite(s): MATH 190G.

SUR 264. Introduction to LIS**3 Credits (2+3P)**

Introduction to land information systems. Land tenure systems, coordinate systems, computer methods. Pre/
Corequisite(s): DRFT 109.

SUR 285. Precise Digital Mapping**3 Credits**

Perform basic photogrammetric mapping, and create digital terrain models. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): SUR 222 or DRFT 222.

SUR 292. Public Land Survey System Boundaries**3 Credits (2+3P)**

Detailed study of the U.S. Public Land Survey System Instructions with special emphasis on New Mexico. Sectionalized land subdivision, corner restoration, and field surveys. Field trips required.

Prerequisite: SUR 222.

SUR 312. Legal Principles and Boundary Law I**3 Credits**

Legal principles of property boundary retracement, and rights-of-way. Systems of law and legal research. Principles of the U.S. Public Land Survey System and manual of Instructions May be repeated up to 3 credits.

Prerequisite(s): SUR 222 or DRFT 222.

SUR 322. Laser Scanning Mapping Technologies**3 Credits (2+2P)**

Perform basic terrestrial & airborne LiDAR scan, LiDAR Technologies and Applications will include ranging technologies such as LiDAR, SAR, and Bathymetry, point cloud data management & extraction, scan registration and processing

Prerequisite(s): SUR 285.

SUR 328. Construction Surveying & Automation Technologies**3 Credits (2+3P)**

Construction Surveying Principles: conventional and machine controlled. Layout alignments, grades, various infrastructure, buildings. Understand error identification, common quality control checks and blunder identification. May be repeated up to 3 credits.

Prerequisite(s): (SUR 222 or DRFT 222) and (MATH 191G or MATH 235).

SUR 330. Computer Applications of Surveying**3 Credits (2+3P)**

Advanced application of concepts and tools used in the manipulation of geospatial data in a computer environment. Topics include the use of surveying-specific software applications for problem solving, analysis and generation of spatial data products. Advanced programming skills in a high level language are presented and applied.

Prerequisite(s): DRFT 109 AND SUR 222, and (MATH 191G or MATH 235) and (C S 187 or E T 262 or E E 161).

SUR 351. Introductory Spatial Data Adjustment I**3 Credits**

Theory of observations/measurements, random error theory, applications of statistical data analysis in surveying, confidence intervals and statistical testing, propagation of random errors. May be repeated up to 3 credits.

Prerequisite(s): (SUR 222 or DRFT 222) and (MATH 191G or MATH 235) and (A ST 311G or STAT 251G).

SUR 361. Introduction to Geodesy/Geodetic Control Surveying**3 Credits (2+2P)**

Horizontal and vertical control network design and consideration. May be repeated up to 3 credits.

Prerequisite(s): (SUR 222 or DRFT 222) and (MATH 191G or MATH 235).

SUR 370. Control Surveying**3 Credits (2+3P)**

Design and use of survey control networks. Includes Horizontal, Vertical and 3D networks. Use of standards in control surveying. History of control surveying.

Prerequisite(s): SUR 222 and (MATH 191G or MATH 235G).

SUR 384. Surveying Practicum**1-3 Credits**

Surveying practice under the direction of a licensed, professional land surveyor requiring 45 hours per credit as per a plan worked out between the student and the surveyor and approved by the Surveying Engineering faculty. Work must be certified by the licensed, professional land surveyor. Requires a written report by the student.

Prerequisites: SUR 222 and junior standing.

SUR 401. Ethics and Professionalism in Surveying and Mapping**3 Credits**

Ethics as applied to the surveying profession. Includes case studies and problems.

Prerequisites: SUR 312, SUR 328, and senior standing.

SUR 412. Advanced Topics in Boundary Surveying**3 Credits (2+3P)**

Advanced land boundary topics including water boundaries, mineral claims, Spanish and Mexican land grants, state and national boundaries.

Prerequisite: SUR 312.

SUR 450. Senior Project**1 Credit**

Research project prepared by student. Includes class presentation. Students will learn how to research after the end of their formal education.

Prerequisite(s): Senior Standing.

SUR 451. Advanced Survey Measurements, Analysis, and Adjustments**3 Credits**

Rigorous analysis of the theory of observations as applied to spatial data, application of least squares adjustments, ability to perform statistical analysis to determine accuracy of final product, constrained/free geospatial data integration, error ellipses, and pre-analysis of spatial data acquisition procedures. May be repeated up to 3 credits.

Prerequisite(s): SUR 351, (MATH 280 or MATH 480).

SUR 452. Spatial Data Integration and Analysis**3 Credits (2+2P)**

Methodologies of geospatial data acquisition and integration, knowledge of applications the source data is intended for, accuracies of acquired spatial data, types and analysis of coordinate transformation models. Integrating datasets for routing analysis, location study analysis, land management and long range plans as well as existing needs related to connectivity and safety. May be repeated up to 3 credits.

Prerequisite(s): SUR 451.

SUR 461. GNSS Positioning**3 Credits (2+3P)**

Logistics of GNSS data collection, the GPS signal, codes and biases, error sources, differences between relative and autonomous GNSS positioning, code phase carrier phase, DGPS static and RTK surveys. Geodetic and GPS standards and specifications GNSS data processing, network adjustments, and evaluation of spatial data accuracy practical applications of GNSS May be repeated up to 3 credits.

Prerequisite(s): SUR 361.

SUR 464. Legal Principles and Boundary Law II**3 Credits**

Concepts of real property, land tenure and ethics, and land registration systems; the function and design of multipurpose cadastre and land information systems. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): SUR 312.

SUR 498. Emerging Technology in Geomatics**3 Credits**

Hydrographic/Bathymetric, Altimetry, Space borne Imaging Systems, Mobile Mapping Systems, Mining and Agriculture Surveying Principles, and advanced ranging data acquisition systems. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor and senior standing.

Name: Engineering Technology and Surveying Engineering (ETSE)

Physical Address:

Ed and Harold Foreman Engineering Complex III
1060 Frenger Mall - Room 130
Las Cruces, NM 88003-1230
Map to ETSE (<https://maps.nmsu.edu/?id=419&type=building>)

Digital Electronic Applications - Undergraduate Minor

A grade of C- (or better) is required in each course (may not be taken S/U). All prerequisites must be met before enrolling in a class. Engineering Technology students can meet most of the requirements for this minor by judicious selection of their technical electives.

For non-ECET majors**Required Courses**

E T 182	Digital Logic	3
E T 282	Digital Electronics	4
E T 362	Software Technology II	3
E T 344	Microcomputer Systems	3
E T 398	Digital Systems	3
E T 444	Hardware and Software Senior Design	3
Total Credits		19

Digital Forensics - Undergraduate Minor

A grade of C- (or better) is required in each class. No courses may be taken S/U. All prerequisites must be met before enrolling in a class. Engineering Technology students can meet most of the requirements for this minor by judicious selection of their electives.

For non-IET majors**Required Courses** 12

E T 255	Linux System Administration
E T 339	Introduction to Digital Forensics and Incident Response
E T 439	Advanced Digital Forensics and Incident Response
ICT 450	Ethical Hacking

Select two from the following list:

6-7

E T 435	Senior Project (topic must be preapproved and related to security) ¹
E T 463	Advanced Linux and Python Scripting
ICT 320	Introduction to Internet Protocols
ICT 457	Introduction to Information Security Technology
PHYS 304	Forensic Physics

Total Credits

18-19

Engineering Technology - Civil - Bachelor of Science in Engineering Technology

CET (<https://et.nmsu.edu/academics/civil-engineering-technology-cet>) students learn to implement current civil engineering practices in design, construction, and project management. They may assist with design and/or supervise the construction of roads, buildings, airports, dams, bridges; and water supply and sewage systems. They take courses in properties of construction materials, blueprint reading, surveying, applied structural design, highway technology, land development, and hydraulics.

The Civil Engineering Technology program is accredited (<https://et.nmsu.edu/accreditation-and-assessment/degree-accreditation-information>) by the Technology Accreditation Commission (ETAC) of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700. www.abet.org (<http://www.abet.org>)

Engineering Technology - Electronics and Computer - Bachelor of Science in Engineering Technology

Electronics and Computer Engineering Technology (<https://et.nmsu.edu/academics/electronics-and-computer-engineering-technology-ecet>) (ECET) curriculum include design, building and testing a wide range of electronic and computer systems including digital and analog system, microprocessor systems, machine or micro-controllers, communications devices, applied power systems, digital signal processing, instrumentation, computer networking. Our program includes a diverse exposure to programming languages such as Java and C as well as the electronic design language of HDL.

The ECET program is accredited (<https://et.nmsu.edu/accreditation-and-assessment/degree-accreditation-information>) by the Engineering Technology Accreditation Commission (ETAC) of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700. www.abet.org (<http://www.abet.org>).

¹ See the required courses (p. 47) section of the catalog for a full list of courses

² Technical electives 300 level and above may come from a pre-approved list (<https://et.nmsu.edu/academics/electronics-and-computer-engineering-technology-ecet>) or see your advisor for other options.

Concentrations are "optional" educational sequences that permit students to focus on particular areas related to their major. Concentrations "may" often be done without additional credits by judicious use of electives and other optional course requirements.

Concentration: Renewable-Energy Technologies

Students can fulfill the requirements for the Renewable Energy Technologies concentration within the ETEC majors by judicious selection of the three required technical electives. The selection of these electives may not require any additional credits beyond those of the major.

Requirements

Select four from the following:		12
E T 365	Building Utilities	
WERC 300	Introduction to Pollution Prevention and Its Application	
WERC 466	Fuel Cell and Hydrogen Technology	
E T 382	Solar Energy Technologies	
E T 384	Wind and Water Energy Technologies	
E T 401 or M E 401	Heating and Air-Conditioning Systems Heating/Air-Conditioning System	
E T 420 or E T 435	Senior Internship Senior Project	
Total Credits		12

² E T 420 Senior Internship must be carried out within a renewable energy field. E T 435 Senior Project must be related to a renewable energy application.

Concentration: Digital Forensics

Students can fulfill the Digital Forensics Concentration requirements by completing the following four courses.

Technical Requirements

ICT 450	Ethical Hacking	3
E T 255	Linux System Administration	3
E T 339	Introduction to Digital Forensics and Incident Response	3
E T 439	Advanced Digital Forensics and Incident Response	3
Total Credits		12

Concentration: Information Security Technology

Students can fulfill the Information Security Technology Concentration requirements by completing the following four courses.

Technical Requirements

C S 478	Computer Security	3
BCIS 482	Management of Information Security	3
ICT 450	Ethical Hacking	3
ICT 457	Introduction to Information Security Technology	3
Total Credits		12

Engineering Technology - Information - Bachelor of Science in Engineering Technology

Information Engineering Technology (IET) (<https://et.nmsu.edu/academics/information-engineering-technology-iet>) focusing on the study related to "information engineering" – its principles, technologies, networks, and applications. It is a vibrant discipline that has a tremendous impact on the economy as well as society. Information Engineering covers the following areas:

- Computer Programming and Coding,
- Database Technology,
- Telecommunications & Networking,

- Internet Technologies & Applications,
- Operating Systems Technology,
- Digital Forensics, and
- Information Security

The Information Engineering Technology program is accredited (<https://et.nmsu.edu/accreditation-and-assessment/degree-accreditation-information>) by the Engineering Technology Accreditation Commission (ETAC) of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700. www.abet.org (<http://www.abet.org>)

Engineering Technology - Mechanical - Bachelor of Science in Engineering Technology

MET (<https://et.nmsu.edu/academics/mechanical-engineering-technology-met>) majors learn theory and applications in the fields of manufacturing, product design and development, power systems, machinery, and fluid technology. Our students take courses in mechanisms and machines, computer aided modeling, heat transfer, and instrumentation, to name a few. They find employment in the design and testing of tools, engines, machines, and other complex mechanical devices. MET represents one of the broadest engineering technology disciplines. Our MET students also learn by designing and racing mini-baja cars, designing and constructing machines to help our farmers, and even building systems in other countries.

The Mechanical Engineering Technology program is accredited (<https://et.nmsu.edu/accreditation-and-assessment/degree-accreditation-information>) by the Engineering Technology Accreditation Commission

(ETAC) of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700. www.abet.org (<http://www.abet.org>)

Concentration: Renewable Energy Technologies

Students can fulfill the requirements for the Renewable Energy Technologies concentration within the ET M majors by judicious selection of the three required technical electives. The selection of these electives will not require any additional credits beyond those of the major.

Requirements

E T 381	Renewable Energy Technologies	3
Select three (9 credits) from the following:		6
E T 365	Building Utilities	
WERC 466	Fuel Cell and Hydrogen Technology	
E T 382	Solar Energy Technologies	
E T 384	Wind and Water Energy Technologies	
E T 401 or M E 401	Heating and Air-Conditioning Systems Heating/Air-Conditioning System	
E T 435 or E T 420	Senior Project Senior Internship	3
Total Credits		12

* E T 420 Senior Internship must be completed within a field of renewable energy field and/or Capstone Design Project must be related to a renewable energy application.

Geomatics - Bachelor of Science in Geomatics

Geomatics (previously known as Surveying Engineering) in the College of Engineering at NMSU will emphasize the techniques and science of measuring the terrestrial and three-dimensional position of points on, above, and below the earth's surface and the distance and angles between them at a high level of precision to aid in the design of infrastructure including roads, bridges and legal boundaries for ownership as well as to meet the educational requirements for employment in industry and registration as a Professional Land Surveyor in the State of New Mexico.

When performing this work, professionals must have an understanding of: the science of geomatics measurement and analysis; the legal principles of boundary location; the laws related to boundaries and land use; and applicable mathematical and computational theories and principles. Geomatics professionals may work for private surveying, construction, and engineering firms, for City, County, State or Federal Highway Departments, for State Lands Commissions, for the US Forest Service and for the US Bureau of Land Management as examples.

The mission of the Department of ETSE is to provide men and women with the rigorous, fundamental education needed to enter and succeed in the Geomatics and related professions. To accomplish this mission, the department will introduce students to the theory and application of recognized geomatics principles.

Geomatics - Undergraduate Minor

Geomatics involves the application of knowledge to the analysis, design and execution of mapping, geomatics, geospatial information systems, and surveying. When performing this work, professionals must have an understanding of: the science of geomatic measurement and analysis; the legal principles of boundary location; the laws related to boundaries and land use; and applicable mathematical and computational theories and principles. Geomatics is made up of positional accuracy, land planning and development concepts pertinent to subdivision science. Geomatics professionals work for private surveying or engineering firms, for City, County, State or Federal Highway Departments, for State Lands Commissions, for the US Forest Service and for the US Bureau of Land Management, among others.

The mission of the Department of ETSE is to provide men and women with the rigorous, fundamental education needed to enter and succeed in the Geomatics and related professions. To accomplish this mission, the department will introduce students to the theory and application of recognized geomatics principles.

Information and Communication Technology - Bachelor of Information and Communication Technology (120 credits)

Information and Communication Technology (ICT) (<https://et.nmsu.edu/academics/information-and-communication-technology-ict>) is a **distance education degree completion program**. The program focuses on the knowledge and experience that is required to design, implement and manage a variety of information systems. The curriculum includes the study of

- networking and network security
- computer hardware,
- application and operating systems software,
- system integration,
- database design and management,

Graduates of the program can expect to enter the workforce with titles that include Information Technologist, Systems or Network Administrator, Project Manager, Database Administrator and Computer Support Specialist.

The ICT program is a distance education program and does not require any on-campus visits. Students who are successful in distance education programs typically are self-motivated, do not rely heavily on face-to-face instruction, work independently, and can remain on schedule. Students must have familiarity with, and access to:

- a high speed Internet connection,
- a sound card, 4G of RAM minimum,
- a microphone/Webcam
- Microsoft Operating System and Office ®.

This program was not designed to be an engineering or engineering technology program, although there is significant overlap with one of the engineering technology programs (IET) offered by the department. Thus, the ICT program differs from all other baccalaureate programs offered by departments in the College of Engineering in that it is **not** accredited by ABET Inc.; however, the ICT program is accredited under NMSU's umbrella accreditation by the Higher Learning Commission (<https://accreditation.nmsu.edu>) of the North Central Association of Colleges and Schools.

The program is designed to be a two-year degree completion educational path to a baccalaureate degree for graduates of computer and technology-related associate degree programs from community colleges or other two-year institutions. It is also a viable degree path for students who have completed the freshmen and sophomore years of computer or technology-related programs at four-year institutions including New Mexico State University.

ICT 360	Operating Systems for ICT	3
ICT 362	Software Technology II	3
ICT 364	Windows Server Administration	3
ICT 377	Computer Networking I	3
ICT 435	Senior Project	3
ICT 450	Ethical Hacking	3
ICT 457	Introduction to Information Security Technology	3
ICT 458	Database Design and Applications	3
ICT 460	Web Technologies and Multimedia	3
ICT 462	Remote Access Operating Systems with Linux	3
ICT 463	Computer Systems Administration	3
ICT 477	Computer Networking II	3

Total Credits	120
---------------	-----

¹ As a completion program, entering students **are expected to have completed two years of college-level work** and satisfied the following requirements: The General Education requirements (p. 47) as well as Viewing a Wider World (p. 49) courses.

Information Security Technology - Undergraduate Minor

A grade of C- or better is required in each course (no courses may be taken S/U). All prerequisites must be met before enrolling in a class. Engineering Technology students can meet most of the requirements for this minor by judicious selection of their electives.

Required Courses

ICT 450	Ethical Hacking	3
ICT 457	Introduction to Information Security Technology	3

BCIS 482	Management of Information Security	3
C S 478	Computer Security	3
Elective - Select two from the following:		6-7
ICT 320	Introduction to Internet Protocols	
C J 424	Forensic Law	
PHYS 304	Forensic Physics	
PHIL 323V	Engineering Ethics	
or C J 425	Issues in Ethics, Law, and Criminal Justice	
E T 435	Senior Project (must be preapproved and information security topic)	
Total Credits		18-19

Manufacturing - Undergraduate Minor

The *Manufacturing Minor* provides students with an augmenting skillset to better facilitate entry-level employment in manufacturing related industries. Students completing the *Minor* also acquire specialized knowledge needed for successful pursuit of a career in the manufacturing sector.

Typical skills gained from *Manufacturing Minor* coursework include: management and coordination of manufacturing processes, design for manufacturing, fabrication and assembly, product design and development, product specification, operations planning, scheduling, material handling, quality control, testing, evaluation and product validation.

A grade of C- or better is required in each course (may not be taken S/U). All prerequisites must be met before enrolling in a course. Engineering Technology students can meet most of the requirements for this minor by judicious selection of their electives.

Required Courses: Select one manufacturing course with any accompanying/embedded lab from the following:		3-4
E T 217 & 217 L	Manufacturing Processes and Manufacturing Processes Lab	
I E 217 & 217 L	Manufacturing Processes and Manufacturing Processes Laboratory	
M E 222	Introduction to Product Development	
Select one from the following:		3
MGT 335V	Business and Government	
MGT 344	Production and Operations Management (note: NOT a VWW course)	
MGT 345V	Quality and Competitiveness: An International Perspective	
Select four from the following:		12
E T 305	Introduction to Product Design	
E T 317	Advanced 3-D Modeling and Design	
E T 415	Manufacturing Management and Productivity	
E T 480	Innovation and Product Development	
E T 482	Advanced Manufacturing	
Total Credits		18-19

Renewable Energy Technologies - Undergraduate Minor

A grade of C- or better is required in each course (no courses may be taken S/U). All prerequisites must be met before enrolling in a class. Engineering Technology students can meet most of the requirements for this minor by judicious selection of their electives. Students may receive credit for only one special topic course (must be renewable content) or internship.

Required Courses

Select any three from the required list		9
E T 381	Renewable Energy Technologies ³	
E T 382	Solar Energy Technologies	
E T 384	Wind and Water Energy Technologies	
E T 386	Sustainable Construction and Green Building Design	
Select 6 credits from the following list:		6
Any extra course from the required list		
C E 256	Environmental Engineering and Science	
C E 356	Fundamentals of Environmental Engineering	
CHME 486	Biofuels	
E T 365	Building Utilities	
E T 396	Heat Transfer and Applications	
or M E 341	Heat Transfer	
E T 456	Applied Power Technologies ³	
or E E 230	AC Circuit Analysis and Introduction to Power Systems	
E T/M E 401	Heating and Air-Conditioning Systems	
WERC 300	Introduction to Pollution Prevention and Its Application	
E E 426	Introduction to Smart Grid	
WERC 466	Fuel Cell and Hydrogen Technology	
I E 490	Selected Topics ¹	
C E 498	Special Topics ¹	
E T 420	Senior Internship ¹	
E T 435	Senior Project ¹	
E T 440	Senior Design ¹	
E T 441	Senior Project ¹	
Select 3 credits from the following: ²		3
AEEC 590	Special Topics ¹	
AG E 337V	Natural Resource Economics	
AG E 420	Special Problems	
ECON 337V	Natural Resource Economics	
E T 360V	Technology in Business and Society	
ECON 384V	Water Resource Economics	
EPWS 380V	Science & Society	
HIST 302V	Science in Modern Society	
HON 378V	Technology and Policy	
PHYS 303V	Energy and Society in the New Millennium	
Total Credits		18

- ¹ Must be related to a renewable energy field and preapproved by faculty advisor.
- ² If the selected class is outside the student's college it may also satisfy a Viewing a Wider World requirement.
- ³ Not available for ECET majors as a required course. Select from other choices

Industrial Engineering

Undergraduate Program Information

Industrial engineers design, develop, install and improve integrated systems. This could be for people, equipment, information, financial resources, software, materials or energy. Industrial engineers work in a variety of manufacturing, health care, utility, retail, government and research settings, therefore the tools and methods of the industrial engineer are both varied and broad. They use knowledge and skills in engineering, mathematics, and physical and social sciences. Industrial engineers also use principles and methods of engineering analysis and design to monitor and improve such systems. New Mexico State University's undergraduate degree program in Industrial Engineering prepares students to join the work force or pursue graduate education while setting the foundation for life-long learning.

Specifically, graduates of the program will be:

- able to apply various industrial engineering techniques in an integrated fashion to solve real world problems in process design and/or improvement;
- able to obtain meaningful employment or enroll in a graduate program; and
- prepared for a long-term, successful career sustained by life-long learning experiences

In addition, the Engineering Accreditation Commission of ABET, Inc. criteria in conjunction with the Institute of Industrial Engineers, requires that:

- baccalaureate degree graduates will be able to demonstrate the ability to design, develop, implement and improve integrated systems that include people, materials, information, equipment and energy;
- industrial engineering curriculums include in-depth instruction allowing students to accomplish the integration of systems using appropriate analytical, computational and experimental practices; and
- that faculty teaching in industrial engineering departments show evidence of understanding professional practice and maintain currency in their respective professional areas. Program faculty must have responsibility and sufficient authority to define, revise, implement and achieve program objectives.

Graduate Program Information

The Department of Industrial Engineering offers graduate work leading to the degrees of Master of Science in Industrial Engineering and Doctor of Philosophy with specialization in industrial engineering. Areas of emphasis include

- computer modeling,
- operations research and systems engineering,
- manufacturing systems,

- quality and reliability engineering.

Departmental admission requirements in addition to those of the Graduate School must be considered on an individual basis because of the diversity of backgrounds of applicants in the program. An applicant should meet or correspond directly with the department as a first step in determining his or her specific admission status. Applicants should present mathematics preparation equivalent to 9 credits of calculus for engineers, 3 credits of differential equations, and 3 credits of calculus-based probability and statistics.

Minimum credit-hour requirements for the master's degree may be met in any of the following ways:

1. 24 semester credits approved course work and 6 semester credits of thesis (I E 599 Master's Thesis) for a total of 30 semester credits,
2. 27 semester credits approved course work and 3 semester credits of project (I E 598 Special Research Programs) for a total of 30 semester credits, or
3. 30 semester credits of approved course work.

Approved course work must meet all requirements of the Graduate School, represent a consistent master's program in relation to a student's graduate study goals as determined through consultation with the graduate program adviser, and be approved by a program committee of the graduate faculty of the department. Programs in the focus areas of engineering management, computer modeling, operations research or manufacturing engineering can be developed with the aid of a faculty advisor.

Departmental facilities and equipment are available to support research efforts of graduate students, including computer terminals and laboratories. In addition to departmental facilities, supporting facilities such as the Manufacturing Technology and Engineering Center and five interdisciplinary Research Clusters are available for research work.

The Ph.D. program is research oriented with the final product being the dissertation. The general information (p. 53) chapter in this catalog describes the Ph.D. The program in industrial engineering also includes the following additions:

- the course work must include at least 12 credits at the 500 level in a related field,
- 6 credits of 600-level research courses covering two areas, and
- 18 credits of 700-level courses following successful completion of the comprehensive examination.

The department does not have any foreign language or research tool requirements. Interested individuals should correspond directly with the department to determine eligibility for admission.

Degrees for the Department

Industrial Engineering - Bachelor of Science in Industrial Engineering (p. 594)

Industrial Engineering - Master of Science in Industrial Engineering (p. 595)

Engineering - Doctor of Philosophy (p. 594)

Minors for the Department

Entrepreneurship - Undergraduate Minor (p. 594)

Associate Professor, Edward Pines, Department Head

Associate Professors Mullen, Pines, Sohn, Valles-Rosales; **Assistant Professors** Kammerdiner, Razzaghi

E. Pines, Department Head, Ph.D. (Penn State)– quality and continuous improvement, technology policy; H. Sohn, Ph.D. (University of Iowa)– operations research, discrete optimization, network design; J. Mullen, Ph.D. (Iowa State)– stochastic processes, quality, improvement, production system design; D. J. Valles-Rosales, Ph.D. (New Mexico State)– manufacturing systems, soft computing technologies, computer integrated manufacturing; A. Kammerdiner, Ph.D. (University of Florida)– statistical analysis, data mining, network science and combinatorial optimization; T. Razzaghi, PhD (Central Florida) Data modeling, health care systems engineering

I E 110. Industrial Engineering Orientation**1 Credit**

Introduction to Industrial Engineering Department, Facility Research and Resources. Overview of where industrial engineering fits into larger view of all of engineering. Introduction to university resources for industrial engineering students. Restricted to majors.

I E 151. Computational Methods in Industrial Engineering**3 Credits**

History, social implications, and application of computers and an introduction to computer programming, word processing, and database management systems. Satisfies General Education computer science requirement.

Prerequisite: MATH 121G.

I E 152. Introduction to Industrial Engineering**2 Credits**

Historical development of industrial engineering, present practice and trends.

Prerequisite: MATH 120.

I E 200. Special Problems-Sophomore**1-3 Credits**

Directed individual projects. May be repeated for a total of 3 credits.

Prerequisite: consent of faculty member.

I E 217. Manufacturing Processes**2 Credits**

Manufacturing methods and industrial processes which include casting, forming and machining. Crosslisted with: E T 217

Prerequisite(s): MATH 121G.

Corequisite(s): I E 217L.

I E 217 L. Manufacturing Processes Laboratory**1 Credit**

Laboratory associated with I E 217.

I E 300. Special Problems-Junior**1-3 Credits**

Directed individual projects. May be repeated for a total of 3 credits.

Prerequisite: consent of faculty member.

I E 311. Engineering Data Analysis**3 Credits**

Methodology and techniques associated with identifying and analyzing industrial data. May be repeated up to 3 credits. C- or better in I E 151, C S 110, or equivalent.

Prerequisite(s): C- or better in MATH 192G.

I E 316. Methods Engineering**3 Credits (2+3P)**

Methods analysis and design. Work measurement techniques. Job evaluation and wage incentive methods.

Prerequisite: I E 311.

I E 330. Environmental Management Seminar I**1 Credit**

Survey of practical and new developments in hazardous and radioactive waste management provided through a series of guest lectures and reports of ongoing research. Restricted to: Main campus only. Crosslisted with: C E 330, CH E 330, E E 330, E S 330, E T 330, M E 330 and WERC 330

I E 351. Applied Problem Solving in Industrial Engineering**3 Credits**

Application of computational techniques to engineering problems including the use of commercial programs in statistics and applied mathematics. Restricted to majors.

Corequisite: I E 311.

I E 365. Quality Control**3 Credits**

Statistical analysis of quality in manufacturing. Acceptance sampling and control charts.

Prerequisite: I E 311 or equivalent.

I E 375. Manufacturing Processes II**3 Credits**

Review of basic manufacturing processes. Advanced topics in casting, forming, machining and joining; major process parameters; economics of processes.

Prerequisite: I E 217 or E T 217.

I E 381. Technology Ventures**3 Credits**

This course looks at how new technology ventures are formed at the individual entrepreneur and corporate levels. It covers the development of science and engineering based ventures from ideas through creating customer value. This is the first course in the Entrepreneurship Minor. The roles of science and engineering specialists in the creation of customer value are defined in preparation for development of technology-based enterprises.

I E 382. Business for the Practicing Engineer**3 Credits**

Business tools and skills, including technology commercialization, patent applications, preparing a technology-oriented business plan, reading and constructing financial documents, modeling and understanding markets, e-commerce, QFD, concurrent engineering, engineer's role in the global economy, and engineer's impact on product design and cost.

Prerequisite: engineering major, junior level or above.

I E 400. Undergraduate Research**1-3 Credits**

May be repeated for a maximum of 6 credits.

Prerequisite: consent of faculty member.

I E 411. Occupational Safety**3 Credits**

Practical methods to improve safety in the workplace. Topics include OSHA and other regulations, hazard recognition, assessment and control, industry standards, risk assessment and safety management. Material is applicable to a variety of workplace settings. This course is intended for College of Engineering students who have completed their lower-division requirements in mathematics, engineering, technology, and basic science. Same as I E 561 with differential assignments. Prerequisite: Junior standing

I E 413. Engineering Operations Research I**3 Credits**

Deterministic operations research modeling including linear and integer programming.

Prerequisite: MATH 192G.

I E 423. Engineering Operations Research II**3 Credits**

Probabilistic operations research modeling, including queuing systems and their optimization; Markov chains.

Prerequisite: I E 311.

I E 424. Manufacturing Systems**3 Credits**

Organization and functions of manufacturing planning and control systems including forecasting, MRP, capacity planning, JIT systems, scheduling, and inventory control.

Prerequisite: I E 311.

I E 451. Engineering Economy**3 Credits**

Discounted cash flows, economics of project, contract and specifications as related to engineering design. Same as CH E 451.

I E 453. Leadership and Motivation**3 Credits**

Theories of leadership and motivation. Motivational programs for complex organizations. Relationships between organizational power, authority, and management styles. Same as MGT 453.

Prerequisite: MGT 309 or consent of instructor.

I E 460. Evaluation of Engineering Data**3 Credits**

Analysis of engineering systems possessing variability, employing regression, analysis of variance, distribution theory, and experimental design methods.

Prerequisite: I E 311 or equivalent.

I E 466. Reliability**3 Credits**

Application of statistical theory to engineering reliability estimation, reliability improvement, and the analysis of reliability test data.

Prerequisite: I E 311 or equivalent.

I E 467. Discrete-Event Simulation Modeling**4 Credits**

Basic modeling concepts, organizations of simulations, input data analysis, random variate generation, simulation design and analysis, model validation, output analysis, and management of simulations. Differentiated graduate assignments. Same as I E 567.

Prerequisite: I E 311 or equivalent.

I E 478. Facilities Planning and Design**3 Credits**

Plant location methods, total process analysis, process integration, materials handling analysis, and traditional and computerized plant layout methodologies. Pre/

Prerequisite: I E 316.

Corequisite: I E 424.

I E 480. Senior Design**3 Credits (2+3P)**

Multi-disciplinary team design project for external clients. Involves semester long activities including major design report and presentation.

Prerequisites: senior standing, I E 467.

I E 490. Selected Topics**1-3 Credits**

May be repeated for a maximum of 9 credits.

Prerequisite: consent of the head of the department.

I E 505. Directed Readings**1-3 Credits**

May be repeated for a maximum total of 6 credits.

Prerequisite: consent of the head of the department.

I E 515. Stochastic Processes Modeling**3 Credits**

Introduction to the use of stochastic processes in the modeling of physical and natural systems. Use of generating functions, conditional probability and expectation, Poisson processes, random walk models, Markov chains, branching processes, Markov processes, and queuing processes in an applied setting.

Prerequisites: I E 311 or equivalent; and MATH 392 or equivalent.

I E 522. Queuing Systems**3 Credits**

Elements and classification of queuing systems, single server models, multi-server models, cost analysis and applications.

Prerequisite: I E 311 or equivalent.

I E 523. Advanced Engineering Economy**3 Credits**

Theoretical basis for engineering economy methods, problems of cost estimation, replacement, nonmonetary factors, and feasibility studies. Same as C E 523.

I E 524. Advanced Production and Inventory Control**3 Credits**

Organization and functions of manufacturing planning and control systems including forecasting, MRP, capacity planning, JIT systems, scheduling and inventory control. Same as I E 424 with differentiated assignments.

I E 525. Systems Synthesis and Design**3 Credits**

Examination of the production management complex in terms of its components and the synthesis of these components into an effective operating unit. Development of input-output models representing the basis structure of all production activities.

I E 530. Environmental Management Seminar**1 Credit**

Same as C E 530, E E 530, CH E 530.

I E 531. Fundamentals of Operations Research Techniques**3 Credits**

Key concepts, terminology, paradigms, and methods of operations research: Linear programming including assignment and transportation algorithms; stochastic analysis, including inventory control and queuing systems; general approaches, including goal, integer, nonlinear and dynamic programming.

I E 533. Linear Programming**3 Credits**

Linear programming problem formulation, simplex algorithm, theory of linear programming, duality, revised simplex algorithm, and sensitivity analysis.

I E 534. Nonlinear Programming**3 Credits**

Theoretical and computational methods to solve optimization problems in engineering, statistics, economics, and operations research. Topics include convexity, optimality conditions, Newton's method, Lagrange multipliers, search algorithms for unconstrained and constrained problems, as well as barrier and penalty methods. Prerequisite: MATH 192G or equivalent

I E 535. Discrete Optimization**3 Credits**

Combinatorial Optimization problems using both integer programming and graph theoretic approaches. Emphasis on modeling and computational algorithms.

I E 537. Large Scale Systems Engineering**3 Credits**

Systems engineering approaches to large-scale complex technological and societal problems. Concepts of interaction and structural graphs, matrices, delta, and Gantt charts. The hall matrix approach, structural concepts, reachability matrices, and cross impact-analysis, modeling and decision making.

I E 539. Fundamentals of Transportation and Routing in Logistics**3 Credits**

Introduction to the conceptual, methodological, and mathematical foundations of transportation and routing problems in logistics system. Emphasis on mathematical modeling and computational algorithms.

I E 545. Characterizing Time-Dependent Engineering Data**3 Credits**

Theory and techniques employed in the characterization of stochastic processes commonly found in engineering applications. Distribution models include exponential, gamma, Weibull, and extreme value. Design and analysis of experiments involving complete and censored data and elevated stress. Analytical techniques include parametric, nonparametric, and graphical approaches with emphasis on modern computer tools. Exact and approximate maximum-likelihood techniques are stressed.

Prerequisite: I E 311 or equivalent.

I E 561. Advanced Safety Engineering**3 Credits**

Regulation as well as qualitative, and quantitative methods to achieve and maintain safety in the workplace. Includes liability, worker's compensation, OSHA, hazard control, safety assessment, cost justification, and system analysis.

Prerequisite: graduate status in engineering.

I E 563. Topics in Engineering Administration**3 Credits**

Study of qualitative and quantitative aspects. Consideration given to philosophical, psychological, political and social implications of engineering administrative decisions.

I E 567. Design and Implementation of Discrete-Event Simulation**3 Credits**

Basic modeling concepts, organizations of simulations, input data analysis, random variate generation, simulation design and analysis, model validation, output analysis, and management of simulations. Taught with I E 467 with differentiated assignments for graduate students.

I E 571. Advanced Quality Control**3 Credits**

Advanced topics in quality control and design of experiments for improvement of quality.

Prerequisite: I E 311 or equivalent.

I E 575. Advanced Manufacturing Processes**3 Credits**

Covers major process parameters in casting, forming, machining, and joining. Process economics and selection of processes design and interactions.

Prerequisite: graduate standing.

I E 590. Selected Topics**1-3 Credits**

May be repeated for a maximum of 9 credits.

Prerequisite: consent of the head of the department.

I E 598. Special Research Programs**1-3 Credits**

Individual analytical or experimental investigations. May be repeated for a maximum total of 6 credits.

Prerequisite: consent of instructor.

I E 599. Master's Thesis**15 Credits**

Thesis.

I E 610. Topics in Operations Research**3 Credits**

Selected topics of current interest, to be designated by subtitle. May be repeated for a maximum of 6 credits.

I E 620. Topics in Computer Modeling**3 Credits**

Selected topics of current interest, to be designated by subtitle. May be repeated for a maximum of 6 credits.

I E 630. Topics in Engineering Management**3 Credits**

Selected topics of current interest, to be designated by subtitle. May be repeated for a maximum of 6 credits.

I E 690. Selected Topics**1-15 Credits**

May be repeated.

Prerequisite: consent of department head.

I E 700. Doctoral Dissertation**15 Credits**

Dissertation.

Website: <http://ie.nmsu.edu/>

Engineering - Doctor of Philosophy

The Department of Industrial Engineering offers the Doctor of Philosophy in Engineering with a specialization in Industrial Engineering. Refer to <http://ie.nmsu.edu> for a program description and current research areas.

Additional Requirements

PhD candidates in the College of Engineering, who have successfully completed their PhD Qualifier Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

Paper #1: An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student's doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.

Paper #2: An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for the Web of Science. Alternatively, one conference paper accepted or published in a national or international conference proceedings.

Entrepreneurship - Undergraduate Minor

The Entrepreneurship Minor is designed to promote entrepreneurship to students across the NMSU campus. The Department of Industrial Engineering coordinates an engineering cluster of electives to support the three required classes offered by the College of Business.

Entrepreneurship

FIN 331	Business Creation and Valuation	3
FIN 332	Entrepreneurial Finance	3
BLAW 330	Entrepreneurial Law	3

Engineering Electives

Select three classes from the following: 9

CHME 449	Intellectual Property for Engineers and Scientists	
E T 480	Innovation and Product Development	
I E 381	Technology Ventures	
I E 382	Business for the Practicing Engineer	

Total Credits 18

Industrial Engineering - Bachelor of Science in Industrial Engineering Requirements (126 credits)

In addition to the university requirements for graduation, a student must have a 2.0 grade-point average in all departmental courses.

General Education

State of New Mexico Common Core

Industrial Engineering - Master of Science in Industrial Engineering

The Department of Industrial Engineering offers the Master of Science in Industrial Engineering with focus areas of manufacturing, operations research and engineering management. Refer to <http://ie.nmsu.edu> for current program offerings and research areas.

Mechanical Engineering and Aerospace Engineering Undergraduate Program Information

The mission of the Mechanical and Aerospace Engineering Department at New Mexico State University is threefold:

- to educate those who will advance knowledge and become the future leaders of industry and academia;
- to conduct both basic and applied research in mechanical and aerospace engineering and related interdisciplinary areas; and
- to provide service to the profession, to the State of New Mexico, to the country, and to the future development of engineering worldwide.

A critical focus within the department is to afford undergraduates of varying backgrounds and abilities every opportunity for achieving success in the mechanical and aerospace engineering professions. To address this focus, the faculty of the Mechanical and Aerospace Engineering Department, with input from other constituents, have established the following program educational objectives that inform the overall undergraduate programs:

- Our graduates will gain relevant employment and/or pursue a graduate degree.
- Our graduates will advance in their level of workplace responsibility.

Graduate Program Information

Graduate programs of study are available leading to the degrees of

- Master of Science and Doctor of Philosophy in Aerospace Engineering,
- the Master of Science in Mechanical Engineering, and
- the Doctor of Philosophy in Engineering with a concentration in Mechanical Engineering.

Areas of active research in mechanical engineering include the following:

- experimental fluids with application to wind power,
- computational fluid dynamics,
- energy systems and components,
- thermal management,
- space transportation,
- modeling and analysis of machining processes,
- micromechanics and cross property connections,
- computational mechanics with application to material properties,
- renewable energy,
- nonlinear dynamics and vibration,
- reduced order modeling in multibody dynamics,
- structural dynamics and fluids,
- robotics,
- composite materials and nanomaterials.

Areas of active research in aerospace engineering include the following:

- computational, theoretical and experimental aerodynamics,
- vortex dynamics,
- flow control,
- aeroelasticity and flutter,

- space dynamics and control,
- spacecraft motion estimation,
- rarefied gasdynamics and space propulsion,
- ground simulation of reduced gravity environments,
- structural health monitoring, and
- unmanned aerial systems.

Laboratory facilities supporting graduate research include a large subsonic wind tunnel, a large water channel, a robotics, controls and UAS lab, a reduced gravity simulation lab, a space dynamics and controls lab, and a composite materials lab. A mechanical testing lab is also available in the College of Engineering.

In addition to fulfilling the basic requirements for admission to the Graduate School, applicants are expected to have an undergraduate degree equivalent to a BS in mechanical or aerospace engineering from a university accredited by ABET. Graduate students whose BS degree is in a discipline other than A E or M E will normally be required to take undergraduate courses in M E or A E in order to prepare for graduate course work; such undergraduate preparatory work will be determined by the graduate coordinator on a case by case basis. A candidate for the master's degree can choose one of two options: a thesis option or a course-only option. Both options require a minimum of 30 credits of graduate study.

Doctoral candidates must complete a program of study determined by the student and his or her advisory committee. The student must successfully pass a written qualifying examination (administered during the student's first year of full-time study) and an oral comprehensive examination administered after approximately 80 percent of the course work is completed. The student must submit and defend an acceptable dissertation based on independent investigation in a field of study approved by the advisory committee. The requirements for the MS and Ph.D. degrees are stated below.

Degrees for the Department

Aerospace Engineering - Bachelor of Science in Aerospace Engineering (p. 601)

Mechanical Engineering - Bachelor of Science in Mechanical Engineering (p. 605)

Aerospace Engineering - Master of Science in Aerospace Engineering (p. 603)

Mechanical Engineering - Master of Science in Mechanical Engineering (p. 607)

Aerospace Engineering - Doctor of Philosophy (p. 603)

Engineering - Doctor of Philosophy (p. 605)

Minors for the Department

Aerospace Engineering - Undergraduate Minor (p. 604)

Mechanical Engineering - Undergraduate Minor (p. 607)

Professor, Ruey-Hung Chen, Department Head

Associate Professor, Gabe Garcia, Associate Department Head

Professor Chen, Ma, Sevostianov; **Associate Professors** Choo, Conley¹, Garcia, Lee, Park, Shashikanth, Shu; **Assistant Professors** Abdelkefi, Drach, Gross, Kota, Kuravi, Sun

Ruey-Hung Chen, Department Head, Ph.D. (Michigan)– combustion and propulsion, gas dynamics and supersonic flows, phase-change heat and mass transfer; A. Abdelkefi, Ph.D. (Virginia Tech)– nonlinear dynamics, energy harvesting, aeroelasticity, fluid-structure interaction, vibration and controls; V. K. S. Choo, Ph.D. (Liverpool)– composite materials, computer applications; E. G. Conley,¹ Ph.D. (Michigan State)– optics and experimental mechanics; B. Drach, Ph.D. (New Hampshire)– mechanics of composite materials, multi-scale modeling and characterization; G. V. Garcia, associate department head, Ph.D. (Texas A&M)– damage detection, experimental mechanics, vibration; A. Gross, DEngr. (Aachen)– computational fluid mechanics, active flow control, and numerical methods; K. Kota, Ph.D. (Central Florida)– heat transfer enhancement, energy efficiency, thermal-fluid interaction on engineered surfaces; S. Kuravi, Ph.D. (Central Florida)– renewable energy, thermal systems, concentrating solar power, thermal desalination, energy storage; Y. S. Lee, Ph.D. (Illinois Urbana - Champaign)– aeroelastically, fluid-structure interaction, nonlinear system identification; O. Ma, Ph.D. (McGill)– dynamics, control, and robotics; Y. H. Park, Ph.D. (Iowa)– design optimization, computational solid mechanics, atomistic and molecular simulations; I. Sevostianov, Ph.D. (St. Petersburg, Russia)– micromechanics of materials, mechanics of biomaterials, mathematical physics; B. Shashikanth, Ph.D. (Southern California)– fluid mechanics, dynamical systems, controls; F. Shu, Ph.D. (Purdue)– experimental fluid dynamics, biofluidics and turbulent flow; L. Sun, Ph.D. (Brigham Young)– unmanned systems, towed cable systems, sensor network, cooperative estimation and control, optimal control.

¹ Registered Professional Engineer (State other than NM)

A E 102. Introduction to Aerospace Engineering

1 Credit

A survey course of aeronautical, aerospace, and astronautical engineering, with an emphasis on basic aerospace concepts and major aerospace principles without going into detailed math and analysis. Students are given the opportunity to listen to guest speakers and participate in projects utilizing the NMSU Ultralight and NMSU wind tunnel. Restricted to: Main campus only.

A E 339. Aerodynamics I

3 Credits

Fluid properties, conservation equations, incompressible 2-dimensional flow; Bernoulli's equation; similarity parameters; subsonic aerodynamics: lift and drag, analysis and design of airfoils. May be repeated up to 3 credits. Restricted to: A E majors.

Prerequisite(s): M E 234 or M E 237 and M E 228 or MATH 392.

A E 362. Orbital Mechanics

3 Credits

Dynamics of exoatmospheric flight of orbiting and non-orbiting bodies; 2-body orbital dynamics and Kepler's laws; orbits in 3 dimensions; orbit determination; orbit design and orbital maneuvers; lunar and interplanetary trajectories. May be repeated up to 3 credits.

Prerequisite(s): M E 228 or MATH 392, M E 234 or M E 237, and M E 261.

A E 363. Aerospace Structures

3 Credits

Advanced concepts of stress and strain, introduction to the analysis of aero structures, complex bending and torsion, thin walled sections and shells, computational techniques. Prerequisites: C E 301

A E 364. Flight Dynamics and Controls**3 Credits**

Fundamentals of airplane flight dynamics, static trim, and stability; spacecraft and missile six degree of freedom dynamics; attitude control of spacecraft. May be repeated up to 3 credits.

Prerequisite(s): M E 228 or MATH 392, M E 234 or M E 237, and M E 261.

A E 400. Undergraduate Research**1-3 Credits (1-3)**

Performed with the direction of a department faculty member. May be repeated for a maximum of 6 credits.

Prerequisite(s): Consent of faculty member.

A E 405. Special Topics**3 Credits**

Topics of modern interest to be offered by the departmental staff. Consent of instructor required.

A E 419. Propulsion**3 Credits**

Propulsion systems, thermodynamic cycles, combustion, specific impulse; principles of gas turbines, jet engines, and rocket propulsion systems. Prerequisites: A E 439

A E 424. Aerospace Systems Engineering**3 Credits**

Basic principles of top down systems engineering and current practice; preliminary and detailed design of aircraft and space vehicles, including requirement, subsystem interaction, and integration, tradeoffs, constraints and non-technical aspects.

Prerequisite(s): A E 362.

A E 428. Aerospace Capstone Design**3 Credits**

Team Project-analysis, design, hands-on build test, evaluate.

Prerequisite(s)/Corequisite(s): A E 447. Prerequisite(s): A E 363 and A E 424.

A E 439. Aerodynamics II**3 Credits**

Principles of compressible flow, momentum and energy conservation; thermal properties of fluids; supersonic flow and shock waves; basics of supersonic aerodynamics.

Prerequisite(s): A E 339, M E 240, and M E 328.

A E 447. Aerofluids Laboratory**3 Credits (2+3P)**

Use of subsonic wind tunnels and other flow to study basic flow phenomena and methods of fluid measurement and visualization.

Prerequisite(s)/Corequisite(s): A E 439. Prerequisite(s): M E 345.

A E 451. Aircraft Design**3 Credits**

Conceptual design of aircraft based on existing designs, empirical relationships, and theory. Dimensioning, structural design, and performance analysis of major subcomponents such as fuselage, wing, and propulsion system. Static stability and control analysis.

Prerequisite(s): A E 339 and A E 363.

A E 509. Individualized Study**3 Credits**

Individualized study covering specialized topics in aerospace engineering. Consent of instructor required. Restricted to A E & M E majors.

A E 510. Special Topics**1-6 Credits (1-6)**

Topics in aerospace engineering. May be repeated for a maximum of 6 credits. Consent of instructor required.

A E 527. Control of Mechanical Systems**3 Credits**

Rigorous introduction to the control of dynamical systems, with a focus on mechanical systems. Includes basic systems theory, controllability, feedback and stabilization, observers and dynamic feedback, and applications of methods to systems of importance in mechanical engineering. Consent of instructor required. Cross-listed with: M E 527

A E 529. Nonlinear and Optimal Control**3 Credits**

Introduction to optimal control theory, Pontryagin's Maximum Principle, control of simple mechanical systems, Lagrangian and Hamiltonian methods, introduction to geometric control-Lie algebras, distributions, controllability and observability. Cross-listed with: M E 529

A E 552. Introduction to Gasdynamics**3 Credits**

Gas kinetics, rarefied gas dynamics, collision dynamics; velocity distribution function, finite rate chemical process; thermal nonequilibrium and chemically reacting flows; introduction to quantum and statistical mechanics; Boltzmann equation and the BGK model; moments of the Boltzmann Equation; the Navier-Stokes Equation; the structure of shock waves.

A E 562. Astrodynamics**3 Credits**

Two-body problem, orbit analysis, and classical orbit determination methods; trajectory design and optimization; orbital maneuvers using impulsive or continuous thrust; relative motion and rendezvous; perturbations and Lagrange planetary equations; interplanetary mission design including gravity assists; introduction to the three-body problem, halo orbits, and invariant manifolds in mission design.

A E 566. Aeroelasticity**3 Credits**

Introduction to aeroelasticity with emphasis on fluid-structure interactions occurring in aircraft. Phenomena considered include flutter/LCD (limit cycle oscillation), buffeting, divergence, and control reversal. Primary emphasis on structural dynamics, with use of simple aerodynamic models.

A E 598. Special Research Programs**1-3 Credits (1-3)**

Individual investigations, either analytical or experimental. May be repeated for a maximum of 6 credits. Restricted to A E & M E majors.

A E 599. Master's Thesis**15 Credits (15)**

Thesis. Graded: Thesis/Dissertation.

A E 600. Doctoral Research**1-15 Credits (1-15)**

This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination. Graded: Thesis/Dissertation.

A E 700. Doctoral Dissertation**15 Credits (15)**

Dissertation. Graded: Thesis/Dissertation.

M E 102. Mechanical Engineering Orientation**1 Credit**

Emphasis on tours of M E labs and NMSU facilities that illustrate possible career paths for mechanical engineers. Students are introduced to department faculty, student organizations, and support services at NMSU. Topics include role of good communication skills, using modern technology, team building, and intellectual property. Students are advised in planning balance of their academic program. Restricted to majors.

M E 159. Graphical Communication and Design**2 Credits (1+3P)**

Sketching and orthographic projection. Covers detail and assembly working drawings, dimensioning, tolerance specification, and design projects. Pre/

Corequisite(s): MATH 190G.

M E 201. Supplemental Instruction to Dynamics**1 Credit**

Optional workshop for students in M E 237. The workshop focuses on problem solving skills associated with M E 237. Course does not count toward departmental degree requirements. May be repeated up to 1 credits. Restricted to Las Cruces campus only.

Corequisite(s): M E 237.

M E 202. Supplemental Instruction to Thermodynamics**1 Credit**

Optional workshop for students in ME 240. The workshop focuses on problem solving skills associated with ME240. Course does not count toward departmental degree requirements. Restricted to Las Cruces campus only.

Corequisite(s): M E 240.

M E 210. Electronics and System Engineering**3 Credits (2+3P)**

Introduction to microcontrollers, measurement systems, motion actuators, sensors, electric circuits, and electronic devices and interfacing. Students required to work individually and in teams to design and test simple electromechanical systems. Restricted to Las Cruces campus only.

Prerequisite(s): MATH 192.

M E 222. Introduction to Product Development**3 Credits (2+3P)**

Introduction to modern methods used in the realization of products. Traditional manufacturing processes, such as metal stamping, turning, milling, and casting are reviewed. Modern methods of rapid prototyping and model making are discussed in context of computer-aided design. Techniques for joining metals, plastics, and composites are discussed. Role of quality control is introduced.

Prerequisite: M E 159.

M E 228. Engineering Analysis I**3 Credits**

Introduction to engineering analysis with emphasis on engineering applications. Topics include ordinary differential equations, linear algebra, and vector calculus with focus on analytical methods. Restricted to Las Cruces campus only.

Prerequisite(s): MATH 291.

M E 234. Mechanics-Dynamics**3 Credits**

Kinematics and dynamic behavior of solid bodies utilizing vector methods.

Prerequisite(s)/Corequisite(s): MATH 291G. **Prerequisite(s):** C E 233.

M E 236. Engineering Mechanics I**3 Credits**

Force systems, resultants, equilibrium, distributed forces, area moments, friction, and kinematics of particles. Pre/ Restricted to: Main campus only.

Prerequisite(s): MATH 192G.

Corequisite(s): PHYS 215G.

M E 237. Engineering Mechanics II**3 Credits**

Kinetics of particles, kinematics and kinetics rigid bodies, systems of particles, energy and momentum principles, and kinetics of rigid bodies in three dimensions. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 291. **Prerequisite(s):** M E 236 or C E 233.

M E 240. Thermodynamics**3 Credits**

First and second laws of thermodynamics, irreversibility and availability, applications to pure substances and ideal gases.

Prerequisite: PHYS 215G.

M E 261. Mechanical Engineering Problem Solving**3 Credits (2+3P)**

Introduction to programming syntax, logic, and structure. Numerical techniques for root finding, solution of linear and nonlinear systems of equations, integration, differentiation, and solution of ordinary differential equations will be covered. Multi function computer algorithms will be developed to solve engineering problems.

Prerequisite(s): MATH 192.

M E 301. Supplemental Instruction to Engineering Analysis II**1 Credit**

Optional workshop for students in ME 328. The workshop focuses on problem solving skills associated with ME328. Course does not count toward departmental degree requirements. May be repeated up to 1 credits.

Corequisite(s): M E 328.

M E 302. Fluids Supplemental Instruction**1 Credit**

Optional workshop for students in ME 338 or AE 339. The workshop focuses on problem solving skills associated with fluid mechanics. Course does not count toward departmental degree requirements.

Corequisite(s): M E 338 or A E 339.

M E 326. Mechanical Design**3 Credits**

Design methodology and practice for mechanical engineers. May be repeated up to 3 credits.

Prerequisite(s): M E 234 or M E 237 and C E 301.

M E 328. Engineering Analysis II**3 Credits**

Advanced engineering analysis with emphasis on engineering applications. Topics include systems of ordinary differential equations, Fourier analysis, partial differential equations, and functions of complex variable with focus on analytical methods. May be repeated up to 3 credits.

Prerequisite(s): M E 228 or MATH 392.

M E 330. Environmental Management Seminar I**1 Credit**

Survey of practical and new developments in hazardous and radioactive waste management provided through a series of guest lectures and reports of ongoing research. Restricted to: Main campus only. Restricted to M E majors. Crosslisted with: C E 330, CH E 330, E E 330, E S 330, I E 330, WERC 330 and E T 330

M E 331. Intermediate Strength of Materials**3 Credits**

Covers stress and strain, theories of failure, curved flexural members, flat plates, pressure vessels, buckling, and composites. May be repeated up to 3 credits.

Prerequisite(s): C E 301 and M E 328 or MATH 392.

M E 332. Vibrations**3 Credits**

Vibration of single and n-degree of freedom systems considering free, forced, and damped motion. Lagrange's equations. Dynamic stability. Controls. Matrix iteration. May be repeated up to 3 credits.

Prerequisite(s): M E 328, M E 234 or M E 237, and M E 261.

M E 333. Intermediate Dynamics**3 Credits**

Three dimensional kinematics and kinetics, orbital motion, Lagrange's equations, dynamic stability, and controls. May be repeated up to 3 credits.

Prerequisite(s): M E 328 and M E 234 or M E 237.

M E 338. Fluid Mechanics**3 Credits**

Properties of fluids. Fluid statics and fluid dynamics. Applications of the conservation equations continuity, energy, and momentum to fluid systems. May be repeated up to 3 credits. Restricted to: M E majors.

Prerequisite(s): M E 234 or M E 237 and M E 228 or MATH 392.

M E 340. Applied Thermodynamics**3 Credits**

Thermodynamic cycles, Maxwell relations, Gibbs and Helmholtz functions, mixtures, psychometrics, chemical reactions, chemical equilibrium.

Prerequisite: M E 240.

M E 341. Heat Transfer**3 Credits**

Fundamentals of conduction, convection, and radiation. Design of heat transfer systems. May be repeated up to 3 credits.

Prerequisite(s): M E 240 and M E 228 or MATH 392.

M E 345. Experimental Methods I**3 Credits (2+3P)**

Emphasis on experimental techniques, basic instrumentation, data acquisition and analysis, and written presentation of results. Includes experiments in dynamics and deformable body mechanics. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): C E 301. **Prerequisite(s):** M E 228 or MATH 392, M E 210, and M E 234 or M E 237.

M E 400. Undergraduate Research**1-3 Credits**

Performed with the direction of a department faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: consent of faculty member.

M E 401. Heating/Air-Conditioning System**3 Credits**

HVAC system design including heating and cooling load calculations, psychometrics, piping, duct layout, and system control. May be repeated up to 3 credits.

Prerequisite(s): M E 340 and M E 341.

M E 405. Special Topics**3 Credits**

Topics of modern interest to be offered by the departmental staff. May be repeated up to 12 credits.

Prerequisite(s): Senior standing.

M E 425. Design of Machine Elements**3 Credits**

Design of machine elements through the application of mechanics. Fatigue and theories of failure. Design projects assigned.

Prerequisite(s): M E 326.

M E 426. Design Project Laboratory I**3 Credits**

Students address a design problem in which innovation and attention to detail are emphasized. Solution of the problem entails applications of mechanics and/or the thermal sciences.

Prerequisite(s)/Corequisite(s): M E 425.

M E 427. Design Project Laboratory II**3 Credits**

Continuation of M E 426.

Prerequisite: M E 426.

M E 445. Experimental Methods II**3 Credits (2+3P)**

Emphasis on experimental techniques, instrumentation and data acquisition in fluid mechanics, heat transfer, and thermodynamics. Laboratory results will be presented in written and verbal formats.

Prerequisite(s): (M E 338 or A E 339), M E 340, M E 341, and M E 345.

M E 449. Mechanical Engineering Senior Seminar**1 Credit**

Senior seminar course covering topics relevant to graduating mechanical engineering seniors (job placement, interviewing techniques, resume preparation).

Prerequisite: senior standing.

M E 452. Introduction to Automation and Control System Design**3 Credits (2+3P)**

Control system design and implementation. Emphasis on practical applications of traditional control algorithms to mechanical engineering applications in thermofluid systems and mechanical systems. Design of feedback analog and digital control systems. Introduction to robots and automation. Lab assignments include programming industrial robotic and automation systems. May be repeated up to 3 credits.

Prerequisite(s): M E 328 and M E 234 or M E 237, or consent of instructor.

M E 456. Experimental Modal Analysis**3 Credits**

Emphasis on hands-on techniques for structural vibration tests for practical applications. Interpretation of experimental results by means of advanced signal processing tools, basic system identification methodology, and reduced-order modeling procedures. May be repeated up to 3 credits.

Prerequisite(s): M E 332, M E 228 or MATH 392, and M E 261, or consent of instructor.

M E 460. Applied Finite Elements**3 Credits**

Introduction to the practical aspects of structural finite element modeling. Course focuses on providing a working knowledge of how to effectively incorporate finite element techniques into the design process. May be repeated up to 3 credits.

Prerequisite(s): M E 425.

M E 481. Alternative and Renewable Energy**3 Credits**

Current and future energy needs of the United States and the world will be considered primarily from the standpoint of renewable energy sources such as solar, wind, ocean, and biomass. Technical, economic, and environmental aspects of each technology will be addressed.

Prerequisite(s): M E 341, and (M E 338 or A E 339).

M E 483. Introduction to Combustion**3 Credits**

Combustion is one of the most fundamental phenomena related to human activities, such as obtaining thermal energies. Fundamental phenomena and physics related to combustion will be discussed, including thermodynamics, chemical reactions; combustion kinetics, premixed and diffuse flames, and examples. May be repeated up to 3 credits.

Prerequisite(s): CHEM 112G, M E 228 or MATH 392, and M E 340.

M E 487. Mechatronics**3 Credits (2+3P)**

Introduction to the analysis and design of computer-controlled electromechanical systems, including data acquisition and conversion, force and motion sensors, actuators, mechanisms, feedback control, and robotic devices. Students required to work in teams to construct and test simple robotic systems. May be repeated up to 3 credits.

Prerequisite(s): M E 210 or E E 201 and M E 345.

M E 502. Elasticity I**3 Credits**

Introduction to stress tensor, strain tensor, constitutive law, energy theorems, plane stress and plane strain. Also covers torsion of shafts and propagation of stress waves in elastic solids.

M E 503. Thermodynamics**3 Credits**

A comprehensive study of the first and second laws of thermodynamics, nonequilibrium processes, equations of state, and statistical thermodynamics.

M E 504. Continuum Mechanics**3 Credits**

Basic introduction to the Mechanics of Continuous Media. Its aim is to prepare the student for more advanced courses in Solid and Fluid Mechanics. The topics to be covered include: introduction to Cartesian tensors, tensor algebra and calculus; Lagrangian and Eulerian kinematics; Cauchy and Piola-Kirchhoff stresses; general principles of conservation; constitutive theory for ideal fluids, Newtonian and non-Newtonian fluids, finite and linear elasticity.

M E 505. Fundamentals of the Theory of Plasticity**3 Credits**

Basic concepts in continuum mechanics, equations of the plastic state, equations of elastic-plastic equilibrium, criteria for yielding, initial and subsequent yield surfaces, two-dimensional and axi-symmetric plasticity problems, dynamic problems.

Prerequisite(s): M E 502.

M E 509. Individualized Study**3 Credits**

Individualized study covering specialized topics in mechanical and aerospace engineering. Consent of instructor required.

M E 510. Special Topics**1-6 Credits**

Topics in mechanical engineering. May be repeated for a maximum of 6 credits.

Prerequisite: consent of the department head.

M E 511. Dynamics**3 Credits**

An advanced study of the dynamical behavior of systems of particles and rigid bodies, with emphasis on the theoretical background of dynamics.

M E 512. Vibrations**3 Credits**

Free and forced vibrations for discrete and continuous systems with single or multiple degrees of freedom. Introduction to nonlinear and random vibration and solution techniques for such systems.

M E 514. Advanced Composite Materials**3 Credits**

Study on the anisotropic elasticity, strength of anisotropic materials and micromechanics. Topics from micromechanics and macromechanics through lamination theory and examples of plate bending, buckling and vibration problems. Course taught on an as-needed basis.

M E 517. Nonlinear Dynamics and Chaos**3 Credits**

Singular points, periodic solutions, stability, and local bifurcations for ODEs and maps; phase space methods, invariant manifolds, and Poincare maps; nonsmooth, periodic, time-delay, and Hamiltonian systems; perturbation, averaging, and harmonic balance methods; center manifold reduction and normal forms; strange attractors, Liapunov exponents, attractor dimension; dissipative and Hamiltonian chaos

M E 518. Finite Element Analysis**3 Credits**

Introduction to finite element method. Topics include mathematical modeling, variational formulation, shape functions, truss, beam, solid, and shell elements. Includes static, dynamic, and nonlinear analysis.

M E 520. Micromechanics**3 Credits**

The course covers fundamentals of micromechanics: point force solution, Eshelby's problem, various approximate methods to calculate effective material properties of inhomogeneous materials, variational principles of the mechanics of composites. The history of micromechanics is discussed from Navier and Cauchy to current state of the art.

Prerequisite(s): M E 502.

M E 527. Control of Mechanical Systems**3 Credits**

Rigorous introduction to the control of dynamical systems, with a focus on mechanical systems. Includes basic systems theory, controllability, feedback and stabilization, observers and dynamic feedback, and applications of methods to systems of importance in mechanical engineering. Consent of Instructor required. Crosslisted with: A E527.

Prerequisite(s): M E 452 or equivalent, or consent of instructor.

M E 529. Nonlinear and Optimal Control**3 Credits**

Introduction to optimal control theory, Pontryagin's Maximum Principle, control of simple mechanical systems, Lagrangian and Hamiltonian methods, introduction to geometric control-Lie algebras, distributions, controllability and observability

M E 530. Intermediate Fluid Mechanics**3 Credits**

Application of exact and empirical solutions to fundamental flow problems, including viscous and inviscid behavior. These applications establish a theoretical basis for the origin and physical role of common terms in the governing equations.

M E 533. Computational and Theoretical Fluid Mechanics**3 Credits**

Application of fluid mechanics theory and computational approaches to advanced flow problems, including viscous/inviscid and laminar/turbulent behavior. Complex flow problems addressed through development of a theoretical formulation, followed by application of computational fluid dynamic (CFD) tools, and finally presentation and validation of solution data.

Prerequisite: M E 530 or consent of instructor.

M E 534. Advance Computational Fluid Dynamics**3 Credits**

Advanced techniques for large-scale numerical simulations of fluid flows: spectral numerical methods, including Fourier and other expansions, Galerkin and collocation projections, computational methods to solve incompressible and compressible Navier-Stokes equations, high-resolution methods for hyperbolic equations with discontinuous solutions, and issues related to implementation on supercomputers.

Prerequisite(s): M E 533.

M E 536. Hydrodynamic Stability and Turbulence**3 Credits**

Introduction to fundamentals of hydrodynamic stability, classical linear stability analysis of parallel shear flows and rotating flows, nonlinear stability, basic concepts in turbulence theory

Prerequisite(s): M E 533.

M E 540. Intermediate Heat Transfer**3 Credits**

Fundamentals of conduction, convection, and radiation heat transfer. Emphasis on the application of combined heat transfer to the solution of problems not accessible at the undergraduate level.

M E 570. Engineering Analysis I**3 Credits**

Introduction to engineering analysis with emphasis on engineering applications. Topics include linear algebra, linear ordinary differential equations, and linear partial differential equations with focus on analytical methods.

M E 580. Engineering Analysis II**3 Credits**

Engineering analysis with emphasis on engineering applications. Topics include analytical and numerical methods in linear and nonlinear ordinary and partial differential equations.

Prerequisite: M E 570 or consent of instructor.

M E 598. Special Research Programs**1-3 Credits**

Individual investigations, either analytical or experimental. May be repeated for a maximum of 6 credits.

M E 599. Master's Thesis**15 Credits**

Thesis.

M E 600. Doctoral Research**1-15 Credits**

This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination.

M E 698. Special Research Programs**1-3 Credits**

May be repeated for a maximum of 6 credits.

M E 700. Doctoral Dissertation**15 Credits**

Dissertation.

Aerospace Engineering - Bachelor of Science in Aerospace Engineering

The aerospace engineering program prepares students for a range of professional engineering careers in aerospace and related professions. The aerospace engineering curriculum covers the important classical areas of low and high speed aerodynamics, propulsion, orbital mechanics, flight mechanics and control, aerospace structures and laboratory practice. In addition, the principles of systems engineering and design that are necessary to conceive, design, analyze and troubleshoot complex engineering systems are covered extensively and are considered to be especially important in the overall educational experience. Students will also be encouraged to participate in significant non-classroom experiences, including:

- co-ops and internships;
- industrial and laboratory field trips;
- guest speakers from outside NMSU;
- the New Mexico Space Grant Program;
- special seminar programs on current topics in aerospace.

Aerospace engineers find employment in areas of launch vehicles, space vehicles and missions, aircraft systems design, land and sea vehicle design, robotics and automated manufacturing, safety and other areas. The aerospace engineering background also allows graduates to pursue careers in non-aerospace fields of engineering. Graduates of the aerospace engineering program will be prepared to apply the following skills to problems of interest either in the industry or research and development:

- engineering sciences,
- mathematics,
- computational methods,
- modern experimental methods,
- effective communication skills and
- systems engineering principles.

The aerospace engineering program is also intended to prepare students to pursue graduate study, which can be of significant benefit in the aerospace profession. The general goals of the aerospace engineering program, as well as the program educational objectives, are the same as those stated above for the mechanical engineering program.

Requirements (131 Credits)

In addition to the NMSU and College of Engineering requirements for graduation, a student must obtain a minimum grade of C- in all math, science, and engineering courses applied toward their BSAE and/or ME minor.

General Education

State of New Mexico Common Core

Aerospace Engineering - Doctor of Philosophy

The student's academic program is not judged satisfactory unless it prepares the student to contribute to the advancement of knowledge in the field of Aerospace Engineering. The Degree of Doctor of Philosophy is

indicative of distinguished achievement in the areas of scholarship and original research. Therefore, a dissertation of high quality is required of all doctoral students in Aerospace Engineering. Students must follow the degree requirements listed below to complete the Ph.D. course of study.

- A minimum of 36 credit hours of coursework (500 level or above) beyond the Bachelor of Science degree, at least 18 of which must support the student's research area.
- A minimum of 24 credit hours of research, A E 700 Doctoral Dissertation, which may include a maximum of 6 credit hours of A E 600 Doctoral Research. A E 600 Doctoral Research is intended for those students who have not completed the qualification examination, a prerequisite for A E 700 Doctoral Dissertation.
- A student is required to have one refereed journal paper accepted and a second one accepted or in review by graduation. The Ph.D. dissertation can be a compilation and reformatted version of these published or accepted journal papers. Exceptions may be made on case by case basis by the Department Head.

Ph.D. Program Transfer Credits

A student who has completed a Master of Science degree in M E, A E, or a closely related field may transfer up to 24 credits of graduate coursework, approved by the student's advisor, into a Ph.D. program of study.

Selection of Permanent Ph.D. Advisor

Newly admitted graduate students will be assigned a temporary advisor for the first semester. The student must select a permanent advisor before registering for the second semester. In selecting a permanent advisor, the student should arrange to meet with several members of the graduate faculty during the first six weeks of enrollment to discuss specific objectives. The student should use these meetings to become familiar with faculty research interests and research projects currently in progress. The faculty member must consent (in writing) to serve as the student's advisor.

Policies governing the Ph.D. written qualifying examination, the Ph.D. written and oral comprehensive examination, the student's Ph.D. committee, and the Ph.D. dissertation are contained in the department's Graduate Program website.

Additional Requirements

PhD candidates in the College of Engineering, who have successfully completed their PhD Qualifier Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

Paper #1: An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student's doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.

Paper #2: An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for the Web of Science. Alternatively, one conference paper accepted or published in a national or international conference proceedings.

Aerospace Engineering - Master of Science in Aerospace Engineering

Students may select one of two options for completing their MS degree. Selection of a particular option must be made during the first semester of study in conjunction with selecting a permanent adviser.

Thesis Option

Requirements

M E 570	Engineering Analysis I	3
Select at least 18 credits of A E graduate courses ¹		18
Select one or both from the following:		
A E 509	Individualized Study	3
A E 510	Special Topics ²	6
Total Credits		30

¹ Up to 6 credits of M E graduate courses may be substituted with the approval of the Graduate Coordinator. All course must be 500 level or above.

² Special topics courses offered formally on a one time basis.

Publication Requirement: a refereed conference paper accepted or a refereed journal article in review or accepted by graduation. The MS thesis can be a reformatted version of this paper. Exceptions may be made on a case by case basis by the department head.

A E 527	Control of Mechanical Systems
A E 566	Aeroelasticity

Mechanics

Select one from the following:		
--------------------------------	--	--

M E 502	Elasticity I
M E 504	Continuum Mechanics

Engineering Analysis

Select one from the following:		
--------------------------------	--	--

M E 518	Finite Element Analysis
M E 580	Engineering Analysis II

Additional Requirements

Select 4 additional A E courses (500 level or above) from the following: ³	12
---	----

Core Courses listed above

Research Area Courses

A E 509	Individualized Study	
A E 510	Special Topics	
Select one course (500 level or above) from related areas ⁴		3
Total Credits		30

³ Graduate M E courses may be substituted for A E courses with the approval of the Graduate Program Coordinator.

⁴ If course is not in A E or M E program, approval of the Graduate Program Coordinator is required.

Selection of MS Option and Permanent Adviser

Newly admitted graduate students will be assigned a temporary advisor for the first semester, but they must select a degree option and permanent advisor before registering for the second semester.

In considering a decision about option and advisor, the student should arrange to meet with several members of the graduate faculty during the first six weeks of study to discuss specific educational objectives. The student can use these meetings to become familiar with faculty interests and research projects currently in progress. The faculty member must agree (in writing) to serve as the student's advisor.

All students must pass a final examination. The final examination is to be conducted by the student's advisory committee and is taken after completing all coursework and thesis work for the thesis option, or all coursework for the course-only option.

Engineering - Doctor of Philosophy

Concentration: Mechanical Engineering

The student's academic program is not judged satisfactory unless it prepares the student to contribute to the advancement of knowledge in the field of Mechanical Engineering. The Degree of Doctor of Philosophy is indicative of distinguished achievement in the areas of scholarship and original research. Therefore, a dissertation of high quality is required of all doctoral students in Mechanical Engineering. Students must follow the degree requirements listed below to complete the Ph.D. course of study.

- A minimum of 36 credit hours of coursework (500 level or above) beyond the Bachelor of Science degree, at least 18 of which must support the student's research area.
- A minimum of 24 credit hours of research, M E 700 Doctoral Dissertation, which may include a maximum of 6 credit hours of M E 600 Doctoral Research. M E 600 Doctoral Research is intended for those students who have not completed the qualification examination, a prerequisite for M E 700 Doctoral Dissertation.
- A student is required to have one refereed journal paper accepted and a second one accepted or in review by graduation. The Ph.D. dissertation can be a compilation and reformatted version of these published or accepted journal papers. Exceptions may be made on case by case basis by the Department Head.

Ph.D. Program Transfer Credits

A student who has completed a Master of Science degree in M E, A E, or a closely related field may transfer up to 24 credits of graduate coursework, approved by the student's advisor, into a Ph.D. program of study.

Selection of Permanent Ph.D. Advisor

Newly admitted graduate students will be assigned a temporary advisor for the first semester. The student must select a permanent advisor before registering for the second semester. In selecting a permanent advisor, the student should arrange to meet with several members of the graduate faculty during the first six weeks of enrollment to discuss specific objectives. The student should use these meetings to become familiar with faculty research interests and research projects currently in progress. The faculty member must consent (in writing) to serve as the student's advisor.

Policies governing the Ph.D. written qualifying examination, the Ph.D. written and oral comprehensive examination, the student's Ph.D. committee, and the Ph.D. dissertation are contained in the department's Graduate Program website.

Additional Requirements

PhD candidates in the College of Engineering, who have successfully completed their PhD Qualifier Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

Paper #1: An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student's doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.

Paper #2: An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for the Web of Science. Alternatively, one conference paper accepted or published in a national or international conference proceedings.

Mechanical Engineering - Bachelor of Science in Mechanical Engineering

The mechanical engineering program prepares students for a wide range of professional engineering careers in such areas as: research and development; design; facilities operation and maintenance; management; and production. Graduates of the program will be prepared to apply engineering sciences, mathematics, computational methods, modern experimental methods, and effective communication skills to problems of interest in industry as well as government or scholarly topics. Employment opportunities for graduates are extensive. These opportunities include: energy and utility; manufacturing; automotive; aerospace; defense and space; research and development; and many others. The emphasis in the curriculum is on engineering sciences (solid mechanics, thermal sciences, fluid mechanics and materials science); mathematics; engineering analysis; engineering design; general sciences; and communication balanced with general education topics and electives. Graduates of the program will also be prepared for graduate studies (subject to grade-point and standardized test qualifications). Students will be prepared to take the fundamentals of engineering examination (and are encouraged to do so) as a step towards professional registration.

Requirements (131 Credits)

In addition to the NMSU and College of Engineering requirements for graduation, a student must obtain a minimum grade of C- in all math, science and engineering courses applied toward their BSME and/or AE minor.

COLLEGE OF HEALTH AND SOCIAL SERVICES

Dean - *Donna Wagner*

Associate Dean for Academic Affairs - *Karen Kopera-Frye*

Assistant Dean for Advancement - *Jennifer Cervantes*

Director of Finance - *Aida Lopez*

Coordinator of Student and Academic Programs - *Sarah Baker*

The College of Health and Social Services brings together associated disciplines and professional fields of study directly applied to the improvement of the quality of life and its existence in rapidly changing family and community environments. The college includes the Department of Public Health Sciences, and the Schools of Nursing and Social Work.

Bachelor Degree Graduation Requirements

Three bachelor degree programs are available. To be awarded a bachelor degree in any of the three programs (i.e., Bachelor of Public Health, Bachelor of Science in Nursing, and Bachelor of Social Work) you must:

1. Complete the requirements for the degree as shown by the department in which the degree is offered including a minimum of 48 credits of upper-division courses (numbered 300 and above) and the minimum total number of credits required for the degree.
2. Complete the general education common core (p. 47) presented in the general education section of this catalog, the specific general education courses that may be required by each department, and Viewing a Wider World requirements specified elsewhere in this catalog.¹
3. Complete any other requirements for graduation as discussed under Regulations in the General Information chapter of this catalog.

¹ Students must check with their academic advisor for current requirements and lists of specific courses that meet these requirements.

While the ultimate responsibility for planning an academic program in compliance with university, college, and departmental requirements rests with you, the college recognizes the importance of helping you work out appropriate academic programs. All Health and Social Service students pursuing baccalaureate degrees are advised about academic matters in their respective department. Students are encouraged to contact departments for specific subject area information and career planning.

Bachelors Degrees

Bachelor of Public Health (p. 626)

Bachelor of Science in Nursing (p. 609)

Bachelor of Social Work (p. 632)

Masters Degrees

Master of Public Health (p. 626)

- Community Health Education
- Health Management and Administration & Policy

Master of Science in Nursing - Nursing Administration (p. 609)

Master of Social Work (p. 632)

Dual Degrees

Master of Public Health/ Master of Social Work (p. 626)

Graduate Certificates

- Family Nurse Practitioner (p. 609)
- Family Psychiatric/Mental Health Nurse Practitioner (p. 609)
- Graduate Public Health (p. 626)

Doctoral Degrees

Doctor of Nursing Practice

- Adult/Geriatric Nurse Practitioner
- Family Psychiatric/Mental Health Nurse Practitioner
- Family Nurse Practitioner
- Public/Community Health Nursing

Doctor of Philosophy-Nursing (p. 609)

Undergraduate Minors

- Gerontology (p. 626)
- Public Health Sciences (p. 626)
- U.S.-Mexico Border Health Issues (p. 626)

Graduate Minors

- Alcohol and Drug Counseling (p. 632)

Accreditation

Within the College of Health and Social Services, the baccalaureate degree program in the School of Nursing is accredited by the Commission of Collegiate Nursing Education (CCNE). The baccalaureate degree program in the School of Social Work is accredited by the Council on Social Work Education. The Bachelor of Public Health degree program in the Department of Public Health Sciences is accredited by the Society for Public Health Education/American Association of Health Education Baccalaureate Program Approval Committee.

Nursing

Undergraduate Program Information

NMSU's School of Nursing offers a Bachelor of Science in Nursing (B.S.N.) degree. The degree plan provides three options to accommodate either the beginning nursing student, the beginning nursing student with a baccalaureate degree in another field, or the returning registered nurse. Students graduating from the first two options are eligible to take the NCLEX-RN® examination for licensure as a registered nurse upon completion of their program studies. This program is also offered at two additional satellite sites at NMSU Grants, NM and NMSU Alamogordo, NM. Option three is designed for the registered nurse who wishes to complete a BSN.

The Bachelor of Science in Nursing degree program is approved by the New Mexico Board of Nursing and accredited by the Commission on Collegiate Nursing Education (CCNE). Approval by the New Mexico Board of Nursing is required for graduates to be eligible for the National Council Licensing Examination (NCLEX-RN®) for licensure as a registered nurse. Accreditation by the CCNE assures prospective students and employers that the program has met national education standards.

The NMSU SON is a full member of the New Mexico Nursing Education Consortium (NMNEC) and offers the NMNEC BSN curriculum.

Requirements for B.S.N. Program Admission

Requirements and procedures to follow for admission to the four-year B.S.N. program are as follows:

1. Obtain admission to NMSU as a regular student.
2. Contact the pre-nursing advisor in the College of Health and Social Services for complete Nursing Program information and advisement.
3. Satisfy NMSU basic academic competency requirements in English and Math.
4. Complete prerequisite coursework before final admission to the nursing major.
5. Prerequisite science courses must have been completed within the past seven years.
6. Achieve a grade of C- or better in each nursing prerequisite course.
7. Achieve a competitive minimum prerequisite GPA of 2.75 which includes grades earned from all higher education institutions.
8. Prelicensure applicants to the NMSU School of Nursing are required to take a standardized admission exam and to obtain a satisfactory score prior to application to the nursing major.
9. Applicants will be considered for admission to the nursing major during the fall or spring semester of anticipated completion of prerequisite coursework or after prerequisite courses are completed. Applicants for fall semester admission may not finish prerequisites in the summer session immediately preceding the fall semester in which they wish to be admitted.
10. Application deadlines each year are:
 - a. February 1st—for consideration for Fall admission to the nursing major
 - b. September 1st—for consideration for Spring admission to the nursing major
4. Have a minimum of a 3.0 GPA on a 4.0 scale in the required prerequisite Anatomy and Physiology or A&P I and A&P II (8 credits), third science course (3 credits in BIOL, MOLB, CHEM, or PHYS), a Pathophysiology course (3- 4 credits) and Statistics (3 credits). Roadrunner applicants must also obtain a B or better in all prerequisites. All courses must be completed before submitting a nursing application and must not be older than 7 years.
5. Roadrunner students are admitted once a year, in the summer. Pathway option students are admitted in spring or fall semesters. Submit an official application to the second degree option to the School of Nursing Advising Center by February 1st, for consideration for summer Roadrunner admissions. Submission dates for Pathway students are February 1st for fall admission, or September 1st for spring admission to the nursing program.
6. Complete a resume documenting prior education and work experience.
7. A Medical Terminology Course is recommended
8. Applications are considered only after all requested documentation is received by the pre-nursing Advisors.
9. Three letters of recommendation are required.

Graduate Program Information

MSN: The School of Nursing offers graduate course work for nurses leading to a Master of Science in Nursing (MSN) degree. The MSN specialization offered is in Nursing Administration, which is designed to provide students with the knowledge and experience to assume leadership roles in a variety of health care delivery systems. Graduates meet the requirements necessary to teach in basic nursing education programs or manage continuing nursing education programs.

The MSN program is accredited by the Commission on Collegiate Nursing Education (CCNE).

Admission to the MSN program is in accordance with the general regulations of the Graduate School. Additional requirements include a BSN from an accredited college or university; successful completion of an inferential statistics course within the last 5 years; three professional letters of recommendation; a letter stating personal goals for graduate education and intended specialty area; resume identifying clinical practice experience; and proof of licensure or eligibility for licensure as a Registered Nurse in any of the 50 United States, the District of Columbia or U.S. territories.

Application for admission should be submitted online through Admissions. Letters of reference, personal goals, resume, unofficial transcripts and proof of licensure should be uploaded into the Admissions portal. Applicants who are registered nurses without a bachelor's degree in nursing, but with a bachelor's degree in another discipline may be considered for admission on an individual basis. Applicants without a BSN are admitted conditionally.

DNP: The Doctorate in Nursing Practice (DNP) prepares individuals who can assume advanced nursing practice roles within the health care arena in the areas of Family Psychiatric/Mental Health Nurse Practitioner, Family Nurse Practitioner, Adult/Geriatric and Public/Community Health Nursing. The focus of the DNP is on advanced nursing practice directed towards improving nursing care outcomes for individuals, families, communities, and systems. The program emphasizes culturally sensitive practice, evidenced-based practice, and translation of research to practice as it relates to improving the care of individuals, families, groups and communities experiencing or at risk for health disparities. The

NOTE: Admission is competitive and available seats are limited. Priority for admission will be given to applicants with the highest GPAs in the required prerequisite coursework, scores on the standardized admission exam, and to New Mexico residents.

Any applicant not admitted to the nursing major may reapply.

Second Degree : BSN (Pathway option) or the Accelerated 2nd Degree (Roadrunner option)

Requirements and procedures for admission to the two second degree options are as follows:

1. Obtain admission to NMSU as a second bachelor's degree-seeking student with official transcripts
2. Contact the pre-nursing advisors in the School of Nursing Advising Center for advisement on program application and admission.
3. Have a minimum 3.0 GPA on a 4.0 scale in first bachelor's degree

complexity of health care combined with rapidly increasing knowledge and the need for both evidence-based practice and translation of research to practice support the scholarship goals of the Doctorate of Nursing Practice (DNP). For the DNP program, students must also take courses in advanced pathophysiology, advanced assessment, and advanced pharmacology in addition to specialty courses within their area of study. The focus of specific clinical experiences varies with student interest and in consultation with faculty advisors. Students in the DNP program complete a Project.

Ph.D.: The intent of the nursing Ph.D. program is to prepare individuals who can assume leadership roles in academia, including the scholarship of teaching, research, and professional service activities. The focus of the program is on nursing scholarship to facilitate the development of new knowledge directed at improving nursing care outcomes for individuals, families, communities and systems. Holistic nursing scholarship as it relates to improving the care of individuals, families, groups and communities experiencing or at risk for health disparities is emphasized. Students in the Ph.D. program complete a dissertation.

Doctoral Admission Criteria: Admission to the Ph.D. and DNP programs is a competitive process and is subject to the general regulations of the Graduate School. Additional requirements include: an MSN from an accredited college or university for the Ph.D. program; a BSN from an accredited program for the BSN to DNP; and an MSN with clinical certification in a nursing specialty area for the MSN to DNP; a graduate level statistics course for both programs (taken within the last five years); three professional letters of recommendation; a letter stating personal goals for graduate education, completion of writing requirement, interview with nursing faculty, resume identifying practice experience; and proof of licensure or eligibility for licensure as a Registered Nurse in any of the 50 United States, the District of Columbia, or U.S. territories. Students in the Ph.D. program complete a Dissertation. Contact the Graduate Advisor for more information (575) 646-7770.

Post-MSN Specialty Certificates

Post-MSN certificates for the specialties of Family Nurse Practitioner and Family Psychiatric/Mental Health Nurse Practitioner. Contact the Graduate Advisor for more information (575) 646-7770.

Degrees for the Department

Nursing - Bachelor of Science in Nursing (p. 623)

Nursing Administration - Master of Science in Nursing (p. 625)

Family Nurse Practitioner - Graduate Certificate (p. 623)

Family Psychiatric/Mental Health Nurse Practitioner - Graduate Certificate (p. 623)

Nursing Practice - Doctor of Nursing Practice (p. 625)

Nursing - Doctor of Philosophy (p. 624)

Alexa Doig, Director of the School of Nursing

Professors Keller; **Associate Professors** Reinhardt, Summers; **Assistant Professors** DeBlieck, Lynch, Noe, Morales, Saiki, Smith, Kuchler

C. DeBlieck, DNP (U of Minnesota)– nursing informatics and health care technologies; T. Keller, Ph.D. (St. Louis U)– health care policy, health care and nursing administration, professional issues; S. Lynch, Ph.D. (New Mexico State)– women's health and family counseling; S. Noe, DNP (New

Mexico State)– substance abuse and addictions; A. Reinhardt Ph.D.(OHSU)– administration, leadership, organization, work environments; L. Summers, Ph.D. (UT- Houston)– adolescent health and mental health, telehealth; J. Smith, Ph.D. (UNM)-nursing education, health disparities; M. Morales, Ph.D. (NMSU)- pediatrics, family health; L. Saiki, Ph.D. (UNM)- women's health, research; E. Kuchler, DNP (NMSU)- public, and community health

NURS 120. Introduction to Pharmacology

3 Credits

General principles of pharmacology including methods of administration, effect on the body, interactions with other drugs, and classification of drugs. Focus on the health care provider's role in safe pharmacologic intervention. Restricted to Allied Health majors. Restricted to:Community Colleges only.

NURS 130. Foundations of Pharmacology

3 Credits

This course provides the nursing student with an introduction to the foundations of pharmacology including: science of drug action, principles of medication administration, accurate calculation of drug doses, medication therapy across the lifespan, application of medications to treat health alterations, normal and adverse responses by the client to medication therapy, medication safety, medication regulation, national patient safety goals, and appropriate nursing interventions to achieve the desired goals of medication therapy. Only students who have been admitted to the nursing program may enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.

Prerequisite(s): Admission into the Nursing Program.

Corequisite(s): NURS 147 & NURS 149.

NURS 134. Foundation of Nursing Skills and Assessment

3 Credits (1+6P)

This course provides nursing students with introductory nursing knowledge related to performance of nursing skills and assessment including: techniques of fundamental nursing care, basic and intermediate nursing skills, and foundational physical assessment techniques associated with care across the lifespan. Open to students who have been accepted into the nursing program. Restricted to: NUR majors. Restricted to: Community Colleges only.

Prerequisite(s): Admission into the Nursing Program.

Corequisite(s): NURS 136 & NURS 137 or permission of the Program Director.

NURS 136. Foundations of Nursing Practice

6 Credits (4+6P)

This course will introduce the nursing student to foundational theoretical concepts of professional nursing practice, the nursing process, and foundational nursing skills. It includes developmental concepts related to clients across the lifespan. Clinical experiences in the simulation lab, long-term care, the community, and rehabilitation settings will provide the student with the opportunity to apply learned skills to provide total care to meet needs of one adult client and to develop care planning skills related to actual problems. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program may enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.

Prerequisite(s): Admission into the Nursing Program.

Corequisite(s): NURS 134, NURS 136 lab & NURS 137 or permission of the Program Director.

NURS 137. Care of Geriatric Patient**3 Credits**

This course will introduce the nursing student to foundational concepts of age-appropriate/specific care of the older adult who represents the largest population of individuals placing demands on the healthcare system. It includes basic and complex concepts and issues related to care of the older client across the care continuum, provision of cost-effective care in a resource sparse environment. Only students who have been admitted to the nursing program may enroll in this course. Restricted to: NURS majors. Restricted to Community Colleges campuses only.

Prerequisite(s): Admission into the nursing program.

Corequisite(s): NURS 134 & NURS 136 or permission of the Program Director.

NURS 140. Pathophysiology for Allied Health Professionals**3 Credits**

Introduction to the nature of disease and its effect on body systems. Deals with the disease processes affecting the human body via an integrated approach to specific disease entities. Includes a review of normal functions of the appropriate body systems. Diseases are studied in relationship to their etiology, pathology, physical signs and symptoms, diagnostic procedures, complication, treatment modalities, and prognosis. Restricted to Allied Health and Health Information Technology majors. Restricted to: Community Colleges only.

Prerequisite: a grade of C or better in OEHO 140.

NURS 146. Common Health Deviations**6 Credits (4+6P)**

Common health deviations and the manner by which they alter various body functions are explored. The role of the licensed practical nurse in assisting clients with common health deviations is presented. Ethical and legal implications and the role of the practical nurse are also considered. The licensed practical nursing student will utilize the application of knowledge to client care situation both in the subacute and acute care settings. The nursing process is presented as guide for coordinating client care. Grade of C or better. May be repeated up to 6 credits.

Restricted to: NURSING majors. Restricted to Carlsbad campus only.

Prerequisite(s): NURS153, NURS156, NURS154, NURS157, and NURS210 or consent of program director.

NURS 147. Adult Health I**6 Credits (4+6P)**

This course focuses on application of the nursing process and theoretical concepts of care for adults with commonly occurring health problems. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to continue development of: prioritization skills, proficiency in performance of nursing skills, collaborative skills with clients, families, peers and health care team members, care planning skills related to patient actual, psychosocial, and potential problems in the delivery of total nursing care to meet needs of one adult client. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program may enroll in this course. Restricted to: NUR majors. Restricted to Community Colleges campuses only.

Prerequisite(s): Admission into the Nursing Program.

Corequisite(s): NURS 130, NURS 147 lab, & NURS 149, or permission of the Program Director.

NURS 148. Physical Assessment**2 Credits (1+3P)**

Introduction of concepts and techniques of interviewing, history taking, review of body systems, and physical assessment of an adult client. The student should be able to apply knowledge of anatomy and physiology, assessment skills, communication skills, cultural awareness, nursing process, critical thinking skills, teaching skills, and psychomotor skills. Restricted to: Community Colleges only.

NURS 149. Mental Health Nursing**3 Credits (2+3P)**

This course will allow the nursing student to develop skills necessary to provide nursing care for clients with mental health problems in various health care settings including: common mental health disorders, psychosocial dysfunction, psychosocial safety/substance abuse issues, violence, suicide, restraints, developmental age related pathophysiology, psychopharmacology, cultural/religious considerations, grief/loss, promotion of mental health, and therapeutic communication. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to develop ability to develop: proficiency in performance of nursing skills, collaborative skills with clients, families, peers and health care team members, care planning skills related to patient actual, psychosocial, and potential problems in the delivery of total nursing care to meet needs of one client across the life span with acute/chronic mental health needs. Students must be concurrently enrolled in both the lecture and lab sections of this course. Only students who have been admitted to the nursing program may enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.

Prerequisite(s): Admission into the Nursing Program.

Corequisite(s): NURS 130, NURS 147, & NURS 149L, or permission of the Program Director.

NURS 150. Medical Terminology**3 Credits**

Understanding of the basic elements of medical words. Use of medical abbreviations. Same as OEHO 120 and BOT 150.

NURS 153. Medication and Dosage Calculation**1 Credit**

Techniques of dosage calculation for medication and fluid administration. RR applicable.

Prerequisite(s): Meet NMSU basic skills requirement in mathematics or consent of program director.

Corequisite(s): NURS156 and NURS154.

NURS 154. Physical Assessment**2 Credits**

Beginning techniques of physical assessment by systems will be presented using the nursing process as a guide for providing safe client centered care throughout the life span. Grade of C or better is required. May be repeated up to 2 credits. Restricted to: NURSING majors. Restricted to Carlsbad campus only.

Prerequisite(s): BIOL 154 or BIOL 225 or consent of program director.

Corequisite(s): NURS 153, NURS 156.

NURS 155. Special Topics**1-4 Credits**

Specific subjects to be announced in the Schedule of Classes.

NURS 156. Basic Nursing Theory and Practice**6 Credits (4+6P)**

Introduction to the nursing profession and the beginning skills of nursing practice as it relates to normalcy. The nursing process is presented as a means of guiding the student in providing safe client centered care. Ethical and legal aspects of nursing practice are also included. Basic clinical nursing skills will be presented and practiced in the nursing lab. The student will perform these skills with clients in an actual health care setting. May be repeated up to 6 credits. Restricted to: NURSING majors. Restricted to Carlsbad campus only.

Prerequisite(s): Consent of Program Director.

Corequisite(s): NURS 153, NURS 154.

NURS 157. Maternal/Child Health Deviations**8 Credits (6+6P)**

The concepts and principles of nursing care of the family from conception to adolescence. Utilizing the nursing process, the student provides safe client centered care to diverse clients and families. Theoretical instruction is applied to client care situation. Students collaborate with clients, families and the interdisciplinary team in meeting health care needs. Experiences may occur in any of the regional health care facilities. Grade of C or better required. May be repeated up to 8 credits. Restricted to: NURSING majors. Restricted to Carlsbad campus only.

Prerequisite(s): NURS 156, NURS 153, and NURS 154 or consent of program director.

Corequisite(s): NURS 210.

NURS 180. The Adult Client I**8 Credits (4+12P)**

Holistic care of the adult client throughout the lifespan, utilizing the nursing process to address personal wellness and acute alterations in wellness in a variety of health care settings. Laboratory and clinical practicum will focus on application of the nursing process in simulated and real world settings. Restricted to: Community Colleges only.

Prerequisite(s): NURS 170, NURS 172, and NURS 173L.

Corequisite(s): NURS 185.

NURS 182. Legal and Ethical Issues in Nursing Practice**2 Credits**

Introduction to legal and ethical implications of nursing practice (through the holistic approach to wellness) as a registered nurse. Restricted to: Community Colleges only.

NURS 185. Holistic Approach to Pharmacotherapeutic Intervention I**2 Credits**

Level I. Holistic approach to the study of basic pharmacology concepts. Includes pharmacodynamic phases of drug interaction. Nursing process is discussed in relation to medication administration. Special emphasis on the role of the nurse and basic concepts related to specific drug categories. Restricted to: Community Colleges only.

Prerequisite(s): NURS 170, NURS 172, and NURS 173L.

Corequisite(s): NURS 180.

NURS 201. Special Topics**1-4 Credits**

Specific topics to be announced in the Schedule of Classes. May be repeated for a maximum of 10 credits. Restricted to: Community Colleges only.

Prerequisite: admission to the nursing program.

NURS 209. Independent Study**1-4 Credits**

Individual studies to meet identified student needs. May be repeated for a maximum of 10 credits. Restricted to: Community Colleges only.

Prerequisite: admission to the nursing program.

NURS 210. Pharmacological Requisites of the Childbearing Family**1 Credit**

Basic concepts of pharmacology including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics, and their relationship to nursing care will be discussed focusing on medications commonly utilized with the childbearing family. Medication classes to be discussed include labor and delivery, analgesic, vitamins, respiratory, gynecological, endocrine, and anti-microbial/anti-infective drugs. Grade of C or better required. Restricted to: Carlsbad campus only.

Prerequisite(s): BIOL 225 and BIOL 226 or consent of instructor and NURS 153, NURS 154 and NURS 156.

Corequisite(s): NURS 157.

NURS 211. Pharmacological Requisites of Simple Health Deviations**1 Credit**

Basic concepts of pharmacology including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics, and their relationship to nursing care are addressed focusing on medications related to the psychiatric, gastrointestinal, musculoskeletal, gynecological, hematological, and anti-neoplastic client. Grade of C or better required. Restricted to: Carlsbad campus only.

Prerequisite(s): BIOL 225 and BIOL 226 or consent of instructor and NURS 153, NURS 154, NURS 156, NURS 157 and NURS 210.

Corequisite(s): NURS 246 and NURS 258.

NURS 212. Pharmacological Requisites of Complex Health Deviations**1 Credit**

Basic concepts of pharmacology including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics, and their relationship to nursing care is examined focusing on medications related to complex health deviations. Drug classes to be discussed include cardiovascular, renal, endocrine, and neurological. Grade of C or better required. Restricted to: Carlsbad campus only.

Prerequisite(s): BIOL 225 and BIOL 226 or consent of instructor, and NURS 153, NURS 154, NURS 156, NURS 157, NURS 246, NURS 258, NURS 210 and NURS 211.

Corequisite(s): NURS 256 and NURS 260.

NURS 224. Maternal Child Nursing**5 Credits (4+3P)**

This course provides the intermediate nursing student with an in-depth review of care of the childbearing woman, family structures and roles, and nursing care of the child from birth through adolescence. Emphasis includes the care of pre-partum, intra-partum and postpartum clients, the neonate and health deviations in pediatric clients. Clinical experiences in the simulation lab, the community, and acute care settings will provide the student with the opportunity to apply learned skills to provide total care to meet needs of up to two adult, neonatal, or pediatric clients and to apply care planning skills related to actual, psychosocial and potential problems. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program may enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.

Prerequisite(s): Admission into the Nursing Program.

Corequisite(s): NURS 224 lab, NURS 235, & NURS 236, or permission of the Program Director.

NURS 226. Adult Health II**6 Credits (4+6P)**

This course focuses on application of nursing process and theoretical concepts of care for adults with complex health alterations. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to apply: prioritization skills, maintain proficiency in performance of nursing skills, collaborative skills with clients, families, peers and health care team members, and care planning skills related to patient actual, psychosocial, and potential problems in the delivery of nursing care to meet needs of three adult clients. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program may enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.

Prerequisite(s): Admission into the Nursing Program.

Corequisite(s): NURS 224, NURS 226 lab, & NURS 235 or permission of the Program Director.

NURS 234. Community Health Nursing**1 Credit**

This course provides an introduction to community health, focusing on health care systems, epidemiology, and nursing care of individuals, families and aggregates of varied cultural backgrounds. Primary, secondary, and tertiary prevention are emphasized. Diverse roles of the community health nurse are examined. Educational theories and their applications are explored. Restricted to: Community Colleges only.

NURS 235. Nursing Leadership and Management**1 Credit**

This course introduces the intermediate nursing student to professional practice principles of nursing leadership and management including: health policy and politics, fiscal management & budgeting, conflict management, decision making, interdisciplinary practice, working with teams, roles in disaster planning and management, application of standards of care to risk management, organization of care delivery, health care systems, processes, and practice environments. May be repeated up to 1 credits. Restricted to: NUR majors. Restricted to Community Colleges campuses only.

Prerequisite(s): Admission into the Nursing Program.

Corequisite(s): NURS 224, NURS 226 & Clinical Or Permission of the Program Director.

NURS 236. Nursing Preceptorship - Adult Health III**6 Credits (2+12P)**

This course is the final course involving care of the patient with acute or chronic illness. It focuses on care of patients with complex or multi-system problems allowing the graduating nursing student to discuss and apply all the skills learned in previous nursing courses. After successfully passing the HESI exam, students have clinical practice with preceptor in various health care settings. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to: organize care of a group of clients, maintain proficiency in performance of nursing skills, collaborate with clients, families, peers and health care team members, and support care planning skills related to patient actual, psychosocial, and potential problems in the delivery of nursing care to meet needs of the preceptors group of clients. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program and have successfully completed all level 1, 2 and 3 nursing courses may enroll in this course. Clinical may include inpatient or outpatient care, days, evenings, nights, or weekend experiences. Students are required to work the preceptors assigned schedule. Restricted to: NUR majors. Restricted to: Community Colleges only.

Prerequisite(s): Admission into the Nursing Program.

Corequisite(s): NURS 201, NCLEX Review or permission of the Program Director.

NURS 246. Health Deviations I**7 Credits (4+9P)**

Introduction to medical/surgical clients, whose health care needs are routine and predictable. Focus is on simple health deviations, including concepts relative to health promotion and maintenance. The nursing process is utilized to provide evidenced based, safe client centered care. Students are expected to apply clinical judgment, communicate and collaborate with clients and the interdisciplinary team in providing care for a group of two to three clients. Grade of C or better required. May be repeated up to 7 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only.

Prerequisite(s): NURS 153, NURS 156, NURS 154, NURS 157 and NURS 210 or consent of program director.

Corequisite(s): NURS 211, NURS 258.

NURS 256. Health Deviations II**8 Credits (4+12P)**

Concepts and principles applied to clients with complex health deviations. Building upon knowledge gained in NURS 246, focus will be on acutely ill clients. The nursing process continues to serve as a guide to provide safe, client centered care. The student collaborates with the interdisciplinary team in all aspects of client care. Student experiences the role of the staff nurse under the guidance and direction of the nursing instructor. Grade of C or better required. May be repeated up to 8 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only.

Prerequisite(s): NURS 153, 154, 156, 157, 210, 211, 246, and 258 or consent of program director.

Corequisite(s): NURS 212, NURS 260.

NURS 258. Psychosocial Requisites: A Deficit Approach
3 Credits (2+3P)

Nursing theory and practice as it relates to the care of the client experiencing psychosocial health deviations. The role of the nurse is discussed along with the ethical and legal aspects of care for the client with psychosocial disorders. Building upon the communication skills of listening and responding, the student develops the therapeutic skills of interpersonal relationships. Grade of C or better is required. May be repeated up to 3 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only.

Prerequisite(s): NURS 153, 154, 156, 157, 210, 246, and 258 or consent of program director.

Corequisite(s): NURS 211, NURS 246.

NURS 260. Management of Patients with Health Deviations
2 Credits (2)

A capstone course to the nursing program in which principles in management and delegation to less prepared personnel is explored. A review of leadership roles, legal issues, quality initiatives, informatics and scope of practice is included. Preparation for the NCLEX is an integral portion of the course. Grade of C or better is required. May be repeated up to 2 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only.

Prerequisite(s): NURS 153, 154, 156, 157, 210, 211, 246, and 258 or consent of program director.

Corequisite(s): NURS 212, NURS 256.

NURS 270. The Adult Client II
5 Credits (2+9P)

Care of adult clients experiencing chronic, life-threatening, and end-of-life health alterations with emphasis on the geriatric population using a holistic approach to wellness. Nursing process, pathophysiology, pharmacology, diet therapy, and alternative therapies are stressed throughout the course. Clinical component will provide an opportunity to apply the nursing process in both the hospital and community setting. Restricted to: Community Colleges only.

Prerequisite(s): NURS 170, NURS 172, NURS 173L, NURS 180, and NURS 185.

Corequisite(s): NURS 285.

NURS 272. Care for the Aging Client
1 Credit

Normal physiological changes of aging and nursing implications related to safety and wellness. Restricted to: Community Colleges only. Restricted to NURS majors.

NURS 275. Holistic Approach to Pharmacotherapeutic Interventions II
2 Credits

Level II. Holistic approach to the study of basic pharmacology concepts. Includes pharmacodynamic phases of drug interaction. Nursing process is discussed in relation to medication administration. Special emphasis on the role of the nurse and basic concepts related to specific drug categories. Restricted to majors. Community Colleges only.

Prerequisite: NURS 185.

Corequisites: NURS 280 and NURS 283.

NURS 280. Women's Health Issues
4 Credits (2+6P)

Consists of lecture and associated clinical/laboratory experiences that focus on the holistic health concerns for women and the care of families expecting birth. Emphasis placed on the wellness of normal and high-risk women's health, including maternal and newborn care. The nursing process will be utilized to develop caring interventions and effective community communication through teaching healthy strategies. Restricted to: Community Colleges only.

Prerequisite(s): NURS 170 and NURS 180.

Corequisite(s): NURS 275 and NURS 283.

NURS 282 L. Practicum: Management of Client Care
1 Credit

Organization and delivery of wellness care services for groups of clients based on the nursing process. Restricted to: Community Colleges only.

Prerequisite(s): NURS 170, NURS 172, NURS 173L, NURS 180, and NURS 185.

Corequisite(s): NURS 284L.

NURS 283. Pediatric Nursing
4 Credits (2+6P)

Consists of lecture and associated clinical and laboratory experiences which focus on the care of children from infancy through adolescence including acute and chronic health care problems. Employs nursing process, pathophysiology, pharmacology, and diet therapy through the holistic approach to wellness. Restricted to: Community Colleges only.

Prerequisite(s): NURS 170 and NURS 180.

Corequisite(s): NURS 275, NURS 280.

NURS 284 L. Practicum: Preceptorship
3 Credits

Clinical experience in a leadership role in specific practice areas enhancing the transition from student to practitioner utilizing the holistic approach to wellness. Restricted to: Community Colleges only.

Prerequisite(s): NURS 182.

Corequisite(s): NURS 282L.

NURS 285. Holistic Approach to Pharmacotherapeutic Intervention III
1 Credit

Level III. Holistic approach to the study of basic pharmacology concepts. Includes pharmacodynamic phases of drug interaction. Nursing process is discussed in relation to medication administration. Special emphasis on the role of the nurse and basic concepts related to specific drug categories. Restricted to: Community Colleges only.

Prerequisite(s): NURS 185 and NURS 275.

Corequisite(s): NURS 270.

NURS 291. Pathophysiology II
1-3 Credits

A continuation of materials presented in NURS 290, Pathophysiology I, covering the remaining body systems. Restricted to: Community Colleges only.

Prerequisite(s): BIOL 226 or 254 and NURS 290 or consent of program director.

NURS 293. Introduction to Nursing Concepts
3 Credits

This course introduces the nursing student to the concepts of nursing practice and conceptual learning. Same as NMNEC course no.: NMNEC101. Restricted to: BSN,BSNP,BSNR,NURS majors. Restricted to Las Cruces campus only.

Prerequisite(s): Admission to Nursing Program.

Corequisite(s): NURS 294, NURS 362.

NURS 294. Principals of Nursing Practice**4 Credits**

This course introduces the nursing student to the application of concepts through clinical skills in seminar, laboratory, and/or clinical settings. Principles of communication, assessments, safety, and interventions including accurate calculation, measurement, and administration of medications will be included. Same as NMNEC course no.: NMNEC102. Restricted to: NURS majors. Restricted to Las Cruces campus only.

Prerequisite(s): Admission to the nursing program.

Corequisite(s): NURS 293, NURS 362.

NURS 300. Principles of Professional Nursing Practice**7 Credits (4+6P)**

Focus on the principles, concepts, theories, and terminology central to the study of nursing and its evolution. Uses the nursing process as a framework for providing research-based professional nursing care. Includes clinical component. Restricted to Majors. Restricted to BSN, BSNP, BSNR, NURS majors.

NURS 302. Foundations of Health Assessment**3 Credits (2+2P)**

Theoretical basis and skills for biopsychosocial assessment of adults. Includes clinical component. Restricted to BSN, BSNP, BSNR, NURS majors.

NURS 314. Computer Technology for Nurses**3 Credits**

Introduction to health care informatics and its use in nursing practice. Focus includes electronic communication resources, issues and technological applications that support nursing and health care.

NURS 315. Introduction to Professional Nursing for the R. N.**3 Credits**

Transition course for the R.N. providing an overview of theories and concepts that are the bases for professional nursing practice.

NURS 322. Nursing Health Assessment**3 Credits**

Theoretical basis for the biopsychosocial assessment of individual patients across the life span for the RN. Restricted to Majors.

NURS 324. Nursing Care of the Older Adult**3 Credits**

Survey course addressing nursing care provisions for the elderly population in a variety of acute, community and home settings.

NURS 325. Human Pathophysiology for Nursing**3 Credits**

Concepts of alteration and adaptation in structure and function of the human body across the life span.

NURS 326. Pharmacology in Clinical Nursing Practice**4 Credits**

Pharmacological concepts and principles and their implications for nursing practice. Includes techniques of dosage calculation for medication and fluid administration. Restricted to BSN, BSNP, BSNR, NURS majors.

NURS 328. Human Pathophysiology Foundation for Nursing**4 Credits**

Human pathophysiology concepts of adaptation and alteration in function and structure across the life span and their implications for nursing practice. Restricted to: BSN, BSNP, BSNR majors.

Prerequisite(s): Grade of C or better in both BIOL 253 and BIOL 254.

Corequisite(s): NURS 362, NURS 293, NURS 294.

NURS 352. Bioterrorism**3 Credits**

Examines the role of today's nurse in the face of real or potential radiological and chemical threats. Emphasis is placed on clinical and public education and safety as well as nursing/logical responses. Taught online.

NURS 353. Nursing Informatics**3 Credits**

This course addresses nursing informatics principles and practices. Key concepts include relationship with evidence-based nursing practice, use of decision support systems, clinical information systems, telehealth, and standardized nursing language. Restricted to BSNC majors.

NURS 360. Introduction to Nursing Concepts**3 Credits**

This course introduces the nursing student to the concepts of nursing practice and conceptual learning. Same as NMNEC course no.: NMNEC101. Restricted to: NURS majors.

Prerequisite(s): Admission to Nursing Program.

Corequisite(s): NURS 361, NURS 362.

NURS 362. Evidence Based Practice**3 Credits**

The focus of this course is the principles of evidence based nursing practice. It includes the identification of clinical practice problems, the evaluation of available evidence, and the integration of evidence with clinical expertise and patient preferences in application to practice. Same as NMNEC course no.: NMNEC103. Restricted to: NURS majors.

Prerequisite(s): Admission to the nursing program.

Corequisite(s): NURS 293, NURS 294.

NURS 372. Adult Health Nursing I**8 Credits (4+8P)**

Theoretical basis for select acute and chronic illnesses related to adults is provided, and critical thinking is used to plan nursing care. Includes clinical component.

NURS 373. Nursing the Psychiatric-Mental Health Client**5 Credits (3+4P)**

Theoretical and practical knowledge applied to provision of psychiatric-mental health nursing service across the health care continuum. Includes clinical component. Restricted to BSN, BSNR, BSNP, NURS majors.

NURS 375. Introduction to Nursing Research**3 Credits**

Introduction to scientific inquiry. Evaluation and utilization of nursing research for clinical practice.

Prerequisite(s): (STAT/A ST 251G, A ST 311, OR STAT 271G) and (NURS 303, NURS 326, and NURS 328) or consent of instructor. Restricted to BSN, BSNP, BSNR, NURS majors.

NURS 376. Research and Evidence-Based Practice for the Practicing RN
3 Credits

Course provides introduction to evidenced-based practice and research principles for the practicing RN. Evidence-based practice principles and processes are covered. Foundations of research (quantitative and qualitative) research designs and research evaluation are included. Emphasis is placed on ethical and practical issues in critiquing and using research/evidence-based findings. Restricted to BSNC majors.

Prerequisite(s): A ST 311, or admission to RN-BSN Option with consent of instructor.

NURS 377. Health and Illness Concepts I**3 Credits**

This course will focus on health and illness concepts across the lifespan. Concepts covered are related to homeostasis/regulation, sexuality/reproductive, protection/movement and emotional processes. Same as NMNEC course no.: NMNEC201. Restricted to: NURS majors.

Prerequisite(s): NURS 294, NURS 293 & NURS 362.

Corequisite(s): NURS 378, NURS 379, NURS 380.

NURS 378. Health Care Participant**3 Credits**

This course introduces the nursing student to the attributes of the health care participant as an individual, a family, or a community. Same as NMNEC course no.: NMNEC202. Restricted to: NURS majors.

Prerequisite(s): NURS 293, NURS 294 & NURS 362.

Corequisite(s): NURS 377, NURS 379, NURS 380.

NURS 379. Nursing Pharmacology**3 Credits**

This course introduces the nursing student to pharmacologic nursing practice from a conceptual approach. Same as NMNEC course no.: NMNEC203. Restricted to: BSN,BSNP,BSNR,NURS majors.

Prerequisite(s): BIO 253 & BIO 254 OR SPM 271 & SPM 371 OR BIO 225 & BIO 226.

Corequisite(s): NURS 328.

NURS 380. Assessment and Health Promotion**4 Credits**

This course introduces the nursing student to the assessment of and the health promotion for the health care participant as an individual, a family, or a community. This course uses seminar, laboratory and/or clinical settings. Same as NMNEC course no.: NMNEC204. Restricted to: NURS majors.

Prerequisite(s): NURS 293, NURS 294, NURS 362.

Corequisite(s): NURS 377, NURS 378, NURS 379.

NURS 395. Health and Illness Concepts II**3 Credits**

This course will cover health and illness concepts across the lifespan. Concepts covered are related to oxygenation and hemostasis, homeostasis and regulation, protection and movement, and cognitive and behavioral processes. Same as NMNEC course no.: NMNEC301. Restricted to: BSN,BSNP,BSNR,NURS majors.

Prerequisite(s): NURS 328, NURS 377, NURS 378, NURS 379, NURS 380.

Corequisite(s): NURS 396, NURS 398.

NURS 396. Professional Nursing Concepts I**3 Credits**

This course covers foundational concepts for professional development, including selected professional attributes and care competencies. Same as NMNEC course no.: NMNEC302. Restricted to: BSN,BSNP,BSNR,NURS majors.

Prerequisite(s): NURS 328, NURS 377, NURS 378, NURS 379, NURS 380.

NURS 397. Special Topics**1-9 Credits (1-9)**

Specific subjects to be announced in the Schedule of Classes. May be repeated for at total of 21 credits.

NURS 398. Care of Patients with Chronic Conditions**4 Credits**

The focus of this course is to provide safe, evidence-based nursing care for patients with chronic conditions, across the lifespan in a variety of settings. This course builds upon curricular concepts. This course is a combination of lab and clinical. Same as NMNEC course no.: NMNEC303. Restricted to: BSN,BSNP,BSNR,NURS majors.

Prerequisite(s): NURS 328, NURS 377, NURS 378, NURS 379, NURS 380.

Corequisite(s): NURS 395, NURS 396.

NURS 410. Adult Health Nursing II**6 Credits (3+6P)**

Focus is on the use of critical thinking to plan nursing care of adults with selected complex illnesses. Clinical component included.

NURS 415. Parent-Child Nursing**8 Credits (4+8P)**

Concepts and principles of nursing applied to healthy and ill infants, children, adolescents, and childbearing women within the context of the family. Includes clinical component.

NURS 416. Older Adult Nursing**2 Credits**

Introduction to aging, health problems and issues associated with aging. Implications for nursing care of the elderly.

NURS 420. Community Health Nursing**3 Credits**

Concepts basic to the nursing care of families, groups, and communities with an emphasis on health promotion, disease prevention, and health maintenance.

NURS 426. Community Health Nursing for the R.N.: Clinical**3 Credits**

Nursing process applied to the care of families, groups, and communities.

NURS 460. Strategies for Student Success**3 Credits**

This course is designed to assist and support students as they identify learning needs and develop a plan for successfully mastering nursing knowledge. Course activities and assignments will be designed to address student's self-identified learning goals to enhance their opportunity for success. Restricted to NURS, BSN, BSNP, BSNR majors.

NURS 466. Health and Illness Concepts III**4 Credits**

This course will cover health and illness concepts across the lifespan. Concepts covered are related to hemostasis/regulation, oxygenation/homeostasis, protection/movement, and emotional processes. Same as NMNEC course no.: NMNEC401. Restricted to: BSN,BSNP,BSNR,NURS majors.

Prerequisite(s): NURS 360, NURS 361, NURS 362.

Corequisite(s): NURS 467, NURS 468.

NURS 467. Clinical Intensive I**4 Credits**

This is the first of two Level Four clinical courses in which the student will apply the curricular concepts in the management of care participants with acute conditions across the lifespan. This course is a combination of seminar, lab, and clinical. Same as NMNEC course no.: NMNEC402. Restricted to: BSN,BSNP,BSNR,NURS majors.

Prerequisite(s): NURS 395, NURS 396, NURS 398.

Corequisite(s): NURS 466, NURS 468.

NURS 468. Clinical Intensive II**4 Credits**

This is the second of two Level Four clinical courses in which the student will apply the curricular concepts in the management of care participants with acute conditions across the lifespan. This course is a combination of seminar, lab, and clinical. Same as NMNEC course no.: NMNEC404.

Restricted to: BSN,BSNP,BSNR,NURS majors.

Prerequisite(s): NURS 395, NURS 396, NURS 398.

Corequisite(s): NURS 466,NURS 467.

NURS 470. Nursing Organization and Management**3 Credits**

Concepts of organization and delivery of care to groups of patients based on the nursing process. Emphasis on the roles of the nurse as manager, leader, and change agent within health-care organizations.

NURS 472. Community and Population Focused Nursing**6 Credits (3+6P)**

Synthesis of nursing, social, and public health science to develop health promotion, disease prevention, and protection strategies for communities and populations. Clinical component included.

NURS 475. Issues and Trends in Professional Nursing**3 Credits**

Explores the challenges associated with issues and trends in health care and the legal and ethical implications of professional nursing practice.

NURS 476. Nursing Organization & Management for the R.N.: Clinical**3 Credits**

Nursing process applied to organization, management, and delivery of health care. An integrating experience for the R.N. student designed to facilitate the transition to professional practice. Students work with mentors in a clinical setting to develop professional nursing roles related to leadership and management.

NURS 477. Nursing Organization and Management for the RN**3 Credits**

Course covers nursing organization, leadership, and management principles, theories, and research for the practicing RN. Restricted to BSNC majors.

NURS 479. Nursing Care for Complex Patients**8 Credits (2+12P)**

Principles and priorities of nursing care for patients across the life span experiencing complex care problems. Includes integrating experiences designed to facilitate the transition from student to professional nurse. Includes clinical component.

NURS 486. Concept Synthesis**3 Credits**

This course will focus on the synthesis of curricular concepts in the care of complex patients. Same as NMNEC course no.: NMNEC501. Restricted to: BSN,BSNP,BSNR,NURS majors.

Prerequisite(s): NURS 466, NURS 467, NURS 468.

Corequisite(s): NURS 487,NURS 488,NURS 489.

NURS 487. Professional Nursing Concepts II**3 Credits**

This course covers policy concepts for professional nursing. Same as NMNEC course no.: NMNEC502. Restricted to: BSN,BSNP,BSNR,NURS majors.

Prerequisite(s): NURS 466, NURS 467, NURS 468.

NURS 488. Clinical Intensive III**4 Credits**

The focus of this clinical course is application of the curricular concepts in the management of care participants with complex conditions across the lifespan. This course is a combination of seminar, lab, and clinical. Same as NMNEC course no.: NMNEC503. Restricted to: BSN,BSNP,BSNR,NURS majors.

Prerequisite(s): NURS 466, NURS 467, NURS 468.

Corequisite(s): NURS 486,NURS 487,NURS 489.

NURS 489. Capstone**4 Credits**

The synthesis, integration, and application of concepts to professional nursing practice will be applied in the final clinical course to ensure readiness to enter practice. Same as NMNEC course no.: NMNEC504. Restricted to: BSN,BSNP,BSNR,NURS majors.

Prerequisite(s): Successful completion of all previous nursing courses.

Corequisite(s): NURS 486,NURS 487,NURS 488.

NURS 490. Independent Study**1-3 Credits**

Individual studies with prior approval of department head.

NURS 500. Applied Statistics for Evidence-Based Practice**3 Credits**

Provides the logic and appropriate use of statistical techniques most commonly used. Emphasis is based on underlying logic of procedure, the appropriate use of underlying assumptions of procedures, interpretation of results from statistical software and evaluation of published results of the procedures. Statistical software will be used. Restricted to: NURP majors.

Prerequisite(s): Admission to DNP Program.

NURS 505. Theoretical Foundations of Advanced Nursing**3 Credits**

This course is a graduate-level introduction to nursing theory. This course assists students in understanding the nature of theory development in nursing, evidence-based practice and related disciplines. Students examine the definitions and meanings of the basic concepts of theory along with theory development and will explore an analysis of selected theories/models and their application to nursing practice, research, education, and administration.

Prerequisite(s)/Corequisite(s): Students must be enrolled in the graduate program in nursing or have the permission of advisor and faculty of course to enroll in course. Restricted to: NURS majors.

NURS 506. Health Policy for Advanced Nursing Practice**3 Credits**

Course provides a conceptual approach to understanding health policy including the social, legal, political and ethical factors that influence policy development. Strategies for influencing policy direction and change are examined. Restricted to: NURS, NUSC, NURP majors.

NURS 507. Nursing Research in Evidence-Based Practice**3 Credits**

This course is designed to prepare advanced practice nurses with the skills and knowledge needed to critically analyze and synthesize scholarly evidence to promote high quality evidence-based practice.

Prerequisite(s)/Corequisite(s): Students must be enrolled in the graduate program in nursing or have the permission of advisor and faculty to enroll in the course. Restricted to: NURS, NUSC, NURP majors.

NURS 511. Advanced Pathophysiology for Clinical Nursing**3 Credits**

In-depth study of the physiological and pathological bases of altered health states of patients across the life span. Case studies facilitate application of complex concepts to clinical nursing practice. Restricted to: NURS, NUSC, NURP majors.

NURS 512. Advanced Clinical Pharmacology**3 Credits**

Principles of clinical pharmacology for advanced clinical practice. Focus on pharmacology as it relates to human physiology and pathophysiology across the lifespan. Restricted to: NURS, NUSC, NURP majors.

NURS 514. Psychopharmacology for Advanced Practice**3 Credits**

Principles of clinical psychopharmacology with emphasis on clinical application of major drug classifications including decision making, prescribing, drug monitoring and patient education.

NURS 515. Advanced Health Assessment**3 Credits (2+1P)**

Assessment theory and skills for advanced clinical practice. Emphasis on assessment of patients across the life span. May be repeated up to 3 credits. Restricted to: NURS, NUSC, NURP majors.

NURS 518. Genetics and Health**2 Credits**

Assess the impact of emerging genetic technologies on healthcare at the individual, system and population level. Restricted to DNP majors.

Prerequisite(s): Admission to DNP Program.

NURS 530. Promoting Health Behavior**3 Credits**

Emphasis is on the role of the advanced practice nurse in facilitating health behavior change. The impact of health status on health behavior, ethical issues relate to health promotion, and the processes for promoting healthy behaviors are explored. Theoretical models of behavior change and primary, secondary, and tertiary prevention concepts serve as a basis for developing nursing interventions that promote behavior change.

NURS 540. Advanced Psychosocial Pathology for Family, Psychiatric-Mental Health Nursing**3 Credits**

In-depth study of psychosocial pathology, factors contributing to psychosocial dysfunction, and diagnostic reasoning basic to advanced-practice psychiatric mental health nursing; emphasis on etiology and differential diagnoses. Restricted to: NURS majors.

Prerequisite(s): Admission to the DNP Program.

NURS 562. Innovations and Health Care Organizations**3 Credits**

Examines complexity and innovation within health care systems, health care delivery, and population health. Areas of focus are systems, organizations, health disparities, and ethical decision making. Emphasis is on improvement in services and outcomes. Taught with NURS 649. Restricted to: NURS, NUSC, NURP majors.

NURS 563. Human Resource Management in Nursing**3 Credits**

Contemporary approaches to the development and management of nursing resources that complement organizational vision, strategies and management goals. Management of a diverse, quality workforce that results in an improved organizational performance. Performance evaluation, motivation, professional development and legal and regulatory aspects will be explored.

NURS 564. Nursing Fiscal Management**3 Credits**

Concepts of financial management emphasizing principles of health care budgeting and finance in managing health care resources. A focus is to achieve quality outcomes through financial resource management. Restricted to: NURS majors.

Prerequisite(s): NURS 562.

NURS 565. Advanced Leadership in Healthcare**3-5 Credits (3+1-2P)**

Analysis of leadership theories as they pertain to the nurse executive and the advanced practice nurse in complex health care organizations. Emphasis will be placed on organizational change and conflict management in working with interdisciplinary health care teams. Clinical component included for DNP students only. May be repeated up to 5 credits. Restricted to: NURS, NUSC, NURP majors.

Prerequisite(s): NURS 562.

NURS 566. Seminar in Nursing Administration- Roles**3 Credits**

Role preparation for the nurse administrator as manager, leader, collaborator and change agent. Synthesis of concepts from management and nursing as a basis for role effectiveness in nursing administration.

Corequisite: NURS 595.

NURS 567. Nursing Informatics**3 Credits**

This course is provides the foundational knowledge necessary to integrate systems and information technologies. Topics include informatics, knowledge management, healthcare information systems/ telehealth including the electronic health record. Focuses on using available technology to enhance safety and monitor the health status and outcomes of populations. Restricted to: NURS, NUSC, NURP majors.

Prerequisite(s): Consent of Instructor.

NURS 572. Pharmacology of Addictions**4 Credits**

Concepts and principles of the pharmacology of psychoactive substances and the addiction process; including the pharmacological approach to treatment. Restricted to: NURS majors.

NURS 573. Cardiovascular/Renal Nursing**3 Credits**

This course emphasizes the comprehensive management of individuals with acute and chronic cardiovascular/renal diseases within the context of family and communities using a case-based approach.

Prerequisite(s): Graduate status or permission of instructor.

NURS 574. Oncology Nursing**3 Credits**

This course presents the clinical aspects of cancer diagnosis, the clinical management of major cancers, and their treatment modalities. The course will also focus on supportive therapies for the cancer patient and symptom management.

Prerequisite(s): Graduate status or permission of instructor.

NURS 590. Independent Study**1-10 Credits**

Individual studies and directed research with prior approval of department head. May be repeated on a different topic. May be repeated for a maximum of 20 credits.

Prerequisite: consent of instructor.

NURS 591. Preceptorship: Prescription Drugs, Medicines and Other Therapeutics**1-11 Credits (4+44P)**

The course provides preceptored clinical experiences that provide advanced practice nursing students opportunities for practice and mastery of skills for management of culturally diverse patients within their designated specialty area to include prescribing drugs, medicines and other therapeutics, as well as monitoring the effects of the prescribed management. It requires the student to demonstrate integration, synthesis and application of assessment, diagnosis and management to include health promotion of patients with acute and/or stable chronic health conditions. Graded: S/U. Restricted to MSN majors. **Prerequisite(s):** NURS 542 or NURS 530 or NURS 521.

NURS 595. Advanced Field Work in Nursing**1-6 Credits (4+24P)**

Faculty-supervised, independent work in student's advanced practice role. Field work normally taken after the core and designated specialty courses. Minimum of three field-work credits (12 contact hours) required in major area of study. May be repeated for a maximum of 12 credits. Restricted to majors. Graded S/U.

Prerequisites: NURS 532 and NURS 561.

NURS 597. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a different subject area. May be repeated for a maximum of 8 credits.

Prerequisite: consent of instructor.

NURS 600. Philosophy of Science in Nursing**3 Credits**

Offers a framework for asking both ontological and epistemological questions about knowledge, human science, and nursing science.

NURS 601. Theory I: Methods and Processes of Nursing Knowledge Development**3 Credits**

Building on the Philosophy of Science course, the student will engage in analysis and critique of both developmental processes and composition of nursing disciplinary knowledge. Diverse approaches will be used to appraise and critique historical and contemporary milestones in the development and evaluation of nursing thought. Emphasis is also placed on implications of theory and knowledge development as related to multicultural and rural issues.

Prerequisite(s): NURS 600.

NURS 602. Theory II: Contemporary Substantive Nursing Knowledge**3 Credits**

Critically examine existing & evolving substantive knowledge drawn from nursing and other disciplines. Focus on the construction, analysis of current substantive nursing knowledge, including evaluation of relationships among theories, evidence and explanation will be pursued. Special attention to existing and evolving theories applicable to rural, multicultural and educational settings. **Prerequisite:** NURS 601

NURS 606. Quantitative Methods in Nursing Research**3 Credits**

Focus on approaches to developing nursing knowledge by means of quantitative research methods as applied to clinical problems, theoretical modeling of human responses to health and illness, and health policy issues. Emphasizes detailed analysis and critique of non-experimental and experimental designs, issues pertaining to sampling and statistical power, the reliability and validity of measures, and uses and abuses of descriptive and inferential statistics in nursing research literature. Students are expected to develop sufficient discernment to read, critique, evaluate, and discuss the quality, significance, and limitations of published quantitative nursing research.

Prerequisite: NURS 621.

NURS 607. Qualitative Methods in Nursing Research**3 Credits**

Major methodological traditions of qualitative research and their applications to knowledge development and clinical research in nursing are the emphasis. Overview of at least one computer-assisted qualitative data analysis software application. Students will engage in detailed critique and discussion of significant nursing investigation representing various qualitative approaches and traditions.

NURS 608. Field Methods in Qualitative Research**3 Credits**

The purpose of this course is to provide opportunities for students to engage in, analyze and evaluate various procedures and techniques used to gather qualitative data. Major data collection approaches including ethnography, phenomenology, grounded and critical theory are discussed. Students have the opportunity to participate in mini-field work projects while gathering expertise in field techniques used in qualitative research. Issues such as role of literature in qualitative research, investigator as instrument, ethical dilemmas, field entry and departure, and reflexivity are analyzed as they relate to the process of gathering and interpreting qualitative data.

Prerequisites: NURS 607 or consent of instructor.

NURS 610. Nursing Education: Pedagogy and Roles**3 Credits**

Teaching-learning process in the clinical and classroom settings. Focuses on educational patterns and pathways in nursing and the roles of faculty in academia. Educational reform is analyzed in relationship to diversity in students, faculty, practice settings and technology-driven learning environments. Instructional designs, teaching strategies, and outcome evaluations are examined for their pedagogic use. The development of critical thinking outcomes, mentorships and partnerships to meet the needs of students are addressed. The course examines issues and challenges that impact the educational process such as student and faculty recruitment, the changing healthcare environment, differentiation of practice, advanced practice, reduced resources and links with theory and research.

NURS 620. Advanced Health Care Statistics I**3 Credits**

This course provides knowledge, skills and practice in collecting, analyzing and interpreting data. The following quantitative techniques will be examined and utilized using SPSS: principle of measurement, probability, principles of parametric and non parametric techniques, Kolmogorov-Smirnov test, comparison of means, correlation analyses, use of psychometric techniques, binomial test, sign test, McNemar test, median test, Cochran Q test, Phi coefficient, Fisher's Exact test, Mann-Whitney U, Kruskal-Wallis test, Wilcoxon Signed Ranks and Spearman Rho. A graduate level statistics course completed within three years prior to the date of expected admission is desirable. Restricted to majors

NURS 621. Advanced Health Care Statistics II**3 Credits**

This course is the second of a two-semester quantitative statistical course designed to provide knowledge, skills and practice in collecting, analyzing, and interpreting data. The following quantities techniques will be examined and utilized using SPSS: analysis of variance (ANOVA), analysis of covariance (ANCOVA), linear, multiple, and logistic regression, structural equation modeling (SEM), principle components analysis, and factor analysis. Restricted to majors.

Prerequisite: NURS 620.

NURS 623. Mixed Methods**3 Credits**

Presents a brief overview of research paradigms with emphasis on formulating research questions, aims and methods for a mixed method/model approach. Students may use proposals developed in earlier qualitative and quantitative research classes to devise mixed method proposal integrating readings on these methods and own research interests. Prerequisite: NURS 606 and NURS 607

NURS 624. Measurement in Culturally Diverse Border Populations**3 Credits**

The focus of this course is the development of essential competencies required to locate, select, evaluate, and use instruments to operationalize nursing variables. Ethical considerations in nursing research and research issues in diverse populations will be discussed. Specific attention is given to the process of moving from concept to construct, measurement theory, validity/reliability issues, and measurement issues in diverse populations including literacy, social desirability bias, sensitive data, translations, and cultural equivalency. Restricted to PhD in Nursing majors.

Prerequisite(s): Admission to PhD in Nursing program; NURS 606; NURS 623; or consent of Instructor.

NURS 630. Issues in Studying Health of Culturally Diverse and Border Populations**3 Credits**

Analysis and evaluation of the unique health care needs of culturally diverse and rural populations across the lifespan from ethnic, economic, gender, and sexual orientation perspectives. Interdisciplinary strategies to affect positive health outcomes are discussed, analyzed, and evaluated. Restricted to: NURS, NUSC, NURP majors.

NURS 631. Population Based Approaches to Health Promotion**3 Credits**

Population based approaches to health promotion focuses on preparing nursing students to identify, critically analyze and evaluate health promotion initiatives in culturally diverse and border populations using the Southwestern U.S. and U.S./Mexico border as the case exemplar. It examines historical, socio-economic, legal and professional issues associated with health promotion and policy initiatives. It considers prospects for social change, political movements and alternative approaches to develop and hasten adaption of health promotion initiatives in partnership with communities, advocacy groups and health care agencies.

NURS 649. Innovations and Health Care Organizations**3 Credits**

Examines complexity and innovation within health care systems, health care delivery, and population health. Areas of focus are systems, organizations, health disparities, and ethical decision making. Emphasis is on improvement in services and outcomes. Taught with NURS 562. Restricted to: NURS, NUSC, NURP majors.

NURS 650. Behavioral Approaches and Determinants of Nursing and Health**3 Credits**

Focuses on how behavioral/mental health concepts are applied in determining health outcomes for individuals, families, and communities. Students will apply and synthesize theoretical constructs within practice and research focusing on behavioral/mental health concepts. Health outcomes are viewed in a traditionally holistic manner in that health outcomes are discussed as an integral part of the human experience of healing and health.

NURS 651. Applied Nursing Science for the APN**3 Credits**

Explores the philosophical and scientific underpinnings for nursing knowledge relevant to the role of the doctorate of nursing practice. Restricted to: NURS, NUSC, NURP majors.

Prerequisite(s): NURS 507.

NURS 652. Translational Methods and Evidence-Based Practice**3 Credits**

Designed to prepare DNP student to demonstrate advanced levels of clinical judgment, systems thinking, and accountability in design, delivery, and evaluating evidence based on care to improve patient outcomes. Translate evidence into their specialty practice environment. Restricted to: NURS, NUSC, NURP majors.

Prerequisite(s): NURS 651.

NURS 658. The Aging Adult**3 Credits**

This course focuses on the care and management of older adults and their families. Content is directed at assessment and management of acute and chronic presentations of illness and complex, multiple health problems across the health care continuum. It will include examination of the psycho-socio-cultural processes which influence the behavioral patterns, coping, and adaptation of older adults. Restricted to DNP majors.

Prerequisite(s): Admission to DNP program.

NURS 659. Addictive Disorders**4 Credits**

Focus on care of the individual with addictive disorders. The impact on the individual as well as the community will be examined. Advanced practice nursing interventions based on theoretical and research based knowledge of addictions will be addressed. The pharmacology of psychoactive substances, the addiction process, and pharmacological approach to treatment will be included. Treatment of addictive disorders and their relevance to culturally diverse clientele with a variety of lifestyles will be evaluated. Restricted to: NURP majors.

Prerequisite(s): Admission to DNP program.

NURS 660. Family, Psychiatric Mental Health Nursing I**7 Credits (3+16P)**

This course provides the family psychiatric nurse practitioner student with advanced theoretical knowledge and practice in individual therapies, comprehensive psychiatric evaluation, personality development concepts, dual diagnoses and psychotherapy principles; including management of health promotion, health maintenance and disease prevention activities. Emphasis will be placed on individuals across the lifespan in a multicultural environment. Restricted to: NURP, NUSC, NURS majors.

Prerequisite(s): NURS 511, NURS 512, NURS 515.

NURS 662. Family, Psychiatric-Mental Health Nursing II
3-7 Credits (3+1-4P)

This course provides further knowledge and skills for the family psychiatric nurse practitioner student in the conceptual framework and practice of psychotherapy in a variety of settings. Emphasis is placed on work with individuals and families and groups across the lifespan in a multicultural environment to help manage their acute and chronic mental illnesses, including, dual diagnosis, psychopathology and psychopharmacology. Advanced practice nurses in the certificate program will have varying hours of credit. May be repeated up to 7 credits. Restricted to: NURS,NUSC,NURP majors.

Prerequisite(s): NURS 660.

NURS 664. Family, Psychiatric Mental Health Nursing III
5 Credits (1+4P)

This course provides further knowledge and skills for the family psychiatric nurse practitioner student to refine competencies in neuropsychology, assessment, diagnosis and treatment. Emphasis will be placed on individuals, families and groups across the lifespan in a multicultural environment. May be repeated up to 5 credits. Restricted to: NURS,NUSC,NURP majors.

Prerequisite(s): NURS 662.

NURS 670. Diagnostic Reasoning
3 Credits (2+4P)

This course is designed to develop advanced knowledge of differential diagnosis based upon physical and mental assessment of clients/patients across the lifespan in a variety of clinical settings. Students apply, synthesize, and integrate advanced clinical problem solving and reasoning to determine differential nursing and medical diagnoses, interpret and apply laboratory and diagnostic techniques to determine a final judgment and diagnosis. Restricted to DNP majors.

NURS 671. Primary Care I
7 Credits (3+16P)

This course provides the nurse practitioner student with advanced theoretical knowledge and practice in the assessment and management of health promotion, health maintenance and disease prevention activities across the lifespan; including the assessment and management of common acute and chronic health concerns. Emphasis will be placed on primary health care of individuals and their families in a multicultural environment. Restricted to: NURS, NURP, NUSC majors.

Prerequisite(s): NURS 511, NURS 512, NURS 515.

NURS 672. Primary Care II
3-7 Credits (3+1-4P)

The course continues the development of knowledge and skills for the nurse practitioner student for the assessment and management of selected common acute and chronic health conditions across the lifespan. Emphasis will be placed on primary health care of individuals and their families in a multicultural environment. Advanced practice nurses in the certificate program will have varying hours of credit. May be repeated up to 7 credits. Restricted to: NURP,NURS,NUSC majors.

Prerequisite(s): NURS 671.

NURS 673. Primary Care III
5 Credits (1+4P)

The course continues the development of knowledge and skills for the nurse practitioner student with special attention to complex and chronic health conditions across the lifespan and business, legal, and ethical issues in primary care. Variable clinical credits, 1-4. May be repeated up to 5 credits. Restricted to: NURS,NUSC,NURP majors.

Prerequisite(s): NURS 672.

NURS 676. Women's Health
3 Credits

The course will examine patient and family perspectives as well as health care system variables and societal issues that affect the organization and delivery of women's health care. Students will engage in critical analysis of the evidence base concerning psychosocial and spiritual concerns and barriers to and opportunities for improving women's health care across the diverse settings in which health care is delivered. Focus on evidence-based approaches to the primary care management of women. May be repeated up to 3 credits.

NURS 678. Health Needs of Special Populations
2-4 Credits (2+1-2P)

This course provides an overview of infant, child, adult and older adult health needs and interventions that promote and support optimal health. The conceptual and theoretical foundation for advanced practice with individuals and families across the lifespan is emphasized, including pharmaco-therapeutic and integrated bio-psychosocial interventions for diverse populations across the continuum of care. Advanced practice nurses in the certificate program will have varying hours of credit. May be repeated up to 4 credits.

Prerequisite(s): NURS 671, NURS 672, NURS 673, NURS 660, NURS 662, NURS 664.

NURS 684. Lifestyle Change and Adherence Issues with Diverse Populations
3 Credits

Includes the critical examination of selected theories of health behavior on life style choices and adherence issues with diverse populations within the community setting. Emphasis is given to the analysis of health behavior in regard to planning, development, and evaluation of population based health programs. Restricted to DNP majors.

NURS 685. Epidemiology for Advanced Nursing Practice
2 Credits

Emphasis is on the practical application of the principles of epidemiology in the measurement and evaluation of population health. Epidemiological literature will be critiqued and synthesized to evaluate population-based public health nursing problems. Issues related to disease surveillance, causation, genetic patterns, screening and social trends in population health will be examined. Use of existing data bases and technology programs are covered. Restricted to: NURP, NURS, NUSC majors.

NURS 690. Doctoral Nursing Seminar
1-3 Credits (1-3)

Seminar to build nursing scholarship skills,consisting of a series of 1 credit seminars that are taken as part of the doctoral degree plan. May be repeated up to 7 credits. Restricted to: NUSC majors.

NURS 691. Independent Study
1-6 Credits (1-6)

Individual studies and directed research with prior approval of department head. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

NURS 697. Professional Roles for Advanced Practice Clinical Nursing
3 Credits

This course will focus on providing an in depth understanding of the legal, historical, political, social, and ethical aspects of advanced practice nursing. Traditional and emerging roles for advanced practice nursing are examined. Restricted to DNP majors.

Prerequisite(s): Admission to DNP program, NURS 664 OR NURS 672.

NURS 698. Advanced Clinical Immersion**1-4 Credits (1-4)**

Capstone practicum experience for advanced practice students. Focus will be on a practice issue chosen by the student for further development as an evidence-based doctoral project. May be repeated up to 4 credits. Restricted to: NURP majors. S/U Grading (S/U, Audit).

Prerequisite(s): NURS 511, NURS 512, NURS 515 or enrollment in post-masters track.

NURS 699. Clinical Scholarly Project**1-4 Credits (1-4)**

Building on the practice expertise of the DNP student, this series of credits is to provide the student with the opportunity to design an innovative clinical practice improvement project/program addressing an actual health care concern. Through mentored activities, the DNP student will identify, develop, implement, evaluate, and disseminate an independent analytic. Graded: S/U. NURS 652. Restricted to: NURP majors. S/U Grading (S/U, Audit).

Prerequisite(s): Admission to DNP program.

NURS 700. Doctoral Dissertation**1-9 Credits (1-9)**

Dissertation may be repeated to maximum of 30 credits. Minimum requirements are 21 credit hours. Comprehensive examine is included within these 21 credits.

NURS 999. Practical Nursing Requirements Completed**99 Credits**

A phantom course created to indicate a student has met Practical Nursing requirements. Used to indicate this in academic history to replace an administrative message not converted from SOLAR to VISTAS. 01/97

Family Nurse Practitioner - Graduate Certificate

Post-Master's Certificate Program: This program is for those Master's-Prepared Advanced practice nurses (Nurse practitioners) who hold current "certification" in a clinical specialty area who wish to obtain the coursework needed to sit for certification in another area. The SON currently offers a post-MSN certificate in Family Psych/Mental Health Practitioner and Family Nurse Practitioner.

The Post-Master's certificate consists of 18 credit hours which includes a minimum of 500 clinical hours. When applying to the Post-Master's Certificate program, please select "Graduate Certificate" in the application system. Please note that the clinical hours are "required" for national certification and cannot be waived or negotiated.

The Family Nurse Practitioner track prepares nurses for advanced practice through a course of study focused on the health care of families across the lifespan. The courses in this specialty focus on advanced health assessment, advanced pathophysiology, advanced pharmacology, and management of acute and chronic illness in families. These courses are combined with specialty seminars and clinical experiences that emphasize the physiological and psychosocial impact of illness on the

patient and family. Graduates are prepared to sit for the Family Nurse Practitioner certification exam.

Family Psychiatric/Mental Health Nurse Practitioner - Graduate Certificate

Post-Master's Certificate Program: This program is for those Master's-Prepared Advanced practice nurses (Nurse practitioners) who hold current "certification" in a clinical specialty area who wish to obtain the coursework needed to sit for certification in another area. The SON currently offers a post-MSN certificate in Family Psych/Mental Health Practitioner and Family Nurse Practitioner.

The Post-Master's certificate consists of 18 credit hours which includes a minimum of 500 clinical hours. When applying to the Post-Master's Certificate program, please select "Graduate Certificate" in the application system. Please note that the clinical hours are "required" for national certification and cannot be waived or negotiated.

The Family, Psych/Mental Health Specialty prepares nurses for advanced practice with a focus on mental health issues across the lifespan. The curriculum builds upon four core FPMHNP competencies: advanced health assessment (physical and psychosocial); diagnosis (diagnosis of mental disorders, pathophysiology, and neurophysiology); psychotherapy (individual, group, and family); and medication management (pharmacology and psychopharmacology). Other courses develop competencies in health care systems, best-practice research utilization and translation, and health care quality improvement. Graduates are prepared to sit for the Family, Psych/Mental Health Nurse Practitioner Exam.

Nursing - Bachelor of Science in Nursing

Four-Year Curriculum Plan Courses

A grade of C- or better is required for all courses in the curriculum. Students must also complete six elective credits from the Part III Viewing a Wider World general education category.

Math basic academic skills requirement must be satisfied.

Departmental Requirements

A ST 311 or STAT 251G	Statistical Applications Statistics for Business and the Behavioral Sciences	3
BIOL 211G	Cellular and Organismal Biology	3
BIOL 211GL	Cellular and Organismal Biology Laboratory	1
BIOL 219 or BIOL 311	Public Health Microbiology General Microbiology	3
BIOL 311 L	General Microbiology Laboratory	2
BIOL 253	Human Anatomy	4
BIOL 354	Physiology of Humans	3
C EP 110G	Human Growth and Behavior	3
HNDS 251	Human Nutrition	3
MATH 121G	College Algebra	3
PSY 201G	Introduction to Psychology	3

Select one from the following: 4

CHEM 110G	Principles and Applications of Chemistry
CHEM 111G	General Chemistry I
CHEM 112G	General Chemistry II

Common Core

Communications Area I
Math Area II (counted in department)
Science Area III (counted in department)
Social/Behavior Science Area IV (3 credits counted in department)
Humanities Area V

University Requirements

Select 6 credits from VWV (from specified list) 6

Nursing Courses¹*Level 1*

NURS 293	Introduction to Nursing Concepts
NURS 294	Principals of Nursing Practice
NURS 328	Human Pathophysiology Foundation for Nursing
NURS 362	Evidence Based Practice

Total Credits 41

¹ **Formal Acceptance required before taking NURSING courses.** The NMSU School of Nursing participates in the New Mexico Nursing Education Consortium. The nursing curriculum offered is the NMNEC Statewide Curriculum Plan.

Note: A grade of C- or better is required for all courses in the curriculum. You must also complete 6 elective credits from the Part III Viewing a Wider World general education category.

1. An applicant who is not a U.S. citizen or who has been convicted of a felony is advised to contact the appropriate State Board of Nursing regarding eligibility for licensure.
2. Clinical clearances are required for all students prior to admission and concurrent with each semester of studies. These include: current immunizations; background screening; drug testing; individual

health insurance coverage; current CPR status; various health agency orientations, as well as other requirements mandated by clinical affiliation agreements. Failure to complete and provide documentation within timelines established by the School of Nursing may prevent admission to/or continuation within the nursing program.

3. Students are required to make a satisfactory score on nationally-normed, standardized tests before application. In the last semester of the curriculum, students are required to take a comprehensive/standardized exam and to make a satisfactory score on this exam prior to their final clinical experience.
4. Newly admitted students are required to attend an orientation session which occurs prior to the start of classes for their first nursing semester.
5. School-wide activities begin 1-3 days prior to the start of classes. Attendance is require.

Nursing - Doctor of Philosophy

Ph.D.: The intent of the nursing Ph.D. program is to prepare individuals who can assume leadership roles in advancing the scholarship of teaching, research and professional service activities. The focus of the program is on nursing scholarship to facilitate development of new knowledge and nursing education directed at improving nursing care outcomes for individuals, families, communities and systems.

Admission to the Ph.D. and DNP programs is in accordance with the general regulations of the Graduate School. Additional requirements include:

- a MSN from an accredited college or university;
- successful completion of an upper division statistics course for the DNP program and a graduate level statistics course for the Ph.D. program (taken within the last five years);
- three professional letters of recommendation;
- a letter stating personal goals for graduate education, completions of writing requirement, interview with nursing faculty, resume identifying practice experience; and
- proof of licensure or eligibility for licensure as a Registered Nurse in any of the 50 United States, the District of Columbia, or U.S. territories.

Students in the Ph.D. program complete a Dissertation. All materials should be sent to the School of Nursing with Graduate School application materials placed in a separate envelope. Contact the Ph.D. programs for full and part-time options.

Required Courses

NURS 600	Philosophy of Science in Nursing	3
NURS 601	Theory I: Methods and Processes of Nursing Knowledge Development	3
NURS 602	Theory II: Contemporary Substantive Nursing Knowledge	3
NURS 606	Quantitative Methods in Nursing Research	3
NURS 607	Qualitative Methods in Nursing Research	3
NURS 610	Nursing Education: Pedagogy and Roles	3
NURS 620	Advanced Health Care Statistics I	3
NURS 621	Advanced Health Care Statistics II	3
NURS 623	Mixed Methods	3

NURS 624	Measurement in Culturally Diverse Border Populations	3
NURS 630	Issues in Studying Health of Culturally Diverse and Border Populations	3
NURS 631	Population Based Approaches to Health Promotion	3
NURS 650	Behavioral Approaches and Determinants of Nursing and Health	3
NURS 690	Doctoral Nursing Seminar	1-3
NURS 700	Doctoral Dissertation	1-9
Electives		9
Total Credits		50-60

Those enrolled as Ph.D. students have dissertation and non-dissertation options (check with advisor). All students must complete a written and oral examination after completing 41-47 credit hours.

New Mexico State University is a full member of the National Council of State Authorization Reciprocity Agreements consortium (SARA). Students will need to check the SARA website (<http://nc-sara.org/>) before application to determine if NMSU has a reciprocity agreement with their home state before application is made.

Nursing Administration - Master of Science in Nursing

MSN: The School of Nursing offers graduate course work for nurses leading to a Master of Science in Nursing (MSN) degree with a specialization in Nursing Administration. This specialization is designed to provide students with the knowledge and preparation to assume leadership roles in a variety of health care delivery systems. The program is accredited by the Commission on Collegiate Nursing Education (CCNE).

Admission to the MSN program is in accordance with the general regulations of the Graduate School. Additional requirements include:

- a B.S.N. from an accredited college or university;
- successful completion of an inferential statistics course within the last 5 years;
- three professional letters of recommendation;
- a letter stating personal goals for graduate education and intended specialty area;
- resume identifying clinical practice experience; and
- proof of licensure or eligibility for licensure as a Registered Nurse in any of the 50 United States, the District of Columbia or U.S. territories;
- a personal interview with Graduate Nursing Faculty is required.

For admission information, contact the NMSU Office of Admissions, <http://prospective.nmsu.edu/>.

Specialization: Nursing Administration

The MSN course of study leading to the master's degree in Nursing Administration follows

MSN: Administration

NURS 505	Theoretical Foundations of Advanced Nursing	3
----------	---	---

NURS 506	Health Policy for Advanced Nursing Practice	3
NURS 507	Nursing Research in Evidence-Based Practice	3
NURS 530	Promoting Health Behavior	3
NURS 563	Human Resource Management in Nursing	3
NURS 564	Nursing Fiscal Management	3
NURS 565	Advanced Leadership in Healthcare	3-5
NURS 566	Seminar in Nursing Administration- Roles	3
NURS 567	Nursing Informatics	3
NURS 595	Advanced Field Work in Nursing	12
NURS 649	Innovations and Health Care Organizations	3
Electives		3

Thesis or Non-thesis Track

Select one from the following: 4-9

Thesis Track

A ST 505 Statistical Inference I

Non-thesis Track

Satisfactory completion of final MSN project and paper

Total Credits 49-56

Nursing Practice - Doctor of Nursing Practice

DNP: The Doctorate in Nursing Practice (DNP) at New Mexico State University prepares individuals who can assume advanced nursing practice roles in the focal areas of family practice, family psychiatric/mental health, and adult/geriatric nursing. As a U.S./Mexico border community, DNP coursework is directed towards improving nursing care outcomes for individuals, families, communities and systems along the border. Students are encouraged to engage in those clinical experiences that address border and minority health issues and concerns. Within this context, the NMSU, DNP program emphasizes evidenced-based practice and the translation of research into practice as it relates to improving the care of individuals, families, groups and communities experiencing or at risk for health disparities. In addition to the BSN to DNP, the program includes tracks for post-MSN to DNP preparation for the certified advanced practice nurse and certificate programs in Family/Mental Health and Family Nurse Practitioner for those nurse practitioners seeking additional clinical certification.

Requirements

DNP Students

Core Courses

NURS 507	Nursing Research in Evidence-Based Practice	3
NURS 511	Advanced Pathophysiology for Clinical Nursing	3
NURS 512	Advanced Clinical Pharmacology	3
NURS 515	Advanced Health Assessment	3
NURS 565	Advanced Leadership in Healthcare	3-5
NURS 567	Nursing Informatics	3

NURS 630	Issues in Studying Health of Culturally Diverse and Border Populations	3
NURS 649	Innovations and Health Care Organizations	3
NURS 651	Applied Nursing Science for the APN	3
NURS 652	Translational Methods and Evidence-Based Practice	3
NURS 685	Epidemiology for Advanced Nursing Practice	2
NURS 697	Professional Roles for Advanced Practice Clinical Nursing	3
NURS 698	Advanced Clinical Immersion	1-20
NURS 506	Health Policy for Advanced Nursing Practice	3
NURS 530	Promoting Health Behavior	3
NURS 690	Doctoral Nursing Seminar	1-3

Total Credits		28-51

Concentration: Family Psychiatric/ Mental Health Nurse

Required Courses

NURS 660	Family, Psychiatric Mental Health Nursing I	7
NURS 662	Family, Psychiatric-Mental Health Nursing II	7
NURS 664	Family, Psychiatric Mental Health Nursing III	5
NURS 514	Psychopharmacology for Advanced Practice	3
NURS 678	Health Needs of Special Populations	4
Total Credits		26

Concentration: Adult/ Geriatric Nurse Practitioner

The School of Nursing does not admit to this concentration every year.

Please call the School of Nursing's- Graduate Nursing advisor for more information on these program requirements

Concentration: Public/Community Health Nursing

Required Courses

MPH 530	Epidemiological Approaches to Disease Control and Prevention	3
MPH 550	Environmental Public Health Issues	3
NURS 631	Population Based Approaches to Health Promotion	3
NURS 685	Epidemiology for Advanced Nursing Practice	2
Total Credits		11

Concentration: Family Nurse Practitioner

Required Courses

NURS 671	Primary Care I	7
NURS 672	Primary Care II	7
NURS 673	Primary Care III	5
NURS 676	Women's Health	3
NURS 678	Health Needs of Special Populations	4
Total Credits		26

Public Health Sciences

Undergraduate Program Information

The curriculum in public health prepares students for careers in community and public health programs, also in voluntary, private and governmental agencies. Upon completion of the degree, the graduate is eligible to take the national Certified Health Education Specialist (CHES) examination administered by the National Commission for Health Education Credentialing, Inc. The Bachelor of Public Health degree has the full approval of the Council on Education in Public Health.

Students seeking admission to the Bachelor of Public Health degree in the Department of Public Health Sciences at NMSU are first admitted as pre-public health (PPHL) students. Students keep this designation until they have met the following admissions requirements:

1. A cumulative grade-point average of at least 2.5 after completing specified general education coursework (the common core).
2. A grade of C- or better in prerequisite departmental courses

PHLS 150G	Personal Health and Wellness	3
PHLS 275	Foundations of Health Education	3
or PHLS 375	Foundations of Community Health Education	
PHLS 395	Foundations of Public Health	3
3. A grade of C- or better in MATH 120 Intermediate Algebra.
4. A grade of B or better in A ST 251G Statistics for Business and the Behavioral Sciences/STAT 251G Statistics for Business and the Behavioral Sciences or A ST 311 Statistical Applications.
5. Entrance Exam: A score of 37% or better on the Conventions of Written English assessment and 75% or better on the Math assessment.
6. Submission of an application packet that includes
 - a. a brief personal statement of interest in the profession, and
 - b. a completed application for the Bachelor of Public Health degree program.

The Bachelor of Public Health degree program accepts applicants during the Spring and Fall semesters. The deadlines for accepting application packets are September 15th for Spring admission and February 15th for Fall admission. All applications must be submitted to the College of Health and Social Services, CHSS, Room 326.

Applicants may receive a conditional acceptance into the program if they are currently enrolled in the last of the required prerequisites at the time that they submit an application to the Bachelor of Public Health degree program. Such conditional acceptance will be revoked if the applicant does not successfully complete each of the prerequisite courses.

Students must attain a grade of C- or better in all required PHLS core coursework.

Any student who receives two or more grades of D or F in required PHLS core courses must petition, in writing, to continue as a major. Unsuccessful petitioners will be dismissed from the program. Should said student receive any further grades of D or F they will be irrevocably dismissed from the BPH program.

Graduate Program Information

The Department of Public Health Sciences offers the Master of Public Health degree (MPH) in Community Health Education and Health Management, Administration and Policy. The degree program prepares public health professionals to function in a variety of settings, including health programs at the local, state, and federal government levels; profit and nonprofit organizations and agencies; worksite settings; and educational institutions. The MPH program is fully accredited by the Council on Education for Public Health (CEPH).

Admissions Requirements

Students may be admitted on a full-time or part-time basis to the on-campus program or part-time in the fully online version of the program. The online Community Health Education program has curriculum and degree requirements in common with the on-campus program, and is covered by the same CEPH accreditation. The fully online Health Management and Policy program is also fully accredited by CEPH. All coursework for the online degree can be completed off-campus utilizing web-based technologies and they are aimed at meeting the needs of working students and others for whom a campus-based program is not an option. In addition to meeting all admissions requirements of the Graduate School, applicants must meet the following departmental requirements:

- Complete a short bio-sketch and an essay describing the applicant's reasons for wishing to pursue the MPH degree at NMSU. Any paid or volunteer work performed in a public health or related agency setting should also be described in detail, including length of work and descriptions of the work typically performed as part of the job.
- Scores from a recent administration (within the past five years) of the GRE are required (verbal reasoning, quantitative reasoning, and analytical writing scores).
- Submit at least three letters of reference from former faculty and/or employers.

Applications are now completed online. Go to <http://gradschool.nmsu.edu/>. For more information, contact the Graduate Coordinator at mphapps@nmsu.edu, or obtained via the website: publichealth.nmsu.edu (<https://publichealth.nmsu.edu>).

Associate Professor, Anup K. Amatya, Department Head

Professors Forster-Cox, McDonald, Rao, Tomaka; **Associate Professors** Amatya, Kozel, Kratzke, Palacios, Wilson; **Assistant Professors** Moralez

Amatya, Ph.D. (U. of Illinois- Chicago) – biostatistics; J.E. Brandon, Ph.D., C.H.E.S. (Southern Illinois U.), emeritus – border health issues; S. Forster-Cox, Ph.D. (U. of New Mexico) Online Coordinator – community health education, health promotion, non-profit organizations, rural health; C. T. Kozel, Ph.D., C.H.E.S. (U. of New Mexico) – community health education, health policy analysis, administration; C. Kratzke, Ph.D., C.H.E.S. (Old Dominion U.) – community health education, health disparities, cancer; J. McDonald, Ph.D., (U Washington)#epidemiology; R. Palacios, Ph.D. (U. of Texas at El Paso) – stress, disease outcomes, program evaluation; E. Moralez, Ph.D. (U. of Colorado Denver) – motivation, health behavior change; S. P. Rao, Ph.D., C.H.E.S. (Texas Women's U.) – Graduate Certificate and undergraduate Coordinator, domestic violence, HIV/AIDS, addictions, community health education; J. Robinson III, Ed.D., FAAHE (U. of Northern Colorado), emeritus – health education; J. Tomaka (U. of Buffalo), Graduate Coordinator – health behavior, program evaluation; S.L. Wilson, Ph.D. (Southern Methodist U.) – health policy, rural health, international health, health disparities.

PHLS 100. Introduction to Health Science

1 Credit

An overview of professional career opportunities in the realm of health science as well as the functional roles of practice, education, administration, and research. Some field trips will be required.

PHLS 150G. Personal Health and Wellness

3 Credits

A holistic and multi-disciplinary approach towards promoting positive lifestyles. Special emphasis is placed on major problems that have greatest significance to personal and community health. Topics to include nutrition, stress management, fitness, aging, sexuality, drug education, and others.

PHLS 275. Foundations of Health Education

3 Credits

Role and responsibility of the health educator with emphasis on small group dynamics, oral and written communication skills, building community coalitions and an introduction to grant writing. Taught with HL S 375. Cannot receive credit for both HL S 275 and HL S 375.

Prerequisite(s): Either HL S 100 or HL S 150G, or consent of instructor.

PHLS 295. Essentials of Public Health**3 Credits**

The course will focus on principles and major areas of public health, including ecological and total personal concept of health care system, epidemiological approaches to disease prevention and control. Consent of Instructor required.

PHLS 301V. Human Sexuality**3 Credits**

Examination of human sexuality from a variety of perspectives: cultural, sociological, physiological and psychological. Issues examined from viewpoints such as gender, individual, family, and professional roles.

PHLS 305V. Global Environmental Health Issues**3 Credits**

Introduction to global environmental health challenges in the 21st century with an emphasis on environmental problems as they affect public health and personal well-being.

PHLS 375. Foundations of Community Health Education**3 Credits**

Role and responsibility of the health educator, with emphasis on small-group dynamics, oral and written communication skills, building community coalitions, and an introduction to grant writing. Equivalent to PHLS 275. May be repeated up to 3 credits.

PHLS 380V. Women's Health Issues**3 Credits**

A focus on the unique issues and problems that confront women today and how they affect the health of women. Same as W S 381V.

PHLS 395. Foundations of Public Health**3 Credits**

The course will focus on principles and major areas of public health, including ecological concepts of healthcare systems and epidemiological approaches to disease promotion and control. Equivalent to PHLS 295. May be repeated up to 3 credits.

PHLS 450. Epidemiology**3 Credits**

Epidemiologic approaches to disease prevention and control. Factors influencing health status. May be repeated up to 3 credits. Restricted to: Public Health majors.

Prerequisite(s): PHLS 471.

PHLS 451. Biometrics and Health Research**3 Credits**

Critical analysis of community health research and related methodologies. May be repeated up to 3 credits. Restricted to: Public Health majors.

Prerequisite(s): E ST 311G.

PHLS 452. Environmental Health**3 Credits**

Introduction to environmental health designed to address public health issues. May be repeated up to 3 credits. Restricted to: Public Health, HNFS and E S majors.

Prerequisite(s): Junior or Senior standing.

PHLS 457. Administration of Health Programs**3 Credits**

Covers administrative responsibilities, organizational theory, strategic planning, and systems theory as applied to the administration of a variety of health programs. May be repeated up to 3 credits. Restricted to: Public Health majors.

Prerequisite(s): HL S 395 or HL S 450, or consent of instructor.

PHLS 458. Public Health Resources and Policy Analysis**3 Credits**

Covers issues related to U.S.-health policy and allocation of resources. Examination of local, state, and federal public health and health care funding. Assessment of impact of health policy on health education, medical practice, and the workplace. May be repeated up to 3 credits.

PHLS 459. Infectious and Noninfectious Disease Prevention**3 Credits**

History, etiology, and prevention of diseases affecting humans. May be repeated up to 3 credits. Consent of Instructor required. Crosslisted with: MPH 559. Restricted to: Public Health majors.

Prerequisite(s): PHLS 395 and Consent of Instructor.

PHLS 460. American Indian Health**3 Credits**

Critical health issues facing American Indians in the contemporary world. Course included in the undergraduate American Indian Program minor. May be repeated up to 3 credits. Crosslisted with: MPH 560.

PHLS 461. Health Disparities: Determinants and Interventions**3 Credits**

Investigates: descriptions of health disparities and measurement issues; physical environmental factors, behavioral and emotional variables; impact of aging of the populations, increased racial and ethnic diversity, and technological developments; intervention strategies and evaluation results. May be repeated up to 3 credits. Crosslisted with: MPH 561.

PHLS 462. Hispanic Health Issues**3 Credits**

Cultural differences that aid or hinder communication with Hispanic clients and the application of cross-cultural communication skills. Some field trips may be required. May be repeated up to 3 credits. Crosslisted with: MPH 562.

PHLS 464V. Cross-Cultural Aspects of Health**3 Credits**

An examination of health practices from a variety of cultural perspectives: communication, observation, research, and assimilation. Issues to be addressed will be examined from a number of viewpoints, such as individual, family, community, and professional roles.

PHLS 465. International Health Problems**3 Credits**

Comparison of domestic health programs and problems with those in other parts of the world; emphasis on political parameters and delivery processes. Additional attention is focused on the health issues of the U.S.-Mexico border. May be repeated up to 3 credits. Crosslisted with: MPH 565.

Prerequisite(s): HL S 395 or consent of instructor.

PHLS 466. International Health Practicum**1-3 Credits**

Intensive examination of health practices and beliefs from a cultural perspective. Focus on health structure, index of diseases, morbidity, mortality and epidemiological approaches to planning. Required travel (personal travel, lodging, and related expenses are extra). May be repeated up to 3 credits. Crosslisted with: MPH 566. Restricted to: BPH majors.

PHLS 467. Rural Health Issues**3 Credits**

Comprehensive overview of rural health services with Southwestern United States and New Mexico focus. May be repeated up to 3 credits. Crosslisted with: MPH 567.

PHLS 468. Coping with Loss and Grief: A Cross-Cultural Perspective
3 Credits

A cross-cultural perspective to death, loss and grief. Hospice philosophy of caring for the dying will be included.

PHLS 469. U.S.-Mexico Border Health Issues
3 Credits

Interdisciplinary analysis of the impact of living conditions and health issues of communities along the U.S.-Mexico border and of the strategies and initiatives to address these issues. Problem-based learning, case analysis, lecture, guest speakers, computer based instruction, and field trips. May be repeated up to 3 credits. Crosslisted with: MPH 569.

PHLS 471. Health Informatics
3 Credits

The application of technology to engage communities and individuals in behavioral and environmental change processes. The course will focus on the use of technology to describe the magnitude of health problems and their sources; analyze risk factors; identify community strengths from which strategies may be defined and tools created to intervene, prevent problems, and promote health and well-being; and continuously evaluate, refine, and implement what works. May be repeated up to 3 credits. Crosslisted with: MPH 571. Restricted to: PHL,C HL majors.

Prerequisite(s): HL S 395 or consent of instructor.

PHLS 473. Health Program Planning
3 Credits

Planning and development of community health education interventions for behavior change at the individual, family, social network levels of practice. Emphasis on applying program-planning models and designs into a grant-writing project. May be repeated up to 3 credits. Restricted to: Public Health majors.

PHLS 475. Methods of Community Health Education
3 Credits

Responsibilities of health educators, analysis of social forces affecting health needs, application of wide range of health education methods and instructional media, and program implementation skills. May be repeated up to 3 credits. Crosslisted with: MPH 575. Restricted to: Public Health majors.

Prerequisite(s): HL S 275/375.

PHLS 476. Theoretically-Based Interventions
3 Credits

Identifying and developing interventions to problematic health-related behaviors. Taught with MPH 576. May be repeated up to 3 credits. Restricted to: Public Health majors.

Prerequisite(s): HL S 473.

PHLS 478. Health Program Evaluation and Research
3 Credits

Covers the application of research and evaluation models for decision-making program and policy development of community health education interventions. Focus on the individual, family, and social network levels of practice. May be repeated up to 3 credits. Restricted to: Public Health majors.

Prerequisite(s): HL S 473.

PHLS 481. Public Health Preparedness and Response
3 Credits

This course is designed to teach students about the role of public health in emergency preparedness and response. It focuses on the nature of public emergencies as well as the role various sectors have in responding to them. One purpose of this online course is to introduce students to the basics of disaster preparedness and responding to disasters, and to build a base for further development in responder training. The course provides training and resources for a basic understanding of the Incident Command System (ICS) and National Incident Management System (NIMS). May be repeated up to 3 credits.

PHLS 486. Special Topics
3 Credits

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

PHLS 490. Independent Study
1-6 Credits

Individual studies with prior approval of department head. Maximum of 12 credits.

Prerequisites: consent of instructor.

PHLS 496. Community Health Education Field Experience
1-6 Credits

Senior-standing community health education majors will integrate and apply various concepts related to actual community health education practice. Experience aims to prepare students to integrate the competencies and responsibilities of community health education. Approximately 55 hours at field agency required per credit hour. May be repeated for a maximum of 6 credits. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: Public Health majors.

Prerequisite(s): HL S 475 or concurrent enrollment.

PHLS 497. Senior Seminar in Community Health Education
1 Credit

Critical analysis of issues in CHE and health care. Readings focus on social, economic, cultural, and political issues as they affect the profession and practice. Emphasis on future, local, national, and international health trends. May be repeated up to 1 credits. Restricted to: Public Health majors.

Prerequisite(s): HL S 475 or consent of instructor.

PHLS 499. Problems in Health Education
3 Credits

Provides opportunity for synthesis of program planning, implementation, and evaluation methodologies in the preparation and delivery of health education topics. Some field trips will be required. May be repeated up to 3 credits. Restricted to: Public Health majors.

Prerequisite(s): Either HL S 395, HL S 478, HL S 476, or consent of instructor.

Gerontology - Undergraduate Minor

On-Line Program Only

A grade of C- or better is required for all minor requirements.

Core Gerontology Courses

GERO 415	Introduction to Gerontology	3
GERO 493	Adulthood and Aging	3
Select 6 credits from the following:		6
FCS 213	Adult Development and Aging	
GERO 450	Health Promotion for the Older Adult	
GERO 451	Aging and Public Policy	
NURS 416	Older Adult Nursing	
Additional Independent Study (to be arranged with either Public Health or Nursing department)		
Total Credits		12

Master of Public Health/Master of Social Work - Dual Degree

The department of Public Health Sciences and the School of Social Work offer a dual MPH/MSW degree program. The two degrees are:

1. Master of Public Health (MPH) in Community Health Education and
2. Master of Social Work (MSW).

Student interested in pursuing the dual degree program must:

- Prepare and submit separate admissions applications to both programs
- Notify each program in writing of the intent to pursue the dual degree program
- Be officially admitted to both degree programs
- Notify the NMSU Graduate School of the intent to pursue the dual degree program
- Complete all course requirements
- Complete separate final examinations for both degree programs

If you are interested in pursuing this option please call and talk with the Dual Program Coordinator in the MPH program. The dual degree waives some courses from each program and students enrolled in this program should expect to complete the program in three years.

Public Health - Bachelor of Public Health

General Requirements (35 credits)

General education requirements for the Department of Public Health Sciences follow those outlined by the university in this catalog.

Departmental Requirements

You are required to complete the following Public Health Sciences core courses. Of the 120 credits required for the degree, you must have a minimum of 48 upper division credit hours (300- and 400-level courses).

General Education Requirements

Select 35 credits of General Education Requirements

Viewing a Wider World Courses 6

Prerequisite Courses

A ST 311 Statistical Applications¹
or A ST 251G Statistics for Business and the Behavioral Sciences

PHLS 150G	Personal Health and Wellness	
PHLS 275	Foundations of Health Education	
or PHLS 375	Foundations of Community Health Education	
PHLS 395	Foundations of Public Health	
MATH 120	Intermediate Algebra	

Public Health Education Core

PHLS 471	Health Informatics	3
PHLS 473	Health Program Planning	3
PHLS 475	Methods of Community Health Education	3
PHLS 476	Theoretically-Based Interventions	3
PHLS 478	Health Program Evaluation and Research	3
PHLS 496	Community Health Education Field Experience	6
PHLS 497	Senior Seminar in Community Health Education	1
PHLS 499	Problems in Health Education	3

Public Health Core

PHLS 450	Epidemiology	3
PHLS 451	Biometrics and Health Research	3
PHLS 452	Environmental Health	3
PHLS 457	Administration of Health Programs	3
PHLS 459	Infectious and Noninfectious Disease Prevention	3

Cultural Foundations Course Requirements

Select 3 credits from the following:		3
PHLS 461	Health Disparities: Determinants and Interventions	
PHLS 462	Hispanic Health Issues	
PHLS 464V	Cross-Cultural Aspects of Health	
PHLS 465	International Health Problems	
PHLS 466	International Health Practicum	
PHLS 467	Rural Health Issues	
PHLS 468	Coping with Loss and Grief: A Cross-Cultural Perspective	
PHLS 469	U.S.-Mexico Border Health Issues	

Departmental Electives

Elective courses ²	24
Electives: to bring the total to 120 credits, with 28 credits being upper-division	47
Total Credits	120

¹ A ST 311 Statistical Applications: does not meet the Common Core Area II.

² Students are encouraged to select additional PHLS and GERO courses to satisfy the elective requirement. Students with an associate degree in an allied health field may transfer up to 24 credit hours of electives.

Additional Requirements

All students are required to complete an exit survey please see the department for more information.

Public Health - Graduate Certificate

The graduate certificate program in public health is not an official graduate degree offered by NMSU but rather a focused collection of courses that enrolled students complete in public health. These courses are designed to provide and/or enhance students' knowledge of and skills in public health practice. Those students who successfully complete the previously listed courses receive a certificate of completion statement on their official transcript and a formal certificate from the university.

Certificate Program Courses

MPH 510	Community and Psychosocial Aspects of Public Health	3
MPH 530	Epidemiological Approaches to Disease Control and Prevention	3
MPH 540	Health Services System: Administration and Organization	3
MPH 550	Environmental Public Health Issues	3
Elective ¹		3
Total Credits		15

¹ For those who have not had any statistics courses it is strongly recommended that they complete MPH 520 Biostatistical Applications in Public Health as their elective.

Note that students who complete the Graduate Certificate are eligible to sit for the Certified Public Health (CPH) examination.

Apply online at <http://gradschool.nmsu.edu/>. International students are required to contact the Center for International Programs at (575) 646-5480.

Public Health - Master of Public Health

Public Health Core Courses

MPH 510	Community and Psychosocial Aspects of Public Health
MPH 520	Biostatistical Applications in Public Health
MPH 530	Epidemiological Approaches to Disease Control and Prevention
MPH 540	Health Services System: Administration and Organization
MPH 550	Environmental Public Health Issues

Concentrations

Select one from the following concentrations: 18

Community Health Education

Health Management, Administration and Policy

Cultural Foundation Course

Select 3 credits from the cultural foundation series numbered MPH 560-MPH 569 3

Additional Requirements

MPH 596 Field Experience

Thesis and Non-thesis Options

Select one of the following options in consultation with your graduate advisor:

Thesis Option ¹

MPH 599 Master's Thesis

Non-Thesis Option ²

Select 3 credits from electives	3
Total Credits	24

¹ Only for those in the Community Health Education concentration

² Available for those in the Community Health Education concentration and the Health Management, Administration & Policy concentration

Concentration: Community Health Education

MPH 570	Foundations of Public Health Education	3
MPH 572	Techniques of Health Communication/ Education	3
MPH 573	Community Organization in Public Health	3
MPH 574	Health Program Planning	3
MPH 578	Evaluative Approaches in Public Health	3
MPH 579	Research and Resources in Community Health	3
Total Credits		18

Concentration: Health Management Administration and Policy

MPH 541	Principles of Health Program Management	3
MPH 545	Health Services Organization and Delivery	3
MPH 546	Public Health Finance and Budget Management	3
MPH 547	Public Health Law and Ethics	3
MPH 558	Public Health Policy Analysis	3
MPH 578	Evaluative Approaches in Public Health	3
Total Credits		18

Elective courses may include other MPH courses or 500-level courses from other departments. Some MPH courses are crossed listed with PHLS 400 level courses (e.g. PHLS 467 Rural Health Issues and MPH 567 Rural Health Issues). Students who have previously taken one of these 400 level courses at NMSU, may not take the corresponding 500 level MPH course for degree completion credit.

The thesis option requires a total of 45 credit hours, while the non-thesis option requires 42 credit hours. Final examination for the non-thesis option includes both oral and written questions pertaining to the student's graduate course work. Final examination for the thesis option consists of an oral defense of the thesis and related course work.

Selected elective and option courses may also be available during summer sessions.

All MPH students must comply with the Student Code of Conduct for the Department of Public Health Sciences. This can be found online at the Department's web page. (<http://publichealth.nmsu.edu>)

Students completing the Community Health Education concentration are eligible to sit for the Certified Health Education Specialist (CHES) examination. Students completing either the Community Health Education or the Health Management, Administration and Policy

concentration are eligible to sit for the Certified Public Health (CPH) examination.

Public Health Sciences - Undergraduate Minor

A grade of C- or better is required for all minor requirements.

Core Public Health Education Courses

PHLS 275	Foundations of Health Education	3
PHLS 395	Foundations of Public Health	3
PHLS 450	Epidemiology ¹	3
PHLS 457	Administration of Health Programs	3
Select one from the following:		3
PHLS 301V	Human Sexuality	
PHLS 380V	Women's Health Issues	
Select 3 credits from the following:		3
PHLS 461	Health Disparities: Determinants and Interventions	
PHLS 462	Hispanic Health Issues	
PHLS 464V	Cross-Cultural Aspects of Health	
PHLS 465	International Health Problems	
PHLS 466	International Health Practicum	
PHLS 467	Rural Health Issues	
PHLS 468	Coping with Loss and Grief: A Cross-Cultural Perspective	
Total Credits		18

¹ All public health minors must complete A ST 251G Statistics for Business and the Behavioral Sciences/STAT 251G Statistics for Business and the Behavioral Sciences or A ST 311 Statistical Applications with a B or better before taking PHLS 450 Epidemiology.

U.S.-Mexico Border Health Issues - Undergraduate Minor

A grade of C- or better is required for all minor requirements.

Core Requirements

Select 3 credits from the following:		3
PHLS 466	International Health Practicum	
PHLS 469	U.S.-Mexico Border Health Issues	
Select four from the following:		12
PHLS 461	Health Disparities: Determinants and Interventions

PHLS 486	Special Topics	
PHLS 486	Special Topics (when subtitle relates to US-Mexico Border Health)	

PHLS 481	Public Health Preparedness and Response	3
Total Credits		18

Social Work Undergraduate Program Information

The BSW degree (CSWE accredited) allows you to join a profession dedicated to helping people in personal and social situations. As a unique and challenging field, social work addresses the complexity of human behavior and the ever-present needs and potential of people. From rural communities to inner cities, social workers are at work in social service agencies, mental health centers, hospitals, schools, neighborhood organizations, probation offices and private agencies. Social work roles are varied and flexible. Social workers practice in areas such as child abuse, community organization, direct services with individuals and families, mental health, group work, and the administration, planning and development of social programs. With each consumer group and in every agency setting, social workers help to correct the causes or alleviate the results of poverty, racism, poor health, mental illness or any condition that prohibits people from reaching their potential.

Graduate Program Information

The School of Social Work offers full-time and part-time graduate study in Las Cruces and Albuquerque leading to the Master of Social Work (MSW) degree. The program is designed to provide academic and fieldwork education with an emphasis in Advanced Generalist Practice with Populations of the Southwest based on the foundation first year of generalist practice. The program is fully accredited by the Council on Social Work Education (CSWE).

Admission to the program is in accordance with the general regulations of the Graduate School, which include a completed undergraduate degree from an accredited institution. In addition to applying to the Graduate School, application must also be made to the School of Social Work. The application to the School of Social Work spells out admission requirements that include submitting an application form, a written statement, a current resume and personal references and statistics course. Applicants having a degree from a non-liberal arts area must show coursework that includes two courses from the humanities, two from the natural and biological sciences (with one course containing content in human biology) and three from the behavioral and social sciences, with at least one course in sociology or psychology. Applicants are also required to complete a Basic Statistics course prior to beginning their MSW program of study. The program does not grant academic credit for work or other life experience in lieu of social work course or field content.

The School of Social Work is committed to ensuring a culturally diverse student population to enhance the social work profession at both state and national levels. To meet this goal of diversity, the school makes an effort to recruit and retain a diverse student population.

Applicants who qualify for advanced standing may complete the program with 34 credits rather than 60 credits. Admission to the advanced-standing program is for highly qualified applicants who have a Bachelor of Social Work degree (BSW) from a social work program accredited by the CSWE and earned within seven years of beginning the advanced standing program, a cumulative GPA of at least 3.0 and a minimum GPA of 3.5 in core Undergraduate Social Work courses.

Degrees for the Department

S WK 221G. Introduction to Social Welfare

3 Credits

A broad overview of current social problems and the role of social agencies and community members in addressing these problems.

S WK 251. Women s Issues in Social Work

3 Credits

Examines gender-specific social problems and their identification and resolution through the use of social agencies and community resources. Community Colleges only.

S WK 253. Case Management

3 Credits

Introduction to case management for social- and human-services workers. Overview of typical duties and responsibilities of a case manager, including setting goals, performing assessments, writing progress notes, and linking clients with other resources in the community. Recommended for students considering a career in social work or human services. Community Colleges only.

Prerequisites: PSY 201G and S WK 221G.

S WK 300. Social Work Practice Skills

3 Credits

Introduction to generalist social work practice. Interpersonal skills, values, and ethics required in the helping relationship. Taught in a small-group format. May be repeated up to 3 credits. Restricted to: S WK majors. Restricted to Las Cruces campus only.

S WK 301. Orientation to Field

1 Credit

This course will provide an orientation to requirements for a social work field practicum and to establish the transfer of learning between classroom instruction and future practicum skill application. Restricted to S WK majors.

Corequisite(s): S WK 300.

S WK 309. Sociocultural Concepts

3 Credits

Theoretical and sociohistorical perspectives on racism, sexism, ageism, heterosexism, classism, ableism, and other forms of discrimination and oppression. Cultural diversity, strengths, and Southwest and border issues are examined.

S WK 311. Human Behavior and the Social Environment I

3 Credits

Major theories of human behavior and the life span from conception to adolescence. Restricted to: S WK majors.

Corequisite(s): S WK 309.

S WK 312. Human Behavior and the Social Environment II

3 Credits

Continuation of S WK 311. Major theories of human behavior and the life span from young adulthood through old age. Restricted to: S WK majors.

Prerequisite(s): S WK 311.

S WK 313. Social Work Practice with Individuals

3 Credits

Generalist social work practice theory and skills in engagement, information gathering, assessments, planning, interventions, evaluation, and termination with individual client systems. Restricted to: S WK majors.

Prerequisite(s): S WK 300.

S WK 315. Social Work Practice with Families

3 Credits

Generalist social work practice theory and skills in engagement, information gathering, assessments, planning, interventions, evaluation, and termination with multicultural family systems. Restricted to: S WK majors.

Prerequisite(s): S WK 300.

Corequisite(s): S WK 313.

S WK 316. Social Work Research

3 Credits

This undergraduate course is designed to prepare students to be effective consumers of research and to evaluate their own practice. Students will learn to read, critically evaluate and use the research of others to select interventions that are based on evidence of effectiveness. Students will demonstrate the knowledge, values and skills to be critical consumers of research for effective and ethical practice as well as possess the basic skills necessary to evaluate their own social work professional practice. May be repeated up to 3 credits. Restricted to: Restricted to Social Work majors.

Prerequisite(s): STAT 251G, STAT 271G or A ST 251G.

S WK 331V. Introduction to Social Policy: History

3 Credits

Historical overview of the economic, political, and cultural impact on social welfare policy, institutions, and professions with international content.

S WK 401. Field Experience I**3 Credits**

This course is a social work practicum at a university approved agency. This course focuses on generalist social work practice. At this level students are expected to assume substantive responsibility for carrying out social work activities at the beginning level of social work practice. • Students are given the opportunity to observe and assume social work activities in direct and indirect practice under close supervision. • These field work opportunities enable students to apply and integrate previous and current semester learning. • Opportunities will be available for students to develop knowledge of professional practice at multiple system levels and with a variety of cultural, ethnic, racial, gender and age groups. • Students in this Field Practicum Course are required to take a Field Seminar that will provide the students the opportunity to discuss the integration of academic and practice experience learning. Restricted to: S WK majors. S/U Grading (S/U, Audit).

Corequisite(s): S WK 412.

S WK 403. Social Work Practicum II**3 Credits**

This course is a social work practicum at a university approved agency. This course focuses on generalist social work practice. At this level students are expected to assume substantive responsibility for carrying out social work activities at the beginning level of social work practice. • Students are given the opportunity to observe and assume social work activities in direct and indirect practice under close supervision. • These field work opportunities enable students to apply and integrate previous and current semester learning. • Opportunities will be available for students to develop knowledge of professional practice at multiple system levels and with a variety of cultural, ethnic, racial, gender and age groups. • Students in this Field Practicum Course are required to take a Field Seminar that will provide the students the opportunity to discuss the integration of academic and practice experience learning. Restricted to: S WK majors.

Corequisite(s): SWK 419.

S WK 405. Service Learning**3 Credits**

This course introduces students to field work as an essential component of social work education. Students are required to provide a minimum of 40 hours of service to a human services agency. This course will focus on the connection between coursework, field work, the NASW Code of Ethics and skills needed to work with people.

Prerequisite(s): S WK 301, S WK 313.

S WK 412. Practicum Seminar I**3 Credits**

This practicum seminar course must be taken with SWK 401 to provide students who are enrolled in the field practicum course the opportunity to discuss and reflect on social work knowledge, values and skills as they interact with clients in their practicum placement. • Students will have an opportunity to present a case and discuss how they are able to integrate the nine social work competencies • The seminar will provide opportunities to integrate previous and current semester learning.

Restricted to: S WK majors. S/U Grading (S/U, Audit).

Corequisite(s): S WK 401.

S WK 415. Generalist Social Work Practice with Organizations and Communities**3 Credits**

This course focuses on generalist social work values, knowledge and skills regarding practice with larger systems. Course content will include theories of community and organizational assessment and intervention. Strategies for advocacy and change, leadership for community and organizational change. May be repeated up to 3 credits.

Prerequisite(s): S WK 300, S WK 313, S WK 315.

Corequisite(s): S WK 417.

S WK 416. Generalist Social Work Practice with Groups**3 Credits**

Generalist social work practice skills with group client systems focusing on the planned change process and the empowerment of oppressed populations. May be repeated up to 3 credits. Restricted to: S WK majors.

Prerequisite(s): SWK 415.

S WK 417. Social Welfare Policy: Legislation**3 Credits**

Policy practice related to the formation of current social welfare policies that promote social and economic justice. Emphasis is on the development and influences of social policy, policy analysis, and the policy change process. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: S WK majors.

S WK 418. Professionalism in the Field of Social Work**3 Credits**

This course is designed to prepare you to develop professional skills, knowledge, awareness and boundaries as a social worker as you get ready to enter the field practicum. May be repeated up to 3 credits.

Restricted to: S WK majors.

Corequisite(s): S WK 419.

S WK 419. Practicum Seminar II**3 Credits**

This practicum seminar course must be taken with S WK 403 to provide students who are enrolled in the field practicum course the opportunity to discuss and reflect on social work knowledge, values and skills as they interact with clients in their practicum placement. • Students will have an opportunity to present a case and discuss how they are able to integrate the nine social work competencies • The seminar will provide opportunities to integrate previous and current semester learning. May be repeated up to 3 credits. Restricted to: S WK majors. S/U Grading (S/U, Audit).

Corequisite(s): S WK 403.

S WK 443. Family and Child Welfare Practice**3 Credits**

Current issues and interventions in child protection, foster care, family preservation and support, family reunification, adoption and permanency planning. Cannot receive credit for S WK 443 and M SW 543.

S WK 447. Identifying Mental Health Concerns**3 Credits**

This course is designed to advance students' knowledge and professional skills for addressing mental health concerns in social work practice at the bachelor's level. Students will learn to identify major mental health concerns across the life span. Culturally competent practices are considered in regard to various mental health concerns. Restricted to: SWK majors.

S WK 449. Independent Study**1-6 Credits**

Individual studies directed by consenting faculty with the prior approval of the department head.

Prerequisite: majors or consent of instructor.

S WK 490. Family and Child Welfare Policy**3 Credits**

This course is designed to provide students with an understanding of the history and evolution of child welfare policies, initiatives and factors that influence advocacy and practices within the child welfare system. Child welfare policies and services specific to the state of New Mexico are infused throughout the course. Taught with MSW 590. Students enrolled in S WK 490 will not receive credit MSW 590. Students enrolled in S WK 490 will not receive credit MSW 590.

S WK 497. Special Topics**3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be used as a mandatory practice elective. Restricted to: S WK majors.

Prerequisite(s): Junior or above standing, majors or consent of instructor.

Alcohol and Drug Counseling - Graduate Minor

This minor involves the departments of: Counseling and Educational Psychology; Family and Consumer Science; Nursing; and Social Work. Completion of this minor will prepare students for completion of the coursework necessary to take the exam for state licensure as a drug and alcohol counselor in the State of New Mexico. If you are interested in the minor please request an information sheet from the Graduate Program Coordinator that will outline the program requirements and specify the application process.

Master of Social Work/Master of Public Health - Dual Degree

The School of Social Work and the Department of Health Science offer a joint MSW/MPH degree program. The two degrees are:

1. Master of Social Work (MSW) and
2. Master of Public Health (MPH) in Community Health Education.

Students interested in pursuing the joint degree program must:

- Prepare and submit separate admissions applications to both programs
- Notify each program in writing of the intent to complete the joint degree program
- Be officially admitted to both degree programs
- Notify the NMSU Graduate School of the intent to complete the joint degree program
- Complete all course requirements for both degree programs
- Complete separate final examinations for both degree programs

If you are interested in pursuing this option please call and talk to the Graduate Program Coordinator. It is anticipated that students in this program will take three academic years to complete the joint MSW/MPH degree programs.

Social Work - Bachelor of Social Work

The B.S.W. program prepares you for a beginning professional level of generalist social work practice with an understanding and appreciation of the cultural diversity of the Southwest.

To be admitted as a B.S.W. candidate, you must formally apply for admission to the program. A 2.5 grade-point average is required for admission. Consult the pre-social work major advisor, located in the School of Social Work in the College of Health and Social Services. The deadline for submitting applications is the last Friday in January. The program is fully accredited by the Council on Social Work Education and all students have access to copies of the Curriculum Policy Statement.

General Education Requirements

Students need to complete the New Mexico State University general education requirements before applying to the Bachelor of Social Work program. The School of Social Work requirements include S WK 221G Introduction to Social Welfare and two semesters of a second language. Once accepted into the program, students also need to meet a Cultural Emphasis requirement.

Students may choose one of three tracks to complete a minimum of six credit hours.

1. Take two more semesters of any language.
2. Take an approved language immersion program.
3. Take two approved upper-level courses with a multicultural emphasis (you can get the approved list of courses from your social work advisor).

If the cultural emphasis classes are also Viewing a Wider World classes, you still need to complete the total number of specified upper-division credits necessary for graduation. Highly recommended electives for social work students include courses in sociology, history, Spanish, psychology, family life, child development, English, philosophy, anthropology, computer science, criminal justice, government and economics. Electives must be sufficient to bring total credits to 120, including 52 upper-division credits, for graduation.

Departmental Requirements

Preparation for entry-level professional social work requires a thorough knowledge of theory and skills; therefore, the high number (57) of core social work credits is required.

S WK 412 Practicum Seminar I	12
S WK 418 Professionalism in the Field of Social Work	3
Credits	15
Total Credits	112-114

¹ BIOL 101G Human Biology and BIOL 101GL Human Biology Laboratory: must be completed before starting the S WK program and require a grade of C- or better.

² C EP 110G Human Growth and Behavior and S WK 221G Introduction to Social Welfare: must be completed before starting the S WK program and require a grade of C- or better.

NOTE: Students need to submit a formal application packet to the School of Social Work in January and be accepted into program before they can take junior or senior year courses.

A grade of C- or better is required for all social work courses.

Social Work - Master of Social Work

The requirements for the Master of Social Work degree include 60 credits of designated graduate courses (34 credits of designated graduate courses for those accepted for advanced standing); a cumulative grade-point average of at least 3.0 on a 4.0 scale in all course and fieldwork.

Note that all social work courses must be taken in sequence. Successful completion of course work for each semester is a prerequisite for the course work of the following semester.

Any social work graduate student who receives an F in a social work course is dismissed from the program and must reapply for admission to the MSW program. Any social work student who receives a D in a social work course must repeat the course. Any social work student who receives 2 D's in social work courses is dismissed from the program and must reapply for admission to the MSW program.

An integral part of a graduate social work program is completing the field experience. For those enrolled in the two-year program, two practicum placements will be required, which result in the student's spending 950 hours in the field. For those students entering the program with advanced standing, one field placement is required, totaling 500 hours in the field. Students are offered a wide range of field settings in New Mexico and West Texas. Students should be prepared to travel some distance and be responsible for their own transportation costs.

Application Deadlines

The deadline for complete applications is January 15th of each year.

- Late applications that are complete will be considered when received on a space available basis.

Course of Study

Full-Time Program (60 credits)

UNDERGRADUATE HONORS COLLEGE

Dean - Miriam S. Chaiken

Associate Dean and Director of National Scholarships - Tim Ketelaar

Assistant Dean for Development - Cindy Gwaltney Nicholson

Executive Administrative Assistant - Valerie Torres

Crimson Scholars Coordinator - Roman Gutierrez

Student Programs Coordinator - Abby Nayra

The Honors College is located in the Conroy Honors Center on the corner of University and Espina Avenues. Most honors classes are taught in the Conroy Honors Center.

Phone: (575) 646-2005

Website: <http://honors.nmsu.edu/>

Mission of the William Conroy Honors College

The mission of the New Mexico State University Honors College is to serve the citizens and state of New Mexico by providing an enriching environment for diverse, academically talented and motivated students. The Honors College also seeks to create a community of scholars and mentors that fosters personal growth, critical thinking, leadership, independence, curiosity and social responsibility. The college aspires to cultivate student potential to broadly understand and positively impact communities, organizations and the larger world. The Honors College aims to focus campus attention on excellence in undergraduate education while strengthening New Mexico State University's reputation as the university of choice in New Mexico.

In support of this mission, the Honors College integrates the following objectives:

- Provide students with an interdisciplinary, intellectually challenging curriculum that integrates active and service-based learning;
- Promote university-wide undergraduate research opportunities, linking students with faculty mentors;
- Foster faculty enrichment and professional development;
- Encourage, mentor and guide students seeking postgraduate scholarships and fellowships;
- Offer students opportunities for developing leadership skills;
- Create a residential community that combines learning inside and outside the classroom.

In small classes taught by master teachers, students in the Honors College engage in lively discussion and collaborative investigation of interdisciplinary topics. By taking honors courses, students may also work toward completing general education requirements and disciplinary requirements in the major.

Students in the Honors College are 'dual citizens', meaning they enroll in both the college(s) of their major/minor and the Honors College. The Honors College does not offer a degree instead, it offers students

the opportunity to graduate with various levels of honors distinction (described below).

The Honors Faculty

The Honors College faculty come from academic departments from throughout the university. Members of the faculty are chosen through a rigorous selection process and include many of New Mexico State University's most distinguished teachers and researchers.

Professors Alexander, Amato, Bosland, Bronstein, Butler, Cleveland, Fouillade, Hammond, Harvey, Horodowich, Hubbell, Huhmann, Knapp, Lapid, Lawton, Linkin, Lodder, Malamud, Manning, Munson-McGee, Olberding, Serrano, Shearer, Stanford, Storm, Thompson

Associate Professors Armfield, Boeing, Clarkson, Guynn, Herrera, Keleher, Ketelaar, Lee, Miller-Tomlinson, Morgan, Rourke, Salamaca-Riba, Schirmer

Assistant Professors Flores-Carmona, Hout

College Professors Fitzsimmons, Gilpin, Lavender, LaPorte, Masson, McCamley, Rochelle

Emeritus Professors Eamon, Ellis, Lapid, Ocepek, Rundell, Townley, Wolf

Admission to the Honors College

Students admitted to the Honors College are designated as Crimson Scholars, the following eligibility criteria apply:

Automatic Eligibility. Entering freshmen are automatically eligible for admission to the Honors College and Crimson Scholars by meeting one of the following criteria:

- composite ACT score of 26 (or 1170 SAT score); or
- high school GPA of 3.75 or higher

Admission by Petition. Entering freshmen who have an ACT score of at least 24 (or 1100 SAT score) or a high school GPA of 3.50 may submit a written petition for provisional admission to the Honors College using a form provided by the Honors College office upon the request of the student.

Transfer and Continuing Students. Transfer and continuing students who have earned at least 3 college credit hours will be eligible for admission to the college on the basis of a cumulative college GPA that meets eligibility requirements for continuing students (see below).

Eligibility for Continuing Membership. The eligibility criteria for continuing membership in the Honors College is the same as for continuing Crimson Scholars status. The requirements are:

- Fewer than 28 hours earned: 3.3 GPA
- More than 28 hours earned: 3.5 GPA

Appeals. Students who fall below the designated GPAs and lose their eligibility for Honors College status due to extraordinary circumstances may petition the College Admission Committee for readmission.

Enrolling in Honors Courses

Students do not have to be members of the Honors College to enroll in honors courses. Any eligible student may enroll. The eligibility requirements to enroll in lower-division honors courses are the same as those pertaining to admission to the college and continuance in the college. For upper-division courses, the requirement is a cumulative

3.2 GPA. Students lacking these requirements may petition the Honors College Dean for permission on a case-by-case basis.

Graduating with University Honors

The Honors College offers two program options:

- 1. Graduation with University Honors and
- 2. The Honors Certificate.

Each option has separate eligibility requirements, benefits and forms of recognition for the student. Almost all honors courses fulfill university general education requirements. To have these courses count toward one of these programs, a student must earn at least a B.

Any student who attains an overall GPA of 3.5-3.749 and who completes 15 credits of honors coursework and the honors capstone is eligible to graduate with University Honors. Students who attain an average of 3.75 or better and who complete 15 credits of honors coursework and the honors capstone are eligible to graduate with Distinction in University Honors. Transcripts will certify graduation with University Honors or Distinction in University Honors. Students who complete the requirements for graduation with either distinction receive recognition in the commencement program, a Certificate of Distinction and a medallion upon graduation.

University Honors Requirements -- Suggested Sequence

Freshman-Sophomore Years	
Three courses from the Honors Core (lower division)	9
Junior-Senior Years	
Two 300- or 400-level Honors Certificate Program courses	6
Thesis or Final Project	3
Total Credits	18

Senior Capstone

In order to graduate from the Honors College with the designation of University Honors or Distinction in University Honors, a student must complete a Capstone. The Capstone is normally completed during the senior year and may be undertaken only if the student meets the eligibility requirements for graduation from the College (3.5 minimum GPA and the required courses). The Capstone carries 3 graded credit hours.

Before beginning the final project, the student must choose a faculty advisor and file with the College a proposal that is approved by the faculty advisor and the Dean of the Honors College. The final project is graded by the faculty advisor, who submits a final grade to the Dean of the Honors College.

Candidates for graduation with University Honors and Distinction in University Honors are expected to make public presentations of their final projects at one or more of the following:

- 1. the Undergraduate Research and Creative Arts Symposium,
- 2. a department seminar,
- 3. and/or a seminar sponsored by the Honors College.

The method of presentation shall be that deemed appropriate for the discipline in which the project is undertaken.

The written component of the final project shall be filed with the Honors College in a bound copy according to the guidelines established by the college.

The Senior Capstone may be any one of the following:

Thesis — The thesis is an independent scholarly or scientific research project that is undertaken with the advice and direction of a member of the university faculty. The thesis does not need to be on a topic in the student’s major field, but must meet the guidelines and protocols of the discipline in which it is written. The student’s faculty advisor will review the student’s thesis and determine a final grade.

Creative Arts or Performance Project — The Senior Creative Arts/ Performance project may take the form of an exhibition, performance, recital or other venue deemed appropriate by the faculty advisor and the Dean of the Honors College. In addition to the performance or exhibition, the student must complete a written report or description of the project that is approved by the faculty advisor, to be filed with the Honors College.

Service Learning Project — The Service Learning Project shall be undertaken under the auspices and supervision of an agency approved by the Dean of the Honors College. A faculty advisor must approve the project and monitor its progress. The Service Learning Project must be more than simply a certain number of hours volunteered to an agency. It must also involve a creative and leadership element, such as the design of a program or policy that identifies a problem and meets a specific need of the agency. A time log and journal shall be kept by the student during the course of the project. A written report describing the objective and design of the project, as well as an evaluation of its successes and failures, must be submitted to the Honors College according to norms established by the college. The report must also contain a reflective component, demonstrating increased self-awareness and personal growth.

Honors Contract — An Honors Contract is a mechanism for adding an "honors dimension" to a course that is not listed as an honors course (HON prefix). The contract allows honors students to convert a regular non-honors course into an honors course that counts toward graduation with University Honors. The Honor Contract project should add an academic or experiential dimension to the course by introducing new material and/or experiences. Contract form may be downloaded from the Honors College website.

Community Service Options

The Honors College encourages its students to perform volunteer public service. Under certain circumstances, public service may be used as an alternative to completing some of the requirements for graduation from the Honors College. The following guidelines apply:

During the sophomore, junior or senior year, a student with at least a 3.5 GPA may undertake community service with an agency or organization in Doña Ana County (or an agency outside the area approved by the Honors College Dean) to earn a waiver of up to 3 of the hours required for University Honors (not including the Final Project). A minimum of 15 hours of community service per week, per semester is required for each honors credit hour to be waived. Community service hours must be verified by a supervisor of the agency or organization on a form approved by the Honors College. On-campus activities are not included under this option. The student must also certify that the community service hours are not being used for any course or degree requirement. Approval of the

Dean of the Honors College must be obtained prior to beginning volunteer service to be eligible for this option.

International Study Option

Students in the Honors College are strongly encouraged to participate in international study. An NMSU honors student with at least a 3.5 GPA may earn a waiver of up to 3 credit hours required for University Honors for such international study (not including the Final Project). This waiver will be awarded for college credit earned while participating in any international study program approved by the Honors College or the Office of International Study. One honors hour will be waived for each 3 semester credit hours earned with a grade of 'A', 'B', or 'S'. Permission to use this option must be approved in advance by the Honors College.

Note: Waiver of university honors credit for service learning or international study does not reduce or affect in any way the total number of hours required for graduation. Waiver of honors credit for service learning or international study cannot be applied toward the final project requirement.

Honors Certificate Program

Sophomores, juniors and seniors with a cumulative grade-point average of 3.2 are eligible for the Honors Certificate Program. A student who completes at least two 300- or 400-level honors seminars will be given a Certificate of Distinction at graduation and special recognition in the commencement program. See the honors Dean for details on available seminars, Honors College, Conroy Honors Center.

Crimson Scholars Program

The Crimson Scholars Program is a benefits and recognition program for academically superior students who have a cumulative 3.5 GPA and are taking three or more credits per semester. Crimson Scholars receive a number of benefits, including:

- Automatic eligibility for all Honors courses
- Early registration
- Extended library check-out privileges
- Special advising
- The option to live in the Honors Living Learning Community in our residence hall.
- Students who earned at least 75% of their credits from New Mexico State University with Crimson Scholar status¹ at the time of graduation receive a "Crimson Scholar Graduate" notation on their transcript.
- Students who complete 75% of their credits as Crimson hours¹ from New Mexico State University at the time of applying for their degree, receive recognition in the commencement program and are eligible to purchase a Crimson Scholar cord for graduation.
- Students who have maintained Crimson Scholars status for 24 Crimson hours¹ from New Mexico State University earn a Crimson scholar pin.

To be eligible for the Crimson Scholars Program, applicants must be degree seeking.

- Entering freshmen must have either:
 - a minimum ACT standard composite score of 26;
 - a 3.75 or better high school GPA; or
 - a minimum SAT score of 1170; or

- a 3.75 or better high school GPA

- Currently enrolled students must have a minimum cumulative GPA of 3.5 for 75% of the credits¹ at NMSU
- Transfer students must have a 3.5 cumulative GPA from their previous institution(s) or complete 3 or more credits¹ at NMSU for eligibility.

To maintain Crimson Scholar status:

- Freshmen entering on an ACT score must maintain a cumulative GPA of 3.5 and complete three or more credits per semester to continue in the program.
- Sophomores, juniors and seniors must maintain a minimum cumulative GPA of 3.5 and be currently enrolled in a total of 3 or more credits¹ per semester at NMSU or any NMSU community college to retain their Crimson Scholars status.
- Crimson Scholars whose GPA drops below the required cumulative 3.5 or drop below the three credit minimum will be dropped from the program. If in the following semester, the student's cumulative GPA and credits again meet the minimum requirement, the student will *automatically* be reinstated.

In recognition of the student's academic achievement, a statement designating "Crimson Scholar Graduate" is placed on the student's transcript after completion of 75% of credits earned at NMSU as Crimson hours¹ at the time of graduation and a minimum cumulative GPA of 3.5. To be designated in the commencement program as a Crimson Scholar graduate, a student must complete a minimum 75% of credits earned at NMSU as Crimson hours¹ at the time of applying for their degree. Crimson Scholars receive recognition in the commencement program and are eligible to purchase a Crimson Scholar cord for graduation. Students who complete 24 Crimson hours¹ from New Mexico State University earn a Crimson Scholar pin. Crimson Scholars are entitled to early registration and library privileges. Additional information is available from the Crimson Scholars Office, located in the Conroy Honors Center.

NOTE: Crimson Scholars interested in work-study positions must submit a yearly Free Application for Federal Student Aid (FAFSA) and complete a financial aid file with the NMSU Office of Financial Aid.

¹ does not include I or audit course designations at NMSU

The Honors Living and Learning Community (HLLC)

The New Mexico State University Honors Living and Learning Community (HLLC) is an educational initiative that links in-class and out-of-class learning experiences for honors students. The goals of the Honors Living and Learning Community are to:

1. supplement classroom learning experiences with co-curricular programming;
2. foster the development of an honors community that includes honors students, faculty, and staff; and
3. create a supportive environment for honors students.

Above all, the Honors Living and Learning Community aims to develop a small-college environment within the context of a large research university, thus giving students the benefits of both. Honors students, especially first-year students, are encouraged to take advantage of

this special opportunity. The Honors Living and Learning Community is comprised of three components:

The Conroy Honors Center — is the academic home of the Honors College. This historic building was designed by the renowned southwestern architect Henry C. Trost and built in 1908 to house the campus chapter of the YMCA. The Conroy Center houses the administrative offices of the program along with three seminar rooms, a student commons area, a kitchen and a computer lab.

The Honors Residence Hall — is the focus of NMSU's vibrant honors community. It is a place where honors students live among a community of excellent students with outstanding academic records and who are interested in getting the most out of the academic opportunities offered to them at a large research institution. It also hosts many social and extracurricular academic activities.

The Honors Residence Hall is equipped with a electronic classroom, where some introductory honors courses are taught. The honors faculty participate in residence hall programming and frequently attend residence hall floor meetings with students. The Honors Residence Hall is open to both men and women of any university class standing.

President NMSU-Grants • *Mickey Best*

NMSU's Community College campuses make two years of college education available to students in their home environment. The community colleges provide a high quality program of education for all full-time and part-time students; provide occupational education; and provide noncredit community education courses.

A student attending any NMSU Community College campus is enrolled as a New Mexico State University student and may change campuses without completing additional admission procedures.

Associate Degree Graduation Requirements

Associate degree programs are offered at the NMSU Community College campuses for those desiring specialized training for employment. Community, junior, and technical college transfer students may be admitted and classified on the basis of acceptable credits at two-year institutions. The Associate in prebusiness degree, administered by the College of Business, is available to NMSU Community College campus students completing the requirements as outlined in the "College of Business" section of this catalog. Most courses required for the Associate in Applied Science degree with options in electronics technology offered at the Carlsbad, Grants and Alamogordo campuses meet lower division requirements for the baccalaureate degree program in Electronics Engineering Technology, which is offered on the Las Cruces campus through the College of Engineering.

Math requirements in associate degree and certificate programs vary. ENGL 111G and all developmental studies courses in English, math and reading must be completed with a grade of C- or better. Please refer to your NMSU Community College campus catalog for details. The last 15 semester credits for an associate degree must be taken in residence at NMSU or one of the NMSU Community Colleges. Degree requirements remain in effect for six years. The designation, Meritorious Graduate, is awarded to the top 15 percent of the students receiving associate degrees within each college in any one academic year, provided 45 or more credits have been completed at NMSU and/or a NMSU Community College with computable grades.

Certificate Programs

In addition to the regular degree programs offered by the NMSU Community College campuses, certificate programs are available. Students should contact the NMSU Community College campus for information on available certificate programs.

NMSU Community College Campus Information

Information concerning NMSU Community College campus programs, class schedules, catalogs, registration and other data may be obtained from the NMSU Community College campus administration.

COURSE LISTINGS

Courses are titled in the following style:

ASTR 110G Introduction to Astronomy (4 cr. (3+3P))

- Course number- (110) indicates the course is a freshman course.
- Suffix (G)- indicates a New Mexico Common Core course.
- Suffix (V)- indicates a Viewing a Wider World course.
- Suffix (H)- indicates a Honors courses outside of the Honors prefix.
- Suffix (L)- indicates a Laboratory course.
- Suffix (M)- indicates a Multicultural course.
- Credits - The unit of university credit is the semester hour, which is the equivalent of one hour's recitation or a minimum of two hours of practice per week for one semester. The (3+3P) means that the class meets for 150 minutes per week for lecture and also requires 150 minutes per week of "laboratory" (practice, field work, or recitation).

Course Number Designation

- 100-199 – Freshman courses
- 200-299 – Sophomore courses
- 300-399 – Junior courses
- 400-499 – Senior courses
- 450-499 – Senior or graduate courses
- 500-599 – First-year graduate courses
- 600-699 – Advanced graduate courses
- 700 – Ph.D. dissertation

In order to register for 300-level courses, a student must have met the basic academic skills requirements.

The letter N will be added as a suffix to the course number when the course credits are not applicable to the baccalaureate and specified associate degrees.

A

- A E-AEROSPACE ENGINEERING (A E) (p. 646)
- A EN-AGRICULTURAL ENGINEERING (A EN) (p. 647)
- A S-ARTS AND SCIENCES (A S) (p. 647)
- A ST- APPLIED STATISTICS (A ST) (p. 648)

A E-AEROSPACE ENGINEERING (A E)

A E 102. Introduction to Aerospace Engineering 1 Credit

A survey course of aeronautical, aerospace, and astronautical engineering, with an emphasis on basic aerospace concepts and major aerospace principles without going into detailed math and analysis. Students are given the opportunity to listen to guest speakers and participate in projects utilizing the NMSU Ultralight and NMSU wind tunnel. Restricted to: Main campus only.

A E 339. Aerodynamics I 3 Credits

Fluid properties, conservation equations, incompressible 2-dimensional flow; Bernoulli's equation; similarity parameters; subsonic aerodynamics: lift and drag, analysis and design of airfoils. May be repeated up to 3 credits. Restricted to: A E majors.

Prerequisite(s): M E 234 or M E 237 and M E 228 or MATH 392.

A E 362. Orbital Mechanics 3 Credits

Dynamics of exoatmospheric flight of orbiting and non-orbiting bodies; 2-body orbital dynamics and Kepler's laws; orbits in 3 dimensions; orbit determination; orbit design and orbital maneuvers; lunar and interplanetary trajectories. May be repeated up to 3 credits.

Prerequisite(s): M E 228 or MATH 392, M E 234 or M E 237, and M E 261.

A E 363. Aerospace Structures 3 Credits

Advanced concepts of stress and strain, introduction to the analysis of aero structures, complex bending and torsion, thin walled sections and shells, computational techniques. Prerequisites: C E 301

A E 364. Flight Dynamics and Controls 3 Credits

Fundamentals of airplane flight dynamics, static trim, and stability; spacecraft and missile six degree of freedom dynamics; attitude control of spacecraft. May be repeated up to 3 credits.

Prerequisite(s): M E 228 or MATH 392, M E 234 or M E 237, and M E 261.

A E 400. Undergraduate Research 1-3 Credits (1-3)

Performed with the direction of a department faculty member. May be repeated for a maximum of 6 credits.

Prerequisite(s): Consent of faculty member.

A E 405. Special Topics 3 Credits

Topics of modern interest to be offered by the departmental staff. Consent of instructor required.

A E 419. Propulsion 3 Credits

Propulsion systems, thermodynamic cycles, combustion, specific impulse; principles of gas turbines, jet engines, and rocket propulsion systems. Prerequisites: A E 439

A E 424. Aerospace Systems Engineering 3 Credits

Basic principles of top down systems engineering and current practice; preliminary and detailed design of aircraft and space vehicles, including requirement, subsystem interaction, and integration, tradeoffs, constraints and non-technical aspects.

Prerequisite(s): A E 362.

A E 428. Aerospace Capstone Design 3 Credits

Team Project-analysis, design, hands-on build test, evaluate.

Prerequisite(s)/Corequisite(s): A E 447. Prerequisite(s): A E 363 and A E 424.

A E 439. Aerodynamics II 3 Credits

Principles of compressible flow, momentum and energy conservation; thermal properties of fluids; supersonic flow and shock waves; basics of supersonic aerodynamics.

Prerequisite(s): A E 339, M E 240, and M E 328.

A E 447. Aerofluids Laboratory 3 Credits (2+3P)

Use of subsonic wind tunnels and other flow to study basic flow phenomena and methods of fluid measurement and visualization.

Prerequisite(s)/Corequisite(s): A E 439. Prerequisite(s): M E 345.

A E 451. Aircraft Design 3 Credits

Conceptual design of aircraft based on existing designs, empirical relationships, and theory. Dimensioning, structural design, and performance analysis of major subcomponents such as fuselage, wing, and propulsion system. Static stability and control analysis.

Prerequisite(s): A E 339 and A E 363.

A E 509. Individualized Study 3 Credits

Individualized study covering specialized topics in aerospace engineering. Consent of instructor required. Restricted to A E & M E majors.

A E 510. Special Topics**1-6 Credits (1-6)**

Topics in aerospace engineering. May be repeated for a maximum of 6 credits. Consent of instructor required.

A E 527. Control of Mechanical Systems**3 Credits**

Rigorous introduction to the control of dynamical systems, with a focus on mechanical systems. Includes basic systems theory, controllability, feedback and stabilization, observers and dynamic feedback, and applications of methods to systems of importance in mechanical engineering. Consent of instructor required. Cross-listed with: M E 527

A E 529. Nonlinear and Optimal Control**3 Credits**

Introduction to optimal control theory, Pontryagin's Maximum Principle, control of simple mechanical systems, Lagrangian and Hamiltonian methods, introduction to geometric control-Lie algebras, distributions, controllability and observability. Cross-listed with: M E 529

A E 552. Introduction to Gasdynamics**3 Credits**

Gas kinetics, rarefied gas dynamics, collision dynamics; velocity distribution function, finite rate chemical process; thermal nonequilibrium and chemically reacting flows; introduction to quantum and statistical mechanics; Boltzmann equation and the BGK model; moments of the Boltzmann Equation; the Navier-Stokes Equation; the structure of shock waves.

A E 562. Astrodynamics**3 Credits**

Two-body problem, orbit analysis, and classical orbit determination methods; trajectory design and optimization; orbital maneuvers using impulsive or continuous thrust; relative motion and rendezvous; perturbations and Lagrange planetary equations; interplanetary mission design including gravity assists; introduction to the three-body problem, halo orbits, and invariant manifolds in mission design.

A E 566. Aeroelasticity**3 Credits**

Introduction to aeroelasticity with emphasis on fluid-structure interactions occurring in aircraft. Phenomena considered include flutter/LCD (limit cycle oscillation), buffeting, divergence, and control reversal. Primary emphasis on structural dynamics, with use of simple aerodynamic models.

A E 598. Special Research Programs**1-3 Credits (1-3)**

Individual investigations, either analytical or experimental. May be repeated for a maximum of 6 credits. Restricted to A E & M E majors.

A E 599. Master's Thesis**15 Credits (15)**

Thesis. Graded: Thesis/Dissertation.

A E 600. Doctoral Research**1-15 Credits (1-15)**

This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination. Graded: Thesis/Dissertation.

A E 700. Doctoral Dissertation**15 Credits (15)**

Dissertation. Graded: Thesis/Dissertation.

A EN-AGRICULTURAL ENGINEERING (A EN)

A EN 459. Design of Water Wells/Pumping Systems**3 Credits**

Design of water wells; selection and specification of pumps and power units.

Prerequisite: C E 382.

A EN 475. Soil and Water Conservation**3 Credits**

Types and extent of erosion. Design and operation of structural and vegetative systems to control erosion. Elements of hydrology.

Prerequisite: C E 331.

Corequisite: C E 382 or consent of instructor.

A EN 478. Irrigation and Drainage Engineering**3 Credits (2+3P)**

Design and operation of surface and sprinkler irrigation systems; pumping and conveyances; introduction to principles and practices of drainage systems and wells.

Prerequisite: C E 382 or consent of instructor.

A EN 498. Special Topics**1-3 Credits**

May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

A S-ARTS AND SCIENCES (A S)

A S 100. Insights: University Experience for Future Careers**1 Credit**

Research and investigation of college majors and career opportunities.

A S 101. Success Seminar**1 Credit**

Academic and personal strategies and campus resources to enhance scholastic achievement. May be repeated up to 1 credits.

A S 102. Career Planning and Development**1 Credit**

Individual assessment of self, the world of work, and the career decision making process.

A S 103. Quantitative Foundations**1-3 Credits (1-3)**

Course is designed to prepare students for College level mathematics. Initial assessments generate individualized paths to mastery of fundamental skills. Course also covers strategies and campus resources to enhance scholastic achievement. Traditional Grading with RR. Restricted to Las Cruces campus only.

A S 200. Interdisciplinary Topics**1-4 Credits**

An interdisciplinary approach to subject matter cutting across departmental fields. Specific subjects to be announced in the Schedule of Classes.

A S 300. Interdisciplinary Topics**1-3 Credits**

An interdisciplinary approach to subject matter cutting across departmental fields. Specific subjects to be announced in the Schedule of Classes. Graded S/U.

A S 305. Prehealth Internship**1-3 Credits**

Placement with an office of a health professional. May be repeated for a maximum of 3 credits. Student must be registered with the Prehealth Advisory Committee and must have a minimum of 15 credits completed at NMSU. Consent of instructor required. Graded: S/U.

Prerequisite(s): Minimum junior standing, 2.5 GPA.

A S 350. Faculty Lead International Travel**1-3 Credits (1-3)**

This is an intensive Faculty Led International Program and earns an additional credit(s) for participation the FLiP. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): Students need to be enrolled or have taken the course related to the Faculty Led International Program.

A S 480. Topics in Pharmacy**12-18 Credits (12-18)**

This course accepts the transfer of credits from the University of New Mexico College of Pharmacy to New Mexico State University for students who are participants in the UNM/NMSU Pre-Pharmacy Cooperative Program. May be repeated up to 18 credits. 35 must be General Education, 48 must be upper division, and 6 must be Viewing a Wider World. Restricted to: Bachelor of Individualized Studies - Pre-Pharmacy majors.

Prerequisite(s): Student must have completed 91 undergraduate credits at NMSU.

A S 490. Advanced Topics in Pharmacy**12-18 Credits (12-18)**

This course accepts the transfer of credits from the University of New Mexico College of Pharmacy to New Mexico State University for students who are participants in the UNM/NMSU Pre-Pharmacy Cooperative Program. May be repeated up to 18 credits. 35 must be General Education, 48 must be upper division, and 6 must be Viewing a Wider World. Restricted to: Bachelor of Individualized Studies, Pre-Pharmacy majors.

Prerequisite(s): Student must have completed 91 undergraduate credits at NMSU.

A ST- APPLIED STATISTICS (A ST)

A ST 251G. Statistics for Business and the Behavioral Sciences**3 Credits**

Techniques for describing and analyzing data; estimation, hypothesis testing, regression and correlation; basic concepts of statistical inference. Same as STAT 251G.

Prerequisite: C- or better in MATH 120.

A ST 311. Statistical Applications**3 Credits**

Techniques for describing and analyzing economic and biological data; estimation, hypothesis testing, regression and correlation; basic concepts of statistical inference.

Prerequisite(s): MATH 120.

A ST 450. Special Topics**1-4 Credits**

Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

A ST 456. Statistical Methods and Data Analysis**3 Credits**

Methods for sampling and estimation; analysis of variance and elementary experimental designs; linear regression and correlation; multiple regression, variable selection methods and residual analysis; introduction to statistical packages.

Prerequisite(s): A ST 251, A ST 311, or equivalent.

A ST 498. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with prior approval of the department head. Maximum of 3 credits per semester and a grand total of 3 credits.

A ST 503. SAS Basics**2 Credits (1+2P)**

An introduction to the statistical software package, SAS, and its utilization in an interactive computing environment, primarily PC/SAS. Provides a fundamental understanding of the structure of SAS, its data management capabilities, and how to invoke a variety of descriptive and simple statistical SAS procedures.

Corequisite(s): A ST 505, or consent of instructor.

A ST 504. Statistical Software Applications**1 Credit**

Optional Computing course to accompany A ST 506. Computer analysis of topics covered in A ST 505 and A ST 506.

Prerequisite(s): A ST 503 or consent of instructor.

Corequisite(s): A ST 506.

A ST 505. Statistical Inference I**4 Credits (3+2P)**

A qualitative introduction to the concepts and methods of statistical inference. Sampling, frequency distributions (z, t, x², F), estimation, and testing. One-way analysis of variance. Simple linear regression.

Prerequisite: consent of the instructor.

A ST 506. Statistical Inference II**3 Credits (2+2P)**

Introduction to multiple regression; the analysis of variance for balanced studies; multiple comparisons, contrasts, factorials, experimental designs through split plots.

Prerequisite: A ST 505 and the ability to use a standard computer package such as SAS (may be satisfied by A ST 503) or consent of instructor.

A ST 507. Advanced Regression**3 Credits**

Examination of multiple regression; residual analysis, collinearity, variable selection, weighted least squares, polynomial models, and nonlinear regression: linearizable and intrinsically nonlinear models.

Prerequisites: A ST 503 and A ST 505 or consent of instructor.

A ST 508. Analysis of Advanced Designs and Related Topics**3 Credits**

Complete and incomplete block designs; fixed, mixed, and random models; unbalanced data; analysis of covariance; nested experiments; fractional factorials.

Prerequisite(s): A ST 503 and A ST 506; or consent of instructor.

A ST 515. Statistical Analysis with R**3 Credits**

Introduction to R data types, basic calculations and programming, data input and manipulation, one and two sample tests, ANOVA, regression, diagnostics, graphics, probability distributions, and basic simulations in the R software environment.

Prerequisite(s): A ST 505 or equivalent with consent of instructor.

A ST 521. Sampling Methodology**3 Credits (3+2P)**

Methodology of sampling finite populations using design-based (simple random, stratified, systematic, cluster, and multistage), model-based (regression and ratio estimators), and adaptive sampling. Properties of estimators under all designs are discussed.

Prerequisite(s): Either A ST 505 or A ST 565, or consent of instructor.

A ST 522. Survey Sampling**2 Credits (3+2P)**

Techniques of survey sampling (mail questionnaire and telephone surveys) applicable to social sciences. Techniques of questionnaire preparation and methods of evaluating results are presented.

Prerequisite: A ST 521, or consent of instructor.

A ST 523. Biological Sampling (s)**3 Credits**

Methods of sampling biological populations: area frame, quadrant, line intercept, line transect, and mark-recapture. May be repeated up to 3 credits.

Prerequisite(s): A ST 505 or consent of instructor.

A ST 545. Time Series Analysis and Applications**3 Credits**

A systematic exposition of the methods for analyzing, modeling, and forecasting time series. Emphasizes underlying ideas and methods rather than detailed mathematical derivations, using SAS, BMDP, IMSL, and Fortran. May be repeated up to 3 credits.

Prerequisite(s): A ST 503 and A ST 505, or consent of instructor.

A ST 550. Special Topics**1-4 Credits**

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

A ST 551. Introduction to Statistical Consulting**1 Credit**

Consideration of published material in the consulting process. Restricted to majors. Graded S/U.

Prerequisite: consent of instructor.

A ST 552. Advanced Statistical Consulting**1 Credit**

Continuation of A ST 551 with emphasis on dealing with clients in order to identify statistically relevant features of a research study. Restricted to majors. Graded S/U.

Prerequisite: A ST 551.

A ST 553. Practicum in Statistical Consulting**1 Credit**

Supervised experience under the guidance of senior faculty. May be repeated for a maximum of 2 credits. Restricted to majors. Graded S/U.

Prerequisite: A ST 552.

A ST 555. Applied Multivariate Analysis**3 Credits**

Multivariate analysis of linear statistical models, including MANOVA and repeated measures. Analysis of correlation and covariance structures, including principal components, factor analysis, and canonical correlation. Classification and discrimination techniques.

Prerequisite(s): A ST 506 and A ST 504 or consent of instructor.

A ST 565. Statistical Analysis I**4 Credits (3+2P)**

An analytic introduction to the theory and methods of statistical inference. Sampling, frequency distributions (z, t, x², F), estimation, testing, and simulation.

Prerequisite: MATH 291G or consent of instructor.

A ST 566. Statistical Analysis II**4 Credits (3+2P)**

Continuation of A ST 565.

Prerequisite: A ST 565 or consent of instructor.

A ST 567. Applied Linear Models I**3 Credits**

The mean model, including constraints, approach to linear models; nonidentity variance-covariance matrices. Some emphasis on computational aspects and relation to statistical packages.

Prerequisite: A ST 566 or consent of instructor.

A ST 568. Applied Linear Models II**3 Credits**

The relation of full to less-than-full rank linear models; complex data structures, including messy data, empty cells, and components of variance: extensions to categorical data analysis and nonparametric methods. Continues some emphasis on computational aspects.

Prerequisite: A ST 567.

A ST 596. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with prior approval by department head. May be repeated for a maximum of 3 credits.

Prerequisite: consent of instructor.

A ST 598. Special Research Problems**1-6 Credits**

Individual analytical or experimental projects. Restricted to majors. Graded S/U.

A ST 599. Master's Thesis**1-6 Credits**

Thesis.

ACCT-ACCOUNTING (ACCT)

ACCT 101. Supplemental Instruction to ACCT 221**1 Credit**

Collaborative workshop for students in ACCT 221 – Financial Accounting. Course does not count toward departmental degree requirements. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

Corequisite(s): ACCT 221.

ACCT 200. A Survey of Accounting**3 Credits**

Emphasis on financial statement interpretation and development of accounting information for management. For engineering, computer science, and other non business majors. Community Colleges only.

Prerequisite: one C S course or consent of instructor.

ACCT 221. Financial Accounting**3 Credits**

Interpretation and use of financial accounting information for making financing, investing, and operating decisions.

ACCT 222. Management Accounting**3 Credits**

Development and use of accounting information for management decision making.

Prerequisite(s): ACCT 221.

ACCT 301. Financial Accounting I**3 Credits**

Concepts, principles, and practices of financial accounting, stressing the determination of income and financial position. A student who does not pass the class within three attempts will not be allowed to take class for a fourth.

Prerequisite(s): C or better in ACCT 221 and ACCT 222.

ACCT 302. Financial Accounting II**3 Credits**

A continuation of ACCT 301.

Prerequisite(s): C- or better in ACCT 301.

ACCT 351. Accounting Systems**3 Credits**

Covers accounting information systems as processors of data for financial reporting and control of economic organizations.

Prerequisite(s): ACCT 221 and ACCT 222.

ACCT 353. Cost Accounting**3 Credits**

The development and use of cost accounting information for inventory valuation, income determination, and cost control. A student who does not pass the class within three attempts will not be allowed to take class for a fourth.

Prerequisite(s): C or better in both ACCT 221 and ACCT 222.

ACCT 403. Federal Taxation I**3 Credits**

Basic federal income tax laws; emphasis on determination of taxable income of individuals. A student who does not pass the class within three attempts will not be allowed to take class for a fourth.

Prerequisite(s): A "C" or better in ACCT 221 and ACCT 222.

ACCT 451. Auditing Theory and Practices**3 Credits**

Auditing standards, audit evidence, auditors reports and opinions, and professional responsibilities.

Prerequisite(s): ACCT 351 and C- or better in ACCT 302.

ACCT 455. Federal Taxation II**3 Credits**

Federal income tax laws applicable to partnerships, corporations, fiduciaries, tax research, tax planning.

Prerequisite(s): C- or better in ACCT 403 or consent of instructor.

ACCT 456. Accounting for Nonprofit Organizations**3 Credits**

Control and reporting problems unique to governmental units and other nonprofit organizations. Fund accounting principles, procedures, and reports.

Prerequisite(s): C- or better in ACCT 302.

ACCT 460. Fraud Examination and Prevention**3 Credits**

Covers business fraud as it is occurring in American society. Emphasis is on occupational fraud and financial statement fraud. Examines various types of fraud, its symptoms and effective investigation techniques. Effective fraud prevention measures are discussed throughout the course. Emphasizes case studies and the application of principles to actual fraud cases.

Prerequisites: a C- or better in ACCT 451 or concurrent enrollment.

ACCT 490. Selected Topics**1-3 Credits**

Current topics in accounting. Prerequisites vary according to the seminar offered. May be repeated for a maximum of 12 credits under different subtitles.

ACCT 498. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with the prior approval of the department head. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

ACCT 500. Concepts in Accounting**1 Credit**

Development, interpretation, and use of accounting information for financing, investing, operating, and managerial decision making.

Prerequisite(s): Admitted to MBA program.

ACCT 503. Accounting for Managers**3 Credits**

Concepts and principles of financial and managerial accounting. Presents techniques used to measure business transactions, prepare financial statements, techniques for management decision-making, planning, and control. Not open to MAcc students.

Prerequisite(s): B or better in both ACCT 221 and ACCT 222.

ACCT 510. Technical and Professional Communication for Accountants**3 Credits**

Effective writing strategies for professional communications. Students will learn to write with a professional style and proper English usage and to work with a variety of technical and lay audiences. Emphasis on initiation, planning, composition, and evaluation of business and accounting workplace scenarios to develop communication skills used in a business environment. Restricted to: Master of Accountancy majors.

ACCT 525. Advanced Cost-Managerial Accounting**3 Credits**

Advanced cost-managerial concepts with a quantitative emphasis. Integrates cost-managerial concepts, quantitative tools, organization theory, behavioral concepts and computer methodology. Restricted to: Master of Accountancy majors.

Prerequisite(s): ACCT 353.

ACCT 530. Advanced Accounting**3 Credits**

This course is designed to provide in-depth study of current financial accounting concepts related to business combinations, financial statement consolidations, and foreign currency transactions and translations. Restricted to: Master of Accountancy majors.

Prerequisite(s): ACCT 302 with a grade of C or better.

ACCT 544. Financial Statement Analysis and Valuation**3 Credits**

Valuation of firms using financial information, financial statement analysis, and the valuation of individual assets and liabilities. Restricted to: Master of Accountancy majors.

Prerequisite(s): Acct 302; Graduate students only.

ACCT 550. Special Topics**3 Credits**

Seminars in current topics in various areas of accounting including financial, managerial, auditing, taxation, systems, and fund accounting. Prerequisites vary according to topic being offered.

ACCT 551. Advanced Auditing Theory and Practice**3 Credits**

Understanding and evaluating internal control in an EDP environment. Statistical sampling applications and current issues in auditing. Restricted to: Master of Accountancy majors.

Prerequisite(s): ACCT 451.

ACCT 554. Accounting Theory**3 Credits**

Contemporary theoretical basis of accounting. An in-depth study of generally accepted accounting principles and current issues in accounting. Restricted to: Master of Accountancy majors.

Prerequisite(s): ACCT 302.

ACCT 555. Federal Tax Research**3 Credits**

Tax research methodology including case materials, critical judicial decisions, journal articles, and research services. Emphasis on tax planning. Restricted to: Master of Accountancy majors.

Prerequisite(s): ACCT 403.

ACCT 559. Ethics and Professionalism in Accounting**3 Credits**

Introduction to ethical reasoning, integrity, objectivity, independence, and professional accounting issues. Students will apply the concepts and theories to accounting-specific cases. Restricted to: Master of Accountancy majors.

Prerequisite(s): C or better in ACCT 451.

ACCT 560. Taxation of Corporations and Shareholders Advanced**3 Credits**

Effects of taxation on the organization, operation, and reorganization of corporations and on their shareholders. Restricted to: Master of Accountancy majors.

Prerequisite(s): ACCT 403.

ACCT 564. Financial Accounting Research**3 Credits**

Interpretation and application of accounting principles to financial reporting issues of business and nonbusiness organizations. Consent of Instructor required. Restricted to: Master of Accountancy majors.

Prerequisite(s): ACCT 302.

ACCT 570. Taxation of Partnerships**3 Credits**

Taxation of partnership contributions and distributions, transfer of partnership interests, and allocations of partnership income. Also includes taxation of S corporations. Restricted to: Master of Accountancy majors.

Prerequisite(s): ACCT 403.

ACCT 580. Professional Accountancy**3 Credits**

Prepares students for the accounting profession and professional certification through study of a wide range of topics similar to those a student might encounter in their first year of employment. Restricted to: Master of Accountancy majors.

ACCT 598. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with prior approval of the department head. A maximum of 3 credits may be earned.

Prerequisite: consent of instructor.

ACCT 599. Master's Thesis**15 Credits**

Thesis.

ACES-AGRI, CONSUMER & ENV SCIE (ACES)

ACES 101. Agricultural Leadership Development**1-3 Credits (1-3)**

This course will introduce the student to skill sets necessary to engage in the process of leadership through an applied project. A broad spectrum of principles and applications associated with the College of Agricultural, Consumer and Environmental Sciences will be employed. The development of a specific project through a collaborative process will be required. Students will be engaged in hands-on, real-time experiences applicable to agriculture. Course may be repeated once. Student must have a 3.5 GPA and above. Consent of Instructor required.

ACES 111. Freshman Orientation**1 Credit**

Orientation to University life, including the understanding and utilization of resources that promote University success. Designed to promote success in achieving a career objective and perseverance for degree completion. Promotes a recognition of changes required in moving from high school to the University. Eight weeks in length, required for all freshmen in the College of Agricultural, Consumer and Environmental Science.

ACES 121. Financial Fitness for College Students**1 Credit**

An introduction to personal financial practices in post high school and/or college lives. Emphasis is placed on budgeting, savings, investment, college debt, student loans, credit cards, scams and consumer protection.

ACES 199. Academic Excellence**1-3 Credits (1-3)**

Academic curriculum of excellence that includes the development of collaborative learning and student success environment, learning diverse learning styles and multiple intelligences, and developing multi-contextual academic communication styles. Restricted to: Open to all ACES majors. Restricted to Las Cruces campus only.

ACES 201. Agricultural Leadership Development**1-3 Credits (1-3)**

This course will introduce the student to skill sets necessary to engage in the process of leadership through an applied project. A broad spectrum of principles and applications associated with the College of Agricultural, Consumer and Environmental Sciences will be employed. The development of a specific project through a collaborative process will be required. Students will be engaged in hands-on, real-time experiences applicable to agriculture. Course may be repeated once. Student must have a 3.5 GPA and above. Consent of Instructor required.

ACES 301. Agricultural Leadership Development**1-3 Credits (1-3)**

This course will introduce the student to skill sets necessary to engage in the process of leadership through an applied project. A broad spectrum of principles and applications associated with the College of Agricultural, Consumer and Environmental Sciences will be employed. The development of a specific project through a collaborative process will be required. Students will be engaged in hands-on, real-time experiences applicable to agriculture. Course may be repeated once. Student must have a 3.5 GPA and above. Consent of Instructor required.

ACES 305. Advanced Leadership and Communication in Agricultural Sciences**1-3 Credits (1-3)**

Theory and application of advanced communication techniques, focusing on public speaking and public relations, are emphasized in this course for current and potential college ambassadors. May be repeated to a maximum of 8 credits. Consent of instructor required.

ACES 401. Agricultural Leadership Development**1-3 Credits (1-3)**

This course will introduce the student to skill sets necessary to engage in the process of leadership through an applied project. A broad spectrum of principles and applications associated with the College of Agricultural, Consumer and Environmental Sciences will be employed. The development of a specific project through a collaborative process will be required. Students will be engaged in hands-on, real-time experiences applicable to agriculture. Course may be repeated once. Student must have a 3.5 GPA and above. Consent of Instructor required.

AEEC-AGRICULTURAL ECON/ECON (AEEC)

AEEC 501. Microeconomic Theory**3 Credits**

A rigorous re-examination of the pricing mechanism in the goods and factor markets. Development of theoretical tools of general applicability. **Prerequisite(s):** ECON 371 and ECON 457, or consent of instructor.

AEEC 502. Macroeconomic Theory**3 Credits**

Contemporary aggregative theory regarding the interrelationships among national income, employment, the price level, money supply and interest rates, and implications of this theory for public policy in a mixed economy.

AEEC 511. Advanced Futures and Options Markets**3 Credits**

Advanced hedging and speculating strategies using futures and options contracts. Coverage includes interest rates, stock indexes, metals, currencies, livestock, and grains. Concepts of price analysis (technical and fundamental) and basis analysis; technical paper is required. Same as AG E/FIN 311 with additional coursework required at the graduate level. Cannot receive credit for both AG E/FIN 311 and AEEC/FIN 311. Crosslisted with: FIN 511.

AEEC 520. International Agricultural Trade Theory and Policy**3 Credits**

Review and analysis of international trade models. Analysis of the effects of trade instruments such as tariffs, quotas, and subsidies on welfare and income distribution. Analysis of bilateral, regional, and multilateral trade agreements and their effect on the agricultural sector from both country-specific and global perspectives.

Prerequisite: ECON 371.

AEEC 522. Public Sector Economics I**3 Credits**

Introduction to the economic rationale for government intervention in the economy and the effects of that intervention on economic agents and the economy in general. Emphasis on the expenditure side of government policies. Same as GOVT 522.

AEEC 523. Public Sector Economics II**3 Credits**

A continuation of AEEC 522. Concentrates on the economic effects of taxation. Same as GOVT 523.

AEEC 526. Global Food Supply Chain Management**3 Credits**

This course aims to provide students a basic understanding of supply chain management issues, and encourages them to analyze problems from a systems perspective, and introduce them to a number of decision tools that are currently being used by the industry such as process analysis, product design, waiting line management, quality control, just-in-time, and inventory management.

AEEC 528. Economic Development**3 Credits**

A graduate-level exposition of microeconomic and macroeconomic theory of why and how nations allocate resources to grow and develop. Strong emphasis is given to understanding the economic problems facing developing nations.

AEEC 540. Econometrics I**3 Credits**

An integration of quantitative and statistical techniques for research and management in economics and business.

Prerequisite(s): ECON 457 and ECON 405 or A ST 505.

AEEC 545. Advanced Agricultural Policy**3 Credits**

Historical and cultural background of food and agricultural policy in the United States. Analysis of food and agricultural problems, policy-making and implementation. Economic evaluation of specific U.S. food and agricultural policy instruments, their domestic and international impacts. Same as AG E 445V with additional work required at the graduate level. Cannot receive credit for both AG E 445V and AEEC 545.

Prerequisite: consent of instructor.

AEEC 550. Advanced Microcomputer Applications in Agriculture
3 Credits (2+2P)

An advanced course in electronic spreadsheets and the concepts and tools of database management emphasizing agricultural applications. Taught with AG E 450 with additional coursework required at the graduate level. Cannot receive credit for both AG E 450 and AEEC 550.
Prerequisite(s): AG E 250G or consent of instructor.

AEEC 551. Advanced Agribusiness Marketing
3 Credits

Applications course in which self-managed teams apply marketing theory in the development and presentation of marketing plans for food and agribusiness firms. Course includes analysis of marketing problems with emphasis on strategic marketing issues changing trade policies, and global competitiveness.

Prerequisite: consent of instructor.

AEEC 556. Advanced Agribusiness Management
3 Credits

Integration of production, marketing, accounting, finance, agricultural policy, human behavior, and business environment concepts in management of agricultural businesses using a decision case approach.

AEEC 575. Economics of Water Resource Management and Policy
3 Credits

Focuses on issues, approaches and methods used in the assessment of water resource management and policy problems. Extends and further develops student understanding and comprehension of specific economic concepts and methods that are useful in the assessment and management of water resources, including cost-benefit analysis, welfare economics, non-market valuation, watershed management, and consideration of equity and ethical concerns. Students will develop critical reasoning, communication and analytic skills through active class discussions and assignments that emphasize both quantitative and written products. May be repeated up to 3 credits.

AEEC 585. Production Economics
3 Credits

Application of microeconomic theory to problems and decisions of food and agricultural firms. The theoretical foundation of production economics and the theory of the firm are developed.

Prerequisites: MATH 142G, ECON 371, and ECON 457.

AEEC 590. Special Topics
3 Credits

Seminars in selected current topics in the various areas of agricultural economics and economics. Offerings will carry a subtitle.

Prerequisite: consent of instructor.

AEEC 593. Internship
1-6 Credits

Supervised professional on-the-job training experience in policy analysis.

AEEC 594. Internship
1-6 Credits

One semester to six months internship with a regulated firm or public utility commission. A faculty member will direct and evaluate the internship. For AEEC regulatory option students only.

AEEC 595. Internship
3 Credits

Supervised professional on-the-job learning experience.

Prerequisite(s): Consent of instructor.

AEEC 596. Individual Study
1-3 Credits

Individual study programs. Each offering will carry a subtitle. Maximum of 3 credits in a semester and 6 credits in a program.

Prerequisite: consent of instructor.

AEEC 597. Non-Thesis Research Project
1-3 Credits (1-3)

Individual investigations, either analytical or experimental. Maximum of 3 credits per semester. No more than 3 credits toward a degree.

AEEC 598. Creative Component Project
3-6 Credits (3-6)

Individual investigations, either analytical or experimental. A minimum of 3 to 6 credits per semester. No more than 6 credits toward degree. Consent of instructor required. Restricted to AEEC majors.

Prerequisite(s): Consent of Instructor.

AEEC 599. Master's Thesis
15 Credits

Thesis.

AERO-AEROSPACE STUDIES (AERO)

AERO 121. The Air Force Today I
2 Credits (1.25+2P)

Survey course on the USAF and AFROTC. Includes mission and organization of the Air Force, officer ship and professionalism, military customs and courtesies, as well as basic communication skills. Leadership Lab practicum, AERO 000 is included.

AERO 122. The Air Force Today II
2 Credits (1.25+2P)

Continuation of AERO 121, with emphasis on Air Force officer opportunities, group leadership problems, and further development of communication skills (oral and written). Includes Leadership Lab practicum, AERO 000.

AERO 221. The Air Force Way I
2 Credits (1.25+2P)

Topics include: Air Force heritage, Air Force leaders, an introduction to ethics and values, and an application of communication skills. Facilitates the transition from Air Force ROTC cadet to Air Force ROTC candidate. Includes Leadership Lab practicum, AERO CIOD.

AERO 222. The Air Force Way II
2 Credits (1.25+2P)

Continuation of AERO 221, including an introduction to leadership, quality Air Force, and continued application of communication skills. Includes Leadership Lab practicum, AERO 000.

AERO 223. Air Force Leadership Development
1 Credit

This course prepares cadets to excel in field training. Cadets are prepared in all facets of field training, including: leadership competency evaluations, the Cadet's Guide to Field Training, individual drill evaluations, attention to detail, dining hall procedures, maintenance of living areas, and the group problem solving process. Restricted to: Main campus only.

AERO 301. Air Force Leadership and Management I**4 Credits (3+2P)**

Study of the leadership and quality management fundamentals, professional knowledge, Air Force doctrine, leadership ethics, and communication skills required of an Air Force junior officer. Includes Leadership Lab practicum, AERO 000.

Prerequisites: Completion of AERO 121/122 and 221/222, or permission of instructor.

AERO 302. Air Force Leadership and Management II**4 Credits (3+2P)**

Continuation of AERO 301, with case studies used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts studied. Continued emphasis on developing communication skills. Includes Leadership Lab practicum, AERO 000. May be repeated up to 4 credits.

Prerequisite(s): Completion of AERO 121/122 and 221/222, or permission of instructor.

AERO 401. Preparation for Active Duty I**4 Credits (3+2P)**

Examines the national security process, regional studies, and Air Force doctrine. Special topics focus on the military as a profession, officership, and civilian control of the military. Communication skills (oral and written) are refined. Includes Leadership Lab practicum, AERO 000.

Prerequisites: Completion of AERO 121/122, 221/222, and 301/302, or permission of instructor.

AERO 402. Preparation for Active Duty II**4 Credits (3+2P)**

Continuation of AERO 401, concentrating on advanced leadership ethics, military justice, preparation for active duty, and current issues affecting military professionalism. Continued emphasis on communication skills necessary to succeed as a junior Air Force officer. Includes Leadership Lab practicum, AERO 000. May be repeated up to 4 credits.

Prerequisite(s): Completion of AERO 121/122, 221/222, 301/302, and 401 or permission of instructor.

AERT-AEROSPACE TECHNOLOGY (AERT)

AERT 105. Aerospace Engineering PLTW**4 Credits (2+4P)**

Introduce the student to Aerospace Engineering (AE) concepts and history. Studied topics include History of Flight, Aerodynamics, Rocket Science, Orbital Physics, Systems Engineering and Life Support/ Environmental Systems. Restricted to: Community Colleges only.

AERT 111. Basic Electricity and Electronics**3 Credits (2+2P)**

Fundamentals of electricity and electronics, basic circuit devices, meters, transistors, integrated fiber optics, and industrial application topics. Minimum math proficiency of CCDM 103 or CCDM 104 required or math placement into CCDM 114 or higher. Restricted to: Community Colleges only. Crosslisted with: ELT 105

AERT 121. Introduction to the Aerospace Workplace**4 Credits (2+4P)**

The course covers space history, regulations, controls, aerospace industry terminology and acronyms as well as hands-on activities related to tools, procedures, and standard practices. Restricted to: Community Colleges only.

AERT 122. Aerospace Safety and Quality**3 Credits (2+2P)**

Covers identification of hazards, personal protective equipment, safe practices, and protection of personnel, property, and equipment in the aerospace environment. Basic principles of quality assurance engineering and quality control relating to work processes will be discussed. Restricted to: Community Colleges only.

AERT 211. Electromechanical Devices**4 Credits (2+4P)**

Theory and application of electromechanical devices and digital control circuits. Includes AD and DA converters, pneumatics, hydraulics, programmable logic controllers, DC, AC and stepper motors, and servomechanisms. Crosslisted with: MAT 240.

Prerequisite(s): ELT 160.

AERT 212. Materials and Processes (Basic Metallurgy)**3 Credits (2+2P)**

Basic Metallurgy: Aluminum and its alloys (Alclad), hardening, tempering, annealing, anodizing, magnetism, titanium, copper, stainless steel, surgical steel, safety wire, iron rust. Metallurgical Processes: Welding and soldering. Inspection Fundamentals: Eddy currents, magnetic particles (ferrous and non-ferrous metals), ultrasonic, x-ray, visual, corrosion and corrosion control, and vacuum bagging. Restricted to: Community Colleges only.

AERT 213. Aerospace Fluid Systems**3 Credits (2+2P)**

This course includes a familiarization of fluid system components, characteristics, and applications. Cryogenic and hypergolic materials and high pressure systems are also covered. Restricted to: Community Colleges only.

AERT 214. Aerospace Systems**3 Credits (2+2P)**

This course provides an introduction to expendable and reusable spacecraft systems including hydraulic, pneumatic, electrical, propulsion, mechanical, HVAC, and ECLSS (Environmental Control and Life Support System). How systems interact with computer and data acquisition systems is also covered. Restricted to: Community Colleges only.

AERT 221. Inspection Requirements and Planning Metrology**3 Credits (2+2P)**

Course teaches the benefits of inspection, quality control, material conditions. Also covers measurements, including temperature, ultrasonic, vibration and more. Restricted to: Community Colleges only.

AERT 222. Electromechanical Systems**3 Credits (2+2P)**

Principles and applications of preventive and corrective maintenance procedures on industrial production machines using systems technical and maintenance manuals to develop troubleshooting procedures using systems block and schematic diagrams. Pre/ Crosslisted with: MAT 245.

Prerequisite(s)/Corequisite(s): AERT 221 or MAT 240. Prerequisite(s): ELT 160.

AERT 224. Aerospace Tests and Measurements**3 Credits (2+2P)**

This course covers electrical and mechanical testing procedures (primarily non-destructive testing), equipment, measurements, and instrumentation involved in aerospace systems. Verification of tool and equipment calibration is also covered. Pre/ Restricted to: Community Colleges only.

Corequisite(s): AERT 221.

AERT 225. Cooperative Experience**1-3 Credits (1-3)**

Supervised cooperative work program. Student is employed in an approved occupation and supervised and rated by the employer and instructor. Consent of instructor required. Graded: S/U. Restricted to: Community Colleges only.

AERT 255. Special Topics**1-4 Credits (1-4)**

Specific topics to be announced in the Schedule of Classes. Restricted to: Community Colleges only.

AERT 290. Independent Study**1-3 Credits (1-3)**

Individual studies in areas directly related to aerospace. Consent of instructor required. Restricted to: Community Colleges only.

AG E-AGRICULTURAL ECONOMICS (AG E)

AG E 100. Introductory to Food and Agribusiness Management**3 Credits**

Orientation to agricultural supply businesses, farm and ranch production, food markets, food processing and distribution, and food consumption. Microeconomic principles for managers. May be repeated up to 3 credits.

AG E 101. Careers in Food and Agribusiness**1 Credit**

Orientation to agribusiness management. Students will learn about agricultural production and marketing in New Mexico, the United States, and the world. Students will be introduced to faculty and staff within the department, learn about career opportunities available to AEAB graduates, and develop a greater appreciation of agricultural management issues. May be repeated up to 1 credits. Restricted to Las Cruces campus only.

Prerequisite(s): Freshman status only or obtain consent of instructor.

AG E 200. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. Consent of instructor required.

AG E 210G. Survey of Food and Agricultural Issues**3 Credits**

Survey of food and agricultural issues, including: geography of food production and consumption; human-agricultural-natural resource relations; agriculture in the United States and abroad; modern agribusiness; food safety; food, agriculture, and natural resources policy; ethical questions; role and impact of technology. Crosslisted with: FSTE 210G.

AG E 236. Principles of Food and Agribusiness Management**3 Credits**

Description and application of management and financial principles, market planning, and organization theory in small business situations. May be repeated up to 3 credits.

AG E 250. Technology and Communication for Business Management**3 Credits (2+2P)**

Understanding and improving skills for data analysis, information management and communication is the focus of this course. Drawing examples from a variety of management, business, technological and research situations, students discover the versatility and variety of uses of computer applications such as spreadsheet, database, presentation and document software. Emphasizing a 'hands-on' approach students learn the foundations of these tools and their use.

AG E 260. Introduction to Food and Agribusiness Accounting**3 Credits**

Purpose and methods of keeping and analyzing farm and ranch records. Net worth and income statements, efficiency measures, analysis of the business, and tax computations. May be repeated up to 3 credits.

AG E 300. Internship**1-4 Credits (1-4)**

Professional work experience under the supervision of a faculty member. May be repeated up to 6 credits. Consent of Instructor required. S/U Grading (S/U, Audit). Restricted to Las Cruces campus only.

Prerequisite(s): Consent of instructor.

AG E 305. Marketing and Food Agricultural Products**3 Credits**

Description of agricultural processes and functions; food production and consumption patterns; agricultural product prices; nature of competition in agricultural product markets; commodity markets. May be repeated up to 3 credits. Crosslisted with: MKTG 305.

Prerequisite(s): ECON 201G or ECON 252G.

AG E 311. Financial Futures Markets**3 Credits**

Emphasis on financial instruments, currencies, and stock index futures. Principles of hedging, arbitrage, speculation, technical and fundamental price analysis, and trading strategies. Simulated computer trading game. Same as AEBC/FIN 511 with additional coursework required at the graduate level. Cannot receive credit for both AG E/FIN 311 and AEBC/FIN 511. Same as FIN 311.

AG E 313. Food and Agricultural Sales**3 Credits**

Techniques of salesmanship including application of sales techniques. Identification and classification of buyer type and different approaches to sales based on client base. Improving oral communication skills through individual and/or group sales presentations. May be repeated up to 3 credits.

Prerequisite(s): Junior or above standing.

AG E 314. Agricultural and Natural Resource Law**3 Credits**

Relationship of common-law principles, statutory law and regulatory law to problems involving agriculture with an emphasis on New Mexico issues. Legal problems relevant to agribusiness, torts, fencing laws, liability for agricultural pollution, irrigation water rights, corporations and partnerships, land tenure, farm and ranch tenancy, agricultural labor, farm and ranch management and taxation. May be repeated up to 3 credits.

AG E 315V. World Agriculture and Food Problems**3 Credits**

Survey of food and agricultural issues in the U.S. and other countries. Covers: role of agriculture in economic development; trade in food and agricultural products; global food production, consumption, and marketing patterns; economics of technical change and food assistance; agriculture and the environment. Same as GEOG 315V.

AG E 325. Food and Agribusiness Finance and Planning**3 Credits**

Understanding, using, and constructing financial statements for agribusiness analysis. Learn how to produce integrated pro forma financial statements first on paper and then on a spreadsheet. Prepare and link revenue, cost, and financing input assumptions formulas to the financial outcomes on the spreadsheet. May be repeated up to 3 credits. Crosslisted with: ANSC 325.

Prerequisite(s): AG E 250 or equivalent experience using spreadsheets.

AG E 337V. Natural Resource Economics**3 Credits**

Gain insight into important natural resource problems of our time. Apply economic principles to problems in the preservation, use, and development of agricultural, range, mineral, water, forestry, fishery, and environmental resources. Understand the use of cost-benefit analysis for government natural-resource projects, policies, and programs. Same as ECON 337V.

Prerequisite: ECON 201G or ECON 252G.

AG E 340. Economics of Food and Agricultural Markets**3 Credits**

Focuses on the analysis of supply and demand characteristics of commodities with particular attention to agricultural products. Pays special attention to empirical analysis. Includes institutional aspects of pricing, temporal and spatial price relationships, price forecasting, and the economic consequences of pricing decisions. May be repeated up to 3 credits.

Prerequisite(s): ECON 252G, MATH 142G, and A ST 311 or A ST/STAT 251G.

AG E 342. Economic Analysis of Food and Agribusiness**3 Credits**

A discussion and application of economic, managerial, and financial considerations in agribusiness. May be repeated up to 3 credits.

Prerequisite(s): ECON 251G, ECON 252G.

AG E 384V. Water Resource Economics**3 Credits**

Use of economic principles to evaluate current and emerging issues in water resources. Applications focus on use of economic methods of analysis to current policy decisions surrounding agricultural, municipal, industrial, and environmental uses of water. Same as ECON 384V.

Prerequisite: AG E 100 or ECON 252G.

AG E 385. Applied Production Economics**3 Credits**

Analysis of economic principles of agricultural production and planning, emphasizing marginal principles. Practical application in budgeting and analyzing profit maximizing agricultural-production strategies. May be repeated up to 3 credits.

Prerequisite(s): ECON 252G, MATH 142G, and A ST 311 or A ST/STAT 251G.

AG E 400. Seminar**1 Credit**

Current topics and cases in the agribusiness literature stressing rigorous qualitative analysis of current problems and policy issues. Consent of Instructor required. Restricted to: AEAB; NREP majors. S/U Grading (S/U, Audit).

Prerequisite(s): Senior standing.

AG E 406. The Economics of Sports**3 Credits**

Applying the tools of economic analysis to a particular industry and gaining an in-depth knowledge of the interaction of professional sports teams and leagues with the economy and society. Same as ECON 406.

AG E 420. Special Problems**1-3 Credits**

Special problems in agricultural economics or agricultural business of particular interest to the individual student. Maximum of 3 credits per semester. No more than 6 credits toward degree. Consent of instructor required.

AG E 425. Food and Agribusiness Financial Management**3 Credits**

Description and application of techniques and principles of financial management to problem situations faced by agricultural businesses, including financial statement development and analysis, capital budgeting, sources and costs of capital. May be repeated up to 3 credits.

Prerequisite(s): ECON 252G and ACCT 221.

AG E 440. Ranch Economics**3 Credits**

Economic principles related to western ranch business. Business management, economic characteristics of ranches, ranch land problems and values, and economics of rangeland use.

Prerequisite: ECON 201G or ECON 252G.

AG E 445V. Agricultural Policy**3 Credits**

Historical and cultural background of food and agricultural policy in the United States. Analysis of food and agricultural problems, policy-making and implementation. Economic evaluation of specific U.S. food and agricultural policy instruments, their domestic and international impacts.

Prerequisites: ECON 251G and ECON 252G.

AG E 450. Spreadsheet Applications in Food and Agriculture**3 Credits (2+2P)**

An advanced course in electronic spreadsheets and the concepts and tools of database management emphasizing agricultural application. Same as AEBC 550 with additional work for graduate credit. Cannot receive credit for both AG E 450 and AEBC 550. May be repeated up to 3 credits.

Prerequisite(s): AG E 250 or consent of instructor.

AG E 451. Food and Agribusiness Market Assessment and Research**3 Credits**

Applications course in which self-managed teams develop and present marketing plans for agribusiness firms. Emphasis on integrating the marketing mix, particularly promotional elements. May be repeated up to 3 credits. Crosslisted with: MKTG 451.

Prerequisite(s): AG E 305 or MKTG 305 or consent of instructor.

AG E 452. Food and Agribusiness Marketing Plan Development**3 Credits**

This course focuses on learning marketing research methods applicable to developing new food and agricultural products and repositioning existing products for new markets. Students will be required to prepare precise written and oral marketing plans to industry standards and will have opportunities to present written and oral plans at national competitions. May be repeated up to 3 credits.

AG E 456. Case Studies in Food and Agribusiness Management
3 Credits

Integration of production, marketing, accounting, finance, agricultural policy, human behavior, and business environment concepts in management of agricultural businesses using a decision case approach. May be repeated up to 3 credits.

Prerequisite(s): Senior standing.

AG E 458. Economics of Making and Marketing Wine
3 Credits

Economics of making and marketing wine for small commercial wineries and amateurs. The class starts with selecting, crushing, and fermenting grapes and all the steps required through bottling the wine. Students must be 21 to enroll in the class. Consent of instructor required.

AG E 470. Real Estate Appraisal
3 Credits (2+2P)

This course addresses issues influencing the value of real estate with some emphasis upon rural properties. Topics include courthouse records, property taxes, appraisal methodology, expert courtroom testimony, condemnation, and legal issues. Students will take field trips and write appraisals. Course material is relevant to students in Finance, Accounting, and Pre-Law, as well as Agriculture. Accredited for hours to apply to both pre-licensing and continuing education requirements of the New Mexico Real Estate Commission for both Appraisers and Real Estate Brokers. Crosslisted with: FIN 470

Prerequisite(s): Junior or above standing.

AG E 499. Senior Thesis
3 Credits

Develop a thesis project with a faculty advisor. The senior thesis requires students to work creatively to apply business and economic principles to address a problem of concern. Restricted to AEAB majors.

Prerequisites: consent of department head and have senior standing.

AGRO-AGRONOMY (AGRO)

AGRO 100G. Introductory Plant Science
4 Credits (3+2P)

Introduction to the physical, biological, and chemical principles underlying plant growth and development in managed ecosystems. In the laboratory portion of the class, students perform experiments demonstrating the principles covered in lecture. The course uses economic plants and agriculturally relevant ecosystems to demonstrate basic principles. Appropriate for nonscience majors. Same as HORT 100G.

AGRO 200. Special Topics
1-4 Credits (1-4)

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.

AGRO 250. Plant Propagation
3 Credits (2+2P)

Practical methods of propagating horticultural plants by seed, cuttings, layering, grafting, division and tissue culture. Examination of relevant physiological processes involved with successful plant propagation techniques. Crosslisted with HORT 250.

AGRO 257. Introduction to Meteorology
4 Credits (3+3P)

Introduction to Earth's atmosphere and the dynamic world of weather as it happens. Working with current meteorological data delivered via the Internet and coordinated with learning investigations keyed to the current weather; and via study of select archives. Consent of instructor required. Crosslisted with: GEOG 257 and SOIL 257.

AGRO 300. Special Topics
1-4 Credits (1-4)

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

AGRO 303V. Genetics and Society
3 Credits

Relates the science of genetics with social ramifications. Ways in which genetics and evolution interact with social, political, and economic issues. Includes genetic engineering, gene therapy, DNA finger-printing, ancient DNA, plant and animal improvement, and future prospects. Students required to formulate value judgments on contemporary biological issues that will impact society. Crosslisted with: GENE 303V.

AGRO 305. Principles of Genetics
3 Credits

Covers fundamental principles of reproduction, variation, and heredity in plants and animals. Crosslisted with: ANSC 305, BIOL 305, HORT 305 and GENE 305.

Prerequisite(s): BIOL 111G, BIOL 211G and either CHEM 111G or CHEM 115.

AGRO 311. Introduction to Weed Science
4 Credits

Principles of weed science with emphasis on characteristics of invasive plants, methods of integrated weed management, and current issues impacting weed management. Identification of local weeds. Same EPWS 311.

Prerequisite: junior standing or consent of instructor and CHEM 111G and BIOL 211G.

AGRO 315. Crop Physiology
3 Credits

Whole plant physiological processes as related to growth, development, yield, quality and post harvest physiology of crop plants within the environment of the crop community. Crosslisted with: HORT 315

Prerequisite(s): EPWS/BIOL 314 or consent of instructor.

AGRO 365. Principles of Crop Production
4 Credits (3+3P)

Basic principles of crop production including environmental and physiological factors limiting production, plant nutrition and soil science, soil-water management, cropping systems and management, pest management, and economic factors influencing crop production. Crosslisted with: HORT 365

Prerequisite(s): AGRO/HORT 100, CHEM 111G or equivalent and MATH 120 or equivalent.

AGRO 377. Introduction to Turfgrass Management
4 Credits (3+3P)

Establishment and maintenance of turfgrass with emphasis on seeding methods, soil and water management, mowing, disease, insects and turfgrass varieties. Consent of instructor required. Crosslisted with: HORT 377

AGRO 391. Internship**1-6 Credits**

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 6 credits toward a degree. Consent of Instructor required. S/U Grading (S/U, Audit).

Prerequisite(s): Consent of instructor.

AGRO 447. Seminar**1 Credit**

Organization, preparation, and presentation of current topics in agronomy, horticulture, and soil science. Same as HORT 447 and SOIL 447.

AGRO 449. Special Problems**1-3 Credits (1-3)**

Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

AGRO 450. Special Topics**1-4 Credits (1-4)**

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.

AGRO 462. Plant Breeding**3 Credits**

Principles and practices involved with the genetic improvement of plants. Same as HORT 462.

Prerequisites: ANSC/AGRO/BIOL/HORT 305.

AGRO 471. Plant Mineral Nutrition**3 Credits**

Basic and applied aspects of plant requirements for soil-derived minerals and the processes whereby minerals are acquired, absorbed, translocated, and utilized throughout the plant. Same as HORT 471 and EPWS 471.

Prerequisite: EPWS/BIOL 314, or concurrent enrollment, or consent of instructor.

AGRO 483. Sustainable Production of Agronomic Crops**4 Credits (3+2P)**

Characteristics and objectives of sustainable agricultural systems with application to the production, utilization, and improvement of cereal grain, fiber, forage and oilseed crops.

Corequisite(s): AGRO 365 or HORT 365.

AGRO 485. Materials from Biorenewable Resources**3 Credits**

Types, sources, composition and properties of biomass. Production, processing, and applications of biomass materials with energy, water, cost, sustainability, and waste management considerations. Crosslisted with: HORT 486, E S 485, SOIL 485 and CHME 485.

Prerequisite(s): CHEM 211 or CHEM 313 or permission of instructor.

AGRO 492. Diagnosing Plant Disorders**3 Credits (2+3P)**

Systematic diagnosis of the physiological, pathological, and entomological causes of plant disorders. Same as EPWS 492 and HORT 492.

Prerequisites: EPWS 303 and EPWS 310.

AGRO 500. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

AGRO 505. Research Orientation**4 Credits (3+2P)**

Training in writing research proposals, presentation of research results, and interpretation of research results. Crosslisted with: HORT 505 and SOIL 505

AGRO 506. Plant Genetics**3 Credits**

Advanced treatment of the principles of classical genetics and heredity with emphasis on the nature and action of the gene including molecular analysis. CHEM 345 recommended. Same as HORT 506.

Prerequisite: AGRO 305 or consent of instructor.

AGRO 511. Introduction to Weed Science (f)**4 Credits**

Covers the principles of weed science with emphasis on characteristics of invasive plants, methods of integrated weed management, and current issues impacting weed management. Includes identification of local weeds. Research paper required for graduate credit. Same as EPWS 511.

Prerequisites: CHEM 111G and BIOL 190 or BIOL 211G, or consent of instructor.

AGRO 514. Soil-Plant Relationships**3 Credits**

Physical, chemical, and biological soil environment as it affects plant and crop growth. Same as HORT 514 and SOIL 514.

Prerequisites: BIOL 314, SOIL 252.

AGRO 515. Crop Physiology**3 Credits**

Whole plant physiological processes as related to growth, development, yield, quality and post harvest physiology of crop plants within the environment of the crop community. Crosslisted with: HORT 515

Prerequisite(s): EPWS/BIOL 314 or consent of instructor.

AGRO 516. Molecular Analysis of Complex Traits**3 Credits**

Provide a comprehensive overview of molecular genetic analysis of complex phenotypes, including case histories/experiments in plants, animals and humans. Emphasize technological developments in DNA marker technologies and their application to molecular quantitative genetics. Explore the efficient application of these technologies in the future to complex genetic systems, breeding, and other areas of life sciences. Same as HORT 516.

Prerequisite: AGRO 305 or consent of instructor.

AGRO 525. Scientific Writing- How to be a Productive and Effective Writer**1-3 Credits (1-3)**

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Crosslisted with: HORT 525, EPWS 525, SOIL 525, AGRO 625, HORT 625 and SOIL 625.

AGRO 533. Environmental Physiology of Plants**3 Credits**

Integral responses of plants and crop productivity to naturally occurring and modified environmental factors such as radiation, temperatures, water vapor, carbon dioxide, and air flow. Same as BIOL/HORT 533.

Prerequisite: BIOL 314 or consent of instructor.

AGRO 590. Graduate Seminar**1 Credit**

Current research discussions presented by masters level graduate students. Not more than one credit toward the degree. Same as HORT/ SOIL 590. Crosslisted with: HORT 590 and SOIL 590.

AGRO 595. Internship**1-6 Credits**

Supervised professional on-the-job learning experience. Limited to Master of Agriculture candidates. Not more than 6 credits toward the degree.

AGRO 596. Masters Proposal**1 Credit**

Current research proposal written by masters level graduate students. Consent of Instructor required. Crosslisted with: E S 596, GENE 596, HORT 596 and SOIL 596. Restricted to: Masters HORT; Masters PLEN majors.

Prerequisite(s): Master level graduate students.

AGRO 597. University Teaching Experience**1-3 Credits (1-3)**

Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ES course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures. Consent of instructor required. Restricted to: Main campus only. Restricted to Agronomy and Horticulture Graduate Students. Crosslisted with: HORT 597 and SOIL 597

AGRO 598. Special Research Programs**1-6 Credits**

Individual investigations, either analytical or experimental. Maximum of 6 credits per semester. No more than 9 credits towards degree. Same as SOIL 598.

AGRO 599. Master's Thesis**15 Credits**

Thesis.

AGRO 600. Doctoral Research**1-15 Credits**

Research.

AGRO 609. Breeding for Plant Disease Resistance**3 Credits**

A practically-oriented course of lectures and discussion on concepts and principles of breeding for disease and pest resistance. Labs familiarize students with preparation, quantification, and application of inoculum to hosts. Same as HORT 609.

AGRO 610. Advanced Crop Breeding**4 Credits (3+3P)**

Applications of breeding principles to crop improvement. Emphasis on breeding methodologies using modern techniques, including biotechnology. Same as HORT 610.

Prerequisite: AGRO 462 or consent of instructor.

AGRO 620. Instrumentation in Agronomy**3 Credits**

Use of instruments used in research in all areas of agronomy including gas chromatography, high performance liquid chromatography, neutron soil moisture probe, and other instruments. Same as HORT/SOIL 620.

AGRO 625. Scientific Writing- How to be a Productive and Effective Writer**1-3 Credits (1-3)**

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Students in the 600-level course will be required to perform additional research than those students in the 500-level cross-listing Crosslisted with: AGRO 525, HORT 525, EPWS 525 and SOIL 525.

AGRO 670. Biometrical Genetics and Plant Breeding**3 Credits**

A statistical approach to gene action and population parameters as applied to plant improvement. Same as HORT 670.

Prerequisite: AGRO 462 or consent of instructor.

AGRO 694. Doctoral Seminar**1 Credit**

Current research discussions presented by doctoral level graduate students. Not more than 2 credits toward the degree. Same as SOIL 694.

Prerequisite: doctoral level graduate students.

AGRO 696. Doctoral Proposal**1 Credit**

Current research proposal written by doctoral level graduate students. Not more than 1 credits toward the degree. May be repeated up to 1 credits. Crosslisted with: E S 696, AGRO 696, HORT 696 and SOIL 696.

Prerequisite(s): Doctoral level graduate students.

AGRO 697. University Teaching Experience**1-3 Credits (1-3)**

Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ES course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures. Consent of instructor required. Crosslisted with: HORT 697 and SOIL 697

AGRO 698. Topics in Agronomy**1-6 Credits**

Topics of current interest, designated by title and credit. Maximum of 6 credits per semester. No more than 9 credits toward a degree.

AGRO 700. Doctoral Dissertation**15 Credits**

Dissertation.

AHS-ALLIED HEALTH SCIENCE (AHS)

AHS 102. Careers in the Health Fields**1-3 Credits (1-3)**

This course will provide students with a broad understanding of health careers as well as emerging issues in health. This will also include the study of the functional roles of practice, education, administration, and research in health fields. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

AHS 108. Disabilities Support Services**4 Credits (3+2P)**

Beginning level preservice preparation for providing in-home care for individuals with disabilities. Restricted to: Community Colleges only. Crosslisted with: NA 108

AHS 115. Dietary Guidelines & Meal Planning**4 Credits**

A combination of the science of nutrition and the current Dietary Guidelines for Americans with practical application to meal planning and preparation. Strategies and techniques used to plan and prepare healthful and appetizing meals are explored. Evidenced-based dietary guidelines are provided to meet the needs of individuals and groups with chronic diseases. Menu development, modification and analysis are reviewed. Restricted to Community Colleges campuses only.

AHS 116. Math for Health Occupations**3 Credits**

Principles of math and pharmacology necessary for administration of medications. Restricted to: Community Colleges only.

Prerequisite(s): CCDM 114N or equivalent.

AHS 120. Medical Terminology**3 Credits**

Study of medical terminology as it relates to understanding diseases, their causes and effects, and the terminology used by the medical specialties. Stress is placed on medical terms, their use, spelling, English translation, and pronunciation. Same as NURS 150 and BOT 150.

AHS 140. Essentials of Anatomy and Physiology**4 Credits (3+3P)**

Essentials of anatomy and physiology for those considering a career in health as well as those interested in understanding their own body and the basics of health.

AHS 153. Introduction to Anatomy and Physiology I**4 Credits (3+3P)**

Survey of human anatomy and physiology.

Prerequisite: high school biology or high school chemistry, or CHEM 110G, or consent of instructor.

AHS 155. Special Topics**1-6 Credits**

Topics to be announced in the Schedule of Classes. May be repeated for a maximum of 6 credits.

AHS 165. Foundations to Allied Health Science**3 Credits (1+4P)**

A foundational course which will cover a multidisciplinary focus on success in the Allied Health care environment. Topics included, but not limited to: the health care system, personal and professional qualities of a health care worker, legal and ethical responsibilities, cultural diversity, nutrition and diets, medical math, infection control, preparing for the world of work, core measures and quality assurance, the prospective payment system, customer service, current trends in health care and communication, and promotion of safety. Laboratory time will cover library and library resource use, promotion of safety, vital sign, CPR & AED use, job interviewing practice, and 16 hours of job shadowing participation located in a healthcare facility. Open to all students seeking to pursue an Allied Health or Healthcare career pathway. Restricted to Community Colleges campuses only.

AHS 190. Clinical Skills & Concepts for Medical Assisting I**6 Credits (3+6P)**

A core course designed to provide an introduction to the theory, concepts, and skills needed for entry-level medical assisting positions. Content includes basic theory and concepts designed to support safe and effective practice as a medical assistant in ambulatory care settings. Includes a skills laboratory for hands-on practice and 96 hours of supervised clinical in the work environment. Restricted to Community Colleges campuses only.

Prerequisite(s): (BIOL 225 and 226) or (AHS 153 and 154).

AHS 202. Legal and Ethical Issues in Health Care**3 Credits**

Consideration of legal and ethical issues in modern health care delivery.

AHS 220. Essentials of Counseling**3 Credits**

Provides students interested in human services professions with theoretical and practical tools and strategies to establish and develop a helping relationship with clients in a diversity of helping settings. Class covers emotional, cognitive, socio-cultural, and spiritual aspects of the human being, that help clients identify and deal with issues that affect their functioning and development. Restricted to Community Colleges only.

AHS 250. SPANISH FOR HEALTH PROFESSIONALS**3 Credits**

Spanish for Health Professionals is a 3 credit course geared toward individuals working or majoring in health related areas. The course focus is on conversation and vocabulary needed for the workplace and task based practical skills. Restricted to: Community Colleges only.

AHS 253. Microbiology for Health Occupations**4 Credits (3+3P)**

Study of the relationship between pathogenic organisms and disease processes.

Prerequisites: high school biology and high school chemistry, CHEM 110G, and OEHO 153 or equivalent or consent of instructor.

Corequisite: OEHO 154 or equivalent.

AHS 290. Clinical Skills & Concepts for Medical Assisting II**6 Credits (3+6P)**

A core course designed to provide the theory, concepts, and skills needed in preparation for entry-level medical assisting positions. Content includes theory and concepts related to specialty areas of healthcare practice, as well as consideration for conditions affecting persons throughout the life span. The course includes a skills laboratory for hands-on practice and 96 hours of supervised clinical in the work environment with specialized populations and procedures in both ambulatory and acute care settings. Restricted to Community Colleges campuses only.

Prerequisite(s): AHS 190.

AHS 295. Introduction to Allied Health**1 Credit**

An introductory course that covers a multidisciplinary focus needed for success in the allied health care environment. Topics include health care delivery systems and allied health careers, history of health care, law and ethics pertaining to health care, personal qualities of health care workers, confidentiality and reportable incidents. This course will also cover an orientation into safety and infection control, core measures and quality assurance, perspective payment system, customer service, current trends in health care and communication, skills to be a patient/client educator and a member of the Health Care team. Open to all students wanting to explore the allied health care industry. Restricted to Community Colleges campuses only.

ANSC-ANIMAL SCIENCE (ANSC)

ANSC 100. Introductory Animal Science**3 Credits**

Orientation and survey of livestock industry in the United States; introduction to feeding, breeding, and management practices for producing farm animals and select companion animals.

ANSC 100 L. Introductory Animal Science Laboratory**1 Credit**

Students will observe and participate in activities related to farm animal management and will include areas of livestock selection, nutrition, reproductive physiology, animal ID and animal health. This lab is required for animal science majors. Pre/

Corequisite(s): ANSC 100.

ANSC 103. Introductory Horse Science**3 Credits (2+2P)**

The light horse industry; breeds; introduction to feeding, breeding, marketing and management; handling and selecting horses for breeding and performance.

ANSC 112. Companion Animals in Society**3 Credits**

Examination of the historical, current, and potential future roles of companion animals in human society. Topics include animal domestication, breeds, exotic companion animals, the companion animal industry, and competitions and sports involving companion animals. Emphasis is on canine and feline species. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

ANSC 190. Western Equitation I**2 Credits**

Basic principles of Western riding, including care and management of the riding horse, equitation equipment, and development of riding skills.

ANSC 200. Introduction to Meat Animal Production**3 Credits (2+2P)**

Production and utilization of beef cattle, sheep and swine; emphasis on feeding, breeding, management problems and marketing; selection of animals for breeding and market.

ANSC 201. Introduction to Genetics for Animal Production**3 Credits**

Introduction to genetics and inheritance relative to livestock production. Introduction to procedures for collection and use of performance information in livestock improvement programs.

Prerequisites: BIOL 111G.

ANSC 220. Animal Science Career Development**1 Credit**

Introduction to scientific disciplines and career options in animal-agriculture career-skill development, including resume preparation, networking, importance of internships, and leadership experiences in animal agriculture.

ANSC 250. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

ANSC 261. Introduction to Animal Metabolism**3 Credits**

Principles underlying the mechanisms of animal metabolism as they relate to production, maintenance, and health of animals.

Prerequisite: CHEM 111G.

ANSC 262. Introduction to Meat Science**3 Credits (2+3P)**

Fundamental aspects of the red meat industry. Lecture topics and laboratory exercises include the nutrient value of meat, meat preservation, meat safety, muscle structure and contraction, slaughter and processing of beef, lamb, and pork, sausage manufacture, meat curing, meat cookery, and muscle and bone anatomy.

ANSC 285. Introduction to Companion Animal Science**3 Credits**

Introduction to the care of common companion animal species. Species specific housing and nutrition are covered in the context of maximizing animal health and well-being and reducing disease. May be repeated up to 3 credits.

ANSC 288. Horse Fitting and Selling**3 Credits**

Preparation of horses for sale; planning and conduct of auction sale; application of marketing principles relating to selling horses.

Prerequisite: ANSC 103 or consent of instructor.

ANSC 289. Management of Equine Operations**3 Credits**

Introduction and application of business skills necessary to effectively manage the equine operation. Students will learn how to use strategic thinking and sound business management practices to succeed in the demanding equine industry.

Prerequisite(s): ANSC 103 or consent of instructor.

ANSC 290. Western Equitation II**2 Credits**

Intermediate principles of Western riding, including reading horse behavior, limbering-up exercises, and developing riding skills. Introduction to rollbacks, turnarounds and stops.

Prerequisite: consent of instructor.

ANSC 295. Team Competition in Animal Science**1-2 Credits**

Training in team competition in the animal sciences. May be repeated for a maximum of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

ANSC 301. Animal and Carcass Evaluation**3 Credits (2+2P)**

Determination of the market value of meat animals by relating live animal and carcass traits. Topics include the identification of economically important traits, grading, growth and development, wholesale and retail pricing, and futures and options markets.

ANSC 302. Therapeutic Horseback Riding I**3 Credits**

Basic principles and understanding of horsemanship and therapeutic riding, including equipment, safety, how to be an effective volunteer, side walker, and horse handler. Consent of instructor required.

ANSC 303. Livestock, Meat and Wool Evaluation**4 Credits (3+2P)**

Selection, classification, grading, and judging of livestock, meat, and wool.

ANSC 304. Feeds and Feeding**3 Credits (2+2P)**

Digestibility of feeds, their nutritive values, grades, and classes, principles of ration formulation and computer ration formulations, and practical feeding of farm animals.

Prerequisite(s): CHEM 111G, General Chemistry I.

ANSC 305. Principles of Genetics**3 Credits**

Covers fundamental principles of reproduction, variation, and heredity in plants and animals. Crosslisted with: AGRO 305, BIOL 305, HORT 305 and GENE 305

Prerequisite(s): BIOL 111G, BIOL 211G and either CHEM 111G or CHEM 115.

ANSC 308. Horse Evaluation**4 Credits (2+4P)**

Students will acquire a working knowledge of selection and classification of horses, learn criteria for evaluation and selection of breeding and show animals, gain a broad understanding of judging conformation and performance in the horse, and learn effective oral and written communication skills through defense of class placings. This course is considered an introduction to the NMSU Horse Judging Team.

ANSC 310. Exhibiting Livestock**3 Credits (1+4P)**

Fitting and showing beef cattle, dairy cattle, sheep and swine.

ANSC 312V. Companion Animals and the Human- Animal Interaction**3 Credits**

The science behind human-animal interactions (HAI). An examination of the interactions between humans and companion animals and the effects on human and animal health and wellness. Cultural differences in HAI will be explored. Topics will include Animal Assisted Activity (AAA), Animal Assisted Therapy (AAT), and service animals. Emerging and future uses of companion animals in HAI will be discussed.

ANSC 320. Equine Behavior and Training**3 Credits**

Basic principles, methods and philosophies of handling, breaking and training the two-year-old Western horse. May be repeated up to 6 credits.

Prerequisite(s): ANSC 290 or consent of instructor.

ANSC 321. Advanced Equine Behavior and Training**3 Credits**

Continuation of ANSC 320. Further development of skills required to advance the training of the two-year-old Western horse. Emphasis will be placed on lateral work, lead changes, turn-arounds, obstacles, and making the horse accustomed to ranch and trail riding situations.

Prerequisite(s): ANSC 320 or consent of instructor.

ANSC 325. Food and Agribusiness Finance and Planning**3 Credits**

Same as AG E 325. May be repeated up to 3 credits. Crosslisted with: AG E 325.

ANSC 350. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

ANSC 351V. Agricultural Animals of the World**3 Credits**

Global study of the development and use of animals for production of food and nonfood products. Climatic, cultural, and economic influences on systems of livestock production and species and breeds of livestock utilized will be evaluated.

ANSC 353. Advanced Livestock Evaluation**2 Credits**

Advanced selection, classification and grading of livestock. May be repeated up to 2 credits. Consent of Instructor required.

ANSC 363. Meat Technology**3 Credits**

Structure function and composition of muscles; factors influencing conversion of muscle to meat; buying, palatability and nutritive value of meat and meat products.

ANSC 370. Anatomy and Physiology of Farm Animals**4 Credits (3+2P)**

Structure and function of the animal body. Includes studies of the horse, cow, sheep, pig, and comparisons with the human body.

Prerequisite(s): CHEM 111G and BIOL 111G or BIOL 211G.

ANSC 383. Equine Reproductive Management**3 Credits (1+4P)**

Anatomy, physiology, and endocrinology of reproduction of the mare and stallion; training in modern reproductive techniques employed in the horse industry.

Prerequisites: ANSC 103, ANSC 289, and ANSC 370.

ANSC 390. Internship**1-3 Credits**

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 3 credits toward a degree. Graded S/U.

Prerequisite: consent of instructor.

ANSC 391. Undergraduate Research Experience**1-3 Credits (1-3)**

Formal laboratory, library, or field study of problems related to animal sciences, emphasizing hypothesis development, testing, and reporting results. Projects are preplanned, reviewed, and approved. Students submit periodic written reports and final written and oral reports. May be repeated for a maximum of three credits. Consent of Instructor required.

Prerequisite(s): Consent of Instructor.

Corequisite(s): NO.

ANSC 392. Animal Sciences Teaching/Extension Experience**1-3 Credits (1-3)**

: Formal teaching experience related to animal sciences supervised by a faculty member. May involve classroom instruction, educational material development, and/or student evaluation and assessment. Students may also be involved in development, implementation, or assessment of adult or youth educational programs related to animal sciences, supervised by a faculty member. Students submit periodic written reports and a final written and oral report. May be repeated for a maximum of three credits. Consent of Instructor required.

ANSC 395. Team Competition II**1-2 Credits**

Advanced training in team competition in the animal sciences. May be repeated for a maximum of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

ANSC 402. Animal Science Seminar**1 Credit**

Review of the current literature in animal sciences. Oral and written reports.

ANSC 411. Canine and Feline Behavior and Training**3 Credits**

The influence of domestication, breeds, genetics, and physiology on the behavior of canine and feline species. Training methods and modification of problem behaviors are examined. The impact of the pet parent on their animal's behavior is addressed. May be repeated up to 3 credits.

Prerequisite(s): Junior or Senior status or consent of the instructor.

ANSC 412. Canine and Feline Health and Diseases**3 Credits**

A review of common infectious and non-infectious diseases and the basics of the immune response. Pathophysiology and treatment of these diseases and the role the pet parent plays in pre-disposing their animals to disease. May be repeated up to 3 credits.

Prerequisite(s): ANSC 285 or consent of instructor.

ANSC 421. Physiology of Reproduction**4 Credits (3+2P)**

Fertility and the role of hormones, nutrition, selection, management and environment in the maintenance of high reproductive rate.

Prerequisite(s): ANSC 370.

ANSC 422. Animal Nutrition**3 Credits**

Nutrient utilization and measurement and nutrient requirements for the various body functions.

Prerequisite(s): CHEM 211 or CHEM 313 or ANSC 261.

ANSC 423. Animal Breeding**3 Credits (2+2P)**

Mating systems, and selection procedures; calculation of inbreeding coefficients, genetic relationships, and gene frequency.

Prerequisite(s): ANSC 201 or 305.

ANSC 424. Swine Production**3 Credits (2+2P)**

Breeding, feeding, and care of swine.

Prerequisite(s): ANSC 304.

ANSC 425. Horse Science and Management**3 Credits (2+2P)**

Senior level course requiring students to apply basic knowledge acquired in the previous courses to solve typical problems encountered in the horse industry. Specific topics include genetics and animal breeding, business and legal issues, reproduction, health, nutrition and exercise physiology.

Prerequisite(s): ANSC 304 and ANSC 370 or concurrent registration.

ANSC 426. Beef Production: Cow-Calf Management**3 Credits (2+2P)**

Senior level course examining management practices for the cow-calf producers. Specifically focusing on nutrition, reproduction, genetics, marketing, and health. May be repeated up to 3 credits.

Prerequisite(s): ANSC 304 and (ANSC 201 or ANSC 305) or concurrent registration.

ANSC 427. Dairy Production**3 Credits (2+2P)**

Breeding, nutrition, physiology and management of dairy cattle.

Prerequisite(s): ANSC 304 and (ANSC 201 or ANSC 305) or concurrent registration.

ANSC 428. Sheep and Wool Production**3 Credits (2+2P)**

Genetics, nutrition, physiology and management of sheep. Wool grading, shearing, and disease control.

Prerequisite(s): ANSC 304 and junior status.

ANSC 429. Beef Production: Feedlot Management**3 Credits**

Senior level course in feedlot management of beef cattle. Topics of interest include cattle handling and processing, health and nutrition, intake management, and growth. Feed mill operation, marketing strategies, and regulatory concerns associated with finishing cattle production may also be discussed.

Prerequisite(s): ANSC 304 or Consent of Instructor.

ANSC 448. Problems**1-4 Credits**

Individual investigation in a specific area of animal science. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

ANSC 458. Livestock Behavior, Welfare and Handling**3 Credits (2+3P)**

Principles of animal behavior and evaluation of management practices on animal welfare in confined and rangeland livestock operations. Low stress livestock handling techniques. Design of livestock handling facilities. Crosslisted with: RGSC 458

Prerequisite(s): RGSC 294 or ANSC 100.

ANSC 462. Parasitology**3 Credits**

Same as EPWS 462.

ANSC 462 L. Parasitology Lab**1 Credit**

Classification, biological effects, and management of animal parasites of man, domestic animals, and wildlife. One-hour lab is optional. Same as EPWS 462.

ANSC 468. Advanced Dairy Herd Management**3 Credits**

The course is offered through the Southern Great Plains Dairy Consortium in Clovis, NM, and will include breeding, nutrition, physiology, health and management of large herd dairies of the Southwest. Students must apply for the course through the Consortium, and can take it more than once, as topics vary. Consent of instructor required.

Prerequisite(s): ANSC 304.

ANSC 480. Environmental Physiology of Domestic Animals**3 Credits**

Influence of environmental factors on physiological processes of domestic animals.

Prerequisite: ANSC 370.

ANSC 484. Ruminant Nutrition**3 Credits**

Energy, nitrogen, and mineral nutrition of ruminants with special emphasis on digestive physiology and metabolism of nonprotein nitrogen compounds.

Prerequisite: ANSC 422.

ANSC 488. Equine Nutrition and Exercise Physiology**3 Credits (2+2P)**

Students will gain an in-depth understanding of nutrition and exercise physiology in the horse. Students will investigate the response of major physiological systems to exercise, conditioning and training, gastrointestinal physiology, nutrition requirements and clinical nutrition of the horse.

Prerequisite(s)/Corequisite(s): Junior standing or consent of instructor.

ANSC 501. Advanced Animal Nutrition (so)**3 Credits**

Emphasis on digestive physiology and metabolism. Basic mechanisms involved in the intake, digestion, and absorption of nutrients studied.

Crosslisted with: HNDS 501

Prerequisite(s): CHEM 211 or consent of instructor.

ANSC 504. Animal Physiology Techniques (se)**4 Credits**

Radioimmunoassay procedures. Methods and procedures for conducting reproductive physiology research in livestock. Includes animal preparation, sample collection, laboratory and cell culture procedures.

Prerequisite: consent of instructor.

ANSC 507. Laboratory Techniques in Nutrition (f)**4 Credits (2+6P)**

Methodology and experimental procedures in measuring nutrient requirements and value of diets. Same as HNDS 507.

Prerequisites: ANSC 422 or consent of instructor.

ANSC 509. Endocrinology of Domestic Animals (f)**3 Credits**

The role of hormones in growth, development, metabolism, temperature regulation, lactation, and reproduction of domestic animals, including commercial applications.

ANSC 510. Range Nutrition Techniques (se)**3 Credits**

Animal and plant methods of determining quantity and quality of range forage. Same as RGSC 510.

Prerequisite: ANSC 484 or consent of instructor.

ANSC 512. Research Methods in Animal Science (s)**4 Credits (3+2P)**

Procedures used in animal science research, including planning and conduct of investigations and interpretation of results. Same as HNDS 512.

ANSC 515. Graduate Seminar**1 Credit**

Current topics. Same as HNDS 517.

ANSC 520. Advanced Nutritional Management I: Feedlot (se)**3 Credits**

Emphasis on feeding systems for beef cattle from weaning to slaughter. Primary focus on feedlot nutrition and management.

Prerequisite: ANSC 484 or consent of instructor.

ANSC 521. Advanced Nutritional Management II: Cow Calf/Stockier (so)**3 Credits**

Emphasis on nutritional management for cow-calf and stockier operations. Primary focus on applications to range animal nutrition and management.

Prerequisite: ANSC 484 or consent of instructor.

ANSC 522. Animal Nutrition (f)**3 Credits**

Nutrient utilization and measurement; nutrient requirements for the various body functions. Taught with ANSC 422 and same as HNDS 522 with additional requirements for graduate students. Recommended for nonmajors. Crosslisted with: HNDS 522

Prerequisite(s): CHEM 211.

ANSC 560. Rumen Microbiology (so)**3 Credits**

Issues in ruminal and gastrointestinal microbiology. Includes physiological and genetic mechanisms in carbohydrate and nitrogen utilization. Same as FSTE 560.

Prerequisites: ANSC/HNDS 501 and CHEM 546.

ANSC 580. Environmental Physiology of Domestic Animals**3 Credits**

Influence of environmental factors on physiological processes of domestic animals. Specific focus on fetal and developmental programming, heat and cold stress.

ANSC 588. Equine Nutrition and Exercise Physiology**3 Credits**

Students will gain and in-depth understanding of nutrition and exercise, conditioning and training, gastrointestinal physiology, nutrition requirements and clinical nutrition of the horse.

Prerequisite(s)/Corequisite(s): ANSC 304 and ANSC 422.

ANSC 598. Special Research Programs**1-4 Credits (1-4)**

Individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

ANSC 599. Master's Thesis**15 Credits**

Thesis. Consent of Instructor required. Thesis/Dissertation Grading.

ANSC 600. Research**1-15 Credits**

This course is for Ph.D. students before they have completed qualifiers. Consent of Instructor required. Thesis/Dissertation Grading.

Prerequisite(s): ANSC 421 or consent of instructor.

ANSC 602. Advanced Reproductive Physiology (fo)**3 Credits**

Mechanisms of reproductive function; research methodology.

Prerequisite(s): ANSC 421 or consent of instructor.

ANSC 602 L. Molecular Techniques in Reproductive Physiology (fo)**2 Credits**

Molecular biology techniques used in the study of reproductive physiology in domestic animals. Extraction of RNA, DNA from endocrine tissues, northern analysis, culture of pituitary/ovarian tissue. Mechanisms of hormone action.

Prerequisite: consent of instructor.

ANSC 604. Hypothalamo-Hypophyseal-Pineal Endocrinology (fe)**1 Credit**

Hormones and other neurochemicals synthesized and secreted by the hypothalamus, pituitary, and pineal glands. Neuroendocrinology of the hypothalamo-hypophyseal axis.

Prerequisite: ANSC 509.

ANSC 605. Gonadal and Uterine Endocrinology (fe)**1 Credit**

Endocrinology of mammalian ovaries, testes, and uteri including developing trophoblasts.

Prerequisite: ANSC 509.

ANSC 606. Endocrinology of Pregnancy, Parturition, and Lactation (fe)**1 Credit**

Hormones and other chemical messengers involved in maintenance of pregnancy, control of parturition, and initiation and maintenance of lactation in farm animals.

Prerequisite: ANSC 509.

ANSC 621. Metabolic Functions and Dysfunctions (fe)**3 Credits**

Physiological chemistry of ruminants and other domestic animals, with attention to metabolic dysfunctions and nutritional toxicology. Same as HNDS 621.

Prerequisites: CHEM 345 and ANSC 501.

ANSC 625. Nutrient Metabolism I: Mineral, Vitamin, and Nitrogen Metabolism (fo)**4 Credits**

Cellular metabolism, physiological function(s), toxicities, and deficiencies of minerals, vitamins and nitrogen in ruminants and nonruminants. Same as HNDS 625.

Prerequisite: ANSC/HNDS 501.

ANSC 626. Nutrient Metabolism II: Carbohydrates, Lipids, and Energetics (se)**4 Credits**

Basic principles of carbohydrate, lipid, and energy metabolism; integration of metabolism with emphasis on nutritional and biochemical processes related to efficiency of nutrient use. Same as HNDS 626.

Prerequisite: ANSC 501 or HNDS 501.

ANSC 698. Special Research Programs**1-4 Credits**

Advanced individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

ANSC 700. Doctoral Dissertation**15 Credits**

Dissertation. Consent of Instructor required. Thesis/Dissertation Grading.

ANTH-ANTHROPOLOGY (ANTH)

ANTH 110. North American Prehistory**3 Credits**

Introduction to major prehistoric cultural developments and changes in North America from the first entry of people into the New World until prior to the arrival of European settlers. Restricted to Community Colleges campuses only.

ANTH 115. Native Peoples of North America**3 Credits**

General survey of the ethnology of selected native American groups.

ANTH 116. Native Peoples of the American Southwest**3 Credits**

Introduction to the early history and culture of native people of the Southwest.

ANTH 118. Introduction to Historic Preservation**3 Credits**

Introduction to historic preservation, its history, goals, methods, legal basis, and economic importance. Explores public role in decision-making. Community Colleges only.

ANTH 120G. Human Ancestors**3 Credits**

Evolutionary history of the human species from its origin in the primate order, with primary emphasis on the evolution of humankind during the past three million years. Examination of the social lives of apes and consideration of similarities to and differences from them. Biological foundations of human behavior, emphasizing thought, movement, and interaction.

ANTH 125G. Introduction to World Cultures**3 Credits**

Examine cross-cultural diversity and human universals through the lens of anthropological inquiry. Explore human thought and behavior in contemporary world cultures covering kinship, economic patterns, power structures, and religious practices and beliefs. The impact of cultural influence on everyday life is emphasized.

ANTH 130G. Human's Place in Nature: Introduction to Biological Anthropology**3 Credits**

This course uses scientific methods and principles to examine human evolutionary history and family tree relationships, as well as the biological foundations of human behavior. Through lectures, readings and laboratory assignments students are introduced to the history and development of modern evolutionary biology, molecular and population genetics, the primate and human fossil record and modern human biological diversity. By examining the social lives of apes and other primates, primitive and unique aspects of human behavior are identified and the lives of fossil ancestors are reconstructed.

Corequisite(s): ANTH 130GL.

ANTH 130GL. Human's Place in Nature Laboratory**1 Credit**

This one credit laboratory course uses scientific methods and principles to examine evidence for human evolutionary history and family tree relationships, primate ecology and behavior, and modern human diversity.

ANTH 201G. Introduction to Anthropology**3 Credits**

Exploration of human origins and the development of cultural diversity. Topics include biological and cultural evolution, the structure and functions of social institutions, belief systems, language and culture, human-environmental relationships, methods of prehistoric and contemporary cultural analysis, and theories of culture.

ANTH 202G. Introduction to Archaeology and Physical Anthropology**3 Credits**

Provides an introduction to the methods, theories, and results of two subfields of anthropology: archaeology and physical anthropology. Archaeology is the study of past human cultures. Physical anthropology is the study of human biology and evolution.

ANTH 203G. Introduction to Language and Cultural Anthropology**3 Credits**

Provides an introduction to the methods, theories, and results of two subfields of anthropology: linguistics and cultural anthropology. Linguistics is the study of human language. Cultural anthropology is the study of the organizing principles of human beliefs and practices.

ANTH 297. Elementary Special Topics**1-4 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

ANTH 301. Cultural Anthropology**3 Credits**

Human concepts of culture and life processes.

ANTH 305V. Contemporary Native Americans**3 Credits**

Introduction to contemporary native peoples and cultures of North America. Emphasis on sociocultural and socioeconomic history, sociocultural change and persistence, present day reservation life, and current social and economic goals.

ANTH 306V. Peoples of Latin America**3 Credits**

Introduction to cultural patterns and diversity of Latin America with emphasis on indigenous groups, peasants, plantation workers, and urban residents throughout South America, the Caribbean, Mexico, and Central America.

ANTH 307. Anthropology of Mexico and Guatemala**3 Credits**

This course focuses on ethnographic study of people in Mexico and Guatemala. Through reading and discussing a variety of ethnographic works, the course will examine some historical and contemporary issues facing different groups of people in this region and will include topics such as gender, indigenous movements, migration, urbanization, and tourism.

ANTH 312. The Ancient Maya**3 Credits**

Archaeological evidence of culture change in the Maya civilizations of Mexico and Central America from 2000 BC to the Spanish Conquest.

ANTH 313. Ancient Mexico**3 Credits**

Archaeological evidence of culture change among the Aztecs, Zapotecs, and their predecessors in Central Mexico and Oaxaca from 7,000 BC to the Spanish Conquest.

ANTH 315. Introduction to Archaeology**3 Credits**

Concepts and methods for study of prehistoric cultures; history of archaeological research.

ANTH 316. Archaeology of the American Southwest**3 Credits**

Introduction to the prehistoric peoples of the North American Southwest, a historical approach emphasizing the rise of method and theory in the region.

ANTH 318. Historical Archaeology in Latin America**3 Credits**

Examination of theoretical and methodological issues in historical archaeology in Latin America from 1450 to present, including conquest, colonialism, capitalism, and modernity as anthropological processes. The contributions and limitations of historical, ethnohistorical, and archaeological evidence are emphasized.

ANTH 320. Anthropological Linguistics**3 Credits**

The study of language and culture with particular emphasis on the cultural factors in the communication process.

ANTH 330V. Magic, Witchcraft and Religion**3 Credits**

Provides an overview of old and new methods and theories for the study of religion. Exposure to the ways groups of people in diverse cultural systems construct and change their religious traditions to serve practical and meaningful ends. Crosslisted with: HIST 330V and SOC 330V.

ANTH 345. Introduction to Museology**3 Credits**

Museum philosophy, history, administration, and collection management. Emphasis on cataloging, care, and exhibition, as well as ethics and public responsibility.

ANTH 348. Museums & Society**3 Credits**

Examines theoretical frameworks that shape museum administration, exhibits and collections development. Examines themes of gender, space, place, multiculturalism, national and international politics in museum contexts.

ANTH 350. Anthropological Theory**3 Credits**

This course introduces students to historical and contemporary theory in anthropology with a focus on understanding why theory matters in our discipline. Key questions the course explores include: How have anthropologists thought about the concept of culture in different ways throughout the history of anthropology? What is the relevance of anthropological theory, both inside and outside the discipline? What new and promising trajectories do we see in anthropological theory today?

ANTH 355. Physical Anthropology**3 Credits**

An introduction to primate behavior, human evolution, and physical variation in modern human populations.

ANTH 357V. Medical Anthropology**3 Credits**

This course introduces students to evolutionary, ecological, interpretive, political-economic, and applied anthropological perspectives on health, illness, and healing to address some of the major questions in the field. How do humans adapt to changing environments that bring with them new illnesses and diseases? How do anthropologists understand the multiple meanings of health and illness cross-culturally? How can anthropologists effectively study health inequalities? What can medical anthropological perspectives contribute to addressing the health issues that we face in our current global context?

ANTH 360V. Food and Culture Around the World**3 Credits**

Study of the interaction between food and human culture from an anthropological perspective. Examines the traditional role of food in local economies, social relations, and identity around the world. Also examines the impact of globalization on traditional food systems and cultures.

ANTH 362. Environmental Anthropology**3 Credits**

This course examines ecology and current environmental studies from an anthropological point of view. The class focuses on how cultural values mediate environmental management. The class will cover topics such as theoretical foundations of ecological anthropology, large scale development, biodiversity conservation, sustainable environmental management, indigenous groups, consumption and globalization.

ANTH 376. Lithic Technology Organization**3 Credits**

Advanced seminars and laboratory exercises to learn and develop techniques and methods that will help us determine how to interpret behavioral and cultural information from lithic (stone tool) data.

Prerequisite(s): ANTH 315.

ANTH 378. Introduction to Lab Methods in Archaeology**3 Credits**

Laboratory techniques used in the analysis of archaeological materials.

ANTH 385. Internship in Anthropology**3-12 Credits (3-12)**

Applied or field experience to gain professional expertise. Placements with public agencies, NGOs, or research organizations. Topical focus tailored to student's individual needs through consultation with instructor.

Prerequisite(s): Junior status, consent of instructor and GPA 2.8 or better.

ANTH 386. Anthropological Study Odyssey**3-6 Credits (3-6)**

This course allows students to explore an anthropological topic, such as an archaeological tradition or culture, through classroom and field activities. Students are initially exposed to a topic during several days of intensive in class work and then pursue greater understanding of the topic through a field trip and possibly limited fieldwork. Readings, site tours, on-site lectures by specialists, and field exercises provide students an opportunity to develop an understanding of anthropological perspectives on the topic as well as to provide exposure to anthropological field and analytic methods. This course also allows students to experience other cultures, prehistoric sites, and/or locales firsthand. May be repeated for credit under a different odyssey title. Taught with ANTH 521. May be repeated up to 6 credits. Consent of Instructor required.

ANTH 388. Intermediate Archaeological Field School**2-6 Credits (2-6)**

Training in archaeological field methods, including excavations of prehistoric sites, record keeping, mapping and analysis of data. Consent of Instructor required.

ANTH 389. Archaeological Mapping**3-6 Credits (3-6)**

Techniques for mapping archaeological sites and recording spatial distributions of archaeological data using a variety of surveying equipment and computer mapping software.

ANTH 399. Professionalism & Practice in Anthropology**3 Credits**

Capstone course for seniors designed to allow students to synthesize the anthropological knowledge they have acquired and connect theory to application in preparation for entry into a career. Restricted to: ANTH majors.

ANTH 401. Ethnography Seminar**3 Credits**

A literature review of ethnographic field research, data gathering, and analysis. A wide variety of anthropological publications will be critically examined and discussed. Designed for ANTH and SOC majors.

ANTH 402. Contemporary Medical Anthropology**3 Credits**

This advanced seminar in medical anthropology addresses contemporary issues in the field of medical anthropology through theoretical and ethnographic texts. Topics span a wide range of studies in medical anthropology and may include such issues as the social production of health and illness, medical pluralism, discourses of mental health, the practice of complementary and alternative medicine, health inequalities, and the political economy of infectious disease. Taught with ANTH 546.

Prerequisite(s): ANTH 201G or 357V.

ANTH 404. Cultures of Africa**3 Credits**

Explores the rich history and cultural diversity of the continent of Africa. The course first examines the historical processes that shaped modern Africa, including the evolution of modern humans in Africa, the origins of agriculture and pastoralism, the formation of indigenous African states, the slave trade, and European colonialism. The course also looks at contemporary African societies, including hunter-gatherer, pastoral, and farming/fishing peoples. In addition, contemporary issues facing modern Africa such as famine and agricultural policy, the status of women, and environmental challenges such as deforestation are discussed. Taught with ANTH 504. Crosslisted with: HIST 404

ANTH 415. Applied Anthropology**3 Credits**

Examines the intellectual roots of applied anthropology and early case studies of anthropologists working as administrators. Examines the ethical and methodological approaches that applied anthropologists employ. Examination of case studies that show role of applied anthropologists in improving human service delivery, cultural preservation, planning and implementing programs of participatory change, advocacy, and economic development. Taught with ANTH 515.

ANTH 431. Nutritional Anthropology**3 Credits**

Evolutionary and cross-cultural perspective on human nutrition.

ANTH 433. Women, Gender, and Culture**3 Credits**

Survey of the history of ideas about women and gender in the discipline of anthropology and a comparison of gender roles, relations, and ideologies across a range of cultures. Same as W S 433.

ANTH 434. Human Evolution**3 Credits**

Overview of human biological evolution from the emergence of Miocene apes to modern human diaspora. May be repeated up to 3 credits.

Crosslisted with: BIOL 434.

Prerequisite(s): ANTH 355 or consent of instructor.

ANTH 434 L. Human Evolution Laboratory**1 Credit**

Laboratory in human evolution, includes exercises and activities to learn the human fossil record. Crosslisted with: BIOL 434 L.

Prerequisite(s): ANTH 355 or consent of instructor.

Corequisite(s): ANTH 434.

ANTH 449. Directed Reading**1-6 Credits**

Comprehensive reading on selected topics. May be repeated for a maximum of 6 credits.

Prerequisite(s): Upper division anthropology majors with consent of instructor.

ANTH 449 H. Directed Reading Honors**1-3 Credits**

Same as ANTH 449. Additional work to be arranged. May be repeated for a maximum of 6 credits.

ANTH 455. Federal Indian Policy**3 Credits**

Federal Indian policy and its impact on Native Americans. This course will provide basic understanding of how federal Indian policy impacts almost all activities and situations with Native Americans. Course will also look at issues such as sovereignty and how it impacts most interactions with tribal groups.

ANTH 458. Sex, Reproduction and Birth**3 Credits**

This course examines pregnancy and birth practices cross-culturally, including such topics as gendered roles and responsibilities, pregnancy and birth as rites of passage, cultural concepts of personhood, global family planning initiatives, the medicalization of pregnancy and birth, and developing reproductive technologies.

Prerequisite(s): ANTH 201G, ANTH 357V or consent of instructor.

ANTH 459. Peru: From Incas to Inca Kola**3 Credits**

Explores issues of cultural and national identity in Peru from the Incas to the present, focusing on the modern period. Themes include indigenous resistance and adaptation to colonial rule, nationalism, militarism, terrorism, globalization, and the drug trade. Crosslisted with: HIST 459

ANTH 467. Archaeology of the American Southwest**3 Credits**

Description and analysis of prehistoric archaeology of the American Southwest including paleo-environmental reconstruction, culture change, and relations with contemporary cultures.

Prerequisite: ANTH 315.

ANTH 472. Primate Behavior and Ecology**3 Credits**

Survey of the social behavior and ecology of nonhuman primates. Crosslisted with: BIOL 472.

ANTH 473. Primate Adaptation and Evolution**3 Credits**

Survey of the adaptations and evolutionary history of nonhuman primates. Crosslisted with: BIOL 423.

Prerequisite(s): ANTH 355 or consent of instructor.

Corequisite(s): ANTH 473 L when offered.

ANTH 474. Human Osteology**3 Credits**

A survey of the functional, developmental, and evolutionary biology of the human skeleton. Identifying bones and teeth from hands-on experience with skeletal and dental material. Provides a foundation for human evolutionary studies, bioarchaeology and forensic anthropology. May be repeated up to 3 credits. Crosslisted with: BIOL 424.

Prerequisite(s)/Corequisite(s): Recommend ANTH 355 or equivalent.

ANTH 477. Zooarchaeology**3 Credits**

Detailed study and analysis of taphonomic processes affecting animal bone recovered from archaeological and paleontological contexts.

Prerequisite(s): Either ANTH 315, ANTH 355, or BIOL 330.

ANTH 485. Special Research Project**1-3 Credits**

Anthropological, archaeological, or museum field work or laboratory experience in academic, private, state, or federal agencies. Must spend 30 hours in a field, museum, or laboratory setting per credit hour earned. May be repeated up to 6 credits.

Prerequisite(s): Complete 12 ANTH credits and consent of instructor.

ANTH 486. Community Engagement and Service Learning**3 Credits**

Course combines classroom instruction with a local community service project. Formal instruction component will examine social science research findings and perspectives on a locally relevant social issue or problem. In the service learning component, students will be trained and work on a local community service project. Students will develop field experience and methodological skills in community engagement. Projects and social issues may vary for different semesters.

ANTH 488. Archaeological Field School Advanced**1-6 Credits**

Archaeological field methods, including excavations of prehistoric sites, record keeping, mapping and analysis of data. Consent of Instructor required.

ANTH 497. Special Topics**1-6 Credits (1-6)**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite(s): Junior or above standing.

ANTH 500. Seminar in Anthropological Theory**3 Credits**

Detailed focus on specific areas of anthropological theory. Course subtitled in the Schedule of Classes. Course may be repeated.

Prerequisite(s): graduate standing in Anthropology or consent of instructor.

ANTH 501. Concepts in Anthropology**3 Credits**

Survey of concepts and theories central to the subdisciplines of anthropology.

ANTH 502. Fundamentals of Anthropology**1-4 Credits (1-4)**

Review of fundamental knowledge and theories in biological, cultural, or linguistic anthropology or archaeology. Graded S/U.

ANTH 504. Cultures of Africa**3 Credits**

Explores the rich history and cultural diversity of the continent of Africa. The course first examines the historical processes that shaped modern Africa, including the evolution of modern humans in Africa, the origins of agriculture and pastoralism, the formation of indigenous African states, the slave trade, and European colonialism. The course also looks at contemporary African societies, including hunter-gatherer, pastoral, and farming/fishing peoples. In addition, contemporary issues facing modern Africa such as famine and agricultural policy, the status of women, and environmental challenges such as deforestation are discussed. Taught with ANTH 404. Crosslisted with: HIST 504

ANTH 505. Issues in Anthropological Practice**3 Credits**

Anthropological approaches to research design, implementation, and dissemination. Restricted to: Main campus only.

ANTH 506. Advanced Studies in Physical Anthropology**1-3 Credits**

Lectures, seminars, or laboratory research in selected topics. May be repeated for a maximum of 12 credits.

Prerequisite(s): graduate standing in Anthropology or consent of instructor.

ANTH 507. Advanced Studies in Archaeology**1-3 Credits**

Lectures, seminars, field or laboratory research in selected topics. May be repeated for a maximum of 12 credits.

Prerequisite(s): graduate standing in Anthropology or consent of instructor.

ANTH 508. Advanced Studies in Cultural Anthropology**1-3 Credits**

Lectures, seminars, or field research in selected topics. May be repeated for a maximum of 12 credits.

Prerequisite(s): graduate standing in Anthropology or consent of instructor.

ANTH 509. Advanced Studies in Anthropological Linguistics**1-3 Credits**

Lectures, seminars, or field research in selected topics. May be repeated for a maximum of 12 credits.

ANTH 512. Analytical Methods in Anthropology**3 Credits**

Quantitative analytical methods of anthropology examined in detail. Applied problem sets include physical and cultural anthropology, linguistics, and archaeology.

Prerequisite: graduate standing or consent of instructor.

ANTH 513. Biological Anthropology**3 Credits**

Examination of major theoretical and methodological issues in biological anthropology.

ANTH 515. Applied Anthropology**3 Credits**

Examines the intellectual roots of applied anthropology and early case studies of anthropologists working as administrators. Examines the ethical and methodological approaches that applied anthropologists employ. Examination of case studies that show the role of applied anthropologists in improving human service delivery, cultural preservation, planning and implementing programs of participatory change, advocacy, and economic development. Taught with ANTH 415.

ANTH 516. Advanced Archaeology of the American Southwest**3 Credits**

Advanced topics in Southwestern archaeology including ritual architecture, environmental reconstruction, violence, site formation processes, and experiment and research.

ANTH 517. Advanced Topics in Mesoamerican Archaeology**3 Credits**

Specific subjects in Mesoamerican archaeology to be announced in the Schedule of Classes. May be repeated for a maximum of 6 credits.

Prerequisite: graduate standing.

ANTH 518. Advanced Historical Archaeology**3 Credits**

Advanced methodological and theoretical concepts applicable to the archaeology of historic periods.

ANTH 519. Advanced Topics in Prehistoric Archaeology**3 Credits**

Seminar on specialized research archaeology.

Prerequisite: graduate standing.

ANTH 520. Ethnographic Field Methods**3 Credits**

Basic methodologies used in conducting qualitative ethnographic research. Projects in participant observation, ethnographic interviews, life history interviews, folk taxonomy construction, and coding of field notes.

ANTH 521. Advanced Anthropologist Study Odyssey**3-6 Credits (3-6)**

This course allows students to explore an anthropological topic, such as an archaeological tradition or culture, through classroom and field activities. Students are initially exposed to a topic during several days of intensive in class work and then pursue greater understanding of the topic through a field trip and possibly limited fieldwork. Readings, site tours, on-site lectures by specialists, and field exercises provide students an opportunity to develop an understanding of anthropological perspectives on the topic as well as to provide exposure to anthropological field and analytic methods. This course also allows students to experience other cultures, prehistoric sites, and/or locales firsthand. May be repeated for credit under a different odyssey title. Taught with ANTH 386. May be repeated up to 6 credits. Consent of Instructor required.

ANTH 522. Archaeological Field School-Graduates**2-6 Credits**

Techniques of archaeological data collection, analysis, and interpretation. Emphasis on archaeological field work in the Southwest.

ANTH 523. Archaeological Mapping**3-6 Credits (3-6)**

Techniques for mapping archaeological sites and recording spatial distributions of archaeological data using a variety of surveying equipment and computer mapping software.

ANTH 526. Conquest and Colonialism**3 Credits**

Examination of major theoretical and methodological issues in historical anthropology and archaeology of the Americas from AD1500 to present, including conquest, colonialism, capitalism, and modernity as anthropological processes. The contributions and limitations of historical, ethnohistorical, and archaeological evidence are emphasized.

Prerequisite(s): graduate standing in Anthropology or History or consent of instructor.

ANTH 531. Issues in Nutritional Anthropology**3 Credits**

Evolutionary and cross-cultural perspective on human nutrition.

ANTH 534. Advanced Human Evolution**3 Credits**

Advanced overview of human biological evolution from the emergence of Miocene apes to the modern human diaspora. May be repeated up to 3 credits. Crosslisted with: BIOL 534.

ANTH 534 L. Advanced Human Evolution Lab**1 Credit**

Advanced laboratory in human evolution, includes exercises and activities to learn the human fossil record. Crosslisted with: BIOL 534 L.

Corequisite(s): ANTH 534.

ANTH 537. Applied Medical Anthropology**3 Credits**

This course introduces students to applications of medical anthropological perspectives to health care, international development, public health, and health policy.

ANTH 538. Plants, Culture, and Sustainable Development**3 Credits**

Study of role of indigenous cultures and indigenous knowledge systems in plant domestication, ethnoecology, and preservation of traditional crop diversity. Examination of issues related to conserving cultural diversity, food systems, food security and biodiversity.

ANTH 539. Culture and Foodways**3 Credits**

Study of interaction between food and culture from anthropological perspective. Study of role of food in cultural history, social relations, ritual, and identity. Examination of impact of globalization of food systems on traditional cultures, local food systems, and food security.

ANTH 540. Cultural Resource Management**3 Credits**

Study of federal and state of New Mexico historic preservation laws and regulations and their application in current Cultural Resource Management and a review of relevant case studies.

ANTH 541. Decolonizing Methodologies in Native American Studies**3 Credits**

This course utilizes decolonizing methodologies and praxis to gain insight into the complex effects of oppression and colonization. Critical and indigenous concepts are used to identify and analyze hegemonic, ethnocentric, historic and contemporary human rights and social justice issues of indigenous people. Research theory and methodology such as community participatory action research that is collaborative, inclusive, and pragmatic to ethics, intellectual property, and cultural boundaries of indigenous people is emphasized.

ANTH 542. Cultural Resource Management II**3 Credits**

Continuation of ANTH 540 to include the study of cultural resource management practices, research design, and completion of proposals in response to requests. Overview of management practices and budgeting of projects and specialized studies (geophysical investigations, National Register nominations).

ANTH 543. Indigenous Ways of Knowing**3 Credits**

This course examines Indigenous knowledge and ways of knowing as a means to gain an appreciation of an epistemology and ontology that may be outside the boundaries of Eurocentric theory, concepts, and principles. Knowledge development through mythology and story telling is viewed from the nature of difference rather than comparative analysis.

ANTH 545. Advanced Museology I**3 Credits**

Museum philosophy, history, administration, and collection management. Emphasis on collecting, cataloging, care, and exhibition, as well as ethics, public responsibility, and grantsmanship.

ANTH 546. Advanced Contemporary Medical Anthropology**3 Credits**

This advanced seminar in medical anthropology addresses contemporary issues in the field of medical anthropology through theoretical and ethnographic texts. Topics span a wide range of studies in medical anthropology and may include such issues as the social production of health and illness, medical pluralism, discourses of mental health, the practice of complementary and alternative medicine, health inequalities, and the political economy of infectious disease. Taught with ANTH 402.

ANTH 547. Museum Field Methods**3 Credits**

Basic methodologies used in conducting museum research away from the museum, including collections evaluation, collections acquisition, donor interviews, educational outreach, and development.

ANTH 548. Museums & Society**3 Credits**

Examines theoretical frameworks that shape museum administration, exhibits and collections development. Examines themes of gender, space, place, multiculturalism, national and international politics in museum contexts.

ANTH 559. Peru: From Incas to Inca Kola**3 Credits**

Explores issues of cultural and national identity in Peru from the Incas to the present, focusing on the modern period. Themes include indigenous resistance and adaptation to colonial rule, nationalism, militarism, terrorism, globalization, and the drug trade. Same as GOVT 565 and HIST 559.

ANTH 572. Advanced Primate Behavior and Ecology**3 Credits**

Advanced review of non-human primate social behavior and ecology. Crosslisted with: BIOL 572.

ANTH 573. Advanced Primate Adaptation and Evolution**3 Credits**

Advanced review of non-human primate adaptation and evolution. Crosslisted with: BIOL 503.

Corequisite(s): ANTH 573 L when offered.

ANTH 574. Advanced Human Osteology**3 Credits**

Advanced Human Osteology surveying the functional, developmental and evolutionary biology of the human skeleton. Identifying bones and teeth from hands-on experience with skeletal and dental material. Provides a foundation for human evolutionary studies, bioarchaeology and forensic anthropology. May be repeated up to 3 credits. Crosslisted with: BIOL 574.

ANTH 576. Lithic Technology Organization**3 Credits**

Advanced seminars and laboratory exercises to learn and develop techniques and methods that will help us determine how to interpret behavioral and cultural information from lithic (stone tool) data. Consent of Instructor required.

ANTH 577. Advanced Zooarchaeology**3 Credits**

Detailed study and analysis of taphonomic processes affecting animal bone recovered from archaeological and paleontological contexts.

ANTH 578. Advanced Lab Methods in Archaeology**3 Credits**

Examination of advanced laboratory techniques used in the analysis of archaeological materials.

ANTH 579. Qualitative Data Analysis and Interpretation**3 Credits**

This course focuses on methods for qualitative data analysis, both computer-assisted and non-computer-assisted, and interpretation. It includes writing up data for academic articles or theses.

ANTH 585. Method and Theory in Archaeology**3 Credits**

Focus on major methodological and theoretical aspects of contemporary archaeology.

ANTH 587. Field Work in Latin America**3-12 Credits**

Covers anthropological field methods in Latin America that also incorporate in-field lab analysis. No S/U grading.

Prerequisite: consent of instructor.

ANTH 596. Readings**1-6 Credits**

Individual study of selected readings and topics. May be repeated for a maximum of 6 credits. Consent of instructor required.

ANTH 597. Internship**1-9 Credits**

Anthropological or archaeological internship in private, state, or federal agency. May be repeated for a maximum of 18 credits. Consent of instructor required. Restricted to ANTH majors.

Prerequisite(s): graduate standing.

ANTH 598. Special Research Problems**1-6 Credits (6)**

Individual analytic or experimental investigations. May be repeated under different subtitles for a maximum of 6 credits. Consent of instructor required. Restricted to ANTH majors.

Prerequisite(s): graduate standing.

ANTH 599. Master's Thesis**15 Credits**

Thesis. Consent of instructor required. Restricted to ANTH majors.

Prerequisite(s): graduate standing.

ARAB-ARABIC (ARAB)

ARAB 111. Elementary Arabic I**4 Credits**

Arabic language for beginners.

ARAB 112. Elementary Arabic II**4 Credits**

Arabic language for beginners.

Prerequisite: C- or better in ARAB 111.

ARAB 211. Intermediate Arabic I**3 Credits**

Speaking, reading and writing.

Prerequisite: C- or better in ARAB 112.

ARAB 212. Intermediate Arabic II**3 Credits**

Speaking, reading and writing.

Prerequisite: C- or better in ARAB 211.

ARCT-ARCHITECTURE (ARCT)

ARCT 101. Introduction to Architecture**3 Credits (2+2P)**

This course provides students the tools and vocabulary to analyze, interpret, and discuss the built environment from the social, historical, perceptual, and technical determinants. Lectures and assignments will introduce students to the elements of current and likely future directions of architecture from experiential, aesthetic, structural, functional, and historical perspectives. The course will provide students with knowledge about the people and processes involved with professional issues of architectural practice. Students will be required to participate in individual and group presentations and projects, as well as compile a portfolio of their work completed in the course.

ARCT 104. Introduction to Architectural Drawing**4 Credits (2+4P)**

This course is designed as an introduction to architectural drawing and design for students without prior experience in the fine arts. Students are guided through a series of spatial and analytical exercises that focus attention on not only how architects draw, but also the reasoning and processes embedded within the technique. Direct linkages with the Introduction to Architecture course provide exposure to a wide range of interconnected architectural concepts.

ARCT 111. Architecture World History I**3 Credits (2+2P)**

A survey of the development of world architecture from the ancient era to the advent of the enlightenment in Europe. Major emphasis is on the visual, intellectual, cultural and technological aspects of the ancient and indigenous cultures of the classical and pre-modern world. Community Colleges only. Restricted to Alamogordo, Dona Ana and Grants campuses.

ARCT 124. Global Issues and Sustainability**3 Credits**

This is a 'critical thinking' course. This course introduces students to global environmental issues (historic, present, and future), and the impact on tomorrow's design and construction professions. Issues will include, but shall not be limited to global warming, energy consumption, population, natural resource consumption, air and water quality, waste management, facilities operation management, politics, and facilities design & construction. Through extensive readings, research, dialogue, and debates, students will establish a personal position (opinion) on each of the topics covered. Guest speakers will also be invited. Students will develop reports and presentations on various related issues, as well as develop ideas for solutions to problems related to environmental issues. The impact on the design and construction industry, including 'Green Building' and 'LEED Accreditation and Certification/Criteria' will also be addressed on each issue. Restricted to Community Colleges only.

ARCT 150. Orientation and Mentoring in Architecture-Construction-Engineering (ACE)**1-6 Credits (1-6)**

This course is intended for high school dual credit students and college/university students wishing to explore careers in Architecture, Construction, and Engineering(ACE), which includes the specific fields of Architectural, Civil, Mechanical, Structural, Interior, Landscape, Sustainability, Environmental. Course is co-taught by a college instructor in conjunction with mentors who are local professionals in the fields of ACE. Students receive one-on-one mentoring, lectures, demonstrations, and attend field trips to construction sites, offices of Architects, Engineers and Designers, etc. Students also engage in hands-on activities such as Design (Architectural, Civil, Mechanical, Structural, Interior, Landscape, Environmental), analysis, model building, software, and research topics related to the ACE fields, as well as Sustainability, Interior Design, Landscape Design, Construction Materials and Fabrication processes. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

ARCT 154. Introduction to Architectural Design**3 Credits (2+2P)**

This course provides students who possess a basic background in architecture and architectural drawing with an introduction to architectural design. Students are guided through a series of spatial and analytical exercises that focus attention on two dimensional, three dimensional, and four dimensional design. This course will build on direct linkages to ARCT 101 and ARCT 104 to further students' exposure to interconnected architectural concepts of process, organizational strategies, and analysis of material methodology while utilizing abstract and practiced graphical architectural conventions. Consent of Instructor required. Restricted to Community Colleges campuses only.

Prerequisite(s): ARCT 101 and ARCT 104.

ARCT 170. Computers in Architecture**3 Credits (2+2P)**

Explore various software and photography techniques widely used in the architectural field. In addition to using industry standard CAD program as primary 2-d drafting tool, focus is to produce digital architectural models and renderings, presentation boards, and animations. Digital images will be produced and enhanced through basic techniques in photography and integration of various software. Both individual and group work will be required.

ARCT 204. Architectural Design Studio I**5 Credits (1+8P)**

Enhancement of general graphic communication skills and introduction to fundamental design including exploration, development and defense of design concepts; structural order; 2D and 3D processes in manual and digital architectural graphic expression; model building; general communication and presentation techniques; and development of course portfolio. Course is Studio/critique-based with considerable amount of work/hours required. This course is designed to be taken during student's last year in the Pre-Architecture program at DACC. Consent of Instructor required. Restricted to Community Colleges only.

Prerequisite(s): Grade of B- or better in both ARCT 101 and ARCT 104.

ARCT 210. Architectural Delineation I**3 Credits (2+2P)**

Introduction to visual literacy, architectural graphic communication, & basic analytical skills. Architectural concepts primarily explored through the application of technical drawing, descriptive geometry, & material manipulation; primarily black & white media.

ARCT 211. Architectural World History II**3 Credits (2+2P)**

A survey of the development of world architecture from the enlightenment in Europe to the present. Community Colleges only. Restricted to Alamogordo, Dona Ana and Grants campuses.

Prerequisite(s): ARCT 111 or consent of instructor.

ARCT 224. Sustainable Design in Architecture**3 Credits**

This course provides students with hands-on opportunity to increase their awareness in, and respond to the issues of responsible environmentally friendly building design by engaging in an integrated design process combining 'Traditional Design Process' with 'Sustainable Environmental Design' strategies. Students will expand their awareness of global environmental impacts due to design and construction, and gain knowledge in the industry's leading design 'tool' LEED (Leadership in Energy and Environmental Design) green building design rating system. LEED strategies will be utilized in the design of individual projects apply LEED in practical, individual design development, and develop an integrated building model utilizing the concept of BIM (Building Information Modeling). Such project development will require learning a basic design process and specific sequence including conceptual design, schematic design, design development and BIM (utilizing a BIM software such as REVIT, or AutoCad Architecture). Restricted to Community Colleges only.

Prerequisite(s): DRFT 109 or DRFT 165 or consent of instructor.

ARCT 250. Construction Documents**3 Credits (2+2P)**

Basic use of CAD to produce residential, commercial, and industrial architectural working drawings, including floor plans, sections, foundation plans and details, exterior and interior elevations, framing plans, and site plans. Use and application of building and zoning codes, typical construction methods and materials, and accessibility requirements. Basic 3-D modeling, AIA layering standards, sheet layout, and construction document coordination. Pre/ Restricted to: Community Colleges only.

Corequisite(s): DRFT 109.

ARCT 254. Architectural Design Studio II**5 Credits (1+8P)**

Advanced graphic communication, design, and 3D physical model representation. Focus on site analysis, programming and fundamental design issues of context, environment, program development and space planning, 2D and 3D design and presentation techniques. Course is 'Studio/critique-based' with considerable amount of outside work/hours required. This course is designed to be taken during student's last year in the Pre-Architecture program at DACC. Restricted to Alamogordo, Dona Ana and Grants campuses.

Prerequisite(s): Grade of C- or better in ARCT 204.

ARCT 260. Architectural Delineation**3 Credits (2+2P)**

Continuation of ARCT 210 with an emphasis in color media.

Prerequisites: ARCT 210.

ARCT 274. LEED Accreditation Exam Prep**3 Credits**

This course is intended for anyone in the construction or architectural design fields who is interested in learning more about green building and the LEED (Leadership in Energy and Environmental Design) strategies, and are also interested in learning about how to become LEED accredited. Overview of the LEED rating systems utilized in the design and operation of buildings, the various LEED building certifications, and accreditation requirements for professionals. Highlights include interpretation of the LEED Reference Guides, accepted strategies for meeting LEED certification, sample practice exams, integrated project delivery methods, and a practical approach to problem solving through the use of design problems. Restricted to Community Colleges only.

ARCT 290. Special Topics**1-6 Credits**

Topics subtitled in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

ARCT 291. Cooperative Experience**1-6 Credits**

Supervised cooperative work program. Student employed in approved occupation; supervised and evaluated by employer and instructor. Student meets weekly with instructor. Graded S/U.

Prerequisite: consent of instructor.

ARCT 295. Professional Development and Leadership-AIAS**1-3 Credits**

As members and/or officers of student professional organizations, architecture students gain experience through undertaking leadership roles, participating in team building, and becoming involved in service to the community. Students can also gain actual work experience involving skills related to their field of study. Graded S/U.

ART-ART (ART)

ART 101G. Orientation in Art**3 Credits (2+3P)**

A multicultural examination of the principles and philosophies of the visual arts and the ideas expressed through them.

ART 110G. Visual Concepts**3 Credits (2+4P)**

Introduction to the philosophies of art, visual thinking, and principles of visual organization. Designed to give students a broad view of aesthetic traditions, ideologies, and techniques basic to the creation and evaluation of art. Principles and concepts are taught in a common lecture and applied in parallel small studio sections. For non-art majors only.

ART 150. Drawing I**3 Credits (2+4P)**

Introduction to the skill of seeing through exercises that emphasize careful drawing from the still life and utilize a range of drawing materials and techniques. Outside assignments required. Intended for non-art majors on main campus. May be repeated up to 3 credits.

ART 151. Drawing II**3 Credits (2+4P)**

Continued emphasis on drawing from observation by focusing on still life and other subject matter. Covers a range of materials, techniques and concepts. Outside assignments. Restricted to ART and ANVE/DFM majors.

Prerequisite(s): ART 150.

ART 155. 2-D Fundamentals**3 Credits**

Introduction to two-dimensional space emphasizing visual elements and design principles as they apply to composition. A variety of materials are used in the studio projects and sketchbook exercises. Developing knowledge in vocabulary, color theory and skill in translating ideas into design are encouraged. Restricted to Community Colleges campuses only.

ART 156. 3-D Fundamentals**3 Credits**

Compositional organization of three-dimensional space explored through a broad range of visual exercises. Resourceful and creative problem solving encouraged. Restricted to Community Colleges campuses only.

ART 157. Color Theory**3 Credits (2+4P)**

Various color theories as they relate to compositional organization. Required for art education majors.

ART 160. Computer-Based Illustration**3 Credits (2+4P)**

Introduction to the principles of computerized drawing and design. Using the basic concepts, drawing tools, and vocabulary of Adobe Illustrator.

Prerequisite: ART 150, ART 155, or consent of instructor.

ART 161. Digital Imaging I**3 Credits (2+4P)**

Work with basic concepts, tools, and vocabulary of Adobe Photoshop to create effective visual communication. Includes selection tools, cloning, copying and pasting, color correction, image restoration, filters, and special effects. Community Colleges only.

ART 163. Digital Graphics**3 Credits (2+4P)**

Importing and exporting images and text into various desktop publishing formats. Exploring imaging, drawing, and page layout applications. Introduction to typography.

Prerequisite: ART 161.

ART 165. Web Page Design**3 Credits (2+4P)**

Introduction to the creation of well-designed and organized Web sites. Emphasis on building creative but functional user-friendly sites. Introduction to HTML, Flash, Java Script, and Web-authoring software. Community Colleges only. Same as OEPT 165.

Prerequisite: ART 161.

ART 250. Introduction to Drawing**3 Credits (2+4P)**

Introduction to drawing with a focus on technical, structural, and methodological skills. Subjects include still life and live figure models.

ART 252. Aspects of Drawing**2-3 Credits**

Continued work in drawing with emphasis on personal creative endeavor. Community Colleges only.

Prerequisites: ART 150, ART 151, and ART 250.

ART 255. Introduction to Graphic Design**3 Credits (2+4P)**

Introduction to the principles of visual communication and digital media, letterforms, typography and identity marks. Projects produced using conventional and digital tools.

ART 256. Introduction to Letter Forms and Typographic Design**3 Credits (2+4P)**

Introduction to letter forms, typography and identify marks. Projects produced using conventional and digital graphic designer tools.

Prerequisite(s): ART 155.

ART 260. Introduction to Painting**3 Credits (2+4P)**

Introduction to basic skills of painting through various exercises that emphasize working from observation, images and imagination. May be repeated up to 3 credits.

Prerequisite(s): ART 250 or ART 150.

ART 261. Painting Methods, Techniques and Applications**3 Credits (2+4P)**

The investigation of formal aspects of painting, an examination of painting techniques, and an exploration of various methodologies regarding form and content as applied to critical thinking skills through medium of paint.

Prerequisite(s): ART 150, ART 260.

ART 262. Aspects of Painting**2-3 Credits**

Varied painting media: continued development of painting skills.

Prerequisites: ART 150, ART 155 (for art majors), ART 260, or consent of instructor.

ART 265. Introduction to Sculpture**3 Credits (2+4P)**

Beginning sculpture students "explore space" while learning new processes and skills, including mold making, welding and woodworking.

ART 266. Go Figure: The Body in Contemporary Art**3 Credits (2+4P)**

Cultivation of individual direction through constant creative action.

Emphasis on self-styled assignments. Rotating themes pertinent to contemporary sculpture supplement aesthetic and conceptual awareness. Restricted to: Main campus only.

ART 267. Art Portfolio Preparation**3 Credits (2+4P)**

Refine general marketing strategies, personal portfolio and resumes. Define, target, and penetrate personal target markets. Students develop individual promotional packages.

Prerequisites: ART 163, ART 269, and ART 272, or consent of instructor.

ART 269. Advanced Computer-Based Illustration**3 Credits (2+4P)**

Design custom graphics and create special effects with filtering, special effects on type, graphing, technical illustrations, and three-dimensional drawing using Adobe Illustrator.

Prerequisites: ART 157, ART 160, and ART 161, or consent of instructor.

ART 270. Introduction to Photography**3 Credits (2+4P)**

Introduction to the production of digital images within the context of contemporary art. Utilizes digital SLR cameras with an emphasis on basic camera operation, picture composition, image processing and digital workflow. A DSLR camera is required. May be repeated up to 3 credits.

ART 271. Introduction to Film and Darkroom**3 Credits (2+4P)**

Introduction to silver based photographic materials, film development, enlargement printing and darkroom work. Students will work with a range of cameras including: medium format, toy and pinhole. Emphasis on understanding the syntax of silver halide photographic materials. Development of conceptual vocabulary and the creation of images with thematic unity. May be repeated for a maximum of 6 credits.

Prerequisite(s): ART 270.

ART 272. Digital Imaging II**3 Credits (2+4P)**

Refining of individual creative styles and technical skills using Adobe Photoshop. Emphasis on input and output predictability, and working with large file productions. Community colleges only. Restricted to: Community Colleges only.

Prerequisite(s): ART 161.

ART 274. Digital Capture and Output**3-9 Credits (3-9)**

Digital workflow, scanning, image processing software, digital printing, color management. Advanced digital printing skills. Emphasis on understanding the syntax of digital photographic processes. Development of conceptual vocabulary and the creation of images with thematic unity. Consent of instructor required. Restricted to ART majors.

ART 275. Introduction to Ceramics**3 Credits (2+4P)**

Introduction to the technical processes and conceptual concerns of working with the ceramic material. Students will explore various methods of forming with earthenware to make both functional and expressive works out of clay.

ART 276. Ceramics I, B**3 Credits (2+4P)**

Beginning ceramics, complementary half to ART 275. (ART 275 and ART 276 do not need to be taken consecutively.) Basic building techniques of coil, slab, and throwing are introduced. High-fire and low-fire clays are used.

ART 280. Introduction to Printmaking**3 Credits (2+4P)**

Introduction to the field of printmaking through projects that focus on specific processes, such as relief, intaglio, collography, paper lithography, and a variety of transfer and stencil techniques. Students engage in several assignments that are collaborative, as well as individual projects designed for development of personal aesthetics.

ART 281. Printmaking II**3 Credits (2+4P)**

Printmaking materials and techniques, with emphasis in intaglio and relief procedures.

Prerequisites: ART 150, ART 156 (for ART majors) and 280.

Corequisite: ART 150.

ART 285. Introduction to Metals and Jewelry**3 Credits (2+4P)**

Introduction to fundamental processes, design, and conceptual development for metal fabrication of jewelry and functional/non-functional objects.

ART 286. Stained Glass**3 Credits (2+4P)**

Instruction in the fundamental fabrication and design techniques for stained glass. Introduction to visual decision making skills, historical, and critical issues of the medium. Community Colleges only.

ART 294. Special Topics in Studio**1-3 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. No more than 9 credits toward a degree.

Prerequisite: consent of instructor.

ART 295G. Introduction to Art History I**3 Credits**

An introduction to the principles of art history within a chronological framework of the art of the Western World. All media will be discussed. From prehistoric times to the fourteenth century.

ART 296G. Introduction to Art History II**3 Credits**

Continuation of ART 295, Art of the Western World from Late Gothic to the present. May be repeated up to 3 credits.

ART 298. Writing in Art**3 Credits**

This reading- and writing-intensive course will introduce students to various approaches of writing about historical art.

ART 300. Special Topics in Art History**3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits. May be repeated up to 12 credits. Restricted to Las Cruces campus only.

Prerequisite(s): ART 295G, ART 296G, and ART 298 or consent of instructor.

ART 305. Medieval Art**3 Credits**

History of painting, stained glass, sculpture, architecture and manuscript illumination in Europe from the Early Christian period to the end of the Gothic period; taught with ART 505.

Prerequisite(s): ART 295G, ART 296G, and ART 298 or consent of instructor.

ART 310. Native American Art**3 Credits**

Cross-cultural introduction to art of the prehistoric and historic native people of the North, Central, and South Americas. Considers the artistic expression and the function of art in diverse cultural and environmental contexts.

Prerequisite(s): ART 295G, ART 296G, and ART 298 or consent of the instructor.

ART 311. Art of China I: Neolithic to Song Dynasty**3 Credits**

Survey of the art of China from the neolithic period to the end of the Song dynasty. Non-majors welcome. May be repeated up to 3 credits. Crosslisted with: ART 511.

Prerequisite(s): ART 295G, 296G, and 298 or HIST 211G and HIST 212G or consent of instructor.

ART 320. Art and Architecture in Pre-Columbian Meso-America**3 Credits**

Analysis of the art and culture of the Mesoamerican peoples before the arrival of Columbus in the New World. Includes an in-depth formal and historical analysis of architecture, sculpture, painting, pottery, and metal works of Mixtec, Toltec, Aztec, Maya, and other cultures and civilizations.

Prerequisite(s): ART 295G, ART 296G, and ART 298 or consent of instructor.

ART 321. Pre-Columbian Art and Architecture of the Andes**3 Credits**

Examines the arts and history of pre-Columbian Andean cultures in a cultural context. Analysis of architecture, sculpture, pottery, jewelry, textiles, and feather work.

Prerequisite(s): ART 295G, ART 296G, and ART 298 or consent of instructor.

ART 323. Italian Renaissance Art**3 Credits**

History of painting, sculpture and architecture in Italy from the 14th century to the end of the 16th century; taught with ART 523.

Prerequisite(s): ART 295G, ART 296G and ART 298 or consent of instructor.

ART 325. Northern Renaissance Art**3 Credits**

History of painting, manuscript illumination and graphics in Northern Europe from the late 14th century to the mid-16th century; taught with ART 525.

Prerequisite(s): ART 295G, 296G, and 298 or consent of instructor.

ART 328. Baroque Art and Architecture in Northern Europe**3 Credits**

Study of architecture, painting sculpture in Flanders, Holland, France, England, and Germany as indigenous developments and as reflections of the Italian Baroque.

Prerequisite(s): ART 295G, ART 296G, ART 298, or consent of instructor.

ART 329. Survey of Western Architecture**3 Credits**

Survey of history of Western architecture from prehistoric time to the present.

Prerequisite(s): ART 295G, ART 296G, and ART 298 or consent of instructor.

ART 330. Modern Architecture**3 Credits**

A survey of the history of Modern Architecture with focus given to major architects, monumental buildings, and building groups stressing construction techniques and style from the 18th century to the present.

Prerequisite(s): ART 295G, ART 296G, ART 298, or consent of instructor.

ART 333. Baroque Art and Architecture in Italy, Spain, and Hispanic Latin America**3 Credits**

Concentration of Italian Baroque architecture, painting, and sculpture; and on Spanish painting, sculpture, and architecture, as well as the art and architecture of Spanish vice-royalties of the Americas.

Prerequisite(s): ART 295G, ART 296G, ART 298, or consent of instructor.

ART 337. American Art to 1900**3 Credits**

Examines painting, sculpture, architecture and other arts in the United States from the colonial period to 1900 and places them within conceptual and historical contexts.

Prerequisite(s): ART 295G, ART 296G, and ART 298.

ART 338. Late Eighteenth- and Nineteenth-Century European Art**3 Credits**

History of painting, sculpture, architecture, and other arts created in Europe from 1789 to 1900.

Prerequisite(s): ART 295G, ART 296G, and ART 298.

ART 339. History of Photography**3 Credits**

Course studies history, theory and use of photographic practices in art, especially from formal introduction of the process in 1839 to the present.

Prerequisite(s): ART 295G, ART 296G, and ART 298.

ART 342. Twentieth-Century Art I, 1900-1945**3 Credits**

Examines themes and monuments of the Western world created between 1900 and 1945 and emphasizes the growth of modern and avant garde cultural practices.

Prerequisite(s): ART 295G, ART 296G, and ART 298.

ART 343. Twentieth-Century Art II, 1945-Present**3 Credits**

History of painting, sculpture, and other arts in Europe, the United States, and elsewhere from 1945 to the present.

Prerequisite(s): ART 295G, ART 296G, and ART 298.

ART 350. Intermediate Drawing and Painting**3 Credits (2+4P)**

Intermediate drawing and painting course focusing on the following topics: Realism, Color, Narrative, and Abstraction. Topics will be announced in the course schedule. Each topic may only be taken once. May be repeated up to 12 credits.

Prerequisite(s): ART 250 and ART 260.

ART 354. History of Graphic Design**3 Credits**

This course introduces students to the history of graphic design and evolution of visual communication. Course will involve writing and design projects.

Prerequisite(s): ART 295G, ART 296G, and ART 298.

ART 355. Special Topics in Graphic Design**3 Credits (2+4P)**

Intermediate graphic design course focusing on the following topics: production, packaging, layout, identity and interactive design. Topics will be announced in the course schedule. Each topic may only be taken once. May be repeated up to 12 credits.

Prerequisite(s): ART 255.

ART 356. Graphic Design and Multicolor Digital Production**3 Credits (2+4P)**

Design and production of multicolor projects using conventional and digital techniques.

Prerequisite(s): Grades of B or higher in each of ART 255 and ART 256; prior passage of ART 355 with a grade of C- or higher.

ART 357. Digital Graphic Design and Illustration**3 Credits (2+4P)**

Graphic illustrations and icons using vector and bitmap software programs. Emphasis on editorial, information and cultural applications. May be repeated for a maximum of 6 credits.

Prerequisite(s): ART 150, ART 255, ART 256.

ART 359. Digital Image-Making for Graphic Designers**3 Credits**

Creation of graphic icons, stylizations and archetypes. Projects produced using vector-based computer programs. Some computer experience required.

Prerequisite(s): ART 150, ART 255, ART 256, and CMT 145.

ART 360. The Figure**3 Credits (2+4P)**

Introduction to working from live models, anatomical skeletons, source images and the imagination in a variety of two-dimensional media, including painting and drawing. An emphasis is placed on anatomical accuracy and with a focus on the figure as an expressive subject. May be repeated up to 3 credits.

Prerequisite(s): ART 150, 250 or consent of instructor.

ART 361. Painting IIIB**3 Credits (2+4P)**

Media, materials and technical problems of contemporary painting continued. May be repeated for a maximum of 6 credits.

Prerequisite(s): ART 295G and ART 360.

ART 365. Intermediate Sculpture Special Topics**3 Credits (2+4P)**

Intermediate sculpture students will expand their fabrication skills in metal, wood and mixed media. Assignments incorporate topics such as Pop art, Process Art, and The Body in Contemporary Art. Topics will be announced in the course schedule. Each topic may only be taken once. May be repeated up to 6 credits.

Prerequisite(s): ART 265.

ART 370. Intermediate Digital Photography**3 Credits (2+4P)**

Intermediate digital photography course addressing techniques and production of photo media within the context of contemporary art. Course focuses on the following rotating topics: Networks, Photo-book and Video art. May be repeated up to 12 credits.

Prerequisite(s): ART 270, or consent of instructor.

ART 373. Intermediate Analog Photography**3 Credits (2+4P)**

Introduction to skills and techniques of black and white film photography within the context of contemporary art. Emphasis on analog camera work and darkroom procedures. 35 mm SLR or rangefinder film camera required for course. May be repeated up to 6 credits.

Prerequisite(s): ART 270, or consent of instructor.

ART 374. Intermediate Ceramics: Multiples (Design and Production)**3 Credits (2+4P)**

Intermediate ceramics course focusing on an introduction to the technical processes of throwing, prototyping, mold making, glaze calculation, and alternative firing. May be repeated up to 6 credits.

Prerequisite(s): ART 275.

ART 375. Intermediate Ceramics: Sculptural Concerns**3 Credits (2+4P)**

Intermediate ceramics course focusing on the refinement of technical skills with an emphasis on conceptual development related to materiality.

Prerequisite(s): ART 275 or consent of instructor.

ART 376. Museum/Gallery Research Internship**1-9 Credits**

Research internship in museum or gallery. Requirements determined by instructor in cooperation with supervising museum/gallery professional. May be repeated up to 9 credits. Consent of Instructor required.

Prerequisite(s): ART 295G, ART 296G, and ART 298.

ART 380. Intermediate Printmaking**3 Credits (2+4P)**

Intermediate printmaking course with emphasis on further investigation of a variety of materials and techniques associated with the print processes of intaglio and relief. Stone lithography, serigraphy and mixed media will be introduced. May be repeated up to 6 credits.

Prerequisite(s): ART 280, or consent of instructor.

ART 385. Intermediate Metals: Special Topics**3 Credits (2+4P)**

Intermediate Metals/Jewelry course focusing on the following topics: design and production, materiality and sculptural concern. Techniques may include casting, complex construction, forming, and mix media. Topics will be announced in the course schedule. Each topic may only be taken once. May be repeated up to 6 credits.

Prerequisite(s): ART 285.

ART 387. Exhibition Studies**3 Credits**

Exhibition theory through practice. Gallery operations and management: collecting, conversation, exhibiting, and public responsibility.

ART 390. Visual Culture of the 1960s**3 Credits**

Focus on major cultural trends and historical events in 1960's America. Offers analysis of art, films, and pop culture phenomena of the period.

Prerequisite(s): ART 295G, ART 296G, and ART 298.

ART 392. Visual Culture of the 1980s**3 Credits**

Focus on major cultural trends and historical events in 1980's America. Offers analysis of art, films, and pop culture phenomena of the period.

Prerequisite(s): ART 295G, ART 296G, and ART 298.

ART 394. Special Topics in Studio**3 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. No more than 9 credits toward a degree.

ART 401. Museum Conservation Techniques I**3 Credits (2+3P)**

Introduces the student to conservation theory and the basic principles of conservation for cultural objects. The course integrates the history, philosophy and technologies of art conservation with knowledge of the properties of materials used in conservation. The student will learn and develop conservation skills including learning about the most frequent kinds of deterioration that can occur in various types of art objects, symptoms and causes as well as preventative and restoration techniques. Although this course provides practical experience, it also seeks to provide a broad understanding of the field of conservation. This course also includes how to document the condition of an object during the conservation process. Crosslisted with: ART 501.

ART 402. Museum Conservation Techniques II**3 Credits (2+3P)**

Continues conservation theory and the basic principles of conservation for cultural objects. The course integrates the history, philosophy and technologies of art conservation with knowledge of the properties of materials used in conservation. The student will learn and develop conservation skills including learning about the most frequent kinds of deterioration that can occur in various types of art objects, symptoms and causes as well as preventative and restoration techniques. Although this course provides practical experience, it also seeks to provide a broad understanding of the field of conservation. Crosslisted with: ART 502.

Prerequisite(s): ART 401.

ART 403. Preventative Conservation/Collections Care**3 Credits**

Introduces the student on how to mitigate the deterioration and damage of cultural property in a museum setting through the formulation and implementation of policies and procedures. The course addresses most aspects of collections management and care for objects in storage, exhibitions and during transportation. Crosslisted with: ART 503.

ART 444. Art and Life in Renaissance Italy**3 Credits**

Examines how Italian Renaissance textual and visual culture offered Europe new ways of seeing and portraying itself. 1350-1550. Topics include: Florence, Venice, Rome, Leonardo, Michelangelo, titian, humanism, the Medici, and republican and courtly culture.

Prerequisite(s): ART 295G, ART 296G, and ART 298.

ART 450. Advanced Drawing and Painting: Special Topics**3-6 Credits (2-4+4P)**

Advanced drawing and painting course focusing on the following topics: Identity, Place, Spirituality, and Body. Topics will be announced in the course schedule. May be repeated up to 12 credits.

Prerequisite(s): 12 credits of ART 350.

ART 455. Advanced Graphic Design Special Topics**3-6 Credits (3-6)**

Advanced graphic design course focusing on the following topics: visual communication, system graphics, typography, portfolio preparation, art of the book and professional practice. Topics will be announced in the course schedule. Each topic may only be taken once. May be repeated up to 18 credits.

Prerequisite(s): 6 credits of ART 355.

ART 458. The New Mexico Studio of Design**3 Credits**

An advanced graphic design studio providing a design service for nonprofit community organizations. Client-based projects produced by students from concept to completion. May be repeated for a maximum of 6 credits.

Prerequisite(s): ART 355.

ART 460. Painting Workshop**3 Credits**

Media, materials and advanced technical problems of contemporary painters. May be taken up to 6 credits.

Prerequisite(s): ART 350 and ART 361.

ART 461. Painting Workshop II**3 Credits (2+4P)**

Advanced issues in contemporary painting. May be repeated for a maximum of 6 credits. Restricted to majors.

Prerequisite(s): ART 460.

ART 465. Advanced Sculpture Special Topics**3-6 Credits (2-4+4P)**

Thematic classes deepen students' knowledge of contemporary sculpture and extended media through a series of interpretive assignments that culminates in a unified body of work. Course topics include: "Artists' Maps", Installation Art/Land Art", "Sculpture and the 1960s", "Sculpture and the 1970's". Topics will be announced in the course schedule. May be repeated up to 18 credits.

Prerequisite(s): 3 credits of ART 365 or permission of the instructor.

ART 470. Advanced Digital Photography**3 Credits (2+4P)**

Advanced digital photography course addressing technique and production of photo media within the context of contemporary art. Course focuses on the following rotating topics: Temporality, Photo-installation and Video Art. Each topic may only be taken once. May be repeated up to 12 credits.

Prerequisite(s): ART 370, ART 373 or consent of instructor.

ART 473. Advanced Analog Photography**3 Credits (2+4P)**

Advanced photography course focused on skills and techniques of black and white film within the context of contemporary art. Course focuses on the following rotating topics: Large Format Tableau, Experimental Processes and Materials. May be repeated up to 12 credits.

Prerequisite(s): ART 370 and ART 373, or consent of instructor.

ART 474. Advanced Ceramics Design and Production**3-6 Credits (3-6)**

Advanced ceramics course focusing on the technical processes of throwing, prototyping, mold making, glaze calculation, and alternative firing. Discussions may also include issues of professional practice, marketing, and branding. May be repeated up to 6 credits.

Prerequisite(s): ART 374 and ART 375, or consent of instructor.

ART 475. Advanced Ceramics Sculptural Concerns**3-6 Credits (2-4+4P)**

Advanced ceramics course focusing on conceptual development as it relates the creation of a unified body of work. Topics may include discussions of advanced techniques, professional practices, and contemporary issues in ceramics. May be repeated up to 15 credits.

Prerequisite(s): ART 374 and ART 375, or consent of instructor.

ART 477. Independent Research Problems in Art History**1-9 Credits**

Advanced research on special problems to be conducted under supervision of art history faculty. May be taken up to 12 credits. Consent of instructor required.

Prerequisite(s): ART 295G, ART 296G, ART 298 and one 300 level art history course and consent of instructor.

ART 478. Seminar: Selected Topics in Art History**3 Credits**

Reading, research, and discussion of advanced problems. Topics will be announced in the course schedule. Each topic may be only taken once. Non-art/art history majors, contact instructor for consent. May be repeated up to 12 credits.

Prerequisite(s): ART 295G, ART 296G and ART 298, and one 300 level art history course.

ART 479. Art Theory, Criticism, and Historiography**3 Credits**

Theories and methodologies in art history and art criticism. May be repeated up to 3 credits.

Prerequisite(s): ART 295G, ART 296G, ART 298 and one 300 level art history course and consent of instructor.

ART 480. Special Topics in Printmaking**3-6 Credits (3-6)**

Special topics in printmaking. Emphasizing conceptual approaches to printmaking and development of individual content. Topics will be announced in the course schedule. May be repeated up to 18 credits.

Prerequisite(s): 6 credits of ART 380.

ART 485. Advanced Metals: Special Topics**3-6 Credits (2-4+4P)**

Advanced Metals/Jewelry course focusing on the following topics: conceptual development and personal aesthetic and style, professional practices, contemporary issues in Metals/Jewelry, and senior exhibition. Techniques may include enameling, coloring, historical processes, and digital technology. Topics will be announced in the course schedule. Each topic may only be taken once. May be repeated up to 18 credits.

Prerequisite(s): 6 credits of ART 385.

ART 490. Museum Conservation Internship**1-6 Credits (1-6)**

The goal of this internship is to provide a student with a practical learning experience in preventative conservation techniques and policies so that they can relate what they have learned in the classroom from ART 403 Preventative Conservation/Collections Care to applied situations. It will provide the student an opportunity to learn skills and knowledge needing in working with museum collections. Tasks and projects will be assigned by the instructor. 3 credits required for BFA in Museum Conservation. May be repeated up to 6 credits.

Prerequisite(s): ART 403.

ART 494. Special Topics in Studio**3 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. No more than 9 credits toward a degree.

ART 495. Undergraduate Studio Thesis**3-6 Credits (3-6)**

Special research and independent study leading to undergraduate thesis exhibition. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

ART 496. Fundamentals of Studio Management**1 Credit**

Advanced studio course designed to introduce students to the fundamentals of studio management. Includes training in proper tools use and maintenance; safety procedures; and practical experience with studio oversight. Concurrent registration in advanced level studio course of the same media area required. May be repeated for a maximum of 3 credits. Restricted to majors. Graded S/U.

Prerequisite: consent of instructor.

ART 497. Readings in Art History**3 Credits**

In-depth study of art historical writing. May be taken up to 12 credits. May be repeated up to 12 credits. Consent of Instructor required.

Prerequisite(s): ART 295G, ART 296G, ART 298 and one 300 level art history course.

ART 499. Problems in Studio Art**1-6 Credits (1-6)**

Individualized study in specialized studio areas not covered by other advanced courses. May be repeated up to 9 credits. Consent of Instructor required.

ART 500. Special Topics in Art History Advanced**3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite: graduate status.

ART 501. Museum Conservation Techniques I**3 Credits (2+3P)**

Introduces the student to conservation theory and the basic principles of conservation for cultural objects. The course integrates the history, philosophy and technologies of art conservation with knowledge of the properties of materials used in conservation. The student will learn and develop conservation skills including learning about the most frequent kinds of deterioration that can occur in various types of art objects, symptoms and causes as well as preventative and restoration techniques. Although this course provides practical experience, it also seeks to provide a broad understanding of the field of conservation. This course also includes how to document the condition of an object during the conservation process. May be repeated up to 3 credits. Crosslisted with: ART 401.

ART 502. Museum Conservation Techniques II**3 Credits (2+3P)**

Continues conservation theory and the basic principles of conservation for cultural objects. The course integrates the history, philosophy and technologies of art conservation with knowledge of the properties of materials used in conservation. The student will learn and develop conservation skills including learning about the most frequent kinds of deterioration that can occur in various types of art objects, symptoms and causes as well as preventative and restoration techniques. Although this course provides practical experience, it also seeks to provide a broad understanding of the field of conservation. Crosslisted with: ART 402.

Prerequisite(s): ART 501.

ART 503. Preventive Conservation/Collections Care**3 Credits**

Introduces the student on how to mitigate the deterioration and damage of cultural property in a museum setting through the formulation and implementation of policies and procedures. The course addresses most aspects of collections management and care for objects in storage, exhibitions and during transportation. Crosslisted with: ART 403.

ART 505. Medieval Art**3 Credits**

History of painting, stained glass, sculpture, architecture and manuscript illumination in Europe from the Early Christian period to the end of the Gothic period; taught with ART 305. Consent of instructor required.

Prerequisite(s): ART 295G; Graduate Standing.

ART 510. Advanced Native American Art**3 Credits**

Cross-cultural introduction to art of the prehistoric and historic native people of the North, Central, and South Americas. The artistic expression and the function of art considered in diverse cultural and environmental contexts.

Prerequisite: graduate standing.

ART 511. Art of China I: Neolithic to Song Dynasty**3 Credits**

Survey of the art of China from the neolithic period to the end of the Song dynasty. May be repeated up to 3 credits. Crosslisted with: ART 311.

Prerequisite(s): Graduate Standing.

ART 520. Art and Architecture in Pre-Columbian Mesoamerica**3 Credits**

Analysis of the art and culture of the Mesoamerican peoples before the arrival of Columbus in the New World. Includes an in-depth formal and historical analysis of architecture, sculpture, painting, pottery and metal works of Mixtec, Toltec, the Aztec, Maya, and other cultures and civilizations.

Prerequisite: graduate standing.

ART 521. Pre-Columbian Art and Architecture of the Andes**3 Credits**

Examines the arts and history of pre-Columbian Andean cultures in a cultural context. Analysis of their architecture, sculpture, pottery, jewelry, textiles, and featherwork.

Prerequisite: graduate standing.

ART 523. Italian Renaissance Art**3 Credits**

History of painting, sculpture and architecture in Italy from the 14th century to the end of the 16th century; taught with ART 323. Consent of instructor required.

Prerequisite(s): Graduate standing.

ART 525. Northern Renaissance Art**3 Credits**

History of painting, manuscript illumination and graphics in Northern Europe from the late 14th century to the mid-16th century; taught with ART 325. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): Graduate Standing.

ART 530. Modern Architecture**3 Credits**

Study of the architecture of the later eighteenth, nineteenth and twentieth centuries in the context of technological, social and stylistic changes. Focus on the works of Louis Sullivan, Frank Lloyd Wright, and European architects of the International Style, and the current reaction.

Prerequisite: graduate standing.

ART 533. Baroque Art and Architecture in Italy, Spain, and Hispanic Latin America**3 Credits**

Concentration on Italian and Spanish Baroque architecture, painting, and sculpture, as well as the art and architecture of Spanish vice-royalties of the Americas.

Prerequisite: graduate standing.

ART 537. American Art to 1900**3 Credits**

Covers the history of painting, sculpture, architecture, and other arts in the United States from the colonial period to 1900.

Prerequisite: graduate standing.

ART 539. Advanced History of Photography**3 Credits**

Course studies history, theory and use of photographic practices in art, especially from formal introduction of the process in 1839 to the present.

Prerequisite(s): ART 295G, ART 296G, and ART 297; Graduate standing.

ART 542. Twentieth-Century Art I, 1900-1945**3 Credits**

History of painting, sculpture, and other arts in Europe, the United States, and elsewhere from 1900 to 1945.

Prerequisite: graduate standing.

ART 543. Twentieth-Century Art II, 1945-Present**3 Credits**

History of painting, sculpture, and other arts in Europe, the United States, and elsewhere from 1945 to the present. Comprehensive research paper required.

Prerequisite: graduate standing.

ART 550. Drawing and Painting Workshop**3-6 Credits (2-4+4P)**

Graduate level drawing and painting course focusing on the development of concepts, expression and visual form. May be repeated up to 27 credits. Restricted to: ART majors.

ART 555. Graphic Design**3 Credits**

May be repeated up to 27 credits.

ART 560. Painting Workshop**3-9 Credits**

Advanced work with painting skills. Emphasis on critical analysis and development of body of work. Restricted to graduate art students. May be repeated up to 27 credits.

Prerequisite(s): Graduate standing.

ART 565. Sculpture Media**3-9 Credits**

May be repeated up to 27 credits.

ART 570. Advanced Introduction to Photography**3-9 Credits**

Graduate students develop and implement a research program using photographic media and processes. Outcomes and program developed in consultation with photography faculty. May be repeated up to 30 credits. Consent of Instructor required. **Prerequisite(s):** .

ART 573. Non-Silver Photographic Processes**3 Credits**

Advanced work with historic photographic processes. Emphasis on creation of an extended body of work. Taught with ART 373. Consent of instructor required. Restricted to ART majors.

Prerequisite(s): ART 270, ART 271, ART 274.

ART 575. Ceramic Arts**3-9 Credits**

May be repeated up to 27 credits.

ART 576. Museum/Gallery Research Internship**1-9 Credits**

Research internship in museum or gallery. Requirements determined by instructor in cooperation with supervising museum/gallery professional.

For art history credit. May be repeated for a maximum of 9 credits.

Prerequisite(s): graduate standing.

ART 577. Independent Research Problems in Art History**1-9 Credits**

Advanced research on special problems to be conducted under supervision of art history faculty. May be repeated for a maximum of 9 credits. Consent of instructor required.

Prerequisite(s): Graduate standing.

ART 578. Seminar: Selected Topics in Art History**3 Credits**

Reading, research, and discussion of advanced problems. May be repeated for a maximum of 9 credits.

Prerequisite(s): graduate standing.

ART 579. Graduate Seminar: Art Theory, Criticism, Historiography**3 Credits**

Theories and methodologies in art history and art criticism.

Prerequisite(s): graduate standing.

ART 580. Printmaking Workshop**3-6 Credits**

May be repeated for a maximum of 33 credits.

Prerequisite(s): Graduate standing.

ART 585. Metals and Jewelry Design**3-9 Credits**

May be repeated up to 27 credits.

ART 590. Visual Culture of the 1960s**3 Credits**

Focuses on major cultural trends and historical events in 1960s America. Offers analysis of art, films, and pop culture phenomena of the period. Fulfill all requirements of ART 390 plus graduate-level research. Graduate standing.

Prerequisite(s): Either ART 297, ART 343, or consent of instructor.

ART 591. Visual Culture of the 1970s**3 Credits**

Focuses on major cultural trends and historical events in 1970s America. Offers analysis of art, films, and pop culture phenomena of the period. Fulfill all requirements of ART 391 plus graduate-level research. Graduate standing.

Prerequisite(s): Either ART 297, ART 343, or consent of instructor.

ART 592. Visual Culture of the 1980s**3 Credits**

Focuses on major cultural trends and historical events in 1980s America. Offers analysis of art, films, and pop culture phenomena of the period. Fulfill all requirements of ART 392 plus graduate-level research. Graduate standing.

Prerequisite(s): Either ART 297, ART 343, or consent of instructor.

ART 595. Problems in Studio**1-6 Credits**

Individualized study in specialized studio areas not covered by other advanced courses. May be repeated up to 12 credits. Consent of Instructor required.

ART 596. Graduate Studio Seminar**3 Credits**

Explores issues in contemporary art making and their relationship to personal work. Presentation of research in oral, visual, and written form. May be repeated for a maximum of 18 credits. Restricted to majors.

Prerequisite(s): Graduate standing.

ART 597. Readings in Art History**3 Credits**

In-depth study of historical writing about art. May be repeated for a maximum of 9 credits.

Prerequisite(s): graduate standing.

ART 598. Studio Thesis**1-15 Credits**

Special research in studio, leading to an exhibition and written thesis statement.

ART 599. Art History Thesis**15 Credits**

Art history master's thesis research. May be repeated for unlimited credit. Restricted to masters level art history students. Consent of instructor required.

Prerequisite(s): Graduate standing.

ASTR-ASTRONOMY (ASTR)

ASTR 105G. The Planets**4 Credits (3+2P)**

Comparative study of the planets, moons, comets, and asteroids which comprise the solar system. Emphasis on geological and physical processes which shape the surfaces and atmospheres of the planets. Laboratory exercises include analysis of images returned by spacecraft. Intended for non-science majors, but some basic math required. This lecture/lab course satisfies the New Mexico Common Core Area III: Lab Sciences requirement

ASTR 110G. Introduction to Astronomy**4 Credits (3+2P)**

A survey of the universe. Observations, theories, and methods of modern astronomy. Topics include planets, stars and stellar systems, black holes and neutron stars, supernovas and gaseous nebulae, galaxies and quasars, and cosmology. Emphasis on physical principles involving gravity, light and optics (telescopes). Generally non-mathematical. Laboratory involves use of the campus observatory and exercises designed to experimentally illustrate principles of astronomy. This lecture/lab course satisfies the New Mexico Common Core Area III: Lab Sciences requirement.

ASTR 199. Introduction to Astronomy Lab, Special**1 Credit**

This lab-only listing exists only for students who may have transferred to NMSU having taken a lecture-only introductory astronomy class, to allow them to complete the lab requirement to fulfill the general education requirement. Consent of Instructor required. , at some other institution). Restricted to Las Cruces campus only.

Prerequisite(s): Must have passed Introduction to Astronomy lecture-only (e.g.

ASTR 301V. Revolutionary Ideas in Astronomy**3 Credits**

Examines recent fundamental scientific revolutions that have shaped our view of Earth and the universe. Topics in astronomy range from exoplanets to black holes to dark energy and raise questions about the very nature of how we use the scientific method to see the unseen, and how this shapes science research today.

Prerequisite(s): Any general education science course.

ASTR 305V. The Search for Life in the Universe**3 Credits**

Use of information from several of the sciences to explore the likelihood that life exists elsewhere in the universe. Subjects include an overview of historical ideas about the possibility of life elsewhere in the universe, the chemistry and biology of life on Earth, recent explorations for life within our solar system, and current search strategies for life in the universe and their scientific basis.

ASTR 308V. Into the Final Frontier**3 Credits**

Exploration of space: a brief review of the history of space flight, the Apollo program, joint U.S.-Soviet space missions, and unstaffed exploration of the planets. Emphasis on knowledge gained through these efforts. Includes new space initiatives. Same as HON 308V.

ASTR 330V. Planetary Exploration**3 Credits**

A current planetary exploration mission is studied within the context of the solar system. The data acquired and principles involved in executing the mission, as well as political and economic implications of planetary exploration, are examined. Same as HON 330V. Main campus only

ASTR 400. Undergraduate Research**1-3 Credits**

Supervised individual study or research. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

ASTR 401. Topics in Modern Astrophysics**3 Credits**

This course is designed for students interested in astrophysics who have some background in math and physics and want to learn about basic astrophysics and interesting current topics. The course will cover basic astrophysical concepts such as orbital mechanics, light, and radiative processes and transfer. These concepts will be applied to the discussion of exciting modern topics involving planets, exoplanets, stars, galaxies, and/or cosmology, with topical emphasis determined by the instructor.

Prerequisite(s): MATH 192G and (PHYS 213 or PHYS 215G).

ASTR 402. Introduction to Astronomical Observations and Techniques**3 Credits**

Designed for students interested in astrophysics who have some background in math and astronomy and want to learn about techniques for obtaining and analyzing astronomical data. This course will review the properties of light and discuss the process of experimental design. The course will describe basic observational tools such as telescopes and detectors. It will discuss how data is obtained, and how features of the detector and the Earth's atmosphere can be corrected for. Some topics in basic astronomical data analysis will be discussed, with topical emphasis determined by the instructor. Some simple data analysis projects will be assigned.

Prerequisite(s): MATH 191G and (PHYS 214 or PHYS 216G) and (ASTR 105, ASTR 110, or ASTR 401).

ASTR 405. Astronomy and Astrophysics I**3 Credits**

Application of physical principles to problems in modern astronomy. Emphasis on radiation mechanisms and radiation transfer in astronomical systems. No S/U grading. Same as ASTR 505 with less advanced work.

Prerequisite: consent of instructor.

ASTR 406. Stellar Dynamics and Hydrodynamics**3 Credits**

Undergraduate cross-listing of graduate class on basic stellar dynamics and principles of hydrodynamics. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

ASTR 435. Observational Techniques I**3 Credits**

Up-to-date introduction to modern observational astronomy. Includes computers, data analysis, optical telescopes, optical and infrared photometry, image processing, and detection. No S/U grading. Same as ASTR 535 with less advanced work.

Prerequisite: consent of instructor.

ASTR 500. Seminar**1 Credit**

Organized group study treating selected topics.

ASTR 505. Astronomy and Astrophysics I (f)**3 Credits**

Application of physical principles to problems in modern astronomy. Emphasis will be on radiation mechanisms and radiation transfer in astronomical systems.

Prerequisite: consent of instructor.

ASTR 506. Stellar Dynamics and Hydrodynamics**3 Credits**

Graduate level course on basic stellar dynamics and fundamentals of hydrodynamics.

ASTR 535. Observational Techniques I (f)**3 Credits**

Up-to-date introduction to modern observational astronomy in a two-semester sequence. Topics include: introduction to computers, error analysis in data, the different types of optical telescopes, and optical and infrared photometry, image processing, and detectors.

ASTR 536. Observational Techniques in Astronomy II (s)**3 Credits**

Sequel to ASTR 535. The second half of the course emphasizes observational techniques in spectroscopy, radio astronomy, and high energy astrophysics.

Prerequisite: ASTR 535.

ASTR 545. Stellar Spectroscopy**3 Credits**

This course covers the physics of stellar atmospheres with emphasis on using spectra as a diagnostic tool for understanding the properties of stars. Topics include spectral classification, radiative transfer, gas equilibrium physics, line and continuum opacities, adiabatic and superadiabatic convection, and extraction of observed quantities from spectra for deducing physical conditions of the source.

ASTR 555. Galaxies I**3 Credits**

Fundamentals of the properties of galaxies and the components that they are made of stars and stellar populations, gas and dust, central black holes, and dark matter. Introduction to basic concepts of galaxy formation.

ASTR 565. Stellar Interiors**3 Credits**

Internal constitutions of stars, computation of stellar models, and stellar evolution.

ASTR 575. Computational Astrophysics**3 Credits**

Scientific programming for astronomical applications. Explore key algorithms and standard techniques for astronomical data analysis. Topics may include pointers, data structures, dynamic memory allocation, least squares fitting, grid and iterative search methods, LCG random number generators, Monte Carlo simulations, numerical integration, and astronomical image and spectrum manipulation. Applications to real astronomical datasets are emphasized.

ASTR 598. Special Research Programs**1-6 Credits**

Individual investigations, either analytical or experimental.

ASTR 599. Master's Thesis**15 Credits**

Master's level research in astrophysics or observational astronomy.

ASTR 600. Pre-dissertation Research**1-15 Credits**

Research.

ASTR 605. Interstellar Medium**3 Credits**

Problems associated with gas and dust in the galaxy and with diffuse and planetary nebulae.

ASTR 610. Radio Astronomy**3 Credits**

Techniques and observations stressing the operational approach to measurement and how the observations are intimately interwoven throughout modern astrophysics.

ASTR 616. Galaxies II**3 Credits**

Advanced topics in galaxies. Includes a detailed description and understanding of the Milky Way and topics in galaxy formation and evolution.

ASTR 620. Planetary Science I**3 Credits**

Evaluation and analysis of observational data on solar system objects to determine their nature and physical conditions, with emphasis upon atmospheres (composition, structure, thermodynamics, evolution, etc.)

ASTR 621. Planetary Science II**3 Credits**

The physical processes involved in planetary system formation are addressed. Specific foci include molecular cloud collapse, disk processes, and competing theories of planet formation within disks. Additional topics to be discussed may include: the solar wind, planetary magnetic fields, planetary ring processes, and mineralogy.

ASTR 625. Cosmology**3 Credits**

Discussion of our current knowledge of the structure of the universe and current research methods. Topics include the distance scale, clustering of galaxies, large-scale structure, metrics, dark matter, and cosmological probes such as distant quasars, radio galaxies, and gravitational lenses.

ASTR 630. Methods of Statistical Analysis for Modern Astronomy**3 Credits**

Graduate class for students interested in applying statistical techniques to modern astrophysical data sets. Topics include a review of probability and probability distribution functions, implications of techniques for statistical inference, regression and multivariate analysis, data smoothing, data mining, survival analysis and time domain analysis. Applications to real astronomical data sets will be emphasized with all topics.

ASTR 670. Heliophysics**3 Credits**

Explore the Sun and its processes. the heliosphere, and its interactions with the planets. Topics include: A introductory description of space weather and its physics; energy interaction with the space environment; the quiet Sun and its interactions with planetary atmospheres (with an emphasis on Earth); Magnetohydrodynamics; frozen-in flux; the solar wind; magnetized fluid dynamics; the active Sun(flares and coronal mass ejections); the effects of Space Weather.

ASTR 698. Special Topics.**1-9 Credits**

Special topics.

ASTR 700. Doctoral Dissertation**15 Credits**

Dissertation.

AUTO-AUTOMOTIVE TECHNOLOGY (AUTO)

AUTO 102. Electrical Measuring Instruments**2 Credits (1+2P)**

Selection, operation, and care of electrical measuring instruments.

AUTO 103. Auto Mechanics Fundamentals**4 Credits (2+4P)**

Theory and operation of all areas of auto mechanics. Basic repair and maintenance operations.

AUTO 105. Welding**4 Credits (2+4P)**

Set-up and adjustment of oxyacetylene and arc welding equipment, identification of metals and rod application. Skill development in laying weld beads and different weld positions.

AUTO 111. Automotive Mechanics Basics**4 Credits**

Basic maintenance procedures of the major components of the automobile using service repair manuals, hand and power tools, precision measurement equipment, fasteners and chemicals. Restricted to: Community Colleges only.

AUTO 112. Basic Gasoline Engines**5 Credits (2+6P)**

Principles of gasoline engine operation. Identification, design, function of engine components; engine disassembly and reassembly; trouble shooting, and rebuilding heads.

AUTO 113. Automotive Electricity and Electronics PT I**4 Credits (2+4P)**

Topics include mastery of DC electricity, use of digital multimeters, troubleshooting electrical problems in starting, charging and accessory systems. Restricted to Community Colleges only.

AUTO 114. Automotive Electricity and Electronics PT II**4 Credits (2+4P)**

Advanced AC and DC automotive electronic circuits. Troubleshooting electronically controlled components including supplemental restraint systems and convenience accessories. Restricted to Community Colleges only.

AUTO 115. Automotive Engine Repair**5 Credits (2+6P)**

Principles of gasoline engine operation. Identification of engine parts, operation, and function. Disassembly and reassembly. Engine problem diagnoses (cooling system, lubrication system, engine noises). Restricted to Community Colleges only.

AUTO 117. Electronic Analysis and Tune-Up of Gasoline Engines**5 Credits (2+6P)**

Theory and operation of ignition and emission control systems and fuel system. Use of troubleshooting equipment and diagnostic equipment.

Prerequisite: AUTO 120 or consent of instructor.

AUTO 118. Technical Math for Mechanics**3 Credits (2+3P)**

Mathematical applications for the automotive trade.

AUTO 119. Manual Transmission/Clutch**5 Credits (2+6P)**

Manual transmission, transfer cases, and clutch operating principles. Students will diagnose problems, remove and replace, disassemble, repair, and assemble units.

AUTO 120. Electrical Systems**4 Credits (2+4P)**

Troubleshooting and repair of starters, alternators, and associated circuits. Reading electrical diagrams, diagnosis and repair of electrical accessories.

Prerequisite: consent of instructor.

AUTO 122. Automotive Brakes**4 Credits (2+4P)**

Focus is on theory, diagnosis, and service of drum, disc, and anti-lock braking systems, brake component machining, hydraulic component reconditioning, friction and hardware replacement. Restricted to Community Colleges only.

AUTO 124. Automotive Heating and Air Conditioning**4 Credits (2+4P)**

R12 and R134A air conditioning systems maintenance diagnosis and repair. R12 to R134A conversion procedures. Troubleshooting automatic temperature controls and leak detection. Restricted to Community Colleges only.

AUTO 125. Brakes**5 Credits (2+6P)**

Theory of operation, diagnosis, repair, and maintenance of disc and drum brakes; safety and use of special tools.

AUTO 126. Suspension, Steering, and Alignment**5 Credits (2+6P)**

Types of steering systems, suspension maintenance and repair, four-wheel alignment procedures.

AUTO 127. Basic Automatic Transmission**4 Credits (2+4P)**

Theory and operation of the automatic transmission; maintenance, troubleshooting, diagnosis, and repair of components.

AUTO 129. Automotive Steering and Suspension**4 Credits (2+4P)**

Diagnosis/service of suspension components including shocks, springs, ball joints, manual and power steering systems and four wheel alignment are some areas covered. Restricted to Community Colleges only.

AUTO 130. Introduction to Transportation Industry**3 Credits**

State and national traffic statutes that relate to the trucking industry. A Commercial Driver's License Learner's Permit will be obtained through successful completion of the course.

Prerequisites: Must be 18 years of age, have a current driver's license and consent of instructor.

AUTO 131. Class A CDL**3 Credits (1+4P)**

Instruction in how to perform proper pre-trip inspection; hands-on training with a tractor-trailer unit on the backing range and street driving to develop skills necessary to pass Class A DCL exam. Restricted to Community Colleges campuses only.

Prerequisite(s): Class A CDL restricted license (permit) and either restriction of D.O.T.

AUTO 132. Automotive Air-Conditioning and Heating Systems**4 Credits (2+4P)**

Theory and operation, reading schematic diagrams, troubleshooting, repair, and replacement operations performed.

AUTO 137. Fuel Systems and Emission Controls**4 Credits (2+4P)**

Covers theory and operation of fuel system and emission control. Troubleshooting, vacuum diagrams, overhaul, repair and adjustment of carburetion and fuel injection.

Prerequisites: AUTO 117 or consent of instructor.

AUTO 139. Automotive Computer Controls**4 Credits (2+4P)**

Same as OEPM 139.

AUTO 155. Bio-Diesel Fuels**5 Credits (2+6P)**

Covers theory and operation of Bio-Diesel fuel powered vehicles. Blends of bio-diesel and conventional hydrocarbon-based diesel products most commonly distributed for use in the retail diesel fuel marketplace will be discussed. Production, installation, services, and repair will be discussed in detail. Pre/ Restricted to: Community colleges.

Prerequisite(s): AUTO 107, AUTO 112, and AUTO 139.

Corequisite(s): AUTO 117 and AUTO 119.

AUTO 160. Hybrid Electric Vehicles**4 Credits (2+4P)**

Covers theory and operation of electrically powered vehicles. Troubleshooting, reading and interpretation of electrical diagrams will be discussed in full detail. Repair and operation procedures will also be covered. Pre/ Restricted to: Community colleges.

Prerequisite(s): AUTO 107, AUTO 112, and AUTO 139.

Corequisite(s): AUTO 117 & AUTO 119.

AUTO 161. Non-Structural Repair**4 Credits (2+4P)**

This basic auto body course is designed to develop the students understanding of general shop safety using hand tools, pneumatic tools and power tools. This course will also cover straightening fundamentals, plastic and composite repair, panel replacement, and adjustments.

Prerequisite(s): AUTO 190.

AUTO 162. Advanced Non-Structural Repair I**4 Credits (2+4P)**

This course will involve the students in all phases of minor non-structural collision damage repairs. It will encompass sheet metal repair, advanced panel replacement and alignment.

Prerequisite(s): AUTO 161.

AUTO 163. Advanced Non-Structural Repair II**4 Credits (2+4P)**

This course is a continuation of AUTO 162 with emphasis in all phases of minor non-structural damage repair. The student will be instructed in sheet metal repair and panel alignment as well as the R&I of automotive glass and related components.

Prerequisite(s): AUTO 162.

AUTO 164. Automotive Industry Collision Repair I**4 Credits (2+4P)**

This advanced course is a continuation of AUTO 161, 162, and 163. This course will incorporate all areas of major non-structural collision damage repair. Through practical application the student will learn how to effectively repair all heavy collision damage using current I-CAR repair standards and procedures.

Prerequisite(s): AUTO 163.

AUTO 165. Automotive Industry Collision Repair II**4 Credits (2+4P)**

This advanced course is a continuation of AUTO 164 with emphasis on time efficiency. This course will involve the student in all areas of major collision damage repair. The student will be exposed to all applicable I-CAR industry procedures and standards involved in sheet metal and composite panel repair.

Prerequisite(s): AUTO 164.

AUTO 172. Introduction to Automotive Refinishing**4 Credits (2+4P)**

This course is designed to incorporate all aspects of surface preparation, paint safety, refinishing materials, and refinishing fundamentals. Students will receive instructions for the application of acrylic enamel and base coat/clear coat refinishing systems.

AUTO 174. Intermediate Automotive Refinishing**4 Credits (2+4P)**

This course encompasses all areas of surface preparation, damage repair and refinishing procedures that are necessary for achieving a proper spot repair. Students will also be exposed to safe work habits in the refinishing area and correct automotive detailing procedures.

Prerequisite(s): AUTO 172.

AUTO 176. Automotive Color Adjustment & Blending**4 Credits (2+4P)**

This course will help develop the skills needed to match any type of paint. It will expose the student to color theory, color evaluation, color matching, and other color adjustment factors. The student will be instructed in multiple panel paint blending techniques as well.

Prerequisite(s): AUTO 174.

AUTO 178. Automotive Overall Refinishing**4 Credits (2+4P)**

This course encompasses all areas of automotive refinishing. This advanced course is a continuation of AUTO 176 with emphasis in achieving industry refinishing times and standards consistent with that of I-CAR. The student will be exposed to surface preparation and refinishing techniques involved with overall coat/clear coat refinishing system.

Prerequisite(s): AUTO 176.

AUTO 181. Frame and Structural Repair**4 Credits (2+4P)**

This course will involve the student in all areas of frame and structural damage repairs. Through theory and practical application, the student will learn how to diagnose and repair various types of damage include: mash, twist, sag, and side sway. This course will expose the students to safe work habits while using measuring and straightening equipment.

Prerequisite(s): AUTO 165.

AUTO 182. Structural Panel Replacement**4 Credits (2+4P)**

This course is a continuation of AUTO 181 with infancies in structural panel replacement. The student will be exposed to frame and unibody measuring equipment and their proper use in sectioning procedures. Through theory and practical application the student will learn how to ID structural components, properly separate spot welds, position and weld new body panels in place.

Prerequisite(s): AUTO 181.

AUTO 201. Engine Performance I**4 Credits (2+4P)**

Theory, function, service and analysis of engine related subsystems including ignition, fuel, starting, and charging systems. Emphasis is placed on diagnosis and operation of electronic engine control management systems. Restricted to Community Colleges only.

AUTO 203. Engine Performance II**4 Credits (2+4P)**

Study of engine management systems and emission control systems, their function and relationship to vehicle performance and air pollution. Emphasis is placed on the analysis and repair of non-compliant vehicles. Restricted to Community Colleges only.

AUTO 204. Engine Performance III**4 Credits (2+4P)**

Study of advanced level diagnostic test procedures and the equipment used to analyze OBD-II emission and drivability concerns. Use of Digital Storage Oscilloscopes, current ramping, Scan Tool analysis of 4 and 5 gas analyzers is mastered. Hybrid vehicles and the latest engine control systems are introduced. Restricted to Community Colleges only.

AUTO 205. Manual Drive Train and Axles**4 Credits (2+4P)**

Operation, diagnosis, maintenance, repair or replacement of manual transmissions, clutch assemblies, differentials, drivelines, axles, and manual transaxles. Restricted to Community Colleges only.

AUTO 206. Automatic Transmissions**5 Credits (2+6P)**

Operation, diagnosis, maintenance, and repair of automatic transmissions including rear wheel drive, front wheel drive, and electronically controlled transmissions and transaxles. Restricted to Community Colleges only.

AUTO 207. Power Train Removal and Replacement**4 Credits**

Course reviews the removal and installation of major automotive components including the engine assembly, transmission assembly, differential and four wheel drive units. Restricted to: Community Colleges only.

AUTO 208. Introduction to Alternative Fueled Vehicles**3 Credits**

Course will familiarize student with conditions that are resulting in the alternative fueled vehicle movement as well as the design and safety precautions unique to each alternative fuel. Propulsion systems covered include electric vehicles, bio-fueled vehicles, hybrid-electric vehicles and hydrogen powered vehicles, along with other emerging technologies as appropriate. Restricted to: Community Colleges only.

Prerequisite(s): AUTO 113 and AUTO 114.

AUTO 209. Hybrid Vehicle Service Techniques**3 Credits**

Designed for experienced automotive technicians, this course will cover safety procedures, design, operational overview and service techniques as well as minor diagnosis and repair of all classifications of hybrid-electric vehicles. Each student must possess legal Class 'O' high voltage gloves and liners to attend this class. Restricted to: Community Colleges only.

Prerequisite(s): AUTO 113 and AUTO 114.

AUTO 221. Cooperative Experience I**1-6 Credits**

Supervised cooperative work program. Student is employed in an approved occupation and supervised and rated by the employer and instructor. Student will meet in a weekly class. Graded S/U.

Prerequisite: consent of instructor.

AUTO 255. Special Problems in Automotive Technology**1-5 Credits**

Individual studies in areas directly related to automotive technologies. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

AUTO 295. Special Topics**1-6 Credits**

Topics to be announced in the Schedule of Classes.

AXED-AGRICULTURAL EXTN EDUC (AXED)

AXED 100. Introduction to Agricultural, Extension, and Technology Education**3 Credits**

Orientation to programs, philosophies, competencies and leadership skills needed by professionals in agricultural and technology education, extension education, agricultural communications, and related career opportunities in industry, governmental agencies, and international organizations.

AXED 105. Techniques in Agricultural Mechanization**3 Credits (2+2P)**

Development of competencies in agricultural mechanics including safety, tool identification, operation and maintenance of hand and power tools, cold metal, drafting, and plumbing procedures. Designed for any major wishing to improve mechanical skills needed in agriculturally related occupations in education and industry.

AXED 200. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 6 credits toward degree.

AXED 201G. Effective Leadership and Communication in Agricultural Organizations**3 Credits (2+2P)**

Theory and practice in leadership and communication for professionals who must work effectively in leadership and supervisory roles with people in agricultural business, industry, government agencies, and education. Course focuses on contemporary leadership theories. Oral communication skills in informative and persuasive speaking, parliamentary procedure, and for small groups are developed.

AXED 205. Metal Technology-Fabrication**3 Credits (2+4P)**

Processes and procedures of metal fusion, including gas and electric welding techniques and safety. Designed for any major wishing to improve mechanical skills needed in agriculturally related occupations in education and industry.

AXED 230. Early Field-Based Experience in Extension and Industry**2 Credits (2)**

First Hand view of the roles of professional educators through field experiences with Cooperative Extension or other government agencies. Includes 4 weeks of classroom instruction and 30 hours of observation in a work setting. Consent of Instructor required. Restricted to Las Cruces campus only.

AXED 232. Early Field-Based Experience in Agricultural and Technology Education**2 Credits**

First-hand view of the roles of professional educators through field experiences in a secondary agricultural or technology education setting. Includes 4 weeks of classroom instruction and 30 hours of observations in a classroom setting. Consent of Instructor required.

AXED 240. Introduction to Agricultural Communication**3 Credits**

Students will learn about the history and theories of agricultural communications, be introduced to the degree program, explore careers in the field, and examine the role of media in agricultural communications

AXED 300. Special Topics**1-4 Credits**

Course addresses specific subjects and issues as identified by department. Topics and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 6 credits may be applied to a degree.

AXED 303. Small Engine Technology**3 Credits (2+2P)**

Development of competencies in small gasoline engines; theory, operation, design, maintenance and safety. Designed for any major wishing to improve mechanical skills needed in agriculturally related occupations in education and industry.

AXED 331. Agricultural Structures**3 Credits (2+3P)**

Selection and use of agricultural building materials. Design, construction, and maintenance of agricultural structures. Development of competencies in carpentry, concrete, electricity, masonry, and safety. Designed for any major wishing to improve mechanical skills needed in agriculturally related occupations in education and industry.

**AXED 348. Advanced Technology in the Agricultural Mechanization
3 Credits (2+3P)**

Students will construct a project in the area of agricultural mechanization under the direction of instructor. Project must be completed within a semester and of sufficient complexity for 3 credits.

Prerequisite(s): AXED 105 and 205 or consent of instructor.

AXED 360. Agricultural Communications**3 Credits**

Principles and practical experience in news writing, radio production, newsletter design, public meeting presentations, video productions, graphics, and public relations activities, especially as related to the fields of agriculture and family and consumer sciences.

AXED 380. Philosophy and Methods of Contests**3 Credits**

Covers the roles that career development events (contests) play in agricultural and technology education and in extension programs. Topics include competition and cooperation, winning and losing, ethics, use of community resources, and academic and employability skills taught through contests. Coaching as a teaching method is introduced and expanded. Students will assist with the coordination of various career development events. May be repeated up to 3 credits.

AXED 400. The Diffusion and Adoption of Agricultural Innovations**3 Credits**

Factors that influence the rates of diffusion and adoption of innovations. Consequences of adopting or rejecting innovations. Processes by which change agents influence introduction and adoption of innovations. Same as AXED 500.

AXED 415. Youth Program Development and Management**3 Credits**

Designed for professionals involved in youth group activities. Basic concepts in planning, conducting, and managing educational youth programs in a variety of organizations.

AXED 430. Teaching Adults in Nonformal Settings**3 Credits**

The adult and postsecondary learner; adult learning styles and principles; use of community resources and problem-solving techniques; and learning strategies for adults in formal and nonformal education.

AXED 436. Keys for Agricultural and Rural Development**3 Credits**

Introduction to concepts of development, the process of change, key factors that contribute to agricultural and rural development in a community, and strategies employed to effect change with implications for international students or domestic students planning to work internationally.

AXED 443. Curriculum Development and Assessment in Agricultural Education**3 Credits**

This course prepares students to develop curriculum, design lessons, and prepare appropriate assessments in an agricultural education setting. An emphasis will be placed on the developing curriculum using the currently established resources that are available to agriculture teachers. Restricted to: AXED majors.

Prerequisite(s): 2.5 GPA.

**AXED 444. Planning and Methods in Nonformal Education
3 Credits**

Identifying trends and resources of a community and planning community-based extension and nonformal education programs. Preliminary methods for teaching and evaluating nonformal education programs.

AXED 445. Developing Excellent Programs in Career and Technical Education**3 Credits**

Students learn to develop excellence in the three components of a successful secondary school program in career and technical education: classroom and laboratory instruction, career and technical student organizations, and career development activities. Community-based program planning, utilizing partners, program marketing, and professional development are addressed as strategies for achieving excellence. Methods of obtaining financing and maintaining accountability for the program are discussed.

**AXED 446. Methods for Teaching Agricultural and Technology Education
3 Credits**

Methods of instruction and presentation, selection of teaching aids and support materials, classroom management, development of a complete educational program, and microteaching experiences. Restricted to AXED Majors

Prerequisite: GPA of 2.5 or above.

**AXED 447. Directed Teaching in Agricultural or Technology Education
15 Credits**

Semester-long off-campus professional experience in directed teaching and observation provided in selected centers under secondary agricultural or technology education supervising teachers. Consent of Instructor required. Restricted to: AXED majors.

Prerequisite(s): AXED 445, 446 and consent of instructor.

**AXED 448. Directed Teaching in Extension Education
3-12 Credits (3-12)**

Four-to-fourteen-week, professional experiences in directed teaching and observation provided in cooperative extension at the county, regional, or state level. Consent of instructor required.

AXED 449. Directed Field Experience in Agricultural or Technology Education**3-12 Credits (3-12)**

Four-to-fourteen-week, supervised learning experience in an approved teaching setting with application to educational, agricultural, technological, communications, public relations, or environmental practices. Consent of instructor required.

**AXED 456. Introduction to Research Methods
3 Credits**

Introduction to research design and methodology in education and behavioral sciences. Overview of common research designs and data collection strategies. Prepares students to critique published research and understand basic skills including hypothesis development and conducting a literature search.

Prerequisite: junior standing.

**AXED 460. Methods in Career and Technical Laboratory Instruction
2 Credits**

For students planning to teach agricultural or technology education at a secondary or postsecondary level. Focus on planning, delivering, and evaluating instruction in laboratories; and on CPR, first aid, and NCCER certifications. Laboratory safety and tool, equipment, and laboratory management systems are also emphasized. Restricted to AXED Majors.

AXED 466V. John Muir: Lessons in Sustainability**3 Credits**

This course examines the life of John Muir in the context of sustainability. Muir was a farmer, inventor, explorer, botanist, glaciologist, conservationist, and noted nature author. He was influential in the National Parks movement and in starting the Sierra Club. Living in the natural world influences his faith and philosophy. By examining his life and the themes that shaped it, students will develop an understanding of what it means to live sustainably and to contribute beyond their personal lives to a sustainable past.

AXED 475. Leadership On Agricultural and Natural Resource Issues**3 Credits**

Investigates leadership concepts and group dynamics as they relate to a changing world and complex agricultural and natural resource issues. Topics include emotional intelligence, leading change, political leadership, facilitating agreement, team building, and managing conflict in agricultural and natural resource settings.

AXED 480. International Agricultural Development**3 Credits**

Introduction to Agricultural topics (products, people, environment, culture, etc) that affect international development. Topics provide students with awareness, knowledge and understanding of teaching, research and service opportunities for those seeking experience or careers in international agricultural development. Taught with AXED 580.

AXED 484. Methods of Teaching Biological, Earth and Physical Sciences in Agriculture**3 Credits**

Students learn to set up and teach in a modular agriscience laboratory, utilizing a variety of technologies. Modules covered focus on incorporating biological, earth and physical sciences into agricultural instruction and may include: Tissue culture, animal anatomy, hydroponics microscopy, electrophoresis, microbiology, soils and plant nutrients, water quality, water systems, entomology, integrated pest management, and renewable energy applications. Students develop their own modules and/or experiments. May be repeated up to 3 credits.

AXED 486. Effective Management of Volunteer Programs**3 Credits**

For individuals currently involved in, or interested in being involved in, the management and supervision of volunteer programs. Emphasis on practical application, utilizing a research and academic base. Explores the roles, functions, and tasks of volunteers and managers of volunteers including recruitment, orientation and training, supervision, evaluation, recognition and retention.

AXED 488. 4-H Youth Development**1 Credit**

On-line course explores 4-H Youth Development as an integral part of the Cooperative Extension Service. Topics to be addressed include mission, philosophy, delivery modes, audiences and partnerships. Course is relevant for anyone interested in pursuing a career in Cooperative Extension.

AXED 489. The FFA Organization: An Overview**1 Credit**

Online course addressing the history, mission, philosophy and structure of the New Mexico and National FFA Organizations and their relationship to supervised agriculture experiences and the agricultural education curriculum. Course is relevant for anyone interested in pursuing a career in agricultural education.

AXED 490. Independent Study in Agricultural, Extension, or Technology Education**1-3 Credits**

Specific subjects are agreed upon by the student and instructor. May be repeated for a maximum of 6 credits.

Prerequisites: junior or senior standing and consent of instructor.

AXED 499. Undergraduate Research**1-4 Credits**

Research experience in agricultural, extension, and technology education with applications to selected issues and problems.

Prerequisites: consent of instructor.

AXED 500. The Diffusion and Adoption of Agricultural Innovations**3 Credits**

Factors that influence rates of diffusion and adoption of innovations. Consequences of adopting or rejecting innovations. Processes by which change agents influence introduction and adoption of innovations. Taught with AXED 400 with differential assignments for graduate students.

AXED 515. Youth Program Development and Management**3 Credits**

Designed for professionals involved in youth group activities. Basic concepts in planning, conducting, and managing educational youth programs in a variety of organizations. Same as AXED 415 with differentiated assignments for graduate students.

AXED 525. Graduate Teaching Methods**3 Credits**

Examines the teaching and learning process, emphasizing the use of appropriate methods for teaching career and technical education subjects to youth or adults in formal and nonformal educational settings. Includes principles of teaching and learning styles, levels of cognition, syllabus development, lesson planning, teaching using a variety of methods, and evaluating students. For students who have no prior education in teaching methods.

AXED 530. Teaching Adults in Nonformal Settings**3 Credits**

The adult and postsecondary learner; adult learning styles and principles; use of community resources and problem-solving techniques; and learning strategies for adults in formal and nonformal education. Same as AXED 430 with differentiated assignments for graduate students.

AXED 536. Keys for Agricultural and Rural Development**3 Credits**

Introduction to concepts of development, the process of change, key factors that contribute to agricultural and rural development in a community, and strategies employed to effect change with implications for international students or domestic students planning to work internationally.

AXED 543. Curriculum Development and Assessment in Agricultural Education**3 Credits**

This course prepares students to develop curriculum, design lessons, and prepare appropriate assessments in an agricultural education setting. An emphasis will be placed on the developing curriculum using the currently established resources that are available to agriculture teachers. Restricted to: AXED majors.

Prerequisite(s): 2.5 GPA.

AXED 544. Planning and Methods in Nonformal Education**3 Credits**

Identifying trends and resources of a community and planning community-based extension and nonformal education programs. Preliminary methods for teaching and evaluating nonformal education programs. Same as AXED 444 with differentiated assignments for graduate students.

AXED 545. Developing Excellent Programs in Career and Technical Education**3 Credits**

Students learn to develop excellence in the three components of a successful secondary school program in career and technical education: classroom and laboratory instruction, career and technical student organizations, and career development activities. Community-based program planning, utilizing partners, program marketing, and professional development are addressed as strategies for achieving excellence. Methods of obtaining financing and maintaining accountability of the program are discussed. Same as AXED 445 with differentiated assignments for graduate students.

AXED 546. Methods for Teaching Agricultural and Technology Education**3 Credits**

Methods of instruction and presentation, selection of teaching aids and support materials, classroom management, development of a complete educational program, and microteaching experiences. Same as AXED 446. Restricted to AXED Majors

Prerequisites: GPA of 3.0 or above.

AXED 547. Directed Teaching in Agricultural or Technology Education**4-9 Credits (4-9)**

Semester-long off-campus professional experience in directed teaching and observation provided in selected centers under secondary agricultural and technology supervising teachers. Consent of Instructor required. Restricted to: AXED majors.

Prerequisite(s): A teaching methods class and consent of instructor.

AXED 548. Directed Teaching in Extension Education**4-9 Credits (4-9)**

Four- to fourteen-week professional experiences in directed teaching and observation provided in cooperative extension at the county, regional, or state level. Same as AXED 448 with reduced credit hours for graduate students. Restricted to majors. Main campus only.

Prerequisite: consent of instructor.

AXED 549. Directed Field Experience in Agricultural or Technology Education**4-9 Credits (4+9P)**

A four-to-fourteen-week supervised learning experience in an approved teaching setting with application to educational, agricultural, technological, communications, public relations, or environmental practices. Same as AXED 449 with reduced credit hours for graduate students. Restricted to majors. Main campus only.

Prerequisite: consent of instructor.

AXED 556. Research Methods**3 Credits**

Students learn the research process as it is applied to solving problems in the behavioral sciences. Prepares students to conduct and critique research and to diffuse research findings. Implications, applications, and ethics of research also stressed. Students develop a research proposal for a problem of their choice. Same as FCSC 556.

AXED 565. New Mexico Water Issues**3 Credits**

Designed for agricultural and natural resource professionals who must educate others or provide leadership on complex water issues in New Mexico. Students will travel to four distinct geographic and cultural regions of the state and study water policies, issues, and delivery technologies in each region. Specific areas covered will be determined by resource professionals who will present past, current and future issues involved in the distribution of water. Urban impacts on water use will also be investigated.

AXED 571. Data Collection and Analysis**3 Credits**

Introduction to basic concepts of data collection and analysis. Interpretations from observational studies and controlled experiments. Roles of descriptive and inferential statistics in a complete data analysis. Mean, median, standard deviation, and graphical summaries of data. Correlation and simple regression. One- and two-sample tests and confidence intervals. Chi-square tests and basic analysis of variance. Competency in arithmetic and algebra required. An undergraduate statistics course recommended.

AXED 575. Leadership on Agricultural and Natural Resource Issues**3 Credits**

Investigates leadership concepts and group dynamics as they relate to a changing world and complex agricultural and natural resource issues. Topics include emotional intelligence, leading change, political leadership, facilitating agreement, team building, and managing conflict in agricultural and natural resource settings. Taught with AXED 475 with differential assignments for graduate students.

AXED 580. International Agricultural Development**3 Credits**

Introduction to agricultural topics (products, people, environment, culture, etc.) that affect international development. Topics provide students with awareness, knowledge and understanding of teaching, research, and service opportunities for those seeking experience or careers in international agricultural development and education. Taught with AXED 480.

AXED 586. Effective Management of Volunteer Programs**3 Credits**

For individuals currently involved in, or interested in being involved in, the management and supervision of volunteer programs. Emphasis on practical application, utilizing a research and academic base. Explores the roles, functions, and tasks of volunteers and managers of volunteers including recruitment, orientation and training, supervision, evaluation, recognition and retention. Taught with AXED 486 with differentiated assignments for graduate students.

AXED 590. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 6 credits toward degree.

AXED 594. Workshops in Agricultural, Extension, and Technology Education**1-3 Credits**

Workshop procedures applied to current trends in agricultural, extension, and technology education. Maximum of 7 credits toward a degree.

AXED 595. Internship/Cooperative Experience**1-6 Credits**

Supervised professional on-the-job learning experience. Maximum of 6 credits toward a degree.

Prerequisite: Consent of instructor.

AXED 598. Creative Component**1-4 Credits**

For nonthesis program. Individual investigations or projects, either qualitative or quantitative studies. Maximum of 6 credits toward a degree.

Prerequisite: consent of instructor.

AXED 599. Master's Thesis**1-6 Credits**

Thesis.

B A-BUSINESS ADMINISTRATION (B A)

B A 104. Introduction to Business**3 Credits**

Survey and integration of functions in business organizations within their social and economic environment. Community Colleges only.

B A 105. Special Topics**1-3 Credits**

Current topics in business and economics.

B A 202. Small Business Enterprise**3 Credits**

Appraisal of business functions within the framework of a small business organization.

B A 291. Business Administration and Economics Internship and Cooperative Education I**1-3 Credits**

Introduction and applications of the principles of business administration and economics. Registration in one course allowed per co-op work phase; a minimum of 12 work weeks is required. Open only to students in the College of Business. Option of S/U or a grade. The amount of academic credit (1-3 cr.) will be determined by the academic experience, and not by the work experience.

B A 305. Leadership Training for COB Ambassadors**1 Credit**

Leadership development for volunteers serving as COB student ambassadors, focusing on COB undergraduate business degree programs, NMSU student services, public speaking and public relations.

B A 391. Business Administration and Economics Internship and Cooperative Education II**1-3 Credits**

Applications of the principles of business administration and economics. Registration in one course allowed per co-op work phase; a minimum of 12 work weeks is required. Open only to students in the College of Business. Option of S/U or a grade. The amount of academic credit (1-3 cr.) will be determined by the academic experience and not by the work experience.

B A 490. Selected Topics**3 Credits**

Prerequisites vary according to the seminar being offered.

B A 498. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with the prior approval of the department head. A maximum of 3 credits may be earned.

Prerequisite: junior or above standing and consent of instructor.

B A 500. Macroeconomic Essentials**1 Credit**

Macroeconomic theory and public policy, national income concepts, unemployment, inflation, economic growth and international payment problems. Restricted to: MBA Major majors majors.

B A 501. Quantitative Tools for the MBA**1 Credit**

An overview of critical topics in math and statistics that will provide a quantitative foundation for students entering the Master of Business Administration program. Admission to the MBA program.

B A 550. Special Topics**3 Credits**

Interdisciplinary seminar in selected current business topics.

Prerequisite(s): Prerequisites vary according to the seminar being offered.

B A 590. Professional Paper/Presentation**3 Credits**

Paper written in close coordination with sponsoring professor and presented near the end of the student's final semester in the M.B.A. program. The paper will consist of a professional business report, a case study of a business or organization or a research report. Restricted to: MBA majors.

Prerequisite(s): Minimum of 3.0 average in: ACCT 503, BLAW 502, FIN 503, and MKTG 503 or AECC 551.

B A 598. Special Research Programs**1-3 Credits**

Individual investigations either analytical or experimental. A maximum of 3 credits may be earned.

Prerequisite: consent of instructor.

B A 599. Master's Thesis**15 Credits**

Thesis.

BCHE-BIOCHEMISTRY (BCHE)

BCHE 140. Introduction to Biochemistry**1 Credit**

A description of the nature of inquiry in biochemistry, especially with respect to the interaction of chemistry and biology. Both historical development and topics of current interest will be discussed. Graded S/U.

BCHE 241. Introduction to Research in Biochemistry**1-3 Credits**

Techniques and procedures of biochemical research. May be repeated for a maximum of 3 credits.

Prerequisites: 8 credits of chemistry and 3.0 GPA in chemistry.

BCHE 341. Survey of Biochemistry**4 Credits (3+3P)**

Basic principles of biochemical processes and the structure/function of the major classes of biomolecules, with introductions to metabolism and the central dogma of biochemistry. The chemical and biological properties of major biomolecules (DNA, proteins,

Prerequisite(s): C or better in CHEM 211 or CHEM 313.

BCHE 395. Biochemistry I**3 Credits**

Principles governing chemistry and physics of life processes with emphasis on the relationships between molecular structure and cell function. Basic principles of biochemical processes, enzymology, and the structure/function of the major classes of biomolecules with introductions to metabolism. Introduction to catabolic metabolism.

Prerequisite(s): C or better in CHEM 314.

BCHE 396. Biochemistry II**3 Credits**

Introduction to anabolic metabolism and hormonal regulation. Biochemical principles of the mechanism and regulation of replication, transcription, recombination and translation in prokaryotes and eukaryotes. Introduction to DNA-based information technology. Taught with BCHE 396 H.

Prerequisite(s): C or better in BCHE 395.

BCHE 396 H. Biochemistry II Honors**3 Credits**

Taught with BCHE 396 with additional work required.

BCHE 397. Experimental Biochemistry Laboratory**3 Credits**

Introduction to fundamental techniques used to explore structure and function of biological macromolecules such as proteins, carbohydrates, lipids, and nucleic acid. Course covers analyzing and reporting experimental data; enzymology; quantitative methods to determine biological molecules; basic principles of electrophoresis, chromatography, and spectroscopic immunochemistry.

Prerequisite: C or better in BCHE 395.

Corequisite: BCHE 396.

BCHE 432. Physical Biochemistry**3 Credits**

This course focuses on modern Biophysical techniques used in protein and nucleic acid research. Topics are covered in some detail at the theoretical level. The course content is delivered entirely by podcast. Podcast contributions are from several different faculty from within their particular area(s) of expertise. Topics covered include (but are not limited to): biomolecular NMR, atomic force microscopy, light scattering, circular dichroism, ultracentrifugation, isothermal titration calorimetry, positron emission tomography, computerized tomography, ultrasound, functional MRI, protein fluorescence, mass spec/ proteomics, protein molecular dynamics simulations, and X-ray diffraction. Course credit qualifies for minor degree in chemistry as a physical-analytical chemistry emphasis. CHEM 431, or CHEM 433.

Prerequisite: One semester of undergraduate physical chemistry, e.g.

BCHE 440. Biochemistry Seminar**1 Credit**

Introduction to current literature in biochemistry and molecular biology. Selected topics in the field will be presented by the faculty. Students will present written and oral reports from literature searches. Restricted to: BCHE majors.

Prerequisite(s): BCHE 395.

BCHE 441. Advanced Research in Biochemistry**1-3 Credits**

Investigation of biochemical problems and the development of special techniques. May be repeated for a maximum of 3 credits.

Prerequisites: consent of instructor, 16 credits of chemistry and 3.0 GPA in chemistry for nonmajors.

BCHE 446. Biochemistry III**3 Credits**

Intermediary metabolism of carbohydrates, lipids, amino acids, and nucleic acids. Metabolic pathways discussed with emphasis on biochemical regulation and mechanistic, structural, functional, and evolutionary basis for existence.

Prerequisite(s): BCHE 395 and either BCHE 396 or consent of instructor.

BCHE 451. Special Topics**1-3 Credits**

Same as CHEM 451. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

BCHE 455. Independent Studies**1-3 Credits**

Independent studies directed by consulting faculty.

Prerequisite: consent of instructor.

BCHE 494. Biochemical Genetics Laboratory**3 Credits (1.25+6P)**

Laboratory techniques required for experimentation with recombinant DNA such as nucleic acid isolation and purification, polymerase chain reaction (PCR), sequence analysis, and directed mutagenesis using genetic material from both prokaryotic and eukaryotic organisms. Consent of Instructor required.

Prerequisite(s): C or better in BCHE 395 and BCHE 396 or GENE 315, and consent of instructor.

BCHE 540. Seminar in Biochemistry**1 Credit**

Formal seminar presentation in current topics in biochemical research. May be repeated for a maximum of 3 credits.

BCHE 542. Biochemistry I**3 Credits**

Relationship between macromolecular structure and function. Basic enzymology. Energy metabolism.

Prerequisite(s): CHEM 314 and CHEM 431 or CHEM 433; or BCHE 395 or equivalent.

BCHE 545. Molecular and Biochemical Genetics**3 Credits**

An accelerated treatment of the molecular basis of gene expression. Discussion of chemical, enzymological, and genetic techniques of molecular biology. Same as BIOL 545.

Prerequisite: BCHE 542 or equivalent.

BCHE 546. Biochemistry II**3 Credits**

Intermediary metabolism: catabolic and anabolic pathways of carbohydrates, lipids, amino acids, and nucleic acids, including their regulation.

Prerequisite: BCHE 542 or BCHE 395 with consent of instructor.

BCHE 590. Discussions in Biochemistry**1 Credit**

Current research problems in biochemistry. May be repeated for a maximum of 6 credits. S/U Grading (S/U, Audit).

BCHE 598. Special Research Programs**1-3 Credits**

May be repeated for a maximum of 6 credits. Same as CHEM 598. Graded S/U.

BCHE 599. Master's Thesis**15 Credits**

May be repeated for a maximum of 6 credits. Same as CHEM 599.

BCHE 600. Research**1-15 Credits**

May be repeated for a maximum of 20 credits. PR/U grading. Same as CHEM 600.

BCHE 645. Nucleic Acid Metabolism**3 Credits**

Study of the enzymology of proteins that act on nucleic acids as well as the effect of DNA and RNA structure on metabolic processes. Taught with BCHE 451.

Prerequisite(s): 'C' or better in BCHE 395 or BCHE 542.

BCHE 647. Physical Biochemistry**3 Credits**

Fundamental applications of physical chemistry to the investigation of biological metabolites and biological macromolecules, including proteins, oligo-nucleotides, and molecular arrays with an emphasis on understanding biological functions based on chemical structures. Taught with BCHE 451.

Prerequisite(s): 'C' or better in CHEM 431 or CHEM 433 or BCHE 542.

BCHE 649. Topics in Biochemistry**1-3 Credits**

Selected topics of current interest designated by title and credit. May be repeated for a maximum of 3 credits.

BCHE 650. Advanced Seminar**1 Credit**

Discussion of biochemical research in progress that relates to a doctoral candidate's thesis research. Intended for students who have earned a master's degree or the equivalent and has made significant research progress for preparation of the doctoral dissertation. May be repeated for a maximum of 3 credits.

BCHE 700. Doctoral Dissertation**20 Credits**

May be repeated for a maximum of 20 credits. Graded PR/U. Same as CHEM 700.

BCIS-BUSINESS COMPUTER SYSTEMS (BCIS)

BCIS 110. Introduction to Computerized Information Systems**3 Credits**

Computerized information systems, their economic, and social implications. Introduction to microcomputer hardware, personal productivity software, and communications.

BCIS 322. Advanced Object-Oriented Programming**3 Credits**

In-depth exposure to object-oriented programming techniques and preliminary enterprise-level programming.

Prerequisite: C- or better in BCIS 222.

BCIS 338. Business Information Systems I**3 Credits**

Application, design and use of computerized information systems in business environment.

Prerequisite(s): BCIS 110G or C S 110G or consent of instructor.

BCIS 350. Information Systems Analysis and Design**3 Credits**

An introduction to the analysis and design of secure information systems.

Prerequisite(s): Concurrently with BCIS 338 or consent of instructor.

BCIS 450. Systems Design, Development and Implementation**3 Credits**

Design, development and implementation of business information processing systems. Includes maintenance, evaluation and system management considerations.

Prerequisite: C- or better in BCIS 350.

BCIS 455. Design of On-Line Business Systems**3 Credits**

Covers analysis, design, and development of on-line, real-time computerized business-information systems.

Prerequisite: C- or better in BCIS 350; and BCIS 322 or concurrent enrollment or consent of instructor.

BCIS 475. Database Management Systems**3 Credits**

Design, development, and use of database management systems in the business environment.

Prerequisite(s): BCIS 338 or consent of instructor.

BCIS 480. E-Commerce Security**3 Credits**

Introduction to securing network-based applications from internal and external threats. Fundamentals of network security, including TCP/IP, firewalls, intrusion detection, and vulnerability.

Prerequisite(s): BCIS 338 or consent of instructor.

BCIS 482. Management of Information Security**3 Credits**

Provides management overview of information security and thorough examination of administration of information security. Surveys field of information security including planning, policy and programs, protection and people relative to information security.

Prerequisite(s): BCIS 338 or consent of instructor.

BCIS 485. Enterprise Resource Planning**3 Credits**

This course covers concepts in enterprise resource planning (ERP). Topics include how ERP integrates business processes across functional areas—such as the procurement process and the sales order process—and how businesses use ERP information systems in day-to-day operations as well as for performance monitoring. SAP R/3 software will be used in several hands-on examples of ERP software as a real-world example of an ERP system.

Prerequisite(s): C- or better in BCIS 338 or BCIS 350 or ACCT 351.

BCIS 490. Selected Topics**1-3 Credits**

Current topics in business systems analysis. Consent of Instructor required.

BCIS 495. Enterprise Information Portals**3 Credits**

Enterprise information portal (EIP) is a framework for integrating information, people and processes across organizational boundaries using web-based technologies. In this class, you will explore the wide range of options (EIP's) (e.g. SAP Netweaver Portal) provided to integrate ERP solutions, third-party applications, legacy systems, databases, unstructured documents, internal and external Web content, and collaboration tools. Taught with BCIS 565.

Prerequisite(s): BCIS 485.

BCIS 498. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with prior approval of the department head. May be repeated for a maximum of 3 credits.

Prerequisites: junior or above standing and consent of instructor.

BCIS 502. Business Information Systems**3 Credits**

Analysis of information systems as integral parts of business organizations, including the responsibility of management to understand their capabilities and uses in handling the organization's information flow and providing appropriate information for decision making.

Prerequisite: graduate students only.

BCIS 550. Information Systems Analysis and Design**3 Credits**

Information systems development methodologies and the system life cycle. Justifying and managing systems development projects. Taught with BCIS 350 with differentiated assignments for graduate students.

Prerequisite(s): Graduate Students Only.

BCIS 575. Database Management Systems**3 Credits**

Design, development, and use of database management systems in the business environment. Taught with BCIS 475 with differentiated assignments for graduate students. Consent of Instructor required.

Prerequisite(s): BCIS 350.

BCIS 580. E-Commerce Security**3 Credits**

Introduction to securing network-based applications from both internal and external threats. Fundamentals of network security including TCP/IP, firewalls, intrusion detection and vulnerability discussed. Not open to students who have taken BCIS 480. Taught with BCIS 480 with differentiated assignments for graduate students. No S/U or audit option.

Prerequisite(s): C- or better in BCIS 460 or consent of instructor.

BCIS 582. Management of Information Security**3 Credits**

Provides management overview of information security and thorough examination of administration of information security. Surveys field of information security including planning, policy and programs, protection and people relative to information security. Taught with BCIS 482 with differentiated assignments for graduate students.

Prerequisite(s): BCIS 110 or equivalent.

BCIS 585. Enterprise Resource Planning & Business Processes**3 Credits**

Enterprise-wide information systems and their use in enterprise resource planning (ERP). This course will examine the many cross-functional business processes. Other topics include ERP implementation issues, change management, and business process re-engineering. Hands-on exercises use SAP/3 Enterprise software. Taught with BCIS 485 with differentiated assignments for graduate students.

Prerequisite(s): C- or better in ACCT 351 or BCIS 502 or consent of instructor.

BCIS 590. Special Topics**1-3 Credits (1-3)**

Seminars in selected current topics in business computer systems. May be repeated up to 3 credits.

Prerequisite(s): Vary according to topic being offered.

BCIS 595. Enterprise Information Portals**3 Credits**

Enterprise information portal (EIP) is a framework for integrating information, people and processes across organizational boundaries using web-based technologies. In this class, you will explore the wide range of options (EIP's)(e.g. SAP Netweaver Portal) provide to integrate ERP solutions, third-party applications, legacy systems, databases, unstructured documents, internal and external Web content, and collaboration tools. Taught with BCIS 495 with differentiated assignments for graduate students.

Prerequisite(s): BCIS 485.

BCIS 598. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with prior approval of department head. A maximum of 3 credits may be earned.

Prerequisite: consent of instructor.

BCT-BUILDING CONSTRUCTION TECH (BCT)

BCT 100. Building Trades I**8 Credits (2+12P)**

Equipment and general safety. Human relations, building construction surveying, footings, foundation form work, framing, sheathing, insulation. Basic electrical wiring and plumbing. Classroom instruction, on-the-job training, and problem solving.

BCT 101. Introduction to Construction I**2 Credits (2+1P)**

Basic safety, including personal protective equipment, how to perform basic construction tasks safely, and what to do if an accident occurs. Includes basic construction methods. May be repeated up to 2 credits. Restricted to Community Colleges campuses only.

Corequisite(s): BCT 102 and BCT 103.

BCT 102. Introduction to Construction II**2 Credits (2+1P)**

Introduction to power and hand tools, blueprints, and basic rigging hardware and techniques. May be repeated up to 2 credits. Restricted to Community Colleges campuses only.

Corequisite(s): BCT 101 and BCT 103.

BCT 103. Introduction to Construction Laboratory**3 Credits**

Provides students the opportunity to practice skills they have acquired in BCT 101 and BCT 102. It includes task-oriented projects in which students can apply many of the skills and knowledge that have been presented throughout the National Center for Construction and Education Research (NCCER) Carpentry Program. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Corequisite(s): BCT 101 and BCT 102.

BCT 104. Woodworking Skills I**3 Credits (1+4P)**

Use and care of hand tools and elementary power tools, safety procedures, and supervised project construction.

BCT 105. Woodworking Skills II**3 Credits (1+4P)**

Advanced woodworking skills to include use of advanced power tools, power tool safety, and supervised construction.

Prerequisite: BCT 104 or consent of instructor.

BCT 106. Woodworking Theory and Practice**3 Credits (2+2P)**

History of wood manufacturing, industrial techniques, wood characteristics, stains and finishes. Design and construction of minor wood projects.

BCT 107. Painting I**4 Credits (2+4P)**

Types and applications of paints and clear coatings. Use of fasteners, caulks, and sealants. Restricted to: Community Colleges only.

BCT 108. Painting Level II**4 Credits (2+4P)**

Continuation of BCT 107: Painting failures and remedies, preparation, drywall patching and wood finishing. Restricted to: Community Colleges only.

Prerequisite(s): BCT 107.

BCT 109. Plumbing I**3 Credits (2+3P)**

Covers orientation to the trade. Students will learn about materials used in the plumbing industry and the different types of plumbing fixtures. It includes task-oriented projects in which the students apply many of the skills and knowledge that are presented through the National Center for Construction and Education Research (NCCER) Plumbing Program. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): BCT 101, BCT 102. Restricted to Community Colleges campuses only.

BCT 110. Blueprint Reading for Building Trades**4 Credits (2+4P)**

Same as DRFT 151, OEET 101, OEPB 110.

BCT 111. Small Equipment Maintenance and Repair**4 Credits (2+4P)**

Covers small engine theory, troubleshooting and repair, auto maintenance, hydraulic theory and repair lubricants, batteries and scheduled tool maintenance. Restricted to: Community Colleges only.

BCT 112. Basic Masonry**4 Credits (2+4P)**

Covers use of brick and concrete blocks; basic techniques for mixing mortar and laying masonry units; describes the hand and power tools used in masonry, including safety; includes mathematics used to perform calculations related to masonry units; explains the types and properties of mortar and the materials used in mixtures. Restricted to: Community Colleges only.

BCT 114. Basic Carpentry**3 Credits (1+4P)**

Covers orientation to the trade; wood building materials, fasteners, and adhesives; detailed description and explanations of hand-operated and power tools, including safety; framing basics including laying out and constructing of wood floors, walls and ceilings and includes roughing in of door and window openings. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Corequisite(s): BCT 115 and BCT 116.

BCT 115. Carpentry Level I**3 Credits (1+4P)**

Describes the various kinds of roofs and provides instructions for lay out of the different roofing systems. Describes the various types of windows, skylights, and exterior doors and provides instruction for installation. May be repeated up to 3 credits. Consent of Instructor required. Restricted to Community Colleges campuses only.

Corequisite(s): BCT 114 and BCT 116.

BCT 116. Basic Carpentry Lab**2 Credits**

Provides students the opportunity to practice skills they have acquired in BCT 114 and BCT 115. It includes task-oriented projects in which students can apply many of the skills and knowledge that have been presented throughout the National Center for Construction and Education Research (NCCER) Carpentry Program. May be repeated up to 2 credits. Restricted to Community Colleges campuses only.

Corequisite(s): BCT 114 or BCT 115.

BCT 117. Plumbing 1A**3 Credits (2+2P)**

This course will introduce students to the plumbing profession. Students will become familiar with the tasks and responsibilities of plumbing professionals in the construction industry and gain a basic knowledge of the plumbing field. Restricted to Community Colleges campuses only.

BCT 118. Math for Building Trades**3 Credits**

Geometry, algebra, arithmetic, and basic trigonometry pertaining to mathematical applications in the building trades field. Same as OEET 118, DRFT 118, OEPB 118.

Prerequisite: CCDM 103N.

BCT 119. Plumbing 1B**3 Credits (2+2P)**

This course continues the introduction of students to the plumbing profession. Students will become familiar with the tasks and responsibilities of plumbing professionals in the construction industry and gain a basic knowledge of the plumbing field. Restricted to Community Colleges campuses only.

Prerequisite(s): BCT 117.

BCT 121. Construction Law**3 Credits**

Using the New Mexico Contractors Reference manual, this course covers licensing requirements and regulations, business, law and other important aspects of owning and running a construction business. Restricted to: Community Colleges only.

BCT 130. Professional Development and Leadership**1 Credit**

As members and/or officers of various student professional organizations, students gain experience in leadership, team building, and community service. Students competing or participating in Skills USA are required to register for the course. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: BCT majors. S/U Grading (S/U, Audit). Restricted to: Community Colleges only.

BCT 150. Forklift Operation**1 Credit**

Classroom instruction and hands-on practice to prepare students to operate a forklift safely in the workplace. Students will have the opportunity to earn a forklift operator's permit. Consent of Instructor required. Restricted to Community Colleges campuses only.

BCT 200. Building Trades II**8 Credits (2+12P)**

Continuation of BCT 100: roofing; exterior and interior finish; masonry; door, window, and cabinet installation.

BCT 206. Advanced Cabinetmaking**3 Credits (1+3P)**

Advanced cabinetmaking skills, to include expert use of hand and power tools, professional construction and finishing techniques.

Prerequisites: BCT 105, BCT 106, or consent of instructor.

BCT 209. PLUMBING II**3 Credits (2+3P)**

Continuation of BCT 109. Provides students the opportunity to gain more practice in the skills and knowledge learned in Plumbing I. Students will install fixtures and run the various plumbing supply lines from Plumbing Level I. The course included hands on projects in which the students apply many of the competencies that have been presented through the National Center for Construction and Education Research (NCCER) Plumbing Program. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): BCT 109.

BCT 217. Building and the Environment**3 Credits**

Introduction to LEED's, and Green Building Fundamentals, sustainability, sustainable design and green building evaluating cost implication of green building. Describes site development; managing site water runoff, improving a project's water use efficiency. Discusses renewable energy sources, and introduces student to generating power on-site using renewable energy sources, improving a building's indoor environment quality, improving the building industries' environmental performance and environmental aspects of building maintenance, re-use and conservation. Restricted to: Community Colleges only.

BCT 218. Plumbing 2**4 Credits (2+4P)**

This course builds on the skills and knowledge students have gained in previous BCT introduction to plumbing courses, focusing on installation of plumbing systems. Students will become familiar with the tasks and responsibilities of plumbing professionals in the construction industry and gain a basic knowledge of the plumbing field.

Prerequisite(s): BCT 117 and BCT 119.

BCT 221. Cooperative Experience I**1-4 Credits**

Supervised cooperative work program. Student is employed in an approved occupation and is supervised and rated by the employer and instructor. Student will meet in a weekly class. Graded S/U.

Prerequisite: consent of instructor.

BCT 222. Alternative Building**3 Credits (2+2P)**

Exploration of different types of building techniques and materials other than the traditional wood framed structures. Materials and techniques will include adobe, straw bale, insulated concrete forms, rammed earth and structural insulated panels with an emphasis on "green building" methods. Restricted to: Community Colleges only.

BCT 255. Special Topics**1-6 Credits (1-6)**

Topics to be announced in the Schedule of Classes . May be repeated up to 12 credits. Consent of Instructor required. Restricted to Community Colleges campuses only.

BCT 290. Special Problems in Building Technology**1-4 Credits**

Individual studies in areas directly related to building technologies.

Prerequisite: consent of instructor.

BIL-BILINGUAL EDUCATION (BIL)

BIL 489. Topics**3 Credits**

Course subtitled in the Schedule of Classes. May be repeated three times for a maximum of 9 credits.

BIL 505. The Bilingual Preschool Child**3 Credits**

Principles of multicultural education applied to preschool and primary levels. Focus on issues, methods, and materials.

BIL 520. Issues in Schooling for Bilingual Learners**3 Credits**

Identification and consideration of current thought and directions in bilingual education, nationally and internationally.

BIL 522. Literacy-Language Instruction for Bilingual Students**3 Credits**

Framework and strategies for developing the written language abilities of bilingual learners, with attention to the interrelationships among reading, writing, and oral language.

BIL 545. Bilingual/Multicultural Schooling and Community Relations**3 Credits**

Rationale, information pertinent to the school and the community in a setting involving economic, cultural, and linguistics diversity.

BIL 550. Internship in Bilingual Education IV**1-6 Credits**

Advanced experience in educational bilingual settings for prospective bilingual education teachers. Maximum of 6 credits.

BIL 560. Selected Topics in Bilingual Education III**1-6 Credits**

Various topics on current requests and needs in bilingual education. Maximum of 6 credits. BIL561. The Bilingual Exceptional Student 3 cr. Introduction to bilingual/multicultural special education. Same as SPED 561, SPED 661.

BIL 570. Directed Study in Bilingual Education III**1-6 Credits**

Independent research topics in bilingual education based on particular individual interest or needs.

BIL 616. Acquiring Emancipatory Discourses: TESOL/BIL**3 Credits**

An elaboration of understandings of bi- and multilingualism and related models of education based on current research and practice.

BIL 617. Multiple Critical Literacies**3 Credits**

An exploration of the multiple literacies that operate on the individual, classroom, community, cultural and societal levels.

BIL 633. Praxis and Reflexivity**3 Credits**

The cyclical research processes of continuous self and systemic (re)evaluation vis-a-vis classroom, community, and society with an eye toward reflection, growth, change, and larger forms of social agency. Restricted to doctoral-level students of any major. Same as ECED 633, EDUC 633, RDG 633, EDLT 633.

Prerequisite: consent of instructor.

BIL 635. Critical Theory and Pedagogy**3 Credits**

Same as EDUC 635.

BIL 637. Social Justice Issues in Education**3 Credits**

Same as EDUC 637.

BIL 670. Directed Study in Bilingual Education IV**1-6 Credits**

Independent research topics in bilingual education based on particular individual interest or needs.

BIOL-BIOLOGY (BIOL)

BIOL 101G. Human Biology

3 Credits

Introduction to modern biological concepts. Emphasis on relevance to humans and their relationships with their environment. Cannot be taken for credit after successful completion of BIOL 111G or BIOL 211G. Appropriate for non-science majors. Requires successful completion of BIOL 101GL in order to meet the NM Common Core Area III Laboratory Science requirements.

BIOL 101GL. Human Biology Laboratory

1 Credit

Laboratory for BIOL 101G. Laboratory experiences and activities exploring biological concepts and their relevance to humans and their relationship with their environment.

Prerequisite(s)/Corequisite(s): BIOL 101G.

BIOL 110G. Contemporary Problems in Biology

4 Credits (3+3P)

Fundamental concepts of biology will be presented using examples from relevant problems in ecology, medicine and genetics. For nonscience majors only. Community Colleges only.

BIOL 111G. Natural History of Life

3 Credits (3)

Survey of major processes and events in the genetics, evolution, and ecology of microbes, plants and animals, and their interactions with the environment. Appropriate for science and nonscience majors. Must be taken with BIOL 111L to meet general education requirements. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): Currently enrolled in MATH 120, grade of C- or better in MATH 120, or a Math Placement Exam score adequate to enroll in mathematics courses beyond MATH 120.

BIOL 111GL. Natural History of Life Laboratory

1 Credit

Laboratory experiments, demonstrations and exercises on interrelationships among organisms, biodiversity, processes of evolution, and interaction of organisms and their environment. Appropriate for science and nonscience majors. May be repeated up to 1 credits.

Prerequisite(s)/Corequisite(s): BIOL 111G; Currently enrolled in MATH 120, grade of C- or better in MATH 120, or a Math Placement Exam score adequate to enroll in mathematics courses beyond MATH 120.

BIOL 150. Topics in Biology

1-3 Credits (1-3)

Introductory level coverage of biological topics. May be repeated up to 9 credits.

BIOL 154. Introductory Anatomy and Physiology

4 Credits (3+3P)

Survey of human structure and function (does not replace BIOL 190, BIOL 111G, or BIOL 211G as a prerequisite for advanced courses in biology). Restricted to: Community Colleges only.

BIOL 211G. Cellular and Organismal Biology

3 Credits

Principles of cellular structure and function, genetics, and organismal physiology. This course prepares the student for continuation in science or allied health fields. Suitable for all majors. Must be taken with BIOL 211L to meet general education requirements. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): a C- or better in MATH 120 or higher and a C- or better in CHEM 110G or CHEM 111G or CHEM 115.

BIOL 211GL. Cellular and Organismal Biology Laboratory

1 Credit

Laboratory demonstrations, experiments and exercises on molecular and cellular biology and organismal physiology. Must have passed BIOL 211G or be concurrently enrolled in BIOL 211G and BIOL 211L. Pre/ May be repeated up to 1 credits.

Prerequisite(s)/Corequisite(s): a C- or better in BIOL 211G, MATH 120 or higher, and a C- or better in CHEM 110G or CHEM 111G or CHEM 115.

BIOL 219. Public Health Microbiology

3 Credits

The characteristics of pathogenic microorganisms and the diseases that they cause. Will not meet the microbiology requirements for biology or medical technology majors.

Prerequisite: BIOL 211G and BIOL 211GL.

BIOL 221. Introductory Microbiology

3 Credits

Principles of isolation, taxonomy, and physiology of microorganisms.

Restricted to Community Colleges campuses only.

Prerequisite(s): CHEM 110G or CHEM 111G or CHEM 112G.

Corequisite(s): BIOL 221 L.

BIOL 221 L. Introductory Microbiology Laboratory

1 Credit

A laboratory course to accompany BIOL 221 or BIOL 219.

Prerequisite: BIOL 221 or BIOL 219 or concurrent enrollment.

BIOL 225. Human Anatomy and Physiology I

4 Credits (3+3P)

The first in a two-course sequence that covers the structure and function of the human body, including terminology of the human gross anatomy, chemistry overview, cell structure, cell physiology (including DNA, protein synthesis and cell division). The organization of cells and tissues and their metabolic and homeostatic processes and regulation are also covered. Physical and chemical operation of organs and systems of the human body include the integumentary, skeletal, muscular, and nervous systems. Pre/ Restricted to: Community Colleges only.

Corequisite(s): CHEM 110G or CHEM 111G.

BIOL 226. Human Anatomy and Physiology II

4 Credits (3+3P)

The second in a two-course sequence that covers the structure and function of the human body. Includes the physical and chemical operation of the organs and systems of the human body, including endocrine, cardiovascular, lymphatic, immune, respiratory, digestive, urinary and reproduction system. Concepts of nutrition, metabolism, energy, fluid and electrolyte balance, heredity pregnancy and human embryonic and fetal development are also covered. Restricted to: Community Colleges only.

Prerequisite(s): BIOL 225, CHEM 110G or CHEM 111G.

BIOL 227. Pathophysiology

3 Credits

A study of the structure and function of the human body with specialized emphasis on disease processes.

Prerequisite(s): AHS 153 or BIOL 225 Corequisite/Prerequisites(s): AHS 154 or BIOL 226 Restricted to: Community Colleges only.

BIOL 250. Special Topics

1-3 Credits

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 6 credits. Community Colleges only.

BIOL 253. Human Anatomy**4 Credits (3+3P)**

Detailed presentations of human anatomy, with laboratory. For nursing, prenursing, and human nutrition and food science majors only. Restricted to: HNFS, PNUR majors.

Prerequisite(s): Grade of C- in BIOL 211G and either CHEM 111G or CHEM 110G.

BIOL 254. Human Physiology**3 Credits**

Physical and chemical operation of the organs and systems of the human body. Not open to students who have passed BIOL 354 or BIOL 381.

Prerequisite(s): Grade of at least C- in BIOL 211G; BIOL 211GL; CHEM 111G or CHEM 110G.

BIOL 262. Human Pathophysiology I**3 Credits**

The first in a two-course sequence that covers changes in body physiology that result from disease or injury. Includes a general introduction to pathophysiology as well as an overview of altered cellular and tissue biology, injury, inflammation, and neoplasia. Students will also explore deviation from fluid, hemodynamic, and endocrinologic balance. Topics related to the science of pathophysiology, including pathology, pathogenesis, etiology, epidemiology, and clinical manifestations, are also discussed throughout the course where relevant. Grade of C- or higher in microbiology is recommended. Restricted to Community Colleges campuses only.

Prerequisite(s): Grade of C- or higher in BIOL 225 and BIOL 226.

BIOL 263. Pathophysiology II**3 Credits**

The second in a two-course sequence that covers changes in body physiology that result from disease or injury. This course focuses on the pathophysiology of the nervous, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems. Topics related to the science of pathophysiology, including pathology, pathogenesis, etiology, epidemiology, and clinical manifestations, are also discussed throughout the course where relevant. Grade of C- or higher in microbiology is recommended. Restricted to Community Colleges campuses only.

Prerequisite(s): Grade of C- or higher in BIOL 225, BIOL 226, and BIOL 262.

BIOL 301. Principles of Ecology**3 Credits**

A survey of ecology including general theory, the adaptations of organisms, population dynamics, species interactions, and the structure and function of natural communities and ecosystems. MATH 191G and A ST 311 recommended. Same as E S 301. Crosslisted with: E S 301.

Prerequisite(s): BIOL 111G, MATH 121G.

BIOL 302. Molecular Biology Techniques Laboratory**3 Credits**

This combined lecture and laboratory course emphasizes molecular biology laboratory practices through the hands-on application of commonly applied techniques, protocols, and equipment. The topics covered include both the fundamental development of empirical data as well as data analysis using stand-alone and web-based resources. Consent of instructor required.

Prerequisite(s): BIOL 211G or equivalent, and MATH 121G.

BIOL 305. Principles of Genetics**3 Credits**

Covers fundamental principles of reproduction, variation, and heredity in plants and animals. Crosslisted with: HORT 305 and AGRO 305.

Prerequisite(s): BIOL 111G and BIOL 211G, or BIOL 211G and BCHE 140, either CHEM 111G or CHEM 115, and MATH 121G.

BIOL 309. Guided Biological Research Lab**3 Credits**

This laboratory course provides a guided experience to hands-on research in biology. It is intended for early-career undergraduates who have finished the introductory sequence of Biology courses. Topics will vary with instructor.

Prerequisite(s): BIOL 111G, BIOL 211G, and MATH 121G.

BIOL 311. General Microbiology**3 Credits**

Principles of physiology, molecular biology, ecology, and taxonomy of microorganisms.

Prerequisite(s): BIOL 211G and MATH 121G.

BIOL 311 L. General Microbiology Laboratory**2 Credits**

Microbiology techniques and procedures, including isolation and identification of microorganisms and biotechnology procedures that employ microorganisms.

Prerequisite(s)/Corequisite(s): BIOL 219 or BIOL 311. Prerequisite(s): BIOL 211G and MATH 121G.

BIOL 312. Plant Taxonomy**3 Credits (2+3P)**

Classification and identification of representative plant families and local plants. Emphasis on ability to use technical sources. Saturday field trips may be recommended.

Prerequisite(s): BIOL 111G and MATH 121G.

BIOL 313. Structure and Function of Plants**3 Credits (2+3P)**

Structure, function, and survey of plants. BIOL 211G recommended.

Prerequisite(s): BIOL 111G, MATH 121G, and sophomore-level standing.

BIOL 314. Plant Physiology**3 Credits**

Photosynthesis, respiration, water relation of plants, minerals and organic nutrition, growth and development.

Prerequisite(s): BIOL 211G and CHEM 112G.

BIOL 322. Zoology**3 Credits (2+3P)**

Structure, function, and survey of animals. BIOL 211G recommended.

Prerequisite(s): BIOL 111G, MATH 121G, and at least sophomore-level standing.

BIOL 330. Comparative Anatomy and Embryology**4 Credits (3+3P)**

The developmental and evolutionary basis for the diversity and homology of body plans within the classes of vertebrate organisms. Laboratories will emphasize comparative dissection. BIOL 322 recommended.

Prerequisite(s): BIOL 111G, BIOL 211G, and MATH 121G.

BIOL 350. Special Topics**1-4 Credits**

Specific subjects announced in Schedule of Classes and offered as scheduled courses. May be repeated for unlimited credit.

BIOL 351. Biology Internship**1-6 Credits**

Substantial off-campus experience in biology selected by student in consultation with regular biology faculty member. Internship must be approved by faculty member. Student will supply mutually agreed upon documentation of internship activities after the internship is completed. May be repeated up to 6 credits. Restricted to: BIOL, MBIO, CEC, GEOT majors. S/U Grading (S/U, Audit).

Prerequisite(s): 45 college credits, 2.5 or better GPA, consent of instructor.

BIOL 353. Pre-Professional Human Anatomy**4 Credits**

Pre-professional clinically-oriented survey of human anatomy. Designed primarily for pre-nursing majors. Provides comprehensive anatomical training for students planning careers in health and allied health sciences, such as medicine, dentistry, nursing, physical therapy, physicians aid, human nutrition, and food science. Suitable as a biology elective. Concurrent enrollment in BIOL 354L is recommended but not required.

Prerequisite(s): BIOL 211G and either CHEM 110G, CHEM 111G, or CHEM 115.

BIOL 353 L. Pre-Professional Human Anatomy Laboratory**1 Credit**

Laboratory experience in human anatomy using anatomical models and cat dissections. Designed as a learning aid to support and augment BIOL 353 pre-professional Human Anatomy. For students planning careers in health and allied health sciences such as medicine, dentistry, nursing, physical therapy, physicians aid, human nutrition, and food science.

Prerequisite(s)/Corequisite(s): BIOL 253 or BIOL 353. **Prerequisite(s):** BIOL 211G and either CHEM 110G, CHEM 111G, or CHEM 115.

BIOL 354. Physiology of Humans**3 Credits**

Principles of integrative functions in humans. A systems approach emphasizing tissues, organs, and their regulation.

Prerequisite(s): BIOL 211G and MATH 121G.

BIOL 354 L. Laboratory of Human Physiology**1 Credit**

Laboratory to accompany BIOL 354.

Prerequisite(s): MATH 121G and either BIOL 254, BIOL 381, BIOL 354, or concurrent enrollment in BIOL 354.

BIOL 373. Fungal Biology**3 Credits (3+2P)**

Same as EPWS 372.

Prerequisite: EPWS 310 or BIOL 311 or consent of instructor.

BIOL 377. Cell Biology**3 Credits**

Fundamentals of eukaryotic cell structure, organization, and function. Emphasis on membranes, subcellular organelle systems, cytoskeleton, and cell cycle. Includes basic aspects of molecular biology. BIOL 111G recommended.

Prerequisite(s): BIOL 211G, BIOL 305, and MATH 121G.

BIOL 381. Animal Physiology**3 Credits**

Principles of integrative function in animals, emphasizing tissues, organs, organ systems, and regulation. Includes adaptations of animals to their environments. BIOL 111G and BIOL 377 recommended.

Prerequisite(s): BIOL 211G and junior-level standing, MATH 121G.

BIOL 382. Plant Signalling and Development**3 Credits**

This is a course that introduces plant signalling pathways and their role in development to students. The lectures are structured to facilitate in-class discussions on the current state and future directions in this field. Topics will cover a wide range of biological questions and the methods used to study them.

Prerequisite(s): BIOL 305 or GENE 315, and MATH 121G.

BIOL 385. An Introduction to Cancer**3 Credits**

This course will cover 3 areas of cancer research and their interdisciplinary connections: clinical cancer research, epidemiology and public health, and basic cancer research. May be repeated up to 3 credits.

Prerequisite(s): BIOL 305 or GENE 315 or equivalent and MATH 121G.

BIOL 398. Biology Research Programs**1-3 Credits**

Directed studies and research experiences, by arrangement with instructor. May be repeated for a maximum of 6 credits.

BIOL 402. Biology Honors Thesis**1-3 Credits (1-3)**

Provides guidance in how to write a scientific paper in the sciences.

Students will produce an honors thesis based on previous independent research. Consent of instructor required.

Prerequisite(s): MATH 121G and consent of instructor.

BIOL 408. Ecology of Plants**3 Credits**

Controlling factors, succession, community dynamics, and the classification of vegetation.

Prerequisite(s): BIOL 301 and MATH 121G.

BIOL 412. Seminar in Microbiology**1 Credit**

Seminar to aid students in assessment and presentation of current topics in microbiology. Graded: S/U.

Prerequisite(s): BIOL 311, BIOL 311L, and MATH 121G.

BIOL 417. Topics in Environmental Microbiology**3 Credits**

This is an advanced undergraduate course based on current literature in Environmental Microbiology, and is a seminar-style, discussion-based class. Topics typically include marine microbiology, ancient DNA, and the human microbiome. Crosslisted with: BIOL 577.

Prerequisite(s): MATH 121G, BIOL 477 or consent of instructor.

BIOL 423. Primate Adaption and Evolution**3 Credits**

Survey of the adaptations and evolutionary history of non-human primates. Consent of Instructor required. Crosslisted with: ANTH 473 .

Prerequisite(s): ANTH 355 or consent of instructor.

Corequisite(s): BIOL 423L when offered.

BIOL 423 L. Primate Evolution Laboratory**1 Credit**

Laboratory with exercises on non-human primate adaptation and evolution. Crosslisted with: ANTH 473 L.

Prerequisite(s): ANTH 355 or consent of instructor.

Corequisite(s): BIOL 423.

BIOL 424. Human Osteology**3 Credits**

A survey of the functional, developmental, and evolutionary biology of the human skeleton. Identifying bones and teeth from hands-on experience with skeletal and dental material. Provides a foundation for human evolutionary studies, bioarchaeology and forensic anthropology. Crosslisted with: ANTH 474.

Corequisite(s): BIOL 424L when offered.

Prerequisite(s)/Corequisite(s): Recommend ANTH 355 or equivalent.

BIOL 424 L. Human Osteology Lab**1 Credit**

Laboratory for ANTH 474. Experiences and activities related to identifying teeth and bones of the human skeleton. Crosslisted with: ANTH 474 L.

Prerequisite(s): Recommend ANTH 355 or equivalent.

Corequisite(s): BIOL 424.

BIOL 427. Symbiosis**3 Credits**

In-depth treatment of the ecology, evolution, and mechanisms that are found in symbiotic systems.

Prerequisite(s): BIOL 111G, BIOL 211G, and MATH 121G.

BIOL 434. Human Evolution**3 Credits**

Overview of human biological evolution from the emergence of Miocene apes to the modern human diaspora. Crosslisted with: ANTH 434.

Prerequisite(s): ANTH 355 or consent of instructor.

Corequisite(s): BIOL 434L when offered.

BIOL 434 L. Human Evolution Laboratory**1 Credit**

Laboratory in human evolution, includes exercises and activities to learn the human fossil record. Crosslisted with: ANTH 434 L.

Prerequisite(s): ANTH 355 or consent of instructor.

Corequisite(s): BIOL 434.

BIOL 436. Disease Vector Biology**3 Credits**

Fundamentals of disease vector biology with emphasis on molecular biology. Explores an overview of vector borne diseases, insect endocrinology, insect immunity, olfaction, vector genome projects and transgenic insect techniques. Includes student presentations and literature discussions. Crosslisted with: BIOL 536

Prerequisite(s): BIOL 211G, BIOL 305, and MATH 121G.

BIOL 442. Genomics Technology**3 Credits**

The course introduces current genomic techniques in genome sequencing, transcriptome analysis, detection of genetic variation, and metagenomics.

Prerequisite(s): BIOL 211G, BIOL 305 or BIOL 478 or GENE 315, and MATH 121G.

BIOL 446. Bioinformatics and NCBI Database**3 Credits**

The course discusses how to use NCBI database and bioinformatic tools for research with genomics approaches. The topics include nucleotide and protein sequence analysis, similarity search with blast algorithms, gene/genome annotation, protein structure analysis, gene expression analysis, and metagenomic study.

Prerequisite(s): BIOL 211G, BIOL 305 or BIOL 478 or GENE 315, and MATH 121G.

BIOL 447. Ornithology**4 Credits (3+3P)**

Morphology, life histories, systematics, ecology, and behavior of birds.

Prerequisite(s): MATH 121G.

BIOL 450. Special Topics**1-3 Credits**

Specific subjects announced in the Schedule of Classes and offered as scheduled courses. May be repeated for unlimited credit.

BIOL 451. Physiology of Microorganisms**3 Credits**

Aspects of cellular physiology unique to prokaryotes. BCHE 395 recommended.

Prerequisite(s): C- or better in BIOL 311, MATH 121G.

BIOL 455. Biometry**3 Credits**

Biometry is the analysis of biological data using mathematical and statistical models. The course will cover basic theories of probability and statistics and will introduce principles of sampling, estimation, experimental design, and hypothesis testing. Students will analyze biological data using computer programs and will perform tests for goodness-of-fit, independence, analysis of variance, correlation, and regression.

Prerequisite(s): BIOL 111G or BIOL 211G, and MATH 121G.

BIOL 459. Darwinism Versus Creationism**3 Credits**

This course examines the debate regarding Creationism versus Darwinism as explanations for the origin and diversification of life on Earth. Topics covered include the nature and philosophy of science, new-world creationism, old-world creationism, intelligent design, history of evolutionary thought, modern evolutionary theory, and the Creationism-Darwinism debate at the societal, political, and educational interfaces. The course structure will include formal lectures and in-class discussion of assigned readings.

Prerequisite(s): BIOL 111G or BIOL 211G, and MATH 121G.

BIOL 462. Conservation Biology**3 Credits**

Examination of the value of biological diversity, the natural processes that control biological diversity, and the ways in which human activities have resulted in the loss of biological diversity, both regionally and globally.

Prerequisite(s): BIOL 301 and either MATH 142G or MATH 191G.

BIOL 465. Invertebrate Zoology**4 Credits (3+3P)**

Survey, ecology, behavior and physiology. BIOL 322 recommended.

Prerequisite(s): MATH 121G, BIOL 111G, and junior-level standing.

BIOL 466. Invertebrate Zoology Field Trip**1 Credit**

A one-week field trip for the study of marine invertebrates. Registrants must provide own camping gear. Graded: S/U.

Prerequisite(s): MATH 121G, BIOL 465 or equivalent (or concurrent enrollment) or consent of instructor.

BIOL 467. Evolution**3 Credits**

Covers theory, historical background, population variation, natural selection, adaptation, speciation.

Prerequisite(s): BIOL 111G, BIOL 305 or GENE 320, and MATH 121G.

BIOL 469. Biology of Emerging Infectious Diseases**3 Credits**

This class will investigate the evolutionary and ecological drivers of disease emergence. The effect of emerging diseases on human health will be addressed throughout the class, but the class will also consider the consequences of disease emergence for the health of wildlife and plant populations. Additionally, the class will consider the mechanisms used to control disease emergence and why they succeed or fail.

Prerequisite(s): MATH 121G, Introductory Genetics (BIOL 305 or equivalent) or consent of the instructor.

BIOL 470. Developmental Biology**3 Credits**

The purpose of this course is to introduce students to the principles that govern the development of a single fertilized egg cell into a complex multicellular organism. These principles, and often the molecular mechanisms by which they are accomplished, appear to be universal for all multicellular organisms including both plants and animals. We will explore issues such as: how cells become committed to particular cell fates and how this commitment is maintained; how organs acquire particular shapes, sizes and positions; the developmental causes of some human diseases; how the environment affects development; and, how changes in development provide the material basis for evolutionary change.

Prerequisite(s): BIOL 211G, BIOL 305, and MATH 121G.

BIOL 471. Molecular and Cellular Mycology**3 Credits**

Exploration of the world of fungi with emphasis on fungal molecular biology and development. Including discussion of fungal taxonomy and genomics.

Prerequisite(s): MATH 121G and BIOL 311 required, BCHE 341 or BCHE 395 recommended, or consent of instructor.

BIOL 472. Primate Behavior and Ecology**3 Credits**

Survey of the social behavior and ecology of nonhuman primates. Crosslisted with: ANTH 472.

BIOL 473. Ecology of Microorganisms**3 Credits (2+3P)**

The metabolic interactions of microorganisms in the environment, with emphasis on their roles in ecological processes.

Prerequisite(s): MATH 121G, BIOL 311 or consent of instructor.

BIOL 474. Immunology**3 Credits**

Basic concepts of the immune response.

Prerequisite(s): MATH 121G, BIOL 305, and CHEM 211 or CHEM 313.

BIOL 475. Virology**3 Credits**

Mechanisms of viral infections of animals and man. BCHE 395 or BIOL 305 are recommended.

Prerequisite(s): BIOL 311 and MATH 121G.

BIOL 476. Soil Microbiology**3 Credits**

Nature and physiology of soil microorganisms, how they affect plant growth and recycle nutrients. Land framing, bioremediation, and other environmental problems as influenced by soil microorganisms. SOIL 252 and BIOL 311 recommended. Same as SOIL 476.

BIOL 476 L. Soil Microbiology Laboratory**1 Credit**

Enumeration of soil microorganisms, their activities, and transformations they mediate. Same as SOIL 476L.

Prerequisite(s)/Corequisite(s): BIOL 476.

BIOL 477. Applied and Environmental Microbiology**4 Credits**

A lecture-laboratory course on the microorganisms and the reactions they mediate which either impact the environment or have industrial applications. Reading of current literature will be emphasized. Topics include bioremediation, water quality, and aspects of industrial and food microbiology.

Prerequisite(s): MATH 121G, BIOL 311, and 311 L, or consent of instructor.

BIOL 478. Molecular Biology of Microorganisms**3 Credits**

The biochemical basis for gene mutation, recombination, and expression with emphasis on prokaryotes. Includes fundamentals of recombinant DNA technology. BIOL 305 and BCHE 395 recommended.

Prerequisite(s): BIOL 311 and MATH 121G.

BIOL 479. Medical Microbiology**3 Credits**

An in-depth overview of microbial pathogens associated with human infectious disease. Etiological agents, pathogenesis, and processes leading to the disease state and the therapies of infectious disease.

Prerequisite(s): MATH 121G and BIOL 311 required, BIOL 474 recommended.

BIOL 479 L. Medical Microbiology Laboratory**1 Credit**

Overview of common procedures used by medical microbiologists to identify agents of disease or microbial pathogen traits. May be repeated up to 1 credits.

Prerequisite(s)/Corequisite(s): BIOL 479. **Prerequisite(s):** MATH 121G, BIOL 311, BIOL 311L.

BIOL 480. Animal Behavior**3 Credits**

A survey of the field of animal behavior. BIOL 322 recommended.

Prerequisite(s): MATH 121G, BIOL 111G, and junior-level standing.

BIOL 480 L. Animal Behavior Laboratory**1 Credit**

Laboratory and field experiences in animal behavior BIOL 322 recommended.

Prerequisite(s): BIOL 111G, MATH 121G, and junior-level standing.

Corequisite(s): BIOL 480.

BIOL 484. Animal Communication**3 Credits**

An examination of how animals produce and perceive signals, what factors influence the form of signals in different sensory modalities, and how conflicts between senders and receivers affect signaling strategies. Weekly discussion from the primary literature and group research products.

Prerequisite(s): BIOL 111G or consent of instructor, and MATH 121G.

BIOL 485. Comparative Stress Physiology**3 Credits**

This course explores the biochemical, hormonal, and molecular aspects of stress physiology in all organisms from bacteria to humans. Focus area include hormesis, temperature, radiation, oxygen, infection, and dehydration.

Prerequisite(s): MATH 121 and BIOL 211G.

BIOL 488. Principles of Conservation Genetics**3 Credits**

Fundamentals of the genetics of small populations. Genetic technologies used in studying small populations. Application of genetics and evolution to the conservation of biological populations.

Prerequisite(s): MATH 121G and BIOL 305.

BIOL 489. Genetic Aspects of Population Biology**3 Credits**

Basic theory of population genetics and how that theory has guided, and been influenced by, studies of natural populations.

Prerequisite(s): MATH 121G and BIOL 305 or equivalent.

BIOL 490. Neurobiology**3 Credits**

Fundamentals of neurobiology with an emphasis on properties of neurons and glia, principles of synaptic transmission, development of nervous system and organization of motor and sensory systems.

Prerequisite: BIOL 211, BIOL 305, MATH 142G, or MATH 191G, and CHEM 211 or CHEM 313.

BIOL 498. Biology Research Programs**1-3 Credits**

Directed studies and research experiences, by arrangement with instructor. May be repeated for a maximum of 6 credits.

BIOL 503. Advanced Primate Adaptation and Evolution**3 Credits**

Advanced review of non-human primate adaptation and evolution. Crosslisted with: ANTH 573.

Corequisite(s): BIOL 503L when offered.

BIOL 503 L. Advanced Primate Adaptation and Evolution Laboratory**1 Credit**

Laboratory with exercises on non-human primate adaptation and evolution. Crosslisted with: ANTH 573 L.

Corequisite(s): BIOL 503.

BIOL 506. Biological Electron Microscopy (f)**5 Credits**

Principles and use of light microscope, transmission and scanning electron microscope; specimen preparation, thick and ultrathin sectioning, analysis of micrographs.

BIOL 510. Current Topics in Biology**3 Credits**

Introduction to diverse topics in modern biology, including dynamic areas of current research.

BIOL 514. Plant Physiology**2 Credits**

Same as EPWS 514.

Prerequisites: BIOL 211G and CHEM 112G.

BIOL 520. Molecular Cell Biology**3 Credits**

An in-depth look at cellular processes and structures at the molecular level. Emphasis is placed on formal student presentations and discussions of current literature.

Prerequisite: BIOL 377 or equivalent.

BIOL 527. Symbiosis**3 Credits**

In-depth treatment of the ecology, evolution, and mechanisms that are found in symbiotic systems.

Prerequisite: graduate status.

BIOL 533. Environmental Physiology of Plants**3 Credits**

Integral responses of plants and crop productivity to naturally occurring and modified environmental factors such as radiation, temperatures, water vapor, carbon dioxide, and air flow. Same as AGRO 533 and HORT 533.

Prerequisite: BIOL 314 or consent of instructor.

BIOL 534. Advanced Human Evolution**3 Credits**

Advanced overview of human biological evolution from the emergence of Miocene apes to the modern human diaspora. Crosslisted with: ANTH 534.

Prerequisite(s): ANTH 355 or consent of instructor.

Corequisite(s): ANTH 534L when offered.

BIOL 534 L. Advanced Human Evolution Laboratory**1 Credit**

Advanced laboratory in human evolution, includes exercises and activities to learn the human fossil record. Crosslisted with: ANTH 534 L.

Corequisite(s): BIOL 534.

BIOL 536. Advanced Disease Vector Biology**3 Credits**

Fundamentals of disease vector biology with emphasis on molecular biology. Explores an overview of vector borne diseases, insect endocrinology, insect immunity, olfaction, vector genome projects and transgenic insect techniques. Includes student presentations and literature discussions. Taught with: BIOL 436.

Prerequisite(s): BIOL 211G and BIOL 305.

BIOL 540. Science and Ethics**1-3 Credits (1-3)**

Ethical concerns facing researchers in the basic and applied biological sciences. Coverage of responsible conduct in research including scientific integrity and research misconduct, mentor/trainee responsibilities, data management, authorship, publication practices, human subjects, animal welfare, intellectual property, conflicts of interest and effort and collaborative science. Emphasis on ethical reasoning skills. Discussion of ethical and societal implications of issues selected from a broad range of contemporary research areas (genetics, reproductive biology, environmental sciences, nanoscience, drug discovery, bioengineering, neuroscience). Subtitled. May be repeated up to 4 credits. Crosslisted with: PHIL 540.

BIOL 541. Professional Development Seminar**1-3 Credits**

Practical aspects of career enhancement including job seeking, professional presentations, grant proposals, etc.

Prerequisite: consent of instructor.

BIOL 545. Molecular and Biochemical Genetics**3 Credits**

Same as BCHE 545.

BIOL 550. Special Topics**1-3 Credits**

Readings, discussions, and/or field and laboratory investigation of selected problems. Possible topics: human genetics, systematic entomology, or parasitism in animals. May be repeated for unlimited credit.

Prerequisite: consent of instructor, and designation of a specific topic before registration.

BIOL 560. Seminar in Cell and Organismal Biology**1-3 Credits**

Oral presentation and discussion of journal articles and ongoing research project. May be repeated for a maximum of 6 credits.

BIOL 562. Advanced Genomics Technology**3 Credits**

This course covers current genomics techniques in genome sequencing, transcriptome analysis, detection of genetic variation, and metagenomics. Consent of Instructor required.

BIOL 566. Advanced Bioinformatics and NCBI Database**3 Credits**

The course discusses how to use NCBI database and bioinformatic tools for research with genomics approaches. The topics include nucleotide and protein sequence analysis, similarity search with blast algorithms, gene/genome annotation, protein structure analysis, gene expression analysis, and metagenomic study. Consent of Instructor required.

BIOL 568. Communities and Ecosystems**3 Credits**

Study of ecological systems at the levels of the community and ecosystem. Topics include species interactions, community structure and dynamics, and flow of material and energy through ecosystems.

BIOL 570. Ecological Biogeography**3 Credits**

Survey of modern theory incorporating ecological mechanisms governing distribution and abundance of species over space and time.

BIOL 571. Advanced Molecular and Cellular Mycology**3 Credits**

Exploration of the world of fungi with emphasis on fungal molecular biology and development, including discussion of fungal taxonomy and genomics, using current literature. Consent of instructor required.

BIOL 572. Advanced Primate Behavior and Ecology**3 Credits**

Advanced review of non-human primate social behavior and ecology. Crosslisted with: ANTH 572.

BIOL 573. Fungal Biology**3 Credits (3+2P)**

Same as EPWS 572.

Prerequisites: EPWS 310 or BIOL 311, or consent of instructor.

BIOL 574. Advanced Human Osteology**3 Credits**

Advanced human osteology surveying the functional, developmental and evolutionary biology of the human skeleton. Identifying bones and teeth from hands-on experience with skeletal and dental material. Provides a foundation for human evolutionary studies, bioarchaeology and forensic anthropology. Crosslisted with: ANTH 574.

Corequisite(s): BIOL 574L when offered.

BIOL 574 L. Human Osteology Laboratory**1 Credit**

Laboratory for BIOL 574. Experiences and activities related to identifying teeth and bones of the human skeleton. Crosslisted with: ANTH 574 L.

Corequisite(s): BIOL 574.

BIOL 577. Advanced Topics in Environmental Microbiology**3 Credits**

This course is based on current literature in Environmental Microbiology, and is a seminar-style, discussion-based class. Topics typically include marine microbiology, ancient DNA and the human microbiome.

Prerequisite(s): Consent of instructor.

BIOL 581. Physiology of Animals**3 Credits**

Comprehensive treatment of integrative physiology of animals, emphasizing tissues, organ systems, and regulatory control, including neuroendocrine function, circulation, respiration, and excretion. Term paper required. BIOL 111G, BIOL 377 recommended.

Prerequisite: BIOL 211G.

BIOL 582. Advanced Plant Signalling and Development**3 Credits**

This is a course that introduces plant signalling pathways and their role in development to students. The lectures are structured to facilitate in-class discussions on the current state and future directions in this field. Topics will cover a wide range of biological questions and the methods used to study them.

Prerequisite(s): BIOL 305 or GENE 315, and MATH 121G.

BIOL 587. Behavioral and Evolutionary Ecology**3 Credits**

This course will investigate the causes and consequences of phenotypic variation and the adaptive value of phenotypic traits.

BIOL 590. Advanced Neurobiology**1-3 Credits**

Detailed examination of the principles underlying nervous system organization and function. Emphasis on recent advances in multidisciplinary, integrated approaches to study the nervous system. May be repeated under different subtitles for a maximum of 9 credits.

Prerequisites: either BIOL 490, BIOL 520, or equivalent, and consent of instructor.

BIOL 598. Special Research Programs**1-9 Credits**

Individual investigations either analytical or experimental.

BIOL 599. Master's Thesis**15 Credits**

Thesis.

BIOL 600. Doctoral Research**1-15 Credits**

Research.

BIOL 610. Seminar**1-3 Credits (1-3)**

Oral presentation and discussion of journal articles and ongoing research projects. May be repeated up to 6 credits. S/U Grading (S/U, Audit).

BIOL 612. Microbiology Seminar**1 Credit**

Seminar to aid graduate students in assessment and presentation of classical and current topics in microbiology.

BIOL 697. University Teaching Experience**1-3 Credits**

Certain graduate students will be permitted to teach up to one-third of one of the biology courses. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures.

BIOL 698. Selected Topics**1-3 Credits**

Selected topics for doctoral students.

BIOL 700. Doctoral Dissertation**15 Credits**

Dissertation.

BLAW-BUSINESS LAW (BLAW)

BLAW 230. Business Law**3 Credits**

Introduction to law in general and application to business specifically; comprehensive study of the law of contracts; and the principal and agent relationship. Offered at all NMSU Community Colleges except Dona Ana Community College. Credit may not be earned in both BLAW 230 and BLAW 317.

BLAW 313. Sports and the Law**3 Credits**

Introduction to legal concepts related to sports and business including an introduction to U. S. law and the civil practice, agency, sports contracts, sport torts, sport crimes, pertinent federal legislation such as Title IX, drugs and sports, international sports issues, pertinent antitrust issues, intellectual property, ethics and alternative dispute resolution.

Prerequisite(s)/Corequisite(s): BLAW 316. **Prerequisite(s):** BLAW 316.

BLAW 316. Legal Environment of Business**3 Credits**

Survey of business law including: the legal system (court systems, sources and types of law, litigation and dispute resolution), ethics and corporate social responsibility, administrative law, tort law, contract law, agency and employment law, business structure and governance, securities regulations, and international law. Students may not receive credit for both BLAW 316 and BLAW 317.

BLAW 325. Real Estate Principles and Law I**3 Credits**

Same as FIN 325.

BLAW 330. Entrepreneurial Law**3 Credits**

This course will explore the legal issues faced in the process of launching, financing, and growing a new venture. We will pay special attention to ventures making use of innovative technologies and business models. Intellectual property (trade secrets and confidential information, patents, copyrights, and trademarks) are of special importance to innovation-driven ventures, so we will consider in-depth how intellectual property is developed, protected, and put to use.

BLAW 385V. Consumers and the Law**3 Credits**

Study of the interrelationships between business, legal, and ethical aspects of consumer issues and their attendant civil liability and remedies in domestic and international markets.

BLAW 418. Uniforms Commercial Code and Advanced Business Law Topics**3 Credits**

Property, advanced contract law, debtor-creditor relations, bankruptcy and Uniform Commercial Code topics, including sales, negotiable instruments, secured transactions. Students who have taken BLAW 318 may not receive credit for BLAW 418.

Prerequisite(s): BLAW 316.

BLAW 430V. American Indian Law and Policy**3 Credits**

Explores the principles, doctrines, and texts governing the legal relations between the United States and Indian tribes, the history of federal Indian law and policy, tribal property, treaty rights and sovereignty, congressional plenary power, the trust doctrine, jurisdiction in Indian country, and tribal government. Topic specifically examined in the course include tribal lawmaking powers, gaming and economic development in Indian country, protection of Indian religious rights and cultural property, water rights, fishing, hunting and other treaty-based rights.

BLAW 490. Selected Topics**1-3 Credits**

Prerequisites vary according to the seminar being offered.

BLAW 498. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with the prior approval of the department head.

Prerequisites: junior or above standing and consent of instructor and department head.

BLAW 502. Legal Environment of Business**3 Credits**

Legal procedures and the judicial system as applied to business situations and a general coverage of the bodies of substantive law most commonly associated with business.

Prerequisite: graduate students only.

BLAW 518. Uniform Commercial Code and Advanced Business Law Topics**3 Credits**

Property, advanced contract law, debtor-creditor relations, bankruptcy and Uniform Commercial Code topics, including sales, negotiable instruments, secured transactions. Students who have taken either BLAW 318 or BLAW 418 may not receive credit for BLAW 518. Same as BLAW 418 with differentiated assignments for graduate students.

Prerequisite(s): BLAW 316 or BLAW 502.

BLAW 527. Negotiation and Business Dispute Resolution**3 Credits**

Focus on learning tactics related to conflict resolution skills and negotiation theory. Also the use of quantitative methods and their realistic application in resolving disputes. Students will participate in numerous role playing activities and simulated mediation games. Same as MGT 527.

BLAW 530. American Indian Law and Policy**3 Credits**

This course is divided into two major parts: an historical survey of federal Indian law and policy, and selected topics focusing on contemporary federal Indian law and policy issues and problems. This course assumes that the students have not had any law courses and approaches the topic of the history of federal Indian law and policy from various multidisciplinary and interdisciplinary perspectives.

BLAW 550. Selected Topics**3 Credits**

Seminars in selected topics related to business law or the legal environment of business.

Prerequisite(s): Varies according to seminar being offered.

BMGT-BUSINESS MANAGEMENT (BMGT)

BMGT 110. Introduction to Business**3 Credits**

Terminology and concepts of the business field. Role of accounting, computers, business management, finance, labor, and international business in our society. Restricted to: Community Colleges only.

BMGT 112. Introduction to Money**3 Credits**

Banking in today's economy: language and documents of banking, check processing, teller functions, deposit function, trust services, bank bookkeeping, loans, and investments. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

BMGT 126. Retail Management**3 Credits**

Phases of retailing, including types of retail outlets and basic problems of organizing and operating a retail store. Restricted to: Community Colleges only.

BMGT 132. Principles of Selling**3 Credits**

Analysis of customer behavior, persuasive communication, process of the sales interview. Restricted to: Community Colleges only.

BMGT 136. Fundamentals of Buying and Merchandising**3 Credits**

Covers operational aspects of procuring and selling merchandise for the retail store. Procedures covered are buying, receiving, pricing strategies, sales promotions and operational controls. Restricted to: Community Colleges only.

BMGT 138. Advertising**3 Credits**

Psychological approach to non-personal consumer persuasion; applied techniques in media selection, layout mechanics, production methods, and campaign structures. Restricted to: Community Colleges only.

BMGT 140. Principles of Supervision I**3 Credits**

Principles of supervision emphasizing planning, organization, rating of employees and procedures to develop good morale. Introduction to interpretation of case studies. Restricted to: Community Colleges only.

BMGT 150. Income Taxation**3 Credits**

Federal income taxation of individuals, sole proprietorships, partnerships, corporations, trusts, and estates with particular reference to CLU, life insurance and annuities. Restricted to: Community Colleges only.

BMGT 155. Special Topics I**1-3 Credits (1-3)**

Introductory special topics of lower division level work that provides a variety of timely subjects and content material. May be repeated up to 9 credits. Restricted to Community Colleges campuses only.

BMGT 160. Self-Presentation and Etiquette**3 Credits**

Introduction to business etiquette based on tradition, social expectations, and professional behavior standards. Restricted to: Community Colleges only.

BMGT 191. ENACTUS (Students in Free Enterprise)**1 Credit**

ENACTUS is an international organization promoting and teaching business entrepreneurship. Students learn teamwork, leadership, and networking skills by participating in regional and national business competitions and community service projects. May be repeated up to 6 credits. Restricted to: BMGT or Pre-Business majors. Restricted to Community Colleges only.

BMGT 201. Work Readiness and Preparation**3 Credits**

Instruction in methods of selection, seeking, acquiring and retaining employment. Addresses work success skills, business etiquette, employer expectation and workplace norms. Restricted to Community Colleges campuses only.

BMGT 205. Customer Service in Business**3 Credits**

Establishes concepts of service quality in relationship to business success and maximization of returns to the organization. Explores techniques for delivering quality and service in a variety of business settings. Restricted to: Community Colleges only.

BMGT 208. Business Ethics**3 Credits**

The course examines the underlying dimensions of ethics in business, investigating ethics in relationship to the organization, the stakeholders, and society. Exploration of ethical issues from a historical context, analyzing actual events through the lens of business decision making, including legal/political, sociocultural, economic, and environmental considerations will be undertaken. Restricted to Community Colleges campuses only.

BMGT 210. Marketing**3 Credits**

Role of marketing in economy, types of markets, product development, distribution channels, pricing, promotion of goods, market research, consumer motivation, and management of marketing process. Restricted to: Community Colleges only.

Prerequisite(s): BMGT 110.

BMGT 212. Supervisory and Leadership Trends**3 Credits**

Current trends in marketing, merchandising, sales promotion and management; in manufacturing, merchandising and service types of businesses. Extensive use of practical student project. Restricted to Community Colleges only.

Prerequisite(s): BMGT 110 or BUSA 111.

BMGT 213. Consumer Lending**3 Credits**

Principles of credit evaluation, types of credit, marketing, collections, legal aspects, installment lending, leasing management, insurance, and rate structure and yields. Restricted to: Community Colleges only.

Prerequisite(s): BMGT 112.

BMGT 215. Banks and the Money Supply**3 Credits**

Practical application of the economics of money and banking. Required of all students electing the banking option. Restricted to: Community Colleges only.

BMGT 216. Business Math**3 Credits**

Application of basic mathematical procedures to business situations, including percentage formula applications, markup, statement analysis, simple and compound interest, and annuities. Restricted to: Community Colleges only.

Prerequisite(s): CCDM 103N or satisfactory math score on ACT.

BMGT 221. Internship I**1-3 Credits (1-3)**

Work experience that directly relates to a student's major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships may be paid or unpaid. Students are supervised/evaluated by both the employer and instructor. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: BMGT majors. S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.

BMGT 225. Introduction to Commercial Lending**3 Credits**

Commercial lending overview, the lending process, portfolio management, and regulation and business development. Restricted to: Community Colleges only.

Prerequisite(s): BMGT 112.

BMGT 231. Legal Issues in Business**3 Credits**

Application of fundamental legal principles to business transactions. Sources, functions, and objectives of law, including federal and New Mexico court systems and procedures, criminal law, torts, contracts, and sales, and Uniform Commercial Code. Restricted to: Community Colleges only.

BMGT 232. Personal Finance**3 Credits**

Budgeting, saving, credit, installment buying, insurance, buying vs. renting a home, income tax statement preparation, investment, and estate disposal through will and trust. Restricted to: Community Colleges only.

BMGT 235. Credit Administration**3 Credits**

Covers factors influencing and determining loan policy: methods of credit investigation and analysis, credit techniques, credit problems, and types of loans. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): BMGT 112.

BMGT 239. Visual Marketing Techniques**3 Credits**

Provides a basic understanding of visual marketing and merchandising techniques. The importance of effective presentation of a store and its merchandise is covered, as is line, balance and artistic display. Restricted to: Community Colleges only.

BMGT 240. Human Relations**3 Credits**

Human interactions in business and industrial settings. Motivation and learning experiences as related to problems of the worker and supervisor. Practical applications of human behavior. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

BMGT 248. Introduction to Quality Management**3 Credits**

Introductory practices of total quality management practices aimed at all levels of an organization to continually improve performance to include competitiveness in today's business world. Restricted to: Community Colleges only.

BMGT 250. Diversity in the Workplace**3 Credits**

Concepts of culture, diversity, prejudice, and discrimination within the domestic workforce/society. Restricted to Community Colleges campuses only.

Prerequisite(s): BMGT 110 or BUSA 111.

BMGT 260. Real Estate Practice**3 Credits**

This course is a requirement for licensure in real estate for the state of New Mexico. Topics covered include: real estate finance, settlement, foreclosure, federal taxation, valuation and appraisal, land descriptions and math skills. These topics are requirements of the New Mexico Real Estate Commission. Restricted to: Community Colleges only.

BMGT 264. Real Estate Law**3 Credits**

This course is a requirement for licensure in real estate for the state of New Mexico. Topics covered include: ownership of real estate, real estate brokerage relationships, contracts, environmental concerns and federal laws that affect real estate. These topics are requirements of the New Mexico Real Estate Commission. Restricted to: Community Colleges only. Crosslisted with: PL S 264

BMGT 268. Real Estate Broker's Basic Course**3 Credits**

State of New Mexico specific criteria that apply to real estate licensure: purchase agreements, listing agreements, New Mexico Rules and Regulations, and landlord tenant legislation. Restricted to: Community Colleges only.

Prerequisite(s): BMGT 260 & BMGT 264.

BMGT 272. E-Commerce Operations**3 Credits**

Includes the many forms of e-commerce and emerging technologies that will impact the business of tomorrow. Restricted to Community Colleges campuses only.

Prerequisite(s): OECS 105 or CS 110 or BCIS 110.

BMGT 275. Small Business Planning**3-4 Credits (3-4)**

How to start a small business based on a formal business plan. Includes feasibility study and legal requirements. Restricted to: Community Colleges only.

BMGT 277. Small Business Management**3 Credits**

Study of the principles, advantages, and problems of owning or operating a small business. Location, capital, marketing, control, and sales promotion. Restricted to Community Colleges campuses only.

Prerequisite(s): BMGT 110 or BUSA 111.

BMGT 280. Introduction to Human Resources**3 Credits**

Personnel functions encompassing job analysis, recruitment, selection, training, appraisals, discipline, and terminations. Restricted to Community Colleges campuses only.

Prerequisite(s): BMGT 110 or BUSA 111 or B A 104.

BMGT 282. Introduction to International Business Management**3 Credits**

Overview of the social, economic and cultural environment of international business transactions. Restricted to Community Colleges only.

Prerequisite(s): BMGT 110 or BUSA 111.

BMGT 285. Introduction to Manufacturing Operations**3 Credits**

Introduction to issues related to manufacturing, including an overview of the production function, product design and development, location, layout, forecasting, planning, purchasing, materials/inventory, and quality management. Restricted to Community Colleges campuses only.

Prerequisite(s): (BMGT 110 or BUSA 111) and (BMGT 140 or MGT 201).

BMGT 286. Introduction to Logistics**3 Credits**

Overview on the planning, organizing, and controlling of transportation, inventory maintenance, order processing, purchasing, warehousing, materials, handling, packaging, customer service standards, and product scheduling. Restricted to: Community Colleges only.

BMGT 287. Introduction to Export/Import**3 Credits**

Procedures and documentation for exporting and importing products. Emphasis on NAFTA regulations and other U.S. border operations crossings. Restricted to Community Colleges only.

Prerequisite(s): BMGT 110 or BUSA 111.

BMGT 290. Applied Business Capstone**3 Credits**

Refines skills and validates courses taken in BMGT program. Business simulations, case studies and projects used to test and improve business practices. Student must be within 25 credits of graduation. May be repeated up to 3 credits. Restricted to: BMGT majors. Restricted to Community Colleges campuses only.

Prerequisite(s): (BMGT 110 or BUSA 111), and (BMGT 140 or MGT 201), and (BMGT 240 or SOC 101 or PSY 201), and MKTG 203 and FIN 206.

BMGT 298. Independent Study**3 Credits**

Individual studies directed by consenting faculty with prior approval of department chair. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): Sophomore standing with 3.0 GPA.

BOT-BUSINESS OFFICE TECHNOLOGY (BOT)

BOT 101. Keyboarding Basics**3 Credits (2+2P)**

Covers correct fingering and mastery of the keyboard to develop skillful operation. Formatting basic business letters, memos, and manuscripts.

BOT 102. Keyboarding: Document Formatting**3 Credits (2+2P)**

Designed to improve keyboarding speed and accuracy; introduce formats of letters, tables and reports. A speed and accuracy competency requirement must be met.

Prerequisite: BOT 101 or consent of instructor.

BOT 105. Business English I**3 Credits**

Training and application of the fundamentals of basic grammar, capitalization and sentence structure (syntax).

BOT 106. Business Mathematics**3 Credits (2+2P)**

Mathematical applications for business, including training in the touch method of the 10-key calculator.

Prerequisite: CCDM 103N or adequate score on math placement exam.

BOT 109. Business English II**3 Credits**

Training and application of the fundamentals of punctuation, numbers, basic writing and editing skills.

Prerequisite: C or better in BOT 105.

BOT 110. Records Management**3 Credits**

Principles, methods and procedures for the selection, operation and control of manual and automated records systems.

BOT 120. Accounting Procedures I**3 Credits (2+2P)**

Business accounting principles and procedures. Use of special journals, cash control, and merchandising concepts. Reports for sole proprietorships.

BOT 121. Accounting Procedures II**3 Credits (2+2P)**

Continuation of BOT 120, emphasizing accounting principles and procedures for notes and interest, depreciation, partnerships and corporations, cash flow and financial statement analysis. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): BOT 120 or ACCT 221.

BOT 135. Keyboarding Technique Review**3 Credits**

Emphasis on improving keyboarding speed and accuracy.

Prerequisite: BOT 101 or equivalent.

BOT 140. Payroll Accounting**3 Credits (2+2P)**

Payroll procedures including payroll tax forms and deposits. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): ACCT 221 or BOT 120.

BOT 150. Medical Terminology**3 Credits**

Understanding of the basic elements of medical words. Use of medical abbreviations. Same as NURS 150 and OEHO 120.

BOT 169. Spanish Grammar for Business Administration**3 Credits**

Introductory course in Spanish grammar and practical business terms required for the proper application of fundamental oral and written business communication skills for Spanish speakers in the field of business administration. Restricted to Community Colleges campuses only.

Prerequisite(s): Spanish-speaking ability and computer keyboarding ability.

BOT 170. Office Communications in Spanish I**3 Credits**

Develop oral and written communications skills of native or near-native speakers of Spanish. The student will learn basic letter writing skills, customer service techniques, and telephone etiquette in Spanish. Restricted to Community Colleges campuses only.

Prerequisite(s): BOT 169, Spanish-speaking ability, and computer keyboarding ability.

BOT 171. Office Communications in Spanish II**3 Credits**

Develop oral and written communications skills of native or near-native speakers of Spanish. Emphasis placed on learning the office assistant's role within the office environment. Compose complex business correspondence and learn to make international travel arrangements.

Prerequisite: BOT 101 or BOT 170.

BOT 191. Taking Minutes & Proofreading**3 Credits**

Preparation and practice producing minutes suited for different meeting types and purposes. Provides strategies to prepare for meetings, to record proceedings, and to transcribe minutes while incorporating proofreading skills practice. Topics include legal requirements, meeting types, minute formats, and duties/expectations of the minute taker and the meeting chair. Graded: S/U. Restricted to Community Colleges campuses only.

Prerequisite(s): BOT 109 or consent of instructor.

BOT 202. Keyboarding Document Production**3 Credits (2+2P)**

Further development of keyboarding speed and accuracy. Production of complex letters, memos, tables, reports and business forms. A speed and accuracy competency requirement must be met.

Prerequisites: BOT 102 and BOT 109, or consent of instructor.

BOT 203. Office Equipment and Procedures I**3 Credits (2+2P)**

Office organization, telephone techniques, equipment and supplies, handling meetings, human relations, mail procedures, and travel.

Prerequisites: BOT 213 or C S 110G or consent of instructor.

BOT 205. Microcomputer Accounting I**3 Credits (2+2P)**

Introduction to automated accounting systems on microcomputers.

Prerequisite: working knowledge of computers and accounting or consent of instructor.

BOT 206. Microcomputer Accounting II**3 Credits (2+2P)**

Microcomputer accounting applications, integrating spreadsheets, word processing, graphics, and database. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): BOT 121 or BOT 215.

BOT 207. Machine Transcription**3 Credits (2+2P)**

Creating office documents using transcribing equipment and microcomputer software. Emphasis on proofreading, editing and grammar.

Prerequisites: minimum keyboarding of 45 wpm and C or better in BOT 105 or BOT 109 or equivalent and BOT 211 or BOT 213.

BOT 208. Medical Office Procedures**3 Credits (2+2P)**

Current computerized and traditional administrative medical office procedures will be introduced. Practical knowledge on managing required record keeping in a medical office environment will be emphasized. Restricted to Community Colleges campuses only.

Prerequisite(s): BOT 109 or ENGL 111G, HIT 150 or AHS 120, and computer keyboarding ability or consent of instructor.

BOT 209. Business and Technical Communications**3 Credits**

Effective written communication skills and techniques for career success in the work place. Composition of letters, memos, short reports, forms, and proposals, and technical descriptions and directions.

Prerequisites: ENGL 111G and computer keyboarding ability or consent of instructor.

BOT 211. Information Processing I**3 Credits (2+2P)**

Defining and applying fundamental information processing concepts and techniques using the current version of leading software. Restricted to Community Colleges only.

Prerequisite(s): BOT 101 or consent of instructor.

BOT 213. Word Processing I**3 Credits (2+2P)**

Operation and function of a word processor. Specific equipment to be announced in the Schedule of Classes.

Prerequisite: BOT 101 or keyboarding proficiency as demonstrated through completion of BOT 122, BOT 123, and BOT 124 or equivalent.

BOT 214. Word Processing II**3 Credits (2+2P)**

Advanced operation and functions of a word processor. Specific equipment to be announced in the Schedule of Classes.

Prerequisite: BOT 213 or consent of instructor.

BOT 215. Spreadsheet Applications**1-3 Credits**

Use of spreadsheets to include graphics and business applications. Same as OECS 215. May be repeated under different subtitles listed in the Schedule of Classes.

BOT 217. Powerpoint Presentation**3 Credits**

Comprehensive, hands-on approach to learning and applying basic and advanced features of PowerPoint. These include text enhancements, objects, fills, colors, animation, charts, sound, video, and hyperlinks. Students demonstrate appropriate audience and communication tools to deliver presentations.

Prerequisites: BOT 211 or ability to demonstrate keyboarding and Windows proficiency.

BOT 218. Information Processing II**3 Credits (2+2P)**

Advanced information processing techniques using current version of leading software. May be repeated for a maximum of 6 credits.

Prerequisite: BOT 211 or consent of instructor.

BOT 220. Internship in Business Office Technology**2 Credits**

Experience in a supervised office position. Student must work at least eight hours per week. May be repeated for a maximum of 4 credits.

Prerequisite(s): sophomore standing and consent of instructor.

BOT 221. Internship I**1-3 Credits**

Work experience that directly relates to a student's major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships may be paid or unpaid. Students are supervised/evaluated by both the employer and the instructor. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: BOT & HIT majors. S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.

BOT 222. Internship II**1-3 Credits**

Continuation of BOT 221. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: BOT & HIT majors. S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.

Prerequisite(s): BOT 221 and consent of instructor.

BOT 223. Medical Transcription I**3 Credits (2+2P)**

Concepts in medical transcription are introduced on how to produce a variety of reports required in a medical office or facility utilizing accurate medical terminology, spelling, grammar, and document formatting. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): HIT 150 or AHS 120 and HIT 158 and BOT 209.

BOT 228. Medical Insurance Billing**3 Credits (2+2P)**

Comprehensive overview of the insurance concepts and applications required for successfully and accurately completing and submitting insurance claims and reimbursement processes for various insurance carriers, both private and government, will be emphasized. Restricted to Community Colleges campuses only.

Prerequisite(s): HIT 150 or AHS 120 and BOT 208.

BOT 233. Advanced Medical Transcription**3 Credits (2+2P)**

Builds upon the concepts introduced in Medical Transcription I providing greater understanding of how to produce advanced reports dictated by physicians with increasing speed and accuracy. Emphasis will be on proofreading and editing of operative reports, patient history and physicals, office notes, labor and delivery reports, consultation reports, discharge summaries, and other medical reports. May be repeated up to 3 credits. Consent of Instructor required. Restricted to Community Colleges campuses only.

Prerequisite(s): BOT 223 and HIT 130.

BOT 239. Personal Development**3 Credits**

Development of a marketable, employable office systems person, to include interview, voice, manners, and apparel.

BOT 240. Introduction to Individual Taxation**3 Credits**

Overview of Individual Federal Taxation; awareness of tax problems pitfalls and planning opportunities; focus on individual personal financial concerns and tax planning. One semester of accounting principles/procedures is recommended.

BOT 241. Auditing and Business Issues**3 Credits**

Introduction to basic auditing concepts, the purpose for the auditing process, and requirements of persons assisting with the audit process. The course will also deal with issues of business law including contracts, sales, torts, strict liability, and business ethics. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): BOT 120 or ACCT 221.

BOT 244. Tax Preparation**3 Credits**

Introduces basic federal and state tax codes for preparing individual income tax returns. Emphasis on use of tax software.

Prerequisite: keyboarding proficiency.

BOT 250. Electronic Office Systems**3 Credits (2+2P)**

Management of the electronic office. Office use of computers, printers, fax machines, copiers, and scanner concepts will be covered.

Prerequisite: BOT 211.

BOT 260. Bookkeeping Simulation Capstone**3 Credits (2+2P)**

Refines the professional and technical skills students have learned while completing the BOT-Bookkeeping Assistant Option curriculum by demonstrating how coursework ties together. Designed as a bookkeeping assistant capstone course.

Prerequisite(s): BOT 121 or ACCT 221, BOT 140, BOT 205, and BOT 244, or consent of instructor.

BOT 270. Business Office Technology Capstone**3 Credits (2+2P)**

Refines professional skills learned in the BOT program and ties all BOT coursework together. Restricted to: Community Colleges only.

Prerequisite(s): BOT 102 or BOT 129; and BOT 120; and BOT 209 or ENGL 203G or ENGL 218G; and BOT 211 or OECS 211.

BUSA-BUSINESS ADMINISTRATION (BUSA)

BUSA 111. Business in a Global Society**3 Credits**

Overview of the global environment of business and the development of business as an integrative, cross-disciplinary activity.

C D-COMMUNICATION DISORDERS (C D)

C D 221. Introduction to Communication Disorders**3 Credits**

Basic information about speech, language, and hearing disorders; orientation to the professions of speech-language pathology and audiology.

C D 301. Language Acquisition**3 Credits**

This course introduces students to the study of the development of language, speech, and communication. Includes language sampling. May be repeated up to 3 credits. Crosslisted with: C D 509. Restricted to: C DSC D majors.

Prerequisite(s): B or better in C D 221; Cumulative GPA of 3.2 or higher.

C D 322. Anatomy and Physiology of Speech Mechanisms**3 Credits**

Structure and function of systems underlying human speech sound production and processing, including respiratory, phonatory, and articulatory components. May be repeated up to 3 credits. Crosslisted with: C D 502. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in C D 221, C D 323, C D 422, C D 324, and C D 301; and minimum 3.2 GPA.

C D 323. Phonetics**3 Credits**

The science of phonetics, including work with the International Phonetic Alphabet. Taught with C D 501. May be repeated up to 3 credits.

Restricted to: C DS,C D majors.

Prerequisite(s): B or better in C D 221; Cumulative GPA of 3.2 or better.

C D 324. Introduction to Speech Science**3 Credits**

Basic concepts and theories in acoustics, speech production and speech perception. Includes laboratory experience with instrumental measurement and analysis of speech systems. May be repeated up to 3 credits. Crosslisted with: C D 503. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in C D 221, C D 323, C D 422; and minimum 3.2 GPA.

C D 325. Language Disorders**3 Credits**

Bases, symptoms, etiologies, and treatment of language disorders. Includes review of normal language acquisition. B or better in C D 301/ C D 509,C D 302/C D 593, C D 321, C D 322/C D 502, C D 323/C D 501, and minimum 3.0 GPA. Restricted to C D majors.

Prerequisite(s): C- or better in C D 221.

C D 326. Clinical Methods and Procedures**3 Credits**

Guidelines and procedures associated with the clinical and supervisory processes. Provide opportunities to complete the supervised clinical observation requirement for participation in clinical practicum. May be repeated up to 3 credits. Crosslisted with: C D 506. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in C D 221, C D 323, C D 422, C D 324, C D 301; and minimum 3.2 GPA.

C D 374. American Sign Language I**3 Credits**

Introduction to the basics of ASL including questions, commands, sentence types, time, subjects and objects, classifiers, locative case, pluralization, and temporal and distributional aspects.

C D 375. American Sign Language II**3 Credits**

Continuation of C D 374, ASL I. Emphasis on ASL grammar, spatial referencing, detailed descriptions, and deaf culture. Features dialogues, short stories, narratives.

Prerequisite: C D 374 or consent of instructor.

C D 421. Speech and Language Disorders**3 Credits**

Bases, symptoms, etiologies, and clinical management of issues related to disorders of articulation, phonology, voice and resonance, and fluency. May be repeated up to 3 credits. Crosslisted with: C D 504. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in C D 221, C D 323, C D 422, C D 324, and C D 301; and minimum 3.2 GPA.

C D 422. Audiology**3 Credits**

Anatomy and physiology of the auditory system, bases of auditory disorders, and basic audiometric procedures. May be repeated up to 3 credits. Crosslisted with: C D 507. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in C D 221, and a minimum of 3.2 GPA.

C D 423. Neural Bases of Communication Disorders**3 Credits**

Study of the neuroanatomy and neurophysiology of communication and communication disorders. Includes review of the central nervous system and peripheral nervous system relationship to speech motor control, language, and hearing. May be repeated up to 3 credits. Crosslisted with: C D 510. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in C D 221, C D 301, C D 323, C D 422, C D 324, C D 421, C D 322, C D 326 and minimum 3.0 GPA.

C D 424. Aural Rehabilitation**3 Credits**

Overview of hearing aids and amplification devices including cochlear implants. Review of the bases and psychosocial aspects of hearing loss. Clinical management of hearing loss consistent with ASHA's scope of practice for SLPs. May be repeated up to 3 credits. Crosslisted with: C D 508. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in C D 221, C D 323, C D 422, C D 324, C D 301, C D 421, C D 322, C D 326; and minimum 3.2 GPA.

C D 425. Professional Reasoning and Scientific Thinking**3 Credits**

Overview of constructive thinking, problem solving, and decision making theories and strategies associated with professional reasoning and scientific thinking that are to be used academically and clinically in the transition from student to scholar to professional. Taught with C D 593. May be repeated up to 3 credits. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in C D 221, C D 323, C D 422, C D 324, C D 301, C D 421, C D 322, C D 326, and a minimum cumulative GPA of 3.2.

C D 476. American Sign Language III**3 Credits**

Continuation of C D 375, ASL II. Focus on more complex grammatical features. Students will comprehend and generate medium length stories, narratives, and discussions including culturally significant topics.

Prerequisite: C D 375.

C D 501. Phonetics**3 Credits**

The science of phonetics, including work with the International Phonetic Alphabet. Restricted to majors. Same as C D 390 with differentiated assignments for graduate students.

Prerequisites: a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

C D 502. Anatomy and Physiology of Speech Mechanisms**3 Credits**

Structure and function of systems underlying human speech sound production and processing including nervous, respiratory, and articulatory components. Restricted to majors. Same as C D 370 with differentiated assignments for graduate students.

Prerequisites: a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

C D 503. Speech Science**3 Credits (2+3P)**

Basic concepts and theories in acoustics, speech production, and speech perception. Laboratory experience with instrumental measurement and analysis of speech systems. Restricted to majors. Same as C D 380 with differentiated assignments for graduate students.

Prerequisites: a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

C D 504. Speech and Language Disorders**3 Credits**

Bases, symptoms, etiologies, and treatment of language disorders. Includes review of normal language acquisition. Taught C D 421.

Prerequisite(s): B or better GPA.

C D 505. Research Methods**3 Credits**

Introduction to basic qualitative, quantitative, and single subject research methodology in speech-language pathology and audiology. Restricted to majors.

Prerequisites: a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

C D 506. Clinical Methods and Procedures**3 Credits**

Guidelines and procedures associated with the clinical and supervisory processes. Provide opportunities to complete the supervised clinical observation requirement for participation in clinical practicum. Differentiated assignments for graduate students. Taught with C D 326.

Restricted to: C DS, C D majors.

Prerequisite(s): B or better GPA.

C D 507. Audiology**3 Credits**

Anatomy and physiology of the auditory system, bases of auditory disorders, and basic audiometric procedures. Differentiated assignments for graduate students. Taught with C D 422. Restricted to: C D, C DS majors.

Prerequisite(s): Minimum of 3.0 GPA.

C D 508. AURAL REHABILITATION**3 Credits**

Overview of hearing aids and amplification devices including cochlear implants. Review of the bases and psycho-social aspects of hearing loss. Clinical management of hearing loss consistent with ASHA's scope of practice for SLPs. Taught with C D 424. Differentiated assignments for graduate students. Restricted to: C D, C DS majors.

Prerequisite(s): Minimum 3.0 GPA.

C D 509. Language Acquisition**3 Credits**

Normal development of communication across the age span. Includes language sampling and analysis. A minimum grade of B- in all graduate courses and a minimum overall GPA of 3.0 required. Taught with C D 360 with differentiated assignments for graduate students. Restricted to CD majors and LING majors.

C D 510. Neural Bases of Communication Disorders**3 Credits**

Study of the neuroanatomy and neurophysiology of communication and communication disorders. Includes review of the central nervous system and peripheral nervous system relationship to speech motor control, language, and hearing. Crosslisted with: C D 423. Restricted to: CD, CDS majors.

C D 521. Professional Issues and Multicultural Practices in Communication Disorders**3 Credits**

This course includes a range of topics pertinent to students entering professional practice as speech-language pathologists including current legal, cultural, ethical, and clinical service provision issues. Restricted to: C DS, C D majors.

Prerequisite(s): Minimum of 3.0 GPA.

C D 522. Interpreter Workplace Skills in Communication Studies**1 Credit**

The purpose of this course is to identify principles and procedures necessary to be an effective interpreter and to use an interpreter in the field speech, language, hearing and swallowing disorders. Students will identify the history the use of interpreters, the interpreting process, bilingual vocabulary appropriate for the scope of practice in the field, bilingual assessment principles, second language learning principles and multicultural aspects to consider in the interview and interpreting process. The students will engage in several interpreter scenarios for interview, assessment and intervention cases. Restricted to: C D majors.

Prerequisite(s): Minimum of 3.0 GPA.

C D 523. Assessment of Communication Disorders**3 Credits**

Diagnostic theories and management of communication disorders using standardized and descriptive methodology. Includes the practice of interviewing, testing, and oral and written reporting. Restricted to: C DS, C D majors.

Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

C D 525. Pediatric Language and Disorders**3 Credits**

Normal communication development of neonates, infants, toddlers, and preschoolers; etiologies, and treatment of cognitive, linguistic and social elements of communication problems in family systems. Restricted to majors.

Prerequisites: minimum grade of B- and an overall GPA of 3.0 or higher.

C D 530. School Age Language and Disorders**3 Credits**

Normal communication-learning development of elementary, secondary, and postsecondary students; etiologies, diagnosis, and treatment of interpersonal communication and language-based academic disorders. Restricted to majors.

Prerequisites: a minimum grade of B- in all graduate courses and an overall GPA of 3.0 or higher.

C D 535. Aphasia & Cognitive Linguistic Disorders**3 Credits**

Etiologies, diagnosis, assessment, and treatment of adult aphasia and cognitive-linguistic disorders. Restricted to: C DS, C D majors.

Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

**C D 541. Advanced Spanish Morpho-Syntax for Education Professionals
3 Credits**

This class has been designed for Heritage Speakers of Spanish who work in educational settings. It will cover the essential linguistic theory and fundamental structures of the Spanish language. This includes, but is not limited to, verb morphology, morphosyntactic and syntactic structures. The main goal of this course is to determine what usages fall within the norms of an individual's speech community, or if there are elements that fall outside those norms.

Prerequisite(s): Students have to be fluent in Spanish as course will be conducted in Spanish.

**C D 542. Articulation and Phonological Disorders
3 Credits**

Advanced study of the symptoms, etiologies, assessment, and clinical management of articulation and phonological disorders including cleft palate and disorders of resonance. Restricted to: C DS, C D majors.

Prerequisite(s): A minimum grade of B- in all graduate courses and a minimum overall GPA of 3.0 is required.

**C D 545. Introduction to Augmentative and Alternative Communication
3 Credits**

Assessment and intervention for children and adults with developmental disabilities; Alternative communication strategies and systems for individuals with severe speech and/or language impairments. May be repeated up to 3 credits. Restricted to: C DS, C D majors.

Prerequisite(s): Graduate standing; overall GPA of 3.0.

**C D 547. Cognitive-Linguistic Communication Disorders
3 Credits**

Topics include attention, memory, executive function, and underlying neuropathologies, with emphasis on assessment, diagnosis, prognosis, treatment and recovery processes in cognitive communication disorders related to traumatic brain injury, dementia, and right hemisphere brain damage. May be repeated up to 3 credits. Restricted to: C DS, C D majors.

Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0.

**C D 548. Best Practices in Bilingual/Multicultural Assessment for Practitioners
3 Credits**

The purpose of this course is to provide future speech-language pathologists, educational diagnosticians and special educators with a foundation for evaluating the linguistic, cognitive and academic skills of students from any cultural linguistic background. The course covers a review of the literature on best practices for working with interpreters during assessments. Practitioners will be expected to gather qualitative information about cultural/linguistic and educational histories of school-age children and integrate those results with the results of standardized tests.

Prerequisite(s): C D 594.

**C D 555. Instrumentation in Communication Disorders
2 Credits**

This course will provide graduate students with information regarding the purpose and operation of a variety of perceptual assessment and instrumental tools for the evaluation and treatment of voice, fluency, and resonance disorders. Restricted to: C D majors.

**C D 574. American Sign Language III
3 Credits**

Continuation of ASL II. Focus on more complex grammatical features. Students will comprehend and generate medium length stories, narratives, and discussions including culturally significant topics.

Prerequisite: C D 375 or consent of instructor.

**C D 583. Dysphagia
3 Credits**

Study of the anatomy and physiology of swallowing and upper aerodigestive systems. Review of the bases and etiologies of child and adult swallowing disorders, including diagnosis, assessment, and treatment. Restricted to: C DS, C D majors.

Prerequisite(s): A course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

**C D 584. Fluency Disorders
3 Credits**

Speech fluency development and the disorders of stuttering, cluttering, and neurogenic dysfluency. Restricted to: C DS, C D majors.

Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

**C D 585. Motor Speech Disorders
3 Credits**

Advanced studies of dysfunction of the nervous system that affect speech. Includes evaluation, diagnosis, and treatment of speech apraxias and dysarthrias. Restricted to: C DS, C D majors.

Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

**C D 586. Voice Disorders/Head and Neck Anomalies
3 Credits**

Advanced studies of anatomy and physiology of the vocal tract with emphasis on diagnosis, assessment, and treatment of voice disorders, laryngectomy, cleft palate, and other oral-facial anomalies. Restricted to: C DS, C D majors.

Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

**C D 587. Cleft Palate and Syndromes
2 Credits**

An advanced study of etiology, assessment and treatment of craniofacial anomalies with a focus on the effects of clefts of the lip and/or palate on speech, resonance and velopharyngeal dysfunction. Review of the contribution of interdisciplinary cleft palate team care managing feeding, audiologic, surgical, orthodontic, and psychosocial aspects. General review of embryology and common syndromes with associated speech, language, and hearing disorders. Consent of Instructor required. Restricted to: C D, C DS majors.

Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

**C D 589. Practicum in Speech-Language Pathology
1-4 Credits (1-4)**

Supervised clinical practice in a variety of speech, language, and hearing disorders. Practicum includes diagnostic, treatment, and management work through direct patient/client contact. Attendance at weekly clinical staff meetings is required. May be repeated for a maximum of 15 credits. Restricted to majors.

Prerequisite: good standing in the graduate school; a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

C D 590. Clinical Education**1 Credit**

This course is specifically designed to target the knowledge base necessary to initiate clinical practicum in the CD Program. The learning objectives are based upon the Council of Academic Accreditation in Audiology and Speech-language Pathology (CAA) standards and knowledge areas. These learning outcomes are developed to assist students in clinical practicum and are specific to the services provided to clients of the NMSU Edgar R. Garrett Speech and Hearing Center.

Restricted to: C DS, C D majors.

Corequisite(s): C D 589.

C D 591. Special Topics**1-9 Credits**

Individual and/or group study of special topics identified by subtitle. May be repeated for a maximum of 9 credits.

Prerequisite: prior arrangement with faculty; a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

C D 593. Professional Reasoning and Scientific Thinking**3 Credits**

Overview of constructive thinking, problem solving, and decision making theories and strategies associated with professional reasoning and scientific thinking that are to be used academically and clinically in the transition from student to scholar to professional. Restricted to majors. Same as C D 393 except for differentiated assignments for graduate students.

Prerequisites: a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

C D 599. Master's Thesis**15 Credits**

Thesis.

C D 640. Externship in Communication Disorders**3-9 Credits (3-9)**

This course is designed to provide opportunities for the developing clinician to provide treatment to and evaluations for clients in a full term externship experience under the supervision of a licensed SLP. May be repeated up to 9 credits. Consent of Instructor required. Restricted to: C DS, C D majors.

C E-CIVIL ENGINEERING (C E)

C E 109. Computer Drafting Fundamentals**3 Credits (2+2P)**

Same as DRFT 109, E T 109, SUR 109.

C E 151. Introduction to Civil Engineering**3 Credits**

Problem solving and use of computer software for civil engineering applications.

Prerequisite(s): ENGR 100.

Corequisite(s): MATH 190.

C E 198. Special Topics**1-3 Credits**

May be repeated for a maximum of 6 credits.

Prerequisite: consent of department head.

C E 233. Mechanics-Statics**3 Credits**

Engineering mechanics using vector methods.

Prerequisites: MATH 192G and cumulative GPA of 2.0.

Corequisite: PHYS 215G.

C E 234. Mechanics-Dynamics**3 Credits**

Kinematics and dynamic behavior of solid bodies utilizing vector methods.

Prerequisite(s): C E 233, MATH 192G, PHYS 215G.

C E 256. Environmental Engineering and Science**3 Credits**

Principles in environmental engineering and science: physical chemical systems and biological processes as applied to pollution control.

Crosslisted with: E S 256

Prerequisite(s): CHEM 111 and MATH 191G.

C E 256 L. Environmental Science Laboratory**1 Credit**

Laboratory experiments associated with the material presented in C E 256. Same as E S 256L.

Corequisite: C E 256.

C E 298. Special Topics**1-3 Credits**

May be repeated for a maximum of 6 credits.

Prerequisite: consent of department head.

C E 301. Mechanics of Materials**3 Credits**

Stress, strain, and elasticity of materials.

Prerequisite: C E 233.

C E 311. Civil Engineering Materials**3 Credits (2+3P)**

Introduction to the structure, physical properties, testing and mechanical behavior of civil engineering materials and components made from these materials.

Prerequisite: C E 301.

C E 315. Structural Analysis**4 Credits (3+3P)**

Classical analysis of determinate and indeterminate structures; introduction to modern methods of structural analysis using computer programs.

Prerequisite(s): C E 301.

C E 331. Fluid Mechanics and Hydraulics**3 Credits**

Fluid Mechanics and Hydraulics. Fundamentals and theory of fluid mechanics, compressible fluids, flow of incompressible fluids in open and closed conduits. Restricted to: CE majors.

Prerequisite(s): PHYS 215, C E 233.

C E 331 L. Fluid Mechanics and Hydraulics Laboratory**1 Credit**

Fundamentals and Theory of Fluid Mechanic, compressible and incompressible flow of fluids in open and closed conduits.

Prerequisite(s)/Corequisite(s): C E 331. Restricted to: C E majors.

C E 355V. Technology and the Global Environment**3 Credits**

A scientific basis for understanding changes in the global environment that result through the complex interactions of natural phenomena and the impacts of the activities of man.

Prerequisites: junior or senior standing, and the general education requirements for math and natural sciences.

C E 356. Fundamentals of Environmental Engineering**3 Credits**

Introduction to water treatment and water pollution and the analysis and design of selected treatment processes.

Prerequisite(s): C E 256.

C E 357. Soil Mechanics**3 Credits (2+3P)**

Engineering properties of soils, consolidation settlement, compaction, water flow through soils, geostatic stresses, soil shear strength, lateral earth pressure, and soil laboratory testing.

Prerequisite(s): C E 160 or GEOL 111G, and C E 301.

C E 365. Intermediate Structural Analysis**1 Credit**

Classical analysis of indeterminate structure; introduction to matrix method of structural analysis.

Prerequisite(s): C E 301 and C E 315.

C E 382. Hydraulic and Hydrologic Engineering**3 Credits**

Analysis and design of hydraulic systems, including pipe networks, open channels, regulating structures, and pumping systems. Surface water and groundwater hydrology, analysis and design. May be repeated up to 3 credits.

Prerequisite(s): C E 331 and C E 331 L.

C E 398. Special Topics**1-3 Credits**

May be repeated for a maximum of 6 credits.

Prerequisite: consent of department head.

C E 430. Environmental Management Seminar II**1 Credit**

Survey of practical and new developments in environmental management field, hazardous and radioactive, waste management, and related health issues, provided through a series of guest lectures and reports of ongoing research. Restricted to: Main campus only. Crosslisted with: CH E 430, E E 430, E S 430, E T 430, I E 430, M E 430 and WERC 430

C E 444. Elements of Steel Design**3 Credits**

Analysis and design of tension members, beams, columns, and bolted and welded connections.

Prerequisite(s)/Corequisite(s): C E 311. **Prerequisite(s):** C E 315.

C E 445. Reinforced Concrete Design**3 Credits**

Design and mechanics of structural reinforced concrete members.

Prerequisite(s)/Corequisite(s): C E 311. **Prerequisite(s):** C E 315.

C E 452. Geohydrology**3-4 Credits (3+1P)**

Origin, occurrence, and movement of fluids in porous media and assessment of aquifer characteristics. Development and conservation of ground water resources, design of well fields. Crosslisted with: E S 452 and GEOL 452.

Prerequisite(s): Junior or Senior.

C E 454. Wood Design**3 Credits**

Theory and design of wood structural members and systems subjected to gravity and lateral loads. Taught every other year, alternates with C E 455, Masonry Design.

Prerequisite(s)/Corequisite(s): C E 311. **Prerequisite(s):** C E 315.

C E 455. Masonry Design**3 Credits**

Theory and design of masonry structural members and systems subjected to gravity and lateral loads. Taught every other year, alternates with C E 454, Wood Design.

Prerequisite(s)/Corequisite(s): C E 311. **Prerequisite(s):** C E 315.

C E 457. Foundation Design**3 Credits (2+3P)**

Application of principles of classical soil mechanics to the design of shallow and deep foundations, and the fundamentals of geotechnical site investigation.

Prerequisite(s): C E 357.

C E 460. Site Investigation**3 Credits (2+2P)**

Investigation and characterization of surficial and subsurface geologic materials and ground water for civil engineering projects. Includes exploration program, drilling and sampling, rock and soil classification and logging, groundwater monitoring, profiles, and preparation of geotechnical reports. Pre/

Prerequisite(s): C E 357.

Corequisite(s): C E 457.

C E 469. Structural Systems**3 Credits**

Design of structural systems for buildings and bridges. May be repeated up to 3 credits.

Prerequisite(s): C E 444 or C E 445 or C E 457.

C E 470. Design of Municipal and Hazardous Waste Landfills**3 Credits**

Solid waste and application of geotechnical engineering principles and methods to the site selection and design of municipal and hazardous waste landfills.

Prerequisite(s): C E 357 and C E 452, or consent of instructor.

C E 471. Transportation Engineering**3 Credits**

Highway and traffic design and systems.

Prerequisite(s): MATH 291.

C E 473. Transportation Analysis**3 Credits**

Transportation Analysis of land-based transportation modes. Crosslisted with: C E 573.

Prerequisite(s): C E 471.

C E 477. Engineering Economics and Construction Management**3 Credits**

Engineering economics, construction and project management.

Prerequisite(s): STAT 371.

Corequisite(s): C E 357.

C E 479. Pavement Analysis and Design**3 Credits**

Covers stresses and deflections in pavement layers, material characterization, flexible and rigid pavement design by AASHTO, and rehabilitation concepts.

Prerequisite(s): C E 357.

C E 481. Civil Engineering Capstone Design**3 Credits**

Culminating multidisciplinary project-oriented capstone design. Ethics, professional development, global issues.

Prerequisite(s)/Corequisite(s): C E 457, C E 471, C E 477. **Prerequisite(s):** C E 356, C E 382, and either C E 444 or C E 445.

C E 482. Hydraulic Structures**3 Credits**

Engineering design of water-regulating structures. Capstone design course. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): C E 477. Prerequisite(s): C E 382.

C E 483. Surface Water Hydrology**3 Credits**

Hydrologic cycle and relationships between rainfall and surface water runoff.

Prerequisite: C E 331 or consent of instructor.

C E 485. Design of Earth Dams**3 Credits**

Engineering design applied to site selection, foundation inspection and treatment, hydrology and hydraulics, stability, and seepage analysis. Economic and environmental factors.

Prerequisite(s): C E 357.

C E 498. Special Topics**1-3 Credits**

May be repeated for a maximum of 9 credits.

Prerequisite: consent of department head.

C E 501. Advanced Mechanics of Materials**3 Credits**

Study of stress and strain in two and three dimensions, theories of failure, stress concentrations, unsymmetrical bending, curved beams, beams on elastic foundations, column theories, torsion, thick-wall cylinders. Same as M E 501.

Prerequisites: C E 301, MATH 392.

C E 502. Advanced Mechanics of Steel Structures**3 Credits**

Advanced structural mechanics applicable to steel structures. Includes inelastic behavior, plastic analysis, column and frame stability and torsion.

Prerequisite: C E 444.

C E 503. Special Design and Analysis Program**3-6 Credits**

Design and analysis covering subject matter of an approved 450 undergraduate departmental course plus an additional report or project. Course may be subtitled in the Schedule of Classes. May be repeated once for a total of 6 credits.

Prerequisite: consent of instructor/committee.

C E 504. Advanced Engineering Design**3 Credits**

Advanced engineering design covering subject matter of a selected capstone undergraduate design course plus an additional report or project. May be subtitled.

Prerequisite: consent of instructor/committee.

C E 505. Advanced Mechanics of Concrete**3 Credits**

Advanced structural mechanics applicable to concrete structures. Topics include: nonlinear-elastic modeling and analysis of reinforced concrete structures, seismic behavior of reinforced concrete structures, and deformation of members under various loads. To be taught along with C E 605.

Prerequisite(s): C E 445.

C E 506. Advanced Soil Mechanics**3 Credits**

Stress and strain analyses in soil, stress paths; drained and undrained shear strengths of granular soils and clays, consolidation, liquefaction, soil improvement.

Prerequisite: C E 457 or consent of instructor.

C E 507. Design of Earth Retaining Structures**3 Credits**

Lateral earth pressure theory, soil-reinforcement interaction, and analysis and design of rigid and flexible earth retaining structures for support of fills and excavations, including retaining walls, mechanically stabilized earth (MSE) walls, sheet pile walls, anchored walls, tiebacks and soil nailing. Pre/

Prerequisite(s): C E 357.

Corequisite(s): C E 457.

C E 508. Advanced Soil Behavior**3 Credits**

The course covers particle-scale phenomena that govern the macro-scale behavior of soils. Topics covered in the class include classical concepts as well as contemporary advances in soil mechanics. The students will develop a fundamental understanding of soil-water interaction, theories of contact level deformation, and mass and energy transport through granular media. Consent of Instructor required.

Prerequisite(s): C E 357 or Instructor Consent.

C E 509. Deep Foundations**3 Credits**

Behavior, analysis and design of pile and pier foundations subjected to axial and lateral loads.

Prerequisite: C E 457 or consent of instructor.

C E 515. Finite Element Methods**3 Credits**

Introduces the finite element method. Topics may include beam, frame, plane stress, plane strain, axisymmetric, and 3-D stress elements. Includes static and dynamic analysis. Uses readily available finite-element software.

Prerequisite: graduate standing or consent of instructor.

C E 530. Environmental Management Seminar I**1 Credit**

Survey of practical and new developments in hazardous and radioactive waste management provided through a series of guest lectures and reports of ongoing research.

C E 531. Open Channel Hydraulics**3 Credits**

Theoretical and applied hydraulics of open channels, with emphasis on nonuniform flow, rapidly varied flow, and wave formation.

Prerequisite: C E 382 or consent of instructor.

C E 543. Advances in Concrete Technology**3 Credits**

Advanced topics related to concrete materials, including mixture proportioning with nontraditional admixtures, roles and side effects of concrete admixtures, durability of concrete, nondestructive testing of concrete, creep, and shrinkage.

Prerequisites: C E 311 and C E 445.

C E 544. Advanced Design of Steel Structures**3 Credits**

Connection design; beam, column, and beam-column stability and design; and seismic frame design.

Prerequisites: C E 444 and C E 468.

C E 545. Advanced Concrete Design**3 Credits**

Prestressed concrete, ultimate strength theory, design of shell structures.

Prerequisites: C E 445 and C E 468.

C E 547. Bridge Engineering**3 Credits**

Topics related to prestressed concrete, reinforced concrete and steel bridge design according to the AASHTO specifications; bridge analysis and evaluation. May be repeated for a maximum of 6 credits.

Prerequisite: C E 469 or consent of instructor.

C E 550. Environmental Management Seminar II**1 Credit**

Survey of practical and new developments in hazardous and radioactive waste management provided through a series of guest lectures and reports of ongoing research.

C E 554. Wood Design**3 Credits**

Theory and design of wood structural members and systems subjected to gravity and lateral loads. Design project required. Taught every other year, alternates with C E 555 - Masonry Design.

C E 555. Masonry Design**3 Credits**

Theory and design of masonry structural members and systems subject to gravity and lateral loads. Design project required. Taught every other year, alternates with C E 554 - Wood Design.

C E 557. Water Resources Development**3 Credits**

Students function as members of a consulting panel and prepare reports on major water resources development problems. Political, financial, and social aspects of water resources development are considered as well as scientific and technical details. Background: C E 450.

Corequisite: C E 483, or C E 482.

C E 571. Structural Dynamics**3 Credits**

Response of elastic structure to dynamic loading. Moving load, earthquake and blast loading.

Prerequisite: C E 468 or consent of instructor.

C E 572. Earthquake Engineering**3 Credits**

Earthquake characteristics; seismic loads; elastic and inelastic response; analysis and design of buildings for earthquakes.

Prerequisites: graduate standing and consent of instructor.

C E 573. Transportation Analysis**3 Credits**

Transportation analysis of land-based transportation modes. Crosslisted with: C E 473.

Prerequisite(s): C E 471.

C E 577. Advanced Pavement Analysis**3 Credits**

Review of advanced constitutive models for pavement materials and their implementation in finite element analysis.

Prerequisite(s): C E 479 and C E 515 or consent of instructor.

C E 579. Ground Improvement**3 Credits**

The objective of this course is to introduce common ground improvement techniques, including mechanical (compaction, soil reinforcement, preloading and accelerated consolidation) and chemical (cementing, ion-replacement, polymer bonding) stabilization methods, as well as seepage and dewatering. Emphasis will be placed on developing an understanding of the underlying physical and chemical processes involved in each case.

Prerequisite(s): C E 357.

C E 581. Ground Water Hydrology**3 Credits**

Mathematical treatment of water flow in porous media. Emphasis on hydraulics of water movement, including pumping and recharge wells, drainage, and water quality.

Prerequisites: MATH 392, G EN 452, and C E 382, or consent of instructor.

C E 582. Statistical Hydrology**3 Credits**

Application of statistical techniques to hydrologic data, including distributions, hypothesis testing, linear models, non-parametrics, and time-series and stochastic models.

C E 585. Slope Stability Analysis and Design**3 Credits**

Design of earth slopes, causes of instability, limit equilibrium methods, slope reinforcement (geosynthetics soil nailing, tiebacks), seismic analysis, rock slope stability. Consent of instructor required.

C E 586. Geotechnical Earthquake Engineering**3 Credits**

Earthquake origin and geology; wave propagation; dynamic soil properties; ground response analysis; local site effects; design ground motion; liquefaction assessment. Consent of Instructor required.

Prerequisite(s): C E 506 or consent of instructor.

C E 596. Special Topics**1-3 Credits**

May be repeated for a maximum of 6 credits.

Prerequisite: consent of department head.

C E 598. Special Research Programs**1-3 Credits**

Individual investigations either analytical or experimental. May be subtitled. Maximum of 3 credits per semester.

C E 599. Master's Thesis**15 Credits**

Thesis.

C E 600. Doctoral Research**1-15 Credits**

Research.

C E 604. Advanced Engineering Topics**3 Credits**

In depth study of a topic at the forefront of environmental engineering & science. Journal papers will be critically reviewed and students will be asked to write an analysis of the topic and present their thoughts orally.

C E 615. Advanced Finite Element Methods**3 Credits**

Finite element method with emphasis on stress analysis. May include development and use of plane stress, plane strain, and 3-D and shell elements. Includes static, dynamic, and nonlinear analysis.

Prerequisite: graduate standing.

C E 645. Prestressed Concrete**3 Credits**

Behavior of prestressed concrete; design of statically determinate and indeterminate structures; estimation of prestress loss; flexure and shear strength; deflections and stress control; composite behavior and design.

Prerequisite(s): graduate standing and consent of instructor.

C E 671. Scientific Approaches to Transportation Research**3 Credits**

This course addresses professional and ethical practices for doing, managing, and evaluating research programs and projects. Students will learn about the critical elements in the research process, turning research objectives into research hypotheses, testing of the hypotheses and evaluation of the results. The course will look at the scientific method as well as the management and handling of data as it applies to transportation research. Consent of Instructor required.

Prerequisite(s): C E 471.

C E 682. Topics in Hydrodynamics II**3 Credits**

Selected topics in flow in open channels, flow-through porous media, and transport of sediments and contaminants. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

C E 698. Special Research Programs**1-3 Credits**

May be subtitled. May be repeated for a maximum of 9 credits.

C E 700. Doctoral Dissertation**15 Credits**

Dissertation.

C EP-COUNSELING & EDUC PSY (C EP)

C EP 110G. Human Growth and Behavior**3 Credits**

Introduction to the principles of human growth and development throughout the life span.

C EP 199. Academic Excellence**1 Credit**

Academic curriculum of excellence that includes the development of collaborative learning and student success environment, learning diverse learning styles and multiple intelligences, and developing multi-contextual academic communication styles. Students must enroll in course for both Fall and Spring semesters. Course does not count toward CEP minor. May be repeated up to 2 credits.

C EP 210. Educational Psychology**3 Credits**

Psychological foundations as they apply to the learner in the class room setting.

C EP 215. The Preschool Child**3 Credits**

Survey of psychological development from conception to age five.

C EP 240. Adolescence in School Settings**3 Credits**

Survey of psychological development during the adolescent years.

C EP 298. Exploration of Counseling & Community Psychology**3 Credits**

An exploration of careers, activities, & techniques in counseling, school, and community psychology. Course does not count towards CEP minor. May be repeated up to 6 credits.

C EP 299. Academic Excellence Classes**1-6 Credits (1-6)**

Academic curriculum of excellence that includes an in-depth understanding of the elements that promote student academic success. Students will develop leadership and presentation skills needed to forge effective student mentor relationships and conduct outreach to campus and local community leaders to cultivate a collaborative learning environment. May be repeated up to 6 credits.

C EP 300V. Human Relations Training**3 Credits**

Gain skills, knowledge, and sensitivity for living and working with others.

C EP 320. Sex Roles in Education**3 Credits**

Physiological, psychological, and political aspects of sex role socialization and the effects of these factors on personal development.

C EP 420. Introduction of Mindfulness Practice**3 Credits**

Students will learn about contemplative practices through learning and participation in various mindfulness practices. Engages students in a practice or experience that leads to reflection and, thus, acquired knowledge about themselves, others, and group functioning.

C EP 451V. Introduction to Counseling**3 Credits**

Principles of counseling for nonmajors.

C EP 455. Addictions Prevention and Recovery**3 Credits**

Understanding addictions process, prevention, and recovery, including biological, interpersonal and sociological influences, and intervention strategies. Taught with C EP 555.

C EP 461. Family Guidance**3 Credits**

Systems based guidance procedures for enhancing family strengths and development, and application of family guidance procedures for prevention and remediation of problems. Taught with C EP 561.

Prerequisite(s): C EP 110G.

C EP 495. Psychology, Multiculturalism and Counseling**3 Credits**

Understanding social identities such as race, ethnicity, sexual orientation, age, social class and spirituality as it relates to psychosocial development, academic achievement and counseling.

C EP 498. Internship in Counseling & Community Psychology**1-6 Credits (1-6)**

Students will explore in more depth the fields of counseling, community, and school psychology professions by completing an internship. Through the completion of the internship students will gain hands on work experience, enhance sensitivity for respect with working with diverse populations, and hone their interpersonal skills needed to succeed in the counseling, community, and school psychology professions. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: CCP majors.

C EP 499. Independent Study**1-6 Credits**

Individual study directed by consenting faculty.

C EP 503. Introduction to Counseling**3 Credits**

Overview of counseling theory, techniques, ethics, and professional issues. Same as C EP 451V. This course is open to all majors.

C EP 505. Appraisal of Psychoeducational Achievement in a Diverse Society**3 Credits**

Advanced theory and use of norm and criterion referenced instruments in the classroom: planning of prescriptive and educational programs. Consent of Instructor required.

C EP 511. Introduction to Inferential Statistics**3 Credits**

An introduction to the theories and techniques of inferential statistics as applied to education and psychology. Includes sampling distributions, confidence intervals, t-test, correlation, and chi-square. Intended primarily for post-baccalaureate students. Both hand calculation and computer packages will be employed. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: NURS; FCS; and all education majors.

C EP 512. Human Development**3 Credits**

Theory and research regarding cognitive, social, and emotional development across the lifespan with emphasis on enhancing human development. This course is open to all majors.

C EP 515. Learning Theory**3 Credits**

Survey and comparison of theory and research regarding human learning as they apply to development, education, and counseling. Crosslisted with: C EP 615

Prerequisite(s): C EP 512 or consent of instructor.

C EP 517. Multicultural Counseling**3 Credits**

Understanding age, gender, ethnicity, socioeconomic status and culture in relation to human development, education, and counseling.

Prerequisite(s)/Corequisite(s): C EP 512 or concurrent enrollment or consent of instructor.

C EP 519. Psychology of Social Identities**3 Credits**

Theory, research and practice from feminist and multicultural perspectives will examine the integration of social identities such as gender, sexual orientation, race, ethnicity, age, social class, spirituality, and ability in relation to counseling psychology. Same as C EP 619.

Prerequisite: C EP 512 or concurrent enrollment or consent of instructor.

C EP 520. The Art & Science of Mindfulness**1-3 Credits (1-3)**

In this course students will learn about contemplative practices by learning about and participating in various mindfulness practices for self-care and to increase well-being. Students will learn about psychological theories and research that support the use of mindfulness in helping others increase their well-being. Students will learn how to teach mindfulness to others. Taught with CEP 490.

C EP 522. Organization and Administration of School Counseling Services**3 Credits**

Procedures for establishing and maintaining counseling programs in the schools. Professional and ethical issues in school counseling and group laboratory experience to enhance self-awareness and interpersonal skills for effective professional relationships. Restricted to majors.

Prerequisite: consent of instructor.

C EP 524. Professional Issues in Mental Health Counseling**3 Credits**

History, roles, organizational structures, settings, ethics, standards, laws, and credentialing related to mental health counseling. Group laboratory experience to enhance self-awareness and interpersonal skills for effective professional relationships. Restricted to majors.

Prerequisite: consent of instructor.

C EP 529. Indigenous Counseling Theory and Practice**3 Credits**

Students will explore current uses of indigenous modes and methods of counseling and therapy that are theoretically consonant with Indigenous/ Native traditions. They will examine the integration of such modes to ensure a progressive reconstruction of the counseling endeavor to include an indigenous epistemology in their work with clients. Taught with C EP 429. This course is open to all majors. Consent of Instructor required.

C EP 532. Research Methods**3 Credits**

Develop research and program evaluation including critical literature review, generating questions, quantitative and qualitative methodology, analysis, and writing proposals.

C EP 542. Appraisal Theory and Technique**3 Credits**

Selection, administration, and interpretation of tests and other assessment methods. Topics include reliability, validity, norms, cultural factors, and ethics related to appraisal. May be repeated up to 3 credits. Restricted to: C G,CEP,C EP,CMHC majors.

Prerequisite(s): C EP 512 and C EP 517, or consent of instructor.

C EP 547. Appraisal of Cognitive Functioning**3 Credits**

Selection, administration, scoring, interpretation, and report writing using individual tests of intelligence. Moderator variables, such as acculturation, ethnic identity development, and world view are also incorporated. Restricted to majors. Taught with C EP 647. Consent of instructor required.

Prerequisite(s): C EP 542 and consent of instructor.

C EP 549. Indigenous Research Methods**3 Credits**

Students will gain an understanding of ethical and respectful research practices from an Indigenous/culturally appropriate vantage. They will thoroughly examine the works of Native/Tribal and Indigenous scholarship. Additionally, safeguards for ethical research practices with native populations will be thoroughly examined with regard to intent, practice, and integration of outcome. This course is open to all majors.

C EP 550. Counseling Theory and Technique**3 Credits**

Major theories of counseling with an emphasis on development of the ability to offer theory-based counseling and consultation. May be repeated up to 3 credits. Restricted to: SPSY,CEP,C EP,C G,CMHC majors.

Prerequisite(s): C EP 512, or concurrent enrollment.

C EP 551. Diagnosis and Treatment Planning**3 Credits**

Appraisal and conceptualization of mental disorders and other problems through diagnostic interviewing using the DSM. Treatment planning for counseling with children, adolescents, and adults. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: SPSY,CEP,C EP,C G,CMHC majors.

Prerequisite(s): C EP 512 or concurrent enrollment, or consent of instructor.

C EP 552. Career/Life Planning and Vocational Assessment**3 Credits**

Vocational choice theories, relationship between career choice and life style, sources of occupational and educational information, and approaches to decision making and values clarification. Laboratory involves supervised interpretation of vocational assessment. This course is open to all majors. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

C EP 554. Counseling Theory and Techniques for School Psychologists**3 Credits**

Major theories of counseling with an emphasis on development of the ability to offer theory-based counseling and consultation. May be repeated up to 3 credits. Restricted to: CEP,SPSY,C EP,CMHC majors.

Prerequisite(s): C EP 524, or concurrent enrollment.

C EP 556. Addictions Counseling**3 Credits**

Emphasis on alcohol and other psychoactive substance abuse. Also includes eating disorders, gambling, and other addictive behaviors. Covers review of psychopharmacology, assessment, and diagnosis with the major focus on treatment and professional issues. May be repeated up to 3 credits. Restricted to: CEP,C EP, C G,SPSY,CMHC majors.

Prerequisite(s): C EP 550.

C EP 558. Child and Adolescent Counseling Theory and Technique**3 Credits**

Counseling theory and technique applied to children and adolescents from a developmental perspective in school and mental health settings. May be repeated up to 3 credits. Restricted to: C G,CEP,C EP,CMHC majors.

Prerequisite(s): C EP 550 or consent of instructor.

C EP 559. Healing Trauma, Including Historical and Intergenerational**3 Credits**

Students will learn about Trauma to gain a deeper understanding of the socio-political implications of colonization on Native people groups. They will learn about incidents of physical and mental health disparities. Students will thoroughly examine the impact of the current mental health field on Native/Indigenous populations and engage the literature from Native Scholars to problem solve and create new ways to address the challenges that Native people and their communities face as members of mainstream Western society. This course is open to all majors.

C EP 562. Family Therapy Theory and Technique**3 Credits**

Major theories of family therapy and associated assessment, intervention and evaluation techniques. Restricted to majors. Taught with C EP 662 except for advanced-level materials and experiential activities. Consent of instructor required.

Prerequisite(s): C EP 550.

C EP 563. Primary Care Psychology**3 Credits**

Didactic and experiential learning in primary care psychology issues. Through this course students will learn about the cultural necessity of the integration of mental and physical health issues and multidisciplinary collaboration. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: SPSY,CEP,C EP,C G, CMHC majors.

C EP 566. Group Work Theory and Technique**3 Credits**

Didactic and experiential learning in group theory and practice. Laboratory involves experiences in group participation and leadership. May be repeated up to 3 credits. Restricted to: C G,CEP,C EP,CMHC majors.

Prerequisite(s): C EP 550, C EP 562 or consent of instructor.

C EP 569. Indigenous Counseling Internship**1-6 Credits (1-6)**

The primary purpose for this course is to provide students with the opportunity to study and practice under a well-known and recognized indigenous healing practitioner with the primary goal of affirming and activating the holistic paradigm of Indigenous knowledge into their work as practitioners in the helping professions to reveal the wealth and richness of Indigenous languages, worldviews, teachings and experiences. Consent of Instructor required.

C EP 572. Counseling Practicum**1-6 Credits**

Supervised experience of counseling and consultation. Weekly individual and group supervision involves review of audio, video, and/or live sessions and case presentations. May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: C EP 662. Restricted to: C G,CEP,C EP,CMHC majors.

Prerequisite(s): C EP 550 and consent of instructor.

C EP 578. Advanced Counseling Practicum**3-6 Credits**

Supervised experience of appraisal and individual, family, and/or group counseling and consultation serving child, adolescent, and/or adult clients. Weekly individual and group supervision involves review of counseling sessions and case presentations. This course will carry a subtitle to reflect the practicum setting. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: C G,CEP,C EP,CMHC majors.

Prerequisite(s): C EP 572, C EP 566, and consent of instructor.

C EP 579. Clinical Psychopharmacology**3 Credits**

Basic biological aspects of psychopharmacology with applications to clinical populations and treatment implications. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: C G,SPSY,CEP,C EP,CMHC majors.

Prerequisite(s): Consent of instructor.

C EP 580. Counseling Internship**3-12 Credits**

Supervised experience in a professional counselor role in a school or agency. Students perform all counselor functions including appraisal, individual/family/group counseling, consultation, administration, program development, research, and/or evaluation.

Prerequisite(s): C EP 578.

C EP 598. Special Research Programs**1-6 Credits**

Individual investigations either analytical or experimental. Maximum of 6 credits per semester and total of 9 credits overall. May be repeated up to 9 credits. Restricted to: CEP,SPSY,C EP,CMHC majors.

C EP 599. Master's Thesis**15 Credits**

Thesis. May be repeated up to 88 credits. Restricted to: CEP,SPSY,C EP,CMHC majors. Thesis/Dissertation Grading.

C EP 607. Curriculum-Based Assessment and Intervention**3 Credits**

The study and practice of curriculum-based assessment and intervention for academic skills and problems among children and adolescents.

Restricted to: SPSY majors.

C EP 608. Diagnostic Class**3 Credits**

Emphasis on developing the knowledge, skills, and necessary application abilities related to diagnosis and associated interventions related to mental health and psychopathology issues that impact a student's ability to navigate the education setting.

C EP 612. Human Development**3 Credits**

Same as C EP 512 with differentiated assignments for Ed.S and Ph.D. students. This course is open to all doctoral majors. Consent of Instructor required.

C EP 616. Spanish for Mental Health Professionals**3 Credits**

This course emphasizes the vocabulary for Mental Health Professionals to include academic, psychological and medical terminology. Students will incorporate Spanish terms in assessment and treatment plans through role plays. Further, the course will include an overview of the use of interpreters and translators in working with culturally and linguistically diverse clientele.

Prerequisite(s): Enrolled in Bilingual School Psychology Training Grant with instructor consent.

C EP 619. Psychology of Social Identities**3 Credits**

Same as C EP 519 with differentiated assignments for Ph.D. students.

C EP 622. Ethical/Professional Issues in Counseling Psychology**3 Credits**

History of counseling psychology, scientist-practitioner model, American Psychological Association's Ethical Principles of Psychologists and Code of Conduct. Focus on current ethical, professional, and scientific issues.

Restricted to majors.

Prerequisite: consent of instructor.

C EP 624. Professional Issues in School Psychology**3 Credits**

History, philosophy, and orientation of school psychology. Roles, technology, credentialing, community resources, school system issues, educational and psychology delivery service models, and current professional issues.

C EP 625. Legal and Ethical Issues in School Psychology**3 Credits**

Overview of legal/ethical, and professional standards in school psychology. NASP and APA codes of ethics, NM Mental Health and Children's codes, and child abuse/neglect laws.

Prerequisite(s): C EP 624.

C EP 630. School Psychology Research and Program Evaluation**3 Credits**

Survey and analysis of research and program evaluation procedures in school psychology. Critical review of literature, formulating questions, quantitative and qualitative methodology, and data analysis as foundations for reading research literature and generating research, program evaluation, and/or grant proposals. Consent of Instructor required.

C EP 632. Counseling Psychology Research**3 Credits**

Survey and analysis of research and program evaluation procedures in counseling psychology. Critical review of literature, formulating questions, quantitative and qualitative methodology, and data analysis are covered as a foundation for reading research literature and generating research, program evaluation, and/or grant proposals.

Prerequisite: C EP major or consent of instructor.

C EP 634. Introduction to Qualitative Research**3 Credits**

This course is intended to be an introduction to qualitative research methods for persons wishing to understand, apply, and conduct qualitative studies with human subjects in the fields of counseling and psychology. This course is open to all doctoral majors. Consent of Instructor required.

C EP 636. Advanced Statistics**3 Credits**

An intermediate course focusing on more advanced theories and techniques of inferential statistics as applied to education and psychology. Includes ANOVA, planned contrasts, ANCOVA, simple regression, and non-parametrics. Both hand calculation and computer packages will be employed.

Prerequisite(s): C EP 511 or equivalent course work.

C EP 637. Multivariate Statistics**3 Credits**

Theories and techniques of multivariate statistics as applied to education and psychology. Includes multiple regression, logistic regression, MANOVA, factor analysis, and structural equation modeling. Computer packages will be the primary tool for data analysis.

Prerequisite(s): C EP 636 or equivalent course work.

C EP 647. Appraisal of Cognitive Functioning**3 Credits**

Taught with C EP 547 with differentiated assignments for doctoral students.

C EP 648. Appraisal of Personality**3 Credits**

Selection, administration, scoring, interpretation, and report writing using major objective and projective tests of personality.

C EP 649. Behavioral Assessment & Intervention**3 Credits**

The course introduces basic concepts, methods, and applications of behavioral assessment and intervention. Students will learn how to conduct functional assessments of behavior and how to write behavior intervention plans. Methods appropriate for assessment and intervention of school-age children will be emphasized. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: SPSY majors.

C EP 651. Diagnosis and Treatment Planning**3 Credits**

Restricted to majors. Same as C EP 551 with differentiated assignments for Ph.D. students.

Prerequisite: C EP 612 or consent of instructor.

C EP 652. Career/Life Planning and Vocational Assessment**3 Credits**

Same as C EP 552 with differentiated assignments for Ed.S and Ph.D. students. This course is open to all doctoral majors.

C EP 658. Child and Adolescent Counseling Theory and Technique
3 Credits

Same as C EP 558 with differentiated assignments for Ph.D. students. Consent of Instructor required.

Prerequisite(s): C EP 550 or consent of instructor.

C EP 662. Family Therapy Theory and Technique
3 Credits

Taught with CEP 562 with differentiated assignments for Ed.S and Ph.D students. Consent of Instructor required. Crosslisted with: C EP 572.

Prerequisite(s): C EP 550.

C EP 670. Behavioral Health Practicum
1-6 Credits

An intensive supervised experience in providing behavioral health services at an on or off campus interdisciplinary health setting. Supervision provided by doctoral level psychologist faculty in collaboration with other team disciplines' supervising faculty involves audio, video, and/or live observation of counseling sessions and team interventions and case presentations. Graded: S/U.

C EP 671. Consultation
3 Credits

Didactic and experimental trainings in theory-based consultation. Supervision provided by faculty involves audio, video, and/or live observation consultation activities and case presentations. Restricted to majors.

Prerequisites: C EP 672, C EP 675, or C EP 678; and consent of instructor.

C EP 672. Practicum in School Psychology: Psychoeducational
1-6 Credits

Supervised practicum in psychological and educational evaluation. Skill development in ecological assessment, including interviewing, observations micro-counseling, acculturation, world view, and ethnic identity formation. Graded: S/U.

Prerequisite(s): C EP 647, C EP 505 and consent of instructor.

C EP 673. Counseling Psychology Theory/Practicum
1-6 Credits

Theories of counseling and psychotherapy and their application during supervised counseling with clients. Supervision provided by doctoral psychologist faculty involves audio, video, and/or live observation of counseling sessions and case presentations. Restricted to majors.

Prerequisite: consent of instructor.

C EP 675. Practicum in School Psychology: Psychological
1-6 Credits

School-based supervised experience for the advanced student. Provides experiences in various roles and models of service delivery (group, multifactored, integrative, family assessments) expected of school psychologists. Restricted to majors. S/U grading option only.

Prerequisites: C EP 672 and consent of instructor.

C EP 676. Field Experience in Educational Diagnostics
1-6 Credits (1-6)

C EP 676 is designed to provide students with supervised school-based experiences and practices. The goal of the course is for students to master the competencies required for the delivery of academic services in the educational diagnostician role. The specific emphases in this course are placed on a data-based decision-making skills, psychoeducational assessment activities, and academic interventions. Under faculty and school-system staff supervisions, students will assume service delivery responsibilities and with increasing independence will respond to the diagnostic and intervention needs of students. Restricted to: C EP Masters, C EP Ph D majors. S/U Grading (S/U, Audit).

Prerequisite(s): C EP 647, C EP 608, C EP 505, C EP 672.

C EP 677. Group Work Theory/Practicum
1-6 Credits

Application of theory in group work with clients and in supervising group leaders in training. Supervision provided by doctoral psychologist faculty involves audio, video, and/or live observation of counseling sessions and case presentations. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: CEP, C EP majors.

Prerequisite(s): C EP 673.

C EP 678. Advanced Counseling Psychology Practicum
1-6 Credits

Supervised counseling psychology experience including appraisal, diagnosis, case conceptualization, treatment planning, theory-based counseling and evaluation. Supervision provided by doctoral psychologist faculty involves audio, video, and/or live observation of counseling sessions and case presentations. Graded: S/U.

Prerequisite(s): C EP 677.

C EP 679. Supervision Theory and Practicum
1-6 Credits

Didactic and experimental training in theory-based supervision. Supervision provided by doctoral psychologist faculty involves audio, video, and/or live observation of supervision sessions and case presentations. May be repeated for a maximum of 6 credits. Restricted to majors.

Prerequisites: C EP 675 or C EP 678; and consent of instructor.

C EP 680. Internship in Counseling Psychology I
1-18 Credits

Full-time equivalent of one-half calendar year of internship preferably in an APA-approved or APA-equivalent site. Available to Ph.D. students who have successfully completed their comprehensive exams. May be repeated for a maximum of 18 credits.

C EP 682. Internship in Counseling Psychology II
1-18 Credits

Full-time equivalent of one-half calendar year of internship preferably in an APA-approved or APA-equivalent site. Available to Ph.D. students who have successfully complete their comprehensive exams. May be repeated for a maximum of 18 credits. Restricted to majors.

Prerequisite: consent of instructor.

C EP 684. Internship in School Psychology
1-12 Credits (1-12)

Supervised experience in school psychology. May be repeated for a maximum of 12 credits. Consent of instructor required. Graded: S/U. Restricted to School Psychology (SPSY) majors.

Prerequisite(s): C EP 672 , C EP 675.

C EP 693. Dissertation Seminar**3 Credits**

Same as EMD, EDUC, SPED 693.

C EP 698. Selected Topics**1-6 Credits**

Offered under various subtitles which indicate the subject matter covered. A maximum of 6 credits in any one semester and a total of 18 credits overall. Restricted to C EP majors.

C EP 699. Ed.S. Thesis**1-15 Credits**

Study and research at the Specialist in Education level. Each problem to be designated by a qualifying subtitle. Restricted to majors.

C EP 700. Doctoral Dissertation**15 Credits**

Dissertation. Restricted to majors.

C J-CRIMINAL JUSTICE (C J)

C J 101G. Introduction to Criminal Justice**3 Credits**

Examination of crime and justice within the broader social and cultural context of U.S. society from interdisciplinary social science perspectives. Includes critical analysis of criminal justice processes and the ethical, legal, and political factors affecting the exercise of discretion by criminal justice professionals.

C J 199. Special Topics in Criminal Justice I**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated under different topics for a maximum of 6 credits.

C J 205. Criminal Law**3 Credits**

Rules, principles, and doctrines of criminal liability in the United States. The historical development, limits, and functions of the substantive criminal law. May be repeated up to 3 credits.

C J 210. The American Law Enforcement System**3 Credits**

Historical and philosophical foundations of law and order. An in-depth examination of the various local, state, and federal law enforcement agencies.

C J 221. Fundamentals of Criminal Investigation**3 Credits**

Investigation procedures from crime scene searches, collection of evidence, and case preparation. Community Colleges only. (Note: students completing C J 221 may not take C J 321.)

C J 230. Introduction to Corrections**3 Credits**

Development of correctional philosophy, theory, and practice. Instructional and non-institutional alternatives available in the corrections process.

C J 250. Courts and the Criminal Justice System**3 Credits**

Structures and functions of American courts. Roles of attorneys, judges, and other court personnel; operation of petit and grand juries, trial and appellate courts.

C J 293. Field Experience in Criminal Justice**3-6 Credits**

Field experience in a public criminal justice agency or equivalent private sector organization. Supervised internship experience, conferences, and observations. Restricted to majors. Community Colleges only.

Prerequisites: C J 101G, prior arrangement and consent of instructor and a GPA of 2.0 or better in major.

C J 300. Introduction to Criminal Justice Research**3 Credits**

Overview and evaluation of criminal justice research. Selection of research topics, methods of data selection and collection, analysis techniques, and presentation of findings.

Prerequisite: restricted to majors or consent of instructor.

C J 301. Advanced Research Methods**3 Credits**

Study of selected quantitative and qualitative skills and their application to criminal justice research.

Prerequisite: Restricted to majors or consent of instructor.

C J 302. Crime, Justice and Society**3 Credits**

Through critical analysis students build a rich understanding of the role of crime in our contemporary landscape and explore ideas and practices associated with justice, victimization, criminality, morality and righteousness. The course cultivates knowledge & awareness of the interactions between socially constructed phenomena (race, class, power, ethnicity, economic structures) and popular beliefs, policies, and practices associated with crime, punishment, and formal social control. It is recommended that you complete three of the following English courses before enrolling in this class: ENGL 111G, 203G, 211G, 218G, & 311G. Restricted to: Criminal Justice majors.

C J 303. Introduction to Criminological Theory**3 Credits**

Defining and measuring crime, crime causation, and the criminal behavior system, and their linkage to criminal justice policies, procedures, and practices. Completed two of the following: ENGL 111G, 203G, 211G, 218G, or 311G. Restricted to: C J majors.

Prerequisite(s): Restricted to majors or consent of the instructor and must have completed C J 300.

Corequisite(s): Must be enrolled or have completed third English writing class.

C J 304. Historical Perspectives of Criminal Justice Systems**3 Credits**

Examines the precursors to and development of three distinct systems associated with crime and punishment in the United States: the Courts, the Police, & Corrections. By studying the historical context and socio-political backdrop in which these institutions emerged and expanded students will come to a richer understanding of them and their attendant policies, practices, conventions, and assumptions. It is recommended that you complete three of the following English courses before enrolling in this class: ENGL 111G, 203G, 211G, 218G, & 311G. Restricted to: Criminal Justice majors.

Prerequisite(s): C J 300.

C J 306. Criminal Procedural Law**3 Credits**

Legal analyses of the rights of criminal defendants; legal duties and responsibilities of criminal justice personnel in the processing of criminal defendants. May be repeated up to 3 credits. Restricted to: C J majors.

Prerequisite(s): Restricted to majors, Forensic Science minors, or consent of instructor.

C J 307. Law of Evidence**3 Credits**

Evidentiary rules and concepts and their application in a criminal trial. May be repeated up to 3 credits. Restricted to: C J majors.

Prerequisite(s): Restricted to majors, Forensic Science minors, or consent of instructor.

C J 321. Criminal Investigation and Intelligence**3 Credits**

Principles of criminal investigation and intelligence production; processing cases from complaint through crime scene search, identification and collection of evidence, interviewing and interrogation, and case preparation for courts. May be repeated up to 3 credits. Restricted to: C J majors.

Prerequisite(s): Restricted to majors, Forensic Science minors, or consent of instructor.

C J 322. Organized Crime**3 Credits**

Study of national and international criminal organizations and organized crime core groups. Examination of criminal and legitimate enterprises of organized criminal syndicates. Study of tactics to combat organized crime. Current policy implications.

Prerequisite: restricted to majors or consent of instructor.

C J 331. American Correctional Institutions**3 Credits**

Structure, organization, and operations of United States jails and prisons. Overview of correctional standards and classification systems, emphasizing current theory and practice.

Prerequisite: restricted to majors or consent of instructor.

C J 332. Correctional Law**3 Credits**

Federal and state laws and rules of post-conviction procedures; rights of the convicted related to sentencing, appeals, clemency, and restoration of rights.

Prerequisite: restricted to majors or consent of instructor.

C J 333. Juvenile Corrections**3 Credits**

Development and implementation of juvenile facilities and community programs. Effectiveness of current corrections practices. Restricted to majors.

C J 345. Victimology**3 Credits**

Study of risk factors in crime victimization, the impact of crimes upon victims, and the role of the victim in the criminal justice system.

Prerequisite: restricted to majors or consent of instructor.

C J 346. Psychology and the Justice System**3 Credits**

Analysis of psychological underpinnings of criminal behavior and the implications of these psychological principles for criminal justice policy. May be repeated up to 3 credits. Restricted to: C J majors.

Prerequisite(s): Restricted to majors, Forensic Science minors, or consent of instructor.

C J 347. Sex Crimes**3 Credits**

Dynamics of sex crimes for victims and offenders, plus consideration of the legal and correction systems' response to sex crimes. Restricted to majors.

C J 348. Serial Killers**3 Credits**

Overview and critical assessment of serial homicide and its relevance for contemporary U.S. society. Focus on factors influencing definitions and cultural understanding of serial homicide.

Prerequisite(s): 60 credit hours.

C J 360. The Juvenile Justice System**3 Credits**

History, development, and philosophy behind a separate juvenile justice system. Role of the juvenile court, evaluation of juvenile law and procedure, and the processing of juvenile offenders.

Prerequisite: restricted to majors or consent of instructor.

C J 380. Introduction to Terrorism**3 Credits**

Overview of the phenomenon of terrorism, psychological and sociological theories of terrorism, and various contemporary governmental policies.

C J 391. Special Readings in Criminal Justice**1-3 Credits**

Individually chosen subject areas not readily available in other courses. May be repeated for a maximum of 6 credits under different subtitles. Restricted to majors.

Prerequisites: at least a 2.5 GPA and consent of instructor.

C J 393. Internship in Criminal Justice**1-12 Credits**

Field experience in a local, state, or federal criminal justice or private security agency. Includes orientation, observation, conferences, and work experience. Credits limited to six if student has taken C J 293. May be repeated for a maximum of 12 credits. Restricted to majors. Graded S/U.

Prerequisites: consent of instructor and GPA of 2.5 or better.

C J 399. New Mexico Law**3 Credits**

Same as GOVT 399, JOUR 399, SOC 399, and HIST 399.

C J 405. Juvenile Courts and Law**3 Credits**

History, development, and current status of juvenile courts. Legal status of juveniles in court and constitutional protections afforded them. Restricted to majors.

C J 410. Criminal Justice Administrative Systems**3 Credits**

Administrative structures in criminal justice agencies and institutions; relationship of administrative structures to practical police, courts, and corrections problems.

Prerequisite: restricted to majors or consent of instructor.

C J 414. Race, Crime and Justice**3 Credits**

Historical and contemporary analysis of the relationship between race and crime in the United States with emphasis upon human equality and fairness. Overview of racial and ethnic social categorizations and how they impact law and order.

C J 416. Global Perspectives on Youth and Drug Use**3 Credits**

Overview of global drug use among young people, comparative legal structures, formal and informal responses. Restricted to C J, ANTH, GOVT, SOC, W S, S WK majors.

C J 417. Drugs In Our World**3 Credits**

Comparative analysis of patterns and theories of drug use, formal government mitigation strategies.

C J 424. Forensic Law**3 Credits**

Overview of the rules and issues related to the use of scientific information in the legal process. May be repeated up to 3 credits. Restricted to: C J majors.

Prerequisite(s): C J major, Forensic Science minors, or consent of instructor.

C J 425. Issues in Ethics, Law, and Criminal Justice**3 Credits**

Examination of the key ethical and decision-making dilemmas facing professionals working in the field of law and criminal justice.

Prerequisite: restricted to majors or consent of instructor.

C J 427. Race and Crime in Film**3 Credits**

Critical analysis of film where messages relating race and crime are present, with emphasis on how this imagery informs problem definition, policies, and practice within the criminal justice system.

Prerequisite(s): 60 credit hours.

C J 428. Mexican-American and Issues of Social Justice**3 Credits**

In this course we will explore and discuss social issues related to the Mexican American community in the U.S., with special emphasis on their collective historical struggles and contributions to society. We will discuss the political, economic and cultural forces that exemplify their experience as a "whole."

Prerequisite(s): Students must have completed C J 300 or research methods equivalent or consent from the instructor.

C J 429. Immigration & Justice**3 Credits**

This course is designed to introduce undergraduate students to the complexities of immigration in the United States through a social justice lens. Students will explore the intersections of race, ethnicity, gender, and class in immigration through different groups' historical and contemporary experiences, including immigrants' experience with the criminal justice system.

Prerequisite(s): Student must have completed C J 300 or Research Methods equivalent or consent of the instructor.

C J 430. The U.S. Supreme Court and the Criminal Justice System**3 Credits**

History and workings of the U.S. Supreme Court in the context of the criminal justice system from writs of certiorari to last minute appeals in death penalty cases, including study of specific U.S. Supreme Court cases in the areas of criminal law, criminal procedural law, 8th amendment prison sentencing issues, and death penalty cases. Consent of Instructor required. Restricted to: Criminal Justice majors.

C J 431. Family Violence and the Law**3 Credits**

This course will examine how practitioners are involved in the criminal justice system in areas of family violence including: child physical abuse; child sexual abuse; child neglect; child ritualistic abuse; child exploitation; sibling abuse; intimate partner abuse; stalking; sexual abuse and elder abuse. This course will be helpful for those who wish to go into law enforcement or victim's advocacy work. Restricted to: Criminal Justice majors.

C J 432. Issues in Criminal Justice**3 Credits**

Seminar on problems and conflicts encountered in major criminal justice issues. Topics announced in the Schedule of Classes. May be repeated for unlimited credits under different subtitles.

C J 434. Probation, Parole, and Community Corrections**3 Credits**

Structure, organization, and operation of probation, parole, and other community-based correctional programs in the U.S. Overview of historical and recent trends in the supervision of offenders in the community and in the development of alternatives to incarceration. Analysis of issues related to community correctional policies and practices. Restricted to majors.

C J 435. Political Penology**3 Credits**

Comparative analysis of incarceration and sanctions as punishment for crimes of conscience, religious intolerance, and dissidence.

C J 436. COURTS AND SENTENCING**3 Credits**

This course will focus on the structure, organization, and operation of the state and federal court systems in the United States. It examines courtroom decision making and dynamics of courthouse justice—prosecutorial discretion, plea bargaining practices, jury and judicial decision making and sentencing. Additional topics will include racial, gender and class disparities in sentencing outcomes and the impact of recent reforms directed at the criminal court system. Restricted to: Criminal Justice majors.

C J 437. WRONGFUL CONVICTIONS**3 Credits**

This course will address causes (e.g. problems in witness identification, forensics, police and attorney conduct) as well as results of erroneous dispositions (e.g. compensation, media dynamics, possible reforms) in a critical analysis. Appropriate for prospective police, legal, and policy professionals. Restricted to: Criminal Justice majors.

C J 440V. Comparative Criminal Justice Systems**3 Credits**

Cross-national study of selected Western and non-Western legal systems. Comparison of structures and functions of police, court systems, and corrections in different systems.

C J 449. Senior Seminar**3 Credits**

Problems and conflicts encountered in major attempts to control crime. Restricted to majors.

Prerequisite(s): C J 101, C J 205, C J 210, C J 230, C J 250, C J 300, C J 301, 90 credit hours completed.

C J 451. Border Violence and Justice**3 Credits**

Critical analysis of violence and systems of justice along border regions. Examines causes and correlates of violence experienced by those living in border regions and the social responses to that violence.

C J 452. Upper World Crime**3 Credits**

Corporate crime, white collar crime and political abuse and corruption; executive and corporate criminal behavior, and violations of the public trust by elected and appointed officials.

Prerequisite: restricted to majors or consent of instructor.

C J 453. Women and Justice**3 Credits**

Critical analysis of the impact of the criminal justice system, race and class upon the lives of women. Restricted to majors.

C J 454. Human Trafficking**3 Credits**

Study of global human trafficking, its causes and costs, and mitigation strategies. Restricted to C J, GOVT, SOC, W S, S WK majors.

C J 455. Feminist Research Methods**3 Credits**

Feminist research practices and methodologies utilized in various disciplines. Definitions of research, what constitutes valid inquiry, how research can be feminist, and what it means to do interdisciplinary work. Same as W S 455.

C J 501. Research Methods in Criminal Justice**3 Credits**

Research design, methods of data collection and analysis, and preparation of research reports. Restricted to majors.

Prerequisite: C J major or consent of instructor.

C J 510. Advanced Criminal Justice Administrative Systems**3 Credits**

Structure and operations of criminal justice agencies and institutions; relationships of structure and operations to practical police, courts, and corrections problems.

C J 511. Nature of Crime**3 Credits**

Defining and measuring crime, crime causation, and criminal behavior systems. Restricted to majors.

Prerequisite: C J major or consent of instructor.

C J 514. Advanced Race, Crime, and Justice**3 Credits**

Advanced analysis of the historical and contemporary relationship between race and crime in the United States with emphasis upon human equality and fairness. Overview of racial and ethnic social categorizations and how they impact law and order.

C J 515. A Course on Punishment**3 Credits**

Exploration and analysis of the idea and practice of punishment through a variety of philosophical perspectives, seeking to understand its moral and practical viability as employed in contemporary society, including its application within the criminal justice system.

C J 520. Advanced Girls, Women & Crime**3 Credits**

Advanced critical social science analysis of concepts of violence and justice as experienced by women impacted by the criminal justice system. Restricted to C J, W S majors. Crosslisted with: W S 520

C J 521. Law and Social Control**3 Credits**

The development and implementation of criminal law. Consideration of functionalist, conflict, and interpretive theories and research. Restricted to majors.

Prerequisite: C J major or consent of instructor.

C J 524. Forensic Law**3 Credits**

Rules and policy implications related to the use of scientific information in legal process. Restricted to majors.

Prerequisite: C J major or consent of instructor.

C J 525. Issues in Ethics, Law, and Criminal Justice**3 Credits**

Examination of the key ethical and decision-making dilemmas facing professionals working in the fields of law and criminal justice. Restricted to majors.

C J 526. Advanced Race & Environmental Justice**3 Credits**

Advanced analysis of concepts of justice and social justice responses across the 20th and 21st centuries to environmental degradation affecting communities of differing racial and ethnic backgrounds.

C J 527. Advanced Race & Crime in Film**3 Credits**

Advanced critical analysis of film where messages relating race and crime are present, with emphasis on how this imagery informs problem definition, policies, and practice within the criminal justice system.

C J 529. Advanced Immigration & Justice**3 Credits**

Advanced analysis of the complexities of immigration in the United States through a social justice lens. Students will explore the intersections of race, ethnicity, gender, and class in immigration through different groups' historical and contemporary experiences, including immigrants' experience with the criminal justice system.

C J 530. Advanced U.S. Supreme Court and the Criminal Justice System
3 Credits

Advanced history and workings of the U.S. Supreme Court in the context of the criminal justice system from writs of certiorari to last minute appeals in death penalty cases, including study of specific U.S. Supreme Court cases in the areas of criminal law, criminal procedural law, 8th amendment prison sentencing issues, and death penalty cases. Restricted to: Criminal Justice majors.

C J 531. Advanced Family Violence and the Law**3 Credits**

This course will examine how practitioners are involved in the criminal justice system in areas of family violence including: child physical abuse; child sexual abuse; child neglect; child ritualistic abuse; child exploitation; sibling abuse; intimate partner abuse; stalking; sexual abuse and elder abuse. This course will be helpful for those who wish to go into law enforcement or victim's advocacy work. Restricted to: Criminal Justice majors.

C J 532. Advanced Issues in Criminal Justice (f, s, sum)**3 Credits**

Seminar on problems and conflicts encountered in major criminal justice issues. Topics announced in the Schedule of Classes. May be repeated under different subtitles for unlimited credit.

C J 535. Advanced Political Penology**3 Credits**

Advanced comparative analysis of incarceration and sanctions as punishment for crimes of conscience, religious intolerance, and dissidence.

C J 537. Advanced Wrongful Convictions**3 Credits**

This course will address causes (e.g. problems in witness identification, forensics, police and attorney conduct) as well as results of erroneous dispositions (e.g. compensation, media dynamics, possible reforms) in a critical analysis. Appropriate for prospective police, legal, and policy professionals. Restricted to: Criminal Justice majors.

C J 541. Seminar in Criminal Justice Policy Analysis and Planning
3 Credits

Seminar on policy development, planning and implementation processes in criminal justice. Links formal policy goals as they relate to theory and outcomes. Topics announced in the Schedule of Classes. Restricted to majors.

Prerequisite: C J major or consent of instructor.

C J 545. Advanced Victimology**3 Credits**

Study of risk factors in crime victimization, the impact of crimes upon victims, and the role of the victim in the criminal justice system. Consideration of the impact of criminal justice policy on victim outcomes. Same as W S 545.

C J 554. Advanced Human Trafficking**3 Credits**

Advanced study of global human trafficking, its causes and costs, and mitigation strategies. Restricted to C J, GOVT, SOC, W S, S WK majors.

C J 555. Advanced Feminist Research Methods**3 Credits**

Advanced feminist research practices and methodologies utilized in various disciplines. Definitions of research, what constitutes valid inquiry, how research can be feminist, and what it means to do interdisciplinary work. Same as W S 555.

C J 560. Juvenile Justice Systems**3 Credits**

Policy development and operations in police, court, and correctional agencies in response to juveniles. Analysis of programs designed to identify, prevent and treat juvenile offenders. CJ 570. Probation and Parole 3 cr. Advanced analysis of goals, theories and practices of all forms of correction in the community, including probation, parole, plus other intermediate sanctions. Restricted to majors.

C J 581. Community Policing**3 Credits**

Overview and analysis of community policing issues from various perspectives. Analysis of strategies that facilitate police and community collaboration. Restricted to majors.

C J 591. Directed Readings in Criminal Justice**3 Credits**

Supervised review of literature in specialized areas of the nature of crime, law and social control, and criminal justice administration. Consent of instructor required.

C J 592. Independent Research**1-3 Credits**

Design and execution of a criminal justice research project. Requires a written paper in standard format, including literature review, hypotheses, methodology, findings, and conclusions.

C J 593. Internship**3-6 Credits**

Supervised placement in an applied or research setting in criminal justice. An in-depth written report of the project is required. Restricted to C J majors. May be repeated for a maximum of 6 credits. Graded S/U.

Prerequisites: introductory graduate course in the area of the internship and consent of the internship supervisor.

C J 599. Master's Thesis**15 Credits**

Thesis.

C S-COMPUTER SCIENCE (C S)

C S 110. Computer Literacy**3 Credits**

This course provides a broad introduction to computing, including computer and information technology concepts; economic and social implications of technology; database management, spreadsheet, word processing, and presentation applications.

C S 111. Computer Science Principles**4 Credits (3+2P)**

This course provides a broad and exciting introduction to the field of computer science and the impact that computation has today on every aspect of life. It focuses on exploring computing as a creative activity and investigates the key foundations of computing: abstraction, data, algorithms, and programming. It looks into how connectivity and the Internet have revolutionized computing and demonstrates the global impact that computing has achieved, and it reveals how a new student in computer science might become part of the computing future.

Prerequisite(s): MATH 120 or higher.

C S 117. Introduction to Computer Animation**3 Credits**

Introductory course for learning to program with computer animation as well as learning basic concepts in computer science. Students create interactive animation projects such as computer games and learn to use software packages for creating animations in small virtual worlds using 3D models. Recommended for students considering a minor/major in computer science or simply interested in beginning computer animation or programming.

C S 150. C Programming**3 Credits (2+2P)**

Programming in the C language. May be repeated up to 3 credits.

Prerequisite(s): MATH 120 or higher.

C S 151. C++ Programming**3 Credits (2+2P)**

Introduction to object-oriented programming in the C++ language. May be repeated up to 3 credits.

Prerequisite(s): MATH 120 or higher.

C S 152. Java Programming**3 Credits (2+2P)**

Programming in the Java language. May be repeated up to 3 credits.

Prerequisite(s): MATH 120 or higher.

C S 153. Python Programming I**3 Credits**

This course is an introduction to programming in the Python language, covering fundamental scripts, data types and variables, functions, and simple object creation and usage. The focus will be on preparing students to use Python in their own areas. No prior programming experience is required.

Prerequisite(s): MATH 120 or higher.

C S 154. Python Programming II**3 Credits**

This course covers advanced Python programming, including classes, objects, and inheritance, embedded programming in domain applications, database interaction, and advanced data and text processing. The focus will be on preparing students to use Python in their own areas.

Prerequisite(s): C S 153 or C S 453.

C S 155. Internet Programming I**3 Credits**

This course is an introduction to programming for the Web in PHP and Javascript, covering fundamental web scripting ideas, CSS, data types and variables, functions, simple object creation and usage. Javascript usage will focus on dynamic page content. No prior programming experience is required, though a basic understanding of HTML will be assumed.

Prerequisite(s): MATH 120 and a basic understanding of HTML.

C S 156. Internet Programming II**3 Credits**

This course covers advanced web scripting, including Javascript with AJAX, PHP integration with databases, object oriented features of PHP and Javascript, advanced CSS usage, and using web application frameworks.

Prerequisite(s): C S 155 or C S 455.

C S 157. Topics in Software Programming and Applications**3 Credits (2+2P)**

Current topics in computer programming and software applications. Topic announced in the Schedule of Classes. May be repeated if subtitle is different.

C S 158. R Programming I**3 Credits**

This course is an introduction to data processing in the R language, covering fundamental script configuration, data types and data collections, R control structures, and basic creation of graphs and data visualizations. This course will not focus on the statistical capabilities of R, though some basic statistical computations will be used.

Prerequisite(s): MATH 121G.

C S 159. R PROGRAMMING II**3 Credits**

This course covers advanced R programming, including advanced data collection processing, advanced data visualizations, object oriented features of R, and file processing. It is recommended that students have one statistics course before taking this course.

Prerequisite(s): C S 158 or C S 458.

C S 171G. Introduction to Computer Science**4 Credits (3+2P)**

Computers are now used widely in all area of modern life. This course provides understanding of the theoretical and practical foundations for how computers work, and provides practical application and programming experience in using computers to solve problems efficiently and effectively. The course covers broad aspects of the hardware, software, and mathematical basis of computers. Weekly labs stress using computers to investigate and report on data-intensive scientific problems. Practical experience in major software applications includes an introduction to programming, word processing, spreadsheets, databases, presentations, and Internet applications.

Prerequisite(s): MATH 210G or MATH 120 or higher.

C S 172. Computer Science I**4 Credits (3+2P)**

Computational problem solving; problem analysis; implementation of algorithms. Recursive structures and algorithms. Crosslisted with: C S 460.

Prerequisite(s): MATH 121G or higher; C S 111 or successful placement.

C S 209. Special Topics.**1-3 Credits**

May be repeated for a maximum of 12 credits.

C S 271. Object Oriented Programming**4 Credits (3+2P)**

Introduction to problem analysis and problem solving in the object-oriented paradigm. Practical introduction to implementing solutions in the C++ language. Hands-on experience with useful development tools.

Prerequisite(s): C- or better in C S 172 or E E 161.

C S 272. Introduction to Data Structures**4 Credits (3+2P)**

Design, implementation, use of fundamental abstract data types and their algorithms: lists, stacks, queues, deques, trees; imperative and declarative programming. Internal sorting; time and space efficiency of algorithms.

Prerequisite(s): At least a C- in C S 172, or placement.

C S 273. Machine Programming and Organization**4 Credits (3+2P)**

Computer structure, instruction execution, addressing techniques; programming in machine and assembly languages.

Prerequisite(s): At least a C- in C S 172 or E E 161.

C S 278. Discrete Mathematics for Computer Science**4 Credits (3+2P)**

Discrete mathematics required for Computer Science, including the basics of logic, number theory, methods of proof, sequences, mathematical induction, set theory, counting, and functions. Crosslisted with: MATH 278.

Prerequisite(s): At least C- in C S 172.

C S 343. Algorithm Design & Implementation**3 Credits**

Introduction to efficient data structure and algorithm design. Basic graph algorithms. Balanced search trees. Classic algorithm design paradigms: divide-and-conquer, greedy scheme, and dynamic programming.

Prerequisite(s): At least a C- in C S 272, or consent of instructor.

C S 370. Compilers and Automata Theory**4 Credits (3+2P)**

Methods, principles, and tools for programming language processor design; basics of formal language theory (finite automata, regular expressions, context-free grammars); development of compiler components.

Prerequisite(s): At least a C- in C S 271, C S 272, C S 273, and C S 278.

C S 371. Software Development**4 Credits (3+2P)**

Software specification, design, testing, maintenance, documentation; informal proof methods; team implementation of a large project.

Prerequisite(s): At least a C- in C S 271 and C S 272.

C S 372. Data Structures and Algorithms**4 Credits (3+2P)**

Introduction to efficient data structure and algorithm design. Order notation and asymptotic run-time of algorithms. Recurrence relations and solutions. Abstract data type dynamic set and red-black trees. Classic algorithm design paradigms: divide-and-conquer, dynamic programming, greedy algorithms.

Prerequisite(s): At least a C- in CS 272 and C S 278.

C S 375. Introduction to Intelligent Agents Using Science Fiction**3 Credits**

This course uses science-fiction movies to introduce fundamental principles and techniques in agents and multi-agent systems. It covers game theory, decision theory, machine learning, and distributed systems.

C S 409. Independent Study**1-6 Credits (1-6)**

Faculty supervised investigation, to culminate in a written report. May be repeated up to 6 credits.

Prerequisite(s): Written agreement with faculty supervisor.

C S 419. Computing Ethics and Social Implications of Computing
1 Credit

An overview of ethics for computing majors includes: history of computing, intellectual property, privacy, ethical frameworks, professional ethical responsibilities, and risks of computer-based systems. S/U Grading (S/U, Audit).

Corequisite(s): C S 448 or C S 449.

C S 448. Senior Project
4 Credits

Capstone course in which C S majors work in teams and apply computer science skills to complete a large project. Consent of Instructor required. Restricted to: C S majors.

Prerequisite(s): Senior standing.

Corequisite(s): C S 419.

C S 449. Senior Thesis
4 Credits

Capstone course in which C S majors apply computer science skills to complete a research project, culminating in a written thesis report. Consent of Instructor required. Restricted to: C S majors.

Prerequisite(s): Consent of thesis adviser.

Corequisite(s): C S 419.

C S 450. C Programming
3 Credits (2+3P)

Programming in the C language. More advanced than C S 150. Recommended for nonmajors only. May be repeated up to 3 credits.

Prerequisite(s): Graduate standing.

C S 451. C++ Programming
3 Credits

Programming in the C language. More advanced than C S 151. Recommended for nonmajors only. May be repeated up to 3 credits.

Prerequisite(s): Graduate standing.

C S 452. Java Programming
3 Credits (2+2P)

Programming in the Java language. More advanced than C S 152. Recommended for nonmajors only. May be repeated up to 3 credits.

Prerequisite(s): Graduate standing.

C S 453. PYTHON PROGRAMMING I
3 Credits

This course is an introduction to programming in the Python language, covering fundamental scripts, data types and variables, functions, and simple object creation and usage. The focus will be on preparing students to use Python in their own areas. No prior programming experience is required. More advanced than C S 153.

Prerequisite(s): MATH 120 or higher.

C S 454. Python Programming II
3 Credits

This course covers advanced Python programming, including classes, objects, and inheritance, embedded programming in domain applications, database interaction, and advanced data and text processing. The focus will be on preparing students to use Python in their own areas. For graduate students only. Has more advanced work than C S 154, and does not count towards CS major requirements.

Prerequisite(s): C S 153 or C S 453.

C S 455. Internet Programming I
3 Credits

This course is an introduction to programming for the Web in PHP and Javascript, covering fundamental web scripting ideas, CSS, data types and variables, functions, simple object creation and usage. Javascript usage will focus on dynamic page content. No prior programming experience is required, though a basic understanding of HTML will be assumed. For graduate students only. Has more advanced work than C S 155. Does not count towards CS major requirements.

Prerequisite(s): MATH 120 and a basic understanding of HTML.

C S 456. Internet Programming II
3 Credits

This course covers advanced web scripting, including Javascript with AJAX, PHP integration with databases, object oriented features of PHP and Javascript, advanced CSS usage, and using web application frameworks. For graduate students only. Has more advanced work than C S 156. Does not count towards CS major requirements.

Prerequisite(s): C S 155 or C S 455.

C S 457. Topics in Software Programming and Applications
3 Credits (2+2P)

Current topics in computer programming and software applications. Topic announced in the Schedule of Classes. More advanced than C S 157. recommended for non-majors only. May be repeated if subtitle is different.

Prerequisite(s): Graduate standing.

C S 458. R Programming I
3 Credits

This course is an introduction to data processing in the R language, covering fundamental script configuration, data types and data collections, R control structures, and basic creation of graphs and data visualizations. This course will not focus on the statistical capabilities of R, though some basic statistical computations will be used. For graduate students only. Has more advanced work than C S 158. Does not count towards CS major requirements.

Prerequisite(s): MATH 121G.

C S 459. R Programming II
3 Credits

This course covers advanced R programming, including advanced data collection processing, advanced data visualizations, object oriented features of R, and file processing. It is recommended that students have one statistics course before taking this course. For graduate students only. Has more advanced work than C S 159, and does not count towards CS major requirements.

Prerequisite(s): C S 158 or C S 458.

C S 460. Computer Science I Transition
3 Credits

Computational problem solving; problem analysis; implementation of algorithms. Recursive structures and algorithms. For C S graduate students only; cannot be used to meet a C S student's program of study. Taught with C S 172. Consent of Instructor required. Crosslisted with: C S 172.

C S 462. Object Oriented Programming Transition**3 Credits**

Introduction to problem analysis and problem solving in the object-oriented paradigm. Practical introduction to implementing solutions in the C++ language. Hands-on experience with useful development tools. Cannot be used in a C S student's program of study. Consent of Instructor required.

Prerequisite(s): At least a C- in C S 172 or C S 460 or consent of instructor.

C S 463. Introduction to Data Structures Transition**3 Credits**

Design, implementation, use of fundamental abstract data types and their algorithms: lists, stacks, queues, deques, trees; imperative and declarative programming. Internal sorting; time and space efficiency of algorithms. Cannot be used in a C S student's program of study. Consent of Instructor required.

Prerequisite(s): At least a C- in C S 172 or C S 460 or consent of instructor.

C S 464. Machine Programming and Organization Transition**3 Credits**

Computer structure, instruction execution, addressing techniques; programming in machine and assembly languages. Cannot be used in a C S student's program of study. Consent of Instructor required.

Prerequisite(s): At least a C- in C S 172 or C S 460 or consent of instructor.

C S 465. Discrete Math for Computer Science Transition**3 Credits**

Logical connectives, sets, functions, relations, graphics, trees, proofs, induction, and application to computer science. Cannot be used in a C S student's program of study. Consent of Instructor required.

Prerequisite(s): At least a C- in C S 172 or C S 460 or consent of instructor.

C S 466. Compilers and Automata Transition**3 Credits**

Methods, principles, and tools for programming language processor design; basics of formal language theory (finite automata, regular expressions, context-free grammars); development of compiler components. For C S graduate students only; cannot be used in a students program of study. Consent of instructor required.

Prerequisite(s): At least a C in C S 271 or C S 462, in C S 272 or C S 463, in C S 273 or C S 464, in C S 278 or C S 465, or consent of instructor.

C S 468. Software Development Transition**3 Credits**

Software specification, design, testing, maintenance, documentation; informal proof methods; team implementation of a large project. Cannot be used in a C S student's program of study. Consent of Instructor required.

Prerequisite(s): At least a C- in C S 271 or C S 462, in C S 272 or C S 463, or consent of instructor.

C S 469. Data Structure and Algorithms Transition**3 Credits**

Introduction to efficient data structure and algorithm design. Order notation and asymptotic run-time of algorithms. Recurrence relations and solutions. Abstract data type dynamic set and red-black trees. Classic algorithm design paradigms: divide-and-conquer, dynamic programming, greedy algorithms. Cannot be used in a C S student's program of study. Consent of Instructor required. Restricted to: C S majors.

Prerequisite(s): At least a C- in C S 272 or C S 463, in C S 278 or C S 465, or consent of instructor.

C S 471. Programming Language Structure I**3 Credits**

Syntax, semantics, implementation, and application of programming languages; abstract data types; concurrency. Not for C S graduate students.

Prerequisite(s): C- or better in C S 370 and C S 371.

C S 473. Architectural Concepts I**3 Credits**

Comparison of architectures to illustrate concepts of computer organization; relationships between architectural and software features. Not for C S graduate students.

Prerequisite(s): At least a C- in C S 273 and C S 370.

C S 474. Operating Systems I**3 Credits**

Operating system principles and structures, and interactions with architectures. Not for C S graduate students.

Prerequisite(s): At least a C- in C S 273, C S 371, and C S 372.

C S 475. Artificial Intelligence I**3 Credits**

Fundamental principles and techniques in artificial intelligence systems. Intelligent Agents; solving problems by searching; local search techniques; game-playing agents; constraint satisfaction problems; knowledge representation and reasoning. Further selected topics may also be covered. Not for C S graduate students.

Prerequisite(s): At least a C- in C S 272 and C S 278.

C S 476. Computer Graphics I**3 Credits**

Languages, programming, devices, and data structures for representation and interactive display of complex objects. Not for C S graduate students.

Prerequisite(s): At least C- in C S 370 or C S 371.

C S 477. Digital Game Design**3 Credits**

An introductory to digital game design. Topics include design, develop, and playtest games. The course is structured to use team-based learning. Not for C S graduate students.

Prerequisite(s)/Corequisite(s): C S 371 or consent of instructor.

C S 478. Computer Security**3 Credits**

Introduction to the art and science of computer security. Fundamentals of computer security including elementary cryptography, authentication and access control, security threats, attacks, detection and prevention in application software, operating systems, networks and databases.

Prerequisite(s): At least a C- in C S 273 or consent of instructor.

C S 479. Special Topics**1-6 Credits**

Topic announced in the Schedule of Classes. May be repeated if subtitle is different. Not for C S graduate students. May be repeated up to 6 credits.

C S 480. Linux System Administration**3 Credits**

Basic system administration for Linux environments. Topics include user managements, file systems, security, backups, system monitoring, kernel configuration and other relevant aspects of system administration. Not for Computer Science graduate students.

C S 481. Visual Programming**3 Credits**

Design and implementation of programs using visual (i.e. dataflow or diagrammatic) programming techniques, with an emphasis on real-time data processing. Students will learn how to design visual programs, including how to handle cycles and state maintenance, and will learn to process audio, video, and other data using visual programs. Not for C S graduate students.

Prerequisite(s): C- or better in C S 272 and C S 278.

C S 482. Database Management Systems I**3 Credits**

Database design and implementation; models of database management systems; privacy, security, protection, recovery. Not for C S graduate students.

Prerequisite(s): At least a C- in C S 272 and C S 278.

C S 483. Introduction to Robotics**3 Credits**

Basic AI-based robotic architecture and concepts, with an emphasis on building and programming mobile robots. Not for C S graduate students. Consent of Instructor required.

Prerequisite(s): At least a C- in C S 272 and C S 273.

C S 484. Computer Networks I**3 Credits**

Fundamental concepts of computer communication networks: layered network architecture, network components, protocol stack and service. Example of application, transport, network and data link layers, protocols primarily drawn from the Internet (TCP, UDP, and IP) protocol multimedia networks; network management and security. Not for C S graduate students. Consent of Instructor required.

Prerequisite(s): At least a C- in C S 272 and CS 273.

C S 485. User Interface Design**3 Credits**

Interface design, conceptual models formed by users, computer aided instruction, natural and query languages, graphical representations. Not for C S graduate students.

Prerequisite(s): At least C- in C S 371.

C S 486. Bioinformatics**3 Credits**

Introduction to bioinformatics and computational biology. Computational approaches to sequences analysis, protein structure prediction and analysis, and selected topics from current advances in bioinformatics. Not for C S graduate students.

Prerequisite(s): At least a C- in C S 272 and C S 278.

C S 488. Introduction to Data Mining**3 Credits**

Techniques for exploring large data sets and discovering patterns in them. Data mining concepts, metrics to measure its effectiveness. Methods in classification, clustering, frequent pattern analysis. Selected topics from current advances in data mining. Taught with C S 508.

Prerequisite(s): At least a C- in C S 272 and C S 278.

C S 489. Bioinformatics Programming**3 Credits**

Application of computer programming languages to address data processing and analysis problems in modern molecular biology. R/Perl/Python programming; Web API programming. Automatic manipulation of next generation sequence data, analysis of large gene expression tables, access to online biological databases, performing statistical analysis, and visualization of data and results. Taught with C S 509.

Prerequisite(s): At least a C- in C S 272 and C S 278.

C S 491. Parallel Programming**3 Credits**

Programming of shared memory and distributed memory machines; tools and languages for parallel programming; techniques for parallel programming; parallel programming environments. Not for C S graduate students.

Prerequisite(s): C- or better in C S 370 or consent of instructor.

C S 493. Algorithm Design and Implementation**3 Credits**

This course introduces the basic knowledge of designing classical algorithms and implementing these algorithms using a programming language. In particular, the course teaches various data structures, including graphs and balanced binary search trees, and efficient schemes to implement these data structures. This course also teaches basic algorithm design techniques including divide-and-conquer, greedy scheme, and dynamic programming. This course covers graph algorithms, including graph traversals (depth-first search and breadth-first search), connectivity, shortest paths, and minimum spanning trees. Restricted to: exclude C S majors.

Prerequisite(s): At least a C- in C S 272, or Consent of Instructor.

C S 494. Introduction to Smart Grids**3 Credits**

This course is an introduction to the technologies and design strategies associated with the Smart Grid. The emphasis will be on the development of communications, energy delivery, coordination mechanisms, and management tools to monitor transmission and distribution networks. Topics include: Smart grid introduction and evolution; Power systems; Networking and transport control; Artificial intelligence & agent coordination; Data mining for smart grids.

Prerequisite(s): At least a C- in C S 272 and a C- in E E 201 or 280; or Consent of instructor.

C S 502. Database Management Systems I**3 Credits**

Database design and implementation; models of database management systems; privacy, security, protection, recovery; requires more advanced graduate work than C S 482. Students are expected to have solid knowledge of data structures and discrete mathematics.

C S 503. Introduction to Robotics**3 Credits**

Basic AI-based robotic architectures and concepts, with an emphasis on building and programming mobile robots; requires more advanced graduate work than C S 483. Students are expected to have solid knowledge of data structures and machine-level programming.

C S 504. Computer Networks I**3 Credits**

Fundamental concepts of computer communication networks: layered network architecture, network components, protocol stack and service. Example of application, transport, network and data link layers, protocols primarily drawn from the Internet (TCP, UDP, and IP) protocol suite; local and wide area networks, wireless and mobile networks, multimedia networks; network management and security; requires more advanced graduate work than C S 484. Students are expected to have solid knowledge of data structures, machine-level programming. Knowledge of statistics (at the level of STAT 371 or 470) is recommended.

C S 505. Artificial Intelligence I**3 Credits**

Fundamental principles and techniques in artificial intelligence systems. Knowledge representation formalisms; heuristic problem solving techniques; automated logical deduction; robot planning methods; algorithmic techniques for natural language understanding, vision and learning; requires more advanced graduate work than C S 475. Students are expected to have strong knowledge of algorithms and data structures (at the level of C S 372).

C S 506. Computer Graphics I**3 Credits**

Languages, programming, devices, and data structures for representation and interactive display of complex objects. Requires more advanced graduate work than C S 476. Students are expected to have knowledge of compilers design and software engineering equivalent to CS 370 and CS 371.

C S 508. Introduction to Data Mining**3 Credits**

Techniques for exploring large data sets and discovering patterns in them. Data mining concepts, metrics to measure its effectiveness. Methods in classification, clustering, frequent pattern analysis. Selected topics from current advances in data mining. Students are expected to have a preparation in Discrete Mathematics and Data Structures equivalent to C S 272 and C S 278. Requires more advanced graduate work than C S 488. Crosslisted with: C S 488.

C S 509. Bioinformatics Programming**3 Credits**

Application of computer programming languages to address data processing and analysis problems in modern molecular biology. R/Perl/Python programming; Web API programming. Automatic manipulation of next generation sequence data, analysis of large gene expression tables, access to online biological databases, performing statistical analysis, and visualization of data and results. Requires a preparation in discrete mathematics and data structures equivalent to C S 272 and C S 278. Taught with C S 489.

C S 510. Automata, Languages, Computability**3 Credits**

Regular and context-free languages, pushdown and finite-state automata, turing machines, models of computation, halting problems. Students are expected to have knowledge of compilers design and algorithms equivalent to C S 370 and C S 372.

C S 511. Logic and Constraint Logic Programming**3 Credits**

Declarative programming techniques; foundations of logic programming; programming in Prolog; constraint logic programming; application of logic and constraint programming; requires more advanced graduate work than C S 472. Students are expected to have knowledge of data structures and discrete mathematics equivalent to C S 272 and C S 278.

C S 512. Computer Systems Modeling and Simulation**3 Credits**

Basic concepts of modeling computer systems: continuous and discrete time models, states and transition, probabilistic models. Structures of simulation programs, time driven and event driven simulation, simulation on captured and synthetic traces, generation of random variables, queuing models, Markov chains, random walks, Poisson, Markov, renewal branching and Brownian motion processes, model validation and data analysis; requires more advanced graduate work than C S 492. Students are expected to have knowledge of algorithms and data structures equivalent to C S 372.

C S 513. Computer Security**3 Credits**

Introduction to the art and science of computer security. Fundamentals of computer security including elementary cryptography, authentication and access control, security threats, attacks, detection and prevention in application software, operating systems, networks and databases.

Prerequisite(s): At least a C in C S 273 or consent of instructor.

C S 514. Introduction to Smart Grids**3 Credits**

This course is an introduction to the technologies and design strategies associated with the Smart Grid. The emphasis will be on the development of communications, energy delivery, coordination mechanisms, and management tools to monitor transmission and distribution networks.

Topics include: Smart grid introduction and evolution; Power systems; Networking and transport control; Artificial intelligence & agent coordination; Data mining for smart grids. Requires more advanced work than C S 494.

Prerequisite(s): At least a C- in C S 272 and a C- in E E 201 or 280; or Consent of instructor.

C S 515. User Interface Design**3 Credits**

Interface design, conceptual models formed by users, computer-aided instruction, natural and query languages, graphical representations; requires more advanced graduate work than C S 485. Students are expected to have knowledge of software engineering equivalent to C S 371.

C S 516. Bioinformatics**3 Credits**

Introduction to bioinformatics and computational biology. Computational approaches to sequences analysis, protein structure prediction and analysis, and selected topics from current advances in bioinformatics; requires more advanced graduate work than C S 486. Students are expected to have a knowledge of algorithms and data structures equivalent to C S 372 or exposure to Biology (equivalent to BIOL 221 or BIOL 311).

C S 517. Digital Game Design**3 Credits**

An introductory to digital game design. Topics include design, develop, and playtest games. The course is structured to use team-based learning.

C S 518. Visual Programming**3 Credits**

Design and implementation of languages using visual but nontextual means to specify programs. Required more advanced work than C S 481.

Prerequisite(s): at least a C in C S 272 and C S 278.

C S 521. Parallel Programming**3 Credits**

Programming of shared memory and distributed memory machines; tools and languages for parallel programming; parallelizing compilers; parallel programming environments; requires more advanced graduate work than C S 491. Students are expected to have knowledge of programming and machine organization equivalent to C S 271 and C S 273.

C S 560. Graph Theory**3 Credits**

Graph theoretic models in all areas of computer science including computer architectures, computation geometry, fault tolerance, databases. Includes connectivity, colorability, factorization, topological embeddings in surfaces, reconstruction, groups and matrices associated with graphs.

Prerequisite: consent of instructor.

C S 570. Analysis of Algorithms**3 Credits**

Techniques for design and analysis of algorithms; time and space complexity; proving correctness of programs. Particular algorithms such as sorting, searching, dynamic programming. NP complete problems. Students are expected to have knowledge of algorithms and data structures equivalent to C S 372.

C S 571. Programming Language Structure II**3 Credits**

Formal semantics of programming languages. Students are expected to have knowledge of algorithms and data structures equivalent to C S 372, and knowledge of principles of programming languages equivalent to C S 471.

C S 572. Advanced Algorithms**3 Credits**

Design, analysis, and use of important algorithms and data structures.

Prerequisite: C S 570 or consent of instructor.

C S 573. Architectural Concepts II**3 Credits**

Advanced topics related to computer architecture, guided by the current literature. Students are expected to have knowledge of computer architectures equivalent to C S 473 and of operating systems equivalent to C S 474. Crosslisted with: E E564.

C S 574. Operating Systems II**3 Credits**

Advanced topics related to operating system principles, guided by the current literature. Students are expected to have knowledge of computer architectures and operating systems equivalent to C S 473 and C S 474.

C S 575. Artificial Intelligence II**3 Credits**

Covers advanced theory and application of artificial intelligence. Concentration on several specific research areas, such as knowledge representation, problem solving, common-sense reasoning, natural language understanding, automated tutoring systems, learning systems. Students are expected to have knowledge of artificial intelligence equivalent to C S 475.

C S 579. Special Topics**1-6 Credits**

Topic announced in the Schedule of Classes.

C S 581. Advanced Software Engineering**3 Credits**

Advanced tools and methods for developing large software systems. Topics include object-oriented modeling and design, component architectures, templates and generic programming, software configuration and revision control, static and dynamic analysis tools, model, checking, advanced testing, and verification. Students are expected to have knowledge of software engineering equivalent to C S 371.

C S 582. Database Management Systems II**3 Credits**

Advanced data models and abstractions, dependencies, implementations, languages, database machines, and other advanced topics. Students are expected to have knowledge of data base management systems equivalent to CS 482.

C S 584. Computer Networks II**3 Credits**

Advanced topics in computer networks. Covers advanced topics in networking, with emphasis on wireless, and IP networks. Students are expected to have knowledge of computer networks equivalent to C S 484, and of statistics equivalent to STAT 371 or STAT 470.

C S 586. Algorithms in Systems Biology**3 Credits**

The course will introduce important algorithms and computational models used in systems biology to study molecular mechanisms for cellular dynamics, processes, and systems. Cellular processes, such as metabolism and signal transduction, are studied as systems and networks quantitatively from high throughput molecular measurements. The topics include molecular biological systems, network alignment, model simulation, network inference, model optimization, and hybrid models. Students will be able to construct models and analyze their properties in the context of molecular biological systems. Students are expected to have knowledge of algorithms and data structures equivalent to C S 372.

C S 589. Special Research Problems**1-6 Credits**

Faculty-supervised investigation, to culminate in a written report. May be repeated; maximum of 6 credits may be applied toward M.S. degree. Restricted to majors.

Prerequisite: written agreement with faculty supervisor.

C S 598. Master's Project**1-6 Credits**

Project-oriented capstone course to be completed by M.S. students under supervision of their advisor. Maximum of 6 credits may be applied toward M.S. degree. Restricted to C S majors.

Prerequisite: written agreement with instructor.

C S 599. Master's Thesis**1-6 Credits (1-6)**

Thesis to be developed by M.S. Students under supervision of their advisor. May be repeated for a maximum of 6 credits. Restricted to majors.

Prerequisite: consent of instructor.

C S 600. Pre-dissertation Research**1-15 Credits**

Pre-dissertation research.

C S 700. Doctoral Dissertation**15 Credits**

Dissertation.

CAST-CHILD ADVOCACY STUDIES (CAST)

CAST 201. Introduction to Child Advocacy**3 Credits**

This is the introductory course for child advocacy studies (CAST). It covers different models for understanding child maltreatment, types and indicators of child maltreatment, controversial topics in the field, and issues and laws related to child maltreatment in various countries around the world. Students will develop critical thinking and analytical skills in assessing child maltreatment. Restricted to Dona Ana campus only.

CAST 202. Professional and Systems Responses to Child Maltreatment
3 Credits

Course examines the professionals and systems that respond to allegations of child abuse and neglect. Includes the differences between civil and criminal proceedings; components of a court-worthy child abuse and neglect investigation; basic child forensic interviewing; an overview of child sex offenders; and current research and controversial issues affecting the field. Restricted to Dona Ana campus only.

Prerequisite(s): CAST 201.

CAST 203. Prevention, Trauma Informed Treatment and Advocacy
3 Credits

The purpose of this course is to prepare students to recognize the effects of child maltreatment and apply interventions strategies for children and their families. Multidisciplinary approaches to prevention, advocacy and treatment of child maltreatment survivors will be presented and discussed. Topics include violence prevention research, interdisciplinary family programs, how to advocate for survivors of child abuse, case management, working with families, mental health service and controversial issues.

Prerequisite(s): CAST 201.

CAST 301V. Introduction to Child Advocacy
3 Credits

Historical review and evolution of child welfare policies, initiatives and factors that influence child welfare service. Child welfare policies and services specific to the state of New Mexico are infused throughout the course. Taught with MSW 590. Cannot receive credit for CAST 301 and MSW 590.

CAST 302. Professional and Systems Responses to Child Maltreatment
3 Credits

Course examines the professionals and systems that respond to allegations of child abuse and neglect. Includes the differences between civil and criminal proceedings; components of a court-worthy child abuse and neglect investigation; basic child forensic interviewing; an overview of child sex offenders; current research and controversial issues affecting the field. Students majoring in social work, criminal justice, education, sociology, psychology, nursing, and other areas will enhance their capacity to strengthen the safety net that protects children.

Prerequisite(s): CAST 301.

CAST 303. Prevention, Trauma Informed Treatment and Advocacy
3 Credits

The purpose of this course is to prepare students to recognize the effects of child maltreatment and to apply intervention strategies for children and their families. Multidisciplinary approaches to prevention, advocacy, and treatment of child maltreatment survivors will be presented and discussed. Topics include violence prevention research, interdisciplinary family programs, how to advocate for survivors of child abuse, short- and long-term effects of child abuse, case management, working with families, mental health services and controversial issues. Crosslisted with: FCS 300

Prerequisite(s): CAST 301.

CAST 501. Introduction to Child Advocacy
3 Credits

This is the introductory course for child advocacy studies (CAST). It covers different models for understanding child maltreatment, types and indicators of child maltreatment, controversial topics in the field, and issues and laws related to child maltreatment in various countries around the world. Students will develop critical thinking and analytical skills in assessing child maltreatment at the graduate level.

CAST 502. Professional and Systems Responses to Child Maltreatment
3 Credits

This graduate level course examines the professionals and systems that respond to allegations of child abuse and neglect. Includes the differences between civil and criminal proceedings; components of a court-worthy child abuse and neglect investigation; basic child forensic interviewing; an overview of child sex offenders; and current research and controversial issues affecting the field.

CAST 503. Prevention, Trauma Informed Treatment and Advocacy
3 Credits

The purpose of this course is to prepare graduate students to recognize the effects of child maltreatment and apply interventions strategies for children and their families. Multidisciplinary approaches to prevention, advocacy and treatment of child maltreatment survivors will be presented and discussed.

Prerequisite(s): A "B" or better in CAST 501.

CCDE-DEVELOPMENTAL ENGLISH (CCDE)

CCDE 105 N. Effective Communication Skills
4 Credits (3+2P)

Instruction and practice in basic communication, to include written and oral presentations. Develops thinking, writing, speaking, reading, and listening skills necessary for successful entry to college and university classes. Provides laboratory. RR applicable.

CCDE 110 N. General Composition
4 Credits (3+2P)

Instruction and practice in preparation for college-level writing. Students will develop and write short essays. Provides laboratory. RR applicable.

Prerequisite: CCDE 105N (C or better) or equivalent.

CCDL-DEVELOPMENTAL ESL (CCDL)

CCDL 101 N. Basic Skills in English as a Second Language I
4 Credits (3+2P)

Developmental studies course for ESL students. Development of basic skills in speaking, listening, reading, and writing English as a second language with emphasis on speaking and listening. Pronunciation stressed. Course intended for U.S. citizens and residents who are nonnative speakers of English.

Prerequisite: English language screening or consent of instructor.

CCDL 103 N. Basic Skills in English as a Second Language II
4 Credits (3+2P)

Continuation of CCDL 101N for ESL students. Course intended for U.S. citizens and residents who are nonnative speakers of English.

Prerequisite: English language screening or consent of instructor.

CCDL 105 N. Intermediate Skills in English as a Second Language I
4 Credits (3+2P)

Intermediate level with emphasis on reading and writing. Grammar and syntax stressed. Course intended for U.S. citizens and residents who are nonnative speakers of English.

Prerequisite: English language screening or consent of instructor.

CCDL 107 N. Intermediate Skills in English as a Second Language II
4 Credits (3+2P)

Continuation of CCDL 105N. Course intended for U.S. citizens and residents who are nonnative speakers of English.

Prerequisite: English language screening or consent of instructor.

CCDM-DEVELOPMENTAL MATHEMATICS (CCDM)

CCDM 100 N. Mathematics Preparation for College Success

1-4 Credits

Mathematics skills course designed for college students with math skills insufficient for success in CCDM 103N. May be repeated for a maximum of 4 credits. RR applicable.

CCDM 103 N. Pre-Algebra

4 Credits (3+2P)

Fundamental mathematics operations and arithmetic computations. Introduction to algebra and applied geometry. Provides laboratory and individualized instruction. RR applicable.

CCDM 105 N. Mathematics Preparation and Pre-Algebra

5 Credits (4+2P)

A total immersion course that combines CCDM 100N and CCDM 103N using tutorials, manipulatives, and classroom instruction. Completion of this class is equivalent to the completion of CCDM 100N and CCDM 103N. Restricted to: Community Colleges only.

Prerequisite(s): Math Placement Exam.

CCDM 112 N. Developmental Algebra I

4 Credits (3+2P)

Fundamental algebra operations, algebraic expressions, solving linear equations, systems of equations and applications of linear equations. Introduction to exponents and polynomials. Provides laboratory instruction. Completion of CCDM 112N and CCDM 113N is equivalent to completion of CCDM 114N. Graded: Traditional with RR. Traditional Grading with RR. Restricted to Community Colleges campuses only.

Prerequisite(s): Grade of C or better in CCDM 103N or CCDM 105N or adequate placement score.

CCDM 113 N. Developmental Algebra II

4 Credits (3+2P)

Fundamental algebra operations, polynomials, factoring, solving quadratics by factoring, rational expressions, exponents and radical expressions (continuation of CCDM 112N). Provides laboratory instruction. Completion of CCDM 112N and CCDM 113N is equivalent to completion of CCDM 114N. Graded: Traditional with RR. Restricted to: Community Colleges only.

Prerequisite(s): Grade of C or better in CCDM 112N or consent of instructor.

CCDM 114 N. Algebra Skills

4 Credits (3+2P)

Fundamental algebra operations: algebraic expressions, solving linear and quadratic equations, factoring, radicals, exponents. Provides laboratory and individualized instruction. Completion of CCDM 114N meets basic skills requirement. Graded: Traditional with RR. Traditional Grading with RR. Restricted to Community Colleges campuses only.

Prerequisite(s): C or better in CCDM 103N or CCDM 105N or adequate placement score.

CCDM 117 N. Intermediate Algebra I

3 Credits

Real numbers, linear equations, functions, inequalities, absolute value equations, systems of equations, exponents and scientific notation, polynomials and polynomial functions, rational expressions. Graded S/U. A student who completes CCDM 117N with a grade of S must then continue with a designated section of MATH 120.

Prerequisite: student must be qualified for MATH 120.

CCDR-DEVELOPMENTAL READING (CCDR)

CCDR 101 N. Introduction to Basic Reading

4 Credits (3+2P)

Provides basic reading skills through comprehension and vocabulary development. Emphasis on oral language literacy and reading fluency.

Course earns institutional credit but will not count toward degree requirements. May be repeated up to 4 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): Appropriate placement score.

CCDR 103 N. Comprehensive Reading Development

4 Credits (3+2P)

Provides integration of basic reading skills, including vocabulary development, text comprehension, and critical reading skills. Course earns institutional credit but will not count towards degree requirements. May be repeated up to 4 credits. Traditional Grading with RR. Restricted to Community Colleges campuses only.

Prerequisite(s): Appropriate placement score.

CCDR 105 N. Fundamentals of Academic Reading.

3 Credits (2+2P)

Fundamentals of academic reading skills. Emphasis on vocabulary development and text comprehension through literature based instruction. Course earns institutional credit but will not count towards degree requirements. Graded: Traditional with RR. May be repeated up to 3 credits. Traditional Grading with RR. Restricted to Community Colleges campuses only.

Prerequisite(s): Appropriate placement score.

CCDR 110 N. Effective College Reading

3 Credits (2+2P)

Provides a variety of strategies for effective reading and studying at the college level. Emphasis on reading across disciplines. Course earns institutional credit but will not count towards degree requirements. Graded: Traditional with RR. May be repeated up to 3 credits. Traditional Grading with RR. Restricted to Community Colleges campuses only.

Prerequisite(s): Appropriate placement score.

CCDS-DEVELOPMENTAL SKILLS (CCDS)

CCDS 104 N. Comprehensive Reading Development

4 Credits (3+2P)

Integration of basic reading skills, including vocabulary development, text comprehension, and critical reading skills. RR applicable.

CCDS 108 N. Effective Reading

4 Credits (3+2P)

Instruction and practice of skills and strategies for effective reading at the college level. Designed to incorporate applied skill practice lab activities. RR applicable.

CCDS 109 N. Study Skills for Reading

1-3 Credits

Individualized reading skill strategies necessary for success in college classroom. May be repeated for a maximum of 3 credits. Graded traditional or S/U.

CCDS 111 N. Study Skills for Math

1-3 Credits

Individualized study skill strategies necessary for success in the math classroom. May be repeated for a maximum of 3 credits.

CCDS 113 N. Study Skills for English**1-3 Credits**

Individualized study skill strategies necessary for success in the composition classroom. May be repeated for a maximum of 3 credits.

CHEF-CULINARY ARTS (CHEF)

CHEF 101. Culinary Arts Kitchen Orientation**3 Credits**

Provides students with basic information and skills necessary for success in the Culinary Arts program. Students learn basic kitchen routines, safety and sanitation, professional conduct and deportment, standard kitchen calculations, knife handling, and are introduced to the laboratories for initial cooking experiences. Restricted to Community Colleges campuses only.

CHEF 125. Introductory Cake Decorating**1 Credit**

Introduction to the professional cake decorating techniques used by pastry chefs. Basic skills of piping a variety of icings into different patterns are taught. Restricted to Community Colleges campuses only.
Prerequisite(s): Consent of instructor.

CHEF 126. Intermediate Cake Decorating**1 Credit**

Introduction to more advanced professional cake decorating techniques used by pastry chefs. Fondant work and more complex decorating schemes are taught. Restricted to Community Colleges campuses only.
Prerequisite(s): CHEF 125.

CHEF 127. Chocolate Work**1 Credit**

Introduction to working with chocolate utilizing a variety of methods. Tempering, forming, molding, and other professional techniques will be taught. Restricted to Community Colleges campuses only.
Prerequisite(s): Consent of Instructor.

CHEF 128. Advanced Chocolate Work**1 Credit**

More advanced treatments of chocolate are explored and professional techniques for the chocolatier are developed. Restricted to Community Colleges campuses only.
Prerequisite(s): CHEF 127.

CHEF 129. Wedding Cake Design and Construction**1 Credit**

Basic skills in designing wedding (or other specialty event) cakes. Includes shaping, icing selection, decorating scheme, presentation, transportation, and remote set up. Restricted to Community Colleges campuses only.
Prerequisite(s): CHEF 125 and CHEF 126.

CHEF 155. Special Topics**1-3 Credits (3-9P)**

Specific subjects to be announced in the Schedule of Classes. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

CHEF 165. Math for Kitchen Operations**3 Credits**

Fundamental mathematical concepts and computations, including measurement, recipe scaling and conversions, metric unit conversion, ingredient yield calculations, ratios and cost extensions are covered. Examples of basic mathematical calculations use kitchen and food service functions, as well as situations to demonstrate principles.

CHEF 211. Food Production Management I**3 Credits (2+2P)**

Introduction to kitchen design, workflow, and commercial equipment. Techniques, methods, and application of basic food production principles. Practical experience in cooking processes from a managerial viewpoint. Crosslisted with: HOST 211. Restricted to Community Colleges only.

CHEF 212. Food Production Management II**3 Credits (2+2P)**

Selection and use of ingredients. Demonstration and application of classical and modern cooking and preparation techniques. Management techniques for kitchen personnel. Recipe design and analysis. Crosslisted with: HOST 212. Restricted to Community Colleges only.

Prerequisite(s): CHEF 211 or consent of instructor.

CHEF 213. Bakery Management I**3 Credits (2+2P)**

Fundamentals of baking from a supervisory/management perspective. Exposure to commercial equipment and processes. Introduction to commercial alternatives to scratch-preparation methods. Crosslisted with: HOST 213. Restricted to Community Colleges only.

CHEF 214. Bakery Management II**3 Credits (2+2P)**

Advanced techniques and management of bakery operations are explored. Students learn classical forms and techniques. Modern methods of preparing traditional pastry and baked goods are introduced. Crosslisted with: HOST218. Restricted to Community Colleges only.
Prerequisite(s): CHEF 213 or consent of instructor.

CHEF 233. Culinary Arts Fundamentals I**4 Credits (1+9P)**

Introduction to the basics of culinary arts, including ingredients recognition, cooking methods and techniques, knife usage, preparation of basic stocks, mother sauces, starches and vegetables. Students will participate in laboratory work designed to create an understanding of the professional role of the culinarian. Preparation and production of food products integral to service to guests is incorporated in the course. May be repeated up to 4 credits. Consent of Instructor required. Restricted to: CHEF, HOST, HSMG, HOCH majors. Restricted to Community Colleges campuses only.

CHEF 234. Culinary Arts Fundamentals II**4 Credits (1+9P)**

Continuation of introductory course focusing on meat cookery, daughter sauces, cold food preparation, poultry and seafood. Safe use of equipment is emphasized while experiencing differing methods of preparation and cooking. Preparation and production of food products integral to service of guests is incorporated in this course. May be repeated up to 4 credits. Restricted to: HOST,HSMG,CHEF majors. Restricted to Community Colleges campuses only.
Prerequisite(s): CHEF 233 with a grade of "C-" or better.

CHEF 235. Advanced Culinary Arts I**4 Credits (1+9P)**

Exploration and experience in preparation techniques beyond the basic level. Nutritional components of food are discussed, as in the application of good nutrition practices in recipe design. Students are encouraged to use creative methods to expand the individual's culinary expressions. Prepares food products for service to guests in both bulk feeding and individual service settings. Plans, prepares, serves and critiques meals provided for students, faculty and staff. Restricted to: CHEF majors. Restricted to Community Colleges campuses only.
Prerequisite(s): CHEF 234 with a grade of "C" or better.

CHEF 236. Advanced Culinary Arts II**4 Credits (1+9P)**

Advanced techniques and experimental use of food combinations to enhance the student's repertoire of skills and abilities. Utilizes knowledge to develop recipes for unique products. Plans, prepares, serves and critiques meals provided for students, faculty and staff. Restricted to: CHEF majors. Restricted to Community Colleges campuses only.

Prerequisite(s): CHEF 235 with a grade of "C" or better.

CHEF 237. Banquet/Catering Production**3 Credits (1+6P)**

Planning and implementation of the culinary aspects of catered functions. Development of time schedules, work assignments and service plans for catered events and banquet functions. Production of food items in appropriate quantities for catered events. Costing and control functions are covered. May be repeated up to 6 credits. Restricted to: CHEF majors. Restricted to Community Colleges campuses only.

Prerequisite(s): CHEF 234.

CHEF 240. Baking Fundamentals I**4 Credits (1+9P)**

Introduction to baking techniques, measurement and use of ingredients; equipment use and chemical reactions inherent in the baking process. Production of simple desserts and baked goods. Introduction to working with bread doughs. Restricted to: HOST, CHEF majors. Restricted to Community Colleges campuses only.

Corequisite(s): CHEF 233.

CHEF 241. Baking Fundamentals II**4 Credits (1+9P)**

More advanced baking and bread making techniques are covered in this course with emphasis on the more advanced elements of quantity production. Students work with a variety of products and ingredients. Restricted to: HOST, CHEF majors. Restricted to Community Colleges campuses only.

Prerequisite(s): grade of "C" or above in CHEF 240.

CHEF 242. Intermediate Baking I**4 Credits (1+9P)**

More advanced baking and pastry techniques are covered in this course with emphasis on the basic elements of patisserie production. Focus is on preparing students to work in a pastry kitchen. Restricted to: HOST, CHEF majors. Restricted to Community Colleges campuses only.

Prerequisite(s): Grade of "C" or above in CHEF 241.

CHEF 243. Intermediate Baking II**3 Credits (1+6P)**

Continuation of work with basic elements of patisserie products including laminated doughs and filled products. Students prepare creams, custards, fillings and are introduced to cake assembly procedures. Restricted to: HOST, CHEF majors. Restricted to Community Colleges campuses only.

Prerequisite(s): Grade of "C" or above in CHEF 242.

CHEF 245. Pastry Art and Techniques**3 Credits (1+6P)**

Advanced skills for the pastry chef including pulled sugar work, spun sugar, chocolate art, pastillage, marzipan molding, butter carving and advanced decorating techniques are explored. Students prepare specialty items for display and competition. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: CHEF majors. Restricted to Community Colleges campuses only.

Prerequisite(s): CHEF 240.

CHEF 255. Special Topics**3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated up to 6 credits. Restricted to: CULI, HOST, HSMG majors. Restricted to Community Colleges campuses only.

CHEF 256. International Cuisine**3 Credits (1+6P)**

Exploration into a variety of international cuisines is undertaken, including the cultural and historical backgrounds of the foods being prepared. Students work on developing themed menus and production plans for meals utilizing a single international cuisine. May be repeated up to 6 credits. Restricted to: CULI, HOST majors. Restricted to Community Colleges campuses only.

Prerequisite(s): CHEF 234.

CHEF 257. Garde Manger**3 Credits (1+6P)**

Traditional garde manger skills are taught, including plated salads, cold foods, entremets, pates, forcemeat, terrines, charcuterie and chaud froid work. The art and craft of food design, preparation and service are emphasized. Restricted to: CHEF & HOST majors. Restricted to Community Colleges only.

Prerequisite(s): CHEF 234.

CHEF 260. Nutrition for Chefs**3 Credits**

Aspects of basic human nutritional requirements are covered as are the applications of the standards to the cooking and baking. Meeting the USDA nutrient guidelines while preparing good tasting food is discussed, calorie, fat and sodium reduction techniques are explored.

CHEM-CHEMISTRY (CHEM)

CHEM 100. Basic Chemistry**3 Credits**

For students whose preparatory science or math training has been deficient. Does not meet the chemistry requirement in any curriculum.

Prerequisite: Enhanced ACT composite score of at least 18 or a grade of C or better in CCDM 114N.

CHEM 101. General Supplemental Instruction I**1 Credit**

Collaborative workshop for students in General Chemistry I. Course does not count toward departmental degree requirements. May be repeated for a maximum of 2 credits.

Corequisite: CHEM 111G.

CHEM 102. General Supplemental Instruction II**1 Credit**

Collaborative workshop for students in General Chemistry II. Course does not count toward departmental degree requirements. May be repeated for a maximum of 2 credits.

Corequisite: CHEM 112G.

CHEM 103. Principles of Supplemental Instruction III**1 Credit**

Collaborative workshop for students in CHEM 110G, Principles and Applications of Chemistry. Course does not count toward departmental degree requirements. May be repeated for maximum of 2 credits.

Co-requisite: CHEM 110G.

CHEM 110G. Principles and Applications of Chemistry**4 Credits (3+3P)**

A survey of the properties and uses of the elements and their compounds. In addition to classical chemistry, attention is paid to the materials from which consumer products are made, to the production of energy, and to environmental considerations.

Prerequisite: 3 years of high school math or CCDM 114N.

CHEM 111G. General Chemistry I**4 Credits (3+3P)**

Descriptive and theoretical chemistry. CHEM 111G/112G are General Education alternative to CHEM 110G.

Prerequisite: (1) grade of C or better in MATH 120 or a Mathematics Placement Exam Score adequate to enroll in mathematics courses beyond MATH 120; and (2) one of the following: B or better in a second semester high school chemistry course, or grade of at least C in CHEM 100, or an enhanced ACT score of at least 22.

CHEM 112G. General Chemistry II**4 Credits (3+3P)**

Descriptive and theoretical chemistry. CHEM 111G/112G are General Education alternative to CHEM 110G.

Prerequisite(s): CHEM 111G.

CHEM 115. Principles of Chemistry I**4 Credits (3+3P)**

Detailed introduction to analytical, inorganic and physical aspects of chemistry; both descriptive and theoretical explanations. Structured for chemistry and biochemistry majors but appropriate for other physical and life science students. CHEM 115/116 are General Education alternatives to CHEM 110G.

Prerequisite: Eligible to take MATH 190G and an ACT composite score of 22 or higher.

CHEM 116. Principles of Chemistry II**4 Credits (3+3P)**

Recommended for chemistry majors and other qualified students. CHEM 115/116 are General Education alternatives to CHEM 110G.

Prerequisites: grade of C or better in CHEM 115.

CHEM 210. Chemistry for the Allied Health Sciences**3 Credits**

Discussion and application of the established facts and concepts of general organic chemistry and biochemistry to acquire a molecular understanding of a variety of health related issues, from atmospheric ozone holes to human nutrition.

Prerequisite: CHEM 110G or CHEM 111G.

CHEM 211. Organic Chemistry**4 Credits (3+3P)**

A one-semester survey for students requiring a brief coverage of important classes of organic compounds.

Prerequisite: CHEM 112G or CHEM 114.

CHEM 217. General Chemistry III**3 Credits (2+3P)**

Quantitative aspects of general chemistry: solid state structure, equilibrium, thermodynamics, and kinetics. Required of chemical science majors who have taken CHEM 111G/112.

Prerequisite: CHEM 112G.

CHEM 241. Introduction to Research**1-3 Credits (3+9P)**

Techniques and procedures of chemical research. May be repeated for a maximum of 3 credits.

Prerequisites: 8 credits of chemistry and a 3.0 GPA in chemistry.

CHEM 242. Explorations in Chemistry**1 Credit**

Historical and current developments, careers in chemistry, computer applications and use of the library by chemists. To be completed before the end of the sophomore year. Graded S/U.

CHEM 251. Special Topics in Chemistry**1-6 Credits (1-6)**

Specific subjects in Chemistry. These subjects will be announced in the 'Schedule of Classes'. It may be repeated under different topics for a maximum of 12 credits.

CHEM 303. Organic Supplemental Instruction I**1 Credit**

Collaborative workshop for students in Organic Chemistry I. Course does not count toward departmental degree requirements. May be repeated for a maximum of 2 credits.

Corequisite: CHEM 313.

CHEM 304. Organic Supplemental Instruction II**1 Credit**

Collaborative workshop for students in Organic Chemistry II. Course does not count toward departmental degree requirements. May be repeated for a maximum of 2 credits.

Corequisite: CHEM 314.

CHEM 313. Organic Chemistry I**3 Credits**

Nomenclature, uses, basic reactions, and preparation methods of the most important classes of aliphatic and aromatic compounds.

Prerequisite: CHEM 112G or CHEM 116.

CHEM 314. Organic Chemistry II**3 Credits**

Nomenclature, uses, basic reactions, and preparation methods of the most important classes of aliphatic and aromatic compounds.

Prerequisite: C or better in CHEM 313.

CHEM 315. Organic Chemistry Laboratory**2 Credits**

Techniques, preparative and analytical methods in organic chemistry.

Prerequisite: C or better in CHEM 313 or consent of instructor.

Corequisite: CHEM 314.

CHEM 351. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

CHEM 356. Descriptive Inorganic Chemistry**3 Credits**

Occurrence and properties of the elements and the chemistry of their compounds.

Prerequisites: CHEM 112G and CHEM 116; and CHEM 211 or CHEM 313.

CHEM 357. Synthetic Inorganic Laboratory**2 Credits**

Explores synthesis and analysis of main group and transition metal inorganic compounds. Inorganic laboratory and spectroscopic techniques will be used.

Prerequisites: CHEM 356.

CHEM 360. General Geochemistry**3 Credits**

Same as GEOL 360.

CHEM 371. Analytical Chemistry**4 Credits (2+6P)**

The fundamentals of quantitative chemical analysis.

Prerequisite: CHEM 112G.

CHEM 422. Environmental Chemistry**3 Credits**

Chemistry of organic and metal ion pollutants in the environment and principles important to their remediation including bioremediation.

Restricted to: Main campus only. Crosslisted with: E S 422

Prerequisite(s): CHEM 112G and either CHEM 211 or CHEM 313.

CHEM 424. Soil Chemistry**3 Credits**

Same as SOIL/GEOL 424.

CHEM 431. Physical Chemistry**3 Credits**

Principles that govern the physical and chemical behavior of matter. May not be counted toward Bachelor of Science degree in Chemistry.

Prerequisite(s): CHEM 116 or CHEM 217; MATH 192G; PHYS 212 or PHYS 222G or PHYS 214 or PHYS 216G.

CHEM 431 H. Physical Chemistry Honors**3 Credits**

Same as CHEM 431. Additional work to be arranged.

Prerequisite(s): CHEM 116 or CHEM 217; MATH 192G; PHYS 212G or PHYS 222G or PHYS 214 or PHYS 216G.

CHEM 433. Physical Chemistry I**3 Credits**

Laws and theories underlying chemical phenomena.

Prerequisite(s): CHEM 116 or CHEM 217; MATH 192G; PHYS 214 or PHYS 216G, or consent of instructor.

CHEM 433 H. Physical Chemistry I Honors**3 Credits**

Same as CHEM 433. Additional work to be arranged.

Prerequisite(s): CHEM 116 or CHEM 217; MATH 192G; PHYS 214 or PHYS 216G, or consent of instructor.

CHEM 434. Physical Chemistry II**3 Credits**

Laws and theories underlying chemical phenomena.

Prerequisite: CH E 302 or CHEM 433.

CHEM 435. Physical Chemistry Laboratory**2 Credits**

Prerequisite: concurrent registration in CHEM 434.

CHEM 441. Advanced Research**1-3 Credits (3+9P)**

Investigation of chemical problems and the development of special techniques. May be repeated for a maximum of 3 credits.

Prerequisites: consent of instructor, 16 credits of chemistry and 3.0 GPA in chemistry for nonmajors.

CHEM 443. Senior Seminar**1 Credit**

Discussions of current chemical research, impact of chemistry on society and/or ethics as applied to chemists. Each student will present a written and an oral report on an approved topic.

Prerequisite: CHEM 431 or CHEM 433.

CHEM 451. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

CHEM 455. Independent Studies**1-3 Credits**

Independent studies directed by consulting faculty.

Prerequisite: consent of instructor.

CHEM 456. Inorganic Structure and Bonding**3 Credits**

Theoretical principles and a systematic study of the periodic table.

Prerequisite: CHEM 356 or CHEM 431 or CHEM 433.

CHEM 466. Advanced Organic Chemistry**3 Credits**

Recent developments in synthesis and theoretical principles of organic chemistry.

Prerequisite: CHEM 314.

CHEM 466 H. Advanced Organic Chemistry Honors**3 Credits**

Same as CHEM 466. Additional work to be arranged.

CHEM 471. Instrumental Methods of Analysis**4 Credits (3+3P)**

Analytical techniques, including optical and procedures.

Prerequisites: CHEM 371 and either PHYS 212G or PHYS 216G.

CHEM 500. Seminar in Inorganic Chemistry**1 Credit**

Current topics. May be repeated.

CHEM 506. Atomic and Molecular Structure in Inorganic Chemistry**3 Credits**

Theories of ionic and molecular bonding.

CHEM 507. Chemistry of the Elements**3 Credits**

Discussion of the reactions and structures of inorganic compounds.

CHEM 508. Main Group Chemistry**3 Credits**

Chemistry, structure and bonding of main group elements are covered along with some spectroscopy.

CHEM 509. Transition Metal Chemistry**3 Credits**

The chemistry, bonding theory, spectroscopy and industrial applications of the transition metals will be covered.

CHEM 510. Seminar in Organic Chemistry**1 Credit**

Current topics. May be repeated.

CHEM 514. Organic Structure Determination**3 Credits**

Modern spectroscopic techniques for characterization of organic compounds.

CHEM 515. Modern Organic Chemistry**3 Credits**

Recent developments in synthesis and theoretical principles of organic chemistry.

CHEM 516. Physical Organic Chemistry**3 Credits**

Physical organic chemistry.

CHEM 517. Synthetic Organic Chemistry**3 Credits**

Synthetic methods in organic chemistry.

CHEM 520. Seminar in Analytical Chemistry**1 Credit**

Current topics. May be repeated.

CHEM 521. Chemical Instrumentation**3 Credits (2+3P)**

Theory and application of electronic devices to chemical analysis.

CHEM 526. Advanced Analytical Chemistry**3 Credits**

Equilibria, and the theories of gravimetric, volumetric, and instrumental analysis.

CHEM 527. Separations**3 Credits**

Covers the fundamentals of separation methods and relationships to modern analytical techniques such as gas chromatography and liquid chromatography.

CHEM 528. Electroanalytical Techniques**3 Credits**

Theory and application of modern electrochemical methods of analysis including voltammetry, amperometry, modern cyclic and pulse methods, and stripping analysis.

CHEM 529. Spectrochemical Analysis**3 Credits**

Fundamentals, instrumentation, and applications of spectrochemical analysis.

CHEM 530. Seminar in Physical Chemistry**1 Credit**

Current topics. May be repeated.

CHEM 536. Chemical Thermodynamics**3 Credits**

First, second, and third laws of thermodynamics, and the concepts, interrelations, and applications of thermodynamic state functions.

CHEM 537. Quantum Chemistry**3 Credits**

Fundamentals of quantum mechanics.

Prerequisite: consent of instructor.

CHEM 538. Chemical Kinetics**3 Credits**

Empirical analysis of rate measurements, collision theory, transition state theory, and chain reactions.

CHEM 539. Spectroscopy**3 Credits**

Molecular spectroscopy for physical chemistry. Quantum mechanics applied to spectroscopy of polyatomic molecules: UV-VIs, IR, magnetic resonance. CHEM 537 desired but not required. **Prerequisite:** consent of instructor.

Prerequisite: consent of instructor.

CHEM 550. Discussions in Inorganic Chemistry**1 Credit**

Current research problems in inorganic chemistry. May be repeated. Graded S/U.

CHEM 560. Discussions in Organic Chemistry**1 Credit**

Current research problems in organic chemistry. May be repeated. Graded S/U.

CHEM 570. Discussions in Analytical Chemistry**1 Credit**

Current research problems in analytical chemistry. May be repeated. Graded S/U.

CHEM 580. Discussions in Physical Chemistry**1 Credit**

Current research problems in physical chemistry. May be repeated. Graded S/U.

CHEM 598. Special Research Programs**1-3 Credits**

Individual investigations, either analytical or experimental. Graded S/U.

CHEM 599. Master's Thesis**15 Credits**

Thesis preparation.

CHEM 600. Research**1-15 Credits**

Course used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination.

CHEM 609. Topics in Inorganic Chemistry**1-3 Credits**

Selected topics of current interest designated by subtitle.

CHEM 619. Topics in Organic Chemistry**1-3 Credits**

Selected topics of current interest designated by subtitle.

CHEM 629. Advanced Topics in Analytical Chemistry**3 Credits**

Discussion of advanced topics in the field of analytical chemistry. May be repeated with different subtitles. Consent of instructor required.

CHEM 639. Topics in Physical Chemistry**1-3 Credits**

Selected topics of current interest designated by subtitle.

CHEM 650. Advanced Seminar**1 Credit**

Intended for students who have earned a master's degree or the equivalent. A discussion of current topics of interest in chemistry. May be repeated.

CHEM 700. Doctoral Dissertation**17 Credits**

Dissertation preparation.

CHIN-CHINESE (CHIN)

CHIN 111. Elementary Chinese I**4 Credits**

Mandarin Chinese for beginners.

CHIN 112. Elementary Chinese II**4 Credits**

Mandarin Chinese for beginners.

Prerequisite: C or better in CHIN 111.

CHIN 211. Intermediate Chinese I**3 Credits**

Speaking, reading and writing Mandarin Chinese. Restricted to Las Cruces campus only.

Prerequisite(s): C or better in CHIN 112.

CHIN 212. Intermediate Chinese II**3 Credits**

Speaking, reading and writing Mandarin Chinese. Restricted to Las Cruces campus only.

Prerequisite(s): C or better in CHIN 211.

CHIN 311. Advanced Chinese Language I**3 Credits**

This course emphasizes the development of advanced oral, aural, reading and writing skills in Mandarin Chinese. Expanding of vocabulary and development of reading comprehension will be through different genres of authentic texts. Students will be trained to write short essays on a variety of topics.

Prerequisite(s): Grade of C or better in CHIN 211 and CHIN 212.

CHIN 312. Advanced Chinese Language II**3 Credits**

This course emphasizes the development of advanced oral, aural, reading and writing skills in Mandarin Chinese. Expanding of vocabulary and development of reading comprehension will be through different genres of authentic texts. Students will be trained to write short essays on a variety of topics.

Prerequisite(s): Grade of C or better in CHIN 311.

CHME-CHEMICAL & MATERIALS ENGR (CHME)

CHME 101. Introduction to Chemical Engineering Calculations**2 Credits**

Introduction to the discipline of chemical engineering, including: an overview of the curriculum; career opportunities; units and conversions; process variables; basic data treatments; and computing techniques including computer programming and use of spreadsheets.

Prerequisite(s)/Corequisite(s): MATH 190G. Restricted to Las Cruces campus only.

CHME 102. Material Balances**2 Credits**

Perform material balances in single- and multi-phase, reacting and non-reacting systems under isothermal conditions.

Prerequisite(s)/Corequisite(s): CHEM 111G or CHEM 115. Prerequisite(s): MATH 190G, CHME 101.

CHME 201. Energy Balances & Basic Thermodynamics**3 Credits**

Chemical Engineering energy balances; combined energy and material balances including those with chemical reaction, purge and recycle; thermochemistry; application to unit operations. Introduction to the first and second laws of thermodynamics and their applications. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

Prerequisite(s): CHME 102, CHEM 115 or CHEM 111G, and MATH 192G.

CHME 301. Chemical Engineering Thermodynamics I**3 Credits**

Applications of the first and second law to chemical process systems, especially phase and chemical equilibria and the behavior of real fluids. Development of fundamental thermodynamic property relations and complete energy and entropy balances.

Prerequisite(s)/Corequisite(s): CHME 392 or MATH 392. Prerequisite(s): CHME 201, MATH 291G. Restricted to: CHME majors.

CHME 302. Chemical Engineering Thermodynamics II**2 Credits**

Continuation of CHME 301. Restricted to: CHME majors.

Prerequisite(s): CHME 301 AND (CHME 392 OR MATH 392).

CHME 302 L. Thermodynamic Models of Physical Properties**1 Credit**

Computational analysis of thermodynamic models in a chemical process simulator, and comparison to experimental data. Specification of pseudo-components. Generation of physical properties by group contribution methods.

Prerequisite(s)/Corequisite(s): CHME 302.

CHME 303. Chemical Engineering Thermodynamics**4 Credits**

Applications of the First Law and Second Law to chemical process systems, especially phase and chemical equilibria and the behavior of real fluids. Development of fundamental thermodynamic property relations and complete energy and entropy balances. Modeling of physical properties for use in energy and entropy balances, heat and mass transfer, separations, reactor design, and process control. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): MATH 392. Prerequisite(s): CHME 201, MATH 291.

CHME 305. Transport Operations I: Fluid Flow**3 Credits**

Theory of momentum transport. Unified treatment via equations of change. Shell balance solution to 1-D problems in viscous flow. Analysis of chemical engineering unit operations involving fluid flow. General design and operation of fluid flow equipment and piping networks.

Prerequisite(s)/Corequisite(s): CHME 392. Prerequisite(s): CHME 201, PHYS 215G, MATH 291G. Restricted to: CHME majors.

CHME 306. Transport Operations II: Heat and Mass Transfer**4 Credits**

Theory of heat and mass transport. Unified treatment via equations of change. Analogies between heat and mass transfer. Shell balance solution to 1-D problems in heat and mass transfer. Analysis of chemical engineering unit operations involving heat transfer. Design principles for mass transfer equipment. Restricted to: CHME, CH E majors.

Prerequisite(s): CHME 305 and (CHME 392 or MATH 392).

CHME 307. Transport Operations III: Staged Operations**3 Credits**

Theory of mass transport. Mass transfer coefficients. Analysis of chemical engineering unit operations involving mass transfer and separations. Equilibrium stage concept. General design and operation of mass-transfer equipment and separation sequences. Restricted to: CHME majors.

Prerequisite(s): CHME 302, CHME 306.

CHME 311. Engineering Data Analysis**3 Credits**

Methodology and techniques associated with analyzing engineering data. Extensive spreadsheet use to analyze data and develop statistically significant conclusions based on the data. Data sets range from single variable experiments to multifactor regression analysis.

Prerequisite(s): MATH 192.

CHME 323 L. Transport Operations and Instrumentation Laboratory I
1 Credit

Laboratory experiments demonstrate the principles of process measurement and instrumentation through the determination of thermodynamic properties, transport phenomena properties, heat transfer, and material physical properties. Treatment of data includes regression techniques, analysis of error, and statistical analysis.

Prerequisite(s)/Corequisite(s): CHME 306. Prerequisite(s): STAT 371 or CHME 311. Restricted to: CHME majors.

CHME 324 L. Transport Operations and Instrumentation Laboratory II
1 Credit

Continuation of CHME 323L. Restricted to: CHME majors.

Prerequisite(s): CHME 323L.

CHME 330. Environmental Management Seminar I
1 Credit

Survey of practical and new developments in environmental management field, hazardous and radioactive, waste management, and related health issues, provided through a series of guest lectures and reports of ongoing research. Restricted to: Main campus only. Crosslisted with: C E 330, E E 330, E S 330, E T 330, I E 330, M E 330 and WERC 330

CHME 352 L. Simulation of Unit Operations
1 Credit

Definition, specification, and convergence of basic unit operations in a process simulator. Course will cover pipe networks, pressure changers, heat exchangers, distillation columns, and chemical reactors.

Prerequisite(s)/Corequisite(s): CHME 307, CHME 441. Restricted to: CHME majors.

CHME 361. Engineering Materials
3 Credits

Bonding and crystal structure of simple materials. Electrical and mechanical properties of materials. Phase diagrams and heat treatment. Corrosion and environmental effects. Application of concepts to metal alloys, ceramics, polymers, and composites. Selection of materials for engineering design.

Prerequisite(s): (CHEM 111G or CHEM 114 or CHEM 115) and MATH 190G.

CHME 391. Industrial Employment
1-2 Credits

Employment in chemical, petroleum, food, biotechnology, materials, environmental, pharmaceutical, or other industry relevant to the discipline, with opportunity for professional experience and training in chemical engineering. Requires written report covering work period approved by employer. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: CHME, CH E majors.

Prerequisite(s): Consent of department head.

CHME 392. Numerical Methods in Engineering
3 Credits

Study and application of numerical methods in solving problems commonly encountered in engineering. The numerical methods are motivated by engineering problems rather than by mathematics. However, sufficient mathematical theory will be provided so that students can appreciate the insight into the techniques and their shortcomings of different methods. MATLAB will be used as the working environment for implementing and performing the numerical methods in computers. This course is an engineering elective open to all engineering majors. May be repeated up to 3 credits.

Prerequisite(s): MATH 392.

CHME 395V. Brewing Science and Society
3 Credits

An overview of the science of brewing and the interrelationships between society, technology, business, and the evolution of the current beer market. Topics covered are history of brewing and the interrelationships between societal attitudes, technology, and cultural preferences; beer styles and evaluation techniques; production and characteristics of ingredients used in brewing; brewing unit operations; biochemistry of malting, mashing, and fermentation; engineering in the brewery; homebrewing; and societal and health issues related to beer and alcohol. Students must be at least 21 years of age by the first day of instruction of the semester to enroll in this course.

CHME 412. Process Dynamics and Control
3 Credits

Process modeling, dynamics, and feedback control. Linear control theory and simulation languages. Application of Laplace transforms and frequency response to the analysis of open-loop and closed-loop process dynamics. Dynamic response characteristics of processes. Stability analysis and gain/phase margins. Design and tuning of systems for control of level, flow, and temperature.

Prerequisite(s): CHME 441.

CHME 423 L. Unit Operations Laboratory I
1 Credit

Experiments with chemical engineering unit operations including the use of computer data acquisition. Covers control system instrumentation and development of empirical models from process data. Includes written and oral reports. Restricted to: CHME majors.

Prerequisite(s): CHME 307, CHME 441, CHME 324L.

CHME 424 L. Process Control Laboratory
1 Credit

Experiments with chemical engineering process control including the use of computer data acquisition and closed-loop process control. Covers control system instrumentation. Includes written and oral reports. Restricted to: CHME majors.

Prerequisite(s): CHME 412, CHME 423L.

CHME 430. Environmental Management Seminar II
1 Credit

Survey of practical and new developments in environmental management field, hazardous and radioactive, waste management, and related health issues, provided through a series of guest lectures and reports of ongoing research. Restricted to: Main campus only. Crosslisted with: C E 430, E E 430, E S 430, E T 430, I E 430, M E 430 and WERC 430

CHME 441. Chemical Kinetics and Reactor Engineering
3 Credits

Analysis and interpretation of kinetic data and catalytic phenomena. Applied reaction kinetics; ideal reactor modeling; non-ideal flow models. Mass transfer accompanied by chemical reaction. Application of basic engineering principles to design, operation, and analysis of industrial reactors.

Prerequisite(s)/Corequisite(s): CHME 307. Prerequisite(s): CHEM 313, CHME 302. Restricted to: CHME, CH E majors.

CHME 443. Industrial Catalysis
3 Credits

Fundamentals of catalytic processes, including chemistry, catalyst preparation, properties and reaction engineering. Addresses heterogeneous catalytic processes employed by industry. Detailed analysis of existing catalysts and catalytic reactions, and process design in chemical engineering.

Prerequisite(s): CHME 441.

CHME 448. Industrial Safety**3 Credits**

An introduction to the fundamentals of chemical process safety, including toxicology, industrial hygiene, source models, fires and explosions, relief systems, hazard identification, risk assessment, environmental fate and transport, hazardous waste generation, pollution prevention, and regulatory requirements.

Prerequisite(s): CHEM 115 or CHEM 111G.

CHME 449. Intellectual Property for Engineers and Scientists**3 Credits**

An overview of intellectual property with an emphasis on patents. Terminology, patentability requirements, invention disclosures, inventorship, scope of claims, patent application content and the patent prosecution process, and post-allowance matters including infringement and enforcement. Taught with CHME 549.

Prerequisite(s): CHEM 110G, CHEM 111G, or CHEM 115G; and senior standing in engineering or a fundamental science major; or consent of instructor.

CHME 452. Chemical Process Design & Economic Evaluation**3 Credits**

Concepts in chemical engineering process design, including: capital and manufacture cost estimation; discounted cash flows; interest; taxes; depreciation; profitability analysis; project specifications. Restricted to: CHME, CH E majors.

Prerequisite(s): CHME 307, CHME 441.

CHME 452 L. Chemical Process Simulation**1 Credit**

Construction and convergence of chemical processes in a process simulator. Students will understand how to access variables, define and converge design specifications and converge tear/recycle streams.

Prerequisite(s)/Corequisite(s): CHME 452. **Prerequisite(s):** CHME 352L. Restricted to: CHME majors.

CHME 455. Chemical Plant Design**3 Credits**

Design and analysis of integrated process plants. Consideration given to optimizing performance, operability, reliability, safety, control, energy integration, and cost effectiveness. Requires written report covering solution of a capstone design problem. Restricted to: CHME majors.

Prerequisite(s): CHME 452.

CHME 455 L. Chemical Plant Simulation**1 Credit**

Construction, convergence, and optimization of chemical processes in a process simulator. Dynamic process simulation and control.

Prerequisite(s)/Corequisite(s): CHME 455. **Prerequisite(s):** CHME 412, CHME 452L. Restricted to: CHME majors.

CHME 461. Calculation of Material and Molecular Properties**3 Credits**

The aim is to describe and apply techniques for computing common properties of materials and molecules: optimized geometries, transition states, vibrational spectra, energies (electronic, internal energy, enthalpy, and Gibbs free energy), heat capacities, net atomic charges, atomic spin moments, and effective bond orders. These techniques allow one to estimate the thermodynamic properties of a chemical, as well as to compute the mechanisms and energy barriers for chemical reactions and catalytic processes, and to quantify the electronic, magnetic, and chemical ordering in materials. The theory behind these techniques will be described and students will perform hands-on computer exercises using common computational chemistry programs. Taught with CHME 561.

Prerequisite(s): CHEM 116, MATH192G, (PHYS 214 or PHYS 216).

CHME 462. MEMs, BioMEMs, and Nano Devices & Technologies**3 Credits**

Device-fabrication approaches and testing methodologies for micro-electro-mechanical (MEM) systems and nanoscale devices. Applications of such devices, and their working principles will also be part of this course. A laboratory component of this course will also be included. Taught with CHME 562. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): CH E 361, CHEM 111.

CHME 463. Soft Matter**3 Credits**

Bulk soft matter assemblies including polymers, macromolecules, colloids, gels, vesicles, emulsions, surfactants, micelles, suspensions and liquid crystals. Self-assembly including molecular self-organization, supramolecular systems, encapsulation, self-assembled films and monolayers. Biological aspects of soft matter including biomacromolecules, cells and soft tissues. Surfaces, interfaces and interactions including thin films, Langmuir monolayers and wetting/dewetting. Physiochemistry and characterization of soft matter. Taught with CHME 563. Consent of Instructor required.

Prerequisite(s): CH E 302, CH E 305, CH E 361.

CHME 464. Polymer Science & Engineering**3 Credits**

This course covers concepts in science and engineering of macromolecules, such as synthesis and chemistry, characterization of molecular weight, morphology, rheology, and mechanical behavior, structure and property relationships, and polymer processing. Taught with CHME 564. May be repeated up to 3 credits.

Prerequisite(s): CHEM 314.

CHME 465. Rheology and Viscoelasticity**3 Credits**

Navier-Stokes equation; non-Newtonian fluids; flow fields; rheometry; viscoelastic models; non-linear viscoelasticity; material functions; complex fluids, including emulsions, suspensions and nanocomposites. Taught with CHME 565. Consent of Instructor required.

Prerequisite(s): CHME 306.

CHME 467. Nanoscience and Nanotechnology**3 Credits**

This is a lecture/laboratory course designed to present the basic concepts, the techniques and the tools to synthesize and characterize nanometer scale materials, and the latest achievements in current and future nanotechnology applications in engineering, materials, physics, chemistry, biology, electronics and energy. It is intended for a multidisciplinary audience with a variety of backgrounds. This course should be suitable for graduate students as well as advanced undergraduates. Topics covered will include: nanoscience and nanotechnology, nanofabrication, self-assembly, colloidal chemistry, sol-gel, carbon nanotubes, graphene, thin film, lithography, physical vapor deposition, chemical vapor deposition, quantum dots, lithium batteries, X-ray diffraction, scanning electron microscopy, transmission electron microscopy, nanoelectronics, nanophotonics and nanomagnetism, etc. Taught with PHYS 520 and CH E 567. Crosslisted with: PHYS 520 and PHYS 467.

Prerequisite(s): (CHEM 116 or CHEM 112G), (PHYS 211G or PHYS 215G), (EH&S Safety training to include the courses: (1) Employee & Hazard Communication Safety (HazCom); (2) Hazardous Waste Management; and (3) Laboratory Standard).

CHME 468. Adsorption**3 Credits**

Introduction to adsorption science and technology, which includes adsorption equilibrium and kinetic theories, adsorbent materials and characterization, adsorption processes and design. Selected applications of adsorption processes in chemical and pharmaceutical industries and environmental protections will also be discussed. Taught with CHME 568. Restricted to: CHME, CH E majors.

Prerequisite(s): CHME 201.

CHME 470. Introduction to Nuclear Energy**3 Credits**

Atomic and nuclear structure, nuclear stability and radioactivity, nuclear reactions, detection and measurement of radiation, interaction of radiation with matter, radiation doses and hazard assessment, principles of nuclear reactors, and applications of nuclear technology.

Prerequisite(s): CHEM 111G, MATH 192G.

CHME 471. Health Physics**3 Credits**

Introduction to radiation protection, radiation/radioactivity, radioactive decay/fission, interactions of radiation and matter, biological effects of radiation, radiation measurement and statistics, sampling for radiation protection, radiation dosimetry, environmental transport, radiation protection guidance, external and internal radiation protection, and hazards analysis.

Prerequisite(s): MATH 192G, CHME 470.

CHME 472. Detection Techniques for Radionuclides and Volatile Organic Compounds**3 Credits**

Basics of analytical techniques used to detect and quantify the presence of radionuclides, with focus on lung and whole-body counting by gamma-ray spectrometry and gas chromatography/mass spectrometry techniques. Course also covers sampling techniques, chain-of-custody methods, and includes hands-on instrument experience at the Carlsbad Environmental Monitoring & Research Center (CEMRC). Course fee required for travel to CEMRC.

Prerequisite(s): CHME 470.

CHME 473. Nuclear Regulations and Compliance Practices**3 Credits**

Introduction, through the use of case studies, to the best technical compliance practices for regulations governing the siting, licensing, constructing, operating and decommissioning of nuclear fuel cycle facilities. Consent of Instructor required.

Prerequisite(s): MATH 191G, (CHEM 111G or CHEM 115), CHME 470.

CHME 474. Power Plant Design**3 Credits**

Principles of electric power generation. Review of DC and AC systems, energy sources, and prime movers. Analysis of hydroelectric, fossil fuel, nuclear, and alternative power systems. Environmental and economic considerations.

Prerequisite(s): MATH 191G, CHEM 111G.

CHME 475. Nuclear Reactor Theory**3 Credits**

An overview of the properties of nuclei, nuclear structure, radioactivity, nuclear reactions, fission, resonance reactions, moderation of neutrons, will be followed by mathematical treatment of the neutronics behavior of fission reactors, primarily from a theoretical, one-speed perspective. Criticality, fission product poisoning, reactivity control, reactor stability and introductory concepts in fuel management, slowing down and one-speed diffusion theory.

Prerequisite(s): (CHEM 112G or CHEM 116G) PHYS 215G, MATH 291G, CHME 470.

CHME 476. Nuclear Fuel Cycles**3 Credits**

Physical and chemical processes in the conventional nuclear fuel cycle: uranium mining and milling, conversion, enrichment, fuel fabrication, reactor operations, interim storage, reprocessing and recycling, waste treatment and disposal. Alternative fuel cycles and future prospects. Consent of Instructor required.

Prerequisite(s): CHME 470.

CHME 479. Corrosion and Degradation of Materials**3 Credits**

Failure of engineering materials in aggressive environments. Chemical and electrochemical mechanisms of corrosion. Influence of chemical composition and microstructure on corrosion behavior. Types of corrosion and chemical attack, including uniform corrosion, galvanic corrosion, pitting and other forms of localized corrosion, stress corrosion cracking, and corrosion fatigue. Methods of corrosion mitigation including cathodic protection, coatings, passivation, and corrosion inhibitors. Corrosion in nuclear reactors and nuclear waste repositories.

Prerequisite(s): CHME 361.

CHME 481. Biomedical Engineering and Engineering Healthcare**3 Credits**

Orientation to solving human and world health issues with biological engineering systems, tools, and analysis methods. Introduces general concepts including applied biology for engineers, biophotonics, biosensing, bioinstrumentation, tissue and biomaterials engineering, biomedical engineering research practices, and physical bioanalytical methods. Taught with CHME 581. Restricted to: CHME, CH E majors.

Prerequisite(s): CHEM 116G, CHME 201.

CHME 485. Materials from Biorenewable Resources**3 Credits**

Types, sources, composition and properties of biomass. Production, processing, and applications of biomass materials with energy, water, cost, sustainability, and waste management considerations. Taught with CHME 585. Crosslisted with: AGRO 485 and HORT 486.

Prerequisite(s): CHEM 211 or CHEM 313 or permission of instructor.

CHME 486. Biofuels**3 Credits**

Introduction to the fundamentals and applications of biofuels and bioenergy production; biomass resources and their composition; types of biofuels; conversion technologies (thermochemical and biochemical conversion processes); biodiesel production, algae to biofuels; economic and environmental assessments; term paper of selected topics relevant to biofuels. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): CHME 201.

CHME 488. Elements of XRD**3 Credits**

Introduction to x-ray diffraction and reflectivity spectra. Topics include X-ray sources and detectors, atomic spectra, characteristic x-rays, thermionic emission, synchrotron radiation, instrument components, and beam conditioners. Crosslisted with: PHYS 468.

Prerequisite(s)/Corequisite(s): . Prerequisite(s): a C- or better in PHYS 315 and PHYS 315 L.

CHME 489. Introduction to Modern Materials**3 Credits**

Structure and mechanical, thermal, electric, and magnetic properties of materials. Modern experimental techniques for the study of material properties. Crosslisted with: PHYS 489.

Prerequisite(s): PHYS 315 or engineering equivalent.

CHME 490. Senior Seminar**1 Credit**

Research seminar attended by graduate students is open to CHME undergraduates who are research active. May be repeated up to 2 credits.

Prerequisite(s)/Corequisite(s): CHME 498. Prerequisite(s): Senior Standing. Restricted to: CHME, CH E majors.

CHME 491. Special Topics**3 Credits**

Lecture and/or laboratory instruction on special topics in chemical engineering. May be repeated to a maximum of 6 credits under different subtitles listed in the Schedule of Classes. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: CHME, CH E majors.

Prerequisite(s): Consent of instructor.

CHME 495. Brewing Science & Engineering**4 Credits (3+3P)**

Details of beer production, fermentation science, brewery operation, and process design & economics. Engineering considerations including process safety, fermentation kinetics, unit operations, and economies of scale. Beer styles, recipe formulation, product quantification for tax purposes, and brew analytical methods will also be discussed. Restricted to: CHME CH E majors.

Prerequisite(s): CHME 441, CHME 452.

CHME 498. Undergraduate Research**1-3 Credits (1-3P)**

Provides an opportunity for undergraduate students to work in research or areas of special interest such as design problems and economic studies under the direction of a faculty member. Written report covering work required. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: CHME, CH E majors.

Prerequisite(s): Consent of instructor and department head.

CHME 501. Graduate Thermodynamics for Chemical Engineers**3 Credits**

Advanced applications of the first and second law to chemical process systems. The calculus of thermodynamics, equilibrium and stability criteria. Properties relationships for real fluids, both pure materials and mixtures. An introduction to molecular thermodynamics and statistical mechanics. Restricted to: CHME, CH E majors.

CHME 506. Graduate Transport Phenomena(s)**3 Credits**

Covers the analysis of simultaneous momentum, energy, and mass transport. Development of integral and local balance equations in vector-tensor form. Application of vector-tensor analysis to transport equations. Boundary layer theory and turbulence.

CHME 513. Intermediate Chemical Engineering Data Analysis (s)**3 Credits**

Intermediate topics in the design and analysis of typical chemical engineering experiments. Topics covered include: linear models, constrained experimental space, non-linear models, model discrimination, and response surface methodologies. Restricted to: CHME, CH E majors.

CHME 516. Numerical Methods in Chemical Engineering**3 Credits**

Survey of numerical methods for solving problems commonly encountered in heat and mass transfer, fluid mechanics, and chemical reaction engineering.

CHME 530. Environmental Management Seminar I**1 Credit**

Survey of practical and new developments in hazardous and radioactive waste management provided through a series of guest lectures and reports of ongoing research. Crosslisted with: C E 330, E E 330, I E 330.

CHME 541. Chemical Kinetics and Reactor Engineering**3 Credits**

Same as CHME 441 with differentiated assignments for graduate students. Consent of Instructor required.

Prerequisite(s): Consent of Instructor.

CHME 542. Graduate Reactor Analysis and Design (s)**3 Credits**

Application and analysis of equations of continuity to multicomponent reaction systems. Introduction to homogeneous and heterogeneous catalysis, single-phase combustion, and shock reaction systems.

CHME 549. Intellectual Property for Engineers and Scientists**3 Credits**

An overview of intellectual property, including patents, trade secrets, copyright, and trademark. Specialized terminology; protectable subject matter and applicable legal standards; inventorship, authorship and ownership; application content and preparation; procedural and substantive application components; and infringement and enforcement. Taught with CHME 449.

Prerequisite(s): CHEM 111G or CHEM 115.

CHME 561. Calculation of Material and Molecular Properties**3 Credits**

The aim is to describe and apply techniques for computing common properties of materials and molecules: optimized geometries, transition states, vibrational spectra, energies (electronic, internal energy, enthalpy, and Gibbs free energy), heat capacities, net atomic charges, atomic spin moments, and effective bond orders. These techniques allow one to estimate the thermodynamic properties of a chemical, as well as to compute the mechanisms and energy barriers for chemical reactions and catalytic processes, and to quantify the electronic, magnetic, and chemical ordering in materials. The theory behind these techniques will be described and students will perform hands-on computer exercises using common computational chemistry programs. Taught with CH E 461. Consent of Instructor required.

Prerequisite(s): CHEM 116, MATH 192G, and (PHYS 214 or PHYS 216G).

CHME 563. Soft Matter**3 Credits**

The physiochemistry of soft materials including gels, polymers and colloids, self-assembly, intermolecular forces, and colloidal forces.

Taught with CHME 463.

Prerequisite(s): CHME 302, CHME 305, CHME 361.

CHME 564. Polymer Science & Engineering**3 Credits**

Synthesis, structure, property relationships of synthetic polymers. Taught with CHME 464. May be repeated up to 3 credits.

Prerequisite(s): CHME 201, CHEM 314.

CHME 565. Rheology and Viscoelasticity**3 Credits**

This course is an introduction to rheology and viscoelasticity. In particular, the flow behavior of Non-Newtonian Fluids and Viscoelastic Fluids will be covered. Rheometry, the technique for characterization of fluids, will be discussed. Most of the course is quantitative and uses mathematical modeling. Taught with CHME 465.

Prerequisite(s): CHME 306.

CHME 567. Nanoscience and Nanotechnology**3 Credits**

This is a lecture/laboratory course designed to present the basic concepts, the techniques and the tools to synthesize and characterize nanometer scale materials, and the latest achievements in current and future nanotechnology applications in engineering, materials, physics, chemistry, biology, electronics and energy. It is intended for a multidisciplinary audience with a variety of backgrounds. This course should be suitable for graduate students as well as advanced undergraduates. Topics covered will include: nanoscience and nanotechnology, nanofabrication, self-assembly, colloidal chemistry, sol-gel, carbon nanotubes, graphene, thin film, lithography, physical vapor deposition, chemical vapor deposition, quantum dots, lithium batteries, X-ray diffraction, scanning electron microscopy, transmission electron microscopy, nanoelectronics, nanophotonics and nanomagnetism, etc. Taught with CHME 467.

Prerequisite(s): (CHEM 112G or CHEM 116G) and (PHYS 211G or PHYS 215G).

CHME 568. Intermediate Adsorption**3 Credits**

Introduction to the fundamentals and applications of biofuels and bioenergy produced from biomass; renewable feedstocks, their production, availability and attributes for biofuel/bioenergy production; types of biomass-derived fuels and energy; thermochemical conversion of biomass to heat, power, and fuel; biochemical conversion of biomass to fuel; biodiesel production; environmental impacts of biofuel production; economics and life-cycle analysis of biofuel; value-added processing of biofuel residues; term paper of selected topics relevant to biofuels. Taught with CHME 468.

Prerequisite(s): CHME 201.

CHME 579. Corrosion and Degradation of Materials**3 Credits**

Failure of engineering materials in aggressive environments. Chemical and electrochemical mechanisms of corrosion. Influence of chemical composition and microstructure on corrosion behavior. Types of corrosion and chemical attack, including uniform corrosion, galvanic corrosion, pitting and other forms of localized corrosion, stress corrosion cracking, and corrosion fatigue. Methods of corrosion mitigation including cathodic protection, coatings, passivation, and corrosion inhibitors. Corrosion in nuclear reactors and nuclear waste repositories. Taught with CHME 479.

Prerequisite(s): CHME 361.

CHME 581. Biomedical Engineering & Healthcare Engineering**3 Credits**

Orientation to solving human and world health issues with biological engineering systems, tools, and analysis methods. Introduces general concepts including applied biology for engineers, biophotonics, biosensing, bioinstrumentation, tissue and biomaterials engineering, biomedical engineering research practices, and physical bioanalytical methods. Taught with CHME 481.

Prerequisite(s): CHEM 116G, CHME 201.

CHME 585. Materials from Biorenewable Resources**3 Credits**

Types, sources, composition and properties of biomass. Production, processing and applications of biomass materials to fulfill food, feed, fiber, fuel and chemical feedstock needs with energy, water, cost, sustainability, and waste management considerations. Taught with CHME 485.

Prerequisite(s): CHEM 211 or 313 or consent of instructor.

CHME 586. Biofuels**3 Credits**

Introduction to the fundamentals and applications of biofuels and bioenergy production; biomass resources and their composition; types of biofuels; conversion technologies (thermochemical and biochemical conversion processes); biodiesel production, algae to biofuels; economic and environmental assessments; term paper of selected topics relevant to biofuels. May be repeated up to 3 credits. Restricted to: CHME, CH E majors.

Prerequisite(s): CHME 201.

CHME 588. Elements of XRD**3 Credits**

Introduction to x-ray diffraction and reflectivity spectra. Topics include X-ray sources and detectors, atomic spectra, characteristic x-rays, thermionic emission, synchrotron radiation, instrument components, and beam conditioners. Crosslisted with: PHYS 568.

CHME 589. Modern Materials**3 Credits**

Same as PHYS 489 with differentiated assignments for graduate students. Crosslisted with: PHYS 589.

Prerequisite(s): PHYS 455 or PHYS 554.

CHME 590. Graduate Seminar**1 Credit**

Presentations on topics of professional interest in chemical engineering. Includes seminars by faculty, graduate students, and invited speakers from academia, government, and industry. May be repeated for a total of 6 credits. May be repeated up to 6 credits. Restricted to: CHME majors.

CHME 594. Professional Communication in Chemical Engineering**2 Credits**

Connections between interpersonal relationships and the effective communication of information. Strategies for formal and informal written and verbal communication in the context of presentations, interviews, reports and publications. Factors affecting non-verbal communication.

Special focus will be given to understanding and adapting to the audience's perspective. 2 credits. Open to chemical engineering graduate students or by permission of instructor. This class will prepare you to communicate technical information effectively within a variety of contexts and to a variety of audiences. Class assignments will be partially based on current student needs such as preparing presentations for professional conferences, giving research progress reports, and writing research manuscripts. Restricted to: CHME majors.

Prerequisite(s): CHME graduate student standing.

CHME 598. Ph.D. Research- Level I**1-9 Credits (1-9)**

Individual investigations either analytical or experimental. May be repeated up to 6 credits.

CHME 599. Master's Thesis**15 Credits**

Thesis.

CHME 690. Graduate Seminar**1 Credit**

Presentations on topics of professional interest in chemical engineering. Includes seminars by faculty, graduate students, and invited speakers from academia, government, and industry. Required each semester for every Ph.D. student. All candidates for graduate degrees required to give seminar. May be repeated for a maximum of 8 credits. May be repeated up to 8 credits. Restricted to: CHME majors.

CHME 698. Ph.D. Research- Level II**1-9 Credits (1-9P)**

Advanced topics for current research. Course subtitled in the Schedule of Classes. May be repeated up to 99 credits. Consent of Instructor required.

Prerequisite(s): successful completion of Ph D qualifying exam.

CHME 700. Doctoral Dissertation**15 Credits (15)**

Individual research in selected topics of current interest in chemical engineering. May be repeated up to 88 credits. Thesis/Dissertation Grading.

Prerequisite(s): CHME 698 (9 credits) and successful completion of comprehensive exam.

CHSS - COMM HEALTH/SOC SRVCS (CHSS)

CHSS 101. Overview of Health and Community Services**3 Credits**

Health and community service professions with emphasis on public health, community health education, and environmental/occupational health.

CHSS 216. Ethical and Research Issues in Human and Community Service**3 Credits**

Ethical and legal responsibilities of health personnel with emphasis on research applications. May not receive credit for both CHSS 216 and CHSS 316. Community Colleges only.

CHSS 295. Leadership/Mentorship Training for the CHSS Ambassadors Program**1 Credit**

Leadership development for volunteers serving as CHSS ambassadors. Focus on public relations and CHSS undergraduate degree programs. Graded S/U.

Prerequisite: consent of instructor.

CHSS 299. Service Learning Experience in Human and Community Services**3 Credits**

Exploration of contemporary social, civic, economic and ethical problems that require student participation in collaborative efforts within the community. Requires 30 clock hours of community based service for each credit. Graded: S/U. Contact instructor for approval.

Prerequisite(s): CHSS 101, HL S 150 and HL S 275 or consent of instructor.

Corequisite(s): HL S 295 or CHSS 216.

CMI - CINEMA & FILM/VIDEO PROD (CMI)

CMI 100. Introduction to the Creative Media Industry**3 Credits**

This class is an introductory course for students interested in learning about the creative media industry and the Creative Media Institute. It offers a broad view of the entire industry including Marketing, Production, Budgets, Jobs, New Media Literacy, and Industry Standards. Students will listen to experts in the field, and become involved in open discussions about the industry and use new information to complete hands-on assignments in the laboratory. Restricted to Las Cruces campus only.

CMI 200. Sound Design 1**3 Credits**

Focuses on the techniques for creating, recording and manipulating sounds through challenging sound design projects. May be repeated up to 3 credits. Crosslisted with: CMT 206.

Prerequisite(s)/Corequisite(s): CMI 100. Restricted to: DFM,ANVE majors. Restricted to Las Cruces campus only.

CMI 205. Cinematography I**3 Credits**

Theories and techniques of visual design in videography and the aesthetics of lighting. Crosslisted with: CMT 205.

Prerequisite(s)/Corequisite(s): CMI 100. Restricted to: ANVE, DFM majors. Restricted to Las Cruces campus only.

CMI 216. Editing I**3 Credits**

Focuses on individual editing skills including capture, interface, basic cuts, and transitions. May be repeated up to 3 credits. Crosslisted with: CMT 195.

Prerequisite(s)/Corequisite(s): CMI 100. Restricted to: DFM,ANVE majors. Restricted to Las Cruces campus only.

CMI 220. Drawing for Animation**3 Credits (2+4P)**

Introductory study of the human and animal form in relation to animation. Students learn fundamentals and exaggeration of the figure, as related to proportion, rhythm, mechanics, and motion. Areas of focus are: basic form, proportion, shape, contour, gesture, anatomy, portraiture, perspective, clothing effects and drawing from observation. Restricted to: ANVE, DFM, and CMT majors.

CMI 231. History of Animation**3 Credits**

Explores the history of Animation as an art form and industry through readings, screenings, lecture and periodic guest speakers. May be repeated up to 3 credits. Restricted to: DFM,ANVE, G-CMI majors. Restricted to Las Cruces campus only.

CMI 232. Storyboarding**3 Credits**

Examines effective writing principles for creating storyboards that communicate the overall picture of a project. There are timing, scene complexity, emotion and resource requirements. Crosslisted with: CMT 232 and ENGL 232. Restricted to: DFM, ANVE majors. Restricted to Las Cruces campus only.

CMI 233. Light, Shade, Render**3 Credits**

This course will explore the theory and practice of 3D lighting and rendering methodologies. Techniques covered will implement cameras, lighting sources, textures, surface-mapping and algorithmic rendering to produce stylized and photo realistic images. Topics covered will include direct and indirect lighting, shaders that simulate physical substances and effects, rendering multiple passes and simulating physical lens effects. Restricted to: Main campus only. Restricted to DFM, ANVE majors.

Prerequisite(s): CMI 260, CMI 280, or Consent of Instructor.

CMI 235. Narrative: Principles of Story Across the Media**3 Credits**

Examines the various strategies of written and visual storytelling: narrative structure and its principle components (plot, theme, character, imagery, symbolism, point of view), with an attempt to connect them to elements of contemporary forms of media expression, including screenwriting, playwriting, writing for documentaries and animation, etc. Crosslisted with: ENGL 235. Restricted to Las Cruces campus only.

CMI 240. Digital Illustration**3 Credits**

Introductory course examining traditional artistic expressions and translating visual art experiences into a digital art medium to enhance visual storytelling. Students acquire basic principles of drawing and painting through hands-on experience manipulating tonal value, composition, form development, light and shadow, color theory, rendering realism, and graphic design. Restricted to: ANVE, DFM majors. Restricted to Las Cruces campus only.

CMI 245. 2-D COMPOSITING & FX**3 Credits (3+3P)**

The purpose of this course is to familiarize students with the powerful compositing and special effects tools of Adobe After Effects for 2D, traditional animation. Students will learn how to assemble an existing un-rendered animation into a final piece with advanced 3D lighting, spacing, and digital effects so that it can achieve a dynamic, professionally rendered look. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

CMI 250. Beginning 2-D Animation**3 Credits**

Learn the basics of digital 2D animation by creating an animated short from a storyboarded scene using professional animation, imaging, and editing software. May be repeated up to 3 credits. Restricted to: DFM,ANVE majors. Restricted to Las Cruces campus only.

CMI 260. Foundations of 3D Animation**3 Credits**

The objective of this course is to provide a hands-on overview of the 3D animation production process. Students will be introduced to basic story development and the creation of computer generated assets and cinematic sequences. The course will survey specialty areas of digital animation and various software and techniques applied in entertainment and information media. Restricted to: Main campus only. Restricted to ANVE, DFM majors.

Prerequisite(s): CMI 235, CMI 232 or consent of instructor.

CMI 270. Rigging for 3D Animation**3 Credits**

This course will introduce principles and practices of current 3D animation rigging. Students will develop fundamental methods necessary to create character rigs. Students will learn aesthetic, technical, and optimization concepts as they apply to organic and mechanical designs. Topics will include: hierarchies, constraints, deformation rigging, skeleton creation, skinning, forward and inverse kinematics, controls, body and facial rigging. Restricted to: ANVE,DFM majors.

Prerequisite(s): CMI 260.

CMI 280. Modeling**3 Credits**

This course will introduce 3D modeling methods and current practices. Students will learn preliminary and detailed modeling techniques using industry standard software. Methods will emphasize formal and functional aspects of modeling as they apply to mechanical, organic, and sculpted topology for application in animation, games, and information media. Restricted to: Main campus only. Restricted to ANVE, DFM majors.

CMI 290. 3-D Animation**3 Credits**

Overview of the essentials and principles of 3D animation; creative methods for using industry standard tools to produce the illusion of movement for storytelling. Topics include, keyframe and curve animation, kinematics, cycle animation, camera animation, deformers, and constraints. Restricted to: Main campus only.

Prerequisite(s): CMI 260, CMI 250 or consent of instructor.

CMI 300. History of Cinema**3 Credits**

In-depth analysis of cinema's history looking at each aspect of film from inception to current development. It focuses on the historical aspects of sound production, cinematography, technological advances, music scoring, foley, animation, and narrative development. Students will see examples of movies throughout the semester and will take part in discussions. May be repeated up to 6 credits. Restricted to Las Cruces campus only.

CMI 301. Sound Design II**3 Credits**

Mixing and balancing dialogue, sound effects and music in postproduction. Study the role of sound effects, foley, soundtrack choices, and music supervision. Prerequisite: CMI 200

CMI 303. Cinema Review and Critique**3 Credits**

This course is for the student who wants to learn to be a more active, intelligent film viewer. It encourages critical thinking about films and educates students on how to write a film review. Students will meet in the movie theater to watch essential films that serious movie watchers should see from classic motion pictures, to current release major motion pictures, independent films and world cinema features. The course will serve as a guide to the illuminating process of evaluating, analyzing, and reviewing movies. Students' reviews will be published publicly.

CMI 305. Business of Filmmaking/Animation**3 Credits**

Explores the roles of unions, basic contracts, legal arrangements, and the economics of the production process, distribution, and financing.

Prerequisite: CMI 235.

CMI 308. Writing for Animation**3 Credits**

This class explores methods for, and approaches to, writing for animation. Students study and produce scripts for a range of animation outlets while engaging in writing exercises based on character and story development. May be repeated up to 3 credits.

Prerequisite(s): CMI 235 or consent of instructor.

CMI 309. Screenwriting I**3 Credits**

Writing intensive. Students learn the craft of screenwriting, honing skills in writing dialogue and visual narrative, crafting dynamic characters and dramatic action. Original student scripts will be performed and discussed in class. Crosslisted with: ENGL 309 and THTR 306.

Prerequisite(s): ENGL/CMI 235 or consent of instructor.

CMI 310. Cinematography II**3 Credits**

Advanced tools of the cinematographer, lighting and composition techniques. Artistic and technological elements of cinematography.

Prerequisite(s): CMI 205, CMT 205. Restricted to DFM, ANVE majors.

CMI 311. Editing II**3 Credits**

Advanced techniques in digital films using professional non-linear editing systems. Restricted to: ANVE,DFM majors.

Prerequisite(s): CMI 216.

CMI 313. Animated Film Review**3 Credits**

This course will enhance student literacy in analyzing and writing about animated films. Through screenings, readings, discussion and lectures, students will acquire conceptual tools for viewing and evaluating films. Through analysis, students will identify cinematic elements.

CMI 314. Acting for Film**3 Credits**

Techniques for film and television acting. In-depth analysis of film performance creation among actor, director, writer, cinematographer, and editor. Restricted to: DFM, THTR majors, or Consent of Instructor.

Prerequisite(s): CMI 100, AND CMI 235.

CMI 315. Adventures in Genre**3 Credits**

Students learn storytelling strategies for the screen by studying various structural genres and components of screenplays and films. Utilizing these strategies, students develop a number of their own original screenplay ideas. Additionally, pitch workshops are held and students learn to present their ideas in various, practical situations.

Prerequisite(s): CMI 235. Restricted to DFM, ANVE majors.

CMI 316. Border Cinema Around the World**3 Credits**

What is the relationship between borders, identity, and vulnerability - and how is this relationship explored in cinema? How are borderlands also testing grounds - the sites of serious ethical dilemmas? By examining powerful feature films from such regions as the Middle East, the Balkans, and the US/Mexico border, we will explore ways in which personal, familial, communal, and national identities are defined through the complex process of bordering. We will investigate the role of cinema in reflecting and/or facilitating this process. May be repeated up to 3 credits.

CMI 318. Documentary Production**3 Credits**

Survey of theory and history of documentary film making including viewings and discussions of notable films and directors. Class works with actual documentary project. May be repeated up to 6 credits. Restricted to: ANVE, DFM majors.

Prerequisite(s): CMI 216, CMI 205.

CMI 320. Race and Gender in Film**3 Credits**

In this course students will analyze film as an art form as well as be exposed to Race and Gender Feminist Film Theory. We will consider the role of film in our understandings of sex, gender and sexuality. Through discussions and writing we will work to discern relevant social, political, ideological, and aesthetic concepts in the media we examine. Crosslisted with: ENGL 399, W S 450 and W S 550.

CMI 328. Producing**3 Credits**

Examines the role of the Producer, essential to every film production. The course will revolve around the best practices in organizational design, the production process, the budgeting process, financial controls, scheduling, insurance and distribution.

Prerequisite(s)/Corequisite(s): CMI 200, 216, 235. Restricted to: ANVE,DFM majors.

CMI 329. Studies in Drama**3 Credits**

Students will draw on a group of related American and European dramatic works to examine various areas of 20th century culture. Topics will vary. Restricted to DFM, ANVE, ENGL, THTR majors. Crosslisted with: ENGL 329 and THTR 329

CMI 330. Developing the Animated Project**3 Credits**

This course will cover fundamental theories and elements of the production and development processes for animated projects. Concept, story, and story and character development will be addressed as well as storyboarding, layout, sound, voice recording and basic editing. Students will develop at least one animated project, and construct an animatic to be used for future production. Restricted to: ANVE, DFM majors.

CMI 332. 3-D Character Animation**3 Credits**

Essentials and principles of 3D character animation. Techniques and craft of breathing life into characters through movement, including dynamic poses, blocking action, run and walk cycles, lip synching and realism. THTR 110, Acting and CMI 200, Sound Design are recommended. May be repeated up to 3 credits. Restricted to: DFM, ANVE majors.

Prerequisite(s): THTR 105 (or CMI 314 or CMI 348), CMI 260 and CMI 290 or consent of instructor.

CMI 341. Visual Effects I**3 Credits**

Fundamentals and principles of live action footage and computer generated imagery integration, including 3D animation, matchmoving, green screen setup, keying and compositing. Restricted to: ANVE, DFM majors.

Prerequisite(s): CMI 205, CMI 260, 280 (or consent of instructor).

CMI 348. Acting and Directing for Voiceover**3 Credits**

Students will explore methods for approaching voiceover and for improving acting and directing skills. Exercises will promote ease with collaboration in the studio setting, written work will focus on viewing voiceover in an analytical and discerning light. Restricted to ANVE, DFM majors.

CMI 350. Intermediate 2-D Animation**3 Credits**

Learn the more refined aspects of motion for character animation by focusing on Disney's 12 Principles of Animation, practicing these advanced drawing techniques in exercises and incorporating them into a brief final short.

Prerequisite(s): CMI 250.

CMI 360. Previsualization**3 Credits**

Implements 3D animation tools in preproduction shot and sequence design for motion picture and broadcast industries; including 3D storyboarding, technical planning and editing basics. LC Campus Only.

Prerequisite(s): CMI 260, CMI 280, and CMI 290 or consent of instructor. Restricted to ANVE, DFM majors.

CMI 362. Motion Graphics**3 Credits**

Students will learn the basics of Motion Graphics by working through a variety of exercises and a final project that will combine animation, text, visual effects, and sound using Adobe After Effects, Photoshop, and Illustrator. Restricted to: ANVE, DFM majors.

CMI 365. Character Design and Development**3 Credits**

Digital character design for the entertainment industry. Provides insight into the process of creating iconic characters. Traditional and contemporary character designers are explored. Industry workflow is introduced and necessary skills are developed to design detailed 3D characters from concept through production.

Prerequisite(s): CMI 250, CMI 260 and CMI 280, or consent of instructor. Restricted to ANVE, DFM majors.

CMI 395. Directing I**3 Credits**

Study and application through short scene work of the basic tools of a director and relationships with actors, designers, playwright, and stage managers. Interpreting as well as organizing. May be repeated up to 3 credits. Restricted to: DFM, ANVE majors.

Prerequisite(s): CMI 200, AND CMI 205, AND CMI 216.

CMI 396. Directing II**3 Credits**

Addresses pre-production concerns including script breakdown, casting ground plans and coverage. The criteria employed when selecting the creative team including a director of photography, art director, light, sound and wardrobe designers. Introduction to budgeting, scheduling, and script breakdowns. Prerequisite: CMI 395

CMI 397. Practicum**1-3 Credits (2-6P)**

Practical application of the student's field of study in a project environment. May be repeated up to 9 credits. Consent of Instructor required.

CMI 398. Special Topics**3 Credits**

This course addresses specific subjects and issues as identified by the department. Topics and credits to be announced in the Schedule of classes. May be repeated up to 12 credits.

CMI 400. Directed Studies**1-6 Credits (1-6)**

Directed study course in CMI under the supervision of a CMI faculty member. May be repeated up to 9 credits.

CMI 401. Motion Capture Techniques**3 Credits**

Implement industry standard motion capture techniques to capture and integrate performance for movie making, 3D animation and game production. Restricted to: ANVE, DFM majors.

Prerequisite(s): CMI 260, CMI 290 and CMI 270 (or consent of instructor).

CMI 410. Cinematography III**3 Credits**

This class is geared towards those who want to learn more about cinematography, color grading, and digital technology as it pertains to cinematography. Shooting high-end codecs (ProRes/DNxHD) or RAW are becoming more and more popular in filmmaking as camera manufactures and computer processing get better. This class will be a mix of production and post-production as learning how to shoot these higher end codecs do not end with the camera. Focus will be on techniques of shooting raw, understanding how to operate a camera capable of high end image acquisition, properly building up the camera rig and accessories, managing data and the post-production workflow. Consent of Instructor required. Restricted to: DFM, ANVE majors.

Prerequisite(s): CMI 310.

CMI 420. Short Film Production**3 Credits**

Students work in teams with rotating crews to write, produce, direct and edit individual and group projects-ultimately demonstrating growing confidence with production equipment and professional practices. May be taken up to 6 credits. Consent of instructor required. Pre/

Prerequisite(s): CMI 200, CMI 216, CMI 205, CMI 235, CMI 309 and CMI 395.

Corequisite(s): CMI 328. Restricted to ANVE, DFM majors.

CMI 421. Short Film Post-Production**3 Credits**

Students work together to complete short films shot in CMI 420. This course focuses on advanced post-production techniques, including editing and sound design, as student directors, editors and producers continue to learn to work together. In the last half of the course, students will build marketing campaigns and submit their finished film to festivals. May be repeated up to 6 credits. Restricted to: DFM, ANVE majors.

Prerequisite(s): CMI 420.

CMI 433. Sets and Environments**3 Credits**

Digital environment design and creation for movies and games from concept to production; including illustration, modeling, matte painting, texturing, lighting, rendering, integration, and camera projection. May be repeated up to 3 credits. Restricted to: DFM, ANVE majors.

Prerequisite(s): CMI 260, CMI 280, and CMI 233 or consent of instructor.

CMI 450. Advanced 2-D Animation**3 Credits**

Advanced techniques in two dimensional animation including motion graphics and integration of live action. Restricted to: ANVE, DFM majors.

Prerequisite(s): CMI 350.

CMI 470. Short 2-D Animation Production**3 Credits**

This is a full-scale animation production class where students will be divided into teams according to the animation skills they have demonstrated in the beginning, intermediate, and advanced classes. Each team member will specialize in one important facet of the production process: character animation, background painting, technical direction, coloring, or story development and storyboarding. 4 to 8 minute animated shorts will be produced. Restricted to: ANVE, DFM majors.

Prerequisite(s): CMI 450, CMI 361.

CMI 480. Screenwriting II**3 Credits**

Students will write 2 short scripts, 10-15 pages each throughout the semester. Focus will be on learning how to take notes and rewrite. Script analysis will be in a workshop format. Scripts will be read and discussed, scenes performed and reactions analyzed to consider effect of dialogue, character development, etc. Crosslisted with: ENGL 480

Prerequisite(s): ENGL 309 or CMI 309 or THTR 306 or consent of instructor. Restricted to ENGL, DFM, ANVE majors.

CMI 490. Advanced Screenwriting**3 Credits**

Students will prepare a 30-60 page screenplay. Script analysis will be in an advanced workshop format. Scripts will be read and discussed, scenes performed and reactions analyzed to consider effect of dialogue, character development, etc. This course is aimed at preparing writers for the professional market. Consent of instructor required. Restricted to ENGL, DFM, ANVE majors. Crosslisted with: ENGL 491

CMI 491. 3D Production Studio I**6 Credits**

The course is the first semester of a year-long effort to complete a Senior Project. The project will be narrative-driven short form, 3D animation or visual effects movie. Emphasis will be on pre-production and some production depending on ongoing CMI productions. You will produce a professional quality product with the aim to assist you in gaining entry into professional employment or graduate school. The course may be adapted toward a specific concentration in animation, visual effects, or digital film making, for group and individual productions. Each project must be approved by the Instructor and work within departmental policies and procedures.

Prerequisite(s)/Corequisite(s): CMI 332, CMI 360, CMI 365, CMI 433.

Prerequisite(s): CMI 308. Restricted to: ANVE majors.

CMI 492. 2D Production Studio I**6 Credits**

In CMI 498, Pre-Production, students will write a script, create a storyboard, record voice over and/or dialogue and time these storyboards to this dialogue/voice over creating an Animatic. For those doing demo reels, students will start to compile exercises from all of all their prior classes. Additional exercises will then be assigned to augment the skill set of the student according to the needs of each student. Restricted to: ANVE majors.

Prerequisite(s): CMI 350, CMI 361.

CMI 493. 3D Production Studio II**6 Credits**

The course is the final semester of a year-long concentration on your Senior Project. Emphasis will be on the production, post-production, and distribution of the work created in the first semester. You will produce a professional quality product that will help you gain entry into professional employment or graduate school. The overall objective is that you will demonstrate mastery of craft through synthesis of concept and technique, resulting in an original cinematic experience. Restricted to: ANVE majors.

Prerequisite(s): CMI 491.

CMI 494. 2D Production Studio II**6 Credits**

Students will complete an entire animated short, trailer, or demo reel for their portfolios by the end of Senior Project II. In CMI 494, Production and Post-Production, students will animate their stories according to the layout set in the animatic from Senior Project I. Lastly, they will composite and edit their shorts into a final piece that will be viewable in time for the Senior Showcase. For demo reels, students will continue to hone their reel into a finished piece that can be presented at the Senior showcase. Restricted to: ANVE majors.

Prerequisite(s): CMI 492.

CMI 495. Internship**1-12 Credits (1-12)**

Placement in a production facility and supervised experience required. With CMI advisor approval only. May be repeated up to 18 credits. Consent of Instructor required. Restricted to: DFM, ANVE majors.

CMI 496. Media Law/Ethics**3 Credits**

Overview of legal & ethical issues in creative media elements of business and commercial law. This class will focus on the fundamentals of entertainment law by exploring the business and legal relationships within film industries, and animation. Learn to anticipate and avoid legal problems prior to production. Key issues in the area of copyright law, sources of financing, distribution agreements; insurance and union consideration will be discussed. Restricted to ANVE, DFM majors.

CMI 497. Portfolio Design and Development**3 Credits**

Advanced graphic design projects with an emphasis on conceptual development, portfolio preparation, and professional practices. Refine general marketing strategies, personal portfolio, and resumes. Define, target, and penetrate personal target markets. Students develop individual promotional/demo packages. May be repeated up to 3 credits. Restricted to: DFM, ANVE majors.

CMI 498. Final Year Senior Project I: Production and Post Production 3-6 Credits (3-6)

Senior Project I is the first half of a year long concentration on a pre-approved creative project guided by a faculty member. Projects are narrative-driven and have an end product: screen-play, short film, documentary, 2-D or 3-D animated short, or pilot with treatment for television. Consent of Instructor required. Restricted to: ANVE, DFM majors.

Prerequisite(s): Consent of instructor.

CMI 499. Final Year Senior Project II: Production and Post Production 3-6 Credits (3-6)

Senior Project II is the second half of a year long concentration on a pre-approved project, guided by a faculty member. Projects are narrative driven and have an end product: short film, documentary, 2-D or 3-D animated short, or pilot and treatment for television. May be repeated up to 9 credits. Restricted to: ANVE, DFM majors.

Prerequisite(s): CMI 498 and Consent of Instructor.

CMT-CREATIVE MEDIA TECHNOLOGY (CMT)

CMT 100. Introduction to Visual Communications**3 Credits**

Overview of the process of crafting a digital product from conception to final. Incorporates basic principles of art and design, typography, layout, color and imagery, logos and advertising basics. Same as OEGR 105.

CMT 108. Introduction to Media Technologies**1-3 Credits (1-3)**

Introduction to various media technologies. Restricted to: Community Colleges only. Cross-listed: OEGR 108

CMT 110. Introduction to Web Design**1 Credit**

Basics of creating simple web sites for personal use.

CMT 115. Digital Photography and Imaging I**3 Credits (2+2P)**

Principles and techniques of photography using digital equipment with an emphasis on lighting, focus, and composition.

CMT 120. Introduction to Creative Media**3 Credits (2+2P)**

Exploration and discovery of the creative processes through art, music, theater, narrative, and other avenues.

CMT 126. Film Crew Training I**9 Credits**

This course was designed in collaboration with the NM IATSE Local 480 union and the NM Film Office and focuses on providing hands-on training for students wishing to work on film crews. The course will offer an overview of the primary below-the-line craft areas of film production. Restricted to: Community Colleges only.

CMT 130. Introduction to Web Design**3 Credits (2+2P)**

Introduction to web development techniques, theory, and design. Incorporates HTML and industry-standard web editing software in developing various web sites. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): ART 161 OR CMT 145.

CMT 135. Introduction to 3D Computer Animation**3 Credits (2+4P)**

Learning to work in a 3D environment. Introduction to the basics of modeling, animation, dynamics, and rendering. Working with polygons, NURBS and subdivisions, and editing in multiple interfaces. May be repeated for a maximum of 6 credits.

CMT 140. Print Media I**3 Credits (2+2P)**

Creation and design of publications and presentation materials using page layout software. May be repeated for a maximum of 6 credits.

CMT 142. Computer Illustration**3 Credits (2+2P)**

Preparation of digital graphics with a vector or draw program for use in print, web, video, animations, and multimedia. May be repeated for a maximum of 6 credits.

CMT 145. Image Processing I**3 Credits (2+2P)**

Design and creation of digital graphics using a raster or bitmap program for use in print, multimedia, video, animation and web. May be repeated for a maximum of 6 credits.

CMT 150. 2D Animation**3 Credits (2+2P)**

Concepts and techniques in storyboarding and creating interactive 2D animations for web, multimedia and video.

Prerequisites: CMT 142 or CMT 146.

CMT 151. Evolution of Electronic Games**3 Credits (2+2P)**

Focus on the evolution of video games and how they have shaped mainstream entertainment. May be repeated up to 6 credits.

CMT 155. Selected Topics**1-4 Credits**

Specific titles to be announced in the Schedule of Classes. May be repeated for a maximum of 18 credits. Same as OEGR 155.

CMT 156. Film Crew Training II**9 Credits**

The purpose of this course is to provide applied training in a specific film production crew craft area, in which a student has decided to specialize. The various craft areas include but are not limited to, Art Dept., Grip., Electric, Sound, Production Office, Script Supervision, Props, Set Dressing, Locations, Special Effects, Hair/Makeup, Wardrobe, Production Assistant/Set Operations. Restricted to: Community Colleges only.

Prerequisite(s): CMT 126.

CMT 160. Modeling and Animation**3 Credits (2+2P)**

Building on student's knowledge of 2D animation, covers modeling, animating objects and scenes in a 3D environment using various camera and lighting effects. May be repeated for a maximum of 6 credits.

Restricted to: Community Colleges only.

CMT 165. Writing and Storyboarding**3 Credits (2+2P)**

Learning good writing principles to create storyboards and scripts that communicate the overall picture of the project, timing, scene complexity, emotion, and resource requirements.

Prerequisite: CMT 135 or CMT 160.

CMT 170. History of Film: A Global Perspective**3 Credits**

Explores the history of cinema from the earliest 19th century developments to the present digital video revolution. Offers students a broader base of understanding of the tools and methodologies used in the craft.

CMT 175. 3-D Character Design**3 Credits (2+4P)**

Focus on designing a character and then taking that design and building it in 3D using intermediate modeling techniques. May be repeated for a maximum of 6 credits.

Prerequisite: CMT 135 or CMT 160.

CMT 180. Design Principles**3 Credits (2+2P)**

Techniques and theories of design principles, including layout foundations, logo building, type, color, and story-boarding and their application to print, web, animation and video. Restricted to: Community Colleges only.

Prerequisite(s): CMT 142 or CMT 146.

CMT 182. Environmental Modeling, Shading and Lighting**3 Credits (2+4P)**

Modeling design techniques to create natural and architectural environments to be used for animated films and gaming. Study of various lighting techniques, shading and shadowing.

Prerequisite: CMT 135 or CMT 160.

CMT 185. 3D Shading and Lighting Techniques**3 Credits (2+4P)**

Study of various global, scene and character lighting techniques, shading and shadowing, and creating atmospheres and reflections that bring computer generated 3D scenes to life. Examines environmental and studio lighting to bring real life experience into the digital production process.

Prerequisite: CMT 135 or CMT 160.

CMT 190. Digital Video Production I**3 Credits (2+4P)**

A hands-on study of the tools and techniques used to produce the independent video. Through the production of various short projects, the student explores how the ideas of the writer/director are translated into a visual story. May be repeated for a maximum of 6 credits.

CMT 192. Acting for the Camera**3 Credits (2+2P)**

Covers acting techniques, body movement, monologues and auditioning. Students will gain professional acting experience on camera as well as learn what is expected on a film or video set. Restricted to: Community College only.

CMT 195. Digital Video Editing I**3 Credits (2+2P)**

A study of the basic tools and techniques of non-linear digital video editing. May be repeated for a maximum of 6 credits.

CMT 200. Critical Game Studies**3 Credits (2+2P)**

Focus on creating a complete design document utilizing techniques and standards used in the industry today. May be repeated for up to 6 credits. Restricted to: Community Colleges only.

CMT 205. Cinematography**3 Credits (2+2P)**

Theory and techniques of visual design in cinematography and the aesthetics of lighting. May be repeated for a maximum of 6 credits. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): CMT 190.

CMT 206. Principles of Sound**3 Credits (2+2P)**

Study of soundtrack design theory, and the use of audio editing software that is compatible with media editing software to create soundtracks for different visual media. Pre/ Restricted to: Community Colleges only.

Corequisite(s): CMT 195.

CMT 210. Digital Video Production II**3 Credits (2+2P)**

Advanced techniques of the tools and application of professional film making. May be repeated for a maximum of 6 credits.

Prerequisite: CMT 190.

CMT 215. Digital Video Editing II**3 Credits (2+2P)**

Advanced features of digital video, audio/music, and titling production software. Included are color correction, vector scopes, motion effects, and advanced editing techniques used by filmmakers. May be repeated for a maximum of 6 credits. Same as OEGR 215.

Prerequisite: CMT 195 or OEGR 210.

CMT 216. Digital Photography and Imaging II**3 Credits (2+2P)**

Provide understanding and skills needed for advanced digital capture, editing, optimizing and manipulating photographic images for print, web and multimedia applications. The course will prepare students to make more advanced technical and more refined aesthetic decisions relative to specific photographic applications. Restricted to: Alamogordo campus, Carlsbad campus, Dona Ana campus.

Prerequisite(s): CMT 115.

CMT 217. Layer Animation & 3D Applications in Photoshop**1 Credit**

This is an advanced course in Photoshop 2D techniques and motion graphic applications pertaining to the animation of Photoshop Layers juxtaposed over time and space relationships. Restricted to: CMT majors. Restricted to Community Colleges only.

Prerequisite(s): CMT 145.

CMT 218. Video for Social Interaction and Informal Commerce**3 Credits**

The use of DSLR video has opened the way for photographers to be able to add video as a component of expression. This course shows the ways that this tool can be used for on-line instructional videos, demonstrations and presentations. As more and more commercial entities become involved in YouTube and other social media, this becomes a vocationally viable form of visual communication. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: Community Colleges only.

CMT 220. Environmental Scene Design**3 Credits (2+4P)**

Modeling design techniques used to create environments and scenes for use in animated films and games. Investigation of both natural and architectural environments to be recreated in the virtual world.

Prerequisite: CMT 135 or CMT 160.

CMT 221. Internship**1-3 Credits**

Work experience that directly relates to a student's major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships may be paid or unpaid. Students are supervised/evaluated by both the employer and the instructor. May be repeated up to 9 credits. Consent of Instructor required. S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.

Prerequisite(s): Consent of instructor.

CMT 222. Pre-production Management**3 Credits (2+2P)**

Pre-production planning paperwork breakdowns, budgeting, and scheduling; taking a project from start to finish from a producers standpoint.

Prerequisite: CMT 190.

CMT 223. Media Production Services**1-3 Credits**

A design studio environment in which students obtain real-world experience while providing service to college and non-profit associations with faculty supervision using a variety of media. Can be used with permission to fulfill cooperative requirement. May be repeated for a maximum of 6 credits.

Prerequisite: CMT 180 or ART 163.

CMT 224. Environmental Scene Design II**3 Credits**

Second level of modeling design techniques used to create environments and scenes for use in animated films and games. Investigation of both natural and architectural environments to be recreated in the virtual world. Restricted to Community Colleges campuses only.

Prerequisite(s): CMT 220.

CMT 225. Anatomical Character Design**3 Credits (2+4P)**

Focus on building anatomy-based 3D characters. Advanced study in NURBS, subdivisions, and polygon modeling techniques used to create fully functional and realist models. May be repeated for a maximum of 6 credits.

Prerequisite: CMT 175.

CMT 226. Film Crew Cooperative Experience**3-6 Credits (3-6)**

Industry production experience in specific craft areas for film crew technicians who have successfully completed two semesters of FTTP. Restricted to: Dona Ana campus, Carlsbad campus.

Prerequisite(s): CMT 156.

CMT 227. Advanced Character Animation**3 Credits (2+2P)**

Focus on complex rigging techniques as well as utilizing advanced animation functions to blend multiple animations into complex animations. May be repeated for a maximum of 6 credits. Restricted to: Community Colleges only.

Prerequisite(s): CMT 160.

CMT 228. Level Design Concepts**3 Credits (2+2P)**

Focus on the design and creation of video game levels. Dealing with the challenges and pitfalls of different video game genres. May be repeated for a maximum of 6 credits. Prerequisite: CMT 200

CMT 229. 3D Digital Sculpting**3 Credits**

Introduce students to the 3D Sculpting programs which are the industry standard sculpting programs. Students will learn how to create complex high polygon sculpts and normal maps and transfer the models into 3D studio Max and Autodesk Maya. May be repeated up to 6 credits.

Restricted to: Community Colleges only.

Prerequisite(s): CMT 160.

CMT 230. Web Design II**3 Credits (2+2P)**

Creating and managing well-designed, organized web sites using HTML and web development software. May be repeated for a maximum of 6 credits. Restricted to: Community Colleges only. Cross-listed: OEGR 230

Prerequisite(s): CMT 130.

CMT 235. Web Design for Small Businesses**3 Credits (2+2P)**

Technology and techniques for designing and building a web presence for small business. May be repeated for a maximum of 6 credits. Restricted to: Community Colleges only. Cross-listed: OEGR 235

Prerequisite(s): CMT 130.

CMT 236. Digital Audio Fundamentals**3 Credits (2+2P)**

Advanced digital audio post production and recording techniques using current entertainment industry-standard software and hardware. Restricted to: Community Colleges only.

CMT 237. Digital Audio Editing**3 Credits (2+2P)**

Techniques in digital audio composing, recording, editing, processing, MIDI & virtual instruments. Additional course topics include signal routing and processing, digital console design, audio signal paths, digital plug-ins, audio file management. Restricted to: Community Colleges only.

Prerequisite(s): CMT 236.

CMT 240. Print Media II**3 Credits (2+2P)**

Refining of technical design skills using advanced features of page layout software in preparing a variety of business-related documents. May be repeated for a maximum of 6 credits.

Prerequisite: CMT 140 or OEGR 140.

CMT 242. Advanced Computer Illustration**3 Credits (2+2P)**

Advanced techniques in 2D vector drawing and fundamentals of 3D illustration for use in print, web, and multimedia applications. May be repeated for a maximum of 6 credits. Same as OEGR 270.

Prerequisite: CMT 142.

CMT 245. Image Processing II**3 Credits (2+2P)**

Advanced techniques in editing and manipulation of raster images for digital graphics for print, multimedia and web. May be repeated for a maximum of 6 credits. Same as OEGR 260.

Prerequisite: CMT 145.

CMT 247. Production Audio**3 Credits (2+2P)**

Essential tools and techniques in: field and studio recording and mixing, environmental assessment, film set protocol, various microphones, audio documentation, wildlines, ambient audio. Restricted to: Community Colleges only.

Prerequisite(s): CMT 190 and CMT 236.

CMT 248. Music Production and Mastering**3 Credits (2+2P)**

Introduction to fundamental tools and techniques in music production and mastering. Including: microphones and microphone techniques, live and studio recording, editing, mixing, and introduction to mastering digital audio. Restricted to: Community Colleges only.

Prerequisite(s): CMT 206 and CMT 236.

CMT 249. Layer Animation and 3D Applications in Photoshop**3 Credits**

This is an advanced course in Photoshop 3D techniques and motion graphic applications pertaining to the animation of Photoshop Layers juxtaposed over time and space relationships. May be repeated up to 6 credits. Restricted to Community Colleges only.

Prerequisite(s): CMT 245.

CMT 250. Advanced Graphics for Digital Media**3 Credits (2+2P)**

Advanced techniques in design and creation of high-level 2D animations and interactive interfaces for web, multimedia, and video. May be repeated for a maximum of 6 credits.

Prerequisite: CMT 150.

CMT 252. Game Tools and Techniques**3 Credits (2+2P)**

Focus on the different engines and gaming technologies that power the games of today. May be repeated for a maximum of 6 credits.

Prerequisite: CMT 200.

CMT 253. History of Animation**3 Credits**

Exploration of animation as art form and industry. Material spans from the roots of animation before film technology to modern commercial and artistic animated productions. Restricted to: Community Colleges only.

CMT 254. History of Media Design**3 Credits**

An introduction to the principles of design history and theory within a chronological framework of historical and emerging media.

CMT 255. Special Topics**1-4 Credits**

Specific topics to be announced in the Schedule of Classes. May be repeated for a maximum of 18 credits.

CMT 256. Typography**3 Credits**

Foundation in typography with an emphasis on history of typography and the practical application and impact of font choices for print, web, animation and video. Deals with studies in font or letter construction and font choices focusing on design, application, incorporation, and visual impact. Restricted to: Community Colleges only.

Prerequisite(s): CMT 142.

CMT 258. Advanced Camera Techniques**3 Credits (2+2P)**

Professional camera techniques and training for electronic news gathering and studio filmmaking. Utilizes high-end handheld shooting techniques, cranes, dollies, and steadicam training. May be repeated for a maximum of 6 credits.

Prerequisite: CMT 190.

CMT 260. 3D Special Effects**3 Credits (2+4P)**

Creating advanced virtual special effects for both rigid and soft bodies. Using MEL, dynamic principles, mixing nodes, and advanced particle systems. How to drive particles over surfaces, add texture to flow, create surface tensions, and use collision events to drive texture. Study of integrating computer-generated images with real-life video and audio.

Prerequisite: CMT 160 or CMT 225.

CMT 265. Personal Character Development**3 Credits (2+4P)**

Focus on the development of personal character(s), from sketch to render. Develop complete biographies of character, then build, skin and animate with as many personal attributes as possible.

Prerequisite: CMT 225.

CMT 266. Audio Postproduction**3 Credits (2+2P)**

Application of techniques for the final postproduction phase of audio track editing, mixing and mastering for film, music, and animation; including Automated Dialog Replacement (ADR) and foley. Restricted to: Community Colleges only.

Prerequisite(s): CMT 206, CMT 236, CMT 237, CMT 247 & CMT 248.

CMT 275. Advanced Web Techniques**3 Credits (2+2P)**

Creating and managing complex web sites using advanced techniques and tools. May be repeated for a maximum of 6 credits. Restricted to: Community Colleges only.

Prerequisites: CMT 145 and CMT 230.

CMT 276. Advanced Photography Workshops**1 Credit**

This is a series of 1-credit workshops offering specialized and intense advanced skill training and upgrading applications of photography for commercial purposes and training in photographic skills and styles presented by a variety of professional lecturers. May be repeated up to 7 credits. Restricted to Community Colleges only.

Prerequisite(s): CMT 115.

CMT 285. Print Media III**3 Credits (2+2P)**

Refinement of skills needed to prepare a variety of documents for print and the service bureau. May be repeated for a maximum of 6 credits.

Prerequisite: CMT 140 or CMT 240.

CMT 290. Advanced 3d Animation Workshop A**3 Credits (2+4P)**

Program capstone. Students will utilize the skills learned in the program to produce their final animation. Group integrated projects are strongly recommended to emulate a real-work animation studio environment. May be repeated for a maximum of 9 credits.

Prerequisite: consent of instructor.

Corequisite: CMT 291.

CMT 291. Advanced 3d Animation Workshop B**3 Credits (2+4P)**

Program capstone. Students will utilize the skills learned in the program to produce their final animation. Group integrated projects are strongly recommended to emulate a real-work animation studio environment. May be repeated for a maximum of 9 credits.

Prerequisite: consent of instructor.

Corequisite: CMT 290.

CMT 292. Creative Media Studio**3 Credits (2+2P)**

A studio environment where students specialize in creating film-festival quality and portfolio-ready projects under the supervision of faculty. May be repeated for a maximum of 6 credits.

Prerequisites: CMT 190 and CMT 195 or CMT 160.

CMT 294. Creative Media Studio II**3 Credits**

Second level of studio environment where students specialize in creating film-festival quality and portfolio ready projects under the supervision of faculty. Restricted to Community Colleges campuses only.

Prerequisite(s): CMT 292.

CMT 295. Professional Portfolio Design and Development**1-3 Credits**

Personalized design and creation of the student's professional portfolio including hard-copy, demo reel, and online. May be repeated for a maximum of 6 credits. Same as OEGR 280.

Prerequisite: consent of instructor.

CMT 298. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with prior approval of department head. May be repeated for a maximum of 6 credits. Same as OEGR 298.

Prerequisite: minimum GPA of 3.0 and sophomore standing.

COLL-COLLEGE (COLL)

COLL 101. College/Life Success**1-3 Credits**

Provides students with an opportunity to cultivate the skills, values, and attitudes necessary to become confident, capable students, and contributing community members. Topics include time management, memory techniques, relationships, health issues, money management, and college and community resources.

COLL 103. Managing Your Money**1 Credit**

Principles and strategies for effective money management. Includes financial goal setting, both short and long term. Explores the relationship between career and income earning potential. Explores issues of credit and debt management and prevention of identity theft.

COLL 108. Academic Reading and Study Skills**1-4 Credits**

Introduction to and practice with strategies for effective reading and studying at the college level. Provides laboratory.

COLL 111. Academic Skills for Mathematics**1-3 Credits (1-3)**

Emphasis on study skills for success in math, up to the calculus level, tailored to meet individual student needs. Topics include test preparation strategies, efficient time management and practice methods, and introduction to and practice with learning software. Consent of instructor required.

COLL 120. Career Exploration**1 Credit**

Survey of careers possible with community college associate degrees. Information on how to make a career choice.

COLL 155. Special Topics**1-4 Credits**

Covers specific study skills and critical thinking topics. Specific sub-titles to be listed in the Schedule of Classes. May be repeated for a maximum of 8 credits.

COLL 201. Critical Thinking Skills**3 Credits**

Introduction to critical thinking processes. Develops higher order thinking necessary to evaluate clearly, logically, and accurately one's academic and life experiences. Practical emphases on assertive thinking and perspectives.

Prerequisite: placement scores for CCDE 110N or higher.

COMM-COMMUNICATION (COMM)

COMM 253G. Public Speaking**3 Credits**

Principles of effective public speaking, with emphasis on preparing and delivering well-organized, logical, and persuasive arguments adapted to different audiences.

COMM 265G. Principles of Human Communication**3 Credits**

Study and practice of interpersonal, small group, and presentational skills essential to effective social, business, and professional interaction.

COMM 285. Survey of Communication Theory**3 Credits**

Exploration of major theories, concepts and methods of research in the study of human communication. Primarily for majors.

COMM 290. Independent Study**1-3 Credits**

Individualized, self-paced projects for students with a special interest in communication topics. May be repeated for a maximum of 6 credits.

Prerequisites: COMM 265G and sophomore standing.

COMM 291. Special Topics**1-3 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

COMM 305. Communication Research Methods**3 Credits**

Introductory course in communication research. Emphasis on how to be an effective consumer of research.

COMM 351. Persuasion Theory and Practice**3 Credits**

Training in understanding and applying the principles and techniques of argumentation and persuasion.

COMM 370. Organizational Communication**3 Credits**

Communication strategies and patterns of private and governmental organizations, including research on the communication process.

COMM 376. Communication and Culture**3 Credits**

Cultural and intercultural communication theory and behavior, with a concentration on the development of specific communication skills which should facilitate effective intercultural communication.

COMM 384. Interpersonal Communication**3 Credits**

Theories of interpersonal communication and relational communication including study of relevant models, contexts and constructs.

COMM 425. Small Group Communication**3 Credits**

Principles and methods of modern group discussion with emphasis on the role of the group in problem solving.

COMM 440. Political Communication**3 Credits**

Presidential and congressional campaigns, political persuasion techniques, political advertising, power in language, and media aspects of political information. Ideology, resistance to political manipulation, and dependence of democracies on communication.

COMM 450. Technologies of Human Communication**3 Credits**

Development and evolution of human communication technologies from prehistory through the future of computer-mediated communication networks. Examines behavioral, cognitive, social, cultural, and political issues of new communication technologies and their use and management.

Prerequisite: junior or senior standing.

COMM 455. Fundamentals of Communication and National Security**3 Credits**

This course addresses communication perspectives informing national security, strategic intelligence, and the intelligence process. Students will examine U.S. national security history, policy, the development of the Intelligence Community, and intelligence as processes of communication. This course serves as an introduction to national security studies.

COMM 456. Communication and the Intelligence Cycle**3 Credits**

The course addresses communication requirements and the technical, cognitive, and cultural complexity of the collaborative research environment. Students participate in novel, team-based problem scenarios that provide the foundation for acquiring advanced cognitive analytic methods and strategies. Students will engage in interdisciplinary information science processes and will develop and present analytic products responding to national security requirements.

COMM 457. Strategic Communication and Public Diplomacy**3 Credits**

This course covers history, theory, and research related to the use of communication to change attitudes in favor of U.S. national security interests. Students will examine the use of strategic communication and influence in diplomacy, intelligence, and military communities in terms of specific strategies, effects, and issues. Students will learn to distinguish public diplomacy, information operations, public affairs, and other forms of political communication that are used by the U.S. government to persuade target populations about American interests and goals. Topics include soft power, intelligence-based negotiation processes, and research methods used to identify influence techniques or groups that threaten U.S. national security.

COMM 458. Intercultural Communication and National Security**3 Credits**

This course provides a concentration on cultural factors in international affairs and conflicts, how culture affects perceptions of national interests, and the relationship of U.S. national security to understand the general and political cultures of other nations. Students will integrate cultural and intercultural communication theory and behavior, with an emphasis on the development of specific communication skills to facilitate developing cultural knowledge in government and political contexts. Students will learn how to study the cultural factors that affect international conflicts and how strategic communication should address such cultural factors.

COMM 460. Deception and Communication**3 Credits**

Deceptive communication including nonverbal indicators of lies, types of lies, and influence of relationships on lying behavior and interpretation.

COMM 462. Family Communication**3 Credits**

A communication perspective on traditional and nontraditional family configurations, roles, interaction patterns, and conflict. Includes an examination of media depictions of families and family interaction, as well as current social and political issues related to the family.

COMM 465. Nonverbal Communication**3 Credits**

Study of and experimentation with nonverbal aspects of human communication as vital components of the total communication process.

COMM 470. Leadership Communication**3 Credits**

Examination of traditional theories and concepts of leader-follower dynamics; presentation of cognitive, systems, and symbolic interpretative views of leadership with an emphasis on persuasion and motivation in leader-follower interactions.

COMM 471. Sports Communication**3 Credits**

This course provides a senior-level exploration of the role sports and sports communication plays in contemporary culture. Readings will examine the interrelationship between sports and media in society, the identities that fans assume when engaging in fandom and sports viewership, the pervasiveness of sports communication practices in the sports industry, the role of media in story telling, and the way cultural identifiers of class, ethnicity, and gender play out in the media. This is taught with COMM 571.

COMM 475. International Communication**3 Credits**

Exploration of the forms and channels of communication substantially influenced by international cultural and political factors. Covers: global communication technology; news, information and entertainment flows; international diplomacy and negotiation, communication in war and peace.

COMM 477. Environmental Communication**3 Credits**

Examines the link between communication and environment within the context of communication scholarship. Topics include sense of place, cultural approaches to interacting with environment as well as exploring current themes surrounding environment.

COMM 480. Health Communication**3 Credits**

Examination of central issues in communication theory and practice as applied to health care. Includes communication in health care organizations, media dissemination of health information, role of communication in disease prevention and health promotion, and symbolic meaning of illness within cultures.

COMM 484. Verbal Communication**3 Credits**

Examination of rules governing conversational structures such as speech acts, action sequences, topics and topic shifts. Also covers humor in conversation and conversational control.

COMM 485. International Teaching Assistant Development**3 Credits**

International teaching assistants will receive instruction in communicative skills to enable them to meet their responsibilities at NMSU. Course includes lectures, seminars, video-taped presentations, and tutorial sessions emphasizing pedagogic and presentation skills and styles.

Prerequisite: consent of instructor.

COMM 490. Independent Study**1-3 Credits**

Individualized, self-paced projects for advanced students. May be repeated for a maximum of 6 credits.

Prerequisites: COMM 265G and junior standing with consent of participating instructor.

COMM 491. Selected Topics**1-6 Credits**

Individual and/or group study of selected topics. To be identified by subtitle. May be repeated for a maximum of 12 credits.

Prerequisite: prior arrangement with faculty supervisor(s).

COMM 495. Communication Internship**3 Credits**

Internship opportunity to apply what has been learned to a real-world situation. May be repeated for a maximum of 6 credits. Restricted to majors.

Prerequisite: junior standing and 3.0 GPA in major.

COMM 505. Research Methods**3 Credits**

Seminar in the quantitative study of human communication phenomena, research design, and statistical analysis.

COMM 506. Qualitative Research Methods in Communication**3 Credits**

Survey of qualitative research methods in the study of human communication, including historical and critical approaches, interviewing, participant-observation, and communication ethnography. Students apply methods to their own research.

COMM 540. Seminar in Political communication**3 Credits**

Political communication theory, research, and issues. Empirical studies of campaigns, movements, news media, voter decision-making, political participation, socialization, and knowledge. Political theory, field research, communication science findings and research methods.

COMM 545. Seminar in Ethicism, Racism, and Communication**3 Credits**

Course focuses on theories and research concerning the social, cognitive, and communication aspects of ethnic and racial prejudice. Specific psychological and communication processes of person and group categorization are explored along with findings about the effects of ethnic prejudice on everyday communication (and vice versa).

COMM 550. Seminar in Communication Technologies**3 Credits**

Seminar on design, usage, and social impact of electronic mail, communication through computer networks, and new technologies of organizational communication such as group decision support systems (GDSS). Each student will study an actual application of a major communication technology in an organization.

COMM 551. Seminar in Persuasion**3 Credits**

Work with an actual persuasion campaign, such as public information, political, or commercial marketing campaigns. Includes case studies of large-scale persuasion efforts, current theoretical models of persuasion processes, and methods for studying, evaluating, and refining messages for optimal effects.

Prerequisite: COMM 351 or consent of instructor.

COMM 555. Seminar Fundamentals of Communication and National Security**3 Credits**

This seminar course addresses communication perspectives informing national security, strategic intelligence, and the intelligence process. Students will examine U.S. national security history, policy, the development of the Intelligence Community, and intelligence as processes of communication. This course serves as an introduction to national security studies. Graduate students are required to fulfill advanced research and presentation requirements.

COMM 556. Seminar Communication and the Intelligence Cycle**3 Credits**

This seminar course addresses communication requirements and the technical, cognitive, and cultural complexity of the collaborative research environment. Students participate in novel, team-based problem scenarios that provide the foundation for acquiring advanced cognitive analytic methods and strategies. Students will engage in interdisciplinary information science processes and will develop and present analytic products responding to national security requirements. Graduate students will be required to fulfill advanced research and presentation requirements.

COMM 557. Seminar Strategic Communication and Public Diplomacy**3 Credits**

The seminar course covers history, theory, and research related to the use of communication to change attitudes in favor of U.S. security interests. Students will examine the use of strategic communication and influence in diplomacy, intelligence, and military communities in terms of specific strategies, effects, and issues. Students will learn to distinguish public diplomacy, information operations, public affairs, and other forms of political communication that are by the U.S. government to persuade target populations about American interests and goals. Topics include soft power, intelligence-based negotiation processes, and research methods used to identify influence techniques of groups that threaten U.S. national security. Graduate students will be required to fulfill advanced research and presentation requirements.

COMM 558. Seminar Intercultural Communication and National Security
3 Credits

The seminar course provides a concentration on cultural factors in international affairs and conflicts, how culture affects perceptions of national interests, and the relationship of U.S. national security to understand the general and political cultures of other nations. Students will integrate cultural and intercultural communication theory and behavior, with an emphasis on the development of specific communication skills to facilitate developing cultural knowledge in government and political contexts. Students will learn how to study the cultural factors that affect international conflicts and how strategic communication should address such cultural factors. Graduate students will be required to fulfill advanced research and presentation requirements.

COMM 562. Seminar in Family Communication
3 Credits

This course examines cutting edge research on family communication, as well as classic theories and research findings that have influenced and revolutionized the way scholars conceptualize family interaction. Topics include basic family communication processes, communication in family subsystems, communication during family stress, and the role of family interaction in health and well-being. Students will explore how family relationships are built, maintained, and destroyed by communication as well as the potentially important and long lasting effects of family relationships on individuals.

COMM 565. Seminar in Nonverbal Communication
3 Credits

This course focuses on human physical behaviors as the basis of communication between persons. This physical behavior includes such variables as the voice, face, eyes, posture, gesture, space, territory, clothing, and touch. The content of the course considers the individual and social factors affecting the production of such behaviors, and the effects of such behaviors on others' attitudes, perceptions, cognitions, and relationships. Applications of research and theory in nonverbal communication to infant development, personality, sex differences, marital satisfaction, relationship development, culture, aging, and brain functioning are also studied throughout the course.

COMM 570. Seminar in Organizational Communication
3 Credits

Communication strategies and patterns of private and governmental organizations, including research on communication systems.

COMM 571. Seminar in Sports Communication
3 Credits

This seminar provides a graduate-level exploration of the role sports and sports communication plays in contemporary culture. Readings will examine the interrelationship between sports and media in society, the identities that fans assume when engaging in fandom and sports viewership, the pervasiveness of sports communication practices in the sports industry, the role of media in story telling, and the way cultural identifiers of class, ethnicity, and gender play out in the media. This is taught with COMM 471.

COMM 576. Seminar on Communication and Culture
3 Credits

Cultural and intercultural communication theory and research. Focuses on discovering and describing distinctive ways of speaking within and between cultures.

COMM 583. Seminar in Theories of Communication
3 Credits

Communication systems, symbolic processes, analysis of messages.

COMM 584. Seminar in Interpersonal Communication
3 Credits

Theories of interpersonal communication and communication within a relationship, including study of relevant models, contexts, and constructs.

COMM 590. Independent Study
1-6 Credits

Individualized, self-paced projects.

Prerequisite: consent of instructor.

COMM 591. Special Topics
1-9 Credits

Individual and/or group study of special topics. To be identified by subtitle.

Prerequisite: prior arrangement with faculty supervisor(s).

COMM 595. Communication Internship for Graduate Students
3 Credits

Internship opportunity to apply what students have learned to the real world. Restricted to majors.

Prerequisite: 9 credits of M.A. degree.

COMM 599. Master's Thesis
15 Credits

Thesis.

CTFM-CLTHNG/TXTLS/FSHN MRCHDSG (CTFM)

CTFM 178. Fundamentals of Fashion
3 Credits

Survey of the fashion business from fiber to end product.

CTFM 202. Fashion Practicum
1-3 Credits (1-3)

Applied field experience in the related areas of apparel design, fashion merchandising, and textile science. May be repeated up to 3 credits. Restricted to: CTFM majors. Restricted to Las Cruces campus only.

CTFM 270. Fashion Illustration
3 Credits (1+4P)

Human figure sketches and fashion illustration as a form of communication. Emphasis on color, proportion, cut, and fabric detail.

Prerequisites: CTFM 255, ART 110G.

CTFM 273. Concepts in Apparel Construction
3 Credits (1+4P)

Application of generalizations and principles of garment construction to varied fabrics and designs. Analysis and evaluation of apparel merchandise with emphasis on the quality of garment construction. Restricted to: Main campus only. Restricted to CTFM, FCSE majors.

CTFM 289. Fashion Studio I
3 Credits

Applied principles in the criteria of pattern making: flat pattern and draping techniques. Projects will require three dimensional approaches in apparel design. Restricted to: CTFM majors. Restricted to Las Cruces campus only.

CTFM 300. Special Topics
1-4 Credits

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree. Restricted to Las Cruces campus only.

Prerequisite(s): CTFM 178; CTFM 270.

CTFM 366. Historic Fashion**3 Credits**

The study of clothing styles from 3500 BC through the 20th century.

Restricted to: CTFM majors.

Prerequisite(s): CTFM 255 and CTFM 270.

CTFM 371. Textile Science**3 Credits (1+4P)**

Study of fabrics used for modern clothing, furnishings, and miscellaneous end uses. Textiles testing procedures explored.

Prerequisites: CHEM 110G or consent of instructor.

CTFM 372. Fashion Merchandising**3 Credits**

The apparel industry from designing through manufacturing and distribution to retailers.

Prerequisites: CTFM 178, and CTFM 255.

CTFM 373. Advanced Apparel Techniques**3 Credits**

This course builds upon concepts introduced in Concepts in Apparel Construction. An in-depth study of fabric selection, advanced garment construction and tailoring. New technologies applied to sewing construction will be explored. The use of computerized sewing machines will be incorporated. Restricted to CTFM majors.

Prerequisite(s): CTFM 255 and CTFM 273.

CTFM 374. The Production of Textile and Fashion Accessories**3 Credits**

The production of textiles and fashion accessories for retail.

Merchandising techniques for wholesale and retail companies. Consent of Instructor required. Restricted to: CTFM majors.

Prerequisite(s): CTFM 178 and CTFM 270.

CTFM 384. Clothing for Special Needs**3 Credits**

Selection, adaptation, and design of clothing that is functional and attractive for special needs populations such as for active sportswear, the handicapped, the elderly, and various specialty populations.

Prerequisite: consent of instructor.

CTFM 402. Field Experience Marketing Training**1-3 Credits (1-3)**

Practical experience in clothing manufacturing or retailing. Supervised by resident faculty and supervisor at the work site. Report required. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: CTFM majors.

CTFM 460. Cultural Perspectives in Dress**3 Credits**

Explores the social, psychological and cultural aspects of dress and appearance which includes the relationship of dress to physical and social environments, aesthetic and personal expression and cultural ideas and values.

Prerequisite(s): CTFM 255 and CTFM 366.

CTFM 474. Fashion Promotion**3 Credits**

This class focuses on the comprehensive nature of promotion in the merchandising environment of fashion related goods. Consent of Instructor required. Restricted to: CTFM majors.

Prerequisite(s): CTFM 255 and CTFM 372.

CTFM 475. Fashion Buying**3 Credits**

Fundamental principles and procedures for successful merchandising of fashion goods, responsibilities of buyers, fashion trends, consumer demands, and merchandising arithmetic.

Prerequisites: ACCT 251, CTFM 372, and CTFM 474.

CTFM 476. Apparel Design by Draping and Pattern Drafting**3 Credits (1+4P)**

Theory and application of draping and drafting garment patterns (required lab). Consent of Instructor required. Restricted to: CTFM majors.

Prerequisite(s): CTFM 255, CTFM 270 CTFM 273, and CTFM 373.

CTFM 492. Special Problems**1-4 Credits**

Individual research study in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and a total of 6 credits toward a degree.

CTFM 571. Textile Science**3 Credits (1+4P)**

Fabrics used for modern clothing, furnishings, and miscellaneous end uses. Explores textiles testing procedures. Students enrolling in the 500-level class will be required to complete additional assignments beyond what is required for CTFM 371.

Prerequisite: CHEM 110G or consent of instructor.

CTFM 572. Fashion Merchandising**3 Credits**

Covers the apparel industry from designing through manufacturing and distribution to retailers. Students enrolling in the 500-level class will be required to complete additional assignments beyond what is required for CTFM 372.

Prerequisites: CTFM 178 and CTFM 255 or consent of instructor.

CTFM 584. Graduate Study in Clothing for Special Needs**3 Credits (1+4P)**

Graduate study in the selection, adaptation, and design of clothing that is functional and attractive for special needs populations such as active sportswear, handicapped, elderly, and various specialty populations.

Prerequisites: CTFM 472 and CTFM 476.

CTFM 598. Special Research Programs**1-4 Credits**

Individual investigations, either analytical or experimental. May be repeated for a maximum of 4 credits per semester and no more than 6 credits toward a degree.

DANC-DANCE (DANC)

DANC 101G. Dance Appreciation**3 Credits**

An investigation of movement, dance and choreographic work as a vehicle for understanding culture. Includes concepts in dance appreciation, themes and purposes of dance analysis of dance works, exposure to different styles of dance and understanding the roles and effects of major historical periods. Restricted to: Main campus only.

DANC 102. Introduction to Hip-Hop Dance**1 Credit**

This course is an introduction to Hip-Hop dance. The movement material will cover West coast and Southern styles with the inclusion of the history and evolution of Hip-Hop dance. No previous dance experience required. May be repeated up to 4 credits. Restricted to Las Cruces campus only.

DANC 109. Argentine Tango I**1 Credit**

Introduction to skills and techniques of Argentine Tango.

DANC 118. West Coast Swing I**1 Credit**

Students will learn to dance the smooth style of Swing. The West Coast Swing may be danced to ANY style of music that has a beat (Country, R&B, Hip Hop, Disco, House). Also featured is the Hustle (fast paced and exhilarating). May be repeated up to 4 credits. Restricted to Las Cruces campus only.

DANC 120. Ballet Folklorico I**1 Credit**

Introductory course in folklorico dances of New Mexico and Mexico. May be repeated for a maximum of 2 credits.

DANC 121. Beginning Country Western Dance**1 Credit**

Beginning Country Western dance, including Country Western two-step, nightclub two-step, polka, and Country Western line dance. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

DANC 122. Introduction to Latin Social Dance**1 Credit**

Introduction to Latin social dance for non dance majors. Students will learn basic Latin dance technique and partnering work. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

DANC 123. Ballet Technique I**1 Credit**

Introduction to basic ballet technique, vocabulary, and history. Includes practical application of anatomical placement, posture and control through participation and academic study. May be repeated for a maximum of 2 credits.

DANC 124. Jazz Technique I**1 Credit**

Introduction to basic jazz technique, styles, and history through participation and academic study. May be repeated for a maximum of 2 credits.

DANC 125. Introduction to Ballroom Dance**1 Credit**

Introduction to ballroom dance for non dance majors. Students will learn basic ballroom technique and partnering work. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

DANC 126. Modern Dance Technique I**1 Credit**

Introduction to and development of basic modern dance technique, history, and aesthetics through participation and academic study. May be repeated for a maximum of 2 credits.

DANC 127. Tap Dance I**1 Credit**

Introduction to skills and techniques of tap dance. May be repeated for a maximum of 2 credits.

DANC 128. Latin Club Dance**1 Credit**

Introduction to the most popular Latin Club Dances to include the Salsa, Merengue, and Bachata. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

DANC 129. Flamenco I**1 Credit**

Introduction to skills and techniques of flamenco dance. May be repeated for a maximum of 2 credits.

DANC 151. Master Works**1 Credit**

This course investigates the work of master choreographers in contemporary, Spanish, and social dance styles. Students will engage in exploring concepts in dance appreciation, themes and purposes of dance by analyzing dance works using principles, elements, and process of compositional design. This course will require students to communicate their opinions through verbal discussions, group projects, and written assignments. Restricted to Las Cruces campus only.

DANC 200. Dance Pedagogy: Educational Theory**1 Credit**

This course will examine how people learn cognitively, physically, and emotionally so that students can become better at self-teaching and self-assessment. Students will study several educational theories and how they relate to dance. Restricted to Las Cruces campus only.

DANC 202. Dance Ensemble**1 Credit**

This course will include learning the elements of dance composition. The students in this course will be the dancers for the students in Dance Choreography II. This course is a requirement for freshman dance majors whose emphasis is in contemporary dance. May be repeated up to 2 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

DANC 203. Dance Production I**1 Credit**

Students will learn the production process of dance events which may include performances, festivals, workshops, conferences. May be repeated up to 4 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

DANC 204. Dance Sport I**1 Credit**

Performance-based, team formation dance in a variety of Latin and ballroom dances. May be repeated up to 4 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Prerequisite(s): Consent of instructor and one of DANC 121, DANC 122, DANC 125, or DANC 128.

DANC 205. Contemporary Dance Ensemble I**1 Credit**

Performance-based instruction for students pursuing a career in contemporary dance. Instruction includes contemporary dance repertory and choreography for stage, outdoor arenas, and site-specific areas. May be repeated up to 4 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

DANC 206. Spanish Dance Ensembles I**1 Credit**

Performance-based instruction for students pursuing a career in dance with an emphasis in Spanish Dance. Instruction includes dance repertory and choreography for stage, outdoor arenas, and site-specific areas. May be repeated up to 4 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

DANC 209. Argentine Tango II**1 Credit**

Intermediate study in Argentine tango. Learn advanced patterns, techniques and partnering skills. May be repeated up to 2 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Prerequisite(s): Consent of instructor.

DANC 210. Classical Spanish II**2 Credits (1+3P)**

The study of theory, techniques, and practice of Classical Spanish at the intermediate level. Includes historical and cultural contexts of this art form. May be repeated up to 8 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Prerequisite(s): DANC 129.

DANC 212. Intermediate Hip-Hop Dance**2 Credits**

This course is for students who have experience in Hip-Hop dance. The movement material will cover West coast and Southern styles with the inclusion of the history and evolution of Hip-Hop dance. May be repeated up to 8 credits. Restricted to Las Cruces campus only.

DANC 218. West Coast Swing II**2 Credits**

Students will take their West Coast Swing & Hustle to the next level. Learn Intermediate and Advanced figures and techniques in both dances. Students will also enjoy advanced study on musicality and blending to create new amalgamations as well as practice in advanced leading & following techniques. May be repeated up to 8 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Prerequisite(s): DANC 118.

DANC 221. Country Western Dance**2 Credits**

Intermediate skills in country/western two-step, nightclub two-step, polka, and Western line dances. May be repeated up to 4 credits. Restricted to Las Cruces campus only.

Prerequisite(s): DANC 121 or consent of instructor.

DANC 222. Bronze American Rhythm**2 Credits (1+2P)**

Bronze level American Rhythm patterns, techniques, and partnering with emphasis on elements of dance. Consent of Instructor required. Restricted to Las Cruces campus only.

DANC 223. Ballet Technique II**2 Credits**

Continued study of classical ballet technique, vocabulary, and history through participation and academic study. May be repeated up to 8 credits. Restricted to Las Cruces campus only.

DANC 224. Jazz Technique II**2 Credits**

Continued study of jazz technique and history through participation and academic study. May be repeated up to 8 credits. Restricted to Las Cruces campus only.

DANC 225. Bronze American Smooth**2 Credits (1+2P)**

Bronze level American Smooth patterns, technique, and partnering with an emphasis on the elements of dance. May be repeated up to 4 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Prerequisite(s): DANC 125 or consent of instructor.

DANC 226. Modern Dance Technique II**2 Credits**

Continued study of postmodern dance technique and history through participation and academic study. May be repeated up to 8 credits. Restricted to Las Cruces campus only.

DANC 227. Tap Dance II**1 Credit**

Continued study of skills and techniques of tap dance at the advanced level. May be repeated for a maximum of 2 credits.

Prerequisite: DANC 127 or consent of instructor.

DANC 229. Flamenco II**2 Credits**

The study of theory, techniques and practice of Flamenco at the intermediate level. Includes historical and cultural contexts of this art form. May be repeated up to 8 credits. Restricted to Las Cruces campus only.

Prerequisite(s): Dance 129.

DANC 232. Bronze International Latin**2 Credits**

This is the style of Latin dance that is danced around the globe and is featured in the World DanceSport Championships. Students will learn the Bronze Level figures and techniques in four (4) International Style dances: Rumba, Cha Cha, Samba & Jive and the techniques. May be repeated up to 8 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Prerequisite(s): DANC 222.

DANC 235. Bronze International Standard**2 Credits**

This is the style of Ballroom dance that is performed around the globe and is featured in the World DanceSport Championships. Learn the Bronze Level figures and techniques in five (5) International Style dances: Waltz, Tango, Viennese Waltz, Foxtrot & Quickstep. Students will focus on understanding technical Elements of Dance, memorizing and performing routines. May be repeated up to 8 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Prerequisite(s): DANC 225.

DANC 269. DanceSport Choreography I**2 Credits**

An introduction to the process and theory behind creating original choreography for both performance and competition level dance. With focus on the individual couple, gain necessary skills, knowledge and practice in choreographing Ballroom, Latin, Swing &/or Nightclub dance routines in various practical settings. Consent of Instructor required. Restricted to Las Cruces campus only.

DANC 275. Dance Studio Management**3 Credits**

The study and practice of studio management. Includes study of financial procedures, marketing, entrepreneurship, leadership, management, fund-raising and other related topics. Restricted to majors and minors.

DANC 279. Flamenco Choreography I**2 Credits**

Students develop and perform solo dance studies with an emphasis placed on the development of personal movement vocabulary, phrase building, and the exploration of choreographic tools for Flamenco on stage. Discussion, critiquing, and descriptive writing about their choreographic processes will supplement direct physical work. May be repeated up to 4 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

DANC 280. Improvisation I**1 Credit**

Introduction and development of basic movement improvisation skills.

DANC 289. Principles of Choreography I**2 Credits**

Solo dance choreography technique. Course must be passed with a grade of C or higher. Consent of instructor required. Restricted to: Main campus only. Restricted to Dance Majors Dance Minors majors.

DANC 300. Dance Pedagogy: Creative Movement**3 Credits**

Teaching methods and class planning for creative movement dance curriculum at preschool and elementary school levels. Restricted to Las Cruces campus only.

DANC 301. Flamenco Pedagogy I**3 Credits**

The methods and theory of teaching Flamenco dance forms particularly in the studio environment. Consent of Instructor required.

Prerequisite(s): DANC 229 AND DANC 206.

DANC 303. Dance Production II**1 Credit**

Students will learn the production process of dance events which may include performances, festivals, workshops, conferences.

Prerequisite(s): DANC 203.

DANC 304. Dance Sport II**1 Credit**

Advanced performance-based, team formation dance in a variety of Latin and social dances. May be repeated up to 4 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor and one of DANC 121, DANC 122, DANC 125, or DANC 128.

DANC 305. Contemporary Dance Ensemble II**1 Credit**

Advanced performance-based instruction for students pursuing a career in contemporary dance. Instruction includes contemporary dance repertory and choreography for stage, outdoor arenas, and site-specific areas. May be repeated up to 6 credits. Consent of Instructor required.

DANC 306. Spanish Dance Ensemble II**1 Credit**

Performance-based instruction for students pursuing a career in dance with an emphasis in Spanish Dance. Instruction includes dance repertory and choreography for stage, outdoor arenas, and site-specific areas. May be repeated up to 4 credits. Consent of Instructor required.

DANC 310. Classical Spanish Dance III**3 Credits**

Advanced study of Classical Spanish Dance with castanets, cultural history, and pedagogy methods. A expanded focus on integration of different classical genres with focus on solo work. May be repeated up to 12 credits. Consent of Instructor required.

Prerequisite(s): DANC 210.

DANC 322. Silver American Rhythm**3 Credits (2+2P)**

Silver level American Rhythm patterns and technique with emphasis on performance. May be repeated up to 12 credits. Consent of Instructor required.

Prerequisite(s): DANC 222.

DANC 323. Ballet Technique III**3 Credits**

Intermediate/advanced study of ballet technique, including vocabulary and history. May be repeated for a maximum of 12 credits.

Prerequisite: DANC 223 or consent of instructor.

DANC 324. Jazz Technique III**3 Credits**

Advanced study of jazz dance, including vocabulary and history. May be repeated for a maximum of 12 credits.

Prerequisite: DANC 224 or consent of instructor.

DANC 325. Silver American Smooth**3 Credits (2+2P)**

Silver level American Smooth patterns and technique with emphasis on performance. May be repeated up to 12 credits. Consent of Instructor required.

Prerequisite(s): DANC 225.

DANC 326. Modern Dance III**3 Credits**

Intermediately advanced-level modern dance technique and study of current dance aesthetics. May be repeated for a maximum of 12 credits.

Prerequisite: DANC 226 or consent of instructor.

DANC 329. Flamenco III**3 Credits**

Advanced study in flamenco dance technique, its cultural history and pedagogy methods. May be repeated up to 12 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

DANC 332. Silver International Latin**3 Credits**

Students will learn Silver Level syllabus figures in four (4) International Style dances: Rumba, Cha Cha, Samba & Jive and Bronze Level figures in Paso Doble. Continued training and practice in International Style Latin dance technique. May be repeated up to 12 credits. Consent of Instructor required.

Prerequisite(s): DANC 232.

DANC 335. Silver International Standard**3 Credits**

Learn Silver Level syllabus figures in the five (5) International Style Standard dances: Waltz, Tango, Viennese Waltz, Foxtrot & Quickstep. Students will focus on increased technical understanding to increase their ability in partnering and musicality. May be repeated up to 12 credits. Consent of Instructor required.

Prerequisite(s): DANC 235.

DANC 339. Flamenco Structure and Improvisation**3 Credits**

A Study of various elements necessary in an improvisational setting in Flamenco. Using a cross section of Flamenco forms as a format. Students study the compass of each palo, then move to several traditional letras appropriate to these forms. May be repeated up to 9 credits. Consent of Instructor required.

Prerequisite(s): DANC 229.

**DANC 342. DanceSport Pedagogy: Rhythm
3 Credits**

In this teacher education course, students will begin to develop skills necessary in becoming a successful, professional Ballroom Dance Instructor. Students will gain technical mastery of Bronze level figures in four (4) Rhythm Dances to include the Rumba, Cha Cha, East Coast Swing and Mambo. Students will gain practical teacher education in the area of Private Lesson Instruction with required in class practicums. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): DANC 222.

**DANC 345. DanceSport Pedagogy: Smooth
3 Credits**

In this teacher education course, students will begin to develop skills necessary in becoming a successful, professional Ballroom Dance Instructor. Students will gain technical mastery of Bronze level figures in the four (4) American Style Smooth Ballroom Dances to include the Waltz, Foxtrot, Tango and Viennese Waltz. Students will gain practical teacher education in the area of Group Class Instruction with required in class practicums. May be repeated up to 9 credits. Consent of Instructor required.

Prerequisite(s): DANC 225.

**DANC 365. Dance Pedagogy: Dance in Education
2 Credits**

This course provides the student with methods and theories of dance education. This course will cover methods of teaching core curriculum subjects in an elementary school through body movement. This course will focus on the special needs of a kinesthetic learner.

**DANC 369. DanceSport Choreography II
2 Credits**

Take DanceSport choreography to the next level. With focus on group formation dance, gain necessary skills, knowledge and practice in choreographing Ballroom, Latin, Swing &/or Nightclub dance routines for groups in artistic and competition settings. Consent of Instructor required.

**DANC 379. Flamenco Choreography II
2 Credits**

Students develop and perform group studies with an emphasis placed on the development of ensemble movement vocabulary, phrase building, and the exploration of choreographic tools for Flamenco on stage. Discussion, critiquing, and descriptive writing about their choreographic processes will supplement direct physical work. Level II will advance to small group work as well as mentoring level I students. Consent of Instructor required.

Prerequisite(s): DANC 279.

**DANC 380. Improvisation II
1 Credit**

Continued practice in movement improvisation with more complex examination of improvisational structures.

Prerequisite: DANC 280.

**DANC 389. Principles of Choreography II
2 Credits**

Continued investigation of the choreographic process with an emphasis on group choreography. Course must be passed with a grade of C or higher. Consent of instructor required. Restricted to: Main campus only. Restricted to Dance majors Dance minors majors.

Prerequisite(s): DANC 289.

**DANC 400. Dance Pedagogy II
3 Credits**

Teaching methods and class planning for dance curriculum at middle school and high school levels.

Prerequisite: DANC 300 or consent of instructor.

**DANC 401. Flamenco Pedagogy II
3 Credits**

Advanced methods and theory of teaching Flamenco dance forms particularly in the studio environment. Includes a practicum of eight onsite teaching units in a location to be determined by the designated study. Consent of Instructor required.

Prerequisite(s): DANC 229 AND DANC 206.

**DANC 411. Flamenco Practicum
1 Credit**

Directed learning experiences for careers in dance. Provides the student with actual classroom teaching experience for all ages and all levels of dance students. May be repeated up to 4 credits. Consent of Instructor required.

Prerequisite(s): DANC 301.

**DANC 412. DanceSport Practicum
1 Credit**

Directed learning experiences for careers in dance. Provides the student with actual classroom teaching experience for all ages and all levels of dance students. May be repeated up to 4 credits. Consent of Instructor required.

Prerequisite(s): DANC 342 or DANC 345.

**DANC 413. Dance Practicum II
1 Credit**

This course provides the student with actual classroom teaching experience for all ages and all levels of dance students. With the supervision of the instructor, students will design a practicum experience, choose a site, and implement dance lessons. Course must be passed with a grade of C or higher. May be repeated up to 2 credits. Consent of Instructor required.

Prerequisite(s): DANC 413.

**DANC 422. Gold American Rhythm
3 Credits (2+2P)**

Advanced level American Rhythm dance technique and partnering work with choreography and performance emphasized. Includes cultural history and pedagogy methods. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: DANC majors.

Prerequisite(s): DANC 322.

**DANC 423. Ballet Technique IV
3 Credits**

Advanced study of ballet technique including vocabulary and history. May be repeated for a maximum of 12 credits.

Prerequisite: DANC 323 or consent of instructor.

**DANC 424. Jazz Dance Technique IV
3 Credits**

Advanced study of jazz dance techniques, including history and aesthetics. May be repeated for a maximum of 6 credits.

Prerequisites: DANC 324 or consent of instructor.

**DANC 425. Gold American Smooth
3 Credits (2+2P)**

Gold level American Smooth technique and choreography with an emphasis on performance and competition dancing. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: DANC majors.

Prerequisite(s): DANC 325.

DANC 426. Modern Dance Technique IV**3 Credits**

Advanced study of modern technique, including history and aesthetics. May be repeated for a maximum of 12 credits.

Prerequisite: DANC 326 or consent of instructor.

DANC 432. Gold International Latin**3 Credits**

Students will complete all syllabus figures through the Gold level in the Rumba, Cha Cha, Samba, Jive and Paso Doble. Advanced training and practice in International Style Latin dance technique. May be repeated up to 12 credits. Consent of Instructor required.

Prerequisite(s): DANC 332.

DANC 435. Gold International Standard**3 Credits**

Students will learn Gold Level syllabus figures in the five (5) International Style Standard dances: Waltz, Tango, Viennese Waltz, Foxtrot & Quickstep. Students will focus on physical and cognitive mastery of standard dance technique and elements as well as high-level performance ability, musicality and choreography. May be repeated up to 12 credits. Consent of Instructor required.

Prerequisite(s): DANC 335.

DANC 442. DanceSport Pedagogy: Latin**3 Credits**

This teacher education course is designed to prepare future dance professionals in the teaching of the International Style Latin dances: Cha Cha, Samba, Rumba, Paso Doble & Jive. Gain a deep understanding of all elements and be well prepared to take the DVIDA or ISTD professional certification exams. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): DANC 232 & 342.

DANC 445. DanceSport Pedagogy: Standard**3 Credits**

This teacher education course is designed to prepare future dance professionals in the teaching of the International Style Standard dances: Waltz, Tango, Foxtrot & Viennese Waltz. Students will gain a deep understanding of all elements and be well prepared to take the DVIDA or ISTD professional certification exam. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): DANC 235 & DANC 345.

DANC 447. DanceSport Certification Preparation**3 Credits**

The Professional Certification process offers extraordinary benefits to dance teachers, deeply enriching their dancing and teaching, and greatly expanding their career opportunities. This intensive course is designed to fully prepare students in taking the DVIDA and/or ISTD exams in the Smooth, Rhythm, Standard or Latin dances depending on course offered. See subtitle for specific style being taught in schedule of classes. May be repeated up to 12 credits. Consent of Instructor required.

DANC 450. Special Topics**1-3 Credits (1-3)**

Specific subjects to be announced in the Schedule of Classes. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

DANC 451V. World Dance**3 Credits**

Examination of dance forms from a cross-cultural perspective, focusing on the role of dance in different cultures around the globe. Same as HON 347V.

DANC 460. Dance History**3 Credits**

History and development of dance forms from ancient cultures to today.

DANC 462. Flamenco Dance History**3 Credits**

An in depth study of the cross section of Flamenco and Spanish Dance traditions and genres from Spain with the influence of her colonies and the modern world from the early 1400s to Present.

DANC 465. Senior Culminating Experience**1-6 Credits (1-6)**

Exit course for graduating seniors. Students will apply comprehensive knowledge of performance and production and/or pedagogy experience, to culminate in a dance production and/or teaching project. Restricted to majors and minors. A minimum of 2 credit hours required for graduation.

DANC 466. Dance Pedagogy: Dance Technique**3 Credits**

Students will learn to develop a curriculum design, apply teaching methods, and structure lesson plans for teaching specific dance styles. Course must be passed with a grade of C or higher. Consent of Instructor required.

Prerequisite(s): DANC 300 or consent of instructor.

DANC 489. Advanced Choreographic Project**2 Credits**

Individual directed studies in choreography with a culminating performance. Consent of Instructor required.

DANC 499. Problems**1-6 Credits (1-6)**

Problems in dance education, dance pedagogy, dance performance and independent work in their solutions. May be repeated up to 6 credits.

Consent of Instructor required.

Prerequisite(s): Consent of instructor.

DANC 501. Directed Studies**1-4 Credits (1-4)**

Supervised projects and/or research in theoretical studies, inclusive of community service projects. May be repeated up to 4 credits. Consent of Instructor required.

DANC 505. Dance Ensemble III**1 Credit**

Rehearsal and performance of dance repertory with emphasis on advanced understanding of musicality, dynamic phrasing, artistic expression, and athletic versatility within a broad range of styles. May be repeated up to 4 credits. Consent of Instructor required.

DANC 510. Advanced Theory of Classical Spanish Technique**1 Credit**

Advanced study of dance pedagogy and theory with practice in Classical Spanish technique May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: DANC 310.

DANC 522. Advanced Theory of American Rhythm Technique**1 Credit**

Advanced study of dance pedagogy and theory with practice in American Rhythm technique May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: DANC 322.

DANC 523. Advanced Theory of Ballet Technique**1 Credit**

Advanced study of dance pedagogy and theory with practice in ballet technique May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: DANC 423.

DANC 525. Advanced Theory of American Smooth Technique**1 Credit**

Advanced study of dance pedagogy and theory with practice in American Smooth technique May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: DANC 325.

DANC 529. ADV THRY FLAM**1 Credit**

Advanced study of dance pedagogy and theory with practice in Flamenco technique May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: DANC 329.

DANC 550. Special Topics**1-6 Credits (1-6)**

Specific subjects offered in addition to standard academic curriculum. Course title to be announced in the Schedule of Classes. May be repeated up to 6 credits. Consent of Instructor required.

DANC 551. Movement as Social Text**3 Credits**

Investigation of the meaning of movement and dance in different cultural, social, and historical contexts in both Western and non-Western dance forms. Emphasis will be placed on the nature of movement, its unique properties, the ways in which it conveys meaning, and its relationship to culture and society. Consent of instructor required.

DANC 566. Advanced Theory of Dance Pedagogy**1-6 Credits (1-6)**

Advanced study of dance pedagogy theory and practice. May be repeated up to 6 credits. Consent of Instructor required.

DANC 567. Dance Internship I**2 Credits**

Internship opportunities in either dance education, dance performance/production, or dance administration. Internship site determined by both Director of Dance Program and graduate student. Consent of Instructor required.

DANC 568. Advanced Theory of Modern Dance Technique**1 Credit**

Advanced study of dance pedagogy and theory with practice in Modern dance technique May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: DANC 426.

DANC 570. Dance Administration and Leadership**2 Credits**

The study and investigation of both management and leadership theories and how to apply these theories in practice.

DANC 599. Master's Thesis**1-6 Credits (1-6)**

This course is for graduate dance students who choose to write a thesis instead of a performance or teaching project. May be repeated up to 6 credits. Thesis/Dissertation Grading.

DANC 600. Dance Research**3 Credits**

Literature review and development of research in the field of dance.

DANC 670. Dance Internship II**3 Credits**

Internship opportunities in either dance education, dance performance/production, or dance administration. Internship site determined by both Director of Dance Program and graduate student.

DANC 700. Doctoral Dissertation**3 Credits**

This course is for graduate dance students working toward their EdD or PhD in dance. A dissertation is required. Topic and format to be determined by dissertation committee chair and graduate student. Consent of instructor required. Restricted to Graduate Dance Majors majors.

DAS-DENTAL ASSISTING (DAS)

DAS 101. Introduction to Dental Assisting**2 Credits**

An introduction to the duties and responsibilities of a dental assistant. Includes brief lessons on head and neck anatomy, chair side assisting, sterilization techniques, dental office emergencies, and dental office management. Restricted to: Community Colleges only.

DAS 111. Bio-Dental Science**4 Credits (3+3P)**

An introduction to biomedical and dental sciences with emphasis on head and neck anatomy and tooth morphology. Includes microbiology, general anatomy and physiology, histology and embryology of the oral cavity, pathology and pharmacology as they relate to dentistry.

Corequisite(s): DAS 113, DAS 115, and DAS 117.

Prerequisite(s)/Corequisite(s): PSY 201G, PHLS 150G, and HNDS 251.

Prerequisite(s): ENGL 111G, BIOL 154, and (COMM 253G or COMM 265G). Restricted to: OEDA majors. Restricted to Alamogordo, Carlsbad and Dona Ana campuses.

DAS 113. Dental Assisting I**4 Credits (2+6P)**

Introduction to chair side assisting procedures, instrumentation, infection control, equipment safety and maintenance, dental office emergencies, and management of pain and anxieties.

Corequisite(s): DAS 111, DAS 115, and DAS 117.

Prerequisite(s)/Corequisite(s): PSY 201G, PHLS 150G, and HNDS 251.

Prerequisite(s): ENGL 111G, BIOL 154, and (COMM 253G or COMM 265G). Restricted to: OEDA majors. Restricted to Alamogordo, Carlsbad and Dona Ana campuses.

DAS 115. Dental Radiology**3 Credits (2+3P)**

Radiation physics, hygiene, and safety theories. Emphasis on the fundamentals of oral radiographic techniques and interpretation of radiographs. Includes exposure of intra-oral radiographs, quality assurance, radiographic interpretation, patient selection criteria, and other ancillary radiographic techniques.

Corequisite(s): DAS 111, DAS 113, and DAS 117.

Prerequisite(s)/Corequisite(s): PSY 201G, PHLS 150G, and HNDS 251.

Prerequisite(s): ENGL 111G, BIOL 154, and (COMM 253G or COMM 265G). Restricted to: OEDA majors. Restricted to Alamogordo, Carlsbad and Dona Ana campuses.

DAS 117. Dental Materials**3 Credits (2+3P)**

Composition, chemical and physical properties, manipulation and uses of dental materials. Laboratory experiences include the application and manipulation of various materials used in dentistry.

Corequisite(s): DAS 111, DAS 113, and DAS 115.

Prerequisite(s)/Corequisite(s): PSY 201G, PHLS 150G, and HNDS 251.

Prerequisite(s): ENGL 111G, BIOL 154, and (COMM 253G or COMM 265G). Restricted to: OEDA majors. Restricted to Alamogordo, Carlsbad and Dona Ana campuses.

DAS 123. Dental Assisting Practicum**6 Credits (1+15P)**

This course is the clinical component of the program that combines general practice and experiences in the work place. Seminar topics focus on the practicum experiences and critique of performance. Restricted to Alamogordo, Carlsbad and Dona Ana campuses.

Prerequisite(s): DAS 111, DAS 113, DAS 115, and DAS 117.

Corequisite(s): DAS 125, DAS 127, and DAS 129.

DAS 125. Professional Concepts**3 Credits**

Emphasis on the development of professionalism for the dental office. Includes oral communication, psychology, patient relations, problem-solving skills, stress management, and employability in addition to dental jurisprudence and ethics. Restricted to Alamogordo, Carlsbad and Dona Ana campuses.

Prerequisite(s): DAS 111, DAS 113, DAS 115, and DAS 117.

Corequisite(s): DAS 123, DAS 127, and DAS 129.

DAS 127. Dental Office Management**2 Credits**

This capstone course is an introduction to business office procedures, including telephone management, appointment control, accounts payable, completion of third party reimbursement forms, inventory control data entry for charges and payments, management recall, basic dental computer software and operating basic business equipment. Restricted to: OEDA majors. Restricted to Alamogordo, Carlsbad and Dona Ana campuses.

Prerequisite(s): DAS 111, DAS 113, DAS 115, and DAS 117.

Corequisite(s): DAS 123, DAS 125, and DAS 129.

DAS 129. Preventive Dentistry**2 Credits**

Prevention of dental diseases, oral hygiene instruction, fluoride, community dental health, and nutrition. Development, implementation and evaluation of a community dental health project. Restricted to Alamogordo, Carlsbad and Dona Ana campuses.

Prerequisite(s): DAS 111, DAS 113, DAS 115, and DAS 117.

Corequisite(s): DAS 123, DAS 125, and DAS 127.

DAS 130. Dental Assisting II**4 Credits (2+6P)**

Continuation of chair side assisting skills and techniques with a major emphasis on four-handed dentistry. This capstone course includes specialties within dentistry and expanded chair side functions. Restricted to Alamogordo, Carlsbad and Dona Ana campuses.

Prerequisite(s): DAS 111, DAS 113, DAS 115, DAS 117, DAS 123, DAS 125, DAS 127, and DAS 129.

DAS 131. Dental Office Management I**3 Credits**

Introduction to the field of dental office management with emphasis placed on professional verbal and written communication skills utilized within the dental office. Content includes dental terminology, charting, and back office experience as they relate to dental reception and management.

Prerequisite(s)/Corequisite(s): DAS 101, AHS 120, and AHS 202.

Prerequisite(s): ENGL 111G. Restricted to Alamogordo, Carlsbad and Dona Ana campuses.

DAS 133. Dental Office Management II**3 Credits**

Places emphasis on computer programs specifically designed for dental office management (Dentrix, Sof Dent, etc.) Expanded course content on oral communication and telephone skills, appointment scheduling, patient relations, stress management solutions, and comprehensive critical thinking/problem solving skills.

Prerequisite(s)/Corequisite(s): AHS 202. **Prerequisite(s):** ENGL 111G, DAS 101, and AHS 120. Restricted to Alamogordo, Carlsbad and Dona Ana campuses.

DAS 155. Special Topics**1-6 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

DENTAL HYGINE/HYGIENIST (DHYG)

DHYG 110. Preclinical Dental Hygiene**3 Credits**

Basic scientific principles and current theory, prevention of disease transmission, ethical and professional treatment of patients, clinical learning preparation, and introduction to comprehensive patient care. Offered concurrently with DHYG 112 to provide dental hygiene students with introductory knowledge, skills and attitudes to function in the clinical setting. May be repeated up to 3 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 112. Preclinical Dental Hygiene Lab**3 Credits**

Clinical application to basic theories and procedures used in dental hygiene practice. Techniques of instrumentation used in performing diagnostic, preventive and therapeutic services utilized when providing comprehensive patient care. Student will practice these techniques on manikins and student partners in the clinic. May be repeated up to 3 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 114. Oral Histology and Embryology**2 Credits**

Introduction and description of general histology and embryology with emphasis on the microscopic structures of enamel, dentin, pulp, cementum, periodontal ligament, bone, oral mucosa, epithelial attachment and development of orofacial structures. May be repeated up to 2 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 116. Head and Neck Anatomy**3 Credits**

Comprehensive study of the anatomy of the head and neck regions, including skeletal, nervous, circulatory, lymphatic, and muscular systems. May be repeated up to 3 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 117. Dental Anatomy**2 Credits (2+1P)**

A detailed study of nomenclature, morphologic characteristics, and physiologic relationships of human primary and permanent teeth as related to the clinical practice of dental hygiene. Laboratory activities develop observation and dexterity skills. May be repeated up to 2 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 118. Dental Radiology**3 Credits (3+4P)**

Study of radiation physics, hygiene and safety theories. Fundamentals of oral radiographic techniques and interpretation of radiographs. Includes exposure of intra-oral radiographs, quality assurance, radiographic interpretation, patient selection criteria, ancillary radiographic techniques and application to dental hygiene treatment. May be repeated up to 3 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 120. Dental Hygiene Theory I**3 Credits**

Continuation of the theoretical basis for dental hygiene clinical practice. Emphasis on emergency care, planning dental hygiene care, health promotion and disease prevention, oral rehabilitation and care of appliances, modifications of dental hygiene care through the life-span, and an introduction to medically compromised patients. May be repeated up to 3 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 122. Clinical Dental Hygiene I**3 Credits**

Application of dental hygiene procedures on a variety of clinical patients under direct supervision of faculty. Emphasis on patient assessment and diagnosis, treatment procedures, appointment planning and prevention techniques. Theory is simultaneously related to practical experience. Offered concurrently with DHYG 120. May be repeated up to 3 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 124. General and Oral Pathology**3 Credits**

Introduction to general pathology with focused study of diseases and disorders of the oral cavity and their interrelationship with body systems; developmental anomalies of the teeth and jaws; manifestations of disease in the oral cavity, head and neck. May be repeated up to 3 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 126. Periodontology**3 Credits**

Study of normal and diseased periodontium to include the structural, functional and environmental factors. Emphasis on etiology, pathology, evaluation of disease, treatment modalities, and therapeutic and preventative periodontics relative to the hygienist's role as a co-therapist in a contemporary practice setting. May be repeated up to 3 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 132. Clinical Dental Hygiene II**2 Credits**

Continuation of clinical skills, patient assessment and diagnosis, treatment and appointment planning, preventive techniques and application of dental hygiene procedures at an intermediate level under the direct supervision of faculty. Clinical-based instruction helps students synthesize new knowledge, apply previous knowledge, and gain experience managing the workflow. Theory is simultaneously related to practical experience. May be repeated up to 2 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

Prerequisite(s): "C" or above in DHYG 120, DHYG 122, DHYG 124, DHYG 126, DHYG 134.

Corequisite(s): DHYG 218.

DHYG 134. Dental Materials**3 Credits (2+2P)**

Study of the composition, chemical and physical properties, manipulations, and uses of dental materials. Emphasis on materials and procedures for which the dental hygienist is directly responsible. Laboratory experiences include application and manipulation of various materials used in dentistry. May be repeated up to 3 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 210. Dental Hygiene Theory III**2 Credits**

Advanced theory of dental hygiene and information on periodontal therapies relative to the hygienist's role as a co-therapist in clinical practice. Continuation of the study of dental hygiene care for medically comprised patients and an introduction to special needs patients. May be repeated up to 2 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 212. Clinical Dental Hygiene III**4 Credits**

Continuation of clinical skills, patient assessment and diagnosis, treatment and appointment planning, preventive techniques and applications of dental hygiene procedures at the intermediate to competent level under supervision of faculty. Emphasis on dental hygiene treatment for the medically compromised and periodontally involved patients. Theory is simultaneously related to practical experience. Offered concurrently with DHYG 210. May be repeated up to 4 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 214. Dental Pharmacology**3 Credits**

Study of the pharmacologic aspects of drugs and drug groups with which the dentist and dental hygienist are directly and indirectly concerned. Emphasis is placed on nomenclature, origin, physical and chemical properties, preparation, modes of administration and effects of drugs upon the body systems. May be repeated up to 3 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 215. Medical and Dental Emergencies**2 Credits**

This course provides an overview of medical and dental emergencies encountered most frequently in the dental setting. It also provides the student with knowledge and techniques on how to address those emergencies should they occur. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 217. Research Methodology**2 Credits**

This course provides an introduction to the principles and application of research methods in social, behavioral and medical research. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 218. Pain and Anxiety Management**2 Credits**

Study of the application of various physical, chemical, and psychological modalities to the prevention and treatment of preoperative and postoperative patient anxiety and pain. Emphasis on administration of local anesthesia and nitrous oxide. May be repeated up to 2 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 219. Pain and Anxiety Management Clinical**1 Credit**

Clinical application of concepts learned in DHYG 218. Emphasis on the administration and techniques of local anesthesia and monitoring nitrous oxide. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

Prerequisite(s): DHYG 218.

DHYG 220. Dental Hygiene Theory IV**3 Credits**

Theoretical preparation for advanced clinical practice. In-depth study of dental hygiene care for patients with special needs. Case Study presentations and a Board Review are utilized to demonstrate the synthesis of comprehensive dental hygiene knowledge, skills and attitudes. The most current dental and dental hygiene technology will be reviewed as it related to clinical practice. May be repeated up to 3 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 222. Clinical Dental Hygiene IV**4 Credits**

Clinical sessions combine basic and advanced dental hygiene skills with time management techniques essential for private practice. Comprehensive patient care to include assessment, dental hygiene diagnosis, treatment planning, implementation and evaluation of dental care, nonsurgical periodontal therapy, adjunct clinical procedures, ultrasonic instrumentation, patient management, sealants, and comprehensive programs for control of oral diseases will be emphasized. Theory is simultaneously related to practical experience. Students are encouraged to develop independent decision-making with minimal faculty supervision. May be repeated up to 4 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 224. Principles of Practice**2 Credits**

Examination of the dental hygienist's role in both traditional and non-traditional employment settings. Career planning, resume preparation and interviewing are practices. An understanding of the law, professional ethics of dental hygiene and the need for lifelong learning are emphasized. Future roles of the dental hygienist and emerging issues in dental hygiene will be explored. May be repeated up to 2 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 225. Dental Public Health Education**3 Credits**

Study of principles and concepts of community public health and dental health education. Emphasis on dental epidemiology and statistical methods, community assessment, educational planning, implementation, and evaluation, scientific review of literature, and classroom presentation. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 255. Special Topics in Dental Hygiene**1-6 Credits (1-6)**

Study of special topics related to the advanced practice of dental hygiene. May include educational methodology as well as applications in clinical practice, research, or community service. Consent of instructor required. Restricted to: Community Colleges only. Restricted to DHYG majors.

DMS-DIAGNOSTIC MED SONOGRAPHY (DMS)

DMS 101. Introduction to Sonography**2 Credits**

Introduction to the principles of ultrasound, terminology, scanning planes and applications of ultrasound. Includes observation in an ultrasound facility. All DMS courses are restricted to students who have been accepted into the Diagnostic Medical Sonography Program. Restricted to: Community Colleges only. Restricted to DMS majors.

Corequisite(s): DMS 112, DMS 113.

DMS 110. Ultrasound Physics**4 Credits**

Properties of sound and its use in diagnostic imaging; technical components involved in ultrasound imaging; how to use ultrasound equipment during lab sessions; the bioeffects of high-frequency sound; and artifacts created during imaging. Restricted to: DMS majors. Restricted to Dona Ana campus only.

DMS 112. Abdominal Sonography I**4 Credits (3+3P)**

Includes anatomy, physiology, and pathology of the abdominal organ systems; scanning techniques, ultrasound appearance of normal structures, and changes seen with pathologic conditions. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

Corequisite(s): DMS 116, DMS 101, DMS 113.

DMS 113. GYN Sonography**3 Credits (2+2P)**

Includes female pelvic anatomy, scanning techniques, pelvic pathology, sonography, and Doppler findings in normal and abnormal exams, introduction to human embryology, and first trimester pregnancy. Restricted to: Community Colleges only. Restricted to DMS majors.

Corequisite(s): DMS 101, DMS 112, DMS 116.

DMS 114. OB Sonography**4 Credits (3+2P)**

Includes review of human embryology, normal fetal anatomy, obstetrical scanning techniques, fetal biometry, fetal abnormalities, fetal Doppler, the role of ultrasound in genetic testing and chromosome abnormalities, fetal echocardiography, and congenital heart abnormalities. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 115. Abdominal Sonography II**3 Credits (2+2P)**

Includes anatomy, physiology, and pathology of superficial structures, including female breast, thyroid, and neck structures, male pelvis, and musculoskeletal system; scanning techniques, ultrasound appearance of normal structures, and changes seen with pathologic conditions; abdominal Doppler principles of applications and organ transplant sonography. Restricted to: DMS majors. Restricted to Dona Ana campus only.

DMS 116. Introduction to Vascular Technology**3 Credits (2+2P)**

Basic ultrasound physics and principles, peripheral vascular anatomy, hemodynamics, Doppler evaluation, peripheral vascular scanning techniques, physiologic testing and the more common pathologies of the carotid arteries, and the peripheral vascular system. Restricted to: Community Colleges only. Restricted to DMS majors.

Corequisite(s): DMS 101, DMS 112, DMS 113.

DMS 117. Advanced Sonographic Procedures**2 Credits**

This course will focus on the anatomy, pathology, laboratory values and sonographic appearances of organ transplants, the musculoskeletal system and the breast. Students will also demonstrate knowledge in age related competency (i.e. neonates, pediatric patients, adolescents, adults, and Obstetric patients) and be able to respond appropriately to parental needs. Restricted to: DMS majors. Restricted to Community Colleges only.

DMS 118. Neurosonography**2 Credits (1+3P)**

This course will cover detailed anatomy of neonatal brain and central nervous system. This course includes scanning techniques and indications for performing neurosonograms of the newborn; as well as common pathologies seen in the fetal and newborn brain and central nervous system. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 120. Clinical Internship I**4 Credits**

Provides the practical, hands-on experience required for both the national registry exam and for quality patient care. Students will spend approximately 32 hours per week at their assigned clinical site performing ultrasound exams under the supervision of the clinical staff. Students return to campus periodically to participate in advanced seminars. Six-week course. Restricted to: DMS majors. Restricted to Community Colleges only.

DMS 122. Clinical Internship II**4 Credits**

Provides the practical, hands-on experience required for both the national registry exam and for quality patient care. Students will spend approximately 32 hours per week at their assigned clinical site performing ultrasound exams under the supervision of the clinical staff. Students return to campus periodically to participate in advanced seminars. Six-week course. Restricted to: DMS majors. Restricted to Community Colleges only.

DMS 124. Clinical Internship III**8 Credits**

Provides the practical, hands-on experience required for both the national registry exam and for quality patient care. Students will spend approximately 32 hours per week at their assigned clinical site performing ultrasound exams under the supervision of the clinical staff. Students return to campus periodically to participate in advanced seminars. Restricted to: DMS majors. Restricted to Dona Ana campus only.

Prerequisite(s): DMS 122 or Consent of Instructor.

DMS 126. Clinical Internship IV**8 Credits**

Provides the practical, hands-on experience required both for national certification and for quality patient care. Students will spend approximately 32 hours per week at their assigned clinical site performing ultrasound exams under the supervision of the clinical staff. Students will learn more difficult exams and will work on case reports and course review materials. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

Prerequisite(s): DMS 124 or consent of instructor.

DRFT-DRAFTING (DRFT)

DRFT 101. Introduction to Drafting and Design Technologies**1 Credit**

Professional and student organizations associated with the Drafting and Design Technologies program, degree requirements, employment skills and work habits, and university and college policies and procedures will be explored. Students will be introduced to the current learning management system and career-readiness certification. Restricted to Community Colleges only.

DRFT 105. Technical Drawing for Industry**3 Credits (2+2P)**

Technical sketching, basic CAD, and interpretation of drawings with visualization, speed and accuracy highly emphasized. Areas of focus include various trades such as machine parts, welding, heating and cooling, and general building sketches/plan interpretation.

DRFT 108. Drafting Concepts/Descriptive Geometry**2 Credits (1+2P)**

Basic manual drafting skills, sketching, terminology and visualization. Graphical solutions utilizing applied concepts of space, planar, linear and point analyses. Metric and S.I. units introduced.

DRFT 109. Computer Drafting Fundamentals**3 Credits (2+2P)**

Introduction to computer-aided drafting. Principles and fundamentals of drafting using the latest version of AutoCAD software. Crosslisted with: C E 109 and E T 109

DRFT 112. Drafting Concepts/Computer Drafting Fundamentals I**4 Credits (2+4P)**

Basic drafting skills, terminology, and visualization. Introduction to principles and fundamentals of computer-aided drafting. Same as E T 106.

Prerequisites: OECS 207, OECS 125 or consent of instructor.

DRFT 113. Drafting Concepts/Computer Drafting Fundamentals II**4 Credits (2+4P)**

Drafting for mechanical/industrial applications; machine part detailing, assemblies in orthographic, isometric, auxiliary, oblique, and sectional views. Two-dimensional AutoCAD with introduction to 3-D AutoCAD. Same as E T 216. Restricted to: Community Colleges only.

Prerequisite: DRFT 112.

DRFT 114. Introduction to Solid Modeling**3 Credits (2+2P)**

2D mechanical drafting and 3D mechanical solid modeling utilizing the latest version of AutoCAD software. Industry dimensioning and annotation standards will be emphasized. 2D multi-view working drawings, 3D solid models, and basic 3D model assemblies will be introduced. Restricted to Community Colleges campuses only.

Prerequisite(s): DRFT 109.

DRFT 115. General Construction Safety**3 Credits**

Overview of general construction safety related to building, highway and road construction, and surveying field work for entry-level individuals. Students will also have the opportunity to earn a 10-hour construction industry OSHA card. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

DRFT 120. Survey Equipment Fundamentals**2 Credits**

Introduces the application and the setup to the following surveying equipment: Automatic Level, Total station, and Global Positioning Systems. Field safety knowledge is required. Restricted to Community Colleges only.

DRFT 130. General Building Codes**3 Credits (2+2P)**

Interpretation of the Building Code, local zoning codes, A.D.A. Standards and the Model Energy Code to study construction and design requirements and perform basic plan checking. Restricted to: Community Colleges only.

DRFT 135. Electronics Drafting I**3 Credits (2+2P)**

Drafting as it relates to device symbols; wiring, cabling, harness diagrams and assembly drawings; integrated circuits and printed circuit boards; schematic, flow and logic diagrams; industrial controls and electric power fields. Drawings produced using various CAD software packages.

Prerequisites: DRFT 108 and DRFT 109.

DRFT 143. Civil Drafting Fundamentals**3 Credits (2+2P)**

Introduction to drafting in the field of Civil Engineering. Drawings, projects, and terminologies related to topographic, contour drawings, plan and profiles, and street/highway layout. Crosslisted with: E T 143. Restricted to Community Colleges only.

Prerequisite(s): DRFT 109.

DRFT 151. Construction Principles and Print Reading**3 Credits (2+2P)**

Introduction to construction materials, methods, and basic cost estimating and print reading applicable in today's residential, commercial, and public works industry. Instruction by print reading and interpretation, field trips, and actual job-site visits and progress evaluation.

DRFT 153. Survey Drafting Applications**3 Credits (2+2P)**

Introduction to drafting in the field of survey engineering. Drawings, projects and terminologies related to Point Data, topography, land/boundary surveys, legal descriptions and plat surveys. Using the current Autodesk software. Crosslisted with: SUR 143. Restricted to: Community Colleges only.

Prerequisite(s): DRFT 109.

DRFT 160. Construction Take-Offs and Estimating**3 Credits (2+2P)**

Computing and compiling materials and labor estimates from working drawings using various techniques common in general building construction and in accordance with standard specifications and estimating formats. Use of spreadsheets and estimating software introduced.

Prerequisite: DRFT 151.

DRFT 161. Introduction to Construction Management**3 Credits**

Introduction to the construction industry and construction management; construction documents and contracts; project planning, scheduling and administration; construction site management; and the role of Building Information Modeling (BIM) in construction management. Pre/ Restricted to: Community Colleges only.

Corequisite(s): DRFT 151 or consent of instructor.

DRFT 164. Intermediate Mechanical Drafting/Solid Modeling**3 Credits (2+2P)**

Intermediate 3D mechanical parametric solid modeling and assembly creation utilizing the latest version of Autodesk Inventor software. The creation of 2D working drawings from 3D solid models will be emphasized. Geometric Dimensioning and Tolerancing (GD&T), basic material properties, and industry standard fastening and manufacturing methods will be introduced.

Prerequisite(s)/Corequisite(s): DRFT 114. Restricted to Community Colleges campuses only.

DRFT 165. Introduction to Building Information Modeling**3 Credits (2+2P)**

Introduction to Building Information Modeling (BIM) in the development of virtual 3D building models, construction documents, renderings and basic animations related to architectural, structural, and mechanical/electrical/plumbing building components. Utilizes the latest BIM technologies in the integration one, parametric BIM. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

DRFT 176. Solid Modeling, Rendering and Animation**3 Credits (2+2P)**

Introduction to three dimensional drafting and solid modeling, rendering and animation for architecture and engineering fields. Material application, mapping, and scene lighting will be introduced. Restricted to: Community Colleges only.

Prerequisite(s): DRFT 109.

DRFT 177. Computer Rendering and Animation I**3 Credits (2+2P)**

Introduction to technical applications of computer generated renderings and animations for the architecture and engineering fields. 3D models, photo-realistic renderings, and basic animation movie files will be produced utilizing Autodesk VIZ and Google SketchUp software. May be repeated for a maximum of 6 credits.

Prerequisite: DRFT 109.

DRFT 180. Residential Drafting**3 Credits (2+2P)**

Basic residential drafting including, floor plans, foundation plans, sections, roof plans, exterior and interior elevations, and site plans.

Applicable residential building and zoning codes, construction methods and materials, adaptable residential design, and drawing and sheet layout for architectural drafting will be introduced. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): DRFT 109.

DRFT 181. Commercial Drafting**3 Credits (2+2P)**

Drafting principles, plan coordination, and code analysis applicable in the development of working drawings for commercial, public, and industrial building projects. Students will utilize National Cad Standards, ADA Standards, and will be introduced to modern office practice. Pre/ Restricted to: Community Colleges only.

Prerequisite(s): DRFT 109.

Corequisite(s): DRFT 180.

DRFT 190. Finding and Maintaining Employment**2 Credits**

Techniques in self-evaluations, resume writing, application completion, job interviewing, and job retention. Exposure to work ethics, employee attitudes, and employer expectations.

DRFT 204. Geographic Information Systems Technology**3 Credits (2+2P)**

The use of digital information for which various digitized data creation methods are captured. Users will capture, store, analyze and manage spatially referenced data in a modeled mapping procedure. Restricted to: Community Colleges only.

Prerequisite(s): DRFT 109.

DRFT 214. Advanced Solid Modeling**3 Credits (2+2P)**

Advanced 3D mechanical parametric solid modeling and assembly creation utilizing the latest version of Solidworks software. The creation of 2D working drawings from 3D solid models and the creation of 3D models for machining/manufacturing will be emphasized. Geometric Dimensioning and Tolerancing (GD&T), material properties, and industry standard fastening and manufacturing methods will be further explored.

Prerequisite(s)/Corequisite(s): DRFT 114. Restricted to Community Colleges campuses only.

DRFT 215. Construction Site Safety Management**3 Credits**

Construction safety, compliance, documentation, and reporting requirements for individuals with construction site safety management responsibilities. Students will have the opportunity to earn a 30-hour construction industry OSHA card. Consent of Instructor required. Restricted to Community Colleges campuses only.

DRFT 222. Surveying Fundamentals**3 Credits (2+2P)**

Elementary surveying and civil drafting theory and techniques for non engineering majors. Includes traverse plotting, site plans, mapping, cross sections, and development of plan and profile drawings. Actual basic field measurement/surveying as well as extensive manual and CAD projects will be assigned. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): DRFT 109 and MATH 190G.

DRFT 230. Building Systems Drafting**3 Credits (2+2P)**

Development of working drawings for electrical, plumbing, and HVAC systems, for residential and commercial building through the applications of both 2D Drafting and 3D Building Information Modeling (BIM) techniques. Basics of project setup, National CAD Standards, ADA Standards, modern office practice, code analysis, as well as Sustainability and LEED for new construction. Restricted to: Community Colleges only.

Prerequisite(s): DRFT 180 or DRFT 181.

DRFT 240. Structural Systems Drafting**3 Credits (2+2P)**

Study of foundations, wall systems, floor systems and roof systems in residential, commercial and industrial design/construction. Produce structural drawings including foundation plans, wall and building sections, floor and roof framing plans, shop drawings and details; schedules, materials lists and specifications. Use of various software. Restricted to: Community Colleges only.

Prerequisite(s): DRFT 180 or DRFT 181.

DRFT 242. Roadway Development Drafting**3 Credits (2+2P)**

Advanced civil/survey technology and drafting related to roadway development. Emphasis is on relevant terminology, codes/standards, and the production of complex working drawings such as topographical/grading, drainage, master utilities, roadway P P/details/etc., according to agency standards. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): DRFT 143.

DRFT 243. Land Development Drafting**3 Credits (2+2P)**

Advanced civil/survey technology and drafting related to land development. Emphasis is on relevant terminology codes/standards, and the production of complex working drawings such as subdivision plats, local utility and drainage plans, construction details roadway P P, etc., according to local development/ agency standards.

Prerequisite: DRFT 143 and DRFT 153.

DRFT 250. Principles of Detailing and Design**3 Credits (2+2P)**

Advanced practice in construction documentation in the development and coordination of working drawings & specifications. In particular, will utilize Architectural Graphic Standards, National CAD Standards, and ADA standards to develop detail drawings related to Architectural, Civil, Structural and Building Mechanical systems. Will also be introduced to basic principles, factors, and process of building design such as space planning, site analysis, and basic architectural programming. Restricted to: Community Colleges only.

Prerequisite(s): DRFT 180 or DRFT 181.

DRFT 254. Spatial Data Processing**3 Credits (2+2P)**

Utilizes the tools and technologies of GIS, processing volumes of geodata identifying a numerical, coded or listed map. Involves the analysis of spatial data from various diverse applications and place in a descriptive mapping process. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): DRFT 204.

DRFT 255. Independent Study**1-3 Credits (1-3)**

Instructor-approved projects in drafting or related topics specific to the student's individual areas of interest and relevant to the drafting and graphics technology curriculum. Consent of instructor required. May be repeated for a maximum of 6 credits.

DRFT 265. Advanced Building Information Modeling Applications**3 Credits (2+2P)**

Advanced applications of Building Information Modeling (BIM) including the creation of, and practice in collaborative work sets, data and design analyses, energy modeling and analysis, preliminary LEED analysis, construction take-offs & estimation, and construction animation, through use of various BIM and related software. Restricted to: Community Colleges only.

Prerequisite(s): DRFT 165.

DRFT 274. GIS Theory and Analysis**3 Credits (2+2P)**

Analyzes the hypothesis in which location and spatial data sufficiently quantifies the appropriate statistical methodology. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): DRFT 254.

DRFT 276. Computer Rendering and Animation I**3 Credits (2+2P)**

Introduction to technical applications of computer generated renderings and animations for the architecture and engineering fields. 3D models, photo-realistic renderings, and basic animation movie files will be produced utilizing industry standard modeling and animation software.

DRFT 277. Computer Rendering and Animation II**3 Credits (2+2P)**

Continuation of DRFT 276. Covers advanced modeling and animation techniques using 3-D animation software.

Prerequisite: DRFT 276.**DRFT 278. Advanced CAD Applications****3 Credits (2+2P)**

Introduction to advanced CAD commands, applications, usage techniques, and user customization. the latest version of the National CAD Standards will also be explored. Restricted to: Community Colleges only.

Prerequisite(s): DRFT 109.**DRFT 288. Portfolio Development****3 Credits (2+2P)**

Production of a portfolio consisting of previously produced student work related to the student's individualized degree option. Process shall include the compilation and organization of working and presentation drawings, construction documents, BIM Models, and renderings/animations. Students will learn the basics of design layout and online portfolio documentation. Job search and resume preparation activities will also be required. Production of new material and content may also be required. This course is designed as a last semester course in the Drafting & Design curricula. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

DRFT 290. Special Topics**1-4 Credits (1-4)**

Topics subtitled in the Schedule of Classes. May be repeated for a maximum of 12 credits.

DRFT 291. Cooperative Experience**1-6 Credits (1-6)**

Supervised cooperative work program. Student is employed in an approved occupation and supervised and rated by the employer and instructor. Student meets with advisor weekly. Graded S/U.

Prerequisite: consent of instructor.**DRFT 295. Professional Development and Leadership DAGA****1 Credit**

Students gain experience in leadership, team building, performing community service, and membership and/or leadership in a student organization. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

E E-ELECTRICAL ENGINEERING (E E)

E E 100. Introduction to Electrical Engineering**4 Credits (3+3P)**

Introduction to analog (DC) and digital electronics. Including electric component descriptions and equations, Ohm's law, Kirchhoff's voltage and current laws, ideal op-amp circuits, Boolean algebra, design of combinational and sequential logic circuits and VHDL or VERILOG.

Prerequisite(s): C- or better in MATH 190.**E E 109. The Engineering of How Things Work****4 Credits (3+3P)**

This class provides Integrated Learning Community students with an introduction to various aspects of engineering.

E E 112. Embedded Systems**4 Credits (3+3P)**

Introduction to programming through microcontroller-based projects. Extensive practice in writing computer programs to solve engineering problems with microcontrollers, sensors, and other peripheral devices.

Prerequisite(s): C- or better in E E 100.**E E 161. Computer Aided Problem Solving****4 Credits (3+3P)**

Introduction to scientific programming. Extensive practice in writing programs to solve engineering problems. Items covered will include: loops, input and output, functions, decision statements, and pointers. Pre/

Corequisite(s): MATH 190G.**E E 162. Digital Circuit Design****4 Credits (3+3P)**

Design of combinational logic circuits based on Boolean algebra. Introduction to state machine design. Implementation of digital projects with hardware description language.

Prerequisite(s): C or better in E E 161 and MATH 190G.**E E 200. Linear Algebra, Probability and Statistics Applications****4 Credits (3+3P)**

The theory of linear algebra (vectors and matrices) and probability (random variables and random processes) with application to electrical engineering. Computer programming to solve problems in linear algebra and probability.

Prerequisite(s): C- or better in E E 112 and MATH 192G.**E E 201. Electric Circuit Analysis****3 Credits**

Electric component descriptions and equations. Kirchhoff's voltage and current laws, formulation and solution of RLC network equations using time domain concepts. For nonmajors only. Minimum 2.0 GPA.

Prerequisite(s): C or better in MATH 192G.**E E 212. Introduction to Computer Architecture and Organization****4 Credits (3+3P)**

Introduction to computer architecture and performance analysis techniques. Design and optimization of systems such as personal mobile devices and cloud computing systems.

Prerequisite(s): C- or better in E E 112 and MATH 190G.**E E 230. AC Circuit Analysis and Introduction to Power Systems****4 Credits (3+3P)**

Electric component descriptions and equations; complete solutions of RLC circuits; steady-state analysis of AC circuits; introduction to frequency response techniques; introduction to power systems in the steady-state. May be repeated up to 4 credits. Restricted to: E E majors.

Prerequisite(s): C- or better in E E 100, PHYS 215G and MATH 192G.**E E 240. Multivariate and Vector Calculus Applications****3 Credits**

Vector algebra, cylindrical and spherical coordinates, partial derivatives, multiple integrals. Calculus of vector functions through electrostatic applications. Divergence, gradient, curl, divergence theorem, Stokes's theorem, Coulomb's Law, Gauss's Law, electric field, electric potential. Applications in Matlab.

Prerequisite(s): C- or better in MATH 192G and E E 112.

E E 260. Embedded Systems**4 Credits (3+3P)**

Applications of microcontrollers, FPGAs, interfaces and sensors. Introduction to Assembly language programming.

Prerequisite(s): C or better in E E 162.

E E 280. DC and AC Circuits**4 Credits (3+3P)**

Electric component descriptions and equations; Kirchhoff's voltage and current laws; formulation and solution of network equations for dc circuits; ideal op-amp circuits. Complete solutions of RLC circuits; steady-state analysis of ac circuits, ac power; introduction to frequency response techniques.

Prerequisite(s): C or better in MATH 192G and PHYS 216G.

E E 300. Cornerstone Design**2 Credits**

Application and realization of engineering principles to a guided team-based design project. Formulation and implementation of test procedures, evaluation of alternate solutions and oral and written communication of the design and test results. May be repeated up to 6 credits. Restricted to: E E majors. Restricted to Las Cruces campus only.

Prerequisite(s): C- or better in E E 212 and E E 230.

E E 310. Engineering Analysis II**3 Credits**

Vector algebra, cylindrical and spherical coordinates, partial derivatives, multiple integrals. Calculus of vector functions through electrostatic applications. Divergence, gradient, curl, divergence theorem, Stoke's theorem, Coulomb's Law, Gauss's Law, electric field, electric potential.

Application of Matlab. Restricted to: E E majors.

Prerequisite(s): C- or better in E E 210 and MATH 291G.

E E 312. Signals and Systems I**3 Credits**

Continuous and discrete time signals and systems. Linear, time-invariant systems. Fourier series, continuous and discrete time Fourier transforms. Time and frequency characterization of signals and systems. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 392. **Prerequisite(s):** C- or better in E E 210 and E E 280.

E E 314. Signals and Systems II**4 Credits (3+3P)**

Introduction to communication systems including amplitude, frequency, and pulse-amplitude modulation. Introduction to control systems including linear feedback systems, root-locus analysis, Nyquist criterion. Introduction to digital signal processing including sampling, digital filtering, and spectral analysis. May be repeated up to 4 credits.

Prerequisite(s): C- or better in E E 312 and MATH 392.

E E 330. Environmental Management Seminar I**1 Credit**

Survey of practical and new developments in hazardous and radio-active waste management provided through a series of guest lectures and reports of ongoing research. Restricted to: Main campus only. Crosslisted with: C E 330, G EN 330, I E 330, M E 330, WERC 330, A EN 330 and CH E 330

E E 351. Fields and Waves**4 Credits (3+3P)**

Static electromagnetic field. Maxwell's equation and time-varying electromagnetic fields. Generalized plane wave propagation, reflection, transmission, superposition and polarization. Transmission line theory. Extensions to optical wave propagation. Applications including Time Domain Reflectometry (TDR) and fiber optic transmission. Laboratory experience with RF/microwave test equipment and optical apparatus. Restricted to Majors: Electrical Engineering.

Prerequisite(s): C- or better in E E 310.

E E 363. Computer Systems Architecture**4 Credits (3+3P)**

Concepts of modern computer architecture. Processor micro-architectures, hardwired vs. micro-programmed control, pipelining and pipeline hazards, memory hierarchies, bus-based system architecture and memory mapping, hardware-software interface, and operating system concepts. Comparison of architectures to illustrate concepts of computer organization; relationships between architectural and software features.

Prerequisite(s): C or better in C S 273 or E E 260.

E E 380. Semiconductor Devices and Electronics**4 Credits (3+3P)**

Analysis and design of opamp circuits, diode circuits and single-transistor MOS and BJT amplifiers. Introduction to solid-state semiconductor devices. Restricted to Majors: Electrical Engineering.

Prerequisite(s): C- or better in E E 230.

E E 391. Introduction to Electric Power Engineering**4 Credits (3+3P)**

Introduction to the principles, concepts, and analysis of the major components of an electric power system. Basic electromechanics, energy conversion and source conversion, transformers, transmission lines, rectifiers, regulators, and system analysis.

Prerequisite(s): C or better in E E 280.

E E 395. Introduction to Digital Signal Processing**3 Credits**

Undergraduate treatment of sampling/reconstruction, quantization, discrete-time systems, digital filtering, Z-transforms, transfer functions, digital filter realizations, discrete Fourier transform (DFT) and fast Fourier transform (FFT), finite impulse response (FIR) and infinite impulse response (IIR) filter design, and digital signal processing (DSP) applications.

Prerequisite(s): C or better in E E 314.

E E 400. Undergraduate Research**1-3 Credits**

Directed undergraduate research. May be repeated for a maximum of 9 credits.

Prerequisite: consent of the department head.

E E 402. Capstone Design**3 Credits (2+3P)**

Application and realization of engineering principles to a significant team-based design project with significant student management and autonomy. Determination of performance requirements, including safety, economics, ethics and manufacturability; extensive communication of design choices and test results to broad audiences; and interfacing of design with other hardware and software. May be repeated up to 3 credits. Restricted to: E E majors.

Prerequisite(s): C- or better in E E 300, E E 314, E E 351, and E E 380.

E E 418. Capstone Design I**3 Credits (1+6P)**

Application of engineering principles to a significant design project. Includes teamwork, written and oral communications, and realistic technical, economic, and public safety requirements.

Prerequisite(s)/Corequisite(s): E E 461. Prerequisite(s): C or better in E E 260, E E 314, E E 351, E E 380, and E E 391.

E E 419. Capstone Design II**3 Credits (1+6P)**

Realization of design project from E E 418 within time and budget constraints.

Prerequisite(s)/Corequisite(s): E E 461. Prerequisite(s): (C or better in E E 260, E E 314, E E 351, E E 380, and E E 391) OR (C or better in E E 418).

E E 425. Introduction to Semiconductor Devices**3 Credits**

Energy bands, carriers in semiconductors, junctions, transistors, and optoelectronic devices, including light-emitting diodes, laser diodes, photodetectors, and solar cells. Taught with E E 525.

Prerequisite(s): C or better in E E 380 and E E 351.

E E 426. Introduction to Smart Grid**3 Credits**

The course will serve as an introduction to the technologies and design strategies associated with the Smart Grid. The emphasis will be on the development of communications, energy delivery, coordination mechanisms, and management tools to monitor transmission and distribution networks. Taught with E E 546. Crosslisted with: C S 494.

Prerequisite(s): C- or better in E E 280.

E E 431. Power Systems II**3 Credits**

Analysis of a power system in the steady-state. Includes the development of models and analysis procedures for major power system components and for power networks.

Prerequisites: C or better in E E 391.

E E 432. Power Electronics**3 Credits (2+3P)**

Basic principles of power electronics and its applications to power supplies, electric machine control, and power systems.

Prerequisites: C or better in E E 380 and E E 391.

Corequisites: E E 312 and E E 314.

E E 438. Mobile Application Development**3 Credits**

Introduction to mobile application development. Students will develop applications for iOS devices including iPhone and iPad. Topics include object-oriented programming using the Objective-C language, model-view-controller (MVC) pattern, memory management, view controllers, graphical user interface design, callbacks, and web services.

Corequisite(s): E E 161 or C S 172 or C S 271 or C S 450 or C S 451 or C S 452.

E E 443. Mobile Application Development**3 Credits**

Introduction to mobile application development. Students will develop applications for iOS devices including iPhone and iPad. Topics include object-oriented programming using Swift, model-view-controller (MVC) pattern, view controllers including tables and navigation, graphical user interface (GUI) design, data persistence, GPS and mapping, camera, and cloud and web services. May be repeated up to 3 credits.

Prerequisite(s): C- or better in C S 172 or C S 177 or C S 187 or C S 271 or C S 451 or C S 452.

E E 446. Digital Image Processing**3 Credits**

Two-dimensional transform theory, color images, image enhancement, restoration, segmentation, compression and understanding. Taught with E E 596. Prerequisite(s): E E 395

E E 447. Neural Signal Processing**3 Credits**

Cross-disciplinary course focused on the acquisition and processing of neural signals. Students in this class will learn about basic brain structure, different brain signal acquisition techniques (fMRI, EEG, MEG, etc.), neural modeling, and EEG signal processing. To perform EEG signal processing, students will learn and use Matlab along with an EEG analysis package that sits on top of Matlab. Taught with E E 597.

Prerequisite(s): C- or better in E E 314.

E E 449. Smart Antennas**3 Credits**

Smart antenna and adaptive array concepts and fundamentals, uniform and planar arrays, optimum array processing. Adaptive beamforming algorithms and architectures: gradient-based algorithms, sample matrix inversion, least mean square, recursive mean square, sidelobe cancellers, direction of arrival estimations, effects of mutual coupling and its mitigation. Taught with E E 549.

Prerequisite(s): C or better in E E 314 and E E 351.

E E 452. Introduction to Radar**3 Credits**

Basic concepts of radar. Radar equation; detection theory. AM, FM, and CW radars. Analysis of tracking, search, MTI, and imaging radar. Taught with E E 548. Restricted to undergraduate students. Pre/

Prerequisite(s): C or better in E E 210 and E E 351.

Corequisite(s): E E 496.

E E 453. Microwave Engineering**3 Credits**

Techniques for microwave measurements and communication system design, including transmissions lines, waveguides, and components. Microwave network analysis and active device design. Taught with E E 521. Restricted to undergraduate students. Restricted to: Main campus only.

Prerequisite(s): C or better in E E 351.

E E 454. Antennas and Radiation**3 Credits**

Basic antenna analysis and design. Fundamental antenna concepts and radiation integrals. Study of wire antennas, aperture antennas, arrays, reflectors, and broadband antennas. Taught with E E 541. Restricted to undergraduate students. Restricted to: Main campus only.

Prerequisite(s): C or better in E E 351.

E E 460. Space System Mission Design and Analysis**3 Credits**

Satellite system design, including development, fabrication, launch, and operations. A systems engineering approach to concepts, methodologies, models, and tools for space systems.

Prerequisite: junior standing.

E E 461. Systems Engineering and Program Management**3 Credits**

Modern technical management of complex systems using satellites as models. Team projects demonstrate systems engineering disciplines required to configure satellite components.

Prerequisite(s): Junior standing.

E E 469. Communications Networks**3 Credits (2+3P)**

Introduction to the design and performance analysis of communications networks with major emphasis on the Internet and different types of wireless networks. Covers network architectures, protocols, standards and technologies; design and implementation of networks; networks applications for data, audio and video; performance analysis. Taught with E E 569.

Prerequisite(s): C or better in E E 162 and (E E 210 or STAT 371).

E E 473. Introduction to Optics**3 Credits**

The nature of light, geometrical optics, basic optical instruments, wave optics, aberrations, polarization, and diffraction. Elements of optical radiometry, lasers and fiber optics. Crosslisted with: PHYS 473

Prerequisite(s): PHYS 216G or PHYS 217.

E E 475. Automatic Control Systems**3 Credits**

Design and synthesis of control systems using state variable and frequency domain techniques. Compensation, optimization, multi-variable system design techniques.

Prerequisite(s): C or better in E E 314.

E E 476. Computer Control Systems**3 Credits**

Representation, analysis and design of discrete-time systems using time-domain and z-domain techniques. Microprocessor control systems.

Prerequisite: C or better in E E 314.

E E 478. Fundamentals of Photonics**4 Credits (3+3P)**

Ray, wave and guided optics, lasers and thermal sources, radiometry, photon detection and signal-to-noise ratio. Elements of photonic crystals, polarization, acousto-optics, electro-optics, and optical nanostructures. Taught with E E 528. Recommended foundation: E E/PHYS 473.

Crosslisted with: PHYS 478.

Prerequisite(s): PHYS 216G or PHYS 217.

E E 479. Lasers and Applications**4 Credits (3+3P)**

Laser operating principles, characteristics, construction and applications. Beam propagation in free space and fibers. Laser diode construction and characteristics. Hands-on laboratory. Taught with E E 529. Crosslisted with: PHYS 479

Prerequisite(s): C or better in E E 351 or PHYS 461.

E E 480. Introduction to Analog and Digital VLSI**4 Credits (3+3P)**

Introduction to analog and digital VLSI circuits implemented in CMOS technology. Design of differential amplifiers, opamps, CMOS logic, flip-flops, and adders. Introduction to VLSI fabrication and CAD tools. Crosslisted with: E E 510.

Prerequisite(s): C- or better in E E 260 and E E 380.

E E 482. Electronics II**3 Credits**

Feedback analysis, application of operational amplifiers, introduction to data converters, analog filters, oscillator circuits..

Prerequisite: C or better in E E 380.

E E 485. Analog VLSI Design**3 Credits (2+3P)**

Analysis, design, simulation, layout and verification of CMOS analog building blocks, including references, opamps, switches and comparators. Teams implement a complex analog IC. Taught with E E 523. Restricted to undergraduate students. Restricted to: Main campus only.

Prerequisite(s): C or better in E E 312 and E E 480.

E E 486. Digital VLSI Design**3 Credits**

An introduction to VLSI layers. Static and dynamic logic design, memory circuits, arithmetic operators, and digital phase-locked loops. Taught with E E 524. Restricted to undergraduate students.

Prerequisite(s): C or better in E E 260 and E E 380.

E E 486 L. Digital VLSI Design Laboratory**1 Credit**

Simulation, schematic capture, layout, and verification using software tools of material presented in E E 486. An introduction to measurement of digital VLSI circuits. Taught with E E 524L. Pre/

Prerequisite(s): C or better in E E 260 and E E 380.

Corequisite(s): E E 486.

E E 490. Selected Topics**1-3 Credits**

May be repeated for a maximum of 9 credits. Graduate students may not use credits of E E 490 toward an M.S. or Ph.D. in electrical engineering.

Prerequisite: consent of instructor.

E E 493. Power Systems III**3 Credits**

Analysis of a power system under abnormal operating conditions. Topics include symmetrical three-phase faults, theory of symmetrical components, unsymmetrical faults, system protection, and power system stability. Taught with E E 543. Restricted to undergraduate students. Pre/

Prerequisite(s): C or better in E E 391.

Corequisite(s): E E 431.

E E 496. Introduction to Communication Systems**4 Credits (3+3P)**

Introduction to the analysis of signals in the frequency and time domains. A study of baseband digital transmission systems and digital/analog RF transmission systems. Introduction to telecom systems as well as satellite systems.

Prerequisite(s): C or better in E E 314.

E E 497. Digital Communication Systems I**3 Credits**

Techniques for transmitting digital data over commercial networks. Topics include baseband and bandpass data transmission and synchronization techniques. Taught with E E 581. Recommended foundation: E E 496.

Prerequisite(s): E E 210 and E E 314.

E E 501. Research Topics in Electrical and Computer Engineering**1 Credit**

Ethics and methods of engineering research; contemporary research topics in electrical and computer engineering.

E E 510. Introduction to Analog and Digital VLSI**4 Credits (3+3P)**

Introduction to analog and digital VLSI circuits implemented in CMOS technology. Design of differential amplifiers, opamps, CMOS logic, flip-flops, and adders. Introduction to VLSI fabrication and CAD tools. Recommended preparation is E E 260 and E E 380 or equivalent. Taught with E E 480 with differentiated assignments for graduate students. Crosslisted with: E E 480.

E E 512. ASIC Design**3 Credits (2+3P)**

This course provides students with experiential knowledge of modern application specific integrated circuits. Topics include ASIC packaging and testing, I/O pads and ESD, Verilog programming and simulation, FPGA verification, Register-transfer level synthesis, timing and area optimization, floorplanning and routing, digital interfaces, full custom and standard cell design, post-layout simulation, and PCB schematics and layout.

Prerequisite(s): E E 486 or E E 524.

E E 514. Biosensor Electronics**3 Credits**

Course provides students with knowledge of basic integrated analog and RF blocks and how to combine these circuits into sensory systems for biomedical applications. Target areas are in physiology, brain-machine interfaces, neural recording and stimulation. Lecture includes details on amplifiers, current-mode circuits, A/D converters, low-power radio transmitters and receivers, and simulation and layout of VLSI circuits. Lectures are in the form of recent paper reviews and discussion. Includes teamwork, written and oral communication, and realistic technical requirements. Pre/

Prerequisite(s): E E 486 OR E E 524.

Corequisite(s): E E 485 OR E E 523.

E E 515. Electromagnetic Theory I**3 Credits**

Electromagnetic theory of time-harmonic fields in rectangular, cylindrical and spherical coordinates with applications to guided waves and radiated waves. Induction and equivalence theorems, perturbational and variational principles applied to engineering problems in electromagnetics. Recommended preparation is E E 351 or equivalent. Restricted to: Main campus only.

E E 516. Electromagnetic Theory II**3 Credits**

Continuation of E E 515.

E E 518. Integrated Power Management Circuits**3 Credits**

Design and analysis of power management integrated circuits, including linear voltage regulators, voltage references, buck, boost, and buck-boost DC-DC converters, and charge pumps. Extensive use of CAD tools are used to simulate these circuits. Pre/

Prerequisite(s): E E 486 or E E 524.

Corequisite(s): E E 485 or E E 523.

E E 519. RF Microelectronics**3 Credits**

Knowledge of modern Radio Frequency CMOS integrated circuits, Basic Concepts in RF Design, Communication Concepts, Transceiver Architectures, Low Noise Amplifiers, Mixers, Passive Device in RF Designs, Oscillators, Phase-Locked Loops, Frequency Synthesizers, Power Amplifiers, and State-of-the-art RF systems and applications.

Prerequisite(s): E E 485 or E E 523.

E E 520. A/D and D/A Converter Design**3 Credits**

Practical design of integrated data converters in CMOS/BJT technologies, OP-AMPS, comparators, sample and holds, MOS switches, element mismatches. Nyquist rate converter architectures: flash, successive approximation, charge redistribution, algorithmic, two step, folding, interpolating, pipelined, delta-sigma converters. Restricted to: Main campus only.

Prerequisite(s): E E 523.

E E 521. Microwave Engineering**3 Credits**

Techniques for microwave measurements and communication system design, including transmission lines, waveguides, and components. Microwave network analysis and active device design. Recommended preparation is E E 351 or equivalent. Taught with E E 453 with differentiated assignments for graduate students. Restricted to: Main campus only.

E E 522. Advanced Analog VLSI Design**3 Credits**

Design of high-performance operational amplifiers; class-AB, rail-to-rail, low-voltage, high-bandwidth, fully-differential. Design of linear operational transconductance amplifiers, high-frequency integrated filters, four-quadrant multipliers, and switched-capacitor circuits.

Prerequisite(s): E E 523.

E E 523. Analog VLSI Design**3 Credits (2+3P)**

Analysis, design, simulation, layout and verification of CMOS analog building blocks, including references, opamps, switches and comparators. Teams implement a complex analog IC. Recommended preparation is E E 312 and E E 480 or equivalent. Taught with E E 485 with differentiated assignments for graduate students. Restricted to: Main campus only.

E E 524. Digital VLSI Design**3 Credits**

An introduction to VLSI layers. Static and dynamic logic design, memory circuits, arithmetic operators, and digital phase-locked loops. Taught with E E 486 with differentiated assignments for graduate students. Recommended foundation: E E 260 and E E 380.

E E 524 L. Digital VLSI Design Laboratory**1 Credit**

Simulation, schematic capture, layout, and verification using software tools of material presented in E E 524. An introduction to measurement of digital VLSI circuits. Taught with E E 486L with differentiated assignments for graduate students.

E E 525. Introduction to Semiconductor Devices**3 Credits**

Energy bands, carriers in semiconductors, junctions, transistors, and optoelectronic devices, including light-emitting diodes, laser diodes, photodetectors, and solar cells. Recommended preparation is E E 380 and E E 351. Taught with: E E 425 with differentiated assignments for graduate students.

E E 528. Fundamentals of Photonics**4 Credits (3+3P)**

Ray, wave and guided optics, lasers and thermal sources, radiometry, photon detection and signal-to-noise ratio. Elements of photonic crystals, polarization, acousto-optics, electro-optics, and optical nanostructures. Taught with E E 478 with differentiated assignments for graduate students. Recommended foundation: (PHYS 216 or PHYS 217) and E E/PHYS 473. Crosslisted with: PHYS 528.

E E 529. Lasers and Applications**4 Credits (3+3P)**

Laser operating principles, characteristics, construction and applications. Beam propagation in free space and fibers. Laser diode construction and characteristics. Hands-on laboratory. Recommended foundation: E E 351 or PHYS 461. Taught with: E E 479 with differentiated assignments for graduate students. Crosslisted with: PHYS 529

E E 530. Environmental Management Seminar I**1 Credit**

Same as CH E 530, C E 530, I E 530.

E E 531. Power System Modeling and Computational Methods**3 Credits**

Development and analysis of fast computational methods for efficient solution of large scale power-system problems. Algorithms for constructing the bus impedance matrix; sparse matrix techniques; partial- inverse methods; compensation of mutual coupling. Pre/ Restricted to: Main campus only.

Corequisite(s): E E 543.

E E 532. Dynamics of Power Systems**3 Credits**

Transient and dynamic stability of power systems; synchronous machine modeling and dynamics; prediction and stabilization of system oscillations. Recommended preparation is E E 493 or equivalent. Restricted to: Main campus only.

E E 533. Power System Operation**3 Credits**

AGC, economic dispatch, unit commitment, operations planning, power flow analysis and network control, system control centers. Recommended preparation is E E 493 or equivalent. Restricted to: Main campus only.

E E 534. Power System Relaying**3 Credits**

Fundamental relay operating principles and characteristics. Current, voltage, directional, differential relays; distance relays; pilot relaying schemes. Standard protective schemes for system protection. Operating principles and overview of digital relays. Recommended preparation is E E 493 or equivalent.

E E 537. Power Electronics**3 Credits (2+3P)**

Basic principles of power electronics and its applications to power supplies, electric machine control, and power systems. Recommended preparation is E E 314, E E 380, and E E 391. Taught with E E 432 with differentiated assignments for graduate students.

E E 541. Antennas and Radiation**3 Credits**

Basic antenna analysis and design. Fundamental antenna concepts and radiation integrals. Study of wire antennas, aperture antennas, arrays, reflectors, and broadband antennas. Recommended preparation is E E 351 or equivalent. Taught with E E 454 with differentiated assignments for graduate students. Restricted to: Main campus only.

E E 542. Power Systems II**3 Credits**

Analysis of a power system in the steady-state. Includes the development of models and analysis procedures for major power system components and for power networks. Recommended preparation is E E 391 or equivalent. Taught with E E 431 with differentiated assignments for graduate students. Restricted to: Main campus only.

E E 543. Power Systems III**3 Credits**

Analysis of a power system under abnormal operating conditions. Topics include symmetrical three-phase faults, theory of symmetrical components, unsymmetrical faults, system protection, and power system stability. Recommended preparation is E E 431 or equivalent. Taught with E E 493 with differentiated assignments for graduate students. Restricted to: Main campus only.

E E 544. Distribution Systems**3 Credits**

Concepts and techniques associated with the design and operation of electrical distribution systems. Recommended preparation is E E 542 and E E 543. Taught with E E 494 with differentiated assignments for graduate students.

E E 545. Digital Signal Processing II**3 Credits**

Non-ideal sampling and reconstruction, oversampling and noise shaping in A/D and D/A, finite word length effects, random signals, spectral analysis, multirate filter banks and wavelets, and applications. Recommended preparation is E E 395 or equivalent. Restricted to: Main campus only.

E E 546. Introduction to Smart Grid**3 Credits**

The course will serve as an introduction to the technologies and design strategies associated with the Smart Grid. The emphasis will be on the development of communications, energy delivery, coordination mechanisms, and management tools to monitor transmission and distribution networks. Taught with E E 426. Crosslisted with: C S 514.

E E 548. Introduction to Radar**3 Credits**

Basic concepts of radar. Radar equation; detection theory, AM, FM, and CW radars. Analysis of tracking, search, MTI, and image radar. Recommended preparation is E E 310, E E 351, and E E 496 or equivalent. Taught with E E 452 with differentiated assignments for graduate students. Restricted to: Main campus only.

E E 549. Smart Antennas**3 Credits**

Smart antenna and adaptive array concepts and fundamentals, uniform and planar arrays, optimum array processing. Adaptive beamforming algorithms and architectures: gradient-based algorithms, sample matrix inversion, least mean square, recursive least mean square, sidelobes cancellers, direction of arrival estimations, effects of mutual coupling and its mitigation. Taught with E E 449. Recommended foundation is E E 314 and E E 351.

E E 551. Control System Synthesis I**3 Credits**

An advanced perspective of linear modern control system analysis and design, including the essential algebraic, structural, and numerical properties of linear dynamical systems.

E E 552. Control System Synthesis II**3 Credits**

An overview of optimal controls for linear dynamical systems, analysis and design of control systems using Lyapunov techniques, control system design using semidefinite programming. An introduction to stochastic filtering and control.

E E 555. Advanced Linear Systems**3 Credits**

Advanced level study of linear systems and associated mathematical tools including linear equations, spectral theory, normal matrices, projections, quadratic forms, discrete and continuous time dynamical systems. Recommended preparation is MATH 480 or equivalent. Restricted to: Main campus only.

E E 563. Computer Performance Analysis I**3 Credits**

Issues involved and techniques used to analyze performance of a computer system. Topics covered include computer system workloads; statistical analysis techniques such as principal component analysis, confidence interval, and linear regression; design and analysis of experiments; queuing system analysis; computer system simulation; and random number generation. Recommended foundation: E E 210 and E E 363.

E E 564. Advanced Computer Architecture I**3 Credits**

Multiprocessor and distributed computer architectures; models of parallel computation; processing element and interconnection network structures, and nontraditional architectures. Recommended preparation is E E 363 or equivalent. Crosslisted with: C S573.

E E 565. Pattern Recognition and Machine Learning**3 Credits**

Statistical pattern classification, supervised and unsupervised learning, feature selection and extraction, clustering, image classification and syntactical pattern recognition. Recommended preparation is E E 210 or equivalent probability and statistics and linear algebra courses.

E E 567. ARM SOC Design**3 Credits**

The course aims to produce students who are capable of developing ARM-based SoCs from high level functional specifications to design, implementation and testing on real FPGA hardware using standard hardware description and software programming languages.

Prerequisite(s): C+ or higher in E E 512.

E E 569. Communications Network**3 Credits (2+3P)**

Introduction to the design and performance analysis of communications networks with major emphasis on the Internet and different types of wireless networks. Covers network architectures, protocols, standards and technologies; design and implementation of networks; networks applications for data, audio and video; performance analysis. Taught with E E 469. Recommended foundation is E E 162 and (E E 210 or STAT 371).

E E 571. Random Signal Analysis**3 Credits**

Application of probability and random variables to problems in communication systems, analysis of random signal and noise in linear and nonlinear systems.

E E 572. Modern Coding Theory**3 Credits**

Error control techniques for digital transmission and storage systems. Introduction to basic coding bounds, linear and cyclic block codes, Reed-Solomon codes, convolutional codes, maximum likelihood decoding, maximum a posteriori probability decoding, factor graphs, low density parity check codes, turbo codes, iterative decoding. Applications to data networks, space and satellite transmission, and data modems. Recommended foundation is E E 210 and E E 496.

E E 573. Signal Compression**3 Credits**

Fundamentals of information source encoding and decoding. Includes information theory bounds on source coding, lossless coding algorithms, scalar quantizing and vector quantizing.

Prerequisite: E E 571.

E E 577. Fourier Methods in Electro-Optics**3 Credits**

Linear systems theory, convolution and Fourier transformation are applied to one-dimensional and two dimensional signals encountered in electro-optical systems. Applications in diffraction, coherent and incoherent imaging, and optical signal processing. Recommended foundation: E E 312 and E E 528. Crosslisted with: PHYS 577

E E 578. Optical System Design**3 Credits**

Optical design software is used to study optical systems involving lenses, mirrors, windows and relay optics. Systems considered include camera lenses, microscopes and telescopes. Recommended foundation: E E/PHYS 473, E E/PHYS 528 and E E/PHYS 577. Crosslisted with: PHYS 578.

E E 581. Digital Communication Systems I**3 Credits**

Techniques for transmitting digital data over commercial networks. Topics include baseband and bandpass data transmission and synchronization techniques. Recommended foundation is E E 210, E E 314, and E E 496. Taught with E E 497.

E E 583. Wireless Communication**3 Credits**

Cellular networks, wireless channels and channel models, modulation and demodulation, MIMO, diversity and multiplexing, OFDM, wireless standards including LTE and WiMAX. Recommended foundation: E E 571 or equivalent.

Prerequisite(s): E E 314 or E E 571.

E E 584. Mathematical Methods for Communications and Signal Processing**3 Credits**

Applications of mathematical techniques from estimation theory, optimization principles and numerical analysis to the problems in communications and signal processing.

Prerequisites: E E 571 and E E 555 or knowledge of linear algebra.

E E 585. Telemetry Systems**3 Credits**

Covers the integration of components into a command and telemetry system. Topics include analog and digital modulation formats, synchronization, link effects, and applicable standards. Recommended preparation is E E 395, E E 496, and E E 497, or equivalent. Restricted to: Main campus only.

E E 586. Information Theory**3 Credits**

This class is a study of Shannon's measure of information and discusses mutual information, entropy, and channel capacity, the noiseless source coding theorem, the noisy channel coding theorem, channel coding and random coding bounds, rate-distortion theory, and data compression. Restricted to: Main campus only. Crosslisted with: MATH 509

Prerequisite(s): E E 571 or STAT 515.

E E 590. Selected Topics**1-9 Credits**

May be repeated for a maximum of 18 credits.

E E 593. Mobile Application Development**3 Credits**

Introduction to mobile application development. Students will develop applications for iOS devices including iPhone and iPad. Topics include object-oriented programming using Swift, model-view-controller (MVC) pattern, view controllers including tables and navigation, graphical user interface (GUI) design, data persistence, GPS and mapping, camera, and cloud and web services. Taught with E E 443 with differentiated assignments for graduate students. Recommended foundation is C++ or Java programming course. May be repeated up to 3 credits.

E E 596. Digital Image Processing**3 Credits**

Two-dimensional transform theory, color images, image enhancement, restoration, registration, segmentation, compression and understanding. Recommended foundation is E E 571. Taught with E E 446.

E E 597. Neural Signal Processing**3 Credits**

Cross-disciplinary course focused on the acquisition and processing of neural signals. Students in this class will learn about basic brain structure, different brain signal acquisition techniques (fMRI, EEG, MEG, etc.), neural modeling, and EEG signal processing. To perform EEG signal processing, students will learn and use Matlab along with an EEG analysis package that sits on top of Matlab. Taught with E E 447.

E E 598. Master's Technical Report**9 Credits**

Individual investigation, either analytical or experimental, culminating in a technical report. May be repeated for a maximum of 18 credits. Graded PR/S/U.

E E 599. Master's Thesis**15 Credits**

Thesis.

E E 600. Doctoral Research**1-15 Credits**

Research.

E E 615. Computational Electromagnetics**3 Credits**

The numerical solution of electromagnetics problems. Topics include differential equation techniques, integral equation methods, hybrid techniques, algorithm development and implementation, and error analysis. Particular algorithms, including FEM, finite differences, direct solvers, and iterative solvers, are studied.

E E 690. Selected Topics**1-9 Credits**

May be repeated for a maximum of 9 credits.

E E 700. Doctoral Dissertation**15 Credits**

Dissertation.

E S-ENVIRONMENTAL SCIENCE (E S)

E S 110G. Introductory Environmental Science**4 Credits (3+2P)**

Introduction to environmental science as related to the protection, remediation, and sustainability of land, air, water, and food resources. Emphasis on the use of the scientific method and critical thinking skills in understanding environmental issues.

E S 256. Environmental Engineering and Science**3 Credits**

Principles in environmental engineering and science: physical chemical systems and biological processes as applied to pollution control. Restricted to: Main campus, Alamogordo campus, Grants campus, Carlsbad campus. Crosslisted with: C E 256

Prerequisite(s): CHEM 111G and MATH 191G.

E S 256 L. Environmental Science Laboratory**1 Credit**

Laboratory experiments associated with the material presented in E S 256. Same as C E 256L.

Corequisite: E S 256.

E S 300. Special Topics**1-4 Credits**

Special subjects and credits to be announced in the Schedule of Classes. Consent of instructor required. Maximum of 4 credits per semester. Restricted to majors.

E S 301. Principles of Ecology**3 Credits**

A survey of ecology including general theory, the adaptations of organisms, population dynamics, species interactions, and the structure and function of natural communities and ecosystems. Crosslisted with: BIOL 301

Prerequisite(s): BIOL 111G, A ST 311, and grade of C or better in MATH 191G or Math Placement Exam score adequate to enroll in mathematics courses beyond MATH 191G.

E S 312. Emergency Response to Hazardous Material Incidents**2 Credits**

EPA approved Environmental Response Training Program Course 165.15. In compliance with OSHA 29 CFR 1910.120. Normally taken during last year of study. Same as E T 312 and WERC 312.

Prerequisite: consent of instructor.

E S 330. Environmental Management Seminar I**1 Credit**

Restricted to: Main campus only. Crosslisted with: A EN 330, C E 330, E E 330, I E 330, M E 330, WERC 330 and CH E 330.

E S 361. Basic Toxicology**3 Credits**

BIOL 110G or BIOL 190 recommended. Same as TOX 361.

Prerequisite: CHEM 110G, CHEM 112G, or CHEM 114.

E S 370. Environmental Soil Science**3 Credits**

Continuation of SOIL 252 that emphasizes soil properties and processes that directly relate to environmental pollution problems. Same as SOIL 370.

Prerequisite: SOIL 252.

E S 391. Internship**3 Credits**

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. Maximum of 3 credits toward a degree. Consent of Instructor required. S/U Grading (S/U, Audit).

E S 422. Environmental Chemistry**3 Credits**

Chemistry of organic and metal ion pollutants in the environment and principles important to their remediation including bioremediation. Restricted to: Main campus only. Crosslisted with: CHEM 422

Prerequisite(s): CHEM 112G and either CHEM 211 or CHEM 313.

E S 423. Environmental Toxicology**3 Credits**

Toxicological tests required by the EPA to determine human and environmental safety of pesticides and industrial pollutants; discussion of environmental fate of major pesticide classes and industrial pollutants. Crosslisted with: TOX 423

Prerequisite(s): TOX 361 or TOX 461.

E S 430. Environmental Management Seminar II**1 Credit**

Survey of practical and new developments in environmental management field, hazardous and radioactive, waste management, and related health issues, provided through a series of guest lectures and reports of ongoing research. Restricted to: Main campus only. Crosslisted with: C E 430, CH E 430, E E 430, E T 430, I E 430 and WERC 430

E S 434. Aquatic Contaminants and Toxicology**4 Credits**

Basic principles and methodologies of aquatic toxicity testing. Routes of exposure and modes of action. Environmental legislation and ecological risk assessment. Crosslisted with: WLSC 434

Prerequisite(s): Senior standing or consent of instructor.

E S 449. Special Problems**1-3 Credits**

Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and 6 credits toward a degree. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: E S majors.

E S 451. Special Topics**1-4 Credits (1-4)**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.

E S 452. Geohydrology**4 Credits (3+2P)**

Origin, occurrence, and movement of fluids in porous media and assessment of aquifer characteristics. Development and conservation of ground water resources, design of well fields. Crosslisted with: C E 452 and GEOL 452.

Prerequisite(s): Junior or Senior.

E S 459. Aquatic Ecology**4 Credits**

Ecological functions of plant and animal communities in aquatic ecosystems with emphasis on chemical and physical properties, productivity, species interactions, population dynamics, and concepts for diagnosing problems and restoring aquatic ecosystems. Crosslisted with: WLSC 459

Prerequisite(s): (E S, WLSC or BIOL 301), CHEM 112G, (MATH 142G or MATH 191G).

E S 460. Introduction to Air Pollution**3 Credits**

An introduction to the physics and chemistry of tropospheric air pollution including sources of air pollution, local and long-range transport, instrumentation, regulatory requirements, control technology.

Prerequisite(s): PHYS 215G, CHEM 112G, MATH 191G.

E S 462. Sampling and Analysis of Environmental Contaminants**3 Credits (1+6P)**

Theory, application, methodology, and instrumentation used in the sampling and analysis of environmental contaminants. Same as ENVE 462.

Prerequisite(s): E S 256.

E S 470. Environmental Impacts of Land Use and Contaminant Remediation**3 Credits**

The course will cover the integrated assessment of soil erosion, contaminant transport in soil and water, and contaminant remediation from site scale to watershed scales. Understanding of the controlling factors for each type land use impact will be gained through the use of risk assessment, case studies, and computer modeling. Case studies will illustrate the processes under various environmental applications. This course will also cover the application of solute transport principles and methods for the remediation of contaminated soil and groundwater. It will also discuss the contaminated site characterization, monitoring, and remediation design. Discussions of innovative methodologies will be supported with case studies. Crosslisted with: WSAM 470.

Prerequisite(s): E S 256, E S 462, E S 370.

E S 485. Materials from Biorenewable Resources**3 Credits**

Types, sources, composition and properties of biomass. Production, processing, and applications of biomass materials with energy, water, cost, sustainability, and waste management considerations. Crosslisted with: AGRO 485, HORT 486, SOIL 485 and CHME 485.

Prerequisite(s): CHEM 211 or CHEM 313 or permission of instructor.

E S 596. Masters Proposal**1 Credit**

Current research proposal written by masters level graduate students. Consent of Instructor required. Crosslisted with: AGRO 596, GENE 596, HORT 596 and SOIL 596. Restricted to: Masters HORT; Masters PLEN majors.

Prerequisite(s): Master level graduate students.

E S 599. Master's Thesis**1-15 Credits**

Thesis Graded: Thesis/Disertation.

E S 605. Arid Land Water Resources**3 Credits (2+2P)**

The course will cover various issues of relevance to water resources and water supply management within the Southwest US and other semiarid and arid regions. Discussions may include development and sustainability, climate change and drought, socioeconomic and cultural, and transboundary issues. Crosslisted with: WSAM605.

E S 696. Doctors Proposal**1 Credit**

Current research proposal written by PhD level graduate students. Consent of Instructor required. Crosslisted with: AGRO 696, HORT 696 and SOIL 696. Restricted to: Doctors PLEN majors.

Prerequisite(s): PhD level graduate students.

E S 700. Doctoral Dissertation**1-15 Credits**

Dissertation Graded: Thesis/Disertation.

E T-ENGINEERING TECHNOLOGY (E T)

E T 101. Introduction to Engineering Technology 1 Credit

The development of engineering technology, with an introduction to engineering technology, education, and practice. Graded S/U.

E T 104. Soldering Techniques 1 Credit

Fundamentals of soldering, desoldering, and quality inspection of printed circuit boards.

E T 106. Drafting Concepts/Computer Drafting Fundamentals I 4 Credits (2+4P)

Basic drafting skills, terminology, and visualization. Introduction to principles and fundamentals of computer-aided drafting. Community Colleges only. Same as DRFT 112.

Prerequisite: OECS 125, OECS 207, or consent of instructor.

E T 109. Computer Drafting Fundamentals 3 Credits (3+2P)

Crosslisted with: DRFT 109, C E 109 and SUR 109

E T 110. Introduction to 3-D Modeling (Solid Works) 3 Credits

Introduction to SolidWorks, a 3-D modeling software. The foundation for designing mechanical parts and assemblies. May be repeated up to 3 credits.

E T 120. Computation Software 2-3 Credits (2-3)

The use of spreadsheet software in the field of engineering technology.

E T 125. Introduction to Renewable Energy 3 Credits

Renewable energy systems, including topics in thermal-solar photovoltaic, wind, geothermal systems, and other current topics. Theory, practical applications, safety considerations and the economics of alternative renewable energy systems compared to conventional systems.

E T 153. Introduction to Computer Networks 3 Credits

Introduction to basic computer network fundamentals including International Open Systems Interconnect (OSI), the seven-layer model, and various networking hardware devices. Community Colleges only.

E T 154. Construction Methods and Communications 3 Credits

Blueprint reading, specifications, and introduction to materials used in construction.

E T 155. Network Operating Systems I 3 Credits (3+1P)

Introduction to a computer network operating system. May not be used as part of an E T degree program on main campus. Restricted to: Community Colleges only.

Prerequisite(s): E T 120 or E T 122.

E T 160. Basic Computer Operating Systems 3 Credits

Basics of the most commonly used computer operating systems, command line interface, file systems, file virtualization.

E T 182. Digital Logic 3 Credits

The use of truth tables, Boolean equations, and diagrams to define, simplify, and implement logic-valued functions.

E T 183. Applied DC Circuits 3 Credits (2+2P)

Application of Ohm's law, Kirchhoff's laws, Thevenin's, and Norton's theorems to the analysis of DC passive circuits. Embedded Lab. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 121G.

E T 183 L. Applied DC Circuits Lab 1 Credit

DC applied circuits lab. May be repeated up to 1 credits.

Corequisite(s): E T 183.

E T 184. Applied AC Circuits 3 Credits (2+2P)

Application of circuit laws and theorems to analysis of AC passive circuits. Resonant circuit, polyphase circuit and magnetic circuit topics are introduced. Embedded Lab. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 190G. **Prerequisite(s):** E T 183.

E T 184 L. Applied AC Circuits Lab 1 Credit

AC applied circuits lab May be repeated up to 1 credits.

Corequisite(s): E T 184.

E T 190. Applied Circuits 4 Credits (3+2P)

Application of Ohm's law, Kirchhoff's laws, and Thevenin's theorems to the analysis of AC and DC passive circuits. Electronic circuit topics are introduced. Embedded lab.

Prerequisite(s)/Corequisite(s): MATH 190G.

E T 191. Applied Circuits Laboratory 1 Credit

Applied Circuits Lab May be repeated up to 1 credits.

E T 200. Special Topics 1-3 Credits

Directed study or project. May be repeated for a maximum of 6 credits.

Prerequisite: consent of department head.

E T 203. Computational Foundations 3 Credits

Fundamental concepts of various proof techniques. These concepts will be applied to the use of computer algorithms, programming languages and other engineering and technology applications. May be repeated up to 3 credits.

Prerequisite(s): MATH 190G and E T 262.

E T 210. Intermediate 3-D Modeling (Solid Works) 3 Credits (2+2P)

Intermediate 3-D modeling. Applied modeling of techniques to prepare for SolidWorks certification (CSWA). May be repeated up to 3 credits.

Prerequisite(s): E T 110.

E T 217. Manufacturing Processes 3 Credits

Introduction to manufacturing and processing, including: casting, forming, and machining. Emphasis on creating products with the appropriate techniques. May be repeated up to 3 credits. Crosslisted with: I E 217.

Prerequisite(s)/Corequisite(s): E T 217L. **Prerequisite(s):** E T 110 and MATH 121G.

E T 217 L. Manufacturing Processes Lab**1 Credit**

Hands-on laboratory in machine shop to apply topics from E T 217, including: casting, forming, and machining. May be repeated up to 1 credits.

Prerequisite(s)/Corequisite(s): E T 217.

E T 220. Internship**1-6 Credits**

Internship requiring an approved number of hours of varied and progressive experience in the field of study. The scope and other requirements of the internship are stated in an individualized syllabus and through a memorandum of understanding between the faculty mentor and the industry partner. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): E T 283.

E T 230. Introduction to Servo Systems**1 Credit**

Introduction to Servo Systems. Topics include uses of servos in the industry, servo types, loop gains and frequency response, software control systems, damping, feedback, encoders, synchros and resolvers. Restricted to Community Colleges campuses only.

Prerequisite(s): E T 246.

E T 240. Applied Statics**3 Credits**

Fundamental topics of applied statics, including force system analysis, equilibrium, free body diagrams, methods of joints and sections, distributed loads, friction, centroids, area moments, and shear and moment diagrams. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 235G or MATH 191G.

Prerequisite(s): PHYS 211G or PHYS 215G.

E T 241. Applied Dynamics**3 Credits**

The foundation for understanding particles and bodies in motion and the forces involved, including: projectile motion, Newton's Laws of Motion, conservation of energy, and impulse and momentum. May be repeated up to 3 credits.

Prerequisite(s): E T 240, (MATH 235 or MATH 191G).

E T 245. Computer Hardware Fundamentals**3 Credits (2+2P)**

Computer hardware fundamentals including architecture, interfacing, peripherals, troubleshooting, system upgrades, and maintenance. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

E T 246. Electronic Devices I**4 Credits (3+3P)**

Solid-state devices including diodes, bipolar-transistors, and field effect transistors. Use of these devices in rectifier circuits, small signal and power amplifiers. May be repeated up to 4 credits.

Prerequisite(s): E T 190 or E T 184.

E T 253. Networking Operating Systems II**3 Credits (3+1P)**

Introduction to a computer network operating system. May not be used as part of an E T degree program on main campus. Restricted to Community Colleges campuses only.

Prerequisite(s): E T 155.

E T 254. Concrete Technology**3 Credits (2+2P)**

Fundamentals of aggregates, Portland cement, and asphalt used in design and construction.

E T 255. Linux System Administration**3 Credits**

Introduction to Linux system administration.

Prerequisite(s)/Corequisite(s): E T 160.

E T 256. Networking Operating Systems III**3 Credits (3+1P)**

Introduction to a computer network operating system. May not be used as part of an E T degree program on main campus. Restricted to Community Colleges campuses only.

Prerequisite(s): E T 253.

E T 262. Software Technology I**3 Credits (2+2P)**

An introduction to computer programming concepts as applied to engineering technology. Includes basic logic design, algorithm development, debugging and documentation. History and use of computers and their impact on society. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): E T 182 or MATH 190G.

E T 272. Electronic Devices II**4 Credits (3+3P)**

Operational amplifiers, positive and negative feedback, computer aided circuit analysis. In addition circuits include integrator, differentiators and phase shift networks. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): MATH 235G or MATH 191G.

Prerequisite(s): E T 246.

E T 273. Fundamentals of Networking Communications I**4 Credits (2+4P)**

Introduction to networking basics, including computer hardware and software, electricity, networking terminology, protocols, LANs, WANs, OSI model, IP addressing, and design and documentation of basic network and structure cabling. Community Colleges only. May be repeated up to 4 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): E T 153.

E T 276. Electronic Communications**3 Credits (2+2P)**

Antennas, transmission devices, A-M and F-M transmission and detection, pulse systems, microwave systems.

Prerequisite(s): E T 246.

E T 277. Computer Networking I for IET**3 Credits (2+2P)**

Computer network design and applications for LAN to WAN, protocols, switches, bridges, routers, NT server, TCP/IP networks, network diagnostics, voice over IP, wireless networks, and the OSI layers from physical to transport. May be repeated up to 3 credits.

Prerequisite(s): E T 182.

E T 280. Introduction to Multimedia**3 Credits**

Introduction to video, audio and other digital presentation methods.

Prerequisite(s): E T 255.

E T 282. Digital Electronics**4 Credits (3+3P)**

Applications of digital integrated circuits, multiplexers, counters, arithmetic circuits, and microprocessors. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): (E T 190 or E T 184). **Prerequisite(s):**

E T 182.

E T 283. Hardware PC Maintenance**3 Credits (3+1P)**

Installing, configuring, troubleshooting, and maintaining personal computer hardware components.

Prerequisite(s): E T 120 or E T 122.

E T 284. Software PC Maintenance**3 Credits (3+1P)**

Installing, configuring, troubleshooting, and maintaining personal computer operating systems.

Prerequisite(s): E T 120 or E T 122.

E T 285. Principles of Security**3 Credits**

Examines the field of information security within a real-world context of issues faced by today's IT professionals.

Prerequisite(s): E T 283 or consent of instructor.

E T 286. Fundamentals of Security**3 Credits**

An overview of general security concepts for information technology systems.

Prerequisite(s): E T 283 or consent of instructor.

E T 287. PC Disaster and Data Recovery**3 Credits**

This course provides an overview of the various causes of personal computer data failure and methods to mitigate the loss of your personal computer data. The focus is on restoring your personal computer to full PC functionality and recovering lost and damaged files after one of these unforeseen problems. In addition, the course provides a means to lessen the impact of these inevitable events with the preparation of a disaster recovery plan.

Prerequisite(s): E T 120 or E T 122.

E T 290. Networking Wireless Communication**3 Credits (3+1P)**

This course provides an introduction to wireless networking and communications. Some of the topics covered are protocols, transmission methods, and IEEE 802.11 standards. Wireless LAN (WLAN) fundamentals, devices, and security, cellular telephony, broadband, and satellite communications.

Prerequisite: E T 273.

E T 291. PC Forensics and Investigation**3 Credits**

Introduction to computer forensics and investigative fundamentals. Topics include understanding computer forensic and investigation law and requirements, processing crime and incident scenes, and the extraction, preservation, analysis and presentation of computer-related evidence.

Prerequisite(s): E T 120 or E T 122.

E T 300. Special Topics**1-3 Credits**

Directed study or project. May be repeated for a maximum of 6 credits.

Prerequisite: consent of department head.

E T 302. Manufacturing Data Analysis**3 Credits**

Methods for analyzing data collected during manufacturing processes. Emphasis placed on production control utilizing results of statistical methods and design of experiments.

Prerequisite(s): MATH 235.

E T 305. Introduction to Product Design**3 Credits (2+3P)**

The process of designing an innovative product for a real customer.

Working through ideas, prototypes, 3-D models, concept validation, and entrepreneurship. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): E T 210, E T 217, and (COMM 265G or COMM 253G or AXED 201G or HON 265G). Restricted to: ET U,ET M,ET C,ET E majors.

E T 306. Fundamental and Applied Thermodynamics**3 Credits**

First and second laws, properties of substances, thermodynamic cycles including power generation and refrigeration. May be repeated up to 3 credits.

Prerequisite(s): CHEM 110G and E T 240 and (MATH 235G or MATH 191G) and ((PHYS 212G or PHYS 216G)and (PHYS 212GL or PHYS 216GL)).

E T 306 L. Thermodynamics Lab**1 Credit**

Applications of thermodynamic theory to lab devices. Practice in testing, instrumentation, and data collection. May be repeated up to 1 credits.

Prerequisite(s)/Corequisite(s): E T 306 and ((E T 184 201440) or (E T 190 201640)).

E T 308. Fluid Technology**3 Credits**

Application of basic principles of fluid mechanics to practical applied problems. May be repeated up to 3 credits.

Prerequisite(s): (MATH 235G or MATH 191G) and E T 240.

E T 308 L. Fluid Technology Lab**1 Credit**

Measurements in fluid statics, dynamics, and hydraulic systems. May be repeated up to 1 credits.

Prerequisite(s)/Corequisite(s): E T 308. Prerequisite(s): (MATH 235 or MATH 191G), E T 240.

E T 309V. Manufacturing: History and Technology**3 Credits**

The history of manufacturing, the technology on which it is based, and its impact on society.

E T 310. Applied Strength of Materials**3 Credits**

Application of principles of strength of materials to practical design and analysis problems. May be repeated up to 3 credits.

Prerequisite(s): (MATH 235G or MATH 191G) and E T 240.

E T 310 L. Applied Strength of Materials Lab**1 Credit**

Testing and analyzing the physical properties of materials. cursory review of Excel, PowerPoint, FEA, Instron machine, and testing standards. May be repeated up to 1 credits.

Prerequisite(s)/Corequisite(s): E T 310.

E T 312. Emergency Response to Hazardous Material Incidents**2 Credits**

Same as E S 312, WERC 312.

E T 314. Communications Systems I**3 Credits (3+2P)**

Circuits and devices used for transmission, reception, and processing of RF signals.

Prerequisite(s): E T 246 & MATH 190G.

E T 317. Advanced 3-D Modeling and Design**3 Credits**

Advanced 3-D modeling with current engineering design practices. Students will use SolidWorks add-ins such as CAMWorks, Product Data Management (PDM), and Model-Based Definition in conjunction with Geometric Dimensioning and Tolerancing (GD&T) practices. Students will have the opportunity to take the Certification SolidWorks Professional Exam (CSWP). May be repeated up to 3 credits. Consent of Instructor required. Restricted to: exlcude ET U,ET M,ET C,ET E majors.

Prerequisite(s): E T 210.

E T 324. Signal Processing and Filtering**4 Credits (3+3P)**

Application of digital and analog signal conversion models. Discrete time signals and systems. Time and frequency domain concepts. Presentation of Fourier and Z transforms. Application of analog and digital signal filtering with and without feedback. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): (MATH 236G or MATH 191G) and ((PHYS 212G or PHYS 216G) and (PHYS 212GL or PHYS 216GL)).

Prerequisite(s): E T 272.

E T 328. Kinematics of Machines**3 Credits (2+3P)**

Kinematic analysis of machine elements using linkages, cams, and gears. Applied design of mechanical systems using SolidWorks simulation and Excel modeling. May be repeated up to 3 credits.

Prerequisite(s): E T 210 and E T 241.

E T 332. Applied Design of Structures I**4 Credits (3+3P)**

An introduction to structural analysis and design. Use of various building codes for development of allowable and factored loads on structures. Allowable stress and strength design concepts for structural components using concrete and steel. Required use of computer software such as spreadsheets, databases, and self-developed programs and design aids.

Prerequisite(s): E T 310.

E T 339. Introduction to Digital Forensics and Incident Response**3 Credits (2+3P)**

Introduction to the skills required to perform digital forensics and incident response on Windows operating systems. Topics include: live response, evidence acquisition, Windows operating system artifacts, documentation and reporting. May be repeated up to 3 credits.

Prerequisite(s): E T 255.

E T 344. Microcomputer Systems**3 Credits (2+3P)**

Microcomputer and/or microcontroller systems applications and architectures with a software emphasis using programming languages.

Prerequisite(s)/Corequisite(s): E T 362. **Prerequisite(s):** E T 182 and MATH 190.

E T 354. Soil and Foundation Technology**4 Credits (3+3P)**

Fundamentals of investigation of soil properties and their importance in design, construction, and testing as related to buildings, roads, dams, and other structures. Design of foundations considering slope stability, bearing capacity and settlement. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): E T 310. **Prerequisite(s):** E T 254.

Restricted to: ET U,ET E,ET M,C,ET C majors.

E T 355. Site/Land Development and Layout**3 Credits**

Techniques, methods, and takeoffs for infrastructure layout, site plan design, grading, earthwork, utilities, road construction. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): DRFT 143 or DRFT 153.

E T 360V. Technology in Business and Society**3 Credits (2+2P)**

Examination of how technology affects business and society with specific attention to understanding the role of technical personnel and their interaction with nontechnical personnel.

E T 362. Software Technology II**3 Credits**

A continuation of topics from E T 262 that are directed toward more advanced software development. Topics include problem analysis, object oriented, structured logic, and development concepts. May be repeated up to 3 credits.

Prerequisite(s): E T 262 and MATH 190G.

E T 365. Building Utilities**3 Credits (2+3P)**

Basic design and code applications in plumbing and electrical systems for buildings.

Prerequisites: junior standing in E T.

E T 377. Computer Networking I**3 Credits (2+2P)**

Computer network design and applications for LAN to WAN, protocols, switches, bridges, routers, TCP/IP networks, network diagnostics, voice over IP, wireless networks, and the OSI layers from physical to transport. May be repeated up to 3 credits.

Prerequisite(s): E T 182 and MATH 190G.

E T 381. Renewable Energy Technologies**3 Credits**

Renewable energy systems, including topics in thermal-solar, photovoltaic, wind, geothermal systems, and other current topics. Theory, practical applications, safety considerations and the economics of alternative renewable energy systems compared to conventional systems. Crosslisted with: WERC 381

Prerequisite(s): MATH 121G.

E T 382. Solar Energy Technologies**3 Credits (2+3P)**

Solar energy technologies, including topics in passive, solar thermal, and photovoltaic systems. Theory, practical applications, safety considerations and the economics of solar renewable energy systems compared to conventional systems. Crosslisted with: WERC 382

Prerequisite(s): MATH 121G.

E T 384. Wind and Water Energy Technologies**3 Credits**

Wind and Water energy technologies, including topics in small and large scale systems. Theory, practical applications, safety considerations and the economics of wind and water renewable energy systems compared to conventional systems. Crosslisted with: WERC 384.

Prerequisite(s): MATH 121G.

E T 386. Sustainable Construction and Green Building Design**3 Credits**

Sustainable Building materials, methods, and techniques including green architecture and design, codes, standards and specifications.

Prerequisite: MATH 121G.

E T 396. Heat Transfer and Applications**3 Credits (2+3P)**

Fundamentals of conduction, convection, and radiation heat transfer. Application of heat transfer, thermodynamics, and fluid mechanics principles to thermal system analysis and design. May be repeated up to 3 credits.

Prerequisite(s): E T 306 and E T 308 and PHYS 212G.

E T 398. Digital Systems**3 Credits (2+3P)**

Advanced analysis and design of digital systems using state machine logic, programming of logic devices, implementation and testing. Pre/
Prerequisite(s): E T 282 and MATH 190G.

Corequisite(s): E T 362.

E T 400. Special Topics**1-3 Credits**

Directed study or project. May be repeated for a maximum of 6 credits.

Prerequisite: consent of department head.

E T 401. Heating and Air-Conditioning Systems**3 Credits**

HVAC system design including heating and cooling load calculations, psychometrics, piping, duct layout, and system control. Same as M E 401.

Prerequisite: E T 306.

Corequisite: E T 396.

E T 402. Instrumentation**3 Credits (2+3P)**

Sensors/transducers, signal conditioning and transmission for measurement and control systems. Student project in an area of instrumentation and/or control is required. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): E T 396 or E T 398.

E T 410. Senior Seminar**1 Credit**

Transition from academics to business and industry. Graded S/U.

Prerequisite: senior standing in E T.

E T 412. Highway Technology**3 Credits**

Road-vehicle performance, geometric alignment, traffic analysis, highway materials, pavement design, and plan and profile development. May be repeated up to 3 credits.

Prerequisite(s): E T 354.

E T 415. Manufacturing Management and Productivity**3 Credits**

Projects incorporating concurrent engineering, total quality management, design for manufacturability/assembly, and other contemporary topics in manufacturing.

Prerequisites: senior standing in E T.

E T 418. Applied Hydraulics**3 Credits**

Introduction to hydrology, hydraulic equations, hydraulic cross-sections, control structures, and collection and distribution of water, wastewater, and storm runoff using closed conduit and open channel flow.

Prerequisite(s): E T 308.

E T 420. Senior Internship**1-6 Credits**

Internship requiring an approved number of hours of varied and progressive experience in the field of study. The scope and other requirements of the internship are stated in an individualized syllabus and through a memorandum of understanding between the faculty mentor and the industry partner. Taken in the senior year of program.

Prerequisites: Senior standing in E T.

E T 421. Senior Project**3 Credits**

Project in an area of civil engineering technology conducted under the direction of civil engineering technology faculty member. Project must be one that can be completed within a semester and of sufficient complexity for 3 credits. Taken last semester of program.

E T 426. Analysis and Design of Machine Elements**3 Credits (2+3P)**

Analysis and design of power transmission components, including: gears, sprockets, belts, chains, bearings, and shafts. Experiential design project using SolidWorks and Excel modeling. May be repeated up to 3 credits.

Prerequisite(s): E T 210, E T 241, and E T 310.

E T 432. Applied Design of Structures II**4 Credits (3+3P)**

Continuation of E T 332. Design of structural systems and study of their responses. Wood and masonry systems included. May be repeated up to 4 credits.

Prerequisite(s): E T 332.

E T 435. Senior Project**3 Credits (2+3P)**

Capstone course. Practical application of student's cumulative knowledge to an assigned design projects. Design principles, teamwork, and project management skills are stressed. Demonstration of written and oral communication skills via project documentation and presentation of results. Must be graduating senior. May be repeated up to 3 credits. Consent of Instructor required.

E T 439. Advanced Digital Forensics and Incident Response**3 Credits**

Advanced topics in digital forensics and incident response on Windows, Linux and Mac OS X and mobile devices. Topics include: Memory analysis, registry analysis, timeline analysis, malware analysis, Linux and Mac artifacts, mobile device forensics. May be repeated up to 3 credits.

Prerequisite(s): E T 339 and E T 377.

E T 440. Senior Design**2 Credits (1+2P)**

Team design of a system, mechanism, or model that will be fabricated or simulated during the following semester in E T 441. Pre/

Prerequisite(s)/Corequisite(s): E T 444 and E T 402. Restricted to: ET C,ET E,ET M,ET U majors.

E T 441. Senior Project**2 Credits (1+2P)**

Team fabrication or simulation, testing, and debugging of a system, mechanism or model designed in E T 440.

Prerequisite(s): E T 440.

E T 444. Hardware and Software Senior Design**3 Credits (2+3P)**

The design, development, implementation, documentation and formal demonstration of a microprocessor-based application to solve an engineering problem. Emphasis on microprocessor architectural concepts and software interfacing. A student project is required.

Prerequisite(s): E T 344 and E T 398.

E T 454. Advanced Construction Technology**3 Credits**

Contractor design and construction methods concerning formwork, special foundations, shoring, excavations, pilings, steel erection, and various material handling components.

Prerequisite: E T 354 and E T 355.

E T 455. Cost Estimating and Scheduling**3 Credits**

Methods and techniques in construction estimating including final bid preparation, construction planning and scheduling using various network methods and other techniques.

Prerequisite: junior or senior standing in E T.

E T 456. Applied Power Technologies**4 Credits (3+3P)**

Basic elements of modern power systems, energy sources, substation configuration, load cycles, and three-phase circuits. Students will gain experience in power factor correction, transmission line configurations and impedance, voltage regulation of transformers, and the per-unit system. Study of load flow, fault analysis, and economic operations is included. May be repeated up to 4 credits.

Prerequisite(s): (MATH 235 or MATH 191G) and E T 272 and ((PHYS 212G or PHYS 216G) and (PHYS 212GL or PHYS 216GL)).

E T 457. Information Security**3 Credits**

Introduction to information security concepts including penetration testing and ethical hacking.

Prerequisite(s): E T 362 and E T 339.

E T 458. Database Technology for Engineering**3 Credits**

MySQL and PHP. Data conversion using PHP, mysql and Python. Methods of transferring data from electronic boards and data feeds, into databases. Use of SQL in java programming. Remote programming of computers for running database systems in a mixed OS environment. Generation of web pages directly from Database queries.

Prerequisite(s): E T 362 and E T 160.

E T 462. Web Technologies and Multimedia**3 Credits**

Introduction to web technologies and multimedia. May be repeated up to 3 credits.

Prerequisite(s): E T 160.

E T 463. Advanced Linux and Python Scripting**3 Credits**

Advanced Linux Includes installation and maintenance of Unix/Linux/Windows versions of Python. Use of Python to solve numerous engineering problems including video and audio. Image manipulation. Using PostScript for image and typesetting development. Integration of C programming with Python.

Prerequisite(s): E T 255 and E T 362.

E T 464. Advanced Windows Server Administration**3 Credits**

Learn about configuration and maintenance of Microsoft Windows Server and related services such as DHCP, DNS, Failover Clusters, Active Directory, Group Policy, File Sharing, Microsoft SQL server, Microsoft Exchange Server, IIS, Network Load Balancing, Backups, Remote Administration, PowerShell scripting and more. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): E T 339. Prerequisite(s): E T 362.

E T 472. Intelligent Transportation Systems (ITS)**3 Credits**

Traffic flow theory, telecommunication and information technology application in transportation, system architecture and standards, transportation management, incident and emergency management, corridor management, dynamic route guidance, in-vehicle systems, and traffic signal timing. Consent of instructor required.

E T 477. Computer Networking II**3 Credits**

Advanced concepts in computer network design and applications including managing the campus network, virtual LANs (VLAN), network security, wireless networks, high-speed optical networks, and voice over IP. May be repeated up to 3 credits.

Prerequisite(s): E T 277 or E T 377.

E T 480. Innovation and Product Development**3 Credits**

Experiential product design and development. Students will learn about different types of innovation, business models, and methods for developing products. Students will apply the scientific method to develop a product idea of their own. Students will propose ideas, develop hypotheses, test hypotheses, and iterate until they have validated their product idea or identified a need to pivot. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s)/Corequisite(s): (COMM 265G or COMM 253G or AXED 201G or HON 265G).

E T 482. Advanced Manufacturing**3 Credits (2+2P)**

Fundamentals of computer aided manufacturing (CAM) and computer numerical control (CNC) machining. Students will learn how to program several variants of CNC machines, using both G/M code programming and computer aided manufacturing software. Emphasis will be on the effective design of parts to be made on CNC machines along with a hands on lab to give students experience on CNC machines. Students will individually design, manufacture, and keep items such as keychains, bottle openers, LED clocks, ergonomic handles, and license plates. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): E T 210 and E T 217.

E T 490. Selected Topics**1-3 Credits**

Selected topics in engineering technology and related areas.

Prerequisite: consent of instructor.

ECDV-ECONOMIC DEVELOPMENT (ECDV)

ECDV 550. Introduction to Local and Regional Development**3 Credits**

Serves as the introductory course in the Doctor of Economic Development program. Overview of the economic development field.

ECDV 590. Special Topics**1-3 Credits (1-3)**

Selected topics in the area of Economic Development. Subtitle reflects content. May be repeated up to 9 credits. Consent of instructor required.

ECDV 596. Individual Study**1-3 Credits (1-3)**

Individual studies directed by consenting faculty with the prior approval of the Department Head. May be repeated up to 6 credits.

ECDV 624. Seminar in Economic Development and the Public Sector**3 Credits**

Explores specific examples of the interaction of public finance and economic development. Students examine actual cases and examples of the use of public finance policy to influence economic development.

Prerequisites: AEEC 522 and AEEC 523.

ECDV 651. Economic Development Theory**3 Credits**

Builds upon a general understanding of microeconomic and macroeconomic theory to focus specifically on theories of economic development at all levels. **Prerequisites:** AEEC 501 and 502

ECDV 661. Regional Economic Modeling I**3 Credits**

Provides an introduction to the basic tools and methods of regional economic development analysis.

Prerequisite(s): AEEC 501, AEEC 502, and AEEC 540.

ECDV 662. Regional Economic Modeling II**3 Credits**

Continuation of ECDV 661 with focus on more advanced tools and methods of regional economic development analysis.

ECDV 664. Population Economics**3 Credits**

Examines the causes and consequences of demographic change. Examines theories of basic demographic processes, population projection and estimation. Consent of instructor required.

ECDV 668. Economic Development Finance**3 Credits**

Focuses on the tools and methods of economic development finance.

ECDV 670. Research in Economic Development**3 Credits**

Intense examination of the academic literature on economic development at all levels.

Prerequisites: ECDV 651, ECDV 661 and ECDV 662.

ECDV 671. Sustainable Economic Development**3 Credits**

Focuses on the interconnections between economic development and the environment. Provides a broad set of tools and ideas related to the impacts of human activities on the environment.

Prerequisites: AEEC 501, AEEC 502 and AEEC 540.

ECDV 673. Research Methods**3 Credits**

An overview of alternative research methods and tools. Students explore quantitative and qualitative research methods as alternatives and complements to statistical methods. Research design, ethics, and presentation are emphasized.

Prerequisites: AEEC 501, AEEC 502 and AEEC 540.

ECDV 681. Urban Economic Development**3 Credits**

Examines causes and consequences of economic change in urban and metropolitan areas. Covers both theory and tools for analysis.

Prerequisites: ECDV 651, ECDV 661 and ECDV 662.

ECDV 682. Rural Development**3 Credits**

Examines causes and consequences of economic change in rural areas, communities and small, open economies. Covers both theory and tools for analysis.

Prerequisites: ECDV 651, ECDV 661 and ECDV 662.

ECDV 683. Seminar in National Economic Development**3 Credits**

Explores specific examples and cases of rural and urban economic development. Involves applied analysis of specific rural and/or urban economic issues/projects.

Prerequisites: ECDV 681 and ECDV 682.

ECDV 685. Seminar in International Economic Development**3 Credits**

Explores specific examples and cases of economic development in an international context. Focuses on the application of theories and methods in prerequisite courses to the problems of nations lagging in economic development.

Prerequisites: AEEC 528, AEEC 520 or ECON 581.

ECDV 692. Seminar in Economic Development**3 Credits**

Seminars in selected topics in economic development. Subtitle reflects content. May be repeated up to 9 credits.

Prerequisite: Completion of at least nine semester hours of ECDV courses.

ECDV 694. Internship**1-9 Credits (1-9)**

Internship in Economic Development. May be repeated up to 9 credits.

Restricted to: ECDV majors. S/U Grading (S/U, Audit).

Prerequisite(s): Completion of core requirements of Doctor of Economic Development.

ECDV 699. Doctoral Project**1-9 Credits (1-9)**

Doctoral Project. May be repeated up to 9 credits. Completion of all DED coursework and successful completion of comprehensive exams.

ECED-EARLY CHILDHOOD EDUCATION (ECED)

ECED 115. Child Growth, Development, and Learning**3 Credits**

This basic course in the growth, development, and learning of young children, prenatal through age eight, provides students with the theoretical foundation for becoming competent early childhood professionals.

ECED 125. Health, Safety, and Nutrition**2 Credits**

This course provides information related to standards and practices that promote children's physical and mental well being sound nutritional practices, and maintenance of safe learning environments.

ECED 135. Family and Community Collaboration**3 Credits**

This beginning course examines the involvement of families and communities from diverse cultural and linguistic backgrounds in early childhood programs. Ways to establish collaborative relationships with families in early childhood settings is discussed.

Prerequisite(s): ECED 115 and ENGL 111G.

ECED 215. Curriculum Development Through Play**3 Credits**

The beginning curriculum course places play at the center of curriculum in developmentally appropriate early childhood programs. It addresses content that is relevant for children birth through age four and developmentally and culturally sensitive ways of integrating content into teaching and learning experiences. Information on adapting content areas to meet the needs of children with diverse abilities and the development of IFSP's and IEP's is included. Consent of instructor required.

Prerequisite(s): ECED 115 and ENGL 111G.

Corequisite(s): ECED 220.

ECED 220. Early Childhood Education Practicum I**2 Credits**

The beginning practicum course will provide experiences that address curriculum content that is relevant for children birth through age four in developmentally and culturally sensitive ways. Consent of instructor required.

Prerequisite(s): ECED 115 and ENGL 111G.

Corequisite(s): ECED 215.

ECED 225. Curriculum Development and Implementation II**3 Credits**

The second curriculum course focuses on developmentally appropriate curriculum content in early childhood programs, age 3 through third grade. Development and implementation of curriculum in all content areas, including literacy, numeracy, the arts, health and emotional wellness, science, motor and social skills, is emphasized. Information on adapting content areas to meet the needs of children with diverse abilities and the development of IEP's is included. Consent of instructor required.

Prerequisite(s): ECED 115, ENGL 111G.

Corequisite(s): ECED 230.

ECED 230. Early Childhood Education Practicum II**2 Credits**

The second field-based curriculum course focuses on practicing developmentally appropriate curriculum content in early childhood programs, age 3 through third grade. Consent of instructor required.

Prerequisite(s): ECED 115, ENGL 111G.

Corequisite(s): ECED 225.

ECED 235. Introduction to Language, Literacy and Reading**3 Credits**

This course is designed to prepare early childhood professionals for promoting children's emergent literacy and reading development. Through a developmental approach, the course addresses ways in which early childhood professionals can foster young children's oral language development, phonemic awareness, and literacy problem solving skills, fluency, vocabulary, and comprehension.

Prerequisite(s): ECED 115 and ENGL 111G.

ECED 245. Professionalism**2 Credits**

This course provides a broad-based orientation to the field of early care and education. Early childhood history, philosophy, ethics and advocacy are introduced. Basic principles of early childhood systems are explored. Multiple perspectives on early care and education are introduced. Professional responsibilities such as cultural responsiveness and reflective practice are examined.

ECED 255. Assessment of Children and Evaluation of Programs**3 Credits**

This basic course familiarizes students with a variety of culturally appropriate assessment methods and instruments, including systematic observation of typically and non-typically developing children. Crosslisted with: SPED 255

Prerequisite(s): ECED 115 and ENGL 111G.

ECED 265. Guiding Young Children**3 Credits**

This course explores various theories of child guidance and the practical applications of each. It provides developmentally appropriate methods for guiding children and effective strategies and suggestions for facilitating positive social interactions. Strategies for preventing challenging behaviors through the use of environment, routines and schedule will be presented.

ECED 270. Program Management**3 Credits**

Technical knowledge necessary to develop and maintain a quality early care and education program. The course will focus on sound financial management and vision, laws and legal issues that affect programs and state and national standards including accreditation requirements.

Prerequisite: consent of instructor.

ECED 275. Curriculum for Diverse Learners and Their Families**3 Credits**

Implementation of family-centered programming that includes developmentally appropriate and culturally responsive curriculum. The course will also cover the establishment and maintenance of healthy and safe learning environments. Consent of instructor required.

ECED 276. Effective Program Development for Diverse Learners and Their Families**2 Credits**

Practical experience in observing and carrying out the role of the director/administrator in the implementation of family-centered programming that includes individually appropriate and culturally responsive curriculum in a healthy and safe learning environment. Consent of instructor required. Restricted to ECED majors.

Corequisite(s): ECED 275.

ECED 280. Professional Relationships**3 Credits**

Development of staff relationships that will foster strong professional relationships with and among families, communities and advisory boards. Issues of staff recruitment, retention, support and supervision will lay a foundation for positive personnel management. Working effectively with board, advisory groups and community members and agencies will be addressed. Consent of instructor required.

Corequisite(s): ECED 281.

ECED 281. Professional Relationships Practicum**2 Credits**

Practical experience in the development of staff relationship that will foster professional relationships with families, communities and boards. Issues of staff recruitment, retention, support and supervision will lay a foundation for positive personnel management. Consent of instructor required. Restricted to ECED majors.

Corequisite(s): ECED 280.

ECED 315. Research in Child, Growth, Development and Learning**3 Credits**

This advanced course in child growth, development, and learning builds upon the foundational material covered in the basic course in child growth, development, and learning. An integration of major theories of child development is provided by focusing on contemporary research in all aspects of development, including bio-ecological, social-affective, cognitive, language, and the methodological aspects of research in early childhood development and education.

Prerequisite(s): ECED 115.

ECED 329. Early Primary Field Placement**2 Credits**

The field practicum is a co-requisite course with Teaching and Learning Reading and Writing; Teaching and Learning Math and Science; Teaching and Learning Social Studies, Fine Arts and Movement. The field based component will provide experiences that address curriculum content and practice teaching that is relevant for early primary children in developmentally and culturally sensitive ways. Graded: S/U.

Corequisite(s): ECED 440, ECED 445, RDG 350.

ECED 335. Family, Language and Cultural**3 Credits**

This course analyzes the interrelationships between family, language, and culture as connected to children's development and learning. In this course, language is understood as a human activity and higher mental process which build on the children's families, community and cultural background.

Prerequisite(s): ECED 135.

ECED 351. Emergent Literacy**3 Credits (2+2P)**

This advanced course is designed to prepare early childhood professionals to study literacy development, specifically oral language, writing and reading. This course focuses on children from birth through age 4, including children with special needs. Through a developmental approach, the course addresses: 1) recent theory and research that translates into practical strategies, assessment materials and preparation of rich literacy environments, 2) the socio-cultural contexts in which children develop literacy, 3) culturally, linguistically and developmentally appropriate literacy curricula, 4) processes used to determine the appropriateness of various literacy strategies, 5) assessment, evaluation, and accountability and 5) literacy leadership. Crosslisted with: RDG 351.

Prerequisite(s): ECED 235.

ECED 395. Special Topics**1-3 Credits**

Each course will be identified by a qualifying subtitle. A maximum of 3 credits in any one semester and a grand total of 6 credits.

ECED 420. Integrated Early Childhood Curriculum**4 Credits**

This advanced course focuses on developmentally appropriate content, learning environments, and curriculum implementation for children birth through age 4. It emphasizes integration of content areas (the arts, literacy, math, health/emotional wellness, science, social studies, motor, and adaptive living skills) and the development of rich learning environments for infants, toddlers, and preschool children.

Prerequisite(s): ECED 125, ECED 215, ECED 220, ECED 225, ECED 230, ECED 245, and ECED 265.

Corequisite(s): ECED 425.

ECED 425. Integrated Curriculum Practicum**2 Credits**

The advanced practicum course is a field based course that will provide opportunities for the integration of content areas (the arts, literacy, math, health/emotional wellness, science, social studies, motor, and adaptive living skills) and the development of rich learning environments for infants, toddlers, and preschool children.

Prerequisite(s): ECED 125, ECED 215, ECED 220, ECED 225, ECED 230, ECED 245, ECED 265.

Corequisite(s): ECED 420.

ECED 440. Teaching and Learning Math and Science**4 Credits (2+4P)**

Standards, principles, and practices in teaching mathematics and science to young children in preschool through grade 3. An emphasis is placed on developing a content-rich integrated math and science curriculum that focuses on children's development and interests, includes appropriate content, processes, environment, and materials with an emphasis on problem-solving as the major means of constructing basic concepts. Field experience required.

ECED 443. Assessment of Children and Evaluation of Programs**3 Credits**

Advanced course builds on understanding the connections among learning, teaching, and assessment and strategies for evaluating programs. Assessment, identification, and monitoring of typical and atypical development in the cognitive, motor, affective and social domains. Multiple and diverse assessment approaches, including responsiveness to cultural and linguistic differences will be emphasized. Builds upon indicators of competence established at the lower division (AA) level. For each course objective (core competency) students will demonstrate the indicators established for the bachelor s level.

ECED 452. Teaching Language Minority Children in Early Childhood**Settings****3 Credits**

Framework and strategies for the educational development of young language-minority children.

ECED 455. Teaching and Learning Social Studies, Fine Arts and**Movement****3 Credits (2+2P)**

The course focuses on the aims, scope, and integration of methods of teaching social studies, the fine arts and movement across the curriculum. This course emphasizes an integrated approach to teaching the what and why of social studies; assessing student learning; planning units, lessons, and activities; effective instructional strategies; and knowledge of social studies content. Concepts of expressive art include the visual arts, music, movement and drama.

Corequisite(s): ECED 440, ECED 329, RDG 350.

ECED 458. Field Experience (Infants Pre-K)**1 Credit**

Supervised field experiences in early childhood settings: infants, toddlers, and pre-K programs. Graded S/U.

ECED 459. Field Experience (K-3)**1 Credit**

Supervised field experiences in early childhood settings: public school programs K 3. Graded S/U.

ECED 465. Advanced Caregiving for Infants and Toddlers**3 Credits**

The advanced field-based course is intended to assist students to define and implement advanced elements of quality programming for all infants, toddlers in safe, healthy, responsive caring environments. The experiences in the approved setting will support strong nurturing relationships, cultural competence, diverse learning needs and styles of every child, appropriate guidance techniques and partnership with the families, cultures, and community represented. Students are assisted through the course in advancing their ability to observe, discuss, and implement elements of quality programming for infants and toddlers in home, small-group or whole-group care situations. Crosslisted with: SPED 465

ECED 470. Student Teaching/Seminar**6 Credits**

Provides student teaching experience in a variety of settings with young children ages birth 8.

ECED 479. Curriculum in Early Childhood Education**3 Credits**

Development and implementation of curriculum and materials for teaching young children.

ECED 489. Topics**3 Credits**

Offered under various subtitles which indicate the subject matter to be covered. May be repeated three times for a maximum of 9 credits.

ECED 510. Issues in Early Childhood Education**3 Credits**

Examines current trends and problems through readings of theoretical, empirical, and applied literature.

ECED 515. Working with Parents of Young Children**3 Credits**

Techniques for setting up home and classroom visitations, communicating with parents, and establishing special programs.

ECED 520. Seminar on Cognitive and Social Development**3 Credits**

In-depth study of developmental theories: Piaget, Kohlberg, Bruner, and Erikson. Implications for development of preschool programs and teaching techniques.

ECED 530. Leadership and Advocacy in Early Childhood**3 Credits**

The course explores a multidisciplinary approach to early childhood educational leadership, advocacy and change. The course focuses on leadership in its many forms: in teaching, administration, policy, research, and ethics. In addition, we will examine the theory and practice of change to gain an understanding of what contributes to advocating for policy and community change. Students will gain a deeper understanding of themselves as leaders, and ways to improve early education to promote social justice in programs and systems serving families and young children.

ECED 570. Play in the Early Childhood Curriculum**3 Credits**

Advanced exploration of the development of curriculum based on children's play. A means of exploring and learning the patterns of human living, communications, and experiences congruous with developing interests and capacities. Restricted to majors. Same as ECED 451 with differentiated assignments for graduate students.

ECED 612. History and Philosophy of Early Childhood Education**3 Credits**

Critical analysis of the historical development and philosophical underpinnings of the field of early childhood education as it relates to current practice. Restricted to doctoral-level students of any major.

ECED 614. Early Childhood, Communities, and Social Policy**3 Credits**

Early childhood politics and policy taken from a global, national, state, and community context. Restricted to doctoral-level students of any major.

ECED 633. Praxis and Reflexivity**3 Credits**

Same as BIL 633, EDUC 633, RDG 633, EDLT 633.

ECED 698. Selected Topics in Early Childhood Education**1-6 Credits**

Offered under various subtitles. May be repeated for a maximum of 6 credits. Restricted to doctoral-level students of any major.

ECON-ECONOMICS (ECON)

ECON 201G. Introduction to Economics**3 Credits**

Economic institutions and current issues with special emphasis on the American economy.

ECON 251G. Principles of Macroeconomics**3 Credits**

Macroeconomic theory and public policy: national income concepts, unemployment, inflation, economic growth, and international payment problems.

ECON 252G. Principles of Microeconomics**3 Credits**

Microeconomic theory and public policy: supply and demand, theory of the firm, market allocation of resources, income distribution, competition and monopoly, governmental regulation of businesses and unions.

ECON 304. Money and Banking**3 Credits**

Income measurement and determination, monetary and fiscal policies.

Prerequisite: ECON 251G or equivalent, or consent of instructor.

ECON 311. Intermediate Macroeconomic Theory**3 Credits**

Analysis of gross domestic product, the Classical, Keynesian, and Neo-Keynesian theories of income, employment, inflation and growth.

Prerequisite(s): ECON 251G or equivalent.

ECON 312. Intermediate Microeconomic Theory**3 Credits**

Contemporary economic theory with emphasis upon value and distribution.

Prerequisite(s): ECON 252G or equivalent.

ECON 324V. Developing Nations**3 Credits**

Economic analysis of problems related to development of developing nations. Issues such as growth, industrialization, poverty, population, international trade, foreign debt, and international economic relations.

ECON 325V. Economic Development of Latin America**3 Credits**

Economic analysis of problems related to development in Latin America, including the agrarian problem, debt and austerity programs, industrialization, inflation and unemployment, the drug trade, U.S.-Latin American relations, development strategies. Also individual countries problems.

ECON 332. Public Finance**3 Credits**

This course will examine the roles of government in modern, market-oriented, mixed economies. It will examine justifications for government participation in resource allocation, income distribution, and economic stabilization focusing primarily on the fiscal functions of government, taxation and public expenditure. Students will apply basic microeconomic analysis to analyze the impacts of public taxation and expenditures on economic decisions made elsewhere in the economy. In this course the emphasis will be on understanding the workings of public finance in fiscal federalist systems like the United States, but the principles taught will be applicable across other economic systems. Prerequisites: ECON 252

ECON 335V. Business and Government**3 Credits**

Relation of government to business through regulation; political, legal, and social implications. Crosslisted with: MGT 335G

ECON 336. Labor Economics**3 Credits**

This course aims at developing students' understanding of how the labor market works. Topics to be covered include: labor supply and demand, wage differentials, wage structure, unemployment, gender issues, labor market discrimination, and migration. May be repeated up to 3 credits.

Prerequisite(s): ECON 252G.

ECON 337V. Natural Resource Economics**3 Credits**

Same as AG E 337V.

Prerequisite: ECON 201 or ECON 252.

ECON 340. American Economic History**3 Credits**

The rise of big business and organized labor, increasing price rigidities, and growing government intervention. Same as HIST 340.

ECON 384V. Water Resource Economics**3 Credits**

Use of economic principles to evaluate current and emerging issues in water resources. Applications focus on use of economic methods of analysis to current policy decisions surrounding agricultural, municipal, industrial, and environmental uses of water. Same as AG E 384V.

Prerequisite: AG E 100 or ECON 252G.

ECON 401. Managerial Economics**3 Credits**

Application of economic theory to problems of business management.

Prerequisite(s): ECON 252G and MATH 142 or equivalent, or consent of instructor.

ECON 404. Collegiate Advisory Board, Federal Reserve**3 Credits**

Students serve on the Collegiate Advisory Board of the El Paso branch of the Federal Reserve Bank of Dallas. Guest speakers provide an overview of the Federal Reserve System, role of monetary policy, and issues facing specific industries in the local, national, and global economies. Students prepare reports, including a final paper, on an assigned industry in the regional or state economy and the current economic performance of their industry. Students must be of junior rank or higher with a GPA of at least 3.5. Consent of Instructor required.

ECON 405. Introductory Econometrics**3 Credits**

Multiple regression and correlation applied to economics and business; inference techniques; significance tests; simultaneous equations, estimation, and problems. May be repeated up to 3 credits.

Prerequisite(s): A ST 251G or STAT 251G or A ST 311 (or equivalent).

ECON 406. The Economics of Sports**3 Credits**

Applying the tools of economic analysis to a particular industry and gaining an in-depth knowledge of the interaction of professional sports teams and leagues with the economy and society. Same as AG E 406.

Prerequisites: one previous course in economics or consent of instructor.

ECON 432V. Economics of Health Care**3 Credits**

Analysis of the allocation of resources in the field of health and medical care.

ECON 449. Open Economy Macroeconomics**3 Credits**

This course studies theoretical and empirical macroeconomics in international dimension. It covers from the fundamental concepts of national income and growth, monetary/fiscal and exchange rate policies, foreign exchange markets, international trade and finance, and regionalization/economic integration to the impact analysis of these macroeconomic fundamentals in the open economy. Crosslisted with: I B 449.

Prerequisite(s): FIN 341 OR ECON 372.

ECON 450. International Economics**3 Credits**

Trade and capital flows between countries, international payments, government policy in balance-of-payments and tariff matters, international organizations. Crosslisted with: I B 450

Prerequisite(s): ECON 251G and ECON 252G.

ECON 457. Mathematical Economics**3 Credits**

Application of mathematical tools, especially the calculus, to economic theory.

Prerequisite: one upper-division economics course.

ECON 489. Senior Economics Seminar**3 Credits**

Seminar primarily for economics majors in their final semester. Provides an opportunity to apply economic theory to a broad variety of topics.

Prerequisite: ECON 371 or ECON 372.

ECON 490. Selected Topics**1-3 Credits**

Current topics in economics. Subject matter to be designated for each semester.

ECON 498. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with the prior approval of the department head. May be repeated for a maximum of 3 credits.

Prerequisite: junior or above standing and consent of instructor.

ECON 503. Managerial Economics**3 Credits**

Theory and application of microeconomics to the management of organizations.

Prerequisite(s): A ST 251G or 311 or equivalent with B or better.

ECON 545. Econometrics II**3 Credits**

Application of statistical techniques to estimation of economic relationships: demand functions, production and cost functions, and macroeconomic equations. May be repeated up to 3 credits.

Prerequisite(s): ECON 251G, ECON 252G, STAT 251G or A ST 311, and AEEC 540.

ECON 550. Special Topics**1-3 Credits**

Seminars in selected current topics in the various areas of economics.

Prerequisites vary according to the topic being offered.

ECON 571. Regulatory Policy and Industry Analysis: Electricity I**3 Credits**

Regulatory policy and economic analysis related to the Electric Industry.

Topics include: characteristics of a utility and legal justification for regulation; characteristics and functions of a regulatory commission; history and structure of the industry; technology and network design; revenue requirements; cost allocation; and basic retail rate design. May be repeated up to 3 credits.

Prerequisite(s): ECON 252G, FIN 341, or consent of instructor.

ECON 572. Regulatory Policy and Industrial Analysis: Water and Natural Gas**3 Credits**

Regulatory policy and economic analysis related to the Natural Gas and Water industries. Topics include: history and structure of the industry; technology and network design; revenue requirements; cost allocation; and retail rate design.

ECON 573. Regulatory Policy and Industry Analysis: Electricity II**3 Credits**

Regulatory policy and economic analysis related to the Electric industry. Topics include: optimal generation mix; ancillary services; environmental policies; rate case procedures and strategies for effective testimony; advanced retail rate design; wholesale exchanges; unbundled transmission tariffs; market institutions and how different markets function; state and federal deregulation policies; Federal Energy Regulatory Commission orders and policies; demand-side management; and regulatory treatment of non-traditional retail services. Consent of instructor required.

Prerequisite(s): ECON 571 or consent of instructor.

ECON 574. Advanced Seminar Regulatory Policy and Industry Analysis**3 Credits**

Advanced seminar and writing course specializing in regulatory policy and regulatory casework. Topics Include: special policy & regulatory issues in telecommunications, electricity, natural gas, and water; preparation of written testimony; expert witness effectiveness including cross-examination; and contested case management. This course involves extensive reading and writing assignments. Consent of instructor required.

Prerequisite(s): ECON 571 or consent of instructor.

ECON 581. International Economics**3 Credits**

Trade and capital flows between countries, international payments, government policy in balance-of-payments and tariff matters, international organizations. Recommended preparation, ECON 371 and 372. May be repeated up to 3 credits.

Prerequisite(s): ECON 251G and ECON 252G.

ECON 582. Economics of Health Care**3 Credits**

Analysis of the allocation of resources in the field of health and medical care. Taught with ECON 432V with differentiated assignments for graduate students.

ECON 596. Independent Study**3 Credits**

Individual study program. Each offering will cover a subtitle. Maximum of 3 credits in a semester and 6 credits in a program. Consent of instructor required.

EDLT-EDUCATION (EDLT)

EDLT 368. Integrating Technology with Teaching**3 Credits**

Considers impact of technology on communication and knowledge development; engages students in the design of technology-integrated lessons with a constructivist approach.

Prerequisite: EDUC 168 or previous computer experience.

EDLT 520. Critical Digital Literacy**3 Credits**

Explore, evaluate and use a variety of multimedia authoring tools including website, video, audio, image editing and apps (iOS/Android) for educational applications. Pre/

Prerequisite(s)/Corequisite(s): EDUC 518 or consent of instructor.

EDLT 522. Technology and Language Learning**3 Credits**

Use of technology to enhance second language and dual language programs. Organized around technology enhanced communicative and interactive language learning environments.

Corequisite: EDUC 587 or consent of instructor.

EDLT 528. Foundations of Learning Design & Technology**3 Credits**

This course covers how to access, use, design, and evaluate instructional resources on the Internet, for blended and online learning environments. Pre/

Prerequisite(s)/Corequisite(s): EDUC 518 or consent of instructor.

EDLT 529. Developing and Managing Educational Networks**3 Credits**

For educators who plan to manage technology resources in schools. Focus on operating systems, network capabilities and management, connections and transfer of files between different computer platforms and managing peripheral devices. Prerequisite(s)/

Corequisite(s): EDUC 518 or consent of instructor.

EDLT 560. Fostering Online Learning Communities**3 Credits**

Examines theoretical and practical aspects of communication and collaboration and their impact on the formation of online learning communities for those teaching adults in higher education, business, or government settings.

EDLT 561. Social Media in Blended and Online Learning Environments
3 Credits

This course will explore the role of social media in online and blended learning environments through practical hands-on activities, critical dialogue, and collaborative projects which will prepare you to utilize social media personally and pedagogically.

EDLT 572. Emerging Models for Learning Design and Technology
3 Credits

Applies instructional strategy development supported by technology for classroom curriculum.

EDLT 573. Culturally Responsive Teaching with Technology
3 Credits

Use of inquiry and problem-based learning supported by computer-based applications. Critical analysis of multiple forms of electronic media.

Prerequisite(s)/Corequisite(s): EDUC 518 or consent of instructor.

EDLT 574. Technology Planning and Grant Writing
3 Credits

Application of principles of curriculum development to the integration of technology to improve educational programs. How to develop technology plans, assess current uses of technology, write grants to acquire technology, improve the management of existing and future learning resources, and develop staff development strategies in technology.

EDLT 575. Designing and Organizing Online Learning Environments
3 Credits

Explores the theories, models, approaches, technologies, and methods of online teaching and adult learning. Provides a foundation for examining the roles and characteristics of the online teacher and learner for those teaching adults in higher education, business, or government settings.

EDLT 577. Online Teaching and Learning
3 Credits

This course provides a survey of theories, models and methods used to design and delivery online education through the use of technologies in K-12, higher education, business/industry, and continuing education.

EDLT 578. Design and Delivery of Webconferences and Webinars
3 Credits

This course provides hands-on experiences with web conferencing and examines the theory and research of webconferencing's impact on teaching and learning.

EDLT 579. Universal Design in Online Course Design
3 Credits

Examines theory, practical application of strategies, and global and policy implications of universal design (UD) in online learning environments.

EDLT 580. Tools and Techniques for Online Teaching
3 Credits

Examines the theoretical and practical implications of various asynchronous and synchronous tools and their impact on teaching and learning through research and hands-on experience.

EDLT 581. Emerging Technology Tools and Techniques
3 Credits

This course examines the theory, research, and practice of emerging technologies for educational practice and their impact on online teaching and learning.

EDLT 590. Assessing and Evaluating Online Learning
3 Credits

Explores a variety of online assessment and evaluation options with an emphasis on continual assessment and evaluation to improve teaching and learning.

EDLT 592. Directed Studies
3 Credits

Supervised academic work. Consent of Instructor required.

EDLT 607. Current Research in Learning and Technology
3 Credits

Explores models and methods for examining and researching the impact of technology on learning and education.

EDLT 610. Technology, Society, and Education
3 Credits

Same as EDUC 610.

EDLT 612. Advanced Fieldwork
3 Credits

Fieldwork in learning technologies provides opportunities to integrate theory and practice through research, teaching and/or development.

EDLT 620. Multimedia, Authoring and Curriculum Design
3 Credits

Explore, evaluate and use a variety of multimedia authoring tools including website, video, audio, image editing and apps (iOS/Android) for educational applications. Includes additional theoretical research component for doctoral students.

EDLT 628. Designing Educational Resources for the Internet
3 Credits

This course covers how to access, use, design, and evaluate instructional resources on the Internet, for blended and online learning environments. Includes a theoretical and research component for doctoral students.

EDLT 633. Praxis and Reflexivity
3 Credits

Same as BIL 633, ECED 633, EDUC 633, RDG, 633. Consent of Instructor required.

EDLT 672. Emerging Models for Learning Design & Technology
3 Credits

Integration of technology into content areas.

Prerequisite(s): EDUC 518.

EDLT 673. Literacy and Technology
3 Credits

Same as RDG 673, BIL 673.

EDUC-EDUCATION (EDUC)

EDUC 101. FRESHMAN ORIENTATION

1 Credit

Introduction to the university and to the College of Education. Discussion of planning for individualized education program and field experience. Restricted to Las Cruces campus only.

EDUC 102. Internship I

3 Credits

Supervised experience in elementary education settings.

EDUC 103. Internship in Bilingual Education/ESL

1-4 Credits

Supervised experience in bilingual education/ESL elementary or secondary classroom settings for prospective bilingual education/ESL teachers.

EDUC 150. Math for Paraprofessionals

3 Credits

Applied math skills for paraprofessionals working with children.

Prerequisite: CCDM 103.

EDUC 151. Math for Paraprofessionals II**3 Credits**

Applied math skills for paraprofessionals working under the direction of a teacher.

Prerequisite: EDUC 150.

EDUC 181. Field Experience I**1 Credit**

Introduction to public school teaching, school visits, classroom observations and discussion seminar.

EDUC 195. Individual Topics in Education**1-3 Credits**

Supervised study in a specific area of interest. Each course shall be designated by a qualifying subtitle. May be repeated for a maximum of 9 credits.

EDUC 202. Internship II**3 Credits**

Supervised experience in junior high settings.

Prerequisite: must be a co-op student.

EDUC 204. Foundations of Bilingual/ESL Education**3 Credits**

Explore and review the historical, legal, philosophical, theoretical and pedagogical paradigms of bilingual/ESL education.

EDUC 219. Pre-Teacher Preparation**3 Credits**

Assists students in developing the necessary competencies needed for acceptance to the Teacher Education Program. Course content includes basic skill development, test taking skills, and completion of teacher preparation packet. Maybe repeated for a maximum of 6 credits. Graded S/U. Community Colleges only.

EDUC 250. Introduction to Education**2 Credits**

An overview of the American education system with emphasis on organization, governance, law, demographics, and professional practice. Restricted to Las Cruces campus only.

EDUC 281. Introduction to Secondary Education and Youth**3 Credits**

Introductory course for students considering a career in secondary education. Includes historical, philosophical, and sociological foundations, program organization, critical dispositions, and understanding the context of schools and youth. Practicum required. Restricted to: Secondary Ed majors. Traditional Grading with RR.

EDUC 302. Internship III**3 Credits**

Student teaching in public school classroom according to major area of interest.

EDUC 303. Secondary Bilingual/ESL Field Experience**3 Credits (2+2P)**

Develop professional skills, dispositions, and understanding of secondary bilingual youth, content, and pedagogy through discussion seminar and interactions with public education mentor teachers. Focused observations, study of classroom language and culture, introduction to lesson planning and student assessment. Requires 32 hours of practicum field experience. Same as EDUC 381. Crosslisted with: EDUC 381.

EDUC 315. Multicultural Education**3 Credits (2+2P)**

The conceptual manifestations of culture, race and ethnicity, class, gender, sexual orientation, exceptionalities, language, bilingualism, and global citizenship within the schooling process. May be repeated up to 3 credits. Crosslisted with: EDUC 317V.

EDUC 317V. Multicultural Issues in Society**3 Credits**

Conceptual manifestations of culture, race, ethnicity, class, gender, exceptionalities, language, and bilingualism within and across society. Crosslisted with: EDUC 315.

EDUC 342. Sheltered English Instruction for the ESL Classroom**3 Credits**

Addresses the acquisition of English proficiency by speakers of other languages.

EDUC 343. Language, Literacy, and Culture in the ESL Classrooms**3 Credits**

Framework and strategies for developing the written abilities of second language learners.

EDUC 344. Issues in Schooling for Bilingual Learners**3 Credits**

Current thought and direction regarding bilingual education in the United States and New Mexico.

EDUC 381. Secondary Field Experience**3 Credits (2+2P)**

Develop professional skills, dispositions, and understanding of secondary bilingual youth, content, and pedagogy through discussion seminar and interactions with public education mentor teachers. Focused observations, study of classroom language and culture, introduction to lesson planning and student assessment. Requires 32 hours of practicum field experience. Same as EDUC 303. Crosslisted with: EDUC 303.

EDUC 395. Special Topics in Education**1-3 Credits**

Offered under various subtitles in the Schedule of Classes. May be taken for a maximum of 3 cr. per semester and a total of 6 credits overall.

EDUC 402. Internship IV**6 Credits**

Supervised co-teaching in educational setting according to major area of interest.

Prerequisite: must be a co-op student.

EDUC 450. Methods of Teaching Early Childhood Education**3 Credits**

Characteristics of the young child, play, guidance, communication, methods, materials, models, issues.

EDUC 451. Methods of Teaching Elementary School Science**3 Credits (2+2P)**

Methods and materials for teaching elementary school science. Includes components of lessons and the use of multimedia. Same as EDUC 551 with differentiated assignments for graduate students.

Prerequisites: 9 hours of science from biology, chemistry, physics, and earth sciences, with no more than 3 hours from any one department.

Corequisites: ECED 450, EDUC 452, and RDG 360 (Block A courses).

EDUC 452. Methods of Teaching Elementary School Mathematics
3 Credits (2+2P)

Content, theories of cognition, and instructional approaches for the teaching of mathematics in the elementary grades. Same as EDUC 552 with differentiated assignments for graduate students.

Prerequisite: MATH 111.

Corequisites: ECED 450, EDUC 451, and RDG 360 (Block A courses).

EDUC 453. Methods of Teaching Elementary School Language Arts
3 Credits (2+2P)

Implications of language acquisition and development for instructional practices. Focus on student-centered response to literature, writing process, whole language learning, based on socio-psycholinguistic theory and research. Same as EDUC 553 with differentiated assignments for graduate students.

Corequisites: RDG 361, EDUC 454, and EDUC 455 (Block B courses).

EDUC 454. Methods of Teaching Elementary School Social Studies
3 Credits (2+2P)

Focus on social studies curriculum and instruction including student-centered approaches, active learning, educational technology, nontextual curriculum, integration, multicultural education, authentic assessment, and practical applications. Same as EDUC 554 with differentiated assignments for graduate students.

Corequisites: RDG 361, EDUC 453, and EDUC 455 (Block B courses).

EDUC 460. Teaching Language Arts at the Middle and High School Level
3 Credits (2+2P)

Implications of cognition and language development for appropriate secondary instructional practices. Focus on construction of meaning, student-centered response to literature, writing process, print and oral language development, based on socio-psycholinguistic research and theory. Practicum required. Same as EDUC 560.

EDUC 461. Teaching Social Studies at the Middle and High School Level
3 Credits (2+2P)

Integrating content knowledge and pedagogy for the middle and high school teacher in social studies. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of social studies. Practicum required. Same as EDUC 561.

EDUC 462. Teaching Mathematics at the Middle and High School Level
3 Credits (2+2P)

Integrating content knowledge and pedagogy for the middle and high school teacher in mathematics. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of mathematics. Practicum required. Same as EDUC 562.

EDUC 463. Teaching Science at the Middle and High School Level
3 Credits (2+2P)

Integrating content knowledge and pedagogy for the middle and high school teacher in science. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of science for students in grades 6-12. Practicum required. Same as EDUC 563.

EDUC 464. Teaching Foreign Language at the Middle and High School Level
3 Credits (2+2P)

Integrating content knowledge and pedagogy for the middle and high school teacher in foreign language. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of foreign language for students in grades 6-12. Practicum required. Same as EDUC 564.

EDUC 467. Teaching Business Education at the Middle and High School Level
3 Credits (2+2P)

Integrating content knowledge and pedagogy for the middle and high school teacher in business education. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of business education for students in grades 6-12. Practicum required. Same as EDUC 567.

EDUC 470. Elementary Student Teaching
9 Credits (9)

Synthesis of knowledge and skills appropriate to teaching in elementary schools. Graded S/U.

EDUC 471. Secondary Student Teaching
9 Credits (9)

Synthesis of knowledge and skills appropriate to teaching in secondary schools. Graded S/U.

EDUC 475. Contemporary Issues in Education
3 Credits (2+2P)

Discussion of contemporary issues including: classroom management, motivation, conferences, professional organizations, professional ethics, community influences, cultural pluralism, reform movements, instructional influences, and educational technology. Requires field experience component in a school or community setting. Same as EDUC 575.

EDUC 480. International Student Teaching Seminar
1 Credit

Preparation for students planning to teach in an international setting.

Prerequisite: Must be scheduled one semester before graduation.

EDUC 481. Elementary Student Teaching Seminar
3 Credits (3)

Discussion of elementary school issues related to student teaching. Taken concurrently with EDUC 470. Graded S/U.

EDUC 482. Middle and High School Student Teaching Seminar
3 Credits (3)

Discussion of secondary school issues related to student teaching. Taken concurrently with EDUC 471.

EDUC 483. Second Language Acquisition
3 Credits

Exploring affective, cultural, linguistic, cognitive factors that influence the second-language-acquisition process with application to classroom practice. Same as EDUC 583.

EDUC 487. Methods of TESOL
3 Credits

Effective second language teaching approaches that provide for interactive learning situations, meaningful input language models, varied language use materials, adaptive teacher response strategies, and assessments of student processing needs.

EDUC 489. Topics
1-3 Credits

Offered under various subtitles which indicate the subject matter to be covered. A maximum of 3 credits in any one semester and a grand total of 3 credits.

EDUC 495. Directed Study Courses in Education
1-3 Credits

Each course shall be identified by a qualifying subtitle. Maximum of 3 credits in any one semester and a grand total of 6 credits.

EDUC 501. Special Topics**1-3 Credits**

Course subtitled in the Schedule of Classes. A maximum of 3 credits per semester and a total of 6 credits overall.

EDUC 504. Adult and Family Literacy in TESOL**3 Credits**

An exploration of the theoretical, programmatic, and curricular frameworks for English language learners and their families. Focus on the development of culturally responsive and pedagogically sound literacy programs. Same as RDG 504.

EDUC 505. Classroom Management**3 Credits**

Strategies for managing classroom settings and determining appropriate modification of instructional approaches to meet changing classroom situations.

EDUC 509. Teaching Methods Laboratory**3 Credits**

Practical application of previously learned content.

Prerequisite(s): Bachelors degree and admission to the Graduate School and departmental special program.

EDUC 510. Internship/Student Teaching**6 Credits**

Integrated with EDUC 509. Student is assigned to an elementary or secondary classroom for 14-16 weeks. Elementary or secondary. Graded S/U.

Prerequisite: EDUC 509.

EDUC 512. Equity Education for Mathematics Teachers**3 Credits**

This course is designed to increase teacher awareness and ability to address diverse students learning needs leading to success in mathematics. Same as EDUC 615.

Prerequisites: Have access to teach in a mathematics classroom with a diverse student population.

EDUC 515. Multicultural Education**3 Credits (2+2P)**

Conceptual manifestations of culture, race, and ethnicity, class, gender, exceptionalities, language and bilingualism within the schooling process. Same as EDUC 315 with differentiated assignments for graduate students.

EDUC 516. Curriculum and Pedagogy I**3 Credits**

Introduction, reconstruction, and other connections among historical, philosophical, sociocultural, psychological, and theoretical foundations of curriculum and pedagogy and their application to culturally and linguistically diverse teaching and learning settings.

EDUC 518. Technology and Pedagogy**3 Credits**

Critical analysis, design, and evaluation of computer-based technologies in teaching and learning for diverse communities.

EDUC 519. Research in Curriculum and Pedagogy**3 Credits**

An introduction to qualitative and quantitative designs for research in curriculum and instruction, with emphasis on action research.

EDUC 520. Action Research Projects**3 Credits**

Deeper explorations and connections among foundations of curriculum and pedagogy and their application to culturally and linguistically diverse teaching and learning settings through action research projects, approaches to assessment, and agency.

Prerequisite(s): EDUC 515, 516, 518 & 519.

EDUC 530. Exploration in Education**3 Credits (2+2P)**

Overview of elementary and secondary schooling. Includes opportunities to gain teaching experience in diverse settings.

EDUC 537. Independent Readings**1-3 Credits**

Each project will be designated by a qualifying subtitle.

EDUC 550. Methods of Teaching Early Childhood Education**3 Credits**

Characteristics of the young child, play, guidance, communication, methods, materials, models, issues. Same as EDUC 450 with differentiated assignments for graduate students.

EDUC 551. Methods of Teaching Elementary School Science**3 Credits (2+2P)**

Methods and materials for teaching elementary school science. Includes components of lessons, planning and teaching lessons in schools, and multimedia. Same as EDUC 451 with differentiated assignments for graduate students.

Prerequisites: 9 hours of science from biology, chemistry, physics, and earth science with no more than 3 hours from any one department.

Corequisites: ECED 550, EDUC 552, and RDG 560 (block A course).

EDUC 552. Methods of Teaching Elementary School Mathematics**3 Credits (2+2P)**

Content, theories of cognition, and instructional approaches for the teaching of mathematics in the elementary grades. Same as EDUC 452 with differentiated assignments for graduate students.

Prerequisite: MATH 111.

Corequisites: ECED 550, EDUC 551, and RDG 560 (block A course).

EDUC 553. Methods of Teaching Elementary School Language Arts**3 Credits (2+2P)**

Implications of language acquisition and development for instructional practices. Focus on student-centered response to literature, writing process, whole language learning, based on socio-psycholinguistic theory and research. Same as EDUC 453 with differentiated assignments for graduate students.

Corequisites: EDUC 554, EDUC 555, and RDG 561 (block B course).

EDUC 554. Methods of Teaching Elementary School Social Studies**3 Credits (2+2P)**

Focus on social studies curriculum and instruction including student-centered approaches, active learning, educational technology, nontextual curriculum, integration, multicultural education, authentic assessment, and practical applications. Same as EDUC 454 with differentiated assignments for graduate students.

Corequisites: EDUC 553, EDUC 555, and RDG 561 (block B course).

EDUC 557. Science and Math Methods: Internship**3 Credits**

Elementary alternative licensure process course designed to introduce intern licensed teachers to methods of instruction for mathematics and science. University supervision provided simultaneously with EDUC 557. Restricted to CI and HSS non-degree students.

EDUC 558. Social Studies/Language Arts Methods Internship
3 Credits

Elementary alternative licensure process course designed to introduce intern licensed teachers to methods of instruction of social studies and language arts. University supervision provided simultaneously with EDUC 558. Restricted to CI and HSS non-degree students.

EDUC 560. Teaching Language Arts at the Middle and High School Level
3 Credits (2+2P)

Implications of cognition and language development for appropriate secondary instructional practices. Focus on construction of meaning, student-centered response to literature, writing process, print and oral language development, based on socio-psycholinguistic research and theory. Practicum required. Same as EDUC 460 with differentiated assignments for graduate students. Prerequisite(s): TEP required EDUC 515 & EDUC 530.

EDUC 561. Teaching Social Studies at the Middle and High School Level
3 Credits (2+2P)

Integrating content knowledge and pedagogy for the middle and high school teacher in social studies. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of social studies for student in grades 6-12. Practicum required. Same as EDUC 461 with differentiated assignments for graduate students. Prerequisite(s): TEP required EDUC 515 & EDUC 530.

EDUC 562. Teaching Mathematics at the Middle and High School Level
3 Credits (2+2P)

Integrating content knowledge and pedagogy for the middle and high school teacher in mathematics. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of students in 6-12 setting settings for mathematics. Same as 462 with differentiated assignments for graduate students. Prerequisite(s): TEP required EDUC 515 & EDUC 530.

EDUC 563. Teaching Science at the Middle and High School Level
3 Credits (2+2P)

Integrating content knowledge and pedagogy for the middle and high school teacher in science. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of science for student in grades 6-12. Practicum required. Same as EDUC 463 with differentiated assignments for graduate students.

Prerequisite(s): TEP required EDUC 515 & EDUC 530.

EDUC 567. Teaching Business Education at the Middle and High School Level

3 Credits (2+2P)

Integrating content knowledge and pedagogy for the middle and high school teacher in business education. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of business education for student in grades 6-12. Practicum required. Same as EDUC 467 with differentiated assignments for graduate students.

Prerequisite(s): TEP required EDUC 515 & EDUC 530.

EDUC 575. Contemporary Issues in Education
3 Credits (2+2P)

Discussion of contemporary issues including: classroom management, motivation, conferences, professional organizations, professional ethics, community influences, cultural pluralism, reform movements, instructional influences, and educational technology. The class will require a field experience component in a school or community setting. Taught with EDUC 475 with differentiated assignments for graduate students.

EDUC 576. Qualitative Research
3 Credits

Introduction to qualitative research methodologies from problem formulation to interpretation of results.

EDUC 583. Second Language Acquisition
3 Credits

Exploring affective, cultural, linguistic, cognitive factors that influence the second-language-acquisition process with application to classroom practice. Appropriate for public school and adult educators. Same as EDUC 483.

EDUC 587. Pedagogy of TESOL
3 Credits

Overview of approaches that provide for interactive, culturally responsive pedagogy for students acquiring English. Emphasis on development of ESL literacy. Appropriate for public school and adult educators. Same as RDG 587.

EDUC 590. TESOL Practicum
3 Credits

Classroom applications of ESL literacy development through supervised teaching experiences accompanied by a seminar. Same as RDG 590.

EDUC 595. Directed Study Courses in Education
1-3 Credits

Each course will be identified by a qualifying subtitle. Maximum of 3 credits in any one semester and a total of 6 credits overall.

EDUC 598. Special Research Programs
1-3 Credits

Individual investigations either analytical or experimental. Maximum of 3 credits per semester and a total of 6 credits overall.

EDUC 599. Master's Thesis
15 Credits

Thesis.

EDUC 600. Doctoral Research
1-15 Credits

Research.

EDUC 601. Contemporary Curriculum/Instruction Practices
1-3 Credits

Course subtitled in the Schedule of Classes. A maximum of 3 credits per semester and a total of 6 credits overall.

EDUC 602. Internship in Curriculum and Instruction
3-6 Credits

For those pursuing an advanced graduate degree to meet the requirement for field work. Each course to bear an appropriate subtitle.

EDUC 603. Curriculum for a Diverse Society
3 Credits

Builds upon knowledge of the foundations of curriculum and professional experience in an educational setting. Focus on the role of the curriculum leader in understanding curriculum theory, designing curriculum, and implementing curriculum in various settings.

EDUC 604. Pedagogy of Learning in a Diverse Society
3 Credits

Builds upon knowledge of the foundations of instruction and professional experience in teaching and learning. Focus on diverse theories of instruction with relevant practices in pluralistic settings and multicultural interactions of teaching and learning.

EDUC 605. Independent Study Topics**1-3 Credits**

A problem and seminar course for those pursuing an advanced graduate degree. Course subtitled in the Schedule of Classes.

Prerequisite: EDUC 535.

EDUC 606. In-depth Interviewing: A Qualitative Research Method**3 Credits**

Use of pilot research project to introduce students to in-depth interviewing techniques.

EDUC 607. Current Research in Educational Practice**3 Credits**

A seminar for doctoral and education specialist students emphasizing current research and educational practices. Same as BIL 607, ECED 607, RDG 607, and SPED 607.

EDUC 608. Issues in Multicultural Curriculum and Instruction and Teacher Education**3 Credits**

Builds upon multicultural theories and practices of teacher education. Restricted to doctoral-level students of any major.

EDUC 613. Evaluation of Quantitative Research in Education**3 Credits**

A doctoral-level exploration of a broad range of quantitative research designs and methodologies for collection and analysis of data as applied to critical review of the literature.

Prerequisite(s): EDUC 519 or the equivalent.

EDUC 623. Curricular Mediation for Democratic Communities**3 Credits**

Problematization of the various relationships, roles, and leadership considerations which emerge within educational institutions, their structures, and their culturally democratic practices in the classroom, community, and society. Restricted to doctoral-level students of any major. Same as BIL 623, ECED 623.

EDUC 630. Critical Race Theory & Storytelling in Educational Spaces**3 Credits**

An upper-level doctoral course focusing on the philosophical, theoretical, and methodological origins and practices of CRT and the sister frameworks that emerged from CRT, i.e., AsianCrit, BlackCrit, FemCrit, LatCrit, QueerCrit, TribalCrit, and WhiteCrit within educational spaces.

EDUC 633. Praxis and Reflexivity**3 Credits**

Same as BIL 633, ECED 633, EDLT 633, RDG 633.

EDUC 634. Research as Praxis**3 Credits**

Alternative community-or-school-based research aimed at investigating and transforming educational realities, with the participants for their own benefit. Students will experience the dynamic between research theory and practice in education. Crosslisted with: BIL 634, EDLT 634 and RDG 634. Restricted to: EDUC,C I,C ID majors.

Prerequisite(s): EDUC 576 and 613.

EDUC 635. Critical Theory and Pedagogy**3 Credits**

Covers the various schools of thought on pedagogy, the historical and philosophical foundations embedded in these schools, and their impact on educational settings. Restricted to doctoral-level students of any major. Same as BIL 635.

EDUC 637. Social Justice Issues in Education**3 Credits**

Covers the systems of oppression located within the constructs of power and hegemony and their impact on schooling. Restricted to doctoral-level students of any major. Same as BIL 637.

EDUC 685. Practicum**2-6 Credits**

Provision for field inquiries and experiences designed to prepare the doctoral student for assuming responsibilities in the areas of curriculum and instruction.

Prerequisite: post-master's standing.

EDUC 694. Dissertation Seminar: Qualitative Research Designs**1-6 Credits**

Dissertation seminar course for doctoral students utilizing a qualitative research design. Restricted to College of Education students.

Prerequisite: consent of instructor.

EDUC 698. Selected Topics**1-6 Credits**

Offered under various subtitles which indicate the subject matter to be covered. A maximum of 6 credits per semester and a total of 6 credits overall.

EDUC 699. Ed.S. Thesis**1-15 Credits**

Offered primarily for those pursuing the research requirements for the Ed.S. degree. Course may be repeated up to a maximum allowed for this degree. Each research project will be designated by a qualifying subtitle.

EDUC 700. Doctoral Dissertation**15 Credits**

Dissertation.

ELA - EDUC LEADERSHIP & ADMIN (ELA)

ELA 215. Multicultural Leadership in Education**3 Credits**

Introduction to the social and cultural constructions of gender, class, and race. Students will critically apply theoretical constructs to everyday life and discuss the intersection of gender and race with class inequality in national and global contexts. Using a social justice framework, readings, and assignments integrate a variety of racial/ethnic groups while considering the effects of historically uneven resource distribution, unearned privilege, forms of domination and subordination, immigration status, and cultural representation and ideologies. Participants will learn how to apply the change theories and concepts introduced in the course to practice through course readings, online discussions with the instructor and colleagues, group work, active examination of daily practice in schools, and personal reflection.

ELA 255. Leadership and Change in Education**3 Credits**

This course will introduce students to the challenges and key strategies in initiating, implementing, and sustaining educational change and reform. In the first part of the course, participants will learn about the challenges of educational change in the United States and the role that they as school leaders play in facilitating change and reform. The course continues with an examination of how culture, micro-politics, and power structures support or impede national and global change initiatives. The last part of the course offers suggestions for change agents including community organizing, culture building, and embracing sustainable leadership practices. Participants will learn how to apply the change theories and concepts introduced in the course to practice through course readings, online discussions with the instructor and colleagues, group work, active examination of daily practice in schools, and personal reflection.

ELA 298. Special Topics in Education**1-3 Credits (1-3)**

Special topics course in education for undergraduate students. Course will be identified by a subtitle. May be repeated up to 12 credits. Restricted to Las Cruces campus only.

ELA 342. Current Issues In Educational Leadership**3 Credits**

This course addresses issues such as the rise in international education, education's costs, social media's role and influence, changes in state and national funding trends, student and faculty/staff diversity, among others. The focus of this course is centered on the actions and responses of administrators to the current issues they are facing.

ELA 350V. Introduction to Educational Leadership in a Global Society**3 Credits**

Multinational educational systems covered through knowledge of the U.S. system of education promoting critical leadership roles every citizen plays in the success of educational systems.

ELA 398. Special Topics in Education**1-3 Credits (1-3)**

Special topics course in education for undergraduate students. Course will be identified by a subtitle. May be repeated for a maximum of 12 credits.

ELA 411. Foundation for School Library Specialists**3 Credits**

Elements of librarianship. Introduction to the history, purpose, and role of the school library. Overview of current issues and legislation affecting school libraries. Same as ELA 511. May be repeated up to 3 credits.

ELA 412. Administration of the School Library**3 Credits**

Principles and practices related to the function, structure, and management of school libraries. Same as ELA 512. May be repeated up to 3 credits.

ELA 413. Curriculum Role of the School Library Specialist**3 Credits**

Introduction to the integration of curriculum in school library programs. Current trends in collaborative planning and teaching between the school librarians and teachers. Taught with ELA 513. May be repeated up to 3 credits.

ELA 414. Collection Management and Development in School Libraries**3 Credits**

Principles of identifying, selecting, acquiring, managing, and evaluating information for school libraries. Same as ELA 514. May be repeated up to 3 credits.

ELA 440. Management of Student Services**3 Credits**

History and overview of student services (e.g., admissions, counseling, registration, financial aid, housing, food services, student organizations) for early entry level positions. This course will provide students with an examination of foundations and principals of student services. Important theories and essential competencies needed in order to be successful will be explored through a social justice perspective of leadership.

ELA 450. Principles of Education Law and Policy**3 Credits**

Overview of the use of law and policy in schools and higher education. May be repeated up to 3 credits. Restricted to: E AD, majors.

ELA 455. Principles of Education Budgeting and Finance**3 Credits**

Analysis of budget and finance practices in education. Restricted to: EMD majors.

ELA 485. Elements of Research**3 Credits**

This course provides students with a foundation for understanding educational research. The course will also provide grounding in proper writing format for use in the education profession. Students will be introduced to various research paradigms and the symbiosis of theory and practice. Besides introducing students to the symbiosis of theory and practice, students will complete assignments and activities that demonstrate the use of that symbiosis. Ultimately, students will be able to use the knowledge they gain through the course to be able to critique educational research.

ELA 499. Internship**3 Credits**

The undergraduate Educational Leadership major requires that students complete two internships. Internships provide students with either experience working in an area of administration that is different from the student's regular job or experience conducting research for a program or project. Each internship placement site and scope of work is determined through consultation with the course instructor. Students must complete 120 hours of work with the selected internship site. May be repeated up to 6 credits. Restricted to: EL majors.

Prerequisite(s): Student must be an EL major and be within (at least) one year of graduation.

ELA 502. Special Problems.**1-3 Credits**

Offered under various subtitles which indicate the subject matter covered. May be taken for a maximum of 3 credits per semester and a total of 6 credits overall. May be repeated up to 6 credits. Consent of Instructor required.

ELA 511. Foundation for School Library Specialists**3 Credits**

Elements of librarianship. Introduction to the history, purpose, and role of the school library. Overview of current issues and legislation affecting school libraries. Same as ELA 411. May be repeated up to 3 credits.

ELA 512. Administration of the School Library**3 Credits**

Principles and practices related to the function, structure, and management of school libraries. Same as ELA 412. May be repeated up to 3 credits.

ELA 513. Curriculum Role of the School Library Specialist**3 Credits**

Introduction to the integration of curriculum in school library programs. Current trends in collaborative planning and teaching between school librarians and teachers. Same as ELA 413. May be repeated up to 3 credits.

ELA 514. Collection Management and Development in School Libraries**3 Credits**

Principles of identifying, selecting, acquiring, managing, and evaluating information for school libraries. Same as ELA 414. May be repeated up to 3 credits.

ELA 530. Management of Educational Change**3 Credits**

Leadership in implementing innovations in education. Consent of Instructor required.

ELA 531. Special Education Administration**3 Credits**

Competencies for the administration of special education programs with an emphasis upon New Mexico public school standards. Consent of Instructor required.

ELA 540. Management of Student Services in Higher Education**3 Credits**

History and overview of student services (e.g., admissions, counseling, registration, financial aid, housing, food services, student organizations) and a review of management components used in student services. Consent of Instructor required.

ELA 550. Higher Education Law**3 Credits**

This course is designed to review the impact of the legal process and the judiciary on higher education. Consent of Instructor required.

ELA 555. Higher Education Finance and Funding**3 Credits**

This course examines the impact and process of financing and funding higher education. Consent of Instructor required.

ELA 563. Higher Education Administration**3 Credits**

This course provides an overview of higher education in the United States including history, mission, and governance, in the context of organizational theory. Consent of Instructor required.

ELA 564. Internship Public Schools Part I**3 Credits**

First half of a practical internship in Pk-12 schools under supervision of school administrator. Consent of Instructor required. Restricted to: E AD majors.

Prerequisite(s): 18 cr. of ELA coursework, 3 years of Pk-12 teaching experience and consent of instructor.

ELA 565. Internship: Public Schools Part II**3 Credits**

Second half of a practical internship in Pk-12 administrative setting under supervision of experienced higher education administrator. Consent of Instructor required. Restricted to: E AD majors.

Prerequisite(s): ELA 564.

ELA 566. Internship: Higher Education Part I**3 Credits**

First half of practical internship in administrative setting under supervision of experienced higher education administrator. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: E AD majors.

Prerequisite(s): 15 credits of ELA coursework and consent of instructor.

ELA 567. Internship: Higher Education Part II**3 Credits**

Second half of a practical internship in an administrative setting under supervision of an experienced higher education administrator. Consent of Instructor required. Restricted to: E AD majors.

Prerequisite(s): ELA 566.

ELA 568. Topics in School Administration**1-3 Credits**

Designated by subtitle.

ELA 569. Basing Decision on Data: Higher Education.**3 Credits**

Analysis of accountability data and other evidence to support educational decision making. Disaggregating and interpreting assessment data to guide improvement of instruction. Moving from evidence to plans for action. Consent of Instructor required.
