TABLE OF CONTENTS

Las Cruces Academic Catalog	10
Welcome from the Chancellor	11
Administration	12
The History of the University	13
Programs A-Z	14
Areas of Interest	19
Applied and Clinical Health Sciences	19
Applied Social and Behavioral Sciences	19
Business	19
Communication, Media Study, and Creative Arts	19
Humanities and Social Sciences	19
Life Sciences	20
Physical Sciences and Engineering	20
Teacher Education	20
Essential Information for Students	21
Undergraduate Admissions	21
Transfer Undergraduate Students	23
International Undergraduate Students	24
Tuition, Fees, and Other Expenses	26
Financial Aid & Scholarship Services	28
Registration	30
Withdrawals	30
Resources for Students	30
Graduate Research Facilities	37
Military and Veterans Programs (MVP)	44
General Education Courses	47
Graduation Requirements	51
Recognition of Academic Achievement	51
Preprofessional Programs	51
Academic Programs	52
The NMSU System Academic Regulations	53
The Graduate School	77
College of Agricultural, Consumer, and Environmental Sciences	84
Agricultural and Extension Education	85
Agricultural and Community Development - Bachelor of Science in Agriculture	90
Agricultural and Extension Education - Bachelor of Science in Agriculture	90
Agricultural and Extension Education - Graduate Minor	91
Agricultural and Extension Education - Master of Arts	91

Agricultural and Extension Education - Undergraduate Minor	91
Agricultural and Natural Resource Leadership - Undergraduate Minor	91
International Agricultural Development and Extension - Graduate Minor	91
Agricultural Economics and Agricultural Business	91
Agricultural Business Management- Undergraduate Minor	96
Agricultural Economics - Master of Science	96
Agricultural Economics and Business - Bachelor of Science in Agriculture	97
Agriculture - Master of Agriculture	98
Agriculture - Master of Business Administration	98
Economic Development - Doctor of Economic Development	99
Natural Resource Economics - Undergraduate Minor	99
Natural Resource Economics and Policy - Bachelor of Science in Agriculture	100
Animal and Range Sciences	100
Agriculture - Master of Agriculture	108
Animal Science - Bachelor of Science in Agriculture	108
Animal Science - Doctor of Philosophy	110
Animal Science - Graduate Minor	111
Animal Science - Master of Science	111
Horse Management - Undergraduate Minor	111
Human Animal Interaction - Undergraduate Minor	112
Livestock Production - Undergraduate Minor	112
Ranch Management - Undergraduate Minor	112
Range Science - Bachelor of Science in Agriculture	112
Range Science - Doctor of Philosophy	113
Range Science - Graduate Minor	113
Range Science - Master of Science	113
Range Science - Undergraduate Minor	114
Entomology, Plant Pathology and Weed Science	114
Agricultural Biology - Bachelor of Science in Agriculture	117
Agricultural Biology - Master of Science	119
Entomology - Undergraduate Minor	119
Pest Management - Undergraduate Minor	119
Plant Pathology - Undergraduate Minor	119
Weed Science - Undergraduate Minor	119
Family and Consumer Sciences	120
Child Advocacy Studies (CAST) - Undergraduate Minor	129
Clothing, Textiles and Fashion Merchandising - Bachelor of Science in Family and Consumer Sciences	129

Clothing, Textiles and Fashion Merchandising - Undergraduate Minor	130	Hotel, Restaurant and Tourism Management - Undergraduate Minor	171
Culinary Science - Undergraduate Minor	130	Water Science and Management	171
Family and Child Science - Bachelor of Science in Family and Consumer Sciences	130	Applied Statistics - Graduate Minor	174
Family and Child Science - Undergraduate Minor	131	Geographic Information Science and Technology (GIS&T) - Graduate Minor	174
Family and Consumer Sciences - Master of Science	131	Water Science and Management - Doctor of Philosophy	174
Family and Consumer Sciences Education - Bachelor of Science in Family and Consumer Sciences	131	Water Science and Management - Master of Science	175
Food Science - Undergraduate Minor	132	College of Arts and Sciences	176
Food Science and Technology - Bachelor of Science in Food Science and Technology	132	Aerospace Studies	179
Human Nutrition and Dietetic Sciences - Bachelor of Science in Family and Consumer Sciences	133	Aerospace Studies - Undergraduate Minor	181
Nutrition - Undergraduate Minor	135	Anthropology	181
Fish, Wildlife and Conservation Ecology	135	Anthropology - Bachelor of Arts	188
Conservation Ecology - Bachelor of Science in Conservation Ecology	139	Anthropology - Master of Arts	189
Conservation Ecology - Undergraduate Minor	140	Anthropology - Undergraduate Minor	190
Fisheries and Wildlife Science - Bachelor of Science in Fish, Wildlife and Conservation Ecology	141	Archaeology - Graduate Minor	190
Fish, Wildlife and Conservation Ecology - Master of Science in Fish, Wildlife and Conservation Ecology	143	Cultural Resource Management - Graduate Certificate	190
Wildlife Science - Undergraduate Minor	144	Food Studies - Graduate Minor	190
General Agriculture	144	Museum Studies - Graduate Certificate	191
Plant and Environmental Sciences	145	Native American Studies - Graduate Minor	191
Agronomy - Bachelor of Science in Agriculture	156	Native American Studies - Undergraduate Minor	192
Agronomy - Undergraduate Minor	157	Religious Studies - Undergraduate Minor	192
Environmental Science - Bachelor of Science in Environmental Science	157	Sustainable Development - Undergraduate Minor	193
Genetics and Biotechnology - Bachelor of Science in Genetics	158	Sustainable Development - Undergraduate Supplemental Major	193
Horticulture - Bachelor of Science in Agriculture	159	Art	193
Horticulture - Master of Science	162	Art - Bachelor of Arts	201
Horticulture - Undergraduate Minor	162	Art - Bachelor of Fine Arts	202
Plant and Environmental Science - Doctor of Philosophy	163	Art - Master of Arts	203
Plant and Environmental Science - Master of Science	163	Art - Master of Fine Arts	204
Soil Science - Bachelor of Science in Agriculture	163	Art - Undergraduate Minor	205
Soil Science - Undergraduate Minor	165	Art History - Undergraduate Minor	205
Turfgrass Science and Management - Bachelor of Science in Agriculture	166	Museum Conservation - Undergraduate Minor	205
Turfgrass Science and Management - Undergraduate Minor	167	Astronomy	206
School of Hotel, Restaurant and Tourism Management	168	Astronomy - Doctor of Philosophy	209
Hotel, Restaurant and Tourism Management - Bachelor of Science	170	Astronomy - Master of Science	209
		Astronomy - Undergraduate Minor	209
		Biology	211
		Biology - Bachelor of Arts	219
		Biology - Bachelor of Science	219
		Biology - Doctor of Philosophy	220
		Biology - Master of Science	220
		Biology - Undergraduate Minor	221

Conservation Ecology - Bachelor in Conservation Ecology	221	Criminal Justice	263
Conservation Ecology - Undergraduate Minor	223	Child Advocacy Studies - Undergraduate Minor	268
Genetics and Biotechnology - Bachelor of Science in Genetics	223	Criminal Justice - Bachelor of Criminal Justice	268
Genetics and Biotechnology - Undergraduate Minor	225	Criminal Justice - Master of Criminal Justice	269
Human Biology - Undergraduate Minor	225	Forensic Science - Undergraduate Minor	270
Microbiology - Bachelor of Science	226	Law and Society - Undergraduate Supplemental Major	271
Microbiology - Undergraduate Minor	226	Economics, Applied Statistics, and International Business	271
Chemistry and Biochemistry	226	Economics - Bachelor of Arts	273
Biochemistry - Bachelor of Science	232	Economics - Undergraduate Minor	274
Biochemistry - Undergraduate Minor	233	English	274
Chemistry - Bachelor of Arts	233	Creative Writing - Master of Fine Arts in Creative Writing	284
Chemistry - Bachelor of Science	233	Creative Writing - Undergraduate Minor	285
Chemistry - Doctor of Philosophy	234	English - Bachelor of Arts	285
Chemistry - Master of Science	234	English - Master of Arts	288
Chemistry - Undergraduate Minor	234	English - Undergraduate Minor	290
Environmental Chemistry - Undergraduate Minor	234	Literature - Undergraduate Minor	290
Communication Studies	235	Medieval and Early Modern Studies - Undergraduate Minor ...	291
Communication and National Security - Graduate Minor	238	Rhetoric and Professional Communication - Doctor of Philosophy	292
Communication and National Security - Undergraduate Minor	239	Rhetoric and Professional Communication - Undergraduate Minor	293
Communication Studies - Bachelor of Arts	239	Geography	293
Communication Studies - Graduate Minor	239	Geographic Information Science and Technology - Graduate Minor	298
Communication Studies - Master of Arts	239	Geographic Information Science and Technology - Undergraduate Minor	298
Communication Studies - Undergraduate Minor	240	Geography - Bachelor of Science	298
Computer Science	240	Geography - Master of Applied Geography	300
Algorithm Theory - Undergraduate Minor	248	Geography - Undergraduate Minor	300
Bioinformatics - Master of Science	248	Geological Sciences	300
Bioinformatics - Undergraduate Minor	249	Geology - Bachelor of Science	303
Computer Science - Bachelor of Arts	249	Geology - Master of Science	305
Computer Science - Bachelor of Science	251	Geology - Undergraduate Minor	306
Computer Science - Bachelor of Science/Master of Science	253	Government	306
Computer Science - Doctor of Philosophy	254	American Government and Politics - Undergraduate Minor	313
Computer Science - Graduate Minor	255	Comparative Politics - Undergraduate Minor	313
Computer Science - Master of Science	255	Contemporary Social Studies - Undergraduate Minor	313
Computer Systems - Undergraduate Minor	256	Government - Bachelor of Arts	313
Software Development - Undergraduate Minor	256	Government - Master of Arts	314
Creative Media	256	Government - Undergraduate Minor	314
Animation and Visual Effects - Bachelor of Creative Media	261	International Relations - Undergraduate Minor	314
Animation and Visual Effects - Undergraduate Minor	262	Law and Society - Supplemental Major	314
Digital Film Making - Bachelor of Creative Media	262	MPA-MA Public History Program - Dual Degree	315
Digital Film Making - Undergraduate Minor	263		

MPA-MCJ Program - Dual Degree	315	Military Science - Undergraduate Minor	366
Political Theory - Undergraduate Minor	315	Molecular Biology	366
Public Administration - Master of Public Administration	315	Bioinformatics (with Computer Science) - Graduate Minor	368
Public Administration - Undergraduate Minor	316	Molecular Biology - Doctor of Philosophy	368
Public Law - Undergraduate Minor	316	Molecular Biology - Graduate Minor	369
Security Studies - Graduate Minor	316	Molecular Biology - Master of Science	369
History	317	Molecular Biology- Undergraduate Minor	369
Contemporary Social Studies - Undergraduate Minor	326	Music	370
History - Bachelor of Arts	327	Music - Bachelor of Music	379
History - Graduate Minor	327	Music - Master of Music	381
History - Master of Arts	328	Music - Undergraduate Minor	381
History - Undergraduate Minor	329	Music Education - Bachelor of Music Education	382
Public History and Public Administration - Dual M.A. Degree	329	Philosophy	383
Interdisciplinary Studies	329	Ethics - Undergraduate Minor	386
Applied Studies - Bachelor of Applied Studies	333	Philosophy - Bachelor of Arts	386
Gender and Sexuality Studies - Bachelor of Arts	333	Philosophy - Undergraduate Minor	386
Gender and Sexuality Studies - Graduate Minor	334	Physics	387
Gender and Sexuality Studies - Undergraduate Minor	334	Engineering Physics - Bachelor of Science in Engineering Physics	393
Individualized Studies - Bachelor of Individualized Studies	334	Physics - Bachelor of Arts	393
International Studies - Undergraduate Minor	335	Physics - Bachelor of Science	394
Journalism and Mass Communications	336	Physics - Doctor of Philosophy	395
Journalism and Mass Communication - Bachelor of Arts	338	Physics - Master of Science	395
Journalism and Mass Communications - Undergraduate Minor	339	Physics - Undergraduate Minor	396
Languages and Linguistics	339	Psychology	396
Chicano Studies - Supplementary Major	347	Psychology - Bachelor of Arts	400
Foreign Languages - Bachelor of Arts	347	Psychology - Doctor of Philosophy	401
French - Undergraduate Minor	348	Psychology - Graduate Minor	402
German - Undergraduate Minor	348	Psychology- Master of Arts	402
Latin American Studies - Supplementary Major	349	Psychology - Undergraduate Minor	402
Linguistics - Supplementary Major	350	Sociology	402
Linguistics - Undergraduate Minor	350	Contemporary Social Studies - Undergraduate Minor	407
Spanish - Master of Arts	350	Sociology - Bachelor of Arts	407
Spanish - Undergraduate Minor	352	Sociology - Master of Arts	408
Mathematical Sciences	352	Sociology - Undergraduate Minor	409
Applied Mathematics - Supplemental Major	359	Theatre Arts	409
Mathematics - Bachelor of Science	360	Theatre Arts - Bachelor of Arts	412
Mathematics - Doctor of Philosophy	362	Theatre Arts - Undergraduate Minor	413
Mathematics - Master of Science	363	College of Business	414
Mathematics - Undergraduate Minor	364	Accounting and Information Systems	416
Military Science	364	Accounting - Bachelor of Accountancy	419
		Accounting - Master of Accountancy	419

Accounting - Undergraduate Minor	420	Professional Selling - Undergraduate Minor	450
Enterprise Systems - Undergraduate Minor	421	Sports Marketing - Undergraduate Minor	450
Information Systems - Bachelor of Business Administration	421	College of Education	452
Information Systems - Graduate Minor	421	Counseling and Educational Psychology	455
Information Systems - Undergraduate Minor	421	Clinical Mental Health Counseling- Master of Arts	460
Business Administration	422	Counseling and Community Psychology - Bachelor of Science	461
Business Administration - Doctor of Philosophy	423	Counseling and Educational Psychology - Undergraduate Minor	461
Business Administration - Master of Business Administration	424	Counseling Psychology - Doctor of Philosophy	462
Engineering/MBA Program – Dual Degree	425	Indigenous Ways of Knowing - Graduate Minor	462
Economics, Applied Statistics, and International Business	426	Integrated Behavioral Health Care - Graduate Minor	462
Applied Statistics - Graduate Minor	431	School Psychology - Specialist in Education	462
Applied Statistics - Master of Science	431	Spanish Counseling - Graduate Minor	463
Economics - Bachelor of Arts in Economics	432	Curriculum and Instruction	463
Economics - Bachelor of Business Administration	433	Curriculum and Instruction - Doctor of Education	472
Economics - Doctor of Economic Development	434	Curriculum and Instruction - Doctor of Philosophy	473
Economics - Graduate Minor	434	Early Childhood - Bachelor of Science in Education	474
Economics - Master of Arts	434	Early Childhood Education - Undergraduate Minor	475
Economics - Undergraduate Minor	435	Education - Master of Arts	475
International Business - Bachelor of Business Administration	435	Education - Master of Arts in Teaching	476
International Business - Undergraduate Minor	436	Elementary Education - Bachelor of Science in Education	476
Public Utility Regulation and Economics - Graduate Certificate	436	Secondary Education - Bachelor of Science in Education	477
Finance	436	Zero-to-Four (Early Childhood) - Bachelor of Applied Studies	481
Banking and Financial Planning - Undergraduate Minor	439	Educational Leadership and Administration	481
Business Law - Undergraduate Minor	440	Educational Administration - Doctor of Education	486
Entrepreneurship and Innovation (Business Cluster) - Undergraduate Minor	440	Educational Administration - Doctor of Philosophy	486
Finance - Bachelor of Business Administration	440	Educational Administration - Graduate Minor	486
Finance - Graduate Certificate	441	Educational Administration - Graduate Minor	487
Finance - Undergraduate Minor	441	Educational Administration - Graduate Minor	487
Risk Management and Insurance - Undergraduate Minor	442	Educational Administration - Master of Arts	487
Management	442	Educational Leadership and Administration - Undergraduate Minor	487
General Business - Bachelor of Business Administration	445	Kinesiology and Dance	488
Management - Bachelor of Business Administration	446	Athletic Training - Bachelor of Science in Athletic Training	502
Management - Undergraduate Minor	446	Dance - Bachelor of Arts in Dance	503
Sustainability - Undergraduate Minor	446	Dance - Undergraduate Minor	504
Marketing	447	Exercise Science - Undergraduate Minor	505
Advertising - Undergraduate Minor	449	Kinesiology - Bachelor of Science in Kinesiology	505
Marketing - Bachelor of Business Administration	450	Kinesiology - Doctor of Philosophy	507
Marketing - Undergraduate Minor	450	Special Education/Communication Disorders	508
		Autism Spectrum Disorders - Graduate Certificate	519

Communication Disorders - Bachelor of Science in Education	519	Engineering Technology - Civil - Bachelor of Science in Engineering Technology	581
Communication Disorders - Master of Arts	520	Engineering Technology - Electronics and Computer - Bachelor of Science in Engineering Technology	583
Special Education - Master of Arts	521	Engineering Technology - Information - Bachelor of Science in Engineering Technology	584
Special Education - Bachelor of Science in Education	522	Engineering Technology - Mechanical - Bachelor of Science in Engineering Technology	585
Special Education - Doctor of Education	522	Geomatics - Bachelor of Science in Geomatics	586
Special Education - Doctor of Philosophy	523	Geomatics - Undergraduate Minor	587
Special Education - Graduate Minor	524	Information and Communication Technology - Bachelor of Information and Communication Technology	588
College of Engineering	525	Information Security Technology - Undergraduate Minor	588
Chemical & Materials Engineering	527	Manufacturing - Undergraduate Minor	589
Biomedical Engineering - Undergraduate Minor	535	Renewable Energy Technologies - Undergraduate Minor	589
Brewery Engineering- Undergraduate Minor	535	Industrial Engineering	590
Chemical Engineering - Bachelor of Science in Chemical Engineering	535	Engineering - Doctor of Philosophy	594
Chemical Engineering - Doctor of Philosophy	536	Entrepreneurship - Undergraduate Minor	594
Chemical Engineering - Master of Science in Chemical Engineering	537	Industrial Engineering - Bachelor of Science in Industrial Engineering	594
Computational Engineering- Undergraduate Minor	537	Industrial Engineering - Master of Science in Industrial Engineering	595
Materials Engineering - Graduate Minor	537	Mechanical Engineering and Aerospace Engineering	595
Materials Engineering - Undergraduate Minor	538	Aerospace Engineering - Bachelor of Science in Aerospace Engineering	601
Nuclear Chemical Engineering - Undergraduate Minor	538	Aerospace Engineering - Doctor of Philosophy	603
Pre-Law in Intellectual Property - Undergraduate Minor	538	Aerospace Engineering - Master of Science in Aerospace Engineering	603
Pre-Medicine Studies- Undergraduate Minor	538	Aerospace Engineering - Undergraduate Minor	604
Civil Engineering	539	Engineering - Doctor of Philosophy	605
Agricultural Engineering - Undergraduate Minor	544	Mechanical Engineering - Bachelor of Science in Mechanical Engineering	605
Civil Engineering - Bachelor of Science in Civil Engineering	544	Mechanical Engineering - Master of Science in Mechanical Engineering	607
Civil Engineering - Master of Science in Civil Engineering	546	Mechanical Engineering - Undergraduate Minor	607
Engineering - Doctor of Philosophy	548	College of Health and Social Services	609
Environmental Engineering - Master of Science in Environmental Engineering	548	Nursing	609
Electrical and Computer Engineering	549	Family Nurse Practitioner - Graduate Certificate	623
Computer Engineering - Undergraduate Minor	559	Family Psychiatric/Mental Health Nurse Practitioner - Graduate Certificate	623
Electrical Engineering - Bachelor of Science in Electrical Engineering	559	Nursing - Bachelor of Science in Nursing	623
Electrical Engineering - Doctor of Philosophy	561	Nursing - Doctor of Philosophy	624
Electrical Engineering - Master of Science in Electrical Engineering	562	Nursing Administration - Master of Science in Nursing	625
Electrical Engineering - Undergraduate Minor	563	Nursing Practice - Doctor of Nursing Practice	625
Engineering Physics	563	Public Health Sciences	626
Engineering Physics - Bachelor of Science in Engineering Physics	568		
Engineering Technology and Surveying Engineering	572		
Digital Electronic Applications - Undergraduate Minor	581		
Digital Forensics - Undergraduate Minor	581		

Gerontology - Undergraduate Minor	629	BIOL-BIOLOGY (BIOL)	695
Master of Public Health/Master of Social Work - Dual Degree	630	BLAW-BUSINESS LAW (BLAW)	702
Public Health - Bachelor of Public Health	630	BMGT-BUSINESS MANAGEMENT (BMGT)	703
Public Health - Graduate Certificate	630	BOT-BUSINESS OFFICE TECHNOLOGY (BOT)	705
Public Health - Master of Public Health	631	BUSA-BUSINESS ADMINISTRATION (BUSA)	707
Public Health Sciences - Undergraduate Minor	632	C D-COMMUNICATION DISORDERS (C D)	707
U.S.-Mexico Border Health Issues - Undergraduate Minor	632	C E-CIVIL ENGINEERING (C E)	711
Social Work	632	C EP-COUNSELING & EDUC PSY (C EP)	715
Alcohol and Drug Counseling - Graduate Minor	635	C J-CRIMINAL JUSTICE (C J)	720
Master of Social Work/Master of Public Health - Dual Degree	635	C S-COMPUTER SCIENCE (C S)	724

LAS CRUCES ACADEMIC CATALOG

Academic programs at the New Mexico State University System are available to all students without regard to age, ancestry, color, disability, gender, national origin, race, religion, sexual orientation or veteran status.

Any item in these catalogs are subject to modification at any time by proper administrative procedure.

The ultimate responsibility for planning an academic program in compliance with university, community college, college and departmental requirements rests with the student. In addition, the student bears ultimate responsibility for understanding all matters of the Course Catalogs.

Catalog effective summer 2017 through spring semester 2023.

Catalog Editor: *Kori Plank*

WELCOME FROM THE CHANCELLOR

New Mexico State University is a caring community transforming lives through discovery. I'm proud of the work done by everyone at NMSU. Our students are talented and spirited, and they join our faculty and staff in taking part in exciting research, teaching and outreach activities that happen here every day.

I've been around this university for a long time – as a student, a faculty member, a dean and now as chancellor. I love the energy on this campus. The Aggie spirit shown by everyone is something you can see and feel.

We are fortunate to have a beautiful campus and I encourage everyone to experience it. Whether it's attending class, watching a sporting event, taking in a musical or theatrical performance, or just enjoying a stroll near the pond, there is plenty that NMSU has to offer.

Garrey Carruthers, Ph.D.

Chancellor and President, New Mexico State University

ADMINISTRATION

Chancellor

Garrey E. Carruthers, Chancellor

Board of Regents

Susana Martinez, Governor of New Mexico, Ex Officio Regent from Santa Fe.

Amanda Lopez-Askin, Appointed Student Regent from Las Cruces for term expiring December 31, 2016

Debra Hicks, Appointed Regent from Hobbs for term expiring December 31, 2020.

Jerean Hutchinson, Appointed Regent from Las Cruces for term expiring December 31, 2020.

Kari Mitchell, Appointed Regent from Las Cruces for term expiring December 31, 2018.

Mike Cheney, Appointed Regent from Las Cruces for term expiring December 31, 2016.

Provost/Academic

Howard, Daniel J., Executive VP & Provost

Fant, Gregory, Associate VP & Deputy Provost

Vice Presidents/Vice Provosts

Boberg, Kevin B., VP Economic Development

Burke, Andrew., Sr. VP Administration & Finance

Vazquez, Luis, Interim VP Research

Menking, Cornell H., Associate Provost International & Border Programs

Montoya, Bernadette R., VP Student Affairs/Enrollment Management

Tawney, Andrea, VP University Advancement

Deans

Chaiken, Miriam, Dean, Honors College and Crimson Scholars

Hoffman, James, Dean, Business College

Flores, Rolando, Dean, Agricultural, Consumer and Environmental Sciences College

Pontelli, Enrico., Dean, Arts and Sciences College

Pope-Davis, Donald B., Dean, Education College

Reddi, Lakshmi, Dean, Engineering College

Reyes, Loui, Dean, Graduate School

Titus, Elizabeth A., Dean, Library

Wagner, Donna, Dean, Health and Social Services College

Community College Campuses Administration

Alamogordo

Van Winkle, Kenneth, Campus President

Cal, Mark P., VP Academic Affairs

Dona Ana

Scott, Renay M., Campus President

Brooks, Kelly, VP Business & Finance

Ledesma, Amadeo "Ike," VP Student Services

Torres, Monica F., VP Academic Affairs

Grants

Best, Mickey, Campus President;

Armstead, Beth, VP Student Services

Sheski, Harry, VP Academic Affairs

THE HISTORY OF THE UNIVERSITY

New Mexico State University (NMSU) was founded in 1888 as the state's land-grant university. Through serving the educational needs of New Mexico's diverse population, NMSU has provided comprehensive programs of education, research, extension education and public service. Upon its founding, NMSU was known as Las Cruces College and later renamed New Mexico College of Agriculture and Mechanic Arts. In 1960, the constitution of New Mexico formally recognized the institution as NMSU. Today, NMSU is a major institution of higher education. Throughout its history, the university has preserved many traditions of its land-grant origin while also increasing emphasis on the fine arts, humanities, social and natural sciences.

Mission

New Mexico State University is the state's land-grant university, serving the educational needs of New Mexico's diverse population through comprehensive programs of education, research, extension education, and public service.

Vision

New Mexico State University will be a premier university as evidenced by demonstrated and quantifiable excellence in teaching, research, extension, outreach, service, economic development, and community engagement relative to its peer institutions.

Values

- Diversity and Inclusion
- Accountability
- Excellence
- Discovery
- Engagement

NMSU's Values began as a project completed by the first class of the Aggie Leadership Training Academy (<https://training.nmsu.edu/alta/2015aggie-leadership-training-academy>). In the fall of 2016, the University Administrative Council started with that work, and members contributed their top five values (http://provost.nmsu.edu/plan/wp-content/uploads/sites/13/2012/07/Values-12_12_16.pdf). This list was compiled from those contributions.

Accreditation

New Mexico State University has been accredited by The Higher Learning Commission (HLC) since 1926. The HLC may be contacted at:

The Higher Learning Commission
230 North LaSalle St.
Suite 7-500
Chicago, IL 60604-1411
Phone: (800) 621-7440

In addition, the university maintains various specialized and professional accreditations, as listed at the beginning of each college section in the catalog, and as found at <https://accreditation.nmsu.edu/specialized-accreditation/>.

NMSU Graduation and Retention Rates

These rates may be found on the NMSU Institutional Research web site at: <http://oia.nmsu.edu/data-reports/oiareports/>.

PROGRAMS A-Z

A

- Accounting - Bachelor of Accountancy (p. 419)
- Accounting - Master of Accountancy (p. 419)
- Accounting - Undergraduate Minor (p. 420)
- Advertising - Undergraduate Minor (p. 449)
- Aerospace Engineering - Bachelor of Science in Aerospace Engineering (p. 601)
- Aerospace Engineering - Doctor of Philosophy (p. 603)
- Aerospace Engineering - Master of Science in Aerospace Engineering (p. 603)
- Aerospace Engineering - Undergraduate Minor (p. 604)
- Aerospace Studies - Undergraduate Minor (p. 181)
- Agricultural Biology - Bachelor of Science in Agriculture (p. 117)
- Agricultural Biology - Master of Science (p. 119)
- Agricultural Business Management- Undergraduate Minor (p. 96)
- Agricultural Economics - Master of Science (p. 96)
- Agricultural Economics and Business - Bachelor of Science in Agriculture (p. 97)
- Agricultural Engineering - Undergraduate Minor (p. 544)
- Agricultural and Community Development - Bachelor of Science in Agriculture (p. 90)
- Agricultural and Extension Education - Bachelor of Science in Agriculture (p. 90)
- Agricultural and Extension Education - Graduate Minor (p. 91)
- Agricultural and Extension Education - Master of Arts (p. 91)
- Agricultural and Extension Education - Undergraduate Minor (p. 91)
- Agricultural and Natural Resource Leadership - Undergraduate Minor (p. 91)
- Agriculture - Master of Agriculture (p. 98)
- Agriculture - Master of Agriculture (p. 108)
- Agriculture - Master of Business Administration (p. 98)
- Agronomy - Bachelor of Science in Agriculture (p. 156)
- Agronomy - Undergraduate Minor (p. 157)
- Alcohol and Drug Counseling - Graduate Minor (p. 635)
- Algorithm Theory - Undergraduate Minor (p. 248)
- American Government and Politics - Undergraduate Minor (p. 313)
- Animal Science - Bachelor of Science in Agriculture (p. 108)
- Animal Science - Doctor of Philosophy (p. 110)
- Animal Science - Graduate Minor (p. 111)
- Animal Science - Master of Science (p. 111)
- Animation and Visual Effects - Bachelor of Creative Media (p. 261)
- Animation and Visual Effects - Undergraduate Minor (p. 262)
- Anthropology - Bachelor of Arts (p. 188)
- Anthropology - Master of Arts (p. 189)
- Anthropology - Undergraduate Minor (p. 190)
- Applied Mathematics - Supplemental Major (p. 359)
- Applied Statistics - Graduate Minor (p. 174)
- Applied Statistics - Graduate Minor (p. 431)
- Applied Statistics - Master of Science (p. 431)

- Applied Studies - Bachelor of Applied Studies (p. 333)
- Archaeology - Graduate Minor (p. 190)
- Art - Bachelor of Arts (p. 201)
- Art - Bachelor of Fine Arts (p. 202)
- Art - Master of Arts (p. 203)
- Art - Master of Fine Arts (p. 204)
- Art - Undergraduate Minor (p. 205)
- Art History - Undergraduate Minor (p. 205)
- Astronomy - Doctor of Philosophy (p. 209)
- Astronomy - Master of Science (p. 209)
- Astronomy - Undergraduate Minor (p. 209)
- Athletic Training - Bachelor of Science in Athletic Training (p. 502)
- Autism Spectrum Disorders - Graduate Certificate (<http://catalogs.nmsu.edu/nmsu/education/special-education-communication-disorders/autism-spectrum-disorders-grad-cert>)

B

- Banking and Financial Planning - Undergraduate Minor (p. 439)
- Biochemistry - Bachelor of Science (p. 232)
- Biochemistry - Undergraduate Minor (p. 233)
- Bioinformatics (with Computer Science) - Graduate Minor (p. 368)
- Bioinformatics - Master of Science (p. 248)
- Bioinformatics - Undergraduate Minor (p. 249)
- Biology - Bachelor of Arts (p. 219)
- Biology - Bachelor of Science (p. 219)
- Biology - Doctor of Philosophy (p. 220)
- Biology - Master of Science (p. 220)
- Biology - Undergraduate Minor (p. 221)
- Biomedical Engineering - Undergraduate Minor (p. 535)
- Brewery Engineering- Undergraduate Minor (p. 535)
- Business Administration - Doctor of Philosophy (p. 423)
- Business Administration - Master of Business Administration (p. 424)
- Business Law - Undergraduate Minor (p. 440)

C

- Chemical Engineering - Bachelor of Science in Chemical Engineering (p. 535)
- Chemical Engineering - Doctor of Philosophy (p. 536)
- Chemical Engineering - Master of Science in Chemical Engineering (p. 537)
- Chemistry - Bachelor of Arts (p. 233)
- Chemistry - Bachelor of Science (p. 233)
- Chemistry - Doctor of Philosophy (p. 234)
- Chemistry - Master of Science (p. 234)
- Chemistry - Undergraduate Minor (p. 234)
- Chicano Studies - Supplementary Major (p. 347)
- Child Advocacy Studies (CAST) - Undergraduate Minor (p. 129)
- Child Advocacy Studies - Undergraduate Minor (p. 268)
- Civil Engineering - Bachelor of Science in Civil Engineering (p. 544)
- Civil Engineering - Master of Science in Civil Engineering (p. 546)
- Clinical Mental Health Counseling- Master of Arts (p. 460)

- Clothing, Textiles and Fashion Merchandising - Bachelor of Science in Family and Consumer Sciences (p. 129)
- Clothing, Textiles and Fashion Merchandising - Undergraduate Minor (p. 130)
- Communication Disorders - Bachelor of Science in Education (p. 519)
- Communication Disorders - Master of Arts (p. 520)
- Communication Studies - Bachelor of Arts (p. 239)
- Communication Studies - Graduate Minor (p. 239)
- Communication Studies - Master of Arts (p. 239)
- Communication Studies - Undergraduate Minor (p. 240)
- Communication and National Security - Graduate Minor (p. 238)
- Communication and National Security - Undergraduate Minor (p. 239)
- Comparative Politics - Undergraduate Minor (p. 313)
- Computational Engineering- Undergraduate Minor (p. 537)
- Computer Engineering - Undergraduate Minor (p. 559)
- Computer Science - Bachelor of Arts (p. 249)
- Computer Science - Bachelor of Science (p. 251)
- Computer Science - Bachelor of Science/Master of Science (p. 253)
- Computer Science - Doctor of Philosophy (p. 254)
- Computer Science - Graduate Minor (p. 255)
- Computer Science - Master of Science (p. 255)
- Computer Systems - Undergraduate Minor (p. 256)
- Conservation Ecology - Bachelor in Conservation Ecology (p. 221)
- Conservation Ecology - Bachelor of Science in Conservation Ecology (p. 139)
- Conservation Ecology - Undergraduate Minor (p. 140)
- Conservation Ecology - Undergraduate Minor (p. 223)
- Contemporary Social Studies - Undergraduate Minor (p. 313)
- Contemporary Social Studies - Undergraduate Minor (p. 326)
- Contemporary Social Studies - Undergraduate Minor (p. 407)
- Counseling Psychology - Doctor of Philosophy (p. 462)
- Counseling and Community Psychology - Bachelor of Science (p. 461)
- Counseling and Educational Psychology - Undergraduate Minor (p. 461)
- Creative Writing - Master of Fine Arts in Creative Writing (p. 284)
- Creative Writing - Undergraduate Minor (p. 285)
- Criminal Justice - Bachelor of Criminal Justice (p. 268)
- Criminal Justice - Master of Criminal Justice (p. 269)
- Culinary Science - Undergraduate Minor (p. 130)
- Cultural Resource Management - Graduate Certificate (p. 190)
- Curriculum and Instruction - Doctor of Education (p. 472)
- Curriculum and Instruction - Doctor of Philosophy (p. 473)

D

- Dance - Bachelor of Arts in Dance (p. 503)
- Dance - Undergraduate Minor (p. 504)
- Digital Electronic Applications - Undergraduate Minor (p. 581)
- Digital Film Making - Bachelor of Creative Media (p. 262)
- Digital Film Making - Undergraduate Minor (p. 263)
- Digital Forensics - Undergraduate Minor (p. 581)

E

- Early Childhood - Bachelor of Science in Education (p. 474)
- Early Childhood Education - Undergraduate Minor (p. 475)
- Economic Development - Doctor of Economic Development (p. 99)
- Economics - Bachelor of Arts (p. 273)
- Economics - Bachelor of Arts in Economics (p. 432)
- Economics - Bachelor of Business Administration (p. 433)
- Economics - Doctor of Economic Development (p. 434)
- Economics - Graduate Minor (p. 434)
- Economics - Master of Arts (p. 434)
- Economics - Undergraduate Minor (p. 274)
- Economics - Undergraduate Minor (p. 435)
- Education - Master of Arts (p. 475)
- Education - Master of Arts in Teaching (p. 476)
- Educational Administration - Doctor of Education (p. 486)
- Educational Administration - Doctor of Philosophy (p. 486)
- Educational Administration - Graduate Minor (p. 486)
- Educational Administration - Graduate Minor (p. 487)
- Educational Administration - Graduate Minor (p. 487)
- Educational Administration - Master of Arts (p. 487)
- Educational Leadership and Administration - Undergraduate Minor (p. 487)
- Electrical Engineering - Bachelor of Science in Electrical Engineering (p. 559)
- Electrical Engineering - Doctor of Philosophy (p. 561)
- Electrical Engineering - Master of Science in Electrical Engineering (p. 562)
- Electrical Engineering - Undergraduate Minor (p. 563)
- Elementary Education - Bachelor of Science in Education (p. 476)
- Engineering - Doctor of Philosophy (p. 548)
- Engineering - Doctor of Philosophy (p. 594)
- Engineering - Doctor of Philosophy (p. 605)
- Engineering Physics - Bachelor of Science in Engineering Physics (p. 393)
- Engineering Physics - Bachelor of Science in Engineering Physics (p. 568)
- Engineering Technology - Civil - Bachelor of Science in Engineering Technology (p. 581)
- Engineering Technology - Electronics and Computer - Bachelor of Science in Engineering Technology (p. 583)
- Engineering Technology - Information - Bachelor of Science in Engineering Technology (p. 584)
- Engineering Technology - Mechanical - Bachelor of Science in Engineering Technology (p. 585)
- Engineering/MBA Program – Dual Degree (p. 425)
- English - Bachelor of Arts (p. 285)
- English - Master of Arts (p. 288)
- English - Undergraduate Minor (p. 290)
- Enterprise Systems - Undergraduate Minor (p. 421)
- Entomology - Undergraduate Minor (p. 119)
- Entrepreneurship - Undergraduate Minor (p. 594)
- Entrepreneurship and Innovation (Business Cluster) - Undergraduate Minor (p. 440)

- Environmental Chemistry - Undergraduate Minor (p. 234)
- Environmental Engineering - Master of Science in Environmental Engineering (p. 548)
- Environmental Science - Bachelor of Science in Environmental Science (p. 157)
- Ethics - Undergraduate Minor (p. 386)
- Exercise Science - Undergraduate Minor (p. 505)

F

- Family Nurse Practitioner - Graduate Certificate (p. 623)
- Family Psychiatric/Mental Health Nurse Practitioner - Graduate Certificate (p. 623)
- Family and Child Science - Bachelor of Science in Family and Consumer Sciences (p. 130)
- Family and Child Science - Undergraduate Minor (p. 131)
- Family and Consumer Sciences - Master of Science (p. 131)
- Family and Consumer Sciences Education - Bachelor of Science in Family and Consumer Sciences (p. 131)
- Finance - Bachelor of Business Administration (p. 440)
- Finance - Graduate Certificate (p. 441)
- Finance - Undergraduate Minor (p. 441)
- Fish, Wildlife and Conservation Ecology - Master of Science in Fish, Wildlife and Conservation Ecology (p. 143)
- Fisheries and Wildlife Science - Bachelor of Science in Fish, Wildlife and Conservation Ecology (p. 141)
- Food Science - Undergraduate Minor (p. 132)
- Food Science and Technology - Bachelor of Science in Food Science and Technology (p. 132)
- Food Studies - Graduate Minor (p. 190)
- Foreign Languages - Bachelor of Arts (p. 347)
- Forensic Science - Undergraduate Minor (p. 270)
- French - Undergraduate Minor (p. 348)

Z

- Zero-to-Four (Early Childhood) - Bachelor of Applied Studies (p. 481)

AREAS OF INTEREST

What Are Meta-Majors?

Meta-majors at NMSU are two-semester academic maps designed as planning tools for students who have not yet decided on a program of study. Each meta-major represents a broad cluster of degree programs. The meta-major academic maps include courses (such as English and Math) that lay the academic foundation for all of the degree programs represented by the specific meta-major as well as course options that facilitate exploration of the various disciplines represented.

Meta-majors share a common early pathway toward a degree, diverging as a student becomes more focused on an individual major. By identifying a limited number of meta-majors that encompass all the majors at NMSU, and helping students who are unsure about a major choose a meta-major consistent with their interests, we can help ensure that courses taken early in a collegiate career will count toward a degree, thereby lessening the academic wandering that can impede student success.

Students will be directed to a meta major only if they are uncertain what they want to study. Students who are certain of their major will be advised into courses that are in that major's degree plan.

- Engineering Technology - Information - Bachelor of Science in Engineering Technology (p. 584)
- Engineering Technology - Mechanical - Bachelor of Science in Engineering Technology (p. 585)

ESSENTIAL INFORMATION FOR STUDENTS

The information provided in this section of the Academic Catalog is considered essential information for students throughout their time at New Mexico State University. The section includes information on Admissions, Tuition, Financial Aid, Military and Veterans Programs and General Education Course requirements. There are also sections pertaining to Student Resources such as Housing, Campus Activities and parking to name a few.

Sections

- Undergraduate Admissions (p. 21)
- Transfer Undergraduate Students (p. 23)
- International Undergraduate Students (p. 24)
- Tuition, Fees and Other Expenses (p. 26)
- Financial Aid & Scholarship Services (p. 28)
- Registration (p. 62)
- Withdrawals (p. 69)
- Resources for Students (p. 30)
- Graduate Research Facilities (p. 37)
- Military and Veterans Programs (MVP) (p. 44)
- General Education Courses (p. 47)
- Graduation Requirements (p. 51)
- Recognition of Academic Achievement (p. 51)
- Preprofessional Programs (p. 51)
- Academic Programs (p. 52)

Undergraduate Admissions

A student may be accepted for undergraduate admission to NMSU as either:

- A degree-seeking student or
- A nondegree student under the policies and conditions as set forth in this section.

How to Apply as a First-Time Student (Regular Student)

Requirements for admission as a degree seeking student include the following:

- A formal application for admission, accompanied by a one-time \$20 nonrefundable application fee.
- An official transcript with the student's high school credits is to be sent directly from the high school to the Undergraduate Admissions Office. Students who attended a college or university while in high school must request official transcripts(s) sent directly to the Undergraduate Admissions Office by the Registrar of each college or any post-secondary educational institution previously attended, you may hand carry the official sealed and unopened school envelope to our office.
- Official results of the American College Testing Program (ACT) or Scholastic Aptitude Test (SAT) are to be sent directly from the Testing Centers to the Undergraduate Admissions Office. All

freshman applicants are required to submit scores from either the ACT or the SAT before a final admission is granted.

Freshman Admission Requirements

Students who meet the minimum high school course requirements listed below must meet one of the following criteria in order to be admitted:

- Cumulative high school GPA of 2.75
- Ranked in the top 20 percent of their graduating class
- ACT composite score of 21 or SAT score* of 990 (SAT score of 1060 for new format)

*NMSU uses combined scores from the critical verbal and math portions of the SAT for admission and scholarship purposes. NMSU will be taking scores from the traditional SAT and the new SAT format, which was launched March 2016.

Note: All entering freshmen must submit official ACT or SAT scores before final admission is granted. ACT code=2638, SAT=4531

Subject	Units
English	4*
Math	4**
Science	2***
Foreign Language/Fine Art	1

**Must include at least 2 units of writing intensive courses, one of which must be a junior or senior level course*

***From Algebra I, Geometry, Algebra II, and one additional math course*

****Beyond general science*

Applicants who meet all the requirements listed above will be offered admission to NMSU. An applicant who does not meet all the requirements may also be offered admission if a review of their additional information indicates that the student would be successful at NMSU.

We encourage all students to apply for admission to NMSU. When reviewing the admissibility of students, we consider many factors, including high school GPA, test scores, dual-credit coursework, leadership experience, community involvement and other accomplishments. Applicants may be asked for additional information, including academic letters of recommendation, in support of their application.

Aggie Pathway

In the Aggie Pathway to the Baccalaureate Program, our system of five campuses work together to navigate you toward a bachelor's degree – even if you initially don't meet admission requirements to the university. Aggie Pathway students may transition to the Las Cruces campus after successful completion of:

- 24 credits, in addition to any required developmental courses
- 2.50 cumulative college GPA

Students participating in the Aggie Pathway program can attend academic, cultural and athletic events on the NMSU Las Cruces campus. Students enrolling through NMSU Doña Ana have access to on-campus housing and dining. For more information, please visit <http://aggiepathway.nmsu.edu/> or call 575-646-8011.

How to Apply as a GED or HISET Student

Students must complete the GED or HiSET in English. Satisfactory scores on either the GED or HiSet tests, official high school transcript and the ACT or SAT test are required.

How to Apply as a Home School Student

The home school educator must submit a signed transcript or document that lists the courses completed and grades earned by the student, as well as, indicate the date the student completed or graduated from the home school program. The ACT or SAT test is also required.

Home school students who are New Mexico residents and wish to participate in the Lottery Success Scholarship program are required to submit official New Mexico GED or HiSET test results in English.

Aggie Welcome and Orientation

At the mandatory Aggie Welcome and Orientation events students will attend information sessions, meet with an academic advisor and register for classes. Students will also learn more about college life and campus resources.

For information, please contact the Aggie Welcome and Orientation Office at (575) 646-4496 or (575) 646-8038 and can be reached via email at awo@nmsu.edu or <http://awo.nmsu.edu/>.

How to Apply as a Nondegree Seeking Student

Nondegree admission is designed to meet the needs of non-traditional, part-time students who do not wish to pursue a degree at this university. Courses taken in this status may not be used to meet university admission requirements. Students interested in using nondegree credit for initial teacher certification or certification in a new field need to contact the College of Education.

Students on nondegree status are ineligible to receive financial aid or student employment; and are ineligible to participate in student government or intercollegiate athletics. They are also ineligible to receive benefits from any veterans' program.

Transcripts from previous institutions, high school, and/or results of college entrance exams may be required to assure readiness for university-level courses. A \$20 one-time, non-refundable, nondegree application fee is required.

Nondegree students are subject to the same university regulations as regular students.

Changing from Nondegree Status

A nondegree student in good academic standing at NMSU must submit a formal application for a change of status from nondegree to degree seeking. Requirements for regular admission must be met. Nondegree students may not transfer more than 30 credits from this status to any undergraduate degree program with the exception of students participating in a high school concurrent enrollment program.

How to Apply For Readmission

Former students of the NMSU system, who have been out of school for more than two consecutive semesters are required to make a formal application for readmission. Applications should be submitted to the

Undergraduate Admissions Office before the opening of the semester or summer sessions for which the student plans to enroll.

A student who has attended other institutions during an absence must have official transcripts forwarded directly to the Undergraduate Admissions Office by the Registrar of each institution and must be eligible to return to the college or university last attended. Transcripts must be received prior to the date of registration. Admission status at the time of readmission will normally be determined by previous NMSU academic standing. However, academic performance at other institutions attended during the applicant's absence from NMSU may be taken into consideration in determining the student's admission status.

Opportunities for High Schools Students Dual Credit for High School Students

The Dual Credit Program is designed to give high school students an opportunity to enroll at NMSU prior to high school graduation. Students must be either a junior or senior in high school and enrolled in one-half or more of the minimum course requirements approved by the following:

- Public Education Department in a New Mexico public school district;
- Locally chartered and state-chartered charter school;
- State-supported school;
- Be in physical attendance at a bureau of Indian education-funded high school at least three documented contact hours per day.

Under Senate Bill 158 signed by the Governor and effective July 1, 2014, support for dual credit privileges at post-secondary institutions is now available for private and home school-eligible students. Under a Statewide Dual Credit Master Agreement between NMSU and the school district, students enrolled in approved dual credit courses are eligible to have the full cost of tuition and general fees waived.

Dual credit students must complete:

1. the Undergraduate Admission Application
2. provide official high school transcript and official ACT or SAT scores to the Undergraduate Admissions Office (and)
3. complete the State of New Mexico Dual Credit Request Form.

Requirements to be admitted to the dual credit or early admission programs are:

1. high school grade point average (GPA) of 3.0
2. an ACT composite of 23 or equivalent SAT score (and)
3. substantial progress toward completion of the following high school courses: 4 units of English, 4 units of Math (Algebra 1, Geometry, Algebra 2, and one additional math course), 2 units of Science (beyond General Science), 1 unit of foreign language or a unit of fine arts.

Application Materials

All documents submitted as part of the official admissions process become property of NMSU and will not be returned to the student.

Application materials are retained for one calendar year for students who apply but do not attend.

Application Deadlines

Applications for admission should be sent to the Undergraduate Admissions Office at least 30 days before the beginning of the regular semester or summer sessions in which the student intends to enroll. The

deadline for application to NMSU's Nursing Program is February 1st for the fall semester and September 1st for the Spring semester.

Out-of-State Students and Legal Jurisdiction

By applying for admission/enrollment, both the student and parents agree that New Mexico law prevails and all litigation will be in federal or state court in New Mexico.

Contact Information

For more information, contact:

Undergraduate Admissions Office, MSC 3A
New Mexico State University
PO Box 30001
Las Cruces, NM 88003-8001
Phone: (575) 646-3121
<http://admissions.nmsu.edu/>

Transfer Undergraduate Students

NMSU evaluates eligible courses for NMSU transfer equivalency from postsecondary institutions that are regionally accredited or are candidates for regional accreditation. Credits from non-accredited institutions may be evaluated after the student has shown acceptable performance at NMSU for two semesters of full time enrollment. NMSU Colleges may have additional requirements for course transfer please the College for more information.

Transfer students are subject to the same graduation requirements as all NMSU baccalaureate-degree (bachelor's) seeking students. Thirty (30) of the last 36 credit hours for every degree to be awarded from NMSU must be earned at NMSU.

Community/Junior College Transfers

Community/Junior college transfer students may be admitted and classified on the basis of acceptable credits earned at a two-year institution. However, transfer students are subject to the same graduation requirements as all NMSU-Las Cruces campus baccalaureate seeking students. This includes the required minimum number of 48 upper division credits from courses numbered 300 or above and the requirement that the last 30 credits must be earned through this university.

NOTE: Students currently enrolled at a NMSU Community College (Alamogordo, Dona Ana, Carlsbad or Grants) are not considered transfer students. If a student wants to change campuses they must submit a Change of Campus (<https://admissions.nmsu.edu/change-of-campus-request>) form.

Transfer Students- Admission Requirements

1. Transfer students must provide official transcripts sent directly from the Registrar's Office or each previously attended institution to the NMSU Admissions Office or official transcripts will be accepted if delivered in person only if in a sealed envelope from the granting institution and with current issue date. Official transcripts must be received before the date of registration.
2. Students who have not earned credit for the first semester of each college English may be required to provide ACT or SAT scores directly to the NMSU Admissions Office.

3. Students with 30 or more college credit hours must have a cumulative grade point average (GPA) of at least 2.0.
4. Students with 29 or fewer college credit hours must fulfill the freshman admission requirements and have an overall college GPA of at least a 2.50.
5. Students must be eligible to return to their last college or university.
6. Any student who conceals the fact that he/she has attended another college or university and has not submitted a transcript for each institution-whether or not credit was earned-will be subject to immediate suspension.
7. NMSU will uphold academic and judicial suspensions from other colleges and universities.

General Requirements for Transfer Credits

Credit will be awarded for transfer courses as follows:

1. Grades earned in courses taken at other institutions are not included in the calculation of the NMSU GPA, except for grades earned by approved National Student Exchange students.
2. A grade of D or better is required to receive NMSU credit for courses identified as having an NMSU equivalent.
3. Colleges or departments may require a grade of C- or higher for courses required in their programs.
4. Any lower-division course from another institution receiving transfer credit from NMSU at the 300 or above level will be evaluated on a case-by-case basis.
5. Each college determines which transferred courses are applicable toward a degree or a minor.
6. Transcripts may need to be reevaluated when students transfer from one NMSU campus to another.
7. Currently enrolled students who do not receive a passing grade for a class taken within the NMSU system can receive transfer credit for the course taken at an outside institution. However, the student may not receive the credit for the equivalent NMSU (system) course.

Student Responsibility

Planning for effective transfer with maximum efficiency is ultimately the student's responsibility. Responsible transfer planning includes early and regular consultation with the intended degree-granting institution to assure that all pre-transfer coursework will meet the requirements of the desired degree.

NMSU maintains a database (<http://nmsudirect.nmsu.edu/>) of commonly transferred courses from numerous institutions. Courses included in the database at the time the student is admitted to NMSU will automatically transfer to NMSU, provided the student follows all guidelines (see Currently Enrolled NMSU Students below). If a transferred course does not exist in the database, it is the student's responsibility to provide the departmental faculty with sufficient materials (e.g. catalog description, syllabi, etc.) to determine if any of the department's courses may be equivalent to the credits being transferred.

Evaluation of Transfer Credits

NMSU has 3 levels of course credit transfer. Once a student has been admitted to NMSU, they are awarded credit for equivalent courses accordingly. Following award of credit as described in Levels 1 and 2 (below), application of any additional credit transfer via specific Program Articulation agreements will be approved by the student's academic department and dean, including additional courses in the major that

may count toward a degree or a minor but are not included in a Program Articulation.

Level 1

Automatic course-to-course equivalency credit transfer from colleges/universities in the state of New Mexico, per the New Mexico Higher Education Department (NM HED) articulation modules. Eligible credits for Level 1 transfers will be automatically applied to the student's transcript, provided minimal grade requirements are met. Level 1 equivalency includes

1. New Mexico State Common Core general education courses
2. New Mexico State articulated academic programs (e.g. Business, Early Childhood Education, and NM Nursing Education Curriculum).

Level 2

Faculty established NMSU course-to-course equivalency transfer

1. Equivalency is determined by designated departmental faculty in the department/program in which the equivalent course is offered, and may include review of course description, syllabus and/or interaction with the other institution. If a course equivalency does not exist in the database, it is the student's responsibility to provide departmental faculty with sufficient materials to determine if any of the department's courses may be equivalent to the credits being transferred.
2. Credit for courses transcribed with NMSU equivalency will count toward the degree/major.
3. Credit for courses with no NMSU equivalence will be transcribed as 100E (lower level) or 300E (upper level) and may or may not count as credit toward a specific degree. Departmental faculty may accept the "E" course as elective credit toward the degree, or as substituting for a course not applied universally.

Level 3

Specific Program Articulation between an NMSU program/department and a program/department at another institution.

1. Program Articulation with other institutions is monitored at the department/program level in accordance with articulation agreements, and may include credit transfers that are applicable only to the specific degree articulated (i.e. credit for courses may change depending on degree student declares).
2. Because Level 3 transfer credit is degree specific, transcripts must be re-evaluated when a student changes their major or college- Level 3 transfer credits are not applied universally.

Religious Center Courses in Religion

Courses in religion, offered by the various religious centers through higher educational institutions with which they are affiliated, are open to all students and these or similar courses from other universities may be transferred for elective credit ("E") to NMSU. Registration for these courses is separate from the NMSU System's registration and is conducted by the religious center offering the course.

No more than 6 credits in such courses may be transferred to NMSU. To transfer earned credits to NMSU, the student must do the following:

1. Obtain written approval from the student's department head and academic dean prior to registration for the course
2. Count the credit in the course as part of the total semester load

3. Upon completion of the course, request that the institution granting the credit send a transcript of the credit to the Registrar's Office at NMSU-Las Cruces

National Student Exchange (NSE)

Courses transferred back to the NMSU System by students participating in the National Student Exchange (NSE) Program will be evaluated as NMSU (system) courses and recorded on the student's academic record. All computable grades earned will be included in calculating the student's cumulative grade point average.

Currently Enrolled NMSU Students

Currently enrolled students must obtain prior approval from their academic department head and dean before courses taken at another institution will be applied toward meeting NMSU graduation requirements.

Currently enrolled students who do not receive a passing grade for a class taken at NMSU can receive transfer credit for the course taken at an outside institution. **However, the student may not receive the credit for the equivalent NMSU course.**

Transfer Credit Appeal Process

All New Mexico public post-secondary institutions are required to establish policies and practices for receiving and resolving complaints from students or from other complainants regarding the transfer of coursework from other public institutions in the state. A copy of NMSU's transfer credit policy may be obtained from the University Registrar's Office or from the Deputy Secretary for Academic Affairs, Higher Education Department, 2048 Galisteo St., Santa Fe, New Mexico 87505-2100.

International Undergraduate Students

The general policies of the university as outlined in this catalog apply to international as well as domestic students. However, some special policies are required by federal laws applicable only to international students.

An international student is any individual attending NMSU while present in the United States on a non-immigrant student visa (F-1, F-2, J-1, J-2, H-4, NATO Visas, and possibly others such as students in protected refugee status).

Legal immigrants (green card holders) should present documentation of their status to University Admissions and go through the same admission process as U.S. citizens.

Federal Regulations

The United States Department of Homeland Security has established rules for students in non-immigrant status, such as those with F-1 or J-1 visa types. Some of these rules include:

1. For immigration purposes, each student must maintain full-time student status
 - a. Full time status for fall and spring semesters is defined as 12 or more credits for undergraduates (only 3 per semester allowable online).
 - b. Full time status for summer is defined as 6 or more credits for undergraduates (only 3 per summer allowable online).
 - c. Exceptions possible for final semester. Consult ISSS officials for more details.

2. International students may not work off campus without authorization. On-campus employment may be authorized under certain conditions.
3. All international students must maintain an up-to-date record in the ISSS Office. This record must indicate the student's current living address, phone number, and email address.
4. Prior to admission, a prospective international student must demonstrate the following:
 - Academic ability to succeed in the chosen course of study.
 - Adequate financial support to complete the chosen course of study.
 - English language proficiency as defined by the university.

University Procedures for International Students

Regular Undergraduate Admission and English Requirements

After regular and full admission to an NMSU degree program, each international undergraduate student is administered an English Language Placement Test. Based on the results, the student is either assigned to SPCD 110 (<http://nmsu.smartcatalogiq.com/en/2015-2016/Undergraduate-Catalog/Courses/SPCD-ENGLISH-AS-A-SECOND-LANGUAGE/100/SPCD-110>) (a bridge course designed to ensure success in ENGL 111 M), or allowed to enroll directly into ENGL 111 M. International students excused from SPCD 110 (<http://nmsu.smartcatalogiq.com/en/2015-2016/Undergraduate-Catalog/Courses/SPCD-ENGLISH-AS-A-SECOND-LANGUAGE/100/SPCD-110>) will be required to take ENGL 111 M. The student may then be required to complete one or more regular English classes as required for a particular degree. Completing basic English courses at other U.S. institutions does not automatically satisfy the ENGL 111 M requirement. Equivalencies for SPCD 110 are determined by CELP, and equivalencies for ENGL 111 M or ENGL 111 G are determined by the English department. CELP and the English Department reserve the right to require additional testing in cases of dramatic discrepancies between TOEFL/IELTS scores and ELPT, or in other unusual circumstances. In cases where further testing is required, students will have to take the TOEFL PBT (Paper Based Test).

Placements will be based on those scores as follows: 519 and below = CELP, 520-529 = 110. 530+ = 111.

In rare cases, exceptions to the above scoring and placements may be applicable. CELP reserves the right to identify cases where dramatic discrepancies exist between the ELPT and the original TOEFL or IELTS score submitted for admission. In such cases, students may be asked to take the institutional Paper Based TOEFL (PBT). This test will be administered locally, in a timely fashion, and at the university's expense.

Following the PBT a re-assessment of the student's English course placement will be made by CELP.

Students voluntarily objecting to their ELPT score and placement in CELP are allowed to take the Institutional TOEFL one time only, at their own expense, for the purpose of re-evaluation of their English course placement by CELP.

Conditional CELP Admission and English Requirements

NMSU, via Center for English Language Programs (CELP), conducts an Intensive English Language Program (IELP) for undergraduate and graduate students prior to pursuing their degree programs at NMSU. International students in this program are admitted to the university for the sole purpose of studying English, with a guarantee of full admission to the university upon completion of the CELP program (subject to all other admission requirements). Only undergraduate students who are conditionally admitted and complete the full sequence of IELP courses

will be admitted directly into ENGL 111 M. Placing out of levels by retaking the TOEFL is not allowable once conditional admission status has been granted. Visit <http://celp.nmsu.edu/> for full details.

English Language Proficiency

NMSU requires a score of 520 (paper-based) or 68 (internet-based) or better on the Test of English as a Foreign Language (TOEFL), or a score of 6.0 on the International English Language Testing System (IELTS), for all international students both non-degree and degree seeking. International students may also demonstrate English proficiency by satisfactorily completing NMSU's Center for English Language Programs (CELP) programs. A waiver of the TOEFL requirement may be considered for:

1. Students who are native speakers of English.
2. Students completing high school in the United States who (a) have attended the high school for at least two full semesters and (b) have scored in at least the 75th percentile in English on the ACT.
3. Students transferring from a junior college, or university in the United States who have earned a minimum of 30 acceptable semester credits (45 acceptable quarter credits) with a GPA of 2.0 or better (acceptable credit means classes that require a high proficiency in both written and oral English).
4. Students demonstrating English-language proficiency using methods accepted by the Office of University Admissions or ISSS Office.
5. Students enrolling in certain programs where English language proficiency is not required.
6. Students completing coursework in CELP. Satisfactory completion of each level in CELP requires a final grade of no less than 70% in all courses. Visit <http://celp.nmsu.edu/> for full details.

The university reserves the right to require any prospective international student to meet the TOEFL or IELTS requirement.

Financial Support

No financial aid is available from NMSU for international students. The university reserves the right to require advance deposit of funds for any period deemed reasonable prior to granting admission. Each prospective international student must submit a current financial support document with his/her application. This document must show that:

1. The person providing the financial support has the necessary funds.
2. The funds can be transferred from the student's home country to the United States.

Admission Restrictions

International student admission may be prohibited based on one of the following conditions:

1. The dean of a chosen college, the department head of a chosen major, and the President of a Community College campus may refuse to grant admission.
2. There may be a disproportionate number of international students or a disproportionate number of a particular nationality in one department, college or community college.
3. Academic advisors may not be available.
4. Sufficient classroom-based courses are not available to maintain visa status (e.g. courses are online).

All application material, including the application for admission, letters of recommendation, transcripts, national examination scores, transcripts from colleges or universities (with an English translation), test scores including the TOEFL. Pearson's IELTS, should be sent to the ISSS Office

by the following recommended dates. Additionally, proof of adequate financial support should be sent directly to ISSS. For full consideration for undergraduate admission, ISSS maintains the following deadlines:

July 1 (application initiated)	for fall semester
July 15 (all documents submitted)	for fall semester
October 1* (Study Aboard and CELP Programs)	for spring semester
November 15 (application initiated)	for spring semester
December 1 (all documents submitted)	for spring semesters

* Contact the Office of Education Abroad for exchange program admission deadlines, and CELP for intensive English program deadlines.

Miscellaneous Regulations

- All international students are required to have student health insurance. Insurance will be automatically be billed to the student's account each semester.
- New international students are not permitted to register until all ISSS requirements are met, including attending orientation and taking the English Language Placement Test. All international students, are therefore, required to report to the campus to which they were admitted. The following are the offices that a student may need to report to:
 - Las Cruces campus: International Student & Scholar Services, Garcia Annex, room 246 (exchange students need to report to the Office of Study Abroad)
 - Doña Ana Community College: International Student & Scholar Services, Garcia Annex, room 246 (exchange students need to report to the Office of Study Abroad)
 - Alamogordo Community College: Office of Student Services, Student Services Building, second floor
 - Carlsbad Community College: Office of Student Services, 150 University Drive, Room 111
 - Grants Community College: Office of Student Services, Walter Martinez Building, Main Office Complex
- Students in nondegree exchange J-1 visa status must be engaged full time in a prescribed course of study as determined by the NMSU Responsible or Alternate Responsible Officer (RO/ARO). Consult ISSS for more details.

Tuition, Fees, and Other Expenses

All costs are given for one term/semester. The university reserves the right to change any of the charges without notice.

Campus Tuition Rates

For a full listing of all tuition rates from the NMSU System please see the University Accounts Receivable (<http://uar.nmsu.edu/tuition-fees/tuition-rates>) website.

Additional Fees

Undergraduate admission application fee	\$20.00
Graduate admission application fee	\$40.00
New student orientation fee	\$165.00

International student admission application fee	\$50.00
International student orientation fee	\$50.00
Distance Education Course Delivery Fee (per credit)	\$35.00
ASNMSU Fee (Fall/Spring 1-11 credit enrollment)	\$33.50
ASNMSU Fee (Summer 1-8 credit enrollment)	\$12.40
Graduate Wellness/Fitness fee— (Fall/Spring 9-11 credits)	\$159.30
Undergraduate Course examination fee (per credit)	\$221.80
Graduate Course examination fee (per credit)	\$243.90
Certificate degree fee	\$25.00
Bachelor or Associate degree fee	\$25.00
Master or Doctorate degree fee	\$35.00
Degree application late filing fee	\$25.00
Late Registration Fee Base Cost	\$25.00
Engineering Technology Fee	\$145.00
Thesis binding fee (3 copies)	\$38.50
Thesis binding molecular biology / astronomy majors (4 copies)	\$48.50
Dissertation binding fee (3 copies)	\$38.50
Dissertation molecular biology / astronomy majors (4 copies)	\$48.50

Course Fees (Fees Assessed Per Course)

See the Course Fee page for a list of courses with additional fees.

Applied Music courses - see Music (p. 370) section of catalog

Mandatory International Student Fees

All international students are required to have health insurance coverage. International student health insurance is provided by HTH Worldwide unless otherwise covered by comparable health and accident insurance approved by the International Student Services. International students will be required to purchase health insurance for spring and summer during spring registration unless they have applied for spring graduation. (See optional fees (p.)) All international undergraduate students will be assessed a \$36 International Student Program Fee each semester.

Optional Fees

Wellness/Fitness Fee - Rates may Increase for 2017-2018

The Wellness/Fitness fee is included in tuition for full-time students at the Las Cruces Campus. Options for part-time students enrolled at Las Cruces Campus include:

	Wellness	Fitness
Term pass for student enrolled in 6-11 credits	\$79.00	\$40.00
Term pass for student enrolled in 1-5 credits	\$105.00	\$53.00

Single visit for student \$35.00 \$5.00
enrolled in 1-11 credits

The Wellness fee grants access to the Student Health Center with charges accruing for medications, lab work, testing or procedures. The Fitness fee grants access to the Student Activity Center.

Health Insurance

Students who have access to the Campus Health Center may choose to purchase a commercial insurance policy offered through the Health Insurance Marketplaces established by the Affordable Care Act (ACT). These exchanges are intended to provide consumers with a new way to shop for, compare costs and coverage benefits, and enroll in insurance coverage. For more information visit: www.healthcare.gov (<https://www.healthcare.gov>) or www.bewellnm.com (<http://www.bewellnm.com>)

Housing Services

See the Students Resources (p. 30) section for room descriptions, accommodations, application process, deposit requirement, regulations and eligibility.

For current rate information, please visit our website at: <http://housing.nmsu.edu/>.

Dining Services

See Housing and Residential Life (<http://catalogs.nmsu.edu/nmsu/general-information/student-resources>) section for meal plan descriptions, application process, deposit requirement, regulations and eligibility. Freshmen living on campus must choose between Aggie Unlimited and Aggie Choice Plans.

	Fall/Spring	Summer
Aggie Unlimited (unlimited entrances + 100 Aggie Dining \$)	\$1,900.00	n/a
Aggie Choice (230 entrances + 325 Aggie Dining \$)	\$1848.00	n/a
Aggie 64 (64 entrances + 325 Aggie Dining \$)	\$894.00	n/a
Pistol 400 (0 entrances + 400 Aggie Dining \$)	\$400.00	n/a
Family Resident Optimum 350 (350 entrances)	\$1,388.00	n/a
Family Resident Optimum 250 (250 entrances)	\$992.00	n/a
Aggie Choice 150 (150 Entrances)	\$1,299.00	n/a
Aggie Choice 100 (100 Entrances)	\$999.00	n/a

Payment of Charges

By enrolling in classes at NMSU, a student makes a financial commitment to pay the tuition and fee charges associated with his/her enrollment. The enrollment action constitutes a financial obligation between the student and NMSU and all proceeds of this agreement will be used for education purposes and constitutes an education loan pursuant to 11 U.S.C 523(a) (8). Terms and Conditions of Course

Registration are posted on the NMSU website and available in each term's registration guide. Payments can be made by mail, web, telephone, or in person at University Accounts Receivable. Cash, checks, money orders and limited types of credit cards are accepted. Term charges can be paid in full or paid by using a payment plan. For payment plan options visit the NMSU website. Fees vary based on the plan. All financial aid received must be paid towards balances owed. Additional penalty charges may be assessed for failure to make payments when due. The University reserves the right to deny a payment plan to any student who has a poor credit rating or who has been negligent in making payments to the University for previous debts. Course enrollment may be cancelled if payment arrangements for past due dates are not completed by the deadlines as outlined on the Important Dates website. Academic credits, transcripts, and diplomas will be withheld until all financial obligations are paid in full. Students are prohibited from registering for a term/semester until all previous debts due to the University are paid in full.

Tuition Adjustments, Refunds and Forfeitures

Students officially withdrawing from all courses or dropping a course(s) during a semester or term are eligible for a 100-percent refund of tuition and fees through the deadlines listed online as outlined on the Important Dates for each term. Students withdrawing from a course(s) after that deadline will not be eligible for a refund and will remain liable for payment of full tuition and fee charges. Non-attendance does not constitute an official course drop or withdrawal. It is the student's responsibility to withdraw from the university and/or drop a course if he/she decides to not attend once enrollment has taken place. All charges due to NMSU must be paid before refunds or adjustments will be permitted.

In cases of academic or disciplinary suspension, eligibility for tuition refunds and adjustments will depend on the conditions of the suspension and will be entirely at the option of the institution. Should unforeseen circumstances beyond the reasonable control of New Mexico State University result in curtailing classes, closing residence facilities, or otherwise withdrawing services that are a normal function of the institution, refunds of any nature will be at the discretion of the college/university administration.

Residence hall rentals and dining hall charges may be refunded in accordance with schedules adopted by these departments.

Delinquent and Prior-Term Balances

NMSU reserves the right to cancel the registration of any student who fails to pay, when due, any indebtedness to the institution.

Academic credits, transcripts, and diplomas will be withheld until all financial obligations are paid in full.

Dishonored Financial Transactions - Checks, Credit Cards, ACH Transactions

The University charges a penalty on all dishonored cash instruments. Personal checks will not be accepted from students who have had previously dishonored checks.

Late Registration Fee

A late registration fee of \$25 is imposed if registration has not been completed before the late-registration period begins. Failure to make

scheduled payments with the University Accounts Receivable on due dates may result in additional liability.

Estimating Other Expenses

In addition to the direct costs stated above, other expenses per semester may include such items as textbooks and supplies (estimated at \$300) and personal expenses (estimated at \$460).

Cooperative Education

Students participating in the Cooperative Education Program who receive academic credit pay the same tuition and fees as regularly enrolled students. Work phase students who are assigned to campus or a nearby off-campus workstation may pay for the student wellness/fitness as if they were a part-time student enrolled in 1-5 credits.

Ways to Qualify for Lower Tuition Rates

Resident or nonresident status is determined in accordance to a uniform definition established for all New Mexico institutions by the Higher Education Department, State of New Mexico. The NMSU Registrar's Office administers residency. Information on the following programs may be obtained from the University Admissions, the University Financial Aid and Scholarship Services, the NM Administrative Code (NMAC) 5.7.18.

- American Indian Agreement
- Athletic Grant
- Colorado-Arizona Reciprocal Agreement
- Dual Credit
- Fire Fighter and Peace Officer Survivor Scholarship
- Foreign Military Dependent
- Foreign Military Spouse
- Foreign Military Stationed in New Mexico
- Graduate Assistantship
- Immigrant Student (NM HS GRAD)
- Military Dependent
- Military Spouse
- Military Stationed in New Mexico
- NM Competitive Scholarship
- Part-time Students
- Senior Citizen Waiver
- Summer Session
- Texas 135
- Veteran Waiver
- Western Undergraduate Exchange
- WICHE/WUE

WUE states include Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, North Dakota, Oregon, South Dakota, Utah, Washington, Wyoming and the Commonwealth of the Northern Mariana Islands. For more information about any of the above ways to qualify for lower tuition rates please contact the University Accounts Receivable Office or the University Registrar's Office.

Financial Aid & Scholarship Services

University Financial Aid and Scholarship Services administers a broad spectrum of loans, grants, scholarships and work-study funding in an attempt to meet the financial need of the university's students.

University Financial Aid and Scholarship Services awards financial aid to students according to their individual need. Parents of students are expected to contribute to their child's education according to their ability, taking into account their income, assets, number of dependents and other relevant information. Students themselves are expected to contribute from their own assets and earnings, including appropriate borrowing against future income. All information provided to University Financial Aid and Scholarship Services is regarded as confidential.

Students applying for financial aid must complete a Free Application for Federal Student Aid (FAFSA) designed to determine, in accordance with state and federal guidelines, the difference between what the student and/or family is expected to contribute and the cost of attending any campus within the NMSU System. Among the factors that determine the family's Expected Family Contribution (EFC) are:

1. annual adjusted gross income as reported to the Internal Revenue Service;
2. savings, stocks, and/or bonds;
3. other assets in the form of a business, farm or real estate;
4. nontaxable income and benefits; and
5. student's prior year income and assets.

Students applying for financial aid should complete a FAFSA by visiting www.fafsa.ed.gov/ (<https://fafsa.ed.gov>).

Please refer to the NMSU-Las Cruces, Financial Aid and Scholarship Services web site for more information on available financial aid. A complete listing of programs and policies is available at: <http://fa.nmsu.edu>.

General Eligibility Requirements

To receive financial aid you must demonstrate that you are qualified to obtain education by:

- Having a high school diploma or a recognized equivalent such as a General Educational Development (GED) certificate or
- Completing a high school education in a home-school setting approved under state law.

If you were enrolled in college in an eligible program or career school prior to July 2, 2012, you may show you are qualified to obtain a higher education by:

- Passing an approved ability-to-benefit test (if you don't have a diploma or GED, a college can administer a test to determine whether you can benefit from the education offered at that school);
- Completing six credit hours or equivalent course work toward a degree or certificate (you may not receive aid while earning the six credit hours)

- Be enrolled or accepted for enrollment as a regular student working toward a degree or certificate in an eligible program.
- Be a U.S. citizen or eligible noncitizen (state funded scholarships are available to undocumented students).
- Have a valid Social Security number. If you don't have a Social Security number, you can find out more about applying for one at www.ssa.gov (<http://www.ssa.gov>).
- Must be meeting satisfactory academic progress (SAP).
- Sign a statement on the FAFSA certifying that you will use Federal student aid only for educational purposes.
- Sign a statement on the FAFSA certifying that you are not in default on a federal student loan and that you do not owe money back on a federal student grant.
- Register with the Selective Service, if required.

Financial Aid Awards

All financial aid awards are based on information provided by the student and/or parents, availability of funds and eligibility requirements. Any award may be revised based on changes in enrollment, cost of attendance, application of graduation, family contribution or failure to meet satisfactory academic progress. Withdrawals or reductions in enrollment may affect an award or any future awards. Financial Aid will not pay for audited courses or some repeats.

Federal Direct Subsidized Loans

This is a loan program for eligible undergraduate students who demonstrate financial need. The U.S. Department of Education pays the interest on a Direct Subsidized Loan while the student is enrolled in school at least half-time.

Federal Direct Unsubsidized Loans

Loans that are made to eligible undergraduate and graduate students that do not demonstrate financial need. Unlike other federal loans, interest accrues while the student is attending school.

Repayment of a Federal Direct loan begins six months after graduation or six months after enrollment drops below 6 credits or less than half time for undergraduate students.

Students receiving a subsidized or unsubsidized Federal Direct Loan, must complete an online entrance counseling session before NMSU will issue the funds. In addition, students must complete an exit interview upon graduation or withdrawal from the university.

Federal Perkins Loans

A school-based loan program for undergraduate and graduate students with exceptional financial need. Under this program the school is the lender. A Perkins Loan must be repaid according to Federal Guidelines. Repayment begins nine months after graduation or nine months after enrollment drops below 6 credits for undergraduate students.

Grants

The Federal Pell Grant is a federal grant available to undergraduate students with documented financial need. Pell Grants range from \$593 to \$5,920, though these figures are subject to change each year. If a Pell Grant is insufficient to pay educational expenses, the student may be eligible to receive other types of aid, including a Federal Supplemental Educational Opportunity Grant (SEOG) or Leveraging Education Assistance Partnership Program Grant (LEAP), and/or other miscellaneous grants. These grants are awarded to undergraduate

students who show exceptional financial need. For more information, contact University Financial Aid and Scholarship Services or visit the university's financial aid website at: <http://fa.nmsu.edu/>. Generally, grants do not have to be repaid.

Work-Study Programs

The Federal Work-Study Program provides employment opportunities for selected undergraduate students with demonstrated financial need. The New Mexico Work-Study Program also provides employment opportunities for New Mexico resident students.

For more information on the U.S. Department of Education student aid programs, go to <http://studentaid.ed.gov/> or see the NMSU Financial Aid web site at <http://fa.nmsu.edu> (<http://fa.nmsu.edu>).

Scholarships and Other Aid

Many students finance part of their education with scholarships, which may be awarded for academic achievement, special skills, talent and/or based on the applicants financial need.

The NMSU System has a variety of scholarships that are offered to incoming freshman, transfer, continuing and graduate students. State, institutional and private scholarships may also be available but amounts, deadlines and eligibility requirements vary. For more information, contact University Financial Aid and Scholarship Services or visit the university's scholarship web site at <http://admissions.nmsu.edu/scholarships/>

To be considered for most scholarships with the NMSU System you are required to apply online through Scholar Dollar\$, at <https://scholarships.nmsu.edu/>. One scholarship application serves all students with the NMSU system, regardless of campus.

Financial Aid Satisfactory Academic Progress

Federal regulations require that financial aid recipients meet certain academic standards to be eligible for federal financial aid. To ensure that financial aid recipients are making satisfactory academic progress, academic transcripts are reviewed at the end of each term to determine eligibility for the next term. All terms of attendance are reviewed, including periods in which the student did not receive financial aid. All transfer credit hours are taken into account when satisfactory progress is reviewed. The Financial Aid SAP standards are not the same as the NMSU System's Academic Standards of Progress criteria.

Elements of Financial Aid Satisfactory Academic Progress

- Qualitative Progress: Undergraduate students must maintain a cumulative GPA of at least 2.0 (a C- average). Grade point values are:

Letter Grade	Grade Points per Unit of Credit
A+ / A	4.0
A-	3.7
B+	3.3
B	3.0
B-	2.7
C+	2.3
C/ C-	2.0
D+/ D/ D-	1.0
F	0

I, CR, RR, PR, NC, W, AU	not calculated in the GPA
--------------------------	---------------------------

- **Completion Rate:** Students must complete a minimum of 70 percent of all coursework (registered credit hours) attempted within the NMSU System. Any course with a grade of withdraw (W), incomplete (I), repeats (RR), failure (F), audit (AU), or no credit (NC) is not considered completed coursework. Repeated courses are included in the calculation.
- **Maximum Time Frame:** Undergraduate students must complete their program within 150 percent of the published length required by the program. Students who have reached the maximum allowable time will be suspended from receiving financial aid. Limited developmental/remedial hours are excluded from this calculation. Total attempted hours including repeated courses and transfer coursework are included in the student's maximum time frame calculation.
- **Recipients of financial aid grants and loans who drop credits or withdraw** may be required to return all or a portion of awarded Title IV funds. Further information regarding the return of Title IV funds is available on the NMSU-Las Cruces web site at <http://fa.nmsu.edu/resources/return-of-title-iv-funds/>.

Financial Aid Warning

"Warning" is a status assigned to a student who fails to make satisfactory academic progress at a school that evaluates satisfactory academic progress at the end of each payment period and/or term, and chooses to allow students who fail its progress standards to continue to receive aid. If the student has not returned to satisfactory standing after this additional semester, he or she will be suspended from further financial assistance until the satisfactory progress standards are met.

Financial Aid Suspension

Students are suspended from receiving financial aid if they do not meet satisfactory academic progress standards for financial aid purposes. Students on financial aid suspension will not receive any form of federal or state financial aid (grants, loans, work study). Financial aid eligibility is reinstated when all standards of satisfactory progress are met.

The Appeals Process

Students suspended from financial aid may appeal the suspension if there are mitigating circumstances affecting their progress. Students who would like to appeal the suspension must submit an appeal form, available at: <http://fa.nmsu.edu>. They must also submit all required documentation to University Financial Aid and Scholarship Services. A committee will review the appeal and may grant reinstatement of financial aid based on mitigating circumstances that directly contributed to deficient academic performance. Appeals are evaluated on a term-by-term basis. All appeals, including relevant documentation, must be submitted by the semester deadline based on the current semester of enrollment. A student may *appeal the termination of eligibility only twice during his or her career* within the New Mexico State University System.

Contact Information

For information about Withdrawals please see the NMSU System Academic Regulations (p. 53) section of the catalog and the Registrar's Office (<http://registrar.nmsu.edu>) website.

Resources for Students

Aggie Health & Wellness Center

The university maintains a well-equipped integrated health center on campus, with a comprehensive medical care, laboratory, pharmacy, x-ray, and counseling services. Hospitalization and emergency services are available in the community. Undergraduate students are eligible for services at the Center. Those students enrolled for 12 or more credits (6 in a summer session) may access the Center as fees have been paid through full-time enrollment. Students enrolled for less than 12 credits (5 in summer session) may choose to pay the wellness fee or office fee for medical care. The Center accepts payment for medical services through cash, credit card, student account and insurance reimbursement.

Counseling services at Aggie Health & Wellness provides students and the campus with individual, couples and group counseling, crisis intervention, career counseling, outreach programs and consultation. We assist students who are dealing with issues such as relationship concerns, depression, anxiety, stress management, trauma and self-esteem. In addition, Aggie Health & Wellness also has services and resources that support harm reduction. These services include: WAVE (Wellness, Alcohol, and Violence Education) which provides the campus with information concerning the decisions that surround alcohol use, sexual assault, and violence prevention; social work services operates the Aggie Cupboard, an on-campus food pantry and provides resource support for students who may need assistance with housing, insurance or other basic needs. All services are strictly confidential and are free.

The Aggie Health & Wellness Center is open Monday- Friday from 8:00 am - 5:00 pm during the academic year and Monday - Friday 8:00 am - 12:00 pm & 1:00 - 5:00 pm during university breaks and summer. The Center is located on the corner of Breland and Stewart Sts. For more information, please call (575) 646-1512 or visit the website at wellness.nmsu.edu (<http://wellness.nmsu.edu>).

Campus Activities

The Office of Campus Activities offers involvement outside the classroom, an essential component of the student's academics. Campus Activities collaborates with campus and community entities to create opportunities for student involvement, group and individual leadership and personal development. Campus Activities coordinates activities and events through the Activity Registration process for chartered student organizations, administers the University Sales and Solicitation Policy, the Freedom of Expression Policy, and serves as the university liaison to the Interfaith Council.

Campus Dining

First-year students living in the residence halls, who recently graduated from high school, are required to participate in a Meal Plan and are limited to the Aggie Unlimited and the Aggie Choice 230. The Meal Plan dining contract runs for an entire academic year (unless applying for the Spring Semester only) and charges are applied to a student's university account each semester.

Any registered student may participate in the Meal Plan program whether living on or off campus to include continuing, commuter, as well as Graduate students. A variety of Meal Plan choices are available to suit their lifestyle.

Application procedures and additional information may be obtained from the ID Card Services Office by calling (575) 646-4835 or via e-mail at idsvs@nmsu.edu, or by stopping by Room 137 in Corbett Center Student Union between 8:00 am - 4:30 pm Monday - Friday. The mailing address is:

ID Card Services Office
PO Box 30001, MSC 3 ID
Las Cruces, NM 88003

Other Food Services Options

In addition to the Meal Plans, food service is available at various locations throughout the campus by using cash, NMSU Aggie Cash, the NMSU Enhanced Aggie ID Card, a credit/debit card, or, in most areas, the Aggie Dining Dollars included with a Meal Plan package. Food service location hours are available at dining.nmsu.edu (<https://dining.nmsu.edu>). Additional information can be obtained by contacting the ID Card Office between 8:00 am - 5:00 pm at (575) 646-4835, idsvs@nmsu.edu, by visiting the office on the 1st floor of the Corbett Center Student Union. You may also visit us at idcard.nmsu.edu (<https://idcard.nmsu.edu>).

Career Services

The mission of Career Services is to offer programs, services and resources that will contribute to students life-long career planning efforts. Staff members work closely with deans, department heads, faculty and employers to assist students and alumni in developing suitable career opportunities based on their education, experiences and interests. Additionally, Career Services coordinates interviews between prospective employers, students and alumni. The staff advises students on the career-planning process and career-search strategies. Current information on employment trends, a comprehensive library of career literature, and electronic career products help students make educated decisions. Also, career fairs are held throughout the academic year. Students can launch their career plans through registration in AggieCAREER Manager.

Excellent experiential opportunities, through the following programs, contribute to forming students' career goals:

On-Campus Employment: Information is available for part-time employment through federal work-study, student employment and graduate assistant programs. Available opportunities are advertised on AggieCAREER Manager located on our website below.

Off-Campus Employment: Part- and full-time jobs in Las Cruces, requiring general or very specific qualifications, are listed and referrals are made for students.

Cooperative Education and Internship Program: Information is available on Cooperative Education and internship opportunities offered by government, nonprofit organizations and business/industry.

For comprehensive information on all programs and services offered by Career Services please visit us at Garcia Annex Room 224, call (575) 646-1631, or review our services online at <http://careerservices.nmsu.edu>.

Center for Academic Advising and Student Support

The Center for Academic Advising and Student Support will be housed in Garcia Annex and new freshmen attending Aggie Welcome and Orientation this summer will be the first class to be fully integrated into the new advising center. The transition for students currently enrolled at NMSU will take effect after the beginning of the Fall 2017 semester. Leadership for the Center for Academic Advising and Student Support is Dr. Jennifer Hodges (jphodges@nmsu.edu) as Interim Director and Marissa Fowler (<http://provost.nmsu.edu/advising/marissa-fowler-bio>) (marimaci@nmsu.edu) as Interim Associate Director.

Cooperative Education and Internship Program

Today's competitive employment market necessitates that students gain practical experience related to their major before they finish their college degree. This experience is called Experiential Learning.

NMSU enjoys a national reputation for its Cooperative Education (Co-op) and Internship Program, which contributes to students' total educational experience and realization of career goals by integrating academic theory and practical application on the job. Co-op and Internship assignments provide varied work experiences with employers from business, industry, government and nonprofit organizations. All Co-op work assignments are for continuing full-time students, and must be completed prior to graduation. Each semester (spring, summer, & fall) that a student participates in an approved Co-op a notation is placed on his/her permanent academic transcript.

Students may register full-time for the alternating plan, working one of more work phases throughout the U.S.; each work phase will last the duration of an academic semester. Work phases are separated by at least one semester of full-time on-campus classroom instruction. Note: While on an alternating work phase, students are afforded full-time academic status with the university, which protects enrollment status, financial aid and other student eligibilities, whether they are registered for any credit or not.

Continuous academic enrollment can be maintained through the parallel plan, wherein a student works part-time (approximately 20-29 hours per week) concurrent with full-time enrollment. Employers are generally located within commuting distance of the university.

In addition to gaining academically related work experience, Co-op students establish positive work ethics, receive remuneration for their educationally related experiences, and also may potentially arrange for course credit through an academic department.

Experiential Learning also includes internships. Internships vary in definition based on the employer and can be one-time or multiple semester work assignments that may or may not be curriculum-related, short or long duration and are paid or unpaid. Internships may qualify for

the NMSU Cooperative Education and Internship program, if they meet the program requirements. Approved internship work assignments for continuing full-time students must be completed prior to graduation. Each semester (spring, summer & fall) that a student participates in an approved part-time or full-time Internship a notation is placed on his/her permanent academic transcripts. Internships may earn academic credit through the approval of an academic department.

All students interested in Cooperative Education or Internships must first register with the Cooperative Education and Internship Program office located in Career Services, Garcia Annex. Registration includes an NMSU AggieCAREER Manager Account and an advising session.

For more information contact:

Cooperative Education and Internship Program, MSC 3509
PO Box 30001
Las Cruces, NM 88003-8001
Phone: (575) 646-4115

<http://careerservices.nmsu.edu>

Corbett Center Student Union

Corbett Center Student Union (CCSU) serves as the center for campus life, providing programs and services for students and other members of the university community. CCSU is a place to study, relax, meet with student groups, eat, work or play; CCSU offers students, faculty and staff a variety of services and activities. The union is the home to several administrative offices, Campus Activities, Associated Students of NMSU (ASNMSU), Housing & Residential Life, Campus Dining Services, the student radio station and student newspaper. Services offered include an auditorium, meeting rooms, multiple dining facilities (both retail and residential), student attorney or student legal aid services, ATMs, a computer lab, study areas, post office, fitness center, game room and a convenience store.

For more information contact:

Corbett Center Information Desk
MSC CC, PO Box 30001
Las Cruces, NM 88003
Phone: (575) 646-4411 or (575) 646-4530
ccsu.nmsu.edu (<https://ccsu.nmsu.edu>)

Distance Education

The Office of Distance Education extends New Mexico State University's reach beyond traditional programs to provide opportunities for students to meet their academic, professional and personal learning goals. Distance Education courses from NMSU are delivered using the most innovative technology and methods available, including web-based technologies, ITV (Interactive Television), faculty exchanges and off-site classes.

Distance Education (DE) programs are designed to serve students who live a significant distance away from the Las Cruces campus or have scheduling conflicts due to family or work obligations and often find distance education as the best solution to educational advancement. DE at NMSU is defined as the formal education process of delivering educational instruction so students physically remote from the campus of program origin and/or instructor may participate. Distance education degree programs at NMSU are delivered using a variety of formats including 100% online, or combinations of ITV, online and face-to-face

instruction at the Las Cruces campus or off-site locations such as NMSU community college campuses. Visit <http://distance.nmsu.edu/degree-programs/> for a complete listing of programs.

For further information, contact the Office of Distance Education (ODE) located in Milton Hall, room 185. Contact ODE by calling (575) 646-8231, or email: distance@nmsu.edu. For current information, visit: <http://distance.nmsu.edu/>.

Bachelor's Degree Completion Programs

All undergraduate degree programs offered through NMSU-Las Cruces are bachelor's degree completion programs. These programs require that students have all lower-division (100 and 200 level) credits completed before admittance into the program. Bachelor degree completion programs normally require two years of 300 and 400 level upper-division coursework to finish. The undergraduate degree completion programs vary in delivery format. Some are 100% online; some use web-based delivery and online; and some use online combined with face-to-face or ITV instruction at off-site locations such as NMSU community college campuses. Visit <http://distance.nmsu.edu/degree-programs/> for a complete listing of programs.

Online Bachelor's Degree Programs

NMSU- Las Cruces partners with the NMSU Community Colleges to provide 100% online bachelor's degrees <https://distance.nmsu.edu/online-bachelors/> where the first two years are completed at the community college and the second two years are completed through the online bachelor's degree completion programs. The academic plans for the 2+2 online bachelor's degrees are aligned for a smooth transition between programs and colleges.

Off-Site/Extension Programs

Distance education programs listed under this category are delivered primarily face-to-face at off-site/extension locations. Often, these courses will enhance instruction and learning with technology. Programs are located at NMSU two-year and Albuquerque Center campuses, as well as other locations throughout the state. Several degree programs are available at one or more off-site/extension locations. Visit <http://distance.nmsu.edu/degree-programs/> for a complete listing of programs.

Technology-Based Programs

Distance Education programs listed under this category are delivered primarily using distance learning technologies. In some cases, programs may require brief residencies on the Las Cruces campus for orientation, assessment, or other activities. Technologies used to deliver distance education at NMSU include:

- **Instructor Canvas** - the learning management system enables instructors to utilize the Internet in the delivery of a course
- **Adobe Connect** - the web-conferencing system, offers a synchronous Web delivery solution for conducting virtual or live classroom events through the Web
- **Instructional Media Services** - provides course delivery primarily through ITV. However, a variety of synchronous and asynchronous technologies may also be used. Courses may use what is known as a "blended approach" to instruction by integrating two or more types of technologies shown above to promote engaging and effective learning.

Edgar R. Garrett Speech and Hearing Center

Combining instruction, evidence-based practical experience, state of the art technology, and service, the center provides training for students in Communication Disorders and renders service to the community. Students have opportunities to participate in diagnostic evaluations and to provide therapy in the areas of speech, language and hearing for clients across the lifespan.

Referrals are accepted from all sources (self, medical, school, nonprofessionals). The Edgar R. Garrett Speech and Hearing Center is a fee-for-service clinic where university students, staff, faculty and their immediate family receive a reduced rate. All services are supervised by speech-language pathologists who are licensed in New Mexico and hold the Certificate of Clinical Competence in Speech-Language Pathology or Audiology from the American Speech-Language-Hearing Association. Services are available in English and Spanish.

For further information, contact:

Edgar R. Garrett Speech and Hearing Center
MSC 3SPE, PO Box 30001
Las Cruces, New Mexico 88003-8001
Phone: (575) 646-3906
TTY: (575) 646-6191
<http://spedcd.education.nmsu.edu/cd/shc/>

Housing and Residential Life

Living on campus is an opportunity for an investment in a student's academic success. As campus residents, students are part of the campus community with more opportunities to join clubs and attend campus events. Students are within walking distance to classes, the student union, activity center, library, bookstore and many other campus resources. The university strongly encourages students to take advantage of the many opportunities available through campus residency. Studies show that compared to their off-campus peers, students who live on campus are more likely to: maintain higher grade point averages, use campus resources, interact more with professors, and ultimately graduate on time (within four years).

Residency Requirement

All incoming first-time, first-year students must reside in university-operated housing or complete an exemption request as part of the campus enrollment process. First-year students will be assigned to the residence halls and must reside for two consecutive semesters to satisfy this requirement. The Board of Regents approved a few reasons for students to be exempted from this requirement:

- The student is living in a structure environment provided by a parent, legal guardian, or immediate family member (as defined as a grandparent or aunt/uncle). Living with an adult sibling is not included in this exemption.
- Students residing with a spouse, domestic partner, and/or dependent child(ren).
- A student is 21 years or older, enrolled exclusively in distance education, or who are active military or veterans.
- Other extenuating circumstances including financial hardship or special medical accommodation.

Students are asked to submit specific documentation to support each of the reasons presented above. Please visit housing.nmsu.edu/exemptions (<http://housing.nmsu.edu/exemptions>) for more information.

Application Procedures and Acceptance

To qualify for housing the student agrees to be enrolled continuously in at least half-time or more at either the undergraduate or graduate level during the fall or spring semesters as degree seeking. Completed applications for housing should be submitted as early as possible, preferably one regular semester in advance. Submission of housing application indicates acceptance of the terms and conditions of the applicable agreement. Housing applications require a deposit and fee at the time of application. Certain qualifications must be met to apply for summer housing, single student apartment and family housing. To view the various housing options visit <http://housing.nmsu.edu/options> or contact the housing office at (575) 646-3202 or Housing and Residential Life MSC 3BB, PO Box 30001, Las Cruces NM 88003-8001. Housing typically has a May 1 priority deadline for both residence hall and campus apartment contracts. Student family housing applications are accepted on a more rolling basis.

The university will assign accommodations subject to the space available. Assignments to a particular building, type of accommodation, specific room or apartment, single room or roommate(s) are not guaranteed. The university reserves the right to change or cancel assignments in the interest of order, health, safety or discipline with appropriate written notice. The university reserves the right to deny housing to any student. Examples of reasons for denial include, but are not limited to, individuals who have criminal histories, individuals who have behavioral problems which may, in the opinion of the university, negatively impact the group-living environment, individuals who have been previously terminated from campus housing, or individuals who have poor rental histories. Student behavior expectations, rights, and responsibilities related to living in university-operated housing can be found at housing.nmsu.edu/guide (<http://housing.nmsu.edu/guide>).

Availability of Units for Students with Disabilities

There are a limited number of specially equipped residence hall rooms, single student apartments and family housing units available to students with disabilities who wish to reside in campus housing. These are assigned on a first come, first-served basis. Specific needs or requirements (i.e., roll-in showers, special door openers, etc.) should be discussed with the Office of Student Accessibility Services on an individual basis prior to submitting an application.

Residence Halls

Residence halls offer furnished, mostly suite-style rooms, large lobbies and plenty of outdoor space. Each residence hall has its own personality and environment, offering students a variety of choices while providing the amenities, social interaction and academic support. Living Learning Communities (LLCs), provide a benefit which allows members to live in the same hall and on the same floor with other students who share common academic interests. More information on the extensive offerings of LLCs can be found at housing.nmsu.edu/llc (<http://housing.nmsu.edu/llc>). Inclusive Housing is offered in the residence halls for those students who are Gender Variant as well as Lesbian, Gay, Bisexual, and Transitioning and Questioning. Inclusive Housing provides a living environment where a student can room with any other student regardless of sex, gender, gender identity/expression or sexual orientation. Alcohol is not permitted in the residence halls.

Single Student Apartments

Campus apartments offer students more than just affordable housing. Campus apartments offer a unique college atmosphere where neighbors share similar goals and together form an academic community unlike any found off campus. Available for second-year to graduate students, on-campus apartments have the benefits of on-site staff, prompt maintenance and amenities such as a computer lab and laundromat. Efficiencies, one, two and four bedroom options are available and include living rooms and kitchens. Apartments are fully furnished and the semester rate includes utilities, cable TV and internet connectivity. Campus apartments feature a select number of co-ed housing options, where students may share an apartment with whichever gender they choose.

Student Family Housing

Completed applications for Student Family Housing should be submitted at least six weeks in advance. Family Housing occupants are assigned once the application process is completed. Applications are considered incomplete and cannot be processed if requested information and supporting documents are not provided and payment of the associated fees is not received. Family Housing applicants may select six, nine or twelve-month agreement, with thirty (30) day notice to vacate or request for renewal, prior to an expiration of the agreement. Family units include married couples, married couples with children, single parents with dependent children and domestic partners (as defined by NMSU Policy found at <http://benefits.nmsu.edu/other/domestic-partner/>). Consideration is also given to veterans and non-traditional dependent family units. As part of the application process, a criminal history check will be conducted for all adult occupants over the age of 18. Current residents will undergo a criminal history check no less than once a year. In addition, a rental payment history will also be conducted. By signing the application, you authorize New Mexico State University to conduct this process. Results of the criminal history checks and rental payment history may be shared with the applicant. Single family homes include two bedrooms, a bath, kitchen and living room. Four-bedroom units include two bathrooms, a kitchen and living room. All units offer a stove and refrigerator and are unfurnished. The monthly rent includes utilities, cable TV, and internet connectivity. Some pets are allowed in parts of Student Family Housing, reference the pet policy at <http://housing.nmsu.edu/guide>.

Community Development

Housing and Residential Life develops safe and engaged communities which supporting students' efforts to achieve academic success and strong social connections at NMSU. Our live-in student (Resident Assistants) and professional staff members (Resident Directors) work to meet students' needs, and create a fun, positive experience for our residents. Residents can expect to have progressive conversations with student staff members, enjoy a myriad of social, educational, and recreational events, and engaged in community meetings and health and safety inspections. Residents are encouraged to join organizations such as community councils, Residence Hall Association (RHA) and the National Residence Hall Honorary, or Greek Life to help shape the community experience and learn more about leadership skills.

Books, Supplies, Parking and Transportation

The New Mexico State University bookstore and parking office are both conveniently located at the corner of Jordan Street and University Avenue. The bookstore provides an avenue for students to obtain assistance with purchasing required books and supplies. The Parking & Transportation office assists with parking permits and transportation services questions.

ID Card Services

The NMSU Aggie ID Card is the official identification card that provides access to everyday life at NMSU. The Aggie ID Card serves as a membership card for meals, Aggie Dining Dollars, Aggie Cash, Aggie Print, as a key to the residential halls, access to various buildings, carries proof of eligibility for access to athletic events and allows for other student services. This information is added to your card after registration for classes and financial arrangements have been completed. Please visit idcard.nmsu.edu (<https://idcard.nmsu.edu>) for more information.

Aggie Cash is a pre-paid account that allows you to use your Aggie ID Card to make purchases at locations all over campus. The NMSU Enhanced Aggie ID Card allows your student card to also be your Wells Fargo debit card. The ID Card Services Office in Corbett Center Student Union, Room 137 has the information and applications you will need. For more information please contact us at (575) 646-4835.

Information and Communication Technologies

Information and Communication Technologies (ICT) provides the university community with the computing and communication resources and services that support the educational, research, and public service missions of the university. These resources include NMSU's central computing systems, the network that supports the systems and the wired and wireless functionality through which the Internet is accessed. ICT operates the student computer labs found throughout the Las Cruces campus; maintains and manages laptop, desktop, camera, and projector checkout and rental for students; network registration of internet connected devices which is required for access to the NMSU network; and student printing known as Aggie print. Information about specific resources are available at <http://studenttech.nmsu.edu/> ICT also provides support for all NMSU technology users through the ICT Help Desk.

For further information, contact:

Information and Communication Technologies (ICT)
MSC 3AT, PO Box 30001
Las Cruces, NM 88003-8001
Phone: (575) 646-1840
email: help@nmsu.edu

ICT's web homepage is located at <http://ict.nmsu.edu> and the helpdesk webpage is located at <http://help.nmsu.edu/>. The helpdesk is located in room 105 of the Hardman and Jacobs Undergraduate Center.

National Student Exchange Program

Under the National Student Exchange Program (NSE), students may pay NMSU tuition and attend any of 180 colleges or universities across the nation. NSE allows students to broaden their academic, social, and cultural awareness through study in different geographical settings. To qualify for the program, an applicant must be a full-time student with a 2.5 grade-point average and must be a sophomore, junior, or senior at the time of exchange. Applications for the program are accepted from October through February for the following academic year. Late applications may be accepted if space permits.

Grades and credit hours earned at the host institution become part of the official NMSU transcript upon approval of the academic advisor and

records officer. Grades are recorded according to the NMSU grading system.

New Mexico State University Library

The New Mexico State University Library is a Destination for Discovery that offers access to rich content and research-level collections in two library facilities located in the heart of the campus. Zuhl and Branson libraries house over 1.8 million items and provide electronic access to scholarly journals and databases for both general academic and discipline-specific research. View the large geological collection and artworks on display at Zuhl Library and explore historical collections within the Archives and Special Collections Department at Branson Library. Reference assistance and research support are provided by a team of faculty and staff dedicated to student learning and success. There are a variety of study areas available including quiet and group spaces, some of which can be reserved. Over 100 PCs, scanners, laptops, and other resources are available for students to use. More detailed information may be found at <http://lib.nmsu.edu>.

Office of International and Border Programs (IBP)

The Office of International and Border Programs oversees the comprehensive internationalization of the university. Overseen by the Associate Provost for IBP, it is the umbrella unit responsible for the welfare and recruitment of incoming international students, outgoing education abroad students, and global learning in general. IBP also represents the university with U.S. government agencies, foreign governments, international education professional associations and the private sector concerning international activities. The office also advocates for effective curricular and co-curricular practices, policies and procedures to internationalize the university and provides programs and services to increase international understanding and awareness in the campus and local community, including southern New Mexico and northern Mexico. The major program areas are reflected in its five offices listed below, each overseen by its own Director. The offices work closely together on all aspects of internationalization.

Office of Education Abroad – This office oversees all study, research, internship and service abroad programs, coordinates Faculty-Led International Programs (FLiPs) that allow faculty to take NMSU students abroad on for-credit programs, and coordinates all programs and services for visiting exchange students.

Office of International Student and Scholar Services – This office ensures that the needs of NMSU's international students and scholars are met, and oversees all international undergraduate admissions. This includes application processing, transcript evaluation, orientation, advising and institutional compliance with U.S. Department of Homeland Security and U.S. Department of State regulations as they pertain to the F and J visa programs. The office also has an important role in facilitating international student programming and cross-cultural activities.

Center for Latin American and Border Programs – This center is responsible for strengthening the university's involvement in US-Mexico and Latin American cooperative projects including research, economic development and educational outreach.

Center for English Language Programs – This office provides all intensive English language training for the NMSU community. CELP prepare students for matriculation into regular degree programs, and also engages in international contracts for special English training programs.

Confucius Institute – This institute is dedicated to increasing awareness and understanding of Chinese language and culture in the community through education. The CI provides teachers and instructional materials for K-16 Chinese language instruction, as well as through performances, seminars, and community outreach. The Institute is a joint project supported by both NMSU and the Hanban/Confucius Institute Headquarters, which is a public institution affiliated with the Chinese Ministry of Education.

The Office of Education Abroad

This division of International and Border Programs is the international education program development and coordination unit that assists colleges and departments with integrating study abroad into the undergraduate and graduate curriculum. It manages support services for outbound study abroad students and inbound international exchange students and coordinates all international partner exchange agreements, intensive language immersion and faculty-led programs as well as all credit-bearing international research, service and internships. The division also sponsors the Study Abroad Ambassadors Club, a chartered student organization that provides support to international exchange students at NMSU. Additionally, the Office of Education Abroad works closely with Housing and Campus Life to provide leadership and oversight for the Global Village Living and Learning Community.

All NMSU students, including community college students, may apply to study abroad while maintaining NMSU student status to receive regular course credit through Faculty Led Programs, international distance education language credit and teacher education credit (graded A+ through F), and/or receive transfer credit (graded CR) per regular NMSU transfer credit guidelines. For most exchanges with international partner institutions, students must have completed two full semesters of university study, maintained a 2.75+ grade-point-average, and obtained permission of their college to receive transfer credit. For other programs, students must be in good standing academically at NMSU, and receive permission to enroll from the course instructor or program coordinator. International Business majors must receive permission from their department for study abroad to count as required in their degree plan. At least four weeks of a study abroad program may count for a waiver for 3 credits of Viewing the Wider World (<http://oea.nmsu.edu>).

Parking Office

NMSU requires a parking permit to park in campus parking lots or curbside on streets. Parking meters require payment. Free parking is available near the Pan American Center. The campus parking map is available online at park.nmsu.edu (<http://park.nmsu.edu>). Parking regulations are enforced between the hours of 7:30am - 4:30pm. Disabled parking spaces, emergency/fire zones, service zones and yellow curbs are enforced 24 hours a day. Parking Regulations are available at park.nmsu.edu (<http://park.nmsu.edu>).

Information on purchasing a parking permit is also available online at park.nmsu.edu (<http://park.nmsu.edu>) or at the Parking Department located at 1400 E. University Ave. (southwest corner of the Auxiliary Services building between Barnes & Noble and Panda Express) Monday through Friday from 8am - 4:30pm. When visiting, you may park for free in designated spots just south of the building. Aggie Transit is a free campus shuttle service available to all students. Bus route maps are available at park.nmsu.edu (<http://park.nmsu.edu>).

Transportation and Parking Services is responsible for issuing parking permits, enforcing parking regulations and developing parking lots as well as maintaining information related to the university fleet.

Student Accessibility Services

In compliance with the federal regulations outlined in Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 2008, NMSU is committed to providing accommodations and academic adjustments to ensure equal access for students with disabilities. Students who wish to request an accommodations or academic adjustment for face-to-face and online classes, practicums and internships must follow the established procedures for self-identification by completing the intake process with Student Accessibility Services (SAS).

For more information, please visit the SAS office in Corbett Center Student Union:

Room. 208
MSC 4149, PO Box 30001
Las Cruces, NM 88003-0001
(575) 646-6840

Sustainability Courses at NMSU

The following courses have been identified as being Sustainability-Focused. These courses may be used to attain an 18 credit minor in a sustainability related discipline offered in the departments of

- Anthropology (p. 181),
- Engineering Technology (p. 572),
- Management (p. 442) and
- Plant and Environmental Sciences (p. 145).

AG E 315V	World Agriculture and Food Problems	3
AG E 337V	Natural Resource Economics	3
AG E 384V	Water Resource Economics	3
AGRO 100G	Introductory Plant Science	4
AGRO 483	Sustainable Production of Agronomic Crops	4
AGRO 515	Crop Physiology	3
ANTH 362	Environmental Anthropology	3
ANTH 538	Plants, Culture, and Sustainable Development	3
BCIS 502	Business Information Systems	3
BIOL 301	Principles of Ecology	3
BIOL 462	Conservation Biology	3
BLAW 530	American Indian Law and Policy	3
CHME 330	Environmental Management Seminar I	1
E S 110G	Introductory Environmental Science	4
E T 300	Special Topics	1-3
E T 381	Renewable Energy Technologies	3
E T 386	Sustainable Construction and Green Building Design	3
E T 400	Special Topics	1-3
ECDV 671	Sustainable Economic Development	3
ECON 337V	Natural Resource Economics	3

ECON 384V	Water Resource Economics	3
EPWS 380V	Science & Society	3
FWCE 255	Principles of Fish and Wildlife Management	3
GEOG 315V	World Agriculture and Food Problems	3
HON 305V	Global Environment	3
HORT 100G	Introductory Plant Science	4
HORT 315	Crop Physiology	3
HORT 485	Vegetable Crop Management	4
HRTM 430	Hospitality Facilities Management	3
HRTM 450	Special Topics	1-4
HRTM 492	Special Problems	1-4
MGT 375V	Global Environmental Assessment and Management	3
MGT 388V	Leadership and Society	3
MGT 448	Business Consulting	3
MGT 449	Strategic Management	3
MGT 458	Comparative International Management	3
MGT 465	Contemporary Issues in Human Resources Management	3
MGT 548	Business Consulting	3
MGT 590	Strategic Management	3
MGT 591	New Venture Creation	3
MGT 655	Seminar in Organizational Systems and Theory	3
SOC 465V	Environmental Sociology	3
WERC 330	Environmental Management Seminar I	1

Student Success Centers

New Mexico State University offers a variety of learning assistance, and tutorial services via the Student Success Center. The Student Success Center provide services to assist NMSU students in reaching their academic potential. The Student Success Center provides study skills assistance in such areas as: time management; memory; concentration; note taking; reading; test preparation; test taking; math; science; speed reading; critical thinking; financial wellness, as well as graduate school and professional skills test preparation. The services are available to students in the following formats:

1. Individualized assistance is provided to any student who walks in at The Student Success Center
2. Degree credit is offered under

UNIV 110	Personal Learning Skills I	1-3
UNIV 112	Academic and Personal Effectiveness	2
UNIV 113	Speed Reading	1
UNIV 114	Financial Literacy Money Matters	2
UNIV 150	The Freshman Year Experience	3
UNIV 300	Preparing for the Graduate Record Examination	1
UNIV 350	Peer Education	3
UNIV 395	Independent Study	1-3
3. Learning strategies and study-skills workshops provide quick assistance in one-hour presentations offered throughout the semester.

4. Professional and graduate school workshops provide development in such areas as speed reading, getting into graduate school, preparing for the GRE, GMAT, LSAT, MCAT, or NMTA.
5. Student Success Center staff provide outreach presentations on learning and study-skills topics to classes, programs and organizations on campus.
6. The Campus Tutoring Service (CTS) provides walk-in and online tutoring at no charge; and the QuickConnect Early Alert and Intervention Program is an early warning and intervention system, utilized by faculty, focused on first-year students.

For comprehensive information on all programs and services offered by the Student Success Center please visit us at the Hardman and Jacobs Undergraduate Learning Center Room 128, call (575) 646-3136, or review our services online at <http://ssc.nmsu.edu>.

Testing Services

Testing Services provides test information and registration materials for the following tests:

- American College Testing Assessment (ACT);
- College Level Examination Program (CLEP);
- High School Equivalency (HSE);
- General Education Development (GED) and HiSet;
- Graduate Management Admission Test (GMAT);
- Graduate Record Exam (GRE);
- Miller Analogies Test (MAT);
- Pearson VUE Test Site;
- PRAXIS Series;
- Pre-Professional Skills Test (PPST);
- New Mexico Teacher Assessments;
- and others.

For more information contact:

Testing Services
MSC 3DA, PO Box 30001
Las Cruces, NM 88003
Phone: (575) 528-7294
<http://dacc.nmsu.edu/testing>

Trio Student Support Services Program

TRIO Student Support Services program offers academic and social support to ensure that program participants succeed at NMSU. Services that are provided to participants include the following:

- **Mentoring** – participants meet with a mentor each week for assistance in adjusting to college, learning and using campus resources, developing effective study skills, accessing financial aid, using academic peer advising, staying motivated and dealing with personal issues associated with college. Mentors are certified by the College Reading and Learning Association.
- **Tutoring** – individual tutoring is available by appointment in science, math, engineering, agriculture, social sciences, humanities, business and foreign languages. Tutors are certified by the College Reading and Learning Association.
- **Computer Lab** – complete assignments and check email.

- **Cultural Activities** – participants receive tickets to cultural/educational activities such as plays, dance productions and symphonies.
- **Equipment Loans** – digital recorders and programmable calculators are available to participants.

To qualify for the program, students must be a first generation college student (neither parent received a four-year baccalaureate degree), meet income guidelines set by the US Department of Education, demonstrate an academic need or have a learning or physical disability. Admission to the TRIO Student Support Services is highly competitive with only 350 slots available for eligible students.

For comprehensive information on program services offered by the TRIO Student Support Services Program please visit us in the Student Success Center located at the Hardman and Jacobs Undergraduate Learning Center Room 128, call (575) 646-1336, or review our services online at <http://ssc.nmsu.edu/trio-student-support-services/>

Undergraduate Research Programs

New Mexico State University has a variety of faculty-mentored undergraduate research programs that offer students the opportunity to demonstrate knowledge gained within the classroom and apply it to scholarly research projects. In addition to offering the opportunity to write an honors thesis and work individually with faculty members through an independent study project is a sample sub-set of research programs available to undergraduates:

- Aggie Innovation Space
- Building Research Achievement in Neuroscience (BRAiN)
- Fred Hutchinson Partnership for the Advancement of Cancer Research Project
- Howard Hughes Medical Institute (HHMI)
- iCREDITS Center
- New Mexico Alliance for Minority Participation (AMP)
- Maximizing Access to Research Careers (MARC)

Graduate Research Facilities

The University recognizes and supports the concept of off-campus study and research as a valuable experience for graduate students. These experiences may take the form of internships, intensive study of specialized techniques with personnel at other institutions, and conducting research at specialized research facilities. Arrangements for such off-campus activities should be made with the student's committee and the graduate dean and should represent opportunities not normally available at this university. When the bulk of a student's research is to be conducted off-campus, both on- and off-campus advisors should be appointed and periodic meetings with the student's committee held to ensure timely progress. Such opportunities offer students considerable flexibility in their training and promote valuable contacts between the student, the university, industry, and research institutions. Students are encouraged to pursue these opportunities with their advisors and the graduate dean.

Agricultural Experiment Station

The Agricultural Experiment Station is the research division of the College of Agricultural, Consumer and Environmental Sciences. Faculty, professional personnel, and graduate students conduct basic and applied research concerned with biological, physical, and economic phases of

food and fiber production, processing, and distribution; consumer health and nutrition; and the social and economic aspects of rural living. Energy, environmental, and natural resource conservation aspects of these broad disciplines offer many opportunities for the graduate student to undertake meaningful research investigations in both the laboratory and the field.

There are eight departments on the main campus with excellent laboratory facilities for research. In addition, the station maintains 13 field research centers including eight agricultural science centers, a forestry research center, a livestock research center, an animal insect lab, and two research ranches.

The station provides financial support to graduate research assistants and cooperates with research institutes at the university and with various state and federal agencies in providing opportunities for graduate research programs covering a wide scope of student interests. For further information, contact aesdean@nmsu.edu or visit <http://aces.nmsu.edu/aes/>.

Apache Point Observatory (APO-ARC)

Apache Point Observatory (APO) is located in the mountains of south-central New Mexico and is operated by New Mexico State University. The observatory is a major astronomical research facility that is home to four telescopes. The largest is a fully equipped 3.5-meter telescope that can be used for optical and infrared imaging, photometry, and spectroscopy. Apache Point Observatory is also the site of the Sloan Digital Sky Survey 2.5-meter telescope, which is running several different wide-field surveys touching on many facets of astronomy. NMSU owns and operates a 1-meter telescope at APO for wide field imaging. There is also a 0.5-meter telescope at the site.

Apache Point Observatory is owned by the Astrophysical Research Consortium (ARC). The consortium members include: New Mexico State University, the University of Colorado, the University of Virginia, the University of Washington, Georgia State University and Johns Hopkins University. NMSU manages and operated the observatory for the ARC consortium. Astronomy faculty and graduate students use the facility for various research projects. For further information, e-mail astro@nmsu.edu.

Arts and Sciences Research Center

The research center is the coordinating office for all scholarly activities within the College of Arts and Sciences. The primary functions are service to departments and faculty members, and the administration of grants and contracts. The center encourages and stimulates individual research and creative efforts in all areas of the college, and it facilitates the development of potential research programs within the college, and with other colleges, institutes, the Physical Science Laboratory, and external organizations. The center assists individual faculty members by providing small grants of "seed" money. Typically, support services fall within, but are not limited to, the following areas:

- Location of funding sources
- Administration of grants and contracts
- Financial management of grants and contracts
- Liaison with the Office of the Vice President for Research

Contact: Olga Ostos at oostos@nmsu.edu
<http://www.nmsu.edu/~artsci/Research/center.html>

Bioinformatics Research Lab

The bioinformatics research lab develops efficient computational and statistical methods to model mechanisms of complex biological systems. The lab's work rigorously evaluates both the theoretical and practical effectiveness of computational methods for characterizing molecular interactions from high-throughput measurements such as next generation sequencing data. The lab's long term goal is to invent advanced computational technology to expedite quantitative understanding of the complexity of life processes.

Director: Joe Song
<http://www.cs.nmsu.edu/~joemsong/group.shtml>

Biology Research Facilities

The Department of Biology houses multiple core facilities and individually faculty-maintained research laboratories that have been successful in the acquisition of millions of dollars in research grants from the NIH and NSF, as well as other agencies. The facilities and equipment include a cell culture facility, insect and invertebrate rearing and microbiology culturing facilities, diverse microscopy laboratories, as well as a well-maintained herbarium and vertebrate museum holding more than 100,000 specimens from our region and beyond. Individual research laboratories are equipped to investigate organismal genomics, transcriptomics, and microbiome analysis; organismal and microbial evolutionary mechanisms and physiology; vaccine development; host-symbiont interactions; cell mitosis and cytokinesis; plant pathology; neuronal and muscular tissues; animal vocalization and behavior; computational modeling of biological phenomena; and molecular systematics.

Contact: Dr. Ralph Preszler (rpreszle@nmsu.edu)

Bureau of Business Research and Services

Founded in 1969, the bureau has two basic objectives. The first is to provide business and economic research services to both public and private sectors of the state, the region and the nation. Research capabilities in the behavioral and managerial sciences, business systems, economic and social sciences, marketing, statistical design and analysis and regional planning can be applied to problems relating to economic growth, business development and community needs in New Mexico.

The second objective of the bureau is to provide management training services to business organizations and associations, to government agencies, and to the public as well. Management development seminars, training programs, and analytical services are designed to meet specific organizational needs.

The Bureau of Business Research and Services is a member of the Association for University Business and Economic Research.

Contact: Dr. William Gould (wgould@nmsu.edu)

Carlsbad Environmental Monitoring and Research Center

Created in 1991 with a grant from the U.S. Department of Energy, the Carlsbad Environmental Monitoring & Research Center (CEMRC), a department of the College of Engineering, conducts environmental research, provides special analytical services, assists with technology development, and disseminates information for federal, state, and private sponsors. CEMRC is housed at Light Hall, a 26,000-square-

foot facility located in Carlsbad, in southeast New Mexico. The facility's laboratories include radiochemistry and associated nuclear spectroscopy, environmental organic and inorganic chemistry, in vivo bioassay, and field sampling. A primary activity of CEMRC is long-term environmental monitoring for contaminants in the region of the Waste Isolation Pilot Plant (WIPP), located near Carlsbad. The data produced from this project are summarized in periodic reports and are presented on the CEMRC web site at www.cemrc.org (<http://www.cemrc.org>). Primary research areas of the CEMRC include studies of atmospheric dust and inorganic contaminants, human and ecological risk assessment, and development of radioanalytical and spectroscopic methods for measurement of naturally occurring and human-produced radioactive elements. Results of CEMRC research projects appear in peer-reviewed scientific journals and are presented at national and international meetings.

Contact: Dr. Russell Hardy at (575) 234-5555

The Center for Animal Health and Food Safety

The Center was founded in 2007 and is comprised of three primary functional research units:

1. Chemical Analysis and Instrumentation Laboratory maintains high-end analytical instrumentation which is available to support collaborative research within NMSU, the State of New Mexico and other educational or industrial partners.
2. Food Safety Microbiology Laboratory specializes in research and development of foodborne pathogen detection and control; food product testing, including microbiological analyses, pH, aw; process evaluation of acidified foods, inoculation studies, shelf-life testing, and contracting to establish food safety plans (e.g. HACCP plans, *Listeria* control programs).
3. Veterinary Entomology Research Laboratory provides a state-of-the-art large animal research facility located on 45 acres, with a 5000 sq. ft. large animal laboratory, capable of housing 24 animals individually in environmentally controlled rooms. The laboratory maintains multiple insect rearing facilities for major ectoparasites including: house flies, stable flies, horn flies, face flies, mosquitoes, lice, mites and ticks. The facility has outdoor housing for 60 large animals in covered, individual outdoor stanchions, in addition to housing for wildlife species including: deer, elk, bighorn sheep and rabbits.

Director: Dr. Tanner Schaub (tschaub@nmsu.edu; (575) 646-5156)

Center for Latin American and Border Studies

The Center for Latin American and Border Studies (CLABS) was established in 1979 by the College of Arts and Sciences and is located at the Nason House. CLABS supports *Frontera NorteSur*, an on-line journal about the U.S.-Mexico border. In addition, CLABS supports the collection at the NMSU library, travel for faculty to conferences, language training in Spanish and Portuguese, lectures by visiting speakers, curriculum development for teachers, the student Latin American organization, and other outreach activities. It has a faculty governance organization and helps administer the Nason foundation fund. In recent years the center has pursued an active program of research on U.S.-Mexico border policy issues, in cooperation with several universities in the United States and Mexico.

Contact: Dr. Cornell Menking (cmenking@nmsu.edu)

Chemistry and Biochemistry Research Facilities

The Department of Chemistry and Biochemistry has a comprehensive equipment base that supports research in nearly all phases of chemistry. It also has instrumentation dedicated to the department's teaching mission. Major instruments supporting both missions include five nuclear magnetic resonance (NMR) spectrometers ranging from low field (200 MHz) to high field (500MHz), two atomic absorption spectrometers, several UV-Vis spectrometers, two mass spectrometers (LS/MS) and four gas chromatograph instruments. Details about all instruments located in the department's facilities can be accessed at http://www.chemistry.nmsu.edu/instrumentation/NMSU_MainInstrument.html.

Instrumentation Facilities Manager: Jaime Rodriguez (jarodrig@nmsu.edu)

Cooperative Extension Service

As a land-grant institution, New Mexico State University has a tripartite mission—instruction, research, and extension. The three parts of this mission are closely interrelated and mutually reinforcing. New Mexico State University's Cooperative Extension Service serves a unique role in New Mexico. As the state's land-grant university, and as mandated by its charter, it is the "leading object" for agriculture, home economics, engineering, business, health sciences, as well as educational programs in the liberal arts and natural sciences. NMSU's uniqueness arises from its vision of teaching/learning, research, and extension/outreach functions—interdependent, mutually supportive and central to its land-grant mission.

The extension aspect of the university's mission is the process of extending the intellectual expertise and resources of the university through teaching and applied research to address the social, civic, economic and environmental challenges and opportunities facing our state, region, nation, and global community. Extension entails an organized and planned program of activities; these activities bring the resources of the university to bear in a coherent and strategic fashion for the benefit of the citizens of New Mexico and the nation. Many faculty have split appointments with the Agricultural Experiment Station and serve as graduate advisors for students interested in extension as a career. For more information see <http://extension.nmsu.edu/>.

Core University Research Resources Laboratory

The Core University Research Resources Laboratory (CURRL) is a campus-wide, core facility providing all levels of technical support and consultation for investigators needing analytical and routine transmission, scanning electron microscopy, and light microscopy services. The integrated imaging facility is administered through the Office of the Vice President for Research and is considered a core research facility. The facility was established to furnish state-of-the-art microscopy instrumentation and techniques to investigators and their students for research and training. The laboratory is located in Skeen Hall, RM W152, and W160.

Director: Dr. Huiyao Wang (huiyao@nmsu.edu)

Data Management and Data Analysis (DATA) Research Lab

The Data Management and Data Analysis (DATA) research lab aims at advancing techniques for the effective management and analysis of complex data (e.g., sequence data, graph data, semi-structured data). The laboratory conducts research in modeling, storing, querying and mining large amount of complex data at both theory and application levels. The laboratory keeps active collaborations with scientists from other Computer Science areas and scientific disciplines to broaden the usage of data management and data mining techniques. The laboratory is located in Science Hall, Rm. 153.

Director: Huiping Cao
<https://kddlab.nmsu.edu/>

Dissect Laboratory

DISSECT (Discovering Science through Computational Thinking) is a laboratory established by a joint team of researchers from the Department of Computer Science and the College of Education. The lab is housed in Computer Science on the second floor of the Science Hall. DISSECT provides physical space and facilities to nurture interactions between computational scientists and educational researchers in order to develop innovative technologies that will expose K-12 students to fundamental principles of computing. The laboratory provides workspaces and high performance workstations for graduate students as well as a dedicated network and offices for researchers and visitors.

Director: Dr. Enrico Pontelli (epontell@cs.nmsu.edu).

Educational Research Center (EDRC)

The Educational Research Center (EdRC) in the College of Education is the administrative office which supports faculty in obtaining and managing external funding. The academic which supports faculty in obtaining and managing external funding. The academic component of the ERC, under the direction of the Associate Dean for Research, facilitates faculty involvement in research, publishing and outreach initiatives with the goal of building a strong research agenda for the college. The business component of the ERC is the Education Research and Budgeting Office (ERB) which assists in proposal submission, account setup and monitoring and provides oversight for the College's unrestricted, restricted and legislative funds.

ERB Director: Juanita Hannan (juamendo@nmsu.edu)

Engineering Research Center

The mission of the College of Engineering's Engineering Research Center (ERC) is to support the faculty and staff of the college in building research programs of nationally and internationally recognized excellence. The ERC assist faculty and staff in their pursuit of research funding, management of their research, and in ensuring research activities are in compliance with all relevant laws and regulations.

The ERC disseminates information to the college regarding state, national and international research trends, programs and policies. The ERC identifies potential funding opportunities and calls for proposals that may be a fit for college faculty and staff. The ERC works with the Office of the Vice President for Research and the other NMSU colleges to bring together multi-disciplinary teams.

Engineering Research Center for Bio-Mediated and Bio-Inspired Geotechnics (CBBG), Engineering Research Center for Re-inventing the Nation's Urban Water Infrastructure (ReNUWIt), and Tran-Set: Transportation Consortium of South-Central States.

For proposal preparation, the ERC pre-award team assists the faculty with interpretation of sponsor guidelines, development of the proposal budget, completion of standardized forms, review of the proposal for adherence to sponsor requirements, and submission to the NMSU Office of Grants and Contracts for their review and final submission. The post-award staff assist the faculty and staff with award management, including working with the NMSU Sponsored Projects Accounting office. The ERC is responsible for financial management of college grants and contracts.

Contact: Dr. Phillip DeLeon (pdeleon@nmsu.edu)

Freeport-McMoran Copper & Gold Water Quality Laboratory

The Water Quality Laboratory in the College of Engineering was established by a gift from Freeport-McMoRan. It is located in ECIII rooms 106 and 110. Current capabilities of the lab include:

- Dionex ICS-2100 Ion Chromatographic System (ICS) with an AS-DV autosampler, the ICS-2100 is configurable for either anions or cations;
- PerkinElmer Elan DRC-e Inductively Coupled Plasma for Mass Spectrometry (ICP/MS) with dynamic reaction cell (DRC) capability;
- Perkin Elmer Series 200 High-Performance Liquid Chromatography (HPLC) with UV/Vis Detection;
- Gas Chromatography (Agilent model 7890) using a mass spectrometer detector (Agilent model 5975C) (GC/MS) using an Agilent 7693 autosampler;
- A 16-vessel Multiwave 3000 Microwave Reaction System by Anton Paar;
- Micromeritics ASAP 2050 High Pressure Sorption Analyser that uses a dewar with liquid nitrogen or antifreeze for temperature control. The antifreeze temperature is controlled from -20° to +75° Celsius using a PolyScience PD15R-30 recirculator bath;
- Shimadzu TOC-Vcsh Total Organic Carbon Analyser (TOC) with a Total Nitrogen Measurement Unit (TNM-1) option;
- Malvern Zetasizer Nano ZS for zeta potential and size measurement of suspended particles;
- Anton Paar Surpass for zeta potential measurement of membranes, granules, or fiber particles; and
- a Millipore Direct Q3 water purification system.

Analyses may be performed by a researcher after receiving training on the device.

Contact: Mark Chidester, (575) 649-0840, mchidest@nmsu.edu

Geochemistry Research Laboratory

The Department of Geological Sciences houses a number of analytical instruments, all of which are available for use by graduate students, undergraduate researchers, and faculty. The department houses a Laser Ablation Multi-Collector Inductively Coupled Plasma Mass Spectrometer (LA-MC-ICPMS) for analysis of isotopic ratios of microsamples, an X-ray fluorescence spectrometer for geochemical analysis of rocks and other solid materials, a thermal ionization mass spectrometer for analysis

of isotopic ratios of solids and liquids, and a laser-induced breakdown spectrometer for the analysis of solid materials. Sample preparation equipment is available to support research on these instruments. In addition, mineral separation equipment including a jaw crusher, Gemini shaker table, Franz magnetic separator, and heavy liquids, is available for geochronologic or other mineralogic research projects.

Contact: Dr. Nancy McMillan (nmcmillan@nmsu.edu)

ICredits: Interdisciplinary Center of Research Excellence in Design of Intelligent Smartgrids Technologies

The Center, funded through a grant from the National Science Foundation, is focused on the development of novel hardware/software technologies and methodologies to enable the design, development, deployment and evaluation of microgrids and smartgrids. The Center is housed in Science Hall; it supports research activities at the boundaries between power systems and computer science. The Center also promotes the development of educational and outreach activities aimed at enhancing the awareness and training in all areas relevant to the smartgrids vision.

Contact: Dr. Enrico Pontelli (epontell@nmsu.edu)

Institute for Energy and the Environment

The Institute for Energy & the Environment (IEE) is a unit within the Engineering Research Center IEE's programmatic efforts focus on interdisciplinary research, education, and outreach to develop comprehensive solutions for environmental, energy and water challenges in the southwestern United States and worldwide. IEE offers opportunity for conducting research to the graduate and undergraduate students at NMSU. IEE's major objectives include renewable energy, biofuel, advanced water treatment and desalination, and advancing education, training and outreach in areas of environment, energy and water.

Director: Dr. Phillip DeLeon (pdeleon@nmsu.edu)

Knowledge Representation, Logic and Advanced Programming Laboratory (KLAP)

The KLAP lab was established in 1994 through an RIMI grant from the National Science Foundation and has developed into a focal research laboratory of international reputation. It is housed in the Department of Computer Science. KLAP's research focus is to advance state-of-the-art knowledge in Artificial Intelligence and High Performance Computing and its application in diverse interdisciplinary domains such as bioinformatics and assistive technologies.

The lab provides a full meeting space (with multimedia projection capabilities), access to eight high performance work stations, a dedicated high performance computing server and a 40-core Infiniband Beowulf cluster. The lab has hosted international researchers and has graduated approximately 100 graduate students with MS and Ph.D. degrees. It has attracted almost \$10,000,000 in external funding.

Director: Dr. Enrico Pontelli (epontell@cs.nmsu.edu)

Networks and Systems Optimization Lab (NSOL)

The Networks and Systems Optimization Laboratory (NSOL) supports research in networking and communication including, but not limited to: wireless networks, the Internet, supercomputing networks, and online social networks. This research includes optimization problems, protocol design and development, hardware design and development, and mechanisms for improving security and privacy of communications (including cybersecurity). The lab has a 24 core blade server (RAID-10) that is used for extended simulations and back-up, five desktops, five laptops, and four smartphones, which form a networking testbed.

Director: Satyajayant "Jay" Misra

<http://nsol.nmsu.edu/>

New Mexico Department of Agriculture

The New Mexico Department of Agriculture (NMDA), under the control of the NMSU Board of Regents, is responsible for administering laws and regulations that daily affect the lives of every citizen of the state. These laws and regulations (concerning the production, preparation, processing, sale, and use of agricultural products; weights and measures; and petroleum products) are designed to assist producers, processors, and consumers. NMDA's marketing program provides guidance to commodity groups in the promotion of agricultural products. A broad consumer service in many areas other than agriculture is provided by the department. NMDA's director is New Mexico's secretary of agriculture and serves on the governor's cabinet as a liaison between state government and the agricultural industry. For further information, e-mail: <mailto:pio@nmda.nmsu.edu> (pio@nmda.nmsu.edu). NMDA's web site is at <http://www.nmda.nmsu.edu>

New Mexico State University Library

The New Mexico State University Library is a Destination for Discovery that offers access to rich content and research-level collections in two library facilities located in the heart of the campus. Zuhl and Branson libraries house over 1.8 million items and provide electronic access to scholarly journals and databases for both general academic and discipline-specific research. View the large geological collection and artworks on display at Zuhl Library and explore historical collections within the Archives and Special Collections Department at Branson Library. Reference assistance and research support are provided by a team of faculty and staff dedicated to student learning and success. There are a variety of study areas available including quiet and group spaces, some of which can be reserved. Over 100 PCs, scanners, laptops, and other resources are available for students to use. More detailed information may be found at <http://lib.nmsu.edu>.

New Mexico Water Resources Research Institute

The New Mexico Water Resources Research Institute (WRRI) at NMSU, established in 1963, was one of the first of 54 water institutes in the United States. The WRRI program encompasses all state universities in New Mexico and public agencies sponsoring water research. The institute serves as a coordinator, assisting researchers in obtaining funds, working with granting agencies, and serving as the administrator for projects. The annual budget of approximately \$1.5 million is made available from federal, state, and/or private sources through a variety of grants and contracts. All research projects administered by the institute encourage graduate student participation. As a result, about 30 students

a year receive scientific training through institute-sponsored projects. WRRRI also sponsors the Annual New Mexico Water Conference, which has provided a public forum for state water issues since 1956. Public participation helps the institute focus its research program on areas of greatest need. The WRRRI publishes research results of every project it administers and other miscellaneous reports. The WRRRI also maintains a water resources reference room with 2,000 books and documents and the ability to link to 10,000 water-related documents on water issues facing the state and the nation. E-mail may be sent to nmwrrri@nmsu.edu. The WRRRI's homepage address is <http://nmwrrri.nmsu.edu/>.

Oak Ridge Associated Universities Program (ORAU)

Since 1991, students and faculty of New Mexico State University benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 98 colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship, and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOA facility that ORAU operates, undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the ORISE Catalog of Education and Training Programs, which is available at <http://www.orau.gov/orise/educ.htm>, or by calling either of the contacts below.

ORAU's Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU's members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research and support programs as well as services to chief research officers.

For more information about ORAU and its programs, contact:

Dr. Luis Vazquez - Interim Vice President for Research (575) 646-2481

ORAU Corporate Secretary (865) 576-3306; or Visit the ORAU Home Page (<http://www.orau.org>)

Physics Research Facilities

The Department of Physics operates a PANalytical Empyrean x-ray diffractometer for low-resolution powder diffraction, high-resolution diffraction, reciprocal space mapping with a triple-axis crystal, and x-ray reflectance. It also operates a J.A. Woollam variable angle of incidence ellipsometer (VASE) with a computer-controlled Berek waveplate compensator for measurements from 190 to 2500 nm, at room temperature and from 80 to 800 K. Both instruments are

integrated into CURRL and available to the campus community and off-campus users for a fee. See <http://xrd.research.nmsu.edu> and <http://ellipsometry.nmsu.edu> for more information and to book time on the instruments.

Contact Dr. Stefan Zollner (zollner@nmsu.edu).

Play and Interactive Experiences for Learning Lab (PIXL)

The Play and Interactive Experiences for Learning (PIXL) Lab works at the intersection of games, human-computer interaction, and mixed reality, developing game experiences that educate and function as scientific experiments in HCI. Projects center around the best means of interfacing with games, including keyboard and mouse and controllers all the way to gesture-based input, wearable systems and mixed reality. Prior research has investigated the use of games for training firefighters, and ongoing research applies this to disaster response in general and military projects. The lab provides space for students, as well as access to workstations, a modular wearable computer, tracking sensors and games.

Director: Zachary O. Dugas Toups (ztoups@nmsu.edu)

Programming Languages Environments and Software Engineering (PLEASE) Laboratory

The PLEASE lab pursues research in the practical aspects of software development, including programming languages, programming environments, and software engineering. The lab is housed in Science Hall 167 and includes workstations and work space for graduate students pursuing research in relevant areas.

Director: Jonathan Cook

<http://www.cs.nmsu.edu/please>

Psychology Research Facilities

The Department of Psychology emphasizes research in social psychology, engineering psychology, and cognitive psychology. Faculty investigate such issues as mother-infant interactions and the impact of cortisol responses to stress upon development; visual search; human factors research; auditory perception; prospective memory; emotion and social decision-making; evolutionary psychology; skill acquisition; social cognition; perception and action; embodied cognition; cognitive neuroscience (control of attention, neural dynamics; and brain-computer interfaces); and research and statistical analysis methods.

All faculty have designated labs with a large central area and 3-4 smaller adjacent rooms. This facilitates data collection from small groups or individuals. Research using the department's subject pool is managed with an online system.

The department has specialist facilities that include an EyeLink 1000 eye tracking system with experiment builder software; two 128 channel Biosemi ActiView-2 EEG systems and two shielded rooms; eight analysis workstations; and a Neuroconn DC Stimulator Plus tDCS stimulator. The lab collaborates with the Mind Research Network that has access to a Siemens 3T Trio research MR scanner, a Magvis 132 channel MEG system, and Biosemi and Geodysics EEG systems. The Auditory Perception Lab has a remote-controlled robot with binocular vision and stereo audition that is used to assess auditory performances in applied

settings; another remote controlled robot to test perceptual interfaces for remotely-operated vehicles; a 30-element speaker array to simulate real-world auditory environments; and two portable eye trackers housed in the PACMANE (Perception, Action and Cognition in Mediated, Artificial and Naturalistic Environments) lab.

Contact: Dr. Dominic Simon (domsimon@nmsu.edu)

Research Initiatives in the College of Education

The College of Education has research initiatives and labs in the following areas:

- The Kinesiology and Dance Department offers lab space for the study of biomechanics, sport psychology & motor learning, applied and basic physiology, healthy aging, physical education curriculum and kinesthetic learning.
- The Speech and Hearing Center's Benfer for voice and speech science research.
- The Special Education/Communication Disorders Department's Autism Research Initiative.
- Alliance for the Advancement of Teaching and Learning in collaboration with the Southwest Regional Educational Lab REL (Institute for Educational Services, IES) provides research for partner school district practitioners on accountability, special education/response to intervention, literacy, leadership development, math and science achievement, and program evaluation.
- The Institute for Mathematics and Science Education oversees multiple mathematics and science grants as well as serving as the STEM Outreach Center for K-12 education.
- The Counseling and School Psychology Training and Research Center provides counseling services for students, training for graduate students in counseling, school psychology and counseling psychology, and conducts research on counseling outcomes and processes.
- A Reading Research Center is housed in the NMSU Children's Village and provides reading diagnostic services including analysis of reading using eye-tracking software.

Southwest Institute for Health Disparities Research

To address the substantial health disparities that exist in Southern New Mexico and the U.S./Mexican Border Region, New Mexico State University has recently established the Southwest Institute for Health Disparities Research within the College of Health and Social Services. The purpose of the Institute is to assist faculty to secure external funding and conduct research which has the potential to reduce health disparities and improve minority health, provide health related community outreach programming, provide training for researchers, lay groundwork for additional funded research, and attract highly qualified minority faculty and graduate students to NMSU. Additionally, the Institute serves as the coordinating office for all scholarly activities within the College of Health and Social Services <http://swihdr.research.nmsu.edu/>.

Dr. Jill McDonald (jillmcd@nmsu.edu)

Southwest Technology Development Institute (SWTDI)

SWTDI, formally the SouthWest Regional Experimental Station or SWRES, was established in 1977 under DOE funding as a Photovoltaic research center. Over the last 30 years SWTDI has conducted extensive long term panel, inverter, and systems testing providing significant contribution to the field. One substantial consequence of the system testing has been the accumulation of knowledge related to the safety, installation methodology, design, and development industry standards in PV. Today SWTDI continues to be a leader in education and development of article 690 of the National Electric Code (NEC), Solar Photovoltaic Systems and continues its research in long term panel and inverter testing. However in 2012 SWTDI integrated with the Electrical and Computer Engineering Department of NMSU to broaden the research focus and has developed a microgrid for expanded research into renewable integration into the electric grid and demonstration of ongoing collaborative research with the ECE department on industry partners.

Director: Dr. Steve Bukowski (sbukowsk@nmsu.edu; (575) 646-1323)

Spatial Applications and Research Center (SPARC)

The SpARC laboratory was established in 1982 as an applied contract research laboratory for the NMSU Geography Department. SpARC provides a variety of services including planning and research, GIS, image processing, modeling and training. The original purpose of the laboratory was to undertake externally funded projects under the direction of geography faculty and employ students within the department. Thirty-four years later, the laboratory continues to do project related work. It has employed more than 150 students, and provided assistance to more than 35 faculty members inside and outside Geography. The primary clients of the lab have been federal state and local government agencies, with an emphasis on applied transportation, water resource, and environmental research projects. The lab houses 11 high performance workstations, a range of mapping grade GPS units, and a large scanner/plotter. Software available for use includes database software, ENVI image processing software, TransCAD, and the entire suite of Esri GIS software.

Director: Dr. Christopher Brown (brownchr@nmsu.edu; (575) 646-1892)

Survey Research and Program Evaluation Center

The Survey Research and Program Evaluation Center (SRPEC) is designed to assist researchers, agency directors, business leaders, and policy makers in all aspects of survey research and program evaluation. Housed in the College of Health and Social Services, the Center has state-of-the-art hardware and software for conducting phone and internet surveys of any type and length as well as facilities for conducting face-to-face interviews and focus groups. SRPEC provides a wide array of services: questionnaire design, sampling, data collection, and statistical analysis for telephone, mail, and internet surveys. Center staff are also able to assist and conduct all forms of program evaluation from formative to summative approaches, including process, outcome and impact evaluations. Bilingual (Spanish/English) questionnaire translation and interviewing are also available.

Director: Dr. Joe Tomaka (tomaka@nmsu.edu; (575) 646-3525)

University Museum

Established in 1959, the New Mexico State University Museum has provided 50 years of service to the university and community. The University Museum assists NMSU in providing quality education, advancing knowledge through research, and celebrating the culture and history of the southwest and the University. The Museum serves the community as a repository and exhibitor of local and regional history and culture. Through its care and maintenance of donated ethnographic, historic and prehistoric objects, it preserves an important part of Southwestern and Border region culture and history. The Museum encourages faculty and student research using our diverse cultural materials.

The Museum's collections are primarily anthropological (archaeological and ethnographic) with secondary collections in history and the natural sciences. Anthropological collections document the cultural diversity of the border in the Greater Southwest and northern Mexico. The Museum preserves and catalogs collections to promote research and access to cultural materials. Exhibits are developed by students and staff as well as brought in from other institutions.

Director: Dr. Fumi Arakawa (farakawa@nmsu.edu)

Curator: Anna Strankman (amstrank@nmsu.edu)

Military and Veterans Programs (MVP)

NMSU is a military and veteran friendly university which strives to provide the best possible service to our current and former servicemembers as they pursue their educational goals. NMSU Military and Veterans Programs promotes lifelong learning and professional development for veterans, active-duty military and their families, assisting them in their higher education goals by offering:

- Affordable, in-state tuition rates for active-duty military personnel and dependents using federal education benefits
- Affordable, in-state tuition rates for veterans and dependents receiving U.S. Department of Veterans Affairs education benefits
- Easily transferable credits that count toward degrees at NMSU
- Facilitation of all Department of Defense Tuition Assistance (TA) Benefits
- Courses taught online and at locations near regional military installations
- Innovative technology and course delivery methods
- Internships for veterans
- Student advocacy at every level, from admissions to graduation
- Resource materials from a variety of veteran and military service organizations
- Priority registration for all military and veteran students
- Veterans on Campus Training by Kognito, training faculty and staff on our student veterans and the unique value they bring to campus
- Salute Honor Society for student veterans
- Connection with student organizations
- A tradition of quality education

NMSU degree programs are approved by the State Approving Agency Directory at the New Mexico Higher Education Department. Eligible

students may receive education benefits from the U.S. Department of Veterans' Affairs.

For further information, contact Military and Veterans Programs at:

MSC 4740, PO Box 30001
Las Cruces, NM 88003-8001
(575) 646-4524
<http://mvp.nmsu.edu>

Costs

Active-Duty

Active-duty military personnel (Armed Forces) stationed in New Mexico or at Fort Bliss, Texas may complete a "Resident Tuition Application for Active Military, Veterans and Dependents of the US Armed Forces" waiver to qualify for in-state tuition. Spouses and minor children of active-duty personnel who are stationed in New Mexico and Fort Bliss, Texas who are not otherwise entitled to claim in-state residency, may apply for in-state tuition by submitting a "Resident Tuition Application for Active Military, Veterans and Dependents of the US Armed Forces" waiver to the Military and Veterans Programs office. Applications are available at the Military and Veterans Programs Office, online at <http://mvp.nmsu.edu>, or through the Registrar's Office.

Dependents Receiving VA Educational Benefits

Per NM 2015 HB 427:

A spouse or child of a veteran of the armed forces is entitled to pay tuition and fees at the rate provided for New Mexico residents; provided that the spouse or child is eligible for benefits pursuant to the federal Post-9/11 Veterans Educational Assistance Act of 2008 or any other federal law authorizing educational benefits for a veteran and the dependents of a veteran. Applications are available by contacting Military and Veterans Programs office.

Veterans

Veterans receiving U.S. Department of Veterans Affairs education benefits are eligible for in-state tuition through the Veterans In-State Tuition Act by submitting a "Resident Tuition Application for Active Military, Veterans and Dependents of the US Armed Forces" waiver. For further information concerning approved programs and application process, eligible persons should contact Military and Veterans Programs office.

Veteran students enrolled under the following programs are responsible for their tuition and fees in the same manner as a nonveteran student:

- Montgomery GI Bill-Active Duty (CH 30)
- Dependents (CH 35)
- Montgomery GI Bill-Selected Reserve (CH 1606 & 1607)
- Vocational Rehabilitation Program (Ch 31)

MVP Lab

The MVP lab serves as a one-stop shop for military and veteran students with numerous resources on and off campus. Military and Veterans Programs can assist you with all matters at NMSU from admissions to graduation. Military and Veterans Programs has a lab containing 6 PCs. Common Access Card (CAC) readers are available on 2 machines. The lab is open 8am-5pm, Monday through Friday and is available to all military and veteran students including dependents. Enjoy a free cup of coffee while doing your homework or just hang out and network with like-

minded veterans. We offer free fax, copy and printing services to further accommodate our students.

Regulations

Note: These regulations apply to all campuses of NMSU and are effective with the publication of this catalog. Tuition amounts, fees, and similar items subject to annual review and change are all effective with the current catalog.

Credit for Military Service

New Mexico State University will award academic credit to United States military personnel for courses and Military Occupational Specialties (MOS), based on the American Council of Education Guide (ACE) as well as through national standardized tests, such as CLEP, AP, PEP and DANTES. Credit for military-training is in accordance with NMSU Faculty Senate Legislation Proposition 24-07/08, which was passed in May 2008. Military Training and Military Occupational Specialties (MOS) must have a recommendation evaluation by ACE (in the ACE Guide) for credit to be awarded. Courses accepted for transfer credit become part of the student's official NMSU transcript and academic record. If a student wishes to appeal a decision regarding the acceptance of military training/education and/or MOS for academic credit, the student must submit a written statement of appeal to the Dean of the College to which the student has applied. The Dean will review the merits of the appeal and render a decision. The decision of the Dean is final.

Only Primary MOS (s) are eligible for academic credit in the initial review and evaluation. Credit for Duty and/or Secondary MOS may be eligible for academic credit if the student petitions the college's Associate Dean. Primary MOS is the primary specialty of a soldier and reflects the broadest and most in-depth scope of military experience. Veterans, active-duty personnel, National Guard and Reservists who are current students or students applying for admission to New Mexico State University may be granted academic credit on a case-by-case basis upon evaluation of military transcripts - the Joint Service Transcript (jst.doded.mil) and the Community College of the Air Force transcripts. Course equivalencies and credit hours awarded for a particular NMSU degree are determined by colleges and/or academic departments. Credit hours may be awarded for specific courses toward degree requirement, or as elective credit. The number of credit hours awarded will be determined by the college and/or academic department.

NOTE: Students submitting military transcripts for credit evaluation must keep in mind the Maximum Time Frame policy. See Financial Aid (<http://catalogs.nmsu.edu/general-information/financial-aid-scholarship-services>) Section.

Tuition Assistance

Tuition Assistance (TA) is a benefit paid to eligible active duty members of the Air Force, Army, Coast Guard, Marines and Navy. The Department of Defense (DoD) has given each service the ability to pay up to \$250 per semester credit hour of the actual cost of tuition (no fees) during the fiscal year (Oct. 1 - Sept. 30). TA will pay for up to 13- semester hours of a bachelor's degree and up to 39 semester hours of a master's degree. TA must be requested and approved prior to the start date of the course.

Service members must first be admitted to NMSU before they may enroll in any classes at NMSU.

Please be aware of our admission and registration process:

1. Servicemembers must apply online to be admitted,

2. login to my.NMSU.edu (<http://my.NMSU.edu>) to register for classes, and
3. create an account and Request TA through their service online portal. Each service has its own criteria for eligibility, application process and restrictions. Refer to our website for service login information: <http://mvp.nmsu.edu/tuition-assistance>

It is important to request TA for the same class and section number as enrolled in NMSU for tuition and grading purposes. Only enrollments requested and approved through their service online portal will be eligible for TA. Refer to our website for further information at <http://mvp.nmsu.edu/tuition-assistance> or contact the Military Programs Coordinator for assistance at mvp@nmsu.edu or (575) 646-4524

Military/Veteran Graduate Student Status

Veteran benefits are determined by the number of graded graduate credits of enrollment for a given semester or summer session. Listed below are the credit hours that determine student status for military veterans.

Fall and Spring semester: full-time enrollment includes 9 or more graded credit hours. Students are considered three-fourths time if they are enrolled in 7 to 8 credit hours. Half time enrollment is 5 hours. Veterans enrolled in less than 5 credit hours are reimbursed for tuition and allowable fees only.

There are several sessions within the summer term. For the 10 week summer session, full-time enrollment is 6 credit hours and half time enrollment is 3 credit hours. During the five week sessions, full-time enrollment is 4 graded credit hours."

Military Withdrawal

New Mexico State University understands that our military students may be called to active duty, specialized training or for disaster relief efforts with little notice from the U.S. armed forces; this includes an order for mobilization of the Reserve Forces as a result of a national emergency. However, the below policy does not pertain to a student's basic and/or annual training. A student who has an order for training is encouraged to formally request, through the proper chain of command, a postponement of their orders until the summer or the end of the semester they are currently enrolled in. If a student's request for postponement is denied, the student may then follow the below steps but must provide documentation that their postponement request was formally denied.

All NMSU students that have been called up for active duty must take the following steps in order to withdraw from all their classes:

1. **Military and Veterans Programs (MVP):** VA students ordered to Active Duty must provide a copy of orders to the MVP office, in Corbett Center Student Union, Room 244. To assist in reporting accurate information to the VA Regional Office, student should also provide, in writing, last day of class attendance.
2. **NMSU Registrar:** All students presenting their orders to the Registrar's Office, (575) 646-3411, will receive a military withdrawal from classes and a full tuition and fees refund for that semester or part of term that is still in progress.
3. **Bookstore:** Students who still have their receipts for textbooks purchased the semester in which they are called to active duty will be given a full refund for these textbook purchases when they present their orders. (575) 646-4431.

Veterans' Attendance and Satisfactory Progress

The U.S. Department of Veterans Affairs requires all veterans receiving VA education benefits to make satisfactory progress and systematic advancement toward an educational objective or be liable for over-payments. Satisfactory progress and regular class attendance are expected of such students.

If a veteran receiving benefits is suspended for academic reasons, benefits are terminated and will be restored only after readmission to NMSU.

If the university has liability claims filed against it as a result of a veteran failing to meet compliance requirements of the U.S. Department of Veterans Affairs, the university will not release any academic records on the veteran until such time as the veteran has reimbursed the federal government for funds drawn in violation of those requirements.

A student receiving VA education benefits who is pursuing a degree program offered by New Mexico State University should adhere to the curriculum of that program. Failure to do so will result in the student being certified for less than full-time status or becoming liable for an overpayment.

Resources for Students

Military and Veteran Housing

New Mexico State University is one of the first in the nation to offer on-campus housing specifically designated for student veterans and their families transitioning out of the military and into student life. The Department of Housing & Residential Life has worked in conjunction with the Student Veterans Organization of NMSU to offer affordable housing on campus to student veterans attending the university.

For more information, please contact Housing and Residential Life: (575) 646-3202, housing@nmsu.edu, <http://housing.nmsu.edu>.

Service Members Opportunity Consortium (SOC)

The NMSU system has been designated a Servicemembers Opportunity Colleges (SOC) Consortium university. As a member of SOC, NMSU has committed itself to fully support and comply with SOC principles and criteria, ensuring that servicemembers and their families share in the postsecondary educational opportunities available to other citizens. Those eligible are provided with appropriately accredited educational programs, courses, and services. The flexibility of programs and procedures particularly in admissions, counseling, credit transfer, course articulation, recognition of other applicable learning experiences, including those gained in the military, scheduling, course format and residency requirements are provided to enhance access of servicemembers and their families to undergraduate education programs. All SOC rules and regulations apply, including:

- Credit for military training and experience – NMSU recognizes and uses ACE Guide in evaluating military training experiences
- Reduced academic residency requirements – 25% maximum for most programs; 30% for 100% online programs
- No final year or semester requirement
- Credit for nationally-recognized testing programs such as CLEP (General and Subject exams), DSST (DANTES Standardized Subject Tests)

For further assistance contact the SOC coordinator through Military and Veterans Programs at:

MSC 4740, NMSU
P.O. Box 30001
Las Cruces, NM 88003-8001
(575) 646-4524

Responsibility of Veteran Students

Students must be pursuing a degree in a specific program to be eligible for benefits. Admission procedures for veterans and other eligible persons are the same as for all students. Academic advisors must submit degree plans to Military and Veterans Programs prior to certification. For continued certification, students must submit a Concise Student Schedule and STAR Degree Audit to the MVP office every semester.

Veterans must notify the MVP office when any of the following occur:

- Dropping or adding course(s)
- Withdrawing from course(s)
- Discontinuing regular class attendance
- Changing programs (academic majors)

VA education benefits are payable for regular attendance in courses that are part of the veteran's program (major) curriculum. VA educational benefits are not payable for:

- Classes not attended regularly
- Repeating a course for which a passing grade was received
- Classes for which credit is received through successful completion of a proficiency test or grade by examination
- Classes taken on an audit basis
- Classes that are dropped or withdrawn from
- Classes taken that are not part of the veteran's program (major) curriculum

Reserve Office Training Corps (ROTC)

The Reserve Officer Training Corps is a commissioning program designed to attract, motivate and train qualified students for military service as officers. The ROTC program is represented on the NMSU campus by the Department of Military Science (U.S. Army) and the Department of Aerospace Studies (U.S. Air Force).

Curricula in the Departments of Military Science and Aerospace Studies are divided into basic and advanced courses of two years each. Enrollment in the basic course is voluntary and involves no obligation. Participation in the advanced courses is on a contractual basis and leads to military service as a commissioned officer. Elective academic credit is granted by the university for ROTC classes.

Students with prior military service or Junior ROTC experience may receive credit, although not academic credit, for all or portions of the basic courses.

All qualified cadets enrolled in ROTC receive a stipend that varies dependent upon the year the cadet is in the program. Scholarships, which pay full college tuition as well as various laboratory, textbook and incidental fees, are available on a competitive basis.

For more detailed information about the ROTC programs, see the College of Arts and Sciences departments of Aerospace Studies (p. 179) and Military Science (p. 364) in this catalog. Additional information may be obtained by contacting the departments directly at:

(575) 646-4030 (Army)

(575) 646-2136 (Air Force)

UNIV 115 - Transition from Military to University

UNIV 115 Transition from Military to University - Making a positive transition from military to civilian life is a key to success. This course will cover a variety of topics ranging from time management to critical thinking. It is designed to assist military and veteran students in becoming more effective learners through self-awareness, effective study, learning strategies and interpersonal skills. Skills and techniques for managing military to civilian readjustment transition issues are discussed and examined.

General Education Courses

The New Mexico Common Core Requirements

General Education at NMSU provides all students with a broad foundation and common framework upon which to develop knowledge and skills, social consciousness and respect for self and others, thus enabling them to function responsibly and effectively now and in the future. General education courses at NMSU can be identified by the G suffix.

The New Mexico General Education Common Core includes designated general education courses guaranteed to transfer to any New Mexico public college or university. A complete list of approved courses can be found on the New Mexico Higher Education Department website at www.hed.state.nm.us (<http://www.hed.state.nm.us>). The current approved NMSU courses are listed below under each of the five general education areas.

In accordance to state law (Chapter 21, Article 1B NMSA 1978), the New Mexico Higher Education Department has established policies to guarantee successful transfer of completed core courses between New Mexico postsecondary public institutions.

Lower Division General Education Course Transfer Curriculum

The NMSU Prefix and Course Number will be listed first, the New Mexico Transfer Curriculum number will then be listed in parenthesis' followed by the course title and credit hours.

Code	Title	Credits

<i>Area V: Humanities and Fine Arts¹</i>			Total Credits		35-37
ART 101G	Orientation in Art	3			
ART 110G	Visual Concepts	3			

¹ For Areas IV and V of the NM Common Core, students can take 6-9 credits of each area for a total of 15 credits.

Alternatives for Meeting General Education Requirements

Students taking nine or more credits in a specific subject area, even though the courses are not designated as General Education courses, will have met the general education requirements for that subject area. For example, a student may complete ART 150 Drawing I, ART 155 2-D Fundamentals and ART 156 3-D Fundamentals (9 hours) and thereby

satisfy one course from the Area V: Humanities and Fine Arts category, even though none of those courses carries a G suffix. Please check with the college associate dean or with college advisors.

NMSU Viewing a Wider World Requirements

The Viewing a Wider World (VWW) requirement fosters intelligent inquiry, abstract logical thinking, critical analysis, as well as the integration and synthesis of knowledge. The program strives for literacy in writing, reading, speaking and listening. It teaches mathematical structures, acquainting students with precise abstract thought about numbers and space. The program also encourages an understanding of science and scientific inquiry, as it provides a historical consciousness, including an understanding of one's own heritage as well as respect for other peoples and cultures. To achieve its goals, the program includes an examination of values and stresses the importance of a carefully considered values system as it fosters an appreciation of the arts and general education. It provides the breadth necessary to have a familiarity with the various branches of human understanding. All VWW courses can be identified by the "V" suffix.

Prior to graduating, NMSU students are required to take two courses from the Viewing a Wider World list in the Undergraduate Catalog. These courses are upper-division (300-400 level) Viewing a Wider World courses and should be taken in a student's junior and/or senior year. One of the two courses must be in a college other than their own. The other course may be taken within their home college, but this course:

1. must be in a different department from their major department;
2. must not be cross-listed with a course in their home department;
3. cannot be counted as one of the requirements for the student's major.

These courses strongly emphasize the international character and multicultural influences in the fields of study and strengthen information retrieval skills. There are two options that NMSU allows for replacing 3 credits of VWW requirement with another form of educational experience, these are:

1. **Study Abroad Experience-** consisting of at least four weeks of a Study Abroad program or university coursework in a foreign country earning 3 credits.
2. **Military Experience-** for students who have served at least four weeks of military service in a foreign country.

NOTE: This list is under continuous revision. Please check with the office of the college associate dean or with college advisors for additional eligible courses. Honors courses have a specific college designation based on course content. These are listed near the end of this section.

Alternatives for Meeting Viewing a Wider World Requirements

Students taking nine or more credits in a specific subject area, even though the courses are not designated as Viewing a Wider World courses, will have met the VWW requirements for that subject area.

The 9 credit hours must be in 300- to 400-level courses in one prefix area. For example, 9 upper-division ECON credits would fulfill one VWW area for students majoring in programs other than Economics.

Graduation Requirements

For specific information about graduation requirements for specific degrees, as well as, information about the commencement ceremony and the application for degree processes please see "The NMSU System Academic Regulations section (p. 71)" for Graduation Requirements.

Recognition of Academic Achievement

NMSU has a number of university-wide programs that recognize academic achievement. These include

- the Honors College,
- the Crimson Scholars Program,
- the dean's report of academic achievement and
- graduation with honors.

In addition, many colleges and departments have their own programs and awards that recognize the academic achievement of their students.

The Honors College

The Honors College provides motivated undergraduate students with opportunities to broaden and enrich their academic programs. In small classes taught by master teachers, honors students engage in lively discussion and collaborative investigation of interdisciplinary topics. By taking honors courses, students may also work toward completing general education requirements and disciplinary requirements in the

major. There are two program options available to students: University Honors and the Honors Certificate. Each option has separate eligibility requirements, benefits, and forms of recognition for the student. For details concerning eligibility and requirements, see the Honors College (p. 639) section of the catalog.

Crimson Scholars Program

Crimson Scholars is a recognition program for academically superior students who achieve and maintain a Grade Point Average (GPA) of 3.5 or better. Crimson Scholars receive a number of benefits, including:

- Automatic eligibility for all Honors courses
- Early registration
- Recognition in the commencement program
- Regalia for Commencement that acknowledges the Crimson Scholar designation
- Permission to live in the Honors Residential Community

For eligibility criteria, see the Honors College (p. 639) section of the catalog.

Dean's Report of Academic Achievement

Following the close of the semester, each college dean publishes a list of students who have achieved honor standing in grades for the previous semester. To be eligible, a student must have been enrolled in 12 or more semester credits with a computable grade in each. The top 15 percent of eligible students by college for that semester will be named to the Dean's Honor List.

Graduation with Honors

To be eligible for a four-year degree with honors, a student must have earned at least 60 semester credits in computable grades while in residence at New Mexico State. Courses taken in the Honors College and graded S will be counted as a part of the minimum of 60 credits. The number of students at graduation, by college, receiving degrees with honors in any one year shall not exceed 15 percent. To receive high honors, a student must be in the top 1.5 percent of the graduating class by college. One person from each college will receive highest honors. In case of a tie, the student with the greatest numbers of credits earned at NMSU with computable grades will be awarded highest honors for each college. Of the students receiving highest honors from the fall and spring commencements, the student with the highest grade-point average and the greatest number of credits earned at NMSU with computable grades will be awarded the Class of 1919 Scholarship Plaque.

Preprofessional Programs

NMSU offers a number of programs designed for transfer to professional schools through its undergraduate colleges. The programs are:

Preveterinary Medicine is administered by the College of Agricultural, Consumer and Environmental Sciences

Prehealth is administered by the College of Arts and Sciences (with the exception of prenursing which is administered by the College of Health and Social Services.)

Prelaw is administered by the College of Business and by the College of Arts and Sciences. Law schools will accept undergraduates who have earned bachelor's degrees in any major. Many prelaw students take some law courses in their undergraduate program. The College of Arts and Sciences supervises a Supplementary Major in Law and Society, which

includes courses from a number of departments and several colleges. It is described under “Government” in the Arts and Sciences chapter. The College of Business offers a number of Business Law courses which can be found under the prefix BLAW in the course description chapter later in this catalog.

Further information will be found in the sections of this catalog devoted to the colleges. (See also the paragraph on Western Interstate Commission for Higher Education)

Academic Programs

Associate Degree Programs

NMSU awards both designated and undesignated associate degrees following completion of at least 60 semester credits (excluding “N” suffix courses). The last 15 to 30 credits, depending on the requirements of the college in which the degree is pursued, must be completed at NMSU or one of its Community Colleges. (Service personnel enrolled under the two-year Servicemembers Opportunity College Program may be exempt from this requirement.)

The designation Meritorious Graduate is awarded to the top 15 percent of the students receiving associate degrees within each college in any one academic year; the students must have completed 45 or more credits with computable grades at NMSU.

Las Cruces Campus

Detailed information on admission requirements, curricula, and associate degree or certificate requirements will be found in the section of this catalog devoted to the administering department/college.

- **Associate of Arts**
Administered by the Community Colleges
- **Associate of Fine Arts**
Administered by the Community Colleges
- **Associate of Science**
Administered by the Community Colleges
- **Associate of Science in Engineering Technology**
Administered by the College of Engineering

Designated Associate Degrees

The following designated associate degrees are granted to students completing the specified requirements of the degree.

- **Associate in Art and Graphic Design**
Administered by the Community Colleges
- **Associate in Criminal Justice**
Administered by the Community Colleges
- **Associate in Education**
Administered by the Community Colleges
- **Associate in Pre-business**
Administered by the College of Business
- **Associate of Arts in Heritage Interpretation**
Administered by the Community Colleges

Community Colleges

Many of the associate degrees offered on Las Cruces campus, as well as other programs, are available at NMSU's four community college campuses. For more information on community college campus

offerings, refer to the “Community Colleges (p. 643)” chapter in this catalog and to their respective catalogs or admissions offices.

Please see the Community College Catalogs for more information about the Associate Degree Programs.

- Alamogordo Catalog
- Dona Ana Catalog
- Carlsbad Catalog
- Grants Catalog

Undergraduate Programs

For a full listing of all Undergraduate Programs offered at New Mexico State University, please see the Undergraduate Admissions webpage <http://admissions.nmsu.edu/academics/>.

Graduate Degree Programs

For a full listing of the Graduate Programs offered at New Mexico State University, please see the Graduate Admissions webpage <http://gradadmissions.nmsu.edu/graduate-programs/>.

Academic Minors

Students seeking a degree may elect to complete one or more minors from those available, and the minor will be designated on their transcripts. Minors cannot be earned after the degree has been conferred.

A minor consists of a minimum of 18 credits, at least 9 of which must be upper-division. The minor may be in a single department or may be interdepartmental. Specific requirements for these minors are available in printed form in departmental and deans' offices. Specific the College sections for a complete list of the minors offered in that college.

THE NMSU SYSTEM

ACADEMIC REGULATIONS

The following regulations are effective with the publication of all the NMSU system catalogs, this includes the Las Cruces-Academic Catalog, Alamogordo Community College, Carlsbad Community College, Dona Ana Community College, and the Grants Community College catalogs. All regulations in this section of the catalog pertain to all the campuses housed with the NMSU System, this means that information for students pursuing Associate Degrees/Certificates, Bachelor's Degree, and Graduate Degrees/Certificates is within the section of the catalog.

The regulations section is broken down into different areas:

- Academic Programs of Study
- Registration
- Academic Performance and Progress
- Grading
- Withdrawals
- Degree Applications, Graduation & Commencement
- Academic Standing and Probation
- Academic Misconduct and Grievances
- The Registrar's Office

NMSU offers Associate, Baccalaureate, Master's and Doctoral degrees. NMSU also offers Certificates at the associate and graduate levels. Requirements for specific degrees and other designations are set forth by this catalog for the NMSU-Las Cruces (main) campus and the corresponding catalogs for the NMSU Community Colleges (Alamogordo, Carlsbad, Dona Ana and Grants).

Additional Degree Designations

As part of a degree program, students may also earn additional degree designations indicating fields of study such as majors, minors or concentrations. A major is defined as a recognized area of study in which there is an extensive and well-developed curriculum offered at the university, as well as adequate library resources and support services. A minor is based on courses that encompass a recognized field of study outside the student's major. A concentration is based on a collection of coursework in an area that is part of a major program of study. Degrees and additional designations awarded, limited to majors, minors, and concentrations, will be noted on the student's transcript.

Catalog Effective Period

Each annual catalog edition is effective Summer Session I through Spring Semester and is considered active for a six year period for all campuses. Curricular requirements (course requirements and number of credits required) for a specific degree or other designation may be met by completing all of the course requirements as set forth by the catalog in effect at first matriculation, or any subsequent catalog, provided the selected catalog is considered active when the requirements for graduation are met. For all other matters, the current catalog is controlling. NMSU reserves the right to withdraw courses at any time, change fees, rules, calendar, curriculum, degree programs, degree requirements, graduation procedures and any other requirements affecting students. Except as otherwise stated here, changes will become effective whenever the proper authorities so determine and will apply to both prospective students and those already enrolled.

Application for Degree/Graduation or Certificate

Degrees and certificates are not awarded automatically upon completion of the requirements of their program of study. In order to receive the degree or certificate, students must submit an application and fee in the semester in which the student expects to graduate or complete the certificate requirements. The deadline for the application and fee is specified in the academic calendar for each semester. All designations earned must be noted in the application. Additional designations may not be added to a degree after it is awarded. Students who will be completing two degrees/certificates in the same semester must apply for graduation and pay the fee for each degree separately. Students who do not meet the necessary degree or certificate requirements or otherwise elect not to graduate in the semester in which the application is filed are required to re-apply in a subsequent semester and pay another fee. Students who wish to participate in commencement must submit a separate application and pay a fee by a separate deadline established by the Registrar. Students applying for graduate degrees must satisfy additional requirements as described in the Master's and Doctoral Degree sections below.

Multiple Degrees and Designations

A student may earn more than one degree or multiple degree designations by completing all of the requirements in an appropriate catalog for each degree or designation. Students completing requirements for more than one degree must apply for and pay the application fee for each degree to be awarded. Upon completion of all requirements, multiple majors for a single degree (e.g., B.A., Major in Art; Major in Anthropology) and multiple bachelor's degrees (e.g., B.A. and B.S.) will be noted on the student's academic record/transcript and may also be granted at one commencement.

Degree Revocation

The Board of Regents reserves the right to revoke a degree should it be determined upon investigation that the degree requirements were not properly met. A degree revocation must be in accordance with NMSU policy and related rules.

Honorary Degrees

Ceremonial Honorary Degrees may be awarded in accordance with NMSU policy and rules as set forth in the NMSU Regents Policy Manual and the related Administrative Rules and Procedures.

Community College Certificate

A Community College may offer two types of certificates, the Certificate of Achievement and/or the Certificate of Completion. Certificates may be awarded independently from any degree program.

Certificate of Achievement

The Certificate of Achievement is a program of study less than 16 credits and is not eligible for Federal financial aid. This Certificate provides employment related and/or career enhancing skills necessary to succeed in a job or a chosen field of study. These courses can be a subset of those required for a corresponding Certificate of Completion or Applied Associates Degree. These certificates are recorded on the student's transcript.

Certificate of Completion

The Certificate of Completion requires a minimum of 16 credits (other Title IV requirements must be met to be eligible for financial aid) and has been approved through the academic review process. These courses can be a subset of those required for a corresponding Applied Associates Degree. These certificates are recorded on the student's transcript.

Requirements for certificates are found in the respective catalogs and sections concerning these programs. The following requirements apply to all certificates.

1. **Minimum Credit Hours:** The number of credit hours varies from certificate to certificate. Students must successfully complete the total number of credit hours as outlined in the respective catalogs and sections describing these certificates.
2. **GPA requirement:** Students must earn a minimum grade of C- in courses required for the certificate. In addition, students must have a cumulative GPA of 2.0 or better in all courses taken at NMSU or one of its community colleges.
3. **Residency:** A minimum of 6 credits earned toward the certificate must be completed at NMSU or one of its community colleges. If the certificate requires fewer than 6 credits, all credits must be completed at NMSU or one of its community colleges.

Associate's Degree

Associate's degrees are of two types. The academic associate's degree prepares students to transfer to a baccalaureate program and generally includes credits toward the first two years of a four-year degree. Academic associate's degrees include the Associate of Arts, the Associate of Science, and other named degrees that link to a specific major (the Associate of Education, for example). Other associate degrees, typically called Associate of Applied Science, prepare students for entry into the workforce. Credits for these programs may or may not apply toward a four-year degree. Students interested in transferring to NMSU or another four-year institution should check the appropriate sections of the university catalog for more information.

Requirements for the two-year associate degrees are found in the respective catalogs and sections concerning these degrees. The following requirements apply to all associates degrees:

1. **Minimum Credit Hours:** a minimum of 60 credits (excluding "N" suffix courses). Some programs of study require coursework in excess of the 60 credit-hour minimum.
2. **GPA requirement:** Students must have a cumulative GPA of 2.0 or better in all courses taken at NMSU or one of its community colleges. In addition, students must earn a C- or better in classes they take to meet the Basic Skills requirement (English 111g and one of several math course options),
3. **Residency** - 15 of the last 30 credits earned toward the degree must be completed at NMSU.
4. **Major:** All requirements for at least one major field of study as specified in the college and departmental sections of the respective catalog.

Associate Major

An associate major, consisting of at least 18 credits, may include courses from more than one department. Requirements for the Associate Majors are specified in the respective Community College Catalogs.

Baccalaureate Degree (Bachelor's Degree)

A baccalaureate or bachelor's degree provides students with a broad educational base as well as knowledge in a specific major field. Each college has unique degree requirements that are listed in the college's designated section of this catalog. In addition to the College and Department requirements, students must complete each of the following degree requirements for every Bachelor's Degree awarded by NMSU:

1. **Minimum Credit Hours:** a minimum of 120 credits (excluding "N" suffix courses)
2. **GPA requirement-** a minimum cumulative GPA of 2.0 in all courses taken at NMSU
3. **New Mexico Common Core-** 35-36 credits of state mandated general education courses (as specified in General Education section); such course are designed with a "G"
4. **New Mexico State University's Viewing a Wider World-** 6 credits of Viewing a Wider World courses; such courses are designated with a "V", or alternatives as specified in the Viewing a Wider World section
5. **Upper Division Courses-** a minimum of 48 credits in courses numbered 300 or above.
6. **Residency** – Of the last 36 credits earned toward award of the degree:
 - a. 30 credits must be completed at NMSU
 - b. 21 credits must be upper division (300 or above) and
 - c. 12 of the 21 upper division credits must be within the student's major.

NOTE: colleges or departments may require that more than 12 upper division credits be within the major and they may direct that a certain number of these credits be course specific.
7. **Major** – all requirements for at least one undergraduate major field of study, other than a supplemental major, as specified in the college and departmental sections of the catalog.

Bachelor's Degree Designations

Undergraduate Major

An undergraduate major consists of 24 or more credits within the major field, of which 18 credits must be upper-division courses, and may include courses from more than one department. Additional requirements for majors are specified in the college and department's designated sections of this catalog.

Supplemental Major

A supplemental major consists of 24 or more credits of interdisciplinary coursework, of which at least 18 credits must be upper-division (300-499), and no more than 9 credits may be from the student's major course of study. Additional requirements for supplemental majors are specified in the catalog listing for the field of study.

Undergraduate Minor

An undergraduate minor consist of 18 credits of course work, of which 9 credits must be upper-division (300-499). A minor encompasses courses that in a recognized field of study outside the student's major. At least 12 credits of a minor must be completed at NMSU. Additional requirements for minors are specified in the college and department's designated sections of this catalog.

Undergraduate Concentration

A concentration consists of 12 or more credits of coursework in a specialty area that is related to a specific major field of study. At least 9 of the 12 credits must be upper-division (300-499), and at least 9 credits must be completed at NMSU. Additional requirements for concentrations are specified in the college and department's designated sections of this catalog.

Distance Education Bachelor's Degree Completion Program

A Bachelor Degree Completion Program allows students who have met the lower division requirements (100 and 200 level) of an undergraduate degree program to complete the remaining upper-division credits (300 and 400 level) through distance delivery courses offered by NMSU

Las Cruces. Only selected degrees are available as degree completion programs. Students must complete all required lower-division (100 and 200 level) credits before they can be admitted to the Bachelor's Degree Completion Programs. The program(s) normally require two years of upper division (300 and 400 level) coursework.

Graduating with Honors

For information about graduating with Honors, please refer to the Recognition of Academic Achievement section of this catalog.

Graduate Degrees

All graduate degrees are subject to rules and regulations of the Graduate School. Degrees will be certified by the Graduate School only upon the complete review and clearance of the candidate's program of study.

Graduate Degree Designations

Graduate Major

A graduate major may include courses from more than one department, but as a minimum it must consist of at least 30 graduate credits. Additional requirements may be imposed by the State of New Mexico and New Mexico State University as specified in this Catalog.

Graduate Minor

A graduate minor is based on at least 9 graduate credits in courses that encompass a recognized field of study outside the student's major. Departments may require certain courses be a part of a minor and may exclude other courses.

Graduate Concentrations

A concentration is a collection of coursework in a specific area that is part of a degree program of study at NMSU. At the graduate level at least 9 of these 12 credits must be numbered 500 or above. Only approved concentrations within a students' department or program may be noted on a transcript.

Concentrations will not be added to a transcript after a degree is awarded. In order for the approved concentration to be noted on the student's transcript, the following conditions must be met:

1. Request the concentration at the time they file their official program of study.
2. Identify the concentration on their official Application for Degree.

Graduate Certificates

A Graduate Certificate program requires 12-18 credits of course work that is interrelated and designed to develop a focused skill or area of expertise but does not culminate in the awarding of a degree. Courses that comprise a graduate certificate must be regular approved courses offered by the University and must be numbered 450 or above. A graduate certificate is indicated on the student's transcript.

Master's Degree

New Mexico State University offers both academic and professional master's degrees. A link to the list of all master's degrees is provided in the Graduate School section of this catalog.

Underprepared students may be required to take additional general or discipline-specific undergraduate or graduate courses to prepare them for the advanced academic work necessary for success in graduate level courses in their chosen field.. This may result in an extended graduation date.

Admissions to the Master's Degree

The admission of a student into the Graduate School does not imply admission to candidacy for an advanced degree. The major department in which the student intends to become a candidate for a master's degree must determine the student's ability to pursue studies at the graduate level. Please see the Department(s) for specific requirements.

Program of Study

During the first semester of enrollment each new graduate student should prepare a complete program of study in consultation with the student's advisor.

Application to Candidacy

The program of study will formally list the curriculum requirements for degree completion and is required for application to candidacy. The program of study must be approved by the advisor, department, and academic dean and submitted to the Graduate School. The Program of study may specify the Catalog at the time of graduation, as long as the catalog is considered active. Otherwise, the current Catalog will be listed.

An Application for Admission to Candidacy must be filed with the Graduate School. This must be done before the completion of 12 credits of graduate coursework. The student must have a minimum cumulative GPA of 3.0 at the time the application is submitted. The application may specify the Catalog at the time of graduation, as long as the catalog is considered active. Otherwise, the current Catalog will be listed.

The student's program of study must:

1. Meet the requirements of the chosen catalog, including the regulations of the Graduate School and of the major department.
2. Be signed by the student, the student's advisor, department head, minor faculty if applicable, and academic dean .
3. List each course prefix/number, short title, credit hours and grades if available.

If the program of study does not comply with the departmental requirements or the potential degree audit, the program of study must be approved by the Dean of the Graduate School. . The Program of Study is not required for master's programs if defined within the Star Degree Audit.

Credit Hour Requirement

A minimum of 30 credits is required for the master's degree. Most master's degrees require at least 15 credits in courses numbered 500 or above. This includes thesis credits for any master's programs that include a thesis option. Master's programs involving a thesis, must include, either a minimum of 4 credits or a maximum of 6 credits of thesis. Please see the "Thesis" section for more information.

At least 15 credits for the master's degree must be for work in courses within the student's department. Additional credits may be selected from other fields to fit into a logical and justifiable program. However, courses that are used to remove deficiencies or satisfy prerequisites cannot be counted as requirements for a master's degree.

Coursework Requirement

Students must take coursework from a variety of faculty. Students may not take more than half of the minimum credits required for a master's degree with the same professor, excluding thesis credits. Short courses, of less than one summer session or one semester cannot constitute more than one-fourth of the total requirements for the degree.

Thesis Option

A thesis in the major field is recommended and may be required at the discretion of the department. A minimum of 4 credits and a maximum of 6 credits may be counted toward the requirements for a master's degree. The final examination shall consist of an oral defense of the student's thesis as well as a general examination of the candidate's field of study.

- *Continuous Enrollment*- once registered, a student must continue to register for a minimum of 1 credit in thesis or graduate coursework each regular semester until the thesis is approved by the Graduate School and the copies have been accepted by the Branson Library binding section. .

Graduate Committee for Thesis Option

The graduate committee for the master's degree consists of a minimum of three faculty members who hold, at least, a master's degree and meet the following criteria:

1. Committee chair:
 - a. Must be from the student's home department
 - b. Must be a graduate faculty member
2. Committee member(s):
 - a. May be from outside the student's home department
 - b. Student's with a declared minor- may have the representative from a related area or be appointed by the Dean of the Graduate School.
 - c. Must be a graduate faculty member
3. Dean's Representative:
 - a. Must be a representative from a related area or appointed by the Dean of the Graduate School
 - b. Must be a graduate faculty member

Finalizing the Master's Thesis

After successful completion of the final examination, a copy of the thesis must be submitted to the Graduate School for format review no later than the deadline posted to the Graduate School website. The form and style of the thesis must comply with the regulations given in the Guidelines for Preparing a Thesis or Dissertation <http://gradschool.nmsu.edu/theses-dissertations/>. These guidelines also contain detailed information on the thesis approval process and binding. The thesis is not complete until copies have been accepted for binding by the binding section staff and until the online Library binding form has been completed and received in Branson Library

Professional Degree and Non-Thesis Final Examination

Each candidate will be given a final examination conducted by their graduate committee in accordance to the schedule provided by the Graduate School. It is the department's responsibility to ensure that the Report of Results for the Master's Professional or Non-Thesis Final Exam form is submitted to the Graduate School at least ten working days after the exam.

The final examination format for the professional degrees and non-thesis option will be determined by the department, with the approval of the Dean of the Graduate School. If a department does not specify an examination format, the final examination will consist of an oral defense of the candidate's field of study.

At the time of the final examination, a graduate student must have a cumulative GPA of at least a 3.0 and must be enrolled for a minimum of

one credit hour in the final semester; or if the student is writing a thesis, he or she must have completed all course work for the master's degree.

NOTE: the cumulative GPA, will be calculated from NMSU graduate coursework only.

Any candidate who fails in the final examination may either:

1. Be granted a second examination, written or oral, after a lapse of at least one semester, only with a recommendation from the student's advisor and approval from the Dean of the Graduate School.
2. Be excluded from further candidacy for the degree.
3. Failure in the second examination disqualifies a candidate from obtaining the degree.

Students in professional or non-thesis options may be required to pay a special exam fee in lieu of registering for 1 credit of graduate coursework. Please see the Tuition, Fees and Other Expenses section for more information.

Time Limit

Students must complete the master's degree program within seven years (or eight successive summers) of the start of the degree, including completion of the master's thesis or final project. Any coursework more than seven years old at the time of the final examination will not be included in the program. Any exception to the time limit rule must have prior approval of the Dean of the Graduate School.

Master's Accelerated Program (MAP)

The master's accelerated program provides an opportunity for academically qualified undergraduate students to begin working on a master's degree during their junior and senior years while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner.

Undergraduate students may apply for acceptance to a Master's Accelerated Program available at New Mexico State University after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at New Mexico State University and apply towards the undergraduate major. The grade point average must be at a minimum of 3.0; departments participating in the master's accelerated program may have requirements that exceed these minimum standards. **It is the student's responsibility to meet with their financial aid advisor as financial aid awards may be adjusted by the Financial Aid Office.**

The graduate department within the colleges may allow well-prepared advanced students to substitute a maximum of 12 graduate course credits for elective courses in an undergraduate degree program and then subsequently count those same courses as fulfilling graduate requirements in a related graduate program that the institution offers. A graduate program has the discretion to use up to 12 credits of NMSU coursework (450 level or higher) that can logically be applied towards the completion of master's program of study. Students must receive a grade of B or higher in this coursework to be counted for graduate credit.

To Participate in this program:

1. The student must prior approval by the graduate program
2. Be general or discipline electives in the student's undergraduate course of study. No required courses from the undergraduate

program will be accepted for transfer credit into the graduate program.

3. Enroll in appropriate graduate level courses. It is the student's responsibility to register for graduate-level courses and ensure that those courses are applicable to the desired graduate degree program. If the course(s) requires instructor approval, it is the responsibility of the students to get approval in order to register for the course(s).
4. Submit a completed Master's Accelerated Program Referral Form to the Graduate School by the first Friday of classes, with the following signatures
 5. The Undergraduate Advisor
 6. The anticipated Master's Department Head
 7. The Undergraduate Academic Dean
 8. The Financial Aid Advisor
9. Be accepted by the Graduate School for conditional admittance.
10. Participate in the Developing New Scholars Program (DNSP) through the Graduate School. The DNSP program provides formal mentoring to students that supports their success in graduate education.
11. Upon graduation with the Bachelor's degree and final admission into the master's/graduate program, the approved credits (up to 12) will be recorded on both the undergraduate and the graduate transcript.

Interdisciplinary Master's Degree

Interdisciplinary studies, at New Mexico State University, are intended for individuals specializing in programs that require the integration of more than one discipline to fully engage in the field of study. The programs provide a mechanism to address emerging scholarship, innovation and research, as well as, allow graduate students to engage in emerging technologies that optimize their education outside the traditional disciplinary boundaries. An Interdisciplinary study takes advantage of traditional academic training within specific departments and also allows students to customize their own career preparation. In these programs, a coherent common core is expected and is intended to combine existing courses across disciplines to meet unique objectives.

The interdisciplinary studies option should not be used in cases where the applicants' objectives can be realized by admission to a specific department with a degree program, and inclusion of up to two minor areas in the program of study.

Admission

Students interested in pursuing an Interdisciplinary Master's Degree (IMAS) degree must meet with the Graduate School for advisement. The advisement session will include information on completing the IMAS admission application:

1. Develop a proposal for interdisciplinary studies
2. Create the IMAS graduate committee
3. Once the student's graduate committee is designated, the committee can require additional materials such as a statement of interest, letters of recommendation, GRE or GMAT scores and a personal interview.
4. Complete the IMAS referral form and procure committee members IMAS program approval.
5. Procure academic department head IMAS referral form approval.
6. Submit IMAS referral form and proposal for interdisciplinary studies to Graduate School for admissions.

Degree(s) Awarded

Students receive a Master of Arts (MA) or a Master of Science (MS) and a concentration in the designated interdisciplinary study area.

Other conditions for being awarded a degree within the interdisciplinary studies program are:

1. The student must present a written description of the program concept consisting of the following, as well as, the designated degree being sought and a name of the interdisciplinary area:
 - a. The objective of the program of study which should include, proposed areas of skill development and proposed courses in more than one graduate degree granting department at NMSU.
 - b. A justification for not using an existing degree program.
2. The student's program of study must include a minimum of 30 graduate level credits and a maximum of 36 graduate level credits. Students may take six credits in departments that do not grant a graduate degree, but the courses must be numbered 450 or above and be pertinent to the program of study.
3. The majority of the departments involved in the student's program will be master's degree granting departments. The student is expected to take at least 15 credits in the primary area of study within one department. The department selected by the student will receive a copy of the student's application for admissions to the Graduate School. In addition, the student is required to select a minor area of study in another department that consists of at least 9 graduate credit hours.
4. The student will form a committee composed of members of the graduate faculty and select an advisor who will chair the committee. The chair must be from the primary department where the student has taken at least 15 credit hours listed in the proposal submitted. The other committee member must be from the department in which the student has selected a minor area of study from the approved list.
5. The student will be required to submit the Candidacy Form after they have satisfactorily completed 12 credits.
6. The program will meet all requirements of a master's degree, with the interpretation, that "major field" includes courses from two or more departments and in the designated interdisciplinary study area.
7. The program of study will include the completion of a research thesis or project. The work may be submitted in the form of a publishable manuscript, technical report, thesis or creative option.
8. The student may enroll on a part-time basis keeping in mind that coursework cannot be more than seven years old at the time of the final examination.
9. The student will be administered a final comprehensive exam that is consistent with the department selected for the primary area of study. For example, if a department requires a written exam, the student in the interdisciplinary masters will also be required to take a written exam.
10. The final oral comprehensive exam will consist of questions pertinent to the area of study and the defense of the research thesis or project. In both cases, an integrated approach to the areas of study chosen should be followed.
11. All other rules for graduate study at NMSU must be followed.

Thesis/Non-thesis Option

As with any graduate student, the student in interdisciplinary studies can select to follow a thesis or non-thesis option. Students enrolled in the thesis option register for six thesis credits. Students not wishing to follow the thesis option will be required to complete a project report. The project

must reflect the interdisciplinary nature of the program which the student is pursuing.

Comprehensive Exam

Students in interdisciplinary studies take a comprehensive exam composed of questions designed by the student's committee. The committee consists of two individuals in the area of study, the dean's representative who must be outside of the department/program/interdisciplinary study option, and a committee chair.

Second Master's Degree

A student who has earned one master's degree at NMSU may be allowed to count a maximum of six semester credits earned on the first degree toward a second master's degree, if those credits fit into a logical graduate program. The number of shared credits may be increased for joint degree programs.

Teacher Licensure

Students wishing to take graduate courses for licensure, renewal of licensure or for personal enrichment must be fully admitted to a department in order to do so. Undeclared students may not register for teacher licensure classes.

Endorsement is available at both the elementary and secondary levels in bilingual education, TESOL (Teaching of English as a Second Language), reading and special education. Endorsement is also available in early childhood education at the elementary level. Contact curric-instr@nmsu.edu for more information.

Specialist in Education

The specialist in education degree is available for experienced members of the education profession who have completed the master's degree and have maintained a 3.3 grade-point average while pursuing this degree or its equivalent. Programs are available in curriculum and instruction, as well as, school psychology. Emphasis is placed on the development of the competencies needed for a professional specialization in a given field. Students must complete the general application for the Graduate School and they should also check with the admitting department for specific departmental requirements.

Residency and Credit Requirements

The specialist in education degree requires a minimum of 30 credits beyond the master's degree, including research, intern experiences and graduate courses. Twenty-four of these credits must be completed at NMSU to meet the campus residency requirements.

Students must maintain a 3.0 GPA, no more than 6 credits of C level work are allowed for this program.

Program of Study

It is recommended that during the first semester of enrollment each beginning graduate student should prepare a complete program of study with the student's advisor. The program of study can be tentative, should be kept in the student's file within the department, and is not considered an "Application for Admission to Candidacy."

Major Field

All course work taken for the degree should apply directly, through a logical program of study, to the specialty which candidate has selected. Each department is responsible for defining the required sequence of courses.

Candidacy

Following the successful completion of 12 credits beyond the master's degree, the student is eligible for admission to candidacy. With the achievement of candidacy, a committee is appointed to work with the candidate on the remainder of the program. The committee consists of three members of the graduate faculty in the College of Education.

Internship

Each candidate will earn from three to six semester credits in an internship. This experience will consist of supervised performance of duties related to the candidate's specialty. The student's department will determine the structure of the internship and a research project will be conducted in conjunction with the internship.

Oral Examination

The oral examination committee will consist of the student's committee and a dean's representative appointed from the graduate faculty by the dean of the Graduate School. This committee will conduct an oral examination at the conclusion of the research project and no earlier than the candidate's last semester of enrollment.

The examination will consist of a defense of the project along with general questions on subject matter related to the candidate's field of study. Any candidate who fails the oral examination may upon recommendation of the advisor and with the approval of the graduate dean, be granted a second examination after a lapse of at least one semester. Failure in the second examination disqualifies the candidate from obtaining the degree.

Time Limit

The specialist in education degree must be completed within seven years following admission to the program. Students cannot include any course work on their program of study that is more than seven years old at the time of the final oral examination.

Doctoral Degrees

The doctoral degree requires significant scholarly study beyond the master's program.

Prospective candidates are expected to hold bachelors or master's degrees from accredited institutions, based on curricula that include the prerequisites for graduate study in the department of their subject. To be considered for admission to a doctoral program, the applicant must have a grade-point average of at least 3.0. Prospective candidates are urged to consult the department in which they wish to study for information concerning specific requirements.

Professional Doctoral Degrees

Doctor of Economic Development (DED)

Students enrolled in the Doctor of Economic Development are required to complete and pass a comprehensive examination. Since a dissertation is not required, students are expected to complete an internship experience and a project paper as defined by their program. They can embark on the project paper once they have completed and passed their comprehensive examination. Students are not required to take 700 level dissertation hours. However, they are expected to complete at least 12 credits at the 600 level including ECDV 694 (Internship) and ECDV 699 (Doctoral Project).

A project paper must be finalized using a similar submission process as the dissertation (see the "Finalizing the Doctoral Dissertation"). On the front page, after the title of the paper, the student should indicate that it is a project paper. Students completing projects papers do not need

to complete the earned doctoral survey. The paper must be submitted to the Graduate School for format review on or before the deadline. The form and style of the paper must comply with regulations given in the "Guidelines for Preparing a Thesis or Dissertation." These guidelines also contain detailed information on the dissertation/project paper- approval process as well as information on binding. Candidates are encouraged to consult with the Graduate School on format, deadlines and procedures before final typing. The project paper is not complete until copies have been accepted for binding by the staff of Branson Library and until the microfilm agreement form has been completed and received in Branson Library.

Doctor of Education (Ed.D)

The degree of Doctor of Education demonstrates proficiency in a program of graduate study in which the emphasis is in preparation for performance in professional education. This program is intended primarily for students pursuing careers in which teaching, administration or school services are predominate rather than those in research. The Ed.D. Degree in curriculum and instruction is offered in the Department of Curriculum and Instruction; the degree in educational administration is offered in the Department of Educational Leadership and Administration.

The requirements for doctoral degrees in the two departments of the College of Education have the following distinguishing elements:

1. The qualifying examination consists of a written and an oral section, both of which are administered prior to admission to the program. Acceptance for doctoral admission is equivalent to the successful completion of the qualifying examination. Residency of at least two consecutive semesters cannot commence until the semester after the qualifying examination is successfully completed.
2. Comprehensive examinations usually are administered three times annually. The written examination tests the major and related areas of concentration and is administered after successful completion of the orals within two weeks' time. A student who fails any part of the comprehensive examination may present him or herself for re-examination of the failed part of the exam before moving on to the next part.
3. The major area of study must be within the College of Education

A minimum of nine credits constitutes the related area. The courses can be taken in any department of the university with the approval of the student's committee. The related area must be specifically planned with the major and minor departments in order for the doctoral fields to be mutually supportive. Any transfer credit or predoctoral course work to be included in the related field must have the approval of both the major and minor department at the outset. Specified course work in both research and statistics is required for this degree. Other requirements are described in the departmental sections of this catalog.

Doctor of Nursing Practice (DNP)

Students holding a Bachelor's degree in Nursing are required to complete and pass all required course work for the DNP program, as well as, complete and pass their comprehensive examination. Since a dissertation is not required, they are expected to complete an internship experience and a project paper as defined by their program. They can embark on the project paper once they have completed and passed their comprehensive examination. They are not required to take 700 level dissertation hours. However, they are expected to complete at least 12 credits at the 600 level including NURS 698 (Advanced Clinical immersion) credits sufficient to complete the DNP Final Project.

Students who hold a Master's of Science in Nursing are required to complete the following:

1. All course work requirements
2. Their comprehensive exam (with passing marks)
3. The DNP Project.

Post- MSN DNP students must complete at least 6 credits at the 600 level, including NURS 698 credits sufficient to finish the DNP Project. Finalized projects must be uploaded to a national DNP Project repository approved by the Graduate Faculty of the School of Nursing in order to achieve the DNP degree.

Doctor of Philosophy (Ph.D.)

The Doctor of Philosophy degree requires distinguished attainment in both scholarship and original research. The doctoral degree requires significant scholarly study beyond the master's that is tailored to the needs and interests of the student. The degree is granted in recognition of the candidate's high attainments and ability in the special field, shown by work on the required examinations covering both the general and the special fields. The individualized program of study is designed to meet the campus residency requirement, includes a minimum of 30 graduate credits, and includes the preparation of a dissertation. A candidate for the Ph.D. degree is expected to maintain a higher level of work than the grade-point average of 3.0, plus at least 18 credits of dissertation work (700-level courses).

Interdisciplinary Doctorate

Students interested in pursuing an Interdisciplinary Doctorate (IDOC) degree program must meet with the Graduate School for advisement. The advisement session will include information on completing the IDOC admission application.

The following requirements for admission to the interdisciplinary doctorate degree program are:

1. Students wishing to study in the interdisciplinary doctoral degree program must apply and be accepted into a doctorate-granting department.
2. A master's degree or equivalent program of study that includes at least 30 credits of graduate course work with a minimum cumulative GPA of 3.0.
3. Twelve credits of graduate course work must be completed at NMSU in order to apply for admission into the interdisciplinary doctorate degree program. Additional course work is required for degree completion.
4. Evidence of outstanding academic achievement in graduate school.
5. A written description of the program concept prepared by the student consisting of:
 - a. Areas in which competency is required
 - b. Purposed readings and course work and how these relate to required competencies
 - c. Objectives and an outline for thesis research
 - d. Justification for not using an existing departmental degree program
6. Student must select an advisor from his/her department to help structure and chair a committee consisting of at least five faculty members from the graduate faculty list who are willing to work on the interdisciplinary degree program. The committee must include at least two members from each of the two doctorate-granting

departments. The committee chair will convene a meeting to review and approve the proposed program.

7. The Graduate School will send an Admission Referral document, signed by all the committee members, to the heads of all the departments from which the student proposes to use more than 8 credits of course work, or from the department which the faculty are requested to serve on the proposed committee.
8. Once the Admission Referral document has been approved by all departments, the committee chair will convene a meeting of the committee to review the student's program and make changes as necessary. In addition, the committee will set the format and date for the qualifying exam. An effort should be made to incorporate the interdisciplinary nature of the program into the qualifying exam.
9. Students have satisfied the requirements for admission to the program once the qualifying exam has been passed and the respective department heads approve the Admission Referral memorandum. Formal acceptance into a doctoral program may be required in order to receive financial assistance.
10. The number of courses required for degree completion will vary depending on the student's program of study, please see the department for more specific requirements. However, Interdisciplinary doctorate degree students must meet the requirements for residency, registration, the comprehensive examination, the Final Examination, the dissertation and the declaration of approved minor.
11. The dissertation work shall include at least 18 credits of a 700-level course.

Completing your Doctoral Degree Program

Any student who fails to abide by the regulations in this section will be considered withdrawn from the university. In order to resume their studies, the student must formally apply for readmission to the Graduate School and satisfy any requirements that are in effect at the time of reapplication.

Declaration of Approved Minor

Any doctoral applicant for candidacy may declare up to two approved minors in addition to the major area of study. Demonstration of competency in the minor area will be required at both comprehensive and final examinations.

Qualifying Examination

Doctoral students must pass a qualifying examination that is scheduled by the student's advisor and is administered by the major department. Its purpose is to determine the areas in which the student shows strength or weakness, as well as the ability to assimilate subject matter presented at the graduate level. A student may not register for dissertation credits prior to the successful completion of the qualifying examination.

The following conditions apply to students who wish to take the qualifying examination:

1. For students who enter the Graduate School with little or no previous graduate experience but wish to proceed directly to the doctorate, the qualifying examination should be taken after 12 credits of graduate work
2. For students who enter with a master's degree or equivalent from another university, or another department, the qualifying examination should be taken before the completion of one semester of graduate work.
3. For students who earn their master's degree at New Mexico State University and will continue in the same department, the department

may allow the master's final examination to serve as the doctoral qualifying examination or may require a separate examination.

Based on the result of the qualifying examination, the department will take one or more of the following actions:

1. Admit the student to further work toward the doctorate
2. Recommend that the program be limited to the master's degree
3. Recommend a re-evaluation of the student's progress after the lapse of one semester
4. Recommend a discontinuation of graduate work

In all cases, the Graduate School shall be notified by the department of the results of the qualifying examination.

Students will be admitted to the doctoral program once the qualifying examination is passed. The student's advisor and department head will then appoint the doctoral committee to prepare the student's preliminary doctorate program of study. The student must submit the program of study to the Graduate School immediately following admission into the doctoral program and before registering for additional coursework.

Doctoral Graduate Committee

The doctoral committee will be composed of at least four members of the graduate faculty who hold doctoral degrees. The following rules apply to the composition of the committee:

- The committee chair must be from a discipline within the student's major area.
- At least one additional member of the committee must also be from a discipline within the student's major area.
- If an approved minor is declared, at least one (but no more than two) members of the committee must be from the minor area.
- At least three committee members must be members of the graduate faculty and be from a doctorate-granting department
- Only one member may be outside of the student's department.
- One member of the committee must serve as the dean's representative. In programs where more than one department participates, the dean's representative may not be from any of those departments. The dean's representative may be one of the following
 - the member from the related area
 - a member from the minor area
- An independent member, not from the student's department, that is appointed by the Dean of the Graduate School.

Departments may structure committees that include more than the minimum number of members, as long as the following conditions are satisfied. No changes can be made to the doctoral committee membership without prior approval from the Dean of the Graduate School.

Additional voting and nonvoting members may be any person approved or appointed by the Dean of the Graduate School

All members of the committee will attend the comprehensive oral and final defense for the student's dissertation.

Program of Study

Students should file the Program of Study Form once they have:

- Completed 12 graduate credits while at NMSU that are beyond the master's degree

- Successfully completed the qualifying examination

The Program of Study Form should be completed and submitted to the Graduate School before registering for any additional courses. The individualized program of study is designed to meet the campus residency requirement and includes a minimum of 30 graduate credits beyond the master's.

If the Doctoral degree requires a dissertation, at least 18 credits of dissertation work must be included. The professional doctoral degree includes a practicum or special project that culminates in a written report which demonstrates a command of the relevant scholarly literature and links it to the specific clinical or practical experience.

Comprehensive Examination

The Graduate School should receive the Program of Study and the Committee for Doctoral Students Form and the Doctoral Qualifying Examination Form.

Students will be admitted to the comprehensive examination only after the following conditions are met

1. Completion of adequate course work, to the satisfaction of the major department and the Graduate School
2. The graduate committee determines the student is adequately prepared for the examination
3. Successful completion of all language requirements (where applicable)

Students must be registered for 3 credits of graduate course work during the semester in which they take the comprehensive examination. A student taking an oral examination during the summer must enroll for at least one credit for that term.

The Doctorate of Philosophy Examination or Professional Doctorate Examination Form must be on file at the Graduate School at least ten working days prior to the proposed date for the examination. The examination must be part written and part oral. The results of the oral examination will be reported to the Graduate School by the Dean's Representative of the committee.

Any student who fails the comprehensive examination may either be terminated from the doctoral program or upon recommendation of the committee and approval of the Dean of the Graduate School, be granted a second examination after a lapse of at least one semester.

NOTE: In general, there should be a time lapse of at least one year between the comprehensive and final oral examination. However, due to the type of research required and the method of administering the written comprehensive in some departments, such a time lapse is not always practical. In all cases there must be one semester between the comprehensive and the final oral examinations.

Time Limit for the Comprehensive Examination

If more than five years have passed since the date of the comprehensive examination, the candidate will be required to take another comprehensive examination before admission to the final examination.

Advancement to Candidacy

Advancement to Candidacy recognizes that the student has demonstrated the ability to sustain a level of scholarly competency commensurate with successful completion of degree requirements. Upon advancement to candidacy, the student is cleared for the final stages of

the graduate program which may include a dissertation, project or written examination.

For advancement to candidacy the following criteria must be met

1. Successful completion of the comprehensive examination
2. Recommendation of the graduate committee
3. Approval of the Dean of the Graduate School

Upon receiving advancement to candidacy, students must establish residency and follow the Dissertation Registration Requirements (see Residency Requirements below).

Residency Requirements

The minimum campus residency requirements for the doctoral degree include enrollment in a minimum of 9 credit hours of program course work, including a minimum of 3 credit hours of dissertation, in at least two semesters of classes taught at NMSU. In some cases the minimum credit hour enrollment for the two semesters required to establish residency may vary based on the instructional delivery of the program, and must have prior approval from the Dean of the Graduate School.

Dissertation Registration during Fall/Spring Sessions

After becoming a candidate, students must continue to register for at least 3 credits of dissertation or graduate course work, each spring/ fall semester until the dissertation is approved by the Graduate School and the dissertation format review has been completed. The total number of dissertation hours must be 18 credits. The doctoral committee can impose additional requirements for courses numbered 700.

A student who fails to abide by these regulations will be considered withdrawn from the university and in order to resume studies, must formally apply for readmission and satisfy the requirements in effect at the time of reapplication.

Dissertation Registration during Summer Sessions

If the final examination is to be held during the summer or the dissertation is to be completed during the summer, students must register for one credit during the summer session in which the final examination will be held or the dissertation will be completed.

Dissertation Leave of Absence

Students may seek a leave of absence from their dissertation. A leave of absence requires that a student must get prior approval from the Dean of the Graduate School, which means the student must receive permission for the leave of absence before discontinuing their formal studies.

Final Examination

NOTE: If more than five years have elapsed since the date of the student's passed comprehensive examination, the candidate will be required to take another comprehensive examination before admission to the final examination.

Every student working toward the doctoral degree will submit a dissertation embodying the results of original research. The dissertation is expected to demonstrate the student's ability in independent investigation and to be a contribution to human knowledge. The dissertation shall display a mastery of the literature of the subject field, present an organized and coherent development of ideas with a clear exposition of results, and provide a critique of the limits and validity of the student's conclusions.

When a complete draft of the dissertation has been prepared, the student's doctoral committee (appointed after the qualifying

examination) will conduct the final examination. The final examination is concerned primarily with the research work of the student as embodied in the dissertation, but it may be much broader and extend over the candidate's entire field of study. The intention of the final examination is to verify that the candidate has a satisfactory grasp of the major subject as a whole and has a general acquaintance with the fields of knowledge represented by the course of study. The final examination is oral and is open to the public.

The final examination must be completed in accordance with the schedule provided in the academic calendar. Ten working days before the examination is taken the department must submit the form requesting this examination to the Graduate School. This form may be found on the Web at <http://gradschool.nmsu.edu/graduate-forms/> and is also available from the Graduate School and departmental offices.

Students must ensure that each member of the examining committee receives a copy of the dissertation, no later than seven working days before the date of the final examination.

Any candidate who fails the final oral examination may either be terminated from the doctoral program or upon recommendation of the committee and approval of the Dean of the Graduate School, be granted a second examination after a lapse of at least one semester. Failure in the second examination disqualifies the candidate from obtaining the degree.

Finalizing the Doctoral Dissertation

After successful completion of the final examination, a copy of the dissertation must be submitted to the Graduate School for format review no later than the deadline posted to the Graduate School website.

The form and style of the dissertation must comply with the regulations given in the Guidelines for Preparing a Thesis or Dissertation <http://gradschool.nmsu.edu/theses-dissertations/>. These guidelines also contain detailed information on the dissertation-approval process and binding. Candidates are encouraged to consult with the Graduate School on format, deadlines and procedures before final typing.

The dissertation is not complete until copies have been accepted for binding by the binding section staff and until the UMI agreement form and the online Library binding form has been completed and received in Branson Library.

Registration at NMSU is a process that includes: (1) Academic advising with a faculty or staff member, (2) Registering for classes, online or with your academic advisor, and (3) Paying the tuition and fee bill. For first time freshman and transfer undergraduate students (at the Las Cruces campus), the registration process is through the Aggie Welcome/Transfer Student Orientations. For currently enrolled Undergraduate students and all Graduate students registration is through your advisor or online through the myNMSU portal. Detailed instructions for registration are provided in the online registration guide maintained by the University Registrar's office. For questions about registration which are not addressed on the website, please contact the University Registrar's Office (<http://registrar.nmsu.edu>).

Admission Requirement

No person will be allowed to register for courses until formally admitted to NMSU through the Community College, International Programs, Undergraduate or Graduate Admissions processes.

Course Schedule

Each semester and summer session, the Registrar's office provides an online course schedule which can be accessed through myNMSU or the

NMSU website. Note that not all courses listed in this catalog are offered every semester.

Registration Schedule by Classification

Several groups of students (e.g. Crimson Scholars, Students with Disabilities, Veterans) receive priority dates for course registration. For other students, registration dates are determined by the student's current classification at the time of registration. A student's classification is determined by the number of credits completed. Freshmen have less than 28 completed credits. Sophomore rank is achieved with successful completion of 28 credits; junior rank 60 credits; senior rank 90 credits.

University Credits

The unit of university credit is the semester hour, which is based upon one hour of lecture class or a minimum of two hours of practice/lab per week for one semester and assumes substantial additional out of class work by the student. The number of credits associated with each course is indicated in the course schedule.

Course Load for Undergraduate Students

The full-time course load in a regular semester (fall or spring) for a main campus undergraduate students is 12-18 credits. A full-time course load for a summer term is 6 credits per session for a total of 12 credit hours. Some scholarships have a 15 credit course load eligibility requirement. Each student is responsible for meeting their own scholarship eligibility requirements.

An overload is classified as more than 18 credits for a regular semester and more than 12 credits for the summer term. A one-credit course in physical education will not create an overload. Registration for a course overload requires written permission from the Associate Dean for Academics in the student's college. A "Petition for Course Overload" form is available from the Registrar's office or website. Freshmen and students with a grade of D or F, or a cumulative grade-point average of less than 2.5, in either of the last two semesters, are not eligible for overloads. Concurrent enrollment in non-NMSU courses at other post-secondary institutions requires prior approval from the Associate Dean for Academics in the student's college, and these courses are counted as part of a student's class load.

Course Load for Graduate Students

A full-time course load is 9 credits, with a maximum of 15 graded credits for a regular semester (fall or spring) and a maximum of 9 graded credits for the summer session.

Course Numbering

The course numbering system at NMSU indicates the level of the course as follows:

Undergraduate courses are assigned numbers 100-499. Courses numbered 100-299 are referred to as "lower-division courses" and are primarily for Freshman and Sophomore level students. Courses numbered 300-499 are referred to as "upper-division courses" and are primarily for Junior and Senior level students.

Graduate courses are assigned numbers 500 or greater. Courses numbered 500-599 are primarily for graduate students working on a master's degree. Courses numbered 600-700 are primarily for students working on a doctoral degree.

Some graduate programs may accept courses numbered 450-499 for graduate credit. Graduate students should confirm eligibility with their program department head.

Prerequisites and Corequisites

Some courses require advance or concurrently acquired specific knowledge and skills. Prerequisite(s) and corequisite(s) for each courses are indicated in the course description section of this catalog. Students must have completed (or be presently enrolled in the prerequisite(s)) courses in order to register for a course with prerequisites. Where a student was allowed to register for a course while completing the prerequisite(s), and then subsequently fails to successfully complete a prerequisite course, the student shall be dis-enrolled from the course requiring the prerequisite. In the case of a corequisite, a student must enroll in the courses during the same semester. In some instances, where a course has an enforced "pre/corequisite" the student can elect to either take the requirement before registering for the course, or take the courses at the same time.

Registration Changes

Subject to any registration "holds" and any applicable deadlines, students may change their course registration online. Caution should be exercised as registration changes may negatively impact eligibility for scholarships, financial aid or athletic participation, the student's ability to progress through their degree program in a timely manner, and the student's obligations with respect to tuition and fees.

The Registrar's office publishes an online schedule of "Important Dates for Students" for each semester. The students is responsible for reviewing and adhering to the Important Dates including the deadlines to add, drop or withdraw from course(s) for the relevant semester.

Adding Courses: There are two different types of deadlines for adding courses:

1. **Last day to add a class without instructor's signature** - during the period through this date courses may be added online through myNMSU, or through your advisor (if necessary).
2. **Last day to add a class with instructor's signature** - during the period through this date courses may only be added with "Change of Schedule" form signed by the instructor (available online through the Registrar's Office).
* Students taking classes online and who do not live in the Las Cruces Area must email the instructor, using the NMSU email, in order to get permission to be added to the course. If the instructor approves the addition, the approved response must be sent to either the student's advisor or to registrar@nmsu.edu with the student's name, ID number and course CRN number they are wanting to add.

Withdrawing from Courses: There are two different types of deadlines for withdrawing from courses:

1. **Last day to drop without a "W" grade** – during the period through this date, the student can drop the course and not have it appear on their official transcript in any form, and the student will have no financial obligation related to the course (students will receive a 100% refund if tuition has been paid for the course).
2. **Last day to drop with a "W" grade** – during the period through this date, the student can withdraw from the course, but the course will appear on their official transcript with the withdrawal (W) designation as the grade, and the student will be responsible for the full tuition and fees related to that course.

Students are responsible for initiating official withdrawal from any course(s) which the student will not complete. Students who experience extraordinary circumstances that prevent timely registration changes should consult with their Academic Associate Dean or the Registrar.

For more information about the process for adding or withdrawing from a course(s), please speak with your advisor or contact the Registrar's Office.

Any student attending under Veteran Educational Assistance must notify the Military and Veteran's Programs office before processing registration changes to determine if changes will enrollment status or benefits.

A student found insufficiently prepared to carry a regular course may be transferred to a more elementary course in the same subject any day before the last day to withdraw from an individual course.

Waitlisting

Waitlisting is available for all courses across the NMSU system, except for labs that are linked to a specific lecture class. Waitlisting is an electronic list of students who are waiting to register for a filled course. Once students are put onto the waitlist, the process to get into that course is as follows:

1. A currently enrolled student must drop the course for a seat to become available.
2. The first student on the waitlist is notified through their NMSU email.
3. The notified student has 24 hours to login to their myNMSU and register themselves for the class.
4. If the first student fails to register within their allotted 24 hours, then the first student is dropped from the waitlist and the next student on the waitlist is notified. This continues until the empty seat is filled.

A student who fails to register for the class during their allotted 24 hours and is automatically dropped from the waitlist can add themselves back onto the bottom of the waitlist for that course.

Students cannot be added to the waitlist after the first day of classes. Instructor overrides can only be made after the second day of class, at this point an instructor's signature (add/drop/withdraw slip) is required for any registration changes.

Graduate Registration Requirements for Summer

Students who have scheduled their final examination, or who are completing their thesis during a summer session, must be registered for one credit hour during the same summer session. In order to graduate during a summer session, the student must have filed the Application for Degree by the deadline posted on the Academic Calendar.

Repeating Courses for Undergraduate Students

Undergraduate students may repeat courses, for a change in grade, when the original grade earned was a D or F. Once a passing grade of B or better is earned, the course will then be substituted in the calculation of the grade-point-average and students will no longer be able to repeat that course for change of grade purposes. Both the original grade and the substituted grade will show on the students transcript.

If the student's original grade was a D and he/she repeats the course, but receives a F, the second grade will not be substituted for the original.

Repeat options apply only to eligible courses that were completed prior to the time a student was awarded a degree at NMSU.

Repeating Courses for Graduate Students

Graduate student may repeat courses to achieve a higher grade, but the grade assigned for each attempt will remain on the transcript and will be counted in the grade point average calculation.

Substitutions and Waivers

Students registering for their final semester must have all substitutions and waivers of required courses approved before the last day of registration, during the semester in which the student expects to obtain the degree.

Auditing a Course (No Credit)

An audited course is one in which the student registers for the learning experience but does not seek to earn academic credit for the course. A student seeking to audit a course must register and pay tuition and fees for the course and have the consent of the instructor to take the class in audit form. A student who has registered to audit a course may be dis-enrolled from the course at any time before the registration deadline expires if necessary to accommodate a student taking the course for credit. After the last day to register, the student cannot change the course an audited course to a for credit course.

Audited courses are not used in determining a maximum class load (overload) for undergraduate students in good academic standing, however, the audited course will be included for graduate students and undergraduate students who are on academic probation.

Attendance and Student Performance

Academic success is closely correlated to student participation and attendance. Accordingly, students are expected to regularly attend all their classes. Each course instructor will establish the specific attendance and course requirements. Only students who are currently enrolled in a course for either credit or audit are permitted to officially attend the classes. However, individual instructors may allow an occasional visitor and may allow a student who officially withdrew from the course to continue to attend for the remainder of the semester.

Absences from Class and Failure to Complete Assignments

Students who must miss class due to accident or illness, or due to other circumstances beyond their control should consult the course syllabus and the instructor for guidance. Students may be administratively dis-enrolled from a course due to excessive absences (consecutive absences in excess of the number of class meetings held within a week or any number of absences which are impairing the student's performance), or for persistent failure to complete assignments. In such cases, the Instructor may recommend administrative dis-enrollment by providing a completed "Student Absence/Lack of Progress Report" form to the Academic Associate Dean. If the Academic Associate Dean agrees with the recommendation of the course instructor, the student will be dis-enrolled from the course. A dis-enrollment has the same effect as a voluntary withdrawal (see "Registration Changes" in this catalog). Any student who has been administratively dis-enrolled from a class may appeal that decision to the Dean of the College where the course was offered within 10 days after notification of the dis-enrollment.

Any absences due to the student's participation in a university sponsored event (e.g. ASNMSU president representing NMSU at legislative session, student athletes competing in NMSU scheduled athletic events, or students attending educational field trips and conferences) will be excused and deemed an "Authorized Absence". Authorized absences do not relieve the student of the course assignments or responsibilities and instructors may require students to complete course work before the absence. Prior to the student's absence, the sponsoring department

will provide the instructor with written notice of the dates of expected absence.

Classroom Conduct

Each instructor has the authority to establish and enforce reasonable rules of conduct in their courses. A student who engages in behavior that interferes with the educational environment of the class may be administratively dis-enrolled with the approval of the academic department head and academic associate dean for the course, and with notification to the Provost. Any student who has been administratively dis-enrolled from a class may appeal that decision to the Dean of the College where the course was offered within 10 days after notification of the dis-enrollment.

Student Performance Assessment

Individual student performance and learning outcomes in a course are measured and evaluated by the course instructor and reported to the student in the form of grades. Each instructor has the authority to establish assignments and other assessments (such as exams and quizzes) and to assign grades based on the student's performance on those assessments. Final grades for the course are determined by the instructor and reported to the University registrar as described in grading section of this catalog. Any student who believes that their academic performance has been evaluated unfairly may appeal the grade through the University's Academic Appeals process as provided in this Catalog.

Academic Program Assessment

New Mexico State University is committed to providing its students with a quality education and a supportive learning environment. Academic Program Assessment is a continuous improvement process achieved by identifying a program's desired learning outcomes, evaluating the extent to which those outcomes are collectively achieved by students in the program, and then implementing changes to enhance and improve the collective program outcomes. For assessment to be effective, students must be actively aware of and engaged in assessment activities.

Academic Program Assessment requires participation of students who are expected to provide feedback on personal, professional and academic development and to participate in a variety of assessment exercises. Assessment activities may be a part of regular graded course assignments, or may require students to engage in other activities. Assessments may include course projects, exams, exit interviews, standardized tests, surveys, focus groups, etc. Data gathered through these assessments is published only in aggregate form. Learn more about NMSU's Academic Program Assessment at <https://assessment.nmsu.edu/>

Exam Week and Final Examinations

NMSU designates the last week of each semester as "Exam Week" during which each course has only a single 2 hour meeting time for a mandatory culminating activity which may be a final examination or some other course related activity. The Registrar's Office establishes the Final Examination Schedule for each semester (<http://registrar.nmsu.edu/final-examination-schedule/>). Examinations are typically held in the course's usual lecture/lab room. Some departments hold Departmental Exams where all students for all sections of a particular course are required to take the final examination simultaneously. The date, time and location of the Departmental Exams are indicated on the Final Examination Schedule. For courses that were not scheduled to meet at the specific times listed under "Regular Class Time" on the Registrar's

Final Examination Schedule, the instructor and course department coordinate examination dates, times and locations with NMSU's Academic Scheduling office (575) 646-4790. Final exams for weekend courses are held at the regular class period on the last day of class.

The final exam or culminating activity must not be rescheduled for a different date, time or location, except with permission of the department head and the unanimous consent of the enrolled students. During the week before Exam Week, instructors are not allowed to hold examinations lasting more than one class period.

Any student having more than three examinations scheduled in any one day may, no later than the week prior to exam week, notify the instructor of the examination scheduled latest in the day to obtain an alternative date for that examination. (If the fourth exam is a departmental exam, the instructor of the third exam will make alternate arrangements for that exam upon request.)

Students who believe that their instructor(s) have not honored Exam Week requirements may appeal to the instructor's department head.

Developmental Evaluation

The academic skill level of all entering first-time students at the time of registration is evaluated based upon ACT scores, SAT test scores, and if available, the NMSU Math Placement Exam score. The student's eligibility to enroll in university level English and Mathematics courses is dependent upon this evaluation. Any new student may choose to take the MPE to test towards a higher math placement than indicated by the ACT and high school graduation scores. All new engineering students must take the MPE. More information on the MPE is available from the Department of Mathematics website. <https://www.math.nmsu.edu/msc/MPE/overview.html>. Students who have not demonstrated adequate preparation for university level courses are required to take developmental courses. Developmental courses are included on the transcript and will be included in the calculation of the GPA, but the developmental course credits do not count towards a degree.

• **Developmental Courses in English** - Students who score below 15 on the ACT English exam will be placed into appropriate developmental English course or course(s) (prefix CCDE) before enrolling in ENGL 111G (<http://nmsu.smartcatalogiq.com/en/2016-2017/Undergraduate-Catalog/Courses/ENGL-ENGLISH/100/ENGL-111G>). Students who score below 13 on the ACT English will require two developmental courses before enrolling in ENGL 111G (<http://nmsu.smartcatalogiq.com/en/2016-2017/Undergraduate-Catalog/Courses/ENGL-ENGLISH/100/ENGL-111G>).

• **Developmental Courses in Math** - Students who score below 23 on the ACT mathematics exam, and who did not achieve a qualifying score on the NMSU Math Placement Exam (MPE), will be placed into the appropriate development mathematics course or courses (prefix CCDM). Placement into CCDM course(s) is dependent upon the student's ACT score and high school GPA. Students are not allowed to enroll in any other math courses at NMSU until successfully completing any requisite CCDM course(s). (As an alternative to the math developmental course(s), students may complete AS 103 with a C- or better, which does earn credit toward a degree.)

Basic Academic Skills

All undergraduate students must demonstrate Basic Academic Skills in both English and mathematics before enrolling in any upper-division course (numbered 300 or higher). These requirements ensure that each student in the upper-division courses has the ability to succeed without

compromising the learning experience of other students. The completion of the Basic Academic Skills requirements **does not necessarily result in the award of academic credit nor satisfaction of university general education requirements** in English and mathematics. (Students should consult the General Education Courses and Requirements section in this chapter for these requirements.)

Transfer students with 45 or more credits are allowed to enroll in upper-division courses for only one semester before satisfying the Basic Academic Skills requirements. The Basic Academic Skills requirements may be satisfied in a variety of different ways as listed below:

English Basic Skill Demonstration Options (achieve one of the following):

- ACT English Score of 30
- Coursework - **ENGL 111G**, or equivalent, completed with a grade of C- or higher.

Equivalents: the following are deemed equivalents to ENGL 111G for the purpose of satisfying Basic Academic Skills in English:

- **ENGL 111H** – completed with a grade of C- or higher
- ENGL 111 M - required for International students who took the TOEFL examination
- CLEP Exam score of 57 or higher in freshman college composition
- English Advanced Placement (AP) Exam score of 3, 4, or 5
- English Composition Transfer Credits - 3 or more credits with a grade of C- or above, transferred from accredited post-secondary institutions (International students may be required to take ENGL 111 M as noted above.)

Credits from Non-accredited Institutions - As a general rule, NMSU does not accept credits from non-accredited institutions. Students with 3 or more credits of college-level English composition with a grade of C- or higher from a non-accredited institution may, however, challenge the Basic Academic Skills requirement in English and English 111G course requirement by submitting a theme paper written under the supervision of, and demonstrating achievement of English 111G learning outcomes as determined by, the Department of English.

Mathematics Basic Skill Demonstration Options (achieve one of the following):

- ACT Mathematics Score of 23
- Coursework – any one of the following courses or course combinations completed with a grade of C- or higher in each course:
 - MATH 111 (<http://nmsu.smartcatalogiq.com/en/2016-2017/Undergraduate-Catalog/Courses/MATH-MATHEMATICS/100/MATH-111>) and MATH 112G (<http://nmsu.smartcatalogiq.com/en/2016-2017/Undergraduate-Catalog/Courses/MATH-MATHEMATICS/100/MATH-112G>)
 - Any mathematics course numbered 120 or above (prefix MATH)
 - Any one statistics course: A ST 251G (<http://nmsu.smartcatalogiq.com/en/2016-2017/Undergraduate-Catalog/Courses/A-ST-APPLIED-STATISTICS/200/A-ST-251G>), STAT 251G (<http://nmsu.smartcatalogiq.com/en/2016-2017/Undergraduate-Catalog/Courses/STAT-STATISTICS/200/STAT-251G>) or STAT 271G (<http://nmsu.smartcatalogiq.com/en/2016-2017/Undergraduate-Catalog/Courses/STAT-STATISTICS/200/STAT-271G>)

- Basic Skills Exam Passing Score - offered twice a semester by the Department of Mathematical Sciences
- Calculus AB, Calculus BC or Statistics Advanced Placement (AP) Exam score of 3, 4, or 5

IMPORTANT NOTE: Basic Academic Skills Demonstration fulfillment options may not appear on the transcript, result in the award of academic credit, or satisfy general education requirements. The Basic Academic Skills requirements are used solely for the purpose of determining eligibility for enrollment in upper-division courses. All students should seek to complete the Basic Academic Skills requirements as early in their academic program as possible. Students who postpone completion of Basic Academic Skills may be unable to progress toward degree completion in a timely manner.

Independent Study and Directed Reading Courses

Independent study courses and directed reading (other than those designated in the catalog with a subtitle), are for students capable of and sufficiently motivated to undertake self-directed study with limited oversight of a faculty member. Only students who have completed at least 28 credits at NMSU under traditional grading, with a cumulative GPA of 2.5 or better, are eligible to enroll in independent study courses. No student is entitled to enroll in independent study and enrollment requires the consent of an instructor who agrees to supervise and evaluate the student's learning activities in the course. Students seeking enrollment in an independent study course should prepare an independent study proposal to present to individual faculty member(s) in the relevant discipline for consideration. At a minimum, the proposal should include the topic of study, a brief survey of the literature or other resources on the topic, and a description of the proposed written product or other tangible outcome of the independent study. The relevant academic department for the discipline may have additional requirements. Each college determines the maximum number of credits that may be earned in independent study courses.

Adjusted Credit Option

The adjusted credit option provides eligible undergraduate students who earned a low grade-point average (less than 2.0 cumulative) during their first few semesters to reset their GPA calculation. This option may be used only once and is not reversible. These are the consequences of exercising the Adjusted Credit Option:

1. All of the student's academic history pre-dating the request, including all NMSU course credits previously attempted or completed, transfer coursework, CLEP, ACT, advanced placement, special examination, and/or military service are included in the adjustment and designated as "ADJUSTED CREDITS" on the transcript. These credits are no longer be included in the calculation of the cumulative grade point average.
2. Courses carrying an academic grade of S, CR, C- or better, earned prior to the grading period in which the student requested this option, are treated as earned academic credit and need not be repeated, except where a higher grade is required in the student's academic program.
3. Courses carrying an academic grade of U, CD, D or F, earned prior to the grading period in which the student requested this option, remain on the student's transcript, but no academic credit is provided for these courses. The student must repeat these courses to obtain academic credit.
4. The student's academic transcripts will continue to reflect all coursework, including courses falling under the adjusted credit option. In no circumstances will a transcript be issued that does not include all courses attempted at this university.
5. The student's current academic status, eligibility for employment, and financial aid may be impacted. Probationary status and eligibility for on-campus employment are not affected by the exercise of the adjusted credit option.
6. The repeat rule for courses starts anew.
7. The student will not be eligible for award of an associate degree until earning thirty (30) or more additional credits after exercise of the Option.
8. The student is eligible for University honors at graduation upon completing a minimum of 60 academic credits at NMSU, after the adjusted credit option is exercised, with a resulting grade point average which satisfies University regulations for honors.

After carefully considering the consequences indicated above, eligible students may exercise the Adjusted Credit Option by paying a fee of \$10 and submitting an adjusted credit option application to the Office of the Registrar. The Option can only be exercised during the fall or spring semester before the last day to withdraw from the university. Application forms are available in the offices of the academic deans. Only students meeting the following criteria are eligible to exercise the Option:

1. No awarded baccalaureate degree
2. Enrolled as a degree-seeking or non-degree undergraduate student
3. Cumulative grade-point average of less than 2.0 at NMSU
4. Fewer than 60 credits accumulated (including both transfer and NMSU credits)

Credit by College Level Examination Program (CLEP)

Prior to or during a student's enrollment at NMSU, credits may be earned through the College Level Examination Program (CLEP) of the College Entrance Examination Board. CLEP is a national program of credit by examination that offers the opportunity to earn credits for college level achievement wherever or however the student learned. Earned CLEP credit will be treated as transfer credit without a grade, will count toward graduation, and may be used in fulfilling specific curriculum requirements. A current NMSU CLEP policy as well as test schedule information is available through Testing Services DACC East Mesa, RM 210. Testing Services may be reached at: (575) 528-7294.

Credit by Examination

Any enrolled student with a cumulative GPA of at least 2.0 currently attending classes may, with permission of the appropriate department, challenge by examination any undergraduate course in which credit has not been previously earned except an independent study, research or reading course, or any foreign language course that precedes the final course in the lower-division sequence. The manner of administering the examination and granting permission shall be determined by the department in which the course is being challenged. Students may not enroll in a single course, challenge it by examination, and drop it during the drop/add period, unless they enroll in an additional course. In exceptional cases in which a student demonstrates outstanding ability in a course in which he is already registered, he may be permitted to challenge the course. A student desiring to apply for special examination may obtain the necessary forms from the Office of the Registrar. The fee for challenging a course is the same as the approved tuition rate. Courses may not be challenged under the S/U option. The special examination

privilege is based on the principle that the student, exclusively, has the responsibility for preparing for a special examination.

Credit for Military Service

New Mexico State University will award academic credit to United States military personnel for courses and Military Occupational Specialties (MOS), based on the American Council of Education Guide (ACE) as well as through national standardized tests, such as CLEP, AP, PEP and DANTES. Credit for military-training is in accordance with NMSU Faculty Senate Legislation Proposition 24-07/08, which was passed in May 2008. Military Training and Military Occupational Specialties (MOS) must have a recommendation evaluation by ACE (in the ACE Guide) for credit to be awarded. Courses accepted for transfer credit become part of the student's official NMSU transcript and academic record. If a student wishes to appeal a decision regarding the acceptance of military training/education and/or MOS for academic credit, the student must submit a written statement of appeal to the Dean of the College to which the student has applied. The Dean will review the merits of the appeal and render a decision. The decision of the Dean is final.

Only Primary MOS (s) are eligible for academic credit in the initial review and evaluation. Credit for Duty and/or Secondary MOS may be eligible for academic credit if the student petitions the college's Associate Dean. Primary MOS is the primary specialty of a soldier and reflects the broadest and most in-depth scope of military experience. Veterans, active-duty personnel, National Guard and Reservists who are current students or students applying for admission to New Mexico State University may be granted academic credit on a case-by-case basis upon evaluation of military transcripts - the Joint Service Transcript (jst.doded.mil) and the Community College of the Air Force transcripts. Course equivalencies and credit hours awarded for a particular NMSU degree are determined by colleges and/or academic departments. Credit hours may be awarded for specific courses toward degree requirement, or as elective credit. The number of credit hours awarded will be determined by the college and/or academic department.

NOTE: Students submitting military transcripts for credit evaluation must keep in mind the Maximum Time Frame policy. See Financial Aid (<https://catalogs.nmsu.edu/nmsu/general-information/financial-aid-scholarship-services>) Section.

Graduate Course Deficiencies

Students who have been admitted with departmental deficiencies may be required to take diagnostics tests and additional qualifying examinations. They must complete satisfactorily, in a manner specified by the major department, all undergraduate course deficiencies as prescribed by the department responsible for the graduate program. Courses taken to satisfy deficiencies will be listed on the undergraduate transcript; however, these course grades will not be calculated in the student's graduate GPA or graduate hours. With the permission of the student's advisor and the head of department, courses to meet undergraduate deficiencies may be taken under an S/U option (with S being a grade satisfactory to the professor), and such courses will not affect the maximum number of S/U graduate credits permitted.

Short Courses for Graduate Students

Short course(s) that are numbered 450 and above have been approved to carry graduate credit. Graduate students must be registered for the short course(s) to receive graduate credit. Concurrent enrollment of graduate students in regular and short courses for the fall/spring semesters is allowed, provided the combined total credits does not exceed 15. All

short courses carrying one semester credit will be graded on an S/U basis and these credits will be counted toward the student's limit of S/U credits.

Challenging Graduate Courses

A graduate student may challenge a graduate course by examination, please see the Graduate School for more information.

University Grading System

Each course department or instructor establishes the system for assessing student performance in achieving course learning objectives.

Students should consult the course syllabus for a description of the grading system used in each course. At the conclusion of each course, instructors are required to report a final grade reflecting the instructor's assessment of each student's performance. Shortly after the end of the term, students can access their grades through the MyNMSU portal. No other grade notification will be issued. The final grade is reported on the student transcript. Instructors may elect whether to use fractional grading (the use of the plus and minus) in assigning final letter grades.

The NMSU system for final grades is expressed in letters, which carry grade points that are used in calculating the cumulative grade-point average, as shown in this table:

Letter Grade	Grade Points per Unit of Credit
A+	4.0
A	4.0
A-	3.7
B+	3.3
B	3.0
B-	2.7
C+	2.3
C	2.0
C-	2.0
D+, D, D-	1.0
F	0
W- Withdrawal	0
N- Grade not submitted	0
CR- Credit authorized, but not letter grade	0
IP- In progress	0
RR- Progress in undergraduate course	0
PR- Progress in graduate thesis	0
S- Satisfactory work ¹	0
U- Unsatisfactory work	0
I- Incomplete work	0
AU- Audit	0

¹ S grades are grades that are satisfactory to the professor and are normally equivalent to the letter grade of C- or higher.

Any courses for which only CR, S or PR is awarded, but no traditional letter grade is given, will be included in the total number of earned hours but is not computed in the grade-point average. Traditional letter grades are those which are used in the grade point average determination: A+, A, A-, B+, B, B-, C+, C, C-, D+, D, D- and F. In computing the overall grade-

point-average, the total credits in which grades of A+ through F have been assigned is divided into the total number of grade points earned.

Midterm and Six-Week Early Performance Grades

A Six-Week Early Performance Grade (sometimes referred to as Midterm Grade) for courses numbered 100-299 will be posted and available to students through the MyNMSU portal. The purpose of the early grade posting is to ensure that students have an opportunity to address any performance issues. Students should be mindful that the Six-Week Early Performance Grade reflects a student's performance on only that portion of the total coursework that has been graded at that time. Any student who is doing poorly, or not as well as they would like, should meet with the instructor to discuss how they can improve. Students who have concerns about their progress in multiple courses or who are considering withdrawal from course(s) must meet with their academic advisor.

In courses numbered 300 or higher, the posting of Early Performance Grades is optional and may occur through the online course management system rather than the MyNMSU portal. However, prior to the last day to withdraw from a course, upon request, instructors will provide information to students about their progress in the course.

Retention of Grading Records

Individual assignments and exams that are not returned to students should be retained by the instructor or department through the end of the subsequent regular semester. The records used to compute individual final grades should be retained for two years after the completion of a course. If a final grade is appealed, these records are kept for at least two years after the completion of the appeal. Departments, colleges or the library may require that records be kept for longer periods.

Minimum Grade Requirement for Graduate Students

Graduate degrees require a cumulative graduate G.P.A. of 3.0 or higher.

Although B- and C grades (including C+ and C-) earned at NMSU may be counted toward the requirements for a graduate degree in some programs, this grade does not reflect acceptable graduate-level performance and may cause the cumulative G.P.A. to fall below the 3.0 required for graduate students. Some departments have higher grading requirements for courses in their programs. Students should check with their departments regarding specific course grading requirements for their particular degree program.

Courses in which a student earns a D or F grade do not ever satisfy graduate degree requirements; however these grades will be calculated in determining the students' cumulative grade-point average. To obtain academic credit, students must retake courses in which a grade of D or F was earned.

S/U Grading

S/U grading allows the student to attempt to earn course credit without having a course grade included in their grade point average calculations.

Under S/U grading, the instructor assigns an S grade for satisfactory achievement of the course learning objectives (normally equivalent to the letter grade of C- or higher) and a U grade for unsatisfactory performance in the class.

Designated S/U Courses

Each academic college may designate courses in which the grading will be on a basis of S or U for all students enrolled in the courses. Credits in designated S/U courses are not included in the limitations on the number of S/U credits a student may take, and are not subject to the student eligibility requirements described below.

Election of the S/U Grading Option - Undergraduate Students

In courses other than those designated as S/U for all students, eligible individual students may elect the S/U Grading Option, subject to the regulations stated below. To be eligible for the S/U (satisfactory/unsatisfactory) Grading Option, undergraduate students must meet the eligibility requirements and obtain approval of an academic advisor. Eligibility requires completion of 28 credits at NMSU under traditional grading, with an overall average of 2.5 or better. (Upon approval of the adjusted credit option, students must re-establish eligibility.) Non-degree seeking students may take courses under the S/U option without regard to eligibility requirements. However, these courses may not be subsequently applied toward an undergraduate degree at NMSU.

The S/U option must be elected as part of the course registration and may not be added once the course registration period closes. Other than honors courses and courses officially designed as S/U, the following limitations apply to courses in which the S/U option is elected:

1. No more than 7 credits per semester or 4 credits per summer session.
2. Not to exceed a total of 21 credits towards a degree.
3. Not a required course for the student's major.

Students electing the S/U option should be mindful that upon a change of majors, the new major department may require a traditional grade for a course within that major that was previously completed with an S grade. In such cases, the student may request that the original instructor process a change of grade form to apply a traditional grade, however, if more than 2 years have elapsed or if the instructor is no longer at NMSU, such a change will not be possible and the student may be required to retake the course or obtain a traditional grade through a course challenge.

Election of the S/U Grading Option Election - Graduate Students

With an approval from their advisor and department head, graduate students in good academic standing may elect the S/U option, at the time of registration, for courses taken outside the major department, subject to the regulations stated below:

1. No more than a total of 6 credits of elected S/U courses are permitted in the master's degree.
2. Doctoral candidates may take an additional 6 credits under the S/U option after application to candidacy.

I Grade Designation

The letter grade of I (incomplete) is given for passable work that could not be completed due to circumstances beyond the student's control that develop after the last day to withdraw from the course.

In no case is an I grade to be used to avoid the assigning of D, F, U or RR grades for marginal or failing work. Examples of appropriate circumstances include documented illness, documented death or crisis in the student's immediate family, unexpected military deployment and

similar circumstances. Other job related circumstances are generally not appropriate grounds for assigning an I grade. Students requesting an I grade are responsible for providing satisfactory evidence of such circumstances. (In the case of medical records, instructors should review the information provided, note that adequate medical documentation was provided for review, and return the documentation to the student. Under no circumstances should the instructor retain any medical records or indicate the specifics of any medical condition in the academic records.) The refusal to grant an I grade may be appealed in the same manner as any other final grade.

To assign an I grade, the instructor must complete the "I grade Information Form" and have the form delivered to the associate dean of the course college. The instructor must indicate on the form whether the student will be given the option to complete the remaining coursework and have the I grade changed to the earned letter grade. If so, the instructor should indicate the steps necessary to complete the remaining coursework. The I grade form should either be signed by the student in person, or the associate dean must send a copy of the document to the student's official permanent address, as recorded in the Registrar's Office, with a notation on the form that the student was not available for signature.

The I grade will be permanent in instances where (1) the instructor did not provide an option to complete the coursework, (2) the instructor left NMSU prior to completion of the coursework and grade change, or (3) the student failed to complete the coursework by the relevant deadline, and the instructor did not indicate that the I grade would be changed to the earned grade upon failure to complete. In such instances, the student will be required to re-enroll in the course to receive credit (in which case the permanent I grade and the subsequent earned letter grade will both appear on the transcript).

The student is entitled to have the I grade removed from the transcript only if, within 12 months or any earlier deadline established by the instructor on the "I Grade Information Form" and prior to graduation, the student completes the remaining coursework, as specified on the Form, in a manner satisfactory to the instructor. If the student fails to complete the coursework, the instructor may change the I grade to any appropriate grade (including D, F or U) only if the instructor stated that this would occur on the "I Grade Information Form." The instructor should assign whatever grade was earned for the entire course.

To change the I grade, the instructor must complete a "Change of Grade Form," obtain the signature of the associate dean for the course, and submit the form to the Registrar's Office.

RR Grade

The RR grade may be assigned only in undergraduate developmental courses (CCDE, CCCL, CCDD & CCDD) and indicates that the student has made substantial progress toward completing the requirements of the course. It carries neither penalty nor credit, so a student must re-enroll and successfully complete the course in order to earn credit. The grade of RR may be received only once in any given course, and is a permanent notation on the student's transcript.

W Grade Designation

The W grade is assigned only in courses when the student withdraws or is administratively dis-enrolled from the course after the last day to drop the course. The W grade is permanent.

Effect of Change of Grade

The effect of a change of grade on a student's academic standing (scholastic warning, probation or suspension) depends on the date the transaction is officially recorded on the student's academic record. If the transaction is recorded before the student begins another semester, the grade change (such as replacing the I grade with an earned grade) is included in the grade-point average calculation in order to establish the student's academic standing. If the transaction is recorded after the student begins another semester, for the purpose of calculating academic standing, the new grade is included with any other grades earned for the semester in which the grade change is processed.

Grade Point Average

Grade point average (GPA) calculations are based solely on courses taken at NMSU or under an approved National Student Exchange.

Grading in Graduate Research

In grading both master's and doctoral research, thesis and dissertation work in progress, the instructor reports for each enrollment period the grade PR (progress) or U (unsatisfactory) rather than a traditional letter grade. These assigned grades are permanent notations on the student's transcript. Only those credits graded PR (Progress) accumulate toward the minimum number of research credits required.

PR indicates that the student has devoted an adequate amount of time to the work scheduled but does not indicate the quality. U indicates that the student has stopped work or is doing work of unacceptable quality.

At the conclusion of the final oral examination, or when the thesis/dissertation is submitted for the final signature of the graduate dean, the instructor will report the final S or U grade for that semester. If the thesis/dissertation and the performance in the final oral examination are found to be acceptable, the instructor will report an S (satisfactory) grade. If the thesis/dissertation or the performance in the final oral examination is found to be unacceptable, the instructor will report an U (unsatisfactory) grade.

If a student accumulates a total of two U (unsatisfactory) grades in courses numbered either 598, 599, 600, 699 or 700, the student will be placed on provisional status. If three U (unsatisfactory) grades are reported for these courses, the student will be dismissed from the Graduate School.

Withdrawal from a Single Course

Any student wishing to formally withdraw from a single course, after the last day to drop has passed, can do so through their Academic Advisor or the Registrar's Office. All such withdrawals will be registered on the student's transcript with the "W" grade indication.

For students wishing to withdraw from all courses, please see the section on Withdrawal from NMSU.

Leave of Absence from the Graduate School

Students who are working on advanced degrees and plan to have an interruption in studies, for a calendar year, should request for a leave of absence through their department head. The student must submit a formal letter through their department head to the Dean of the Graduate

School, an email will not be accepted. The request should include the beginning date and the anticipated ending date for the period of absence.

A graduate student on leave of absence will be expected not to use university facilities and place no demands upon the university faculty and staff, and, therefore will pay no fees. Time spent in the "leave-of-absences" status will not be counted toward the advanced degree time limits.

A graduate student who fails to register for one calendar year without obtaining a leave of absence from the Graduate School will be considered withdrawn from the university, by the Graduate School. In order to resume their studies after such absences, the student must go through the formal readmission process.

Administrative Withdrawals

An administrative withdrawal is initiated for a student who is representing the university at an official out-of-town event and becomes effective when the student returns from the event or five class days after the signed drop slip gets to the dean's office.

Military Withdrawal

New Mexico State University understands that our military students may be called to active duty, specialized training or up for disaster relief efforts with little notice active duty who wish to withdraw from the U.S. all their classes: armed forces; this includes an order for mobilization of the Reserve Forces as a result of a national emergency. However, the below policy does not pertain to a student's basic and/or annual training. Military and Veterans Programs: A student who has an order for training is encouraged VA students ordered to formally request, through the proper chain Active Duty must provide a copy of command, a postponement of their orders until the summer or the end of the semester they are currently enrolled in. to the MVP office, Garcia Annex, room 144. If a student's request for postponement is denied, the student may then follow the below steps but must provide documentation that their postponement request was formally denied.

All NMSU students that have been called up for active duty must take the following steps in order to withdraw from all their classes:

1. **Military and Veterans Programs (MVP):** VA students ordered to Active Duty must provide a copy of orders to the MVP office, in Corbett Center Student Union, Room 244. To assist in reporting accurate information to the VA Regional Office, student should also provide, in writing, last day of class attendance.
2. **NMSU Registrar:** All students presenting their orders to the Registrar's Office, (575) 646-3411, will receive a military withdrawal from classes and a full tuition and fees refund for that semester.
3. **Bookstore:** Students who still have their receipts for textbooks purchased the semester in which they are called to active duty will be given a full refund for these textbook purchases when they present their orders. (575) 646-4431.

Student Medical Withdrawal

A student medical withdrawal applies to a student who becomes seriously ill, injured or hospitalized and is therefore unable to complete an academic term for which they are enrolled. This action applies to all courses a student is registered for in the affected semester(s). The student cannot select which courses they want to withdraw from and which they want to remain registered for when exercising this option. The students' attending physician must provide a letter, on official letterhead with an original signature, stating the date(s) within the semester that

the student was under medical care and must withdraw because of that medical condition. This letter must be submitted within the semester or no later than one academic year after the end of the term for which the withdrawal is being requested.

Once the information is reviewed a final determination will be made if the student is eligible for the consideration of tuition or other refunds (students receiving funds awarded by the University Financial Aid and Scholarship Services should be aware of policies regarding withdrawal from the University). At the Las Cruces campus, medical withdrawal begins and ends at the Registrar's Office. At all other campuses, medical withdrawal begins at the Student Services Office but is ultimately finalized with the Registrar's Office on the Las Cruces campus.

Medical Conditions of a Family Member Withdrawal

A student who is withdrawing because of a medical condition of an immediate family member must submit a letter from the family member's attending physician. This action applies to all courses a student is registered for in the affected semester(s). The student cannot select which courses they want to withdraw from and which they want to remain registered for when exercising this option. It must be on official letterhead with an original signature, stating the date(s) within the semester that the student's immediate family member was under medical care and that the student must withdraw to attend to the immediate family member's medical condition. This letter must be submitted within the semester or no later than one academic year at the end of the term for which the withdrawal is being requested.

Immediate family member, in this instance, includes a spouse; a domestic partner, as defined in the NMSU Policy Manual 7.04; a child, parent or legal guardian; a sister or brother and a grandparents or a grandchild. Familial relationships that are created by law are also included (i.e. mother/father in law; half or step siblings); any other relationships can be considered on a case-by-case basis.

Once the information is reviewed a final determination will be made if the student is eligible for consideration of tuition or other refunds (Students receiving funds awarded by the University Financial Aid and Scholarship Services should be aware of policies regarding withdrawal from the University.) At the Las Cruces campus, medical withdrawal begins at the Registrar's Office. At all other campuses, medical withdrawal begins at the Student Services Office.

Withdrawal from NMSU

Withdrawal from any NMSU campus is an official procedure that must be:

1. Initiated by the student (using the Withdrawal form)
2. Have all necessary signatures (as indicated on the form)
3. Be approved and processed through the Registering Office, located on the Las Cruces Campus

Students who withdraw from all courses for the semester should do so in person through the Registrar's Office. However, students who are unable to come in person may submit an e-mail using their NMSU e-mail account to registrar@nmsu.edu. Students who leave without following the official procedure are graded appropriately by the instructor.

Applicable dates for the last day to withdrawal are published on the approved university academic calendar or under important dates at: <http://registration.nmsu.edu>.

A student who withdraws from all classes for the semester will retain access to their NMSU account per current policy but will lose access to other services and privileges available to enrolled students.

Financial information concerning drops and withdrawals can be found at <http://uar.nmsu.edu/withdrawals/>. Financial Aid Recipients should contact University Financial Aid and Scholarship Services before withdrawing. Students receiving funds awarded by the University Financial Aid and Scholarship Services should be aware of policies regarding withdrawal from the University.

The Federal Higher Education Act requires the University to calculate a Return of Federal Student Aid Funds for students who withdraw (officially or unofficially) from all classes on or before the 60 percent attendance point in the semester. Using a pro-rata schedule, the percentage of the semester attended is used to calculate the amount of the student's earned versus unearned Federal student aid funds. The unearned portion of Federal student aid funds will be returned to the appropriate aid program(s). Students withdrawing from classes are responsible for payment of any balance due after the required return of Federal student aid funds.

Graduation Requirements

For specific graduation requirements for any degree offered at NMSU please see the Degrees, Majors, Minors and Other Academic Programs of Study (p. 53) section (<http://catalogs.nmsu.edu/nmsu/regulations-policies/nmsu/regulations-policies/#academicprogramsofstudytext>), as well as the departmental sections for those requirements. These requirements will include the minimum GPA, total credits and specific course requirements for graduation.

Applying for a Degree

Any students that are in their final semester of classes are considered degree candidates and are required to submit an "Application for Degree" as well as pay graduation fees for each degree being sought. The application for Degree form is available online through the MyNMSU website. It must be completed and submitted by the designated deadline for that semester. The fees for the Las Cruces campus are all listed in the Tuition, Fees and other Expenses (p. 26) section of the catalog, once a student submits the application the fee will be included in the total cost for the semester or session in which the candidate anticipates completing their degree requirements.

If degree requirements are not completed during the semester/ session the student originally applied for, the student must then reapply and pay the appropriate fees. A \$25 late fee applies to applications received after the application deadline, and no applications will be accepted after the posted deadline date.

A student must specify which catalog they are using for their degree requirements in order for the university to determine if the requirements are met and if a degree can be certified. The latest date for substitution or waiver of required courses for degree candidates is two weeks after the last date of registration for regular or summer terms.

Attendance at the Commencement Ceremony

Commencement is a symbolic ceremony. Participation in commencement does not, in itself, mean that a student is considered an NMSU graduate. In order to be awarded a degree, a student must fulfill university requirements as determined by academic colleges. The degree

will reflect the graduation date from the application for degree in which all degree requirements were determined by the academic colleges.

The academic colleges will confirm the students eligibility to participate in the commencement ceremony that is held at the close of the fall and spring semesters. Eligible candidates who are in the process of completing their final degree requirements and degree recipients from the previous summer session will participate in the fall ceremony. Students who are in the process of completing their final degree requirements in the spring must attend the spring ceremony. However, Bachelor degree candidates that wish to participate in a spring commencement, prior to completing degree requirements in summer school may do so if they meet the following conditions:

1. Receive permission the Dean of their college
2. Show a minimum cumulative grade-point average of 2.0
3. Only need 12 or fewer credit hours to complete their degree requirements
4. These remaining credit hours must be offered in the upcoming summer schedule of classes
5. Submit a degree application and approved petition form (available in the Dean's office) by the last day to apply for a degree in the spring semester.

Academic Regalia

Each college may approve distinctive symbols to be worn by the top 10 percent of its graduates at commencement. Only one symbol may be worn by each graduate. In addition, the student with the highest honors in each college may wear a crimson- colored gown. No other symbolic additions to academic regalia are allowed without the approval of the Academic Deans Council.

Diploma

All fees and bills owed the university must be paid in full before a student may receive a diploma or official transcripts. The degree title and major(s) will be printed on the diplomas, in accordance to the degree application award, determined by the academic colleges. Academic honors will also be printed on the diplomas below the degree and major(s). The name on the diploma will reflect the student's current official NMSU records. Name changes are only processed for currently admitted students.

Diplomas will be mailed to graduates approximately eight weeks after the individual colleges certify the degree requirements and the final grades have been processed by the Registrar's Office. The diploma will be mailed to the address specified on the degree application, unless an address change was requested before the last day of the semester.

Undergraduate Academic Standing

When a student does not maintain adequate academic standing, he/ she is placed in Academic Warning. If the student's academic standing does not improve, the placement progresses to Academic Probation I. Continued unimproved academic standing moves a student into Academic Probation II, then finally, Academic Suspension. Each stage imposes more structure and limitations on the student in order to help them return to normal academic standing. The intent is not to punish, but to help the student return to normal academic standing and success. Since some of these limitations involve limitations on the number of credit hours, students on Probation or Suspension may be subject to loss of financial aid. It is the responsibility of the student to determine the impact of their changed academic standing on their financial aid.

Notification to students of academic warning, probation, or suspension appears on the student's grade report at the end of each grading period.

Undergraduate Academic Warning

Issued only once, the first time a student's cumulative GPA falls below a 2.0 while in good academic standing. The relevant Associate Dean for Academics or Campus Academic Officer (CAO) will send the student a letter detailing the consequences should the cumulative grade point remain below a 2.0 at the conclusion of the semester. A student on Academic Warning remains eligible for all extracurricular activities as governed by the rules of the specific activity.

While under Academic Warning the following restrictions apply:

1. The student may be required to enroll in a 3-credit hour special study skills/time management course specifically designed for students on Academic Warning, or an equivalent course approved by the appropriate associate dean or CAO of their campus.
2. Students will be required to enter into a contract with their advisor, approved by their department head that places further stipulations on Academic Warning. The contract may include, but is not limited to the following:
3. The student may be required to take at least one repeat course to try to improve their GPA.
4. Except for the special study skills/time management course, the student's coursework may be restricted to their major.
5. The student may be required to get tutoring help.
6. The student may be required to see an academic counselor on a specified time schedule.
7. The number of credit hours a student may register for may be restricted (due to extenuating circumstances such as the student's workload commitments).

The associate dean or CAO may place the student on Academic Probation I should the student not adhere to the stipulations of the contract.

If the student's semester GPA is less than a 2.0, and the cumulative GPA remains below a 2.0 at the end of the semester on Academic Warning, the student is placed on Academic Probation I. If the semester GPA is greater than 2.0 but the cumulative GPA is still less than 2.0, the student will remain on Academic Warning. If the cumulative GPA is greater than a 2.0 at the end of the semester then the student is returned to good academic standing.

Undergraduate Academic Probation I

This occurs when a student under Academic Warning has a semester GPA less than 2.0, and the cumulative GPA remains below 2.0 at the conclusion of the semester or if the student maintains a semester GPA greater than 2.0 while on Academic Probation I but the cumulative GPA is still less than 2.0.

Under Academic Probation I the following conditions apply:

1. The student cannot enroll in more than 13 hours of coursework during the semester. *Note: Students falling below 12 credits in any one semester will jeopardize their financial aid.* Should this occur, students should see the associate dean in their college as soon as possible to try to implement corrective measures.
2. The student will enter into a contract or individualized education plan with their advisor and approved by the associate dean or CAO that place further stipulations on Academic Probation I. The

associate dean or CAO may place the student on Academic Probation II or Academic Suspension should the student not adhere to the stipulations of the contract.

3. Students on Academic Probation receiving educational benefits from the Veterans' Administration must obtain counseling from the Military & Veterans Programs Office.
4. Students admitted under special provisions whose transcripts indicate less than a 2.0 GPA are admitted on Academic Probation I.

The student must maintain a semester GPA equal to or greater than 2.0 until such time that the cumulative GPA is greater than 2.0 at which time the student goes back to good academic standing. Until the transition happens the student remains on Academic Probation I. The student will be placed on Academic Probation II if he/she is unable to maintain a 2.0 semester GPA, and the cumulative remains below a 2.0 GPA, while under Academic Probation I. A student on Academic Probation I remains eligible for all extracurricular activities as governed by the rules of the specific activity.

Undergraduate Academic Probation II

Academic Probation II is issued in two ways.

- The first is when a student falls below a semester 2.0 GPA and the cumulative GPA remains below a 2.0 while on Academic Probation I.
- The second is when a student maintains a semester GPA greater than 2.0 while on Academic Probation II but the cumulative GPA is still less than 2.0.

The following restrictions are in place for student's in Academic Probation II:

1. The student cannot enroll in more than 7 credit hours of coursework during the semester.
2. As with rule 2 under Academic Warning and Academic Probation I and at the discretion of the associate dean or CAO, the student will be required to enter into a contract with their advisor, approved by the associate dean or CAO, to place further stipulations on Academic Probation II.

The associate dean or CAO may place the student on Academic Suspension should the student not adhere to the stipulations of the contract.

The student must maintain a semester 2.0 GPA or higher until the cumulative GPA reaches a 2.0 or higher at which time they are placed on good academic standing. A student unable to maintain a semester GPA of 2.0 or higher, and the cumulative remains below 2.0 GPA, while under Probation II will be placed on Academic Suspension. A student on Academic Probation II remains eligible for all extracurricular activities as governed by the rules of the specific activity.

Continuing in Probationary Status

Students may continue to enroll while on Academic Probation I or II provided they maintain a semester GPA of 2.0 or higher. If they withdraw from the university while on Academic Probation, they continue on that same level of Academic Probation.

Removal of Academic Probation

Such academic standing is removed when the cumulative GPA is raised to 2.0 or higher, with the following exceptions:

1. a transfer student may not remove probation by summer work alone;

2. if an I grade is removed after the student has enrolled, the new grade's effect on academic standing is based on its inclusion with grades for the term for which the student is enrolled;
3. exercise of the Adjusted Credit Option does not change academic status until subsequent grades are earned.

Academic Suspension

When a student does not achieve a semester 2.0 GPA or higher, and the cumulative remains below a 2.0 while under Academic Probation II, they are placed on Academic Suspension. Students under Academic Suspension are not allowed to take NMSU courses while under suspension. Students on Academic Suspension must sit out a minimum of 1 semester and then petition the Provost or designee to be removed from Academic Suspension. At this time the suspension status will be evaluated for possible removal. Should the suspension be lifted, the student is placed on Academic Probation II until such time as the cumulative GPA equals or exceeds a 2.0. At the discretion of the Provost or designee, the student will enter into a contract approved by the Provost or designee and the student's Dean or CAO, setting stipulations to have the suspension removed. Failure to adhere to the contract will return the student to Academic Suspension.

Under certain conditions, a student may be re-admitted at NMSU under regular status while under Academic Suspension when satisfactory progress has been demonstrated at another college or university (see Readmission- Degree Seeking). Credits earned at another university or college while under Academic Suspension from NMSU or another university or college will be accepted at NMSU only after the student demonstrates satisfactory progress over a period of two semesters after being re-admitted or admitted to NMSU. Acceptance of transfer credits that count toward degree requirements is still governed by the rules established by the student's respective college or campus.

Rescinding Academic Suspension for Summer Attendance

A student may use summer classes to try to get warning or probationary status removed. Students suspended at the close of the spring semester may have their Academic Suspension rescinded if they attend summer session at NMSU or one of its Community College colleges. Such attendance must raise the combined spring semester and summer GPA to 2.0 or better. Under no circumstances may a student on Academic Warning or Academic Probation be allowed to register for an overload. Academic Warning status is continued if the student withdraws from the university and the probation or suspension status applies to all subsequent enrollments.

A certification of eligibility to attend summer sessions at NMSU after a spring semester Academic Suspension is available to the suspended student who wishes to attend summer sessions at other institutions.

Graduate Academic Probation and Suspension

Graduate Academic Standing is based on both the student's semester GPA and cumulative GPA.

Graduate Academic Probation I: A graduate student is placed on Graduate Academic Probation I when a graduate student's semester GPA is above a 3.0 and the cumulative GPA drops below 3.0; or when the semester and cumulative GPA's drop below 3.0 and the previous academic standing is Graduate Regular Good Standing.

Graduate Academic Probation II: Is issued when a graduate student semester GPA is above a 3.0 and the cumulative GPA drops below as

3.0 and the previous academic standing is one of Graduate Academic Probation I or Graduate Re-admit on Probation I.

The student must maintain a semester GPA of 3.0 or higher until the cumulative GPA reaches a 3.0 or higher at which time the graduate student is placed on Good Academic Standing. If the graduate student is unable to maintain a semester GPA of 3.0 or higher and the cumulative remains below 3.0 GPA while under Graduate Academic Probation II, the student will then be placed on Graduate Academic Suspension.

Graduate Academic Suspension: When a graduate student does not achieve a semester GPA of 3.0 or higher, and the graduate cumulative GPA remains below a 3.0 while under Graduate Academic Probation II or Graduate Re-Admit on Probation II, the graduate student is placed on Graduate Academic Suspension.

Graduate students under Graduate Academic Suspension are barred from enrolling in graduate level courses at NMSU while under Graduate Academic Suspension. Graduate students on Graduate Academic Suspension must sit out a minimum of one semester. Graduate students on suspension who wish to continue Graduate School after suspension must re-apply to the Graduate School and petition the Graduate Dean or College Academic Dean to be removed from Graduate Academic Suspension. At this time the graduate academic suspension status will be evaluated for possible removal. Should the suspension be lifted, the graduate student is placed on Graduate Academic Probation II or Graduate Re-admit on Probation II until such time that the graduate cumulative GPA equals or exceeds 3.0.

If you have questions about your academic standing, please contact the advising center or Graduate Dean's office.

Academic Misconduct and Grievances

Both Undergraduate and Graduate students at NMSU are expected to observe and maintain the highest academic, ethical, and professional standards of conduct. Students should consult Section III of the Student Code of Conduct in the Student Handbook (<http://studenthandbook.nmsu.edu>) for more specific information regarding the rules of conduct and definitions of misconduct. Any student found guilty of academic misconduct shall be subject to disciplinary action. Academic misconduct includes, but is not limited to, the following actions:

1. Cheating or knowingly assisting another student in committing an act of cheating or other forms of academic dishonesty
2. Plagiarism, which includes, but is not necessarily limited to: submitting examinations, themes, reports, drawings, laboratory notes, undocumented quotations, computer-processed materials, or other material as one's own work when such work has been prepared by another person or copied from another person.
3. Unauthorized possession of examinations, reserve library materials, or laboratory materials.
4. Unauthorized changing of grades on an examination, in an instructor's grade book, or on a grade report or unauthorized access to academic computer records.
5. Nondisclosure or misrepresentation in filling out applications or other university records in, or for, academic departments or colleges.

Disciplinary Suspension or Expulsion Due to Academic Misconduct

NMSU expects all students, both Undergraduate and Graduate, to regard themselves as responsible citizens on all campuses (including Alamogordo, Carlsbad, Dona Ana and Grants) and in the community.

Repeated misconduct and major violations will cause the student to be subject to immediate suspension or expulsion from the university.

Students are subject to the general rules and regulations applicable in the Student Code of Conduct of the Student Handbook (<http://studenthandbook.nmsu.edu>).

Procedures to Deal with Cases of Alleged Academic Misconduct

Policies and procedures for dealing with such cases are detailed in the in the Student Code of Conduct <http://studenthandbook.nmsu.edu/>. Procedures include all course levels and all of the campuses of New Mexico State University, including Alamogordo, Carlsbad, Dona Ana, Grants and Las Cruces.

- Undergraduate Students: Questions concerning these policies and procedures should be addressed to the Dean of the Academic College
- Graduate Students: Questions concerning these policies and procedures should be addressed to the Dean of the Graduate School.

Undergraduate Academic Appeals Board

Within each college of the university or the library, an academic appeals board will be appointed by the associate dean for academics to hear student appeals. The appeals board will consist of three faculty members and two students.

Procedure for Initiating Grievance Complaints for Undergraduate Students

This procedure has been established to provide a method to resolve undergraduate student grievances at the lowest administrative level in a fair and expeditious manner.

For the purpose of this procedure, grievances are limited to alleged violations of university policy or procedures by the university or its employees, disputes with faculty and/or alleged unfair treatment. Usually this method is used to appeal a grade the student feels was not justified. Under no condition should these policies be used when the student has allegedly violated the University Code of Conduct or a contractual agreement, and at no hearing should either party have a lawyer. Any student who believes that he/she has been unjustly treated within the academic process may proceed as far as necessary in the steps detailed below. Should the alleged grievance not involve a faculty member or course, the student is to appeal directly to the department head or associate dean for academics in whose area or college the alleged grievance occurred.

The following are the steps and procedures for initiating a Grievance Complaint:

1. **Appeal to the faculty member:** The student is to submit a written appeal to the faculty member within 30 days after the start of the semester following the semester in which the alleged grievance occurred. Semester in this case refers to fall and spring only. If the alleged grievance occurs during the summer session, the student is to submit an appeal no later than 30 days into the fall semester following the summer session in which the alleged grievance occurred. The faculty member and the student are to discuss the problem. The faculty member will submit a written report outlining his or her decision to the student and department head or appropriate unit designee within ten working days of receiving the student's written appeal.
2. **Appeal to the department head or appropriate unit designee:** If a decision satisfactory to the student cannot be reached, the student may submit a written appeal to the department head or appropriate unit designee in which the course in question is taught. This is to be done within ten days of the receipt of the faculty member's written decision. The faculty member, the department head or appropriate unit designee, and the student are to meet to discuss the problem. The department head or appropriate unit designee will send a written response outlining his or her decision to the student and faculty member within ten days of this meeting.
3. **Appeals to the associate dean for academics or associate dean of the library:** If a satisfactory decision cannot be reached among the department head or appropriate unit designee, the faculty member, and the student, the student or the faculty member may submit a written state of appeal to the associate dean for academics of the college in which the course was taught. This is to be done within ten working days after the receipt of the written decision by the department head. The associate dean may request a written recommendation from an Academic Appeals Board. Should this be the case, the Academic Appeals Board will conduct a hearing with the student and faculty member (not necessarily at the same time) to review the merits of the appeal. They may also ask for supporting evidence for or against the appeal. The Academic Appeals Board will submit the written recommendation to the associate dean within five working days following the conclusion of their process. The associate dean may meet with the student, faculty member, and department head to discuss the appeal (not necessarily at the same time). The associate dean will submit a written response outlining his or her decision to the student, faculty member, department head, and dean within ten days of the last meeting.
4. **Appeals to the dean:** The dean of the college or library in which the course is taught or in whose college the alleged grievance occurred may, at his or her discretion, review the appeal upon the written request of the student or faculty member and render a final decision. An appeal to the dean is the last step in the appeals process and the dean's decision cannot be appealed further. Should the dean not choose to review the appeal, the decision of the associate dean for academics or associate dean of the library is final.
5. **Exceptions to the time involved:** The associate dean for academics or associate dean of the library may waive the normal time frame for appeals for compelling reasons. Regardless of circumstances, academic appeals must be initiated with the course instructor within two years of the conclusion of the semester or summer session in which the course was taken.
6. **Enrollment:** A student need not be enrolled at the university to initiate an appeal.

Graduate Student Appeals Board

Each academic year a standing committee, consisting of three members of the graduate faculty and two graduate students, is appointed by the dean of Graduate School to handle grievance complaints including grade appeals. Any graduate who believes that he or she has been unjustly treated within the academic process may proceed as far as necessary in the following steps to resolve his or her grievance. In general, there are three levels at which a grievance can be addressed:

- a course instructor or advisor,
- a department head, or
- the dean of the Graduate School.

If the initial grievance is with an instructor or advisor, the process begins at Step 1. If the initial grievance is with a departmental committee, the process begins at Step 3. In all instances, the process must begin at the lowest possible level.

1. Under normal circumstances, the student should discuss the issue with the instructor/advisor.
2. If the student is unable to resolve the issue through consultation with the faculty member, the student must submit a written memorandum detailing the grievance to the course instructor or advisor within 10 calendar days of the beginning of the following full (i.e., fall or spring) semester. The person to whom the memorandum is addressed must respond in writing within ten calendar days to the student.
3. If the student is not satisfied with the response from Steps 1-2, he or she must submit a written appeal to the department head within ten working days of the initial decision. If the student is initiating the appeal at the departmental level, he or she must do so, in writing, within ten calendar days of the beginning of the following full (i.e., fall or spring) semester. The department head must respond in writing within ten working days to the student, the instructor or advisor (if one is involved), and the dean of Graduate School.
4. If the student is not satisfied with the response from Steps 1-3, they must submit a written grade appeal letter to the academic dean's office of the college where the course is taught. If it is a grievance against a faculty member, then the academic dean's office where the course is taught would be that of the faculty member's college. The student has ten calendar days after receiving the decision of the department head. The associate dean of the given college has ten days to collect the necessary documents to make a decision on the student's appeal or grievance. Please note that additional days may be required to collect information from the faculty and/or student involved in the case. The academic dean's office where the course is taught may convene an ad hoc committee to investigate the case.
5. If after the fourth step the student or any of the other parties involved is still not satisfied with the response, he or she must present to the dean of the Graduate School within ten working days a formal letter that provides specific details regarding the nature of the grievance. Copies of all documents including course materials and grades must accompany the letter. In the letter, the student can request that their case be presented to the Graduate Student Appeals Board. After receiving a letter complaint (not an email), the dean of the Graduate School will determine whether the complaint has merit. He or she will do so after reviewing the letters from the faculty member, the department head and the office of the academic dean as well as the materials from the student and all those involved in the case. If the graduate dean determines that the appeal does not have merit, he or she will inform the appellant and other parties, in writing, within ten working days of receiving the appeal. Please note that additional days may be required to collect information from the faculty and/or student involved in the case. If the graduate dean decides that the appeal does have merit, he or she will convene the Graduate Student Appeals Board, normally within three weeks. The Graduate Student Appeals Board will conduct, within 60 days of their convening, whatever investigations and deliberations are necessary, and will forward to the dean of the Graduate School a recommendation to resolve the grievance.
6. After reviewing the recommendation of the Graduate Student Appeals Board, the dean of Graduate School will, within ten working days, inform all parties involved of his or her decision in writing.
7. The dean of the Graduate School may waive the normal time frame for grievances when either party presents compelling evidence

justifying such a delay, but grievances must be launched within one year. Grade appeals involving charges of plagiarism must follow the process established on academic misconduct in the Student Code of Conduct., the web site is <http://studenthandbook.nmsu.edu/>. The Graduate School strongly encourages students to study and use the Plagiarism web site of the Library to learn of ways to avoid plagiarism: <http://nmsu.libguides.com/plagiarism>.

Privacy Rights

The following information has been designated as directory information and is subject to release to the public under the Buckley Amendment (PL 98-380), "The Family Educational Rights and Privacy Act of 1974:" student's name, address, telephone number, date and place of birth, student ID number, honors and awards and dates of attendance.

Other information regarding disclosure of student data is posted at the Registrar's Office in compliance with the Act.

Requests for withholding directory information must be filed in writing with the Registrar's Office. A student may choose to hide his/her address and phone number from the campus phonebook through the myNMSU portal. This will only hide the information from the public but the records will still be officially kept within the Registrar's Office.

Social Security Numbers in Student Records

As required by law, social security numbers are collected from prospective and current students who are either applying for admission to the university or plan to seek employment on campus. The social security number is a confidential record and is maintained as such by the university in accordance with the Family Educational Rights and Privacy Act.

In addition, the university is mandated by federal tax regulations to provide tuition and fee payment information to the student and the Internal Revenue Service so that applicable educational tax credits may be computed. The social security number will be necessary to submit this tax reporting.

Change in Demographic Information

Students wishing to make a formal name change, social security number update or a gender update can do so through the Registrar's Office. All students will need to fill out the "Demographic Change form" located at <https://registrar.nmsu.edu/forms/> and provide one of the following documents to the Registrar's Office.

1. **Name change:** students will need one legal documentation with the new name on it. This can be a Government Issued ID (drivers license, state card or valid passport), a Birth Certificate, a Court Order, a Marriage Certificate/Divorce Decree or a Certificate of Naturalization/Green Card. * Note: Documentation is not required to add/delete hyphen, space, apostrophe, or to abbreviate a middle name to initial.
2. **Social Security Number Update:** students will need to bring the updated and signed Social Security Card. Unsigned cards will not be accepted until the signature is added.
3. **Gender Update:** students will need to bring a Government Issued ID (drivers license, state ID card or valid passport) and a Revised Birth Certificate

For more information about the specific documents that are needed please contact the Registrar's Office at (575) 646-3411.

Students may update their “preferred name” which is the name used in lieu of a student’s legal name on certain documents, such as, the email display name, learning management system, the phonebook, class rosters and advisee lists. This can be done by the student through the myNMSU portal and does not need to be done at the Registrar’s Office.

Changes in Residency Status

The Registrar’s Office does not determine the laws and rulings for determining Residency, these are state laws that the Registrar’s Office simply administers. An individual must establish legal residency in New Mexico before he or she is entitled to pay in-state tuition rates.

The student’s initial residency status is determined at the time of admission, any changes to this status must be initiated by the student through the Registrar’s Office. A continuing student, classified as a non-resident, who has satisfied the requirements to establish residency may submit a Petition for In-State Residency Tuition Classification along with the required supporting documentation to the Registrar’s Office.

Petitions must be filed on or before the census date of the semester effective.

For specific information about the process of petitioning for In-State Residency or for information about who is eligible for residency for tuition purposes please visit the <https://registrar.nmsu.edu/residency/> website or the Registrar’s Office on the Las Cruces campus.

Official Transcripts

An official transcript is the University’s certified statement of your complete NMSU academic record in chronological order by semester and year. It includes the student’s coursework, grades and any degrees that were awarded. Any credit hours earned through transfer work are not listed in detail, but do appear as cumulative totals. Official transcripts will not be released if the student is in debt to the university.

Transcripts can either be ordered in person at the Registrar’s Office or online at <https://registrar.nmsu.edu/transcripts/>, there will be a fee for these that may vary depending on the total number of transcripts ordered and the type of delivery method that is selected. A student can request two types of transcripts an electronic one, which is sent as a secured PDF or a printed hard copy that can be delivered in a sealed envelope.

The name that will appear on the student’s transcript will match the name on the student’s official NMSU record. Name changes will only be processed for current NMSU or Community College students.

Purging of Student Files

All academic files for students who attend NMSU are kept for five years following the student’s final enrollment. Only archival documentation will be retained. The files of students who do not enroll for one year after being admitted are destroyed.

THE GRADUATE SCHOOL

A number of academic departments of the university have a long history of providing formal graduate study. The first master's degree from NMSU was awarded in 1896. In 1921, the president of NMSU appointed a committee to oversee graduate study. The Graduate School was formally established in 1956 with a full-time dean, and in the same year, 57 master's degrees were awarded.

The Graduate School mission is to facilitate the exchange of ideas and the creation of knowledge, while fostering academic excellence. The Graduate School promotes a high-quality learning environment that embraces diversity. New Mexico State University is one of the few research extensive universities that reflect Hispanic, Native American, and other American cultures and the world. Our international students from Latin American, Asian, African and European countries add to the richness of our diversity. The quality of life for our students is of critical importance to the Graduate School and NMSU. We cultivate the marriage of academic, professional and personal skills while helping students graduate in a timely manner.

Policies

Since graduate degrees are awarded for attainment in scholarship, the requirements stated in this catalog are to be considered as minimal. The major department or the dean of the graduate school may make additional requirements as deemed necessary for each candidate. Each student's program is subject to the approval of the respective department head. Responsibility for securing approval of the proposed program of study rests with the student. Frequent consultation with the advisor is essential to satisfactory progress toward degree completion.

Graduate Degree Programs

For a full listing of the Graduate Programs offered at New Mexico State University, please see the Graduate Admissions webpage <http://gradadmissions.nmsu.edu/graduate-programs/>.

Admission for Graduate Students

A student seeking admission to graduate school at New Mexico State University must hold a minimum of a bachelor's degree or an advanced degree from a regionally accredited institution. The program of preparation should be substantially equivalent in the distribution of academic subject matter to the requirements for a comparable degree at NMSU.

No student is officially admitted into a graduate program until a Certificate of Admission has been issued by the Graduate School. Although the Graduate School considers this certificate valid for a one year period, academic departments may require re-application if the admitted applicant does not enroll in the semester noted in the certificate.

Formal application is required of all prospective students, including graduates of NMSU, who seek admission to a graduate program.

- Students must submit: the Application for Admission as well as other supplemental documents required by the academic department.
- Supplemental documents may include, but are not limited to, unofficial college transcripts, test scores (TOEFL, IELTS, GRE,

and GMAT), statement of purpose, writing samples, and letters of recommendation.

If a student is recommended for admission by the academic department, the student will be required to submit official transcripts, test scores, and the appropriate application fee directly to the Graduate School. Other official documents may be required. Official transcripts must be sent directly from the prior colleges or university directly to the Graduate School.

Categories of Graduate Students

A student seeking admission to a graduate program is assigned one of the following categories based upon previous academic performance:

Doctoral Student

To be considered for admission to a doctoral program, an applicant must have a minimum grade-point average of 3.0. Some doctoral degree programs also require a master's degree or its equivalent.

Master's Regular

An applicant whose scholastic record is satisfactory will be admitted as a regular student. This classification includes:

1. an applicant whose grade-point average is greater than or equal to 3.0, or a grade-point average greater than or equal to 3.0 in the last half of undergraduate work,
2. an international applicant whose grade-point average (or its equivalent) is greater than or equal to 3.0,
3. a continuing graduate student whose grade-point average is greater than or equal to 3.0, or
4. a student with prior graduate work at another institution whose minimum grade-point average is 3.0.

Master's Provisional

An applicant whose scholastic record is not satisfactory can be admitted as a provisional student. Students admitted with this classification can be either:

1. transferring graduate students whose cumulative grade-point average is less than a 3.0
2. Students whose grade-point average the last half of undergraduate work is less than a 3.0, but who does have a minimum grade-point average of 2.5

A student admitted provisionally must complete his or her first three courses, a total of 9 credits of graduate work, with a minimum grade-point average of a 3.0. A provisional student who does not meet the 3.0 grade-point average after at least 9 credits of graduate work is subject to dismissal. A student admitted on a provisional basis is prohibited from working as a teaching assistant. However, he or she may work as a research assistant or a grader for one semester. A provisional student can be employed for one semester as a grader. To hire a provisional student, departments must submit an official letter to the Graduate School requesting permission.

Master's Undeclared

An applicant that has not decided on a specific graduate degree program and has an undergraduate minimum grade-point average of 2.5 may be considered for admission as an undeclared master student. International students with an F-1 visa are not eligible for undeclared master status. Advising for an undeclared master student can be obtained from the Graduate School.

Only undeclared regular status students who meet all Title IV eligibility requirements are eligible to receive federal financial aid for one consecutive 12-month period beginning the first term of enrollment. Questions about financial aid and undeclared master's should contact Financial Aid and Scholarship Services. An applicant admitted as an undeclared master is not eligible to receive a graduate teaching assistantship.

Student Enrollment Restrictions

- Students in this standing are restricted to enrolling in 9 graduate credit hours. To continue enrollment the student must apply and be admitted into a degree-seeking program.
- Course restrictions placed by the graduate department may constrain enrollment by an undeclared student.
- An undeclared master student is restricted to transferring 9 graduate credit hours to a degree program.

Transfers

Transferring from an undeclared master's to a degree program requires a new Application for Admission.

- If the student has nine or more graded graduate credit hours, the cumulative minimum grade-point average (GPA) must be 3.0 for the request to be considered.
- If the student transferring to a degree program has fewer than nine graded graduate credits and the undergraduate GPA is between 2.5 to 2.9 the recommendation for admission will be provisional student status.
- If the undergraduate GPA is 3.0 or greater, the admission recommendation will be regular student status.

Admission to a Graduate Certificate Program

The graduate certificate program of study is designed to develop or enhance a focused area of expertise. The primary purpose of a graduate certificate program is to provide specific skill training to meet employment needs locally, regionally, nationally and globally.

A graduate certificate is a focused collection of courses, consisting of 12-18 credits, successfully completed by a student in a given discipline or a set of related disciplines. A graduate certificate is not an official graduate degree of NMSU. A student that successfully completes a certificate program at the graduate level will receive a certificate of completion statement on his or her official transcript and a formal certificate from the Graduate School. A student has three years to complete a graduate certificate program.

The graduate certificate program is offered to both currently enrolled, degree-seeking students and students who enroll solely to obtain a certificate. Currently enrolled degree-seeking students must apply separately to the graduate certificate program. Students wishing to enroll solely in the certificate program must still meet all admissions criteria. Successful completion of a certificate program does not guarantee admission into a graduate degree program.

A student enrolled in a graduate certificate program cannot transfer credits from another institution towards the completion of the program. However, transfer credits taken in a graduate certificate program may be applied towards a graduate degree program in the same area of focus. The number of transfer credits will be determined by the program of

study. The time limit on transfer credits is 5 years after the completion of the certificate.

Students only enrolled in a graduate certificate program are not eligible for a graduate assistantship.

Graduate Certificate Student

A student enrolled in a certificate program is not automatically enrolled in a graduate degree seeking program at NMSU. The status will change if he or she applies and is accepted to a graduate degree program. A student enrolled in a graduate certificate program is not eligible for a graduate assistantship.

Application Dates and Deadlines

Contact the graduate degree program for published application deadlines. If the graduate program does not publish a deadline, the Graduate School encourages the applicant to apply by March 15th for fall enrollment and by October 15th for spring enrollment to be considered for financial support. The Graduate School will continue to accept applications 30 days prior to the first day of classes.

Transcripts

An applicant is required to arrange to have one official transcript from each institution attended sent directly to the Graduate School.

If the applicant's undergraduate coursework is not complete at the time of application, she or he must submit a transcript showing the completion this course work directly after the degree has been granted. No application materials will be returned to the applicant.

Standardized Tests

Certain graduate programs may require standardized test scores for admission. An applicant may be required to take one or more of the following examinations as determined by the academic department:

- Graduate Record Examination,
- the Miller Analogies Test,
- the Graduate Management Admission Test.

(See academic department description for required testing.)

Readmission

An NMSU student who has been out of school for more than two consecutive terms is required to make formal application for readmission to the institution. The application will be reviewed by the academic department and the Graduate School. The application should be submitted at least 30 days prior to the start of the semester.

A student who has attended other institutions during the absence is required to submit official transcripts to the Graduate School prior to the date of registration and be eligible to return to the college or university last attended. Admission status will be determined by previous NMSU academic standing. Academic performance at other institutions attended during the applicant's absence from NMSU may be taken into consideration in determining the student's admission status.

Renewal of Application for Admission

The admission credentials for an applicant who does not register for the semester admitted are retained at the Graduate School for a period of one calendar year from the date of application. At the end of this

period, credentials are discarded. A student wishing to renew his or her application after the one-year lapse must submit a new application.

Denied Admission

The Graduate School or the department may deny admission if the scholastic record or program of study is judged inadequate. If denied admission by a specific academic department, the applicant may be eligible to seek undeclared status as described in Categories of Graduate Students. If denied by the department, the student may wish to contact the department for additional information.

Admission may be denied to an otherwise qualified applicant when the desired program lacks resources to accommodate additional enrollment.

A student who is denied admission to one program and wishes to be considered for another program must complete a new application for the second program.

Application documents are retained by the Graduate School for one calendar year.

Non-Degree Admission

Non-degree admission is designed to meet the needs of an applicant who does not wish to pursue a degree or who has not yet completed the application process to a specific department. Academic advising for non-degree students is obtained from the academic department. No more than 9 graduate credits earned in non-degree status may be transferred to a graduate degree program. NMSU only recognizes graduate credit for non-degree work from the University of New Mexico (UNM). Transfer credit is restricted to 6 credits with the approval of the appropriate department, the college dean, and the graduate dean. A student classified as non-degree is not eligible to receive financial aid, student employment, or institutional tuition waivers; nor is he or she eligible to participate in student government or intercollegiate athletics; and is not eligible to receive benefits from veterans' programs.

Visiting Student

A visiting student is a student taking graduate credit to transfer to his or her parent institution. An Application for Admission to the Graduate School must be submitted 30 days prior to registration. The student is required to submit unofficial transcripts; however, the academic department must concur and admit a visiting student. Visiting students are not eligible for undeclared status or for graduate assistantships.

Out-of-State Students and Legal Jurisdiction

By applying for admission/enrollment, both the student and parents agree that New Mexico law prevails and all litigation will be held in New Mexico federal court or state court in Dona Ana County, New Mexico.

<http://gradschool.nmsu.edu/>

International Graduate Students

English Proficiency for Admission

- TOEFL 79 IBT; 550 PBT
- 6.5 IELTS

International students admitted with TOEFL 68 to 78 IBT, 520 to 549 PBT or 6.0 IELTS are required to sit for the English Placement Exam prior to beginning academic coursework. (The International Student and Scholar Services Office arranges this test upon arrival). If the results of the English Placement Exam do not meet the requirements for academic coursework the student may be required to take additional academic English classes (SPCD 110 and/or SPCD 470).

English Proficiency

International students that wish to become teaching assistants must demonstrate that they are proficient in the English language. This is done by participating in an International Teaching Assistant Screenings (ITAS). The purpose of the ITAS exercise is to determine whether candidates will be required to take COMM 485 International Teaching Assistant Development before being allowed to be assigned a teaching assistant position.

The ITAS requires that a teaching assistant candidate deliver a short, ten minute teaching demonstration of a typical introductory undergraduate level course in a specific area relevant to the his or her area of studies. The demonstration is observed by CELP faculty and an actual undergraduate student.

Based on the results of this exercise, a full report by the CELP observers will be presented to the head of the department in which the graduate student wishes to be a teaching assistant.

- COMM 485 International Teaching Assistant Development not required
- COMM 485 International Teaching Assistant Development recommended, but not required
- COMM 485 International Teaching Assistant Development required

Ultimate authority to enforce the recommendation lies with the Department Head.

Preferably during Summer Session II, or before the start of the first semester of enrollment, all international students that wish to be considered for a teaching assistantship must take the ITAS, which is administered by the CELP. The ITAS can be waived for international students who hold a degree from an accredited university in the United States, or a country where English is the official language of instruction. Departments also have the discretion to allow waivers for special circumstances.

Enrollment

All international graduate students on F-1 or J-1 visas are required to comply with Department of Homeland Security regulations governing maintenance of status related to full-time enrollment and making normal progress toward completing a degree. Therefore, all international graduate students are required to enroll in 9 or more credits (exclusive of audited work) during fall and spring semesters.

Transfer of Graduate Credits into a Degree Program

1. Graduate credits taken at NMSU as undergraduate electives may be transferred to the student's graduate program at NMSU.
2. Graduate credits from another university may be transferred to NMSU, provided the credits were earned on the campus of an accredited institution.
3. Transferred course work (grades and hours) is maintained separately from NMSU course work.
4. Immediately after initial enrollment in the Graduate School, students must submit forms to obtain formal permission from their advisor, department head, and the dean of the Graduate School to transfer graduate-level course work. The department has the responsibility to accept or reject any number of transferred credits based on such elements as whether the work fits into a logical program for a degree, if grades of A or B have been earned in the courses proposed for transfer, and any other elements it deems relevant. Credit granted for work done at another institution is tentative until proved by satisfactory work in residence. The department may also require work to be validated by examination.
5. Transfer credits must meet the same time-limit requirements (seven years) as graduate classes at NMSU.
6. Course work taken at other institutions after initiation of Graduate School at NMSU must have prior approval of the department head and the dean of the Graduate School if such work is to be transferred. All requirements as to accreditation, level, grades and other elements described for initial transfer work will apply. Request for Transfer of Credit forms are available online at http://gradschool.nmsu.edu/wp-content/uploads/sites/5/2015/04/transfer_of_credit_form.pdf

Graduate Certificates

Students enrolled in certificate programs may not transfer credits from another institution towards the completion of the certificate program offered by NMSU. However, they can transfer credits taken in a graduate certificate program at NMSU into a graduate degree program at NMSU, provided that the courses will lead towards a graduate degree in the focused area of the certificate program. The number of transfer credits will be determined by the program of study. The time limit on course transfer is five years after the completion of the certificate.

Master's level

In order to meet residency requirements at the master's degree level, students must take at least 50 percent of their required coursework at NMSU.

Masters of Fine Arts

Before consideration for candidacy, the department head and the graduate advisor will determine the number of transferable credits from a previous graduate program.

Specialist in Education Degree

A maximum of 6 graduate credits earned at another approved institution may apply to the Specialist in Education degree. Transfer credits must have been earned during the five-year period prior to completion of the specialist in education degree.

Doctorate Level

At the doctoral level, students may transfer course work required for their master's degree.

Funding Opportunities for Graduate Students

The Graduate School offers awards, assistantships and fellowships to qualified graduate students. All awards require faculty nominations. Continuing and newly admitted students can request either a faculty member or the department head to nominate them for the awards of the Graduate School. In selecting individuals for any assistantship or fellowship and in the administration of appointments, New Mexico State University will not discriminate on grounds of age, ancestry, color, disability, gender, national origin, race, religion, sexual orientation or veteran status. The University limits the number of years a student may be supported on funds from the state of New Mexico. Departments may place additional limitations on the years of support. The student must be admitted to the Graduate School before a request for an assistantship or fellowship will be considered by the department or the Graduate School. For detailed information, application process and deadlines please consult <http://gradschool.nmsu.edu/ga-resources/> (<http://gradschool.nmsu.edu/ga-resources/>)

A student should check Graduate Assistant Employment Guidelines of the Graduate School at <http://gradschool.nmsu.edu/ga-resources/>. Departments may place additional limitations on the years of support.

Assistantships

Graduate assistantships, including teaching and research, offered by New Mexico State University are awarded primarily by the students' academic department. Employment guidelines may be found at: <http://gradschool.nmsu.edu/ga-resources/>.

Students with assistantships must ensure that they are enrolled in, as well as successfully complete, 9 graded credits for full-time status. Graduate assistants should take no more than 15 course credits per semester. Students must also maintain a 3.0 grade-point-average. Courses taken for audit may count for the total course load, but may not be counted in the minimum graduate assistant course load requirement. If course deficiencies are identified, the student can register for 3 undergraduate credits and a minimum of 6 graded graduate credits during their first semester at NMSU to be eligible for a graduate assistantship. The duties of a graduate assistantship normally require about 20 hours per week (full-time, fall and spring) of student's time.

Teaching Assistantships

A student seeking appointment as a teaching assistant will be required to demonstrate proficiency in communication skills necessary for satisfactory service in the classroom. All graduate students awarded an assistantship must attend a mandatory orientation offered by the Graduate School. Departments may also require students to complete workshops/orientations in order to qualify for assistantships.

Eligibility for teaching assistantships includes:

- Acceptance by and subsequent registration in the Graduate School and academic department
- Classification as a "regular" graduate student

All international students seeking a teaching assistantship must demonstrate proficiency in English and competency in pedagogy.

Prior to the first semester in which the teaching assistantship is to be received, international students must undergo the NMSU International Teaching Assistant (ITA) screening administered by the Center for English Language Programs (CELP) on behalf of the Graduate School. Students who pass the screening exam are immediately eligible for assignment to a teaching assistantship. Those who do not pass the screening exam must enroll in and satisfactorily complete COMM 485 International Teaching Assistant Development before being eligible for a teaching assistantship. To aid those incoming international students who plan to teach in the fall semester, COMM 485 International Teaching Assistant Development is offered in the summer. International graduate students wishing to hold a teaching assistantship should check with their department to determine when they should arrive on campus to meet the screening requirement. International students who don't pass the screening exam may be eligible to serve as graders for their academic departments. The academic departments must receive approval from the Graduate School in order to hire these students.

Assistantships for Provisional Graduate Students

Graduate students accepted on a provisional basis cannot serve as teaching assistants. However, they can serve as research assistants. Eligibility includes:

- Acceptance by and subsequent registration in the Graduate School and academic department
- Classification as a provisional graduate student
- Enrolling in and successfully complete 9 graded credits
- Funded on research projects of the faculty of NMSU

Provisional students can also be hired as graders for one semester. The department must submit a formal letter to the Graduate School requesting that the student be allowed to work as a grader. The Graduate School can approve or deny the request.

Diversity Graduate Assistantships

The diversity awards are allocated to departments on a competitive basis to help increase the diversity and quality of the student body. Departments will commit matching funds to support these awards for the student. The diversity award can be used to recruit domestic students. Please note that the award is for an academic year. Departments will need to commit funds to the selected student for at least one additional semester or preferably a year. The selected student must be admitted to the department prior to applying for the diversity award.

Fellowships

The Graduate School maintains a Fellowship and Grant Information webpage <http://gradschool.nmsu.edu/funding-opportunities/> providing a database of grants, fellowships and assistantships for graduate students. The university offers a number of fellowships available to both new and continuing students.

Graduate Assistant Tuition Fellowships

As an opportunity for departments to recruit outstanding graduate students to their programs, the Graduate School awards tuition fellowships to graduate assistants. Master's degree students will receive up to two years of support and doctoral degree students will receive up to three years of support. In order for students to qualify for a second and third year of support, they must maintain their status as graduate assistants for the duration of the tuition fellowship period. These awards are for students receiving 10 hour and 20 hour graduate assistantships. The tuition fellowships do not include fees.

McNair Graduate Assistantships

The Graduate School wishes to support and recognize the success of the McNair program by offering several McNair Graduate Assistantships for one academic year with a match of one year from a department.

Merit-Based Enhancement Fellowships for Current Graduate Assistants

To help departments reward outstanding graduate assistants, the Graduate School offers Merit-Based Enhancement Fellowships to graduate assistants who are engaged in the teaching or research mission of New Mexico State University. The amount of the award is \$4,000 for an academic year. Nominations must come from faculty.

The Mike Watts Outstanding Leadership Graduate Fellowships

The Graduate School encourages faculty to nominate outstanding graduate assistants for a Mike Watts Outstanding Leadership award. The fellowship is made available through the generosity of the family and friends of Michael E. Watts. The Watts Fellowships are available to graduate assistants from any area of Graduate School.

If awarded, the fellowship will be paid as salary supplement to the regular assistantship. Please note that for those students who also receive financial aid, the fellowship can have an impact on the amount of financial aid received. The Graduate Council Fellowship Committee will review the applications and select recipients.

Outstanding Graduate Assistantship Award

We also offer Outstanding Graduate Assistant awards of \$2,000 to recognize the contributions of graduate assistants to the teaching and research mission of New Mexico State University. The awards allow faculty to show appreciation for the excellent work of graduate assistants. Current graduate assistants must be nominated by their faculty to be considered for the awards.

State of New Mexico Department of Higher Education (NMHED) Graduate Scholarship Programs

The State of New Mexico Higher Education Department Graduate Scholarship Program offers Graduate Fellowships/Assistantships for women and minority persons who are citizens or permanent U.S. residents and who are a first year student or a student that is beginning graduate studies in any graduate department at the master's or doctoral level at NMSU. The selected student must be admitted to a graduate program prior to applying for this award.

NMHED fellowships carry stipends of \$7,200 per annum and matched with half-time (10 hours per week) teaching assistantship provided by the student's department for a total award of \$15,800.

The total amount of this award is based on the salary for a 20 hour graduate assistantship and usually increases from year to year, based on raises awarded by the State of New Mexico.

Fellowships are available for two years for master's students and four years for doctoral students. One of the NMHED fellowships is, when possible, designated for a McNair Scholar. The nomination process can be found at: <http://gradschool.nmsu.edu/>.

In order for the student to establish financial need, students must complete a Free Application for Federal Student Aid (FAFSA) form available in the Financial Aid Office. This form is not to be returned to the Graduate School. The form must be mailed to the Federal Student Aid

Programs address listed on the application or submitted via computer at the Financial Aid Office. The results will be sent to the student and the Financial Aid Office. ***Students must have a complete file and have been approved for financial aid to be considered for this fellowship.***

Preference will be given to those students that have a current FAFSA form on file at the NMSU Financial Aid office.

Graduate Assistants Salaries and Tax Withholding Guidelines

Internal Revenue Service tax withholding guidelines require undergraduate and graduate students employed through New Mexico State University to maintain at least 6 credits of course work during the fall and spring semesters and 3 credits of course work for summer sessions to be eligible for the student FICA tax exemption. Student employees who do not meet this requirement during any given pay period will be subject to Social Security taxes at the rate of 6.2% and Medicare taxes at the rate of 1.45%. Salaries for graduate assistants in 2017-2018 are as follows:

Level	Salary
I- G1	\$16,964
II- G2	\$17,368
III- G3	\$17,772

Level I (G1) - Applies to regularly enrolled students pursuing a master's degree. This level is also for a first year student seeking a doctoral degree who does not currently hold a master's degree. On the doctoral student becomes a second year student and passes their qualifying exam, they can obtain support as a Level II (G2) student.

Level II (G2) - Applies to students

1. pursuing the education specialist or doctoral degree who have passed the qualifying exam or
2. who have a master's degree in the same or cognate field and the recommendation of the head of their major department.

Level III (G3) - Applies to a doctoral student who has passed the comprehensive examination and has advanced to candidacy.

Graduate assistants employed at least ten hours per week will be given in-state tuition during the first 12 months of tenure if Human Resources approve the hiring process prior to census data (stated by the Registrar's Office as the third Friday of the semester each spring and fall semester).

If New Mexico resident status has not been established by the time of any reappointment, the graduate assistant may be subject to non-resident tuition rates.

Applications for state residency may be obtained in the Registrar's Office located in the Educational Services building.

Social Security Numbers in Student Records

As required by law, social security numbers are collected from prospective and current students who

1. plan to seek employment on campus or
2. wish to receive financial aid.

In addition, the university is mandated by federal tax regulations to provide tuition and fee payment information to the student and the Internal Revenue Service, so that applicable educational tax credits may

be computed. The social security number will be necessary to submit this tax reporting. The social security number is a confidential record and is maintained as such by the university in accordance with the Family Educational Rights and Privacy Act.

In order to be employed by New Mexico State University all students must have obtained a social security number within eight weeks of being hired or risk losing their assistantship.

When an official social security number is issued to an international student, it is the student's responsibility to inform Human Resources or the Registrar's Office as soon as possible.

Hourly Work

Eligibility for student payroll requires that a graduate student

1. be admitted to the Graduate School as well as to a department,
2. have a GPA of 3.0, and
3. be enrolled for at least 9 graded credits.

A student may not work more than 20 hours per week during the academic year. Students looking for current job postings should check with Career Services, Garcia Annex, Room 204; or visit <http://careerservices.nmsu.edu/>.

Students not classified as residents of New Mexico but working at an hourly rate are not eligible to receive in-state tuition.

Postdoctoral Fellowships

Those individuals who are exemplary scholars, who have recently been awarded a doctoral degree, but who wish to continue their education and research experience under the direction of a professor at New Mexico State University are classified as postdoctoral. The postdoctoral fellowship is a regular professional appointment normally for one or two years. Under no circumstances will an individual remain in this classification for more than three years.

Postdoctoral fellowships are advertised and applications are submitted to the hiring department in compliance with the guidelines for hiring professional staff, but without the requirement for a position description questionnaire. An "E-Hire" staffing authorization request must be submitted to the office of Human Resources by the hiring department. No offer of employment may be made until approval has been given by Human Resources.

A postdoctoral fellow has the following privileges:

- may take 6 credits in spring and fall semesters, 4 credits per summer session without tuition charge
- is eligible to purchase an employee parking permit

- is eligible for other employee benefits available to regular employees, including annual and sick leave, as well as health, dental, and life insurances
- may purchase athletic tickets, activity tickets, and gymnasium privileges
- is eligible for library privileges

Persons classified as postdoctoral fellows pay Social Security and New Mexico State Educational Retirement.

COLLEGE OF AGRICULTURAL, CONSUMER, AND ENVIRONMENTAL SCIENCES

Dean and Chief Administrative Officer- Rolando A. Flores

Interim Associate Dean and Director of Academic Programs - Gerald M. Hawkes

Associate Dean and Director of the Cooperative Extension Service - Jon C. Boren

Interim Associate Dean and Director of the Agricultural Experiment Station - Natalie Goldberg

Scholarship Coordinator - Lee-Ann Carter

Requirements for Bachelors of Science in Agriculture; Conservation Ecology; Family and Consumer Sciences; Genetics; and Hotel, Restaurant and Tourism Management

1. Courses required of all qualifying for this degree.
2. General education requirements.
3. Courses to be taken in the particular field of your major interest.
4. Free electives sufficient to bring the total number of credits to a minimum of 120 semester credits. Of this total at least 48 semester credits must be in upper-division courses (numbered 300 or above).
5. A grade-point average of no less than 2.0.
6. All students will have an official degree check on file in the Academic Dean's Office prior to start of senior year.

Typical Curricula in Agriculture

The following suggested curricula are presented for your guidance. With the consent of the head of the department in which you are majoring, you may select electives and changes in a curriculum except in the case of constants.

Bachelor Degrees

Bachelor in Conservation Ecology

Bachelor of Science in Agriculture

Majors in:

- Agricultural Biology (p. 114);
- Agricultural Economics and Agricultural Business (p. 91);
- Agriculture and Community Development (p. 85);
- Agricultural and Extension Education (p. 85);
- Agronomy (p. 145);
- Animal Science (p. 100);
- Fisheries and Wildlife Science (p. 141);
- General Agriculture (p. 144);
- Horticulture (p. 145);
- Natural Resource Economics and Policy (p. 91);
- Range Science (p. 100);
- Soil Science (p. 145);
- Turfgrass Science and Management (p. 145);

- Programs in also in Preveterinary Medicine (p. 144) and Preforestry.

Bachelor of Science in Environmental Science

Bachelor of Science in Family and Consumer Sciences

Majors in:

- Clothing, Textiles, and Fashion Merchandising (p. 120);
- Family and Child Science (p. 120);
- Family and Consumer Sciences Education (p. 120);
- Human Nutrition and Dietetic Sciences (p. 120)

Bachelor of Science in Food Science and Technology

Bachelor of Science in Genetics

Bachelor of Hotel, Restaurant and Tourism Management

Masters Degrees

Master of Agriculture

Major in Agriculture:

- Concentration in Agribusiness (p. 91)
- Concentration in (p. 91) Domestic Animal Biology (p. 100)

Master of Arts

Major in Agricultural and Extension Education: (p. 85)

Master of Business Administration

Major in Business Administration:

- Concentration in Agribusiness (p. 98)

Master of Science

Majors:

- Agriculture Biology (p. 114);
- Agricultural Economics (p. 91);
- Animal Science (p. 100);
- Family and Consumer Sciences (p. 120);
- Fish, Wildlife and Conservation Ecology; (p. 143)
- Horticulture (p. 145);
- Plant and Environmental Sciences (p. 145);
- Range Science (p. 100);
- Water Science and Management (p. 171);

Doctoral Degrees

Doctor of Economic Development

Major in Economic Development (p. 91)

Doctor of Philosophy

Majors in:

- Animal Science (p. 100);
- Plant and Environmental Science (p. 145);
- Range Science (p. 100);

- Water Science and Management (p. 171)

Undergraduate Minors

- Agricultural & Extension Education (p. 85)
- Agricultural & Natural Resource Leadership (p. 85)
- Agricultural Business Management (p. 91)
- Agronomy (p. 145)
- Child Advocacy Studies (p. 120)
- Clothing, Textiles and Fashion Merchandising (p. 120)
- Conservation Ecology (p. 135)
- Culinary Science (p. 120)
- Entomology (p. 114)
- Family and Child Science (p. 120)
- Food Studies (p. 120)
- Horse Management (p. 100)
- Horticulture (p. 145)
- Hotel, Restaurant and Tourism Management (p. 168)
- Human Animal Interaction (p. 100)
- Livestock Production (p. 100)
- Natural Resource Economics (p. 91)
- Nutrition (p. 120)
- Pest Management (p. 114)
- Plant Pathology (p. 114)
- Ranch Management (p. 100)
- Range Science (p. 100)
- Soil Science (p. 145)
- Turfgrass Science and Management (p. 145)
- Weed Science (p. 114)
- Wildlife Science (p. 135)

Graduate Minors

- Agricultural & Extension Education (p. 85)
- Animal Science (p. 100)
- International Agricultural Development and Extension (p. 85)

Accreditation

The two teacher education options (Agricultural Education Teaching and Advanced Technology Education) in the Department of Agricultural and Extension Education are accredited by the National Council for the Accreditation of Teacher Education. It is critical that students consult their academic advisor prior to selection of courses for the agriculture, secondary science and teaching endorsements.

Agricultural and Extension Education Undergraduate Program Information

The department offers a broad-based curriculum with majors, options and minors that prepare students for many careers as professional educators, communicators and leaders in agricultural, natural resource, technology and related disciplines. Example occupations the department prepares its students to enter are agriculture teacher, media specialist, technology teacher, Extension agent, NMDA or USDA professional, industry educational specialist, and development specialist. Graduates work in domestic and/or international settings.

The department offers major work for a Master of Arts in Agricultural and Extension Education. The degree can be obtained with emphasis in

- Agricultural or Technology Teacher Education,
- Extension Education,
- International Extension and Development, and
- Adult Non-formal Education.

General Undergraduate Degree Requirements

You must meet the general education and departmental requirements for the degree and the major, option or minor chosen. You must establish a cumulative grade-point average of not less than 2.5 before you are admitted into the student teaching or other internship program. You need a minimum of 48 hours in technical agriculture for the secondary teaching certificate program in agriculture.

You may select technical courses required for completion of the majors and options from the following areas:

- agricultural economics (p. 91);
- agricultural mechanics;
- animal and range sciences (p. 100);
- entomology, plant pathology and weed science (p. 114);
- fish, wildlife and conservation ecology (p. 135);
- engineering (p. 525);
- also plant and environmental sciences (p. 145).

Graduate Program Information

The Department of Agricultural and Extension Education requires the following items for admission:

- Three letters of recommendation - Applicants should request letters of recommendation from individuals who know them well enough to comment on their professional skills and abilities, and on their ability to complete graduate-level work.
- Career statement - The two-page letter of application should clearly identify applicant's professional and career goals as well as reasons for pursuing the degree.
- Personal Interview - Upon receipt of all application materials, a personal interview may be required at the discretion of the Departmental Graduate Committee.

The above requested materials should be sent directly to the department. Do not send to the Graduate School as this will cause a delay on your admission status.

Courses in research methods, teaching methods and data collection and analysis; a graduate seminar; and a thesis or creative component are required for the major. Two 9 credit minors are available to students completing major work in other departments.

A minimum of 30 semester credits (including 4-6 credits of thesis) is required under the thesis plan. A non-thesis plan is available and requires 32 semester credits of course work (includes a focused creative component). Both plans require a final oral examination.

Flexibility in each program allows students to pursue professional interests and to develop specialized competencies in agricultural and extension education, technology education, and in technical and scientific areas. The department delivers courses in evening, weekend and distance formats (go to <http://distance.nmsu.edu> and click on

degree programs, and then Agricultural and Extension Education) to accommodate student needs. Previous experience in teaching, extension and/or other professional education positions is highly recommended to be considered for a graduate teaching assistantship.

Degrees for the Department

Agricultural and Community Development - Bachelor of Science in Agriculture (p. 90)

Agricultural and Extension Education - Bachelor of Science in Agriculture (p. 90)

Agricultural and Extension Education - Master of Arts (p. 91)

Minors for the Department

Agricultural and Extension Education - Undergraduate Minor (p. 91)

Agricultural and Natural Resource Leadership - Undergraduate Minor (p. 91)

Agricultural and Extension Education - Graduate Minor (p. 91)

International Agricultural Development and Extension - Graduate Minor (p. 91)

Professor, Frank E. Hodnett, Department Head

Professors Dormody, Hodnett, SeEVERS, VanLeeuwen; **Associate Professor** Rosencrans, **Assistant Professor** Easterly

F. Hodnett, Department Head, Ph.D. (New Mexico State)– youth development, youth leadership, youth program development; B. Chamberlin, Ph.D. (University of Virginia)-informal and non-formal learning, educational media design; T. J. Dormody, Ph.D. (Cornell)– agricultural education, leadership, and agricultural communications; R.G. (Tre) Easterly, Ph.D (University of Florida)-agricultural education, pre-service teacher preparation, teacher professional development, J.Gleason, Ed.D. (Virginia Tech)– instructional technology, agricultural communications, and multimedia education; C. Rosencrans, Ph.D. (Iowa State)– agricultural mechanics, technology education and youth development; B. SeEVERS, Ph.D. (Ohio State)– adult and extension education; P. Skelton, Ph.D., (University of Nebraska)– youth development, sustainable agriculture and natural resource management; D. VanLeeuwen, Ph.D. (Oregon State)– statistics and research design

AXED 100. Introduction to Agricultural, Extension, and Technology Education

3 Credits

Orientation to programs, philosophies, competencies and leadership skills needed by professionals in agricultural and technology education, extension education, agricultural communications, and related career opportunities in industry, governmental agencies, and international organizations.

AXED 105. Techniques in Agricultural Mechanization

3 Credits (2+2P)

Development of competencies in agricultural mechanics including safety, tool identification, operation and maintenance of hand and power tools, cold metal, drafting, and plumbing procedures. Designed for any major wishing to improve mechanical skills needed in agriculturally related occupations in education and industry.

AXED 200. Special Topics

1-4 Credits

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 6 credits toward degree.

AXED 201G. Effective Leadership and Communication in Agricultural Organizations

3 Credits (2+2P)

Theory and practice in leadership and communication for professionals who must work effectively in leadership and supervisory roles with people in agricultural business, industry, government agencies, and education. Course focuses on contemporary leadership theories. Oral communication skills in informative and persuasive speaking, parliamentary procedure, and for small groups are developed.

AXED 205. Metal Technology-Fabrication

3 Credits (2+4P)

Processes and procedures of metal fusion, including gas and electric welding techniques and safety. Designed for any major wishing to improve mechanical skills needed in agriculturally related occupations in education and industry.

AXED 230. Early Field-Based Experience in Extension and Industry

2 Credits (2)

First Hand view of the roles of professional educators through field experiences with Cooperative Extension or other government agencies. Includes 4 weeks of classroom instruction and 30 hours of observation in a work setting. Consent of Instructor required. Restricted to Las Cruces campus only.

AXED 232. Early Field-Based Experience in Agricultural and Technology Education

2 Credits

First-hand view of the roles of professional educators through field experiences in a secondary agricultural or technology education setting. Includes 4 weeks of classroom instruction and 30 hours of observations in a classroom setting. Consent of Instructor required.

AXED 240. Introduction to Agricultural Communication

3 Credits

Students will learn about the history and theories of agricultural communications, be introduced to the degree program, explore careers in the field, and examine the role of media in agricultural communications

AXED 300. Special Topics

1-4 Credits

Course addresses specific subjects and issues as identified by department. Topics and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 6 credits may be applied to a degree.

AXED 303. Small Engine Technology

3 Credits (2+2P)

Development of competencies in small gasoline engines; theory, operation, design, maintenance and safety. Designed for any major wishing to improve mechanical skills needed in agriculturally related occupations in education and industry.

AXED 331. Agricultural Structures

3 Credits (2+3P)

Selection and use of agricultural building materials. Design, construction, and maintenance of agricultural structures. Development of competencies in carpentry, concrete, electricity, masonry, and safety. Designed for any major wishing to improve mechanical skills needed in agriculturally related occupations in education and industry.

**AXED 348. Advanced Technology in the Agricultural Mechanization
3 Credits (2+3P)**

Students will construct a project in the area of agricultural mechanization under the direction of instructor. Project must be completed within a semester and of sufficient complexity for 3 credits.

Prerequisite(s): AXED 105 and 205 or consent of instructor.

AXED 360. Agricultural Communications**3 Credits**

Principles and practical experience in news writing, radio production, newsletter design, public meeting presentations, video productions, graphics, and public relations activities, especially as related to the fields of agriculture and family and consumer sciences.

AXED 380. Philosophy and Methods of Contests**3 Credits**

Covers the roles that career development events (contests) play in agricultural and technology education and in extension programs. Topics include competition and cooperation, winning and losing, ethics, use of community resources, and academic and employability skills taught through contests. Coaching as a teaching method is introduced and expanded. Students will assist with the coordination of various career development events. May be repeated up to 3 credits.

AXED 400. The Diffusion and Adoption of Agricultural Innovations**3 Credits**

Factors that influence the rates of diffusion and adoption of innovations. Consequences of adopting or rejecting innovations. Processes by which change agents influence introduction and adoption of innovations. Same as AXED 500.

AXED 415. Youth Program Development and Management**3 Credits**

Designed for professionals involved in youth group activities. Basic concepts in planning, conducting, and managing educational youth programs in a variety of organizations.

AXED 430. Teaching Adults in Nonformal Settings**3 Credits**

The adult and postsecondary learner; adult learning styles and principles; use of community resources and problem-solving techniques; and learning strategies for adults in formal and nonformal education.

AXED 436. Keys for Agricultural and Rural Development**3 Credits**

Introduction to concepts of development, the process of change, key factors that contribute to agricultural and rural development in a community, and strategies employed to effect change with implications for international students or domestic students planning to work internationally.

AXED 443. Curriculum Development and Assessment in Agricultural Education**3 Credits**

This course prepares students to develop curriculum, design lessons, and prepare appropriate assessments in an agricultural education setting. An emphasis will be placed on the developing curriculum using the currently established resources that are available to agriculture teachers. Restricted to: AXED majors.

Prerequisite(s): 2.5 GPA.

**AXED 444. Planning and Methods in Nonformal Education
3 Credits**

Identifying trends and resources of a community and planning community-based extension and nonformal education programs. Preliminary methods for teaching and evaluating nonformal education programs.

AXED 445. Developing Excellent Programs in Career and Technical Education**3 Credits**

Students learn to develop excellence in the three components of a successful secondary school program in career and technical education: classroom and laboratory instruction, career and technical student organizations, and career development activities. Community-based program planning, utilizing partners, program marketing, and professional development are addressed as strategies for achieving excellence. Methods of obtaining financing and maintaining accountability for the program are discussed.

**AXED 446. Methods for Teaching Agricultural and Technology Education
3 Credits**

Methods of instruction and presentation, selection of teaching aids and support materials, classroom management, development of a complete educational program, and microteaching experiences. Restricted to AXED Majors

Prerequisite: GPA of 2.5 or above.

**AXED 447. Directed Teaching in Agricultural or Technology Education
15 Credits**

Semester-long off-campus professional experience in directed teaching and observation provided in selected centers under secondary agricultural or technology education supervising teachers. Consent of Instructor required. Restricted to: AXED majors.

Prerequisite(s): AXED 445, 446 and consent of instructor.

**AXED 448. Directed Teaching in Extension Education
3-12 Credits (3-12)**

Four-to-fourteen-week, professional experiences in directed teaching and observation provided in cooperative extension at the county, regional, or state level. Consent of instructor required.

AXED 449. Directed Field Experience in Agricultural or Technology Education**3-12 Credits (3-12)**

Four-to-fourteen-week, supervised learning experience in an approved teaching setting with application to educational, agricultural, technological, communications, public relations, or environmental practices. Consent of instructor required.

**AXED 456. Introduction to Research Methods
3 Credits**

Introduction to research design and methodology in education and behavioral sciences. Overview of common research designs and data collection strategies. Prepares students to critique published research and understand basic skills including hypothesis development and conducting a literature search.

Prerequisite: junior standing.

**AXED 460. Methods in Career and Technical Laboratory Instruction
2 Credits**

For students planning to teach agricultural or technology education at a secondary or postsecondary level. Focus on planning, delivering, and evaluating instruction in laboratories; and on CPR, first aid, and NCCER certifications. Laboratory safety and tool, equipment, and laboratory management systems are also emphasized. Restricted to AXED Majors.

AXED 466V. John Muir: Lessons in Sustainability**3 Credits**

This course examines the life of John Muir in the context of sustainability. Muir was a farmer, inventor, explorer, botanist, glaciologist, conservationist, and noted nature author. He was influential in the National Parks movement and in starting the Sierra Club. Living in the natural world influences his faith and philosophy. By examining his life and the themes that shaped it, students will develop an understanding of what it means to live sustainably and to contribute beyond their personal lives to a sustainable past.

AXED 475. Leadership On Agricultural and Natural Resource Issues**3 Credits**

Investigates leadership concepts and group dynamics as they relate to a changing world and complex agricultural and natural resource issues. Topics include emotional intelligence, leading change, political leadership, facilitating agreement, team building, and managing conflict in agricultural and natural resource settings.

AXED 480. International Agricultural Development**3 Credits**

Introduction to Agricultural topics (products, people, environment, culture, etc) that affect international development. Topics provide students with awareness, knowledge and understanding of teaching, research and service opportunities for those seeking experience or careers in international agricultural development. Taught with AXED 580.

AXED 484. Methods of Teaching Biological, Earth and Physical Sciences in Agriculture**3 Credits**

Students learn to set up and teach in a modular agriscience laboratory, utilizing a variety of technologies. Modules covered focus on incorporating biological, earth and physical sciences into agricultural instruction and may include: Tissue culture, animal anatomy, hydroponics microscopy, electrophoresis, microbiology, soils and plant nutrients, water quality, water systems, entomology, integrated pest management, and renewable energy applications. Students develop their own modules and/or experiments. May be repeated up to 3 credits.

AXED 486. Effective Management of Volunteer Programs**3 Credits**

For individuals currently involved in, or interested in being involved in, the management and supervision of volunteer programs. Emphasis on practical application, utilizing a research and academic base. Explores the roles, functions, and tasks of volunteers and managers of volunteers including recruitment, orientation and training, supervision, evaluation, recognition and retention.

AXED 488. 4-H Youth Development**1 Credit**

On-line course explores 4-H Youth Development as an integral part of the Cooperative Extension Service. Topics to be addressed include mission, philosophy, delivery modes, audiences and partnerships. Course is relevant for anyone interested in pursuing a career in Cooperative Extension.

AXED 489. The FFA Organization: An Overview**1 Credit**

Online course addressing the history, mission, philosophy and structure of the New Mexico and National FFA Organizations and their relationship to supervised agriculture experiences and the agricultural education curriculum. Course is relevant for anyone interested in pursuing a career in agricultural education.

AXED 490. Independent Study in Agricultural, Extension, or Technology Education**1-3 Credits**

Specific subjects are agreed upon by the student and instructor. May be repeated for a maximum of 6 credits.

Prerequisites: junior or senior standing and consent of instructor.

AXED 499. Undergraduate Research**1-4 Credits**

Research experience in agricultural, extension, and technology education with applications to selected issues and problems.

Prerequisites: consent of instructor.

AXED 500. The Diffusion and Adoption of Agricultural Innovations**3 Credits**

Factors that influence rates of diffusion and adoption of innovations. Consequences of adopting or rejecting innovations. Processes by which change agents influence introduction and adoption of innovations. Taught with AXED 400 with differential assignments for graduate students.

AXED 515. Youth Program Development and Management**3 Credits**

Designed for professionals involved in youth group activities. Basic concepts in planning, conducting, and managing educational youth programs in a variety of organizations. Same as AXED 415 with differentiated assignments for graduate students.

AXED 525. Graduate Teaching Methods**3 Credits**

Examines the teaching and learning process, emphasizing the use of appropriate methods for teaching career and technical education subjects to youth or adults in formal and nonformal educational settings. Includes principles of teaching and learning styles, levels of cognition, syllabus development, lesson planning, teaching using a variety of methods, and evaluating students. For students who have no prior education in teaching methods.

AXED 530. Teaching Adults in Nonformal Settings**3 Credits**

The adult and postsecondary learner; adult learning styles and principles; use of community resources and problem-solving techniques; and learning strategies for adults in formal and nonformal education. Same as AXED 430 with differentiated assignments for graduate students.

AXED 536. Keys for Agricultural and Rural Development**3 Credits**

Introduction to concepts of development, the process of change, key factors that contribute to agricultural and rural development in a community, and strategies employed to effect change with implications for international students or domestic students planning to work internationally.

AXED 543. Curriculum Development and Assessment in Agricultural Education**3 Credits**

This course prepares students to develop curriculum, design lessons, and prepare appropriate assessments in an agricultural education setting. An emphasis will be placed on the developing curriculum using the currently established resources that are available to agriculture teachers. Restricted to: AXED majors.

Prerequisite(s): 2.5 GPA.

AXED 544. Planning and Methods in Nonformal Education**3 Credits**

Identifying trends and resources of a community and planning community-based extension and nonformal education programs. Preliminary methods for teaching and evaluating nonformal education programs. Same as AXED 444 with differentiated assignments for graduate students.

AXED 545. Developing Excellent Programs in Career and Technical Education**3 Credits**

Students learn to develop excellence in the three components of a successful secondary school program in career and technical education: classroom and laboratory instruction, career and technical student organizations, and career development activities. Community-based program planning, utilizing partners, program marketing, and professional development are addressed as strategies for achieving excellence. Methods of obtaining financing and maintaining accountability of the program are discussed. Same as AXED 445 with differentiated assignments for graduate students.

AXED 546. Methods for Teaching Agricultural and Technology Education**3 Credits**

Methods of instruction and presentation, selection of teaching aids and support materials, classroom management, development of a complete educational program, and microteaching experiences. Same as AXED 446. Restricted to AXED Majors

Prerequisites: GPA of 3.0 or above.

AXED 547. Directed Teaching in Agricultural or Technology Education**4-9 Credits (4-9)**

Semester-long off-campus professional experience in directed teaching and observation provided in selected centers under secondary agricultural and technology supervising teachers. Consent of Instructor required. Restricted to: AXED majors.

Prerequisite(s): A teaching methods class and consent of instructor.

AXED 548. Directed Teaching in Extension Education**4-9 Credits (4-9)**

Four- to fourteen-week professional experiences in directed teaching and observation provided in cooperative extension at the county, regional, or state level. Same as AXED 448 with reduced credit hours for graduate students. Restricted to majors. Main campus only.

Prerequisite: consent of instructor.

AXED 549. Directed Field Experience in Agricultural or Technology Education**4-9 Credits (4+9P)**

A four-to-fourteen-week supervised learning experience in an approved teaching setting with application to educational, agricultural, technological, communications, public relations, or environmental practices. Same as AXED 449 with reduced credit hours for graduate students. Restricted to majors. Main campus only.

Prerequisite: consent of instructor.

AXED 556. Research Methods**3 Credits**

Students learn the research process as it is applied to solving problems in the behavioral sciences. Prepares students to conduct and critique research and to diffuse research findings. Implications, applications, and ethics of research also stressed. Students develop a research proposal for a problem of their choice. Same as FCSC 556.

AXED 565. New Mexico Water Issues**3 Credits**

Designed for agricultural and natural resource professionals who must educate others or provide leadership on complex water issues in New Mexico. Students will travel to four distinct geographic and cultural regions of the state and study water policies, issues, and delivery technologies in each region. Specific areas covered will be determined by resource professionals who will present past, current and future issues involved in the distribution of water. Urban impacts on water use will also be investigated.

AXED 571. Data Collection and Analysis**3 Credits**

Introduction to basic concepts of data collection and analysis. Interpretations from observational studies and controlled experiments. Roles of descriptive and inferential statistics in a complete data analysis. Mean, median, standard deviation, and graphical summaries of data. Correlation and simple regression. One- and two-sample tests and confidence intervals. Chi-square tests and basic analysis of variance. Competency in arithmetic and algebra required. An undergraduate statistics course recommended.

AXED 575. Leadership on Agricultural and Natural Resource Issues**3 Credits**

Investigates leadership concepts and group dynamics as they relate to a changing world and complex agricultural and natural resource issues. Topics include emotional intelligence, leading change, political leadership, facilitating agreement, team building, and managing conflict in agricultural and natural resource settings. Taught with AXED 475 with differential assignments for graduate students.

AXED 580. International Agricultural Development**3 Credits**

Introduction to agricultural topics (products, people, environment, culture, etc.) that affect international development. Topics provide students with awareness, knowledge and understanding of teaching, research, and service opportunities for those seeking experience or careers in international agricultural development and education. Taught with AXED 480.

AXED 586. Effective Management of Volunteer Programs**3 Credits**

For individuals currently involved in, or interested in being involved in, the management and supervision of volunteer programs. Emphasis on practical application, utilizing a research and academic base. Explores the roles, functions, and tasks of volunteers and managers of volunteers including recruitment, orientation and training, supervision, evaluation, recognition and retention. Taught with AXED 486 with differentiated assignments for graduate students.

AXED 590. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 6 credits toward degree.

AXED 594. Workshops in Agricultural, Extension, and Technology Education**1-3 Credits**

Workshop procedures applied to current trends in agricultural, extension, and technology education. Maximum of 7 credits toward a degree.

AXED 595. Internship/Cooperative Experience**1-6 Credits**

Supervised professional on-the-job learning experience. Maximum of 6 credits toward a degree.

Prerequisite: Consent of instructor.

AXED 598. Creative Component**1-4 Credits**

For nonthesis program. Individual investigations or projects, either qualitative or quantitative studies. Maximum of 6 credits toward a degree.

Prerequisite: consent of instructor.

AXED 599. Master's Thesis**1-6 Credits**

Thesis.

Name: Dr. Frank Hodnett

Office Location: Gerald Thomas Hall, Room 111

Agricultural and Community Development - Bachelor of Science in Agriculture

Required Courses

AXED 100	Introduction to Agricultural, Extension, and Technology Education	3
AXED 201G	Effective Leadership and Communication in Agricultural Organizations	3
AXED 360	Agricultural Communications	3
AXED 400	The Diffusion and Adoption of Agricultural Innovations	3
or AXED 436	Keys for Agricultural and Rural Development	
AXED 415	Youth Program Development and Management	3
or AXED 430	Teaching Adults in Nonformal Settings	
AXED 444	Planning and Methods in Nonformal Education	3
AXED 475	Leadership On Agricultural and Natural Resource Issues	3
Agricultural Economics (at least 12 credits)		12
Agricultural Mechanics and Technology		6
Plant and Pest Sciences (at least 13 credits)		13
Animal Science (at least 9 credits)		9
Natural Resources (at least 9 credits)		9
Internship/Emphasis Area (at least 12 credits)		12
Total Credits		82

Agricultural and Extension Education - Bachelor of Science in Agriculture

Concentration: Advanced Technology Education

Required Courses

AXED 100	Introduction to Agricultural, Extension, and Technology Education	3
AXED 201G	Effective Leadership and Communication in Agricultural Organizations	3
AXED 232	Early Field-Based Experience in Agricultural and Technology Education	2
AXED 445	Developing Excellent Programs in Career and Technical Education	3
AXED 446	Methods for Teaching Agricultural and Technology Education	3

Technology Education

AXED 447	Directed Teaching in Agricultural or Technology Education	15
AXED 460	Methods in Career and Technical Laboratory Instruction	2
RDG 414	Content Area Literacy	3
SPED 350	Introduction to Special Education in a Diverse Society	3

Upper Division Technical Education

Select at least 18 credits, which may include: 18

AXED 331	Agricultural Structures	
AXED 348	Advanced Technology in the Agricultural Mechanization	
AXED 484	Methods of Teaching Biological, Earth and Physical Sciences in Agriculture	

E T Courses

E T 300	Special Topics	1-3
E T 317	Advanced 3-D Modeling and Design	3
E T 365	Building Utilities	3
E T 480	Innovation and Product Development	3

Total Credits 65-67

Concentration: Agricultural Communications

This degree option includes a certificate in Creative Media Technology and a minor in either Journalism and Mass Communication or Communication Studies. See your academic advisor for more information.

Concentration: Agricultural Education Teaching

Required Courses

Select 28-33 credits from the following: 28-33

ACES 111	Freshman Orientation	
AXED 100	Introduction to Agricultural, Extension, and Technology Education	
AXED 201G	Effective Leadership and Communication in Agricultural Organizations	
AXED 232	Early Field-Based Experience in Agricultural and Technology Education	

AXED 380	Philosophy and Methods of Contests	
AXED 445	Developing Excellent Programs in Career and Technical Education	
AXED 446	Methods for Teaching Agricultural and Technology Education	
AXED 447	Directed Teaching in Agricultural or Technology Education	
AXED 460	Methods in Career and Technical Laboratory Instruction	
AXED 484	Methods of Teaching Biological, Earth and Physical Sciences in Agriculture	
AXED 489	The FFA Organization: An Overview	
RDG 414	Content Area Literacy	
SPED 350	Introduction to Special Education in a Diverse Society	
Agricultural Economics (at least 9 credits)		9
Agricultural Mechanics (at least 12 credits)		12
Plant, Pest and Soil Sciences (at least 12 credits)		12
Select at least 12 credits from one of the following areas:		12
Animal Science		
Horticulture		
Natural Resources		
Total Credits		73-78

Agricultural and Extension Education - Graduate Minor

A graduate student who wishes to minor in AXED, while majoring in another academic program, should select an advisor from the AXED Graduate Faculty. A student minoring in AXED must complete at least nine credit hours of approved courses in the AXED department. A copy of the minor program must be approved by the AXED department head. Contact an advisor in AXED.

Agricultural and Extension Education - Master of Arts

To be admitted to the graduate program in Agricultural and Extension Education, the student must have a baccalaureate degree from an accredited college or university with an academic record that clearly demonstrates an ability to pursue graduate studies in this field. As a general rule, applicants will not be admitted to the program unless they have a 3.0 (out of a possible 4.0) cumulative point-hour ratio for all previous academic work, though the records of potential students will not be examined strictly from an academic perspective. Students with a GPA of 2.5-2.99 may be considered for admission on a provisional status.

The AXED Graduate Studies Committee reviews each application and decides whom to admit into the master's program. Master's degree students are admitted each semester.

The committee will consider only those applicants from whom all of the admission materials have been received. It is the applicant's responsibility to ensure that all materials are received to meet graduate school and departmental requirements.

Agricultural and Extension Education - Undergraduate Minor

The department offers a minor in agricultural and extension education, which may be earned by completion of 18 credits in the department. The minor must include 9 credits of upper-division courses.

Agricultural and Natural Resource Leadership - Undergraduate Minor

The department offers a minor in agricultural and natural resource leadership, which may be earned by completing

Leadership Related Courses in the Department of Agricultural and Extension Education	12
Leadership Related Course from Outside the Department of Agricultural and Extension Education	3
Agricultural or Natural Resource Policy Course	3
Total Credits	18

The minor must include 9 credits of upper division courses.

International Agricultural Development and Extension - Graduate Minor

A student who wishes to have a minor in Agricultural Development and Extension must complete nine credits of approved courses. Two courses are required for the minor: AXED 500–Diffusion and Adoption of Agricultural Innovations and AXED 580–International Agricultural Development. A third three credit course may be selected from several approved electives.

Agricultural Economics and Agricultural Business

Undergraduate Program Information

Specific courses meeting these and the university general education requirements are included for each major. A total of 120 credits are required for graduation. At least 48 credits must be at the 300+ level. You will develop schedules for specific semesters with the help of your academic advisor.

Graduate Program Information

The Department of Agricultural Economics and Agricultural Business cooperates with the Department of Economics, Applied Statistics, and International Business and the College of Business to offer graduate programs in agricultural economics and economics and a Master of Business Administration with specialization in Agribusiness. The programs are jointly administered by faculty from the two colleges. Graduate degrees include

- a Master of Science in agricultural economics,
- a Master of Agriculture with an agribusiness emphasis, and
- an MBA degree with specialization in agribusiness.

The objectives of the three programs differ in emphasis. The two departments also offer a doctoral program, Doctor of Economic Development.

- Master of Agriculture (MAG-AB) with Specialization in Agribusiness provides students with backgrounds or interests in agriculture with graduate-level training in agribusiness and applied economics. It is a degree alternative for individuals holding undergraduate degrees in various agricultural and food science fields.
- Master of Business Administration with Specialization in Agribusiness (MBA-AB) prepares students for business and public sector careers in agriculture and the food and fiber industry. Graduates from this program are knowledgeable about U.S. and international food and fiber sectors and hold an AACSB International accredited MBA degree.
- Master of Science (MS) in Agricultural Economics program provides rigorous training in economic theory, applied economic analysis and quantitative methods and is designed to prepare students for professional careers in business, government, research, and for continued education in pursuit of a Ph.D.
- Doctor of Economic Development (DED) is a professional doctorate designed to provide advanced training for economic development professionals. It is not designed to prepare graduates for academic careers.

All students in these programs must meet the requirements specified in the general regulations and requirements for admission to the Graduate School and to candidacy. To transfer between the program options requires a change of major form be submitted through the Graduate School and approved by the program to which the application is made.

Teaching and research assistantships are available to qualified applicants on a competitive basis. It is not necessary to have a degree in economics or agricultural economics to enter the graduate program or to qualify for a teaching or research assistantships. An application and three letters of reference are required to be considered for any available assistantships. These forms can be obtained from the department.

Degrees for the Department

Agricultural Economics and Business - Bachelor of Science in Agriculture (p. 97)

Natural Resource Economics and Policy - Bachelor of Science in Agriculture (p. 100)

Agriculture - Master of Agriculture (p. 98)

Agriculture - Master of Business Administration (p. 98)

Agricultural Economics - Master of Science (p. 96)

Economic Development - Doctor of Economic Development (p. 99)

Minors for the Department

Agricultural Business Management- Undergraduate Minor (p. 96)

Natural Resource Economics- Undergraduate Minor (p. 99)

Professor, Jay Lillywhite, Department Head

Professors Gorman, Gutierrez, Hawkes, Hurd, Libbin, Lillywhite, Ward

Associate Professors Acharya, Patrick;

Assistant Professors McNelis

College Professors Bullock; Townsend

College Assistant Professor Robinson

Department of Agricultural Economics and Agricultural Business:

J. Lillywhite, Department Head, Ph.D. (Purdue)– agribusiness management and marketing; R.N. Acharya, Ph.D. (Auburn)– food safety, logistics management, technology adoption, and marketing; T. L. Crawford, Ph.D. (Emeritus) Cornell)– marketing, policy and pricing, quantitative methods, trade; J.M. Fowler, Ph.D. (Emeritus) (Iowa State)– forestry and range economics; W. D. Gorman, Ph.D. (Emeritus) (Oregon State)– agricultural business management, international marketing; P. Gutierrez, Ph.D. (Oklahoma State)– extension, ranch economics, economic development; J. Hawkes, Ph.D. (New Mexico State)– extension, range management; B. H. Hurd, Ph.D. (California-Davis)– water and natural resource economics; J. D. Libbin, Ph.D. (Iowa State)– farm management, production economics; M. Patrick, Ph.D. (Michigan State University)– Economic Development; R. Skaggs, Ph.D. (Emeritus) (Utah State)– agriculture and natural resource policy; L. A. Torell, Ph.D. (Utah State)– range, ranch economics, production economics; F. A. Ward, Ph.D. (Colorado State)– resource economics, welfare economics

Department of Economics, Applied Statistics and International Business:

R. Adkisson, Department Head, Ph.D., (Nebraska)– international economics, public finance, institutional economics; B. Bai, MS (New Mexico State University)– applied statistics; L. Blank, Ph.D. (University of Tennessee, Knoxville)– microeconomic theory, managerial economics and regulatory economics; K. Brook, Ph.D. (Texas-Austin)– macroeconomic theory, monetary policy; D. L. Daniel, Ph.D. (Southern Methodist)– nonparametrics; C. M. Downes, Ph.D. (University of New Mexico)– environmental/resource economics, development, international business; C. Enomoto, Ph.D. (Texas A&M)– econometrics, economic theory; C. A. Erickson, Ph.D. (Arizona State)– monetary theory, macroeconomics; C. Gard, Ph.D. (University of Washington)– biostatistics; D. A. Gegax, Ph.D. (Wyoming)– public utility economics, industrial organization; K. R. Geisler, Ph.D. (Nevada)– regional, applied micro, environmental; W. R. Gould, Ph.D. (North Carolina State)– biological sampling, wildlife and fisheries estimation; Y. L. Lee, Ph.D. (Southern Illinois-Carbondale)– international finance, international trade, international system, economic developments; R. McFerrin, Ph.D. (Texas A & M University)– micro theory, principles and American economic history; J. T. Peach, Ph.D. (Texas-Austin)– quantitative economics, border studies, economic development; C. Ricketts, Ph.D. (Mississippi State)– labor, health, development; R. L. Steiner, Ph.D. (Oklahoma State)– likelihood methods, discrete distributions; D. Van Leeuwen, Ph.D. (Oregon State)– statistics; B. Widner, Ph.D. (Colorado State)– urban/regional, public finance, development; D. L. Clason, (Emeritus) Ph.D. (Kansas State)– linear models, government statistics; M. Ellis (Emeritus), Ph.D. (California-Riverside)– comparative economic systems, medical economics; B. N. Matta, Ph.D. (Emeritus) (Texas-Austin)– labor economics, managerial economics; J. T. McGuckin, (Emeritus) Ph.D. (Wisconsin-Madison)– production economics, resource economics and policy; A. V. Popp, Ph.D. (Emeritus) (Northern Illinois)– public finance; D. B. Smith (Emeritus), Ph.D. (Nebraska); E. S. Willman, (Emeritus) Ph.D. (Indiana)– monetary policy, macroeconomic theory

AEEC 501. Microeconomic Theory 3 Credits

A rigorous re-examination of the pricing mechanism in the goods and factor markets. Development of theoretical tools of general applicability.

Prerequisite(s): ECON 371 and ECON 457, or consent of instructor.

AEEC 502. Macroeconomic Theory**3 Credits**

Contemporary aggregative theory regarding the interrelationships among national income, employment, the price level, money supply and interest rates, and implications of this theory for public policy in a mixed economy.

AEEC 511. Advanced Futures and Options Markets**3 Credits**

Advanced hedging and speculating strategies using futures and options contracts. Coverage includes interest rates, stock indexes, metals, currencies, livestock, and grains. Concepts of price analysis (technical and fundamental) and basis analysis; technical paper is required. Same as AG E/FIN 311 with additional coursework required at the graduate level. Cannot receive credit for both AG E/FIN 311 and AEEC/FIN 311. Crosslisted with: FIN 511.

AEEC 520. International Agricultural Trade Theory and Policy**3 Credits**

Review and analysis of international trade models. Analysis of the effects of trade instruments such as tariffs, quotas, and subsidies on welfare and income distribution. Analysis of bilateral, regional, and multilateral trade agreements and their effect on the agricultural sector from both country-specific and global perspectives.

Prerequisite: ECON 371.

AEEC 522. Public Sector Economics I**3 Credits**

Introduction to the economic rationale for government intervention in the economy and the effects of that intervention on economic agents and the economy in general. Emphasis on the expenditure side of government policies. Same as GOVT 522.

AEEC 523. Public Sector Economics II**3 Credits**

A continuation of AEEC 522. Concentrates on the economic effects of taxation. Same as GOVT 523.

AEEC 526. Global Food Supply Chain Management**3 Credits**

This course aims to provide students a basic understanding of supply chain management issues, and encourages them to analyze problems from a systems perspective, and introduce them to a number of decision tools that are currently being used by the industry such as process analysis, product design, waiting line management, quality control, just-in-time, and inventory management.

AEEC 528. Economic Development**3 Credits**

A graduate-level exposition of microeconomic and macroeconomic theory of why and how nations allocate resources to grow and develop. Strong emphasis is given to understanding the economic problems facing developing nations.

AEEC 540. Econometrics I**3 Credits**

An integration of quantitative and statistical techniques for research and management in economics and business.

Prerequisite(s): ECON 457 and ECON 405 or A ST 505.

AEEC 545. Advanced Agricultural Policy**3 Credits**

Historical and cultural background of food and agricultural policy in the United States. Analysis of food and agricultural problems, policy-making and implementation. Economic evaluation of specific U.S. food and agricultural policy instruments, their domestic and international impacts. Same as AG E 445V with additional work required at the graduate level. Cannot receive credit for both AG E 445V and AEEC 545.

Prerequisite: consent of instructor.

AEEC 550. Advanced Microcomputer Applications in Agriculture**3 Credits (2+2P)**

An advanced course in electronic spreadsheets and the concepts and tools of database management emphasizing agricultural applications. Taught with AG E 450 with additional coursework required at the graduate level. Cannot receive credit for both AG E 450 and AEEC 550.

Prerequisite(s): AG E 250G or consent of instructor.

AEEC 551. Advanced Agribusiness Marketing**3 Credits**

Applications course in which self-managed teams apply marketing theory in the development and presentation of marketing plans for food and agribusiness firms. Course includes analysis of marketing problems with emphasis on strategic marketing issues changing trade policies, and global competitiveness.

Prerequisite: consent of instructor.

AEEC 556. Advanced Agribusiness Management**3 Credits**

Integration of production, marketing, accounting, finance, agricultural policy, human behavior, and business environment concepts in management of agricultural businesses using a decision case approach.

AEEC 575. Economics of Water Resource Management and Policy**3 Credits**

Focuses on issues, approaches and methods used in the assessment of water resource management and policy problems. Extends and further develops student understanding and comprehension of specific economic concepts and methods that are useful in the assessment and management of water resources, including cost-benefit analysis, welfare economics, non-market valuation, watershed management, and consideration of equity and ethical concerns. Students will develop critical reasoning, communication and analytic skills through active class discussions and assignments that emphasize both quantitative and written products. May be repeated up to 3 credits.

AEEC 585. Production Economics**3 Credits**

Application of microeconomic theory to problems and decisions of food and agricultural firms. The theoretical foundation of production economics and the theory of the firm are developed.

Prerequisites: MATH 142G, ECON 371, and ECON 457.

AEEC 590. Special Topics**3 Credits**

Seminars in selected current topics in the various areas of agricultural economics and economics. Offerings will carry a subtitle.

Prerequisite: consent of instructor.

AEEC 593. Internship**1-6 Credits**

Supervised professional on-the-job training experience in policy analysis.

AEEC 594. Internship**1-6 Credits**

One semester to six months internship with a regulated firm or public utility commission. A faculty member will direct and evaluate the internship. For AEEC regulatory option students only.

AEEC 595. Internship**3 Credits**

Supervised professional on-the-job learning experience.

Prerequisite(s): Consent of instructor.

AEEC 596. Individual Study**1-3 Credits**

Individual study programs. Each offering will carry a subtitle. Maximum of 3 credits in a semester and 6 credits in a program.

Prerequisite: consent of instructor.

AEEC 597. Non-Thesis Research Project**1-3 Credits (1-3)**

Individual investigations, either analytical or experimental. Maximum of 3 credits per semester. No more than 3 credits toward a degree.

AEEC 598. Creative Component Project**3-6 Credits (3-6)**

Individual investigations, either analytical or experimental. A minimum of 3 to 6 credits per semester. No more than 6 credits toward degree.

Consent of instructor required. Restricted to AEEC majors.

Prerequisite(s): Consent of Instructor.

AEEC 599. Master's Thesis**15 Credits**

Thesis.

AG E 100. Introductory to Food and Agribusiness Management**3 Credits**

Orientation to agricultural supply businesses, farm and ranch production, food markets, food processing and distribution, and food consumption. Microeconomic principles for managers. May be repeated up to 3 credits.

AG E 101. Careers in Food and Agribusiness**1 Credit**

Orientation to agribusiness management. Students will learn about agricultural production and marketing in New Mexico, the United States, and the world. Students will be introduced to faculty and staff within the department, learn about career opportunities available to AEAB graduates, and develop a greater appreciation of agricultural management issues. May be repeated up to 1 credits. Restricted to Las Cruces campus only.

Prerequisite(s): Freshman status only or obtain consent of instructor.

AG E 200. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. Consent of instructor required.

AG E 210G. Survey of Food and Agricultural Issues**3 Credits**

Survey of food and agricultural issues, including: geography of food production and consumption; human-agricultural-natural resource relations; agriculture in the United States and abroad; modern agribusiness; food safety; food, agriculture, and natural resources policy; ethical questions; role and impact of technology. Crosslisted with: FSTE 210G.

AG E 236. Principles of Food and Agribusiness Management**3 Credits**

Description and application of management and financial principles, market planning, and organization theory in small business situations. May be repeated up to 3 credits.

AG E 250. Technology and Communication for Business Management**3 Credits (2+2P)**

Understanding and improving skills for data analysis, information management and communication is the focus of this course. Drawing examples from a variety of management, business, technological and research situations, students discover the versatility and variety of uses of computer applications such as spreadsheet, database, presentation and document software. Emphasizing a 'hands-on' approach students learn the foundations of these tools and their use.

AG E 260. Introduction to Food and Agribusiness Accounting**3 Credits**

Purpose and methods of keeping and analyzing farm and ranch records. Net worth and income statements, efficiency measures, analysis of the business, and tax computations. May be repeated up to 3 credits.

AG E 300. Internship**1-4 Credits (1-4)**

Professional work experience under the supervision of a faculty member. May be repeated up to 6 credits. Consent of Instructor required. S/U Grading (S/U, Audit). Restricted to Las Cruces campus only.

Prerequisite(s): Consent of instructor.

AG E 305. Marketing and Food Agricultural Products**3 Credits**

Description of agricultural processes and functions; food production and consumption patterns; agricultural product prices; nature of competition in agricultural product markets; commodity markets. May be repeated up to 3 credits. Crosslisted with: MKTG 305.

Prerequisite(s): ECON 201G or ECON 252G.

AG E 311. Financial Futures Markets**3 Credits**

Emphasis on financial instruments, currencies, and stock index futures. Principles of hedging, arbitrage, speculation, technical and fundamental price analysis, and trading strategies. Simulated computer trading game. Same as AEEC/FIN 511 with additional coursework required at the graduate level. Cannot receive credit for both AG E/FIN 311 and AEEC/FIN 511. Same as FIN 311.

AG E 313. Food and Agricultural Sales**3 Credits**

Techniques of salesmanship including application of sales techniques. Identification and classification of buyer type and different approaches to sales based on client base. Improving oral communication skills through individual and/or group sales presentations. May be repeated up to 3 credits.

Prerequisite(s): Junior or above standing.

AG E 314. Agricultural and Natural Resource Law**3 Credits**

Relationship of common-law principles, statutory law and regulatory law to problems involving agriculture with an emphasis on New Mexico issues. Legal problems relevant to agribusiness, torts, fencing laws, liability for agricultural pollution, irrigation water rights, corporations and partnerships, land tenure, farm and ranch tenancy, agricultural labor, farm and ranch management and taxation. May be repeated up to 3 credits.

AG E 315V. World Agriculture and Food Problems**3 Credits**

Survey of food and agricultural issues in the U.S. and other countries. Covers: role of agriculture in economic development; trade in food and agricultural products; global food production, consumption, and marketing patterns; economics of technical change and food assistance; agriculture and the environment. Same as GEOG 315V.

AG E 325. Food and Agribusiness Finance and Planning**3 Credits**

Understanding, using, and constructing financial statements for agribusiness analysis. Learn how to produce integrated pro forma financial statements first on paper and then on a spreadsheet. Prepare and link revenue, cost, and financing input assumptions formulas to the financial outcomes on the spreadsheet. May be repeated up to 3 credits. Crosslisted with: ANSC 325.

Prerequisite(s): AG E 250 or equivalent experience using spreadsheets.

AG E 337V. Natural Resource Economics**3 Credits**

Gain insight into important natural resource problems of our time. Apply economic principles to problems in the preservation, use, and development of agricultural, range, mineral, water, forestry, fishery, and environmental resources. Understand the use of cost-benefit analysis for government natural-resource projects, policies, and programs. Same as ECON 337V.

Prerequisite: ECON 201G or ECON 252G.

AG E 340. Economics of Food and Agricultural Markets**3 Credits**

Focuses on the analysis of supply and demand characteristics of commodities with particular attention to agricultural products. Pays special attention to empirical analysis. Includes institutional aspects of pricing, temporal and spatial price relationships, price forecasting, and the economic consequences of pricing decisions. May be repeated up to 3 credits.

Prerequisite(s): ECON 252G, MATH 142G, and A ST 311 or A ST/STAT 251G.

AG E 342. Economic Analysis of Food and Agribusiness**3 Credits**

A discussion and application of economic, managerial, and financial considerations in agricultural business. May be repeated up to 3 credits.

Prerequisite(s): ECON 251G, ECON 252G.

AG E 384V. Water Resource Economics**3 Credits**

Use of economic principles to evaluate current and emerging issues in water resources. Applications focus on use of economic methods of analysis to current policy decisions surrounding agricultural, municipal, industrial, and environmental uses of water. Same as ECON 384V.

Prerequisite: AG E 100 or ECON 252G.

AG E 385. Applied Production Economics**3 Credits**

Analysis of economic principles of agricultural production and planning, emphasizing marginal principles. Practical application in budgeting and analyzing profit maximizing agricultural-production strategies. May be repeated up to 3 credits.

Prerequisite(s): ECON 252G, MATH 142G, and A ST 311 or A ST/STAT 251G.

AG E 400. Seminar**1 Credit**

Current topics and cases in the agribusiness literature stressing rigorous qualitative analysis of current problems and policy issues. Consent of Instructor required. Restricted to: AEAB; NREP majors. S/U Grading (S/U, Audit).

Prerequisite(s): Senior standing.

AG E 406. The Economics of Sports**3 Credits**

Applying the tools of economic analysis to a particular industry and gaining an in-depth knowledge of the interaction of professional sports teams and leagues with the economy and society. Same as ECON 406.

AG E 420. Special Problems**1-3 Credits**

Special problems in agricultural economics or agricultural business of particular interest to the individual student. Maximum of 3 credits per semester. No more than 6 credits toward degree. Consent of instructor required.

AG E 425. Food and Agribusiness Financial Management**3 Credits**

Description and application of techniques and principles of financial management to problem situations faced by agricultural businesses, including financial statement development and analysis, capital budgeting, sources and costs of capital. May be repeated up to 3 credits.

Prerequisite(s): ECON 252G and ACCT 221.

AG E 440. Ranch Economics**3 Credits**

Economic principles related to western ranch business. Business management, economic characteristics of ranches, ranch land problems and values, and economics of rangeland use.

Prerequisite: ECON 201G or ECON 252G.

AG E 445V. Agricultural Policy**3 Credits**

Historical and cultural background of food and agricultural policy in the United States. Analysis of food and agricultural problems, policy-making and implementation. Economic evaluation of specific U.S. food and agricultural policy instruments, their domestic and international impacts.

Prerequisites: ECON 251G and ECON 252G.

AG E 450. Spreadsheet Applications in Food and Agriculture**3 Credits (2+2P)**

An advanced course in electronic spreadsheets and the concepts and tools of database management emphasizing agricultural application. Same as AEBC 550 with additional work for graduate credit. Cannot receive credit for both AG E 450 and AEBC 550. May be repeated up to 3 credits.

Prerequisite(s): AG E 250 or consent of instructor.

AG E 451. Food and Agribusiness Market Assessment and Research**3 Credits**

Applications course in which self-managed teams develop and present marketing plans for agribusiness firms. Emphasis on integrating the marketing mix, particularly promotional elements. May be repeated up to 3 credits. Crosslisted with: MKTG 451.

Prerequisite(s): AG E 305 or MKTG 305 or consent of instructor.

**AG E 452. Food and Agribusiness Marketing Plan Development
3 Credits**

This course focuses on learning marketing research methods applicable to developing new food and agricultural products and repositioning existing products for new markets. Students will be required to prepare precise written and oral marketing plans to industry standards and will have opportunities to present written and oral plans at national competitions. May be repeated up to 3 credits.

**AG E 456. Case Studies in Food and Agribusiness Management
3 Credits**

Integration of production, marketing, accounting, finance, agricultural policy, human behavior, and business environment concepts in management of agricultural businesses using a decision case approach. May be repeated up to 3 credits.

Prerequisite(s): Senior standing.

**AG E 458. Economics of Making and Marketing Wine
3 Credits**

Economics of making and marketing wine for small commercial wineries and amateurs. The class starts with selecting, crushing, and fermenting grapes and all the steps required through bottling the wine. Students must be 21 to enroll in the class. Consent of instructor required.

**AG E 470. Real Estate Appraisal
3 Credits (2+2P)**

This course addresses issues influencing the value of real estate with some emphasis upon rural properties. Topics include courthouse records, property taxes, appraisal methodology, expert courtroom testimony, condemnation, and legal issues. Students will take field trips and write appraisals. Course material is relevant to students in Finance, Accounting, and Pre-Law, as well as Agriculture. Accredited for hours to apply to both pre-licensing and continuing education requirements of the New Mexico Real Estate Commission for both Appraisers and Real Estate Brokers. Crosslisted with: FIN 470

Prerequisite(s): Junior or above standing.

**AG E 499. Senior Thesis
3 Credits**

Develop a thesis project with a faculty advisor. The senior thesis requires students to work creatively to apply business and economic principles to address a problem of concern. Restricted to AEAB majors.

Prerequisites: consent of department head and have senior standing.

Name: Dr. Jay Lillywhite

Office Location: GT Room 387

Phone: (575) 646-3215

Website: <http://www.aeab.nmsu.edu>

Agricultural Business Management- Undergraduate Minor

The minor in Agricultural Business Management (ABM) consists of 18 or more credit hours of approved course work from the list below. All courses must be completed with grades of "C" or better. Once courses are completed or show "IP" status, students pursuing the ABM minor need to log in to their mynmsu and print out the STAR Audit for the minor and obtain departmental approval. The course requirements for the ABM minor are as follows:

Quantitative/Information - 6 credits

AG E 250	Technology and Communication for Business Management	3
A ST/STAT 251G	Statistics for Business and the Behavioral Sciences	3
or A ST 311	Statistical Applications	
Agricultural Economics, Law and Policy - 6 credits		
ECON 252G	Principles of Microeconomics	3
<i>Choose 1 from the following:</i>		3
AG E 314	Agricultural and Natural Resource Law	
AG E 445V	Agricultural Policy	
Agribusiness Management - 6 credits		
AG E 236	Principles of Food and Agribusiness Management	3
<i>Choose 1 from the following - 3 credits</i>		3
AG E 260	Introduction to Food and Agribusiness Accounting	
AG E/MKTG 305	Marketing and Food Agricultural Products	
AG E/FIN 311	Financial Futures Markets	
AG E 313	Food and Agricultural Sales	
AG E/ANSC 325	Food and Agribusiness Finance and Planning	
AG E/ECON 337V	Natural Resource Economics	
AG E 342	Economic Analysis of Food and Agribusiness	
AG E/ECON 384V	Water Resource Economics	
AG E 456	Case Studies in Food and Agribusiness Management	
AG E/FIN 470	Real Estate Appraisal	
Total Credits		18

Agricultural Economics - Master of Science

Students entering the MS program are required to have completed

- intermediate microeconomics and intermediate macroeconomics (completed with a B grade or better),
- a college-level calculus class, and
- a course in statistics that included linear regression analysis.

Students that have not completed these courses may be admitted with the requirement that they take them as deficiencies at the beginning of their graduate program. Prospective graduate students must have at least a 3.0 undergraduate GPA. Students with a GPA less than 3.25 must complete the GRE or the GMAT exam.

Completion of the Master of Science degree in agricultural economics requires completion of a minimum of 33 graduate credit hours. Twenty-one of the credits must have one of the following three prefixes: AEEC, ECON, or ECDV. Twenty-four of the credits must be associated with course numbers greater than 500. All students in the MS program must successfully complete the following core courses:

M.S. CORE (16-18 hrs)

AEEC 501	Microeconomic Theory	3
AEEC 502	Macroeconomic Theory	3

AEEC 540	Econometrics I	3
AEEC 585	Production Economics	3
AEEC 599	Master's Thesis ¹	4
Total Credits		16

Choose 3 Classes from AEAB Block (9 hrs) ² 9

AEEC/FIN 511	Advanced Futures and Options Markets	
AEEC 520	International Agricultural Trade Theory and Policy	
AEEC 526	Global Food Supply Chain Management	
AEEC 550	Advanced Microcomputer Applications in Agriculture	
AEEC 551	Advanced Agribusiness Marketing	
AEEC 556	Advanced Agribusiness Management	
AEEC 545	Advanced Agricultural Policy ²	
AEEC 575	Economics of Water Resource Management and Policy	
AEEC 590	Special Topics	
AEEC 596	Individual Study	

Additional Graduate Courses (~6 hrs) ³ 6

Total Credits		15
---------------	--	----

¹ AEEC 599 minimum hours are 4 with maximum of 6 toward the degree

² AEEC 545 must be taken as part of this AEAB Block if not previously completed as an undergraduate under AG E 445V.

³ One of these two choices may include three (3) additional hours of AEEC 596. Or student may select a justifiable minor (9+ hours) per Graduate School policy plus 2 additional courses from the AEAB Block.

MS students are generally required to write a thesis (AEEC 599 Master's Thesis (4-6 credits). Non-thesis options that include a non-thesis research project (AEEC 597 Non-Thesis Research Project, 3 credits) or an internship (AEEC 595 Internship, 3 credits) must have approval from the student's committee and the graduate chairman. Students pursuing the MS degree may not complete the graduate program with more than one C grade in the core courses. If a student receives C grades in two of these core classes one of the classes must be repeated with a grade of at least B. In addition to core courses, nine additional credits must be completed from an agricultural economics and agricultural business (AEAB) course block. AEEC 545 Advanced Agricultural Policy must be taken in the graduate program if an agricultural policy course was not taken as an undergraduate. Individual study (AEEC 596 Individual Study) is limited to 6 credits hours. Electives and up to 3 credits from the AEAB course block can be used to pursue a minor. An oral defense is required of all master's candidates and will be scheduled and completed according to the guidelines of the Graduate School. The oral defense must be preceded by an open seminar to present major research findings to faculty, fellow students and the interested public.

Agricultural Economics and Business - Bachelor of Science in Agriculture

General and Departmental Requirements

ENGL 111G	Rhetoric and Composition	4
-----------	--------------------------	---

Agriculture - Master of Agriculture

Concentration: Agribusiness

Candidates for the Master of Agriculture (MAG) with specialization in Agribusiness must successfully complete a minimum of 33 graduate credits. Students entering the Master of Agriculture program are required to have completed

- intermediate microeconomics and intermediate macroeconomics,
- a college-level calculus class, and
- a course in statistics that included linear regression analysis.

All prerequisite courses must be completed with a B grade or better. AEEC 545 Advanced Agricultural Policy must be taken in the graduate program if an agricultural policy course was not taken as an undergraduate. Those students not having completed these courses may be admitted with the requirement that the deficiencies be completed at the beginning of the graduate program. Prospective graduate students must have at least a 3.0 undergraduate GPA. Students with a GPA less than 3.25 must complete the GRE or GMAT exam.

All students in the MAG program must successfully complete the following:

Core Courses

AEEC 551	Advanced Agribusiness Marketing	3
AEEC 556	Advanced Agribusiness Management	3
FIN 503	Financial Management	3
ACCT 503	Accounting for Managers	3

Additional Requirements

AEAB Block (6 hrs) ¹		6
AEEC/FIN 511	Advanced Futures and Options Markets	
AEEC 520	International Agricultural Trade Theory and Policy	
AEEC 526	Global Food Supply Chain Management	
AEEC 540	Econometrics I	
AEEC 550	Advanced Microcomputer Applications in Agriculture	
AEEC 575	Economics of Water Resource Management and Policy	
AEEC 585	Production Economics	
AEEC 545	Advanced Agricultural Policy ²	
Internship, Creative Component, or Thesis (3-6 hrs) ³		3-6
AEEC 595	Internship	
AEEC 598	Creative Component Project	
AEEC 599	Master's Thesis	
Electives (~9-12)		12
Total Credits		33-36

¹ Some courses in this degree are core requirements for the MBA and have limitations for participation by non-MBA students. MAGRI students cannot take BA 590 and MGT 591. Only 9 hours are allowed for MAGRI students from: ACCT 503, BA 590, BLAW 502, ECON 503, FIN 502, FIN 503, MGT 502, MGT 503, MGT 512, or MKTG 503 - two of which are core requirements, leaving 1 choice from this group.

² AEEC 545 must be taken as part of this AEAB Block if not previously completed as an undergraduate under AG E 445V.

³ Students can take 2 additional courses with advisor and graduate chairman approval in lieu of AEEC 595, AEEC 598, or AEEC 599.

A thesis (AEEC 599 Master's Thesis, 4-6 credits) is not required but can substitute for the internship or individual investigation. Individual study (AEEC 596 Individual Study) is limited to 3 credits. An oral defense must be scheduled and completed as prescribed by the Graduate School. The defense must be preceded by a public seminar to present major findings, experiences, and contributions of the individual investigation, internship, and/or thesis research to faculty, fellow students, and the interested public.

Agriculture - Master of Business Administration

Concentration: Agribusiness

Candidates for the Master of Business Administration with specialization in Agribusiness (MBA-AB) must successfully complete a minimum of 36 graduate credit hours. Admission to the MBA-AB program is through the College of Business. The program includes numerous prerequisites in economics, accounting, and business as defined in the Business Administration and Economics section of this catalog. AEEC 545 Advanced Agricultural Policy must be taken in the MBA-

Agribusiness program if an agricultural policy course was not taken at the undergraduate level. A written paper and presentation following the guidelines described for B A 590 Professional Paper/Presentation is required. MBA-AB students can take the required minimum 4 thesis credit hours to substitute for B A 590 Professional Paper/Presentation. If a thesis (AEEC 599 Master's Thesis) is written in-lieu of taking B A 590 Professional Paper/Presentation, an examining committee and thesis defense must be organized similar to that of the MS degree program. For more information about the requirements for the MBA specialization refer to the MBA section (p. 422) of this catalog.

Core (21 hs)

ACCT 503	Accounting for Managers	3
BCIS 502	Business Information Systems	3
B A 590	Professional Paper/Presentation ¹	3
BLAW 502	Legal Environment of Business	3
FIN 503	Financial Management	3
MGT 503	Organizational Behavior and Management Processes	3
MGT 590	Strategic Management	3
AEAB Block Requirements (15 hrs) ²		
AEEC/FIN 511	Advanced Futures and Options Markets	3
AEEC 520	International Agricultural Trade Theory and Policy	3
AEEC 526	Global Food Supply Chain Management	3
AEEC 551	Advanced Agribusiness Marketing	3
AEEC 556	Advanced Agribusiness Management	3
Total Credits		36

¹ MBA-Agribusiness majors, with advisor approval, may take the required minimum 4 thesis hours (maximum of 6 hrs) in lieu of BA 590

² AEEC 545 must be taken as part of this AEAB Block if not previously completed as an undergraduate under AG E 445V.

Economic Development - Doctor of Economic Development

The Doctor of Economic Development (DED) is a professional doctorate designed to provide advanced training for economic development professionals. It is not designed to prepare graduates for academic careers.

Candidates for the DED enter the program with the equivalent of a master's degree. DED students must successfully complete approximately 60 graduate credits beyond the hours required for entry. All students must meet the requirements specified in the general regulations and requirements for admission to the Graduate School and to candidacy. DED minimum admission requirements include:

1. related master's degree or equivalent coursework;
2. one course in intermediate microeconomic theory and one course in macroeconomic theory with minimum grades of B;
3. one course in college-level calculus with a minimum grade of B; and
4. one course in statistics, including simple regression with a minimum grade of B.

Additionally, students who have not completed graduate level courses in microeconomic theory, macroeconomic theory, and econometrics

with grades of B or better will be required to successfully complete these courses early in the DED program.

All students in the DED program must successfully complete the following:

Core Courses

AEEC 501	Microeconomic Theory	3
AEEC 502	Macroeconomic Theory	3
AEEC 540	Econometrics I	3
ECDV 550	Introduction to Local and Regional Development	3
ECDV 651	Economic Development Theory	3
ECDV 661	Regional Economic Modeling I	3
ECDV 662	Regional Economic Modeling II	3
ECDV 664	Population Economics	3
ECDV 668	Economic Development Finance	3
ECDV 671	Sustainable Economic Development	3
ECDV 692	Seminar in Economic Development (taken twice)	6
ECDV 681	Urban Economic Development	3
ECDV 682	Rural Development	3
ECDV 683	Seminar in National Economic Development	3
Specialty Area		6
Internship and Final Project (12-15 hrs)		12-15
Elective credits to fulfill the 60+ hour requirement		3
Total Credits		66-69

NOTE: Doctor of Economic Development (DED) students who enter the DED program with a master's degree may, upon completion of all requirements for the MA in Economics, apply for the MA in Economics degree and count courses that overlap with the DED requirements toward the DED. Students must apply separately for the MA in Economics program and the master's degree must be conferred before the DED.

Comprehensive and oral exams will be given and will determine eligibility to continue in the program and/or to graduate.

Teaching and research assistantships are available to qualified applicants, however, admission to the program does not imply or guarantee funding.

Detailed and updated information is available at <https://business.nmsu.edu/academics/graduate-programs/ded/>.

Natural Resource Economics - Undergraduate Minor

The minor in Natural Resource Economics (NRE) consists of 18 or more credit hours of approved course work of which at least 9 hours must be numbered 300 or above and completed with grades of "C" or better. Once courses are completed or show "IP" status in the audit, students pursuing the NRE minor need to log in to their mynmsu and print out the STAR Audit and obtain departmental approval. The course requirements for the NRE minor are as follows:

Required Courses - 6 credits

ECON 252G	Principles of Microeconomics	3
-----------	------------------------------	---

Select 1 course from the following:		3
AG E/ECON 337V	Natural Resource Economics	
AG E/ECON 384V	Water Resource Economics	
Select 2 courses from the following - 6 credits		6
FWCE 255	Principles of Fish and Wildlife Management	
AG E 445V	Agricultural Policy	
GOVT 330	Introduction to Public Administration	
Select 2 courses from the following - 6 credits		6
FWCE 110	Introduction to Natural Resources Management	
FWCE 301	Wildlife Ecology	
GEOG 281	Map Use: Reading, Analysis and Interpretation	
RGSC 294	Rangeland Resource Management	
PHIL 300+		
Total Credits		18

Animal and Range Sciences Undergraduate Program Information

The Department of Animal and Range Sciences provides opportunities for you to follow a variety of interests in modern scientific agriculture. The animal science curriculum provides a background for many phases of the food animal industry, from farm animal production on rangelands to management positions in the food processing industry to highly technical careers in research and companion animal management. The range science curriculum provides you with knowledge and skills necessary to sustainably manage rangelands for multiple uses. These curricula allow you to acquire the background necessary to adjust easily to variations in specific job opportunities. If you are majoring in either animal science or range science, you must meet general education requirements, have a minimum of 48 credits of upper-division courses (numbered 300 and above), and complete a minimum of 35 credits in courses in the College Agricultural, Consumer and Environmental Sciences.

Graduate Program Information

The Department of Animal and Range Sciences offers graduate work leading to the Master of Science and the Doctor of Philosophy degrees with majors in animal science and range science. The Doctor of Philosophy degree in animal science is only in the areas of reproductive physiology or ruminant nutrition.

Prerequisite for admission as a regular graduate student in the department is the completion of a curriculum, substantially equivalent to that required of undergraduate students in animal or range science at this institution, 3.0 GPA, and three letters of reference.

For the Master of Science degree, a minimum of 30 semester credits of graduate work in the major and related subjects will be required, together with a thesis for most majors. A non-thesis option is available for certain students.

For the Master of Agriculture with specialization in Domestic Animal Biology, students must complete 32 credit hours of graduate courses which include 2 credits of ANSC 598 Special Research Programs for the creative component.

The Doctor of Philosophy student must demonstrate proficiency in a foreign language or research tool, such as experimental statistics, philosophy of science, computer science, or mathematics. Choice of the research tool will remain the option of the student subject to approval by the student's graduate committee. Demonstration of proficiency may be accomplished by satisfactory completion of courses or by other suitable evidence acceptable to the student's committee. In addition, doctoral students are required to complete advanced courses in a field of study closely related to animal science or range science. The number of courses to be completed in the related area will be determined by the student's committee. Related areas of study often are biology, chemistry, or experimental statistics.

The Department of Animal and Range Sciences is a sponsoring department in the recently approved interdisciplinary graduate degree program that offers both a MS and Ph.D. degree in Water Science Management. The degree program is being handled through the College of Agricultural, Consumer and Environmental Sciences (ACES), and the program description, including application guidelines, classes involved, and topic areas being supported can be found in the catalog under the section describing ACES Programs. Interested students are encouraged to contact the Department Head of Animal and Range Sciences, Shanna Ivey at (575) 646-2515 for more information.

Graduate work in the department is designed to prepare the student for work in the fields of research, extension, teaching, production, and conservation.

Facilities available to graduate students include herds and flocks of the major livestock species, animal nutrition laboratories, physiology laboratories, meats laboratory, small animal laboratory, 25,000-specimen herbarium, two ranches of approximately 92,000 acres, and a 1,000-head experimental feedlot. Active cooperation is maintained with federal research agencies located on and off the campus.

A number of graduate assistantships will be available each year. Inquiries should be addressed to the head of the department.

Degrees for the Department

Animal Science - Bachelor of Science in Agriculture (p. 108)

Range Science - Bachelor of Science in Agriculture (p. 112)

Agriculture - Master of Agriculture (p. 108)

Animal Science - Master of Science (p. 111)

Range Science - Master of Science (p. 113)

Animal Science - Doctor of Philosophy (p. 110)

Range Science - Doctor of Philosophy (p. 113)

Minors for the Department

Horse Management - Undergraduate Minor (p. 111)

Human Animal Interaction - Undergraduate Minor (p. 112)

Livestock Production - Undergraduate Minor (p. 112)

Ranch Management - Undergraduate Minor (p. 112)

Range Science - Undergraduate Minor (p. 114)

Range Science - Graduate Minor (p. 113)

Animal Science - Graduate Minor (p. 111)

Professor, Shanna Ivey, Interim Department Head

Professors Bailey, Cibils, Duff, Fernald, Hubbert, Holechek, Löest, Soto, Wise

Associate Professors Ashley, Burcham, Fasenko, Ganguli, Scholljegerdes, White

Assistant Professors Geli, Summers

College Track Assistant Professors Campbell, Fuentes, Pridhoko

Instructors Priest

Co-operators (USDA) Estell, Herrick, Peters

Emeritus Faculty Abbott, Allred, McDaniel, Ross, Thomas

S. L. Ivey, Department Head, Ph.D. (New Mexico State University)- ruminant nutrition/microbiology; K. W. Allred, Ph.D. (emeritus, Texas A&M University)- plant taxonomy; R.L. Ashley, Ph.D. (Colorado State University)- physiology of reproduction; D.W. Bailey, Ph.D. (Colorado State University)- rangeland management; A.F. Cibils, Ph.D. (Colorado State University)- grazing management and ecology; G.C. Duff, Ph.D. (New Mexico State University)- animal nutrition; G.M. Fasenko, Ph.D. (North Carolina State University)- companion animal management; A. G. Fernald, Ph.D. (Colorado State University)- land use hydrology and water quality hydrology; A.C. Ganguli, Ph.D. (Oklahoma State University)- range restoration; H. M. E. Geli, Ph.D. (Utah State University)-Landscape Hydrology; J. Hernandez-Gifford, Ph.D. (Washington State University)-Reproductive Physiology; J. L. Holechek, Ph.D. (Oregon State)- range ecology; M.E. Hubbert, Ph.D., (University of Alaska-Fairbanks)- ruminant nutrition; C. A. Löest, Ph.D. (Kansas State University)- ruminant nutrition; K. C. McDaniel, Ph.D. (emeritus, Texas A&M University)- brush management; T. T. Ross, Ph.D. (emeritus, North Carolina State University)- physiology of reproduction and sheep production; E.J. Scholljegerdes, Ph.D. (University of Wyoming)- ruminant nutrition; S.A. Soto-Navarro, Ph.D. (New Mexico State University)- ruminant nutrition; A.F. Summers, Ph.D. (University of Nebraska)-Physiology of reproduction; J. D. Thomas, Ph.D. (emeritus, University of Missouri-Columbia)- meat science; L. M. White, Ph.D. (Clemson)- equine science; M. E. Wise, Ph.D. (University of Nebraska)- physiology of reproduction.

Adjunct faculty: C. D. Allison, Ph.D. (Texas A&M University)- range management; K. M. Harvstad, Ph.D. (Utah State University)- range animal nutrition; J.E. Herrick, Ph.D. (Ohio State University)- soils; M.R. Levi, Ph.D. (University of Arizona)-soil morphology/classification; T.J. Nagaraja, Ph.D. (Kansas State University)-rumen microbiology; D.P. Peters, Ph.D.

(Colorado State University)– landscape ecology; S. Spiegel, Ph.D. (University of California Berkeley)–range management.

Cooperative Extension Service: D. Cram, Ph.D. (New Mexico State University)– range science; C. Gifford, Ph. D. (University of Idaho)–animal science; J. L. Turner, Ph.D. (Kansas State University)– equine immunology and physiology; M. Ward, Ph.D. (North Dakota State University)– ruminant nutrition; K. Young, Ph.D. (Brigham Young University)–Brush & Weed Specialist

ANSC 100. Introductory Animal Science

3 Credits

Orientation and survey of livestock industry in the United States; introduction to feeding, breeding, and management practices for producing farm animals and select companion animals.

ANSC 100 L. Introductory Animal Science Laboratory

1 Credit

Students will observe and participate in activities related to farm animal management and will include areas of livestock selection, nutrition, reproductive physiology, animal ID and animal health. This lab is required for animal science majors. Pre/

Corequisite(s): ANSC 100.

ANSC 103. Introductory Horse Science

3 Credits (2+2P)

The light horse industry; breeds; introduction to feeding, breeding, marketing and management; handling and selecting horses for breeding and performance.

ANSC 112. Companion Animals in Society

3 Credits

Examination of the historical, current, and potential future roles of companion animals in human society. Topics include animal domestication, breeds, exotic companion animals, the companion animal industry, and competitions and sports involving companion animals. Emphasis is on canine and feline species. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

ANSC 190. Western Equitation I

2 Credits

Basic principles of Western riding, including care and management of the riding horse, equitation equipment, and development of riding skills.

ANSC 200. Introduction to Meat Animal Production

3 Credits (2+2P)

Production and utilization of beef cattle, sheep and swine; emphasis on feeding, breeding, management problems and marketing; selection of animals for breeding and market.

ANSC 201. Introduction to Genetics for Animal Production

3 Credits

Introduction to genetics and inheritance relative to livestock production. Introduction to procedures for collection and use of performance information in livestock improvement programs.

Prerequisites: BIOL 111G.

ANSC 220. Animal Science Career Development

1 Credit

Introduction to scientific disciplines and career options in animal-agriculture career-skill development, including resume preparation, networking, importance of internships, and leadership experiences in animal agriculture.

ANSC 250. Special Topics

1-4 Credits

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

ANSC 261. Introduction to Animal Metabolism

3 Credits

Principles underlying the mechanisms of animal metabolism as they relate to production, maintenance, and health of animals.

Prerequisite: CHEM 111G.

ANSC 262. Introduction to Meat Science

3 Credits (2+3P)

Fundamental aspects of the red meat industry. Lecture topics and laboratory exercises include the nutrient value of meat, meat preservation, meat safety, muscle structure and contraction, slaughter and processing of beef, lamb, and pork, sausage manufacture, meat curing, meat cookery, and muscle and bone anatomy.

ANSC 285. Introduction to Companion Animal Science

3 Credits

Introduction to the care of common companion animal species. Species specific housing and nutrition are covered in the context of maximizing animal health and well-being and reducing disease. May be repeated up to 3 credits.

ANSC 288. Horse Fitting and Selling

3 Credits

Preparation of horses for sale; planning and conduct of auction sale; application of marketing principles relating to selling horses.

Prerequisite: ANSC 103 or consent of instructor.

ANSC 289. Management of Equine Operations

3 Credits

Introduction and application of business skills necessary to effectively manage the equine operation. Students will learn how to use strategic thinking and sound business management practices to succeed in the demanding equine industry.

Prerequisite(s): ANSC 103 or consent of instructor.

ANSC 290. Western Equitation II

2 Credits

Intermediate principles of Western riding, including reading horse behavior, limbering-up exercises, and developing riding skills.

Introduction to rollbacks, turnarounds and stops.

Prerequisite: consent of instructor.

ANSC 295. Team Competition in Animal Science

1-2 Credits

Training in team competition in the animal sciences. May be repeated for a maximum of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

ANSC 301. Animal and Carcass Evaluation

3 Credits (2+2P)

Determination of the market value of meat animals by relating live animal and carcass traits. Topics include the identification of economically important traits, grading, growth and development, wholesale and retail pricing, and futures and options markets.

ANSC 302. Therapeutic Horseback Riding I

3 Credits

Basic principles and understanding of horsemanship and therapeutic riding, including equipment, safety, how to be an effective volunteer, side walker, and horse handler. Consent of instructor required.

ANSC 303. Livestock, Meat and Wool Evaluation**4 Credits (3+2P)**

Selection, classification, grading, and judging of livestock, meat, and wool.

ANSC 304. Feeds and Feeding**3 Credits (2+2P)**

Digestibility of feeds, their nutritive values, grades, and classes, principles of ration formulation and computer ration formulations, and practical feeding of farm animals.

Prerequisite(s): CHEM 111G, General Chemistry I.

ANSC 305. Principles of Genetics**3 Credits**

Covers fundamental principles of reproduction, variation, and heredity in plants and animals. Crosslisted with: AGRO 305, BIOL 305, HORT 305 and GENE 305

Prerequisite(s): BIOL 111G, BIOL 211G and either CHEM 111G or CHEM 115.

ANSC 308. Horse Evaluation**4 Credits (2+4P)**

Students will acquire a working knowledge of selection and classification of horses, learn criteria for evaluation and selection of breeding and show animals, gain a broad understanding of judging conformation and performance in the horse, and learn effective oral and written communication skills through defense of class placings. This course is considered an introduction to the NMSU Horse Judging Team.

ANSC 310. Exhibiting Livestock**3 Credits (1+4P)**

Fitting and showing beef cattle, dairy cattle, sheep and swine.

ANSC 312V. Companion Animals and the Human- Animal Interaction**3 Credits**

The science behind human-animal interactions (HAI). An examination of the interactions between humans and companion animals and the effects on human and animal health and wellness. Cultural differences in HAI will be explored. Topics will include Animal Assisted Activity (AAA), Animal Assisted Therapy (AAT), and service animals. Emerging and future uses of companion animals in HAI will be discussed.

ANSC 320. Equine Behavior and Training**3 Credits**

Basic principles, methods and philosophies of handling, breaking and training the two-year-old Western horse. May be repeated up to 6 credits.

Prerequisite(s): ANSC 290 or consent of instructor.

ANSC 321. Advanced Equine Behavior and Training**3 Credits**

Continuation of ANSC 320. Further development of skills required to advance the training of the two-year-old Western horse. Emphasis will be placed on lateral work, lead changes, turn-arounds, obstacles, and making the horse accustomed to ranch and trail riding situations.

Prerequisite(s): ANSC 320 or consent of instructor.

ANSC 325. Food and Agribusiness Finance and Planning**3 Credits**

Same as AG E 325. May be repeated up to 3 credits. Crosslisted with: AG E 325.

ANSC 350. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

ANSC 351V. Agricultural Animals of the World**3 Credits**

Global study of the development and use of animals for production of food and nonfood products. Climatic, cultural, and economic influences on systems of livestock production and species and breeds of livestock utilized will be evaluated.

ANSC 353. Advanced Livestock Evaluation**2 Credits**

Advanced selection, classification and grading of livestock. May be repeated up to 2 credits. Consent of Instructor required.

ANSC 363. Meat Technology**3 Credits**

Structure function and composition of muscles; factors influencing conversion of muscle to meat; buying, palatability and nutritive value of meat and meat products.

ANSC 370. Anatomy and Physiology of Farm Animals**4 Credits (3+2P)**

Structure and function of the animal body. Includes studies of the horse, cow, sheep, pig, and comparisons with the human body.

Prerequisite(s): CHEM 111G and BIOL 111G or BIOL 211G.

ANSC 383. Equine Reproductive Management**3 Credits (1+4P)**

Anatomy, physiology, and endocrinology of reproduction of the mare and stallion; training in modern reproductive techniques employed in the horse industry.

Prerequisites: ANSC 103, ANSC 289, and ANSC 370.

ANSC 390. Internship**1-3 Credits**

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 3 credits toward a degree. Graded S/U.

Prerequisite: consent of instructor.

ANSC 391. Undergraduate Research Experience**1-3 Credits (1-3)**

Formal laboratory, library, or field study of problems related to animal sciences, emphasizing hypothesis development, testing, and reporting results. Projects are preplanned, reviewed, and approved. Students submit periodic written reports and final written and oral reports. May be repeated for a maximum of three credits. Consent of Instructor required.

Prerequisite(s): Consent of Instructor.

Corequisite(s): NO.

ANSC 392. Animal Sciences Teaching/Extension Experience**1-3 Credits (1-3)**

: Formal teaching experience related to animal sciences supervised by a faculty member. May involve classroom instruction, educational material development, and/or student evaluation and assessment. Students may also be involved in development, implementation, or assessment of adult or youth educational programs related to animal sciences, supervised by a faculty member. Students submit periodic written reports and a final written and oral report. May be repeated for a maximum of three credits. Consent of Instructor required.

ANSC 395. Team Competition II**1-2 Credits**

Advanced training in team competition in the animal sciences. May be repeated for a maximum of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

ANSC 402. Animal Science Seminar**1 Credit**

Review of the current literature in animal sciences. Oral and written reports.

ANSC 411. Canine and Feline Behavior and Training**3 Credits**

The influence of domestication, breeds, genetics, and physiology on the behavior of canine and feline species. Training methods and modification of problem behaviors are examined. The impact of the pet parent on their animal's behavior is addressed. May be repeated up to 3 credits.

Prerequisite(s): Junior or Senior status or consent of the instructor.

ANSC 412. Canine and Feline Health and Diseases**3 Credits**

A review of common infectious and non-infectious diseases and the basics of the immune response. Pathophysiology and treatment of these diseases and the role the pet parent plays in pre-disposing their animals to disease. May be repeated up to 3 credits.

Prerequisite(s): ANSC 285 or consent of instructor.

ANSC 421. Physiology of Reproduction**4 Credits (3+2P)**

Fertility and the role of hormones, nutrition, selection, management and environment in the maintenance of high reproductive rate.

Prerequisite(s): ANSC 370.

ANSC 422. Animal Nutrition**3 Credits**

Nutrient utilization and measurement and nutrient requirements for the various body functions.

Prerequisite(s): CHEM 211 or CHEM 313 or ANSC 261.

ANSC 423. Animal Breeding**3 Credits (2+2P)**

Mating systems, and selection procedures; calculation of inbreeding coefficients, genetic relationships, and gene frequency.

Prerequisite(s): ANSC 201 or 305.

ANSC 424. Swine Production**3 Credits (2+2P)**

Breeding, feeding, and care of swine.

Prerequisite(s): ANSC 304.

ANSC 425. Horse Science and Management**3 Credits (2+2P)**

Senior level course requiring students to apply basic knowledge acquired in the previous courses to solve typical problems encountered in the horse industry. Specific topics include genetics and animal breeding, business and legal issues, reproduction, health, nutrition and exercise physiology.

Prerequisite(s): ANSC 304 and ANSC 370 or concurrent registration.

ANSC 426. Beef Production: Cow-Calf Management**3 Credits (2+2P)**

Senior level course examining management practices for the cow-calf producers. Specifically focusing on nutrition, reproduction, genetics, marketing, and health. May be repeated up to 3 credits.

Prerequisite(s): ANSC 304 and (ANSC 201 or ANSC 305) or concurrent registration.

ANSC 427. Dairy Production**3 Credits (2+2P)**

Breeding, nutrition, physiology and management of dairy cattle.

Prerequisite(s): ANSC 304 and (ANSC 201 or ANSC 305) or concurrent registration.

ANSC 428. Sheep and Wool Production**3 Credits (2+2P)**

Genetics, nutrition, physiology and management of sheep. Wool grading, shearing, and disease control.

Prerequisite(s): ANSC 304 and junior status.

ANSC 429. Beef Production: Feedlot Management**3 Credits**

Senior level course in feedlot management of beef cattle. Topics of interest include cattle handling and processing, health and nutrition, intake management, and growth. Feed mill operation, marketing strategies, and regulatory concerns associated with finishing cattle production may also be discussed.

Prerequisite(s): ANSC 304 or Consent of Instructor.

ANSC 448. Problems**1-4 Credits**

Individual investigation in a specific area of animal science. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

ANSC 458. Livestock Behavior, Welfare and Handling**3 Credits (2+3P)**

Principles of animal behavior and evaluation of management practices on animal welfare in confined and rangeland livestock operations. Low stress livestock handling techniques. Design of livestock handling facilities. Crosslisted with: RGSC 458

Prerequisite(s): RGSC 294 or ANSC 100.

ANSC 462. Parasitology**3 Credits**

Same as EPWS 462.

ANSC 462 L. Parasitology Lab**1 Credit**

Classification, biological effects, and management of animal parasites of man, domestic animals, and wildlife. One-hour lab is optional. Same as EPWS 462.

ANSC 468. Advanced Dairy Herd Management**3 Credits**

The course is offered through the Southern Great Plains Dairy Consortium in Clovis, NM, and will include breeding, nutrition, physiology, health and management of large herd dairies of the Southwest. Students must apply for the course through the Consortium, and can take it more than once, as topics vary. Consent of instructor required.

Prerequisite(s): ANSC 304.

ANSC 480. Environmental Physiology of Domestic Animals**3 Credits**

Influence of environmental factors on physiological processes of domestic animals.

Prerequisite: ANSC 370.

ANSC 484. Ruminant Nutrition**3 Credits**

Energy, nitrogen, and mineral nutrition of ruminants with special emphasis on digestive physiology and metabolism of nonprotein nitrogen compounds.

Prerequisite: ANSC 422.

ANSC 488. Equine Nutrition and Exercise Physiology**3 Credits (2+2P)**

Students will gain an in-depth understanding of nutrition and exercise physiology in the horse. Students will investigate the response of major physiological systems to exercise, conditioning and training, gastrointestinal physiology, nutrition requirements and clinical nutrition of the horse.

Prerequisite(s)/Corequisite(s): Junior standing or consent of instructor.

ANSC 501. Advanced Animal Nutrition (so)**3 Credits**

Emphasis on digestive physiology and metabolism. Basic mechanisms involved in the intake, digestion, and absorption of nutrients studied. Crosslisted with: HNDS 501

Prerequisite(s): CHEM 211 or consent of instructor.

ANSC 504. Animal Physiology Techniques (se)**4 Credits**

Radioimmunoassay procedures. Methods and procedures for conducting reproductive physiology research in livestock. Includes animal preparation, sample collection, laboratory and cell culture procedures.

Prerequisite: consent of instructor.

ANSC 507. Laboratory Techniques in Nutrition (f)**4 Credits (2+6P)**

Methodology and experimental procedures in measuring nutrient requirements and value of diets. Same as HNDS 507.

Prerequisites: ANSC 422 or consent of instructor.

ANSC 509. Endocrinology of Domestic Animals (f)**3 Credits**

The role of hormones in growth, development, metabolism, temperature regulation, lactation, and reproduction of domestic animals, including commercial applications.

ANSC 510. Range Nutrition Techniques (se)**3 Credits**

Animal and plant methods of determining quantity and quality of range forage. Same as RGSC 510.

Prerequisite: ANSC 484 or consent of instructor.

ANSC 512. Research Methods in Animal Science (s)**4 Credits (3+2P)**

Procedures used in animal science research, including planning and conduct of investigations and interpretation of results. Same as HNDS 512.

ANSC 515. Graduate Seminar**1 Credit**

Current topics. Same as HNDS 517.

ANSC 520. Advanced Nutritional Management I: Feedlot (se)**3 Credits**

Emphasis on feeding systems for beef cattle from weaning to slaughter. Primary focus on feedlot nutrition and management.

Prerequisite: ANSC 484 or consent of instructor.

ANSC 521. Advanced Nutritional Management II: Cow Calf/Stocker (so)**3 Credits**

Emphasis on nutritional management for cow-calf and stocker operations. Primary focus on applications to range animal nutrition and management.

Prerequisite: ANSC 484 or consent of instructor.

ANSC 522. Animal Nutrition (f)**3 Credits**

Nutrient utilization and measurement; nutrient requirements for the various body functions. Taught with ANSC 422 and same as HNDS 522 with additional requirements for graduate students. Recommended for nonmajors. Crosslisted with: HNDS 522

Prerequisite(s): CHEM 211.

ANSC 560. Rumen Microbiology (so)**3 Credits**

Issues in ruminal and gastrointestinal microbiology. Includes physiological and genetic mechanisms in carbohydrate and nitrogen utilization. Same as FSTE 560.

Prerequisites: ANSC/HNDS 501 and CHEM 546.

ANSC 580. Environmental Physiology of Domestic Animals**3 Credits**

Influence of environmental factors on physiological processes of domestic animals. Specific focus on fetal and developmental programming, heat and cold stress.

ANSC 588. Equine Nutrition and Exercise Physiology**3 Credits**

Students will gain an in-depth understanding of nutrition and exercise, conditioning and training, gastrointestinal physiology, nutrition requirements and clinical nutrition of the horse.

Prerequisite(s)/Corequisite(s): ANSC 304 and ANSC 422.

ANSC 598. Special Research Programs**1-4 Credits (1-4)**

Individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

ANSC 599. Master's Thesis**15 Credits**

Thesis. Consent of Instructor required. Thesis/Dissertation Grading.

ANSC 600. Research**1-15 Credits**

This course is for Ph.D. students before they have completed qualifiers. Consent of Instructor required. Thesis/Dissertation Grading.

Prerequisite(s): ANSC 421 or consent of instructor.

ANSC 602. Advanced Reproductive Physiology (fo)**3 Credits**

Mechanisms of reproductive function; research methodology.

Prerequisite(s): ANSC 421 or consent of instructor.

ANSC 602 L. Molecular Techniques in Reproductive Physiology (fo)**2 Credits**

Molecular biology techniques used in the study of reproductive physiology in domestic animals. Extraction of RNA, DNA from endocrine tissues, northern analysis, culture of pituitary/ovarian tissue. Mechanisms of hormone action.

Prerequisite: consent of instructor.

ANSC 604. Hypothalamo-Hypophyseal-Pineal Endocrinology (fe)**1 Credit**

Hormones and other neurochemicals synthesized and secreted by the hypothalamus, pituitary, and pineal glands. Neuroendocrinology of the hypothalamo-hypophyseal axis.

Prerequisite: ANSC 509.

ANSC 605. Gonadal and Uterine Endocrinology (fe)**1 Credit**

Endocrinology of mammalian ovaries, testes, and uteri including developing trophoblasts.

Prerequisite: ANSC 509.

ANSC 606. Endocrinology of Pregnancy, Parturition, and Lactation (fe)**1 Credit**

Hormones and other chemical messengers involved in maintenance of pregnancy, control of parturition, and initiation and maintenance of lactation in farm animals.

Prerequisite: ANSC 509.

ANSC 621. Metabolic Functions and Dysfunctions (fe)**3 Credits**

Physiological chemistry of ruminants and other domestic animals, with attention to metabolic dysfunctions and nutritional toxicology. Same as HNDS 621.

Prerequisites: CHEM 345 and ANSC 501.

ANSC 625. Nutrient Metabolism I: Mineral, Vitamin, and Nitrogen Metabolism (fo)**4 Credits**

Cellular metabolism, physiological function(s), toxicities, and deficiencies of minerals, vitamins and nitrogen in ruminants and nonruminants. Same as HNDS 625.

Prerequisite: ANSC/HNDS 501.

ANSC 626. Nutrient Metabolism II: Carbohydrates, Lipids, and Energetics (se)**4 Credits**

Basic principles of carbohydrate, lipid, and energy metabolism; integration of metabolism with emphasis on nutritional and biochemical processes related to efficiency of nutrient use. Same as HNDS 626.

Prerequisite: ANSC 501 or HNDS 501.

ANSC 698. Special Research Programs**1-4 Credits**

Advanced individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

ANSC 700. Doctoral Dissertation**15 Credits**

Dissertation. Consent of Instructor required. Thesis/Dissertation Grading.

RGSC 150. Rangeland Science Profession**1 Credit**

Introduction to scientific disciplines and career opportunities in rangeland science and management.

RGSC 250. Special Topics**1-4 Credits**

Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

RGSC 294. Rangeland Resource Management**3 Credits**

Overview of arid and semi-arid ecosystems in the US and abroad, rangeland plant physiology, ecology of rangeland plant communities and ecosystems, sustainable management for multiple uses including grazing livestock production, wildlife habitat, recreation and ecosystem services, and economics of rangeland-based enterprises. Restricted to: Main campus only.

RGSC 302V. Forestry and Society**3 Credits**

Global study of the development and use of forest resources for production of wood, fuel, fiber, and food products. Climatic, edaphic, cultural, and economic influences on forests of the world evaluated. Same as HORT 302V.

RGSC 316. Rangeland Plants**3 Credits (2+3P)**

Identification, classification, cultural uses, and economic importance of native and introduced rangeland plants.

RGSC 317. Rangeland Communities**3 Credits**

Rangeland associations and communities, their plant species composition, and ecological factors affecting management of communities.

RGSC 318. Watershed Management**3 Credits (2+2P)**

Management of rangeland and forest watersheds with emphasis on hydrologic cycle and land use effects on runoff and water quality.

RGSC 325. Rangeland Restoration Ecology**3 Credits**

Principles and practices of vegetation management and ecological restoration. Course emphasizes problems associated with rangeland degradation, and implementation of rangeland restoration and improvements.

Prerequisite(s): Sophomore standing or consent of instructor.

RGSC 350. Special Topics**1-4 Credits**

Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

RGSC 357. Grass Taxonomy and Identification**3 Credits (1+4P)**

Taxonomy of grasses; grass anatomy, variation in reproductive structures, and identification of grasses by sight and through the use of dichotomous keys.

Prerequisite/Corequisite(s): Junior Standing or consent of the instructor.

RGSC 390. Internship**1-3 Credits**

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 3 credits toward a degree. Graded S/U.

Prerequisite: consent of instructor.

RGSC 402. Seminar**1 Credit**

Topics in range science. Oral and written reports.

Prerequisite: senior standing.

RGSC 406. Rangeland Team Competition**1 Credit**

Description and characteristics of range plants. May be repeated for a maximum of 4 credits.

RGSC 440. Rangeland Resource Ecology**3 Credits**

Plant adaptations to arid environments. Life histories of arid land plants. Biotic interactions among rangeland organisms. Arid land plant communities: their physiognomy, diversity, productivity, and response to disturbance. Arid land ecosystem dynamics.

Prerequisite(s): Senior standing.

RGSC 440 L. Rangeland Resource Ecology Lab**1 Credit**

Living and nonliving factors of the range environment, the life forms and role of range plants and animals on succession and interactions in range ecosystems. Corerequisite(s): RGSC 440.

RGSC 448. Problems**1-4 Credits (1-4)**

Individual investigation in a specific area of range science. Maximum of 4 credits per semester and a grand total of 6 credits. Consent of Instructor required.

RGSC 452. Vegetation Measurements for Rangeland Assessment**4 Credits (2+4P)**

Sampling principles, sampling design, and measurement methods used to quantify vegetation attributes and to assess the structure and function of rangeland ecosystems. Laboratory emphasizes practical field techniques, quantitative analysis, and interpretation of results.

Prerequisite(s): RGSC 294 and A ST 311.

RGSC 458. Livestock Behavior, Welfare and Handling**3 Credits (2+3P)**

Principles of animal behavior and evaluation of management practices on animal welfare in confined and rangeland livestock operations. Low stress livestock handling techniques. Design of livestock handling facilities. Crosslisted with: ANSC 458

Prerequisite(s): RGSC 294 or ANSC 100.

RGSC 460. Rangeland and Natural Resource Planning and Management**4 Credits (3+3P)**

Planning and problem solving in rangeland and natural resource management. Public land planning and policy. Application of land management principles to resolve rangeland, riparian and habitat issues.

Prerequisite(s): Senior or graduate student standing.

RGSC 509. Approaches to Rangeland Research**3 Credits**

Experimental design and statistical analysis of experimental results.

Prerequisite(s): A ST 505 or consent of instructor.

RGSC 513. Advanced Rangeland Ecology**3 Credits**

Overview of the current state of knowledge in selected areas of rangeland ecology, with emphasis on currently developing ideas and issues relevant to rangeland management.

Prerequisite(s): RGSC 440 or equivalent.

RGSC 515. Graduate Seminar**1 Credit**

Current topics. Graded S/U.

RGSC 516. Arid Land Management**3 Credits**

Survey of seminal and current literature dealing with management of arid and semiarid lands including soil-plant-animal interactions, plant community ecology, arid land assessment methods, and arid land hydrology.

RGSC 518. Watershed Methods and Management**3 Credits**

Management of rangeland and forest watersheds with emphasis on the hydrologic cycle and land use effects on runoff and water quality. Hydrologic monitoring methods problem sets required for graduate credit.

RGSC 520. Arid Land Plant Herbivore Interactions**3 Credits**

Survey of seminal and current literature dealing with plant- and animal-related factors that influence herbivory patterns in arid landscapes. Although ungulate herbivory is a central focus of the course, the role of plant defenses in deterring both vertebrate and invertebrate herbivores is discussed in detail.

RGSC 525. Advanced Rangeland Restoration Ecology**3 Credits**

Principles and practices of vegetation management and ecological restoration. Course emphasizes problems associated with rangeland degradation, and implementation of rangeland restoration and improvements. Research paper required for graduate credit.

RGSC 550. Special Topics**1-4 Credits**

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

RGSC 557. Advanced Grass Taxonomy and Identification**3 Credits**

Taxonomy of grasses; grass anatomy, variation in reproductive structures, and identification of grasses by sight and through the use of dichotomous keys. Additional writing and grass identification assignments are required for graduate credit.

RGSC 598. Special Research Program**1-4 Credits**

Individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

RGSC 599. Master's Thesis**15 Credits**

Thesis. Consent of Instructor required. Thesis/Dissertation Grading.

RGSC 600. Doctoral Research**1-15 Credits**

Research. Consent of Instructor required. Thesis/Dissertation Grading.

RGSC 616. Advanced Arid Land Management**3 Credits**

In depth discussion of seminal and current literature dealing with management of arid and semiarid lands including land tenure systems, soil-plant-animal interactions (emphasis on livestock grazing), plant community ecology and assessment methods, and arid land hydrology.

RGSC 620. Advanced Arid Land Plant-Herbivore Interactions**3 Credits**

In depth discussion of seminal work dealing with plant- and animal-related factors that influence herbivory patterns in arid landscapes. Although ungulate herbivory is a central focus of the course, the role of plant defenses in deterring both vertebrate and invertebrate herbivores is discussed in detail.

RGSC 698. Special Research Programs**1-4 Credits (1-4)**

Advanced individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

RGSC 700. Doctoral Dissertation**15 Credits**

Dissertation. Consent of Instructor required. Thesis/Dissertation Grading.

Agriculture - Master of Agriculture

Concentration: Domestic Animal Biology

The Department of Animal and Range Sciences at New Mexico State University offers a non thesis coursework Master of Agriculture degree with a Concentration in Domestic Animal Biology (MAG-DAB) which provides students with graduate training in animal nutrition and physiology. The degree is earned after satisfactory completion of 32 credit hours of upper division and graduate-level courses. The curriculum is completed in two or three academic semesters and includes a creative component which can be met in several ways.

Students having an undergraduate degree in an area of agriculture or a related field may consider the MAG-DAB as an alternative to a Master of Science which traditionally involves preparation of a thesis. Students who may benefit from this program include those in need of additional advanced science-based coursework in preparation for applying to a professional program in veterinary medicine. Other individuals may be interested in careers in the cooperative extension service, education, or the feed and pharmaceutical industries where an advanced degree may be of benefit to advancement. The curriculum outlined below will assist students in preparing for a number of career opportunities.

Admission to the Program

The MAG-DAB program is administered through the Department of Animal and Range Sciences and is coordinated by the Animal Science Graduate Committee. Admission to the program requires acceptance by the NMSU Graduate School as well as the Department of Animal and Range Sciences. Basic requirements include an undergraduate degree in an agricultural or a related major from an accredited college or university and an undergraduate GPA of 3.0.

Depending on undergraduate training, some individuals may need to complete deficiency classes. In addition, the graduate school may require international students to complete one or more English language courses. Applications to the Department should include three letters of reference, a resume, and a statement of interest in advanced graduate training.

Once admitted to the program, each student will work with an advisor to develop a course work plan of study. The advisor and the student will also select an advisory committee consisting of two departmental faculty members and a third member from outside the department who will normally serve as the Dean's representative to the committee.

Inquiries about the MAG-DAB Program should be directed to the Chair of the Animal Science Graduate Committee.

For the Master of Agriculture with a concentration in Domestic Animal Biology, students must complete 32 credit hours of graduate courses which include 2 credits of ANSC 598 Special Research Programs for the creative component.

All students in the MAG-DAB Program will complete the following classes: 18

ANSC 480	Environmental Physiology of Domestic Animals	3
----------	--	---

ANSC 484	Ruminant Nutrition	3
ANSC 501	Advanced Animal Nutrition (so)	3
ANSC 509	Endocrinology of Domestic Animals (f)	3
ANSC 512	Research Methods in Animal Science (s)	4
ANSC 515	Graduate Seminar ¹	1

Elective Courses

In consultation with their graduate advisor, students choose at least 12 credits from the following list of core courses (other classes may be considered on an individual basis): 12

ANSC 462	Parasitology
ANSC 504	Animal Physiology Techniques (se)
ANSC 507	Laboratory Techniques in Nutrition (f)
ANSC 520	Advanced Nutritional Management I: Feedlot (se)
ANSC 521	Advanced Nutritional Management II: Cow Calf/Stocker (so)
ANSC 560	Rumen Microbiology (so)
ANSC 602	Advanced Reproductive Physiology (fo)
ANSC 602 L	Molecular Techniques in Reproductive Physiology (fo)
ANSC 604	Hypothalamo-Hypophyseal-Pineal Endocrinology (fe)
ANSC 605	Gonadal and Uterine Endocrinology (fe)
ANSC 606	Endocrinology of Pregnancy, Parturition, and Lactation (fe)
ANSC 621	Metabolic Functions and Dysfunctions (fe)

¹ must take two semesters of seminar

Creative Component

The creative component of the program involves completing at least two credits of ANSC 598 Special Research Programs. This requirement can be met in one of two ways. In consultation with the advisor, the student can select a topic of importance in domestic animal biology and prepare a comprehensive literature review covering that topic. An alternative way to meet this requirement is for the student, in consultation with the advisor, to conduct a research project and prepare a written manuscript for evaluation by the advisory committee. In either case, the student will present results of the project in the graduate Seminar (ANSC 515) and then be examined by the advisory committee.

In certain cases, the student may request approval from the Advisory Committee to complete two additional graduate courses (at least six credits) in lieu of one of the reports described above. If this approach is approved, the oral examination at the end of the program will cover all the courses completed during the MAG-DAB Program. Students pursuing this option must also prepare and present a topical seminar in ANSC 515 at some time during the program.

Animal Science - Bachelor of Science in Agriculture

The animal industry option includes courses that prepare you for work in many phases of the livestock industry, such as livestock production on farms and ranches, the meat industry, the feed industry, livestock breed associations, and livestock publications. The science option provides

you with a strong background in technical science and prepares you for advanced studies leading to graduate or professional degrees.

Requirements

Animal Science Core Requirements ¹

ANSC 100	Introductory Animal Science	3
ANSC 100 L	Introductory Animal Science Laboratory	1
ANSC 220	Animal Science Career Development	1
ANSC 303	Livestock, Meat and Wool Evaluation	4
ANSC 304	Feeds and Feeding	3
ANSC 370	Anatomy and Physiology of Farm Animals	4
ANSC 402	Animal Science Seminar	1
ANSC 421	Physiology of Reproduction	4
ANSC 422	Animal Nutrition	3
ANSC 423	Animal Breeding	3
<i>Ag Electives: choose a total of 6 credit with no more than 3 credits in ANSC Experience</i>		6
RGSC 294	Rangeland Resource Management	
ANSC 103	Introductory Horse Science	
ANSC 112	Companion Animals in Society	
ANSC 262	Introduction to Meat Science	
ANSC 301	Animal and Carcass Evaluation	
ANSC Experience		
ANSC 390	Internship	
ANSC 391	Undergraduate Research Experience	
ANSC 392	Animal Sciences Teaching/Extension Experience	
<i>Other Required Courses</i>		
AXED 201G	Effective Leadership and Communication in Agricultural Organizations	3
or COMM 265G	Principles of Human Communication	
BIOL 111G	Natural History of Life	3
BIOL 111GL	Natural History of Life Laboratory	1
CHEM 111G	General Chemistry I	4
MATH 121G	College Algebra	3
or MATH 191G	Calculus and Analytic Geometry I	
A ST 311	Statistical Applications	3
Select one from the following:		3
ECON 201G	Introduction to Economics	
ECON 251G	Principles of Macroeconomics	
ECON 252G	Principles of Microeconomics	
<i>Select one from the following options:</i>		31-36
Industry		
Science		
Total Credits		84-89

¹ Required of Industry and Science Options

Concentration: Animal Industry

Required Courses

AG E 260	Introduction to Food and Agribusiness Accounting	3
or ANSC 325	Food and Agribusiness Finance and Planning	

ANSC 200	Introduction to Meat Animal Production	3
ANSC 201	Introduction to Genetics for Animal Production	3
or ANSC 305	Principles of Genetics	
ANSC 261	Introduction to Animal Metabolism	3

Electives

Production Electives

Select 9 credits from production courses offered in the department. 9

ANSC 424	Swine Production	
ANSC 425	Horse Science and Management	
ANSC 426	Beef Production: Cow-Calf Management	
ANSC 427	Dairy Production	
ANSC 428	Sheep and Wool Production	
ANSC 429	Beef Production: Feedlot Management	
ANSC 468	Advanced Dairy Herd Management	

Ranch Management Electives

Select 3 courses from the following: 9

ANSC 383	Equine Reproductive Management	
ANSC 480	Environmental Physiology of Domestic Animals	
RGSC 316	Rangeland Plants	
RGSC 318	Watershed Management	
RGSC 325	Rangeland Restoration Ecology	
RGSC 458	Livestock Behavior, Welfare and Handling	

Business Electives

Select one from the following: 3

ACCT 221	Financial Accounting	
AG E 305	Marketing and Food Agricultural Products	
AG E 456	Case Studies in Food and Agribusiness Management	
MGT 361	Managing a Startup	
MKTG 312	Personal Selling	
Or any ACCT, BUSA, MGT, MKTF numbered 300 & above that are NOT VWV courses		

Total Credits 33

Concentration: Science

Required Courses

ANSC 305	Principles of Genetics	3
BIOL 211G	Cellular and Organismal Biology	3
BIOL 211GL	Cellular and Organismal Biology Laboratory	1
CHEM 112G	General Chemistry II	4
CHEM 211	Organic Chemistry	4-8
or CHEM 313 & CHEM 314 & CHEM 315	Organic Chemistry I and Organic Chemistry II and Organic Chemistry Laboratory	
BCHE 341	Survey of Biochemistry	3-4
or BCHE 395	Biochemistry I	

Electives

Production Electives

Select two from the following: 6

ANSC 424	Swine Production	
ANSC 425	Horse Science and Management	
ANSC 426	Beef Production: Cow-Calf Management	
ANSC 427	Dairy Production	
ANSC 428	Sheep and Wool Production	
ANSC 429	Beef Production: Feedlot Management	
ANSC 468	Advanced Dairy Herd Management	
<i>Designated Electives</i>		
Select one from the following:		4
MATH 191G	Calculus and Analytic Geometry I	
MATH 192G	Calculus and Analytic Geometry II	
PHYS 211G & 211GL	General Physics I and General Physics I Laboratory	
PHYS 212G & 212GL	General Physics II and General Physics II Laboratory	
Select one from the following:		3
ANSC 462	Parasitology	
ANSC 480	Environmental Physiology of Domestic Animals	
ANSC 484	Ruminant Nutrition	
TOX 361	Basic Toxicology	
TOX 461	Toxicology I	
Total Credits		31-36

Animal Science - Doctor of Philosophy

Requirements for Ph.D. Degree in Animal Science

Admission

1. GPA of 3.0 or greater.
2. Three letters of recommendation.
3. Completion of the form, "Application for Graduate Admission in Animal Science" including a brief letter (personal statement) outlining the student's background, career goals, and research interest.
4. Resume
5. Favorable evaluation for admission will be by consensus of the Animal Science Graduate Committee and will be contingent on availability of an advisor and research funding.
6. A requirement for admission as a doctoral graduate student in the department is completion of a curriculum substantially equivalent to that required of undergraduate students. Therefore, deficiency courses may be required after admission to the program, as determined initially by the Animal Science Graduate Committee.
7. Non-thesis MS degrees are not acceptable although some of the courses may be transferred if deemed appropriate by the student's Doctoral Committee.

General Requirements

1. Graduate students must maintain at least a 3.0 grade point average.
2. A minimum of 90 credit hours of graduate work is required of which:
 - a. At least 30 credits must be in courses numbered 600 or above.
 - b. At least 18 credits must be in ANSC 700 (Doctoral Dissertation).

3. All graduate assistants must enroll as full-time students taking at least 9 graded graduate credits (courses numbered 450 and above). No audits can be taken as part of the 9 minimum credits. Only 3 of the 9 credits may be taken as an S/U option.
 - a. A graduate assistant may not enroll for more than 15 credits each semester.
 - b. If a student needs to take deficiency courses as part of the 9 credits, then a memo from the advisor or department head should be submitted to the Graduate School. If approved, the student can register for 3 undergraduate credits and a minimum of 6 graded graduate credits during their first semester at New Mexico State University.
 - c. Enrollment during summer sessions is not required.
4. Students admitted to the Doctoral program (passed qualifying exam) must continue to enroll in three credits of graduate work each semester (exclusive of summer sessions) until the dissertation is approved by the Graduate School.
5. In certain instances, deficiency courses may be required.
6. Two semesters of ANSC 515(Graduate Seminar) are required and students are urged to attend seminar every semester that they are in residence.
7. No more than 6 credits of ANSC 698 may apply toward graduation.
8. The "Program of Study and Committee for Doctoral Students" form listing the graduate committee and courses to be taken, should be filed with the Graduate School after completion of 12 credits and after the qualifying exam, and before registering for additional courses.

Qualifying Examination

1. The Animal and Range Sciences Department may allow the M.S. Final examination to serve as a Ph.D. qualifying exam for students receiving an M.S. in Animal Science at NMSU. See "Guidelines for Graduate Studies" for further details.
2. Doctoral students must take a qualifying exam before completion of one semester of graduate work. The exam is scheduled by the student's advisor and administered by a provisional committee of at least 3 regular Animal Science faculty members in the student's area of concentration (reproductive physiology or ruminant nutrition). Its purpose is to evaluate the student's strengths and weaknesses, determine deficiency courses, and discuss a possible program of study (coursework).
3. After successful completion of this exam, a Doctoral Committee is appointed.

Doctoral Committee

1. The student's Doctoral Committee is selected by the student and the student's advisor, with approval of the Department Head and the Graduate Dean. The committee will consist of five or more members, as follows:
 - a. The committee chair (advisor) and at least two other members must be from the regular Animal Science faculty in the student's concentration area (reproductive physiology or ruminant nutrition).
 - b. One member must be from the Related Area.
 - c. One member from the Research Tool Area.
 - d. The member from the Related or Research Tool Area may serve as the Representative of the Graduate Dean.
2. Duties of the Doctoral Committee

- Prepare and file a preliminary program of study with the Graduate Dean
- Provide counsel for the student during the program
- Attend the comprehensive oral examination and the final dissertation defense.

NOTE: Changes in committee membership must be approved by the Graduate Dean.

Animal Science - Graduate Minor

A minimum of 9 credit hours in graduate level classes with the ANSC prefix are required to obtain a graduate minor in Animal Science. Approval by the Animal and Range Sciences Department Head is required.

Animal Science - Master of Science Requirements for Master of Science Degree in Animal Science

Admission

- GPA of 3.0 or greater.
- Three letters of recommendation.
- Completion of the form, "Application for Graduate Admission in Animal Science" including a brief letter (personal statement) outlining the student's background, career goals, and research interest.
- Resume
- Favorable evaluation for admission will be by consensus of the Animal Science Graduate Committee and will be contingent on availability of an advisor and research funding.
- A requirement for admission as a masters graduate student in the department is completion of a curriculum substantially equivalent to that required of undergraduate students. Therefore, deficiency courses may be required after admission to the program, as determined initially by the Animal Science Graduate Committee.

General Requirements

A. Graduate students must maintain at least a 3.0 grade point average.

B. A minimum of 30 credit hours of graduate work is required of which:

- At least 15 credits must be in courses numbered 500 or above
- At least 15 credits must be in Animal Science courses
- At least 15 credits (exclusive of ANSC 598) must be taken with other than a single professor

C. Designated hours to be completed:

- At least four formal Animal Science courses numbered 500 or above
- At least six credits in ANSC 599 (Master's Thesis)
- At least two credits in ANSC 515 (Graduate Seminar)
- At least four credits in Experimental Statistics

D. Graduate Assistants

- All graduate assistants must enroll as full-time students taking at least 9 graded graduate credits (courses numbered 450 and above). No audits can be taken as part of the 9 minimum credits. Only 3 of the 9 credits may be taken as an S/U option.

- A graduate assistant may not enroll for more than 15 credits each semester.
- If a student needs to take deficiency courses as part of the 9 credits, then a memo from the advisor or department head should be submitted to the Graduate School. If approved, the student can register for 3 undergraduate credits and a minimum of 6 graded graduate credits during their first semester at New Mexico State University.
- Enrollment during summer sessions is not required.

E. Additional Requirements

- A maximum of six credits in S/U courses may be taken during a Master's program
- A maximum of six credits (four in a single semester) in ANSC 598 (Special Research Programs) may be taken during a Master's program.
- If a minor is declared, a minimum of eight credits in this discipline must be completed and approved by that department.
- In certain instances, deficiency courses may be required.
- Attendance at graduate seminars is urged.
- Graduate students are encouraged to adapt their thesis data for submission as a scientific journal article, an Experiment Station Bulletin, or research report.

F. The Masters Committee

The Masters Committee is appointed by the student's advisor with the approval of the Department Head and consists of four members including three from the animal science area and one representative from the Graduate School.

G. The Masters Final Examination

The Masters Final Oral Examination is primarily concerned with the thesis research conducted by the student but it may also extend over the entire discipline. Candidates for a Masters Degree are expected to demonstrate a thorough understanding of their research topic including how it was conducted, the results that were found, and what the results mean. They should also demonstrate knowledge of the general discipline of Animal Science.

Horse Management - Undergraduate Minor

A minor in Horse Management consists of at least 18 credits.

Required Courses

All of the following:

ANSC 103	Introductory Horse Science	3
ANSC 425	Horse Science and Management	3
Choose two of the following courses:		6-7
ANSC 289	Management of Equine Operations	
ANSC 302	Therapeutic Horseback Riding I	
ANSC 308	Horse Evaluation	

Choose 3 credits of the following: 3

ANSC 288	Horse Fitting and Selling	
ANSC 290	Western Equitation II	
ANSC 320	Equine Behavior and Training	
ANSC 321	Advanced Equine Behavior and Training	

ANSC 390	Internship	
Choose one of the following:		3
ANSC 383	Equine Reproductive Management	
ANSC 488	Equine Nutrition and Exercise Physiology	
Total Credits		18-19

Human Animal Interaction - Undergraduate Minor

A minor in Human Animal Interaction consists of at least 18 credits.

Required Courses

ANSC 112	Companion Animals in Society	3
ANSC 285	Introduction to Companion Animal Science	3
ANSC 312V	Companion Animals and the Human-Animal Interaction	3
ANSC 390	Internship <small>Must complete 3 credit hours of internship</small>	1-3
ANSC 411	Canine and Feline Behavior and Training	3
ANSC 412	Canine and Feline Health and Diseases	3
Total Credits		16-18

Livestock Production - Undergraduate Minor

A minor in Livestock Production consists of at least 18 credits. Animal science majors may NOT minor in Livestock Production.

Core ANSC Courses

All of the following		
ANSC 100	Introductory Animal Science	3
ANSC 304	Feeds and Feeding	3
<i>Production Electives</i>		
Choose 6 credits of the following:		6
ANSC 424	Swine Production	
ANSC 425	Horse Science and Management	
ANSC 426	Beef Production: Cow-Calf Management	
ANSC 427	Dairy Production	
ANSC 428	Sheep and Wool Production	
ANSC 429	Beef Production: Feedlot Management	
<i>ANSC Electives</i>		
Choose 6 credits of the following:		6
ANSC 301	Animal and Carcass Evaluation	
ANSC 363	Meat Technology	
Or any ANSC course numbered 300 and above <small>Only one ANSC VWW is eligible towards minor</small>		
Total Credits		18

Ranch Management - Undergraduate Minor

The Ranch Management minor consists of at least 18 credits. Animal science majors may NOT minor in ranch management.

Core ANSC Courses

ANSC 100	Introductory Animal Science	3
ANSC 304	Feeds and Feeding	3
<i>Production Electives</i>		
Choose 2 of the following		6
ANSC 425	Horse Science and Management	
ANSC 426	Beef Production: Cow-Calf Management	
ANSC 428	Sheep and Wool Production	
ANSC 429	Beef Production: Feedlot Management	
<i>Range Electives</i>		
RGSC 294	Rangeland Resource Management	3
Choose 3 credits from the following		3
RGSC 302V	Forestry and Society	
RGSC 316	Rangeland Plants	
RGSC 317	Rangeland Communities	
RGSC 318	Watershed Management	
RGSC 440	Rangeland Resource Ecology	

Range Science - Bachelor of Science in Agriculture

The following course work prepares you for study and management of rangelands through an integrated ecological approach with special emphasis on rangeland plants, livestock, wildlife, soils and watersheds. The course work is also well designed for those who want to continue study in graduate school. Any undergraduate student majoring in Range Science must earn a grade of C- or higher in Range Science (RGSC prefix) courses to satisfy degree requirements. Students earning a D or F in a Range Science (RGSC prefix) course will be expected to repeat that course until the student earns a grade of C- or higher. The following courses are required for a major in rangeland resources, as well as the University requirements for General Education (p. 47), Viewing a Wider World (p. 47) and electives to bring the total credits to 120, with 48 credits being upper division.

Requirements

Range Science Core

RGSC 150	Rangeland Science Profession	1
RGSC 294	Rangeland Resource Management	3
RGSC 302V	Forestry and Society	3
RGSC 316	Rangeland Plants	3
RGSC 317	Rangeland Communities	3
RGSC 318	Watershed Management	3
RGSC 325	Rangeland Restoration Ecology	3
RGSC 357	Grass Taxonomy and Identification	3
RGSC 402	Seminar	1
RGSC 440	Rangeland Resource Ecology	3
RGSC 440 L	Rangeland Resource Ecology Lab	1
RGSC 452	Vegetation Measurements for Rangeland Assessment	4
RGSC 460	Rangeland and Natural Resource Planning and Management	4

Other Required Courses

A ST 311	Statistical Applications	3
----------	--------------------------	---

ANSC 261 or CHEM 211	Introduction to Animal Metabolism Organic Chemistry	3-4
AXED 201G or COMM 265G	Effective Leadership and Communication in Agricultural Organizations Principles of Human Communication	3
BIOL 111G	Natural History of Life	3
BIOL 211G	Cellular and Organismal Biology	3
CHEM 111G	General Chemistry I	4
CHEM 112G	General Chemistry II	4
EPWS 314	Plant Physiology	3
FWCE 255	Principles of Fish and Wildlife Management	3
Select one from the following:		4
GEOG 381 A 300/400-level GIS Course	Cartography and Geographic Information Systems	
MATH 121G	College Algebra	3
PHIL 100G or PHIL 223G	Philosophy, Law and Ethics Ethics	3
SOIL 252	Soils	3
SOIL 252 L	Soils Laboratory	1
SOIL 472	Soil Morphology and Classification	4
<i>Natural Resource Management</i>		6
AG E 337V	Natural Resource Economics	
AG E 384V	Water Resource Economics	
AG E 385	Applied Production Economics	
AG E 440	Ranch Economics	
AG E 456	Case Studies in Food and Agribusiness Management	
FWCE 110	Introduction to Natural Resources Management	
FWCE 255	Principles of Fish and Wildlife Management	
FWCE 437	Wildlife Damage Management	
RGSC 302V	Forestry and Society	
<i>ANSC Elective</i>		3
ANSC 100	Introductory Animal Science	
ANSC 304	Feeds and Feeding	
ANSC 351V	Agricultural Animals of the World	
ANSC 422	Animal Nutrition	
ANSC 426	Beef Production: Cow-Calf Management	
ANSC 428	Sheep and Wool Production	
ANSC 458	Livestock Behavior, Welfare and Handling	
Select one from the following:		3
ECON 201G	Introduction to Economics	
ECON 251G	Principles of Macroeconomics	
ECON 252G	Principles of Microeconomics	
Total Credits		94-95

Range Science - Doctor of Philosophy

A GPA of 3.0 or higher is required for admission. GRE exam is required. Prerequisite for admission as a regular graduate student in the department is the completion of a curriculum substantially equivalent to that required of undergraduate students. Therefore, deficiency courses may be required after admission to the program, as determined by the admissions committee and the student's graduate committee and advisor.

A minimum of 30 credits of graduate work plus 18 credits of dissertation (RGSC 700) are required to graduate. The Qualifying Exam will take place during the first semester of graduate work. Its purpose is to evaluate the student's strengths and weaknesses, determine deficiency courses, and discuss a possible program of study (coursework). The "Program of Study and Committee for Doctoral Students" form, listing the graduate committee and courses to be taken, should be filed with the Graduate School after completion of 12 credits and after the qualifying exam, and before registering for additional courses. The Comprehensive Exam is intended to test the knowledge of the major and minor fields of study. The student will be admitted to the exam after fulfilling the language/research tool requirement, after completion of adequate coursework (as determined by the department and the Graduate School), and when considered by the student's graduate committee to be adequately prepared. The exam is part written and part oral. The student is formally considered a candidate for the Ph.D. only after the successful completion of the comprehensive exam, the recommendation of the committee, and the approval of the graduate dean.

The research project must be approved by the student's graduate committee. The dissertation is expected to demonstrate the student's ability in independent investigation and to be a contribution to human knowledge. It shall display a mastery of the literature, present an organized, coherent development of ideas with a clear exposition of results, and provide a critical discussion of the student's conclusions. Every effort should be made to publish the dissertation as scientific journal articles. Final Exam is concerned primarily with the research work of the student as embodied in the dissertation, but it may also extend over the entire field of study. It is entirely oral. The final exam will be advertised to the public one week prior to the exam.

Range Science - Graduate Minor

A minimum of 9 credit hours in graduate level classes with the RGSC prefix are required to obtain a graduate minor in Range Science. Approval by the Animal and Range Sciences Department head is required.

Range Science - Master of Science

A GPA of 3.0 or higher is required for admission. GRE exam is not required. Prerequisite for admission as a regular graduate student in the department is the completion of a curriculum substantially equivalent to that required of undergraduate students. Therefore, deficiency courses may be required after admission to the program, as determined by the admissions committee and the student's graduate committee and advisor.

Graduate Program with the Thesis (Research) Option

A minimum of 30 credits of graduate work is required to graduate. At least one advanced statistics course or equivalent is required, as

determined by the student's graduate committee. The thesis research project must be approved by the student's graduate committee. Every effort should be made to publish the thesis as a scientific journal article or Experiment Station publication.

Graduate Program with the Non-Thesis Option

A minimum of 32 credits of graduate work is required to graduate. A final written report is required.

The report will be on a topic approved by the student's graduate committee. Research for the report may involve field work and data gathering, but should also be strongly library- and literature-based.

The report should be of graduate quality and content, and should follow graduate school thesis format or the format of an acceptable scholarly journal. Final approval and acceptance of the report will be by the student's graduate committee. Every effort should be made to publish the report in an appropriate outlet (journal article, Experiment Station bulletin or report, Extension bulletin, etc.)

Range Science - Undergraduate Minor

A minor in Range Science consists of at least 18 credits in courses with a RGSC prefix and achieve a C- or higher in all RGSC classes.

Choose 18 credits from the following courses		18
RGSC 294	Rangeland Resource Management	
RGSC 302V	Forestry and Society	
RGSC 316	Rangeland Plants	
RGSC 317	Rangeland Communities	
RGSC 318	Watershed Management	
RGSC 325	Rangeland Restoration Ecology	
RGSC 357	Grass Taxonomy and Identification	
RGSC 440	Rangeland Resource Ecology	
RGSC 440 L	Rangeland Resource Ecology Lab	
RGSC 452	Vegetation Measurements for Rangeland Assessment <small>RGSC 294 & A St 311 are pre-requisites for this course</small>	
RGSC 458	Livestock Behavior, Welfare and Handling	
RGSC 460	Rangeland and Natural Resource Planning and Management	
Total Credits		18

Entomology, Plant Pathology and Weed Science

Undergraduate Program Information

Specific courses that meet these and the university general education requirements and additional courses in biology, chemistry, mathematics and seminar are included below in departmental requirements. A total of 120 credits are required for graduation. At least 48 credits must be 300-level courses and above. Schedules in specific semesters will be developed with the help of a student's academic advisor.

Graduate Program Information

The complexity of managing insects, plant diseases, and weeds is increasing environmental concerns, costs, and regulations requiring an integrated approach to management strategies. Future professionals in integrated pest management will be ecologically oriented, trained to manipulate biological and cultural technologies while minimizing chemical control options. The Master of Science degree program in agricultural biology is designed to produce graduates with the academic and research background needed to facilitate effective, innovative, and environmentally sound protection of plants and animals from a wide and varied spectrum of pests. Students will be prepared for careers in research, extension, teaching, private consulting, industry, and government or to continue in a broad range of Ph.D. programs. Specific opportunities will include positions as agricultural consultants, technical and sales representatives for industry, state departments of agriculture and USDA specialists, agricultural extension agents, and industry research and environmental technicians. There is currently a strong need for MS graduates trained in these areas, and the demand is expected to increase dramatically.

Students may wish to concentrate their graduate program in entomology, plant pathology, or weed science, or conversely may wish to be broadly trained in all three pest-management disciplines. Most students will be expected to complete a thesis. A non-thesis option is available, depending on prior training and experience and subject to approval by the department head. A nonthesis research option requires completion of a research paper, suitable as judged by the student's graduate committee, for journal publication. Completion of an undergraduate degree essentially equivalent to that offered by the department is required for admission to the MS graduate program. Qualifications for admission will be reviewed by the departmental Graduate Admissions committee. Prospective graduate students must have at least a 3.0 undergraduate GPA, complete the GRE, and submit an official transcript, a letter of intent and three letters of recommendation.

Degrees for the Department

Agricultural Biology - Bachelor of Science in Agriculture (p. 117)

Agricultural Biology - Master of Science (p. 119)

Minors for the Department

Entomology - Undergraduate Minor (p. 119)

Pest Management - Undergraduate Minor (p. 119)

Plant Pathology - Undergraduate Minor (p. 119)

Weed Science - Undergraduate Minor (p. 119)

Professor, Gerald K. Sims, Department Head

Professors Creamer, Bundy, Sanogo, Thomas, Thompson; **Associate Professors** Hanson, Mesbah, Pierce; **Assistant Professors** Lehnhoff, Romero, Schutte; **Affiliated Faculty** Ashigh, Banks, Murray, Schroeder, Sweet, Leeper; **College Assistant Professor** Lewis; **College Associate Professor** Randall; **Emeritus Professor** Arnold, Richman

G.K. Sims, Department Head, Ph.D. (Purdue)– soil microbiology; R. N. Arnold, M.S. (New Mexico State)– weed science; J. Ashigh, Ph.D. (Guelph)– weed science; C. S. Bundy, Ph.D. (Georgia)– entomology; R. Creamer, Ph.D. (California-Davis)– plant pathology; N.P. Goldberg, Ph.D. (Arizona)– plant pathology; S. Hanson, Ph.D. (University of Wisconsin)– molecular plant

pathology; E. Lehnhoff, Ph.D. (Montana State) Ecology and Environmental Science; B. E. Lewis, M.S. (New Mexico State)– economic entomology; A.O. Mesbah, Ph.D. (University of Wyoming)– weed science; J. Breen Pierce (Rutgers)– entomology; J. Randall, Ph.D. (New Mexico State University)– plant pathology; A. Romero, Ph.D. (University of Kentucky)– Entomology; S. Sanogo, Ph.D. (Pennsylvania State)– plant pathology; B. Schutte, Ph.D. (Ohio State)– Horticulture & Crop Science; C. A. Sutherland, Ph.D. (Oregon State)– extension entomology; S. H. Thomas, Ph.D. (Iowa State)– nematology; D.C. Thompson, Ph.D. (Colorado State)– entomology.

EPWS 100. Applied Biology

3 Credits

Introduction to applied biology and ecology focusing on insects, plants and pathogens in natural areas, crops and urban settings. EPWS 100L is strongly recommended to take in the same semester. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

EPWS 100 L. Applied Biology Lab

1 Credit

Study of applied biology and ecology of insects, plants and pathogens in natural areas, crops, and urban settings. EPWS 100 strongly recommended to take in the same semester. May be repeated up to 1 credits. Restricted to Las Cruces campus only.

EPWS 200. Special Topics

1-4 Credits

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

EPWS 300. Special Topics

1-4 Credits

Specific topics and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

EPWS 301. Agricultural Biotechnology

3 Credits (2+2P)

The principles of molecular biology will be introduced and used to explore the past, present, and future applications of biotechnology in agriculture. Specific topics include methodologies for making transgenic plants with increased pest resistance, the use of biotechnology in pest detection, and improving nutritional value. The laboratory will provide students with hands-on experience with equipment used for biotechnology research.

Prerequisites: CHEM 112G, BIOL 111G, or BIOL 211G.

EPWS 302. General Entomology

4 Credits

An introduction to the biology and classification of insects. Lecture covers life histories, classification, ecology and behavior of insect orders and families. Laboratory focuses on identification of insect orders and families.

Prerequisite(s): BIOL 111G or 211G.

EPWS 303. Economic Entomology

3 Credits (3+2P)

Identification and life cycles of insects of economic significance, their relationship to humans and agriculture including biological interactions and controls. May be repeated up to 3 credits.

Prerequisite(s): Either BIOL 111G or BIOL 211G.

EPWS 310. Plant Pathology

4 Credits (3+2P)

Causes and methods of prevention and treatment of diseases in plants.

Prerequisite(s): Either BIOL 111G or BIOL 211G.

EPWS 311. Introduction to Weed Science

4 Credits (3+2P)

Principles of weed science, with emphasis on characteristics of invasive plants, methods of integrated weed management, and current issues impacting weed management. Identification of local weeds. Crosslisted with: AGRO 311.

Prerequisite(s): CHEM 111G, and BIOL 211G.

EPWS 314. Plant Physiology

3 Credits

Overview of photosynthesis, respiration, water relations of plants, minerals and organic nutrition, growth and development. Same as BIOL 314.

Prerequisites: BIOL 211G, CHEM 112G.

EPWS 325V. Insects, Humans, and the Environment

3 Credits

Overview of the interactions of the world's largest group of organisms with humans. Emphasizing the role of insects in the development of human cultures, including health, food and fiber production, art, music, and environmental issues; with discussions of historic, present day, and future impacts in underdeveloped, developing, and developed civilizations.

EPWS 373. Fungal Biology

3 Credits (2+2P)

Introduction to the taxonomy, morphology, physiology, and ecology of fungi. Same as BIOL 373.

Prerequisites: EPWS 310 or BIOL 311, or consent of instructor.

EPWS 380V. Science & Society

3 Credits

Analysis and evaluation of how human activities affect the earth's environment or ecosystems. Several examples, from global issues to local issues will be studied in detail. Current science and the intersection of science and public policy will be discussed in relation to problems like world population, agricultural productivity, deforestation, medical advances, and future prospects for the environment. May be repeated up to 3 credits.

EPWS 390. Internship

1-3 Credits

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. Maximum of 3 credits. Graded S/U.

Prerequisite: consent of instructor.

EPWS 420. Environmental Behavior of Pesticides

3 Credits

Behavior of pesticide compounds in the environment, their function toward target and non target pest organisms including humans, effect of environmental conditions on pesticide function, ecology of organisms involved in pesticides degradation, overview of environmental regulation. CHEM 211 recommended prior to course. May be repeated up to 3 credits.

EPWS 447. Seminar

1 Credit

Organization and techniques for the oral presentation of research information. Restricted to: Main campus only.

EPWS 449. Special Problems

1-3 Credits

Individual investigation in specific areas of entomology, plant pathology or plant physiology. Maximum of 3 credits per semester and a grand total of 6 credits.

EPWS 451. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

Prerequisite: consent of instructor.

EPWS 455. Advanced Integrated Pest Management**3 Credits**

Examination of factors affecting the biology and ecology, population evaluations, and control of insect, disease, and weed pests with an emphasis on integrating management practices. Credit cannot be given for both EPWS 455 and EPWS 505. Crosslisted with: EPWS 505.

Prerequisite(s): Either EPWS 303 or EPWS 310 or EPWS 311, or consent of instructor.

EPWS 462. Parasitology**3 Credits**

Introduction to classification, biology, ecology and management of the major parasites of human, domestic animals and wildlife.

EPWS 462 L. Parasitology Lab**1 Credit**

Methods of collecting and identifying the major parasites of humans, domestic animals and wildlife. Concurrent enrollment in EPWS 462 is desirable.

EPWS 471. Plant Mineral Nutrition**3 Credits**

Same as HORT 471 and AGRO 471.

EPWS 481. Plant Nematology**3 Credits (2+2P)**

Biology, ecology and basic identification of soil-inhabiting nematodes, with emphasis on host-parasite relationships and management principles for plant-parasitic genera.

EPWS 486. Plant Virology**3 Credits**

An overview of viral pathogens associated with infectious plant disease. Includes pathogens, replication, genetics, transmission, and movement of plant viruses.

EPWS 492. Diagnosing Plant Disorders**3 Credits (2+3P)**

Systematic diagnosis of the physiological, pathological, and entomological causes of plant disorders. Same as AGRO 492 and HORT 492.

Prerequisites: EPWS 303, EPWS 310.

EPWS 502. General Entomology**4 Credits**

An introduction to the biology and classification of insects. Lecture covers life histories, classification, ecology and behavior of insect orders and families. Laboratory focuses on identification of insect orders and families.

Prerequisite(s): BIOL 111G or BIOL 211G.

EPWS 505. Advanced Integrated Pest Management**3 Credits**

Examination of the factors affecting the biology and ecology, population evaluations, and control of insect, disease, and weed pests, with an emphasis on integrating management practices. Crosslisted with: EPWS 455.

Prerequisite(s): EPWS 303 or EPWS 310 or EPWS 311 or consent of instructor.

EPWS 511. Introduction to Weed Science (f)**4 Credits (3+2P)**

Covers the principles of weed science with emphasis on characteristics of invasive plants, methods of integrated weed management, and current issues impacting weed management. Includes identification of local weeds. Research paper required for graduate credit. Crosslisted with: AGRO 511.

Prerequisite(s): CHEM 111G and BIOL 211G.

EPWS 514. Plant Physiology**3 Credits**

Overview of photosynthesis, respiration, water relations of plants, minerals and organic nutrition, growth and development.

Prerequisite(s): BIOL 211G, CHEM 112G.

EPWS 520. Environmental Behavior of Pesticides (so)**3 Credits**

Behavior of these compounds in the environment, their function toward target and non target pest organisms including humans, effect of environmental conditions on pesticide function, ecology of organisms involved in pesticides degradation, overview of environmental regulation. CHEM 211 recommended prior to course. May be repeated up to 3 credits.

EPWS 525. Scientific Writing- How to be a Productive and Effective Writing**1-3 Credits (1-3)**

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Crosslisted with: AGRO 525, HORT 525 and SOIL 525.

EPWS 549. Special Problems**1-4 Credits**

Individual investigation in specific areas of entomology, plant pathology, and weed science. Maximum of 4 credits per semester and a total of 6 credits.

EPWS 551. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

EPWS 573. Fungal Biology**3 Credits (2+2P)**

Introduction to the taxonomy, morphology, physiology, and ecology of fungi. Same as BIOL 573.

Prerequisite: EPWS 310 or consent of instructor.

EPWS 575. Urban Entomology**3 Credits**

Identification and life cycles of insects in urban environments, their relationship to humans, agriculture, biological interactions and controls

Prerequisite(s): Either BIOL 111G or BIOL 211G.

EPWS 590. Graduate Seminar**1 Credit**

Review of current scientific literature in entomology, plant pathology, and weed science, and verbal presentation of information. No more than 2 credits toward a degree.

EPWS 598. Graduate Internship**1-6 Credits**

Supervised professional on-the-job learning experience. Limited to Master of Agriculture candidates. Not more than 6 credits toward the degree.

EPWS 599. Master's Thesis**15 Credits**

Thesis.

Name: Entomology, Plant Pathology & Weed Science Department**Office Location: Skeen Hall, Room N141****Phone: (575) 646-3225****Website:** <http://eppws.nmsu.edu/>

Agricultural Biology - Bachelor of Science in Agriculture

The agricultural biology course work prepares you for a variety of careers in the biological sciences and agriculture. You will develop your curriculum with an academic advisor to attain your individual goals. Many will pursue advanced degrees in the sciences or prepare for admittance to professional schools (medical, dental, etc.). A diverse program is offered with five separate options that allow you to tailor your program for careers in the commercial sector, such as agricultural consulting, and pest management or for careers with county, state, or federal agencies, such as research technicians, land managers, and extension agents. A minimum of 120 credit hours is required for graduation. Any undergraduate student majoring in Agricultural Biology must earn a grade of C- or higher in core (EPWS prefix) courses to satisfy degree requirements. Students earning a D or F in a core (EPWS prefix) course will be expected to repeat that course until the student earns a grade of C- or higher. The following courses are required for a major in Agricultural Biology.

Requirements

Departmental Requirements

A ST 311	Statistical Applications	3
AGRO 305	Principles of Genetics	3
BIOL 111G	Natural History of Life	3
BIOL 211G	Cellular and Organismal Biology	3
BIOL 311	General Microbiology	3
BIOL 313	Structure and Function of Plants	3
or BIOL 322	Zoology	
CHEM 111G	General Chemistry I	4
CHEM 112G	General Chemistry II	4
ENGL 111G	Rhetoric and Composition	4
EPWS 100	Applied Biology	3
EPWS 100 L	Applied Biology Lab	1
EPWS 301	Agricultural Biotechnology	3
EPWS 302	General Entomology	4
EPWS 310	Plant Pathology	4
EPWS 311	Introduction to Weed Science	4
EPWS 447	Seminar	1
MATH 121G	College Algebra	3
Select one from the following:		3
COMM 253G	Public Speaking	
COMM 265G	Principles of Human Communication	
AXED 201G	Effective Leadership and Communication in Agricultural Organizations	

Select one from the following: 3

ENGL 211G	Writing in the Humanities and Social Sciences
ENGL 218G	Technical and Scientific Communication
ENGL 311G	Advanced Composition

General Education Electives

Humanities and Fine Arts	6-9
Social and Behavioral Sciences	6-9

Viewing a Wider World

Select 6 credits at the 300 or 400 Level ¹ 6

Concentrations/Options

Select at least one from the following options: ² 37-46

Applied Biology
Applied Microbiology
Entomology
Environmental Biology
Pest Biology and Management

Total Credits 114-129

¹ Select two General Education Courses: one must be from a college outside of the College of Agricultural, Consumer and Environmental Sciences.

² In addition to the departmental requirements listed above, you must also complete all of the courses in at least one of the options listed below. Courses with higher numbered prefixes may replace courses listed as departmental requirements in some cases.

Agricultural Biology Concentrations/Options

Concentrations: Applied Biology

The Applied Biology option prepares you for professional advancement including admittance to medical, dental, veterinary and graduate schools. Students interested in the health professions must register with the Health Professional Advisory Committee no later than the sophomore year. Students should check the specific entrance requirements for the professional or graduate school of their choice prior to selecting electives within this option.

Required Courses

BCHE 341	Survey of Biochemistry	4
CHEM 313	Organic Chemistry I	3
CHEM 314	Organic Chemistry II	3
CHEM 315	Organic Chemistry Laboratory	2
MATH 190G	Trigonometry and Precalculus	4
MATH 191G	Calculus and Analytic Geometry I	4
PHYS 211G	General Physics I	3
PHYS 211GL	General Physics I Laboratory	1

Select 6-8 credits from the following: 6-8

ANSC 370	Anatomy and Physiology of Farm Animals
BIOL 312	Plant Taxonomy
BIOL 330	Comparative Anatomy and Embryology
BIOL 354	Physiology of Humans
BIOL 377	Cell Biology

EPWS 314	Plant Physiology	
EPWS 373	Fungal Biology	
EPWS 481	Plant Nematology	
Suggested Electives		
MATH 192G	Calculus and Analytic Geometry II	4
PHYS 212G	General Physics II	3
Total Credits		37-39

Option: Applied Microbiology

The Applied Microbiology option prepare you for professional positions in algal biofuels, environmental monitoring and improvement, industrial applications of microbiology, food sanitation, research or graduate study.

Required Courses

BCHE 341	Survey of Biochemistry	4
BIOL 311 L	General Microbiology Laboratory	2
BIOL 451	Physiology of Microorganisms	3
BIOL 473	Ecology of Microorganisms	3
CHEM 313	Organic Chemistry I	3
CHEM 314	Organic Chemistry II	3
CHEM 315	Organic Chemistry Laboratory	2
EPWS 373	Fungal Biology	3
EPWS 420	Environmental Behavior of Pesticides	3
EPWS 486	Plant Virology	3
MATH 142G	Calculus for the Biological and Management Sciences	3
PHYS 211G	General Physics I	3
PHYS 212GL	General Physics II Laboratory	1
Select 6-7 credits from the following:		6-7
A ST 456	Statistical Methods and Data Analysis	
AGRO 471	Plant Mineral Nutrition	
BIOL 477	Applied and Environmental Microbiology	
E S 301	Principles of Ecology	
E S 370	Environmental Soil Science	
EPWS 455	Advanced Integrated Pest Management	
EPWS 462	Parasitology	
EPWS 481	Plant Nematology	
EPWS 492	Diagnosing Plant Disorders	
FSTE 320	Food Microbiology	
SOIL 252	Soils	
SOIL 312	Soil Management and Fertility	
SOIL 476	Soil Microbiology	
TOX 361	Basic Toxicology	
E S 423	Environmental Toxicology	3
Total Credits		45-46

Concentration: Entomology

The Entomology concentration prepares you for graduate degrees in entomology. Emphasis is placed on a broad background in field and laboratory aspects of insect biology and management.

Required Courses

MATH 142G	Calculus for the Biological and Management Sciences	3
-----------	---	---

BIOL 465	Invertebrate Zoology	4
CHEM 211	Organic Chemistry	4
EPWS 303	Economic Entomology	3
EPWS 325V	Insects, Humans, and the Environment	3
EPWS 455	Advanced Integrated Pest Management	3
EPWS 462	Parasitology	3
EPWS 575	Urban Entomology	3
EPWS 481	Plant Nematology	3
EPWS 492	Diagnosing Plant Disorders	3
Select at least three from the following:		7-11
EPWS 314	Plant Physiology	
EPWS 451	Special Topics	
BIOL 301	Principles of Ecology	
AGRO 365	Principles of Crop Production	
AGRO 471	Plant Mineral Nutrition	
SOIL 252	Soils	
Total Credits		39-43

Concentration: Environmental Biology

The Environmental Biology option prepares you for professional positions in environmental impact, regulation, compliance and improvement.

Required Courses

CHEM 211	Organic Chemistry	4
E S 301	Principles of Ecology	3
E S 330	Environmental Management Seminar I	1
E S 430	Environmental Management Seminar II	1
EPWS 380V	Science & Society	3
EPWS 314	Plant Physiology	3
EPWS 455	Advanced Integrated Pest Management	3
EPWS 492	Diagnosing Plant Disorders	3
MATH 142G	Calculus for the Biological and Management Sciences	3
PHYS 211G	General Physics I	3
PHYS 211GL	General Physics I Laboratory	1
SOIL 252	Soils	3
TOX 361	Basic Toxicology	3
Select at least two from the following:		5-8
A ST 456	Statistical Methods and Data Analysis	
AGRO 365	Principles of Crop Production	
AGRO 471	Plant Mineral Nutrition	
BCHE 341	Survey of Biochemistry	
E S 370	Environmental Soil Science	
EPWS 420	Environmental Behavior of Pesticides	3
EPWS 451	Special Topics	
EPWS 481	Plant Nematology	
GEOG 381	Cartography and Geographic Information Systems	
SOIL 257	Introduction to Weather Science	
SOIL 312	Soil Management and Fertility	
TOX 361	Basic Toxicology	3
Total Credits		45-48

Concentration: Pest Biology and Management

This option prepares you for careers such as insect, weed and disease management; in both field and urban environments, including IPM and Sustainable/Organic Techniques research technician; federal and state agencies; border security; agricultural consulting; and extension positions.

Required Courses

CHEM 211	Organic Chemistry	4
EPWS 314	Plant Physiology	3
EPWS 455	Advanced Integrated Pest Management	3
EPWS 481	Plant Nematology	3
or EPWS 462	Parasitology	
EPWS 492	Diagnosing Plant Disorders	3
MATH 142G	Calculus for the Biological and Management Sciences	3
PHYS 110G	The Great Ideas of Physics	4
SOIL 252	Soils	3
SOIL 312	Soil Management and Fertility	3
TOX 361	Basic Toxicology	3
Select one from the following:		3
BIOL 312	Plant Taxonomy	
RGSC 357	Grass Taxonomy and Identification	
RGSC 316	Rangeland Plants	
Select 3 credits from the following:		3
EPWS 451	Special Topics	
EPWS 486	Plant Virology	
AGRO 365	Principles of Crop Production	
AGRO 471	Plant Mineral Nutrition	
BIOL 301	Principles of Ecology	
RGSC 317	Rangeland Communities	
Total Credits		38

Agricultural Biology - Master of Science

There is currently a strong need for M.S. graduates trained in these areas, and the demand is expected to increase dramatically.

Students are prepared for careers in research, extension, teaching, private consulting, industry, and government or to continue in a broad range of Ph.D. programs. Specific career opportunities include positions as agricultural consultants, technical and sales representatives for industry, state departments of agriculture and USDA specialists, agricultural extension agents, industry research and environmental technicians.

The Master of Science degree program in Agricultural Biology is designed to produce graduates with the academic and research background needed to facilitate effective, innovative, and environmentally sound protection of plants and animals from a wide and varied spectrum of pests.

Entomology - Undergraduate Minor

Choose from the following Courses (18 credits)¹

EPWS 100	Applied Biology	3
EPWS 100 L	Applied Biology Lab	1

EPWS 302	General Entomology	4
EPWS 303	Economic Entomology (required for the minor)	3
EPWS 451	Special Topics	1-4
EPWS 462	Parasitology	3
EPWS 575	Urban Entomology	3
Total Credits		18-21

¹ EPWS 303: required for the minor

Pest Management - Undergraduate Minor

Choose from the following Courses (18 Credits)

EPWS 100	Applied Biology	3
EPWS 100 L	Applied Biology Lab	1
EPWS 303	Economic Entomology ¹	3
EPWS 310	Plant Pathology ¹	4
EPWS 311	Introduction to Weed Science ¹	4
EPWS 451	Special Topics	1-4
Upper-division EPWS course(s)		3-6
Total Credits		19-25

¹ EPWS 303, EPWS 310 and EPWS 311: required for the minor

Plant Pathology - Undergraduate Minor

Courses required for minor:

EPWS 310	Plant Pathology (required for the minor)	4
EPWS 481	Plant Nematology (required for the minor)	3
EPWS 486	Plant Virology (required for the minor)	3

Choose from the following Courses (8 credits)

BIOL 311	General Microbiology	
BIOL 311 L	General Microbiology Laboratory	
EPWS 100	Applied Biology	
EPWS 100 L	Applied Biology Lab	
EPWS 314	Plant Physiology	
EPWS 373	Fungal Biology	
EPWS 492	Diagnosing Plant Disorders	
Total Credits		18

Weed Science - Undergraduate Minor Requirements

Choose from the following Courses (18 credits)

BIOL 312	Plant Taxonomy	3
BIOL 408	Ecology of Plants	3
EPWS 100	Applied Biology	3
EPWS 100 L	Applied Biology Lab	1
EPWS 311	Introduction to Weed Science ¹	4
EPWS 314	Plant Physiology ¹	3

EPWS 449	Special Problems ¹	1-3
Total Credits		18-20

¹ EPWS 311, EPWS 314, and EPWS 449: Required for the minor

Family and Consumer Sciences Undergraduate Program Information

Courses and curricula in the department are designed to educate you as an individual and as a citizen in a changing society. They also develop a scientific attitude and the ability to conduct research directed toward solutions of problems affecting the quality of life for individuals, families and communities.

You must complete general education requirements, and a sequence of specialized course work is then identified for each major.

The following prefixes are used for courses:

- CTFM—Clothing, Textiles, and Fashion Merchandising;
- FCSC—Family and Consumer Sciences;
- FCS—Family and Child Science;
- FCSE—Family and Consumer Sciences Education;
- FSTE—Food Science and Technology;
- HNDS—Human Nutrition and Dietetic Sciences.

Graduate Program Information

The candidate for the master's degree should have an undergraduate degree in a field related to the intended area of specialization. In addition to the Graduate School requirements, the admissions criteria for the Department of Family and Consumer Sciences Graduate Program include letters of reference, standardized test scores, and other materials. Suggested departmental deadlines for review of admission materials are six weeks prior to the first day of the semester of desired start. A complete description of admission requirements should be obtained from the department.

Degrees for the Department

Clothing, Textiles and Fashion Merchandising - Bachelor of Science in Family and Consumer Sciences (p. 129)

Family and Child Science - Bachelor of Science in Family and Consumer Sciences (p. 130)

Family and Consumer Sciences Education - Bachelor of Science in Family and Consumer Sciences (p. 131)

Food Science and Technology - Bachelor of Science in Food Science and Technology (p. 132)

Human Nutrition and Dietetic Sciences - Bachelor of Science in Family and Consumer Sciences (p. 133)

Family and Consumer Sciences - Master of Science (p. 131)

Minors for the Department

Child Advocacy Studies (CAST) - Undergraduate Minor (p. 129)

Clothing, Textiles and Fashion Merchandising - Undergraduate Minor (p. 130)

Culinary Science - Undergraduate Minor (p. 130)

Family and Child Science - Undergraduate Minor (p. 131)

Food Science - Undergraduate Minor (p. 132)

Nutrition - Undergraduate Minor (p. 135)

Professor, Esther Devall, Department Head

Professors Bock, Devall, Eastman, Munson-McGee; **Associate Professors** Chavez, Montanez, Smitley, Vaillancourt; Bartley **Assistant Professors** Golem, Marin; **Emeritus Professors** Cummings, Del Campo

E. Devall, Department Head, Ph.D. (Georgia)— child and family development; S. Bartley, Ph.D. (Tennessee)— family studies; G. Blanch, Ph.D. (Claremont)— education; P. Bloomquist, Ph.D. (New Mexico State)— education management and development; M. Bock, Ph.D. (Kansas State)— foods and nutrition; M. Chavez, Ph.D. (New Mexico State)— educational management; W. Eastman, Ph.D. (Texas Woman's)— nutrition and food service systems management; E. Delgado, Ph.D. (Technical University of Berlin, Germany)— food science and technology; W. Fedio, Ph.D. (University of Alberta-Canada)— food microbiology; N. Flores, Ph.D. (Kansas State)— food science; D. Golem, Ph.D. (Rutgers)— nutritional and exercise sciences; W. Hamilton, Ed.D. (Montana State)— adult education and administration; J. Hertzman, Ph.D. (University of Nevada)— educational leadership; B. Jorgensen, Ph.D. (Virginia Tech)— family studies; S. Koukel, Ph.D. (Texas Tech)— family and consumer sciences education; K. Mandabach, Ed.D. (Houston)— higher education cultural and historical studies; M. Marin, Ph.D. (New Mexico State)— counseling and educational psychology; M. Montanez, Ph.D. (Michigan State)— psychology; S.H. Munson-McGee, Ph.D. (University of Delaware)— food processing and engineering; L. Shields, Ph.D. (New Mexico State)— educational administration; R. Smitley, Ph.D. (Texas Woman's)— clothing, textiles, and fashion merchandising; B. Stringam, Ph.D. (University of Northern Arizona)— education; K. Vaillancourt, Ph.D. (Virginia Tech)— family studies

CTFM 178. Fundamentals of Fashion

3 Credits

Survey of the fashion business from fiber to end product.

CTFM 202. Fashion Practicum

1-3 Credits (1-3)

Applied field experience in the related areas of apparel design, fashion merchandising, and textile science. May be repeated up to 3 credits.

Restricted to: CTFM majors. Restricted to Las Cruces campus only.

CTFM 270. Fashion Illustration

3 Credits (1+4P)

Human figure sketches and fashion illustration as a form of communication. Emphasis on color, proportion, cut, and fabric detail.

Prerequisites: CTFM 255, ART 110G.

CTFM 273. Concepts in Apparel Construction

3 Credits (1+4P)

Application of generalizations and principles of garment construction to varied fabrics and designs. Analysis and evaluation of apparel merchandise with emphasis on the quality of garment construction.

Restricted to: Main campus only. Restricted to CTFM, FCSE majors.

CTFM 289. Fashion Studio I

3 Credits

Applied principles in the criteria of pattern making: flat pattern and draping techniques. Projects will require three dimensional approaches in apparel design. Restricted to: CTFM majors. Restricted to Las Cruces campus only.

CTFM 300. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree. Restricted to Las Cruces campus only.

Prerequisite(s): CTFM 178; CTFM 270.

CTFM 366. Historic Fashion**3 Credits**

The study of clothing styles from 3500 BC through the 20th century. Restricted to: CTFM majors.

Prerequisite(s): CTFM 255 and CTFM 270.

CTFM 371. Textile Science**3 Credits (1+4P)**

Study of fabrics used for modern clothing, furnishings, and miscellaneous end uses. Textiles testing procedures explored.

Prerequisites: CHEM 110G or consent of instructor.

CTFM 372. Fashion Merchandising**3 Credits**

The apparel industry from designing through manufacturing and distribution to retailers.

Prerequisites: CTFM 178, and CTFM 255.

CTFM 373. Advanced Apparel Techniques**3 Credits**

This course builds upon concepts introduced in Concepts in Apparel Construction. An in-depth study of fabric selection, advanced garment construction and tailoring. New technologies applied to sewing construction will be explored. The use of computerized sewing machines will be incorporated. Restricted to CTFM majors.

Prerequisite(s): CTFM 255 and CTFM 273.

CTFM 374. The Production of Textile and Fashion Accessories**3 Credits**

The production of textiles and fashion accessories for retail. Merchandising techniques for wholesale and retail companies. Consent of Instructor required. Restricted to: CTFM majors.

Prerequisite(s): CTFM 178 and CTFM 270.

CTFM 384. Clothing for Special Needs**3 Credits**

Selection, adaptation, and design of clothing that is functional and attractive for special needs populations such as for active sportswear, the handicapped, the elderly, and various specialty populations.

Prerequisite: consent of instructor.

CTFM 402. Field Experience Marketing Training**1-3 Credits (1-3)**

Practical experience in clothing manufacturing or retailing. Supervised by resident faculty and supervisor at the work site. Report required. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: CTFM majors.

CTFM 460. Cultural Perspectives in Dress**3 Credits**

Explores the social, psychological and cultural aspects of dress and appearance which includes the relationship of dress to physical and social environments, aesthetic and personal expression and cultural ideas and values.

Prerequisite(s): CTFM 255 and CTFM 366.

CTFM 474. Fashion Promotion**3 Credits**

This class focuses on the comprehensive nature of promotion in the merchandising environment of fashion related goods. Consent of Instructor required. Restricted to: CTFM majors.

Prerequisite(s): CTFM 255 and CTFM 372.

CTFM 475. Fashion Buying**3 Credits**

Fundamental principles and procedures for successful merchandising of fashion goods, responsibilities of buyers, fashion trends, consumer demands, and merchandising arithmetic.

Prerequisites: ACCT 251, CTFM 372, and CTFM 474.

CTFM 476. Apparel Design by Draping and Pattern Drafting**3 Credits (1+4P)**

Theory and application of draping and drafting garment patterns (required lab). Consent of Instructor required. Restricted to: CTFM majors.

Prerequisite(s): CTFM 255, CTFM 270 CTFM 273, and CTFM 373.

CTFM 492. Special Problems**1-4 Credits**

Individual research study in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and a total of 6 credits toward a degree.

CTFM 571. Textile Science**3 Credits (1+4P)**

Fabrics used for modern clothing, furnishings, and miscellaneous end uses. Explores textiles testing procedures. Students enrolling in the 500-level class will be required to complete additional assignments beyond what is required for CTFM 371.

Prerequisite: CHEM 110G or consent of instructor.

CTFM 572. Fashion Merchandising**3 Credits**

Covers the apparel industry from designing through manufacturing and distribution to retailers. Students enrolling in the 500-level class will be required to complete additional assignments beyond what is required for CTFM 372.

Prerequisites: CTFM 178 and CTFM 255 or consent of instructor.

CTFM 584. Graduate Study in Clothing for Special Needs**3 Credits (1+4P)**

Graduate study in the selection, adaptation, and design of clothing that is functional and attractive for special needs populations such as active sportswear, handicapped, elderly, and various specialty populations.

Prerequisites: CTFM 472 and CTFM 476.

CTFM 598. Special Research Programs**1-4 Credits**

Individual investigations, either analytical or experimental. May be repeated for a maximum of 4 credits per semester and no more than 6 credits toward a degree.

FCS 181. Interpersonal Skills in Intimate Relationships**3 Credits**

Developing social skills within friendships, dating relationships, marriage, parenting, and families. May be repeated up to 3 credits. Restricted to Las Cruces and Dona Ana campuses.

FCS 210. Infancy and Early Childhood in the Family**3 Credits**

Research and theory relevant to prenatal development and the physical, mental, and socio-emotional development of the child from birth to age five. Attitudes, knowledge, and skills needed for working with young children and their families. Restricted to Las Cruces campus only.

FCS 211. Middle Childhood Development in the Family**3 Credits**

Research and theory relevant to the physical, mental, social, and emotional development of the child from age five to age twelve. Attitudes, knowledge, and skills related to working with school-age children in the family system. Observation in a variety of settings may be required. Restricted to Las Cruces campus only.

FCS 212. Adolescent Development and the Family**3 Credits**

Research and theory relevant to the physical, mental, social, and emotional development of the children ages 12 to 18. Attitudes, knowledge, and skills related to working with adolescents in the family system. Observation in a variety of settings may be required. Restricted to Las Cruces campus only.

FCS 213. Adult Development and Aging**3 Credits**

Research and theory related to the physical, mental, social, and emotional development of older adults. Attitudes, knowledge, and skills related to working with older adults in the family system, including normative, and nonnormative transitions. Restricted to Las Cruces campus only.

FCS 300. Special Topics**1-4 Credits**

Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

FCS 301. Personal and Family Finance**3 Credits**

Principles, processes and procedures involved in effective utilization and management of financial resources to meet the needs of individuals and/or families. Open to nonmajors.

FCS 302. Consumer Practices and Problems for Families**3 Credits**

Consumer issues related to social, political, and economic components of the larger social system. Focuses on consumer rights and responsibilities within the marketplace.

FCS 380. Family Dynamics**3 Credits**

The dynamics of family relationships and changes influencing contemporary families. Interaction between the family and other social systems will be examined. Open to nonmajors.

FCS 383. Parenting and Child Guidance**3 Credits**

Theories, principles, and skills essential for parents and professionals in guiding children within the family system. Problem prevention techniques are stressed.

FCS 424. Field Experience: Issues and Ethics**4 Credits**

Supervised work experience in community agencies providing services to family systems. Discussion of professional issues and ethical dilemmas. A total of 8 credits must be taken. Consent of instructor required. Restricted to: Main campus only. Restricted to FCS majors.

Prerequisite(s): FCS 380 or equivalent, junior standing, and an overall GPA of at least 2.5 and consent of instructor.

FCS 449V. Family Ethnicities and Subcultures**3 Credits**

Comparative study of American family subsystems with respect to selected social, economic, and cultural backgrounds. Interaction of these subsystems in American society. Differentiated assignments for graduate students.

FCS 492. Special Problems**1-4 Credits**

Individual research in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and a total of 6 credits.

FCS 510. Infancy and Early Childhood in the Family**3 Credits**

Research and theory relevant to prenatal development and the physical, mental, and socio-emotional development of the child from birth to age 5. Attitudes, knowledge, and skills needed for working with young children and their families. May be repeated up to 3 credits.

FCS 511. MIDDLE CHLDHD DEV IN FMLY**3 Credits**

Research and theory relevant to the physical, mental, and socio-emotional development of children from ages five to twelve. Attitudes, knowledge, and skills needed for working with school-age children and their families. May be repeated up to 3 credits.

FCS 512. Adolescent Development and the Family**3 Credits**

Advanced study in research and theory relevant to the physical, mental, social, and emotional development of the child, ages 12-18. Attitudes, knowledge, and skills related to working with adolescents in the family system. May be repeated up to 3 credits.

FCS 524. Supervised Practicum**1-9 Credits**

Supervised experience in organizations providing services to families and children. Course subtitled in the Schedule of Classes. May be repeated for a maximum of 9 credits. Graded S/U.

Prerequisite: consent of instructor.

FCS 525. Supervised Clinical Practice**1-9 Credits (2-18P)**

Supervised clinical experience in Marriage and Family Therapy. Includes reviews of audio, video, and/or live sessions and case presentations. Maximum of 9 credits toward a degree. May be repeated up to 20 credits.

FCS 548. Adult Development and Aging**3 Credits**

Advanced study in research and theory related to the physical, mental, social, and emotional development of older adults. Attitudes, knowledge, and skills related to working with older adults in the family system, including normative and non-normative role transitions.

FCS 549. Family Ethnicities and Subcultures**3 Credits**

Comparative study of American family subsystems with respect to selected social, economic and cultural backgrounds. Interaction of these subsystems in American society. Students responsible for all requirements for FCS 449V plus additional work.

FCS 562. The Business and Practice of Marriage and Family Therapy**1 Credit**

This seminar course will provide students with an overview of the business and practice of Marriage and Family Therapy to the end that they will understand how to develop and maintain a private practice in the field of MFT. Restricted to: FCS (MFT) majors. S/U Grading (S/U, Audit).

FCS 572. Family Dysfunction and Diagnosis**3 Credits**

A study of the development of abnormal behavior patterns and characteristics to include the major mental and personality disorders and how these can influence and impact family systems. Emphasis is on the symptomology and/or life circumstances and events described in the various diagnostic categories.

Prerequisite(s): Students must be enrolled in a clinical program (i.e. MFT, CEP, MSW).

FCS 582. Theories of Marriage and Family Therapy**2 Credits**

A balanced study of major theories, research, applications and principles of marriage and family therapy. This course will examine major therapy models and the theories they are derived from as well as the effectiveness of specific therapy models for specific mental health disorders through research. May be repeated up to 4 credits.

FCS 583. Parenting and Child Guidance**3 Credits**

Theories, principles, and skills essential for parents and professionals in guiding children within the family system. Problem prevention techniques are stressed.

FCS 584. Family Law and Ethics**3 Credits**

Study of selected aspects of federal and state laws and ethical issues as they relate to the family system.

FCS 585. The Family System**3 Credits**

Contemporary family interaction: concepts, composition, resource and environment.

FCS 586. Sexuality and Family Dynamics**3 Credits**

Psychosocial and physiological aspects of human sexuality from a life span and family systems perspective.

FCS 587. Contemporary Marriage and Family Issues**3 Credits**

Investigation of one of the following topics each semester: dual career marriages, nontraditional relationships, aged in marriage.

FCS 589. Family Crises and Rehabilitation**3 Credits**

Examination of the major crises experienced by families. Emphasis on family system functioning rather than individual functioning. Preventative measures, positive coping strategies, and therapeutic intervention approaches examined.

FCS 590. Special Topics**1-4 Credits**

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree.

FCS 592. Strategies in Family Therapy**2 Credits**

Effective intervention strategies in family therapy practice. Live and taped role plays of interventions for various family problems required. Constructive approaches for working with family systems and third-party payers. May be repeated up to 4 credits.

FCS 598. Special Research Programs**1-4 Credits**

Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree.

FCS 599. Master's Thesis**15 Credits**

Thesis

FCSC 400. Research Methods in Family and Consumer Sciences**3 Credits**

Introduction to research design and methodology in Family and Consumer Sciences. Overview of common research designs and data collection strategies. Prepares students to critique published research and perform basic skills including hypotheses development and conducting a literature search.

FCSC 500. Research Methods**3 Credits**

This course covers the critical evaluation of research literature, development of research proposals and principles of program evaluation. Students will be introduced to the application of qualitative or quantitative methods. Students will be expected to develop research questions and test hypotheses using statistical analysis and a variety of methodologies.

FCSC 598. Special Research Programs**1-4 Credits**

Individual investigations, either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree.

FCSC 599. Master's Thesis**15 Credits**

May be repeated for unlimited credit, maximum of 6 credits toward a degree.

FCSE 235. Housing and Interior Design**3 Credits**

Investigation of types of housing and factors impacting housing decisions for families. Selection, planning, and arrangement of interior components of homes to meet the needs of the family. Restricted to Las Cruces campus only.

Prerequisite(s): No prerequisites.

FCSE 245. Overview of Family and Consumer Sciences Teaching**3 Credits**

Overview of planning and teaching skills. Supervised experiences in observing and directing the learning of secondary family and consumer sciences students. Philosophy and history of the profession.

FCSE 345. Management Concepts in Family and Consumer Sciences Teaching**3 Credits**

Incorporation and application of management concepts in family and consumer sciences subject matter. Practical experience teaching management and ways to use management skills to plan, implement, and evaluate the teaching-learning transaction.

FCSE 348. Teaching in Informal Family and Consumer Sciences Settings**3 Credits**

Learning principles and theories with application in informal family and consumer sciences education situations. Includes supervised experience in use of teaching strategies.

Prerequisite: overall GPA of at least 2.5 or consent of instructor.

**FCSE 445. Career and Technical Education Programs
3 Credits**

History and development of career and technical programs. Ancillary functions of family and consumer sciences teachers, including student evaluation and leadership development for students. Experiences in extension programs and teaching. Ethical issues and concerns of educators are introduced. Lifelong leadership development and evaluation tools for educators are explored. May be repeated up to 3 credits.

**FCSE 446. Teaching Methods I for Family and Consumer Sciences
3 Credits**

Objectives, content, and organization of family and consumer sciences curriculum in high schools; materials and methods of teaching. Restricted to majors.

Prerequisite(s): FCSE 245 and FCSE 345 and an overall GPA of at least 2.5, or consent of instructor.

**FCSE 447. Teaching Methods II for Family and Consumer Sciences
3 Credits**

Planning, preparation, and strategies for teaching family and consumer sciences in the secondary schools. Preparation for employment. Restricted to majors.

Prerequisite(s): FCSE 245, FCSE 345, FCSE 445, FCSE 446 and an overall GPA of at least 2.5, or consent of instructor.

**FCSE 448. Supervised Teaching in Family and Consumer Sciences
12 Credits**

Seventy (70) days of full-time supervised teaching in selected high schools. Consent of Instructor required. Restricted to: FCSE majors.

Prerequisite(s): FCSE 446, an overall GPA of at least 2.5, and consent of instructor.

**FCSE 492. Special Problems
1-4 Credits**

Individual research study in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and 6 credits toward degree.

**FCSE 545. Graduate Study in Vocational Programs for Youth and Adults
3 Credits**

History and development of career and technical programs. Ancillary functions of family and consumer sciences teachers, including student evaluation and leadership development for students. Experiences in extension programs and teaching. Ethical issues and concerns of educators are introduced. Lifelong leadership development and evaluation tools for educators are explored. May be repeated up to 3 credits.

**FCSE 546. Graduate Study in Teaching Methods I
3 Credits**

Objectives, content, and organization of family and consumer sciences in high schools; materials and methods of teaching. Additional assignments beyond FCSE 446 required for students registering in FCSE 546.

**FCSE 547. Graduate Study in Teaching Methods II
3 Credits**

Planning, preparation, and strategies for teaching family and consumer sciences in the secondary schools. Additional assignments beyond FCSE 447 required for students registering in FCSE 547.

**FCSE 548. Graduate Study in Supervised Teaching in Family and Consumer Sciences
12 Credits**

Seventy of full-time, supervised teaching in selected schools. Additional assignments beyond FCSE 448 required for students registering in FCSE 548. Consent of Instructor required.

Prerequisite(s): FCSE 446 or FCSE 546, and consent of instructor.

**FCSE 590. Special Topics
1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. May be repeated for a maximum of 9 credits toward a degree, 4 credits per semester.

**FSTE 164G. Introduction to Food Science and Technology
4 Credits (3+2P)**

An introductory course in the scientific study of the nature and composition of foods and their behavior during all aspects of their conversion from raw materials to consumer food products.

**FSTE 175. ACES in the Hole Foods I
4 Credits**

Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products. Restricted to Las Cruces campus only.

Prerequisite(s): Students enrolled in this class must possess A Food Handler Card.

**FSTE 200. Special Topics
1-4 Credits**

Specific topics and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

**FSTE 210G. Survey of Food and Agricultural Issues
3 Credits**

Same as AG E 210G.

**FSTE 263G. Food Science I
4 Credits (3+2P)**

The scientific study of the principles involved in the preparation and evaluation of foods. May be repeated up to 4 credits.

**FSTE 275. ACES in the Hole Foods II
4 Credits**

Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products. May be repeated up to 4 credits.

Prerequisite(s): FSTE 175 and Have a Food Handler Card.

**FSTE 320. Food Microbiology
4 Credits (3+2P)**

Detrimental and beneficial microbiological aspects of food products. Methods of quantification and identification of microorganisms associated with food spoilage and preservation. May be repeated up to 4 credits.

Prerequisite(s): BIOL 111G and BIOL 111L, or BIOL 211G and BIOL 211L, or BIOL 190, or consent of instructor.

**FSTE 325. Food Analysis
3 Credits (2+2P)**

Basic chemical and physical techniques used in establishing nutritional properties and overall acceptance of food products. May be repeated up to 3 credits.

Prerequisite(s): CHEM 111 or consent of instructor.

FSTE 328. Introduction to Food Engineering**3 Credits (2+2P)**

Basic engineering principles including mass and energy balances, fluid flow, heat transfer and chemical kinetics and their application to food processing unit operations. Video and laboratory participation are used to enhance course content and relevance. May be repeated up to 3 credits.

Prerequisite(s): MATH 142G or consent of instructor.

FSTE 331. Food Preservation**3 Credits (2+2P)**

Processes used in home and commercial food preservation, including canning, freezing, drying, and irradiation. May be repeated up to 3 credits.

Prerequisite(s): HNFS 263.

FSTE 375. ACES in the Hole Foods III**4 Credits (2+8P)**

Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products. May be repeated up to 8 credits. Restricted to: FSTE majors.

Prerequisite(s): FSTE 275 and Have a Food Handler Card.

FSTE 421. Food Chemistry**3 Credits**

Comprehensive study of the chemical and physiochemical properties of food constituents. Chemical changes involved in the production, processing, and storage of food products and basic techniques used to evaluate chemical and physiochemical properties of foods.

Prerequisites: CHEM 111G, CHEM 112G, and CHEM 211, or consent of instructor.

FSTE 423. Food Processing Technologies**4 Credits (3+2P)**

Common food processing unit operations such as raw material preparation, separation, concentration, fermentation, pasteurization, sterilization, extrusion, dehydration, baking, frying, chilling, freezing, controlled atmosphere storage, water, waste and energy management, packaging, materials handling and storage and process control. Application of principles to processing food in a laboratory setting.

Prerequisite(s): FSTE 328.

FSTE 425. Sensory Evaluation of Foods**3 Credits (2+2P)**

Principles and procedures involved in the sensory evaluation of foods. Physiological, psychological and environmental factors affecting the evaluation of sensory properties. Analysis and interpretation of sensory data.

Prerequisite(s): FSTE 263G and A ST 311 or STAT 251.

FSTE 429. Product Development**3 Credits (1+4P)**

Application of chemical, physical, nutritional and psychological principles and experimental methods to the development and evaluation of a food product for a specified food product development competition.

Prerequisite(s): FSTE 320 and FSTE 425.

FSTE 430. Designing and Brewing Great Beers of the World**3 Credits (1+4P)**

The science and technology of brewing unit operations and the ingredients used in beer brewing. That knowledge is then applied to designing and brewing classic world beer styles. Styles investigated change every semester but typically include India Pale Ale, Pale Ale, Stout, Porter, Hefeweizen, Scottish Ale, and Black IPA. Comprehensive evaluation of the product relative to style guidelines completes the design-brew-evaluate cycle. Students must be at least 21 years of age on the first day of class. May be repeated up to 3 credits.

FSTE 450. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits towards a degree. Consent of instructor required.

FSTE 475. ACES in the Hole Foods IV**1-4 Credits (2-8P)**

Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products. May be repeated up to 8 credits. Restricted to: FSTE majors.

Prerequisite(s): FSTE 375 Have a Food Handler Card.

FSTE 492. Special Problems**1-4 Credits**

Individual research study in a selected subject of Family and Consumer Sciences. Maximum of 4 credits per semester and a grand total of 8 credits towards a degree. Consent of instructor required.

FSTE 500. Data Analysis for Food Scientists**3 Credits (3)**

An introduction to data analysis of food scientists. Modern statistical techniques used to analyze typical data collected by food scientists and researchers will be covered. Consent of Instructor required.

FSTE 520. Graduate Study in Food Microbiology**3 Credits (2+3P)**

Detrimental and beneficial microbiological aspects of food products.

Methods of quantification and identification of microorganisms associated with food spoilage and preservation. Additional work required at the graduate level.

Prerequisites: BIOL 111G/111L, or BIOL 211G/211L, or BIOL 190, or consent of instructor.

FSTE 521. Graduate Study in Food Chemistry**3 Credits**

Comprehensive study of the chemical and physiochemical properties of food constituents. Chemical changes involved in the production, processing and storage of food products and basic techniques used to evaluate chemical and physiochemical properties of foods. Additional work required at the graduate level.

Prerequisites: CHEM 111G, CHEM 112G, and CHEM 211, or consent of instructor.

FSTE 523. Food Processing Technologies**4 Credits (3+2P)**

Common food processing unit operations such as raw material preparation, separation, concentration, fermentation, pasteurization, sterilization, extrusion, dehydration, baking, frying, chilling, freezing, controlled atmosphere storage, water, waste and energy management, packaging, materials handling and storage and process control. Application of principles to processing food in a laboratory setting. Additional work beyond that for FSTE 423 required at the graduate level.

Prerequisite(s): FSTE 528.

FSTE 524. Sensory Evaluation of Foods**3 Credits (2+3P)**

Principles and procedures involved in the sensory evaluation of foods. Physiological, psychological and environmental factors affecting the evaluation of sensory properties. Analysis and interpretation of sensory data.

Prerequisite(s): FSTE 263G and A ST 311 or STAT 251.

FSTE 525. Graduate Study in Food Analysis**3 Credits (2+3P)**

Covers basic chemical and physical techniques used in establishing nutritional properties and overall acceptance of food products. Additional work required at the graduate level.

Prerequisite(s): CHEM 111 or consent of instructor.

FSTE 532. Designing and Brewing Great Beers of the World**3 Credits (2+2P)**

The science and technology of brewing unit operations and the ingredients used in beer brewing. That knowledge is then applied to designing and brewing classic world beer styles. Styles investigated change every semester but typically include India Pale Ale, Pale Ale, Stout, Porter, Hefeweizen, Scottish Ale, and Black IPA. Comprehensive evaluation of the product relative to style guidelines completes the design-brew-evaluate cycle. Students must be at least 21 years of age on the first day of class.

FSTE 560. Rumen Microbiology (so)**3 Credits**

Same as ANSC 560.

FSTE 575. ACES in the Hole Foods**1-4 Credits (2-8P)**

Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products. May be repeated up to 8 credits.

Prerequisite(s): Students must possess a food handler card.

FSTE 598. Special Research Programs**1-4 Credits**

Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits towards a degree. Consent of instructor required.

HNDS 201. Seminar 1- The Field of Dietetics**1 Credit**

This course will introduce students to the field experience, careers, and professions in nutrition. This course is required for students pursuing a Didactic Program in Dietetics verification statement. May be repeated up to 1 credits. Consent of Instructor required. Restricted to: HNDS majors. Restricted to Las Cruces and Dona Ana campuses.

HNDS 251. Human Nutrition**3 Credits**

Principles of normal nutrition. Relation of nutrition to health. Course contains greater amounts of chemistry and biology than HNDS 163. Open to nonmajors.

HNDS 300. Special Topics**1-4 Credits**

Specific topics and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

HNDS 350. Nutrition Throughout the Lifecycle**3 Credits**

Relationship of the stages of the human life cycle to changes in nutrient need.

Prerequisites: BIOL 254 and (HNDS 163 or HNDS 251), or consent of instructor.

HNDS 360. Food for Health**4 Credits**

This course is designed to provide students the opportunity to learn about the intersection of nutrition and health in terms of food and diet. Students will be introduced to basic concepts within nutrition education, nutrition communication, nutrition and health and food culture.

Prerequisite(s): FSTE 263; HNDS 251.

HNDS 363. Quantity Food Production and Service**6 Credits (1+10P)**

Covers quantity food production including cooking concepts, sanitation and safety, teamwork, and management responsibilities. Students will apply this knowledge developing product for sale in a student run restaurant. Proof of current ServSafe or NM Food Handler certification required. May be repeated up to 6 credits. Crosslisted with: HRTM 363.

Prerequisite(s): HRTM 263.

HNDS 401. Field Experience- Clinical Dietetics**1-8 Credits (1-8)**

Experience in various areas of clinical nutrition facilities with emphasis on nutrition care of patients. Practical experience with supervision by resident faculty as well as supervisor at work site. Performance at work site graded in accordance with university standards. May be repeated for a maximum of 8 credits. Consent of instructor required. Restricted to: Main campus only.

Prerequisite(s): HNDS 201, overall GPA of 2.5 or higher and junior or senior standing and consent of instructor.

HNDS 403. Community Nutrition**3 Credits**

Overview of the practice of community nutrition. Includes program planning, needs assessment, program implementation and program evaluation. Role of public and private agencies in nutrition programs that impact on nutrition of individuals and groups in the community.

Prerequisite: HNDS 350 or consent of instructor.

HNDS 404. Maternal, Infant and Child Nutrition**3 Credits**

Nutritional needs and status during pregnancy, infancy, childhood, and adolescence. Applications also made to preschools and day care centers.

Prerequisite: HNFS 251 or consent of instructor.

HNDS 405. Seminar II- Entering the Field of Dietetics**1 Credit**

Students will develop professional materials that will be used in their future careers including a personal statement, curriculum vitae, resume, and interview dialogues. Students will become familiar with career options in the field of dietetics and learn to navigate the processes of becoming a registered dietitian or dietetic technician, registered. Consent of Instructor required. Crosslisted with: HNDS 505. Restricted to: HNDS majors.

Prerequisite(s): Students must be enrolled in their last fall semester prior to planned graduation from the DPD program; HNDS 201, HNDS, 251, HNDS 350.

Corequisite(s): HNDS 403, HNDS 446, AND HNDS 448.

HNDS 407. Field Experience Community Nutrition**1-8 Credits**

Experience working with nutritional problems of individual families of all socioeconomic and age levels and with agencies concerned with community nutrition. Practical experience with supervision by resident faculty as well as supervisor at the work site. Performance at work site graded in accordance with university standards. May be repeated for a maximum of 8 credits. Restricted to majors.

Prerequisites: HNFS 201, overall GPA of at least 2.5 and junior or senior standing or consent of instructor.

HNDS 409. Dietetic Science Capstone**3 Credits**

This course will provide a cumulative review and assessment of the foundational knowledge, concepts, and skills presented throughout the didactic program in nutrition and dietetics to ensure readiness to proceed within the field of dietetics. Students will apply professional skills to prepare them for their future careers. Students will also be guided through the dietetic internship application process. Consent of Instructor required. Crosslisted with: HNDS 509. Restricted to: Dietetics Option majors.

Prerequisite(s): Students must be enrolled in their last spring semester prior to planned graduation from the DPD program.

HNDS 410. Sports Nutrition**3 Credits**

Role of nutrition in physical performance of competitive and recreational sports participants.

Prerequisites: BIOL 254, BCHE 341, and HNDS 251, or consent of instructor.

HNDS 420. Nutrition Counseling and Communication**3 Credits**

This course is designed to meet the needs of individuals entering the healthcare/dietetics field who have little counseling experience, but have a strong foundational knowledge in the field of dietetics. It includes counseling techniques and strategies, behavior change, interviewing, cultural competence, mass media, and nutrition education. Consent of Instructor required.

Prerequisite(s): HNDS 251, HNDS 350.

HNDS 430. Food Service Organization and Management**3 Credits**

Personnel, financial and general management in institutional and commercial food service operations.

Prerequisite: junior/senior standing or consent of instructor.

HNDS 440. Nutrition Education and Research**3 Credits**

Course will enable students to apply general education and research knowledge to the field of nutrition. Nutrition information will be applied to education topics including learning objective development, backwards design of curriculum, student centered learning and learning assessment. Crosslisted with: HNDS 540.

Prerequisite(s)/Corequisite(s): HNDS 251, 350, and 360.

HNDS 446. Diet Therapy I**3 Credits**

Special diets and physiological basis for their use. Laws and regulations concerning the practice of dietetics.

Prerequisites: BIOL 254, BCHE 341, and HNDS 251, or consent of instructor.

HNDS 446 L. Diet Therapy I Laboratory**1 Credit**

Supplements HNDS 446. Students will perform nutrition assessments, nutrition focused physical exams, apply medical nutrition therapy-based interventions and practice patient discharge education for specific disease states. Must be taken with HNDS446. Restricted to: HNDS majors.

Corequisite(s): HNDS 446.

HNDS 448. Advanced Nutrition**3 Credits**

Application of biochemistry and physiology to nutrition. Restricted to: Main campus only.

Prerequisite(s): BIOL 254, BCHE 341, and HNFS 251, or consent of instructor.

HNDS 449. Diet Therapy II**3 Credits**

Continuation of HNDS 446.

Prerequisite: HNDS 446 or consent of instructor.

HNDS 449 L. Diet Therapy II Laboratory**1 Credit**

Supplements HNDS 449. Students will apply medical nutrition therapy to specific disease states with special emphasis on writing nutrition support orders and learning to utilize nutrition support equipment. Must be taken with HNDS449. Restricted to: HNDS majors.

Corequisite(s): HNDS 449.

HNDS 450. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

HNDS 455. Billing and Coding for Dietetics**3 Credits**

This course provides students with an overview of billing and coding practices for medical nutrition therapy that ensure proper reimbursement for services. Students will learn nutrition related billing codes, apply nutrition care process terminology to documentation, and discover how policy affects current and future coverage of nutrition services. Crosslisted with: HNDS 555.

Prerequisite(s): HNDS 446, HNDS 449.

HNDS 492. Special Problems**1-4 Credits**

Individual research study in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and a total of 8 credits.

HNDS 500. Orientation to Dietetic Internship**3 Credits**

Dietetic interns prepare for supervised practice rotations. Topics include professionalism, Code of Ethics, and dietetic internship portfolios. Consent of Instructor required.

Prerequisite(s): Acceptance into Dietetic Internship program.

HNDS 501. Advanced Animal Nutrition (so)**3 Credits**

Same as ANSC 501.

Prerequisite: CHEM 211 or consent of instructor.

HNDS 507. Laboratory Techniques in Nutrition**4 Credits (2+6P)**

Methodology and experimental procedures in measuring nutrient requirements and values of diets. Same as ANSC 507.

Prerequisites: ANSC 422 and CHEM 321, or consent of instructor.

HNDS 509. Dietetic Science Capstone**3 Credits**

This course will provide a cumulative review and assessment of the foundational knowledge, concepts, and skills presented throughout the didactic program in nutrition and dietetics to ensure readiness to proceed within the field of dietetics. Students will apply professional skills to prepare them for their future careers. Students will also be guided through the dietetic internship application process. Consent of Instructor required. Crosslisted with: HNDS 409.

Prerequisite(s): Students must be enrolled in their last semester of the DPD program.

HNDS 510. Graduate Study in Sports Nutrition**3 Credits**

Role of nutrition and nutrients in physical performance of competitive and recreational sports participants. Additional work required at the graduate level.

Prerequisites: BIOL 254, BCHE 341, and HNDS 251, or consent of instructor.

HNDS 512. Research Methods in Animal Science**4 Credits**

Same as ANSC 512.

HNDS 517. Graduate Seminar**1 Credit**

Current topics. Same as ANSC 515.

Prerequisite: consent of instructor.

HNDS 522. Animal Nutrition (f)**3 Credits**

Same as ANSC 522.

Prerequisite: CHEM 211.

HNDS 530. Graduate Studies in Food Service Organization and Management**3 Credits**

Personnel, financial, and general management in institutional and commercial food service operations. Additional work required at the graduate level.

HNDS 546. Diet Therapy I**3 Credits**

Special diets and physiological basis for their use. Laws and regulations concerning the practice of dietetics. Additional assignments beyond HNFS 446 required for students registering in HNDS 546.

Prerequisites: BIOL 254, BCHE 341, and HNDS 251, or consent of instructor.

HNDS 548. Graduate Studies in Advanced Nutrition**3 Credits**

Covers biochemistry and physiology applied to nutrition. Students enrolled in the 500-level class will be required to complete additional assignments beyond what is required for HNDS 448. Restricted to: Main campus only.

Prerequisite(s): BIOL 254, BCHE 341, and HNDS 251, or consent of instructor.

HNDS 549. Diet Therapy II**3 Credits**

Continuation of HNDS 546.

Prerequisites: HNDS 546 or consent of instructor.

HNDS 551. Graduate Study in Community Nutrition**3 Credits**

Overview on the practice of community nutrition to include program planning, needs assessment, program implementation and program evaluation. Role of public and private agencies in nutrition programs that impact on nutrition of individuals and groups in the community. Additional work required at the graduate level.

Prerequisite: HNDS 350 or consent of instructor.

HNDS 560. Dietetic Intern Seminar**1 Credit**

Portfolio development for dietetic interns during supervised practice rotations. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): Acceptance into the NMSU dietetic internship.

HNDS 562. Dietetic Internship: Supervised Practice in Community Nutrition**1-8 Credits (2-6P)**

Provides dietetic interns with a minimum of 500 clock hours of supervised practice in community nutrition to include an emphasis in Cooperative Extension Service. Dietetic interns work under the the guidance of faculty and community nutrition professionals. May be repeated up to 8 credits. Consent of Instructor required. Restricted to: HNFS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

HNDS 563. Community Nutrition for Dietetic Interns**3 Credits**

Advanced topics in community nutrition to include conducting community nutrition needs assessments, program planning and grant writing. Consent of instructor required. Restricted to HNDS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

HNDS 564. Dietetic Internship: Supervised Practice in Food Service Management**1-5 Credits (2-10P)**

Provides dietetic interns with a minimum of 300 clock hours of supervised practice in foodservice management. Dietetic interns work under the guidance of faculty and foodservice management professionals. Students must complete a total of 4 credit hours of HNDS 564. May be repeated up to 5 credits. Consent of Instructor required.

Prerequisite(s): Acceptance into Dietetic Internship.

HNDS 565. Foodservice Management for Dietetic Interns**3 Credits**

Advanced topics in foodservice systems management to include business planning and marketing. Consent of Instructor required. Restricted to: HNFS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

HNDS 566. Dietetic Internship: Supervised Practice in Clinical Dietetics**1-8 Credits (2-16P)**

Provides dietetic interns with a minimum of 500 clock hours of supervised practice in clinical dietetics. Dietetic interns work under the guidance of faculty and dietetics professionals. May be repeated up to 8 credits. Consent of Instructor required.

Prerequisite(s): Acceptance into Dietetic Internship.

HNDS 567. Nutrition Care Process for Dietetic Interns**3 Credits**

Advanced topics in nutrition care process and model to include medical nutrition therapy and evidence-based research and outcomes assessment in clinical dietetics. Consent of instructor required. Restricted to HNDS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

HNDS 568. Review Course for National RD Exam**3 Credits**

Completion of dietetic internship portfolio and preparation for the national registration examination for dietitians. Consent of Instructor required.

Prerequisite(s): Acceptance into Dietetic Internship.

HNDS 590. Special Topics**1-4 Credits**

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree.

HNDS 598. Special Research Programs**1-4 Credits**

Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree.

HNDS 626. Nutrient Metabolism II: Carbohydrates, Lipids, and Energetics (se)**4 Credits**

Same as ANSC 626.

Child Advocacy Studies (CAST) - Undergraduate Minor

A minor in Child Advocacy Studies (CAST) is available. The minor requires a minimum of 18 hours of which 9 hours are specifically concentrated in the area of child advocacy at the 300 or higher level. Specific coursework requirements apply and consultation with an advisor for course requirements and scheduling is urged.

Clothing, Textiles and Fashion Merchandising - Bachelor of Science in Family and Consumer Sciences

The Clothing, Textiles and Fashion Merchandising major prepares students to achieve career goals in the diverse field of fashion merchandising and apparel design. Students are prepared with courses in fashion merchandising, marketing, retail management, textiles and apparel design. With knowledge and skills attained from the academic preparation, graduates can compete in today's fashion industry. Skills attained in garment construction, draping and flat pattern allow for additional technical and costing abilities to meet the creative environment of the fashion industry. A GPA of 2.5 or better is required to enroll in CTFM 402 Field Experience Marketing Training to complete the degree requirements.

General Education Requirements

A list of specific general education requirements is available in the department. Please check with your advisor.

Departmental Requirements

CTFM 178	Fundamentals of Fashion	3
CTFM 270	Fashion Illustration	3
CTFM 273	Concepts in Apparel Construction	3
CTFM 366	Historic Fashion	3
CTFM 371	Textile Science	3
CTFM 372	Fashion Merchandising	3
CTFM 373	Advanced Apparel Techniques	3
CTFM 374	The Production of Textile and Fashion Accessories	3
CTFM 384	Clothing for Special Needs	3
CTFM 402	Field Experience Marketing Training	1-3
CTFM 460	Cultural Perspectives in Dress	3
CTFM 474	Fashion Promotion	3
CTFM 475	Fashion Buying	3
CTFM 476	Apparel Design by Draping and Pattern Drafting	3
Select six 300 or 400 level credits from FCS, FCSE or FRMG prefixes		6

Nondepartmental Requirements

A ST 311 or STAT 251G	Statistical Applications Statistics for Business and the Behavioral Sciences	3
ACCT 222 or ACCT 221	Management Accounting Financial Accounting	3
ART 110G	Visual Concepts	3
CHEM 110G or	Principles and Applications of Chemistry	4
One general education course from the approved list		
ECON 252G	Principles of Microeconomics	3
ENGL 111G	Rhetoric and Composition	4
MATH 120	Intermediate Algebra	3
MATH 210G	Mathematics Appreciation	3
MGT 309	Human Behavior in Organizations	3
MGT 315V	Human Relations in Organizations	3
PSY 201G	Introduction to Psychology	3
SOC 101G	Introductory Sociology	3
General Education HIST Course		3
Viewing a Wider World		6
Select one from the following:		3
MKTG 303	Principles of Marketing	
MKTG 313	Retail Management	
MKTG 324	Product/Service Development	
Select one from the following:		3
AXED 201G	Effective Leadership and Communication in Agricultural Organizations	
COMM 253G	Public Speaking	
COMM 265G	Principles of Human Communication	
Select one from the following:		3

AG E 250	Technology and Communication for Business Management

ENGL 203G	Business and Professional Communication	
ENGL 211G	Writing in the Humanities and Social Sciences	
ENGL 218G	Technical and Scientific Communication	
ENGL 311G	Advanced Composition	
ENGL 318G	Advanced Technical and Professional Communication	
Electives		
Select credits in consultation with CTFM advisor to round out curriculum of 120 credits. ¹		18
Courses recommended by advisor.		
<i>Recommended Electives</i>		
MGT 332	Human Resources Management	
MGT 453	Leadership and Motivation	
MKTG 317	International Marketing	
Total Credits		128

¹ At least 48 credits must be courses labeled 300 or above. Check prerequisites before enrolling in courses.

Clothing, Textiles and Fashion Merchandising - Undergraduate Minor

A minor in Clothing, Textiles and Fashion Merchandising is available. The minor requires a minimum of 18 hours of which a minimum of 9 hours must be at the 300 or higher level. Specific coursework requirements may apply. See an advisor for course requirements and scheduling.

Culinary Science - Undergraduate Minor

A minor in Culinary Science is available. The minor requires a minimum of 18 credits of which a minimum of 9 hours must be at the 300 or higher level. Specific coursework requirements apply and depend on the student's specific major. See an advisor for course requirements and scheduling.

Family and Child Science - Bachelor of Science in Family and Consumer Sciences

This major stresses the interrelationship of individuals across the life span and the impact of social and economic factors on the family system. Graduates are prepared for professional work with social and community agencies and other programs serving families. This degree program has been deemed a CFLE-approved academic program by the National Council on Family Relations' Certified Family Life Educator

program so that you can apply through the abbreviated application process to become a CFLE upon graduation. You must work closely with an advisor. You must achieve a grade of C- or higher in your required core and minor courses, and must retake required courses with a grade lower than C-. You must have a GPA of 2.5 or higher before enrolling in

FCS 424	Field Experience: Issues and Ethics	4
FCSC 400	Research Methods in Family and Consumer Sciences	3
FCSE 348	Teaching in Informal Family and Consumer Sciences Settings	3

General Education Requirements

A list of specific general education requirements is available in the department. Please check with your advisor.

Departmental Requirements

CAST 301V	Introduction to Child Advocacy	3
CAST 302	Professional and Systems Responses to Child Maltreatment	3
CAST 303	Prevention, Trauma Informed Treatment and Advocacy	3
FCS 181	Interpersonal Skills in Intimate Relationships	3
FCS 210	Infancy and Early Childhood in the Family	3
FCS 211	Middle Childhood Development in the Family	3
FCS 212	Adolescent Development and the Family	3
FCS 213	Adult Development and Aging	3
FCS 301	Personal and Family Finance	3
FCS 302	Consumer Practices and Problems for Families	3
FCS 380	Family Dynamics	3
FCS 383	Parenting and Child Guidance	3
FCS 424	Field Experience: Issues and Ethics	4
FCS 449V	Family Ethnicities and Subcultures	3
FCSC 400	Research Methods in Family and Consumer Sciences	3
FCSE 345	Management Concepts in Family and Consumer Sciences Teaching	3
or FCSE 348	Teaching in Informal Family and Consumer Sciences Settings	
HNDS 251	Human Nutrition	3
or PHLS 150G	Personal Health and Wellness	

Minor Courses

Select 9-18 credits with the approval of an FCS advisor from a minor related to the FCS field such as CAST, C EP, ECED, GERO, PHLS, PSY, SOC, S WK and W S.	9-18
---	------

Electives

Select electives with approval of an FCS advisor sufficient to bring total to at least 120 credits. ¹	50
--	----

Total Credits	111-120
----------------------	----------------

¹ At least 48 credits must be courses labeled 300 or above.

Family and Child Science - Undergraduate Minor

A minor in Family and Child Science is available. The minor requires a minimum of 18 hours of which a minimum of 9 hours must be at the 300 or higher level. Specific coursework requirements may apply. See an advisor for course requirements and scheduling.

Family and Consumer Sciences - Master of Science

The Master of Science degree in Family and Consumer Sciences can be obtained with an emphasis in one of the following areas:

- hotel, restaurant and tourism management;
- clothing, textiles and fashion merchandising;
- family and child science (marriage and family therapy emphasis or teaching and research emphasis);
- human nutrition and dietetic sciences (dietetic internship emphasis or human nutrition emphasis);
- food science and technology;
- family and consumer sciences education;
- or general family and consumer sciences.

A minor may be taken in a variety of supporting fields that fit the particular interests of the candidate. A minimum of 30 credits (including 4-6 credits of thesis) is required under the thesis plan and is the recommended program for most students. A non-thesis plan is available that requires a minimum of 32 credits of course work with a written comprehensive examination. Both plans require a final oral examination.

Students will take 3 credits of statistics and 3 credits of research methodology at the graduate level. Students may be required to take a graduate-level technical writing course based on demonstrated writing ability in initial graduate courses. Students who do not have degrees related to their intended areas of specialization may be required to do some leveling work. Prior to the completion of 12 credits, a program advisory committee will be established to determine, with the student, the courses that will be taken for the degree work.

Family and Consumer Sciences Education - Bachelor of Science in Family and Consumer Sciences

This major prepares you to teach in middle or high school or in other settings such as the Cooperative Extension Service or community agencies. The major is an accredited education program which meets the teacher licensure requirements for the State of New Mexico. In the spring semester of the senior year, you will apply all the principles of teaching that you have learned in a semester of student teaching in a selected school. Requirements for admission to the student teaching component of the Family and Consumer Sciences Education are

1. an overall grade-point average of 2.5 or higher, and a grade-point average of 2.5 or higher in family and consumer sciences courses;
2. a C or better in all departmental courses; and
3. recommendation of the advisor.

You must have a GPA of 2.5 or higher before enrolling in the following FCSE courses:

FCSE 446	Teaching Methods I for Family and Consumer Sciences	3
FCSE 447	Teaching Methods II for Family and Consumer Sciences	3
FCSE 448	Supervised Teaching in Family and Consumer Sciences	12

Requirements

A list of specific requirements is available in the department. Please check with your advisor.

Departmental Requirements

CTFM 178	Fundamentals of Fashion	3

Food Science - Undergraduate Minor

A minor in Food Science is available. The minor requires a minimum of 18 hours of which a minimum of 9 hours must be at the 300 or higher level. Specific coursework requirements may apply. See an advisor for course requirements and scheduling.

Food Science and Technology - Bachelor of Science in Food Science and Technology

Students in this major study diverse scientific disciplines including chemistry, microbiology, nutrition and engineering. These principles from these disciplines are then applied to the industrial and practical aspects of product development, food processing, quality control/quality assurance, food preservation and sensory evaluation of foods. Background courses required in English, communication, biology, chemistry, core food science and technology. Necessary courses will cover production, preparation, analysis, safety, nutritional and aesthetic principles. This will provide students with a solid background to understand the nature, deterioration and processing of foods. These critical thinking, analytical, and application skills are necessary to translate those principles into the selection, processing, preservation, packaging, distribution and use of a safe, adequate, and high-quality food supply. Concentration areas in science, engineering and technology, culinary science and meat science allow students to focus on an area of interest.

You must achieve a grade of C- or higher in all classes with CHEM, BCHE, BIOL, FSTE and HNDS prefixes.

Requirements

Basic Science and Background Requirements

BCHE 341	Survey of Biochemistry	4
BIOL 211G	Cellular and Organismal Biology	3
BIOL 211GL	Cellular and Organismal Biology Laboratory	1
BIOL 311	General Microbiology	3
BIOL 311 L	General Microbiology Laboratory	2
CHEM 111G	General Chemistry I	4
CHEM 112G	General Chemistry II	4
CHEM 211	Organic Chemistry	4
ENGL 111G	Rhetoric and Composition	4

MATH 142G	Calculus for the Biological and Management Sciences	3
Select at least 15 credits from Humanities and Fine Arts and Social/Behavioral Sciences General Education Requirements, with at least 6 credits from each category:		15
Select 6-9 credits from Humanities and Fine Arts		
Select 6-9 credits from Social/Behavioral Sciences		
ENGL 218G	Technical and Scientific Communication	3
or ENGL 318G	Advanced Technical and Professional Communication	
A ST 311	Statistical Applications	3
or STAT 251G	Statistics for Business and the Behavioral Sciences	
Select one from the following:		3

AG E 250	Technology and Communication for Business Management	
BCIS 110	Introduction to Computerized Information Systems	
C S 110	Computer Literacy	
Select one from the following:		3
AXED 201G	Effective Leadership and Communication in Agricultural Organizations	
COMM 253G	Public Speaking	
COMM 265G	Principles of Human Communication	

Food Science and Technology Core Requirements

ANSC 262	Introduction to Meat Science	3
FSTE 164G	Introduction to Food Science and Technology	4
FSTE 210G	Survey of Food and Agricultural Issues	3
FSTE 263G	Food Science I	4
FSTE 320	Food Microbiology	4
FSTE 325	Food Analysis	3
FSTE 328	Introduction to Food Engineering	3
FSTE 331	Food Preservation	3
FSTE 421	Food Chemistry	3
FSTE 423	Food Processing Technologies	4
FSTE 425	Sensory Evaluation of Foods	3
FSTE 429	Product Development ¹	3
HNDS 251	Human Nutrition	3

Options

Select one from the following options:	19-26
Culinary Science	
Meat Science	
Science, Technology and Engineering	

Total Credits	121-128
---------------	---------

¹ FSTE majors must take FSTE 429 Product Development for 3 credits.

Option: Culinary Science

Required Courses

ANTH 360V	Food and Culture Around the World	3
HRTM 231	Safety, Sanitation and Health in the Hospitality Industry	2
HRTM 263	Food Production and Service Fundamentals	3

HRTM 307	Professional Development	1
HRTM 363	Quantity Food Production and Service	6
HRTM 408	Hospitality Internship	1
HRTM 413	Restaurant Operations Management	4
HRTM 414	International Food and Wine	3
Viewing a Wider World		3
Total Credits		26

Option: Meat Science

Required Courses

ANSC 200	Introduction to Meat Animal Production	3
ANSC 301	Animal and Carcass Evaluation	3
ANSC 351V	Agricultural Animals of the World	3
ANSC 363	Meat Technology	3
PHYS 211G	General Physics I	3
PHYS 211GL	General Physics I Laboratory	1
Viewing a Wider World		3
Total Credits		19

Option: Science, Technology and Engineering

Required Courses

FSTE 175	ACES in the Hole Foods I ²	4
FSTE 275	ACES in the Hole Foods II ²	4
FSTE 375	ACES in the Hole Foods III ²	4
FSTE 475	ACES in the Hole Foods IV ²	4
PHYS 211G	General Physics I	3
PHYS 211GL	General Physics I Laboratory	1
Select two Viewing a Wider World courses		6
Total Credits		26

² FSTE majors with the Science, Technology, and Engineering option must take FSTE 175 ACES in the Hole Foods I, FSTE 275 ACES in the Hole Foods II, FSTE 375 ACES in the Hole Foods III and FSTE 475 ACES in the Hole Foods IV for 4 credits each (a total of 16 credits).

Students are encouraged to use the elective hours to complete a minor in a related area such as chemistry, microbiology, and business. Consult an advisor for requirements.

Human Nutrition and Dietetic Sciences - Bachelor of Science in Family and Consumer Sciences

Option: Nutrition Education

This option prepares students to become nutrition educators that work within the community and public health settings. This option focuses on health and wellness, the association between nutrition and health, and teaching healthy living. Graduates from the Nutrition Education option will have learned the skills to communicate evidence-based nutrition information, provide nutrition education, and blend nutrition with other health science subjects. The job opportunities for those graduating from this program include working as a nutrition educator or nutrition assistant in county agencies, Extension Services, community nutrition programs, schools and with health organizations.

Unlike the Dietetics option, this option does **not** prepare students to pursue the credential of a Registered Dietitian.

General Education Requirements

Areas I-III are incorporated into the Nutrition Education course list below. Students are able to select the five required courses from Areas IV-V and two required courses from the Viewing a Wider World (p. 47) section in the General Requirements (p. 47) section of the catalog. Please refer to the HNDS Undergraduate Student Handbook for a list of recommended courses to choose from in order to fulfill these requirements.

Departmental Requirements

FCS 181	Interpersonal Skills in Intimate Relationships	3
FCSC 400	Research Methods in Family and Consumer Sciences	3
FCSE 245	Overview of Family and Consumer Sciences Teaching	3
FCSE 345	Management Concepts in Family and Consumer Sciences Teaching	3
FCSE 446	Teaching Methods I for Family and Consumer Sciences	3
FCSE 447	Teaching Methods II for Family and Consumer Sciences	3
FSTE 263G	Food Science I	4
FSTE 320	Food Microbiology	4
HNDS 201	Seminar 1- The Field of Dietetics	1
HNDS 251	Human Nutrition	3
HNDS 350	Nutrition Throughout the Lifecycle	3
HNDS 363	Quantity Food Production and Service	6
HNDS 403	Community Nutrition	3
HNDS 407	Field Experience Community Nutrition	1-8
HNDS 420	Nutrition Counseling and Communication	3
HRTM 263	Food Production and Service Fundamentals	3

Nondepartmental Requirements

ENGL 111G	Rhetoric and Composition	4
Select one from the following:		3
ENGL 203G	Business and Professional Communication	
ENGL 218G	Technical and Scientific Communication	
ENGL 318G	Advanced Technical and Professional Communication	
Select one from the following:		3
AXED 201G	Effective Leadership and Communication in Agricultural Organizations	
COMM 253G	Public Speaking	
COMM 265G	Principles of Human Communication	
MATH 121G or MATH 142G	College Algebra or Calculus for the Biological and Management Sciences	3
BIOL 111G	Natural History of Life	3
BIOL 111GL	Natural History of Life Laboratory	1
PSY 201G	Introduction to Psychology	3
CHEM 111G	General Chemistry I	4
BIOL 225	Human Anatomy and Physiology I	4

BIOL 226	Human Anatomy and Physiology II	4
PHLS 150G	Personal Health and Wellness	3
PHLS 275	Foundations of Health Education	3
PHLS 395	Foundations of Public Health	3
PHLS 459	Infectious and Noninfectious Disease Prevention	3
PHLS 461	Health Disparities: Determinants and Interventions	3
PHLS 464V	Cross-Cultural Aspects of Health	3
RDG 414	Content Area Literacy	3
Total Credits		102-109

Viewing a Wider World

Refer to the "List of Recommended GE courses" for HNDS students in the HNDS Undergraduate Student Handbook for a list of field-related course options that can be selected from the GE Core Curriculum and Viewing a Wider World course requirements.

Option: Pre-Dietetics/Dietetics

The Dietetics option prepares students to become registered dietitians (RD) and dietetic technicians, registered (DTR). This option encompasses nutritional science, clinical dietetics, community nutrition, food science and food service management.

All students enrolled in this option begin as Pre-Dietetics students. **All Pre-Dietetics students are required to apply for admission into the Dietetics option in the fall semester of their junior year as indicated on the Pre-Dietetics/Dietetics road map.** Please refer to the HNDS Undergraduate Student Handbook for information on the admissions criteria, application instructions, and the application process. Pre-Dietetic students are termed Dietetic students upon formal notification of admission into the Dietetics program.

The Dietetics option is a Didactic Program in Dietetics (DPD) that is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). This option enables graduates to continue pursuing the credentials of a registered dietitian (RD). Becoming an RD is currently a three-step process:

1. Successfully complete an ACEND-accredited DPD program (e.g. the NMSU Dietetics Option), earn a degree and a verification statement
 - a. The verification statement ensures eligibility to apply to the next step.
2. Successfully complete an ACEND-accredited Dietetic Internship (DI) program, earn another verification statement.
 - a. This 2nd verification statement ensures eligibility to begin the next step.
3. Pass the Commission on Dietetic Registration (CDR) registration exam.

General Education Requirements

Areas I-III are incorporated into the Pre-Dietetics/Dietetics course list below. Students are able to select the five required courses from Areas IV-V and two required courses from the Viewing a Wider World (<http://catalogs.nmsu.edu/nmsu/general-information/general-education-courses>) section as stated in the General Requirements (<http://catalogs.nmsu.edu/nmsu/general-information/general-education-courses>) section of the catalog. Please refer to the HNDS Undergraduate

Student Handbook for a list of recommended courses to choose from in order to fulfill these requirements.

Departmental Requirements

FCSE 348	Teaching in Informal Family and Consumer Sciences Settings	3
FSTE 263G	Food Science I	4
FSTE 320	Food Microbiology	4
FSTE 425	Sensory Evaluation of Foods	3
or		
other upper division FSTE

Viewing a Wider World

Refer to the "List of Recommended GE courses" for HNDS students in the HNDS Undergraduate Student Handbook for a list of field-related course options that can be selected from the GE Core Curriculum and Viewing a Wider World course requirements.

<http://aces.nmsu.edu/academics/FCS/documents/hnds-dietetics-option-road-map-2016-2017.pdf>

<http://aces.nmsu.edu/academics/FCS/documents/hnds-nutrition-education-option-road-map-2016-2017.pdf>

Nutrition - Undergraduate Minor

A minor in Nutrition is available. The minor requires a minimum of 18 hours of which a minimum of 9 hours must be at the 300 or higher level. Specific coursework requirements may apply. See an advisor for course requirements and scheduling.

Fish, Wildlife and Conservation Ecology

Undergraduate Program Information

The Department of Fish, Wildlife and Conservation Ecology prepares you for careers in a variety of natural resource fields related to the management of wild animal populations and the natural systems they share. Within the major you are offered two options.

- The Wildlife Ecology and Management Option is for students who plan to focus on terrestrial organisms, and
- The Aquatic Ecology and Management Option is for students who want to focus on fish and aquatic organisms.

To graduate, an overall grade point average of 2.0 is required in courses taken in the major field and in all courses taken at NMSU. The department offers a minor in Wildlife Science for students majoring in other disciplines. The minor includes a minimum of 18 credit hours.

Graduate Program Information

The Department of Fish, Wildlife and Conservation Ecology (FWCE) offers graduate work leading to the Master of Science degree with a major in Fish, Wildlife and Conservation Ecology. Faculty members in the department also may advise Ph.D. candidates through the graduate program in the Department of Biology, Department of Animal and Range Sciences, Department of Plant and Environmental Sciences, as well as

other Ph.D. granting departments. For additional information please see the graduate catalog entries for the respective departments.

Minimum qualifications for admission to the graduate program include the following:

- 3.0 grade-point average in the last two years of undergraduate work
- Students who are most competitive for admission are those with a combined average GRE score greater than 70th percentile on the verbal and quantitative parts of the GRE.
- Course work in zoology, botany and animal ecology and a basic appreciation of sustainable use of natural resources, with supporting courses in mathematics, chemistry, physics and written and oral communication.

Applicants should submit a written composition of approximately 350 words that indicates the applicant's reasons for pursuing advanced study, explains personal and educational goals, and any additional experiences (e.g., military or career) or skills that might provide a foundation for graduate study. Applicants should submit three letters of recommendation (it is preferred that at least two letters come from university instructors) along with official GRE scores (the department code is 0115). Applicants should also contact a faculty member in the department that they would like to work with as an advisor, and that faculty member needs to agree to serve as the student's advisor. Application forms, application fee and transcripts, GRE scores, letters of recommendation and letter of application should be submitted online to the Graduate School. Successful applicants will be selected from those who meet the criteria of grade-point average, GRE scores, and educational background described above and who appear to have professional promise as indicated by personal history and written references.

For the Master of Science degree, a minimum of 30 semester credits of graduate work in the major and related subjects is required, together with a thesis for most students. Of these credits, at least 15 must be in courses numbered 500 or above, and at least 15 must be for courses with the FWCE prefix. Those programs involving a thesis or research project include 4 to 6 credits of research (FWCE 598 Special Research Programs or FWCE 599 Master's Thesis). Students electing a minor in FWCE are required to take at least 9 credits in the minor field. A nonthesis option is available to some students, depending on prior training and experience, and subject to approval by the advisor and department head.

All students in the program must complete the following requirements:

- A ST 505 Statistical Inference I or equivalent
- One semester of Graduate Seminar (FWCE 515 Graduate Seminar - may be repeated for credit)
- A minimum of 3 additional credits from the Quantitative Methods category in addition to A ST 505 Statistical Inference I (eligible courses listed below)
- One course each from the Ecological Concepts, Organismal Biology and Ecological Techniques categories (eligible courses listed below)
- 4 to 9 credits from the Independent Study category (eligible courses listed below)

In addition, a student may petition to have up to 3 credits of special topics courses (FWCE 548 Graduate Problems) to apply to one of the three areas. Courses other than those listed may be acceptable, given permission by the student's supervisory committee

Degrees for the Department

Conservation Ecology - Bachelor of Science in Conservation Ecology (p. 139)

Fisheries and Wildlife Science - Bachelor of Science in Fish, Wildlife and Conservation Ecology (p. 141)

Fish, Wildlife and Conservation Ecology - Master of Science (p. 143)

Minors for the Department

Conservation Ecology - Undergraduate Minor (p. 140)

Wildlife Science - Undergraduate Minor (p. 144)

Professor, Kathryn E. Stoner, Department Head

Professors Boeing, Caldwell, Cowley, Desmond, Roemer; **Associate Professor** Cain; **Assistant Professor** Gebreselassie; **College Associate Professors** Boykin, Frey, Sallenave

K.E. Stoner – Department Head, Ph.D. (University of Kansas) – ecology and conservation of neotropical mammals; W.J. Boeing, Ph.D. (Louisiana State University) – aquatic ecology; K.G. Boykin, Ph.D. (New Mexico State University) – spatial ecology and conservation; J. W. Cain, Ph.D. (University of Arizona) – large mammal ecology, conservation and management; C. A. Caldwell, Ph.D. (University of Tennessee) – fish biology; D. E. Cowley, Ph.D. (University of Wisconsin-Madison) – fish conservation genetics; M.J. Desmond, Ph.D. (University of Nebraska) – avian ecology and conservation; J.K. Frey, Ph.D. (University of New Mexico) – ecology and conservation of mammals; F.A. Gebreselassie, Ph.D. (University of Bern Switzerland) – Capture-recapture models, Integrated population models; G. W. Roemer, Ph.D. (UCLA) – behavioral, population and community ecology and conservation biology; R. Sallenave, Ph.D. (University of Guelph) – aquatic benthic ecology, outreach, education.

FWCE 109. Contemporary Issues in Wildlife and Natural Resources Management

3 Credits

Ecological, socioeconomic, and political issues surrounding the management of our natural resources with an emphasis on fish and wildlife resources. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

FWCE 110. Introduction to Natural Resources Management

4 Credits (3+2P)
This class covers historical and current issues affecting the management of renewable natural resources with an emphasis on water, soil, rangeland, forest, fish, and wildlife resources. An emphasis is placed on the scientific method and critical thinking. In the laboratory students collect and analyze field data on topics covered above and write up each unit as a laboratory report. May be repeated up to 4 credits.

FWCE 255. Principles of Fish and Wildlife Management

3 Credits
Basic principles of fish and wildlife management including history, ecology, economics, and policy. Emphasis on wildlife and fisheries. Uses an ecosystem approach integrating living and nonliving resources.
Prerequisite(s): FWCE 110.

FWCE 301. Wildlife Ecology

3 Credits

General ecological theory with emphasis on concepts including biogeography, species interactions, population dynamics and disease ecology as they relate to the management and conservation of vertebrates.

Prerequisite(s): BIOL 111G or BIOL 190.

FWCE 330. Natural History of the Vertebrates

4 Credits (3+3P)

Evolution, ecology, and diversity of vertebrates. Topics include comparative anatomy and physiology, biogeography, community ecology, behavior, and conservation. Laboratory emphasizes identification of local taxa. Field trips may be required.

Prerequisite(s)/Corequisite(s): BIOL 322 Zoology. Prerequisite(s): BIOL 111G and BIOL 111L.

FWCE 355. Wildlife Techniques and Analysis

4 Credits (3+2P)

FWCE 355 will provide a broad overview of basic skills and techniques that are commonly used by biologists in performing management, research, and reporting functions in natural resource fields with an emphasis on wildlife techniques, data processing and analysis.

Prerequisite(s): FWCE 301, A ST 311.

FWCE 357. Fisheries Management and Analysis

4 Credits (3+2P)

Lectures and laboratory exercises provide a broad overview of basic skills and techniques used for assessing and managing fish populations.

Prerequisite(s): FWCE 301 and A ST 311.

FWCE 391. Internship

1-3 Credits (1-3)

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 3 credits toward a degree. Consent of Instructor required. S/U Grading (S/U, Audit).
Prerequisite(s): Consent of instructor.

FWCE 393. Professional Experience and Communication

3 Credits

Professional work experience under the supervision of employer and/or a faculty member. Written report and presentation is required.

Prerequisite(s)/Corequisite(s): FWCE 255.

FWCE 402. Seminar in Natural Resource Management

1 Credit

Review of current topics in natural resource management. Oral and written report required.

Prerequisite: senior standing or above.

FWCE 409. Introduction to Population Ecology

3 Credits

Quantitative analysis of vital statistics and mechanisms affecting dynamics of wild populations. Patterns of growth, age structure, survival, and natality. Population theories and life tables. May be repeated up to 3 credits.

Prerequisite(s): MATH 142G and FWCE 255.

FWCE 430. Avian Field Ecology

4 Credits (3+3P)

Principles of avian ecology and management with an emphasis on taxonomy, physiology, behavior and field studies. Includes weekly field trips focusing on identification and behavior of Southwest birds. Pre/
Corequisite(s): FWCE 330.

FWCE 431. Mammalogy**4 Credits (3+2P)**

Classification, identification, anatomy, physiology, life history, and ecology of mammals. Field trips required. May be repeated up to 4 credits.

Prerequisite(s): FWCE 255 and FWCE 330.

FWCE 432. Environmental Biology of Fishes**4 Credits (3+3P)**

What makes a fish, a fish. Mechanisms of circulation, gas exchange, osmotic and ionic regulation, swimming, migration, reproduction, and chemoreception. Taught with FWCE 532.

Prerequisite(s): CHEM 111G and senior standing.

FWCE 433. Fisheries Management**3 Credits**

This course is designed to introduce students to the basic principles of fisheries management. Students will learn the techniques and tools used to collect, analyze, and interpret fisheries data needed to undertake fisheries management decisions. Taught with FWCE 533. Consent of Instructor required.

Prerequisite(s): FWCE 482 and A ST 311.

FWCE 434. Aquatic Contaminants and Toxicology**4 Credits (3+3P)**

Basic principles and methodologies of aquatic toxicity testing. Routes of exposure and modes of action. Environmental legislation and ecological risk assessment. Taught with FWCE 534. Crosslisted with: E S434.

Prerequisite(s): CHEM 111G and senior standing.

FWCE 436. Large Mammal Ecology, Conservation and Management**3 Credits**

This course will cover aspects of large mammal ecology, management and conservation. Will include aspects of foraging ecology, resource and habitat selection, competition and resource partitioning, predation and population dynamics. Taught with FWCE 530. Consent of Instructor required.

FWCE 437. Wildlife Damage Management**3 Credits**

Introduction to basic need and appropriate methods for resolving human-wildlife conflicts and management of animal damage. Socioeconomic, ecological, and political factors. Field trips required. Taught with FWCE 537.

Prerequisite(s): BIOL 111G, FWCE 255, FWCE 301, FWCE 409.

FWCE 439. Game Bird Ecology and Management**3 Credits**

In this class we will look at the overall history of game bird management and conservation, how management and conservation of game birds was and still is the foundation for wildlife conservation in North America, define the challenges both past and present to managing and conserving game bird populations, and explore the conceptual and quantitative models used to manage migratory and non-migratory game birds. Taught with FWCE 539. Consent of Instructor required. Restricted to: FISH, WLSC majors.

Prerequisite(s): FWCE 301, FWCE 409, A ST 311 or equivalent.

FWCE 440. Wildlife Habitat Relationships**3 Credits**

The study of wildlife-habitat relationships primarily seeks to describe how the distribution and abundance of resources used for food, cover and security, and constraints on the use of these resources influence the distribution of animals. This course will cover aspects of animal behavior related to how animals select habitat, theoretical models of habitat selection, the influence of inter- and intra-specific interactions on habitat selection, habitat quality, study designs for wildlife-habitat studies, modeling habitat selection and data analyses. Taught with FWCE 540. Consent of Instructor required. Restricted to: FWCE majors.

FWCE 447. Wildlife Law and Policy**3 Credits**

Introduction to state and federal laws and policies for wildlife and the historical context for their development. Taught with FWCE 547.

Prerequisite(s): Junior or Senior level standing.

FWCE 448. Problems**1-3 Credits (1-3)**

Individual investigations in fishery or wildlife science. Maximum 3 credits per semester and a grand total of 6 credits. Consent of instructor required.

Prerequisite(s): 18 credits in FWCE.

FWCE 450. Special Topics**1-4 Credits (1-4)**

Specific subjects and credits as announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits. Consent of instructor required.

FWCE 457. Ecological Biometry**3 Credits**

Use of ecological data to test scientific hypotheses. Stochastic and statistical models for environmental data, data visualization, likelihood-based and information-based model selection. Emphasis on open-source software tools.

Prerequisite(s): MATH 142G or 191G, A ST 311, FWCE 301.

FWCE 459. Aquatic Ecology**4 Credits**

Ecological functions of plant and animal communities in aquatic ecosystems with emphasis on chemical and physical properties, productivity, species interactions, population dynamics, and concepts for diagnosing problems and restoring aquatic ecosystems. Taught with FWCE 559.

Prerequisite(s): FWCE 301 or BIOL 301, CHEM 112, MATH 142G.

FWCE 464. Management of Aquatic and Terrestrial Ecosystems**4 Credits (3+2P)**

Principles and methods for managing aquatic and terrestrial ecosystems and their fish and wildlife resources. Emphasis on quantitative techniques, data collection and analysis for management of systems at a landscape spatial scale. May be repeated up to 4 credits.

Prerequisite(s): (BIOL 301 or FWCE 301) FWCE 330, A ST 311G.

FWCE 467. Herpetology**4 Credits**

Systematics, taxonomy, ecology, behavior, and conservation of amphibians and reptiles. Field trips required. Taught with FWCE 567.

Prerequisite(s): FWCE 330.

FWCE 471. GIS for Natural Resource Scientists**4 Credits**

Practical GIS class for students with little or no GIS experience. Class focuses on learning to use industry-standard software and applications in natural resource management. Taught with FWCE 571.

FWCE 472. Wildlife Museum Internship**1-4 Credits (1-4)**

Substantial directed work experience in various functions of the wildlife natural history museum developed by the student in consultation with the faculty curator. Internships may involve aspects of collection development and management, public education programs, or other related museum activities. Internship must be approved by the faculty curator. May be repeated up to 9 credits. Consent of Instructor required.

Prerequisite(s): BIOL 111G and BIOL 111GL.

FWCE 473. NAT HIST MUSEUM FUNCTION MTHDS**3 Credits**

Fundamentals of the function and methods of natural history museums in research, education, service, and biodiversity conservation. Emphasis on experiential learning. Includes lectures, paper discussions, laboratory activities, specimen preparation, required full-day Friday field trips, and an individual term project.

Prerequisite(s): FWCE 330 or BIOL 322 or BIOL 312 or RGSC 316.

FWCE 482. Ichthyology**4 Credits (3+2P)**

Classification, morphology, identification, life history, and ecology of fishes. May be repeated up to 4 credits.

Prerequisite(s): FWCE 330 or consent of instructor.

FWCE 509. Population Ecology (s)**3 Credits (2+2P)**

Quantitative analysis of vital statistics and mechanisms promoting stability in wild populations. Theory and application of life tables and population models.

FWCE 515. Graduate Seminar**1 Credit**

Current topics. May be repeated up to 4 credits.

FWCE 530. Large Mammal Ecology, Conservation and Management**3 Credits**

This course will cover aspects of large mammal ecology, management and conservation. Will include aspects of foraging ecology, resource and habitat selection, competition and resource partitioning, predation and population dynamics. Taught with FWCE 436.

FWCE 532. Environmental Biology of Fishes**4 Credits (3+3P)**

What makes a fish a fish. Mechanisms of circulation, gas exchange, osmotic and ionic regulation, swimming, migration, reproduction, and chemoreception. Students are responsible for all requirements for FWCE 432 plus additional work.

FWCE 533. Fisheries Management**3 Credits**

This course is designed to introduce students to the basic principles of fisheries management. Students will learn the techniques and tools used to collect, analyze, and interpret fisheries data needed to undertake fisheries management decisions. Taught with FWCE 433. Consent of Instructor required.

Prerequisite(s): FWCE 482, A ST 311.

FWCE 534. Aquatic Contaminants and Toxicology**4 Credits (3+3P)**

Basic principles and methodologies of aquatic toxicity testing. Routes of exposure and modes of action. Environmental legislation and ecological risk assessment. Students are responsible for all requirements for FWCE 434 plus additional work.

FWCE 535. Special Topics**1-4 Credits (1-4)**

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

FWCE 536. Advanced Avian Ecology**3 Credits**

Focuses on current topics and literature in avian ecology including systematics, mating systems, behavior, physiology, movement patterns and conservation. Includes required overnight field trips.

Prerequisite(s): Graduate standing or consent of instructor.

FWCE 537. Wildlife Damage Management**3 Credits**

Introduction to basic need and appropriate methods for resolving human-wildlife conflicts and management of animal damage. Socioeconomic, ecological, and political factors. Field trips required. Taught with FWCE 437. Students are responsible for all requirements for FWCE 437 plus additional work.

Prerequisite(s): FWCE 409.

FWCE 539. Game Bird Ecology and Management**3 Credits**

In this class we will look at the overall history of game bird management and conservation, how management and conservation of game birds was and still is the foundation for wildlife conservation in North America, define the challenges both past and present to managing and conserving game bird populations, and explore the conceptual and quantitative models used to manage migratory and non-migratory game birds. Taught with FWCE 439. Restricted to: FISH, WLSC majors.

Prerequisite(s): FWCE 301, FWCE 409, A ST 311 or equivalent.

FWCE 540. Wildlife Habitat Relationships**3 Credits**

The study of wildlife-habitat relationships primarily seeks to describe how the distribution and abundance of resources used for food, cover and security, and constraints on the use of these resources influence the distribution of animals. This course will cover aspects of animal behavior related to how animals select habitat, theoretical models of habitat selection, the influence of inter- and intra-specific interactions on habitat selection, habitat quality, study designs for wildlife-habitat studies, modeling habitat selection and data analyses. Taught with FWCE 440. Restricted to: WLSC majors.

FWCE 547. Wildlife Law and Policy**3 Credits**

Introduction to state and federal laws and policies for wildlife and the historical context for their development. Taught with FWCE 447.

FWCE 548. Graduate Problems**1-3 Credits (1-3)**

Individual studies in fishery and wildlife sciences. Maximum of 3 credits per semester. No more than 6 credits of this course and FWCE 598, combined, toward a degree. May be repeated up to 6 credits.

FWCE 558. Nonthesis Project**1-6 Credits (1-6)**

Independent study to satisfy nonthesis project requirement. Maximum of 6 credits toward degree. Available only to nonthesis students.

FWCE 559. Aquatic Ecology**4 Credits**

Ecological functions of plant and animal communities in aquatic ecosystems with emphasis on chemical and physical properties, productivity, species interactions, population dynamics, and concepts for diagnosing problems and restoring aquatic ecosystems. Taught with FWCE 459.

Prerequisite(s): FWCE 301 or BIOL 301, CHEM 112, MATH 142G.

FWCE 567. Herpetology**4 Credits**

Systematics, taxonomy, ecology, behavior and conservation of amphibians and reptiles. Field trips required. Taught with FWCE 467.

FWCE 571. GIS for Natural Resource Scientists**4 Credits**

Practical GIS class for students with little or no GIS experience. Class focuses on learning to use industry-standard software and applications in natural resource management. Taught with FWCE 471.

FWCE 582. Ichthyology**4 Credits**

Classification, morphology, identification, life history, and ecology of fishes. Taught with FWCE 482.

FWCE 598. Special Research Programs**1-3 Credits (1-3)**

Individual investigations, either analytical or experimental. Maximum of 3 credits per semester. No more than 6 credits of this course and FWCE 548, combined, toward a degree. Not available to students in the nonthesis program.

FWCE 599. Master's Thesis**1-9 Credits (1-9)**

Thesis. May be repeated up to 30 credits. Thesis/Dissertation Grading.

Conservation Ecology - Bachelor of Science in Conservation Ecology

Co-directors of the Program:

Regents Professor, Michelle K. Nishiguchi, Department Head, Biology

Professor, Kathryn E. Stoner, Department Head, Fish, Wildlife and Conservation Ecology

Professors Boecklen, Boeing, Caldwell, Cowley, Desmond, Hanley, Houde, Milligan, Nishiguchi, Roemer, G.Smith, Wright; **Associate Professors** Bailey, Cain, Mabry; **Assistant Professor** Ferrenberg.

New Mexico State University offers an interdisciplinary, undergraduate program in Conservation Ecology. The goal of this program is to train biologists for the current and future challenges that we face in the conservation and wise use of our Earth's natural resources. An overriding principle of the program is to provide a solid foundation in basic science coupled with a practical approach towards sustainability and stewardship. The curriculum encompasses several disciplines

and includes a wide variety of courses from Biology, Fish, Wildlife and Conservation Ecology, Geography and Range Science.

The educational experience will provide students with an overview of global biodiversity and an understanding of the ecological and evolutionary processes that have created and sustained it. Courses in population and community ecology coupled with population viability analysis and risk assessment will give students the necessary background to understand the theory and development of these fields as well as the tools to tackle real-world problems. Courses in basic genetics, evolution, and conservation genetics will expose students to the importance of conserving genetic variation in order to maintain adaptive potential within populations, thereby sustaining the evolutionary process. Students will also receive background on wildlife law and environmental policy, information vital for assisting governing bodies in making decisions regarding the protection and wise use of our natural resources. Skills obtained in the application of geographic information systems, molecular genetics, and professional communication can also be acquired through various electives. In sum, we seek to provide undergraduate students with an education that will allow them the opportunity to contribute to the conservation of all life on Earth.

The requirements are listed below. In addition each required course must be passed with a grade of C- or better.

New Mexico and University Requirements

<i>Area I: Communications</i>		
ENGL 111G	Rhetoric and Composition	4
ENGL 218G or ENGL 318G	Technical and Scientific Communication Advanced Technical and Professional Communication	3
Select one from the following:		3
AXED 201G	Effective Leadership and Communication in Agricultural Organizations	
COMM 253G	Public Speaking	
COMM 265G	Principles of Human Communication	
<i>Area II: Mathematics</i>		
MATH 121G	College Algebra	3
<i>Area III: Science, with Laboratory</i>		
Select one from the following groups:		8
<i>Group 1:</i>		
BIOL 111G & 111GL	Natural History of Life and Natural History of Life Laboratory	
<i>Group 2:</i>		
PHYS 211G & 211GL	General Physics I and General Physics I Laboratory	
PHYS 212G & 212GL	General Physics II and General Physics II Laboratory	
<i>Group 3:</i>		
PHYS 221G & 221GL	General Physics for Life Sciences I and Laboratory to General Physics for Life Science I	
PHYS 222G & 222GL	General Physics for Life Sciences II and Laboratory to General Physics for Life Sciences II	

Select a total of 15 combined credits from Areas IV and V, with at least 9 credits in one of the two areas: ¹ 15

Area IV: Social Behavioral Sciences: Select 6-9 credits including one from the following:

ECON 201G	Introduction to Economics	
ECON 251G	Principles of Macroeconomics	
ECON 252G	Principles of Microeconomics	

Area V: Humanities and Fine Arts: Select 6-9 credits ¹

Viewing a Wider World

Select 6 credits from Viewing a Wider World courses ² 6

Core Curriculum

A ST 311	Statistical Applications	3
CHEM 111G	General Chemistry I	4
CHEM 112G	General Chemistry II	4
CHEM 211	Organic Chemistry	4
ECON 337V	Natural Resource Economics	3

Physiology

Select 3-4 credits from the following: 3-4

ANSC 370	Anatomy and Physiology of Farm Animals	
BIOL 314	Plant Physiology	
BIOL 354 & 354 L	Physiology of Humans and Laboratory of Human Physiology	
BIOL 381	Animal Physiology	
FWCE 432	Environmental Biology of Fishes	

Major Requirements

BIOL 111G & 111GL	Natural History of Life and Natural History of Life Laboratory	4
BIOL 211G & 211GL	Cellular and Organismal Biology and Cellular and Organismal Biology Laboratory	4
BIOL 301 or FWCE 301	Principles of Ecology Wildlife Ecology	3

GEOL 111G	Introductory to Geology	
GEOL 295	Environmental Geology	
GEOL 424	Soil Chemistry	
GOVT 378	U.S.-Mexico Border Politics	
RGSC 318	Watershed Management	
RGSC 325	Rangeland Restoration Ecology	
RGSC 452	Vegetation Measurements for Rangeland Assessment	

Total Credits 134-138

¹ Areas IV and V are linked. You have to take a total of 15 credits between these two areas, for example, either 9 credits in Area IV and 6 credits in Area V or vice versa. See Required Courses (p. 47) section.

² 3 credits can be taken inside the College of ACES, but 3 credits must also be taken outside the College of ACES or 9 credits can be taken within a single department (e.g. Biology) that is outside the College of ACES.

Conservation Ecology - Undergraduate Minor

A minor in Conservation Ecology is available for students who choose to major in other areas, but wish to include Conservation Ecology in their academic training. The minor must include a minimum of 20 credits in the discipline with 9 of these coming from upper-division courses.

Requirements

Core Curriculum

Select 14 credits from the following: 14

BIOL 111G & 111GL	Natural History of Life and Natural History of Life Laboratory	
BIOL 301 or FWCE 301	Principles of Ecology Wildlife Ecology	
BIOL 462	Conservation Biology	
FWCE 330	Natural History of the Vertebrates	
Electives		
Select 6 credits from the following:		6
FWCE 447	Wildlife Law and Policy	
ECON 337V	Natural Resource Economics	
ECON 384V	Water Resource Economics	
HORT 302V	Forestry and Society	
BIOL 322	Zoology	
BIOL 408	Ecology of Plants	
BIOL 465	Invertebrate Zoology	
BIOL 467	Evolution	
BIOL 488	Principles of Conservation Genetics	
FWCE 409	Introduction to Population Ecology	
FWCE 464	Management of Aquatic and Terrestrial Ecosystems	
Total Credits		20

Fisheries and Wildlife Science - Bachelor of Science in Fish, Wildlife and Conservation Ecology

The Department of Fish, Wildlife and Conservation Ecology prepares you for careers in a variety of natural resource fields related to the management of wild animal populations and the natural systems they share. Within the major you are offered two options.

- The Wildlife Ecology and Management Option is for students who plan to focus on terrestrial organisms, and
- The Aquatic Ecology and Management Option is for students who want to focus on fish and aquatic organisms.

To graduate, an overall grade point average of 2.0 is required in courses taken in the major field and in all courses taken at NMSU. The department offers a minor in Wildlife Science for students majoring in other disciplines. The minor includes a minimum of 18 credit hours.

New Mexico and University Requirements

Select 3-4 credits from the following:		3-4
FWCE 432	Environmental Biology of Fishes	
ANSC 370	Anatomy and Physiology of Farm Animals	
BIOL 381	Animal Physiology	
Program Option		
Aquatic Ecology and Management or Wildlife Ecology and Management Option ⁵		17-20
Additional Electives		
Select additional credits so the total adds up to at least 128 credits including 55 credits 300- and 400-level classes.		
Total Credits		133-140

- ¹ Areas IV and V are linked. You have to take a total of 15 credits between these two areas, for example, either 9 credits in Area IV and 6 credits in Area V or vice versa. See Required Courses (p. 47) section.
- ² 3 credits can be taken inside the College of ACES, but 3 credits must also be taken outside the College of ACES or 9 credits can be taken within a single department (e.g. Biology) that is outside the College of ACES. See Viewing a Wider World (p. 47) section.
- ³ Students intending to pursue graduate studies should also take CHEM 211 Organic Chemistry.
- ⁴ Off campus students can take FWCE 109 Contemporary Issues in Wildlife and Natural Resources Management Distance Education.
- ⁵ Students Must Declare One of the Two Options. A maximum of 3 credits of FWCE 448 Problems can count towards the Option. More credits can be taken towards the degree.

Option: Aquatic Ecology and Management

Techniques		
FWCE 357	Fisheries Management and Analysis	4
Management		
Select 3-4 credits from the following:		3-4
FWCE 434	Aquatic Contaminants and Toxicology	
FWCE 459	Aquatic Ecology	
RGSC 318	Watershed Management	
Organismal Biology		
Select 3-4 credits from the following: ⁶		3-4
BIOL 465	Invertebrate Zoology	4
EPWS 462	Parasitology	
FWCE 467	Herpetology	
FWCE 482	Ichthyology	
Wildlife Ecology and Management Electives		
Select 3-4 credits from the following:		3-4
ACES 111	Freshman Orientation	
FWCE 448	Problems	
FWCE 450	Special Topics	

FWCE 471	GIS for Natural Resource Scientists	
FWCE 472	Wildlife Museum Internship	
Total Credits		17-20

- ⁶ At least one course chosen must be a vertebrate taxonomy course with FWCE prefix, i.e., one of FWCE 467 Herpetology or FWCE 482 Ichthyology.

Option: Wildlife Ecology and Management

Techniques		
FWCE 355	Wildlife Techniques and Analysis	4
Management		
Select one from the following:		3
FWCE 436	Large Mammal Ecology, Conservation and Management	
FWCE 437	Wildlife Damage Management	
FWCE 440	Wildlife Habitat Relationships	
RGSC 325	Rangeland Restoration Ecology	
Organismal Biology		
Select 3-4 credits from the following: ⁷		3-4
BIOL 484	Animal Communication	3
EPWS 303	Economic Entomology	
EPWS 462	Parasitology	
FWCE 430	Avian Field Ecology	
or BIOL 447	Ornithology	
FWCE 431	Mammalogy	
FWCE 467	Herpetology	
Aquatic Ecology and Management Elective		
Select 3-4 credits of electives		3-4
Total Credits		16-18

- ⁷ At least one course chosen must be a vertebrate taxonomy course with FWCE prefix, i.e., one of FWCE 467 Herpetology or FWCE 482 Ichthyology.

Additional Electives

Take additional credits so the total adds up to at least 128 credits including 55 credits 300- and 400-level classes.

Students are encouraged to pursue a minor course of study with a department of their choosing.

Compatible minors include, but are not limited to:

- animal science,
- biology,
- chemistry,
- environmental science,
- forensic sciences,
- geography,
- journalism,
- management,
- and range science.

Notes:

1. No more than 6 credits of Physical Education classes will count towards your degree.
2. Maximum of two grades of 'D' in FWCE classes will count towards a student's degree.

Fish, Wildlife and Conservation Ecology - Master of Science in Fish, Wildlife and Conservation Ecology

The Department of Fish, Wildlife and Conservation Ecology (FWCE) offers graduate work leading to the Master of Science degree with a major in Fish, Wildlife and Conservation Ecology. Faculty members in the department also may advise Ph.D. candidates through the graduate program in the Department of Biology, Department of Animal and Range Sciences, Department of Plant and Environmental Sciences, as well as other Ph.D. granting departments. For additional information please see the graduate catalog entries for the respective departments.

Minimum qualifications for admission to the graduate program include the following:

- 3.0 grade-point average in the last two years of undergraduate work
- Students who are most competitive for admission are those with a combined average GRE score greater than 70th percentile on the verbal and quantitative parts of the GRE.
- Course work in zoology, botany and animal ecology and a basic appreciation of sustainable use of natural resources, with supporting courses in mathematics, chemistry, physics and written and oral communication.

Applicants should submit a written composition of approximately 350 words that indicates the applicant's reasons for pursuing advanced study, explains personal and educational goals, and any additional experiences (e.g., military or career) or skills that might provide a foundation for graduate study. Applicants should submit three letters of recommendation (it is preferred that at least two letters come from university instructors) along with official GRE scores (the department code is 0115). Applicants should also contact a faculty member in the department that they would like to work with as an advisor, and that faculty member needs to agree to serve as the student's advisor. Application forms, application fee and transcripts, GRE scores, letters of recommendation and letter of application should be submitted online to the Graduate School. Successful applicants will be selected from those who meet the criteria of grade-point average, GRE scores, and educational background described above and who appear to have professional promise as indicated by personal history and written references.

For the Master of Science degree, a minimum of 30 semester credits of graduate work in the major and related subjects is required, together with a thesis for most students. Of these credits, at least 15 must be in courses numbered 500 or above, and at least 15 must be for courses with the FWCE prefix. Those programs involving a thesis or research project include 4 to 6 credits of research (FWCE 598 Special Research Programs or FWCE 599 Master's Thesis). Students electing a minor in FWCE are required to take at least 9 credits in the minor field. A nonthesis option is available to some students, depending on prior training and experience, and subject to approval by the advisor and department head.

All students in the program must complete the following requirements:

- A ST 505 Statistical Inference I or equivalent
- One semester of Graduate Seminar (FWCE 515 Graduate Seminar - may be repeated for credit)
- A minimum of 3 additional credits from the Quantitative Methods category in addition to A ST 505 Statistical Inference I (eligible courses listed below)
- One course each from the Ecological Concepts, Organismal Biology and Ecological Techniques categories (eligible courses listed below)
- 4 to 9 credits from the Independent Study category (eligible courses listed below)

In addition, a student may petition to have up to 3 credits of special topics courses (FWCE 548 Graduate Problems) to apply to one of the three areas. Courses other than those listed may be acceptable, given permission by the student's supervisory committee.

Degree Requirements

A ST 505	Statistical Inference I (or equivalent)	4
FWCE 515	Graduate Seminar (may be repeated for credit)	1

Quantitative Methods: Eligible Courses ¹

Select minimum of 3 credits from the following: 3

A ST 503	SAS Basics
A ST 506	Statistical Inference II
A ST 507	Advanced Regression
A ST 515	Statistical Analysis with R
A ST 523	Biological Sampling (s)
A ST 550	Special Topics
FWCE 509	Population Ecology (s)
FWCE 457	Ecological Biometry
GEOG 585	Advanced Spatial Analysis

Ecological Concepts: Eligible Courses

Select one from the following: 3-4

BIOL 467	Evolution
BIOL 484	Animal Communication
BIOL 489	Genetic Aspects of Population Biology
BIOL 568	Communities and Ecosystems
BIOL 570	Ecological Biogeography
BIOL 587	Behavioral and Evolutionary Ecology
FWCE 459	Aquatic Ecology
FWCE 540	Wildlife Habitat Relationships
GEOG 557	Fundamentals of Biogeography

Organismal Biology: Eligible courses

Select one from the following: 3-4

FWCE 532	Environmental Biology of Fishes
FWCE 536	Advanced Avian Ecology
FWCE 567	Herpetology
FWCE 582	Ichthyology

Ecological Techniques: Eligible courses

Select one from the following: 3-4

FWCE 464	Management of Aquatic and Terrestrial Ecosystems
FWCE 530	Large Mammal Ecology, Conservation and Management
FWCE 534	Aquatic Contaminants and Toxicology

FWCE 537	Wildlife Damage Management	
FWCE 571	GIS for Natural Resource Scientists	
GEOG 521	GIS & T Applications and Modeling	
RGSC 452	Vegetation Measurements for Rangeland Assessment	
RGSC 518	Watershed Methods and Management	
Independent Study: Eligible courses		
Select one from the following:		4-9
FWCE 548	Graduate Problems ²	
FWCE 598	Special Research Programs	
FWCE 599	Master's Thesis	
Total Credits		21-29

¹ Other courses, particularly in Applied Statistics, may be eligible with consent of the advisory committee.

² Students may petition to have up to 3 credits of special topics courses (FWCE 548 Graduate Problems) to apply to one of the three areas.

Graduate work in the department is intended to prepare students for careers in research, teaching, extension and management. Facilities available to graduate students include two ranches of approximately 90,000 acres, a large suite of shared laboratories, and a large fish-culture facility. We actively cooperate with state and federal natural resource management agencies, and graduate students have access to national forests and extensive public lands, as well as the Jornada Basin Long-Term Ecological Research site and associated databases (see <http://jornada-www.nmsu.edu> for details). Additional research opportunities for graduate students are available in the New Mexico Cooperative Fish and Wildlife Research Unit, located in the department since 1988.

Additional information on the graduate program and faculty is available at <http://aces.nmsu.edu/academics/fws>.

Wildlife Science - Undergraduate Minor

The Department offers a minor in Wildlife Science for students majoring in other disciplines. The minor includes a minimum of 20 credits, with 17 credits required courses and 3 in wildlife electives.

Required Courses

FWCE 109 & FWCE 402	Contemporary Issues in Wildlife and Natural Resources Management and Seminar in Natural Resource Management (Seminar in Natural Resources Management)	4
or		
FWCE 110	Introduction to Natural Resources Management	
FWCE 255	Principles of Fish and Wildlife Management	3
FWCE 301	Wildlife Ecology	3
FWCE 330	Natural History of the Vertebrates	4
FWCE 464	Management of Aquatic and Terrestrial Ecosystems	4
Total Credits		18

General Agriculture

General Agriculture - Bachelor of Science in Agriculture

The general agriculture major is designed for students searching for a well-rounded education that builds on the diversity of the other degree programs in the College of Agricultural, Consumer and Environmental Sciences (ACES). The flexibility of the general agriculture degree allows students to tailor a program to fit their individual interests and career goals. Students completing the program earn a Bachelor of Science in General Agriculture. Students choose general agriculture for a variety of reasons. Some may enter the program with a specific career goal in mind. Others may choose general agriculture to obtain a broader education that will give them more flexibility. The curriculum in General Agriculture is administered by the Department of Entomology, Plant Pathology and Weed Science.

New Mexico and University Requirements

Area I. Communications		
ENGL 111G	Rhetoric and Composition	4
Select one from the following:		3
AXED 201G	Effective Leadership and Communication in Agricultural Organizations	
COMM 253G	Public Speaking	
COMM 265G	Principles of Human Communication	
Select one from the following:		3
ENGL 203G	Business and Professional Communication	
ENGL 211G	Writing in the Humanities and Social Sciences	
ENGL 218G	Technical and Scientific Communication	
ENGL 311G	Advanced Composition	
ENGL 318G	Advanced Technical and Professional Communication	

Area II. Mathematics		
Select 3 credits from the following:		3
MATH 121G	College Algebra	
MATH 142G	Calculus for the Biological and Management Sciences	
MATH 190G	Trigonometry and Precalculus	
MATH 191G	Calculus and Analytic Geometry I	
MATH 210G	Mathematics Appreciation	

Area III. Science, with Laboratory		
Select 8 credits from the "General Education Courses" section of this catalog.		8

Area IV. Social/ Behavioral Sciences		
Select 6-9 credits from the "General Education Courses" section of this catalog.		6-9

Area V. Humanities and Fine Arts		
Select 6-9 credits from the "General Education Courses" section of this catalog.		6-9

Viewing a Wider World		
Select six 300 or 400 level credits from Viewing a Wider World courses ¹		6

Additional College Requirements ²

Select three areas of concentration from the following ACES departments:³ 52

Agricultural Economics and Agricultural Business

Agricultural and Extension Education

Animal and Range Science

Entomology, Plant Pathology and Weed Science

Family and Consumer Sciences

Fish, Wildlife and Conservation Ecology

Plant and Environmental Sciences

Hotel, Restaurant and Tourism Management

Electives: to bring total to 120 credits 29

Total Credits 120-126

¹ One course must be from a college outside of the College of Agricultural, Consumer and Environmental Sciences.

² Some ACES classes will meet general education requirements.

³ At least 18 credits must be taken from the primary department and at least 12 credits must be taken from two secondary departments. A minimum of 52 credits (20 of which need to be 300+) of the 120 required for the degree, must be completed in courses offered by the College of Agricultural, Consumer, and Environmental Sciences.

Veterinary Medicine (Preprofessional Training Only, Non-Degree)

The Doctor of Veterinary Medicine (D.V.M.) degree is a professional degree that is not offered by any college or university in New Mexico; however, you may complete the preparatory program required for admittance to the professional colleges of veterinary medicine at New Mexico State University.

The D.V.M. degree normally requires four years of training in a professional college subsequent to completion of a preveterinary program that requires at least three years of college-level instruction. In most instances a baccalaureate degree is a distinct advantage to the applicant.

Curriculum requirements are determined by the particular school or college of veterinary medicine. The Department of Animal and Range Sciences maintains current requirements for Colorado State University, Washington State, Oregon State and Texas A&M. You should check with an advisor for specific course requirements. As a student from New Mexico, you may be eligible for financial assistance under the program of the Western Interstate Commission for Higher Education (WICHE). See the section on WICHE in the General Information chapter under Resources for Students for more information.

Plant and Environmental Sciences Undergraduate Program Information

The undergraduate program in Plant and Environmental Science prepares you for a variety of careers in agriculture and related fields. Accordingly, a flexible curriculum has been designed that will allow specific programs to be developed in consultation with your academic advisor. Programs may also be developed if you wish to prepare for advanced studies in graduate school. In addition to the courses listed for each major, 35 credits must be taken in the College of Agricultural, Consumer and Environmental

Sciences, and the university general education requirements must be met.

The minors require a minimum of 18 credits of which at least 9 hours must be at the 300 or higher level. Specific coursework requirements apply. See advisor for course requirements and scheduling.

Graduate Program Information

More than ever, we are linked in an interconnected world: both in agriculture and sustainability of environmental systems. The department has programs in

- plant sciences,
- environmental science,
- soil science,
- water management,
- natural resources management and
- turf management.

Students trained in these areas are in demand for U.S. and international positions. This demand is at all levels of training—BS, MS, and Ph.D. Therefore, the course work and original research in Plant and Environmental Sciences leading to the Master of Science and Doctor of Philosophy are designed for and have proven to be successful in preparing students for commercial companies, educational institutions, governmental agencies and private production enterprises.

The student may emphasize study in several discipline areas described in the following pages.

- The agronomy section emphasizes sustainable crop production, plant-pest/disease/weed interactions, soil-water-plant relations, crop physiology, and breeding and genetics of cotton, alfalfa, maize and peanuts.
- The genetics section places special emphasis on genetic basis of agronomic or horticultural traits, applied bioinformatics, gene regulation and genomics.
- The environmental and soil science sections emphasize environmental quality and ecosystem services, bioremediation, recycling of organic wastes and wastewater, water use efficiency, soil-plant relations, soil-geomorphology and desert ecology, and the fertility, chemistry, physics, and microbiology of soils, including forest soils.
- The horticulture section emphasizes the creative use of plants by humans, and studies on the technical advancements in the husbandry of most economic commodity groups of fruits, vegetables, or ornamentals as well as managed turf. Emphasis may be in breeding and genetics of chile or onions, plant growth and development, nutrition, dormancy and cold hardiness, plant stress (water and/or salinity) response, fruit and vegetable physiology, forestry, and turfgrass.

Most students will be expected to complete a thesis. The research detailed in a thesis should be of a scope and quality to merit publication in a refereed journal. Depending on prior training and experience, a non-thesis option is available subject to approval by a departmental committee. The non-thesis option requires completion of a research project and paper of limited scope. In both the thesis and non-thesis options, suitability of the research project and resulting thesis or paper will be judged by the student's graduate committee. A minor is

recommended and may be taken in chemistry, biology, molecular biology, environmental management, applied statistics, toxicology or other areas.

Prerequisite to major graduate work is completion of a curriculum essentially equivalent to that required by the department for the BS degree at New Mexico State University.

Degrees for the Department

Agronomy - Bachelor of Science in Agriculture (p. 156)

Horticulture - Bachelor of Science in Agriculture (p. 159)

Soil Science - Bachelor of Science in Agriculture (p. 163)

Turfgrass Science and Management - Bachelor of Science in Agriculture (p. 165)

Environmental Science - Bachelor of Science in Environmental Science (p. 157)

Genetics and Biotechnology - Bachelor of Science in Genetics (p. 158)

Horticulture - Master of Science (p. 162)

Plant and Environmental Science - Master of Science (p. 163)

Plant and Environmental Science - Doctor of Philosophy (p. 163)

Minors for the Department

Agronomy - Undergraduate Minor (p. 157)

Horticulture - Undergraduate Minor (p. 162)

Soil Science - Undergraduate Minor (p. 165)

Turfgrass Science and Management - Undergraduate Minor (p. 167)

Professor, Rolston St. Hilaire, Department Head

Professors Bosland, Cramer, Guldan, Hanan, Leinauer, O'Connell, O'Neill, Picchioni, Pratt, Puppala, Ray, Sengupta-Gopalan, Shukla, Ulery, Zhang;
Associate Professors Angadi, Flynn, Goss, Heerema, Marsalis, Yao;
Assistant Professors Brungard, Burney, Ghimire, Grover, Guzman, Holguin, Lombard, Pietrasiak Webb; **College Professors** Lauriault; **College Associate Professor** Stringam, DuBois; **College Assistant Professors**

R. St. Hilaire, Department Head, Ph.D. (Iowa State University)–plant stress physiology and landscape horticulture; S. Angadi, Ph.D. (University of Manitoba, Canada)–crop physiology; D.L. Auld, Ph.D. (Montana State University)–plant genetics; W. Boeing, Ph.D. (Louisiana State University)–aquatic ecology; P.W. Bosland, Assistant Department Head, Ph.D. (University of Wisconsin, Madison)–chile breeding and genetics; C. Brungard, Ph.D. (Utah State University, Logan)–pedology; O. Burney, Ph.D. (Purdue University, West Lafayette)–silviculture and forest biology; K.C. Carroll, Ph.D. (University of Arizona)–hydrology and water resources; C. S. Cramer, Ph.D. (North Carolina State University)–onion breeding and horticulture; M. Darapuneni, Ph.D. (Texas A&M, College Station)–Agronomy and semi-arid crop rotations; D. DuBois, Ph.D. (University of Nevada)–atmospheric science; M.C. Duniway, Ph.D. (New Mexico State University)–agronomy; R. Flynn, Ph.D. (Auburn University)–soil and water quality; R. Ghimire, Ph.D. (University of Wyoming, Laramie)–soil & crop management; R.M. Goss, Ph.D. (University of Nebraska, Lincoln)–turf science; K. Grover, Ph.D. (Pennsylvania State University)–agronomy; S.J. Guldan, Ph.D. (University of Minnesota)–sustainable agriculture; I. Guzman, Ph.D. (New Mexico State University)–horticulture; N. Hanan, Ph.D. (Queen Mary College, UK)–dryland ecology; S.F. Hanson,

Ph.D. (University of Wisconsin-Madison)–genetics and microbiology; R.J. Heerema, Ph.D. (University of California, Davis)–pecans; F.O. Holguin, Ph.D. (New Mexico State University)–biochemical analysis; J. Idowu, Ph.D. (Cranfield University, United Kingdom)–agronomy and land management; B. Leinauer, Ph.D. (Hohenheim University, Germany)–turfgrass; K. Lombard, Ph.D. (New Mexico State University)–horticulture; M. Marsalis, Ph.D. (Texas Tech University)–forages; G. Niu, Ph.D. (Chiba University, Japan)–horticulture; M.A. O'Connell, Ph.D. (Cornell University)–plant biochemistry and molecular genetics; M. O'Neill, Ph.D. (University of Arizona)–agronomy; G.A. Picchioni, Ph.D. (Texas A&M University)–plant-mineral relations; N. Pietrasiak, Ph.D. (University of California, Riverside)–soil and water sciences; R. Pratt, Ph.D. (Purdue University)–plant breeding and genetics; N. Puppala, Ph.D. (New Mexico State University)–plant breeding and genetics; I.M. Ray, Ph.D. (University of Wisconsin-Madison)–alfalfa breeding and genetics; D. Rucker, Ph.D. (University of Arizona)–hydrogeophysics; C. Sengupta-Gopalan, Ph.D. (Ohio State University)–biochemical genetics; M.K. Shukla, Ph.D. (University of Agricultural Sciences Vienna, Austria)–environmental soil physics; B. Stringam, Ph.D. (Utah State University)–biological and agricultural engineering; C. Steele, Ph.D. (King's College, University of London, United Kingdom)–range soils; A.L. Ulery, Ph.D. (University of California, Riverside)–environmental soil chemistry; S. J. Walker, Ph.D. (New Mexico State University)–horticulture; N. Webb Ph.D. (University of Queensland, Australia); S. Yao, Ph.D. (Cornell University)–pomology/horticulture; J. Zhang, Ph.D. (University of Arkansas, Fayetteville)–cotton breeding, genetics, and genomics

AGRO 100G. Introductory Plant Science

4 Credits (3+2P)

Introduction to the physical, biological, and chemical principles underlying plant growth and development in managed ecosystems. In the laboratory portion of the class, students perform experiments demonstrating the principles covered in lecture. The course uses economic plants and agriculturally relevant ecosystems to demonstrate basic principles. Appropriate for nonscience majors. Same as HORT 100G.

AGRO 200. Special Topics

1-4 Credits (1-4)

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.

AGRO 250. Plant Propagation

3 Credits (2+2P)

Practical methods of propagating horticultural plants by seed, cuttings, layering, grafting, division and tissue culture. Examination of relevant physiological processes involved with successful plant propagation techniques. Crosslisted with HORT 250.

AGRO 257. Introduction to Meteorology

4 Credits (3+3P)

Introduction to Earth's atmosphere and the dynamic world of weather as it happens. Working with current meteorological data delivered via the Internet and coordinated with learning investigations keyed to the current weather; and via study of select archives. Consent of instructor required. Crosslisted with: GEOG 257 and SOIL 257.

AGRO 300. Special Topics

1-4 Credits (1-4)

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

AGRO 303V. Genetics and Society**3 Credits**

Relates the science of genetics with social ramifications. Ways in which genetics and evolution interact with social, political, and economic issues. Includes genetic engineering, gene therapy, DNA finger-printing, ancient DNA, plant and animal improvement, and future prospects. Students required to formulate value judgments on contemporary biological issues that will impact society. Crosslisted with: GENE 303V.

AGRO 305. Principles of Genetics**3 Credits**

Covers fundamental principles of reproduction, variation, and heredity in plants and animals. Crosslisted with: ANSC 305, BIOL 305, HORT 305 and GENE 305.

Prerequisite(s): BIOL 111G, BIOL 211G and either CHEM 111G or CHEM 115.

AGRO 311. Introduction to Weed Science**4 Credits**

Principles of weed science with emphasis on characteristics of invasive plants, methods of integrated weed management, and current issues impacting weed management. Identification of local weeds. Same EPWS 311.

Prerequisite: junior standing or consent of instructor and CHEM 111G and BIOL 211G.

AGRO 315. Crop Physiology**3 Credits**

Whole plant physiological processes as related to growth, development, yield, quality and post harvest physiology of crop plants within the environment of the crop community. Crosslisted with: HORT 315

Prerequisite(s): EPWS/BIOL 314 or consent of instructor.

AGRO 365. Principles of Crop Production**4 Credits (3+3P)**

Basic principles of crop production including environmental and physiological factors limiting production, plant nutrition and soil science, soil-water management, cropping systems and management, pest management, and economic factors influencing crop production. Crosslisted with: HORT 365

Prerequisite(s): AGRO/HORT 100, CHEM 111G or equivalent and MATH 120 or equivalent.

AGRO 377. Introduction to Turfgrass Management**4 Credits (3+3P)**

Establishment and maintenance of turfgrass with emphasis on seeding methods, soil and water management, mowing, disease, insects and turfgrass varieties. Consent of instructor required. Crosslisted with: HORT 377

AGRO 391. Internship**1-6 Credits**

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 6 credits toward a degree. Consent of Instructor required. S/U Grading (S/U, Audit). **Prerequisite(s):** Consent of instructor.

AGRO 447. Seminar**1 Credit**

Organization, preparation, and presentation of current topics in agronomy, horticulture, and soil science. Same as HORT 447 and SOIL 447.

AGRO 449. Special Problems**1-3 Credits (1-3)**

Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

AGRO 450. Special Topics**1-4 Credits (1-4)**

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.

AGRO 462. Plant Breeding**3 Credits**

Principles and practices involved with the genetic improvement of plants. Same as HORT 462.

Prerequisites: ANSC/AGRO/BIOL/HORT 305.

AGRO 471. Plant Mineral Nutrition**3 Credits**

Basic and applied aspects of plant requirements for soil-derived minerals and the processes whereby minerals are acquired, absorbed, translocated, and utilized throughout the plant. Same as HORT 471 and EPWS 471.

Prerequisite: EPWS/BIOL 314, or concurrent enrollment, or consent of instructor.

AGRO 483. Sustainable Production of Agronomic Crops**4 Credits (3+2P)**

Characteristics and objectives of sustainable agricultural systems with application to the production, utilization, and improvement of cereal grain, fiber, forage and oilseed crops.

Corequisite(s): AGRO 365 or HORT 365.

AGRO 485. Materials from Biorenewable Resources**3 Credits**

Types, sources, composition and properties of biomass. Production, processing, and applications of biomass materials with energy, water, cost, sustainability, and waste management considerations. Crosslisted with: HORT 486, E S 485, SOIL 485 and CHME 485.

Prerequisite(s): CHEM 211 or CHEM 313 or permission of instructor.

AGRO 492. Diagnosing Plant Disorders**3 Credits (2+3P)**

Systematic diagnosis of the physiological, pathological, and entomological causes of plant disorders. Same as EPWS 492 and HORT 492.

Prerequisites: EPWS 303 and EPWS 310.

AGRO 500. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

AGRO 505. Research Orientation**4 Credits (3+2P)**

Training in writing research proposals, presentation of research results, and interpretation of research results. Crosslisted with: HORT 505 and SOIL 505

AGRO 506. Plant Genetics**3 Credits**

Advanced treatment of the principles of classical genetics and heredity with emphasis on the nature and action of the gene including molecular analysis. CHEM 345 recommended. Same as HORT 506.

Prerequisite: AGRO 305 or consent of instructor.

AGRO 511. Introduction to Weed Science (f)**4 Credits**

Covers the principles of weed science with emphasis on characteristics of invasive plants, methods of integrated weed management, and current issues impacting weed management. Includes identification of local weeds. Research paper required for graduate credit. Same as EPWS 511.

Prerequisites: CHEM 111G and BIOL 190 or BIOL 211G, or consent of instructor.

AGRO 514. Soil-Plant Relationships**3 Credits**

Physical, chemical, and biological soil environment as it affects plant and crop growth. Same as HORT 514 and SOIL 514.

Prerequisites: BIOL 314, SOIL 252.

AGRO 515. Crop Physiology**3 Credits**

Whole plant physiological processes as related to growth, development, yield, quality and post harvest physiology of crop plants within the environment of the crop community. Crosslisted with: HORT 515

Prerequisite(s): EPWS/BIOL 314 or consent of instructor.

AGRO 516. Molecular Analysis of Complex Traits**3 Credits**

Provide a comprehensive overview of molecular genetic analysis of complex phenotypes, including case histories/experiments in plants, animals and humans. Emphasize technological developments in DNA marker technologies and their application to molecular quantitative genetics. Explore the efficient application of these technologies in the future to complex genetic systems, breeding, and other areas of life sciences. Same as HORT 516.

Prerequisite: AGRO 305 or consent of instructor.

AGRO 525. Scientific Writing- How to be a Productive and Effective Writer**1-3 Credits (1-3)**

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Crosslisted with: HORT 525, EPWS 525, SOIL 525, AGRO 625, HORT 625 and SOIL 625.

AGRO 533. Environmental Physiology of Plants**3 Credits**

Integral responses of plants and crop productivity to naturally occurring and modified environmental factors such as radiation, temperatures, water vapor, carbon dioxide, and air flow. Same as BIOL/HORT 533.

Prerequisite: BIOL 314 or consent of instructor.

AGRO 590. Graduate Seminar**1 Credit**

Current research discussions presented by masters level graduate students. Not more than one credit toward the degree. Same as HORT/SOIL 590. Crosslisted with: HORT 590 and SOIL 590.

AGRO 595. Internship**1-6 Credits**

Supervised professional on-the-job learning experience. Limited to Master of Agriculture candidates. Not more than 6 credits toward the degree.

AGRO 596. Masters Proposal**1 Credit**

Current research proposal written by masters level graduate students. Consent of Instructor required. Crosslisted with: E S 596, GENE 596, HORT 596 and SOIL 596. Restricted to: Masters HORT; Masters PLEN majors.

Prerequisite(s): Master level graduate students.

AGRO 597. University Teaching Experience**1-3 Credits (1-3)**

Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ES course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures. Consent of instructor required. Restricted to: Main campus only. Restricted to Agronomy and Horticulture Graduate Students. Crosslisted with: HORT 597 and SOIL 597

AGRO 598. Special Research Programs**1-6 Credits**

Individual investigations, either analytical or experimental. Maximum of 6 credits per semester. No more than 9 credits towards degree. Same as SOIL 598.

AGRO 599. Master's Thesis**15 Credits**

Thesis.

AGRO 600. Doctoral Research**1-15 Credits**

Research.

AGRO 609. Breeding for Plant Disease Resistance**3 Credits**

A practically-oriented course of lectures and discussion on concepts and principles of breeding for disease and pest resistance. Labs familiarize students with preparation, quantification, and application of inoculum to hosts. Same as HORT 609.

AGRO 610. Advanced Crop Breeding**4 Credits (3+3P)**

Applications of breeding principles to crop improvement. Emphasis on breeding methodologies using modern techniques, including biotechnology. Same as HORT 610.

Prerequisite: AGRO 462 or consent of instructor.

AGRO 620. Instrumentation in Agronomy**3 Credits**

Use of instruments used in research in all areas of agronomy including gas chromatography, high performance liquid chromatography, neutron soil moisture probe, and other instruments. Same as HORT/SOIL 620.

AGRO 625. Scientific Writing- How to be a Productive and Effective Writer**1-3 Credits (1-3)**

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Students in the 600-level course will be required to perform additional research than those students in the 500-level cross-listing Crosslisted with: AGRO 525, HORT 525, EPWS 525 and SOIL 525.

AGRO 670. Biometrical Genetics and Plant Breeding**3 Credits**

A statistical approach to gene action and population parameters as applied to plant improvement. Same as HORT 670.

Prerequisite: AGRO 462 or consent of instructor.

AGRO 694. Doctoral Seminar**1 Credit**

Current research discussions presented by doctoral level graduate students. Not more than 2 credits toward the degree. Same as SOIL 694.

Prerequisite: doctoral level graduate students.

AGRO 696. Doctoral Proposal**1 Credit**

Current research proposal written by doctoral level graduate students. Not more than 1 credits toward the degree. May be repeated up to 1 credits. Crosslisted with: E S 696, AGRO 696, HORT 696 and SOIL 696.

Prerequisite(s): Doctoral level graduate students.

AGRO 697. University Teaching Experience**1-3 Credits (1-3)**

Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ES course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures. Consent of instructor required. Crosslisted with: HORT 697 and SOIL 697

AGRO 698. Topics in Agronomy**1-6 Credits**

Topics of current interest, designated by title and credit. Maximum of 6 credits per semester. No more than 9 credits toward a degree.

AGRO 700. Doctoral Dissertation**15 Credits**

Dissertation.

E S 110G. Introductory Environmental Science**4 Credits (3+2P)**

Introduction to environmental science as related to the protection, remediation, and sustainability of land, air, water, and food resources. Emphasis on the use of the scientific method and critical thinking skills in understanding environmental issues.

E S 256. Environmental Engineering and Science**3 Credits**

Principles in environmental engineering and science: physical chemical systems and biological processes as applied to pollution control. Restricted to: Main campus, Alamogordo campus, Grants campus, Carlsbad campus. Crosslisted with: C E 256

Prerequisite(s): CHEM 111G and MATH 191G.

E S 256 L. Environmental Science Laboratory**1 Credit**

Laboratory experiments associated with the material presented in E S 256. Same as C E 256L.

Corequisite: E S 256.

E S 300. Special Topics**1-4 Credits**

Special subjects and credits to be announced in the Schedule of Classes. Consent of instructor required. Maximum of 4 credits per semester. Restricted to majors.

E S 301. Principles of Ecology**3 Credits**

A survey of ecology including general theory, the adaptations of organisms, population dynamics, species interactions, and the structure and function of natural communities and ecosystems. Crosslisted with: BIOL 301

Prerequisite(s): BIOL 111G, A ST 311, and grade of C or better in MATH 191G or Math Placement Exam score adequate to enroll in mathematics courses beyond MATH 191G.

E S 312. Emergency Response to Hazardous Material Incidents**2 Credits**

EPA approved Environmental Response Training Program Course 165.15. In compliance with OSHA 29 CFR 1910.120. Normally taken during last year of study. Same as E T 312 and WERC 312.

Prerequisite: consent of instructor.

E S 330. Environmental Management Seminar I**1 Credit**

Restricted to: Main campus only. Crosslisted with: A EN 330, C E 330, E E 330, I E 330, M E 330, WERC 330 and CH E 330.

E S 361. Basic Toxicology**3 Credits**

BIOL 110G or BIOL 190 recommended. Same as TOX 361.

Prerequisite: CHEM 110G, CHEM 112G, or CHEM 114.

E S 370. Environmental Soil Science**3 Credits**

Continuation of SOIL 252 that emphasizes soil properties and processes that directly relate to environmental pollution problems. Same as SOIL 370.

Prerequisite: SOIL 252.

E S 391. Internship**3 Credits**

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. Maximum of 3 credits toward a degree. Consent of Instructor required. S/U Grading (S/U, Audit).

E S 422. Environmental Chemistry**3 Credits**

Chemistry of organic and metal ion pollutants in the environment and principles important to their remediation including bioremediation.

Restricted to: Main campus only. Crosslisted with: CHEM 422

Prerequisite(s): CHEM 112G and either CHEM 211 or CHEM 313.

E S 423. Environmental Toxicology**3 Credits**

Toxicological tests required by the EPA to determine human and environmental safety of pesticides and industrial pollutants; discussion of environmental fate of major pesticide classes and industrial pollutants. Crosslisted with: TOX 423

Prerequisite(s): TOX 361 or TOX 461.

E S 430. Environmental Management Seminar II**1 Credit**

Survey of practical and new developments in environmental management field, hazardous and radioactive, waste management, and related health issues, provided through a series of guest lectures and reports of ongoing research. Restricted to: Main campus only. Crosslisted with: C E 430, CH E 430, E E 430, E T 430, I E 430 and WERC 430

E S 434. Aquatic Contaminants and Toxicology**4 Credits**

Basic principles and methodologies of aquatic toxicity testing. Routes of exposure and modes of action. Environmental legislation and ecological risk assessment. Crosslisted with: WLSC 434

Prerequisite(s): Senior standing or consent of instructor.

E S 449. Special Problems**1-3 Credits**

Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and 6 credits toward a degree. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: E S majors.

E S 451. Special Topics**1-4 Credits (1-4)**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.

E S 452. Geohydrology**4 Credits (3+2P)**

Origin, occurrence, and movement of fluids in porous media and assessment of aquifer characteristics. Development and conservation of ground water resources, design of well fields. Crosslisted with: C E 452 and GEOL 452.

Prerequisite(s): Junior or Senior.

E S 459. Aquatic Ecology**4 Credits**

Ecological functions of plant and animal communities in aquatic ecosystems with emphasis on chemical and physical properties, productivity, species interactions, population dynamics, and concepts for diagnosing problems and restoring aquatic ecosystems. Crosslisted with: WLSC 459

Prerequisite(s): (E S, WLSC or BIOL 301), CHEM 112G, (MATH 142G or MATH 191G).

E S 460. Introduction to Air Pollution**3 Credits**

An introduction to the physics and chemistry of tropospheric air pollution including sources of air pollution, local and long-range transport, instrumentation, regulatory requirements, control technology.

Prerequisite(s): PHYS 215G, CHEM 112G, MATH 191G.

E S 462. Sampling and Analysis of Environmental Contaminants**3 Credits (1+6P)**

Theory, application, methodology, and instrumentation used in the sampling and analysis of environmental contaminants. Same as ENVE 462.

Prerequisites: E S 256.

E S 470. Environmental Impacts of Land Use and Contaminant Remediation**3 Credits**

The course will cover the integrated assessment of soil erosion, contaminant transport in soil and water, and contaminant remediation from site scale to watershed scales. Understanding of the controlling factors for each type land use impact will be gained through the use of risk assessment, case studies, and computer modeling. Case studies will illustrate the processes under various environmental applications. This course will also cover the application of solute transport principles and methods for the remediation of contaminated soil and groundwater. It will also discuss the contaminated site characterization, monitoring, and remediation design. Discussions of innovative methodologies will be supported with case studies. Crosslisted with: WSAM 470.

Prerequisite(s): E S 256, E S 462, E S 370.

E S 485. Materials from Biorenewable Resources**3 Credits**

Types, sources, composition and properties of biomass. Production, processing, and applications of biomass materials with energy, water, cost, sustainability, and waste management considerations. Crosslisted with: AGRO 485, HORT 486, SOIL 485 and CHME 485.

Prerequisite(s): CHEM 211 or CHEM 313 or permission of instructor.

E S 596. Masters Proposal**1 Credit**

Current research proposal written by masters level graduate students. Consent of Instructor required. Crosslisted with: AGRO 596, GENE 596, HORT 596 and SOIL 596. Restricted to: Masters HORT; Masters PLEN majors.

Prerequisite(s): Master level graduate students.

E S 599. Master's Thesis**1-15 Credits**

Thesis Graded: Thesis/Disertation.

E S 605. Arid Land Water Resources**3 Credits (2+2P)**

The course will cover various issues of relevance to water resources and water supply management within the Southwest US and other semiarid and arid regions. Discussions may include development and sustainability, climate change and drought, socioeconomic and cultural, and transboundary issues. Crosslisted with: WSAM605.

E S 696. Doctors Proposal**1 Credit**

Current research proposal written by PhD level graduate students. Consent of Instructor required. Crosslisted with: AGRO 696, HORT 696 and SOIL 696. Restricted to: Doctors PLEN majors.

Prerequisite(s): PhD level graduate students.

E S 700. Doctoral Dissertation**1-15 Credits**

Dissertation Graded: Thesis/Disertation.

GENE 110. Experimental Systems in Genetics**1 Credit**

Survey of molecular, biochemical, organismal, and computer science based approaches to investigate how genes determine important traits. Historical development and topics of current interest will be discussed.

GENE 303V. Genetics and Society**3 Credits**

Relates the science of genetics with social ramifications. Ways in which genetics and evolution interact with social, political, and economic issues. Includes genetic engineering, gene therapy, DNA finger-printing, ancient DNA, plant and animal improvement, and future prospects. Students required to formulate value judgments on contemporary biological issues that will impact society. Crosslisted with: AGRO303V.

GENE 305. Principles of Genetics**3 Credits**

Covers fundamental principles of reproduction, variation, and heredity in plants and animals. Crosslisted with: AGRO 305, ANSC 305, BIOL 305 and HORT 305

Prerequisite(s): BIOL 111G, BIOL 211G and either CHEM 111G or CHEM 115.

GENE 305 L. Genetic Techniques**1 Credit**

Experimental procedures used in genetic research including: sexual transmission genetics, eukaryotic DNA isolation, DNA marker development and genotyping, polymerase chain reaction, and cytogenetics. Pre/

Corequisite(s): GENE 315, or AGRO/ANSC/BIOL/HORT 305.

GENE 315. Molecular Genetics**3 Credits**

Covers fundamental principles of DNA structure and replication, transcription, translation, gene regulation, recombinant DNA technology, and a survey of genomics and bioinformatics.

Prerequisite(s)/Corequisite(s): . Prerequisite(s): CHEM 112 and BIOL 211. Recommend CHEM 313.

GENE 320. Hereditary and Population Genetics**3 Credits**

Covers fundamental principles of reproduction, variation, and heredity in plants and animals including: Mendelian inheritance, mitosis, meiosis, genetic linkage, random mating, genetic drift, natural selection, inbreeding, migration, mutation, interrelationships between individuals, populations and communities and the environment.

Prerequisite(s): CHEM 111G & BIOL 211G.

GENE 440. Genetics Seminar**1 Credit**

Organization, preparation, and presentation of genetic studies in model microorganism, plant, or animal systems that have been used to solve problems in molecular, cellular, and developmental biology. Consent of instructor required.

Prerequisite(s): Seniors only; GENE 315 & GENE 320.

GENE 449. Special Problems**1-3 Credits (1-3)**

Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 3 credits toward a degree. Consent of instructor required.

GENE 450. Special Topics**1-3 Credits (1-3)**

Specific subjects to be announced in the schedule of classes. Maximum of 3 credits per semester and a total of 3 credits toward a degree. Consent of instructor required.

GENE 452. Applied Bioinformatics**3 Credits**

Survey and application of publicly available bioinformatic tools that treat genomic DNA, cDNA, and protein sequences, RNA abundance, as well as tools that allow inference based on phylogenetic relationships.

Prerequisites: AGRO/ANSC/BIOL/HORT 305 or GENE 315 and GENE 320, and BCHE 341, or BCHE 395.

GENE 486. Genes and Genomes**3 Credits**

Extensive coverage of nuclear and organelle genome structure in plants and animals, genome restructuring including duplication, aneuploidy, chromosome translocations and inversions, comparative genomics, and molecular systematics.

Prerequisites: AGRO/ANSC/BIOL/HORT 305 or GENE 315, and GENE 320.

GENE 488. Gene Regulation**3 Credits**

Extensive coverage of signal transduction processes and approaches used to monitor large scale changes in gene regulation and protein synthesis that occur during development and in response to environmental changes.

Prerequisites: AGRO/ANSC/BIOL/HORT 305 or GENE 315.

HORT 100G. Introductory Plant Science**4 Credits (3+2P)**

Introduction to the physical, biological, and chemical principles underlying plant growth and development in managed ecosystems. In the laboratory portion of the class, students perform experiments demonstrating the principles covered in lecture. The course uses economic plants and agriculturally relevant ecosystems to demonstrate basic principles. Appropriate for nonscience majors. Same as AGRO 100G.

HORT 110. Athletic Field and Golf Course Management**1 Credit**

Survey of proper management of athletic fields, golf courses and other turfgrass stands. Career opportunities in athletic field and golf course management will be discussed. Course includes field trips to local and regional sports turf facilities.

HORT 200. Special Topics**1-4 Credits**

Specific subjects and credits as announced. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required.

HORT 205. Introduction to Horticulture**3 Credits**

Principles and practices of horticulture. Basic chemical, physical, and biological principles that govern plant growth in different environments. Economics of plant science as related to the field of horticulture. Online course entirely. Intended for non-majors.

HORT 210. Ornamental Plants I**4 Credits (3+2P)**

Covers identification, botanical characteristics, culture, and landscape uses of woody plants. Emphasis on deciduous trees, native shrubs, and evergreens.

HORT 211. Ornamental Plants II**4 Credits (3+2P)**

Identification, botanical characteristics, culture, and landscape uses of woody plants. Emphasis on flowering trees, cacti, and members of the pea and rose families.

HORT 240. Floral Quality Evaluation and Design**2 Credits (1+2P)**

Critical hands-on evaluation of the quality of cut and potted floral and tropical foliage crops, their specific merits and faults, and fundamentals of floral design.

HORT 241. Floriculture Field Practicum**1 Credit**

Participation as team member in the National Intercollegiate Floral Quality Evaluation and Design Competition. Intensive week-long travel for competition, networking with industry, academia, and floriculture tours. May be repeated for a maximum of 3 credits.

Prerequisite(s): HORT 240 or consent of instructor.

HORT 250. Plant Propagation**3 Credits (2+2P)**

Practical methods of propagating horticultural plants by seed, cuttings, layering, grafting, division and tissue culture. Examination of relevant physiological processes involved with successful plant propagation techniques. Same as AGRO 250.

HORT 300. Special Topics**1-4 Credits**

Specific subjects as announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

HORT 302V. Forestry and Society**3 Credits**

Global study of the development and use of forest resources for production of wood, fuel, fiber, and food products. Climatic, edaphic, cultural, and economic influences on forests of the world evaluated. Same as RGSC 302V.

HORT 305. Principles of Genetics**3 Credits**

Covers fundamental principles of reproduction, variation, and heredity in plants and animals. Crosslisted with: AGRO 305, ANSC 305, BIOL 305 and GENE 305

Prerequisite(s): BIOL 111G, BIOL 211G and either CHEM 111G or CHEM 115.

HORT 307. Landscape Design**3 Credits (1+4P)**

Design elements, the design process, and contemporary planting design used in the design of residential and small commercial landscapes. Basic drafting, drawing, and landscape plan presentation techniques. Prerequisites : HORT 210 or HORT 211 or concurrent enrollment or consent of instructor.

HORT 310. Medicinal Herbs**3 Credits**

Introduction to ethnobotany, including plant cultivation, extraction methods, and analysis of active chemistries.

HORT 315. Crop Physiology**3 Credits**

Whole plant physiological processes as related to growth, development, yield, quality and post harvest physiology of crop plants within the environment of the crop community. Crosslisted with: AGRO 315

Prerequisite(s): EPWS/BIOL 314 or consent of instructor.

HORT 365. Principles of Crop Production**4 Credits (3+3P)**

Basic principles of crop production including environmental and physiological factors limiting production, plant nutrition and soil science, soil-water management, cropping systems and management, pest management, and economic factors influencing crop production. Crosslisted with: AGRO 365

Prerequisite(s): AGRO/HORT 100, CHEM 111G or equivalent and MATH 120 or equivalent.

HORT 377. Introduction to Turfgrass Management**4 Credits (3+3P)**

Establishment and maintenance of turfgrass with emphasis on seeding methods, soil and water management, mowing, disease insects and turfgrass varieties. Crosslisted with: AGRO 377

HORT 378. Turfgrass Science**4 Credits (3+3P)**

Introduction to the scientific fundamentals for turfgrass management cultural practices, pest management, rootzone construction and ecology.

Prerequisite(s): HORT 377 or consent of instructor.

HORT 391. Internship**1-6 Credits**

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 6 credits toward a degree. Consent of instructor required. Graded: S/U. Crosslisted with: AGRO 391 and SOIL 391

HORT 447. Seminar**1 Credit**

Review of current literature. Same as AGRO 447 and SOIL 447.

HORT 449. Special Problems**1-3 Credits**

Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

HORT 450. Special Topics**1-4 Credits**

Specific subjects as announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required.

HORT 462. Plant Breeding**3 Credits**

Principles and practices involved with the genetic improvement of plants. Same as AGRO 462.

Prerequisites: ANSC/AGRO/BIOL/HORT 305.

HORT 465. Landscape Construction and Maintenance**4 Credits (3+2P)**

Application of landscape design and construction principles to build and maintain residential, small commercial and selected public managed landscapes.

HORT 471. Plant Mineral Nutrition**3 Credits**

Basic and applied aspects of plant requirements for soil-derived minerals and the processes whereby minerals are acquired, absorbed, translocated, and utilized throughout the plant. Same as AGRO/EPWS 471.

Prerequisite: EPWS/BIOL 314, or concurrent enrollment, or consent of instructor.

HORT 479. Advanced Turfgrass Science**3 Credits**

Extensive reviews of turfgrass sciences including ecology, physiology, entomology, pathology, weed science, and soil science.

Prerequisite: HORT 378 or consent of instructor.

HORT 485. Vegetable Crop Management**4 Credits (3+2P)**

Physiological, environmental and cultural aspects of vegetable crop production.

Corequisite(s): AGRO 365 or HORT 365, or consent of instructor.

HORT 486. Materials from Biorenewable Resources**3 Credits**

Types, sources, composition and properties of biomass. Production, processing, and applications of biomass materials with energy, water, cost, sustainability, and waste management considerations. Crosslisted with: AGRO 485, SOIL 485, E S 485 and CHME 485.

Prerequisite(s): CHEM 211 or CHEM 313 or permission of instructor.

HORT 488. Greenhouse Management**4 Credits (3+3P)**

Principles and practices involved in greenhouse structures and construction, site considerations, covering materials, heating and cooling systems, greenhouse crop production techniques, and case studies.

Prerequisite: HORT/AGRO 365 or consent of instructor.

HORT 492. Diagnosing Plant Disorders**3 Credits (2+3P)**

Systematic diagnosis of the physiological, pathological, and entomological causes of plant disorders. Same as EPWS 492 and AGRO 492.

Prerequisites: EPWS 303 and EPWS 310.

HORT 500. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

HORT 505. Research Orientation**4 Credits (3+2P)**

Training in writing research proposals, presentation of research results, and interpretation of research results. Crosslisted with: AGRO 505 and SOIL 505

HORT 506. Plant Genetics**3 Credits**

Advanced treatment of the principles of classical genetics and heredity with emphasis on the nature and action of the gene including molecular analysis. CHEM 345 recommended. Same as AGRO 506 and MOLB 506.

Prerequisite: AGRO 305 or consent of instructor.

HORT 514. Soil-Plant Relationships**3 Credits**

Physical, chemical, and biological soil environment as it affects plant and crop growth. Same as AGRO/SOIL 514.

Prerequisites: BIOL 314, SOIL 252.

HORT 515. Crop Physiology**3 Credits**

Whole plant physiological processes as related to growth, development, yield, quality and post harvest physiology of crop plants within the environment of the crop community. Crosslisted with: AGRO 515

Prerequisite(s): EPWS/BIOL 314 or consent of instructor.

HORT 516. Molecular Analysis of Complex Traits**3 Credits**

Provide a comprehensive overview of molecular genetic analysis of complex phenotypes, including case histories/experiments in plants, animals and humans. Emphasize technological developments in DNA marker technologies and their application to molecular quantitative genetics. Explore the efficient application of these technologies in the future to complex genetic systems, breeding, and other areas of life sciences. Same as AGRO 516.

Prerequisite: AGRO 305 or consent of instructor.

HORT 525. Scientific Writing How to be a Productive and Effective Writer
1-3 Credits (1-3)

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review Crosslisted with: AGRO 525, AGRO 625, EPWS 525, SOIL 625 and SOIL 525.

HORT 533. Environmental Physiology of Plants**3 Credits**

Integral responses of plants and crop productivity to naturally occurring and modified environmental factors such as radiation, temperatures, water vapor, carbon dioxide, and air flow. Same as AGRO/BIOL 533.

Prerequisite: BIOL 314 or consent of instructor.

HORT 590. Graduate Seminar**1 Credit**

Current research discussions presented by masters level graduate students. Not more than one credit toward the degree. Same as AGRO/SOIL 590. Crosslisted with: AGRO 590 and SOIL 590.

HORT 595. Internship**1-6 Credits**

Supervised professional on-the-job learning experience. Limited to Master of Horticulture or Plant & Environmental Science candidates. Not more than 6 credits toward the degree.

HORT 596. Masters Proposal**1 Credit**

Current research proposal written by masters level graduate students. Consent of Instructor required. Crosslisted with: AGRO 596, E S 596, GENE 596 and SOIL 596. Restricted to: Masters HORT; Masters PLEN majors.

Prerequisite(s): Master level graduate students.

HORT 597. University Teaching Experience**1-3 Credits (1-3)**

Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ES course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures. Consent of instructor required. Crosslisted with: AGRO 597 and SOIL 597

HORT 598. Special Research Programs**1-6 Credits**

Individual investigations, either analytical or experimental. Maximum of 6 credits per semester. No more than 9 credits toward a degree.

Prerequisite: consent of instructor.

HORT 599. Master's Thesis**15 Credits**

Thesis.

HORT 609. Breeding for Plant Disease Resistance**3 Credits**

A practically-oriented course of lectures and discussion on concepts and principles of breeding for disease and pest resistance. Labs familiarize students with preparation, quantification, and application of inoculum to hosts. Same as AGRO 609.

HORT 610. Advanced Crop Breeding**4 Credits (3+3P)**

Applications of breeding principles to crop improvement. Emphasis on breeding methodologies using modern techniques, including biotechnology. Same as AGRO 610.

Prerequisite: AGRO 462 or consent of instructor.

HORT 620. Instrumentation in Agronomy**3 Credits**

Use of instruments used in research in all areas of agronomy including gas chromatography, high performance liquid chromatography, neutron soil moisture probe, and other instruments. Same as AGRO/SOIL 620.

HORT 625. Scientific Writing- How to be a Productive and Effective Writer**1-3 Credits (1-3)**

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Students in the 625 course will be required to perform additional research than those students in the 525 cross-listing. Crosslisted with: AGRO 525, EPWS 525, HORT 525 and SOIL 525.

HORT 670. Biometrical Genetics and Plant Breeding**3 Credits**

A statistical approach to gene action and population parameters as applied to plant improvement. Same as AGRO 670.

Prerequisite: AGRO 462 or consent of instructor.

HORT 685. Plant Genetic Engineering**3 Credits**

Analysis of plant genome structure and potential applications of emerging molecular techniques to the genetic improvement of plants. Same as AGRO/BIOL 685.

Prerequisites: HORT/AGRO 585 and AGRO/HORT 506 or CHEM 545, or consent of instructor.

HORT 696. Doctors Proposal**1 Credit**

Current research proposal written by PhD level graduate students. Consent of Instructor required. Crosslisted with: AGRO 696, E S 696 and SOIL 696. Restricted to: Doctors PLEN majors.

Prerequisite(s): PhD level graduate students.

HORT 697. University Teaching Experience**1-3 Credits (1-3)**

Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ES course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures. Consent of instructor required. Crosslisted with: AGRO 697 and SOIL 697

SOIL 200. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.

SOIL 252. Soils**3 Credits**

Origin, classification, morphology, and physical, chemical, and biological properties of soils.

Prerequisite: CHEM 111G and CHEM 112G.

SOIL 252 L. Soils Laboratory**1 Credit**

Morphological, chemical, physical and biological properties of soil in the laboratory and field.

Corequisite: SOIL 252.

SOIL 257. Introduction to Weather Science**4 Credits (3+3P)**

Introduction to Earth's atmosphere and the dynamic world of weather as it happens. Working with current meteorological data delivered via the Internet and coordinated with learning investigations keyed to the current weather; and via study of select archives. Consent of instructor required. Crosslisted with: GEOG 257 and AGRO 257

SOIL 300. Special Topics**1-4 Credits**

Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

SOIL 312. Soil Management and Fertility**3 Credits**

Management, conservation, and fertility of soils; physical conditions affecting growth, nutrition, and plant production.

Prerequisite: SOIL 252.

Corequisite: SOIL 312L.

SOIL 312 L. Soil Management and Fertility Lab**1 Credit**

Hands-on experience. Includes field trips, videos, calculations, visiting lecturers and other lab activities as possible.

Prerequisite: SOIL 252.

Corequisite: SOIL 312.

SOIL 350. Soils and Land Use**3 Credits (2+2P)**

Relationship of soils to the limitations and potentials of land use.

Emphasis on soil interpretations and soils as a resource in urban, rural, and recreational development. Same as PLAN 350.

SOIL 357. Climatology**3 Credits**

Elements and controls of climate. Energy and hydrologic cycles, general circulation, climate classification, distribution of climate types, microscale effects, applications. Same as AGRO/GEOG 357.

Prerequisites: MATH 120.

SOIL 370. Environmental Soil Science**3 Credits**

Continuation of SOIL 252 that emphasizes soil properties and processes that directly relate to environmental pollution problems. Same as E S 370.

Prerequisite: SOIL 252.

SOIL 391. Internship**1-6 Credits (1-6)**

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 6 credits toward a degree. Consent of Instructor required. S/U Grading (S/U, Audit).

SOIL 424. Soil Chemistry**3 Credits**

Basic elements of soil chemistry including clay mineralogy, cation and anion exchange and the chemistry of problem (acid, saline and flooded) soils. Credit not given for both SOIL 424 and SOIL 479.

Prerequisite(s): SOIL 252L or CHEM 111G and 112G.

SOIL 447. Seminar**1 Credit**

Organization, preparation, and presentation of current topics in agronomy, horticulture, and soil science. Same as AGRO/HORT 447.

SOIL 449. Special Problems**1-3 Credits**

Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

SOIL 450. Special Topics**1-4 Credits**

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits towards a degree. May be repeated up to 9 credits. Consent of Instructor required.

SOIL 456. Irrigation and Drainage**3 Credits**

Principles and practices required for irrigation to exist as a permanent economy. Equipment and methods for measurement and control of water.

SOIL 472. Soil Morphology and Classification**4 Credits (2+2P)**

Terminology used to describe soils. Soil classification systems of the world with emphasis on systems used in the United States. Theory of classification and taxonomy as applied to soils. Same as GEOG 472.

Prerequisite: SOIL 252.

SOIL 476. Soil Microbiology**3 Credits**

Nature and physiology of soil microorganisms, how they affect plant growth and recycle nutrients. Land farming, bioremediation and other environmental problems as influenced by soil microorganisms. SOIL 252 and BIOL 311 recommended. Same as BIOL 476.

SOIL 476 L. Soil Microbiology Laboratory**1 Credit**

Enumeration of soil microorganisms, their activities, and transformations they mediate. Same as BIOL 476L.

Prerequisites: SOIL 476 or concurrent enrollment.

SOIL 477. Environmental Soil Physics**3 Credits**

A description of the physical characteristics of porous media including soil. Examination of processes describing the transport of water, chemicals, heat and gases through porous media with application to environmental quality, waste management, and crop production.

SOIL 477 L. Environmental Soil Physics Laboratory**1 Credit**

Concurrent enrollment with SOIL 477 recommended. Hands on experience with techniques for characterizing soil physical properties such as particle size distribution, bulk density, water retention, hydraulic conductivity and solute transport. Demonstrations of field and laboratory techniques for measuring moisture content, soil water potential, gas/air flow and thermal conductivity.

Prerequisite: SOIL 252.

SOIL 479. Environmental Soil Chemistry**3 Credits**

Basic elements of soil chemistry including discussion of clay mineralogy, cation and anion exchange and the chemistry of problem (acid, saline and flooded) soils. Credit not given for both SOIL 424 and SOIL 479.

Prerequisite(s): SOIL 252L or CHEM 111G and 112G.

SOIL 485. Materials from Biorenewable Resources**3 Credits**

Types, sources, composition and properties of biomass. Production, processing, and applications of biomass materials with energy, water, cost, sustainability, and waste management considerations. Crosslisted with: AGRO 485, HORT 486, E S 485 and CHME 485.

Prerequisite(s): CHEM 211 or CHEM 313 or permission of instructor.

SOIL 500. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

SOIL 505. Research Orientation**4 Credits (3+2P)**

Training in writing research proposals, presentation of research results, and interpretation of research results. Crosslisted with: AGRO 505 and HORT 505

SOIL 514. Soil-Plant Relationships**3 Credits**

Physical, chemical, and biological soil environment as it affects plant and crop growth. Same as AGRO/HORT 514.

Prerequisites: BIOL 314, SOIL 252.

SOIL 525. Scientific Writing- How to be a Productive and Effective Writer**1-3 Credits (1-3)**

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Crosslisted with: AGRO 525, AGRO 625, HORT 525, HORT 625, SOIL 625 and EPWS 525.

SOIL 590. Graduate Seminar**1 Credit**

Current research discussions presented by master level graduate students. Not more than one credit toward the degree. Same as AGRO/HORT 590. Crosslisted with: AGRO 590 and HORT 590.

SOIL 596. Masters Proposal**1 Credit**

Current research proposal written by masters level graduate students. Consent of Instructor required. Crosslisted with: AGRO 596, E S 596, GENE 596 and HORT 596. Restricted to: Masters HORT; Masters PLEN majors.

Corequisite(s): Master level graduate students.

SOIL 597. University Teaching Experience**1-3 Credits (1-3)**

Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ES course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures. Consent of instructor required. Crosslisted with: AGRO 597 and HORT 597

SOIL 598. Special Research Programs**1-6 Credits**

Individual investigations, either analytical or experimental. Maximum of 6 credits per semester. No more than 9 credits toward a degree.

SOIL 600. Doctoral Research**1-15 Credits**

Research.

SOIL 625. Scientific Writing- How to be a Productive and Effective Writer**1-3 Credits (1-3)**

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Students in the 625 course will be required to perform additional research than those students in the 525 cross-listing. Crosslisted with: AGRO 525, HORT 525 and EPWS 525.

SOIL 630. Advanced Soil Classification**3 Credits**

Philosophy and organization of various soil classification systems, some international in scope, with emphasis on the new USDA system and classroom and field experience in using this system.

Prerequisite: SOIL 472 or consent of instructor.

SOIL 640. Advanced Soil Microbiology**3 Credits**

Advanced topics in soil microbiology and biochemistry, including carbon cycling, nitrogen cycling, humus formation and nature, and microbial-plant root interactions. Consent of instructor required.

SOIL 650. Advanced Topics**1-3 Credits**

Colloquium on contemporary topics associated with agriculture, environmental science and engineering. Multidisciplinary topics will be chosen to encourage participation of students from diverse disciplines. May be repeated for a maximum of 9 credits.

Prerequisite: consent of instructor.

SOIL 652. Advanced Soil Physics**3 Credits**

Advanced treatment of soil physics, modeling, includes working on an existing/new research project, modeling existing or new data, step by step guide on the use of some 1-D and 2-D models. Specific areas of specialization will be field scale variability of soil properties, water flow, solute transport, and plant water relations.

Prerequisite(s): SOIL 477 and computer literacy; or consent of instructor.

SOIL 655. Moisture Heat Contaminant Transport Modeling**3 Credits**

Provides clear coverage of the basic principles of heat, moisture and contaminant transport through porous media, and a step-by-step guidance and hands on application on the use of some spreadsheet based and physically based one-and two-dimensional transport models. A similar course does not exist in the college for students that can encourage them to pursue modeling as a means of solving vadose zone and groundwater contamination and remediation problems. Consent of instructor required. Pre/

Corequisite(s): Graduate student with at least two 400.

SOIL 694. Doctoral Seminar**1 Credit**

Current research discussions presented by doctoral level graduate students. Not more than 2 credits toward the degree. Same as AGRO 694.

Prerequisite: doctoral level graduate students.

SOIL 696. Doctoral Proposal**1 Credit**

Current research proposal written by doctoral level graduate students. Not more than 1 credit toward the degree. Same as AGRO 696.

Prerequisite: doctoral level graduate students.

SOIL 697. University Teaching Experience**1-3 Credits (1-3)**

Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ES course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures. Consent of instructor required. Crosslisted with: AGRO 697 and HORT 697

SOIL 698. Topics in Agronomy**1-6 Credits**

Topics of current interest, designated by title and credit. Maximum of 6 credits per semester. No more than 9 credits toward a degree.

Agronomy - Bachelor of Science in Agriculture

Agronomy is an understanding of the principles of plant and soil science and an application of these principles in the production of crops. Commercial sector careers include positions in agricultural consulting companies, agricultural seed or chemical companies, research and development with commercial companies, as well as farm and/or ranch management. Careers in county, state or federal agencies are in the areas of USDA, Cooperative Extension Service, Natural Resources Conservation Service, Forest Service and Bureau of Land Management.

Two options are available in the agronomy major. In addition to the completion of the requirements of the major listed above, you must elect an option and complete 25 credits from the requirements for that option. To deviate from the courses required within a concentration, you must file a formal petition, subject to approval by departmental committee. You should develop a specific program of study in consultation with a departmental agronomy advisor.

Requirements

<i>Agronomy and Soil Science Courses</i> ¹		
AGRO 100G	Introductory Plant Science	4
AGRO 305	Principles of Genetics	3
AGRO 365	Principles of Crop Production	4
AGRO 447	Seminar	1
AGRO 483	Sustainable Production of Agronomic Crops	4
SOIL 252	Soils	3
SOIL 252 L	Soils Laboratory	1
SOIL 312	Soil Management and Fertility	3
SOIL 312 L	Soil Management and Fertility Lab	1
Other Required Courses		
A ST 311	Statistical Applications	3
AG E 250	Technology and Communication for Business Management	3
AGRO 449	Special Problems	1-3
BIOL 111G & BIOL 211G	Natural History of Life and Cellular and Organismal Biology	6
CHEM 111G	General Chemistry I	4
CHEM 112G	General Chemistry II	4
CHEM 211	Organic Chemistry	4
Select 3 credits from MATH – to equal the proficiency level of MATH 142G or MATH 121G		3
Select one from the following:		4
EPWS 303	Economic Entomology	

EPWS 310	Plant Pathology	
EPWS 311	Introduction to Weed Science	
Program Concentrations ²		
Crop Consulting or General Agronomy Concentration		25
Total Credits		81-83

¹ requires a grade of C- or above in agronomy and soil science courses

² Two concentrations are available in the agronomy major. In addition to the completion of the requirements of the major listed above, you must elect a concentration and complete 25 credits from the requirements for that option. To deviate from the courses required within an concentration, you must file a formal petition, subject to approval by departmental committee. You should develop a specific program of study in consultation with a departmental agronomy advisor.

Concentration: Crop Consulting

Required Courses

AG E 236	Principles of Food and Agribusiness Management	3
AG E 315V	World Agriculture and Food Problems	3
AG E 450	Spreadsheet Applications in Food and Agriculture	3
AGRO 311	Introduction to Weed Science	4
AGRO 365	Principles of Crop Production (mandatory course)	4
AGRO 462	Plant Breeding (mandatory course)	3
AGRO 483	Sustainable Production of Agronomic Crops (mandatory course)	4
AGRO 492	Diagnosing Plant Disorders (mandatory course)	3
B A 202	Small Business Enterprise	3
EPWS 314	Plant Physiology	3
EPWS 455	Advanced Integrated Pest Management	3
EPWS 373	Fungal Biology	3
HORT 471	Plant Mineral Nutrition	3
HORT 485	Vegetable Crop Management	4
SOIL 456	Irrigation and Drainage	3
SOIL 476	Soil Microbiology	3
SPAN 111	Elementary Spanish I	4
SPAN 211	Intermediate Spanish I	3
Total Credits		59

Concentration: General Agronomy

Required Courses

AG E 236	Principles of Food and Agribusiness Management	3
AG E 305	Marketing and Food Agricultural Products	3
AG E 315V	World Agriculture and Food Problems	3
AGRO 391	Internship	1-6
AGRO 471	Plant Mineral Nutrition (mandatory course)	3
AGRO 492	Diagnosing Plant Disorders (mandatory course)	3

BIOL 312	Plant Taxonomy	3
BIOL 313	Structure and Function of Plants (mandatory course)	3
BLAW 316	Legal Environment of Business	3
EPWS 314	Plant Physiology	3
HORT 250	Plant Propagation	3
HORT 485	Vegetable Crop Management	4
RGSC 294	Rangeland Resource Management	3
RGSC 325	Rangeland Restoration Ecology	3
SOIL 456	Irrigation and Drainage	3
Total Credits		44-49

Agronomy - Undergraduate Minor

Students majoring in subjects other than Agronomy, Horticulture, Soil Science or Turfgrass Management may pursue a minor in Agronomy. Courses in chemistry (CHEM 111G General Chemistry I/CHEM 112G General Chemistry II) and Biology (BIOL 211G Cellular and Organismal Biology) are prerequisites for several of the courses.

Required Courses

AGRO 100G	Introductory Plant Science	4
AGRO 365	Principles of Crop Production	4
SOIL 252	Soils	3
SOIL 252 L	Soils Laboratory	1
SOIL 312	Soil Management and Fertility	3
SOIL 312 L	Soil Management and Fertility Lab	1
Select 3-4 credits from the following to bring the total AGRO and SOIL credits to a minimum of 18 credits:		3-4
AGRO 250	Plant Propagation	
AGRO 305	Principles of Genetics	
AGRO 311	Introduction to Weed Science	
AGRO 315	Crop Physiology	
AGRO 462	Plant Breeding	
AGRO 471	Plant Mineral Nutrition	
AGRO 483	Sustainable Production of Agronomic Crops	
SOIL 456	Irrigation and Drainage	
Total Credits		19-20

Environmental Science - Bachelor of Science in Environmental Science

The environmental science major is a multidisciplinary program based on a strong general science curriculum and an environmental curriculum that focuses on environmental problems and solutions. Although administered by the Department of Plant and Environmental Sciences, a multidisciplinary advisory committee recommends curriculum and other changes to the program. Graduates are very competitive for careers in industry and government and have excellent preparation for graduate programs in a variety of fields. A grade of C- or better must be earned in the Basic Background and Core Requirements.

Requirements

Basic Science Background

A ST 311	Statistical Applications	3
----------	--------------------------	---

BIOL 111G	Natural History of Life	3
BIOL 211G	Cellular and Organismal Biology	3
BIOL 311	General Microbiology	3
CHEM 111G	General Chemistry I	4
CHEM 112G	General Chemistry II	4
CHEM 211	Organic Chemistry	4
GEOL 111G	Introductory to Geology	4
MATH 191G	Calculus and Analytic Geometry I	4
MATH 192G	Calculus and Analytic Geometry II	4
PHYS 215G	Engineering Physics I	3
SOIL 252	Soils	3
SOIL 252 L	Soils Laboratory	1
<i>Environmental Science Core</i>		
E S 110G	Introductory Environmental Science	4
E S 256	Environmental Engineering and Science	3
E S 256 L	Environmental Science Laboratory	1
E S 301	Principles of Ecology	3
E S 312	Emergency Response to Hazardous Material Incidents	2
E S 330	Environmental Management Seminar I	1
E S 361	Basic Toxicology	3
or E S 423	Environmental Toxicology	
E S 370	Environmental Soil Science	3
E S 391	Internship	3
E S 422	Environmental Chemistry	3
E S 430	Environmental Management Seminar II	1
E S 452	Geohydrology	4
E S 460	Introduction to Air Pollution	3
E S 462	Sampling and Analysis of Environmental Contaminants	3
E S 470	Environmental Impacts of Land Use and Contaminant Remediation	3
FWCE 434	Aquatic Contaminants and Toxicology	4
or FWCE 459	Aquatic Ecology	
Total Credits		87

Genetics and Biotechnology - Bachelor of Science in Genetics

Codirectors of the Program:

Professor, Michelle Nishiguchi, Department Head, Biology

Associate Professor, Rolston St. Hilaire, Interim Department Head, Plant and Environmental Sciences

Professors Bosland, Cramer, Houde, Milligan, Nishiguchi, O'Connell, Ray, Sengupta-Gopalan, C. Shuster, St. Hilaire; **Associate Professors** Bailey, Curtiss, M. Shuster, Zhang

Have you ever wondered why your hair or eye color, facial features, or the build of your body resembles that of your parents, grandparents, or other close relatives? What factors are responsible for generating all the variety of colors and shapes of flowers, trees, and different types of animals? If these questions have crossed your mind, then you have been thinking about Genetics; the science of heredity. Genetics is studied at the DNA/

gene/genome level (molecular genetics, biotechnology, genomics and bioinformatics), the level of organisms (classical or Mendelian genetics), and within/among populations of individuals (population and quantitative genetics).

One of the most significant scientific accomplishments in history has been the use of genomic technologies to recently identify most human genes, as well as, most genes for a number of other animals, plants, fungi, and bacteria. Geneticists now have tremendous opportunities to use molecular, biochemical, mathematical, and computer science-based (bioinformatics) approaches to investigate how these genes determine observable traits. This information can be used to significantly advance human health and well being, and to meet the food and fiber needs of the world.

A degree in Genetics can provide excellent preparation for careers in academic research and technical support, teaching, agriculture, the biotechnology industry, medicine and health sciences, forensic science, technical writing, and sales or marketing. It is also an excellent background for students wishing to enter a graduate program, medical school, and veterinary school.

Undergraduates in the Genetics program must earn a grade of C- or better to receive credit for required Basic Science Background and Genetics Core courses. Within the Genetics Core curriculum, Tier I courses must be taken by all majors, for a total of 28 credit hours. To accommodate differing interests among students, a series of Tier II courses comprising 11 to 13 credits are provided. Ethical considerations of genetic based technologies will be infused throughout the curriculum, with a focused course on Science and Ethics in the Tier III portion of the core curriculum.

Requirements

General Education Requirements

<i>Area I: Communications</i>		
English Composition-Level 1. Select one from the following:		4
ENGL 111G	Rhetoric and Composition	
ENGL 111GH	Rhetoric and Composition Honors	
SPCD 111G	Advanced ESL Composition	
ENGL 111 M	Rhetoric and Composition for International and Multilingual Students	
English Composition-Level 2:		
ENGL 218G	Technical and Scientific Communication	3
or ENGL 318G	Advanced Technical and Professional Communication	
Oral Communication. Select one from the following:		3
AXED 201G	Effective Leadership and Communication in Agricultural Organizations	
COMM 253G	Public Speaking	
COMM 265G	Principles of Human Communication	
HON 265G	Principles of Human Communication Honors	
<i>Area II: Mathematics/Algebra</i>		
MATH 191G	Calculus and Analytic Geometry I	4
<i>Area III: Laboratory Science</i>		
CHEM 111G	General Chemistry I	4
CHEM 112G	General Chemistry II	4
<i>Area IV & V: Social/Behavioral Sciences and Humanities and Fine Arts</i>		

Select a total of 15 credits combined from Areas IV and V, with 6 credits in one area and 9 credits in the other area: ¹

Area IV: Social/Behavioral Sciences: Select 6-9 credits ^a

Area V: Humanities and Fine Arts: Select 6-9 credits ¹

Viewing a Wider World

Select one Viewing a Wider World course ² 6

Basic Science Background Requirements

A ST 311	Statistical Applications	3
or BIOL 455	Biometry	
BCHE 395	Biochemistry I	3
BCHE 396	Biochemistry II	3
BIOL 111G	Natural History of Life	3
CHEM 111G	General Chemistry I	4
or CHEM 115	Principles of Chemistry I	
CHEM 112G	General Chemistry II	4
or CHEM 116	Principles of Chemistry II

PHYS 211G	General Physics I	3
or PHYS 221G	General Physics for Life Sciences I	
PHYS 212G	General Physics II	3
or PHYS 222G	General Physics for Life Sciences II	

Core Requirements

Tier I Courses

GENE 110	Experimental Systems in Genetics	1
BIOL 211G	Cellular and Organismal Biology	3
BIOL 211GL	Cellular and Organismal Biology Laboratory	1
BIOL 311	General Microbiology	3
BIOL 311 L	General Microbiology Laboratory	2
GENE 305 L	Genetic Techniques	1
GENE 315	Molecular Genetics	3
GENE 320	Hereditary and Population Genetics	3
BIOL 377	Cell Biology	3
GENE 440	Genetics Seminar	1
GENE 452	Applied Bioinformatics	3
or BIOL 446	Bioinformatics and NCBI Database	
BCHE 494	Biochemical Genetics Laboratory	3
or BIOL 302	Molecular Biology Techniques Laboratory	

Tier II Courses

Select one course from each of the following four areas: 12-14

Selection response:

AGRO 462	Plant Breeding
ANSC 423	Animal Breeding
BIOL 467	Evolution

Physiology:

ANSC 421	Physiology of Reproduction
BIOL 354	Physiology of Humans
BIOL 381	Animal Physiology

BIOL 385	An Introduction to Cancer
BIOL 451	Physiology of Microorganisms
BIOL 474	Immunology
EPWS 314	Plant Physiology
HORT 471	Plant Mineral Nutrition
Organism Structure:	
ANSC 370	Anatomy and Physiology of Farm Animals
BIOL 313	Structure and Function of Plants
BIOL 322	Zoology
BIOL 330	Comparative Anatomy and Embryology
BIOL 382	Plant Signalling and Development
BIOL 470	Developmental Biology
BIOL 465	Invertebrate Zoology
EPWS 303	Economic Entomology
Molecular Genetics:	
BIOL 475	Virology
BIOL 478	Molecular Biology of Microorganisms
GENE 486	Genes and Genomes
GENE 488	Gene Regulation

Tier III Courses 3

Select one from the following:

AGRO 303V	Genetics and Society
HON 306V	Science, Ethics and Society
PHIL 321	Biomedical Ethics

Additional Courses

Select electives to bring total to 120 credits including 48 upper division credits.

Recommended Electives (Honors College)

HON 400	Honors Thesis
Select 9 credits from the following:	
HON 205G	Life, Energy, and Evolution
HON 214	Successful Fellowship Writing
HON 225G	History of Ethics
Select 6 credits from the following:	
HON 306V	Science, Ethics and Society
HON 314	Successful Fellowship Writing
HON 410	Honors Internship

Total Credits 127-129

¹ Total of 15 credits combined between Areas IV and V, with 6 credits in one area and 9 credits in the other area. See General Education Courses (p. 47) for listing of available courses.

² One VWW area will be satisfied using the nine-hour rule. Students with Biology as their home department will use GENE courses and students with Plant and Environmental Science as their home department use BIOL courses.

Horticulture - Bachelor of Science in Agriculture

Horticulture includes a wide variety of topics that relate to fruit, vegetable and ornamental crops. Careers range from production management to processing and marketing, retail and wholesale management, greenhouse

and nursery production, floriculture, landscaping, turf management, research and development, various service activities and positions with local, state and federal agencies.

Required Courses

BIOL 111G	Natural History of Life	3
or BIOL 211G	Cellular and Organismal Biology	
Select one from the following:		8
CHEM 111G & CHEM 112G	General Chemistry I and General Chemistry II	
EPWS 303	Economic Entomology	3
EPWS 310	Plant Pathology	4
EPWS 314	Plant Physiology	3
HORT 447	Seminar	1
MATH 142G	Calculus for the Biological and Management Sciences	3
or MATH 121G	College Algebra	
SOIL 252	Soils	3

Horticulture Courses

Select at least 29 credits from the following: ¹		29
HORT 100G	Introductory Plant Science	
HORT 200	Special Topics	
HORT 205	Introduction to Horticulture	
HORT 210	Ornamental Plants I	
HORT 211	Ornamental Plants II	
HORT 240	Floral Quality Evaluation and Design	
HORT 241	Floriculture Field Practicum	
HORT 250	Plant Propagation	
HORT 300	Special Topics	
HORT 302V	Forestry and Society	
HORT 305	Principles of Genetics	
HORT 307	Landscape Design	
HORT 310	Medicinal Herbs	
HORT 365	Principles of Crop Production	
HORT 377	Introduction to Turfgrass Management	
HORT 391	Internship	
HORT 447	Seminar	
HORT 449	Special Problems	
HORT 450	Special Topics	
HORT 462	Plant Breeding	
HORT 465	Landscape Construction and Maintenance	
HORT 471	Plant Mineral Nutrition	
HORT 485	Vegetable Crop Management	
HORT 488	Greenhouse Management	
HORT 492	Diagnosing Plant Disorders	

Program Concentrations/Options ²

Select one from the following concentrations/options:		24-44
Crop Consulting		
General Horticulture		
Horticulture Business		
Landscape Design		

Ornamental Horticulture

Total Credits	81-101
---------------	--------

¹ requires a grade of C- or above in horticulture courses

² Four concentrations and one option are available in the horticulture major. In addition to the completion of the requirements of the major listed above, you must elect a concentration or an option and complete the requirements for that option. You should develop a specific program of study in consultation with a departmental horticulture advisor. To deviate from the courses required within a concentration or an option, you should develop a specific program of study in consultation with a departmental horticulture advisor.

If you want to apply for certification as a professional horticulturist, you should also complete:

HORT 305	Principles of Genetics	3
BCHE 341	Survey of Biochemistry	4
or CHEM 211	Organic Chemistry	

Total Credits	7
---------------	---

Concentration: Crop Consulting

Required Courses

Select 13-14 credits from the following:		13-14
--	--	-------

HORT 365	Principles of Crop Production	
HORT 462	Plant Breeding	
HORT 471	Plant Mineral Nutrition	
HORT 485	Vegetable Crop Management	
HORT 492	Diagnosing Plant Disorders	

Select 24-27 credits from the following:		24-27
--	--	-------

AG E 236	Principles of Food and Agribusiness Management	
AG E 250	Technology and Communication for Business Management	
AG E 315V	World Agriculture and Food Problems	
AG E 450	Spreadsheet Applications in Food and Agriculture	
AGRO 311	Introduction to Weed Science	
AGRO 483	Sustainable Production of Agronomic Crops	
B A 202	Small Business Enterprise	
BIOL 301	Principles of Ecology	
BIOL 313	Structure and Function of Plants	
EPWS 373	Fungal Biology	
EPWS 455	Advanced Integrated Pest Management	
EPWS 481	Plant Nematology	
FSTE 320	Food Microbiology	
FSTE 421	Food Chemistry	
SOIL 312	Soil Management and Fertility	
SOIL 456	Irrigation and Drainage	
SOIL 476	Soil Microbiology	
SPAN 111	Elementary Spanish I	
SPAN 211	Intermediate Spanish I	

Total Credits	37-41
---------------	-------

Option: General Horticulture

Required Courses

Select 12-16 credits from the following: 12-16

A ST 311	Statistical Applications
BCHE 341	Survey of Biochemistry
CHEM 211	Organic Chemistry
HORT 210	Ornamental Plants I
HORT 211	Ornamental Plants II
HORT 250	Plant Propagation
HORT 305	Principles of Genetics
HORT 307	Landscape Design
HORT 315	Crop Physiology
HORT 365	Principles of Crop Production
HORT 462	Plant Breeding
HORT 465	Landscape Construction and Maintenance
HORT 471	Plant Mineral Nutrition
HORT 485	Vegetable Crop Management
HORT 488	Greenhouse Management
HORT 492	Diagnosing Plant Disorders

Select 20-28 credits from the following: 20-28

A ST 311	Statistical Applications
A ST 456	Statistical Methods and Data Analysis
ACCT 221	Financial Accounting
ACCT 222	Management Accounting
AG E 236	Principles of Food and Agribusiness Management

MKTG 303	Principles of Marketing
MKTG 313	Retail Management
SOIL 312	Soil Management and Fertility

Total Credits 39-40

³ or similar alternative courses with same prefix and level after consultation with advisor

Horticulture - Master of Science

Prerequisite to major graduate work is completion of a curriculum essentially equivalent to that required by the department for the BS degree at New Mexico State University. Qualifications for admission will be reviewed by the departmental graduate faculty. Applications should include a letter of interest. A 3.0 undergraduate grade-point average is needed for admission to study for the MS degree. The department requires the GRE scores and three letters of recommendation, transcripts, as well as the student's letter of interest as an admission requirement. Acceptance requires that a graduate faculty member in the applicant's area of interest accept the student into their program.

Horticulture - Undergraduate Minor

Students majoring in subjects other than Agronomy, Environmental Sciences, Soil Science and Turfgrass Management may pursue a minor in Horticulture. Courses in chemistry (CHEM 111G General Chemistry I/CHEM 112G General Chemistry II) and biology (BIOL 211G Cellular and Organismal Biology) are prerequisites for several of the courses.

Required Courses

HORT 100G	Introductory Plant Science	4
HORT 250	Plant Propagation	3
SOIL 252	Soils	3

Select 9 credits from the following: ¹ 9

HORT 305	Principles of Genetics
HORT 307	Landscape Design
HORT 310	Medicinal Herbs
HORT 365	Principles of Crop Production
HORT 377	Introduction to Turfgrass Management
HORT 378	Turfgrass Science
HORT 391	Internship
HORT 462	Plant Breeding
HORT 465	Landscape Construction and Maintenance
HORT 471	Plant Mineral Nutrition
HORT 485	Vegetable Crop Management
HORT 488	Greenhouse Management
HORT 492	Diagnosing Plant Disorders

Total Credits 19

¹ or other upper division HORT courses deemed appropriate by student's advisor

Plant and Environmental Science - Doctor of Philosophy

Qualifications for admission will be reviewed by the departmental graduate faculty. Applications should include a letter of interest. A 3.3 undergraduate grade-point average is needed for admission for Ph.D. studies. The department requires the GRE scores and three letters of recommendation, transcripts, as well as the student's letter of interest as an admission requirement. Acceptance requires that a graduate faculty member in the applicant's area of interest accept the student into their program.

A student planning a program leading to a Ph.D. must satisfy one of the following departmental requirements approved by the doctoral committee:

1. A thorough knowledge of a language other than English
2. A reading ability in two foreign languages
3. Reading ability in one foreign language and proficiency with a research tool
4. Reading ability in one foreign language and one semester of supervised teaching experience
5. Proficiency with a research tool and one semester of supervised teaching
6. Two semesters of supervised teaching

A number of graduate assistantships are available each year. Inquiries should be addressed to the department.

Plant and Environmental Science - Master of Science

Qualifications for admission will be reviewed by the departmental graduate faculty. Applications should include a letter of interest. A 3.0 undergraduate grade-point average is needed for admission to study for the M.S degree. The department requires the GRE scores and three letters of recommendation, transcripts, as well as the student's letter of interest as an admission requirement. Acceptance requires that a graduate faculty member in the applicant's area of interest accept the student into their program.

Soil Science - Bachelor of Science in Agriculture

Soil scientists investigate the physical, chemical and biological characteristics and behaviors of soils, their description and classification, and their management for both agricultural and non-agricultural uses. Career opportunities include: industry jobs; environmental consulting firms; and federal, state and local government careers working on various environmental, agricultural and ecological projects.

Requirements

In addition to the courses listed for each major, you must take 35 credits in the College of Agricultural, Consumer and Environmental Sciences. You must also meet university general education requirements. At least

24 credits of soil science related courses with a grade of C- or above including:

Required Courses

SOIL 252	Soils	3
SOIL 252 L	Soils Laboratory	1
SOIL 312	Soil Management and Fertility	3
SOIL 312 L	Soil Management and Fertility Lab	1
SOIL 447	Seminar	1
Select 12-13 credits from the following:		12-13
SOIL 424	Soil Chemistry	3
SOIL 456	Irrigation and Drainage	3
SOIL 472	Soil Morphology and Classification	4
SOIL 476	Soil Microbiology	3
SOIL 477	Environmental Soil Physics	3

Other Required Courses

Select two from the following:		6
BIOL 111G	Natural History of Life	3
BIOL 211G	Cellular and Organismal Biology	3
BIOL 311	General Microbiology	3
CHEM 111G	General Chemistry I	4
CHEM 112G	General Chemistry II	4
GEOL 111G	Introductory to Geology	4
MATH 142G	Calculus for the Biological and Management Sciences	3
PHYS 211G	General Physics I	3
Total Credits		70-71

Soil Science Options

Three options are available in soil science. In each case, your academic advisor has a list of appropriate courses.

Option: Environment and Resource Management

Soil science is integrated into the management of the environment and natural resources. Students interested in careers of conservation, environmental management, urban planning, waste disposal and related fields in government and industry may choose from a variety of course offerings. The economic and social implications as well as the technological aspects of resource management are included in the option courses.

You must select one course from each of the four following subject matter areas and a total of at least ten courses:

30

Soil, Water, Wildlife or Range Conservation and Economics

A EN 475	Soil and Water Conservation
A EN 478	Irrigation and Drainage Engineering
C E 256	Environmental Engineering and Science
C E 331	Fluid Mechanics and Hydraulics
C E 356	Fundamentals of Environmental Engineering
C E 357	Soil Mechanics
C E 482	Hydraulic Structures
C E 483	Surface Water Hydrology
RGSC 294	Rangeland Resource Management
RGSC 318	Watershed Management

RGSC 325	Rangeland Restoration Ecology
RGSC 440	Rangeland Resource Ecology
RGSC 460	Rangeland and Natural Resource Planning and Management
Any SOIL Course	
Any FWCE course numbered 255-499	
<i>Ecology, Plant Biology or Crop Production:</i>	
AGRO 311	Introduction to Weed Science
AGRO 315	Crop Physiology
AGRO 365	Principles of Crop Production
AGRO 462	Plant Breeding
AGRO 471	Plant Mineral Nutrition
AGRO 483	Sustainable Production of Agronomic Crops
AGRO 492	Diagnosing Plant Disorders
BIOL 301	Principles of Ecology
BIOL 312	Plant Taxonomy
BIOL 314	Plant Physiology
BIOL 408	Ecology of Plants
BIOL 462	Conservation Biology
BIOL 470	Developmental Biology
BIOL 471	Molecular and Cellular Mycology
BIOL 473	Ecology of Microorganisms
BIOL 477	Applied and Environmental Microbiology
E S 423	Environmental Toxicology
EPWS 303	Economic Entomology
EPWS 310	Plant Pathology
EPWS 311	Introduction to Weed Science
EPWS 373	Fungal Biology
EPWS 455	Advanced Integrated Pest Management
EPWS 462	Parasitology
EPWS 481	Plant Nematology
EPWS 486	Plant Virology
EPWS 492	Diagnosing Plant Disorders
HORT 205	Introduction to Horticulture
HORT 250	Plant Propagation
HORT 307	Landscape Design
HORT 310	Medicinal Herbs
HORT 465	Landscape Construction and Maintenance
HORT 471	Plant Mineral Nutrition
HORT 485	Vegetable Crop Management
HORT 488	Greenhouse Management
TOX 361	Basic Toxicology
TOX 461	Toxicology I
<i>Earth, Mineral or Climatic Resources:</i>	
AG E 315V	World Agriculture and Food Problems
AG E 337V	Natural Resource Economics
AG E 384V	Water Resource Economics
AG E 385	Applied Production Economics
AG E 456	Case Studies in Food and Agribusiness Management
Any E S course	

Any GEOG course numbered 257-499	
Any GEOL course numbered 295-499	
Any SUR course	
<i>Math, Statistical or Computer Sciences:</i>	
A ST 311	Statistical Applications
Any 300-level BCIS course	
Any 300-level C S course	
Any 300-level CHEM course	
Any 300-level MATH course	
Any 300-level PHYS course	
Any STAT course numbered 311-499	
Total Credits	30

Option: Soils

Crop production and plant growth are emphasized in the general soils option. Soil management, soil conservation, and soil reclamation are related to plant growth for those students interested in both private industry and government employment opportunities as well as farm management.

You must select one course from each of the four following subject matter areas and a total of at least ten courses: 30

<i>Soil, Water and Agricultural Business Management:</i>	
GEOG 381	Cartography and Geographic Information Systems
GEOG 481	Fundamentals of Geographic Information Science and Technology (GIS & T)
GEOL 295	Environmental Geology
GEOL 353	Geomorphology
GEOL 475	Geology of Mineral Resources
Any AG E course	
Any SOIL course	
<i>Crop Production and Protection:</i>	
AGRO 311	Introduction to Weed Science
AGRO 365	Principles of Crop Production
AGRO 471	Plant Mineral Nutrition
AGRO 483	Sustainable Production of Agronomic Crops
AGRO 485	Materials from Biorenewable Resources
AGRO 492	Diagnosing Plant Disorders
HORT 250	Plant Propagation
HORT 307	Landscape Design
HORT 310	Medicinal Herbs
HORT 365	Principles of Crop Production
HORT 462	Plant Breeding
HORT 465	Landscape Construction and Maintenance
HORT 485	Vegetable Crop Management
Any EPWS course	
<i>Plant Biology and Ecology:</i>	
BIOL 301	Principles of Ecology
BIOL 312	Plant Taxonomy
BIOL 314	Plant Physiology
BIOL 408	Ecology of Plants

BIOL 462	Conservation Biology
BIOL 470	Developmental Biology
BIOL 471	Molecular and Cellular Mycology
C E 256	Environmental Engineering and Science
C E 355V	Technology and the Global Environment
RGSC 294	Rangeland Resource Management
RGSC 316	Rangeland Plants
RGSC 317	Rangeland Communities
RGSC 325	Rangeland Restoration Ecology
RGSC 357	Grass Taxonomy and Identification
RGSC 440	Rangeland Resource Ecology
RGSC 452	Vegetation Measurements for Rangeland Assessment
RGSC 460	Rangeland and Natural Resource Planning and Management

Advanced Science, Computing and Statistics:

A ST 311	Statistical Applications
Any 300-level BCIS course	
Any 300-level C S course	
Any 300-level CHEM course	
Any 300-level MATH course	
Any 300-level PHYS course	
Any STAT course numbered 311-499	

Total Credits 30

Option: Soil and Water Science

The soil and water science option is for students interested in careers in water management and water quality. Employment opportunities exist with irrigation districts, consulting firms, and government agencies dealing with water management and quality. The optimum use of water in semi-arid areas is emphasized through selection of courses in the technical and social sciences.

You must select one course from each of the four following subject matter areas and a total of at least ten courses: 30

Crop Production and Water Use:

AGRO 365	Principles of Crop Production
AGRO 471	Plant Mineral Nutrition
AGRO 483	Sustainable Production of Agronomic Crops
AGRO 492	Diagnosing Plant Disorders
EPWS 311	Introduction to Weed Science
EPWS 314	Plant Physiology
HORT 307	Landscape Design
HORT 315	Crop Physiology
HORT 462	Plant Breeding
HORT 485	Vegetable Crop Management
HORT 488	Greenhouse Management

Soil and Water Engineering and Management:

A EN 459	Design of Water Wells/Pumping Systems
A EN 475	Soil and Water Conservation
A EN 478	Irrigation and Drainage Engineering
AG E 337V	Natural Resource Economics
C E 256	Environmental Engineering and Science

C E 356	Fundamentals of Environmental Engineering
C E 357	Soil Mechanics
C E 382	Hydraulic and Hydrologic Engineering
C E 452	Geohydrology
C E 482	Hydraulic Structures
C E 483	Surface Water Hydrology
SOIL 424	Soil Chemistry
SOIL 456	Irrigation and Drainage
SOIL 477	Environmental Soil Physics
SOIL 477 L	Environmental Soil Physics Laboratory
SOIL 479	Environmental Soil Chemistry

Ecology

BIOL 221	Introductory Microbiology
BIOL 301	Principles of Ecology
BIOL 408	Ecology of Plants
BIOL 462	Conservation Biology
BIOL 471	Molecular and Cellular Mycology
BIOL 477	Applied and Environmental Microbiology
GEOG 315V	World Agriculture and Food Problems
GEOG 357	Climatology
GEOG 382	Aerial Photo Interpretation
GEOG 435	Environmental Planning
GEOG 452	Landscape Ecology
GEOG 455	Southwest Environments
GEOL 295	Environmental Geology
RGSC 325	Rangeland Restoration Ecology
RGSC 440	Rangeland Resource Ecology
RGSC 452	Vegetation Measurements for Rangeland Assessment
SOIL 472	Soil Morphology and Classification
SOIL 476	Soil Microbiology

Advanced Science, Computing and Statistics:

A ST 311	Statistical Applications
Any 300-level BCIS course	
Any 300-level C S course	
Any 300-level CHEM course	
Any 300-level MATH course	
Any 300-level PHYS course	
Any STAT course numbered 311-499	

Total Credits 30

Soil Science - Undergraduate Minor

College of Agriculture and Home Economics constants are not required for those students majoring in other colleges. However, CHEM 111G General Chemistry I and concurrent enrollment in CHEM 112G General Chemistry II are prerequisites for most SOIL courses.

Required Courses

SOIL 252	Soils	3
SOIL 252 L	Soils Laboratory	1
SOIL 312	Soil Management and Fertility	3
SOIL 312 L	Soil Management and Fertility Lab	1

SOIL 472	Soil Morphology and Classification	4
Select any SOIL course to bring the total SOIL credit hours to 18.		6
Total Credits		18

Turfgrass Science and Management - Bachelor of Science in Agriculture

Turfgrass managers help build, maintain, and manage golf courses, athletic fields, parks, and other recreational areas. The curriculum of each option allows you to focus on a specific segment of the turfgrass industry. All majors are required to pursue two internships with a golf course, parks department, athletic field, lawn care operator or other acceptable turfgrass segment. A grade of C- or above in all Core & Option credits is required.

Requirements

<i>Core Requirements I</i>		
CHEM 111G	General Chemistry I	4
CHEM 112G	General Chemistry II	4
EPWS 311	Introduction to Weed Science	4
EPWS 314	Plant Physiology	3
HORT 377	Introduction to Turfgrass Management	4
HORT 378	Turfgrass Science	4
HORT 391	Internship (two internships)	1-6
HORT 447	Seminar	1
HORT 479	Advanced Turfgrass Science	3
MATH 121G or MATH 142G	College Algebra Calculus for the Biological and Management Sciences	3
SOIL 252	Soils	3
BIOL 211G	Cellular and Organismal Biology	3
<i>Core Requirements II</i>		
Select 27 credits from the following: ¹		27
CHEM 211	Organic Chemistry

School of Hotel, Restaurant and Tourism Management

Undergraduate Program Information

The School of Hotel, Restaurant & Tourism Management is committed to the broad land-grant mission of New Mexico State University. The school's mission is to serve the needs of our constituents through innovative teaching, research, service, professional applications and partnerships in a multi-cultural and international environment.

This bachelor degree program prepares students for supervisory and management positions in all areas of the diverse and growing hospitality and tourism industry. The program also provides a foundation for continuing development to advance to more senior management or to pursue entrepreneurial opportunities. In this professional program, faculty, students and industry partners bring together theory and practice to forge hospitality management excellence. The curriculum is designed to educate students as individuals and professionals in a changing society. Students will take a core curriculum until senior year, when they develop an individual plan with a faculty advisor for selecting professional elective courses. A grade of C- or better must be earned in each upper-division HRTM class to satisfy the requirement of the major.

Students are required to participate in an internship program that is offered only after completion of 400 hours of hospitality work experience (practicum). The HRTM 307 Professional Development, HRTM 408 Hospitality Internship, and HRTM 409 HRTM Internship Seminar internship sequence, which includes another 400 hours in the field, must be completed prior to enrolling in other 400-level professional electives. Thus, at the end of both the work experience practicum and the internship, students will have completed a minimum of 800 hours professional work experience in the field.

Degree for the Department

Hotel, Restaurant and Tourism Management - Bachelor of Science (p. 170)

Hotel, Restaurant and Tourism Management - Undergraduate Minor (p. 171)

Director - Jean Hertzman

Professors - Priscilla Bloomquist; Jean Hertzman; Keith Mandabach; Betsy Stringam **Associate Professors** - Gregory Blanch **College Assistant Professors** - Daren Bloomquist; Julie Correa; John Hartley; Peter Mitchell

HRTM 111. Freshman Orientation

1 Credit

Orientation to university life, including available resources and methods to promote success at NMSU. Open to all freshmen and transfer students. Graded S/U.

HRTM 200. Special Topics

1-4 Credits

Specific subjects and credits to be assigned on a semester basis for both lecture and laboratory assignments. May be repeated for a maximum of 4 credits.

Prerequisite: consent of instructor.

HRTM 201. Introduction to Tourism

3 Credits

Survey of travel and tourism development and operating characteristics.

HRTM 221. Introduction to Hospitality Management

3 Credits

Overview of the major segments of the hospitality industry, with a focus on basic management principles.

HRTM 231. Safety, Sanitation and Health in the Hospitality Industry

2 Credits

Addresses public health, HACCP, safety and culinary nutrition responsibilities in the hospitality industry. Sanitation certification test allows students to receive national credential.

HRTM 263. Food Production and Service Fundamentals

3 Credits (1+4P)

Basic overview of food service systems including menu management, purchasing and production. The course includes basic principles of food fabrication and production. Topics include knife skills, culinary terminology, product identification, quality standards, nutritional cooking theory and application of food preparation techniques. The course includes laboratory aspects and demonstration of basic food production techniques, service styles, practices and procedures in food service operations including culinary math. This course provides students with an understanding of food service sanitation and culinary nutrition. Completion of a national certification examination is required. Restricted to Las Cruces campus only.

Prerequisite(s): HRTM 221 or FSTE 263G.

HRTM 301. Hotel, Restaurant, and Tourism Marketing

3 Credits

The development of effective marketing programs for hospitality service organizations. Prerequisites: HRTM 221

HRTM 302. Hospitality Management Accounting**3 Credits**

Specialized accounting for hotel revenue and expenses; accounting for inventory, property, and equipment; hospitality payroll accounting; hotel departmental financial statements; income statement, balance sheet, and statement of cash flows; the analysis of financial statements; interim and annual reports; budgeting expenses; forecasting sales; budgetary reporting and analysis; and financial decision making.

Prerequisite: ACCT 221.

HRTM 304. Hospitality and Travel Law**3 Credits**

Specialized applications of the law to the hospitality and tourism industry.

Prerequisite: HRTM 221.

HRTM 307. Professional Development**1 Credit**

Covers essential elements of career management including preparation for a successful internship. Restricted to majors. Graded S/U.

HRTM 311. Hospitality Leadership Management**3 Credits**

Examines modern leadership theory in the context of the hospitality industry. Connects contemporary leadership topics to their historical antecedents through focused reading, discussion and film.

Prerequisites: HRTM 221 and HRTM 201.

HRTM 331. Hotel Operations I**3 Credits**

Analysis of hotel systems design, process, and applications for operating areas including guest services, reservations, reception, telecommunications, guest/city ledger, and the night audit.

Prerequisites: HRTM 201 and HRTM 221.

HRTM 363. Quantity Food Production and Service**6 Credits (1+10P)**

Covers quantity food production including cooking concepts, sanitation and safety, teamwork, and management responsibilities. Students will apply this knowledge developing product for sale in a student run restaurant. Proof of current ServSafe or NM Food Handler certification required. May be repeated up to 6 credits. Crosslisted with: HNDS 363.

Prerequisite(s): HRTM 263.

HRTM 404. Gaming Operations and Organization**3 Credits**

Introduction to the multi-billion-dollar industry, including an historical overview, social and economic impacts of gaming, and casino operations.

Prerequisites: HRTM 201 and HRTM 221.

HRTM 408. Hospitality Internship**1 Credit**

Hospitality and tourism professional work experience for HRTM majors only. Restricted to majors.

Prerequisites: HRTM 307 and consent of instructor.

HRTM 409. HRTM Internship Seminar**1 Credit**

A case based approach to analyzing internship experiences. Students will write case studies about specific business issues they encountered during HRTM 408 (Internship) and analyze them. Restricted to majors.

Prerequisites: HRTM 408.

HRTM 410. Hospitality Cost Control**3 Credits**

Familiarizes students with all aspects of cost control including financial data entry and hospitality accounting practices, financial report production, analysis and problem solving. Students will learn to understand the roles of the various stakeholders (owners, managers, employees and customers.) Provides tools needed to communicate effectively about global financial issues affecting the hospitality business.

Prerequisite: HRTM 408.

HRTM 412. Beverage Management**3 Credits**

Survey of all aspects of beverage management, including wine/beer/distilled spirits origins and trends, cost control, bar management, beverage purchasing, and wine appreciation.

Prerequisite: HRTM 408.

HRTM 413. Restaurant Operations Management**4 Credits (1+6P)**

Provides a detailed understanding of the processes of restaurant operations management. Students are expected to increase kitchen technical skills, learn to cook from recipes and develop a personal culinary style. Provides the opportunity to perform a detailed analysis of a food and beverage operation, including running and selectively analyzing the reports from systems. Proof of current NM Alcohol Server certification required. May be repeated up to 4 credits.

Prerequisite(s): HRTM 363.

HRTM 414. International Food and Wine**3 Credits**

An experiential examination of wine through lectures, films, guest speakers and focused tasting of food and wine. Topics include viticulture, wine making varietals, terroir, and food pairings. Student must be at least 21 years old.

Prerequisite: consent of instructor.

HRTM 420. Club Management and Marketing**3 Credits**

Provides an understanding of the general operational and administrative procedures practiced in private clubs from a marketing perspective with a special emphasis on managing and marketing club food and beverage operations and service. It will provide the professional golf management and hospitality students with the unique sensitivities required in managing and operating in the increasingly lucrative club management market.

HRTM 430. Hospitality Facilities Management**3 Credits**

Exploration of the engineering and maintenance requirements specific to the hospitality industry. Emphasis on environmental issues, renovation and management of the physical plant.

Prerequisite(s): HRTM 331, HRTM 408.

HRTM 431. Hotel Operations II**3 Credits**

The duties and administration of a hotel front office, including housekeeping. Additional focus on the procedures of reservations and night audit. Students also gain exposure to property management systems.

Prerequisite(s): HRTM 331, HRTM 408.

HRTM 432. Hotel Revenue and Sales Management**3 Credits**

Examines methods used for profitably managing capacity, including dynamic pricing and allocation of the rooms inventory across market segments to maximize revenues. Focuses on the integration of revenue management principles with information technology, management, marketing and sales concerns at the property and market level.

Prerequisite: HRTM 408.

HRTM 433. Training for Hospitality Operations**3 Credits**

Analysis of training needs and methods in hospitality organizations.

Prerequisite(s): MGT 332.

HRTM 434. Senior Capstone Experience**3 Credits**

Synthesizes all previous work. Students apply multi-disciplinary principles to the analysis of hospitality business cases and tourism problems.

Prerequisite: HRTM 408.

HRTM 443. Meetings, Conventions and Special Events**3 Credits**

Examination of the role of the meeting/event planner, including setting objectives, site selection, negotiations, design, budgeting, marketing, registration, on-site logistics, and evaluation. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): HRTM 408.

HRTM 450. Special Topics**1-4 Credits**

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

Prerequisite: consent of instructor.

HRTM 492. Special Problems**1-4 Credits**

Individual research in a selected subject area of hospitality management. Maximum of 4 credits per semester and a total of 6 credits toward a degree.

Prerequisite: consent of instructor.

HRTM 507. Hospitality and Tourism Internship**3 Credits**

Supervised placement in a hospitality or tourism organization. An in-depth written report of the experience is required. Graded S/U.

Prerequisite: consent of instructor.

HRTM 510. Hospitality Cost Control**3 Credits**

Familiarizes students with all aspects of cost control including financial data entry and hospitality accounting practices, financial report production, analysis and problem solving. Students will learn to understand the roles of the various stakeholders (owners, managers, employees and customers). Provides tools needed to communicate effectively about global financial issues affecting the hospitality business. Same as HRTM 410 with additional work for graduate credit. Consent of Instructor required.

HRTM 512. Beverage Management**3 Credits**

Survey of all aspects of beverage management, including wine/beer/distilled spirits origins and trends, cost control, bar management, beverage purchasing, and wine appreciation. Same as HRTM 412 with additional work for graduate credit. Consent of Instructor required.

HRTM 530. Facilities Management**3 Credits**

Exploration of the engineering and maintenance requirements specific to the hospitality industry. Emphasis on environmental issues, renovation and management of the physical plant. Same as HRTM 430 with additional work for graduate credit. Consent of Instructor required.

HRTM 531. Hotel Operations II**3 Credits**

The duties and administration of a hotel front office, including housekeeping. Additional focus on the procedures of reservations and night audit. Students also gain exposure to property management systems. Same as HRTM 431 with additional work for graduate credit. Consent of Instructor required.

HRTM 532. HOTEL REV/SALES MGT**3 Credits**

Examines methods used for profitably managing capacity, including dynamic pricing and allocation of the rooms inventory across market segments to maximize revenues. Focuses on the integration of revenue management principles with information technology, management, marketing and sales concerns at the property and market level. Same as HRTM 432 with additional work for graduate credit. Consent of Instructor required.

HRTM 543. Meetings, Conventions and Special Events**3 Credits**

Examination of the role of the meeting/event planner, including setting objectives, site selection, negotiations, design, budgeting, marketing, registration, on-site logistics, and evaluation. Same as HRTM 443 with additional work for graduate credit. Consent of Instructor required.

HRTM 590. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree.

Prerequisite: consent of instructor.

HRTM 598. Special Research Programs**1-4 Credits**

Individual investigations, either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree.

Prerequisite: consent of instructor.

HRTM 599. Master's Thesis**6 Credits**

Thesis.

Prerequisite: consent of instructor.

Hotel, Restaurant and Tourism Management - Bachelor of Science

Core Courses

General Education Requirements

Select 36 credits of general education requirements and 6 credits of Viewing A Wider World Courses.^{1, 2}

Departmental Requirements

HRTM 201	Introduction to Tourism	3
HRTM 221	Introduction to Hospitality Management	3
HRTM 263	Food Production and Service Fundamentals	3
HRTM 301	Hotel, Restaurant, and Tourism Marketing	3
HRTM 302	Hospitality Management Accounting	3
HRTM 304	Hospitality and Travel Law	3
HRTM 307	Professional Development	1
HRTM 311	Hospitality Leadership Management	3
HRTM 331	Hotel Operations I	3
HRTM 363	Quantity Food Production and Service	6
HRTM 408	Hospitality Internship	1
HRTM 409	HRTM Internship Seminar	1
HRTM 410	Hospitality Cost Control	3
HRTM 430	Hospitality Facilities Management	3
HRTM 434	Senior Capstone Experience ³	3

Nondepartmental Requirements

A ST 251G	Statistics for Business and the Behavioral Sciences ⁴	3
or STAT 251G	Statistics for Business and the Behavioral Sciences	
ACCT 221	Financial Accounting	3
Select one from the following:		3-6
ECON 201G	Introduction to Economics	
ECON 251G & ECON 252G	Principles of Macroeconomics and Principles of Microeconomics ⁵	
FIN 341	Financial Analysis and Markets	3
MGT 309	Human Behavior in Organizations	3
MGT 332	Human Resources Management	3
SPAN 111	Elementary Spanish I (or any higher level Spanish course)	4
Any MKTG #300 and above		3

Departmental Electives

Select 9 credits of Professional Departmental Electives in consultation with your advisor. 9

Student may need open elective credits to bring total credits to 120 credits for graduation.

Total Credits 118-121

- ¹ A list of specific general education requirements available in the department. Please check with your advisor.
- ² Viewing A Wider World Requirement - Two courses in two different colleges, with at least one from outside ACES. See list of approved courses in the catalog. (300+ level courses with a "V" behind them.)
- ³ Complete during final semester.
- ⁴ Counts as Area II - Math/Algebra requirement
- ⁵ Counts as Area IV - Social/Behavioral Sciences requirement

Departmental Electives

Select 9 credits of Departmental Electives. The following are typical offerings: 9

HRTM 412	Beverage Management
HRTM 413	Restaurant Operations Management

HRTM 414	International Food and Wine
HRTM 420	Club Management and Marketing
HRTM 431	Hotel Operations II
HRTM 432	Hotel Revenue and Sales Management
HRTM 443	Meetings, Conventions and Special Events
HRTM 450	Special Topics (If pre-approved)
HRTM 492	Special Problems (If pre-approved)

Total Credits 9

Hotel, Restaurant and Tourism Management - Undergraduate Minor

A minor in the School of Hotel, Restaurant and Tourism Management consists of 18 or more credit hours of approved course work of which at least 12 must be numbered 300 or higher: all completed with a grade of "C" or higher.

Requirements**Required Courses:**

HRTM 221	Introduction to Hospitality Management	3
HRTM 302	Hospitality Management Accounting	3

Choose one additional HRTM course (200-level): 3

HRTM 201	Introduction to Tourism
HRTM 263	Food Production and Service Fundamentals

Choose nine credits of 300-level courses: 9

HRTM 301	Hotel, Restaurant, and Tourism Marketing
HRTM 304	Hospitality and Travel Law
HRTM 311	Hospitality Leadership Management
HRTM 331	Hotel Operations I
HRTM 363	Quantity Food Production and Service

Total Credits 18

Permission to take the Hospitality Internship sequence of classes or HRTM 400 level classes may be granted on an individual basis.

Water Science and Management Graduate Program Information

New Mexico faces serious challenges concerning the supply, development, quality, management and administration of water resources; responses to the challenges will have major impacts on the regional economy, environmental quality and the quality of life of the residents of New Mexico. A major need exists to train the next generation of water resource researchers, educators, and managers to address these challenges, both inside and outside New Mexico. To help meet these needs, an interdisciplinary program in Water Science & Management (WSM) has been developed at NMSU by the departments of

- Agricultural Economics and Agricultural Business,
- Animal and Range Science,
- Civil Engineering,
- Geography, and

- Plant and Environmental Sciences.

The primary purposes of the interdisciplinary masters and doctoral degree programs in WSM are to provide graduate education for addressing state, national, and international water issues, and to train the next generation of water professionals needed to meet the challenges noted above. A Master of Science WSM degree can be earned with 26 credits of formal course work, plus additional thesis research credits, and a Doctor of Philosophy WSM can be earned with 30-40 credits of formal course work beyond the masters, plus additional dissertation research credits.

Five (5) fields of study are offered in the program and are detailed below (suggested classes for each area are detailed in the following section):

- **Agricultural Water Resources** relates to the major use of ground and surface water in providing safe and secure food systems while ensuring ecosystem services. This field of study includes water allocation, water conservation and water management issues facing urban water supply and irrigated agriculture.
- **Watershed, Riparian and Aquatic Systems** includes the processes of organizing and guiding land and other resources used in a river basin to provide desired goods and services without adversely affecting soil and water resources. Watershed, riparian, and aquatic system management involves an array of nonstructural (vegetation management) practices, as well as an array of structural (engineering) activities, when conditions warrant.
- **Water Quality and Treatment** includes processes used to make water acceptable for desired end-uses. These can include use as drinking water, industrial processes, agricultural uses and environmental management. The goal of water treatment processes is to remove existing contaminants in the water or reduce the concentration of such contaminants so the water becomes fit for its desired end-use.
- **Water Economics and Policy** examines the demand for water by all its competing uses, including irrigated agriculture, energy, urban supply, and environmental restoration and management. Policies are examined for their influence on water supplies, water demands, and economic values of water reallocations among agricultural, environmental, energy, and urban users. It examines the role of water markets, water user decisions, institutional adjustments, and water-related policies with respect to resource costs, water quality, profitability, and environmental effects.
- **Water Informatics** is an interdisciplinary science primarily concerned with the collection, classification, manipulation, storage, retrieval and especially the dissemination of water information, including both human and machine readable documents. Examples of human readable documents include maps, field data sheets, operational schedules, and long term asset management plans with narrative text. Machine readable documents include files for geographic information systems (GIS), Global Positioning Systems (GPS), relational database management systems and emerging applications.

Admission Requirements

Admission Requirements for the Master of Science (MS) in water science and management include all general requirements for a graduate degree as set forth in the NMSU Catalog, plus the following:

- Possession of a bachelor’s degree from an accredited university grade point average of 3.5 or higher on a 4.0 scale. However, students with grade point averages between 3.0 and 3.5 will be given

consideration, this degree being preparatory to the Water Science and Management degree.

- A letter of intent or statement of purpose that addresses individual professional and personal goals related to water science and management and discusses how these goals fit within the degree programs at NMSU. It is expected that the candidate will have made contact with prospective advisor(s) at NMSU and speak to how he or she would work with said advisor(s) to advance their research and study.
- Three letters of recommendation submitted directly from persons who know the applicant professionally, including a recommendation from the candidate’s current employer/sponsor. These letters should provide evidence of professional ability, research experience and the potential for professional development.
- A brief resume or curriculum vitae not to exceed five pages that summarize the candidate’s background and qualifications.

Admission Requirements for the Doctor of Philosophy (Ph.D.) in water science and management include all general requirements for a graduate degree as set forth in the NMSU Catalog, plus the following:

- Possession of a master’s degree from an accredited university with a grade point average of 3.5 or higher on a 4.0 scale. However, students with grade point averages between 3.0 and 3.5 will be given consideration. This degree being preparatory to the Water Science and Management doctorate.
- Three letters of recommendation submitted directly from persons who know the applicant professionally, including a recommendation from the candidate’s current employer/sponsor. These letters should provide evidence of professional ability, research experience, and the potential for professional development.
- In addition, applicants to the Ph.D. program should provide evidence of research experience. This could include a master’s thesis, a professional paper, peer reviewed manuscripts, consulting reports, or other evidence of experience conducting research.
- A letter of intent or statement of purpose that addresses individual professional and personal goals related to water science and management and discusses how these goals fit within the degree programs at NMSU. It is expected that the candidate will have made contact with prospective advisor(s) at NMSU and speak to how he or she would work with said advisor(s) to advance their research and study.
- A brief resume or curriculum vitae not to exceed five pages that summarize the candidate’s background and qualifications.

Degree Requirements

Water Science & Management Graduate Courses

The following courses are courses deemed likely to support each of the five fields of study, but this list is not meant to be all inclusive. Variations from or additions to this list may be made by the candidate, subject to the approval by the thesis or dissertation committee chairperson.

Agricultural Water Resources

A EN 459	Design of Water Wells/Pumping Systems	3
A EN 475	Soil and Water Conservation	3
A EN 478	Irrigation and Drainage Engineering	3
AGRO 620	Instrumentation in Agronomy	3
C E 452	Geohydrology	3-4

C E 482/E S 452/ GEOL 452	Hydraulic Structures	3
C E 483	Surface Water Hydrology	3
C E 485	Design of Earth Dams	3
C E 506	Advanced Soil Mechanics	3
C E 531	Open Channel Hydraulics	3
C E 557	Water Resources Development	3
C E 581	Ground Water Hydrology	3
C E 582	Statistical Hydrology	3
C E 682	Topics in Hydrodynamics II	3
GEOG 467	Transportation Geography	3
GEOG 552	Landscape Ecology	4
GEOG 553	Geomorphology	3
M E 530	Intermediate Fluid Mechanics	3
M E 533	Computational and Theoretical Fluid Mechanics	3
SOIL 456	Irrigation and Drainage	3
SOIL 477	Environmental Soil Physics	3
SOIL 477 L	Environmental Soil Physics Laboratory	1
SOIL 479	Environmental Soil Chemistry	3
SOIL 652	Advanced Soil Physics	3

Watersheds, and Aquatic and Riparian Wetlands

BIOL 533	Environmental Physiology of Plants	3
C E 483	Surface Water Hydrology	3
C E 557	Water Resources Development	3
C E 581	Ground Water Hydrology	3
C E 682	Topics in Hydrodynamics II	3
FWCE 459	Aquatic Ecology	4
FWCE 482	Ichthyology	4
FWCE 532	Environmental Biology of Fishes	4
FWCE 534	Aquatic Contaminants and Toxicology	4
GEOL 452	Geohydrology	4
RGSC 518	Watershed Methods and Management	3
SOIL 456	Irrigation and Drainage	3
SOIL 472	Soil Morphology and Classification	4
SOIL 477	Environmental Soil Physics	3
SOIL 477 L	Environmental Soil Physics Laboratory	1
SOIL 652	Advanced Soil Physics	3

Water Quality and Treatment

BIOL 477	Applied and Environmental Microbiology	4
ENVE 456	Environmental Engineering Design	3
ENVE 462	Sampling and Analysis of Environmental Contaminants	3
ENVE 551	Unit Processes/Operation of Water Treatment	3
ENVE 552	Unit Processes/Operation of Wastewater Treatment	3
ENVE 552 L	Unit Processes/Operation of Wastewater Treatment Laboratory	1
ENVE 557	Surface Water Quality Modeling	3
ENVE 630	Fate and Transport of Environmental Contaminants	3

FWCE 534	Aquatic Contaminants and Toxicology	4
----------	-------------------------------------	---

Water Economics and Policy

AEEC 575	Economics of Water Resource Management and Policy	3
PHLS 452	Environmental Health	3
ECDV 651	Economic Development Theory	3
ECDV 661	Regional Economic Modeling I	3
ECDV 662	Regional Economic Modeling II	3
ECDV 664	Population Economics	3
ECDV 668	Economic Development Finance	3
ECDV 671	Sustainable Economic Development	3
MPH 550	Environmental Public Health Issues	3
MPH 565	International Health Problems	3
MPH 567	Rural Health Issues	3
MPH 569	U.S.-Mexico Border Health Issues	3

Water Informatics

GEOG 521	GIS & T Applications and Modeling	3
GEOG 571	Cartography and Geographic Information Systems	4
GEOG 572	Geodatabase Design	3
GEOG 573	Introduction to Remote Sensing	4
GEOG 578	Fundamentals of Geographic Information Science and Technology (GIS & T)	4
GEOG 581	System Design for Geographic Information Science and Technology (GIS & T)	3
GEOG 582	Advanced Remote Sensing	4
GEOG 585	Advanced Spatial Analysis	3

Degrees for the Department

Water Science and Management - Master of Science (p. 175)

Water Science and Management - Doctor of Philosophy (p. 174)

Minors for the Department

Both minors within the WSAM program are affiliated with other departments.

Geographic Information Science and Technology (GIS&T) - Graduate Minor (p. 174)

Applied Statistics - Graduate Minor (p. 174)

Affiliated Faculty – S. Angadi, Ph.D. (University of Manitoba, Canada); S. Archambault, Ph.D. (UNM); A. Salim Bawazir, Ph.D. (NMSU); M.P. Bleiweiss, M.S. (California State-Los Angeles); W.Boeing, Ph.D. (Louisiana State); K. Boykin, Ph.D. (NMSU); C. E. Brewer, Ph.D. Iowa State); C. Brown, Ph.D. (San Diego State/California-Santa Barbara); S. W. Brown, Ph.D. (NMSU); C. A. Caldwell, Ph.D. (Tennessee); K. C. Carroll, Ph.D. (Arizona); D. E. Cowley, Ph.D. (Wisconsin); D. S. Cram, Ph.D. (NMSU); M. N. DeMers, Ph.D. (Kansas); C. M. Downes, Ph.D. (New Mexico); D. W. DuBois, Ph.D. (Nevada); D. P. Dugas, Ph.D. (Oregon); A. G. Sam Fernald, Ph.D. (Colorado State); A. Ghassemi, Ph.D. (NMSU); R. M. Goss, Ph. D. (Nebraska); W. R. Gould, Ph.D. (North Carolina State); S. J. Guldan, Ph.D. (Minnesota); P. Gutierrez, Ph.D. (J. Herrick, Ph.D. (Ohio State); B. H. Hurd, Ph.D. (California-Davis); M. D. Johnson, Ph.D. (NMSU); N. Khandan, Ph.D. (Drexel University); J. P. King, Ph.D. (Colorado State);

A. S. Lara, Ph.D. (NMSU); B. Leinauer, Ph.D. (Hohenheim University, Germany); H. Luo, Ph.D. (Tulane); M. C. Mitchell, Ph.D. (Minnesota); M. O' Neill, Ph.D. (Arizona); L. Papelis, Ph.D. (Stanford); J. T. Peach, Ph.D. (Texas); G. A. Picchioni, Ph.D. (Texas A&M); R. C. Pratt, Ph.D. (Purdue); A. Rango, Ph.D. (Colorado State); D. A. Rockstraw, Ph.D. (Oklahoma); R. Sallenave, Ph.D. (University of Guelph-Canada); Z. A. Samani, Ph.D. (Utah State); M. K. Shukla, Ph.D. (University of Agricultural Sciences-Vienna, Austria); G. Sims, Ph.D. (Purdue); G. B. Smith, Ph.D. (North Carolina State); R. G. Smits, Ph.D. (Purdue); S. N. Smirnov, Ph.D. (Novosibirsk University, Russia); R. St. Hilaire, Ph.D. (Iowa State); C. M. Steele, Ph.D. (King's College, University of London-UK); K. Stevens, M.S. (NMSU); B. L. Stringam, Ph.D. (Utah State); A. L. Ulery, Ph.D. (California-Riverside); J. Urquidi, Ph.D. (Texas Tech); F. A. Ward, Ph.D. (Colorado State); N. Webb, Ph.D. (University of Queensland, Australia); B. Widner, Ph.D. (Colorado State); P. Xu, Ph.D. (Ecole Nationale de Genie Rural, Des Eaux Et Des Forets, France)

WSAM 589. Landscape Hydrology Modeling

3 Credits

Understand the landscape scale of hydrologic cycle and related hydrological processes. Quantitatively evaluate hydrological system components. Retrieve, visualize and model some of the physical processes using some of the available tools. Consent of Instructor required.

WSAM 599. Masters Thesis

1-15 Credits (1-15)

Thesis. May be repeated up to 88 credits. Consent of Instructor required. Restricted to: Water and Science Management majors. Thesis/Dissertation Grading.

WSAM 605. Arid Land Water Resources

3 Credits (2+2P)

The course will cover various issues of relevance to water resources and water supply management within the Southwest US and other semiarid and arid regions. Discussions may include development and sustainability, climate change and drought, socioeconomic and cultural, and transboundary issues.

WSAM 610. Water and Sustainable Economic Development

3 Credits

For graduate students in the Water Science and Management or other research degree programs, use the water economics literature as a model for student research leading to an M.S. thesis or Ph.D. dissertation.

WSAM 700. Doctoral Dissertation

15 Credits (15)

Dissertation for Water Sciences and Management Majors May be repeated up to 88 credits. Restricted to: Water Sciences and Management majors. Thesis/Dissertation Grading.

Applied Statistics - Graduate Minor

Students interested in completing a Geographic Information Science and Technology minor should consult with the Economics, Applied Statistics and International Business department (<http://business.nmsu.edu/academics/graduate-programs/ms-astat-minor/>).

Geographic Information Science and Technology (GIS&T) - Graduate Minor

Student interested in completing a Geographic Information Science and Technology minor should consult with the geography department (<http://geography.nmsu.edu>)

Water Science and Management - Doctor of Philosophy

Core Courses

This degree is designed to give students a thorough and comprehensive knowledge of water science and hydrology and training in methods of research. The Ph.D. degree can be earned in about 30-40 credits of formal course work beyond the Masters Degree, plus additional dissertation research credits, for a minimum total of 75 credits beyond the BS degree, as detailed below.

Master's Degree Requirements		32
Doctoral Degree Requirements		
AEEC 575	Economics of Water Resource Management and Policy	3
RGSC 518 or SOIL 456	Watershed Methods and Management Irrigation and Drainage	3
C E 557	Water Resources Development	3
GEOG 578 or GEOG 521	Fundamentals of Geographic Information Science and Technology (GIS & T) GIS & T Applications and Modeling	3-4
Select one from the following: ¹		4
A ST 505	Statistical Inference I	
C E 582	Statistical Hydrology	
GEOG 585	Advanced Spatial Analysis	
Select one from the following: ²		2-3
Seminar		
WSAM 605	Arid Land Water Resources	
WSAM 610	Water and Sustainable Economic Development	
GEOG 501	Research Design and History of Geographic Thought	
Electives from the designated water list for the relevant field of study		10
Free electives in consultation with the student's committee		5

Dissertation	18
Total Credits	83-85

¹ With the consent of the instructor and the approval of the student's advisor, C E 582 Statistical Hydrology or GEOG 585 Advanced Spatial Analysis may be used as a substitute.

² Seminar may be substituted by WSAM 605 Arid Land Water Resources, or WSAM 610 Water and Sustainable Economic Development, or GEOG 501 Research Design and History of Geographic Thought.

² Seminar may be substituted by WSAM 605 Arid Land Water Resources, or WSAM 610 Water and Sustainable Economic Development, or GEOG 501 Research Design and History of Geographic Thought.

Students are expected to have a basic foundation in Geographic Information System (GIS) within a classroom, research experience, or professional experience. Students without this background are required to take an appropriate GIS class as advised by their advisor such as: GEOG 578 Fundamentals of Geographic Information Science and Technology (GIS & T), or GEOG 521 GIS & T Applications and Modeling, or FWCE 535 Special Topics.

Water Science and Management - Master of Science

Core Courses

This degree is designed primarily for students who wish to complement their primary discipline by obtaining scientific, technical, and managerial expertise in water. The Master's degree can be earned with 26 credits of formal course work, plus six additional thesis research credits, as detailed below.

Core Courses

AEEC 575	Economics of Water Resource Management and Policy	3
RGSC 518	Watershed Methods and Management	3
or SOIL 456	Irrigation and Drainage	
Select one from the following: ¹		3-4
A ST 505	Statistical Inference I	
C E 582	Statistical Hydrology	
GEOG 585	Advanced Spatial Analysis	
Select one from the following: ²		1-3
Seminar		
WSAM 605	Arid Land Water Resources	
WSAM 610	Water and Sustainable Economic Development	
GEOG 501	Research Design and History of Geographic Thought	
Electives from the designated water list for the relevant field of study		10
Free electives in consultation with the student's committee		5
Thesis		6
Total Credits		31-34

¹ With the consent of the instructor and the approval of the student's advisor, C E 582 Statistical Hydrology or GEOG 585 Advanced Spatial Analysis may be used as a substitute.

COLLEGE OF ARTS AND SCIENCES

Dean - *Enrico Pontelli*

Interim Associate Dean (Research) - *James Murphy*

Associate Dean (Academics) - *Beth Pollack*

Associate Director, Research Center - *Olga Ostos*

Undergraduate programs offered in the College of Arts and Sciences prepare students for a variety of career opportunities and for graduate study. The broad curriculum offered provides both the motivation and the tools for lifelong learning experiences.

While the ultimate responsibility for planning an academic program in compliance with university, college and departmental requirements rests with the student, the college recognizes the importance of helping students work out appropriate academic programs.

Students should consult the "Academic Regulations (p. 53)" section of the catalog regarding general limitations for total credit hours, independent study and registration under S/U option. Students in the College of Arts and Sciences on Academic Probation 1 are limited to 13 credit hours, and students on Probation 2 are limited to 7 credit hours. The Regulations section of the catalog discusses registration, drop/add and withdrawal deadlines. Students may not do additional course work or repeat course exercises after the semester has ended in order to raise a grade in any course. Exceptions will be made for students completing an official Incomplete grade.

College Undergraduate Degree Requirements

1. In accordance with NMSU policy, students in all majors in the College of Arts and Sciences must meet the Basic Academic Skills requirements in English and Mathematics. See "Basic Academic Skills (p. 53)" in the General Information, Regulations section.

Basic Academic Skills rules:

- a. Students must complete, with a C- grade or better, in MATH 111 Fundamentals of Elementary Mathematics I and MATH 112G Fundamentals of Elementary Math II, or any mathematics course numbered 120 or above which includes A ST 251G Statistics for Business and the Behavioral Sciences, STAT 251G Statistics for Business and the Behavioral Sciences and STAT 271G Statistics for Psychological Sciences. Please see department requirements for each major for specific mathematics requirements.
- b. Students must complete, with a C - grade or better, ENGL 111G Rhetoric and Composition, ENGL 111GH Rhetoric and Composition Honors, or ENGL 111 M Rhetoric and Composition for International and Multilingual Students prior to enrolling in upper division courses numbered 300 or higher.
NOTE: Transfer students must complete an English course listed above and begin their Math sequence no later than their second semester at NMSU in order to continue enrolling in upper division courses numbered 300 level or higher.
- c. Students whose ACT or other test scores require them to take developmental Mathematics or English courses must complete those courses prior to enrolling in the English and Mathematics basic skills courses listed above.

2. University graduation requirements. See "Graduation Requirements (p. 53)" in the "General Information" section in this catalog. In order to graduate, students must have met all degree requirements for their major, earned a minimum of 120 university level credits, or more if required for the degree, of which at least 48 must be upper division and must have a cumulative GPA of 2.0 in all courses taken at NMSU. Each student must complete at least 30 of the necessary credits for their Bachelor Degree at NMSU. A minimum of "C-" in all courses counting toward the major, supplemental major and minor is required of all students.

3. Some departments in the college require a second language and some do not. For those students whose major requires a second language, the following parameters apply unless otherwise specified in their departmental requirements. A student must meet one of the following requirements.

- If two years are required for the major, students need to complete the second language course sequence: 111, 112, 211 and 212 in French, German, Spanish, Portuguese, Japanese or Chinese. If one year is required then students should complete the first year of language study or equivalent, for example PORT 213 and 214. Students should enter the sequence at their proficiency level. Heritage speakers of Spanish should complete the Spanish 113-213-214 sequence. Students who successfully complete either SPAN 113 Spanish for Heritage Learners I or SPAN 213 Spanish for Heritage Learners II or SPAN 214 Spanish for Heritage Learners III (or all) may not take SPAN 111 Elementary Spanish I, SPAN 112 Elementary Spanish II, SPAN 211 Intermediate Spanish I or SPAN 212 Intermediate Spanish II for credit.
- Challenge the 212 level of Chinese, French, German, Japanese, Chinese, or Spanish, or the 214 level of Spanish for Heritage Learners of Spanish, or Portuguese.
- Obtain college certification of completion of a second language at the high school level by fulfilling one of the following:

Option A: For those departments requiring one year of a second language a student must pass two years of a high school language with a C- or better in the last year level.

Option B: For those departments requiring two years of a second language a student must pass three years of a high school language with a C- or better in the last year level.

- Obtain, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at New Mexico State University.
- Obtain certification of a working knowledge of a Native American language from the American Indian program director, or as attested by a Native American Elder.
- Successfully complete a regular university course taught in a language other than English. A student can receive credit only once for the same course taught in two languages.
- Pass a three-credit upper-division course (numbered 300 or above) taught in a second language by the Department of Languages and Linguistics.
- Pass C D 476 American Sign Language III, with a grade of C- or better.
- In the case of an international student who is required to take the TOEFL exam for admission to NMSU, the dean will automatically waive the second language requirement.

Students should satisfy the second language requirement as soon as possible and take the necessary courses in consecutive semesters.

Please note: SPCD or English language may not be used to fulfill the second language requirements.

S/U Grading Option for Undergraduate Students

Instructors may establish individual standards for an S grade, but the minimum standard for an S grade in the College of Arts and Sciences courses is a C-.

Developmental and Applied Credit Limitations for Undergraduate Students

The College of Arts and Sciences will accept all applied coursework, which include Occupational Education courses, BOT, CMT, UNIV (not including UNIV 150 The Freshman Year Experience and UNIV 350 Peer Education), ART (applied), DANC (applied), MUS (applied and participation), THTR (applied), NURS, A EN, AXED, AG E, AGHE, COLL, CCDL, CCDS, all lower-division RDG. These courses count towards overall credit hours to bring the students total to the minimum credit hours required. Students must still complete all university requirements: GEN ED; VWV; a minimum of 48 upper division credits as well as all requirements for their declared major degree.

Credits earned in developmental courses (N suffix) are not counted toward any arts and sciences degree. Students should contact the Student Records Center regarding the acceptability of specific courses.

Independent Study/Directed Reading Courses for Undergraduate Students

Students are limited to six credits in any independent study course. Independent study courses include directed reading and special topic courses, which do not carry a subtitle.

Distance Education Courses

The College of Arts and Sciences offers a variety of distance education/online courses each semester. Specific courses can be found under departmental course listings online. Students who successfully complete NMSU distance education courses receive the same credit as students who take an equivalent course on the Las Cruces campus. Distance education courses appear on a student's transcript in the same way a course taken on the Las Cruces campus does. Students will be charged a Course Delivery Fee for taking online courses.

Majors, Minors and Supplementary Majors for Undergraduate Students

Students who wish to obtain a bachelor's degree must select a major field or fields. For a listing of majors, the student should refer to the list of majors in this catalog. Course requirements for majors are listed under individual departments. Students should consult the department for current admissions requirements. Until a major is selected, the student is designated as undeclared.

Each major consists of not less than 20 credits of upper-division courses (300 and above) in a specific field. Students must earn a grade of C- or better for all course requirements indicated for each major, minor, or supplementary major, including any courses required from outside the department. Students may not count an S grade towards completion of any major, minor or supplementary major requirement unless a course is automatically S/U for all enrolled students. A student may not earn a minor that bears the same name as a bachelor's degree that the student is earning. (For example, a student earning a B.S. in Biology

cannot also earn a minor in Biology.) Some departments also require specific courses outside the major field. Please refer to the departmental section of the catalog for specific nondepartmental requirements. These nondepartmental requirements must be passed with a grade of C- or better. It is imperative that students consult the departmental sections of this catalog and the department(s) for advice in planning to fulfill requirements for their declared majors.

The requirements for academic minors in the College of Arts and Sciences are found under each offering department or program section of this catalog. Requirements for supplementary majors are found as follows:

- the Supplementary Majors in Chicano Studies, Latin American Studies, and Linguistics (p. 339) are listed under Languages and Linguistics (p. 339);
- the Supplementary Major in Law and Society (p. 306) is listed under Government (p. 306); and
- the Supplementary Major in Applied Mathematics (p. 352) is listed under Mathematical Sciences (p. 352).

Most students have considerable latitude in choosing elective courses. These are the courses beyond university and major requirements that a student must take to bring her or his total credits to the minimum overall credits required for the degree 120 or 128. This latitude provides students with opportunities to major in more than one field, to take a minor or to devise interdisciplinary programs tailored to individual interests or future career needs.

Regardless of the option elected, students should consult regularly with an advisor and track their progress towards degree completion and graduation using the online degree audit system STAR (Student Academic Requirements), at: <http://www.my.nmsu.edu>.

Supplementary Majors

- Applied Mathematics in the Department of Mathematical Sciences (p. 352)
- Chicano Studies in the Department of Languages & Linguistics (p. 339)
- Latin American Studies in the Department of Languages & Linguistics (p. 339)
- Law and Society in the Department of Government (p. 306)
- Linguistics in the Department of Language & Linguistics (p. 339)
- Sustainable Development in the Department of Anthropology (p. 181)

Preprofessional Studies

- Prehealth Studies in the Department of Biology (p. 211)
- Prelaw Studies in the Department of Government (p. 306)

Bachelors Degrees

Bachelor of Applied Studies (p. 329)

Bachelor of Arts

Majors in:

- Anthropology (p. 181)
- Art (p. 193)
- Biology (p. 211)
- Chemistry (p. 226)

- Communication Studies (p. 235)
- Computer Science (p. 240)
- Economics (p. 271)
- Engineering Physics (p. 387) (through the College of Engineering)
- English (p. 274)
- Foreign Languages (p. 339)
- Gender & Sexuality Studies (p. 329)
- Government (p. 306)
- History (p. 317)
- Journalism and Mass Communications (p. 336)
- Philosophy (p. 383)
- Physics (p. 387)
- Psychology (p. 396)
- Sociology (p. 402)
- Theatre Arts (p. 409)

Bachelor of Individualized Studies (p. 329)

Bachelor of Science

Majors in:

- Biochemistry (p. 226)
- Biology (p. 211)
- Chemistry (p. 226)
- Computer Science (p. 240)
- Geography (p. 293)
- Geology (p. 300)
- Mathematics (p. 352)
- Microbiology (p. 211)
- Physics (p. 387)

Designated Bachelor's Degree

Bachelor in Conservation Ecology (p. 211)

Bachelor of Creative Media

Majors in:

- **Animation and Visual Effects**
- **Digital Film Making**

Bachelor of Criminal Justice (p. 263)

Bachelor of Fine Arts (p. 193)

Bachelor of Science in Genetics (p. 211)

Bachelor of Music (p. 370)

Bachelor of Music Education (p. 370)

Dual Degrees

Bachelor of Science/Master of Science in Computer Science (p. 240)

Masters Degrees

Master of Applied Geography (p. 293)

Master of Arts

- Anthropology (p. 181)
- Art (p. 193)
- Communication Studies (p. 235)
- English (p. 274)
- Government (p. 306)
- History (p. 317)
- Psychology (p. 396)
- Sociology (p. 402)
- Spanish (p. 339)

Master of Criminal Justice (p. 263)

Master of Fine Arts (p. 193)

Master of Fine Arts in Creative Writing

Master of Music (p. 370)

Master of Public Administration (p. 306)

Master of Science

- Astronomy (p. 206)
- Bioinformatics (p. 240)
- Biology (p. 211)
- Chemistry (p. 226)
- Computer Science (p. 240)
- Geology (p. 300)
- Mathematics (p. 352)
- Molecular Biology (p. 366)
- Physics (p. 387)

Dual Degrees

Master of Public Administration/Master of Arts in Public History (p. 306)

Master of Public Administration/Master of Criminal Justice (p. 306)

Graduate Certificates

Cultural Resource Management (p. 181)

Museum Studies (p. 181)

Doctoral Degrees

Doctor of Philosophy

- Astronomy (p. 206)
- Biology (p. 211)
- Chemistry (p. 226)
- Computer Science (p. 240)
- Mathematics (p. 352)
- Molecular Biology (p. 366)
- Physics (p. 387)
- Psychology (p. 402)
- Rhetoric and Professional Communication (p. 274)

Undergraduate Minors

- Aerospace Studies (p. 179)

- Algorithm Theory (p. 240)
- American Government and Politics (p. 306)
- Animation and Visual Effects (p. 256)
- Anthropology (p. 181)
- Art (p. 193)
- Art History (p. 193)
- Astronomy (p. 206)
- Biochemistry (p. 226)
- Bioinformatics (p. 240)
- Biology (p. 211)
- Chemistry (p. 226)
- Child Advocacy Studies (p. 263) (through the FCS department, in the College of ACES)
- Communication Studies (p. 235)
- Communications and National Security (p. 235)
- Comparative Politics (p. 306)
- Computer Systems (p. 240)
- Conservation Ecology (p. 211)
- Contemporary Social Studies (p. 306)
- Creative Writing (p. 274)
- Digital Film Making (p. 256)
- Economics (p. 271)
- English (p. 274)
- Environmental Chemistry (p. 226)
- Ethics (p. 383)
- Forensic Science (p. 263)
- French (p. 339)
- Gender & Sexuality Studies (p. 329)
- Genetics and Biotechnology (p. 211)
- Geographic Information Science and Technology (p. 293)
- Geography (p. 293)
- Geology (p. 300)
- German (p. 339)
- Government (p. 306)
- History (p. 317)
- Human Biology (p. 211)
- International Relations (p. 306)
- International Studies (p. 329)
- Journalism and Mass Communications (p. 336)
- Linguistics (p. 339)
- Literature (p. 274)
- Mathematics (p. 352)
- Medieval and Early Modern Studies (p. 274)
- Microbiology (p. 211)
- Military Science (p. 364)
- Molecular Biology (p. 366)
- Museum Conservation (p. 193)
- Music (p. 370)
- Native American Studies (p. 181)
- Philosophy (p. 383)
- Physics (p. 387)
- Political Theory (p. 306)

- Psychology (p. 402)
- Public Administration (p. 306)
- Public Law (p. 306)
- Religious Studies (p. 181)
- Rhetoric and Professional Communication (p. 274)
- Sociology (p. 402)
- Software Development (p. 240)
- Spanish (p. 339)
- Sustainable Development (p. 181)
- Theatre Arts (p. 409)

Graduate Minors

- Archaeology (p. 181)
- Bioinformatics (p. 366)
- Communication and National Security (p. 235)
- Communication Studies (p. 235)
- Computer Science (p. 240)
- Food Studies (p. 181)
- Gender & Sexuality Studies (p. 329)
- Geographic Information Science and Technology (p. 293)
- History (p. 317)
- Molecular Biology (p. 366)
- Native American Studies (p. 181)
- Psychology (p. 402)
- Security Studies (p. 306)
- In the College of Arts and Sciences, the Department of Chemistry and Biochemistry is accredited by the American Chemical Society.
- The Bachelor of Science in Computer Science is accredited by ABET.
- Music curricula in the Department of Music are accredited by the National Association of Schools of Music.
- The Master of Public Administration program in the Department of Government is accredited by the National Association of Schools of Public Affairs and Administration.

Aerospace Studies

Undergraduate Program Information

Air Force Reserve Officer Training Corps (AFROTC) is a nationwide program that allows students to pursue commissions (become officers) in the United States Air Force (USAF) while simultaneously attending college. AFROTC classes are held on college campuses throughout the United States and Puerto Rico; students can register through normal course registration processes. AFROTC consists of four years of Aerospace Studies classes (Foundations of the USAF, Evolution of USAF and Space Power, Air Force Leadership Studies, and National Security Affairs/Preparation for Active Duty), and a corresponding Leadership Laboratory for each year (where students apply leadership, demonstrate command and effective communication, develop physical fitness, and practice military customs and courtesies). College students enrolled in the AFROTC program (known as "cadets") who successfully complete both AFROTC training and college degree requirements will graduate and simultaneously commission as Second Lieutenants in the Active Duty Air Force. The AFROTC program is currently offered at New Mexico State University (NMSU), but they have a crosstown agreement that allows our students to enroll in AFROTC and become full-fledged cadet participants.

Freshman and Sophomore Years (General Military Course or GMC)

This group provides a general background knowledge of the military establishment with emphasis on the Air Force. GMC courses may be taken out of sequence.

AERO 121 & AERO 122	The Air Force Today I and The Air Force Today II	4
AERO 221	The Air Force Way I	2
AERO 222	The Air Force Way II	2
AERO 223	Air Force Leadership Development	1
Total Credits		9

Junior and Senior Years (Professional Officer Course or POC)

This group constitutes an in-depth study of topics that provides a broad preparation for a career as an Air Force officer. Students must have certain qualifications for entry and have a desire to be commissioned in the Air Force. These qualifications include, achieving a passing score on the Air Force Officer's Qualifying Test, passing a physical fitness test, and successfully completing a medical exam. They must also complete a four- or five-week summer orientation course.

Students may, with departmental approval, take POC courses out of normal sequence. However, compressed or dual enrollment in upper-division POC courses is normally prohibited. Through this department, you can also earn a minor in Aerospace Studies.

AERO 301	Air Force Leadership and Management I	4
AERO 302	Air Force Leadership and Management II	4
AERO 401	Preparation for Active Duty I	4
AERO 402	Preparation for Active Duty II	4
Total Credits		16

Leadership Laboratory

This is an integral and mandatory portion of the Aerospace Studies curriculum. Within the framework of the cadet wing, it provides a progression of experiences designed to develop each student's leadership potential and serves as an orientation to military life.

Minors for the Department

Aerospace Studies - Undergraduate Minor (p. 181)

Lieutenant Colonel Jeremy Klomp, Department Head

Assistant Professors and Staff: Capt Evin Greensfelder, Capt Michael Vetri, TSgt Melissa Cadman, Sr Airman Alan Crossley, and Patti Alarcon

A E 102. Introduction to Aerospace Engineering 1 Credit

A survey course of aeronautical, aerospace, and astronomical engineering, with an emphasis on basic aerospace concepts and major aerospace principles without going into detailed math and analysis. Students are given the opportunity to listen to guest speakers and participate in projects utilizing the NMSU Ultralight and NMSU wind tunnel. Restricted to: Main campus only.

A E 339. Aerodynamics I 3 Credits

Fluid properties, conservation equations, incompressible 2-dimensional flow; Bernoulli's equation; similarity parameters; subsonic aerodynamics: lift and drag, analysis and design of airfoils. May be repeated up to 3 credits. Restricted to: A E majors.

Prerequisite(s): M E 234 or M E 237 and M E 228 or MATH 392.

A E 362. Orbital Mechanics 3 Credits

Dynamics of exoatmospheric flight of orbiting and non-orbiting bodies; 2-body orbital dynamics and Kepler's laws; orbits in 3 dimensions; orbit determination; orbit design and orbital maneuvers; lunar and interplanetary trajectories. May be repeated up to 3 credits.

Prerequisite(s): M E 228 or MATH 392, M E 234 or M E 237, and M E 261.

A E 363. Aerospace Structures 3 Credits

Advanced concepts of stress and strain, introduction to the analysis of aero structures, complex bending and torsion, thin walled sections and shells, computational techniques. Prerequisites: C E 301

A E 364. Flight Dynamics and Controls 3 Credits

Fundamentals of airplane flight dynamics, static trim, and stability; spacecraft and missile six degree of freedom dynamics; attitude control of spacecraft. May be repeated up to 3 credits.

Prerequisite(s): M E 228 or MATH 392, M E 234 or M E 237, and M E 261.

A E 400. Undergraduate Research 1-3 Credits (1-3)

Performed with the direction of a department faculty member. May be repeated for a maximum of 6 credits.

Prerequisite(s): Consent of faculty member.

A E 405. Special Topics 3 Credits

Topics of modern interest to be offered by the departmental staff. Consent of instructor required.

A E 419. Propulsion 3 Credits

Propulsion systems, thermodynamic cycles, combustion, specific impulse; principles of gas turbines, jet engines, and rocket propulsion systems. Prerequisites: A E 439

A E 424. Aerospace Systems Engineering 3 Credits

Basic principles of top down systems engineering and current practice; preliminary and detailed design of aircraft and space vehicles, including requirement, subsystem interaction, and integration, tradeoffs, constraints and non-technical aspects.

Prerequisite(s): A E 362.

A E 428. Aerospace Capstone Design 3 Credits

Team Project-analysis, design, hands-on build test, evaluate.

Prerequisite(s)/Corequisite(s): A E 447. Prerequisite(s): A E 363 and A E 424.

A E 439. Aerodynamics II 3 Credits

Principles of compressible flow, momentum and energy conservation; thermal properties of fluids; supersonic flow and shock waves; basics of supersonic aerodynamics.

Prerequisite(s): A E 339, M E 240, and M E 328.

A E 447. Aerofluids Laboratory**3 Credits (2+3P)**

Use of subsonic wind tunnels and other flow to study basic flow phenomena and methods of fluid measurement and visualization.

Prerequisite(s)/Corequisite(s): A E 439. Prerequisite(s): M E 345.

A E 451. Aircraft Design**3 Credits**

Conceptual design of aircraft based on existing designs, empirical relationships, and theory. Dimensioning, structural design, and performance analysis of major subcomponents such as fuselage, wing, and propulsion system. Static stability and control analysis.

Prerequisite(s): A E 339 and A E 363.

A E 509. Individualized Study**3 Credits**

Individualized study covering specialized topics in aerospace engineering. Consent of instructor required. Restricted to A E & M E majors.

A E 510. Special Topics**1-6 Credits (1-6)**

Topics in aerospace engineering. May be repeated for a maximum of 6 credits. Consent of instructor required.

A E 527. Control of Mechanical Systems**3 Credits**

Rigorous introduction to the control of dynamical systems, with a focus on mechanical systems. Includes basic systems theory, controllability, feedback and stabilization, observers and dynamic feedback, and applications of methods to systems of importance in mechanical engineering. Consent of instructor required. Cross-listed with: M E 527

A E 529. Nonlinear and Optimal Control**3 Credits**

Introduction to optimal control theory, Pontryagin's Maximum Principle, control of simple mechanical systems, Lagrangian and Hamiltonian methods, introduction to geometric control-Lie algebras, distributions, controllability and observability. Cross-listed with: M E 529

A E 552. Introduction to Gasdynamics**3 Credits**

Gas kinetics, rarefied gas dynamics, collision dynamics; velocity distribution function, finite rate chemical process; thermal nonequilibrium and chemically reacting flows; introduction to quantum and statistical mechanics; Boltzmann equation and the BGK model; moments of the Boltzmann Equation; the Navier-Stokes Equation; the structure of shock waves.

A E 562. Astrodynamics**3 Credits**

Two-body problem, orbit analysis, and classical orbit determination methods; trajectory design and optimization; orbital maneuvers using impulsive or continuous thrust; relative motion and rendezvous; perturbations and Lagrange planetary equations; interplanetary mission design including gravity assists; introduction to the three-body problem, halo orbits, and invariant manifolds in mission design.

A E 566. Aeroelasticity**3 Credits**

Introduction to aeroelasticity with emphasis on fluid-structure interactions occurring in aircraft. Phenomena considered include flutter/LCD (limit cycle oscillation), buffeting, divergence, and control reversal. Primary emphasis on structural dynamics, with use of simple aerodynamic models.

A E 598. Special Research Programs**1-3 Credits (1-3)**

Individual investigations, either analytical or experimental. May be repeated for a maximum of 6 credits. Restricted to A E & M E majors.

A E 599. Master's Thesis**15 Credits (15)**

Thesis. Graded: Thesis/Dissertation.

A E 600. Doctoral Research**1-15 Credits (1-15)**

This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination.

Graded: Thesis/Dissertation.

A E 700. Doctoral Dissertation**15 Credits (15)**

Dissertation. Graded: Thesis/Dissertation.

Anthropology

Undergraduate Program Information

Anthropology is the study of humankind, a multidisciplinary endeavor involving the social sciences, the humanities, and the natural sciences. Anthropologists study the human species and the human condition in all its diversity. Anthropologists ask questions such as: "Who are we?"

"Where did we come from?" "How did we get here?" "Why are we different from each other?" and, "How can we better understand each other?"

Studies in anthropology might focus, for example, on our distant ancestors from the African plains, modern workers in a high-tech factory, historic military forts in the Mesilla Valley, Native American Languages, or prehistoric or contemporary cultures of the American Southwest and Mesoamerica.

Undergraduate education at New Mexico State University covers all four sub-disciplines of the field:

Biological Anthropology - the study of human origins, primate relatives, and human biological diversity

Archaeology - the study of the origin and change of the human past in both historic and prehistoric times, using material remains

Cultural Anthropology - the study of beliefs, values, shared understandings, traditions and modern practices of peoples from around the world

Linguistic Anthropology - the study of human language, linguistic diversity, and speech

Graduate Program Information

The Anthropology M.A. program is designed for students who are interested in the traditional sub-disciplines of anthropology, as well as such related fields as cultural resource management, food studies, medical anthropology, museum studies, and social impact assessment. The program is directed both toward students who intend to take a terminal M.A. degree and students who intend, after NMSU, to enter a Ph.D. program. In addition to the M.A. in anthropology, our program also offers graduate minors in anthropology, archaeology, food studies, and Native American studies, as well as graduate certificates in cultural resource management and museum studies.

An undergraduate anthropology degree is not required for entry into the M.A. program. Students who lack the equivalent of ANTH 301, ANTH 315, ANTH 320, and ANTH 355 may be required to take these courses. ANTH 350 or the equivalent is recommended.

Degrees for the Department

Anthropology - Bachelor of Arts (p. 188)

Sustainable Development - Undergraduate Supplemental Major (p. 193)

Anthropology - Master of Arts (p. 189)

Cultural Resource Management - Graduate Certificate (p. 190)

Museum Studies - Graduate Certificate (p. 191)

Minors for the Department

Anthropology - Undergraduate Minor (p. 190)

Religious Studies - Undergraduate Minor (p. 192)

Sustainable Development - Undergraduate Minor (p. 193)

Native American Studies - Undergraduate Minor (p. 192)

Native American Studies - Graduate Minor (p. 191)

Archaeology - Graduate Minor (p. 190)

Food Studies - Graduate Minor (p. 190)

Professor, Rani T. Alexander, Department Head

Professors Alexander, Benefit, Chaiken, Rushforth, Stanforn, Walker; **Associate Professors** Arakawa, McCrossin, Stanford; **Assistant Professors** Arakawa, Jenks, Scott; **College Professors** Conelly, Pepion; **Emeritus Professors** Eber, O'Leary, Staski, Trevathan **Affiliated Faculty** Berryman, DeBoer, LeBeau, Loendorf, Marinas-Feliner; Robles; Steele, Stinson; Strankman, Torezani

R. T. Alexander, Department Head, Ph.D. (New Mexico)– Mesoamerican archaeology, historical archaeology of Yucatan, ethnohistory and colonialism, agrarian ecology, fauna analysis; F. Arakawa, Ph.D. (Washington State)– Southwest archaeology, ceramic analysis; B. R. Benefit, Ph.D. (NYU)– biological anthropology, African paleoanthropology, dental anthropology, paleoecology; M. Chaiken, Ph.D. (California - Santa Barbara)- Participatory development, resettlement, and rural health and nutrition, gender, applied anthropology, Africa and Southeast Asia; W. T. Conelly, Ph.D (California - Santa Barbara)– Agricultural systems, ecological anthropology, applied/ development anthropology, Southeast Asia, East Africa, rural communities in the US; M. McCrossin, Ph.D. (California-Berkeley)– biological anthropology, human evolution, African paleoanthropology, primatology; D. Pepion, Ed.D. (Montana State)– Native American studies, ethnohistory, anthropology and education; S. Rushforth, Ph.D. (Arizona)– cultural anthropology, anthropological linguistics, Native American ethnology; M. A. T. Scott, Ph.D. (Kentucky)– medical anthropology, Latin America; L. Stanford, Ph.D. (Florida)– agriculture, organizations, food studies, globalization, sociocultural anthropology, Latin America; A.M. Strankman, MA (U Washington)- museum studies, Native American art; W. Walker, Ph.D. (Arizona)– Southwestern archaeology, theory and field method in archaeology, ritual prehistory. Emeritus Faculty: C.E. Eber, Ph.D. (emerita; SUNY- Buffalo)– art, drugs, gender, religion, Mesoamerica, women's studies and writing about culture; B. O'Leary, Ph.D. (emerita, New Mexico)- Southwest archaeology, cultural resource management, arctic ethnography; E. Staski, Ph.D. (emeritus, Arizona)–historical archaeology, urban anthropology, ethnic relations; W. Trevathan, Ph.D. (Regent's Professor Emerita, Colorado-Boulder)– reproduction, evolutionary medicine, medical anthropology, nutritional anthropology

ANTH 110. North American Prehistory

3 Credits

Introduction to major prehistoric cultural developments and changes in North America from the first entry of people into the New World until prior to the arrival of European settlers. Restricted to Community Colleges campuses only.

ANTH 115. Native Peoples of North America

3 Credits

General survey of the ethnology of selected native American groups.

ANTH 116. Native Peoples of the American Southwest

3 Credits

Introduction to the early history and culture of native people of the Southwest.

ANTH 118. Introduction to Historic Preservation

3 Credits

Introduction to historic preservation, its history, goals, methods, legal basis, and economic importance. Explores public role in decision-making. Community Colleges only.

ANTH 120G. Human Ancestors**3 Credits**

Evolutionary history of the human species from its origin in the primate order, with primary emphasis on the evolution of humankind during the past three million years. Examination of the social lives of apes and consideration of similarities to and differences from them. Biological foundations of human behavior, emphasizing thought, movement, and interaction.

ANTH 125G. Introduction to World Cultures**3 Credits**

Examine cross-cultural diversity and human universals through the lens of anthropological inquiry. Explore human thought and behavior in contemporary world cultures covering kinship, economic patterns, power structures, and religious practices and beliefs. The impact of cultural influence on everyday life is emphasized.

ANTH 130G. Human's Place in Nature: Introduction to Biological Anthropology**3 Credits**

This course uses scientific methods and principles to examine human evolutionary history and family tree relationships, as well as the biological foundations of human behavior. Through lectures, readings and laboratory assignments students are introduced to the history and development of modern evolutionary biology, molecular and population genetics, the primate and human fossil record and modern human biological diversity. By examining the social lives of apes and other primates, primitive and unique aspects of human behavior are identified and the lives of fossil ancestors are reconstructed.

Corequisite(s): ANTH 130GL.

ANTH 130GL. Human's Place in Nature Laboratory**1 Credit**

This one credit laboratory course uses scientific methods and principles to examine evidence for human evolutionary history and family tree relationships, primate ecology and behavior, and modern human diversity.

ANTH 201G. Introduction to Anthropology**3 Credits**

Exploration of human origins and the development of cultural diversity. Topics include biological and cultural evolution, the structure and functions of social institutions, belief systems, language and culture, human-environmental relationships, methods of prehistoric and contemporary cultural analysis, and theories of culture.

ANTH 202G. Introduction to Archaeology and Physical Anthropology**3 Credits**

Provides an introduction to the methods, theories, and results of two subfields of anthropology: archaeology and physical anthropology. Archaeology is the study of past human cultures. Physical anthropology is the study of human biology and evolution.

ANTH 203G. Introduction to Language and Cultural Anthropology**3 Credits**

Provides an introduction to the methods, theories, and results of two subfields of anthropology: linguistics and cultural anthropology. Linguistics is the study of human language. Cultural anthropology is the study of the organizing principles of human beliefs and practices.

ANTH 297. Elementary Special Topics**1-4 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

ANTH 301. Cultural Anthropology**3 Credits**

Human concepts of culture and life processes.

ANTH 305V. Contemporary Native Americans**3 Credits**

Introduction to contemporary native peoples and cultures of North America. Emphasis on sociocultural and socioeconomic history, sociocultural change and persistence, present day reservation life, and current social and economic goals.

ANTH 306V. Peoples of Latin America**3 Credits**

Introduction to cultural patterns and diversity of Latin America with emphasis on indigenous groups, peasants, plantation workers, and urban residents throughout South America, the Caribbean, Mexico, and Central America.

ANTH 307. Anthropology of Mexico and Guatemala**3 Credits**

This course focuses on ethnographic study of people in Mexico and Guatemala. Through reading and discussing a variety of ethnographic works, the course will examine some historical and contemporary issues facing different groups of people in this region and will include topics such as gender, indigenous movements, migration, urbanization, and tourism.

ANTH 312. The Ancient Maya**3 Credits**

Archaeological evidence of culture change in the Maya civilizations of Mexico and Central America from 2000 BC to the Spanish Conquest.

ANTH 313. Ancient Mexico**3 Credits**

Archaeological evidence of culture change among the Aztecs, Zapotecs, and their predecessors in Central Mexico and Oaxaca from 7,000 BC to the Spanish Conquest.

ANTH 315. Introduction to Archaeology**3 Credits**

Concepts and methods for study of prehistoric cultures; history of archaeological research.

ANTH 316. Archaeology of the American Southwest**3 Credits**

Introduction to the prehistoric peoples of the North American Southwest, a historical approach emphasizing the rise of method and theory in the region.

ANTH 318. Historical Archaeology in Latin America**3 Credits**

Examination of theoretical and methodological issues in historical archaeology in Latin America from 1450 to present, including conquest, colonialism, capitalism, and modernity as anthropological processes. The contributions and limitations of historical, ethnohistorical, and archaeological evidence are emphasized.

ANTH 320. Anthropological Linguistics**3 Credits**

The study of language and culture with particular emphasis on the cultural factors in the communication process.

ANTH 330V. Magic, Witchcraft and Religion**3 Credits**

Provides an overview of old and new methods and theories for the study of religion. Exposure to the ways groups of people in diverse cultural systems construct and change their religious traditions to serve practical and meaningful ends. Crosslisted with: HIST 330V and SOC 330V.

ANTH 345. Introduction to Museology**3 Credits**

Museum philosophy, history, administration, and collection management. Emphasis on cataloging, care, and exhibition, as well as ethics and public responsibility.

ANTH 348. Museums & Society**3 Credits**

Examines theoretical frameworks that shape museum administration, exhibits and collections development. Examines themes of gender, space, place, multiculturalism, national and international politics in museum contexts.

ANTH 350. Anthropological Theory**3 Credits**

This course introduces students to historical and contemporary theory in anthropology with a focus on understanding why theory matters in our discipline. Key questions the course explores include: How have anthropologists thought about the concept of culture in different ways throughout the history of anthropology? What is the relevance of anthropological theory, both inside and outside the discipline? What new and promising trajectories do we see in anthropological theory today?

ANTH 355. Physical Anthropology**3 Credits**

An introduction to primate behavior, human evolution, and physical variation in modern human populations.

ANTH 357V. Medical Anthropology**3 Credits**

This course introduces students to evolutionary, ecological, interpretive, political-economic, and applied anthropological perspectives on health, illness, and healing to address some of the major questions in the field. How do humans adapt to changing environments that bring with them new illnesses and diseases? How do anthropologists understand the multiple meanings of health and illness cross-culturally? How can anthropologists effectively study health inequalities? What can medical anthropological perspectives contribute to addressing the health issues that we face in our current global context?

ANTH 360V. Food and Culture Around the World**3 Credits**

Study of the interaction between food and human culture from an anthropological perspective. Examines the traditional role of food in local economies, social relations, and identity around the world. Also examines the impact of globalization on traditional food systems and cultures.

ANTH 362. Environmental Anthropology**3 Credits**

This course examines ecology and current environmental studies from an anthropological point of view. The class focuses on how cultural values mediate environmental management. The class will cover topics such as theoretical foundations of ecological anthropology, large scale development, biodiversity conservation, sustainable environmental management, indigenous groups, consumption and globalization.

ANTH 376. Lithic Technology Organization**3 Credits**

Advanced seminars and laboratory exercises to learn and develop techniques and methods that will help us determine how to interpret behavioral and cultural information from lithic (stone tool) data.

Prerequisite(s): ANTH 315.

ANTH 378. Introduction to Lab Methods in Archaeology**3 Credits**

Laboratory techniques used in the analysis of archaeological materials.

ANTH 385. Internship in Anthropology**3-12 Credits (3-12)**

Applied or field experience to gain professional expertise. Placements with public agencies, NGOs, or research organizations. Topical focus tailored to student's individual needs through consultation with instructor.

Prerequisite(s): Junior status, consent of instructor and GPA 2.8 or better.

ANTH 386. Anthropological Study Odyssey**3-6 Credits (3-6)**

This course allows students to explore an anthropological topic, such as an archaeological tradition or culture, through classroom and field activities. Students are initially exposed to a topic during several days of intensive in class work and then pursue greater understanding of the topic through a field trip and possibly limited fieldwork. Readings, site tours, on-site lectures by specialists, and field exercises provide students an opportunity to develop an understanding of anthropological perspectives on the topic as well as to provide exposure to anthropological field and analytic methods. This course also allows students to experience other cultures, prehistoric sites, and/or locales firsthand. May be repeated for credit under a different odyssey title. Taught with ANTH 521. May be repeated up to 6 credits. Consent of Instructor required.

ANTH 388. Intermediate Archaeological Field School**2-6 Credits (2-6)**

Training in archaeological field methods, including excavations of prehistoric sites, record keeping, mapping and analysis of data. Consent of Instructor required.

ANTH 389. Archaeological Mapping**3-6 Credits (3-6)**

Techniques for mapping archaeological sites and recording spatial distributions of archaeological data using a variety of surveying equipment and computer mapping software.

ANTH 399. Professionalism & Practice in Anthropology**3 Credits**

Capstone course for seniors designed to allow students to synthesize the anthropological knowledge they have acquired and connect theory to application in preparation for entry into a career. Restricted to: ANTH majors.

ANTH 401. Ethnography Seminar**3 Credits**

A literature review of ethnographic field research, data gathering, and analysis. A wide variety of anthropological publications will be critically examined and discussed. Designed for ANTH and SOC majors.

ANTH 402. Contemporary Medical Anthropology**3 Credits**

This advanced seminar in medical anthropology addresses contemporary issues in the field of medical anthropology through theoretical and ethnographic texts. Topics span a wide range of studies in medical anthropology and may include such issues as the social production of health and illness, medical pluralism, discourses of mental health, the practice of complementary and alternative medicine, health inequalities, and the political economy of infectious disease. Taught with ANTH 546.

Prerequisite(s): ANTH 201G or 357V.

ANTH 404. Cultures of Africa**3 Credits**

Explores the rich history and cultural diversity of the continent of Africa. The course first examines the historical processes that shaped modern Africa, including the evolution of modern humans in Africa, the origins of agriculture and pastoralism, the formation of indigenous African states, the slave trade, and European colonialism. The course also looks at contemporary African societies, including hunter-gatherer, pastoral, and farming/fishing peoples. In addition, contemporary issues facing modern Africa such as famine and agricultural policy, the status of women, and environmental challenges such as deforestation are discussed. Taught with ANTH 504. Crosslisted with: HIST 404

ANTH 415. Applied Anthropology**3 Credits**

Examines the intellectual roots of applied anthropology and early case studies of anthropologists working as administrators. Examines the ethical and methodological approaches that applied anthropologists employ. Examination of case studies that show role of applied anthropologists in improving human service delivery, cultural preservation, planning and implementing programs of participatory change, advocacy, and economic development. Taught with ANTH 515.

ANTH 431. Nutritional Anthropology**3 Credits**

Evolutionary and cross-cultural perspective on human nutrition.

ANTH 433. Women, Gender, and Culture**3 Credits**

Survey of the history of ideas about women and gender in the discipline of anthropology and a comparison of gender roles, relations, and ideologies across a range of cultures. Same as W S 433.

ANTH 434. Human Evolution**3 Credits**

Overview of human biological evolution from the emergence of Miocene apes to modern human diaspora. May be repeated up to 3 credits.

Crosslisted with: BIOL 434.

Prerequisite(s): ANTH 355 or consent of instructor.

ANTH 434 L. Human Evolution Laboratory**1 Credit**

Laboratory in human evolution, includes exercises and activities to learn the human fossil record. Crosslisted with: BIOL 434 L.

Prerequisite(s): ANTH 355 or consent of instructor.

Corequisite(s): ANTH 434.

ANTH 449. Directed Reading**1-6 Credits**

Comprehensive reading on selected topics. May be repeated for a maximum of 6 credits.

Prerequisite(s): Upper division anthropology majors with consent of instructor.

ANTH 449 H. Directed Reading Honors**1-3 Credits**

Same as ANTH 449. Additional work to be arranged. May be repeated for a maximum of 6 credits.

ANTH 455. Federal Indian Policy**3 Credits**

Federal Indian policy and its impact on Native Americans. This course will provide basic understanding of how federal Indian policy impacts almost all activities and situations with Native Americans. Course will also look at issues such as sovereignty and how it impacts most interactions with tribal groups.

ANTH 458. Sex, Reproduction and Birth**3 Credits**

This course examines pregnancy and birth practices cross-culturally, including such topics as gendered roles and responsibilities, pregnancy and birth as rites of passage, cultural concepts of personhood, global family planning initiatives, the medicalization of pregnancy and birth, and developing reproductive technologies.

Prerequisite(s): ANTH 201G, ANTH 357V or consent of instructor.

ANTH 459. Peru: From Incas to Inca Kola**3 Credits**

Explores issues of cultural and national identity in Peru from the Incas to the present, focusing on the modern period. Themes include indigenous resistance and adaptation to colonial rule, nationalism, militarism, terrorism, globalization, and the drug trade. Crosslisted with: HIST 459

ANTH 467. Archaeology of the American Southwest**3 Credits**

Description and analysis of prehistoric archaeology of the American Southwest including paleo-environmental reconstruction, culture change, and relations with contemporary cultures.

Prerequisite: ANTH 315.

ANTH 472. Primate Behavior and Ecology**3 Credits**

Survey of the social behavior and ecology of nonhuman primates.

Crosslisted with: BIOL 472.

ANTH 473. Primate Adaptation and Evolution**3 Credits**

Survey of the adaptations and evolutionary history of nonhuman primates. Crosslisted with: BIOL 423.

Prerequisite(s): ANTH 355 or consent of instructor.

Corequisite(s): ANTH 473 L when offered.

ANTH 474. Human Osteology**3 Credits**

A survey of the functional, developmental, and evolutionary biology of the human skeleton. Identifying bones and teeth from hands-on experience with skeletal and dental material. Provides a foundation for human evolutionary studies, bioarchaeology and forensic anthropology. May be repeated up to 3 credits. Crosslisted with: BIOL 424.

Prerequisite(s)/Corequisite(s): Recommend ANTH 355 or equivalent.

ANTH 477. Zooarchaeology**3 Credits**

Detailed study and analysis of taphonomic processes affecting animal bone recovered from archaeological and paleontological contexts.

Prerequisite(s): Either ANTH 315, ANTH 355, or BIOL 330.

ANTH 485. Special Research Project**1-3 Credits**

Anthropological, archaeological, or museum field work or laboratory experience in academic, private, state, or federal agencies. Must spend 30 hours in a field, museum, or laboratory setting per credit hour earned. May be repeated up to 6 credits.

Prerequisite(s): Complete 12 ANTH credits and consent of instructor.

**ANTH 486. Community Engagement and Service Learning
3 Credits**

Course combines classroom instruction with a local community service project. Formal instruction component will examine social science research findings and perspectives on a locally relevant social issue or problem. In the service learning component, students will be trained and work on a local community service project. Students will develop field experience and methodological skills in community engagement. Projects and social issues may vary for different semesters.

**ANTH 488. Archaeological Field School Advanced
1-6 Credits**

Archaeological field methods, including excavations of prehistoric sites, record keeping, mapping and analysis of data. Consent of Instructor required.

**ANTH 497. Special Topics
1-6 Credits (1-6)**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite(s): Junior or above standing.

**ANTH 500. Seminar in Anthropological Theory
3 Credits**

Detailed focus on specific areas of anthropological theory. Course subtitled in the Schedule of Classes. Course may be repeated.

Prerequisite(s): graduate standing in Anthropology or consent of instructor.

**ANTH 501. Concepts in Anthropology
3 Credits**

Survey of concepts and theories central to the subdisciplines of anthropology.

**ANTH 502. Fundamentals of Anthropology
1-4 Credits (1-4)**

Review of fundamental knowledge and theories in biological, cultural, or linguistic anthropology or archaeology. Graded S/U.

**ANTH 504. Cultures of Africa
3 Credits**

Explores the rich history and cultural diversity of the continent of Africa. The course first examines the historical processes that shaped modern Africa, including the evolution of modern humans in Africa, the origins of agriculture and pastoralism, the formation of indigenous African states, the slave trade, and European colonialism. The course also looks at contemporary African societies, including hunter-gatherer, pastoral, and farming/fishing peoples. In addition, contemporary issues facing modern Africa such as famine and agricultural policy, the status of women, and environmental challenges such as deforestation are discussed. Taught with ANTH 404. Crosslisted with: HIST 504

**ANTH 505. Issues in Anthropological Practice
3 Credits**

Anthropological approaches to research design, implementation, and dissemination. Restricted to: Main campus only.

**ANTH 506. Advanced Studies in Physical Anthropology
1-3 Credits**

Lectures, seminars, or laboratory research in selected topics. May be repeated for a maximum of 12 credits.

Prerequisite(s): graduate standing in Anthropology or consent of instructor.

**ANTH 507. Advanced Studies in Archaeology
1-3 Credits**

Lectures, seminars, field or laboratory research in selected topics. May be repeated for a maximum of 12 credits.

Prerequisite(s): graduate standing in Anthropology or consent of instructor.

**ANTH 508. Advanced Studies in Cultural Anthropology
1-3 Credits**

Lectures, seminars, or field research in selected topics. May be repeated for a maximum of 12 credits.

Prerequisite(s): graduate standing in Anthropology or consent of instructor.

**ANTH 509. Advanced Studies in Anthropological Linguistics
1-3 Credits**

Lectures, seminars, or field research in selected topics. May be repeated for a maximum of 12 credits.

**ANTH 512. Analytical Methods in Anthropology
3 Credits**

Quantitative analytical methods of anthropology examined in detail. Applied problem sets include physical and cultural anthropology, linguistics, and archaeology.

Prerequisite: graduate standing or consent of instructor.

**ANTH 513. Biological Anthropology
3 Credits**

Examination of major theoretical and methodological issues in biological anthropology.

**ANTH 515. Applied Anthropology
3 Credits**

Examines the intellectual roots of applied anthropology and early case studies of anthropologists working as administrators. Examines the ethical and methodological approaches that applied anthropologists employ. Examination of case studies that show the role of applied anthropologists in improving human service delivery, cultural preservation, planning and implementing programs of participatory change, advocacy, and economic development. Taught with ANTH 415.

**ANTH 516. Advanced Archaeology of the American Southwest
3 Credits**

Advanced topics in Southwestern archaeology including ritual architecture, environmental reconstruction, violence, site formation processes, and experiment and research.

**ANTH 517. Advanced Topics in Mesoamerican Archaeology
3 Credits**

Specific subjects in Mesoamerican archaeology to be announced in the Schedule of Classes. May be repeated for a maximum of 6 credits.

Prerequisite: graduate standing.

**ANTH 518. Advanced Historical Archaeology
3 Credits**

Advanced methodological and theoretical concepts applicable to the archaeology of historic periods.

**ANTH 519. Advanced Topics in Prehistoric Archaeology
3 Credits**

Seminar on specialized research archaeology.

Prerequisite: graduate standing.

**ANTH 520. Ethnographic Field Methods
3 Credits**

Basic methodologies used in conducting qualitative ethnographic research. Projects in participant observation, ethnographic interviews, life history interviews, folk taxonomy construction, and coding of field notes.

ANTH 521. Advanced Anthropologist Study Odyssey**3-6 Credits (3-6)**

This course allows students to explore an anthropological topic, such as an archaeological tradition or culture, through classroom and field activities. Students are initially exposed to a topic during several days of intensive in class work and then pursue greater understanding of the topic through a field trip and possibly limited fieldwork. Readings, site tours, on-site lectures by specialists, and field exercises provide students an opportunity to develop an understanding of anthropological perspectives on the topic as well as to provide exposure to anthropological field and analytic methods. This course also allows students to experience other cultures, prehistoric sites, and/or locales firsthand. May be repeated for credit under a different odyssey title. Taught with ANTH 386. May be repeated up to 6 credits. Consent of Instructor required.

ANTH 522. Archaeological Field School-Graduates**2-6 Credits**

Techniques of archaeological data collection, analysis, and interpretation. Emphasis on archaeological field work in the Southwest.

ANTH 523. Archaeological Mapping**3-6 Credits (3-6)**

Techniques for mapping archaeological sites and recording spatial distributions of archaeological data using a variety of surveying equipment and computer mapping software.

ANTH 526. Conquest and Colonialism**3 Credits**

Examination of major theoretical and methodological issues in historical anthropology and archaeology of the Americas from AD1500 to present, including conquest, colonialism, capitalism, and modernity as anthropological processes. The contributions and limitations of historical, ethnohistorical, and archaeological evidence are emphasized.

Prerequisite(s): graduate standing in Anthropology or History or consent of instructor.

ANTH 531. Issues in Nutritional Anthropology**3 Credits**

Evolutionary and cross-cultural perspective on human nutrition.

ANTH 534. Advanced Human Evolution**3 Credits**

Advanced overview of human biological evolution from the emergence of Miocene apes to the modern human diaspora. May be repeated up to 3 credits. Crosslisted with: BIOL 534.

ANTH 534 L. Advanced Human Evolution Lab**1 Credit**

Advanced laboratory in human evolution, includes exercises and activities to learn the human fossil record. Crosslisted with: BIOL 534 L.

Corequisite(s): ANTH 534.

ANTH 537. Applied Medical Anthropology**3 Credits**

This course introduces students to applications of medical anthropological perspectives to health care, international development, public health, and health policy.

ANTH 538. Plants, Culture, and Sustainable Development**3 Credits**

Study of role of indigenous cultures and indigenous knowledge systems in plant domestication, ethnoecology, and preservation of traditional crop diversity. Examination of issues related to conserving cultural diversity, food systems, food security and biodiversity.

ANTH 539. Culture and Foodways**3 Credits**

Study of interaction between food and culture from anthropological perspective. Study of role of food in cultural history, social relations, ritual, and identity. Examination of impact of globalization of food systems on traditional cultures, local food systems, and food security.

ANTH 540. Cultural Resource Management**3 Credits**

Study of federal and state of New Mexico historic preservation laws and regulations and their application in current Cultural Resource Management and a review of relevant case studies.

ANTH 541. Decolonizing Methodologies in Native American Studies**3 Credits**

This course utilizes decolonizing methodologies and praxis to gain insight into the complex effects of oppression and colonization. Critical and indigenous concepts are used to identify and analyze hegemonic, ethnocentric, historic and contemporary human rights and social justice issues of indigenous people. Research theory and methodology such as community participatory action research that is collaborative, inclusive, and pragmatic to ethics, intellectual property, and cultural boundaries of indigenous people is emphasized.

ANTH 542. Cultural Resource Management II**3 Credits**

Continuation of ANTH 540 to include the study of cultural resource management practices, research design, and completion of proposals in response to requests. Overview of management practices and budgeting of projects and specialized studies (geophysical investigations, National Register nominations).

ANTH 543. Indigenous Ways of Knowing**3 Credits**

This course examines Indigenous knowledge and ways of knowing as a means to gain an appreciation of an epistemology and ontology that may be outside the boundaries of Eurocentric theory, concepts, and principles. Knowledge development through mythology and story telling is viewed from the nature of difference rather than comparative analysis.

ANTH 545. Advanced Museology I**3 Credits**

Museum philosophy, history, administration, and collection management. Emphasis on collecting, cataloging, care, and exhibition, as well as ethics, public responsibility, and grantsmanship.

ANTH 546. Advanced Contemporary Medical Anthropology**3 Credits**

This advanced seminar in medical anthropology addresses contemporary issues in the field of medical anthropology through theoretical and ethnographic texts. Topics span a wide range of studies in medical anthropology and may include such issues as the social production of health and illness, medical pluralism, discourses of mental health, the practice of complementary and alternative medicine, health inequalities, and the political economy of infectious disease. Taught with ANTH 402.

ANTH 547. Museum Field Methods**3 Credits**

Basic methodologies used in conducting museum research away from the museum, including collections evaluation, collections acquisition, donor interviews, educational outreach, and development.

ANTH 548. Museums & Society**3 Credits**

Examines theoretical frameworks that shape museum administration, exhibits and collections development. Examines themes of gender, space, place, multiculturalism, national and international politics in museum contexts.

ANTH 559. Peru: From Incas to Inca Kola**3 Credits**

Explores issues of cultural and national identity in Peru from the Incas to the present, focusing on the modern period. Themes include indigenous resistance and adaptation to colonial rule, nationalism, militarism, terrorism, globalization, and the drug trade. Same as GOVT 565 and HIST 559.

ANTH 572. Advanced Primate Behavior and Ecology**3 Credits**

Advanced review of non-human primate social behavior and ecology. Crosslisted with: BIOL 572.

ANTH 573. Advanced Primate Adaptation and Evolution**3 Credits**

Advanced review of non-human primate adaption and evolution. Crosslisted with: BIOL 503.

Corequisite(s): ANTH 573 L when offered.

ANTH 574. Advanced Human Osteology**3 Credits**

Advanced Human Osteology surveying the functional, developmental and evolutionary biology of the human skeleton. Identifying bones and teeth from hands-on experience with skeletal and dental material. Provides a foundation for human evolutionary studies, bioarchaeology and forensic anthropology. May be repeated up to 3 credits. Crosslisted with: BIOL 574.

ANTH 576. Lithic Technology Organization**3 Credits**

Advanced seminars and laboratory exercises to learn and develop techniques and methods that will help us determine how to interpret behavioral and cultural information from lithic (stone tool) data. Consent of Instructor required.

ANTH 577. Advanced Zooarchaeology**3 Credits**

Detailed study and analysis of taphonomic processes affecting animal bone recovered from archaeological and paleontological contexts.

ANTH 578. Advanced Lab Methods in Archaeology**3 Credits**

Examination of advanced laboratory techniques used in the analysis of archaeological materials.

ANTH 579. Qualitative Data Analysis and Interpretation**3 Credits**

This course focuses on methods for qualitative data analysis, both computer-assisted and non-computer-assisted, and interpretation. It includes writing up data for academic articles or theses.

ANTH 585. Method and Theory in Archaeology**3 Credits**

Focus on major methodological and theoretical aspects of contemporary archeology.

ANTH 587. Field Work in Latin America**3-12 Credits**

Covers anthropological field methods in Latin America that also incorporate in-field lab analysis. No S/U grading.

Prerequisite: consent of instructor.

ANTH 596. Readings**1-6 Credits**

Individual study of selected readings and topics. May be repeated for a maximum of 6 credits. Consent of instructor required.

ANTH 597. Internship**1-9 Credits**

Anthropological or archaeological internship in private, state, or federal agency. May be repeated for a maximum of 18 credits. Consent of instructor required. Restricted to ANTH majors.

Prerequisite(s): graduate standing.

ANTH 598. Special Research Problems**1-6 Credits (6)**

Individual analytic or experimental investigations. May be repeated under different subtitles for a maximum of 6 credits. Consent of instructor required. Restricted to ANTH majors.

Prerequisite(s): graduate standing.

ANTH 599. Master's Thesis**15 Credits**

Thesis. Consent of instructor required. Restricted to ANTH majors.

Prerequisite(s): graduate standing.

Anthropology - Bachelor of Arts

The major in anthropology provides a broadly based education in the social and biological sciences. The undergraduate program prepares students for careers in many areas, such as cultural resource management (or contract archaeology), archaeological research, forensic sciences, health services, cross-cultural field work, community development programs and museum work. Anthropology students can continue for advanced degrees in teaching, museology, other social sciences and anthropology.

Requirements

Departmental Requirements

ANTH 301	Cultural Anthropology	3
ANTH 315	Introduction to Archaeology	3
ANTH 320	Anthropological Linguistics	3
ANTH 350	Anthropological Theory	3
ANTH 355	Physical Anthropology	3
ANTH 399	Professionalism & Practice in Anthropology	3

Nondepartmental Requirements¹

ENGL 218G	Technical and Scientific Communication	3
or ENGL 318G	Advanced Technical and Professional Communication	
MATH 210 or above		3

Electives

Select additional electives in anthropology to bring total credits in major to 36, including 27 upper-division.	12
Select sufficient electives to bring total credits to 120, including 48 upper-division.	84

Second Language Requirement²

Total Credits	120
---------------	-----

¹ A grade of C- or better must be earned.² Students seeking the B.A. in Anthropology must meet the second language requirement. The requirement is considered satisfied when a student provides evidence that at least the 212 or 214 level of language proficiency has been attained.

Anthropology - Master of Arts

The MA program in anthropology is designed for students who are interested in the traditional subdisciplines of anthropology and in selected areas of applied anthropology. The program is directed both toward students who intend to take a terminal MA degree and students who intend to enter a Ph.D. program.

A bachelor's degree in anthropology is not required for entry into the program. Nevertheless, students who lack the equivalent of the following courses may be required to take these courses or corresponding sections of ANTH 502 Fundamentals of Anthropology:

ANTH 301	Cultural Anthropology	3
ANTH 315	Introduction to Archaeology	3
ANTH 320	Anthropological Linguistics	3
ANTH 355	Physical Anthropology	3

Program Requirements

Students selecting the thesis option must complete 33 hours of basic course work, as described below, plus 6 hours of thesis credit. Students selecting the non-thesis option must complete 39 hours of course work including an internship or special research project for 6 credits.

The 33 hours of basic course work for students selecting either the thesis or non-thesis options are distributed as follows:

Required Course

ANTH 505	Issues in Anthropological Practice	3
----------	------------------------------------	---

Core Theory Courses

Select one of the following core theory courses in respective subfield: ¹	3
--	---

ANTH 585	Method and Theory in Archaeology (for students in archaeology subfield)	
ANTH 513	Biological Anthropology (for students in biological subfield)	
ANTH 500	Seminar in Anthropological Theory (for students in cultural anthropology and anthropological linguistics subfields)	

Select a core theory course in another subdiscipline.	3
---	---

Additional Courses

Select an additional topical/methodological/areal course in respective subfield. ¹	3
---	---

Total Credits		39

¹ earning a grade of B or better

Archaeology Subfield Courses

ANTH 507	Advanced Studies in Archaeology	1-3
ANTH 516	Advanced Archaeology of the American Southwest	3
ANTH 517	Advanced Topics in Mesoamerican Archaeology	3
ANTH 518	Advanced Historical Archaeology	3
ANTH 519	Advanced Topics in Prehistoric Archaeology	3
ANTH 526	Conquest and Colonialism	3
ANTH 540	Cultural Resource Management	3
ANTH 577	Advanced Zooarchaeology	3
ANTH 578	Advanced Lab Methods in Archaeology	3

Biological Anthropology Subfield Courses

ANTH 506	Advanced Studies in Physical Anthropology	1-3
ANTH 531	Issues in Nutritional Anthropology	3
ANTH 534	Advanced Human Evolution	3
ANTH 537	Applied Medical Anthropology	3
ANTH 572	Advanced Primate Behavior and Ecology	3
ANTH 573	Advanced Primate Adaptation and Evolution	3
ANTH 574	Advanced Human Osteology	3

Cultural Anthropology and Anthropological Linguistics Subfields Courses

ANTH 455	Federal Indian Policy	3
ANTH 504	Cultures of Africa	3
ANTH 508	Advanced Studies in Cultural Anthropology	1-3
ANTH 509	Advanced Studies in Anthropological Linguistics	1-3
ANTH 515	Applied Anthropology	3
ANTH 520	Ethnographic Field Methods	3
ANTH 526	Conquest and Colonialism	3
ANTH 531	Issues in Nutritional Anthropology	3
ANTH 538	Plants, Culture, and Sustainable Development	3
ANTH 539	Culture and Foodways	3

Admission Requirements

To be considered for admission to the MA program in anthropology, submit the following:

- Application form and fees
- Official undergraduate and graduate transcripts from all colleges and universities attended

- A letter from the candidate addressing his or her interests and graduate school objectives
- Letters of recommendation from three persons familiar with the candidate's academic record
- A Curriculum Vita
- An undergraduate grade-point average of 3.0 or higher

Application materials are available on the Anthropology website <http://anthropology.nmsu.edu>.

Anthropology - Undergraduate Minor

Students who earn a minor in Anthropology must earn 18 credits, distributed as follows:

Required Courses		
Select one from the following:		3
ANTH 301	Cultural Anthropology	
ANTH 315	Introduction to Archaeology	
ANTH 320	Anthropological Linguistics	
ANTH 350	Anthropological Theory	
ANTH 355	Physical Anthropology	
Upper division Anthropology courses 300 or above		9
Anthropology courses (any level)		6
Total Credits		18

Students who earn a B.A. in Anthropology may not also earn a minor in Anthropology. Students earning the minor must pass 18 credits with grades of C- or higher. Nine of the credits must be upper-division. Students may count S only in courses in which all grades are S/U.

Archaeology - Graduate Minor

Graduate Minor in Archaeology

The graduate minor in archaeology allows students in other programs to develop a specialization in archaeology. A minor in archaeology provides a useful concentration for students developing professional careers in cultural resource management, public lands management, environmental sciences, public history, geography, or teaching.

Course Requirements:

In order to complete the minor requirements, students are required to complete 9 credit hours (3 classes) of graduate level courses. The core courses for the minor are:

ANTH 507	Advanced Studies in Archaeology	1-3
ANTH 516	Advanced Archaeology of the American Southwest	3
ANTH 517	Advanced Topics in Mesoamerican Archaeology	3
ANTH 518	Advanced Historical Archaeology	3
ANTH 522	Archaeological Field School-Graduates	2-6
ANTH 523	Archaeological Mapping	3-6
ANTH 540	Cultural Resource Management	3
ANTH 577	Advanced Zooarchaeology	3
ANTH 585	Method and Theory in Archaeology	3

Students should choose among these core offerings with the advice of their MA thesis chair and minor area committee member. The minor in archaeology is not available to graduate anthropology majors.

Cultural Resource Management - Graduate Certificate

Graduate Certificate programs typically require 12-18 credits, and must be completed within 3 years. Our certificate program will require the student to take 18 credits, 6 credits from two required courses and 12 credits from a comprehensive list of electives in anthropology and cognate fields. All these courses are designed to promote expertise in cultural resource management.

Required Courses		
ANTH 540	Cultural Resource Management	3
ANTH 542	Cultural Resource Management II	3
HIST 579	Oral History	3
or HIST 583	Advanced Historic Preservation	
Elective Courses		
Select 9 credits from the following: ^{1,2}		9
ANTH 455	Federal Indian Policy	
ANTH 507	Advanced Studies in Archaeology	
ANTH 512	Analytical Methods in Anthropology	
ANTH 516	Advanced Archaeology of the American Southwest	
ANTH 522	Archaeological Field School-Graduates	
ANTH 523	Archaeological Mapping	
ANTH 526	Conquest and Colonialism	
ANTH 574	Advanced Human Osteology	
ANTH 577	Advanced Zooarchaeology	
ANTH 578	Advanced Lab Methods in Archaeology	
ANTH 596	Readings	
ANTH 597	Internship	
GEOG 521	GIS & T Applications and Modeling	
GEOG 553	Geomorphology	
GEOG 573	Introduction to Remote Sensing	
GEOG 578	Fundamentals of Geographic Information Science and Technology (GIS & T)	
HIST 579	Oral History	
HIST 586	Interpreting Historic Places for the Public	
HIST 594	Public History Seminar	
Total Credits		18

¹ Some of these courses have prerequisites, consult the graduate catalog for details.

² Other classes maybe included in the list of elective courses at the discretion of the Department and with approval of the Anthropology Department Head.

Food Studies - Graduate Minor

The purpose of the Food Studies Graduate Minor is to:

1. Enable students to develop a specialization in food studies within their respective graduate program

2. Develop specialized knowledge of the complex and dynamic relationship between food and culture
3. Explore the role of culture in food production, distribution and consumption across different cultures
4. Apply ideas and knowledge from graduate seminars to fieldwork for MA thesis or internship in a food studies topic

Program Requirements

Core Curriculum

Select three from the following: ¹ 9

ANTH 520	Ethnographic Field Methods
ANTH 531	Issues in Nutritional Anthropology
ANTH 538	Plants, Culture, and Sustainable Development
ANTH 539	Culture and Foodways
ANTH 515	Applied Anthropology ²
ANTH 537	Applied Medical Anthropology ²

Total Credits 9

¹ Alternative classes may be substituted for one of the core classes with the approval of the Anthropology Department Head.

² In these cases, the student's class research project should focus on a food studies theme.

Students are expected to conduct a food studies thesis, applying anthropological theoretical frameworks and ethnographic methodologies to the study of a food-related topic. Non-thesis students may select a food studies internship. Possible topics include sustainable development, alternative food movements, community food security, community health, nutrition, food safety, globalization of food, indigenous knowledge systems, food self-sufficiency, among others.

Museum Studies - Graduate Certificate

The Certificate in Museum Studies is a 3 semester (or one year and one summer) program designed for individuals who want to enhance their understanding of museum work but do not need a master's degree, or to be completed in conjunction with a Master's degree in Public History, History, Art History, Anthropology, Studio Art or other disciplines by permission.

Core Curriculum

ANTH 545	Advanced Museology I	3
ART 503	Preventive Conservation/Collections Care	3
HIST 500 or HIST 586	Special Topics Interpreting Historic Places for the Public	3
Internship (credits from ANTH, ART, or HIST)		3

Controlled Electives

Select two from the following: ¹ 6

ANTH 540	Cultural Resource Management
ANTH 542	Cultural Resource Management II
ANTH 547	Museum Field Methods
ANTH 548	Museums & Society
ART 501	Museum Conservation Techniques I

ART 502	Museum Conservation Techniques II
ART 579	Graduate Seminar: Art Theory, Criticism, Historiography
HIST 579	Oral History
HIST 581	Time Traveling Through New Mexico's Past
HIST 583	Advanced Historic Preservation
HIST 594	Public History Seminar

Total Credits 18

¹ This list can be modified as new courses are added to the catalog, or old ones are phased out. Eligible courses to be determined by a committee with at least one representative from Art, Anthropology and History.

Native American Studies - Graduate Minor

The purpose of the Native American Studies Graduate Minor are to:

- Provide an opportunity for all students to learn about Native American cultures and societies.
- Facilitate research and other creative activities that concern Native American peoples and that have potential benefit for them.
- Serve the University and State of New Mexico in ways that support and illuminate the rich heritage of Native American peoples.

NAS focuses on Native American cultures and societies, deals with contemporary and historical experiences of American Indians, and examines the contributions of Indigenous peoples to life in the United States and other American nations. This specialization field has developed in reaction to Western academic views of Native Americans and to the frequently restrictive, assimilationist approach within universities to issues concerning Native peoples. NAS contributes to a new understanding of Native American cultures and societies from contemporary and historical perspectives.

To qualify for a graduate minor in Native American Studies - Anthropology, students are required to complete 9 credit hours (3 classes) of graduate level courses. To record a minor on a student's transcript, the minor must be listed on the Application for Admission to Candidacy, and the Native American Studies advisor in the Department of Anthropology must sign this form.

Core Courses

ANTH 541	Decolonizing Methodologies in Native American Studies	3
ANTH 543	Indigenous Ways of Knowing	3
ANTH 455	Federal Indian Policy	3

Cognate Area Courses

GOVT 524	American Indian Politics ¹
HIST 509	Native American History ¹

Total Credits 9

¹ Alternative and support classes are identified in the list of cognate classes, and one class from the alternative class list may be substituted for a core class with the approval of the student's MA chair and the Coordinator for the Graduate Minor in Native American Studies.

Native American Studies - Undergraduate Minor

Students must pass a total of 18 credits of which at least 9 of which must be upper division. ANTH 115 Native Peoples of North America is strongly recommended as the first course for the minor. A grade of C- or better must be obtained for each course. Students may count S grades only in courses in which all grades are S/U, and no more than 6 hours of S credit can be accepted. Students can count no more than 3 credits in independent studies, readings or special topics courses. Such courses, marked below with an asterisk (*), must focus upon Native Americans and must be approved in advance by the director of the minor program, specifying the semester during which a student takes such a course. Students may count no more than 9 credits in Anthropology (except that ANTH 330V Magic, Witchcraft and Religion/HIST 330V Introduction to Religious Studies/SOC 330V Introduction to Religious Studies, may be included above this limit) and no more than 6 credits in History. Please contact the Department of Anthropology regarding the minor.

Requirements

Select 18 credits from the following: ¹		18
ANTH 110	North American Prehistory	
ANTH 115	Native Peoples of North America (strongly recommended as first course)	
ANTH 116	Native Peoples of the American Southwest	
ANTH 305V	Contemporary Native Americans	
ANTH 316	Archaeology of the American Southwest	
ANTH 330V	Magic, Witchcraft and Religion	
ANTH 449 H	Directed Reading Honors (preferred)	
ANTH 455	Federal Indian Policy	
ANTH 467	Archaeology of the American Southwest	
GOVT 406	Independent Study (preferred)	
GOVT 354	American Indian Politics	
HIST 309	American Indian History I	
HIST 310	American Indian History II	
HIST 449	Readings (preferred)	
HIST 489	Projects in History (preferred)	
PHLS 460	American Indian Health	
or by approval of Minor Advisor		

Total Credits	18
---------------	----

¹ Preferred: ANTH 449 H Directed Reading Honors, ANTH 497 Special Topics, ANTH 497 Special Topics, GOVT 406 Independent Study, HIST 449 Readings, HIST 449 Readings, HIST 489 Projects in History, HIST 489 Projects in History, HIST 489 Projects in History, and W S 250 Course W S 250 Not Found.

Religious Studies - Undergraduate Minor

Students must pass 18 credits of which at least 9 are upper division. Students must earn C- or higher grades and cannot count S/U courses unless all grades in the course must be S/U. No more than 9 credits (upper or lower division) can be earned in any one department. Students may not earn more than 3 credits total in independent studies or special readings courses and must receive approval from the minor advisor to count these credits. Courses that may be eligible as special topics courses when offered with specific subtitles are asterisked. Please contact the Department of Anthropology regarding the minor.

Requirements

Required Courses

ANTH 330V	Magic, Witchcraft and Religion	3
Select 15 credits from the following: ¹		15
ANTH 115	Native Peoples of North America	
ANTH 455	Federal Indian Policy	
ART 305	Medieval Art	
ART 310	Native American Art	
ART 311	Art of China I: Neolithic to Song Dynasty	
ART 320	Art and Architecture in Pre-Columbian Meso-America	
ART 321	Pre-Columbian Art and Architecture of the Andes	
ART 323	Italian Renaissance Art	
ART 325	Northern Renaissance Art	
ART 478	Seminar: Selected Topics in Art History	
DANC 451V	World Dance	
ENGL 243	The Bible as Literature	
ENGL 341V	American Indian Literature	
ENGL 392V	Mythology	
ENGL 407	Milton	
ENGL 421	Advanced Study in a Literary Period or Movement (preferred)	
ENGL 423	Advanced Study in a Major Author (preferred)	
ENGL 425	Advanced Study in Comparative Literature (preferred)	
Varying 400-level ENGL Courses ²		
GOVT 387	Religion and Politics	
HIST 101G	Roots of Modern Europe (when section approved by minor advisor)	
HIST 211G	East Asia to 1600	
HIST 221G	Islamic Civilizations to 1800	
HIST 222G	Islamic Civilizations since 1800	
HIST 309	American Indian History I	
HIST 353	Colonial Mexico	
HIST 400	Special Topics (preferred)	
HIST 433	United States Labor History Since 1877	
HIST 471	China through the Ming Dynasty	
HIST 473	History of Japan	
HON 229G	The New Testament as Literature	

HON 234G	The Worlds of Arthur
HON 237G	Archaeology: Search for the Past
HON 239G	Medieval Understandings: Literature and Culture in the Middle Ages
HON 326V	Art and Mythology
HON 348V	Comparative Mythology: Myth, Ritual, and the Life Cycle
HON 366V	The Gothic Imagination
PHIL 136G	The Quest for God
PHIL 331	Philosophy of Religion
SOC 460	Sociology of Religion
Or by approval of Minor Advisor	
Total Credits	18

¹ Preferred: ENGL 421 Advanced Study in a Literary Period or Movement, ENGL 423 Advanced Study in a Major Author, ENGL 425 Advanced Study in Comparative Literature, and HIST 400 Special Topics, HIST 101G Roots of Modern Europe: when section approved by minor advisor.

² ENGL, Dying for Love: Sex and the Spirit in Early English Poetry and ENGL, Women Reading the Bible, from Late Antiquity to Puritan America

Sustainable Development - Undergraduate Minor

A minor in Sustainable Development is available for students who want to include Sustainable Development in their academic training. The minor includes a minimum of 18 credit hours of which

- 6 credit hours must be from the core curriculum of the supplemental major,
- 12 credit hours from the elective courses for the supplemental major, and
- 3 credit hours of field study.

Sustainable Development - Undergraduate Supplemental Major

This program consists of 24 credits drawn from the lists below of which 18 credits must be numbered 300 or above. The student must take

Select 6 credit hours (2 classes) from the core curriculum	6
Select 15 credit hours (5 classes) of electives	15
Select 3 credit hours (1 class) of sustainable development field study	3
Total Credits	24

Advisor: Lois Stanford, Anthropology

Requirements

Core Requirements

Select two from the following:		6
AG E 315V	World Agriculture and Food Problems	
ANTH 362	Environmental Anthropology	
BIOL 301	Principles of Ecology	

GEOG 295	Introduction to Climate Science
SOC 465V	Environmental Sociology
Elective Courses	
Select 15 credits from the following: ¹	
AG E 337V	Natural Resource Economics
AGRO 483	Sustainable Production of Agronomic Crops
ANTH 360V	Food and Culture Around the World
BIOL 462	Conservation Biology
EPWS 380V	Science & Society
FWCE 255	Principles of Fish and Wildlife Management
HON 305V	Global Environment
HON 321V	Agriculture in an Interconnected World
SOC 361V	Social Issues in the Rural Americas

Additional Courses

With the permission of the program advisor, students may substitute 1 class that presents a topical focus on sustainable development. ²

Field Requirements

Select 3 credits from the following: ³		3
ANTH 485	Special Research Project	
FWCE 450	Special Topics	
SOC 496	Internship	

Total Credits 24

¹ Courses are limited in each department in order to encourage students to take classes in different disciplines and broaden their perspective.

² Certain courses, such as SOC 489 Globalization or special topics courses may have a sustainable development focus, depending on the instructor or subheading. In these cases the student can request permission to substitute this specific course for an elective class listed above.

³ In addition, students are expected to take one class that applies the principles and concepts of sustainable development in a local, regional or international setting. Students may opt to enroll in one of the classes listed below, or they may choose to work on an independent study or internship in sustainable development. In these cases, students should seek the approval of the sustainable development committee before embarking on the field experience or internship.

Art Undergraduate Program Information

The Department of Art provides a rigorous program for the enrichment, application, development and appreciation of the visual arts. Students in studio develop an individual aesthetic by experimenting with and expressing visual concepts in an articulate manner. Art history students acquire a comprehensive understanding of the aesthetic and cultural issues addressed within the history of art, conducting and presenting independent research. The study of art provides an appropriate background for the pursuit of careers in studio art and art history in such areas as: the visual arts; graphic design; conservation; library work; museum work; advertising; architecture and interior design; photography; crafts; cinematography; education and art therapy;

publishing; theatre; set design; television; industry and business; communication; management and research in the creative and academic areas. A major in art also provides students with a broad humanistic background appropriate to preparation for advanced degrees in other fields.

Degrees for the Department

Art - Bachelor of Arts (p. 201)

Art - Bachelor of Fine Arts (p. 202)

Art - Master of Arts (p. 203)

Art - Master of Fine Arts (p. 204)

Minors for the Department

Art - Undergraduate Minor (p. 205)

Art History - Undergraduate Minor (p. 205)

Museum Conservation - Undergraduate Minor (p. 205)

Professor, Julia Barello, Department Head

Professors Barello, Stevens; **Associate Professors** Cully, Goehring, Zarur; **Assistant Professors** d'Agostino, Edgar, Furuhashi, Kline, Taylor; **College Instructors** Cole-Dorn, Fitzsimmons, Marinas-Feliner; **Emeritus Professors** Fidler, Jaffe, Ocepek, Rose, St. Aubyn; **Gallery Director** Sage; **Conservator** Marinas-Feliner

J. Barello, Department Head, MFA (University of Wisconsin-Milwaukee)– metals; T. Cole-Dorn, MFA (New Mexico State University)– painting and drawing; C. Cully, MFA (University of Arizona)– painting and drawing; B. d'Agostino MFA (University of Maryland)– graphic design; J. Edgar, MFA (Cranbrook Academy of Art)-Ceramics; J. Fitzsimmons, MA (New Mexico State University)– art history; M. Furuhashi, MFA (University of Illinois-Champagne)- jewelry and metals; M. Goehring, Ph.D. (Case Western)– art history; R. W. Kline MFA (University of Illinois - Chicago); S. Marinas-Feliner, MA Art Conservation (Universidad Complutense de Madrid, Spain) and MA Anthropology (New Mexico State University)– Art Conservator; M. Sage, MFA (MICA)- University Art Gallery Director; R. Stevens, MFA (Syracuse University)– sculpture; S. Taylor, Ph.D. (Boston University)– art history; E. Zarur, MFA, Ph.D. (University of Georgia)– art history

ART 101G. Orientation in Art

3 Credits (2+3P)

A multicultural examination of the principles and philosophies of the visual arts and the ideas expressed through them.

ART 110G. Visual Concepts

3 Credits (2+4P)

Introduction to the philosophies of art, visual thinking, and principles of visual organization. Designed to give students a broad view of aesthetic traditions, ideologies, and techniques basic to the creation and evaluation of art. Principles and concepts are taught in a common lecture and applied in parallel small studio sections. For non-art majors only.

ART 150. Drawing I

3 Credits (2+4P)

Introduction to the skill of seeing through exercises that emphasize careful drawing from the still life and utilize a range of drawing materials and techniques. Outside assignments required. Intended for non-art majors on main campus. May be repeated up to 3 credits.

ART 151. Drawing II

3 Credits (2+4P)

Continued emphasis on drawing from observation by focusing on still life and other subject matter. Covers a range of materials, techniques and concepts. Outside assignments. Restricted to ART and ANVE/DFM majors.

Prerequisite(s): ART 150.

ART 155. 2-D Fundamentals

3 Credits

Introduction to two-dimensional space emphasizing visual elements and design principles as they apply to composition. A variety of materials are used in the studio projects and sketchbook exercises. Developing knowledge in vocabulary, color theory and skill in translating ideas into design are encouraged. Restricted to Community Colleges campuses only.

ART 156. 3-D Fundamentals

3 Credits

Compositional organization of three-dimensional space explored through a broad range of visual exercises. Resourceful and creative problem solving encouraged. Restricted to Community Colleges campuses only.

ART 157. Color Theory

3 Credits (2+4P)

Various color theories as they relate to compositional organization. Required for art education majors.

ART 160. Computer-Based Illustration

3 Credits (2+4P)

Introduction to the principles of computerized drawing and design. Using the basic concepts, drawing tools, and vocabulary of Adobe Illustrator.

Prerequisite: ART 150, ART 155, or consent of instructor.

ART 161. Digital Imaging I

3 Credits (2+4P)

Work with basic concepts, tools, and vocabulary of Adobe Photoshop to create effective visual communication. Includes selection tools, cloning, copying and pasting, color correction, image restoration, filters, and special effects. Community Colleges only.

ART 163. Digital Graphics

3 Credits (2+4P)

Importing and exporting images and text into various desktop publishing formats. Exploring imaging, drawing, and page layout applications.

Introduction to typography.

Prerequisite: ART 161.

ART 165. Web Page Design

3 Credits (2+4P)

Introduction to the creation of well-designed and organized Web sites. Emphasis on building creative but functional user-friendly sites. Introduction to HTML, Flash, Java Script, and Web-authoring software. Community Colleges only. Same as OEPT 165.

Prerequisite: ART 161.

ART 250. Introduction to Drawing

3 Credits (2+4P)

Introduction to drawing with a focus on technical, structural, and methodological skills. Subjects include still life and live figure models.

ART 252. Aspects of Drawing

2-3 Credits

Continued work in drawing with emphasis on personal creative endeavor. Community Colleges only.

Prerequisites: ART 150, ART 151, and ART 250.

ART 255. Introduction to Graphic Design**3 Credits (2+4P)**

Introduction to the principles of visual communication and digital media, letterforms, typography and identity marks. Projects produced using conventional and digital tools.

ART 256. Introduction to Letter Forms and Typographic Design**3 Credits (2+4P)**

Introduction to letter forms, typography and identify marks. Projects produced using conventional and digital graphic designer tools.

Prerequisite(s): ART 155.

ART 260. Introduction to Painting**3 Credits (2+4P)**

Introduction to basic skills of painting through various exercises that emphasize working from observation, images and imagination. May be repeated up to 3 credits.

Prerequisite(s): ART 250 or ART 150.

ART 261. Painting Methods, Techniques and Applications**3 Credits (2+4P)**

The investigation of formal aspects of painting, an examination of painting techniques, and an exploration of various methodologies regarding form and content as applied to critical thinking skills through medium of paint.

Prerequisite(s): ART 150, ART 260.

ART 262. Aspects of Painting**2-3 Credits**

Varied painting media: continued development of painting skills.

Prerequisites: ART 150, ART 155 (for art majors), ART 260, or consent of instructor.

ART 265. Introduction to Sculpture**3 Credits (2+4P)**

Beginning sculpture students "explore space" while learning new processes and skills, including mold making, welding and woodworking.

ART 266. Go Figure: The Body in Contemporary Art**3 Credits (2+4P)**

Cultivation of individual direction through constant creative action. Emphasis on self-styled assignments. Rotating themes pertinent to contemporary sculpture supplement aesthetic and conceptual awareness. Restricted to: Main campus only.

ART 267. Art Portfolio Preparation**3 Credits (2+4P)**

Refine general marketing strategies, personal portfolio and resumes. Define, target, and penetrate personal target markets. Students develop individual promotional packages.

Prerequisites: ART 163, ART 269, and ART 272, or consent of instructor.

ART 269. Advanced Computer-Based Illustration**3 Credits (2+4P)**

Design custom graphics and create special effects with filtering, special effects on type, graphing, technical illustrations, and three-dimensional drawing using Adobe Illustrator.

Prerequisites: ART 157, ART 160, and ART 161, or consent of instructor.

ART 270. Introduction to Photography**3 Credits (2+4P)**

Introduction to the production of digital images within the context of contemporary art. Utilizes digital SLR cameras with an emphasis on basic camera operation, picture composition, image processing and digital workflow. A DSLR camera is required. May be repeated up to 3 credits.

ART 271. Introduction to Film and Darkroom**3 Credits (2+4P)**

Introduction to silver based photographic materials, film development, enlargement printing and darkroom work. Students will work with a range of cameras including: medium format, toy and pinhole. Emphasis on understanding the syntax of silver halide photographic materials. Development of conceptual vocabulary and the creation of images with thematic unity. May be repeated for a maximum of 6 credits.

Prerequisite(s): ART 270.

ART 272. Digital Imaging II**3 Credits (2+4P)**

Refining of individual creative styles and technical skills using Adobe Photoshop. Emphasis on input and output predictability, and working with large file productions. Community colleges only. Restricted to: Community Colleges only.

Prerequisite(s): ART 161.

ART 274. Digital Capture and Output**3-9 Credits (3-9)**

Digital workflow, scanning, image processing software, digital printing, color management. Advanced digital printing skills. Emphasis on understanding the syntax of digital photographic processes. Development of conceptual vocabulary and the creation of images with thematic unity. Consent of instructor required. Restricted to ART majors.

ART 275. Introduction to Ceramics**3 Credits (2+4P)**

Introduction to the technical processes and conceptual concerns of working with the ceramic material. Students will explore various methods of forming with earthenware to make both functional and expressive works out of clay.

ART 276. Ceramics I, B**3 Credits (2+4P)**

Beginning ceramics, complementary half to ART 275. (ART 275 and ART 276 do not need to be taken consecutively.) Basic building techniques of coil, slab, and throwing are introduced. High-fire and low-fire clays are used.

ART 280. Introduction to Printmaking**3 Credits (2+4P)**

Introduction to the field of printmaking through projects that focus on specific processes, such as relief, intaglio, collography, paper lithography, and a variety of transfer and stencil techniques. Students engage in several assignments that are collaborative, as well as individual projects designed for development of personal aesthetics.

ART 281. Printmaking II**3 Credits (2+4P)**

Printmaking materials and techniques, with emphasis in intaglio and relief procedures.

Prerequisites: ART 150, ART 156 (for ART majors) and 280.

Corequisite: ART 150.

ART 285. Introduction to Metals and Jewelry**3 Credits (2+4P)**

Introduction to fundamental processes, design, and conceptual development for metal fabrication of jewelry and functional/non-functional objects.

ART 286. Stained Glass**3 Credits (2+4P)**

Instruction in the fundamental fabrication and design techniques for stained glass. Introduction to visual decision making skills, historical, and critical issues of the medium. Community Colleges only.

ART 294. Special Topics in Studio**1-3 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. No more than 9 credits toward a degree.

Prerequisite: consent of instructor.

ART 295G. Introduction to Art History I**3 Credits**

An introduction to the principles of art history within a chronological framework of the art of the Western World. All media will be discussed. From prehistoric times to the fourteenth century.

ART 296G. Introduction to Art History II**3 Credits**

Continuation of ART 295, Art of the Western World from Late Gothic to the present. May be repeated up to 3 credits.

ART 298. Writing in Art**3 Credits**

This reading- and writing-intensive course will introduce students to various approaches of writing about historical art.

ART 300. Special Topics in Art History**3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits. May be repeated up to 12 credits. Restricted to Las Cruces campus only.

Prerequisite(s): ART 295G, ART 296G, and ART 298 or consent of instructor.

ART 305. Medieval Art**3 Credits**

History of painting, stained glass, sculpture, architecture and manuscript illumination in Europe from the Early Christian period to the end of the Gothic period; taught with ART 505.

Prerequisite(s): ART 295G, ART 296G, and ART 298 or consent of instructor.

ART 310. Native American Art**3 Credits**

Cross-cultural introduction to art of the prehistoric and historic native people of the North, Central, and South Americas. Considers the artistic expression and the function of art in diverse cultural and environmental contexts.

Prerequisite(s): ART 295G, ART 296G, and ART 298 or consent of the instructor.

ART 311. Art of China I: Neolithic to Song Dynasty**3 Credits**

Survey of the art of China from the neolithic period to the end of the Song dynasty. Non-majors welcome. May be repeated up to 3 credits. Crosslisted with: ART 511.

Prerequisite(s): ART 295G, 296G, and 298 or HIST 211G and HIST 212G or consent of instructor.

ART 320. Art and Architecture in Pre-Columbian Meso-America**3 Credits**

Analysis of the art and culture of the Mesoamerican peoples before the arrival of Columbus in the New World. Includes an in-depth formal and historical analysis of architecture, sculpture, painting, pottery, and metal works of Mixtec, Toltec, Aztec, Maya, and other cultures and civilizations.

Prerequisite(s): ART 295G, ART 296G, and ART 298 or consent of instructor.

ART 321. Pre-Columbian Art and Architecture of the Andes**3 Credits**

Examines the arts and history of pre-Columbian Andean cultures in a cultural context. Analysis of architecture, sculpture, pottery, jewelry, textiles, and feather work.

Prerequisite(s): ART 295G, ART 296G, and ART 298 or consent of instructor.

ART 323. Italian Renaissance Art**3 Credits**

History of painting, sculpture and architecture in Italy from the 14th century to the end of the 16th century; taught with ART 523.

Prerequisite(s): ART 295G, ART 296G and ART 298 or consent of instructor.

ART 325. Northern Renaissance Art**3 Credits**

History of painting, manuscript illumination and graphics in Northern Europe from the late 14th century to the mid-16th century; taught with ART 525.

Prerequisite(s): ART 295G, 296G, and 298 or consent of instructor.

ART 328. Baroque Art and Architecture in Northern Europe**3 Credits**

Study of architecture, painting sculpture in Flanders, Holland, France, England, and Germany as indigenous developments and as reflections of the Italian Baroque.

Prerequisite(s): ART 295G, ART 296G, ART 298, or consent of instructor.

ART 329. Survey of Western Architecture**3 Credits**

Survey of history of Western architecture from prehistoric time to the present.

Prerequisite(s): ART 295G, ART 296G, and ART 298 or consent of instructor.

ART 330. Modern Architecture**3 Credits**

A survey of the history of Modern Architecture with focus given to major architects, monumental buildings, and building groups stressing construction techniques and style from the 18th century to the present.

Prerequisite(s): ART 295G, ART 296G, ART 298, or consent of instructor.

ART 333. Baroque Art and Architecture in Italy, Spain, and Hispanic Latin America**3 Credits**

Concentration of Italian Baroque architecture, painting, and sculpture; and on Spanish painting, sculpture, and architecture, as well as the art and architecture of Spanish vice-royalties of the Americas.

Prerequisite(s): ART 295G, ART 296G, ART 298, or consent of instructor.

ART 337. American Art to 1900**3 Credits**

Examines painting, sculpture, architecture and other arts in the United States from the colonial period to 1900 and places them within conceptual and historical contexts.

Prerequisite(s): ART 295G, ART 296G, and ART 298.

ART 338. Late Eighteenth- and Nineteenth-Century European Art**3 Credits**

History of painting, sculpture, architecture, and other arts created in Europe from 1789 to 1900.

Prerequisite(s): ART 295G, ART 296G, and ART 298.

ART 339. History of Photography**3 Credits**

Course studies history, theory and use of photographic practices in art, especially from formal introduction of the process in 1839 to the present.

Prerequisite(s): ART 295G, ART 296G, and ART 298.

ART 342. Twentieth-Century Art I, 1900-1945**3 Credits**

Examines themes and monuments of the Western world created between 1900 and 1945 and emphasizes the growth of modern and avant garde cultural practices.

Prerequisite(s): ART 295G, ART 296G, and ART 298.

ART 343. Twentieth-Century Art II, 1945-Present**3 Credits**

History of painting, sculpture, and other arts in Europe, the United States, and elsewhere from 1945 to the present.

Prerequisite(s): ART 295G, ART 296G, and ART 298.

ART 350. Intermediate Drawing and Painting**3 Credits (2+4P)**

Intermediate drawing and painting course focusing on the following topics: Realism, Color, Narrative, and Abstraction. Topics will be announced in the course schedule. Each topic may only be taken once. May be repeated up to 12 credits.

Prerequisite(s): ART 250 and ART 260.

ART 354. History of Graphic Design**3 Credits**

This course introduces students to the history of graphic design and evolution of visual communication. Course will involve writing and design projects.

Prerequisite(s): ART 295G, ART 296G, and ART 298.

ART 355. Special Topics in Graphic Design**3 Credits (2+4P)**

Intermediate graphic design course focusing on the following topics: production, packaging, layout, identity and interactive design. Topics will be announced in the course schedule. Each topic may only be taken once. May be repeated up to 12 credits.

Prerequisite(s): ART 255.

ART 356. Graphic Design and Multicolor Digital Production**3 Credits (2+4P)**

Design and production of multicolor projects using conventional and digital techniques.

Prerequisite(s): Grades of B or higher in each of ART 255 and ART 256; prior passage of ART 355 with a grade of C- or higher.

ART 357. Digital Graphic Design and Illustration**3 Credits (2+4P)**

Graphic illustrations and icons using vector and bitmap software programs. Emphasis on editorial, information and cultural applications. May be repeated for a maximum of 6 credits.

Prerequisite(s): ART 150, ART 255, ART 256.

ART 359. Digital Image-Making for Graphic Designers**3 Credits**

Creation of graphic icons, stylizations and archetypes. Projects produced using vector-based computer programs. Some computer experience required.

Prerequisite(s): ART 150, ART 255, ART 256, and CMT 145.

ART 360. The Figure**3 Credits (2+4P)**

Introduction to working from live models, anatomical skeletons, source images and the imagination in a variety of two-dimensional media, including painting and drawing. An emphasis is placed on anatomical accuracy and with a focus on the figure as an expressive subject. May be repeated up to 3 credits.

Prerequisite(s): ART 150, 250 or consent of instructor.

ART 361. Painting IIIB**3 Credits (2+4P)**

Media, materials and technical problems of contemporary painting continued. May be repeated for a maximum of 6 credits.

Prerequisite(s): ART 295G and ART 360.

ART 365. Intermediate Sculpture Special Topics**3 Credits (2+4P)**

Intermediate sculpture students will expand their fabrication skills in metal, wood and mixed media. Assignments incorporate topics such as Pop art, Process Art, and The Body in Contemporary Art. Topics will be announced in the course schedule. Each topic may only be taken once. May be repeated up to 6 credits.

Prerequisite(s): ART 265.

ART 370. Intermediate Digital Photography**3 Credits (2+4P)**

Intermediate digital photography course addressing techniques and production of photo media within the context of contemporary art. Course focuses on the following rotating topics: Networks, Photo-book and Video art. May be repeated up to 12 credits.

Prerequisite(s): ART 270, or consent of instructor.

ART 373. Intermediate Analog Photography**3 Credits (2+4P)**

Introduction to skills and techniques of black and white film photography within the context of contemporary art. Emphasis on analog camera work and darkroom procedures. 35 mm SLR or rangefinder film camera required for course. May be repeated up to 6 credits.

Prerequisite(s): ART 270, or consent of instructor.

ART 374. Intermediate Ceramics: Multiples (Design and Production)**3 Credits (2+4P)**

Intermediate ceramics course focusing on an introduction to the technical processes of throwing, prototyping, mold making, glaze calculation, and alternative firing. May be repeated up to 6 credits.

Prerequisite(s): ART 275.

ART 375. Intermediate Ceramics: Sculptural Concerns**3 Credits (2+4P)**

Intermediate ceramics course focusing on the refinement of technical skills with an emphasis on conceptual development related to materiality.

Prerequisite(s): ART 275 or consent of instructor.

ART 376. Museum/Gallery Research Internship**1-9 Credits**

Research internship in museum or gallery. Requirements determined by instructor in cooperation with supervising museum/gallery professional. May be repeated up to 9 credits. Consent of Instructor required.

Prerequisite(s): ART 295G, ART 296G, and ART 298.

ART 380. Intermediate Printmaking**3 Credits (2+4P)**

Intermediate printmaking course with emphasis on further investigation of a variety of materials and techniques associated with the print processes of intaglio and relief. Stone lithography, serigraphy and mixed media will be introduced. May be repeated up to 6 credits.

Prerequisite(s): ART 280, or consent of instructor.

ART 385. Intermediate Metals: Special Topics**3 Credits (2+4P)**

Intermediate Metals/Jewelry course focusing on the following topics: design and production, materiality and sculptural concern. Techniques may include casting, complex construction, forming, and mix media. Topics will be announced in the course schedule. Each topic may only be taken once. May be repeated up to 6 credits.

Prerequisite(s): ART 285.

ART 387. Exhibition Studies**3 Credits**

Exhibition theory through practice. Gallery operations and management: collecting, conversation, exhibiting, and public responsibility.

ART 390. Visual Culture of the 1960s**3 Credits**

Focus on major cultural trends and historical events in 1960's America. Offers analysis of art, films, and pop culture phenomena of the period.

Prerequisite(s): ART 295G, ART 296G, and ART 298.

ART 392. Visual Culture of the 1980s**3 Credits**

Focus on major cultural trends and historical events in 1980's America. Offers analysis of art, films, and pop culture phenomena of the period.

Prerequisite(s): ART 295G, ART 296G, and ART 298.

ART 394. Special Topics in Studio**3 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. No more than 9 credits toward a degree.

ART 401. Museum Conservation Techniques I**3 Credits (2+3P)**

Introduces the student to conservation theory and the basic principles of conservation for cultural objects. The course integrates the history, philosophy and technologies of art conservation with knowledge of the properties of materials used in conservation. The student will learn and develop conservation skills including learning about the most frequent kinds of deterioration that can occur in various types of art objects, symptoms and causes as well as preventative and restoration techniques. Although this course provides practical experience, it also seeks to provide a broad understanding of the field of conservation. This course also includes how to document the condition of an object during the conservation process. Crosslisted with: ART 501.

ART 402. Museum Conservation Techniques II**3 Credits (2+3P)**

Continues conservation theory and the basic principles of conservation for cultural objects. The course integrates the history, philosophy and technologies of art conservation with knowledge of the properties of materials used in conservation. The student will learn and develop conservation skills including learning about the most frequent kinds of deterioration that can occur in various types of art objects, symptoms and causes as well as preventative and restoration techniques. Although this course provides practical experience, it also seeks to provide a broad understanding of the field of conservation. Crosslisted with: ART 502.

Prerequisite(s): ART 401.

ART 403. Preventative Conservation/Collections Care**3 Credits**

Introduces the student on how to mitigate the deterioration and damage of cultural property in a museum setting through the formulation and implementation of policies and procedures. The course addresses most aspects of collections management and care for objects in storage, exhibitions and during transportation. Crosslisted with: ART 503.

ART 444. Art and Life in Renaissance Italy**3 Credits**

Examines how Italian Renaissance textual and visual culture offered Europe new ways of seeing and portraying itself. 1350-1550. Topics include: Florence, Venice, Rome, Leonardo, Michelangelo, titian, humanism, the Medici, and republican and courtly culture.

Prerequisite(s): ART 295G, ART 296G, and ART 298.

ART 450. Advanced Drawing and Painting: Special Topics**3-6 Credits (2-4+4P)**

Advanced drawing and painting course focusing on the following topics: Identity, Place, Spirituality, and Body. Topics will be announced in the course schedule. May be repeated up to 12 credits.

Prerequisite(s): 12 credits of ART 350.

ART 455. Advanced Graphic Design Special Topics**3-6 Credits (3-6)**

Advanced graphic design course focusing on the following topics: visual communication, system graphics, typography, portfolio preparation, art of the book and professional practice. Topics will be announced in the course schedule. Each topic may only be taken once. May be repeated up to 18 credits.

Prerequisite(s): 6 credits of ART 355.

ART 458. The New Mexico Studio of Design**3 Credits**

An advanced graphic design studio providing a design service for nonprofit community organizations. Client-based projects produced by students from concept to completion. May be repeated for a maximum of 6 credits.

Prerequisite(s): ART 355.

ART 460. Painting Workshop**3 Credits**

Media, materials and advanced technical problems of contemporary painters. May be taken up to 6 credits.

Prerequisite(s): ART 350 and ART 361.

ART 461. Painting Workshop II**3 Credits (2+4P)**

Advanced issues in contemporary painting. May be repeated for a maximum of 6 credits. Restricted to majors.

Prerequisite(s): ART 460.

ART 465. Advanced Sculpture Special Topics**3-6 Credits (2-4+4P)**

Thematic classes deepen students' knowledge of contemporary sculpture and extended media through a series of interpretive assignments that culminates in a unified body of work. Course topics include: "Artists' Maps", Installation Art/Land Art", "Sculpture and the 1960s", "Sculpture and the 1970's". Topics will be announced in the course schedule. May be repeated up to 18 credits.

Prerequisite(s): 3 credits of ART 365 or permission of the instructor.

ART 470. Advanced Digital Photography**3 Credits (2+4P)**

Advanced digital photography course addressing technique and production of photo media within the context of contemporary art. Course focuses on the following rotating topics: Temporality, Photo-installation and Video Art. Each topic may only be taken once. May be repeated up to 12 credits.

Prerequisite(s): ART 370, ART 373 or consent of instructor.

ART 473. Advanced Analog Photography**3 Credits (2+4P)**

Advanced photography course focused on skills and techniques of black and white film within the context of contemporary art. Course focuses on the following rotating topics: Large Format Tableau, Experimental Processes and Materials. May be repeated up to 12 credits.

Prerequisite(s): ART 370 and ART 373, or consent of instructor.

ART 474. Advanced Ceramics Design and Production**3-6 Credits (3-6)**

Advanced ceramics course focusing on the technical processes of throwing, prototyping, mold making, glaze calculation, and alternative firing. Discussions may also include issues of professional practice, marketing, and branding. May be repeated up to 6 credits.

Prerequisite(s): ART 374 and ART 375, or consent of instructor.

ART 475. Advanced Ceramics Sculptural Concerns**3-6 Credits (2-4+4P)**

Advanced ceramics course focusing on conceptual development as it relates the creation of a unified body of work. Topics may include discussions of advanced techniques, professional practices, and contemporary issues in ceramics. May be repeated up to 15 credits.

Prerequisite(s): ART 374 and ART 375, or consent of instructor.

ART 477. Independent Research Problems in Art History**1-9 Credits**

Advanced research on special problems to be conducted under supervision of art history faculty. May be taken up to 12 credits. Consent of instructor required.

Prerequisite(s): ART 295G, ART 296G, ART 298 and one 300 level art history course and consent of instructor.

ART 478. Seminar: Selected Topics in Art History**3 Credits**

Reading, research, and discussion of advanced problems. Topics will be announced in the course schedule. Each topic may be only taken once. Non-art/art history majors, contact instructor for consent. May be repeated up to 12 credits.

Prerequisite(s): ART 295G, ART 296G and ART 298, and one 300 level art history course.

ART 479. Art Theory, Criticism, and Historiography**3 Credits**

Theories and methodologies in art history and art criticism. May be repeated up to 3 credits.

Prerequisite(s): ART 295G, ART 296G, ART 298 and one 300 level art history course and consent of instructor.

ART 480. Special Topics in Printmaking**3-6 Credits (3-6)**

Special topics in printmaking. Emphasizing conceptual approaches to printmaking and development of individual content. Topics will be announced in the course schedule. May be repeated up to 18 credits.

Prerequisite(s): 6 credits of ART 380.

ART 485. Advanced Metals: Special Topics**3-6 Credits (2-4+4P)**

Advanced Metals/Jewelry course focusing on the following topics: conceptual development and personal aesthetic and style, professional practices, contemporary issues in Metals/Jewelry, and senior exhibition. Techniques may include enameling, coloring, historical processes, and digital technology. Topics will be announced in the course schedule. Each topic may only be taken once. May be repeated up to 18 credits.

Prerequisite(s): 6 credits of ART 385.

ART 490. Museum Conservation Internship**1-6 Credits (1-6)**

The goal of this internship is to provide a student with a practical learning experience in preventative conservation techniques and policies so that they can relate what they have learned in the classroom from ART 403 Preventative Conservation/Collections Care to applied situations. It will provide the student an opportunity to learn skills and knowledge needing in working with museum collections. Tasks and projects will be assigned by the instructor. 3 credits required for BFA in Museum Conservation. May be repeated up to 6 credits.

Prerequisite(s): ART 403.

ART 494. Special Topics in Studio**3 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. No more than 9 credits toward a degree.

ART 495. Undergraduate Studio Thesis**3-6 Credits (3-6)**

Special research and independent study leading to undergraduate thesis exhibition. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

ART 496. Fundamentals of Studio Management**1 Credit**

Advanced studio course designed to introduce students to the fundamentals of studio management. Includes training in proper tools use and maintenance; safety procedures; and practical experience with studio oversight. Concurrent registration in advanced level studio course of the same media area required. May be repeated for a maximum of 3 credits. Restricted to majors. Graded S/U.

Prerequisite: consent of instructor.

ART 497. Readings in Art History**3 Credits**

In-depth study of art historical writing. May be taken up to 12 credits. May be repeated up to 12 credits. Consent of Instructor required.

Prerequisite(s): ART 295G, ART 296G, ART 298 and one 300 level art history course.

ART 499. Problems in Studio Art**1-6 Credits (1-6)**

Individualized study in specialized studio areas not covered by other advanced courses. May be repeated up to 9 credits. Consent of Instructor required.

ART 500. Special Topics in Art History Advanced**3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite: graduate status.

ART 501. Museum Conservation Techniques I**3 Credits (2+3P)**

Introduces the student to conservation theory and the basic principles of conservation for cultural objects. The course integrates the history, philosophy and technologies of art conservation with knowledge of the properties of materials used in conservation. The student will learn and develop conservation skills including learning about the most frequent kinds of deterioration that can occur in various types of art objects, symptoms and causes as well as preventative and restoration techniques. Although this course provides practical experience, it also seeks to provide a broad understanding of the field of conservation. This course also includes how to document the condition of an object during the conservation process. May be repeated up to 3 credits. Crosslisted with: ART 401.

ART 502. Museum Conservation Techniques II**3 Credits (2+3P)**

Continues conservation theory and the basic principles of conservation for cultural objects. The course integrates the history, philosophy and technologies of art conservation with knowledge of the properties of materials used in conservation. The student will learn and develop conservation skills including learning about the most frequent kinds of deterioration that can occur in various types of art objects, symptoms and causes as well as preventative and restoration techniques. Although this course provides practical experience, it also seeks to provide a broad understanding of the field of conservation. Crosslisted with: ART 402.

Prerequisite(s): ART 501.

ART 503. Preventive Conservation/Collections Care**3 Credits**

Introduces the student on how to mitigate the deterioration and damage of cultural property in a museum setting through the formulation and implementation of policies and procedures. The course addresses most aspects of collections management and care for objects in storage, exhibitions and during transportation. Crosslisted with: ART 403.

ART 505. Medieval Art**3 Credits**

History of painting, stained glass, sculpture, architecture and manuscript illumination in Europe from the Early Christian period to the end of the Gothic period; taught with ART 305. Consent of instructor required.

Prerequisite(s): ART 295G; Graduate Standing.

ART 510. Advanced Native American Art**3 Credits**

Cross-cultural introduction to art of the prehistoric and historic native people of the North, Central, and South Americas. The artistic expression and the function of art considered in diverse cultural and environmental contexts.

Prerequisite: graduate standing.

ART 511. Art of China I: Neolithic to Song Dynasty**3 Credits**

Survey of the art of China from the neolithic period to the end of the Song dynasty. May be repeated up to 3 credits. Crosslisted with: ART 311.

Prerequisite(s): Graduate Standing.

ART 520. Art and Architecture in Pre-Columbian Mesoamerica**3 Credits**

Analysis of the art and culture of the Mesoamerican peoples before the arrival of Columbus in the New World. Includes an in-depth formal and historical analysis of architecture, sculpture, painting, pottery and metal works of Mixtec, Toltec, the Aztec, Maya, and other cultures and civilizations.

Prerequisite: graduate standing.

ART 521. Pre-Columbian Art and Architecture of the Andes**3 Credits**

Examines the arts and history of pre-Columbian Andean cultures in a cultural context. Analysis of their architecture, sculpture, pottery, jewelry, textiles, and featherwork.

Prerequisite: graduate standing.

ART 523. Italian Renaissance Art**3 Credits**

History of painting, sculpture and architecture in Italy from the 14th century to the end of the 16th century; taught with ART 323. Consent of instructor required.

Prerequisite(s): Graduate standing.

ART 525. Northern Renaissance Art**3 Credits**

History of painting, manuscript illumination and graphics in Northern Europe from the late 14th century to the mid-16th century; taught with ART 325. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): Graduate Standing.

ART 530. Modern Architecture**3 Credits**

Study of the architecture of the later eighteenth, nineteenth and twentieth centuries in the context of technological, social and stylistic changes. Focus on the works of Louis Sullivan, Frank Lloyd Wright, and European architects of the International Style, and the current reaction.

Prerequisite: graduate standing.

ART 533. Baroque Art and Architecture in Italy, Spain, and Hispanic Latin America**3 Credits**

Concentration on Italian and Spanish Baroque architecture, painting, and sculpture, as well as the art and architecture of Spanish vice-royalties of the Americas.

Prerequisite: graduate standing.

ART 537. American Art to 1900**3 Credits**

Covers the history of painting, sculpture, architecture, and other arts in the United States from the colonial period to 1900.

Prerequisite: graduate standing.

ART 539. Advanced History of Photography**3 Credits**

Course studies history, theory and use of photographic practices in art, especially from formal introduction of the process in 1839 to the present.

Prerequisite(s): ART 295G, ART 296G, and ART 297; Graduate standing.

ART 542. Twentieth-Century Art I, 1900-1945**3 Credits**

History of painting, sculpture, and other arts in Europe, the United States, and elsewhere from 1900 to 1945.

Prerequisite: graduate standing.

ART 543. Twentieth-Century Art II, 1945-Present**3 Credits**

History of painting, sculpture, and other arts in Europe, the United States, and elsewhere from 1945 to the present. Comprehensive research paper required.

Prerequisite: graduate standing.

ART 550. Drawing and Painting Workshop**3-6 Credits (2-4+4P)**

Graduate level drawing and painting course focusing on the development of concepts, expression and visual form. May be repeated up to 27 credits. Restricted to: ART majors.

ART 555. Graphic Design**3 Credits**

May be repeated up to 27 credits.

ART 560. Painting Workshop**3-9 Credits**

Advanced work with painting skills. Emphasis on critical analysis and development of body of work. Restricted to graduate art students. May be repeated up to 27 credits.

Prerequisite(s): Graduate standing.

ART 565. Sculpture Media**3-9 Credits**

May be repeated up to 27 credits.

ART 570. Advanced Introduction to Photography**3-9 Credits**

Graduate students develop and implement a research program using photographic media and processes. Outcomes and program developed in consultation with photography faculty. May be repeated up to 30 credits. Consent of Instructor required. **Prerequisite(s):** .

ART 573. Non-Silver Photographic Processes**3 Credits**

Advanced work with historic photographic processes. Emphasis on creation of an extended body of work. Taught with ART 373. Consent of instructor required. Restricted to ART majors.

Prerequisite(s): ART 270, ART 271, ART 274.

ART 575. Ceramic Arts**3-9 Credits**

May be repeated up to 27 credits.

ART 576. Museum/Gallery Research Internship**1-9 Credits**

Research internship in museum or gallery. Requirements determined by instructor in cooperation with supervising museum/gallery professional. For art history credit. May be repeated for a maximum of 9 credits.

Prerequisite: graduate standing.

ART 577. Independent Research Problems in Art History**1-9 Credits**

Advanced research on special problems to be conducted under supervision of art history faculty. May be repeated for a maximum of 9 credits. Consent of instructor required.

Prerequisite(s): Graduate standing.

ART 578. Seminar: Selected Topics in Art History**3 Credits**

Reading, research, and discussion of advanced problems. May be repeated for a maximum of 9 credits.

Prerequisite: graduate standing.

ART 579. Graduate Seminar: Art Theory, Criticism, Historiography**3 Credits**

Theories and methodologies in art history and art criticism.

Prerequisite: graduate standing.

ART 580. Printmaking Workshop**3-6 Credits**

May be repeated for a maximum of 33 credits.

Prerequisite(s): Graduate standing.

ART 585. Metals and Jewelry Design**3-9 Credits**

May be repeated up to 27 credits.

ART 590. Visual Culture of the 1960s**3 Credits**

Focuses on major cultural trends and historical events in 1960s America. Offers analysis of art, films, and pop culture phenomena of the period. Fulfill all requirements of ART 390 plus graduate-level research. Graduate standing.

Prerequisite(s): Either ART 297, ART 343, or consent of instructor.

ART 591. Visual Culture of the 1970s**3 Credits**

Focuses on major cultural trends and historical events in 1970s America. Offers analysis of art, films, and pop culture phenomena of the period. Fulfill all requirements of ART 391 plus graduate-level research. Graduate standing.

Prerequisite(s): Either ART 297, ART 343, or consent of instructor.

ART 592. Visual Culture of the 1980s**3 Credits**

Focuses on major cultural trends and historical events in 1980s America. Offers analysis of art, films, and pop culture phenomena of the period. Fulfill all requirements of ART 392 plus graduate-level research. Graduate standing.

Prerequisite(s): Either ART 297, ART 343, or consent of instructor.

ART 595. Problems in Studio**1-6 Credits**

Individualized study in specialized studio areas not covered by other advanced courses. May be repeated up to 12 credits. Consent of Instructor required.

ART 596. Graduate Studio Seminar**3 Credits**

Explores issues in contemporary art making and their relationship to personal work. Presentation of research in oral, visual, and written form. May be repeated for a maximum of 18 credits. Restricted to majors.

Prerequisite(s): Graduate standing.

ART 597. Readings in Art History**3 Credits**

In-depth study of historical writing about art. May be repeated for a maximum of 9 credits.

Prerequisite: graduate standing.

ART 598. Studio Thesis**1-15 Credits**

Special research in studio, leading to an exhibition and written thesis statement.

ART 599. Art History Thesis**15 Credits**

Art history master's thesis research. May be repeated for unlimited credit. Restricted to masters level art history students. Consent of instructor required.

Prerequisite(s): Graduate standing.

Art - Bachelor of Arts

Concentration: Art History

The art history program is designed to give the student a broad familiarity with the visual arts through the factual and theoretical study of aesthetics, cultural contexts, iconography, pictorial traditions, stylistic development and technical practices. Students are encouraged to take related courses in anthropology, history, languages and literature, music history, philosophy, religion, theatre and costume history.

Students must demonstrate a reading knowledge of a second language either by completing the 212 or 214 course or by taking a 300-level literature course (FREN, GER, SPAN, PORT, JPNS or CHIN). Art History majors may not use C D 476 American Sign Language III to fulfill the language requirement.

Studio Art Courses 200-400 level or Art History Courses 300-400 level		3
Credits		12
Total Credits		48

Electives

Sufficient to bring total credits to 120 for graduation, including 48 upper-division.

Concentration: Studio Art

The Bachelor of Arts is designed to give the student a broad interdisciplinary understanding of the areas of painting/drawing, graphic design, printmaking, sculpture, photography, ceramics, conservation, jewelry and metalsmithing, through a series of introductory and special topics courses and the history and appreciation of art in the context of a liberal education. Students are required to take 30 credits of upper-level studio art classes and 18 credits of Art History.

Departmental Requirements

Art - Bachelor of Fine Arts

Concentration: Museum Conservation

Art Conservation is the study of the preservation and restoration of art as well as of other cultural and natural objects. The B.F.A. degree with an concentration in Museum Conservation provides an academic structure within which students master specific sets of practical skills while developing broad professional and theoretical perspectives toward the issue of conserving objects in a museum or collection setting. By combining theory with practice, the program offers students the interpretive, quantitative and administrative skills needed for careers as conservators, curators, registrars, collections managers, exhibit designers and museum administrators, all of whom must have specialized training in the care and handling of works of art to be successful.

Science

Select 16 credits from Option A or Option B:		16
<i>Option A</i> ¹

Total Credits		79

¹ Recommended for students planning to attend graduate school in art conservation.

² Recommended for students who do NOT plan to attend graduate school in art conservation.

³ Courses are open by permission of the instructor only.

Emphasis: Studio Art

The studio art curriculum is designed to give the student a broad, transdisciplinary understanding of the field of visual arts, including appreciation and criticism, art history, ceramics, drawing, graphic design and media arts, jewelry/metalsmithing, painting, photography, printmaking, sculpture and museum conservation. This program is recommended for those students who wish to embark on a professional career in art. The maximum number of credits counted toward graduation is 84. The maximum credits for variable courses shall be 6 credits per semester except by permission. The Bachelor of Fine Arts degree is a professional baccalaureate degree, which requires a senior thesis exhibition and capstone class in the final semester of study. Students seeking a BFA must apply in the spring of their sophomore year for acceptance into the BFA program - this is done via a portfolio review.

Course	Title	Credits
Freshman		
ART 295G	Introduction to Art History I	3
ART 298	Writing in Art	3

ART 495	Undergraduate Studio Thesis	3-6

Thesis Exhibition/Capstone Course

BFA students must have a thesis exhibition at the culmination of their degree.

ART 495	Undergraduate Studio Thesis	3-6
Credits		24-30
Total Credits		81-87

Art - Master of Arts

Emphasis: Art History

An emphasis in art history requires a minimum of 33 credits of art history courses, 6 of which may be thesis credits. Of the required minimum, 6 credits of related courses may be substituted with the approval of the department head and the student's major advisor.

Reading proficiency in a foreign language is also required and should be acquired prior to the beginning of thesis research for which it will be employed. A reading proficiency exam will be arranged in conjunction

with the major advisor. Admission to the MA program with an emphasis in art history is based on an accredited BA or BS degree (or equivalent) with a major in art history, including at least 24 art history credits and 9 studio credits. Undergraduate deficiencies must be completed before advancement to candidacy.

Candidacy and Thesis Committee Selection

Upon satisfactory completion of all required course work (except thesis credits) and foreign language requirement, the student will prepare a thesis proposal under the direction of the major professor. The student will then select the second member of his or her thesis committee and submit the proposal to this committee member for approval. With the backing of these two advisors, the student must then present the proposal to the department faculty. After a successful presentation, the student will advance to candidacy and select the third committee member, who may be from outside the art department.

Admission

All applicants for admission to the MA program must submit

1. A polished undergraduate research paper
2. A written statement of intent
3. Letters of recommendation from three qualified people of the applicant's choice
4. Official undergraduate transcripts.

Research papers, statement of intent, and letters of recommendation should be sent to the Department of Art. Applications and official undergraduate transcripts should be sent directly to the Graduate School. Psychometric test scores are not required.

Application Deadline

The final submission date for all application materials and teaching assistantship applications is January 20 for the fall and spring semesters.

Art - Master of Fine Arts

Emphasis: Studio Art

Art requirements for an MFA degree with an emphasis in studio art include a minimum of 60 credits of academic work, usually completed in three years. Of those 60 credits,

- 9 must be taken in art history,
- 6 in non-art courses numbered 450 or above,
- 6 in thesis work,
- 3 in graduate seminar: art theory, criticism, historiography and
- 12 in ART 596 Graduate Studio Seminar.

In order to remain in good standing in the MFA program, a student must maintain an average GPA of 3.0. Any grade lower than B- in an Art Department graduate course is considered failing. In the event that a student fails a required course, they must repeat the class in order to get credit for it. If a student is awarded a graduate assistantship, he or she must maintain an average GPA of 3.0.

Program Requirements

Art history courses	9
Non-art 450 level or higher courses	6
Studio Thesis	6

ART 579	Graduate Seminar: Art Theory, Criticism, Historiography	3
ART 596	Graduate Studio Seminar	12-18
Studio Electives		18-24
Total Credits		54-66

Semester Reviews

At the end of the first two semesters, each graduate student's creative production will be reviewed by the assembled faculty. Participation in semester reviews are required for successful completion of graduate level studio courses.

Candidacy

Candidacy occurs during the third semester of study in residency. Candidacy consists of a formal review of the student's work by the assembled graduate faculty. The graduate faculty advances the student to his or her final 3 semesters of study by a majority vote. If the faculty does not advance the student, candidacy may be repeated one additional time at the end of the next consecutive semester. The final three semesters of thesis work will commence from that point. Students who are not successful in their second candidacy attempt will be dis-enrolled from the MFA program.

Thesis Committee

At the end of the third semester and after a successful candidacy the student will propose his or her thesis committee, consisting of two department of art graduate faculty members, and one faculty member from outside the department.

Thesis Exhibition

The studio thesis will culminate in an exhibition of the candidate's creative works and a written thesis statement. A successful oral examination and defense of the thesis and exhibition is required for graduation. Two copies of the thesis and a photographic record of the final exhibition are required; other requirements may be determined by the graduate faculty. Students who do not satisfactorily complete their oral examination may not participate in the thesis exhibition.

Thesis exhibitions for the MFA degree will be held in the spring semester in the University Art Gallery. Students who wish to graduate at mid-year are obligated to find an exhibition space other than the NMSU Art Gallery that meets with the approval of the graduate committee. In this case the student is responsible for making all arrangements for the thesis exhibition.

Admission

Admission to the MFA program in studio art is based on an accredited BA, BS, or BFA degree (or equivalent) with a major in art, including at least 45 credits in studio art courses and 15 credits in art history, 9 of which must be 300-level or above (or equivalent). Any deficiencies must be corrected by undergraduate course work to be completed before advancement to candidacy. Exceptions to these requirements will be considered by the graduate committee. Students with an earned MA may be considered with the consent of the faculty, for advancement to candidacy for the MFA degree upon completion of one semester or 9 credits in residence at NMSU. The number of transferable credits from a previous graduate program will be determined by the department head and the graduate advisor before consideration for candidacy.

All applicants for admission to the MFA program in studio art must submit

- Submit a portfolio of 20 images to Slideroom: <https://nmsu.slideroom.com/>
- Include an Image List that identifies each piece by title, date, size and media.
- A written statement of intent, including scholarly and professional goals and the applicant's interest in studying at NMSU
- Letters of recommendation from three qualified people of the applicant's choice
- Official undergraduate transcripts

Admission to the MFA program in studio art will be decided upon consideration of all materials. Application guidelines are available on the Departmental website. The majority of teaching assistantships and studio spaces are awarded in the fall. Psychometric test scores are not required.

Application Deadline

The final submission date for all application materials and teaching assistantship applications is January 20 for the fall and spring semesters.

Art - Undergraduate Minor

The Art minor requires 27 credits. Students cannot earn both a bachelor's degree in the Department of Art and a Art minor unless they pass at least 6 credits in the minor beyond the requirements of the major.

Required Courses

Studio art or art history at the 300-400 level	9
Select six from the following:	18
ART 250 Introduction to Drawing	
ART 255 Introduction to Graphic Design	
ART 260 Introduction to Painting	
ART 265 Introduction to Sculpture

Astronomy

Undergraduate Program Information

The department offers an undergraduate astronomy minor degree, which requires 18-20 credits. The department does not offer a BS degree but encourages interested students to enroll in the physics program as a first step toward a career in astronomy. Our 100- and 300-level courses meet various university general education requirements. All students are invited to share with us this exciting area of study, through our basic and advanced undergraduate courses

Course List ¹

ASTR 105G	The Planets	4
ASTR 110G	Introduction to Astronomy	4
ASTR 301V	Revolutionary Ideas in Astronomy	3
ASTR 305V	The Search for Life in the Universe	3
ASTR 308V	Into the Final Frontier	3
ASTR 330V	Planetary Exploration	3
ASTR 400	Undergraduate Research	1-3
ASTR 401	Topics in Modern Astrophysics	3
ASTR 402	Introduction to Astronomical Observations and Techniques	3
ASTR 406	Stellar Dynamics and Hydrodynamics ²	3
ASTR 435	Observational Techniques I ²	3

¹ Other courses at the 300 and 400-levels are offered on an occasional basis. Consult the "Course Descriptions" section in this catalog.

² ASTR 405 Astronomy and Astrophysics I, ASTR 406 Stellar Dynamics and Hydrodynamics and ASTR 435 Observational Techniques I are cross-listed with graduate classes and require special permission.

Graduate Program Information

The Department of Astronomy offers graduate work leading to the Doctor of Philosophy and Master of Science degrees. To be admitted as a regular student to the NMSU Graduate School as a major in astronomy, a student must present a suitable undergraduate background with emphasis (12-16 credits) on junior-senior level physics, and mathematics. The prospective student is also required to take aptitude and physics (or approved specialized field) sections of the Graduate Record Examination (GRE).

Information on assistantships and fellowships in teaching and research can be obtained from the department.

Each entering graduate student will be assigned a committee that will guide the student in choice of courses, suggest training needed to remedy deficiencies and determine specific degree requirements in accord with the student's needs and objectives, and in agreement with departmental policies. The program requires 33 traditional course credit hours (11 classes), 4 seminar class credit hours, plus research in astronomy. Each student must demonstrate no later than during the second year sufficient academic and research ability to qualify for continuation in doctoral studies.

It is possible, through arrangement with the Department of Physics, to obtain a Master of Science degree in physics during progress toward the Ph.D. in astronomy. See the Department of Physics (p. 387) section in this catalog for details of that program.

The MS degree in astronomy is closely connected with the astronomy Ph.D. program, and questions concerning requirements should be directed to the department.

Qualifying, Comprehensive and Final examinations are described elsewhere in this catalog. Questions concerning styles of the examinations should be directed to the department head.

The department has access to several different observing facilities. NMSU operates the Apache Point Observatory on behalf of the Astrophysical Research Corporation and the observatory is home to several telescopes:

- the ARC 3.5m telescope,
- a 1m telescope fully owned by NMSU
- the ARCSAT 0.5m telescope, and
- the Sloan Digital Sky Survey (SDSS) 2.5m telescope.

The Department is a full partner in the SDSS project. The Department also operates a 24-inch telescope on Tortugas Mountain, near the NMSU campus.

The department is home to NASA's Planetary Data System's Planetary Atmosphere Node, where solar system exploration data are archived.

Degrees for the Department

Astronomy - Master of Science (p. 209)

Astronomy - Doctor of Philosophy (p. 209)

Minors for the Department

Astronomy - Undergraduate Minor (p. 209)

Professor, Jon Holtzman, Department Head

Professors Chanover, Churchill, Murphy, Klypin, Walterbos; **Associate Professors** Jackiewicz, McAteer; **Assistant Professors** Finlator, Prescott; **College Professors** Beebe, Webber; **Observatory Specialist** Harrison

J. Holtzman, Department Head, Ph.D. (California- Santa Cruz)– stellar populations in galaxies; R. F. Beebe, Ph.D. (Indiana-Bloomington)– planetary astronomy and stellar spectra; N. Chanover, Ph.D. (New Mexico State)– planetary astronomy; C. Churchill, Ph.D. (California-Santa Cruz)– galaxies and intergalactic medium; K. Finlator, Ph.D. (University of Arizona)- Galaxy Evolution, the Intergalactic Medium, Cosmological Reionization; Harrison,

Ph.D. (Minnesota)– cataclysmic variables and gamma-ray burst sources; J. Jackiewicz, Ph.D. (Boston College)– Helioseismology, theoretical condensed matter physics; A. Klypin, Ph.D. (Moscow)– cosmology; R. T. J. McAteer, Ph.D. (Queen's University, Belfast)– solar physics, Sun-Earth connection; J. Murphy, Ph.D. (U. Washington)– planetary atmospheres and exploration; M. Prescott, Ph.D. (University of Arizona)– Lyman-alpha nebulae, kinematics of gas within cosmic web; R. Walterbos, Ph.D. (Leiden)– interstellar medium, star formation, and structure and evolution of galaxies; W. Webber, Ph.D. (Iowa)– high energy astrophysics

ASTR 105G. The Planets

4 Credits (3+2P)

Comparative study of the planets, moons, comets, and asteroids which comprise the solar system. Emphasis on geological and physical processes which shape the surfaces and atmospheres of the planets. Laboratory exercises include analysis of images returned by spacecraft. Intended for non-science majors, but some basic math required. This lecture/lab course satisfies the New Mexico Common Core Area III: Lab Sciences requirement

ASTR 110G. Introduction to Astronomy

4 Credits (3+2P)

A survey of the universe. Observations, theories, and methods of modern astronomy. Topics include planets, stars and stellar systems, black holes and neutron stars, supernovas and gaseous nebulae, galaxies and quasars, and cosmology. Emphasis on physical principles involving gravity, light and optics (telescopes). Generally non-mathematical. Laboratory involves use of the campus observatory and exercises designed to experimentally illustrate principles of astronomy. This lecture/lab course satisfies the New Mexico Common Core Area III: Lab Sciences requirement.

ASTR 199. Introduction to Astronomy Lab, Special

1 Credit

This lab-only listing exists only for students who may have transferred to NMSU having taken a lecture-only introductory astronomy class, to allow them to complete the lab requirement to fulfill the general education requirement. Consent of Instructor required. , at some other institution). Restricted to Las Cruces campus only.

Prerequisite(s): Must have passed Introduction to Astronomy lecture-only (e.g.

ASTR 301V. Revolutionary Ideas in Astronomy

3 Credits

Examines recent fundamental scientific revolutions that have shaped our view of Earth and the universe. Topics in astronomy range from exoplanets to black holes to dark energy and raise questions about the very nature of how we use the scientific method to see the unseen, and how this shapes science research today.

Prerequisite(s): Any general education science course.

ASTR 305V. The Search for Life in the Universe

3 Credits

Use of information from several of the sciences to explore the likelihood that life exists elsewhere in the universe. Subjects include an overview of historical ideas about the possibility of life elsewhere in the universe, the chemistry and biology of life on Earth, recent explorations for life within our solar system, and current search strategies for life in the universe and their scientific basis.

ASTR 308V. Into the Final Frontier

3 Credits

Exploration of space: a brief review of the history of space flight, the Apollo program, joint U.S.-Soviet space missions, and unstaffed exploration of the planets. Emphasis on knowledge gained through these efforts. Includes new space initiatives. Same as HON 308V.

ASTR 330V. Planetary Exploration

3 Credits

A current planetary exploration mission is studied within the context of the solar system. The data acquired and principles involved in executing the mission, as well as political and economic implications of planetary exploration, are examined. Same as HON 330V. Main campus only

ASTR 400. Undergraduate Research

1-3 Credits

Supervised individual study or research. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

ASTR 401. Topics in Modern Astrophysics

3 Credits

This course is designed for students interested in astrophysics who have some background in math and physics and want to learn about basic astrophysics and interesting current topics. The course will cover basic astrophysical concepts such as orbital mechanics, light, and radiative processes and transfer. These concepts will be applied to the discussion of exciting modern topics involving planets, exoplanets, stars, galaxies, and/or cosmology, with topical emphasis determined by the instructor.

Prerequisite(s): MATH 192G and (PHYS 213 or PHYS 215G).

ASTR 402. Introduction to Astronomical Observations and Techniques

3 Credits

Designed for students interested in astrophysics who have some background in math and astronomy and want to learn about techniques for obtaining and analyzing astronomical data. This course will review the properties of light and discuss the process of experimental design. The course will describe basic observational tools such as telescopes and detectors. It will discuss how data is obtained, and how features of the detector and the Earth's atmosphere can be corrected for. Some topics in basic astronomical data analysis will be discussed, with topical emphasis determined by the instructor. Some simple data analysis projects will be assigned.

Prerequisite(s): MATH 191G and (PHYS 214 or PHYS 216G) and (ASTR 105, ASTR 110, or ASTR 401).

ASTR 405. Astronomy and Astrophysics I

3 Credits

Application of physical principles to problems in modern astronomy. Emphasis on radiation mechanisms and radiation transfer in astronomical systems. No S/U grading. Same as ASTR 505 with less advanced work.

Prerequisite: consent of instructor.

ASTR 406. Stellar Dynamics and Hydrodynamics

3 Credits

Undergraduate cross-listing of graduate class on basic stellar dynamics and principles of hydrodynamics. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

ASTR 435. Observational Techniques I**3 Credits**

Up-to-date introduction to modern observational astronomy. Includes computers, data analysis, optical telescopes, optical and infrared photometry, image processing, and detection. No S/U grading. Same as ASTR 535 with less advanced work.

Prerequisite: consent of instructor.

ASTR 500. Seminar**1 Credit**

Organized group study treating selected topics.

ASTR 505. Astronomy and Astrophysics I (f)**3 Credits**

Application of physical principles to problems in modern astronomy. Emphasis will be on radiation mechanisms and radiation transfer in astronomical systems.

Prerequisite: consent of instructor.

ASTR 506. Stellar Dynamics and Hydrodynamics**3 Credits**

Graduate level course on basic stellar dynamics and fundamentals of hydrodynamics.

ASTR 535. Observational Techniques I (f)**3 Credits**

Up-to-date introduction to modern observational astronomy in a two-semester sequence. Topics include: introduction to computers, error analysis in data, the different types of optical telescopes, and optical and infrared photometry, image processing, and detectors.

ASTR 536. Observational Techniques in Astronomy II (s)**3 Credits**

Sequel to ASTR 535. The second half of the course emphasizes observational techniques in spectroscopy, radio astronomy, and high energy astrophysics.

Prerequisite: ASTR 535.

ASTR 545. Stellar Spectroscopy**3 Credits**

This course covers the physics of stellar atmospheres with emphasis on using spectra as a diagnostic tool for understanding the properties of stars. Topics include spectral classification, radiative transfer, gas equilibrium physics, line and continuum opacities, adiabatic and superadiabatic convection, and extraction of observed quantities from spectra for deducing physical conditions of the source.

ASTR 555. Galaxies I**3 Credits**

Fundamentals of the properties of galaxies and the components that they are made of stars and stellar populations, gas and dust, central black holes, and dark matter. Introduction to basic concepts of galaxy formation.

ASTR 565. Stellar Interiors**3 Credits**

Internal constitutions of stars, computation of stellar models, and stellar evolution.

ASTR 575. Computational Astrophysics**3 Credits**

Scientific programming for astronomical applications. Explore key algorithms and standard techniques for astronomical data analysis. Topics may include pointers, data structures, dynamic memory allocation, least squares fitting, grid and iterative search methods, LCG random number generators, Monte Carlo simulations, numerical integration, and astronomical image and spectrum manipulation. Applications to real astronomical datasets are emphasized.

ASTR 598. Special Research Programs**1-6 Credits**

Individual investigations, either analytical or experimental.

ASTR 599. Master's Thesis**15 Credits**

Master's level research in astrophysics or observational astronomy.

ASTR 600. Pre-dissertation Research**1-15 Credits**

Research.

ASTR 605. Interstellar Medium**3 Credits**

Problems associated with gas and dust in the galaxy and with diffuse and planetary nebulae.

ASTR 610. Radio Astronomy**3 Credits**

Techniques and observations stressing the operational approach to measurement and how the observations are intimately interwoven throughout modern astrophysics.

ASTR 616. Galaxies II**3 Credits**

Advanced topics in galaxies. Includes a detailed description and understanding of the Milky Way and topics in galaxy formation and evolution.

ASTR 620. Planetary Science I**3 Credits**

Evaluation and analysis of observational data on solar system objects to determine their nature and physical conditions, with emphasis upon atmospheres (composition, structure, thermodynamics, evolution, etc.)

ASTR 621. Planetary Science II**3 Credits**

The physical processes involved in planetary system formation are addressed. Specific foci include molecular cloud collapse, disk processes, and competing theories of planet formation within disks. Additional topics to be discussed may include: the solar wind, planetary magnetic fields, planetary ring processes, and mineralogy.

ASTR 625. Cosmology**3 Credits**

Discussion of our current knowledge of the structure of the universe and current research methods. Topics include the distance scale, clustering of galaxies, large-scale structure, metrics, dark matter, and cosmological probes such as distant quasars, radio galaxies, and gravitational lenses.

ASTR 630. Methods of Statistical Analysis for Modern Astronomy **3 Credits**

Graduate class for students interested in applying statistical techniques to modern astrophysical data sets. Topics include a review of probability and probability distribution functions, implications of techniques for statistical inference, regression and multivariate analysis, data smoothing, data mining, survival analysis and time domain analysis. Applications to real astronomical data sets will be emphasized with all topics.

ASTR 670. Heliophysics **3 Credits**

Explore the Sun and its processes, the heliosphere, and its interactions with the planets. Topics include: A introductory description of space weather and its physics; energy interaction with the space environment; the quiet Sun and its interactions with planetary atmospheres (with an emphasis on Earth); Magnetohydrodynamics; frozen-in flux; the solar wind; magnetized fluid dynamics; the active Sun (flares and coronal mass ejections); the effects of Space Weather.

ASTR 698. Special Topics. **1-9 Credits**

Special topics.

ASTR 700. Doctoral Dissertation **15 Credits**

Dissertation.

Astronomy - Doctor of Philosophy

The Astronomy Department at NMSU offers programs leading to the Master of Science and the Doctor of Philosophy degrees. Graduate courses (http://astronomy.nmsu.edu/?page_id=2503) cover topics in astrophysics, stellar atmospheres, observational techniques, the interstellar medium, galactic structure, star formation and evolution, extragalactic objects, cosmology, and solar system studies. Students also take courses in other relevant fields to broaden their knowledge and capabilities.

Astronomy - Master of Science

The Astronomy Department at NMSU offers programs leading to the Master of Science and the Doctor of Philosophy degrees. Graduate courses (http://astronomy.nmsu.edu/?page_id=2503) cover topics in astrophysics, stellar atmospheres, observational techniques, the interstellar medium, galactic structure, star formation and evolution, extragalactic objects, cosmology, and solar system studies. Students also take courses in other relevant fields to broaden their knowledge and capabilities.

Astronomy - Undergraduate Minor

The department offers a minor created for majors in a variety of scientific fields, and two minor emphases specifically designed to address the needs and interests of students from the Colleges of Education and

Engineering. Any undergraduate, however, may pursue any of the three minor tracks.

Requirements

The requirements for the regular minor requires 19 credits, from the following:

Requirements

ASTR 105G	The Planets	4
or ASTR 110G	Introduction to Astronomy	
Select two from the following: ¹		6
ASTR 301V	Revolutionary Ideas in Astronomy	
ASTR 305V	The Search for Life in the Universe	
ASTR 308V	Into the Final Frontier	
ASTR 330V	Planetary Exploration	
Select 9 credits between the following groups: ²		9
<i>Group A</i>		
Select 6-9 credits from the following: ²		
ASTR 401	Topics in Modern Astrophysics	
ASTR 402	Introduction to Astronomical Observations and Techniques	
ASTR 406	Stellar Dynamics and Hydrodynamics ³	
ASTR 435	Observational Techniques I ³	
<i>Group B</i>		
Select 3-9 credits from the following: ^{2,4}		
A E 424	Aerospace Systems Engineering	
BIOL 451	Physiology of Microorganisms	
BIOL 467	Evolution	
BIOL 473	Ecology of Microorganisms	
C S 475	Artificial Intelligence I	
C S 482	Database Management Systems I	
C S 483	Introduction to Robotics	
C S 491	Parallel Programming	
CHEM 360	General Geochemistry	
CHEM 431	Physical Chemistry	
CHEM 433	Physical Chemistry I	
E E 454	Antennas and Radiation	
E E 460	Space System Mission Design and Analysis	
E E 473	Introduction to Optics	
E E 478	Fundamentals of Photonics	
GEOL 465	Isotope Geochemistry	
MATH 471	Complex Variables	
MATH 472	Fourier Series and Boundary Value Problems	
PHYS 451	Intermediate Mechanics I	
PHYS 461	Intermediate Electricity and Magnetism I	
PHYS 480	Thermodynamics	
STAT 371	Statistics for Engineers and Scientists I	
STAT 470	Probability: Theory and Applications	
STAT 480	Statistics: Theory and Applications	
Total Credits		19

- 1 Three credits of ASTR 400 Undergraduate Research may replace one of these courses.
- 2 ASTR 401 Topics in Modern Astrophysics and ASTR 402 Introduction to Astronomical Observations and Techniques are the preferred classes but are generally offered only in alternate years. Three credits of ASTR 400 Undergraduate Research may replace one of these courses, but not the same three if used above.
- 3 Cross-listed with graduate classes and require special permission.
- 4 Alternative 400-level courses in the physical sciences, engineering, or related fields, including one-time seminars, may be proposed on a case-by-case basis to fulfill this requirement, drawn from the fields of astronomy, biochemistry, biology, chemistry, computer science, geology, geophysics, mathematics, physics, statistics or from engineering. Proposals should include a clear justification that connects the course materials to a particular topic in astronomy or astrophysics.

Emphasis: Education

The requirements for the education track minor requires 18-20 credits from the following:

ASTR 105G	The Planets	4
ASTR 110G	Introduction to Astronomy	4
Select two from the following:		6
ASTR 301V	Revolutionary Ideas in Astronomy	
ASTR 305V	The Search for Life in the Universe	
ASTR 308V	Into the Final Frontier	
ASTR 330V	Planetary Exploration	
Select 4-6 credits from the following: ⁵		4-6
ASTR 400	Undergraduate Research	
ASTR 401	Topics in Modern Astrophysics	
ASTR 402	Introduction to Astronomical Observations and Techniques	
EDUC 451	Methods of Teaching Elementary School Science	
EDUC 463	Teaching Science at the Middle and High School Level	
Total Credits		18-20

⁵ This requirement will generally be fulfilled by two 3-credit courses. Students may request the 4 credit option instead, if an appropriate topic and instructor for 1 credit of ASTR 400 Undergraduate Research are available. ASTR 401 Topics in Modern Astrophysics and ASTR 402 Introduction to Astronomical Observations and Techniques are generally offered only in alternate years, and have prerequisites.

Emphasis: Engineering

The requirements for the engineering track minor requires 18-19 credits from the following:

Required Courses

Select 3-4 credits from the following:		3-4
ASTR 105G	The Planets	
ASTR 110G	Introduction to Astronomy	
PHYS 215G	Engineering Physics I	
PHYS 216G	Engineering Physics II	

Select one from the following: 3

ASTR 301V	Revolutionary Ideas in Astronomy
ASTR 305V	The Search for Life in the Universe
ASTR 308V	Into the Final Frontier
ASTR 330V	Planetary Exploration

Select 12 credits from the following two groups: 12

Group A

Select 6-9 credits from the following: ⁶	
A E 428	Aerospace Capstone Design
ASTR 400	Undergraduate Research
ASTR 401	Topics in Modern Astrophysics ⁷
ASTR 402	Introduction to Astronomical Observations and Techniques ⁷
ASTR 406	Stellar Dynamics and Hydrodynamics ⁸
ASTR 435	Observational Techniques I ⁸
E E 400	Undergraduate Research
E E 418	Capstone Design I
E E 419	Capstone Design II
M E 400	Undergraduate Research

Group B

Select 3-6 credits from the following: ⁹	
A E 424	Aerospace Systems Engineering
BIOL 451	Physiology of Microorganisms
BIOL 467	Evolution
BIOL 473	Ecology of Microorganisms
C S 475	Artificial Intelligence I
C S 482	Database Management Systems I
C S 483	Introduction to Robotics
C S 491	Parallel Programming
CHEM 360	General Geochemistry
CHEM 431	Physical Chemistry
CHEM 433	Physical Chemistry I
E E 454	Antennas and Radiation
E E 460	Space System Mission Design and Analysis
E E 473	Introduction to Optics
E E 478	Fundamentals of Photonics
GEOL 465	Isotope Geochemistry
MATH 471	Complex Variables
MATH 472	Fourier Series and Boundary Value Problems
PHYS 451	Intermediate Mechanics I
PHYS 461	Intermediate Electricity and Magnetism I
PHYS 480	Thermodynamics
STAT 371	Statistics for Engineers and Scientists I
STAT 470	Probability: Theory and Applications
STAT 480	Statistics: Theory and Applications

Total Credits 18-19

⁶ Taking any of the non-astronomy classes for this requirement requires prior approval from the head of astronomy on a case-by-case basis, with a clear connection being established between the proposed research or design project and a particular topic in astronomy or astrophysics (astronomy instrumentation or observational projects are particularly encouraged); no more than 3 non-ASTR credits can be counted toward the minor.

⁷ Generally offered in alternate years.

⁸ Cross-listed with graduate classes and require special permission.

⁹ Alternative 400-level courses in the physical sciences, engineering, or related fields, including one-time seminars, may be proposed on a case-by-case basis to fulfill this requirement, drawn from the fields of astronomy, biochemistry, biology, chemistry, computer science, geology, geophysics, mathematics, physics, statistics, or from engineering. Proposals should include a clear justification that connects the course materials to a particular topic in astronomy or astrophysics.

Biology

Undergraduate Program Information

A student may earn the Bachelor of Arts in biology or the Bachelor of Science in biology, genetics, microbiology or conservation ecology through major studies in the Department of Biology. The Bachelor of Science in biology or microbiology is recommended for premedical and pre dental students, for those preparing to teach biology and other sciences at the secondary and college levels, for those interested in the numerous fields of biological research and applied biology, and for those planning on obtaining an advanced degree in biology.

Freshmen should begin taking required biology and chemistry courses in their first year. Students are required to speak with an advisor as soon as they declare a major within the department. The department welcomes students considering a biology major who wish preliminary advising. More information on the Department of Biology is available on our web site, <http://bio.nmsu.edu>.

A student must earn a grade of C- or better to receive credit for any nondepartmental or departmental requirement for any major or minor offered by the Department of Biology.

It is strongly recommended that students include a minor or supplementary course work in a specific discipline to enhance their academic experience. See the "General Information" section of this catalog for specific requirements for minors and departments which offer them. Selection of a minor or a supplementary coursework area should be done in consultation with an advisor.

The department offers a minors in biology, microbiology, human biology and conservation ecology. A student may not earn a major and a minor in the same discipline.

A student must fulfill a second language requirement to receive a Bachelor of Arts or Bachelor of Science degree in the Biology and Microbiology majors. This requirement does not apply to the Conservation Ecology major, offered jointly with the Department of Fisheries, Wildlife and Conservation Ecology, or the Genetics major, offered jointly with the Department of Plant and Environmental Science. To meet the second language requirement, the student must do one of the following:

- Complete two semesters of second language courses numbered 111 and 112 with a grade of C- or better. Spanish speakers should enter and complete SPAN 113 Spanish for Heritage Learners I with a C- or better to fulfill the requirement.
- Challenge the 112 level of French, German, Japanese, Latin, Portuguese, Russian or Spanish, or the 113 level for the Spanish-speaking student.
- Obtain college certification of completion of two years of a second language at the high school level with a grade of C- or higher in the second-year level. (i.e. equivalent to FREN 112 Elementary French II, GER 112 Elementary German II, SPAN 112 Elementary Spanish II, etc.)
- Complete two semesters of American Sign Language, courses C D 374 American Sign Language I and C D 375 American Sign Language II, with a grade of C- or better.
- Additional mechanisms for fulfilling the language requirement are listed under the College of Arts and Science language requirement.

Graduate Program Information

The Department of Biology offers graduate study leading to the Doctor of Philosophy and Master of Science degrees. Our goal is to prepare students for careers in the various fields in biology through formal coursework and research experiences as well as through seminars and discussion groups.

All prospective applicants must submit the materials specified in the current Department Graduate Application Packet that is available at the Graduate Student section of the Biology website <http://bio.nmsu.edu/grads/>. The Departmental Graduate Application Packet also describes how to apply for Graduate Assistantships. These assistantships are awarded based on departmental needs and student merit; in general they are reserved for Ph.D. and thesis Master of Science students, and are not available to non-thesis Master of Science students.

There are three formal course requirements for all Biology Graduate students, with the exception of students in the accelerated non-thesis MS Biotechnology option. These core courses are

BIOL 510	Current Topics in Biology	3
BIOL 540	Science and Ethics	1-3
or PHIL 540	Science and Ethics	
BIOL 610	Seminar	1-3

Students are required to successfully complete the Seminar course once each year that they are in the program.

For research toward the Master of Science or the Ph.D., students can choose among the Department's three areas of emphasis:

1. Behavioral, Ecological and Evolutionary Biology
2. Cell and Organismal Biology
3. Microbiology

All graduate students should develop their curriculum plan in consultation with their faculty advisor and graduate committee. Details of sample course sequences within the different emphases are described in the Biology Graduate Handbook available for download from the Graduate Student section of the Biology website <http://bio.nmsu.edu/grads/>. Graduate students may also take a minor in other graduate departments and programs.

Degrees for the Department

Biology - Bachelor of Science (p. 219)

Biology - Bachelor of Arts (p. 219)

Microbiology - Bachelor of Science (p. 226)

Conservation Ecology - Bachelor in Conservation Ecology (p. 221)

Genetics and Biotechnology - Bachelor of Science in Genetics (p. 223)

Biology - Master of Science (p. 220)

Biology - Doctor of Philosophy (p. 220)

Minors for the Department

Biology - Undergraduate Minor (p. 221)

Microbiology - Undergraduate Minor (p. 226)

Conservation Ecology - Undergraduate Minor (p. 223)

Genetics and Biotechnology - Undergraduate Minor (p. 225)

Human Biology - Undergraduate Minor (p. 225)

Michelle Nishiguchi, Professor, Department Head

Jennifer Curtiss, Associate Professor, Associate Department Head

Professors Boecklen, Hanley, Houde, Milligan, Nishiguchi, C. Shuster, Serrano, Smith, Unquez, Wright; **Associate Professors** Bailey, Curtiss, Hansen, Mabry, M. Shuster, Xu; **Assistant Professors** Castillo, Indriolo, Ferrenberg, James, Lodato, Lopez

C. D. Bailey, Ph.D. (Cornell)– plant systematics; W. J. Boecklen, Ph.D. (Northern Arizona)– plant/ insect and community ecology; M. G. Castillo, Ph.D. (Wisconsin)– microbiology/immunology; J. Curtiss, Ph.D. (University of Colorado at Boulder)– cell and development; . S. Ferrenberg, Ph.D. (University of Colorado at Boulder)- plant/insect interactions; K. A. Hanley, Ph.D. (California-San Diego)– evolution, ecology, and control of flaviviruses; I. A. Hansen, Ph.D. (University of Wurzburg)– molecular vector biology; P. W. Houde, Ph.D. (Howard)– avian systematics; E. Indriolo, Ph.D. (Perdue)- plant signalling; K. E. Mabry, Ph.D. (California-Davis)– behavioral ecology; B. G. Milligan, Ph.D. (California-Davis)– plant evolutionary biology; M.K. Nishiguchi, Ph.D. (California-Santa Cruz)– evolutionary microbiology, marine symbiosis; E. E. Serrano, Ph.D. (Stanford)– biophysics, neuroscience; C. B. Shuster, Ph.D. (Tufts)– cell and developmental biology; M. Shuster, Ph.D. (Tufts)– biology education; G. B. Smith, Ph.D. (North Carolina State)– environmental microbiology; G. A. Unquez, Ph.D. (California-Los Angeles)– developmental biology; T. F. Wright, Ph.D. (California-San Diego)– animal behavior and evolution; J. Xu, Ph.D. (Military Medical University, Shanghai)– mosquito-malaria interactions.

BIOL 101G. Human Biology

3 Credits

Introduction to modern biological concepts. Emphasis on relevance to humans and their relationships with their environment. Cannot be taken for credit after successful completion of BIOL 111G or BIOL 211G. Appropriate for non-science majors. Requires successful completion of BIOL 101GL in order to meet the NM Common Core Area III Laboratory Science requirements.

BIOL 101GL. Human Biology Laboratory

1 Credit

Laboratory for BIOL 101G. Laboratory experiences and activities exploring biological concepts and their relevance to humans and their relationship with their environment.

Prerequisite(s)/Corequisite(s): BIOL 101G.

BIOL 110G. Contemporary Problems in Biology

4 Credits (3+3P)

Fundamental concepts of biology will be presented using examples from relevant problems in ecology, medicine and genetics. For nonscience majors only. Community Colleges only.

BIOL 111G. Natural History of Life

3 Credits (3)

Survey of major processes and events in the genetics, evolution, and ecology of microbes, plants and animals, and their interactions with the environment. Appropriate for science and nonscience majors. Must be taken with BIOL 111L to meet general education requirements. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): Currently enrolled in MATH 120, grade of C- or better in MATH 120, or a Math Placement Exam score adequate to enroll in mathematics courses beyond MATH 120.

BIOL 111GL. Natural History of Life Laboratory

1 Credit

Laboratory experiments, demonstrations and exercises on interrelationships among organisms, biodiversity, processes of evolution, and interaction of organisms and their environment. Appropriate for science and nonscience majors. May be repeated up to 1 credits.

Prerequisite(s)/Corequisite(s): BIOL 111G; Currently enrolled in MATH 120, grade of C- or better in MATH 120, or a Math Placement Exam score adequate to enroll in mathematics courses beyond MATH 120.

BIOL 150. Topics in Biology

1-3 Credits (1-3)

Introductory level coverage of biological topics. May be repeated up to 9 credits.

BIOL 154. Introductory Anatomy and Physiology

4 Credits (3+3P)

Survey of human structure and function (does not replace BIOL 190, BIOL 111G, or BIOL 211G as a prerequisite for advanced courses in biology). Restricted to: Community Colleges only.

BIOL 211G. Cellular and Organismal Biology

3 Credits

Principles of cellular structure and function, genetics, and organismal physiology. This course prepares the student for continuation in science or allied health fields. Suitable for all majors. Must be taken with BIOL 211L to meet general education requirements. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): a C- or better in MATH 120 or higher and a C- or better in CHEM 110G or CHEM 111G or CHEM 115.

BIOL 211GL. Cellular and Organismal Biology Laboratory

1 Credit

Laboratory demonstrations, experiments and exercises on molecular and cellular biology and organismal physiology. Must have passed BIOL 211G or be concurrently enrolled in BIOL 211G and BIOL 211L. Pre/ May be repeated up to 1 credits.

Prerequisite(s)/Corequisite(s): a C- or better in BIOL 211G, MATH 120 or higher, and a C- or better in CHEM 110G or CHEM 111G or CHEM 115.

BIOL 219. Public Health Microbiology**3 Credits**

The characteristics of pathogenic microorganisms and the diseases that they cause. Will not meet the microbiology requirements for biology or medical technology majors.

Prerequisite: BIOL 211G and BIOL 211GL.

BIOL 221. Introductory Microbiology**3 Credits**

Principles of isolation, taxonomy, and physiology of microorganisms. Restricted to Community Colleges campuses only.

Prerequisite(s): CHEM 110G or CHEM 111G or CHEM 112G.

Corequisite(s): BIOL 221 L.

BIOL 221 L. Introductory Microbiology Laboratory**1 Credit**

A laboratory course to accompany BIOL 221 or BIOL 219.

Prerequisite: BIOL 221 or BIOL 219 or concurrent enrollment.

BIOL 225. Human Anatomy and Physiology I**4 Credits (3+3P)**

The first in a two-course sequence that covers the structure and function of the human body, including terminology of the human gross anatomy, chemistry overview, cell structure, cell physiology (including DNA, protein synthesis and cell division). The organization of cells and tissues and their metabolic and homeostatic processes and regulation are also covered. Physical and chemical operation of organs and systems of the human body include the integumentary, skeletal, muscular, and nervous systems. Pre/ Restricted to: Community Colleges only.

Corequisite(s): CHEM 110G or CHEM 111G.

BIOL 226. Human Anatomy and Physiology II**4 Credits (3+3P)**

The second in a two-course sequence that covers the structure and function of the human body. Includes the physical and chemical operation of the organs and systems of the human body, including endocrine, cardiovascular, lymphatic, immune, respiratory, digestive, urinary and reproduction system. Concepts of nutrition, metabolism, energy, fluid and electrolyte balance, heredity pregnancy and human embryonic and fetal development are also covered. Restricted to: Community Colleges only.

Prerequisite(s): BIOL 225, CHEM 110G or CHEM 111G.

BIOL 227. Pathophysiology**3 Credits**

A study of the structure and function of the human body with specialized emphasis on disease processes.

Prerequisite(s): AHS 153 or BIOL 225 Corequisite/Prerequisites(s): AHS 154 or BIOL 226 Restricted to: Community Colleges only.

BIOL 250. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 6 credits. Community Colleges only.

BIOL 253. Human Anatomy**4 Credits (3+3P)**

Detailed presentations of human anatomy, with laboratory. For nursing, prenursing, and human nutrition and food science majors only. Restricted to: HNFS, PNUR majors.

Prerequisite(s): Grade of C- in BIOL 211G and either CHEM 111G or CHEM 110G.

BIOL 254. Human Physiology**3 Credits**

Physical and chemical operation of the organs and systems of the human body. Not open to students who have passed BIOL 354 or BIOL 381.

Prerequisite(s): Grade of at least C- in BIOL 211G; BIOL 211GL; CHEM 111G or CHEM 110G.

BIOL 262. Human Pathophysiology I**3 Credits**

The first in a two-course sequence that covers changes in body physiology that result from disease or injury. Includes a general introduction to pathophysiology as well as an overview of altered cellular and tissue biology, injury, inflammation, and neoplasia. Students will also explore deviation from fluid, hemodynamic, and endocrinologic balance. Topics related to the science of pathophysiology, including pathology, pathogenesis, etiology, epidemiology, and clinical manifestations, are also discussed throughout the course where relevant. Grade of C- or higher in microbiology is recommended. Restricted to Community Colleges campuses only.

Prerequisite(s): Grade of C- or higher in BIOL 225 and BIOL 226.

BIOL 263. Pathophysiology II**3 Credits**

The second in a two-course sequence that covers changes in body physiology that result from disease or injury. This course focuses on the pathophysiology of the nervous, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems. Topics related to the science of pathophysiology, including pathology, pathogenesis, etiology, epidemiology, and clinical manifestations, are also discussed throughout the course where relevant. Grade of C- or higher in microbiology is recommended. Restricted to Community Colleges campuses only.

Prerequisite(s): Grade of C- or higher in BIOL 225, BIOL 226, and BIOL 262.

BIOL 301. Principles of Ecology**3 Credits**

A survey of ecology including general theory, the adaptations of organisms, population dynamics, species interactions, and the structure and function of natural communities and ecosystems. MATH 191G and A ST 311 recommended. Same as E S 301. Crosslisted with: E S 301.

Prerequisite(s): BIOL 111G, MATH 121G.

BIOL 302. Molecular Biology Techniques Laboratory**3 Credits**

This combined lecture and laboratory course emphasizes molecular biology laboratory practices through the hands-on application of commonly applied techniques, protocols, and equipment. The topics covered include both the fundamental development of empirical data as well as data analysis using stand-alone and web-based resources. Consent of instructor required.

Prerequisite(s): BIOL 211G or equivalent, and MATH 121G.

BIOL 305. Principles of Genetics**3 Credits**

Covers fundamental principles of reproduction, variation, and heredity in plants and animals. Crosslisted with: HORT 305 and AGRO 305.

Prerequisite(s): BIOL 111G and BIOL 211G, or BIOL 211G and BCHE 140, either CHEM 111G or CHEM 115, and MATH 121G.

BIOL 309. Guided Biological Research Lab**3 Credits**

This laboratory course provides a guided experience to hands-on research in biology. It is intended for early-career undergraduates who have finished the introductory sequence of Biology courses. Topics will vary with instructor.

Prerequisite(s): BIOL 111G, BIOL 211G, and MATH 121G.

BIOL 311. General Microbiology**3 Credits**

Principles of physiology, molecular biology, ecology, and taxonomy of microorganisms.

Prerequisite(s): BIOL 211G and MATH 121G.

BIOL 311 L. General Microbiology Laboratory**2 Credits**

Microbiology techniques and procedures, including isolation and identification of microorganisms and biotechnology procedures that employ microorganisms.

Prerequisite(s)/Corequisite(s): BIOL 219 or BIOL 311. **Prerequisite(s):** BIOL 211G and MATH 121G.

BIOL 312. Plant Taxonomy**3 Credits (2+3P)**

Classification and identification of representative plant families and local plants. Emphasis on ability to use technical sources. Saturday field trips may be recommended.

Prerequisite(s): BIOL 111G and MATH 121G.

BIOL 313. Structure and Function of Plants**3 Credits (2+3P)**

Structure, function, and survey of plants. BIOL 211G recommended.

Prerequisite(s): BIOL 111G, MATH 121G, and sophomore-level standing.

BIOL 314. Plant Physiology**3 Credits**

Photosynthesis, respiration, water relation of plants, minerals and organic nutrition, growth and development.

Prerequisite(s): BIOL 211G and CHEM 112G.

BIOL 322. Zoology**3 Credits (2+3P)**

Structure, function, and survey of animals. BIOL 211G recommended.

Prerequisite(s): BIOL 111G, MATH 121G, and at least sophomore-level standing.

BIOL 330. Comparative Anatomy and Embryology**4 Credits (3+3P)**

The developmental and evolutionary basis for the diversity and homology of body plans within the classes of vertebrate organisms. Laboratories will emphasize comparative dissection. BIOL 322 recommended.

Prerequisite(s): BIOL 111G, BIOL 211G, and MATH 121G.

BIOL 350. Special Topics**1-4 Credits**

Specific subjects announced in Schedule of Classes and offered as scheduled courses. May be repeated for unlimited credit.

BIOL 351. Biology Internship**1-6 Credits**

Substantial off-campus experience in biology selected by student in consultation with regular biology faculty member. Internship must be approved by faculty member. Student will supply mutually agreed upon documentation of internship activities after the internship is completed. May be repeated up to 6 credits. Restricted to: BIOL, MBIO, CEC, GEBT majors. S/U Grading (S/U, Audit).

Prerequisite(s): 45 college credits, 2.5 or better GPA, consent of instructor.

BIOL 353. Pre-Professional Human Anatomy**4 Credits**

Pre-professional clinically-oriented survey of human anatomy. Designed primarily for pre-nursing majors. Provides comprehensive anatomical training for students planning careers in health and allied health sciences, such as medicine, dentistry, nursing, physical therapy, physicians aid, human nutrition, and food science. Suitable as a biology elective. Concurrent enrollment in BIOL 354L is recommended but not required.

Prerequisite(s): BIOL 211G and either CHEM 110G, CHEM 111G, or CHEM 115.

BIOL 353 L. Pre-Professional Human Anatomy Laboratory**1 Credit**

Laboratory experience in human anatomy using anatomical models and cat dissections. Designed as a learning aid to support and augment BIOL 353 pre-professional Human Anatomy. For students planning careers in health and allied health sciences such as medicine, dentistry, nursing, physical therapy, physicians aid, human nutrition, and food science.

Prerequisite(s)/Corequisite(s): BIOL 253 or BIOL 353. **Prerequisite(s):** BIOL 211G and either CHEM 110G, CHEM 111G, or CHEM 115.

BIOL 354. Physiology of Humans**3 Credits**

Principles of integrative functions in humans. A systems approach emphasizing tissues, organs, and their regulation.

Prerequisite(s): BIOL 211G and MATH 121G.

BIOL 354 L. Laboratory of Human Physiology**1 Credit**

Laboratory to accompany BIOL 354.

Prerequisite(s): MATH 121G and either BIOL 254, BIOL 381, BIOL 354, or concurrent enrollment in BIOL 354.

BIOL 373. Fungal Biology**3 Credits (3+2P)**

Same as EPWS 372.

Prerequisite: EPWS 310 or BIOL 311 or consent of instructor.

BIOL 377. Cell Biology**3 Credits**

Fundamentals of eukaryotic cell structure, organization, and function. Emphasis on membranes, subcellular organelle systems, cytoskeleton, and cell cycle. Includes basic aspects of molecular biology. BIOL 111G recommended.

Prerequisite(s): BIOL 211G, BIOL 305, and MATH 121G.

BIOL 381. Animal Physiology**3 Credits**

Principles of integrative function in animals, emphasizing tissues, organs, organ systems, and regulation. Includes adaptations of animals to their environments. BIOL 111G and BIOL 377 recommended.

Prerequisite(s): BIOL 211G and junior-level standing, MATH 121G.

BIOL 382. Plant Signalling and Development**3 Credits**

This is a course that introduces plant signalling pathways and their role in development to students. The lectures are structured to facilitate in-class discussions on the current state and future directions in this field. Topics will cover a wide range of biological questions and the methods used to study them.

Prerequisite(s): BIOL 305 or GENE 315, and MATH 121G.

BIOL 385. An Introduction to Cancer**3 Credits**

This course will cover 3 areas of cancer research and their interdisciplinary connections: clinical cancer research, epidemiology and public health, and basic cancer research. May be repeated up to 3 credits.

Prerequisite(s): BIOL 305 or GENE 315 or equivalent and MATH 121G.

BIOL 398. Biology Research Programs**1-3 Credits**

Directed studies and research experiences, by arrangement with instructor. May be repeated for a maximum of 6 credits.

BIOL 402. Biology Honors Thesis**1-3 Credits (1-3)**

Provides guidance in how to write a scientific paper in the sciences. Students will produce an honors thesis based on previous independent research. Consent of instructor required.

Prerequisite(s): MATH 121G and consent of instructor.

BIOL 408. Ecology of Plants**3 Credits**

Controlling factors, succession, community dynamics, and the classification of vegetation.

Prerequisite(s): BIOL 301 and MATH 121G.

BIOL 412. Seminar in Microbiology**1 Credit**

Seminar to aid students in assessment and presentation of current topics in microbiology. Graded: S/U.

Prerequisite(s): BIOL 311, BIOL 311L, and MATH 121G.

BIOL 417. Topics in Environmental Microbiology**3 Credits**

This is an advanced undergraduate course based on current literature in Environmental Microbiology, and is a seminar-style, discussion-based class. Topics typically include marine microbiology, ancient DNA, and the human microbiome. Crosslisted with: BIOL 577.

Prerequisite(s): MATH 121G, BIOL 477 or consent of instructor.

BIOL 423. Primate Adaption and Evolution**3 Credits**

Survey of the adaptations and evolutionary history of non-human primates. Consent of Instructor required. Crosslisted with: ANTH 473 .

Prerequisite(s): ANTH 355 or consent of instructor.

Corequisite(s): BIOL 423L when offered.

BIOL 423 L. Primate Evolution Laboratory**1 Credit**

Laboratory with exercises on non-human primate adaptation and evolution. Crosslisted with: ANTH 473 L.

Prerequisite(s): ANTH 355 or consent of instructor.

Corequisite(s): BIOL 423.

BIOL 424. Human Osteology**3 Credits**

A survey of the functional, developmental, and evolutionary biology of the human skeleton. Identifying bones and teeth from hands-on experience with skeletal and dental material. Provides a foundation for human evolutionary studies, bioarchaeology and forensic anthropology. Crosslisted with: ANTH 474.

Corequisite(s): BIOL 424L when offered.

Prerequisite(s)/Corequisite(s): Recommend ANTH 355 or equivalent.

BIOL 424 L. Human Osteology Lab**1 Credit**

Laboratory for ANTH 474. Experiences and activities related to identifying teeth and bones of the human skeleton. Crosslisted with: ANTH 474 L.

Prerequisite(s): Recommend ANTH 355 or equivalent.

Corequisite(s): BIOL 424.

BIOL 427. Symbiosis**3 Credits**

In-depth treatment of the ecology, evolution, and mechanisms that are found in symbiotic systems.

Prerequisite(s): BIOL 111G, BIOL 211G, and MATH 121G.

BIOL 434. Human Evolution**3 Credits**

Overview of human biological evolution from the emergence of Miocene apes to the modern human diaspora. Crosslisted with: ANTH 434.

Prerequisite(s): ANTH 355 or consent of instructor.

Corequisite(s): BIOL 434L when offered.

BIOL 434 L. Human Evolution Laboratory**1 Credit**

Laboratory in human evolution, includes exercises and activities to learn the human fossil record. Crosslisted with: ANTH 434 L.

Prerequisite(s): ANTH 355 or consent of instructor.

Corequisite(s): BIOL 434.

BIOL 436. Disease Vector Biology**3 Credits**

Fundamentals of disease vector biology with emphasis on molecular biology. Explores an overview of vector borne diseases, insect endocrinology, insect immunity, olfaction, vector genome projects and transgenic insect techniques. Includes student presentations and literature discussions. Crosslisted with: BIOL 536

Prerequisite(s): BIOL 211G, BIOL 305, and MATH 121G.

BIOL 442. Genomics Technology**3 Credits**

The course introduces current genomic techniques in genome sequencing, transcriptome analysis, detection of genetic variation, and metagenomics.

Prerequisite(s): BIOL 211G, BIOL 305 or BIOL 478 or GENE 315, and MATH 121G.

BIOL 446. Bioinformatics and NCBI Database**3 Credits**

The course discusses how to use NCBI database and bioinformatic tools for research with genomics approaches. The topics include nucleotide and protein sequence analysis, similarity search with blast algorithms, gene/genome annotation, protein structure analysis, gene expression analysis, and metagenomic study.

Prerequisite(s): BIOL 211G, BIOL 305 or BIOL 478 or GENE 315, and MATH 121G.

BIOL 447. Ornithology**4 Credits (3+3P)**

Morphology, life histories, systematics, ecology, and behavior of birds.

Prerequisite(s): MATH 121G.

BIOL 450. Special Topics**1-3 Credits**

Specific subjects announced in the Schedule of Classes and offered as scheduled courses. May be repeated for unlimited credit.

BIOL 451. Physiology of Microorganisms**3 Credits**

Aspects of cellular physiology unique to prokaryotes. BCHE 395 recommended.

Prerequisite(s): C- or better in BIOL 311, MATH 121G.

BIOL 455. Biometry**3 Credits**

Biometry is the analysis of biological data using mathematical and statistical models. The course will cover basic theories of probability and statistics and will introduce principles of sampling, estimation, experimental design, and hypothesis testing. Students will analyze biological data using computer programs and will perform tests for goodness-of-fit, independence, analysis of variance, correlation, and regression.

Prerequisite(s): BIOL 111G or BIOL 211G, and MATH 121G.

BIOL 459. Darwinism Versus Creationism**3 Credits**

This course examines the debate regarding Creationism versus Darwinism as explanations for the origin and diversification of life on Earth. Topics covered include the nature and philosophy of science, new-world creationism, old-world creationism, intelligent design, history of evolutionary thought, modern evolutionary theory, and the Creationism-Darwinism debate at the societal, political, and educational interfaces. The course structure will include formal lectures and in-class discussion of assigned readings.

Prerequisite(s): BIOL 111G or BIOL 211G, and MATH 121G.

BIOL 462. Conservation Biology**3 Credits**

Examination of the value of biological diversity, the natural processes that control biological diversity, and the ways in which human activities have resulted in the loss of biological diversity, both regionally and globally.

Prerequisite(s): BIOL 301 and either MATH 142G or MATH 191G.

BIOL 465. Invertebrate Zoology**4 Credits (3+3P)**

Survey, ecology, behavior and physiology. BIOL 322 recommended.

Prerequisite(s): MATH 121G, BIOL 111G, and junior-level standing.

BIOL 466. Invertebrate Zoology Field Trip**1 Credit**

A one-week field trip for the study of marine invertebrates. Registrants must provide own camping gear. Graded: S/U.

Prerequisite(s): MATH 121G, BIOL 465 or equivalent (or concurrent enrollment) or consent of instructor.

BIOL 467. Evolution**3 Credits**

Covers theory, historical background, population variation, natural selection, adaptation, speciation.

Prerequisite(s): BIOL 111G, BIOL 305 or GENE 320, and MATH 121G.

BIOL 469. Biology of Emerging Infectious Diseases**3 Credits**

This class will investigate the evolutionary and ecological drivers of disease emergence. The effect of emerging diseases on human health will be addressed throughout the class, but the class will also consider the consequences of disease emergence for the health of wildlife and plant populations. Additionally, the class will consider the mechanisms used to control disease emergence and why they succeed or fail.

Prerequisite(s): MATH 121G, Introductory Genetics (BIOL 305 or equivalent) or consent of the instructor.

BIOL 470. Developmental Biology**3 Credits**

The purpose of this course is to introduce students to the principles that govern the development of a single fertilized egg cell into a complex multicellular organism. These principles, and often the molecular mechanisms by which they are accomplished, appear to be universal for all multicellular organisms including both plants and animals. We will explore issues such as: how cells become committed to particular cell fates and how this commitment is maintained; how organs acquire particular shapes, sizes and positions; the developmental causes of some human diseases; how the environment affects development; and, how changes in development provide the material basis for evolutionary change.

Prerequisite(s): BIOL 211G, BIOL 305, and MATH 121G.

BIOL 471. Molecular and Cellular Mycology**3 Credits**

Exploration of the world of fungi with emphasis on fungal molecular biology and development. Including discussion of fungal taxonomy and genomics.

Prerequisite(s): MATH 121G and BIOL 311 required, BCHE 341 or BCHE 395 recommended, or consent of instructor.

BIOL 472. Primate Behavior and Ecology**3 Credits**

Survey of the social behavior and ecology of nonhuman primates. Crosslisted with: ANTH 472.

BIOL 473. Ecology of Microorganisms**3 Credits (2+3P)**

The metabolic interactions of microorganisms in the environment, with emphasis on their roles in ecological processes.

Prerequisite(s): MATH 121G, BIOL 311 or consent of instructor.

BIOL 474. Immunology**3 Credits**

Basic concepts of the immune response.

Prerequisite(s): MATH 121G, BIOL 305, and CHEM 211 or CHEM 313.

BIOL 475. Virology**3 Credits**

Mechanisms of viral infections of animals and man. BCHE 395 or BIOL 305 are recommended.

Prerequisite(s): BIOL 311 and MATH 121G.

BIOL 476. Soil Microbiology**3 Credits**

Nature and physiology of soil microorganisms, how they affect plant growth and recycle nutrients. Land framing, bioremediation, and other environmental problems as influenced by soil microorganisms. SOIL 252 and BIOL 311 recommended. Same as SOIL 476.

BIOL 476 L. Soil Microbiology Laboratory**1 Credit**

Enumeration of soil microorganisms, their activities, and transformations they mediate. Same as SOIL 476L.

Prerequisite(s)/Corequisite(s): BIOL 476.

BIOL 477. Applied and Environmental Microbiology**4 Credits**

A lecture-laboratory course on the microorganisms and the reactions they mediate which either impact the environment or have industrial applications. Reading of current literature will be emphasized. Topics include bioremediation, water quality, and aspects of industrial and food microbiology.

Prerequisite(s): MATH 121G, BIOL 311, and 311 L, or consent of instructor.

BIOL 478. Molecular Biology of Microorganisms**3 Credits**

The biochemical basis for gene mutation, recombination, and expression with emphasis on prokaryotes. Includes fundamentals of recombinant DNA technology. BIOL 305 and BCHE 395 recommended.

Prerequisite(s): BIOL 311 and MATH 121G.

BIOL 479. Medical Microbiology**3 Credits**

An in-depth overview of microbial pathogens associated with human infectious disease. Etiological agents, pathogenesis, and processes leading to the disease state and the therapies of infectious disease.

Prerequisite(s): MATH 121G and BIOL 311 required, BIOL 474 recommended.

BIOL 479 L. Medical Microbiology Laboratory**1 Credit**

Overview of common procedures used by medical microbiologists to identify agents of disease or microbial pathogen traits. May be repeated up to 1 credits.

Prerequisite(s)/Corequisite(s): BIOL 479. **Prerequisite(s):** MATH 121G, BIOL 311, BIOL 311L.

BIOL 480. Animal Behavior**3 Credits**

A survey of the field of animal behavior. BIOL 322 recommended.

Prerequisite(s): MATH 121G, BIOL 111G, and junior-level standing.

BIOL 480 L. Animal Behavior Laboratory**1 Credit**

Laboratory and field experiences in animal behavior BIOL 322 recommended.

Prerequisite(s): BIOL 111G, MATH 121G, and junior-level standing.

Corequisite(s): BIOL 480.

BIOL 484. Animal Communication**3 Credits**

An examination of how animals produce and perceive signals, what factors influence the form of signals in different sensory modalities, and how conflicts between senders and receivers affect signaling strategies. Weekly discussion from the primary literature and group research products.

Prerequisite(s): BIOL 111G or consent of instructor, and MATH 121G.

BIOL 485. Comparative Stress Physiology**3 Credits**

This course explores the biochemical, hormonal, and molecular aspects of stress physiology in all organisms from bacteria to humans. Focus area include hormesis, temperature, radiation, oxygen, infection, and dehydration.

Prerequisite(s): MATH 121 and BIOL 211G.

BIOL 488. Principles of Conservation Genetics**3 Credits**

Fundamentals of the genetics of small populations. Genetic technologies used in studying small populations. Application of genetics and evolution to the conservation of biological populations.

Prerequisite(s): MATH 121G and BIOL 305.

BIOL 489. Genetic Aspects of Population Biology**3 Credits**

Basic theory of population genetics and how that theory has guided, and been influenced by, studies of natural populations.

Prerequisite(s): MATH 121G and BIOL 305 or equivalent.

BIOL 490. Neurobiology**3 Credits**

Fundamentals of neurobiology with an emphasis on properties of neurons and glia, principles of synaptic transmission, development of nervous system and organization of motor and sensory systems.

Prerequisite: BIOL 211, BIOL 305, MATH 142G, or MATH 191G, and CHEM 211 or CHEM 313.

BIOL 498. Biology Research Programs**1-3 Credits**

Directed studies and research experiences, by arrangement with instructor. May be repeated for a maximum of 6 credits.

BIOL 503. Advanced Primate Adaptation and Evolution**3 Credits**

Advanced review of non-human primate adaptation and evolution.

Crosslisted with: ANTH 573.

Corequisite(s): BIOL 503L when offered.

BIOL 503 L. Advanced Primate Adaptation and Evolution Laboratory**1 Credit**

Laboratory with exercises on non-human primate adaptation and evolution. Crosslisted with: ANTH 573 L.

Corequisite(s): BIOL 503.

BIOL 506. Biological Electron Microscopy (f)**5 Credits**

Principles and use of light microscope, transmission and scanning electron microscope; specimen preparation, thick and ultrathin sectioning, analysis of micrographs.

BIOL 510. Current Topics in Biology**3 Credits**

Introduction to diverse topics in modern biology, including dynamic areas of current research.

BIOL 514. Plant Physiology**2 Credits**

Same as EPWS 514.

Prerequisites: BIOL 211G and CHEM 112G.

BIOL 520. Molecular Cell Biology**3 Credits**

An in-depth look at cellular processes and structures at the molecular level. Emphasis is placed on formal student presentations and discussions of current literature.

Prerequisite: BIOL 377 or equivalent.

BIOL 527. Symbiosis**3 Credits**

In-depth treatment of the ecology, evolution, and mechanisms that are found in symbiotic systems.

Prerequisite: graduate status.

BIOL 533. Environmental Physiology of Plants**3 Credits**

Integral responses of plants and crop productivity to naturally occurring and modified environmental factors such as radiation, temperatures, water vapor, carbon dioxide, and air flow. Same as AGRO 533 and HORT 533.

Prerequisite: BIOL 314 or consent of instructor.

BIOL 534. Advanced Human Evolution**3 Credits**

Advanced overview of human biological evolution from the emergence of Miocene apes to the modern human diaspora. Crosslisted with: ANTH 534.

Prerequisite(s): ANTH 355 or consent of instructor.

Corequisite(s): ANTH 534L when offered.

BIOL 534 L. Advanced Human Evolution Laboratory**1 Credit**

Advanced laboratory in human evolution, includes exercises and activities to learn the human fossil record. Crosslisted with: ANTH 534 L.

Corequisite(s): BIOL 534.

BIOL 536. Advanced Disease Vector Biology**3 Credits**

Fundamentals of disease vector biology with emphasis on molecular biology. Explores an overview of vector borne diseases, insect endocrinology, insect immunity, olfaction, vector genome projects and transgenic insect techniques. Includes student presentations and literature discussions. Taught with: BIOL 436.

Prerequisite(s): BIOL 211G and BIOL 305.

BIOL 540. Science and Ethics**1-3 Credits (1-3)**

Ethical concerns facing researchers in the basic and applied biological sciences. Coverage of responsible conduct in research including scientific integrity and research misconduct, mentor/trainee responsibilities, data management, authorship, publication practices, human subjects, animal welfare, intellectual property, conflicts of interest and effort and collaborative science. Emphasis on ethical reasoning skills. Discussion of ethical and societal implications of issues selected from a broad range of contemporary research areas (genetics, reproductive biology, environmental sciences, nanoscience, drug discovery, bioengineering, neuroscience). Subtitled. May be repeated up to 4 credits. Crosslisted with: PHIL 540.

BIOL 541. Professional Development Seminar**1-3 Credits**

Practical aspects of career enhancement including job seeking, professional presentations, grant proposals, etc.

Prerequisite: consent of instructor.

BIOL 545. Molecular and Biochemical Genetics**3 Credits**

Same as BCHE 545.

BIOL 550. Special Topics**1-3 Credits**

Readings, discussions, and/or field and laboratory investigation of selected problems. Possible topics: human genetics, systematic entomology, or parasitism in animals. May be repeated for unlimited credit.

Prerequisite: consent of instructor, and designation of a specific topic before registration.

BIOL 560. Seminar in Cell and Organismal Biology**1-3 Credits**

Oral presentation and discussion of journal articles and ongoing research project. May be repeated for a maximum of 6 credits.

BIOL 562. Advanced Genomics Technology**3 Credits**

This course covers current genomics techniques in genome sequencing, transcriptome analysis, detection of genetic variation, and metagenomics. Consent of Instructor required.

BIOL 566. Advanced Bioinformatics and NCBI Database**3 Credits**

The course discusses how to use NCBI database and bioinformatic tools for research with genomics approaches. The topics include nucleotide and protein sequence analysis, similarity search with blast algorithms, gene/genome annotation, protein structure analysis, gene expression analysis, and metagenomic study. Consent of Instructor required.

BIOL 568. Communities and Ecosystems**3 Credits**

Study of ecological systems at the levels of the community and ecosystem. Topics include species interactions, community structure and dynamics, and flow of material and energy through ecosystems.

BIOL 570. Ecological Biogeography**3 Credits**

Survey of modern theory incorporating ecological mechanisms governing distribution and abundance of species over space and time.

BIOL 571. Advanced Molecular and Cellular Mycology**3 Credits**

Exploration of the world of fungi with emphasis on fungal molecular biology and development, including discussion of fungal taxonomy and genomics, using current literature. Consent of instructor required.

BIOL 572. Advanced Primate Behavior and Ecology**3 Credits**

Advanced review of non-human primate social behavior and ecology. Crosslisted with: ANTH 572.

BIOL 573. Fungal Biology**3 Credits (3+2P)**

Same as EPWS 572.

Prerequisites: EPWS 310 or BIOL 311, or consent of instructor.

BIOL 574. Advanced Human Osteology**3 Credits**

Advanced human osteology surveying the functional, developmental and evolutionary biology of the human skeleton. Identifying bones and teeth from hands-on experience with skeletal and dental material. Provides a foundation for human evolutionary studies, bioarchaeology and forensic anthropology. Crosslisted with: ANTH 574.

Corequisite(s): BIOL 574L when offered.

BIOL 574 L. Human Osteology Laboratory**1 Credit**

Laboratory for BIOL 574. Experiences and activities related to identifying teeth and bones of the human skeleton. Crosslisted with: ANTH 574 L.

Corequisite(s): BIOL 574.

BIOL 577. Advanced Topics in Environmental Microbiology**3 Credits**

This course is based on current literature in Environmental Microbiology, and is a seminar-style, discussion-based class. Topics typically include marine microbiology, ancient DNA and the human microbiome.

Prerequisite(s): Consent of instructor.

BIOL 581. Physiology of Animals**3 Credits**

Comprehensive treatment of integrative physiology of animals, emphasizing tissues, organ systems, and regulatory control, including neuroendocrine function, circulation, respiration, and excretion. Term paper required. BIOL 111G, BIOL 377 recommended.

Prerequisite: BIOL 211G.

BIOL 582. Advanced Plant Signalling and Development**3 Credits**

This is a course that introduces plant signalling pathways and their role in development to students. The lectures are structured to facilitate in-class discussions on the current state and future directions in this field. Topics will cover a wide range of biological questions and the methods used to study them.

Prerequisite(s): BIOL 305 or GENE 315, and MATH 121G.

BIOL 587. Behavioral and Evolutionary Ecology**3 Credits**

This course will investigate the causes and consequences of phenotypic variation and the adaptive value of phenotypic traits.

BIOL 590. Advanced Neurobiology**1-3 Credits**

Detailed examination of the principles underlying nervous system organization and function. Emphasis on recent advances in multidisciplinary, integrated approaches to study the nervous system. May be repeated under different subtitles for a maximum of 9 credits.

Prerequisites: either BIOL 490, BIOL 520, or equivalent, and consent of instructor.

BIOL 598. Special Research Programs**1-9 Credits**

Individual investigations either analytical or experimental.

BIOL 599. Master's Thesis**15 Credits**

Thesis.

BIOL 600. Doctoral Research**1-15 Credits**

Research.

BIOL 610. Seminar**1-3 Credits (1-3)**

Oral presentation and discussion of journal articles and ongoing research projects. May be repeated up to 6 credits. S/U Grading (S/U, Audit).

BIOL 612. Microbiology Seminar**1 Credit**

Seminar to aid graduate students in assessment and presentation of classical and current topics in microbiology.

BIOL 697. University Teaching Experience**1-3 Credits**

Certain graduate students will be permitted to teach up to one-third of one of the biology courses. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures.

BIOL 698. Selected Topics**1-3 Credits**

Selected topics for doctoral students.

BIOL 700. Doctoral Dissertation**15 Credits**

Dissertation.

Biology - Bachelor of Arts

The Bachelor of Arts curriculum is intended for students who desire a broad education with emphasis in biology in a program chosen by the student in consultation with an academic advisor. The Bachelor of Arts is recommended for those who plan to teach at the primary levels or to use a background in life science in business or other endeavors.

Requirements

General Education Requirements		35
Viewing a Wider World		6
Nondepartmental Requirements		
CHEM 111G	General Chemistry I	4
CHEM 112G	General Chemistry II	4
MATH 142G	Calculus for the Biological and Management Sciences	3-4
or MATH 191G	Calculus and Analytic Geometry I	
Organic Chemistry Requirement		4-8
CHEM 211	Organic Chemistry	
OR		
CHEM 313 & CHEM 314 & CHEM 315	Organic Chemistry I and Organic Chemistry II and Organic Chemistry Laboratory	
Select 3-4 credits from one of the following departments: astronomy, computer science, geology or physics		3-4
Departmental Requirements		
BIOL 111G	Natural History of Life	3
BIOL 111GL	Natural History of Life Laboratory	1
BIOL 211G	Cellular and Organismal Biology	3
BIOL 211GL	Cellular and Organismal Biology Laboratory	1
BIOL 301	Principles of Ecology	3
BIOL 305	Principles of Genetics	3
BIOL 377	Cell Biology	3
BIOL 467	Evolution	3
Select sufficient upper-division biology electives to bring total upper-division credits to 24. ¹		12
Electives		29
Selective sufficient electives to bring the total to 120, including at least 48 upper-division credits.		
Total Credits		120-126

¹ Choice of electives should be done in consultation with an advisor.

Biology - Bachelor of Science

The major in biology provides a solid academic base for those planning to enter any of the various fields of the biological sciences. The program allows considerable latitude. Suggested course sequences for specific

areas of interest within biology can be obtained from the Biology Success Center (<http://bio.nmsu.edu/success>).

Requirements

Nondepartmental Requirements

CHEM 111G	General Chemistry I	4
CHEM 112G	General Chemistry II	4
<i>Organic Chemistry Requirement</i>		4-8
CHEM 211	Organic Chemistry	
OR		
CHEM 313 & CHEM 314 & CHEM 315	Organic Chemistry I and Organic Chemistry II and Organic Chemistry Laboratory	
BCHE 341 or BCHE 395	Survey of Biochemistry Biochemistry I	3-4
BIOL 455 or A ST 311	Biometry (preferred) Statistical Applications	3

Select sufficient electives to bring the total to 120 credits, including at least 48 upper-division credits.		
Total Credits		120-125

¹ At least one upper-division course must include laboratory and/or field experience. The laboratory/field requirement can be satisfied by any BIOL course above the 300 level that includes a laboratory or a field trip—including BIOL 350 Special Topics or BIOL 450 Special Topics.

Biology - Doctor of Philosophy

The Department of Biology offers graduate study leading to the Doctor of Philosophy degree. Our goal is to prepare students for careers in

the various fields in biology through formal coursework and research experiences as well as through seminars and discussion groups.

There are three formal course requirements for all Biology Graduate students, with the exception of students in the accelerated non-thesis MS Biotechnology option. These core courses are:

Course Requirements

BIOL 510	Current Topics in Biology	3
BIOL 540 or PHIL 540	Science and Ethics Science and Ethics	1-3
BIOL 610	Seminar	1-3

Students are required to successfully complete the Seminar course once each year that they are in the program.

Doctor of Philosophy students can choose among the Department's three areas of emphasis:

1. Behavioral, Ecological and Evolutionary Biology

The Behavioral, Ecological and Evolutionary Biology program is appropriate for graduate students who wish to specialize in areas of biology that study the various processes that encompass the behavior, ecology, and evolution of living and extinct taxa.

2. Cell and Organismal Biology

The Cell and Organismal Biology program is appropriate for all Graduate students who wish to emphasize those areas of biology that integrate function and structure in cells, tissues, and organisms.

3. Microbiology

The Microbiology curriculum is appropriate for graduate students who wish to specialize in areas of biology that study the various processes that occur in microbes (bacteria, viruses, fungi, and protists) such as their physiology, ecology, development or evolution.

All graduate students should develop their curriculum plan in consultation with their faculty advisor and graduate committee. Details of sample course sequences within the different emphases are described in the Biology Graduate Handbook available for download from the Graduate Student section of the Biology website <http://bio.nmsu.edu/grads/>.

Graduate students may also earn a minor in other graduate departments and programs.

Biology - Master of Science

The Master of Science degree can be obtained through either a thesis option or a non-thesis option. Both options require 30 credits of course work. The non-thesis option can be completed as an accelerated (one-year) program concentrating in biotechnology or through an individual degree plan in consultation with the student's Master of Science committee.

There are three formal course requirements for all Biology Graduate students, with the exception of students in the accelerated non-thesis MS Biotechnology option. These core courses are

Course Requirements

BIOL 510	Current Topics in Biology	3
----------	---------------------------	---

BIOL 540	Science and Ethics	1-3
or PHIL 540	Science and Ethics	
BIOL 610	Seminar	1-3

Students are required to successfully complete the Seminar course once each year that they are in the program.

For research toward the Master of Science degree, students can choose among the Department's three areas of emphasis:

1. Behavioral, Ecological and Evolutionary Biology

The Behavioral, Ecological and Evolutionary Biology program is appropriate for graduate students who wish to specialize in areas of biology that study the various processes that encompass the behavior, ecology, and evolution of living and extinct taxa.

2. Cell and Organismal Biology

The Cell and Organismal Biology program is appropriate for all Graduate students who wish to emphasize those areas of biology that integrate function and structure in cells, tissues, and organisms.

3. Microbiology

The Microbiology curriculum is appropriate for graduate students who wish to specialize in areas of biology that study the various processes that occur in microbes (bacteria, viruses, fungi, and protists) such as their physiology, ecology, development or evolution.

All graduate students should develop their curriculum plan in consultation with the faculty advisor and graduate committee. Details of sample course sequences within the different emphases are described in the Biology Graduate Handbook available for download from the Graduate Student section of the Biology website <http://bio.nmsu.edu/grads/>.

Graduate students may also earn a minor in other graduate departments and programs.

Biotechnology Program

This is an accelerated (one year) non-thesis Master of Science degree in Biology that focuses on biotechnology. The program requires 30 hours of course work. The courses in this program are designed to prepare students for biotechnology-related careers in basic and applied research; in product development and testing; and in policy-making, regulation and law enforcement. The program of study includes practical training in molecular biology, genomics and bioinformatics, statistical analysis, business, bioethics and professional development skills. Additional graduate course work will provide students with further expertise in their individual areas of interest, including cell, molecular, and microbial biology; environmental, ecological and evolutionary biology; and general and integrative biology. Students who complete this training will be prepared for successful employment in academic, corporate, and government settings.

Skills		9-10
BIOL 450	Special Topics (Molecular Biology Techniques Lab)	
BIOL 566	Advanced Bioinformatics and NCBI Database	
or GENE 452	Applied Bioinformatics	
BIOL 562	Advanced Genomics Technology	

A ST 505	Statistical Inference I	
Professional Development		5-7
BIOL 540	Science and Ethics	
or PHIL 540	Science and Ethics	
BIOL 541	Professional Development Seminar	
MGT 591	New Venture Creation (or approved substitute)	
Biological Knowledge Electives ¹		14-16
Optional Internship ²		3-6

¹ Students are expected to choose 5 or more courses numbered 450 or above in microbiology, organismal and cellular biology, genetics, or ecology.

² This may include a research internship in a biotechnology company or in a Biology Department laboratory. Credits earned during an internship count towards the required elective credits.

Biology - Undergraduate Minor

The courses of the Biology minor represent core biological content, critical for a general view of biology. A student cannot earn a bachelor's degree in Biology and also earn a minor in Biology.

Requirements

A minor in Biology must include 20 credits in Biology, of which at least 9 credits must be numbered 300 and above.

No more than 3 credits of special topics or individual study courses may be applied to the minor. A grade of C- or better must be earned in all courses.

Required Courses

BIOL 111G	Natural History of Life	3
BIOL 111GL	Natural History of Life Laboratory	1
BIOL 211G	Cellular and Organismal Biology	3
BIOL 211GL	Cellular and Organismal Biology Laboratory	1
BIOL 301	Principles of Ecology	3
or BIOL 377	Cell Biology	
BIOL 305	Principles of Genetics	3
BIOL 467	Evolution	3
Elective		3
Select any Biology courses to bring the total credits to 20.		

Total Credits 20

Conservation Ecology - Bachelor in Conservation Ecology

Co-directors of the Program:

Professor, Michelle Nishiguchi, Department Head, Biology
Professor, Kathryn Stoner, Department Head, Fish, Wildlife and Conservation Ecology

Professors Boeing, Boecklen, Caldwell, Cowley, Desmond, Hanley, Houde, Milligan, Nishiguchi, Roemer, G. Smith, Wright; **Associate Professors** Bailey, Cain, Mabry; **Assistant Professors** Ferrenberg, James

New Mexico State University offers an interdisciplinary, undergraduate program in Conservation Ecology. The goal of this program is to train biologists for the current and future challenges that we face in the conservation and wise use of our Earth's natural resources. An overriding principle of the program is to provide a solid foundation in basic science coupled with a practical approach towards sustainability and stewardship. The curriculum encompasses several disciplines and includes a wide variety of courses from the Biology; Fish, Wildlife and Conservation Ecology; Geography; and Range Science departments.

The educational experience will provide students with an overview of global biodiversity and an understanding of the ecological and evolutionary processes that have created and sustained it. Courses in population and community ecology coupled with population viability analysis and risk assessment will give students the necessary background to understand the theory and development of these fields as well as the tools to tackle real-world problems. Courses in basic genetics, evolution, and conservation genetics will expose students to the importance of conserving genetic variation in order to maintain adaptive potential within populations, thereby sustaining the evolutionary process. Students will also receive background on wildlife law and environmental policy, information vital for assisting governing bodies in making decisions regarding the protection and wise use of our natural resources. Skills obtained in the application of geographic information systems, molecular genetics, and professional communication can also be acquired through various electives. In sum, we seek to provide undergraduate students with an education that will allow them the opportunity to contribute to the conservation of all life on Earth.

The requirements are listed below. In addition, each required course must be passed with a grade of C- or better.

Core Curriculum ¹

A ST 311	Statistical Applications	3
CHEM 111G	General Chemistry I	4
CHEM 112G	General Chemistry II	4
CHEM 211	Organic Chemistry	4

Total Credits 20

Genetics and Biotechnology - Bachelor of Science in Genetics

Codirectors of the Program:

Professor, Michelle Nishiguchi, Department Head, Biology

Associate Professor, Rolston St. Hilaire, Interim Department Head, Plant and Environmental Sciences

Professors Bosland, Cramer, Houde, Milligan, Nishiguchi, O'Connell, Ray, Sengupta-Gopalan, C. Shuster, St. Hilaire; **Associate Professors** Bailey, Curtiss, M. Shuster, Zhang

Have you ever wondered why your hair or eye color, facial features, or the build of your body resembles that of your parents, grandparents, or other close relatives? What factors are responsible for generating all the variety of colors and shapes of flowers, trees, and different types of animals? If these questions have crossed your mind, then you have been thinking about Genetics; the science of heredity. Genetics is studied at the DNA/gene/genome level (molecular genetics, biotechnology, genomics and bioinformatics), the level of organisms (classical or Mendelian genetics), and within/among populations of individuals (population and quantitative genetics).

One of the most significant scientific accomplishments in history has been the use of genomic technologies to recently identify most human genes, as well as, most genes for a number of other animals, plants, fungi, and bacteria. Geneticists now have tremendous opportunities to use molecular, biochemical, mathematical, and computer science-based (bioinformatics) approaches to investigate how these genes determine observable traits. This information can be used to significantly advance

human health and well being, and to meet the food and fiber needs of the world.

A degree in Genetics can provide excellent preparation for careers in academic research and technical support, teaching, agriculture, the biotechnology industry, medicine and health sciences, forensic science, technical writing, and sales or marketing. It is also an excellent background for students wishing to enter a graduate program, medical school, and veterinary school.

Undergraduates in the Genetics program must earn a grade of C- or better to receive credit for required Basic Science Background and Genetics Core courses. Within the Genetics Core curriculum, Tier I courses must be taken by all majors, for a total of 28 credit hours. To accommodate differing interests among students, a series of Tier II courses comprising 11 to 13 credits are provided. Ethical considerations of genetic based technologies will be infused throughout the curriculum, with a focused course on Science and Ethics in the Tier III portion of the core curriculum.

Requirements

General Education Requirements

Area I: Communications

English Composition-Level 1. Select one from the following: 4

ENGL 111G	Rhetoric and Composition
ENGL 111GH	Rhetoric and Composition Honors
SPCD 111G	Advanced ESL Composition
ENGL 111 M	Rhetoric and Composition for International and Multilingual Students

English Composition-Level 2:

ENGL 218G	Technical and Scientific Communication	3
or ENGL 318G	Advanced Technical and Professional Communication	

Oral Communication. Select one from the following: 3

AXED 201G	Effective Leadership and Communication in Agricultural Organizations

BIOL 305	Principles of Genetics	
GENE 315	Molecular Genetics	

GENE 320	Hereditary and Population Genetics	
Total Credits		18

Human Biology - Undergraduate Minor

The Human Biology minor is intended to provide academic recognition for students who wish to focus a significant amount of attention on courses that deal with human beings from a wide variety of biological standpoints. Thus, course work may encompass topics representing a range of viewpoints such as biological function, human ecology, human origins, and psychology. Successful completion of this minor will provide students with a valuable interdisciplinary perspective on the human condition. This program consists of a minimum of 18 hours, that includes a minimum of 12 from within the Biology Department and a minimum of 3 outside the department. Successful completion of the minor will be certified by the Biology Department. A grade of C- or better is required of all minor courses.

Requirements

Required Departmental Courses

BIOL 211G	Cellular and Organismal Biology	3
BIOL 211GL	Cellular and Organismal Biology Laboratory	1
Select 3-4 credits from the following: ¹		3-4

BIOL 254	Human Physiology	
BIOL 353	Pre-Professional Human Anatomy	
BIOL 354	Physiology of Humans	

Additional Courses

Select sufficient credits to total 18 credits from within and outside Biology department: 11

Within Department

Select a minimum of 5 credits from the following:		
BIOL 101G	Human Biology	
BIOL 305	Principles of Genetics	
BIOL 330	Comparative Anatomy and Embryology	
BIOL 353 L	Pre-Professional Human Anatomy Laboratory	
BIOL 354 L	Laboratory of Human Physiology	
BIOL 385	An Introduction to Cancer	
BIOL 424	Human Osteology	
BIOL 424 L	Human Osteology Lab	
BIOL 434	Human Evolution	
BIOL 434 L	Human Evolution Laboratory	
BIOL 469	Biology of Emerging Infectious Diseases	
BIOL 470	Developmental Biology	
BIOL 474	Immunology	
BIOL 490	Neurobiology	

Outside Department

Select a minimum of 3 credits; maximum 6 credits from the following:		
ANTH 130G	Human's Place in Nature: Introduction to Biological Anthropology	
ANTH 130GL	Human's Place in Nature Laboratory	
ANTH 355	Physical Anthropology	

ANTH 357V	Medical Anthropology
HON 232G	The Human Mind
HON 306V	Science, Ethics and Society
PHLS 301V	Human Sexuality
PSY 375	Psychology and the Brain
<hr/>	
Total Credits	18-19

¹ Any of BIOL 254 Human Physiology, BIOL 353 Pre-Professional Human Anatomy, or BIOL 354 Physiology of Humans not taken as a departmental requirement can be taken as one of the departmental elective courses.

Microbiology - Bachelor of Science

The major in microbiology provides a solid academic base for those planning to enter any of the various fields of microbiology.

Requirements

Nondepartmental Requirements

CHEM 111G	General Chemistry I	4
CHEM 112G	General Chemistry II	4

BIOL 474	Immunology	3
BIOL 478	Molecular Biology of Microorganisms	3
BIOL 479	Medical Microbiology	3
BIOL 479 L	Medical Microbiology Laboratory	1

Select six additional credits related to microbiology numbered 300 or above to bring total upper-division credits in microbiology to 24 from the following:

BIOL 412	Seminar in Microbiology
BIOL 427	Symbiosis
BIOL 451	Physiology of Microorganisms
BIOL 469	Biology of Emerging Infectious Diseases
BIOL 471	Molecular and Cellular Mycology
BIOL 473	Ecology of Microorganisms
BIOL 475	Virology
BIOL 476	Soil Microbiology
BIOL 477	Applied and Environmental Microbiology

General Education Requirements 35

Viewing a Wider World 6

Electives 10

Select sufficient electives to bring total credits to 120 including 48 upper-division credits.

Total Credits 120

Microbiology - Undergraduate Minor

A student cannot earn a bachelor's degree in Microbiology and also earn a minor in Microbiology.

Requirements

Required Courses

BIOL 311	General Microbiology	3
BIOL 311 L	General Microbiology Laboratory	2
BCHE 341	Survey of Biochemistry	4
or BCHE 395	Biochemistry I	

Select at least 11 credits from the following: 11

BIOL 412	Seminar in Microbiology
BIOL 451	Physiology of Microorganisms
BIOL 473	Ecology of Microorganisms
BIOL 474	Immunology
BIOL 475	Virology
BIOL 477	Applied and Environmental Microbiology
BIOL 478	Molecular Biology of Microorganisms
BIOL 479	Medical Microbiology
BIOL 479 L	Medical Microbiology Laboratory

Total Credits 20

Chemistry and Biochemistry Undergraduate Program Information

A degree in chemistry or biochemistry enables a student to pursue a wide variety of careers in: research, production, sales, management and teaching. These degrees are also an excellent preparation for professional studies in medicine, dentistry, forensics, veterinary science, optometry, pharmacology, pharmacy and law.

Chemistry majors who have completed the requirements for the Bachelor of Science degree may receive American Chemical Society certification if they take one additional one-semester course which includes 1 credit of laboratory.

Students who complete a Bachelor of Science in Biochemistry and wish to complete the Bachelor of Arts in Chemistry must complete 3 additional

upper division chemistry credits that are not counted in the Bachelor of Science in Biochemistry.

All departmental and nondepartmental requirements may not be taken S/U and must earn a C- or better final grade.

This department does not have a foreign language requirement for any of its degrees.

Graduate Program Information

The Department of Chemistry and Biochemistry offers programs leading to the MS and Ph.D. degrees in the areas of physical, organic, inorganic, biological, and analytical chemistry. Admission to these programs without deficiency is based on an undergraduate program essentially equivalent to that pursued by a chemistry or biochemistry major at this university. An entering student is encouraged to take the Graduate Record Examination (aptitude) to increase his or her chances for financial support. All foreign students must take GRE and TOEFL and must demonstrate adequate English speaking and writing skills.

Students who wish may take a minor in chemical toxicology or molecular biology. The core course work required of students entering with no previous graduate study in chemistry or biochemistry consists of basic core courses completed in one of the following options:

1. two courses chosen respectively from two of the five major areas represented in the department apart from a student's elected field of thesis research; or
2. one course chosen from the five major areas apart from the student's elected field of thesis research plus one graduate-level course in a discipline outside the Department of Chemistry and Biochemistry.

A master's candidate will plan an appropriate program of further study with his or her advisor and is also required to prepare a thesis. The thesis requirement may be waived upon application to the department head, after completion of the doctoral comprehensive examination requirements. A chemistry student who successfully completes the Ph.D. qualifying examination will begin writing the cumulative examinations, which constitute the written portion of the comprehensive examination. A biochemistry student who successfully completes the Ph.D. qualifying examination will begin preparation of a research proposal which will be orally defended for completion of the comprehensive examination. After completion of the qualifying exam, a doctoral committee is formed to assist the student in planning a program appropriate to his or her background and goals. Since research is central in both the master's and doctoral programs, the early selection of a research advisor is encouraged. The student is expected to participate in the colloquia and seminar programs. Financial support is available to graduate students in chemistry and biochemistry through numerous teaching and research assistantships as well as federally supported traineeships and fellowships. Inquiries regarding these opportunities should be directed to the head of the department.

Degrees for the Department

Chemistry - Bachelor of Arts (p. 233)

Biochemistry - Bachelor of Science (p. 232)

Chemistry - Bachelor of Science (p. 233)

Chemistry - Master of Science (p. 234)

Chemistry - Doctor of Philosophy (p. 234)

Minors for the Department

Environmental Chemistry - Undergraduate Minor (p. 234)

Biochemistry - Undergraduate Minor (p. 233)

Chemistry - Undergraduate Minor (p. 234)

Professor William Quintana, Department Head

Professors Arterburn, Gopalan, Herndon, Johnson, Quintana, Rayson, Smirnov, Zoski; **Associate Professors** Houston, Lara, Lusetti, Lyons, Maio; **Assistant Professors** Ashley, Li, Mera, Talipov, Yukl; **Adjunct Professors** Wollnik; **College Professors** Chinnasamy, Dunlavy, Potenza; **Emeritus Professor** Eiceman, Kuehn

W. Quintana, Department Head, Ph.D. (Pennsylvania)– inorganic chemistry, boron chemistry, chemical education; J.B. Arterburn, Ph.D. (Arizona)– organic chemistry, synthetic medicinal and chemical biology; A. Ashley, Ph.D. (Colorado State University)– biochemistry, toxicology, cell culture, DNA/RNA isolation, genotyping; A. Gopalan, Ph.D. (Ohio State University)– organic chemistry: synthetic methods, applications of enzymes in asymmetric synthesis; J. W. Herndon, Ph.D. (Princeton)– organic chemistry; organo-transition metal complexes, synthesis of biologically important cyclic compounds; K. Houston, Ph.D. (University of Texas- MD Anderson)– biochemistry, molecular mechanisms of hormone action in tumorigenesis; M. D. Johnson, Ph.D. (New Mexico State University)– inorganic chemistry; kinetics, reaction mechanisms of transition metal complexes; A. S. Lara, Ph.D. (New Mexico State University)– analytical chemistry: exploitation of clays for remediation of environmental pollutants; F. Li, Ph.D. (Minnesota)– inorganic chemistry, bioinorganic chemistry, small molecule activation; S. L. Lusetti, Ph.D. (Wisconsin–Madison)– biochemistry: cell metabolism, disease etiology; B. A. Lyons, Ph.D. (Cornell University)– biochemistry: nmr spectroscopic studies of signal transduction pathways in breast cancer; W. A. Maio, Ph.D. (Johns Hopkins University)– organic chemistry, total synthesis of marine natural products and explorations of new chemical methods; synthesis of lactones and lactams, artemisinin- based antimalarial dimers, and total synthesis of (+)-iriomoteolide 1a; P. E. Mera, Ph. D. (Wisconsin–Madison)– Microbiology, cell - division cycle of bacteria, drug - resistant bacteria, DNA replication; G. D. Rayson, Ph.D. (Texas-Austin)– analytical chemistry: spectroscopy; S. N. Smirnov, Ph.D. (Novosibirsk State University)– physical chemistry: photo-induced charge separation; M. R. Talipov, Ph. D. (Bashkir State University)– Theoretical Physical Chemistry, electronic structure calculations, ab initio calculations, density functional theory calculations; E.T. Yukl, Ph.D. (Oregon Health and Science University)– biochemistry: x-ray crystallography and spectroscopy of bacterial metalloproteins; C. G. Zoski, Ph.D. (Queens University, Canada)– analytical chemistry: theoretical and experimental electrochemistry

BCHE 140. Introduction to Biochemistry

1 Credit

A description of the nature of inquiry in biochemistry, especially with respect to the interaction of chemistry and biology. Both historical development and topics of current interest will be discussed. Graded S/U.

BCHE 241. Introduction to Research in Biochemistry

1-3 Credits

Techniques and procedures of biochemical research. May be repeated for a maximum of 3 credits.

Prerequisites: 8 credits of chemistry and 3.0 GPA in chemistry.

BCHE 341. Survey of Biochemistry**4 Credits (3+3P)**

Basic principles of biochemical processes and the structure/function of the major classes of biomolecules, with introductions to metabolism and the central dogma of biochemistry. The chemical and biological properties of major biomolecules (DNA, proteins,

Prerequisite(s): C or better in CHEM 211 or CHEM 313.

BCHE 395. Biochemistry I**3 Credits**

Principles governing chemistry and physics of life processes with emphasis on the relationships between molecular structure and cell function. Basic principles of biochemical processes, enzymology, and the structure/function of the major classes of biomolecules with introductions to metabolism. Introduction to catabolic metabolism.

Prerequisite(s): C or better in CHEM 314.

BCHE 396. Biochemistry II**3 Credits**

Introduction to anabolic metabolism and hormonal regulation. Biochemical principles of the mechanism and regulation of replication, transcription, recombination and translation in prokaryotes and eukaryotes. Introduction to DNA-based information technology. Taught with BCHE 396 H.

Prerequisite(s): C or better in BCHE 395.

BCHE 396 H. Biochemistry II Honors**3 Credits**

Taught with BCHE 396 with additional work required.

BCHE 397. Experimental Biochemistry Laboratory**3 Credits**

Introduction to fundamental techniques used to explore structure and function of biological macromolecules such as proteins, carbohydrates, lipids, and nucleic acid. Course covers analyzing and reporting experimental data; enzymology; quantitative methods to determine biological molecules; basic principles of electrophoresis, chromatography, and spectroscopic immunochemistry.

Prerequisite: C or better in BCHE 395.

Corequisite: BCHE 396.

BCHE 432. Physical Biochemistry**3 Credits**

This course focuses on modern Biophysical techniques used in protein and nucleic acid research. Topics are covered in some detail at the theoretical level. The course content is delivered entirely by podcast. Podcast contributions are from several different faculty from within their particular area(s) of expertise. Topics covered include (but are not limited to): biomolecular NMR, atomic force microscopy, light scattering, circular dichroism, ultracentrifugation, isothermal titration calorimetry, positron emission tomography, computerized tomography, ultrasound, functional MRI, protein fluorescence, mass spec/ proteomics, protein molecular dynamics simulations, and X-ray diffraction. Course credit qualifies for minor degree in chemistry as a physical-analytical chemistry emphasis. CHEM 431, or CHEM 433.

Prerequisite: One semester of undergraduate physical chemistry, e.g.

BCHE 440. Biochemistry Seminar**1 Credit**

Introduction to current literature in biochemistry and molecular biology. Selected topics in the field will be presented by the faculty. Students will present written and oral reports from literature searches. Restricted to: BCHE majors.

Prerequisite(s): BCHE 395.

BCHE 441. Advanced Research in Biochemistry**1-3 Credits**

Investigation of biochemical problems and the development of special techniques. May be repeated for a maximum of 3 credits.

Prerequisites: consent of instructor, 16 credits of chemistry and 3.0 GPA in chemistry for nonmajors.

BCHE 446. Biochemistry III**3 Credits**

Intermediary metabolism of carbohydrates, lipids, amino acids, and nucleic acids. Metabolic pathways discussed with emphasis on biochemical regulation and mechanistic, structural, functional, and evolutionary basis for existence.

Prerequisite(s): BCHE 395 and either BCHE 396 or consent of instructor.

BCHE 451. Special Topics**1-3 Credits**

Same as CHEM 451. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

BCHE 455. Independent Studies**1-3 Credits**

Independent studies directed by consulting faculty.

Prerequisite: consent of instructor.

BCHE 494. Biochemical Genetics Laboratory**3 Credits (1.25+6P)**

Laboratory techniques required for experimentation with recombinant DNA such as nucleic acid isolation and purification, polymerase chain reaction (PCR), sequence analysis, and directed mutagenesis using genetic material from both prokaryotic and eukaryotic organisms. Consent of Instructor required.

Prerequisite(s): C or better in BCHE 395 and BCHE 396 or GENE 315, and consent of instructor.

BCHE 540. Seminar in Biochemistry**1 Credit**

Formal seminar presentation in current topics in biochemical research. May be repeated for a maximum of 3 credits.

BCHE 542. Biochemistry I**3 Credits**

Relationship between macromolecular structure and function. Basic enzymology. Energy metabolism.

Prerequisite(s): CHEM 314 and CHEM 431 or CHEM 433; or BCHE 395 or equivalent.

BCHE 545. Molecular and Biochemical Genetics**3 Credits**

An accelerated treatment of the molecular basis of gene expression. Discussion of chemical, enzymological, and genetic techniques of molecular biology. Same as BIOL 545.

Prerequisite: BCHE 542 or equivalent.

BCHE 546. Biochemistry II**3 Credits**

Intermediary metabolism: catabolic and anabolic pathways of carbohydrates, lipids, amino acids, and nucleic acids, including their regulation.

Prerequisite: BCHE 542 or BCHE 395 with consent of instructor.

BCHE 590. Discussions in Biochemistry**1 Credit**

Current research problems in biochemistry. May be repeated for a maximum of 6 credits. S/U Grading (S/U, Audit).

BCHE 598. Special Research Programs**1-3 Credits**

May be repeated for a maximum of 6 credits. Same as CHEM 598. Graded S/U.

BCHE 599. Master's Thesis**15 Credits**

May be repeated for a maximum of 6 credits. Same as CHEM 599.

BCHE 600. Research**1-15 Credits**

May be repeated for a maximum of 20 credits. PR/U grading. Same as CHEM 600.

BCHE 645. Nucleic Acid Metabolism**3 Credits**

Study of the enzymology of proteins that act on nucleic acids as well as the effect of DNA and RNA structure on metabolic processes. Taught with BCHE 451.

Prerequisite(s): 'C' or better in BCHE 395 or BCHE 542.

BCHE 647. Physical Biochemistry**3 Credits**

Fundamental applications of physical chemistry to the investigation of biological metabolites and biological macromolecules, including proteins, oligo-nucleotides, and molecular arrays with an emphasis on understanding biological functions based on chemical structures. Taught with BCHE 451.

Prerequisite(s): 'C' or better in CHEM 431 or CHEM 433 or BCHE 542.

BCHE 649. Topics in Biochemistry**1-3 Credits**

Selected topics of current interest designated by title and credit. May be repeated for a maximum of 3 credits.

BCHE 650. Advanced Seminar**1 Credit**

Discussion of biochemical research in progress that relates to a doctoral candidate's thesis research. Intended for students who have earned a master's degree or the equivalent and has made significant research progress for preparation of the doctoral dissertation. May be repeated for a maximum of 3 credits.

BCHE 700. Doctoral Dissertation**20 Credits**

May be repeated for a maximum of 20 credits. Graded PR/U. Same as CHEM 700.

CHEM 100. Basic Chemistry**3 Credits**

For students whose preparatory science or math training has been deficient. Does not meet the chemistry requirement in any curriculum.

Prerequisite: Enhanced ACT composite score of at least 18 or a grade of C or better in CCDM 114N.

CHEM 101. General Supplemental Instruction I**1 Credit**

Collaborative workshop for students in General Chemistry I. Course does not count toward departmental degree requirements. May be repeated for a maximum of 2 credits.

Corequisite: CHEM 111G.

CHEM 102. General Supplemental Instruction II**1 Credit**

Collaborative workshop for students in General Chemistry II. Course does not count toward departmental degree requirements. May be repeated for a maximum of 2 credits.

Corequisite: CHEM 112G.

CHEM 103. Principles of Supplemental Instruction III**1 Credit**

Collaborative workshop for students in CHEM 110G, Principles and Applications of Chemistry. Course does not count toward departmental degree requirements. May be repeated for maximum of 2 credits.

Co-requisite: CHEM 110G.

CHEM 110G. Principles and Applications of Chemistry**4 Credits (3+3P)**

A survey of the properties and uses of the elements and their compounds. In addition to classical chemistry, attention is paid to the materials from which consumer products are made, to the production of energy, and to environmental considerations.

Prerequisite: 3 years of high school math or CCDM 114N.

CHEM 111G. General Chemistry I**4 Credits (3+3P)**

Descriptive and theoretical chemistry. CHEM 111G/112G are General Education alternative to CHEM 110G.

Prerequisite: (1) grade of C or better in MATH 120 or a Mathematics Placement Exam Score adequate to enroll in mathematics courses beyond MATH 120; and (2) one of the following: B or better in a second semester high school chemistry course, or grade of at least C in CHEM 100, or an enhanced ACT score of at least 22.

CHEM 112G. General Chemistry II**4 Credits (3+3P)**

Descriptive and theoretical chemistry. CHEM 111G/112G are General Education alternative to CHEM 110G.

Prerequisite(s): CHEM 111G.

CHEM 115. Principles of Chemistry I**4 Credits (3+3P)**

Detailed introduction to analytical, inorganic and physical aspects of chemistry; both descriptive and theoretical explanations. Structured for chemistry and biochemistry majors but appropriate for other physical and life science students. CHEM 115/116 are General Education alternatives to CHEM 110G.

Prerequisite: Eligible to take MATH 190G and an ACT composite score of 22 or higher.

CHEM 116. Principles of Chemistry II**4 Credits (3+3P)**

Recommended for chemistry majors and other qualified students. CHEM 115/116 are General Education alternatives to CHEM 110G.

Prerequisites: grade of C or better in CHEM 115.

CHEM 210. Chemistry for the Allied Health Sciences**3 Credits**

Discussion and application of the established facts and concepts of general organic chemistry and biochemistry to acquire a molecular understanding of a variety of health related issues, from atmospheric ozone holes to human nutrition.

Prerequisite: CHEM 110G or CHEM 111G.

CHEM 211. Organic Chemistry**4 Credits (3+3P)**

A one-semester survey for students requiring a brief coverage of important classes of organic compounds.

Prerequisite: CHEM 112G or CHEM 114.

CHEM 217. General Chemistry III**3 Credits (2+3P)**

Quantitative aspects of general chemistry: solid state structure, equilibrium, thermodynamics, and kinetics. Required of chemical science majors who have taken CHEM 111G/112.

Prerequisite: CHEM 112G.

CHEM 241. Introduction to Research**1-3 Credits (3+9P)**

Techniques and procedures of chemical research. May be repeated for a maximum of 3 credits.

Prerequisites: 8 credits of chemistry and a 3.0 GPA in chemistry.

CHEM 242. Explorations in Chemistry**1 Credit**

Historical and current developments, careers in chemistry, computer applications and use of the library by chemists. To be completed before the end of the sophomore year. Graded S/U.

CHEM 251. Special Topics in Chemistry**1-6 Credits (1-6)**

Specific subjects in Chemistry. These subjects will be announced in the 'Schedule of Classes'. It may be repeated under different topics for a maximum of 12 credits.

CHEM 303. Organic Supplemental Instruction I**1 Credit**

Collaborative workshop for students in Organic Chemistry I. Course does not count toward departmental degree requirements. May be repeated for a maximum of 2 credits.

Corequisite: CHEM 313.

CHEM 304. Organic Supplemental Instruction II**1 Credit**

Collaborative workshop for students in Organic Chemistry II. Course does not count toward departmental degree requirements. May be repeated for a maximum of 2 credits.

Corequisite: CHEM 314.

CHEM 313. Organic Chemistry I**3 Credits**

Nomenclature, uses, basic reactions, and preparation methods of the most important classes of aliphatic and aromatic compounds.

Prerequisite: CHEM 112G or CHEM 116.

CHEM 314. Organic Chemistry II**3 Credits**

Nomenclature, uses, basic reactions, and preparation methods of the most important classes of aliphatic and aromatic compounds.

Prerequisite: C or better in CHEM 313.

CHEM 315. Organic Chemistry Laboratory**2 Credits**

Techniques, preparative and analytical methods in organic chemistry.

Prerequisite: C or better in CHEM 313 or consent of instructor.

Corequisite: CHEM 314.

CHEM 351. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

CHEM 356. Descriptive Inorganic Chemistry**3 Credits**

Occurrence and properties of the elements and the chemistry of their compounds.

Prerequisites: CHEM 112G and CHEM 116; and CHEM 211 or CHEM 313.

CHEM 357. Synthetic Inorganic Laboratory**2 Credits**

Explores synthesis and analysis of main group and transition metal inorganic compounds. Inorganic laboratory and spectroscopic techniques will be used.

Prerequisites: CHEM 356.

CHEM 360. General Geochemistry**3 Credits**

Same as GEOL 360.

CHEM 371. Analytical Chemistry**4 Credits (2+6P)**

The fundamentals of quantitative chemical analysis.

Prerequisite: CHEM 112G.

CHEM 422. Environmental Chemistry**3 Credits**

Chemistry of organic and metal ion pollutants in the environment and principles important to their remediation including bioremediation.

Restricted to: Main campus only. Crosslisted with: E S 422

Prerequisite(s): CHEM 112G and either CHEM 211 or CHEM 313.

CHEM 424. Soil Chemistry**3 Credits**

Same as SOIL/GEOL 424.

CHEM 431. Physical Chemistry**3 Credits**

Principles that govern the physical and chemical behavior of matter. May not be counted toward Bachelor of Science degree in Chemistry.

Prerequisite(s): CHEM 116 or CHEM 217; MATH 192G; PHYS 212 or PHYS 222G or PHYS 214 or PHYS 216G.

CHEM 431 H. Physical Chemistry Honors**3 Credits**

Same as CHEM 431. Additional work to be arranged.

Prerequisite(s): CHEM 116 or CHEM 217; MATH 192G; PHYS 212G or PHYS 222G or PHYS 214 or PHYS 216G.

CHEM 433. Physical Chemistry I**3 Credits**

Laws and theories underlying chemical phenomena.

Prerequisite(s): CHEM 116 or CHEM 217; MATH 192G; PHYS 214 or PHYS 216G, or consent of instructor.

CHEM 433 H. Physical Chemistry I Honors**3 Credits**

Same as CHEM 433. Additional work to be arranged.

Prerequisite(s): CHEM 116 or CHEM 217; MATH 192G; PHYS 214 or PHYS 216G, or consent of instructor.

CHEM 434. Physical Chemistry II**3 Credits**

Laws and theories underlying chemical phenomena.

Prerequisite: CHEM 302 or CHEM 433.

CHEM 435. Physical Chemistry Laboratory**2 Credits**

Prerequisite: concurrent registration in CHEM 434.

CHEM 441. Advanced Research**1-3 Credits (3+9P)**

Investigation of chemical problems and the development of special techniques. May be repeated for a maximum of 3 credits.

Prerequisites: consent of instructor, 16 credits of chemistry and 3.0 GPA in chemistry for nonmajors.

CHEM 443. Senior Seminar**1 Credit**

Discussions of current chemical research, impact of chemistry on society and/or ethics as applied to chemists. Each student will present a written and an oral report on an approved topic.

Prerequisite: CHEM 431 or CHEM 433.

CHEM 451. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

CHEM 455. Independent Studies**1-3 Credits**

Independent studies directed by consulting faculty.

Prerequisite: consent of instructor.

CHEM 456. Inorganic Structure and Bonding**3 Credits**

Theoretical principles and a systematic study of the periodic table.

Prerequisite: CHEM 356 or CHEM 431 or CHEM 433.

CHEM 466. Advanced Organic Chemistry**3 Credits**

Recent developments in synthesis and theoretical principles of organic chemistry.

Prerequisite: CHEM 314.

CHEM 466 H. Advanced Organic Chemistry Honors**3 Credits**

Same as CHEM 466. Additional work to be arranged.

CHEM 471. Instrumental Methods of Analysis**4 Credits (3+3P)**

Analytical techniques, including optical and procedures.

Prerequisites: CHEM 371 and either PHYS 212G or PHYS 216G.

CHEM 500. Seminar in Inorganic Chemistry**1 Credit**

Current topics. May be repeated.

CHEM 506. Atomic and Molecular Structure in Inorganic Chemistry**3 Credits**

Theories of ionic and molecular bonding.

CHEM 507. Chemistry of the Elements**3 Credits**

Discussion of the reactions and structures of inorganic compounds.

CHEM 508. Main Group Chemistry**3 Credits**

Chemistry, structure and bonding of main group elements are covered along with some spectroscopy.

CHEM 509. Transition Metal Chemistry**3 Credits**

The chemistry, bonding theory, spectroscopy and industrial applications of the transition metals will be covered.

CHEM 510. Seminar in Organic Chemistry**1 Credit**

Current topics. May be repeated.

CHEM 514. Organic Structure Determination**3 Credits**

Modern spectroscopic techniques for characterization of organic compounds.

CHEM 515. Modern Organic Chemistry**3 Credits**

Recent developments in synthesis and theoretical principles of organic chemistry.

CHEM 516. Physical Organic Chemistry**3 Credits**

Physical organic chemistry.

CHEM 517. Synthetic Organic Chemistry**3 Credits**

Synthetic methods in organic chemistry.

CHEM 520. Seminar in Analytical Chemistry**1 Credit**

Current topics. May be repeated.

CHEM 521. Chemical Instrumentation**3 Credits (2+3P)**

Theory and application of electronic devices to chemical analysis.

CHEM 526. Advanced Analytical Chemistry**3 Credits**

Equilibria, and the theories of gravimetric, volumetric, and instrumental analysis.

CHEM 527. Separations**3 Credits**

Covers the fundamentals of separation methods and relationships to modern analytical techniques such as gas chromatography and liquid chromatography.

CHEM 528. Electroanalytical Techniques**3 Credits**

Theory and application of modern electrochemical methods of analysis including voltammetry, amperometry, modern cyclic and pulse methods, and stripping analysis.

CHEM 529. Spectrochemical Analysis**3 Credits**

Fundamentals, instrumentation, and applications of spectrochemical analysis.

CHEM 530. Seminar in Physical Chemistry**1 Credit**

Current topics. May be repeated.

CHEM 536. Chemical Thermodynamics**3 Credits**

First, second, and third laws of thermodynamics, and the concepts, interrelations, and applications of thermodynamic state functions.

CHEM 537. Quantum Chemistry**3 Credits**

Fundamentals of quantum mechanics.

Prerequisite: consent of instructor.

CHEM 538. Chemical Kinetics**3 Credits**

Empirical analysis of rate measurements, collision theory, transition state theory, and chain reactions.

CHEM 539. Spectroscopy**3 Credits**

Molecular spectroscopy for physical chemistry. Quantum mechanics applied to spectroscopy of polyatomic molecules: UV-VIs, IR, magnetic resonance. CHEM 537 desired but not required. **Prerequisite:** consent of instructor.

Prerequisite: consent of instructor.

CHEM 550. Discussions in Inorganic Chemistry**1 Credit**

Current research problems in inorganic chemistry. May be repeated.
Graded S/U.

CHEM 560. Discussions in Organic Chemistry**1 Credit**

Current research problems in organic chemistry. May be repeated.
Graded S/U.

CHEM 570. Discussions in Analytical Chemistry**1 Credit**

Current research problems in analytical chemistry. May be repeated.
Graded S/U.

CHEM 580. Discussions in Physical Chemistry**1 Credit**

Current research problems in physical chemistry. May be repeated.
Graded S/U.

CHEM 598. Special Research Programs**1-3 Credits**

Individual investigations, either analytical or experimental. Graded S/U.

CHEM 599. Master's Thesis**15 Credits**

Thesis preparation.

CHEM 600. Research**1-15 Credits**

Course used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination.

CHEM 609. Topics in Inorganic Chemistry**1-3 Credits**

Selected topics of current interest designated by subtitle.

CHEM 619. Topics in Organic Chemistry**1-3 Credits**

Selected topics of current interest designated by subtitle.

CHEM 629. Advanced Topics in Analytical Chemistry**3 Credits**

Discussion of advanced topics in the field of analytical chemistry. May be repeated with different subtitles. Consent of instructor required.

CHEM 639. Topics in Physical Chemistry**1-3 Credits**

Selected topics of current interest designated by subtitle.

CHEM 650. Advanced Seminar**1 Credit**

Intended for students who have earned a master's degree or the equivalent. A discussion of current topics of interest in chemistry. May be repeated.

CHEM 700. Doctoral Dissertation**17 Credits**

Dissertation preparation.

BCHE 396	Biochemistry II	3
BCHE 397	Experimental Biochemistry Laboratory	3
BCHE 440	Biochemistry Seminar	1
BCHE 494	Biochemical Genetics Laboratory	3

Select one from the following: 6

CHEM 433 & CHEM 434	Physical Chemistry I and Physical Chemistry II	
CHEM 431 & CHEM 456	Physical Chemistry and Inorganic Structure and Bonding	
CHEM 431 & CHEM 356	Physical Chemistry and Descriptive Inorganic Chemistry	
CHEM 431 & BCHE 432	Physical Chemistry and Physical Biochemistry	

Select one from the following additional classes not used to fulfill another departmental requirement: 1-3

Biochemistry - Bachelor of Science

BCHE 432	Physical Biochemistry	
BCHE 446	Biochemistry III	
BCHE 451	Special Topics (by petition only)	
Electives		
Select sufficient electives to bring total credits to 120, including 48 upper division. ¹		40
Total Credits		115-120

¹

Biochemistry - Undergraduate Minor

Required Courses

BCHE 395	Biochemistry I	3
CHEM 111G	General Chemistry I	4
or CHEM 115	Principles of Chemistry I	
CHEM 112G	General Chemistry II	4
or CHEM 116	Principles of Chemistry II	
CHEM 313	Organic Chemistry I	3
CHEM 314	Organic Chemistry II	3
One additional Biochemistry (BCHE) course		1-3
Total Credits		18-20

The following (BCHE) courses do not count towards minor:

BCHE 341	Survey of Biochemistry	4
BCHE 440	Biochemistry Seminar	1

Toxicology and Supplemental Instruction (SI) courses are not accepted.

Courses provisionally allowed:

BCHE 441	Advanced Research in Biochemistry (3 credits maximum)	1-3
BCHE 451	Special Topics (by petition only)	1-3

Chemistry - Bachelor of Arts

The Bachelor of Arts curriculum is designed to provide flexibility with less depth in chemistry, physics, and mathematics. The program may be used by students planning extensive study in other areas and requires emphasis in a second field of study. Emphasis area credits cannot be used for Bachelor of Arts degree.

Requirements

Nondepartmental Requirements

MATH 191G	Calculus and Analytic Geometry I	4
MATH 192G	Calculus and Analytic Geometry II	4
Select one from the following:		6
PHYS 211G & PHYS 212G	General Physics I and General Physics II

CHEM 443	Senior Seminar	1
Additional Chemistry credits		3

Electives

Select sufficient electives to bring total credits to 120, including 48 upper-division. ²		51
Total Credits		117-120

¹ Nine credits must be upper-division. See advisor for approval.

² BCHE 341 Survey of Biochemistry or BCHE 395 Biochemistry I can be used for electives.

Chemistry - Bachelor of Science

Nondepartmental Requirements

MATH 191G	Calculus and Analytic Geometry I	4
MATH 192G	Calculus and Analytic Geometry II	4
MATH 291G	Calculus and Analytic Geometry III	3
PHYS 213	Mechanics	3
PHYS 213 L	Experimental Mechanics	1
PHYS 214	Electricity and Magnetism	3
PHYS 214 L	Electricity and Magnetism Laboratory	1
PHYS 315	Modern Physics	3
Select 3-4 credits from the following:		3-4

MATH 391	Vector Analysis	
MATH 392	Introduction to Ordinary Differential Equations	
C S 172	Computer Science I	
STAT 371	Statistics for Engineers and Scientists I	

Departmental Requirements

BCHE 395	Biochemistry I	3-4
or BCHE 341	Survey of Biochemistry	
Select one from the following:		8-11
CHEM 115 & CHEM 116	Principles of Chemistry I and Principles of Chemistry II	
CHEM 111G & CHEM 112G & CHEM 217	General Chemistry I and General Chemistry II and General Chemistry III	
CHEM 242	Explorations in Chemistry	1
CHEM 313	Organic Chemistry I	3
CHEM 314	Organic Chemistry II	3
CHEM 315	Organic Chemistry Laboratory	2

CHEM 356	Descriptive Inorganic Chemistry	3
CHEM 357	Synthetic Inorganic Laboratory	2
CHEM 371	Analytical Chemistry	4
CHEM 433	Physical Chemistry I	3
CHEM 434	Physical Chemistry II	3
CHEM 435	Physical Chemistry Laboratory	2
CHEM 443	Senior Seminar	1
CHEM 456	Inorganic Structure and Bonding	3
CHEM 471	Instrumental Methods of Analysis	4

Electives

Select sufficient electives to bring total credits to 120, including 48 upper-division. 45

Total Credits 115-120

Note: Students should work closely with their advisors and review carefully the prerequisites for and the sequential nature of courses required for the Bachelor of Science. There is no foreign language requirement for any baccalaureate degree from this department.

Chemistry - Doctor of Philosophy

A chemistry student who successfully completes the Ph.D. qualifying examination will begin writing the cumulative examinations, which constitute the written portion of the comprehensive examination. After completion of the qualifying exam, a doctoral committee is formed to assist the student in planning a program appropriate to his or her background and goals.

Chemistry - Master of Science

The core course work required of students entering with no previous graduate study in chemistry or biochemistry consists of basic core courses completed in one of the following options:

1. two courses chosen respectively from two of the five major areas represented in the department apart from a student's elected field of thesis research; or
2. one course chosen from the five major areas apart from the student's elected field of thesis research plus one graduate-level course in a discipline outside the Department of Chemistry and Biochemistry.

A master's candidate will plan an appropriate program of further study with his or her advisor and is also required to prepare a thesis. The thesis requirement may be waived upon application to the department head, after completion of the doctoral comprehensive examination requirements.

Chemistry - Undergraduate Minor

Required Courses

CHEM 111G	General Chemistry I	4
or CHEM 115	Principles of Chemistry I	
CHEM 112G	General Chemistry II	4
or CHEM 116	Principles of Chemistry II	
CHEM 211	Organic Chemistry	3-4
or CHEM 313	Organic Chemistry I	
CHEM 314	Organic Chemistry II	3

Additional Courses

Select sufficient additional upper division CHEM/BCHE credits to bring total upper division CHEM/BCHE credits to at least 9 from the following:

Physical/Analytical Chemistry Emphases

CHEM 356	Descriptive Inorganic Chemistry
CHEM 371	Analytical Chemistry
CHEM 431	Physical Chemistry

Biochemical Emphasis

CHEM 313	Organic Chemistry I
CHEM 314	Organic Chemistry II
BCHE 341	Survey of Biochemistry

Total Credits 17-18

The following courses do not count towards a minor in Chemistry:

CHEM 100	Basic Chemistry	3
CHEM 110G	Principles and Applications of Chemistry	4
CHEM 217	General Chemistry III	3
CHEM 241	Introduction to Research	1-3
CHEM 351	Special Topics	1-3
CHEM 443	Senior Seminar	1

No BCHE courses except BCHE 341

Supplemental instruction (SI) courses are not accepted.

Courses provisionally allowed:

CHEM 441	Advanced Research (3 credits maximum)	1-3
CHEM 451	Special Topics (by petition only)	1-3

Environmental Chemistry - Undergraduate Minor

Students must pass the courses listed below. Check the undergraduate catalog for prerequisites.

Required Courses¹

BIOL 477	Applied and Environmental Microbiology	4
C E 256	Environmental Engineering and Science	3
C E 355V	Technology and the Global Environment	3
C E 356	Fundamentals of Environmental Engineering	3
CHEM 111G	General Chemistry I	4
or CHEM 115	Principles of Chemistry I	
CHEM 112G	General Chemistry II	4
or CHEM 116	Principles of Chemistry II	
CHEM 211	Organic Chemistry	3-4
or CHEM 313	Organic Chemistry I	
CHEM 314	Organic Chemistry II	3
CHEM 315	Organic Chemistry Laboratory	2
CHEM 371	Analytical Chemistry	4
or CHEM 471	Instrumental Methods of Analysis	
CHEM 422	Environmental Chemistry	3
CHEM 424	Soil Chemistry	3
CHEM 451	Special Topics	1-3
I E 411	Occupational Safety	3

TOX 361	Basic Toxicology	3
Total Credits		46-49

¹ B.A. or B.S. majors in Chemistry or Biochemistry must pass an additional 9 credits from these courses; CHEM 451 Special Topics: as appropriate.

The following courses do not count toward a minor in Environmental Chemistry:

CHEM 100	Basic Chemistry	3
CHEM 110G	Principles and Applications of Chemistry	4

Supplemental instruction (SI) courses are not accepted.

Communication Studies

Undergraduate Program Information

The communication studies program is designed to enhance students' interpersonal skills, presentation skills and critical thinking skills. Thus the successful graduate should be able to work effectively with people, assimilate, organize and analyze information, solve problems, make effective presentations and show potential for leadership. The program prepares students for careers in several professions, such as training and development, public relations, law, advertising and sales, government service, mediation, customer relations, human resources, international service, fundraising and the ministry.

Graduate Program Information

The Master of Arts in Communication Studies provides students with a social scientific approach to the study of human interaction, using quantitative and qualitative methods. Our curriculum is designed to explore how oral communication takes place interpersonally, within organizations, within our political system, and between and within cultures. Students take courses in interpersonal communication, organizational communication, political communication and/or cultural communication. All graduate students take courses in communication theory and research methods. In addition, students can take courses in topic areas such as conflict management, small group communication, persuasion and nonverbal communication.

The program offers a wide variety of courses allowing students an opportunity to select topics pursuant to their special interests. In addition to courses, students have the opportunity to obtain practical experience by participating in professional activities offered by the department; for example, graduate teaching assistantships, research and colloquia.

Degrees for the Department

Communication Studies - Bachelor of Arts (p. 239)

Communication Studies - Master of Arts (p. 239)

Minors for the Department

Communication and National Security - Undergraduate Minor (p. 239)

Communication and National Security - Graduate Minor (p. 238)

Communication Studies - Graduate Minor (p. 239)

Professor Kenneth L. Hacker, Department Head

Professor Hacker; **Professors** Hubbell, Flora, Associate Professors Morgan, Armfield; **Assistant Professors** Halliwell

K. Hacker, Department Head, Ph.D. (Oregon) – new media networking, political communication, national security communication; G. Armfield, Ph.D. (University of Missouri-Columbia) – organizational communication, communication and sports; J. Flora, Ph.D. (Kansas) – communication; A. Hubbell, Ph.D. (Michigan State) – organizational communication, health communication; E. Morgan, Ph.D. (University of Massachusetts-Amherst) – communication and culture, environmental communication; D. Halliwell, Ph.D. (University of Missouri) – interpersonal communication, communication and technology.

COMM 253G. Public Speaking

3 Credits

Principles of effective public speaking, with emphasis on preparing and delivering well-organized, logical, and persuasive arguments adapted to different audiences.

COMM 265G. Principles of Human Communication

3 Credits

Study and practice of interpersonal, small group, and presentational skills essential to effective social, business, and professional interaction.

COMM 285. Survey of Communication Theory

3 Credits

Exploration of major theories, concepts and methods of research in the study of human communication. Primarily for majors.

COMM 290. Independent Study

1-3 Credits

Individualized, self-paced projects for students with a special interest in communication topics. May be repeated for a maximum of 6 credits.

Prerequisites: COMM 265G and sophomore standing.

COMM 291. Special Topics

1-3 Credits

Specific subjects and credits to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

COMM 305. Communication Research Methods

3 Credits

Introductory course in communication research. Emphasis on how to be an effective consumer of research.

COMM 351. Persuasion Theory and Practice

3 Credits

Training in understanding and applying the principles and techniques of argumentation and persuasion.

COMM 370. Organizational Communication

3 Credits

Communication strategies and patterns of private and governmental organizations, including research on the communication process.

COMM 376. Communication and Culture

3 Credits

Cultural and intercultural communication theory and behavior, with a concentration on the development of specific communication skills which should facilitate effective intercultural communication.

COMM 384. Interpersonal Communication

3 Credits

Theories of interpersonal communication and relational communication including study of relevant models, contexts and constructs.

COMM 425. Small Group Communication**3 Credits**

Principles and methods of modern group discussion with emphasis on the role of the group in problem solving.

COMM 440. Political Communication**3 Credits**

Presidential and congressional campaigns, political persuasion techniques, political advertising, power in language, and media aspects of political information. Ideology, resistance to political manipulation, and dependence of democracies on communication.

COMM 450. Technologies of Human Communication**3 Credits**

Development and evolution of human communication technologies from prehistory through the future of computer-mediated communication networks. Examines behavioral, cognitive, social, cultural, and political issues of new communication technologies and their use and management.

Prerequisite: junior or senior standing.

COMM 455. Fundamentals of Communication and National Security**3 Credits**

This course addresses communication perspectives informing national security, strategic intelligence, and the intelligence process. Students will examine U.S. national security history, policy, the development of the Intelligence Community, and intelligence as processes of communication. This course serves as an introduction to national security studies.

COMM 456. Communication and the Intelligence Cycle**3 Credits**

The course addresses communication requirements and the technical, cognitive, and cultural complexity of the collaborative research environment. Students participate in novel, team-based problem scenarios that provide the foundation for acquiring advanced cognitive analytic methods and strategies. Students will engage in interdisciplinary information science processes and will develop and present analytic products responding to national security requirements.

COMM 457. Strategic Communication and Public Diplomacy**3 Credits**

This course covers history, theory, and research related to the use of communication to change attitudes in favor of U.S. national security interests. Students will examine the use of strategic communication and influence in diplomacy, intelligence, and military communities in terms of specific strategies, effects, and issues. Students will learn to distinguish public diplomacy, information operations, public affairs, and other forms of political communication that are used by the U.S. government to persuade target populations about American interests and goals. Topics include soft power, intelligence-based negotiation processes, and research methods used to identify influence techniques or groups that threaten U.S. national security.

COMM 458. Intercultural Communication and National Security**3 Credits**

This course provides a concentration on cultural factors in international affairs and conflicts, how culture affects perceptions of national interests, and the relationship of U.S. national security to understand the general and political cultures of other nations. Students will integrate cultural and intercultural communication theory and behavior, with an emphasis on the development of specific communication skills to facilitate developing cultural knowledge in government and political contexts. Students will learn how to study the cultural factors that affect international conflicts and how strategic communication should address such cultural factors.

COMM 460. Deception and Communication**3 Credits**

Deceptive communication including nonverbal indicators of lies, types of lies, and influence of relationships on lying behavior and interpretation.

COMM 462. Family Communication**3 Credits**

A communication perspective on traditional and nontraditional family configurations, roles, interaction patterns, and conflict. Includes an examination of media depictions of families and family interaction, as well as current social and political issues related to the family.

COMM 465. Nonverbal Communication**3 Credits**

Study of and experimentation with nonverbal aspects of human communication as vital components of the total communication process.

COMM 470. Leadership Communication**3 Credits**

Examination of traditional theories and concepts of leader-follower dynamics; presentation of cognitive, systems, and symbolic interpretative views of leadership with an emphasis on persuasion and motivation in leader-follower interactions.

COMM 471. Sports Communication**3 Credits**

This course provides a senior-level exploration of the role sports and sports communication plays in contemporary culture. Readings will examine the interrelationship between sports and media in society, the identities that fans assume when engaging in fandom and sports viewership, the pervasiveness of sports communication practices in the sports industry, the role of media in story telling, and the way cultural identifiers of class, ethnicity, and gender play out in the media. This is taught with COMM 571.

COMM 475. International Communication**3 Credits**

Exploration of the forms and channels of communication substantially influenced by international cultural and political factors. Covers: global communication technology; news, information and entertainment flows; international diplomacy and negotiation, communication in war and peace.

COMM 477. Environmental Communication**3 Credits**

Examines the link between communication and environment within the context of communication scholarship. Topics include sense of place, cultural approaches to interacting with environment as well as exploring current themes surrounding environment.

COMM 480. Health Communication**3 Credits**

Examination of central issues in communication theory and practice as applied to health care. Includes communication in health care organizations, media dissemination of health information, role of communication in disease prevention and health promotion, and symbolic meaning of illness within cultures.

COMM 484. Verbal Communication**3 Credits**

Examination of rules governing conversational structures such as speech acts, action sequences, topics and topic shifts. Also covers humor in conversation and conversational control.

COMM 485. International Teaching Assistant Development**3 Credits**

International teaching assistants will receive instruction in communicative skills to enable them to meet their responsibilities at NMSU. Course includes lectures, seminars, video-taped presentations, and tutorial sessions emphasizing pedagogic and presentation skills and styles.

Prerequisite: consent of instructor.

COMM 490. Independent Study**1-3 Credits**

Individualized, self-paced projects for advanced students. May be repeated for a maximum of 6 credits.

Prerequisites: COMM 265G and junior standing with consent of participating instructor.

COMM 491. Selected Topics**1-6 Credits**

Individual and/or group study of selected topics. To be identified by subtitle. May be repeated for a maximum of 12 credits.

Prerequisite: prior arrangement with faculty supervisor(s).

COMM 495. Communication Internship**3 Credits**

Internship opportunity to apply what has been learned to a real-world situation. May be repeated for a maximum of 6 credits. Restricted to majors.

Prerequisite: junior standing and 3.0 GPA in major.

COMM 505. Research Methods**3 Credits**

Seminar in the quantitative study of human communication phenomena, research design, and statistical analysis.

COMM 506. Qualitative Research Methods in Communication**3 Credits**

Survey of qualitative research methods in the study of human communication, including historical and critical approaches, interviewing, participant-observation, and communication ethnography. Students apply methods to their own research.

COMM 540. Seminar in Political communication**3 Credits**

Political communication theory, research, and issues. Empirical studies of campaigns, movements, news media, voter decision-making, political participation, socialization, and knowledge. Political theory, field research, communication science findings and research methods.

COMM 545. Seminar in Ethicism, Racism, and Communication**3 Credits**

Course focuses on theories and research concerning the social, cognitive, and communication aspects of ethnic and racial prejudice. Specific psychological and communication processes of person and group categorization are explored along with findings about the effects of ethnic prejudice on everyday communication (and vice versa).

COMM 550. Seminar in Communication Technologies**3 Credits**

Seminar on design, usage, and social impact of electronic mail, communication through computer networks, and new technologies of organizational communication such as group decision support systems (GDSS). Each student will study an actual application of a major communication technology in an organization.

COMM 551. Seminar in Persuasion**3 Credits**

Work with an actual persuasion campaign, such as public information, political, or commercial marketing campaigns. Includes case studies of large-scale persuasion efforts, current theoretical models of persuasion processes, and methods for studying, evaluating, and refining messages for optimal effects.

Prerequisite: COMM 351 or consent of instructor.

COMM 555. Seminar Fundamentals of Communication and National Security**3 Credits**

This seminar course addresses communication perspectives informing national security, strategic intelligence, and the intelligence process. Students will examine U.S. national security history, policy, the development of the Intelligence Community, and intelligence as processes of communication. This course serves as an introduction to national security studies. Graduate students are required to fulfill advanced research and presentation requirements.

COMM 556. Seminar Communication and the Intelligence Cycle**3 Credits**

This seminar course addresses communication requirements and the technical, cognitive, and cultural complexity of the collaborative research environment. Students participate in novel, team-based problem scenarios that provide the foundation for acquiring advanced cognitive analytic methods and strategies. Students will engage in interdisciplinary information science processes and will develop and present analytic products responding to national security requirements. Graduate students will be required to fulfill advanced research and presentation requirements.

COMM 557. Seminar Strategic Communication and Public Diplomacy**3 Credits**

The seminar course covers history, theory, and research related to the use of communication to change attitudes in favor of U.S. security interests. Students will examine the use of strategic communication and influence in diplomacy, intelligence, and military communities in terms of specific strategies, effects, and issues. Students will learn to distinguish public diplomacy, information operations, public affairs, and other forms of political communication that are by the U.S. government to persuade target populations about American interests and goals. Topics include soft power, intelligence-based negotiation processes, and research methods used to identify influence techniques of groups that threaten U.S. national security. Graduate students will be required to fulfill advanced research and presentation requirements.

COMM 558. Seminar Intercultural Communication and National Security
3 Credits

The seminar course provides a concentration on cultural factors in international affairs and conflicts, how culture affects perceptions of national interests, and the relationship of U.S. national security to understand the general and political cultures of other nations. Students will integrate cultural and intercultural communication theory and behavior, with an emphasis on the development of specific communication skills to facilitate developing cultural knowledge in government and political contexts. Students will learn how to study the cultural factors that affect international conflicts and how strategic communication should address such cultural factors. Graduate students will be required to fulfill advanced research and presentation requirements.

COMM 562. Seminar in Family Communication
3 Credits

This course examines cutting edge research on family communication, as well as classic theories and research findings that have influenced and revolutionized the way scholars conceptualize family interaction. Topics include basic family communication processes, communication in family subsystems, communication during family stress, and the role of family interaction in health and well-being. Students will explore how family relationships are built, maintained, and destroyed by communication as well as the potentially important and long lasting effects of family relationships on individuals.

COMM 565. Seminar in Nonverbal Communication
3 Credits

This course focuses on human physical behaviors as the basis of communication between persons. This physical behavior includes such variables as the voice, face, eyes, posture, gesture, space, territory, clothing, and touch. The content of the course considers the individual and social factors affecting the production of such behaviors, and the effects of such behaviors on others' attitudes, perceptions, cognitions, and relationships. Applications of research and theory in nonverbal communication to infant development, personality, sex differences, marital satisfaction, relationship development, culture, aging, and brain functioning are also studied throughout the course.

COMM 570. Seminar in Organizational Communication
3 Credits

Communication strategies and patterns of private and governmental organizations, including research on communication systems.

COMM 571. Seminar in Sports Communication
3 Credits

This seminar provides a graduate-level exploration of the role sports and sports communication plays in contemporary culture. Readings will examine the interrelationship between sports and media in society, the identities that fans assume when engaging in fandom and sports viewership, the pervasiveness of sports communication practices in the sports industry, the role of media in story telling, and the way cultural identifiers of class, ethnicity, and gender play out in the media. This is taught with COMM 471.

COMM 576. Seminar on Communication and Culture
3 Credits

Cultural and intercultural communication theory and research. Focuses on discovering and describing distinctive ways of speaking within and between cultures.

COMM 583. Seminar in Theories of Communication
3 Credits

Communication systems, symbolic processes, analysis of messages.

COMM 584. Seminar in Interpersonal Communication
3 Credits

Theories of interpersonal communication and communication within a relationship, including study of relevant models, contexts, and constructs.

COMM 590. Independent Study
1-6 Credits

Individualized, self-paced projects.

Prerequisite: consent of instructor.

COMM 591. Special Topics
1-9 Credits

Individual and/or group study of special topics. To be identified by subtitle.

Prerequisite: prior arrangement with faculty supervisor(s).

COMM 595. Communication Internship for Graduate Students
3 Credits

Internship opportunity to apply what students have learned to the real world. Restricted to majors.

Prerequisite: 9 credits of M.A. degree.

COMM 599. Master's Thesis
15 Credits

Thesis.

Office Location:

Phone: (575) 646-2801

Website: <https://commstudies.nmsu.edu/>

Communication and National Security - Graduate Minor

This minor is aimed at graduate students who seek employment in national security, intelligence, international business, military affairs in other nations, and other positions which require knowledge of how communication affects the national image of the United States and how Americans communicate with members of other cultures about political matters. Graduate students will be required to write a special analysis for each course that is not required of the undergraduate students. Each graduate student will also be required to present a one-hour lecture on an area of research specialization.

Requirements

Students will take three of four courses below plus one outside course approved by the department. The list below is our expected course rotation.

Requirements	
Select three from the following:	
COMM 555	Seminar Fundamentals of Communication and National Security
COMM 556	Seminar Communication and the Intelligence Cycle
COMM 557	Seminar Strategic Communication and Public Diplomacy
COMM 558	Seminar Intercultural Communication and National Security

Other Departments

Select one from the following: ¹		3
GEOG 501	Research Design and History of Geographic Thought ²	
GOVT 562	Advanced Issues in Security and Intelligence Studies	
HIST 561	Islam and the West: Cultural Contacts, Conflicts and Exchanges ³	
SOC 489	Globalization	
Total Credits		12

¹ The courses from other departments can include special topics courses or related courses relevant to this minor, as well as regular courses such as the ones listed.

² Should focus research project on national security.

³ Pre-requisites or co-requisites include HIST 221G Islamic Civilizations to 1800 or HIST 222G Islamic Civilizations since 1800.

Communication and National Security - Undergraduate Minor

A minor in Communication and National Security consists of 18 credits, 12 credits of required courses and 6 credits of electives. All courses must be completed with grades of "C-" or better.

Required Courses

COMM 455	Fundamentals of Communication and National Security	3
COMM 456	Communication and the Intelligence Cycle	3
COMM 457	Strategic Communication and Public Diplomacy	3
COMM 458	Intercultural Communication and National Security	3

Additional Courses

Select two from the following:		6
GEOG 281	Map Use: Reading, Analysis and Interpretation	
GEOG 363V	Cultural Geography	
GOVT 364	National Security Policy	
SOC 362	Urban Society in a Global World: Problems, Prospects, and Promises	
SOC 489	Globalization	
Total Credits		18

Note: If any of the above courses are not available the department will consider course substitutions.

Communication Studies - Bachelor of Arts

In addition to completing the general education requirements of the university and the college, students majoring in communication studies are required to complete 21 credits of core COMM courses and 15 credits of COMM electives for a total of 36 credits. Any exception to these policies requires department head approval.

All COMM courses must be completed with a grade of C- or better.

Requirements

General Education Requirements ¹		36
Viewing a Wider World Requirements ²		6
Core Courses		21
COMM 265G	Principles of Human Communication	
COMM 285	Survey of Communication Theory	
COMM 305	Communication Research Methods	
COMM 351	Persuasion Theory and Practice	
COMM 370	Organizational Communication	
COMM 376	Communication and Culture	
COMM 384	Interpersonal Communication	
Second Language Requirement ³		
Departmental Elective Courses		
Select an additional 15 credits from COMM to reach a total of 36 credits.		15
General Electives to bring total to 120		42
Total Credits		120

¹ For Information regarding the General Education Course Requirements see the General Education Courses (p. 47) section of the catalog.

² For information on the Viewing a Wider World Requirements, see the General Education Courses (p. 47) section of the catalog

³ Students seeking the BA in Communication Studies must meet the second language requirement. Take two years of a second language or complete the second language through the 212 or 214 level as indicated in Section III of the College Degree Requirement (p. 176) section.

Communication Studies - Graduate Minor

Students who wish to take a minor in Communication Studies will need to accumulate a minimum of 9 graduate credits in Communication Studies courses. Students are encouraged to contact the Communication Studies Department Chair for directions in the selection of courses.

Communication Studies - Master of Arts

The department offers both thesis and non-thesis options in its Masters of Arts program. Both options require a minimum of 36 credits, which includes not only Communication courses but courses from outside the department. The thesis option requires at least 30 credits of coursework, 3-6 credits of thesis (COMM 599 Master's Thesis), and an oral defense of the thesis and coursework. The non-thesis option requires 36 credits of coursework, plus a comprehensive written examination, followed by an oral defense. Both options require a minimum of 30 credit hours of Communication courses.

Select 15 credits from Communication Studies Electives for the Thesis Option. Take 15 credits plus 6 credits from related disciplines for the Non-Thesis Option. Two courses (6 credits) for courses that have numbers

450+ can be counted. For either the Thesis or the Non-Thesis option, a total of 36 credits is required.

Degree Requirements

COMM 505	Research Methods	3
----------	------------------	---

COMM 583	Seminar in Theories of Communication	3
----------	--------------------------------------	---

Select three from the following:		9
----------------------------------	--	---

COMM 540	Seminar in Political communication	
----------	------------------------------------	--

COMM 570	Seminar in Organizational Communication	
----------	---	--

COMM 576	Seminar on Communication and Culture	
----------	--------------------------------------	--

COMM 584	Seminar in Interpersonal Communication	
----------	--	--

COMM Electives

Select 15 credits from Electives in Related Fields, 3-6 credits from (graduate levels; numbered 450+).	15
--	----

Thesis or Non-Thesis Options

Select one from the following:	3-6
--------------------------------	-----

Thesis Option: Select 3-6 credits from COMM 599.

Non-thesis Option: Select 3-6 credits from Additional Graduate COMM Electives.

Total Credits	33-36
---------------	-------

A GPA of 3.0 or better must be maintained overall and grades in each course must be a B- or better.

Entrance Requirements for Graduate Study in Communication Studies

The Graduate Record Exam (GRE) General Test is not required for admission; however, high GRE scores will strengthen a candidate's application and are highly regarded in the awarding of Graduate Assistantships. Students wishing to enroll in the Master program in Communication Studies must meet the following criteria:

1. Hold a BA or BS degree, from an accredited institution of higher learning; Social Science disciplines are preferred
2. Hold a minimum grade point average of 3.25

To apply for an graduate study in our department, please submit the following application materials:

- Three very positive letters of recommendation
- Current Vitae/Resume
- 750 word statement of intent
- A sample of scholarly writing

If you seek to have a graduate teaching assistantship, please indicate so with your application letter. Such positions are competitive.

Communication Studies - Undergraduate Minor

A minor in Communication Studies consists of 18 credits; at least 9 of those credits must be in courses numbered 300 or above. All courses must be completed with grades of C- or better.

Required Course

COMM 265G	Principles of Human Communication	3
-----------	-----------------------------------	---

Additional Courses

Select two from the following:	6
--------------------------------	---

COMM 370	Organizational Communication	
----------	------------------------------	--

COMM 376	Communication and Culture	
----------	---------------------------	--

COMM 384	Interpersonal Communication	
----------	-----------------------------	--

Select 9 credits from the following:	9
--------------------------------------	---

COMM 253G	Public Speaking	
-----------	-----------------	--

COMM 285	Survey of Communication Theory	
----------	--------------------------------	--

COMM 305	Communication Research Methods	
----------	--------------------------------	--

COMM 351	Persuasion Theory and Practice	
----------	--------------------------------	--

COMM 425	Small Group Communication	
----------	---------------------------	--

COMM 440	Political Communication	
----------	-------------------------	--

COMM 450	Technologies of Human Communication	
----------	-------------------------------------	--

COMM 465	Nonverbal Communication	
----------	-------------------------	--

COMM 470	Leadership Communication	
----------	--------------------------	--

COMM 475	International Communication	
----------	-----------------------------	--

COMM 480	Health Communication	
----------	----------------------	--

COMM 490	Independent Study	
----------	-------------------	--

COMM 491	Selected Topics	
----------	-----------------	--

Total Credits	18
---------------	----

Computer Science

Computer Science is the area of study that encompasses all of the theory and practice of computing. The mission of the Department of Computer Science at New Mexico State University is to provide formal education in the core disciplines of computer science, as well as to prepare our graduates for research, development and academic careers. For more information on the Department of Computer Science, please visit the web site www.cs.nmsu.edu (<https://www.cs.nmsu.edu/wp13>).

Undergraduate Program Information

The undergraduate computer science programs prepare students for graduate study in computer science and for employment in positions involving the design, construction and application of computer systems. Undergraduate degree programs include a Bachelor of Science (ABET accredited), Bachelor of Arts, and four minor degree tracks. The B.S. degree is the traditional computer science degree program, while the B.A. degree offers a more open, flexible degree plan that is easier to combine with studies in other disciplines. The minors offer specialized tracks in algorithm theory, bioinformatics, computer systems and software development. With technology underpinning almost every area of human endeavor today, students across NMSU should consider pursuing a minor or at least taking some computer science courses. Computer science majors should review their programs of study in consultation with their advisors each semester, preferably using the most recent Undergraduate Catalog.

Graduate Program Information

The department offers both Master of Science and Doctor of Philosophy graduate degrees in computer science, along with a Master of Science in Bioinformatics. We also encourage students in other disciplines to do a graduate minor in computer science. Graduate students typically work closely with a faculty member in a specific area of research. The department offers expertise in several research areas, such as: artificial intelligence and knowledge representation; computer and wireless networks; data mining and machine learning; game design and human-computer interaction; bioinformatics; high performance computing;

software engineering and programming languages; theory of computing; and assistive technologies.

A number of laboratories have been established to coordinate research activities, including

- the Knowledge representation, Logic and Advanced Programming (KLAP) lab,
- the Play and Interactive Experiences for Learning (PiXL) lab,
- the Knowledge Discovery and Data Mining (KDD) lab,
- the Data Storage Lab (DSL),
- the Programming Languages, Environments, and Automated Software Engineering (PLEASE) lab,
- the Bioinformatics Research lab; and
- the Network and Systems Optimization Lab (NSOL).

Department members are also directing the iCREDITS interdisciplinary Center of Research Excellence in Design of Intelligent Technologies for Smartgrids, offering educational and research opportunities in smartgrids.

Entrance Requirements for Graduate Study in Computer Science

The Graduate Record Exam (GRE) General Test is not required for admission; however, high GRE scores will strengthen a candidate's application and are highly regarded in the awarding of Graduate Assistantships. To be admitted without undergraduate deficiencies, an entering student must have completed undergraduate preparation substantially equivalent to that required for the Bachelor of Science degree in Computer Science at New Mexico State University; in particular, this includes courses equivalent to

C S 172	Computer Science I	4
C S 271	Object Oriented Programming	4
C S 272	Introduction to Data Structures	4
C S 273	Machine Programming and Organization	4
C S 278	Discrete Mathematics for Computer Science	4
C S 370	Compilers and Automata Theory	4
C S 371	Software Development	4
C S 372	Data Structures and Algorithms	4
C S 471	Programming Language Structure I	3
C S 473	Architectural Concepts I	3
C S 474	Operating Systems I	3

Deficiencies should be satisfied as early in the student graduate program as possible, through the regular undergraduate courses, the C S 460 - C S 469 transition courses, or through tests administered by faculty members in the relevant areas. Students should consult with their Graduate Advisor to address issues related to deficiencies. Deficiencies are also assigned to applicants whose transcripts denote low grades in selected areas. Admission is often denied to candidates with little background in Computer Science. Instructions for prospective applicants can be found at <http://www.cs.nmsu.edu>.

Entrance Requirements for Graduate Study in Bioinformatics

The Graduate Record Exam (GRE) General Test is not required for admission; however, high GRE scores will strengthen a candidate's

application and are highly regarded in the awarding of Graduate Assistantships. Students wishing to enroll in the Master program in Bioinformatics must meet the following criteria:

1. Hold a BS degree, from an accredited institution of higher learning, in either a computational field (e.g., Computer Science) or in life sciences (preferably Biology, Biochemistry, or Environmental Sciences)
2. Hold a minimum grade point average of 3.2

Applicants will be expected to provide a Career statement, motivating the interest in bioinformatics and a minimum of three letters of reference.

Graduate Assistantships

Graduate assistantships (in the form of Teaching and Research assistantships) are expected to be available during the academic year. Inquiries should be addressed to the departmental Graduate Committee. Research assistantships are available at the discretion of individual research project leaders in the Department or elsewhere on campus. Submitting detailed vitae, letters of reference, and GRE test scores are encouraged when applying for any assistantship.

Degrees for the Department

Computer Science - Bachelor of Arts (p. 249)

Computer Science - Bachelor of Science (p. 251)

Computer Science - Bachelor of Science/Master of Science (p. 253)

Bioinformatics - Master of Science (p. 248)

Computer Science - Master of Science (p. 255)

Computer Science - Doctor of Philosophy (p. 254)

Minors for the Department

A student cannot earn more than one of the undergraduate minors unless they pass at least 6 credits in the second minor beyond the requirements of the first minor. The maximum number of undergraduate minors that a student may earn is two. Most courses for the minors listed below have prerequisites. Please check the undergraduate catalog for individual course prerequisites. Students interested in pursuing a computer science minor are encouraged to pick up more information at the departmental office.

Algorithm Theory - Undergraduate Minor (p. 248)

Bioinformatics - Undergraduate Minor (p. 249)

Computer Systems - Undergraduate Minor (p. 256)

Software Development - Undergraduate Minor (p. 256)

Computer Science - Graduate Minor (p. 255)

Faculty

Professor Jonathan Cook, Interim Department Head

Professors Cook, Leung, Pontelli, Tran; **Associate Professors** Misra, Pivkina, Song; **Assistant Professors** Cao, Toups, Yeoh, Zheng; **College Professors** Cooper, Steiner

J. Cook, Interim Department Head, Ph.D. (Colorado)– software engineering, component-based systems; H. Cao, Ph.D. (Hong-Kong)– data mining,

databases, data integration; H. Leung, Ph.D. (Penn State)– automata theory; S. Misra, Ph.D. (Arizona State)– communication networks, social networks, high performance computing, security and privacy; I. Pivkina, Ph.D. (Kentucky)– artificial intelligence, computer science education, data mining; E. Pontelli, Ph.D. (New Mexico State)– parallel processing, logic programming, knowledge representation, bioinformatics, assistive technologies; M. Song, Ph.D. (Washington)– statistical computing, systems biology, bioinformatics, computer vision; Z. Touns, Ph.D. (Texas A&M)– digital games, human-computer interaction, mixed reality; C. Tran, Ph.D. (Texas-El Paso)– artificial intelligence, knowledge representation, planning, logic programming, non-monotonic reasoning; W. Yeoh, Ph.D. (Southern California)– artificial intelligence, heuristic search, distributed constraint reasoning; M. Zheng, Ph.D. (Ohio State)– computer systems, storage and file systems, parallel and distributed systems

Support Faculty:

S. Cooper, Ph.D. (New Mexico State)– computer networks; E. Steiner, Ph.D. (Oklahoma State)– computer science education

Courses

C S 110. Computer Literacy

3 Credits

This course provides a broad introduction to computing, including computer and information technology concepts; economic and social implications of technology; database management, spreadsheet, word processing, and presentation applications.

C S 111. Computer Science Principles

4 Credits (3+2P)

This course provides a broad and exciting introduction to the field of computer science and the impact that computation has today on every aspect of life. It focuses on exploring computing as a creative activity and investigates the key foundations of computing: abstraction, data, algorithms, and programming. It looks into how connectivity and the Internet have revolutionized computing and demonstrates the global impact that computing has achieved, and it reveals how a new student in computer science might become part of the computing future.

Prerequisite(s): MATH 120 or higher.

C S 117. Introduction to Computer Animation

3 Credits

Introductory course for learning to program with computer animation as well as learning basic concepts in computer science. Students create interactive animation projects such as computer games and learn to use software packages for creating animations in small virtual worlds using 3D models. Recommended for students considering a minor/major in computer science or simply interested in beginning computer animation or programming.

C S 150. C Programming

3 Credits (2+2P)

Programming in the C language. May be repeated up to 3 credits.

Prerequisite(s): MATH 120 or higher.

C S 151. C++ Programming

3 Credits (2+2P)

Introduction to object-oriented programming in the C++ language. May be repeated up to 3 credits.

Prerequisite(s): MATH 120 or higher.

C S 152. Java Programming

3 Credits (2+2P)

Programming in the Java language. May be repeated up to 3 credits.

Prerequisite(s): MATH 120 or higher.

C S 153. Python Programming I

3 Credits

This course is an introduction to programming in the Python language, covering fundamental scripts, data types and variables, functions, and simple object creation and usage. The focus will be on preparing students to use Python in their own areas. No prior programming experience is required.

Prerequisite(s): MATH 120 or higher.

C S 154. Python Programming II

3 Credits

This course covers advanced Python programming, including classes, objects, and inheritance, embedded programming in domain applications, database interaction, and advanced data and text processing. The focus will be on preparing students to use Python in their own areas.

Prerequisite(s): C S 153 or C S 453.

C S 155. Internet Programming I

3 Credits

This course is an introduction to programming for the Web in PHP and Javascript, covering fundamental web scripting ideas, CSS, data types and variables, functions, simple object creation and usage. Javascript usage will focus on dynamic page content. No prior programming experience is required, though a basic understanding of HTML will be assumed.

Prerequisite(s): MATH 120 and a basic understanding of HTML.

C S 156. Internet Programming II

3 Credits

This course covers advanced web scripting, including Javascript with AJAX, PHP integration with databases, object oriented features of PHP and Javascript, advanced CSS usage, and using web application frameworks.

Prerequisite(s): C S 155 or C S 455.

C S 157. Topics in Software Programming and Applications

3 Credits (2+2P)

Current topics in computer programming and software applications.

Topic announced in the Schedule of Classes. May be repeated if subtitle is different.

C S 158. R Programming I

3 Credits

This course is an introduction to data processing in the R language, covering fundamental script configuration, data types and data collections, R control structures, and basic creation of graphs and data visualizations. This course will not focus on the statistical capabilities of R, though some basic statistical computations will be used.

Prerequisite(s): MATH 121G.

C S 159. R PROGRAMMING II

3 Credits

This course covers advanced R programming, including advanced data collection processing, advanced data visualizations, object oriented features of R, and file processing. It is recommended that students have one statistics course before taking this course.

Prerequisite(s): C S 158 or C S 458.

C S 171G. Introduction to Computer Science**4 Credits (3+2P)**

Computers are now used widely in all area of modern life. This course provides understanding of the theoretical and practical foundations for how computers work, and provides practical application and programming experience in using computers to solve problems efficiently and effectively. The course covers broad aspects of the hardware, software, and mathematical basis of computers. Weekly labs stress using computers to investigate and report on data-intensive scientific problems. Practical experience in major software applications includes an introduction to programming, word processing, spreadsheets, databases, presentations, and Internet applications.

Prerequisite(s): MATH 210G or MATH 120 or higher.

C S 172. Computer Science I**4 Credits (3+2P)**

Computational problem solving; problem analysis; implementation of algorithms. Recursive structures and algorithms. Crosslisted with: C S 460.

Prerequisite(s): MATH 121G or higher; C S 111 or successful placement.

C S 209. Special Topics.**1-3 Credits**

May be repeated for a maximum of 12 credits.

C S 271. Object Oriented Programming**4 Credits (3+2P)**

Introduction to problem analysis and problem solving in the object-oriented paradigm. Practical introduction to implementing solutions in the C++ language. Hands-on experience with useful development tools.

Prerequisite(s): C- or better in C S 172 or E E 161.

C S 272. Introduction to Data Structures**4 Credits (3+2P)**

Design, implementation, use of fundamental abstract data types and their algorithms: lists, stacks, queues, deques, trees; imperative and declarative programming. Internal sorting; time and space efficiency of algorithms.

Prerequisite(s): At least a C- in C S 172, or placement.

C S 273. Machine Programming and Organization**4 Credits (3+2P)**

Computer structure, instruction execution, addressing techniques; programming in machine and assembly languages.

Prerequisite(s): At least a C- in C S 172 or E E 161.

C S 278. Discrete Mathematics for Computer Science**4 Credits (3+2P)**

Discrete mathematics required for Computer Science, including the basics of logic, number theory, methods of proof, sequences, mathematical induction, set theory, counting, and functions. Crosslisted with: MATH 278.

Prerequisite(s): At least C- in C S 172.

C S 343. Algorithm Design & Implementation**3 Credits**

Introduction to efficient data structure and algorithm design. Basic graph algorithms. Balanced search trees. Classic algorithm design paradigms: divide-and-conquer, greedy scheme, and dynamic programming.

Prerequisite(s): At least a C- in C S 272, or consent of instructor.

C S 370. Compilers and Automata Theory**4 Credits (3+2P)**

Methods, principles, and tools for programming language processor design; basics of formal language theory (finite automata, regular expressions, context-free grammars); development of compiler components.

Prerequisite(s): At least a C- in C S 271, C S 272, C S 273, and C S 278.

C S 371. Software Development**4 Credits (3+2P)**

Software specification, design, testing, maintenance, documentation; informal proof methods; team implementation of a large project.

Prerequisite(s): At least a C- in C S 271 and C S 272.

C S 372. Data Structures and Algorithms**4 Credits (3+2P)**

Introduction to efficient data structure and algorithm design. Order notation and asymptotic run-time of algorithms. Recurrence relations and solutions. Abstract data type dynamic set and red-black trees. Classic algorithm design paradigms: divide-and-conquer, dynamic programming, greedy algorithms.

Prerequisite(s): At least a C- in CS 272 and C S 278.

C S 375. Introduction to Intelligent Agents Using Science Fiction**3 Credits**

This course uses science-fiction movies to introduce fundamental principles and techniques in agents and multi-agent systems. It covers game theory, decision theory, machine learning, and distributed systems.

C S 409. Independent Study**1-6 Credits (1-6)**

Faculty supervised investigation, to culminate in a written report. May be repeated up to 6 credits.

Prerequisite(s): Written agreement with faculty supervisor.

C S 419. Computing Ethics and Social Implications of Computing**1 Credit**

An overview of ethics for computing majors includes: history of computing, intellectual property, privacy, ethical frameworks, professional ethical responsibilities, and risks of computer-based systems. S/U Grading (S/U, Audit).

Corequisite(s): C S 448 or C S 449.

C S 448. Senior Project**4 Credits**

Capstone course in which C S majors work in teams and apply computer science skills to complete a large project. Consent of Instructor required. Restricted to: C S majors.

Prerequisite(s): Senior standing.

Corequisite(s): C S 419.

C S 449. Senior Thesis**4 Credits**

Capstone course in which C S majors apply computer science skills to complete a research project, culminating in a written thesis report. Consent of Instructor required. Restricted to: C S majors.

Prerequisite(s): Consent of thesis adviser.

Corequisite(s): C S 419.

C S 450. C Programming**3 Credits (2+3P)**

Programming in the C language. More advanced than C S 150. Recommended for nonmajors only. May be repeated up to 3 credits.

Prerequisite(s): Graduate standing.

C S 451. C++ Programming**3 Credits**

Programming in the C language. More advanced than C S 151. Recommended for nonmajors only. May be repeated up to 3 credits.

Prerequisite(s): Graduate standing.

C S 452. Java Programming**3 Credits (2+2P)**

Programming in the Java language. More advanced than C S 152. Recommended for nonmajors only. May be repeated up to 3 credits.

Prerequisite(s): Graduate standing.

C S 453. PYTHON PROGRAMMING I**3 Credits**

This course is an introduction to programming in the Python language, covering fundamental scripts, data types and variables, functions, and simple object creation and usage. The focus will be on preparing students to use Python in their own areas. No prior programming experience is required. More advanced than C S 153.

Prerequisite(s): MATH 120 or higher.

C S 454. Python Programming II**3 Credits**

This course covers advanced Python programming, including classes, objects, and inheritance, embedded programming in domain applications, database interaction, and advanced data and text processing. The focus will be on preparing students to use Python in their own areas. For graduate students only. Has more advanced work than C S 154, and does not count towards CS major requirements.

Prerequisite(s): C S 153 or C S 453.

C S 455. Internet Programming I**3 Credits**

This course is an introduction to programming for the Web in PHP and Javascript, covering fundamental web scripting ideas, CSS, data types and variables, functions, simple object creation and usage. Javascript usage will focus on dynamic page content. No prior programming experience is required, though a basic understanding of HTML will be assumed. For graduate students only. Has more advanced work than C S 155. Does not count towards CS major requirements.

Prerequisite(s): MATH 120 and a basic understanding of HTML.

C S 456. Internet Programming II**3 Credits**

This course covers advanced web scripting, including Javascript with AJAX, PHP integration with databases, object oriented features of PHP and Javascript, advanced CSS usage, and using web application frameworks. For graduate students only. Has more advanced work than C S 156. Does not count towards CS major requirements.

Prerequisite(s): C S 155 or C S 455.

C S 457. Topics in Software Programming and Applications**3 Credits (2+2P)**

Current topics in computer programming and software applications. Topic announced in the Schedule of Classes. More advanced than C S 157. recommended for non-majors only. May be repeated if subtitle is different.

Prerequisite(s): Graduate standing.

C S 458. R Programming I**3 Credits**

This course is an introduction to data processing in the R language, covering fundamental script configuration, data types and data collections, R control structures, and basic creation of graphs and data visualizations. This course will not focus on the statistical capabilities of R, though some basic statistical computations will be used. For graduate students only. Has more advanced work than C S 158. Does not count towards CS major requirements.

Prerequisite(s): MATH 121G.

C S 459. R Programming II**3 Credits**

This course covers advanced R programming, including advanced data collection processing, advanced data visualizations, object oriented features of R, and file processing. It is recommended that students have one statistics course before taking this course. For graduate students only. Has more advanced work than C S 159, and does not count towards CS major requirements.

Prerequisite(s): C S 158 or C S 458.

C S 460. Computer Science I Transition**3 Credits**

Computational problem solving; problem analysis; implementation of algorithms. Recursive structures and algorithms. For C S graduate students only; cannot be used to meet a C S student's program of study. Taught with C S 172. Consent of Instructor required. Crosslisted with: C S 172.

C S 462. Object Oriented Programming Transition**3 Credits**

Introduction to problem analysis and problem solving in the object-oriented paradigm. Practical introduction to implementing solutions in the C++ language. Hands-on experience with useful development tools. Cannot be used in a C S student's program of study. Consent of Instructor required.

Prerequisite(s): At least a C- in C S 172 or C S 460 or consent of instructor.

C S 463. Introduction to Data Structures Transition**3 Credits**

Design, implementation, use of fundamental abstract data types and their algorithms: lists, stacks, queues, dequeues, trees; imperative and declarative programming. Internal sorting; time and space efficiency of algorithms. Cannot be used in a C S student's program of study. Consent of Instructor required.

Prerequisite(s): At least a C- in C S 172 or C S 460 or consent of instructor.

C S 464. Machine Programming and Organization Transition**3 Credits**

Computer structure, instruction execution, addressing techniques; programming in machine and assembly languages. Cannot be used in a C S student's program of study. Consent of Instructor required.

Prerequisite(s): At least a C- in C S 172 or C S 460 or consent of instructor.

C S 465. Discrete Math for Computer Science Transition**3 Credits**

Logical connectives, sets, functions, relations, graphics, trees, proofs, induction, and application to computer science. Cannot be used in a C S student's program of study. Consent of Instructor required.

Prerequisite(s): At least a C- in C S 172 or C S 460 or consent of instructor.

C S 466. Compilers and Automata Transition**3 Credits**

Methods, principles, and tools for programming language processor design; basics of formal language theory (finite automata, regular expressions, context-free grammars); development of compiler components. For C S graduate students only; cannot be used in a students program of study. Consent of instructor required.

Prerequisite(s): At least a C in C S 271 or C S 462, in C S 272 or C S 463, in C S 273 or C S 464, in C S 278 or C S 465, or consent of instructor.

C S 468. Software Development Transition**3 Credits**

Software specification, design, testing, maintenance, documentation; informal proof methods; team implementation of a large project. Cannot be used in a C S student's program of study. Consent of Instructor required.

Prerequisite(s): At least a C- in C S 271 or C S 462, in C S 272 or C S 463, or consent of instructor.

C S 469. Data Structure and Algorithms Transition**3 Credits**

Introduction to efficient data structure and algorithm design. Order notation and asymptotic run-time of algorithms. Recurrence relations and solutions. Abstract data type dynamic set and red-black trees. Classic algorithm design paradigms: divide-and-conquer, dynamic programming, greedy algorithms. Cannot be used in a C S student's program of study. Consent of Instructor required. Restricted to: C S majors.

Prerequisite(s): At least a C- in C S 272 or C S 463, in C S 278 or C S 465, or consent of instructor.

C S 471. Programming Language Structure I**3 Credits**

Syntax, semantics, implementation, and application of programming languages; abstract data types; concurrency. Not for C S graduate students.

Prerequisite(s): C- or better in C S 370 and C S 371.

C S 473. Architectural Concepts I**3 Credits**

Comparison of architectures to illustrate concepts of computer organization; relationships between architectural and software features. Not for C S graduate students.

Prerequisite(s): At least a C- in C S 273 and C S 370.

C S 474. Operating Systems I**3 Credits**

Operating system principles and structures, and interactions with architectures. Not for C S graduate students.

Prerequisite(s): At least a C- in C S 273, C S 371, and C S 372.

C S 475. Artificial Intelligence I**3 Credits**

Fundamental principles and techniques in artificial intelligence systems. Intelligent Agents; solving problems by searching; local search techniques; game-playing agents; constraint satisfaction problems; knowledge representation and reasoning. Further selected topics may also be covered. Not for C S graduate students.

Prerequisite(s): At least a C- in C S 272 and C S 278.

C S 476. Computer Graphics I**3 Credits**

Languages, programming, devices, and data structures for representation and interactive display of complex objects. Not for C S graduate students.

Prerequisite(s): At least C- in C S 370 or C S 371.

C S 477. Digital Game Design**3 Credits**

An introductory to digital game design. Topics include design, develop, and playtest games. The course is structured to use team-based learning. Not for C S graduate students.

Prerequisite(s)/Corequisite(s): C S 371 or consent of instructor.

C S 478. Computer Security**3 Credits**

Introduction to the art and science of computer security. Fundamentals of computer security including elementary cryptography, authentication and access control, security threats, attacks, detection and prevention in application software, operating systems, networks and databases.

Prerequisite(s): At least a C- in C S 273 or consent of instructor.

C S 479. Special Topics**1-6 Credits**

Topic announced in the Schedule of Classes. May be repeated if subtitle is different. Not for C S graduate students. May be repeated up to 6 credits.

C S 480. Linux System Administration**3 Credits**

Basic system administration for Linux environments. Topics include user managements, file systems, security, backups, system monitoring, kernel configuration and other relevant aspects of system administration. Not for Computer Science graduate students.

C S 481. Visual Programming**3 Credits**

Design and implementation of programs using visual (i.e. dataflow or diagrammatic) programming techniques, with an emphasis on real-time data processing. Students will learn how to design visual programs, including how to handle cycles and state maintenance, and will learn to process audio, video, and other data using visual programs. Not for C S graduate students.

Prerequisite(s): C- or better in C S 272 and C S 278.

C S 482. Database Management Systems I**3 Credits**

Database design and implementation; models of database management systems; privacy, security, protection, recovery. Not for C S graduate students.

Prerequisite(s): At least a C- in C S 272 and C S 278.

C S 483. Introduction to Robotics**3 Credits**

Basic AI-based robotic architecture and concepts, with an emphasis on building and programming mobile robots. Not for C S graduate students. Consent of Instructor required.

Prerequisite(s): At least a C- in C S 272 and C S 273.

C S 484. Computer Networks I**3 Credits**

Fundamental concepts of computer communication networks: layered network architecture, network components, protocol stack and service. Example of application, transport, network and data link layers, protocols primarily drawn from the Internet (TCP, UDP, and IP) protocol multimedia networks; network management and security. Not for C S graduate students. Consent of Instructor required.

Prerequisite(s): At least a C- in C S 272 and CS 273.

C S 485. User Interface Design**3 Credits**

Interface design, conceptual models formed by users, computer aided instruction, natural and query languages, graphical representations. Not for C S graduate students.

Prerequisite(s): At least C- in C S 371.

C S 486. Bioinformatics**3 Credits**

Introduction to bioinformatics and computational biology. Computational approaches to sequences analysis, protein structure prediction and analysis, and selected topics from current advances in bioinformatics. Not for C S graduate students.

Prerequisite(s): At least a C- in C S 272 and C S 278.

C S 488. Introduction to Data Mining**3 Credits**

Techniques for exploring large data sets and discovering patterns in them. Data mining concepts, metrics to measure its effectiveness. Methods in classification, clustering, frequent pattern analysis. Selected topics from current advances in data mining. Taught with C S 508.

Prerequisite(s): At least a C- in C S 272 and C S 278.

C S 489. Bioinformatics Programming**3 Credits**

Application of computer programming languages to address data processing and analysis problems in modern molecular biology. R/Perl/Python programming; Web API programming. Automatic manipulation of next generation sequence data, analysis of large gene expression tables, access to online biological databases, performing statistical analysis, and visualization of data and results. Taught with C S 509.

Prerequisite(s): At least a C- in C S 272 and C S 278.

C S 491. Parallel Programming**3 Credits**

Programming of shared memory and distributed memory machines; tools and languages for parallel programming; techniques for parallel programming; parallel programming environments. Not for C S graduate students.

Prerequisite(s): C- or better in C S 370 or consent of instructor.

C S 493. Algorithm Design and Implementation**3 Credits**

This course introduces the basic knowledge of designing classical algorithms and implementing these algorithms using a programming language. In particular, the course teaches various data structures, including graphs and balanced binary search trees, and efficient schemes to implement these data structures. This course also teaches basic algorithm design techniques including divide-and-conquer, greedy scheme, and dynamic programming. This course covers graph algorithms, including graph traversals (depth-first search and breadth-first search), connectivity, shortest paths, and minimum spanning trees. Restricted to: exclude C S majors.

Prerequisite(s): At least a C- in C S 272, or Consent of Instructor.

C S 494. Introduction to Smart Grids**3 Credits**

This course is an introduction to the technologies and design strategies associated with the Smart Grid. The emphasis will be on the development of communications, energy delivery, coordination mechanisms, and management tools to monitor transmission and distribution networks. Topics include: Smart grid introduction and evolution; Power systems; Networking and transport control; Artificial intelligence & agent coordination; Data mining for smart grids.

Prerequisite(s): At least a C- in C S 272 and a C- in E E 201 or 280; or Consent of instructor.

C S 502. Database Management Systems I**3 Credits**

Database design and implementation; models of database management systems; privacy, security, protection, recovery; requires more advanced graduate work than C S 482. Students are expected to have solid knowledge of data structures and discrete mathematics.

C S 503. Introduction to Robotics**3 Credits**

Basic AI-based robotic architectures and concepts, with an emphasis on building and programming mobile robots; requires more advanced graduate work than C S 483. Students are expected to have solid knowledge of data structures and machine-level programming.

C S 504. Computer Networks I**3 Credits**

Fundamental concepts of computer communication networks: layered network architecture, network components, protocol stack and service. Example of application, transport, network and data link layers, protocols primarily drawn from the Internet (TCP, UDP, and IP) protocol suite; local and wide area networks, wireless and mobile networks, multimedia networks; network management and security; requires more advanced graduate work than C S 484. Students are expected to have solid knowledge of data structures, machine-level programming. Knowledge of statistics (at the level of STAT 371 or 470) is recommended.

C S 505. Artificial Intelligence I**3 Credits**

Fundamental principles and techniques in artificial intelligence systems. Knowledge representation formalisms; heuristic problem solving techniques; automated logical deduction; robot planning methods; algorithmic techniques for natural language understanding, vision and learning; requires more advanced graduate work than C S 475. Students are expected to have strong knowledge of algorithms and data structures (at the level of C S 372).

C S 506. Computer Graphics I**3 Credits**

Languages, programming, devices, and data structures for representation and interactive display of complex objects. Requires more advanced graduate work than C S 476. Students are expected to have knowledge of compilers design and software engineering equivalent to CS 370 and CS 371.

C S 508. Introduction to Data Mining**3 Credits**

Techniques for exploring large data sets and discovering patterns in them. Data mining concepts, metrics to measure its effectiveness. Methods in classification, clustering, frequent pattern analysis. Selected topics from current advances in data mining. Students are expected to have a preparation in Discrete Mathematics and Data Structures equivalent to C S 272 and C S 278. Requires more advanced graduate work than C S 488. Crosslisted with: C S 488.

C S 509. Bioinformatics Programming**3 Credits**

Application of computer programming languages to address data processing and analysis problems in modern molecular biology. R/Perl/Python programming; Web API programming. Automatic manipulation of next generation sequence data, analysis of large gene expression tables, access to online biological databases, performing statistical analysis, and visualization of data and results. Requires a preparation in discrete mathematics and data structures equivalent to C S 272 and C S 278.

Taught with C S 489.

C S 510. Automata, Languages, Computability**3 Credits**

Regular and context-free languages, pushdown and finite-state automata, turing machines, models of computation, halting problems. Students are expected to have knowledge of compilers design and algorithms equivalent to C S 370 and C S 372.

C S 511. Logic and Constraint Logic Programming**3 Credits**

Declarative programming techniques; foundations of logic programming; programming in Prolog; constraint logic programming; application of logic and constraint programming; requires more advanced graduate work than C S 472. Students are expected to have knowledge of data structures and discrete mathematics equivalent to C S 272 and C S 278.

C S 512. Computer Systems Modeling and Simulation**3 Credits**

Basic concepts of modeling computer systems: continuous and discrete time models, states and transition, probabilistic models. Structures of simulation programs, time driven and event driven simulation, simulation on captured and synthetic traces, generation of random variables, queuing models, Markov chains, random walks, Poisson, Markov, renewal branching and Brownian motion processes, model validation and data analysis; requires more advanced graduate work than C S 492. Students are expected to have knowledge of algorithms and data structures equivalent to C S 372.

C S 513. Computer Security**3 Credits**

Introduction to the art and science of computer security. Fundamentals of computer security including elementary cryptography, authentication and access control, security threats, attacks, detection and prevention in application software, operating systems, networks and databases.

Prerequisite(s): At least a C in C S 273 or consent of instructor.

C S 514. Introduction to Smart Grids**3 Credits**

This course is an introduction to the technologies and design strategies associated with the Smart Grid. The emphasis will be on the development of communications, energy delivery, coordination mechanisms, and management tools to monitor transmission and distribution networks. Topics include: Smart grid introduction and evolution; Power systems; Networking and transport control; Artificial intelligence & agent coordination; Data mining for smart grids. Requires more advanced work than C S 494.

Prerequisite(s): At least a C- in C S 272 and a C- in E E 201 or 280; or Consent of instructor.

C S 515. User Interface Design**3 Credits**

Interface design, conceptual models formed by users, computer-aided instruction, natural and query languages, graphical representations; requires more advanced graduate work than C S 485. Students are expected to have knowledge of software engineering equivalent to C S 371.

C S 516. Bioinformatics**3 Credits**

Introduction to bioinformatics and computational biology. Computational approaches to sequences analysis, protein structure prediction and analysis, and selected topics from current advances in bioinformatics; requires more advanced graduate work than C S 486. Students are expected to have a knowledge of algorithms and data structures equivalent to C S 372 or exposure to Biology (equivalent to BIOL 221 or BIOL 311).

C S 517. Digital Game Design**3 Credits**

An introductory to digital game design. Topics include design, develop, and playtest games. The course is structured to use team-based learning.

C S 518. Visual Programming**3 Credits**

Design and implementation of languages using visual but nontextual means to specify programs. Required more advanced work than C S 481.

Prerequisite(s): at least a C in C S 272 and C S 278.

C S 521. Parallel Programming**3 Credits**

Programming of shared memory and distributed memory machines; tools and languages for parallel programming; parallelizing compilers; parallel programming environments; requires more advanced graduate work than C S 491. Students are expected to have knowledge of programming and machine organization equivalent to C S 271 and C S 273.

C S 560. Graph Theory**3 Credits**

Graph theoretic models in all areas of computer science including computer architectures, computation geometry, fault tolerance, databases. Includes connectivity, colorability, factorization, topological embeddings in surfaces, reconstruction, groups and matrices associated with graphs.

Prerequisite: consent of instructor.

C S 570. Analysis of Algorithms**3 Credits**

Techniques for design and analysis of algorithms; time and space complexity; proving correctness of programs. Particular algorithms such as sorting, searching, dynamic programming. NP complete problems. Students are expected to have knowledge of algorithms and data structures equivalent to C S 372.

C S 571. Programming Language Structure II**3 Credits**

Formal semantics of programming languages. Students are expected to have knowledge of algorithms and data structures equivalent to C S 372, and knowledge of principles of programming languages equivalent to C S 471.

C S 572. Advanced Algorithms**3 Credits**

Design, analysis, and use of important algorithms and data structures.

Prerequisite: C S 570 or consent of instructor.

C S 573. Architectural Concepts II**3 Credits**

Advanced topics related to computer architecture, guided by the current literature. Students are expected to have knowledge of computer architectures equivalent to C S 473 and of operating systems equivalent to C S 474. Crosslisted with: E E564.

C S 574. Operating Systems II**3 Credits**

Advanced topics related to operating system principles, guided by the current literature. Students are expected to have knowledge of computer architectures and operating systems equivalent to C S 473 and C S 474.

C S 575. Artificial Intelligence II**3 Credits**

Covers advanced theory and application of artificial intelligence. Concentration on several specific research areas, such as knowledge representation, problem solving, common-sense reasoning, natural language understanding, automated tutoring systems, learning systems. Students are expected to have knowledge of artificial intelligence equivalent to C S 475.

C S 579. Special Topics**1-6 Credits**

Topic announced in the Schedule of Classes.

C S 581. Advanced Software Engineering**3 Credits**

Advanced tools and methods for developing large software systems. Topics include object-oriented modeling and design, component architectures, templates and generic programming, software configuration and revision control, static and dynamic analysis tools, model, checking, advanced testing, and verification. Students are expected to have knowledge of software engineering equivalent to C S 371.

C S 582. Database Management Systems II**3 Credits**

Advanced data models and abstractions, dependencies, implementations, languages, database machines, and other advanced topics. Students are expected to have knowledge of data base management systems equivalent to CS 482.

C S 584. Computer Networks II**3 Credits**

Advanced topics in computer networks. Covers advanced topics in networking, with emphasis on wireless, and IP networks. Students are expected to have knowledge of computer networks equivalent to C S 484, and of statistics equivalent to STAT 371 or STAT 470.

C S 586. Algorithms in Systems Biology**3 Credits**

The course will introduce important algorithms and computational models used in systems biology to study molecular mechanisms for cellular dynamics, processes, and systems. Cellular processes, such as metabolism and signal transduction, are studied as systems and networks quantitatively from high throughput molecular measurements. The topics include molecular biological systems, network alignment, model simulation, network inference, model optimization, and hybrid models. Students will be able to construct models and analyze their properties in the context of molecular biological systems. Students are expected to have knowledge of algorithms and data structures equivalent to C S 372.

C S 589. Special Research Problems**1-6 Credits**

Faculty-supervised investigation, to culminate in a written report. May be repeated; maximum of 6 credits may be applied toward M.S. degree. Restricted to majors.

Prerequisite: written agreement with faculty supervisor.

C S 598. Master's Project**1-6 Credits**

Project-oriented capstone course to be completed by M.S. students under supervision of their advisor. Maximum of 6 credits may be applied toward M.S. degree. Restricted to C S majors.

Prerequisite: written agreement with instructor.

C S 599. Master's Thesis**1-6 Credits (1-6)**

Thesis to be developed by M.S. Students under supervision of their advisor. May be repeated for a maximum of 6 credits. Restricted to majors.

Prerequisite: consent of instructor.

C S 600. Pre-dissertation Research**1-15 Credits**

Pre-dissertation research.

C S 700. Doctoral Dissertation**15 Credits**

Dissertation.

Algorithm Theory - Undergraduate Minor

Required Courses

C S 172	Computer Science I	4
C S 271	Object Oriented Programming	4
C S 272	Introduction to Data Structures	4
C S 372	Data Structures and Algorithms	4
Select 3-4 credits from the following:		3-4
C S 278	Discrete Mathematics for Computer Science	
MATH 279	Introduction to Higher Mathematics	
Select 6-7 credits from the following:		6-7
C S 370	Compilers and Automata Theory	
C S 475	Artificial Intelligence I	
C S 476	Computer Graphics I	
MATH 377	Introduction to Numerical Methods	
MATH 430	Combinatorial Mathematics	
MATH 454	Mathematical Logic	

Total Credits

25-27

Bioinformatics - Master of Science

The degree requirements include 30 graduate credit hours. The requirements are structured as follows:

Introductory Courses

Select Computational or Life Sciences Track ¹ 9

Computational Track ²

C S 462	Object Oriented Programming Transition
C S 468	Software Development Transition
C S 469	Data Structure and Algorithms Transition

Life Sciences Track ³

C S 508	Introduction to Data Mining
C S 570	Analysis of Algorithms
C S 581	Advanced Software Engineering

Core Courses ⁴

C S 509	Bioinformatics Programming	3
C S 586	Algorithms in Systems Biology	3

Select one from the following: 3

C S 516	Bioinformatics
GENE 452	Applied Bioinformatics
BIOL 566	Advanced Bioinformatics and NCBI Database

Elective Courses

Select 6 credits from the following: ⁵ 6

A ST 505	Statistical Inference I
A ST 506	Statistical Inference II
AGRO 506	Plant Genetics
BCHE 542	Biochemistry I
BCHE 546	Biochemistry II
BCHE 649	Topics in Biochemistry
BIOL 474	Immunology
BIOL 475	Virology
BIOL 478	Molecular Biology of Microorganisms
BIOL 490	Neurobiology
BIOL 520	Molecular Cell Biology
BIOL 566	Advanced Bioinformatics and NCBI Database
C S 502	Database Management Systems I
C S 505	Artificial Intelligence I
C S 508	Introduction to Data Mining
C S 516	Bioinformatics
C S 521	Parallel Programming
C S 570	Analysis of Algorithms
C S 572	Advanced Algorithms
C S 575	Artificial Intelligence II
C S 581	Advanced Software Engineering
C S 582	Database Management Systems II
GENE 452	Applied Bioinformatics
GENE 486	Genes and Genomes
GENE 488	Gene Regulation
HORT 506	Plant Genetics
MOLB 542	Biochemistry I
MOLB 546	Biochemistry II
MOLB 550	Topics in Molecular Biology

MOLB 590 Discussions in Molecular Biology

Master's Project / Thesis		
C S 598	Master's Project ⁶	6
or C S 599	Master's Thesis	
Total Credits		30

¹ These courses provide foundational preparation in biological sciences and computational sciences.

² These courses are intended for students with a Bachelor's degree in life sciences.

³ These courses are intended for students with a Bachelor's degree in computer sciences. These courses can be replaced by more advanced courses with written permission of the graduate advisor.

⁴ The goal of these courses is to expose the students to the central issues and techniques in the field of bioinformatics.

⁵ The goal of these courses is to allow students to specialize in a specific branch of bioinformatics.

⁶ Each master's student must write a thesis (C S 599 Master's Thesis) or, with the advisor's permission, undertake a research project (C S 598 Master's Project). In either case, the number of required graduate credits is 6 for the thesis or project. In all cases, the students are required to sustain a final exam, covering the thesis/ research project.

Bioinformatics - Undergraduate Minor

Required Courses

BIOL 211G	Cellular and Organismal Biology	3
BIOL 211GL	Cellular and Organismal Biology Laboratory	1
C S 172	Computer Science I	4
C S 272	Introduction to Data Structures	4
C S 371	Software Development	4
C S 486	Bioinformatics	3
C S 489	Bioinformatics Programming	3
Select one from the following:		3
C S 482	Database Management Systems I	
C S 491	Parallel Programming	
BIOL 305	Principles of Genetics	
CHEM 433	Physical Chemistry I	
MATH 331	Introduction to Modern Algebra	
PHYS 315	Modern Physics	
Total Credits		25

Computer Science - Bachelor of Arts

The Bachelor of Arts in Computer Science is an open, flexible degree plan that offers the student both a rigorous undergraduate degree program in Computer Science and an extensive open credit hour allotment to pursue knowledge in other domains. It is an excellent choice to combine into a double major program, and is an option for the student who has an interest in learning both domain knowledge in some areas outside of Computer Science, and in acquiring a Computer Science background sufficient to pursue a strong technology career.

Students planning to undertake graduate work in Computer Science are encouraged to pursue the Bachelor of Science degree rather than the Bachelor of Arts degree. Students interested in graduate work should consult with their advisor regarding the possibility of taking other computer science electives to satisfy their departmental requirements.

General Requirements Exception

A grade of at least C- must be earned in each of the courses taken to satisfy the departmental and non-departmental requirements. No course may be counted as satisfying both a departmental and a non-departmental requirement. No course taken to satisfy either a departmental or a non-departmental requirement may be taken S/U.

Computer Science - Bachelor of Science

The Bachelor of Science in Computer Science is the traditional undergraduate degree in Computer Science. It is rigorously focused on educating the student in the fundamental disciplines of Computer Science. It prepares the student for any technological field in industry, and also provides the preparation for graduate studies in Computer Science. It is the main undergraduate degree in the Computer Science department, and should be the choice of a single-major Computer Science student. This degree is accredited by the ABET Computing Accreditation Commission (CAC) under the General and Computer Science Program Criteria (through 9/30/2022).

General Requirements Exception

A grade of at least C- must be earned in each of the courses taken to satisfy the departmental and non-departmental requirements. No course may be counted as satisfying both a departmental and a non-departmental requirement. No course taken to satisfy either a departmental or a non-departmental requirement may be taken S/U.

C S 473	Architectural Concepts I	3
Computer Science 400-level Elective		3
MATH elective (upper division) ⁴		3
Lab Science Elective ⁴		4
Lab Science Elective ⁴		4
Area IV & Area V ³		3
Viewing a Wider World		3
Viewing a Wider World		3
Credits		33
Senior		
C S 448	Senior Project	4
C S 419	Computing Ethics and Social Implications of Computing	1
C S 474	Operating Systems I	3
Lab Science Elective ⁴		4
Computer Science 400-level Elective ⁴		3
Upper division electives to bring total upper division to 48 ⁴		
Electives as needed to meet minimum credit requirements ⁴		
Credits		15
Total Credits		112

³ AREA IV: Social/ Behavioral Sciences and AREA V: Humanities and Fine Arts: New Mexico State Common Core Requirements (<http://nmsu-preview.courseleaf.com/nmsu/arts-sciences/computer-science/computer-science-bachelor-science>)

⁴ For electives see lists above.

Students planning to undertake graduate work in computer science are encouraged to consult with their advisor regarding the possibility of taking other computer science electives to satisfy their departmental requirements.

Computer Science - Bachelor of Science/Master of Science

5 Year Dual Degree BS+MS Program

The dual degree program combines some of the requirements of the Bachelor of Science (BS) and the Master of Science (MS) in Computer Science. It is very important for the student to apply to the BS+MS program before they take any 400-level C S courses. Full details of the program can be found at <http://www.cs.nmsu.edu>.

Admission occurs in two steps.

1. First, students will apply to the Computer Science department to receive approval for the BS+MS program. The student submits the pre-application when he/she is within 48 credits of earning a BS in Computer Science; an application form is provided on the department website. Qualification for the BS+MS program will be based on the cumulative (non-grade replaced) grade point average in Computer Science and Math courses taken up to that point (at least 3.5), including at least two of the following: C S 370 Compilers and Automata Theory, C S 371 Software Development and C S 372 Data Structures and Algorithms, and recommendations by faculty members listed on the departmental application. Additional factors might be taken into account when available (e.g., GRE scores). Students having a grade point average below 3.5 may be admitted to the combined program on a case-by-case basis, depending on faculty recommendations and evaluations of the individual academic and professional history.
2. Once the Computer Science department has notified the applicant of acceptance in the combined BS+MS program, the applicant must then formally apply to the graduate school (prospective.nmsu.edu/graduate) for formal admission to the graduate program. This application to the graduate school is made during the semester of graduation from the BS in Computer Science.

The curriculum for the first three years of the BS+MS program coincides with the requirements of the BS program. In particular; the general requirements include a grade of at least a C- in each course satisfying the departmental and non-departmental requirements. No course may be counted as satisfying both a departmental and non-departmental requirement. No course taken to satisfy either a departmental or non-departmental requirement may be taken S/U. The following are the departmental requirements for the degree (the non-departmental requirements are identical to those of the BS in Computer Science).

Departmental Requirements for Years 1 through 4

C S 172	Computer Science I	4
C S 271	Object Oriented Programming	4
C S 272	Introduction to Data Structures	4
C S 273	Machine Programming and Organization	4
C S 278	Discrete Mathematics for Computer Science	4
C S 370	Compilers and Automata Theory	4
C S 371	Software Development	4
C S 372	Data Structures and Algorithms	4
C S 419	Computing Ethics and Social Implications of Computing	1
C S 449 or C S 448	Senior Thesis Senior Project	4
C S 471	Programming Language Structure I	3
C S 473	Architectural Concepts I	3

C S 474	Operating Systems I	3
Select one from the following:		3
C S 502	Database Management Systems I	
C S 503	Introduction to Robotics	
C S 504	Computer Networks I	
C S 505	Artificial Intelligence I	
C S 506	Computer Graphics I	
C S 508	Introduction to Data Mining	
C S 511	Logic and Constraint Logic Programming	
C S 512	Computer Systems Modeling and Simulation	
C S 513	Computer Security	
C S 515	User Interface Design	
C S 516	Bioinformatics	
C S 517	Digital Game Design	
C S 518	Visual Programming	
C S 521	Parallel Programming	
Select one from the following:		3
C S 573	Architectural Concepts II	
C S 574	Operating Systems II	
C S 584	Computer Networks II	
Departmental Requirements for Year 5		
C S 510	Automata, Languages, Computability	3
C S 570	Analysis of Algorithms	3
One additional course numbered 550 or above		3
One additional course numbered 500 or above		3
C S 599	Master's Thesis ¹	6
or C S 598	Master's Project	
Select one from the following:		3
C S 571	Programming Language Structure II	
C S 575	Artificial Intelligence II	
C S 581	Advanced Software Engineering	
C S 582	Database Management Systems II	
Select one from the following:		3
C S 571	Programming Language Structure II	
C S 572	Advanced Algorithms	
C S 573	Architectural Concepts II	
C S 574	Operating Systems II	
C S 575	Artificial Intelligence II	
C S 581	Advanced Software Engineering	
C S 582	Database Management Systems II	
C S 584	Computer Networks II	
C S 586	Algorithms in Systems Biology	
Total Credits		76

¹ In order to fulfill the degree requirement, the student must complete a total of 6 credits for either course.

Computer Science - Doctor of Philosophy

Doctoral students may specialize in any of the areas in which computer science faculty members have active research interests. Through

interdisciplinary arrangements with other doctoral departments at New Mexico State University, doctoral students may also specialize in such areas as computational biology, computer networks and architectures and cognitive science.

Doctoral students are expected to join the program with a preparation equivalent to that required for the Master's degree in computer science at New Mexico State University. The requirements for the degree are as specified in the NMSU graduate catalog, with the following additional considerations:

- The qualifying examination consists of written exams in five subject areas: four of these are required areas, while the fifth is an elective area. The student will take four exams in the following required subjects:
 - Operating Systems or Computer Architectures;
 - Principles of Programming Languages;
 - Design and Analysis of Algorithms and Data Structures; and
 - Discrete Mathematics.
- The topics of each exam are listed on the departmental website.
- The student is required to enroll in an elective course offered in the first semester of his/her enrollment at NMSU, which identifies the fifth subject for the qualifying examination. The faculty in charge of the class will determine the exam topics of the elective subject.
- The student is required to take the qualifying examination at the end of the first semester of enrollment as a doctoral student at NMSU; the only exceptions will be granted to students entering the doctoral program with significant undergraduate deficiencies—in such case the deadline for the qualifying examination will be indicated in the admission records. It is the responsibility of the student to ensure that the qualifying examination is taken within the prescribed deadline. Students failing to meet the deadline will be automatically withdrawn from the doctoral program. If a student fails any of the exams, they must retake those exams in the following semester. If a student fails to pass all exams after the second attempt, they will be dismissed from the doctoral program.
- The comprehensive examination evaluates depth of knowledge in the specific research area selected by the candidate with the consent of their graduate committee. It includes: a written part, in the form of an extensive survey paper; an annotated bibliography; and an oral examination.
- The student is required to submit and defend a prospectus, at the same time or after completing the comprehensive examination. The prospectus describes and motivates the specific research problem to be addressed in the doctoral dissertation.
- A PhD student is required to take at least one course each in the following three areas (foundations, systems, or applications)

Graduation Requirements

Foundations

Select at least one from the following:		3
C S 510	Automata, Languages, Computability	
C S 560	Graph Theory	
C S 570	Analysis of Algorithms	
C S 571	Programming Language Structure II	
C S 572	Advanced Algorithms	
C S 586	Algorithms in Systems Biology	

Systems

Select at least one from the following:	3
C S 573 Architectural Concepts II	
C S 574 Operating Systems II	
C S 584 Computer Networks II	

Applications

Select at least one from the following:	3
C S 515 User Interface Design	
C S 516 Bioinformatics	
C S 575 Artificial Intelligence II	
C S 581 Advanced Software Engineering	
C S 582 Database Management Systems II	

Other

Other graduate credit to meet NMSU requirements	21
C S 700 Doctoral Dissertation	18
Total Credits	48

Only courses from the MS CS program from NMSU can be used to waive this requirement.

Students should contact the department for information on additional graduation requirements, or visit the on-line Graduate Handbook (<http://www.cs.nmsu.edu/>).

Computer Science - Graduate Minor

Students who wish to take a minor in Computer Science will need to accumulate a minimum of 9 graduate credits in Computer Science courses. Students are encouraged to contact the Computer Science Graduate Committee Chair for directions in the selection of courses.

Computer Science - Master of Science

Each master's student normally must write a thesis (C S 599 Master's Thesis) or, with the advisor's permission, undertake a research project (C S 598 Master's Project). In either case, the number of required graduate credits is 33, including 6 for the thesis or project. In all cases, the students are required to sustain a final exam, covering the thesis/research project and the graduate course-work. The two parts of the exam bring equal weight.

In no case may a C S course numbered below 500 be counted towards the required number of credits. In particular, graduate students are expected to register for C S classes numbered 500 or above.

Degree Requirements

C S 510 Automata, Languages, Computability	3

C S 582 Database Management Systems II	
C S 584 Computer Networks II	
C S 586 Algorithms in Systems Biology	

Select one Computer Science course numbered above 550 and different from the following: 3

C S 598 Master's Project	
C S 599 Master's Thesis	
C S 600 Pre-dissertation Research	
C S 700 Doctoral Dissertation	

C S courses above 500 or other pre-approved graduate courses 9

Thesis / Non-Thesis

C S 599 Master's Thesis ¹	6
or C S 598 Master's Project	

Total Credits 33

¹ Each master's student normally must write a thesis (C S 599 Master's Thesis) or, with the advisor's permission, undertake a research project (C S 598 Master's Project). In either case, the number of required graduate credits is 33, including 6 for the thesis or project.

Courses not in Computer Science can be included in the student's program of study only if prior written approval has been obtained from the student's advisor and the departmental Graduate Committee. Further details can be found in the on-line Graduate Handbook (<http://www.cs.nmsu.edu/>).

Course-work Only - Master of Science Degree

With the advisor's consent, the student may instead complete a coursework-only Master degree; this requires 36 credits of regular course work, satisfying the same requirements listed above, except that the 6 credits of thesis or project are replaced by 9 credits of courses numbered 550 or above and distinct from C S 589 Special Research Problems, C S 598 Master's Project, and C S 599 Master's Thesis. Students pursuing a coursework-only degree are expected to complete an oral exam covering a selected subset of the students' plan of study. Further details can be found in the on-line Graduate Handbook (<http://www.cs.nmsu.edu/>).

Degree Requirements

C S 510 Automata, Languages, Computability	3
C S 570 Analysis of Algorithms	3
Select one from the following:	3
C S 573 Architectural Concepts II	
C S 574 Operating Systems II	
C S 584 Computer Networks II	
Select one from the following:	3
C S 571 Programming Language Structure II	

C S 575	Artificial Intelligence II	
C S 581	Advanced Software Engineering	
C S 582	Database Management Systems II	
Select one from the following:		3
C S 571	Programming Language Structure II	
C S 572	Advanced Algorithms	
C S 573	Architectural Concepts II	
C S 574	Operating Systems II	
C S 575	Artificial Intelligence II	
C S 581	Advanced Software Engineering	
C S 582	Database Management Systems II	
C S 584	Computer Networks II	
C S 586	Algorithms in Systems Biology

Computer Systems - Undergraduate Minor

Required Courses

C S 172	Computer Science I	4
C S 271	Object Oriented Programming	4
C S 272	Introduction to Data Structures	4
C S 273	Machine Programming and Organization	4
C S 370	Compilers and Automata Theory	4
or C S 371	Software Development	
C S 473	Architectural Concepts I	3
or C S 474	Operating Systems I	
Select one from the following:		3
C S 476	Computer Graphics I	
C S 482	Database Management Systems I	
C S 484	Computer Networks I	
C S 480	Linux System Administration	
C S 491	Parallel Programming	
Total Credits		26

Software Development - Undergraduate Minor

Required Courses

C S 172	Computer Science I	4
C S 271	Object Oriented Programming	4
C S 272	Introduction to Data Structures	4
C S 371	Software Development	4
Select 6-7 credits from the following:		6-7
C S 370	Compilers and Automata Theory	
C S 471	Programming Language Structure I	
C S 474	Operating Systems I	
C S 475	Artificial Intelligence I	
C S 476	Computer Graphics I	
C S 482	Database Management Systems I	
C S 484	Computer Networks I	
C S 485	User Interface Design	
C S 491	Parallel Programming	
Total Credits		22-23

Creative Media

Undergraduate Program Information

New Mexico State University's Creative Media Institute (CMI) prepares students to become digital storytellers using state of the art, industry-standard tools. The Creative Media Institute is dedicated to developing and nurturing the artistic endeavors of student filmmakers through industry-standard education, research and collaboration in the art, craft and production of the moving image through storytelling, resulting in a Bachelor of Creative Media degree. The program provides learning opportunities for newly admitted NMSU students, and provides some credit transfer opportunities for students with an associate degree from a NMSU community college or other two-year degree granting institution. The Bachelor of Creative Media provides a liberal arts background enabling students to pursue further education, professional training or employment in the digital media-based industry. Study in the CMI program fosters collaborative expression based on a clear understanding of media culture, history, design and practice. CMI also offers students the opportunity for internships in digital video, animation, visualization and simulation, industrial and educational video at varied production facilities on and off campus.

Theory and practice are integrated at every step as students manipulate text, sound and images using industry-standard technology. CMI houses a state of the art digital projection system screening room, post-production lab, animation lab, production space, motion capture laboratory and THX sound mixing theatre.

Due to limited capacity, new students wishing to continue in the CMI program after their freshman year are required to complete an application process. Transfer students from other institutions, including NMSU Community Colleges, must complete the application process. Transfer students should contact an Academic Advisor from the College of Arts and Sciences Advising Office for information about joining one of the two degree programs offered in CMI. Space is limited and varies each year. The quality of the student's work as demonstrated in the application and prior course work are additional criteria of the admission decision. Exact details and procedures for applying to the CMI program can be found on the CMI website at: cmi.nmsu.edu (<http://cmi.nmsu.edu>).

Degrees for the Department

Animation and Visual Effects - Bachelor of Creative Media (p. 261)

Digital Film Making - Bachelor of Creative Media (p. 262)

Minors for the Department

Animation and Visual Effects - Undergraduate Minor (p. 262)

Digital Film Making - Undergraduate Minor (p. 263)

Associate Professor, Amy Lanasa, Department Head

Associate Professors Fisher, Lanasa; **Assistant Professors** Fowler, Lapid, Lau; **College Assistant Professors** Bakshi, Chase, Gorell, Marks; **College Instructor** Nirmalakhandan

CMI 100. Introduction to the Creative Media Industry

3 Credits

This class is an introductory course for students interested in learning about the creative media industry and the Creative Media Institute. It offers a broad view of the entire industry including Marketing, Production, Budgets, Jobs, New Media Literacy, and Industry Standards. Students will listen to experts in the field, and become involved in open discussions about the industry and use new information to complete hands-on assignments in the laboratory. Restricted to Las Cruces campus only.

CMI 200. Sound Design 1

3 Credits

Focuses on the techniques for creating, recording and manipulating sounds through challenging sound design projects. May be repeated up to 3 credits. Crosslisted with: CMT 206.

Prerequisite(s)/Corequisite(s): CMI 100. Restricted to: DFM, ANVE majors. Restricted to Las Cruces campus only.

CMI 205. Cinematography I

3 Credits

Theories and techniques of visual design in videography and the aesthetics of lighting. Crosslisted with: CMT 205.

Prerequisite(s)/Corequisite(s): CMI 100. Restricted to: ANVE, DFM majors. Restricted to Las Cruces campus only.

CMI 216. Editing I

3 Credits

Focuses on individual editing skills including capture, interface, basic cuts, and transitions. May be repeated up to 3 credits. Crosslisted with: CMT 195.

Prerequisite(s)/Corequisite(s): CMI 100. Restricted to: DFM, ANVE majors. Restricted to Las Cruces campus only.

CMI 220. Drawing for Animation

3 Credits (2+4P)

Introductory study of the human and animal form in relation to animation. Students learn fundamentals and exaggeration of the figure, as related to proportion, rhythm, mechanics, and motion. Areas of focus are: basic form, proportion, shape, contour, gesture, anatomy, portraiture, perspective, clothing effects and drawing from observation. Restricted to: ANVE, DFM, and CMT majors.

CMI 231. History of Animation

3 Credits

Explores the history of Animation as an art form and industry through readings, screenings, lecture and periodic guest speakers. May be repeated up to 3 credits. Restricted to: DFM, ANVE, G-CMI majors. Restricted to Las Cruces campus only.

CMI 232. Storyboarding

3 Credits

Examines effective writing principles for creating storyboards that communicate the overall picture of a project. There are timing, scene complexity, emotion and resource requirements. Crosslisted with: CMT 232 and ENGL 232. Restricted to: DFM, ANVE majors. Restricted to Las Cruces campus only.

CMI 233. Light, Shade, Render

3 Credits

This course will explore the theory and practice of 3D lighting and rendering methodologies. Techniques covered will implement cameras, lighting sources, textures, surface-mapping and algorithmic rendering to produce stylized and photo realistic images. Topics covered will include direct and indirect lighting, shaders that simulate physical substances and effects, rendering multiple passes and simulating physical lens effects. Restricted to: Main campus only. Restricted to DFM, ANVE majors.

Prerequisite(s): CMI 260, CMI 280, or Consent of Instructor.

CMI 235. Narrative: Principles of Story Across the Media

3 Credits

Examines the various strategies of written and visual storytelling: narrative structure and its principle components (plot, theme, character, imagery, symbolism, point of view), with an attempt to connect them to elements of contemporary forms of media expression, including screenwriting, playwriting, writing for documentaries and animation, etc. Crosslisted with: ENGL 235. Restricted to Las Cruces campus only.

CMI 240. Digital Illustration

3 Credits

Introductory course examining traditional artistic expressions and translating visual art experiences into a digital art medium to enhance visual storytelling. Students acquire basic principles of drawing and painting through hands-on experience manipulating tonal value, composition, form development, light and shadow, color theory, rendering realism, and graphic design. Restricted to: ANVE, DFM majors. Restricted to Las Cruces campus only.

CMI 245. 2-D COMPOSITING & FX

3 Credits (3+3P)

The purpose of this course is to familiarize students with the powerful compositing and special effects tools of Adobe After Effects for 2D, traditional animation. Students will learn how to assemble an existing un-rendered animation into a final piece with advanced 3D lighting, spacing, and digital effects so that it can achieve a dynamic, professionally rendered look. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

CMI 250. Beginning 2-D Animation

3 Credits

Learn the basics of digital 2D animation by creating an animated short from a storyboarded scene using professional animation, imaging, and editing software. May be repeated up to 3 credits. Restricted to: DFM, ANVE majors. Restricted to Las Cruces campus only.

CMI 260. Foundations of 3D Animation**3 Credits**

The objective of this course is to provide a hands-on overview of the 3D animation production process. Students will be introduced to basic story development and the creation of computer generated assets and cinematic sequences. The course will survey specialty areas of digital animation and various software and techniques applied in entertainment and information media. Restricted to: Main campus only. Restricted to ANVE, DFM majors.

Prerequisite(s): CMI 235, CMI 232 or consent of instructor.

CMI 270. Rigging for 3D Animation**3 Credits**

This course will introduce principles and practices of current 3D animation rigging. Students will develop fundamental methods necessary to create character rigs. Students will learn aesthetic, technical, and optimization concepts as they apply to organic and mechanical designs. Topics will include: hierarchies, constraints, deformation rigging, skeleton creation, skinning, forward and inverse kinematics, controls, body and facial rigging. Restricted to: ANVE, DFM majors.

Prerequisite(s): CMI 260.

CMI 280. Modeling**3 Credits**

This course will introduce 3D modeling methods and current practices. Students will learn preliminary and detailed modeling techniques using industry standard software. Methods will emphasize formal and functional aspects of modeling as they apply to mechanical, organic, and sculpted topology for application in animation, games, and information media. Restricted to: Main campus only. Restricted to ANVE, DFM majors.

CMI 290. 3-D Animation**3 Credits**

Overview of the essentials and principles of 3D animation; creative methods for using industry standard tools to produce the illusion of movement for storytelling. Topics include, keyframe and curve animation, kinematics, cycle animation, camera animation, deformers, and constraints. Restricted to: Main campus only.

Prerequisite(s): CMI 260, CMI 250 or consent of instructor.

CMI 300. History of Cinema**3 Credits**

In-depth analysis of cinema's history looking at each aspect of film from inception to current development. It focuses on the historical aspects of sound production, cinematography, technological advances, music scoring, foley, animation, and narrative development. Students will see examples of movies throughout the semester and will take part in discussions. May be repeated up to 6 credits. Restricted to Las Cruces campus only.

CMI 301. Sound Design II**3 Credits**

Mixing and balancing dialogue, sound effects and music in postproduction. Study the role of sound effects, foley, soundtrack choices, and music supervision. Prerequisite: CMI 200

CMI 303. Cinema Review and Critique**3 Credits**

This course is for the student who wants to learn to be a more active, intelligent film viewer. It encourages critical thinking about films and educates students on how to write a film review. Students will meet in the movie theater to watch essential films that serious movie watchers should see from classic motion pictures, to current release major motion pictures, independent films and world cinema features. The course will serve as a guide to the illuminating process of evaluating, analyzing, and reviewing movies. Students' reviews will be published publicly.

CMI 305. Business of Filmmaking/Animation**3 Credits**

Explores the roles of unions, basic contracts, legal arrangements, and the economics of the production process, distribution, and financing.

Prerequisite: CMI 235.

CMI 308. Writing for Animation**3 Credits**

This class explores methods for, and approaches to, writing for animation. Students study and produce scripts for a range of animation outlets while engaging in writing exercises based on character and story development. May be repeated up to 3 credits.

Prerequisite(s): CMI 235 or consent of instructor.

CMI 309. Screenwriting I**3 Credits**

Writing intensive. Students learn the craft of screenwriting, honing skills in writing dialogue and visual narrative, crafting dynamic characters and dramatic action. Original student scripts will be performed and discussed in class. Crosslisted with: ENGL 309 and THTR 306.

Prerequisite(s): ENGL/CMI 235 or consent of instructor.

CMI 310. Cinematography II**3 Credits**

Advanced tools of the cinematographer, lighting and composition techniques. Artistic and technological elements of cinematography.

Prerequisite(s): CMI 205, CMT 205. Restricted to DFM, ANVE majors.

CMI 311. Editing II**3 Credits**

Advanced techniques in digital films using professional non-linear editing systems. Restricted to: ANVE, DFM majors.

Prerequisite(s): CMI 216.

CMI 313. Animated Film Review**3 Credits**

This course will enhance student literacy in analyzing and writing about animated films. Through screenings, readings, discussion and lectures, students will acquire conceptual tools for viewing and evaluating films. Through analysis, students will identify cinematic elements.

CMI 314. Acting for Film**3 Credits**

Techniques for film and television acting. In-depth analysis of film performance creation among actor, director, writer, cinematographer, and editor. Restricted to: DFM, THTR majors, or Consent of Instructor.

Prerequisite(s): CMI 100, AND CMI 235.

CMI 315. Adventures in Genre**3 Credits**

Students learn storytelling strategies for the screen by studying various structural genres and components of screenplays and films. Utilizing these strategies, students develop a number of their own original screenplay ideas. Additionally, pitch workshops are held and students learn to present their ideas in various, practical situations.

Prerequisite(s): CMI 235. Restricted to DFM, ANVE majors.

CMI 316. Border Cinema Around the World**3 Credits**

What is the relationship between borders, identity, and vulnerability - and how is this relationship explored in cinema? How are borderlands also testing grounds - the sites of serious ethical dilemmas? By examining powerful feature films from such regions as the Middle East, the Balkans, and the US/Mexico border, we will explore ways in which personal, familial, communal, and national identities are defined through the complex process of bordering. We will investigate the role of cinema in reflecting and/or facilitating this process. May be repeated up to 3 credits.

CMI 318. Documentary Production**3 Credits**

Survey of theory and history of documentary film making including viewings and discussions of notable films and directors. Class works with actual documentary project. May be repeated up to 6 credits.

Restricted to: ANVE, DFM majors.

Prerequisite(s): CMI 216, CMI 205.

CMI 320. Race and Gender in Film**3 Credits**

In this course students will analyze film as an art form as well as be exposed to Race and Gender Feminist Film Theory. We will consider the role of film in our understandings of sex, gender and sexuality. Through discussions and writing we will work to discern relevant social, political, ideological, and aesthetic concepts in the media we examine. Crosslisted with: ENGL 399, W S 450 and W S 550.

CMI 328. Producing**3 Credits**

Examines the role of the Producer, essential to every film production. The course will revolve around the best practices in organizational design, the production process, the budgeting process, financial controls, scheduling, insurance and distribution.

Prerequisite(s)/Corequisite(s): CMI 200, 216, 235. Restricted to: ANVE, DFM majors.

CMI 329. Studies in Drama**3 Credits**

Students will draw on a group of related American and European dramatic works to examine various areas of 20th century culture. Topics will vary. Restricted to DFM, ANVE, ENGL, THTR majors. Crosslisted with: ENGL 329 and THTR 329

CMI 330. Developing the Animated Project**3 Credits**

This course will cover fundamental theories and elements of the production and development processes for animated projects. Concept, story, and story and character development will be addressed as well as storyboarding, layout, sound, voice recording and basic editing. Students will develop at least one animated project, and construct an animatic to be used for future production. Restricted to: ANVE, DFM majors.

CMI 332. 3-D Character Animation**3 Credits**

Essentials and principles of 3D character animation. Techniques and craft of breathing life into characters through movement, including dynamic poses, blocking action, run and walk cycles, lip syncing and realism. THTR 110, Acting and CMI 200, Sound Design are recommended. May be repeated up to 3 credits. Restricted to: DFM, ANVE majors.

Prerequisite(s): THTR 105 (or CMI 314 or CMI 348), CMI 260 and CMI 290 or consent of instructor.

CMI 341. Visual Effects I**3 Credits**

Fundamentals and principles of live action footage and computer generated imagery integration, including 3D animation, matchmoving, green screen setup, keying and compositing. Restricted to: ANVE, DFM majors.

Prerequisite(s): CMI 205, CMI 260, 280 (or consent of instructor).

CMI 348. Acting and Directing for Voiceover**3 Credits**

Students will explore methods for approaching voiceover and for improving acting and directing skills. Exercises will promote ease with collaboration in the studio setting, written work will focus on viewing voiceover in an analytical and discerning light. Restricted to ANVE, DFM majors.

CMI 350. Intermediate 2-D Animation**3 Credits**

Learn the more refined aspects of motion for character animation by focusing on Disney's 12 Principles of Animation, practicing these advanced drawing techniques in exercises and incorporating them into a brief final short.

Prerequisite(s): CMI 250.

CMI 360. Previsualization**3 Credits**

Implements 3D animation tools in preproduction shot and sequence design for motion picture and broadcast industries; including 3D storyboarding, technical planning and editing basics. LC Campus Only.

Prerequisite(s): CMI 260, CMI 280, and CMI 290 or consent of instructor. Restricted to ANVE, DFM majors.

CMI 362. Motion Graphics**3 Credits**

Students will learn the basics of Motion Graphics by working through a variety of exercises and a final project that will combine animation, text, visual effects, and sound using Adobe After Effects, Photoshop, and Illustrator. Restricted to: ANVE, DFM majors.

CMI 365. Character Design and Development**3 Credits**

Digital character design for the entertainment industry. Provides insight into the process of creating iconic characters. Traditional and contemporary character designers are explored. Industry workflow is introduced and necessary skills are developed to design detailed 3D characters from concept through production.

Prerequisite(s): CMI 250, CMI 260 and CMI 280, or consent of instructor. Restricted to ANVE, DFM majors.

CMI 395. Directing I**3 Credits**

Study and application through short scene work of the basic tools of a director and relationships with actors, designers, playwright, and stage managers. Interpreting as well as organizing. May be repeated up to 3 credits. Restricted to: DFM, ANVE majors.

Prerequisite(s): CMI 200, AND CMI 205, AND CMI 216.

CMI 396. Directing II**3 Credits**

Addresses pre-production concerns including script breakdown, casting ground plans and coverage. The criteria employed when selecting the creative team including a director of photography, art director, light, sound and wardrobe designers. Introduction to budgeting, scheduling, and script breakdowns. Prerequisite: CMI 395

CMI 397. Practicum**1-3 Credits (2-6P)**

Practical application of the student's field of study in a project environment. May be repeated up to 9 credits. Consent of Instructor required.

CMI 398. Special Topics**3 Credits**

This course addresses specific subjects and issues as identified by the department. Topics and credits to be announced in the Schedule of classes. May be repeated up to 12 credits.

CMI 400. Directed Studies**1-6 Credits (1-6)**

Directed study course in CMI under the supervision of a CMI faculty member. May be repeated up to 9 credits.

CMI 401. Motion Capture Techniques**3 Credits**

Implement industry standard motion capture techniques to capture and integrate performance for movie making, 3D animation and game production. Restricted to: ANVE,DFM majors.

Prerequisite(s): CMI 260, CMI 290 and CMI 270 (or consent of instructor).

CMI 410. Cinematography III**3 Credits**

This class is geared towards those who want to learn more about cinematography, color grading, and digital technology as it pertains to cinematography. Shooting high-end codecs (ProRes/DNxHD) or RAW are becoming more and more popular in filmmaking as camera manufactures and computer processing get better. This class will be a mix of production and post-production as learning how to shoot these higher end codecs do not end with the camera. Focus will be on techniques of shooting raw, understanding how to operate a camera capable of high end image acquisition, properly building up the camera rig and accessories, managing data and the post-production workflow. Consent of Instructor required. Restricted to: DFM, ANVE majors.

Prerequisite(s): CMI 310.

CMI 420. Short Film Production**3 Credits**

Students work in teams with rotating crews to write, produce, direct and edit individual and group projects-ultimately demonstrating growing confidence with production equipment and professional practices. May be taken up to 6 credits. Consent of instructor required. Pre/
Prerequisite(s): CMI 200, CMI 216, CMI 205, CMI 235, CMI 309 and CMI 395.

Corequisite(s): CMI 328. Restricted to ANVE, DFM majors.

CMI 421. Short Film Post-Production**3 Credits**

Students work together to complete short films shot in CMI 420. This course focuses on advanced post-production techniques, including editing and sound design, as student directors, editors and producers continue to learn to work together. In the last half of the course, students will build marketing campaigns and submit their finished film to festivals. May be repeated up to 6 credits. Restricted to: DFM, ANVE majors.

Prerequisite(s): CMI 420.

CMI 433. Sets and Environments**3 Credits**

Digital environment design and creation for movies and games from concept to production; including illustration, modeling, matte painting, texturing, lighting, rendering, integration, and camera projection. May be repeated up to 3 credits. Restricted to: DFM,ANVE majors.

Prerequisite(s): CMI 260, CMI 280, and CMI 233 or consent of instructor.

CMI 450. Advanced 2-D Animation**3 Credits**

Advanced techniques in two dimensional animation including motion graphics and integration of live action. Restricted to: ANVE,DFM majors.

Prerequisite(s): CMI 350.

CMI 470. Short 2-D Animation Production**3 Credits**

This is a full-scale animation production class where students will be divided into teams according to the animation skills they have demonstrated in the beginning, intermediate, and advanced classes. Each team member will specialize in one important facet of the production process: character animation, background painting, technical direction, coloring, or story development and storyboarding. 4 to 8 minute animated shorts will be produced. Restricted to: ANVE,DFM majors.

Prerequisite(s): CMI 450, CMI 361.

CMI 480. Screenwriting II**3 Credits**

Students will write 2 short scripts, 10-15 pages each throughout the semester. Focus will be on learning how to take notes and rewrite. Script analysis will be in a workshop format. Scripts will be read and discussed, scenes performed and reactions analyzed to consider effect of dialogue, character development, etc. Crosslisted with: ENGL 480

Prerequisite(s): ENGL 309 or CMI 309 or THTR 306 or consent of instructor. Restricted to ENGL, DFM, ANVE majors.

CMI 490. Advanced Screenwriting**3 Credits**

Students will prepare a 30-60 page screenplay. Script analysis will be in an advanced workshop format. Scripts will be read and discussed, scenes performed and reactions analyzed to consider effect of dialogue, character development, etc. This course is aimed at preparing writers for the professional market. Consent of instructor required. Restricted to ENGL, DFM, ANVE majors. Crosslisted with: ENGL 491

CMI 491. 3D Production Studio I**6 Credits**

The course is the first semester of a year-long effort to complete a Senior Project. The project will be narrative-driven short form, 3D animation or visual effects movie. Emphasis will be on pre-production and some production depending on ongoing CMI productions. You will produce a professional quality product with the aim to assist you in gaining entry into professional employment or graduate school. The course may be adapted toward a specific concentration in animation, visual effects, or digital film making, for group and individual productions. Each project must be approved by the Instructor and work within departmental policies and procedures.

Prerequisite(s)/Corequisite(s): CMI 332, CMI 360, CMI 365, CMI 433.

Prerequisite(s): CMI 308. Restricted to: ANVE majors.

CMI 492. 2D Production Studio I**6 Credits**

In CMI 498, Pre-Production, students will write a script, create a storyboard, record voice over and/or dialogue and time these storyboards to this dialogue/voice over creating an Animatic. For those doing demo reels, students will start to compile exercises from all of all their prior classes. Additional exercises will then be assigned to augment the skill set of the student according to the needs of each student. Restricted to: ANVE majors.

Prerequisite(s): CMI 350, CMI 361.

CMI 493. 3D Production Studio II**6 Credits**

The course is the final semester of a year-long concentration on your Senior Project. Emphasis will be on the production, post-production, and distribution of the work created in the first semester. You will produce a professional quality product that will help you gain entry into professional employment or graduate school. The overall objective is that you will demonstrate mastery of craft through synthesis of concept and technique, resulting in an original cinematic experience. Restricted to: ANVE majors.

Prerequisite(s): CMI 491.

CMI 494. 2D Production Studio II**6 Credits**

Students will complete an entire animated short, trailer, or demo reel for their portfolios by the end of Senior Project II. In CMI 494, Production and Post-Production, students will animate their stories according to the layout set in the animatic from Senior Project I. Lastly, they will composite and edit their shorts into a final piece that will be viewable in time for the Senior Showcase. For demo reels, students will continue to hone their reel into a finished piece that can be presented at the Senior showcase. Restricted to: ANVE majors.

Prerequisite(s): CMI 492.

CMI 495. Internship**1-12 Credits (1-12)**

Placement in a production facility and supervised experience required. With CMI advisor approval only. May be repeated up to 18 credits. Consent of Instructor required. Restricted to: DFM,ANVE majors.

CMI 496. Media Law/Ethics**3 Credits**

Overview of legal & ethical issues in creative media elements of business and commercial law. This class will focus on the fundamentals of entertainment law by exploring the business and legal relationships within film industries, and animation. Learn to anticipate and avoid legal problems prior to production. Key issues in the area of copyright law, sources of financing, distribution agreements; insurance and union consideration will be discussed. Restricted to ANVE, DFM majors.

CMI 497. Portfolio Design and Development**3 Credits**

Advanced graphic design projects with an emphasis on conceptual development, portfolio preparation, and professional practices. Refine general marketing strategies, personal portfolio, and resumes. Define, target, and penetrate personal target markets. Students develop individual promotional/demo packages. May be repeated up to 3 credits. Restricted to: DFM,ANVE majors.

CMI 498. Final Year Senior Project I: Production and Post Production 3-6 Credits (3-6)

Senior Project I is the first half of a year long concentration on a pre-approved creative project guided by a faculty member. Projects are narrative-driven and have an end product: screen-play, short film, documentary, 2-D or 3-D animated short, or pilot with treatment for television. Consent of Instructor required. Restricted to: ANVE,DFM majors.

Prerequisite(s): Consent of instructor.

CMI 499. Final Year Senior Project II: Production and Post Production 3-6 Credits (3-6)

Senior Project II is the second half of a year long concentration on a pre-approved project, guided by a faculty member. Projects are narrative driven and have an end product: short film, documentary, 2-D or 3-D animated short, or pilot and treatment for television. May be repeated up to 9 credits. Restricted to: ANVE,DFM majors.

Prerequisite(s): CMI 498 and Consent of Instructor.

Name: Amy Lanasa

Office Location: Milton Hall, Room 172-A

Phone: (575) 646-5671

ENGL 336	Studies in Film	
THTR 306	Screenwriting I	
Electives: to bring the total to 120 credits		22
Total Credits		120

¹ For more information please see the General Education (p. 47) and Viewing a Wider World (p. 49) section of the catalog.

² Required pre-application course for DFM

³ Course may be taken at an NMSU community college.

⁴ See course descriptions in the designated community college campuses.

Digital Film Making - Undergraduate Minor

Must be admitted to ANVE

Take 18 credits from the CMI/ENGL, CMI/THTR courses as listed in the Digital Film Making major. A minimum of 9 credits must be upper division.

Criminal Justice

Undergraduate Program Information

The Department of Criminal Justice offers courses in the traditional setting as well as online. However, we do not offer a fully online Bachelor of Criminal Justice (BCJ). We offer an online Degree Completion Program. Students interested in completing the degree online need to complete at least the first two years on campus while working closely with an academic advisor.

The criminal justice degree plan is broadly interdisciplinary in nature embracing the study of the humanities, law, natural, behavioral and social sciences. The curriculum seeks to balance theoretical inquiry with applied knowledge.

Students become prepared for careers in law enforcement, corrections, probation and parole, work with juveniles, victim services, non- and not-for profit organizations connected with criminal and social justice, and the related field of forensics. Graduates have also been successful in law school and graduate programs in the social sciences. The undergraduate major consists of at least 33 credits in the major field, 27 of which must be numbered 300 or above (excluding C J 393 Internship in Criminal Justice).

The department offers an interdisciplinary minor in Forensic Sciences and has partnered with various other departments to offer an interdisciplinary minor in child advocacy studies. Students interested in the minor should consult with the department head.

Graduate Program Information

The Department of Criminal Justice offers graduate study leading to the Master of Criminal Justice (MCJ) degree. Admission to the MCJ is competitive and prospective graduate students are expected to have at least a 3.0 undergraduate grade-point-average, coursework in research methods and statistics, and possess a bachelor's degree. Those not meeting these requirements may be admitted conditionally and required to make up deficiencies at the outset of their program of study. Applicants must submit three letters of recommendation and a 3-5 page essay introducing themselves and addressing the following topic: "What is the most important change needed in the criminal justice system?" This essay serves as a sample of written work to be evaluated by the MCJ Graduate Committee. The GRE is NOT required for admission into the MCJ program. The MCJ Graduate Committee may require a student to complete additional English writing coursework. For more information, please visit our website: <http://crimjust.nmsu.edu/criminal-justice-graduat/>.

Students must declare their intent to pursue one of the two degree options: the thesis option or the focused coursework option. The degree

options are provided so that students may better match their education with career goals. The thesis option is often used by students interested in pursuing careers in basic and applied criminal justice research or a doctoral degree. The focused coursework option is often used by students pursuing administrative positions within criminal justice agencies. The thesis option is only available for Campus-Based students. Online students may only pursue the Focused Coursework Option.

All candidates, regardless of chosen degree option, must complete a final examination. Examination requirements vary by degree option. Please contact the director of the MCJ program or consult the Department of Criminal Justice web site <http://crimjust.nmsu.edu/criminal-justice-graduat/> for details.

Thesis students must submit a thesis proposal to their faculty committee at a proposal hearing for approval and subsequently complete the approved thesis project. An approved thesis proposal is one wherein the thesis committee determines the student demonstrates a comprehensive understanding of the nexus of theory, method, and policy as it applies to the proposed thesis project. At the discretion of the thesis committee the proposal may be considered inadequate and the student is required to revise and resubmit the thesis proposal until the committee determines the proposal is satisfactory. The final examination includes a defense of the completed thesis, but may also include a general examination based upon the candidate's program of study. The minimum coursework requirements are displayed below.

Focused coursework students must pass two written comprehensive examinations following completion of the required courses, no earlier than their third semester. Students not passing the examinations will be required to wait until the following semester to retake the examination. The minimum course requirements are displayed below.

Online M.C.J. Coursework

There is an online option for the MCJ degree. Online criminal justice courses are available only to those admitted to the MCJ program as online students, or with permission of the Director of the MCJ program. Students desiring to be admitted to the MCJ program as online students must declare that intent in writing to the MCJ director. Online students may not enroll in campus-based criminal justice courses. Online students may only pursue the Focused Coursework Option, not the Thesis Option. For more information regarding the online MCJ degree option, consult the Department of Criminal Justice web page, <http://crimjust.nmsu.edu>, or contact the Director of the MCJ program.

Teaching Assistantships

Teaching assistantships are typically available for some traditional (on-campus) MCJ students on a competitive basis. The Director of the MCJ Program will contact admitted students to determine their interest, and the Graduate Committee will make recommendations to the Department Head for a final decision.

Degrees for the Department

Criminal Justice - Bachelor of Criminal Justice (p. 268)

Law and Society - Undergraduate Supplemental Major (p. 271)

Criminal Justice - Master of Criminal Justice (p. 269)

Minors for the Department

Child Advocacy Studies - Undergraduate Minor (p. 268)

Forensic Science - Undergraduate Minor (p. 270)

Professor, Dennis M. Giever, Department Head

Associate Professors Keys, Lara, Posadas; **Assistant Professors** Alatorre, Natividad, Tapia, Valadez; **College Associate Professors** Corbett, Dimitrijevic, Joseph; **Emeritus Professors** Crowley, Gregware, Mays (Regents), Winfree

F. Alatorre, Ph.D. (Arizona State)– immigration, race, ethnicity, gender in criminal justice; D. Keys, Ph.D. (Missouri-Columbia)– penology, narcotic policy; D. Lara, Ph.D. (University of California-Berkeley)– cultural studies, race & ethnicity, border justice; N. Natividad, Ph.D. (Arizona State)–borderland studies, race and identity studies, immigration; C. Posadas, Ph.D. (Arizona State)– immigration and justice, juvenile justice, research methods; M. Tapia, Ph.D. (Ohio State)–crime theory, race and crime, juvenile justice; M. Valadez (Arizona State)–courts and sentencing, immigration.*

**MCJ Program Director*

C J 101G. Introduction to Criminal Justice

3 Credits

Examination of crime and justice within the broader social and cultural context of U.S. society from interdisciplinary social science perspectives. Includes critical analysis of criminal justice processes and the ethical, legal, and political factors affecting the exercise of discretion by criminal justice professionals.

C J 199. Special Topics in Criminal Justice I

1-3 Credits

Specific subjects to be announced in the Schedule of Classes. May be repeated under different topics for a maximum of 6 credits.

C J 205. Criminal Law

3 Credits

Rules, principles, and doctrines of criminal liability in the United States. The historical development, limits, and functions of the substantive criminal law. May be repeated up to 3 credits.

C J 210. The American Law Enforcement System

3 Credits

Historical and philosophical foundations of law and order. An in-depth examination of the various local, state, and federal law enforcement agencies.

C J 221. Fundamentals of Criminal Investigation

3 Credits

Investigation procedures from crime scene searches, collection of evidence, and case preparation. Community Colleges only. (Note: students completing C J 221 may not take C J 321.)

C J 230. Introduction to Corrections

3 Credits

Development of correctional philosophy, theory, and practice. Instructional and non-institutional alternatives available in the corrections process.

C J 250. Courts and the Criminal Justice System

3 Credits

Structures and functions of American courts. Roles of attorneys, judges, and other court personnel; operation of petit and grand juries, trial and appellate courts.

C J 293. Field Experience in Criminal Justice

3-6 Credits

Field experience in a public criminal justice agency or equivalent private sector organization. Supervised internship experience, conferences, and observations. Restricted to majors. Community Colleges only.

Prerequisites: C J 101G, prior arrangement and consent of instructor and a GPA of 2.0 or better in major.

C J 300. Introduction to Criminal Justice Research

3 Credits

Overview and evaluation of criminal justice research. Selection of research topics, methods of data selection and collection, analysis techniques, and presentation of findings.

Prerequisite: restricted to majors or consent of instructor.

C J 301. Advanced Research Methods

3 Credits

Study of selected quantitative and qualitative skills and their application to criminal justice research.

Prerequisite: Restricted to majors or consent of instructor.

C J 302. Crime, Justice and Society

3 Credits

Through critical analysis students build a rich understanding of the role of crime in our contemporary landscape and explore ideas and practices associated with justice, victimization, criminality, morality and righteousness. The course cultivates knowledge & awareness of the interactions between socially constructed phenomena (race, class, power, ethnicity, economic structures) and popular beliefs, policies, and practices associated with crime, punishment, and formal social control. It is recommended that you complete three of the following English courses before enrolling in this class: ENGL 111G, 203G, 211G, 218G, & 311G.

Restricted to: Criminal Justice majors.

C J 303. Introduction to Criminological Theory

3 Credits

Defining and measuring crime, crime causation, and the criminal behavior system, and their linkage to criminal justice policies, procedures, and practices. Completed two of the following: ENGL 111G, 203G, 211G, 218G, or 311G. Restricted to: C J majors.

Prerequisite(s): Restricted to majors or consent of the instructor and must have completed C J 300.

Corequisite(s): Must be enrolled or have completed third English writing class.

C J 304. Historical Perspectives of Criminal Justice Systems

3 Credits

Examines the precursors to and development of three distinct systems associated with crime and punishment in the United States: the Courts, the Police, & Corrections. By studying the historical context and socio-political backdrop in which these institutions emerged and expanded students will come to a richer understanding of them and their attendant policies, practices, conventions, and assumptions. It is recommended that you complete three of the following English courses before enrolling in this class: ENGL 111G, 203G, 211G, 218G, & 311G. Restricted to: Criminal Justice majors.

Prerequisite(s): C J 300.

C J 306. Criminal Procedural Law

3 Credits

Legal analyses of the rights of criminal defendants; legal duties and responsibilities of criminal justice personnel in the processing of criminal defendants. May be repeated up to 3 credits. Restricted to: C J majors.

Prerequisite(s): Restricted to majors, Forensic Science minors, or consent of instructor.

C J 307. Law of Evidence**3 Credits**

Evidentiary rules and concepts and their application in a criminal trial. May be repeated up to 3 credits. Restricted to: C J majors.

Prerequisite(s): Restricted to majors, Forensic Science minors, or consent of instructor.

C J 321. Criminal Investigation and Intelligence**3 Credits**

Principles of criminal investigation and intelligence production; processing cases from complaint through crime scene search, identification and collection of evidence, interviewing and interrogation, and case preparation for courts. May be repeated up to 3 credits. Restricted to: C J majors.

Prerequisite(s): Restricted to majors, Forensic Science minors, or consent of instructor.

C J 322. Organized Crime**3 Credits**

Study of national and international criminal organizations and organized crime core groups. Examination of criminal and legitimate enterprises of organized criminal syndicates. Study of tactics to combat organized crime. Current policy implications.

Prerequisite: restricted to majors or consent of instructor.

C J 331. American Correctional Institutions**3 Credits**

Structure, organization, and operations of United States jails and prisons. Overview of correctional standards and classification systems, emphasizing current theory and practice.

Prerequisite: restricted to majors or consent of instructor.

C J 332. Correctional Law**3 Credits**

Federal and state laws and rules of post-conviction procedures; rights of the convicted related to sentencing, appeals, clemency, and restoration of rights.

Prerequisite: restricted to majors or consent of instructor.

C J 333. Juvenile Corrections**3 Credits**

Development and implementation of juvenile facilities and community programs. Effectiveness of current corrections practices. Restricted to majors.

C J 345. Victimology**3 Credits**

Study of risk factors in crime victimization, the impact of crimes upon victims, and the role of the victim in the criminal justice system.

Prerequisite: restricted to majors or consent of instructor.

C J 346. Psychology and the Justice System**3 Credits**

Analysis of psychological underpinnings of criminal behavior and the implications of these psychological principles for criminal justice policy. May be repeated up to 3 credits. Restricted to: C J majors.

Prerequisite(s): Restricted to majors, Forensic Science minors, or consent of instructor.

C J 347. Sex Crimes**3 Credits**

Dynamics of sex crimes for victims and offenders, plus consideration of the legal and correction systems' response to sex crimes. Restricted to majors.

C J 348. Serial Killers**3 Credits**

Overview and critical assessment of serial homicide and its relevance for contemporary U.S. society. Focus on factors influencing definitions and cultural understanding of serial homicide.

Prerequisite(s): 60 credit hours.

C J 360. The Juvenile Justice System**3 Credits**

History, development, and philosophy behind a separate juvenile justice system. Role of the juvenile court, evaluation of juvenile law and procedure, and the processing of juvenile offenders.

Prerequisite: restricted to majors or consent of instructor.

C J 380. Introduction to Terrorism**3 Credits**

Overview of the phenomenon of terrorism, psychological and sociological theories of terrorism, and various contemporary governmental policies.

C J 391. Special Readings in Criminal Justice**1-3 Credits**

Individually chosen subject areas not readily available in other courses. May be repeated for a maximum of 6 credits under different subtitles. Restricted to majors.

Prerequisites: at least a 2.5 GPA and consent of instructor.

C J 393. Internship in Criminal Justice**1-12 Credits**

Field experience in a local, state, or federal criminal justice or private security agency. Includes orientation, observation, conferences, and work experience. Credits limited to six if student has taken C J 293. May be repeated for a maximum of 12 credits. Restricted to majors. Graded S/U.

Prerequisites: consent of instructor and GPA of 2.5 or better.

C J 399. New Mexico Law**3 Credits**

Same as GOVT 399, JOUR 399, SOC 399, and HIST 399.

C J 405. Juvenile Courts and Law**3 Credits**

History, development, and current status of juvenile courts. Legal status of juveniles in court and constitutional protections afforded them. Restricted to majors.

C J 410. Criminal Justice Administrative Systems**3 Credits**

Administrative structures in criminal justice agencies and institutions; relationship of administrative structures to practical police, courts, and corrections problems.

Prerequisite: restricted to majors or consent of instructor.

C J 414. Race, Crime and Justice**3 Credits**

Historical and contemporary analysis of the relationship between race and crime in the United States with emphasis upon human equality and fairness. Overview of racial and ethnic social categorizations and how they impact law and order.

C J 416. Global Perspectives on Youth and Drug Use**3 Credits**

Overview of global drug use among young people, comparative legal structures, formal and informal responses. Restricted to C J, ANTH, GOVT, SOC, W S, S WK majors.

C J 417. Drugs In Our World**3 Credits**

Comparative analysis of patterns and theories of drug use, formal government mitigation strategies.

C J 424. Forensic Law**3 Credits**

Overview of the rules and issues related to the use of scientific information in the legal process. May be repeated up to 3 credits.

Restricted to: C J majors.

Prerequisite(s): C J major, Forensic Science minors, or consent of instructor.

C J 425. Issues in Ethics, Law, and Criminal Justice**3 Credits**

Examination of the key ethical and decision-making dilemmas facing professionals working in the field of law and criminal justice.

Prerequisite: restricted to majors or consent of instructor.

C J 427. Race and Crime in Film**3 Credits**

Critical analysis of film where messages relating race and crime are present, with emphasis on how this imagery informs problem definition, policies, and practice within the criminal justice system.

Prerequisite(s): 60 credit hours.

C J 428. Mexican-American and Issues of Social Justice**3 Credits**

In this course we will explore and discuss social issues related to the Mexican American community in the U.S., with special emphasis on their collective historical struggles and contributions to society. We will discuss the political, economic and cultural forces that exemplify their experience as a "whole."

Prerequisite(s): Students must have completed C J 300 or research methods equivalent or consent from the instructor.

C J 429. Immigration & Justice**3 Credits**

This course is designed to introduce undergraduate students to the complexities of immigration in the United States through a social justice lens. Students will explore the intersections of race, ethnicity, gender, and class in immigration through different groups' historical and contemporary experiences, including immigrants' experience with the criminal justice system.

Prerequisite(s): Student must have completed C J 300 or Research Methods equivalent or consent of the instructor.

C J 430. The U.S. Supreme Court and the Criminal Justice System**3 Credits**

History and workings of the U.S. Supreme Court in the context of the criminal justice system from writs of certiorari to last minute appeals in death penalty cases, including study of specific U.S. Supreme Court cases in the areas of criminal law, criminal procedural law, 8th amendment prison sentencing issues, and death penalty cases. Consent of Instructor required. Restricted to: Criminal Justice majors.

C J 431. Family Violence and the Law**3 Credits**

This course will examine how practitioners are involved in the criminal justice system in areas of family violence including: child physical abuse; child sexual abuse; child neglect; child ritualistic abuse; child exploitation; sibling abuse; intimate partner abuse; stalking; sexual abuse and elder abuse. This course will be helpful for those who wish to go into law enforcement or victim's advocacy work. Restricted to: Criminal Justice majors.

C J 432. Issues in Criminal Justice**3 Credits**

Seminar on problems and conflicts encountered in major criminal justice issues. Topics announced in the Schedule of Classes. May be repeated for unlimited credits under different subtitles.

C J 434. Probation, Parole, and Community Corrections**3 Credits**

Structure, organization, and operation of probation, parole, and other community-based correctional programs in the U.S. Overview of historical and recent trends in the supervision of offenders in the community and in the development of alternatives to incarceration. Analysis of issues related to community correctional policies and practices. Restricted to majors.

C J 435. Political Penology**3 Credits**

Comparative analysis of incarceration and sanctions as punishment for crimes of conscience, religious intolerance, and dissidence.

C J 436. COURTS AND SENTENCING**3 Credits**

This course will focus on the structure, organization, and operation of the state and federal court systems in the United States. It examines courtroom decision making and dynamics of courthouse justice—prosecutorial discretion, plea bargaining practices, jury and judicial decision making and sentencing. Additional topics will include racial, gender and class disparities in sentencing outcomes and the impact of recent reforms directed at the criminal court system. Restricted to: Criminal Justice majors.

C J 437. WRONGFUL CONVICTIONS**3 Credits**

This course will address causes (e.g. problems in witness identification, forensics, police and attorney conduct) as well as results of erroneous dispositions (e.g. compensation, media dynamics, possible reforms) in a critical analysis. Appropriate for prospective police, legal, and policy professionals. Restricted to: Criminal Justice majors.

C J 440V. Comparative Criminal Justice Systems**3 Credits**

Cross-national study of selected Western and non-Western legal systems. Comparison of structures and functions of police, court systems, and corrections in different systems.

C J 449. Senior Seminar**3 Credits**

Problems and conflicts encountered in major attempts to control crime. Restricted to majors.

Prerequisite(s): C J 101, C J 205, C J 210, C J 230, C J 250, C J 300, C J 301, 90 credit hours completed.

C J 451. Border Violence and Justice**3 Credits**

Critical analysis of violence and systems of justice along border regions. Examines causes and correlates of violence experienced by those living in border regions and the social responses to that violence.

C J 452. Upper World Crime**3 Credits**

Corporate crime, white collar crime and political abuse and corruption; executive and corporate criminal behavior, and violations of the public trust by elected and appointed officials.

Prerequisite: restricted to majors or consent of instructor.

C J 453. Women and Justice**3 Credits**

Critical analysis of the impact of the criminal justice system, race and class upon the lives of women. Restricted to majors.

C J 454. Human Trafficking**3 Credits**

Study of global human trafficking, its causes and costs, and mitigation strategies. Restricted to C J, GOVT, SOC, W S, S WK majors.

C J 455. Feminist Research Methods**3 Credits**

Feminist research practices and methodologies utilized in various disciplines. Definitions of research, what constitutes valid inquiry, how research can be feminist, and what it means to do interdisciplinary work. Same as W S 455.

C J 501. Research Methods in Criminal Justice**3 Credits**

Research design, methods of data collection and analysis, and preparation of research reports. Restricted to majors.

Prerequisite: C J major or consent of instructor.

C J 510. Advanced Criminal Justice Administrative Systems**3 Credits**

Structure and operations of criminal justice agencies and institutions; relationships of structure and operations to practical police, courts, and corrections problems.

C J 511. Nature of Crime**3 Credits**

Defining and measuring crime, crime causation, and criminal behavior systems. Restricted to majors.

Prerequisite: C J major or consent of instructor.

C J 514. Advanced Race, Crime, and Justice**3 Credits**

Advanced analysis of the historical and contemporary relationship between race and crime in the United States with emphasis upon human equality and fairness. Overview of racial and ethnic social categorizations and how they impact law and order.

C J 515. A Course on Punishment**3 Credits**

Exploration and analysis of the idea and practice of punishment through a variety of philosophical perspectives, seeking to understand its moral and practical viability as employed in contemporary society, including its application within the criminal justice system.

C J 520. Advanced Girls, Women & Crime**3 Credits**

Advanced critical social science analysis of concepts of violence and justice as experienced by women impacted by the criminal justice system. Restricted to C J, W S majors. Crosslisted with: W S 520

C J 521. Law and Social Control**3 Credits**

The development and implementation of criminal law. Consideration of functionalist, conflict, and interpretive theories and research. Restricted to majors.

Prerequisite: C J major or consent of instructor.

C J 524. Forensic Law**3 Credits**

Rules and policy implications related to the use of scientific information in legal process. Restricted to majors.

Prerequisite: C J major or consent of instructor.

C J 525. Issues in Ethics, Law, and Criminal Justice**3 Credits**

Examination of the key ethical and decision-making dilemmas facing professionals working in the fields of law and criminal justice. Restricted to majors.

C J 526. Advanced Race & Environmental Justice**3 Credits**

Advanced analysis of concepts of justice and social justice responses across the 20th and 21st centuries to environmental degradation affecting communities of differing racial and ethnic backgrounds.

C J 527. Advanced Race & Crime in Film**3 Credits**

Advanced critical analysis of film where messages relating race and crime are present, with emphasis on how this imagery informs problem definition, policies, and practice within the criminal justice system.

C J 529. Advanced Immigration & Justice**3 Credits**

Advanced analysis of the complexities of immigration in the United States through a social justice lens. Students will explore the intersections of race, ethnicity, gender, and class in immigration through different groups' historical and contemporary experiences, including immigrants' experience with the criminal justice system.

C J 530. Advanced U.S. Supreme Court and the Criminal Justice System**3 Credits**

Advanced history and workings of the U.S. Supreme Court in the context of the criminal justice system from writs of certiorari to last minute appeals in death penalty cases, including study of specific U.S. Supreme Court cases in the areas of criminal law, criminal procedural law, 8th amendment prison sentencing issues, and death penalty cases. Restricted to: Criminal Justice majors.

C J 531. Advanced Family Violence and the Law**3 Credits**

This course will examine how practitioners are involved in the criminal justice system in areas of family violence including: child physical abuse; child sexual abuse; child neglect; child ritualistic abuse; child exploitation; sibling abuse; intimate partner abuse; stalking; sexual abuse and elder abuse. This course will be helpful for those who wish to go into law enforcement or victim's advocacy work. Restricted to: Criminal Justice majors.

C J 532. Advanced Issues in Criminal Justice (f, s, sum)**3 Credits**

Seminar on problems and conflicts encountered in major criminal justice issues. Topics announced in the Schedule of Classes. May be repeated under different subtitles for unlimited credit.

C J 535. Advanced Political Penology**3 Credits**

Advanced comparative analysis of incarceration and sanctions as punishment for crimes of conscience, religious intolerance, and dissidence.

C J 537. Advanced Wrongful Convictions**3 Credits**

This course will address causes (e.g. problems in witness identification, forensics, police and attorney conduct) as well as results of erroneous dispositions (e.g. compensation, media dynamics, possible reforms) in a critical analysis. Appropriate for prospective police, legal, and policy professionals. Restricted to: Criminal Justice majors.

C J 541. Seminar in Criminal Justice Policy Analysis and Planning**3 Credits**

Seminar on policy development, planning and implementation processes in criminal justice. Links formal policy goals as they relate to theory and outcomes. Topics announced in the Schedule of Classes. Restricted to majors.

Prerequisite: C J major or consent of instructor.

C J 545. Advanced Victimology
3 Credits

Study of risk factors in crime victimization, the impact of crimes upon victims, and the role of the victim in the criminal justice system. Consideration of the impact of criminal justice policy on victim outcomes. Same as W S 545.

C J 554. Advanced Human Trafficking
3 Credits

Advanced study of global human trafficking, its causes and costs, and mitigation strategies. Restricted to C J, GOVT, SOC, W S, S WK majors.

C J 555. Advanced Feminist Research Methods
3 Credits

Advanced feminist research practices and methodologies utilized in various disciplines. Definitions of research, what constitutes valid inquiry, how research can be feminist, and what it means to do interdisciplinary work. Same as W S 555.

C J 560. Juvenile Justice Systems
3 Credits

Policy development and operations in police, court, and correctional agencies in response to juveniles. Analysis of programs designed to identify, prevent and treat juvenile offenders. CJ 570. Probation and Parole 3 cr. Advanced analysis of goals, theories and practices of all forms of correction in the community, including probation, parole, plus other intermediate sanctions. Restricted to majors.

C J 581. Community Policing
3 Credits

Overview and analysis of community policing issues from various perspectives. Analysis of strategies that facilitate police and community collaboration. Restricted to majors.

C J 591. Directed Readings in Criminal Justice
3 Credits

Supervised review of literature in specialized areas of the nature of crime, law and social control, and criminal justice administration. Consent of instructor required.

C J 592. Independent Research
1-3 Credits

Design and execution of a criminal justice research project. Requires a written paper in standard format, including literature review, hypotheses, methodology, findings, and conclusions.

C J 593. Internship
3-6 Credits

Supervised placement in an applied or research setting in criminal justice. An in-depth written report of the project is required. Restricted to C J majors. May be repeated for a maximum of 6 credits. Graded S/U.
Prerequisites: introductory graduate course in the area of the internship and consent of the internship supervisor.

C J 599. Master's Thesis
15 Credits

Thesis.

Child Advocacy Studies - Undergraduate Minor

The interdisciplinary undergraduate minor in Child Advocacy Studies (CAST) provides mandated reporters and responders in social work, public health, nursing, criminal justice, psychology, education, family studies, cooperative extension and other disciplines with evidence-based, culturally relevant knowledge and skills to improve the outcomes for maltreated children in New Mexico or wherever their paths may take them.

The core courses, worth three (3) credits each, will be focused on the needs specific to New Mexico and will adhere to both statewide and national best practice standards on the welfare of children. The remaining nine (9) out of the total of 18 required credits will come from courses that students choose from a list of selected courses already being taught across the campus. To declare this minor please contact the Family and Consumer Sciences department. For more information, please visit: <http://aces.nmsu.edu/academics/FCS/cast.html>

Criminal Justice - Bachelor of Criminal Justice

Departmental Requirements

Lower Division (100 and 200-level)		
C J 101G	Introduction to Criminal Justice	3
C J 205	Criminal Law	3
Upper-Division (300 and 400-level) ¹		
Select 3-4 credits from the following:		3
C J 300	Introduction to Criminal Justice Research	
GOVT 300	Political Research Skills	
PSY 310	Experimental Methods	
SOC 352	Social Research: Methods	
Select 9 credits from the following:		9
C J 301	Advanced Research Methods (or any statistics class)	
C J 302	Crime, Justice and Society	
C J 425	Issues in Ethics, Law, and Criminal Justice	
One course from the following:		3
C J 303	Introduction to Criminological Theory	
C J 304	Historical Perspectives of Criminal Justice Systems	
C J 414	Race, Crime and Justice	

Criminal Justice Electives

Select 12 credits from upper division Criminal Justice Electives. ²

Nondepartmental Requirements

Select one of the following: ³		4-14
Second Language Requirement		
MATH 191G	Calculus and Analytic Geometry I	
American Sign Language through C D 476		
Select two Viewing a Wider World courses ³		6
Select 3 credits from the following:		3

PHIL 100G	Philosophy, Law and Ethics	
PHIL 201G	Introduction to Philosophy	
PHIL 211G	Informal Logic	
PHIL 223G	Ethics	
Upper division Philosophy course		
MATH 121G	College Algebra ⁴	3
or STAT 251G	Statistics for Business and the Behavioral Sciences	
ENGL 111G	Rhetoric and Composition	4
Select two from the following:		6
ENGL 203G	Business and Professional Communication	
ENGL 211G	Writing in the Humanities and Social Sciences	
ENGL 218G	Technical and Scientific Communication	
ENGL 311G	Advanced Composition	
ENGL 318G	Advanced Technical and Professional Communication	

General Electives

Select sufficient credits to bring the total credits to 120, including 48 upper-division credits.⁵ 51

Total Credits 110-120

- ¹ Prior to enrolling in upper division courses, lower division courses must be completed or final courses must be in progress.
- ² Not to include C J 393 Internship in Criminal Justice, or any criminal justice required course. Courses that fall under multiple content areas may only be counted once. Please visit our website for specific courses in each of these content areas <http://crimjust.nmsu.edu>.
- ³ Students seeking the BCJ degree must complete the College of Arts and Sciences second language requirement, through the 212 or 214 level as indicated in Section III, (see second language requirement (p. 176) under "College Degree Requirement (p. 176)" section of this catalog) or MATH 191G Calculus and Analytic Geometry I, or American Sign Language through C D 476 American Sign Language III, and two Viewing a Wider World courses, one each from two different colleges and outside of criminal justice.
- ⁴ Or higher than Math 121G, excluding MATH 210G Mathematics Appreciation, or higher than STAT 251G.
- ⁵ Please visit our website for additional requirements <http://crimjust.nmsu.edu>.

A student must earn a C- or better to receive credit for any departmental and nondepartmental requirement for the BC J degrees.

Criminal Justice - Master of Criminal Justice

All candidates, regardless of chosen degree option, must complete a final examination. Examination requirements vary by degree option. Please contact the director of the MCJ program or consult the Department of Criminal Justice website (<http://crimjust.nmsu.edu/criminal-justice-graduat>) for details.

Thesis Option (33 Credits)

Thesis students must submit a thesis proposal to their faculty committee for approval and subsequently complete the approved thesis project. An approved thesis proposal is one wherein the thesis committee

determines the student demonstrates a comprehensive understanding of the nexus of theory, method, and policy as it applies to the proposed thesis project. At the discretion of the thesis committee the proposal may be considered inadequate and the student is required to revise and resubmit the thesis proposal until the committee determines the proposal is satisfactory. The final examination minimally includes a defense of the completed thesis, but may also include a general examination based upon the candidate's program of study. The minimum coursework requirements are displayed below.

Required Courses 15

C J 511	Nature of Crime
C J 514	Advanced Race, Crime, and Justice
or C J 521	Law and Social Control
C J 525	Issues in Ethics, Law, and Criminal Justice
C J 501	Research Methods in Criminal Justice
or C J 555	Advanced Feminist Research Methods
C J 510	Advanced Criminal Justice Administrative Systems
or C J 541	Seminar in Criminal Justice Policy Analysis and Planning

Master's Thesis Credits

C J 599	Master's Thesis	6
---------	-----------------	---

General Electives

Select 12 credits from General Electives.¹ 12

Total Credits 33

- ¹ Students may not count C J 593 Internship or C J 592 Independent Research credit toward their elective requirement. No more than three total credits of C J 591 Directed Readings in Criminal Justice coursework may be used as electives; a minimum of 3 of the 12 credit general elective requirement must come from the Department of Criminal Justice.

A minor is optional (contact the director of the MCJ program or consult the Department of Criminal Justice web site, <https://crimjust.nmsu.edu/>, for details) and may result in more than 33 total credits for the degree.

Focused Coursework Option (36 Credits)

Focused coursework students must pass a written comprehensive examination following completion of the required courses. Students not passing the examination will be required to wait until the following semester to retake the examination. The minimum course requirements are displayed below.

Required Courses 15

C J 511	Nature of Crime
C J 514	Advanced Race, Crime, and Justice
or C J 521	Law and Social Control
C J 525	Issues in Ethics, Law, and Criminal Justice
C J 501	Research Methods in Criminal Justice
or C J 555	Advanced Feminist Research Methods
C J 510	Advanced Criminal Justice Administrative Systems

or C J 541	Seminar in Criminal Justice Policy Analysis and Planning	
C J Electives		
Select 12 credits from electives from courses offered by the Department of Criminal Justice, to be selected in consultation with a student's advisor. ²		12
General Electives/Minor		
An additional 9 credits of electives, to be selected in consultation with a student's advisor. ³		9
Total Credits		36

² No more than three total credits of C J 593 Internship or C J 591 Directed Readings courses may be used as Criminal Justice electives. C J 592 Independent Research may not be used as Criminal Justice Electives for this option.

³ No more than three credits of C J 593 Internship or C J 591 Directed Readings may be used to fulfill the general elective requirement. C J 592 Independent Research may not be used as Criminal Justice Elective for this option.

A minor is optional (contact the director of the MCJ program or consult the Department of Criminal Justice web site, <http://crimjust.nmsu.edu/degrees.htm>, for details) and may result in more than 36 total credits for the degree.

Minimum Grade Requirement

Students must earn a minimum B- grade in all required core courses. This applies to both options: Thesis and Focused Coursework as well as to both programs: On-Campus (traditional) and Online.

Forensic Science - Undergraduate Minor

Forensic Science is the application of principles and techniques of scientific analysis in a legal context. Forensic scientists study physical evidence to resolve issues involving criminal investigations, environment analyses and similar areas of research.

A student must pass 18 credits with a grade of C- or higher from the following curriculum to earn the Forensic Science minor. No courses may be taken S/U. Students must take at least 6 credits from departments outside their major(s). At least 9 credits in any minor must be upper division. Students must register in the minor before enrolling in any upper division Criminal Justice courses.

The following curriculum represents minimum requirements for a minor. Students interested in a career in Forensic Science are encouraged to take additional courses from those listed below.

The Forensic Minor requires courses from three sections: (1) 6 credits from the list of Core Courses; (2) 3 credits from an additional course not already completed; and (3) 9 credits from one of the four tracks listed below.

Core Courses

Select 6 credits from the following:	6
C J 306	Criminal Procedural Law
C J 321	Criminal Investigation and Intelligence
C J 424	Forensic Law
PHYS 304	Forensic Physics

Additional Course

Select 3 credits from areas I or II above not already completed.	3
Total Credits	9

Track A: Laboratory Analysis

Students should check the catalog to ensure that they have taken prerequisites before enrolling in these courses.

Select one from the following:	4-5
BIOL 221 & 221 L	Introductory Microbiology and Introductory Microbiology Laboratory
BIOL 311 & 311 L	General Microbiology and General Microbiology Laboratory
Select 4-5 credits from the following:	4-5
BIOL 330	Comparative Anatomy and Embryology
BIOL 354 & 354 L	Physiology of Humans and Laboratory of Human Physiology
BCHE 395	Biochemistry I
BCHE 396	Biochemistry II
CHEM 371	Analytical Chemistry
TOX 361	Basic Toxicology
TOX 461	Toxicology I
PHYS 211G & 211GL	General Physics I and General Physics I Laboratory
Total Credits	8-10

Track B: Human Forensic Analysis

Honors, Special Topics, or Independent Studies courses if approved by Academic Head, Department of Criminal Justice.

Select 9 credits from the following: ¹	9
ANTH 130G & 130GL	Human's Place in Nature: Introduction to Biological Anthropology and Human's Place in Nature Laboratory
ANTH 315	Introduction to Archaeology
ANTH 355	Physical Anthropology
ANTH 357V	Medical Anthropology
ANTH 388	Intermediate Archaeological Field School
BIOL 330	Comparative Anatomy and Embryology ²
ANTH 474	Human Osteology ²
ANTH 477	Zooarchaeology
Total Credits	9

¹ Recommended sequence ANTH 130G Human's Place in Nature: Introduction to Biological Anthropology/ANTH 130GL Human's Place in Nature Laboratory, ANTH 355 Physical Anthropology or ANTH 315 Introduction to Archaeology, and then ANTH 474 Human Osteology.

² Courses have prerequisites, and students should check the catalog to ensure that they have taken prerequisites before enrolling in these courses.

Track C: Forensic Psychology

Students should check the catalog to ensure that they have taken prerequisites before enrolling in these courses.

Required Courses

Select three from the following: 9

Principles of Behavior

PSY 317	Social Psychology
PSY 321	Psychology of Personality
PSY 324	Sexual Behavior
PSY 330	Psychology and the Law
PSY 376	Evolutionary Psychology

Psychological Treatment

PSY 302	Abnormal Psychology
PSY 445	Clinical Psychology
C J 346	Psychology and the Justice System

Total Credits 9

Track D: General

Select 9 credits from the following: 9

ANTH 474	Human Osteology ³
C J 306	Criminal Procedural Law
C J 307	Law of Evidence
C J 321	Criminal Investigation and Intelligence
C J 346	Psychology and the Justice System
C J 424	Forensic Law
PSY 330	Psychology and the Law ³
PHYS 304	Forensic Physics

Total Credits 9

³ Courses have prerequisites, and students should check the catalog to ensure that they have taken prerequisites before enrolling in these courses.

Law and Society - Undergraduate Supplemental Major

The Law and Society Program is administered by the Department of Government and offers an interdisciplinary major for students interested in pursuing law school or careers that incorporate a strong legal element, such as government, law enforcement, business and social work. As a supplementary major, it must be taken in conjunction with a regular major. Some courses may double-count toward a student's regular major or General Education requirements. Students should check with academic advisors in their primary major. To declare this supplemental major please contact the College of Arts & Sciences Student Records Office. For more information please visit: <https://deptofgov.nmsu.edu/academic-programs/law-society/>.

Economics, Applied Statistics, and International Business

Undergraduate Program Information

The Department of Economics, Applied Statistics and International Business in the College of Business offers an economics major to Bachelor of Arts candidates in the College of Arts and Sciences. (Additional information may be found under the Economics and International Business (p. 426) section in the College of Business chapter).

Degrees for the Department

Economics - Bachelor of Arts (p. 273)

Minors for the Department

Economics - Undergraduate Minor (p. 274)

ECON 201G. Introduction to Economics

3 Credits

Economic institutions and current issues with special emphasis on the American economy.

ECON 251G. Principles of Macroeconomics

3 Credits

Macroeconomic theory and public policy: national income concepts, unemployment, inflation, economic growth, and international payment problems.

ECON 252G. Principles of Microeconomics

3 Credits

Microeconomic theory and public policy: supply and demand, theory of the firm, market allocation of resources, income distribution, competition and monopoly, governmental regulation of businesses and unions.

ECON 304. Money and Banking

3 Credits

Income measurement and determination, monetary and fiscal policies.

Prerequisite: ECON 251G or equivalent, or consent of instructor.

ECON 311. Intermediate Macroeconomic Theory

3 Credits

Analysis of gross domestic product, the Classical, Keynesian, and Neo-Keynesian theories of income, employment, inflation and growth.

Prerequisite(s): ECON 251G or equivalent.

ECON 312. Intermediate Microeconomic Theory

3 Credits

Contemporary economic theory with emphasis upon value and distribution.

Prerequisite(s): ECON 252G or equivalent.

ECON 324V. Developing Nations

3 Credits

Economic analysis of problems related to development of developing nations. Issues such as growth, industrialization, poverty, population, international trade, foreign debt, and international economic relations.

ECON 325V. Economic Development of Latin America**3 Credits**

Economic analysis of problems related to development in Latin America, including the agrarian problem, debt and austerity programs, industrialization, inflation and unemployment, the drug trade, U.S.-Latin American relations, development strategies. Also individual countries problems.

ECON 332. Public Finance**3 Credits**

This course will examine the roles of government in modern, market-oriented, mixed economies. It will examine justifications for government participation in resource allocation, income distribution, and economic stabilization focusing primarily on the fiscal functions of government, taxation and public expenditure. Students will apply basic microeconomic analysis to analyze the impacts of public taxation and expenditures on economic decisions made elsewhere in the economy. In this course the emphasis will be on understanding the workings of public finance in fiscal federalist systems like the United States, but the principles taught will be applicable across other economic systems. Prerequisites: ECON 252

ECON 335V. Business and Government**3 Credits**

Relation of government to business through regulation; political, legal, and social implications. Crosslisted with: MGT 335G

ECON 336. Labor Economics**3 Credits**

This course aims at developing students' understanding of how the labor market works. Topics to be covered include: labor supply and demand, wage differentials, wage structure, unemployment, gender issues, labor market discrimination, and migration. May be repeated up to 3 credits.

Prerequisite(s): ECON 252G.

ECON 337V. Natural Resource Economics**3 Credits**

Same as AG E 337V.

Prerequisite: ECON 201 or ECON 252.

ECON 340. American Economic History**3 Credits**

The rise of big business and organized labor, increasing price rigidities, and growing government intervention. Same as HIST 340.

ECON 384V. Water Resource Economics**3 Credits**

Use of economic principles to evaluate current and emerging issues in water resources. Applications focus on use of economic methods of analysis to current policy decisions surrounding agricultural, municipal, industrial, and environmental uses of water. Same as AG E 384V.

Prerequisite: AG E 100 or ECON 252G.

ECON 401. Managerial Economics**3 Credits**

Application of economic theory to problems of business management.

Prerequisite(s): ECON 252G and MATH 142 or equivalent, or consent of instructor.

ECON 404. Collegiate Advisory Board, Federal Reserve**3 Credits**

Students serve on the Collegiate Advisory Board of the El Paso branch of the Federal Reserve Bank of Dallas. Guest speakers provide an overview of the Federal Reserve System, role of monetary policy, and issues facing specific industries in the local, national, and global economies. Students prepare reports, including a final paper, on an assigned industry in the regional or state economy and the current economic performance of their industry. Students must be of junior rank or higher with a GPA of at least 3.5. Consent of Instructor required.

ECON 405. Introductory Econometrics**3 Credits**

Multiple regression and correlation applied to economics and business; inference techniques; significance tests; simultaneous equations, estimation, and problems. May be repeated up to 3 credits.

Prerequisite(s): A ST 251G or STAT 251G or A ST 311 (or equivalent).

ECON 406. The Economics of Sports**3 Credits**

Applying the tools of economic analysis to a particular industry and gaining an in-depth knowledge of the interaction of professional sports teams and leagues with the economy and society. Same as AG E 406.

Prerequisites: one previous course in economics or consent of instructor.

ECON 432V. Economics of Health Care**3 Credits**

Analysis of the allocation of resources in the field of health and medical care.

ECON 449. Open Economy Macroeconomics**3 Credits**

This course studies theoretical and empirical macroeconomics in international dimension. It covers from the fundamental concepts of national income and growth, monetary/fiscal and exchange rate policies, foreign exchange markets, international trade and finance, and regionalization/economic integration to the impact analysis of these macroeconomic fundamentals in the open economy. Crosslisted with: I B 449.

Prerequisite(s): FIN 341 OR ECON 372.

ECON 450. International Economics**3 Credits**

Trade and capital flows between countries, international payments, government policy in balance-of-payments and tariff matters, international organizations. Crosslisted with: I B 450

Prerequisite(s): ECON 251G and ECON 252G.

ECON 457. Mathematical Economics**3 Credits**

Application of mathematical tools, especially the calculus, to economic theory.

Prerequisite: one upper-division economics course.

ECON 489. Senior Economics Seminar**3 Credits**

Seminar primarily for economics majors in their final semester. Provides an opportunity to apply economic theory to a broad variety of topics.

Prerequisite: ECON 371 or ECON 372.

ECON 490. Selected Topics**1-3 Credits**

Current topics in economics. Subject matter to be designated for each semester.

ECON 498. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with the prior approval of the department head. May be repeated for a maximum of 3 credits.

Prerequisite: junior or above standing and consent of instructor.

ECON 503. Managerial Economics**3 Credits**

Theory and application of microeconomics to the management of organizations.

Prerequisite(s): A ST 251G or 311 or equivalent with B or better.

ECON 545. Econometrics II**3 Credits**

Application of statistical techniques to estimation of economic relationships: demand functions, production and cost functions, and macroeconomic equations. May be repeated up to 3 credits.

Prerequisite(s): ECON 251G, ECON 252G, STAT 251G or A ST 311, and AEEC 540.

ECON 550. Special Topics**1-3 Credits**

Seminars in selected current topics in the various areas of economics. Prerequisites vary according to the topic being offered.

ECON 571. Regulatory Policy and Industry Analysis: Electricity I**3 Credits**

Regulatory policy and economic analysis related to the Electric Industry. Topics include: characteristics of a utility and legal justification for regulation; characteristics and functions of a regulatory commission; history and structure of the industry; technology and network design; revenue requirements; cost allocation; and basic retail rate design. May be repeated up to 3 credits.

Prerequisite(s): ECON 252G, FIN 341, or consent of instructor.

ECON 572. Regulatory Policy and Industrial Analysis: Water and Natural Gas**3 Credits**

Regulatory policy and economic analysis related to the Natural Gas and Water industries. Topics include: history and structure of the industry; technology and network design; revenue requirements; cost allocation; and retail rate design.

ECON 573. Regulatory Policy and Industry Analysis: Electricity II**3 Credits**

Regulatory policy and economic analysis related to the Electric industry. Topics include: optimal generation mix; ancillary services; environmental policies; rate case procedures and strategies for effective testimony; advanced retail rate design; wholesale exchanges; unbundled transmission tariffs; market institutions and how different markets function; state and federal deregulation policies; Federal Energy Regulatory Commission orders and policies; demand-side management; and regulatory treatment of non-traditional retail services. Consent of instructor required.

Prerequisite(s): ECON 571 or consent of instructor.

ECON 574. Advanced Seminar Regulatory Policy and Industry Analysis**3 Credits**

Advanced seminar and writing course specializing in regulatory policy and regulatory casework. Topics Include: special policy & regulatory issues in telecommunications, electricity, natural gas, and water; preparation of written testimony; expert witness effectiveness including cross-examination; and contested case management. This course involves extensive reading and writing assignments. Consent of instructor required.

Prerequisite(s): ECON 571 or consent of instructor.

ECON 581. International Economics**3 Credits**

Trade and capital flows between countries, international payments, government policy in balance-of-payments and tariff matters, international organizations. Recommended preparation, ECON 371 and 372. May be repeated up to 3 credits.

Prerequisite(s): ECON 251G and ECON 252G.

ECON 582. Economics of Health Care**3 Credits**

Analysis of the allocation of resources in the field of health and medical care. Taught with ECON 432V with differentiated assignments for graduate students.

ECON 596. Independent Study**3 Credits**

Individual study program. Each offering will cover a subtitle. Maximum of 3 credits in a semester and 6 credits in a program. Consent of instructor required.

Economics - Bachelor of Arts

The study of economics can lead to career positions in economics and related managerial and technical specialties in businesses, financial institutions, government and education. Qualified students are also prepared for graduate study in economics, business administration including management and law. Students who plan to pursue graduate work in economics or to become professional economic analysts should consider taking supplementary courses in accounting, computer science, mathematics, quantitative economics and/or statistics, in addition to those listed below as required.

Requirements

A student must earn a grade of C- or better in the nondepartmental requirements, and a cumulative GPA of 2.5 in the 27 hours of departmental requirements.

General Education Courses		35
Viewing a Wider World Courses		6
Nondepartmental Requirements		
ACCT 221	Financial Accounting	3
MATH 120	Intermediate Algebra	3
MATH 142G	Calculus for the Biological and Management Sciences	3
MATH 121G	College Algebra	3
STAT 251G	Statistics for Business and the Behavioral Sciences	3
or A ST 311	Statistical Applications	
Departmental Requirements		
ECON 251G	Principles of Macroeconomics	3
ECON 252G	Principles of Microeconomics	3
ECON 304	Money and Banking	3
ECON 311	Intermediate Macroeconomic Theory	3

ECON 312	Intermediate Microeconomic Theory	3
ECON 405	Introductory Econometrics	3
ECON 457	Mathematical Economics	3
ECON 489	Senior Economics Seminar	3
Select 9 additional credits numbered 300 or above, including at least one course from the following to bring total upper-division in major to 27:		9
ECON 332	Public Finance	
ECON 336	Labor Economics	
ECON 449	Open Economy Macroeconomics	
ECON 450	International Economics	
Electives		
Select sufficient electives to bring total credits to 120, including 48 upper-division.		31
Total Credits		120

Economics - Undergraduate Minor

A minor in economics consists of 18 or more credit hours of approved course work in economics of which at least 12 are numbered 300 or higher, all completed with a grade of C- or higher. Please note that the minor in economics is not available to Bachelor of Individualized Studies (BIS) or Bachelor of Applied Studies (BAS) students.

Required Courses

ECON 251G	Principles of Macroeconomics	3
ECON 252G	Principles of Microeconomics ¹	3
ECON 304	Money and Banking	3
ECON 401	Managerial Economics	3
Select 6 credits from any upper-division economics courses (numbered 300 or higher).		6
Total Credits		18

¹ ECON 201G Introduction to Economics, may be substituted for one of these with the approval of the department head.

English

Undergraduate Program Information

The Department of English offers the Bachelor of Arts (BA) in English as the cornerstone of studies in the humanities. This rich and versatile major provides students with a source of personal enrichment as well as verbal, analytical and cultural skills that are readily adaptable to a variety of careers. The English curriculum includes courses in literature, language, creative writing, technical and professional communication, rhetoric, cultural studies, digital media and film. Our majors go on to succeed in a wide range of professions, including secondary and post-secondary education, business, government, publishing and law. We offer four different major emphases that students can tailor to their individual needs, in:

1. English,
2. Creative Writing,
3. Literature, Language, and Culture, and
4. Rhetoric, Digital Media and Professional Communication.

The department provides strong and personalized advising designed to help students reach their full academic potential and future career goals.

The department also offers minors in:

- English;
- creative writing;
- literature;
- medieval and Early Modern studies; and
- rhetoric and professional communication.

Further information about career opportunities, emphases and minors is available from the Department of English. Students who wish to pursue English as a double major may eliminate one elective from the departmental requirements. Students are required to fulfill a second language requirement of one year. Please refer to the Arts and Sciences degree requirements (p. 176) for specifics.

Graduate Program Information

(department needs to add info during edits)

Degrees for the Department

English - Bachelor of Arts (p. 285)

English - Master of Arts (p. 288)

Creative Writing - Master of Fine Arts in Creative Writing (p. 284)

Rhetoric and Professional Communication - Doctor of Philosophy (p. 292)

Minors for the Department

Creative Writing - Undergraduate Minor (p. 285)

English - Undergraduate Minor (p. 290)

Literature - Undergraduate Minor (p. 290)

Medieval and Early Modern Studies - Undergraduate Minor (p. 291)

Rhetoric and Professional Communication - Undergraduate Minor (p. 293)

Professor Barry Thatcher, Department Head

Professors Thatcher, Wojahn; **Associate Professors** Bradburd, Cull, Garay, Greenfield, Hoang, Miller-Tomlinson, Rourke, Schirmer, Smith, Voisine, Wojahn; **Assistant Professors** Banazek, Lavender-Smith, Sharp-Hoskins, Stagliano, Stolte, Wells; **College Associate Professor** Brown; **College Assistant Professors** Conley, Hastings, Lanier; **College Instructor** Gray

B. Thatcher, Department Head, Ph.D. (Purdue)– professional communication, intercultural rhetoric; L. Rosenberg, Associate Department Head, Writing Program Director, Ph.D. (Massachusetts)-composition, literacy studies; R. Bradburd, M.F.A. (New Mexico State)– creative writing: fiction, creative nonfiction; R. Cull, Ph.D. (Illinois)– modern and contemporary American literature; J. Garay, Ph.D. (Arizona State)– Chicano/a and Latino/a literature; C. Gray, M.F.A. (New Mexico State)- creative writing, fiction; R. Greenfield, Ph.D. (Denver)– creative writing: poetry; L. Hoang, M.F.A (Notre Dame)– creative writing: fiction; C. Lanier, Ph.D. (New Mexico State)- rhetoric and professional communication; E. Lavender-Smith, M.F.A. (New Mexico State)- creative writing: fiction; T. Miller-Tomlinson, Ph.D. (Yale)– Shakespeare, early modern literature and culture; B. Rourke, Ph.D. (Stanford)– modern British

literature, critical theory; E. Schirmer, Ph.D. (California-Berkeley)– medieval literature; K. Sharp- Hoskins, Ph.D. (Illinois-State)-rhetoric, composition, culture, pedagogy; C. Smith, M.F.A. (Iowa)– creative writing: poetry; A. Stagliano, Ph.D. (South Carolina)- rhetoric, media and technology theory, posthumanities; T. Stolte, Ph.D. (British Columbia)– 19th-century British literature and culture; C. Voisine, Ph.D. (Utah)– creative writing: poetry, creative nonfiction; J. Wells, Ph.D. (South Carolina) – rhetorical theory and history, environmental rhetoric; P. Wojahn, Ph.D. (Carnegie Mellon)– professional communication, computers and writing

ENGL 111 M. Rhetoric and Composition for International and Multilingual Students

4 Credits

For international and multilingual students. Students will build on your prior knowledge of writing in English as a second or additional language by engaging in several genres of writing and reading, including reading responses, discussion posts, formal academic papers (Rhetorical Analysis and Documented Argument), and peer review. Your instructor and classmates will serve as your readers and will give you helpful and constructive criticism, which will in turn assist you in becoming a more fluent and engaging communicator in English. Fulfills English 111 Gen-ed requirement. Restricted to Las Cruces campus only.

Prerequisite(s): CBT/PB score of 500, or IBT score of 61, or SPCD 110, or consent of instructor.

ENGL 111G. Rhetoric and Composition

4 Credits

Skills and methods used in writing university-level essays.

Prerequisite(s): ACT standard score in English of 16 or higher or a Compass score 76 or higher; for those scoring 13-15 in English on the ACT or 35-75 on the Compass, successful completion of a developmental writing course; for those scoring 12 or below on the ACT standard score in English or 34 or below on the Compass, successful completion of two developmental writing courses.

ENGL 111GH. Rhetoric and Composition Honors

4 Credits

Individualized assignments and independent study. Satisfies 4 credits of General Education English Composition requirement.

Prerequisite: ACT standard English score of 25 or higher and departmental approval.

ENGL 112. Rhetoric and Composition II

2 Credits

A continuation of English 111G for those desiring more work in composition. Weekly themes based on outside reading.

Prerequisite: successful completion of ENGL 111G or the equivalent.

ENGL 115G. Perspectives on Literature

3 Credits

Examines literature by writers from culturally diverse backgrounds and from different cultural and historical contexts. Explores various strategies of critical reading.

ENGL 116G. Perspectives on Film

3 Credits (3+3P)

Explores narrative and documentary film and examines significant developments in the history of cinema. Criticism of film as an art form, technical enterprise, business venture, and cultural phenomenon.

ENGL 203G. Business and Professional Communication

3 Credits

Effective writing for courses and careers in business, law, government, and other professions. Strategies for researching and writing correspondence and reports, with an emphasis on understanding and responding to a variety of communication tasks with a strong purpose, clear organization, and vigorous professional style. May be repeated up to 3 credits.

Prerequisite(s): ENGL 111G or SPCD 111G or ENGL 111 M.

ENGL 211G. Writing in the Humanities and Social Sciences

3 Credits

Theory and practice in interpreting texts from various disciplines in the humanities and social sciences. Strategies for researching, evaluating, constructing, and writing researched arguments. Course subtitled in the Schedule of Classes. May be repeated up to 3 credits.

Prerequisite(s): ENGL 111G or SPCD 111G or ENGL 111 M.

ENGL 218G. Technical and Scientific Communication

3 Credits

Effective writing for courses and careers in sciences, engineering, and agriculture. Strategies for understanding and presenting technical information for various purposes to various audiences. May be repeated up to 3 credits.

Prerequisite(s): ENGL 111G or SPCD 111G or ENGL 111 M.

ENGL 220G. Introduction to Creative Writing

3 Credits

Examines classic and contemporary literature in three genres. Various forms, terminologies, methods and technical aspects of each genre, and the art and processes of creative writing. May be repeated up to 3 credits.

Prerequisite(s): ENGL 111G or SPCD 111G or ENGL 111 M.

ENGL 232. Script Development and Storyboarding

3 Credits

Examines effective writing principles for creating storyboards that communicate the overall picture of a project, timing, scene complexity, emotion and resource requirements. Crosslisted with: CMI 232.

ENGL 235. Narrative: Principles of Story Across the Media

3 Credits

Examines the various strategies of written and visual storytelling, narrative structure and its principal components (plot, theme, character, imagery, symbolism, point of view) with an attempt to connect them to elements of contemporary forms of media expression, including screenwriting, playwriting, writing for documentaries and animation, etc. Crosslisted with: CMI 235

ENGL 243. The Bible as Literature

3 Credits

Develops informed readings of Hebrew and Christian scriptures. Emphasizes understanding Biblical literary forms, techniques, themes; historical, cultural contexts for interpretation; authorship, composition, audience for individual books; development of Biblical canon.

ENGL 244G. Literature and Culture

3 Credits

Intensive reading of and discussion and writing about selected masterpieces of world literature. Emphasizes cultural and historical contexts of readings to help students appreciate literary traditions. Core texts include works by Homer, Dante, and Shakespeare, a classic novel, an important non-Western work, and modern literature.

ENGL 251. Survey of American Literature I

3 Credits

From the colonial period to the transcendentalists.

ENGL 252. Survey of American Literature II**3 Credits**

From Whitman to the present.

ENGL 262. Masterpieces of Western European Literature, Post-Renaissance to Modern Times**3 Credits**

Modern Western European literary classics, from the seventeenth through the twentieth centuries, with attention to the rise of the novel and other modern forms.

ENGL 263. History of Argument**3 Credits**

Investigates the major figures and movements in rhetoric from the classical period to modern rhetorical theory, examining relations between rhetorical teaching and practice, culture, epistemology, and ideology. Main campus only.

ENGL 271. Survey of English Literature I**3 Credits**

From Beowulf through the eighteenth century.

ENGL 272. Survey of English Literature II**3 Credits**

From the pre-Romantics to the present.

ENGL 299. Special Topics**1-3 Credits**

Emphasis on a literary and/or writing subject chosen for the semester. Repeatable for a unlimited credit under different subtitles.

ENGL 301. Theory and Criticism: Rhetoric and Culture**3 Credits**

Introduction to rhetorical criticism with an emphasis on understanding the theoretical and cultural underpinnings for the rhetorical analyses of texts.

ENGL 302. Theory and Criticism: Literature and Culture**3 Credits**

Introduction to literary criticism, from its classical beginnings through contemporary critical approaches.

ENGL 303. Theory and Criticism: Film, Media and Culture**3 Credits**

Surveys classical and contemporary film theory. Explores the relationship of theory to textual analysis and filmmaking practices. Includes auteurism semiotics, psychoanalysis, and other theories, as well as theories of other media.

ENGL 304. Creative Writing: Prose**3 Credits**

Imaginative writing, chiefly prose narrative. Repeatable for a maximum of 9 credits.

ENGL 305. Creative Writing: Reading Series**1 Credit**

A one credit class based on the English Department's literary reading series. The class meets online and at the literary readings.

ENGL 306. Creative Writing: Poetry**3 Credits**

Introduction to the writing of poetry. Repeatable for a total of 9 credits.

ENGL 307. Creative Writing: Creative Nonfiction**3 Credits**

Introduction to creative nonfiction. Skills emphasized will include the personal voice, powers of observation and reflection, advocacy, argument, and a creative, powerful use of language. Repeatable for a maximum of 9 credits.

ENGL 308. Creative Writing: Playwriting**3 Credits**

Technique of one-act playwriting, and analysis of dramatic structure. Crosslisted with: THTR 308

ENGL 309. Screenwriting I**3 Credits**

Writing intensive. Students learn the craft of screenwriting, honing skills in writing dialogue and visual narrative, crafting dynamic characters and dramatic action. Original student scripts will be performed and discussed in class. Consent of instructor required. Crosslisted with: CMI 309 and THTR 306

Prerequisite(s): ENGL 235 or CMI 235.

ENGL 310. Critical Writing**3 Credits**

A course in critical reading, writing, and research designed to prepare English majors for upper-division courses.

ENGL 311G. Advanced Composition**3 Credits**

Writing of nonfiction prose. Reviews principles of expository and descriptive writing. Emphasizes the argument/persuasion essay with detailed discussion of semantic and rhetorical techniques.

Prerequisite: junior or senior standing, or consent of instructor.

ENGL 315. Writing for the Web**3 Credits**

Introduction to writing for the World Wide Web through practical application and analysis on both theory and research. Allows hands-on learning in a computer classroom.

ENGL 318G. Advanced Technical and Professional Communication**3 Credits**

Theory and practice of writing in technical and professional fields, individualized to each student's field. Emphasizes efficient writing processes and effective written products.

Prerequisite: junior or above standing, or consent of instructor.

ENGL 321V. Modern European Drama**3 Credits**

Masterworks of European drama from the late 18th century to present. Crosslisted with: THTR 321V

ENGL 322. Dramatic Character**3 Credits**

How characters have been created for the stage from the beginning of theatrical performances in ancient Greece to the present day. Exploring characterization related to dramatic structure, style, and genre, and how dramatic characters differ from those in literary fiction. Crosslisted with: THTR 322.

ENGL 323. American Drama**3 Credits**

Masterworks of American drama by noted American playwrights. Crosslisted with: THTR 323

ENGL 326. Cultural Identity and Representation Across the Media**3 Credits**

Considers complex relationships between representation and culture including how images and language shape racial, ethnic, gender, sexual, and class identities. Examines theories from several disciplines. Includes lecture, discussion and production exercises.

ENGL 327V. Shakespeare around the Globe**3 Credits**

Introduction to multicultural issues in Shakespeare's plays and to adaptations of Shakespeare's plays in other cultures.

ENGL 328V. Literature of Science Fiction and Fantasy**3 Credits**

Survey and critical examination of the development of science fiction and fantasy as literature genres through selected authors and texts.

ENGL 329. Studies in Drama**3 Credits**

Emphasis on a group of related works of European or American drama; topics will vary. Crosslisted with: THTR 329 and CMI 329

ENGL 330V. Studies in Poetry**3 Credits**

Emphasis on a related group of poems or on the work of one or more poets; topics will vary.

ENGL 335V. Studies in the Novel**3 Credits**

Intensive reading of, discussion of, and writing about selected major novels from around the world. Emphasizes the history of the novel and its role in culture.

ENGL 336. Studies in Film**3 Credits (3+3P)**

Explores the conventions of cinematic representation; the strategies involved in writing about and reading film; and/or the adaptation of literary texts to film. Repeatable under different subtitles.

ENGL 339V. Chicana/o Literature**3 Credits**

Introduction to Chicano novels, short stories and selected creative nonfiction.

ENGL 341V. American Indian Literature**3 Credits**

Forms and themes of Native American oral literary traditions; Native American writing in English, especially novels, short fiction, and poetry.

ENGL 349. The Short Story**3 Credits**

Development of the short story as a distinct form. Readings and critical analysis of representative nineteenth and twentieth century pieces.

ENGL 354. Form and Technique in Fiction**3 Credits**

Literature course designed for fiction writers, especially those English majors in the Creative Writing emphasis. The course combines the study of published fiction with the study of craft. Some of the assignments will require the student to write original fiction based on exercises provided by the instructor. Repeatable for up to 9 credits.

ENGL 356. Form and Technique in Poetry**3 Credits**

Literature course designed for poets, especially those English majors in the Creative Writing emphasis. The course combines the study of published poetry with the study of craft. Some of the assignments will require the student to write original poems based on exercises provided by the instructor. Repeatable for up to 9 credits.

ENGL 358. Form and Technique in Playwriting**3 Credits**

Literature course designed for playwrights, especially those English majors in the Creative Writing emphasis. The course combines the study of published plays and performances with the study of craft. Some of the assignments will require the student to write original plays based on exercises provided by the instructor. Repeatable up to 9 credits.

ENGL 363. Literature for Children and Young Adults**3 Credits**

A comparative, historical survey of literature for young (K to 12th grade) readers. Emphasis on critical evaluation.

Prerequisite: junior or above standing.

ENGL 380V. Women Writers**3 Credits**

Introduction to multicultural women's traditions through intensive study of works by women writers. Crosslisted with: W S 380V.

ENGL 392V. Mythology**3 Credits**

Greek and Roman mythology and its impact on European and English literature. Readings in myths, classical plays, and other literature with mythological interest, including nonclassical myths.

ENGL 394V. Southwestern Literature**3 Credits**

Introduction to multicultural literature of the Southwest: oral folk literature, literary fiction (classic and contemporary), nonfiction and poetry.

ENGL 399. Special Topics**3 Credits**

Emphasis on a theme, genre, figure, or technique chosen for study during the semester. Repeatable under different subtitles.

ENGL 400. Independent Study: Upper Division**1-3 Credits**

For students with demonstrated aptitude for independent work. Approval of instructor required before registration. Repeatable under different subtitles.

ENGL 405. Chaucer**3 Credits**

Principal works, with emphasis on *The Canterbury Tales*.

ENGL 407. Milton**3 Credits**

Studies in Milton's works.

ENGL 408. Shakespeare I**3 Credits**

Principal plays of Shakespeare's first two periods. Crosslisted with: THTR 408.

ENGL 409. Shakespeare II**3 Credits**

Principal plays of Shakespeare's last two periods. Crosslisted with: THTR 409.

ENGL 412. Writing in the Workplace**3 Credits**

Study of workplace writing practices, including a focus on research-based, theoretical, and pedagogical approaches to professional communication.

ENGL 413. Advanced Creative Writing: Prose Workshop**3 Credits**

Imaginative writing, chiefly the narrative. May be repeated up to 12 credits.

Prerequisite(s): ENGL 304 or consent of instructor.

ENGL 414. Advanced Creative Writing: Poetry Workshop**3 Credits**

For advanced writers of poetry. Repeatable for a total of 12 credits.

Prerequisite(s): ENGL 306 or consent of instructor.

ENGL 415. Advanced Creative Writing: playwriting Workshop**3 Credits**

Technique of full-length playwriting, and analysis of dramatic structure. May be repeated up to 12 credits. Consent of Instructor required. Crosslisted with: THTR 309 and CMI 309.

Prerequisite(s): ENGL 308 or consent of instructor.

ENGL 416. Approaches to Literature**3 Credits**

Understanding, appreciation, techniques of instruction in the high school. **Prerequisite:** at least 6 credits in upper-division English courses.

ENGL 417. Advanced Study in Critical Theory**3 Credits**

Advanced study of one or more major trends in theoretical inquiry within English studies. Some prior study of theory, such as English 301-303, strongly recommended. Repeatable under different subtitles.

ENGL 418. History of Rhetoric**3 Credits**

Investigation of crucial writings that have shaped Western attitudes towards and practice of rhetoric. Will examine key concepts from the Greeks through the Enlightenment, especially as they have influenced contemporary rhetorical theory.

ENGL 419. Modern Rhetorical Theory**3 Credits**

Major figures in rhetorical theory, with particular emphasis on developments in rhetorical theory in the twentieth century.

ENGL 421. Advanced Study in a Literary Period or Movement**3 Credits**

Close study of a historical or theoretical topic in a particular literary period or movement. Repeatable under different subtitles.

ENGL 422. Advanced Study in a Literary Form or Genre**3 Credits**

Close study of a topic in a particular literary form or genre. May be repeated under different subtitles.

ENGL 423. Advanced Study in a Major Author**3 Credits**

Close study of selected works by a major author. May be repeated under different subtitles.

ENGL 424. Advanced Study in a Major Text**3 Credits**

Close study of a major text. Course subtitled in the Schedule of Classes. Repeatable under different subtitles.

ENGL 425. Advanced Study in Comparative Literature**3 Credits**

Close study of a selection of non-English literary works read in translation. English-language works from a similar literary period or genre may also be read. Repeatable under different subtitles.

ENGL 429. British Romanticism**3 Credits**

Intensive study of major writers and critical topics from the Romantic period. Repeatable under different subtitles.

ENGL 430. Online Publishing**3 Credits**

This three-credit course provides a theoretical background for online publishing and design as well as hands on experience publishing an online arts magazine.

ENGL 431. Technical Editing**3 Credits**

Uses workshops, readings, hands-on projects, and discussion to improve skills in gathering, writing, designing, and editing technical information. For students interested in technical communication as well as students interested in developing strengths in communicating in scientific and technical fields.

ENGL 432. Gothic Literature**3 Credits**

Intensive study of gothic literature in particular historical, aesthetic, cultural, or intellectual contexts, such as American Gothic, Female Gothic, Dark Romanticism, or Vampire Literature. Repeatable under different subtitles.

ENGL 433. Victorian Literature**3 Credits**

Intensive study of major writers and critical topics from the Victorian period. Repeatable under different subtitles.

ENGL 438. Literature of the American Renaissance**3 Credits**

Intensive study of topics critical to the development of nineteenth century American literature before and during the Civil War, and the work of authors such as Emerson, Thoreau, Poe, Hawthorne, Melville, Whitman and Dickinson. Repeatable once under a different subtitle.

ENGL 442. Modern and Contemporary American Poetry**3 Credits**

Studies the development of American poetry from World War I to the present. Repeatable once under a different subtitle.

ENGL 444. Modern British Fiction**3 Credits**

Study of the fiction produced in the British Isles in the 20th and 21st centuries. Repeatable once under a different subtitle.

ENGL 445. Postmodern Fiction**3 Credits**

Study of the various forms of formally innovative experimental fiction produced since 1945, with a focus on the relationship between literary history and its sociohistorical contexts. Some texts will be read in translation. Repeatable once under a different subtitle.

ENGL 446. Advanced Creative Writing: Nonfiction Prose**3 Credits**

This workshop-format class for advanced writers will examine the many varieties of Creative Nonfiction. Students should be prepared for a rigorous reading load of published nonfiction and student submissions. Because of the workshop format, every student is expected to contribute extensively to every class, both in printed form and oral comments. Taught with ENGL 546. May be repeated up to 12 credits.

Prerequisite(s): ENGL 307 or consent of instructor.

ENGL 449. Advanced Study in Writing**3 Credits**

Close study of a topic in composition, rhetoric and/or technical and professional communication. Repeatable for a maximum of 6 credits with permission of department.

ENGL 451. Practicum in the Grammar of American English**3 Credits**

Studies of formal grammar of the English language in preparation for the teaching of the English language and/or advanced linguistic analysis.

ENGL 452. History of the English Language**3 Credits**

This course examines the history of the English language from its Indo-European origins through its development into an international language. The aim is to describe the English language formally and to trace linguistic change over time. Samples of written English will illustrate various stages in the development of English. Also considered are contemporary social and political issues related to language, including the problem of 'standard English' and the uses of language in advertising, the media, and politics.

ENGL 453. World Literatures**3 Credits**

Study of one or more literary traditions exclusive of those originating in Europe and the United States. Readings will include texts in translation. Repeatable once under a different subtitle.

ENGL 456. Ethnic Studies in US Literature and Culture**3 Credits**

Concentrates on comparative study of literary and cultural production by two or more U.S. ethnic populations. Incorporates both literary and sociocultural readings of texts. Repeatable under different subtitles.

ENGL 458. Latino/a Literature and Culture**3 Credits**

Focuses on established and emergent Latino/a literary and cultural production. Incorporates both literary and sociocultural readings of texts. Repeatable once under a different subtitle.

ENGL 460. Proposal Writing**3 Credits**

Developing proposals and grants in a workshop setting.

ENGL 462. Interdisciplinary, Client-Based Project Practicum**3 Credits**

Hands-on experience in designing projects within interdisciplinary teams for organizational clients. Taught with ENGL 562.

ENGL 463. Advanced Study in English Literature**3 Credits**

Covers selected works for a particular period of English literary history. Repeatable under different subtitles.

ENGL 469. Advanced Study in American Literature**3 Credits**

Covers selected works for a particular period of American literary history. Repeatable under different subtitles.

ENGL 470. Approaches to Composition**3 Credits**

Theory and practice of teaching writing. Discussion and application of classroom practices, definition of standards, and evaluation of student writing.

ENGL 478. Document Design**3 Credits**

Advanced study in writing, with an emphasis on the computer as a tool for designing visually informative text. Includes theory and research in document design and the use of page composition and graphics software.

ENGL 479. Computers and Writing**3 Credits**

This course will trace the history of computers and composition as a field by looking at the work of important scholars including Selfe, Hawisher, Johnson-Eilola, and Wysocki. We will then focus on specific ways new media might be integrated into composition classrooms. The course will include discussions, student facilitations, and experimentation with technologies.

ENGL 480. Screenwriting II**3 Credits**

Students will write two short scripts, 10-15 pages each. Focus will be on learning how to take notes and rewrite. Script analysis will be in a workshop format. Scripts will be read and discussed, scenes performed and reactions analyzed to consider effect of dialog, character development, etc. Crosslisted with: CMI 480

Prerequisite(s): ENGL 309 or CMI 309 or THTR 306 or consent of instructor.

ENGL 481. Women's Literature**3 Credits**

Intensive study of literature by women, in particular historical, aesthetic, cultural, or intellectual contexts. Repeatable under different subtitles. Crosslisted with: W S 484

ENGL 486. Hollywood Film**3 Credits (3+3P)**

Intensive study of Hollywood film in its artistic, cultural, or historical contexts. Repeatable under different subtitles.

ENGL 489. Cultural Studies: Literature and Theory**3 Credits**

Examines the theory and practice of cultural studies in relation to the variety of discourse describable as literary, including autobiography, avant-garde writing, nonfiction prose, the essay, online writing, folklore, and popular genre fiction (such as mystery, romance, thriller, or horror). Repeatable once under a different subtitle.

ENGL 493. Middle English Textual Cultures**3 Credits**

Intensive study of cultures of reading, writing, and literary production in late-medieval England, situating Middle English literature in its manuscript contexts. No prior experience with Middle English required.

ENGL 497. Internship**3-6 Credits (3-6)**

Supervised technical and professional communication internship in business, industry, government, or the university. Repeatable for a total of 6 credits. Consent of instructor required.

ENGL 500. Supervised Study**1-3 Credits**

To prepare the student for the master's degree examinations by special studies in fields not covered in routine course work.

Prerequisite: consent of instructor.

ENGL 501. Online Publishing**3 Credits**

This three-credit course provides a theoretical background for online publishing and design as well as hands-on experience publishing an online arts magazine. Taught with ENGL 430.

ENGL 505. Graduate Study in Chaucer**3 Credits**

Principal works, with emphasis on the Canterbury Tales. Requirements include independent directed research.

Prerequisite: ENGL 261 or consent of instructor.

ENGL 508. Graduate Study in Shakespeare I**3 Credits**

Principal plays of Shakespeare's first two periods. Requirements include independent directed research.

ENGL 509. Graduate Study in Shakespeare II**3 Credits**

Principal plays of Shakespeare's last two periods. Requirements include independent directed research.

ENGL 510. Proseminar in Rhetoric and Professional Communication**3 Credits**

Introduction to research in rhetoric and professional communication. Taught with ENGL 610.

ENGL 511. Discourse and Theories**3 Credits**

Investigates theories describing how humans use language and considers production, reception, and cultural context. Topics vary. Repeatable for a maximum of 6 credits.

ENGL 512. Graduate Study in Writing in the Workplace**3 Credits**

Study of workplace writing practices, including a focus on research-based, theoretical, and pedagogical approaches to professional communication.

ENGL 513. Creative Writing Workshop: Fiction**3 Credits**

Advanced creative writing prose workshop. Imaginative writing, chiefly the narrative. Graduate level workshop for students who are not in the English Department MFA program. May be repeated for a maximum of 12 credits. Taught with ENGL 413 with additional work required at the graduate level.

ENGL 514. Creative Writing Workshop: Poetry**3 Credits**

Creative writing poetry workshop for advanced writers of poetry. Graduate level works for students who are not in the English Department MFA program. Repeatable for a maximum of 12 credits. Taught with ENGL 414 with additional work required at the graduate level.

ENGL 516. Graduate Study in Approaches to Literature**3 Credits**

Understanding, appreciation, techniques of instruction in the high school. Requirements include independent directed research.

Prerequisite: at least 6 credits in upper-division English courses.

ENGL 517. Graduate Study in Critical Theory**3 Credits**

Advanced study of one or more major trends in theoretical inquiry within English studies. Some prior study of theory, such as English 301, 302, or 303, strongly recommended. Repeatable under different subtitles.

ENGL 518. History of Rhetoric**3 Credits**

An investigation of the crucial writings that have shaped Western attitudes towards and practice of rhetoric. Course will examine key texts from the Greeks through the Enlightenment, especially as they have influenced contemporary rhetorical theory.

ENGL 519. Graduate Study in Modern Rhetorical Theory**3 Credits**

Major figures in rhetorical theory, with particular emphasis on developments in rhetorical theory in the 20th century. Students will be responsible for all requirements of ENGL 419 and will in addition undertake independent directed research.

ENGL 520. Workshop: Advanced Composition**3 Credits**

Intensive work in composition in a workshop setting.

ENGL 521. Graduate Study in a Literary Period or Movement**3 Credits**

Close study of a topic in a particular literary period or movement. Requirements include independent directed research. Repeatable under different subtitles.

ENGL 522. Graduate Study in a Literary Form or Genre**3 Credits**

Close study of a topic in a particular literary form or genre. Requirements include independent directed research. Repeatable under different subtitles.

ENGL 523. Graduate Study of a Major Author**3 Credits**

Close study of selected works of a major author. Requirements include independent directed research. Repeatable under different subtitles.

ENGL 524. Graduate Study in a Major Text**3 Credits**

Close study of a major text. Requirements include independent directed research. Repeatable under different subtitles.

ENGL 525. Graduate Study in Comparative Literature**3 Credits**

Close study of a selection on non-English literary works read in translation. English-language works from a similar literary period or genre may also be read. Requirements include independent directed research. Repeatable under different subtitles.

Prerequisite: graduate standing or consent of instructor.

ENGL 526. Special Topics in Critical Theory**3 Credits**

Study of a specific historical or theoretical topic, trend, or movement in Critical Theory. Repeatable under different subtitles.

ENGL 527. Graduate Study in Film and Digital Media**3 Credits**

Offers close graduate study of a form or genre, a major figure or style, a historical period or movement, or a major theme or text. Topics vary from semester to semester.

ENGL 529. British Romanticism**3 Credits**

Intensive study of major writers and critical topics from the Romantic period. Repeatable under different subtitles.

ENGL 530. Argument Theory and Practice**3 Credits**

Examining theories of argument and how language convinces audiences to think and act in certain ways and not in others. Investigates argument across disciplines and in social/political contexts.

ENGL 531. Technical Editing**3 Credits**

Uses workshops, readings, hands-on projects, and discussion to improve skills in gathering, writing, designing, and editing technical information. For students interested in technical communication as well as students interested in developing strengths in communicating in scientific and technical fields.

ENGL 532. Gothic Literature**3 Credits**

Intensive study of gothic literature in particular historical, aesthetic, cultural, or intellectual contexts, such as American Gothic, Female Gothic, Dark Romanticism, or Vampire Literature. Repeatable under different subtitles.

ENGL 533. Victorian Literature**3 Credits**

Intensive study of major writers and critical topics from the Victorian period. Repeatable under different subtitles.

ENGL 534. Graduate Study: Form and Technique in Fiction**3 Credits**

Advanced study of issues in form and technique in fiction, including point of view, scene and dialogue, and story structure. Repeatable for a maximum of 6 credits.

ENGL 535. Graduate Study: Form and Technique in Poetry**3 Credits**

Advanced study of issues in form and technique in poetry, including voice, tone, syntax, and structure. Repeatable for a maximum of 12 credits.

ENGL 536. The Borderlands Writing Project**3-6 Credits (3-6)**

Intensive month-long seminar for practicing teachers and educators designed to improve the teaching of writing and the writing process and literacy and reading in schools and other educational contexts. Reading, discussing, and writing about current professional literature; completing teacher inquiry; and planning action research. Participants complete personal and professional writing, as well as additional professional development activities. By invitation only. Affiliated with the National Writing Project. Consent of instructor required. Crosslisted with: RDG 536

ENGL 537. Practitioner Inquiry and Literacy Action Research**1-3 Credits (1-3)**

Inquiry concerning literacy practices within specific contexts and the planning, implementing, and assessing projects designed to increase and improve literacy within that context. Instruction includes reading and web-based discussion, bi-monthly seminars, and onsite consultations. Associated with ongoing community outreach by the English Department and the Borderlands Writing Project. Consent of instructor required.

ENGL 538. Antebellum American Literature**3 Credits**

Intensive study of topics critical to the development of nineteenth century American literature before and during the Civil War, and the work of authors such as Emerson, Thoreau, Poe, Hawthorne, Melville, Whitman and Dickinson. Repeatable once under a different subtitle. May be repeated up to 6 credits.

ENGL 542. Modern and Contemporary American Poetry**3 Credits**

Studies the development of American poetry from World War I to the present. Repeatable once under a different subtitle.

ENGL 543. Multimedia Theory and Production**3 Credits**

Issues, theories, and production practices underlying design of multimedia, including rhetorical choices, aesthetic approaches, usability concerns, and diverse academic and popular discourses contributing to continued development of digital texts. Taught with ENGL 643.

ENGL 544. Modern British Fiction**3 Credits**

Study of the fiction produced in the British Isles in the 20th and 21st centuries. Repeatable once under a different subtitle.

ENGL 545. Postmodern Fiction**3 Credits**

Study of the various forms of formally innovative experimental fiction produced since 1945, with a focus on the relationship between literary history and its sociohistorical contexts. Some texts will be read in translation. Repeatable once under a different subtitle.

ENGL 548. Graduate Study in Empirical Research**3 Credits**

Introduction to empirical research methods in composition, professional communication, and rhetoric.

ENGL 549. Graduate Study in Writing**3 Credits**

Close study of a topic in composition, rhetoric, and/or technical and professional communication. Topics vary. Repeatable for a maximum of 6 credits.

ENGL 550. Graduate Study in Literacy**3 Credits**

Studies in literacy theory and literacy research. Topics may vary. Taught with ENGL 650.

ENGL 551. Practicum in the Grammar of American English**3 Credits**

Studies of formal grammar of the English language in preparation for the teaching of the English language and/or advanced linguistic analysis. Taught with ENGL 451.

ENGL 552. Graduate Study in History of the English Language**3 Credits**

This course examines the history of the English language from its Indo-European origins through its development into an international language. The aim is to describe the English language formally and to trace linguistic change over time. Samples of written English will illustrate various stages in the development of English. Also considered are contemporary social and political issues related to language, including the problem of 'standard English' and the uses of language in advertising, the media, and politics.

ENGL 553. World Literatures**3 Credits**

Study of one or more literary traditions exclusive of those originating in Europe and the United States. Readings will include texts in translation. Repeatable once under a different subtitle.

ENGL 555. Graduate Study in Rhetoric of Scientific Literature**3 Credits**

Intensive study of the rhetoric of selected works of scientific literature.

ENGL 556. Ethnic Studies in US Literature and Culture**3 Credits**

Concentrates on comparative study of literary and cultural production by two or more U.S. ethnic populations. Incorporates both literary and sociocultural readings of texts. Repeatable under different subtitles.

ENGL 558. Latino/a Literature and Culture**3 Credits**

Focuses on established and emergent Latino/a literary and cultural production. Incorporates both literary and sociocultural readings of texts. Repeatable once under a different subtitle.

ENGL 559. Black Literature and Culture in the United States**3 Credits**

Focuses on established and emergent Black U.S. literary and cultural production. Incorporates both literary and sociocultural readings of texts. Repeatable once under a different subtitle.

ENGL 560. Proposal and Grant Writing**3 Credits**

Developing proposals and grants in a workshop setting.

ENGL 561. Topics in Writing Program Administration**3 Credits**

Explores issues, theories, and research underlying the design of writing programs and the administration of writing centers. Repeatable for a maximum of 6 credits. Taught with ENGL 661.

ENGL 562. Interdisciplinary, Client-Based Project Practicum**3 Credits**

Hands-on experience in collaborating within interdisciplinary teams designing projects for organizational clients. Taught with ENGL 462.

ENGL 563. Graduate Study in English Literature**3 Credits**

Covers selected works for a particular period of English literary history. Repeatable under different subtitles.

ENGL 564. History and Theory of Composition Studies**3 Credits**

Studies in the history and theory of composition as a discipline. Taught with ENGL 664.

ENGL 565. Intercultural Rhetoric and Professional Communication**3 Credits**

Examines rhetorical traditions in intercultural professional, technical, academic, and governmental contexts. Taught with ENGL 665.

ENGL 566. Online Pedagogy for Writing and Professional Communication**3 Credits**

Course explores key issues related to teaching and learning in online environments, with a focus on the teaching of writing and professional communication. Examines digital classroom practices and the theories that inform them and evaluates applicability and relevance of available technologies.

ENGL 567. Documentary Film Theory and Criticism**3 Credits (3+3P)**

Course offers critical survey of documentary film theory and criticism including considerations of the epistemological assumptions, rhetorical choices, aesthetic approaches, political circumstances of historical and contemporary documentary film.

ENGL 568. Rhetoric and Cultural Studies**3 Credits**

Explores intersections between rhetoric and cultural studies. Examines theories and practices of texts and discourses in political and cultural contexts. Taught with ENGL 668.

ENGL 569. Graduate in American Literature**3 Credits**

A group of works from a particular period of American literary history. Repeatable under different subtitles.

ENGL 570. Graduate Study in Approaches to Composition**3 Credits**

Theory and practice of teaching writing, including classroom practices, definition of standards, and evaluation of student writing. Requirements include independent directed research.

ENGL 571. Composition Pedagogy and Practicum**3 Credits**

Examines the pedagogical implications of contemporary composition theory and research. Focuses on teaching composition at the college level. Consent of instructor required.

ENGL 572. Technical-Professional Communication: Theory and Pedagogy**3 Credits**

Topics in teaching business, technical and scientific communication in academic and workplace contexts.

Prerequisite: graduate standing.

ENGL 574. Workshop: Advanced Writing Prose**3 Credits**

Intensive practice in prose writing, primarily fiction, in a workshop environment with peer criticism. Repeatable for a total of 15 credits. Consent of instructor required.

ENGL 575. Workshop: Advanced Writing Poetry**3 Credits**

Intensive practice in poetry writing in a workshop environment with peer criticism. Repeatable for a total of 15 credits. Consent of instructor required.

ENGL 576. Workshop: Advanced Writing Playwriting**3 Credits**

Intensive practice in dramatic writing in a workshop environment with peer criticism. Repeatable for a total of 9 credits. Consent of instructor required.

ENGL 577. Workshop: Advanced Technical and Professional Writing**3 Credits**

Intensive practice in technical and professional writing and editing in a workshop environment. May be repeated for a total of 6 credits. Consent of instructor required.

ENGL 578. Topics in Rhetoric and Technology**3 Credits**

Explores intersections between rhetoric and technology, approaches may highlight theory, media production, and/or research. Repeatable for a maximum of 6 credits. Taught with ENGL 678.

ENGL 579. Computers and Writing**3 Credits**

This course will trace the history of computers and composition as a field by looking at the work of important scholars including Selfe, Hawisher, Johnson-Eilola, and Wysocki. We will then focus on specific ways new media might be integrated into composition classrooms. The course will include discussions, student facilitations, and experimentation with technologies.

ENGL 580. Graduate Problems in Creative Writing**3 Credits**

Independent study in creative writing. Consent of instructor required. Repeatable for a total of 9 credits.

ENGL 581. Women's Literature**3 Credits**

Intensive study of literature by women, in particular historical, aesthetic, cultural, or intellectual contexts. Repeatable under different subtitles.

Crosslisted with: W S 584

ENGL 582. Gender and Popular Culture**3 Credits**

Intensive study of the representations of gender in popular culture. Examines the historical, aesthetic, and cultural contexts of these representation and the various critical and theoretical lenses we use to understand them. Repeatable under different subtitles. Crosslisted with: W S 582

ENGL 583. Critical Writing Studies**3 Credits**

Overview of current and historical approaches to the critical study of gender and language: how gender theoretically manifests in linguistic, social, cultural, academic, and professional contexts.

ENGL 584. Workshop: Advanced Academic Writing for International Students**3 Credits**

This workshop-based course is for graduate-level multilingual writers from all disciplines who want to improve their English academic writing in an intensive and collaborative environment. Students will propose a major writing project to workshop throughout the semester, such as dissertation, thesis, comprehensive exams, etc. Some of the topics covered will be academic language, cohesion/coherence, organization, and supporting academic arguments. Other topics to be determined by needs of the class.) 4.Consent of instructor.

Prerequisite(s): 1.Be classified as a graduate student by the Graduate School 2.Be classified as an international student whose first language is not English 3.Have a major writing project in progress (comprehensive exams, thesis, dissertation, conference paper, etc.

ENGL 585. Advanced Writing Workshop: RPC Capstone**3 Credits**

Students work to develop and revise their chosen Master's program Capstone Project (a portfolio, thesis or master essay) in consultation with instructor and classmates. Students provide and receive feedback on their work-in-progress. Consent of Instructor required.

ENGL 586. Hollywood Film**3 Credits (3+3P)**

Intensive study of Hollywood film in its artistic, cultural, or historical contexts. Repeatable under different subtitles.

ENGL 587. Modernist and Experimental Film**3 Credits**

Explores the variety of film aesthetics that depart to some degree from the conventions of classical cinema. Focuses on how film form relates to modernist, postmodernist, experimental, and avant-garde tendencies in the arts. Special attention will be paid to the implications of radical formal experimentation for cultural politics, in particular in the context of modern and contemporary history. Repeatable once under a different subtitle.

ENGL 589. Cultural Studies: Literature and Theory**3 Credits**

Examines the theory and practice of cultural studies in relation to the variety of discourse describable as literary, including autobiography, avant-garde writing, nonfiction prose, the essay, online writing, folklore, and popular genre fiction (such as mystery, romance, thriller, or horror). Repeatable once under a different subtitle.

ENGL 590. Master's Seminar in Rhetoric**3 Credits**

Studies in theories of and issues in rhetoric. Topics may vary from year to year. Repeatable for a total of 9 credits.

ENGL 591. Graduate Screenwriting**3 Credits**

Students will prepare a feature-length screenplay. Script analysis will be in an advanced workshop format. Scripts will be read and discussed, scenes performed and reactions analyzed to consider effect of dialogue, character development, etc. Aimed at preparing writers for the professional market. Consent of instructor required.

ENGL 595. Master's Workshop: Poetry**3-6 Credits (3-6)**

Students will submit a draft of thesis project for workshop critique. Revision of the thesis draft submitted to the instructor. Restricted to MFA CW majors.

Prerequisite(s): Enrolled in MFA penultimate semester.

ENGL 596. Master's Workshop: Fiction**3-6 Credits**

Students will submit a draft of thesis project for workshop critique. Revision of the thesis draft submitted to the instructor. Restricted to MFA CW majors.

Prerequisite(s): Enrolled in MFA penultimate semester.

ENGL 597. Internship in Technical and Professional Communication**3-6 Credits (3-6)**

Supervised technical and professional communication in business, industry, government, or the university. May be repeated for a total of 6 credits. Consent of instructor required.

ENGL 598. Master's Essay**3 Credits**

Students electing the master essay option complete revision of a scholarly essay of 25-30 pages, the approximate length of a journal article, and reformulation of this essay to the 7-8 pages appropriate for presentation at a conference. This option also requires research of appropriate publication venues and a final oral defense of the project. A supervising faculty member will approve the selected essay, guide revision, and help students form an examining committee, which consists of at least two members of the graduate English faculty and one member of the graduate faculty from outside the department. Students are encouraged to undertake the Master Essay process in the first half of their third semester of full time graduate work, or soon after completing 18 hours of course work. This option is the preferred exam option, particularly for those students who intend to pursue Ph.D. study. Consent of instructor required.

ENGL 599. Master's Thesis**1-15 Credits**

Thesis.

ENGL 600. Doctoral Research**1-15 Credits**

Assigns credit for research performed prior to the doctoral comprehensive examination.

ENGL 601. Qualitative Research**3 Credits**

Theory and practice of designing research studies and of collecting and analyzing data. Emphasis on qualitative methods of research in composition, professional communication, and rhetoric.

ENGL 602. Quantitative Research**3 Credits**

Theory and practice of designing quantitative research studies and of collecting and analyzing data. Emphasis on quantitative methods of research in composition, professional communication, and rhetoric.

ENGL 603. Rhetorical Criticism and Methodology**3 Credits**

Theory and practice of designing research studies and of collecting and analyzing data. Emphasis on methods of rhetorical criticism.

ENGL 604. Digital Research Methods**3 Credits**

This course will serve as one of the core methods courses in the RPC PhD program, focusing on “digital” methods in rhetorical studies. As such, the aim of this class is to help you begin to gain confidence in conducting research in rhetoric, professional communication, and composition using digital methods. In this course we will assume that digital methods in rhetoric take broadly two forms: first, digital methods of acquisition, processing, and presentation of research data. And second, digital methods of production and circulation of rhetorical objects. The former closely resembles the methods of “digital humanities” while the latter will be closer to media archaeology and “critical making” practices. In all cases, we will relate these tools and methods to key questions and theories in our field, asking how and why we might apply digital methods in rhetorical scholarship.

Prerequisite(s): graduate standing.

ENGL 610. Proseminar in Rhetoric and Professional Communication**3 Credits**

Introduction to research in rhetoric and professional communication. Required of and limited to students enrolled in the Ph.D. program in Rhetoric and Professional Communication.

ENGL 643. Multimedia Theory and Production**3 Credits**

Issues, theories, and production practices underlying design of multimedia, including rhetorical choices, aesthetic approaches, usability concerns, and diverse academic and popular discourses contributing to continued development of digital texts. Taught with ENGL 543.

ENGL 646. Teaching Rhetoric and Writing with English Language Learners**3 Credits**

This course introduces students to the rich interdisciplinary world of writing for English language learners with the goal of helping researchers and instructors understand the unique characteristics and needs of ELL writers. It also examines Generation 1.5, bilingualism, and Spanish-dominant writers along the U.S.-Mexico Border. The course prepares students to work with ELL writing in curriculum design, needs analysis, classroom implementation, assessment, writing program administration, and institutional policies. The course will be a requirement for those GAs seeking to teach experimental sections of first-year multilingual composition at NMSU.

Prerequisite(s): graduate standing.

ENGL 649. Graduate Study in Writing**3 Credits**

Close study of a topic in composition, rhetoric, and/or technical and profession communication. Repeatable for a total of 6 credits.

ENGL 650. Graduate Study in Literacy**3 Credits**

Studies in literacy theory and literacy research. Topics may vary. Taught with ENGL 550.

ENGL 661. Topics in Writing Program Administration**3 Credits**

Explores issues, theories, and research underlying writing programs and the administration of writing centers. Repeatable for a maximum of 6 credits. Taught with ENGL 561.

ENGL 664. History and Theory of Composition Studies**3 Credits**

Studies in the history and theory of composition as a discipline. Taught with ENGL 564.

ENGL 665. Intercultural Rhetoric and Professional Communication**3 Credits**

Examines rhetorical traditions in intercultural professional, technical, academic, and governmental contexts. Taught with ENGL 565.

ENGL 667. Documentary Film Theory and Criticism**3 Credits (3+3P)**

Course offers critical survey of documentary film theory and criticism including considerations of the epistemological assumptions, rhetorical choices, aesthetic approaches, and political circumstances of historical and contemporary documentary film. Taught with ENGL 567

ENGL 668. Rhetoric and Cultural Studies**3 Credits**

Explores intersections between rhetoric and cultural studies. Examines theories and practices of texts and discourses in political and cultural contexts. Taught with ENGL 568.

ENGL 678. Topics in Rhetoric and Technology**3 Credits**

Explores intersections between rhetoric and technology, approaches may highlight theory, media production, and/or research. Repeatable for a maximum of 6 credits. Taught with ENGL 578.

ENGL 683. CRITICAL WRITING STUDIES**3 Credits**

This course investigates the field of Writing Studies as a distinct field of study, related to but not synonymous with Composition Studies. While debates surrounding the relationships among Writing Studies and Composition Studies flourish, this course centers on the former—investigating writing as a practice, process, and object that merits attention in its own right. Such attention will be grounded in contemporary critical and cultural theory that contests writing as a positive or neutral sign (i.e. activity theory, posthumanism, ecocriticism, new materialism, new media studies; feminist, queer, critical race or decolonial theory). Crosslisted with: ENGL 583.

Prerequisite(s): graduate standing.

ENGL 690. Doctoral Seminar in Rhetoric**3 Credits**

Studies in theories of and issues in rhetoric. Topics may vary from year to year. Repeatable for a maximum of 9 credits.

ENGL 700. Doctoral Dissertation**15 Credits**

Dissertation.

Creative Writing - Master of Fine Arts in Creative Writing

Students pursuing the MFA in Creative Writing devote themselves to concentrated study and development of a chosen genre: poetry or fiction. Students

- complete 54 hours of graduate-level coursework,
- present a book-length thesis of original work with an introduction or afterward,
- perform a public reading from the thesis, and
- pass an oral examination in the final semester.

A maximum of 12 credits in Form and Technique count for the degree.

Required Coursework¹

MFA workshop in the major genre (poetry, fiction)	12
Form and Technique courses in major genre	6
Workshop in a second genre	3
Master Workshop (poetry, fiction)	6-12
Graduate literature courses (may include 2 Form & Technique)	12
ENGL 599 Master's Thesis	1-15
Elective Courses	3-12
Total Credits	43-72

¹ Graduate assistants must take 3 hours of ENGL 571 Composition Pedagogy and Practicum, during their first semester of teaching.

Creative Writing - Undergraduate Minor

Students not earning a bachelor's degree in English with an emphasis in Creative Writing are eligible to pursue a minor in Creative Writing. Students must earn 18 credits from the approved course lists below. At least 12 credits must be upper division. Students may request approval for other courses clearly related to the minor from the undergraduate advisor in the Department of English. Students earning a BA in English must earn at least 6 credits approved by the Department of English undergraduate advisor beyond those earned for the major in order to earn a minor in Creative Writing.

Requirements

Select two from the following: ¹	6
ENGL 220G Introduction to Creative Writing	
ENGL 243 The Bible as Literature	
ENGL 251 Survey of American Literature I	
ENGL 252 Survey of American Literature II	
ENGL 262 Masterpieces of Western European Literature, Post-Renaissance to Modern Times	
ENGL 263 History of Argument	
ENGL 271 Survey of English Literature I	
ENGL 272 Survey of English Literature II	
Select two from the following: ²	6
ENGL 304 Creative Writing: Prose	
ENGL 306 Creative Writing: Poetry	
ENGL 307 Creative Writing: Creative Nonfiction	
ENGL 308 Creative Writing: Playwriting	
ENGL 309 Screenwriting I	
ENGL 413 Advanced Creative Writing: Prose Workshop	
ENGL 414 Advanced Creative Writing: Poetry Workshop	

ENGL 415	Advanced Creative Writing: playwriting Workshop	
ENGL 480	Screenwriting II	
Select one from the following: ²		3
ENGL 413	Advanced Creative Writing: Prose Workshop	
ENGL 414	Advanced Creative Writing: Poetry Workshop	
ENGL 415	Advanced Creative Writing: playwriting Workshop	
ENGL 480	Screenwriting II	
Select 3 credits from English literature courses numbered 300 and above.		3
Total Credits		18

¹ Students may make 1 or 2 of the following substitutions:

- HON 229G The New Testament as Literature for ENGL 243 The Bible as Literature;
- HON 234G The Worlds of Arthur, or HON 239G Medieval Understandings: Literature and Culture in the Middle Ages for ENGL 271 Survey of English Literature I;

² All Creative Writing workshops may be taken more than once.

English - Bachelor of Arts Concentration: Creative Writing

In addition to meeting the English basic skills requirement, the student majoring in Creative Writing must complete 42 credits in English beyond ENGL 111G Rhetoric and Composition satisfying the following requirements.

Departmental Requirements

Select three from the following: ^{1,2}	9
ENGL 243 The Bible as Literature	
ENGL 251 Survey of American Literature I	
ENGL 252 Survey of American Literature II	
ENGL 262 Masterpieces of Western European Literature, Post-Renaissance to Modern Times	
ENGL 263 History of Argument	
ENGL 271 Survey of English Literature I	
ENGL 272 Survey of English Literature II	
ENGL 310 Critical Writing ²	3
Select one from the following: ²	3
ENGL 301 Theory and Criticism: Rhetoric and Culture	
ENGL 302 Theory and Criticism: Literature and Culture	
ENGL 303 Theory and Criticism: Film, Media and Culture	
Select a minimum of two different Creative Writing workshops from the following:	6
ENGL 304 Creative Writing: Prose	
ENGL 306 Creative Writing: Poetry	
ENGL 307 Creative Writing: Creative Nonfiction	

ENGL 308	Creative Writing: Playwriting	
ENGL 309	Screenwriting I	
Select two advanced Creative Writing Workshops from the following:		6
ENGL 413	Advanced Creative Writing: Prose Workshop	
ENGL 414	Advanced Creative Writing: Poetry Workshop	
ENGL 415	Advanced Creative Writing: playwriting Workshop	
ENGL 480	Screenwriting II	
Select two from the following:		6
ENGL 354	Form and Technique in Fiction	
ENGL 356	Form and Technique in Poetry	
ENGL 358	Form and Technique in Playwriting	
Select 9 additional credits from English courses numbered 400-499.		9
Total Credits		42

- ¹ Students may make 1 or 2 of the following substitutions:
- HON 229G The New Testament as Literature for ENGL 243 The Bible as Literature;
 - HON 234G The Worlds of Arthur, or HON 239G Medieval Understandings: Literature and Culture in the Middle Ages for ENGL 271 Survey of English Literature I;

- ² These 15 credits should be completed before the student enrolls in 400-level courses.

Concentration: English

Departmental Requirements

In addition to meeting the English basic skills requirement, the student majoring in English must complete 42 credits in English beyond ENGL 111G Rhetoric and Composition satisfying the following requirements.

Departmental Requirements

Select four from the following: ^{1,2}		12
ENGL 220G	Introduction to Creative Writing	
ENGL 243	The Bible as Literature	
ENGL 251	Survey of American Literature I	
ENGL 252	Survey of American Literature II	
ENGL 262	Masterpieces of Western European Literature, Post-Renaissance to Modern Times	
ENGL 263	History of Argument	
ENGL 271	Survey of English Literature I	
ENGL 272	Survey of English Literature II	
ENGL 310	Critical Writing ²	3
Select one from the following: ²		3
ENGL 301	Theory and Criticism: Rhetoric and Culture	
ENGL 302	Theory and Criticism: Literature and Culture	
ENGL 303	Theory and Criticism: Film, Media and Culture	

Select 6 additional credits from English courses numbered 298-399.		6
Students may count 1 or 2 of the following Honors courses towards the requirement of 6 hours of 300-level electives:		
HON 348V	Comparative Mythology: Myth, Ritual, and the Life Cycle ³	
HON 365V	African and Caribbean: Literature and Film	
HON 366V	The Gothic Imagination	
HON 379V	Literature as Film	
Select one from the following:		3
ENGL 469	Advanced Study in American Literature	
ENGL 438	Literature of the American Renaissance	
ENGL 442	Modern and Contemporary American Poetry	
ENGL 456	Ethnic Studies in US Literature and Culture	
ENGL 458	Latino/a Literature and Culture	
ENGL 405	Chaucer	3
or ENGL 407	Milton	
ENGL 408	Shakespeare I	3
or ENGL 409	Shakespeare II	
Select 9 additional credits from English courses numbered 400-499.		9
Total Credits		42

- ¹ Students may make 1 or 2 of the following substitutions:
- HON 229G The New Testament as Literature for ENGL 243 The Bible as Literature;
 - HON 234G The Worlds of Arthur, or HON 239G Medieval Understandings: Literature and Culture in the Middle Ages for ENGL 271 Survey of English Literature I;
- ² These 15 credits should be completed before the student enrolls in 400-level courses.
- ³ Students may not take both ENGL 392V Mythology and HON 348V Comparative Mythology: Myth, Ritual, and the Life Cycle.

Concentration: Literature, Language and Culture

Departmental Requirements

In addition to meeting the English basic skills requirement, the student pursuing an emphasis in Literature, Language, and Culture must complete 42 credits in English beyond ENGL 111G Rhetoric and Composition satisfying the following requirements.

Departmental Requirements

Select three from the following: ^{1,2}		9
ENGL 251	Survey of American Literature I	
ENGL 252	Survey of American Literature II	
ENGL 271	Survey of English Literature I	
ENGL 272	Survey of English Literature II	
Select one from the following: ^{1,2}		3
ENGL 220G	Introduction to Creative Writing	
ENGL 243	The Bible as Literature	

ENGL 262	Masterpieces of Western European Literature, Post-Renaissance to Modern Times	
ENGL 263	History of Argument	
ENGL 310	Critical Writing ²	3
Select one from the following: ²		3
ENGL 301	Theory and Criticism: Rhetoric and Culture	
ENGL 302	Theory and Criticism: Literature and Culture (recommended)	
ENGL 303	Theory and Criticism: Film, Media and Culture	
Select 6 additional credits from English courses numbered 298-399. ³		6
Students may count 1 or 2 of the following Honors courses towards the requirement of 6 hours of 300-level electives: ³		
HON 348V	Comparative Mythology: Myth, Ritual, and the Life Cycle	
HON 365V	African and Caribbean: Literature and Film	
HON 366V	The Gothic Imagination	
HON 379V	Literature as Film	
Select one from the following:		3
ENGL 321V	Modern European Drama

Digital Rhetoric and Design		
Select two from the following: ³		6
ENGL 315	Writing for the Web	
ENGL 326	Cultural Identity and Representation Across the Media	
ENGL 449	Advanced Study in Writing	

ENGL 478	Document Design
Additional Courses	
Select 6 credits of upper division level, advisor-approved English courses relevant to program of study. ⁴	
Total Credits	

- ¹ Students may make 1 or 2 of the following substitutions:
 - HON 229G The New Testament as Literature for ENGL 243 The Bible as Literature;
 - HON 234G The Worlds of Arthur, or HON 239G Medieval Understandings: Literature and Culture in the Middle Ages for ENGL 271 Survey of English Literature I;
- ² These 18 credits should be completed before the student enrolls in 400 level courses.
- ³ Students must take a total of 12 credit hours at the 400 level or above.

English - Master of Arts

New Mexico State University offers MA programs in four areas of emphasis; each one requires 36 hours of graduate-level work.

Emphasis: Creative Writing

- Students electing this emphasis
- complete 36 hours of graduate-level course work including creative writing and literature;
 - submit a creative writing portfolio (totaling 20-50 pages), depending on genre choices, that includes original creative work in more than one genre and either an essay describing the writer’s personal poetics or a critical piece of writing relevant to the portfolio; and
 - pass an oral examination.

Required Coursework ¹		
Workshop courses in at least two genres		12
Graduate form and technique courses		6
Graduate literature courses in the Department of English		9
Elective courses		6
In the final term:		
ENGL 520	Workshop: Advanced Composition	3
ENGL 574	Workshop: Advanced Writing Prose	3
ENGL 575	Workshop: Advanced Writing Poetry	3
ENGL 576	Workshop: Advanced Writing Playwriting	3
ENGL 591	Graduate Screenwriting	3
Total Credits		48

¹ Graduate assistants must take 3 hours of ENGL 571 Composition Pedagogy and Practicum, during their first semester of teaching.

Emphasis: English Studies for Teachers

Students take 36 hours of graduate coursework, including core courses in creative writing, film, literature and rhetoric and professional communication, as well as additional courses in an area of specialization approved by an advisor. Students in the program develop individualized plans of study in consultation with an advisor. They conclude their program by developing a master’s portfolio or other approved capstone project and passing an oral examination. This portfolio may provide material for public schools’ Professional Development Dossier. With

advisor approval, students may take up to two related courses (six credit hours) in other departments, such as Communication Studies, Education, Journalism, and Theatre, and may also develop an alternative capstone experience and enroll for appropriate credits (such as independent study).

Required Coursework

Core class in Composition, Rhetoric, and Professional Communication	3
Core class in Creative Writing	3
Core class in Literature	3
Core class in Film	3
Courses in core area of specialization	18-21
Courses typically meeting capstone requirement:	3-6
ENGL 577 Workshop: Advanced Technical and Professional Writing	
Or Portfolio	
Total Credits	33-39

Emphasis: Literature

Students electing this emphasis can choose to work in various areas of literature, criticism and film. Students are required to

- complete 36 hours of coursework while satisfying area requirements (in early and modern literatures, in British and American Literatures, and in critical theory) with advisor-approved courses;
- demonstrate competency in a foreign language;
- deliver a public presentation on their research;
- write a master essay or thesis; and
- complete their program by passing an oral examination.

See advisor for list of courses satisfying theory and distribution requirements.

Required Coursework¹

Graduate course in critical theory	3
Literature courses, including "early" and "late" periods, English and American	18
Elective courses in English Department	9-12
Master's Thesis or Master Essay	
ENGL 599 Master's Thesis ²	3-6
or ENGL 598 Master's Essay	
Total Credits	33-39

¹ Graduate assistants must take 3 hours of ENGL 571 Composition Pedagogy and Practicum, during their first semester of teaching.

² Students must take 6 credits of ENGL 599 Master's Thesis to complete this requirement.

Emphasis: Rhetoric and Professional Communication

Students electing this emphasis take core courses across a wide range of topics within rhetoric and professional communication and choose from one of four areas of specialization:

- Composition,
- Critical/Cultural Studies,

- Rhetoric and
- Professional and Technical Communication.

Students conclude their program by writing a thesis, composing a portfolio of work completed in the program, or writing a master essay and by passing an oral examination. Students develop individualized plans of study in consultation with an advisor.

Required Coursework

Core classes from an area of specialization:	6
Composition	
Critical/Cultural Studies	
Rhetoric	
Professional and Technical Communication	
Core classes in additional area(s)	6
Additional courses in area of specialization	12

Methods Course

Select one from the following:	3
ENGL 548 Graduate Study in Empirical Research	
ENGL 601 Qualitative Research	
ENGL 602 Quantitative Research	
ENGL 603 Rhetorical Criticism and Methodology	

Elective Courses

Select one from the following:	
Advisor-approved electives in English and/or related fields	
ENGL 597 Internship in Technical and Professional Communication	
ENGL 599 Master's Thesis ¹	

Capstone Course

Select one from the following: ²	3-6
ENGL 585 Advanced Writing Workshop: RPC Capstone	
ENGL 598 Master's Essay	
ENGL 599 Master's Thesis ¹	

Core Courses

Select two core courses from area of specialization.	6
Select two core courses from any of the other three core areas:	6

Core Composition Courses

ENGL 564 History and Theory of Composition Studies	
ENGL 570 Graduate Study in Approaches to Composition ³	
ENGL 571 Composition Pedagogy and Practicum ³	

Core Critical/Cultural Studies Courses

ENGL 517 Graduate Study in Critical Theory	
ENGL 568 Rhetoric and Cultural Studies	

Core Professional and Technical Communication Courses

ENGL 512 Graduate Study in Writing in the Workplace	
ENGL 572 Technical-Professional Communication: Theory and Pedagogy	

Core Rhetoric Courses

ENGL 518 History of Rhetoric	
-----------------------------------	--

ENGL 519	Graduate Study in Modern Rhetorical Theory	
Specialized Courses		
Select four additional courses in area of specialization determined in consultation with an advisor. ⁴		12
<i>Composition Courses</i>		
ENGL 549	Graduate Study in Writing	
ENGL 550	Graduate Study in Literacy	
ENGL 561	Topics in Writing Program Administration	
<i>Critical/Cultural Studies Courses</i>		
ENGL 511	Discourse and Theories	
ENGL 549	Graduate Study in Writing	
ENGL 550	Graduate Study in Literacy	
ENGL 555	Graduate Study in Rhetoric of Scientific Literature	
ENGL 590	Master's Seminar in Rhetoric	
<i>Professional and Technical Communication Courses</i>		
ENGL 451	Practicum in the Grammar of American English	
ENGL 478	Document Design	
ENGL 543	Multimedia Theory and Production	
ENGL 549	Graduate Study in Writing	
ENGL 562	Interdisciplinary, Client-Based Project Practicum	
ENGL 565	Intercultural Rhetoric and Professional Communication	
ENGL 577	Workshop: Advanced Technical and Professional Writing	
ENGL 578	Topics in Rhetoric and Technology	
<i>Rhetoric Courses</i>		
ENGL 511	Discourse and Theories	
ENGL 530	Argument Theory and Practice	
ENGL 549	Graduate Study in Writing	
ENGL 555	Graduate Study in Rhetoric of Scientific Literature	
ENGL 590	Master's Seminar in Rhetoric	
Total Credits		54-57

¹ Students must take 6 credits of ENGL 599 Master's Thesis to complete this requirement. ENGL 599 Master's Thesis: in lieu of portfolio or master essay.

² Graduate assistants must take 3 hours of ENGL 571 Composition Pedagogy and Practicum, during their first semester of teaching.

³ Students may take either ENGL 570 Graduate Study in Approaches to Composition or ENGL 571 Composition Pedagogy and Practicum as a core course. Taking a second course will count under the area of specialization.

⁴ Students are encouraged to take ENGL 510 Proseminar in Rhetoric and Professional Communication, early in their time as a graduate student. This course is appropriate for all areas of specialization. Appropriate courses for each specialization are suggested, though the lists are not inclusive of all options.

English - Undergraduate Minor

Students not earning a bachelor's degree in English are eligible to pursue a minor in English. Students must earn 18 credits from the approved course lists below. Students may request approval for other courses clearly related to the minor from the undergraduate advisor in the Department of English.

Requirements		
Select 6 credits from the following: ¹		6
ENGL 220G	Introduction to Creative Writing	
ENGL 243	The Bible as Literature	
ENGL 251	Survey of American Literature I	
ENGL 252	Survey of American Literature II	
ENGL 262	Masterpieces of Western European Literature, Post-Renaissance to Modern Times	
ENGL 263	History of Argument	
ENGL 271	Survey of English Literature I	
ENGL 272	Survey of English Literature II	
Select one from the following:		3
ENGL 301	Theory and Criticism: Rhetoric and Culture	
ENGL 302	Theory and Criticism: Literature and Culture	
ENGL 303	Theory and Criticism: Film, Media and Culture	
ENGL 310	Critical Writing	
ENGL 311G	Advanced Composition	
Select 6 credits from English courses numbered 300-499.		6
Select three additional credits from English courses numbered 400-499.		3
Total Credits		18

¹ Students may make 1 or 2 of the following substitutions:

- HON 229G The New Testament as Literature for ENGL 243 The Bible as Literature;
- HON 234G The Worlds of Arthur, or HON 239G Medieval Understandings: Literature and Culture in the Middle Ages for ENGL 271 Survey of English Literature I;

Literature - Undergraduate Minor

Students not earning a bachelor's degree in English with an emphasis in Literature, Language and Culture are eligible to pursue a minor in Literature. Students must earn 18 credits from the approved course lists below. At least 12 credits must be upper division. Students may request approval for other courses clearly related to the minor from the undergraduate advisor in the Department of English. Students earning a BA in English must earn at least 6 credits approved by the Department of English undergraduate advisor beyond those earned for the major in order to earn a minor in Literature.

Requirements		
Select two from the following: ¹		6
ENGL 243	The Bible as Literature	
ENGL 251	Survey of American Literature I	
ENGL 252	Survey of American Literature II	

ENGL 262	Masterpieces of Western European Literature, Post-Renaissance to Modern Times
ENGL 263	History of Argument
ENGL 271	Survey of English Literature I
ENGL 272	Survey of English Literature II
Select one from the following:	
ENGL 301	Theory and Criticism: Rhetoric and Culture
ENGL 302	Theory and Criticism: Literature and Culture (recommended)
ENGL 303	Theory and Criticism: Film, Media and Culture
ENGL 310	Critical Writing
Select one from the following:	
ENGL 321V	Modern European Drama
ENGL 323	American Drama
ENGL 326	Cultural Identity and Representation Across the Media
ENGL 327V	Shakespeare around the Globe
ENGL 328V	Literature of Science Fiction and Fantasy
ENGL 329	Studies in Drama
ENGL 330V	Studies in Poetry
ENGL 335V	Studies in the Novel
ENGL 336	Studies in Film
ENGL 339V	Chicana/o Literature
ENGL 341V	American Indian Literature
ENGL 349	The Short Story
ENGL 363	Literature for Children and Young Adults
ENGL 380V	Women Writers
ENGL 392V	Mythology
ENGL 394V	Southwestern Literature
ENGL 399	Special Topics (with advisor approval)
<i>Substitutions Allowed</i>	
HON 348V	Comparative Mythology: Myth, Ritual, and the Life Cycle
HON 365V	African and Caribbean: Literature and Film
HON 366V	The Gothic Imagination
Select two from the following:	
ENGL 405	Chaucer
ENGL 407	Milton
ENGL 408	Shakespeare I
ENGL 409	Shakespeare II
ENGL 417	Advanced Study in Critical Theory
ENGL 421	Advanced Study in a Literary Period or Movement
ENGL 422	Advanced Study in a Literary Form or Genre
ENGL 423	Advanced Study in a Major Author
ENGL 424	Advanced Study in a Major Text
ENGL 425	Advanced Study in Comparative Literature
ENGL 429	British Romanticism

ENGL 432	Gothic Literature
ENGL 433	Victorian Literature
ENGL 438	Literature of the American Renaissance
ENGL 442	Modern and Contemporary American Poetry
ENGL 444	Modern British Fiction
ENGL 445	Postmodern Fiction
ENGL 451	Practicum in the Grammar of American English
ENGL 452	History of the English Language
ENGL 453	World Literatures
ENGL 456	Ethnic Studies in US Literature and Culture
ENGL 458	Latino/a Literature and Culture
ENGL 463	Advanced Study in English Literature
ENGL 469	Advanced Study in American Literature
ENGL 481	Women's Literature
ENGL 486	Hollywood Film
ENGL 489	Cultural Studies: Literature and Theory
ENGL 493	Middle English Textual Cultures

Total Credits 18

¹ Students may make 1 or 2 of the following substitutions:

- HON 229G The New Testament as Literature for ENGL 243 The Bible as Literature;
- HON 234G The Worlds of Arthur, or HON 239G Medieval Understandings: Literature and Culture in the Middle Ages for ENGL 271 Survey of English Literature I;

Medieval and Early Modern Studies - Undergraduate Minor

Students must earn 18 credits from the approved course lists below. At least 9 credits must be upper division. No more than 9 credits may be taken under faculty in any department. Students may request approval for other courses clearly related to Medieval and/or Early Modern Studies from the undergraduate advisor in the Department of English in consultation with faculty in medieval and early modern studies.

Requirements

Select three from the following:		9
ART 295G	Introduction to Art History I	
ENGL 243	The Bible as Literature	
ENGL 271	Survey of English Literature I	
HIST 101G	Roots of Modern Europe	
HIST 211G	East Asia to 1600	
HIST 221G	Islamic Civilizations to 1800	
HON 222G	Foundations of Western Culture	
HON 229G	The New Testament as Literature	
HON 234G	The Worlds of Arthur	
HON 239G	Medieval Understandings: Literature and Culture in the Middle Ages	
Select 9 credits from the following:		9
ART 300	Special Topics in Art History ¹	

ART 328	Baroque Art and Architecture in Northern Europe
ART 333	Baroque Art and Architecture in Italy, Spain, and Hispanic Latin America

PHIL 463	Independent Studies ¹
SPAN 306	Special Topics ¹
THTR 312	Acting Shakespeare

Total Credits

18

¹ Courses are approved for the minor only when their topics are appropriate. Students must seek approval to count these courses for the minor from the undergraduate advisor in the Department of English.

Rhetoric and Professional Communication - Doctor of Philosophy

Students in the doctoral program will develop individualized plans of study in consultation with advisors. Students are required to take

- 78 hours of graduate-level coursework including the doctoral proseminar in the first semester;
- courses in research methods;
- core courses in composition, critical/cultural studies, professional communication, and rhetoric;
- additional coursework in an area of specialization determined in consultation with an advisor;
- an internship; and
- a dissertation.

The Ph.D. also requires a qualifying portfolio, a comprehensive examination and an oral examination. The dissertation must be completed and approved within 5 years after the comprehensive exam. Consult the department for additional instructions regarding the internship, qualifying comprehensive examinations, portfolio and dissertation.

Requirements

Program Requirements

ENGL 610	Proseminar in Rhetoric and Professional Communication	3
Methods Courses		6
ENGL 597	Internship in Technical and Professional Communication	6
ENGL 700	Doctoral Dissertation	18
Select one from the following: ¹		3
ENGL 548	Graduate Study in Empirical Research	
ENGL 601	Qualitative Research	
ENGL 602	Quantitative Research	
ENGL 603	Rhetorical Criticism and Methodology	

Core Courses

Select four from the following core courses: 12

Core Composition Courses

ENGL 664	History and Theory of Composition Studies
ENGL 571	Composition Pedagogy and Practicum

Core Critical/Cultural Studies Courses

ENGL 517	Graduate Study in Critical Theory
ENGL 668	Rhetoric and Cultural Studies

Core Professional and Technical Communication Courses

ENGL 512	Graduate Study in Writing in the Workplace
----------	--

ENGL 572	Technical-Professional Communication: Theory and Pedagogy	
Core Rhetoric Courses		
ENGL 518	History of Rhetoric	
ENGL 519	Graduate Study in Modern Rhetorical Theory	
Specialized Courses		
Select 15-18 credits in area of specialized determined in consultation with an advisor. ²		15-18
Total Credits		63-66

¹ Graduate assistants must take 3 hours of ENGL 571 Composition Pedagogy and Practicum, during their first semester of teaching.

² Students define their specialized area, a coherent set of related courses drawn from both inside and outside the Department of English, in consultation with their doctoral committee. Possible specializations include Border Rhetorics and Cultures; Writing Program Administration/Writing Center Administration; Assessment; Pedagogy; Literacy Studies; Identity and Political and Social Rhetoric; New Media Rhetoric and Design; Intercultural Rhetorics; Writing Across the Curriculum; Workplace Communication; and the Rhetoric of Science.

Transfer Courses (up to 18 credits)

Students may apply 18 hours of master's level work to the 54-hour coursework requirement with departmental approval. In consultation with an advisor and the Doctoral Committee, students petition for transfer credits when they submit their qualifying portfolio and file the program of study with the Graduate School.

Financial Support

Students are eligible for teaching assistantships and a variety of positions that involve writing around campus and the community. Because many students work full time, many courses are offered in the late afternoon and evening to accommodate various schedules.

Application Information

Please refer to the online application process described on the NMSU Admissions website for specific instructions for each program.

Rhetoric and Professional Communication - Undergraduate Minor

Students not earning a bachelor's degree in English with an emphasis in Rhetoric, Digital Media and Professional Communication are eligible to pursue a minor in Rhetoric and Professional Communication. Students must earn 18 credits from the approved course lists below. Students may request approval for other courses clearly related to the minor from the undergraduate advisor in the Department of English. Students earning a BA in English must earn at least 6 credits approved by the Department of English undergraduate advisor beyond those earned for the major in order to earn a minor in Rhetoric and Professional Communication.

Requirements

Select one from the following: ¹		3
ENGL 220G	Introduction to Creative Writing	

ENGL 243	The Bible as Literature	
ENGL 251	Survey of American Literature I	
ENGL 252	Survey of American Literature II	
ENGL 262	Masterpieces of Western European Literature, Post-Renaissance to Modern Times	
ENGL 263	History of Argument	
ENGL 271	Survey of English Literature I	
ENGL 272	Survey of English Literature II	
Select one from the following:		3
ENGL 203G	Business and Professional Communication	
ENGL 211G	Writing in the Humanities and Social Sciences	
ENGL 218G	Technical and Scientific Communication	
ENGL 311G	Advanced Composition	
ENGL 318G	Advanced Technical and Professional Communication	
Select 12 credits from the following:		12
ENGL 301	Theory and Criticism: Rhetoric and Culture	
ENGL 315	Writing for the Web	
ENGL 318G	Advanced Technical and Professional Communication	
ENGL 326	Cultural Identity and Representation Across the Media	
ENGL 412	Writing in the Workplace	
ENGL 418	History of Rhetoric	
ENGL 431	Technical Editing	
ENGL 449	Advanced Study in Writing	
ENGL 451	Practicum in the Grammar of American English	
ENGL 452	History of the English Language	
ENGL 460	Proposal Writing	
ENGL 462	Interdisciplinary, Client-Based Project Practicum	
ENGL 470	Approaches to Composition	
ENGL 478	Document Design	
ENGL 497	Internship	
Total Credits		18

- ¹ Students may make 1 or 2 of the following substitutions:
- HON 229G The New Testament as Literature for ENGL 243 The Bible as Literature;
 - HON 234G The Worlds of Arthur, or HON 239G Medieval Understandings: Literature and Culture in the Middle Ages for ENGL 271 Survey of English Literature I;

Geography

Undergraduate Program Information

The Geography Program emphasizes the interaction of humans with the environment, and the program prepares students for professional positions in the public and private sectors, as well as for graduate work. The Department offers two concentrations for the major:

- The Geographic Information Science and Technology (GIS&T) Concentration emphasizes the acquisition of knowledge and skills in geographic information systems and remote sensing tools and concepts;
- The Human-Environment Relationships (HER) Concentration focuses on the analysis and interpretation of the coupled and complex interactions between people and the environment.

As detailed above, the Department also offers minors in Geography and GIS&T. The requirements for teaching fields in earth sciences are listed under the Department of Curriculum and Instruction in the College of Education.

Note: A grade of "C-" or better is required for all courses taken for the major. Students may not take any of these courses S/U.

Graduate Program Information

The Department of Geography offers graduate study leading to the Master of Applied Geography degree, with a specific focus on the use of geographic perspectives and tools to examine an array of applied research questions related to land use change, water resources, biogeography, desertification, landscape conservation, and urban and transportation planning. A minor in Geographic Information Science and Technology (GIS &T) is also available for all graduate students, regardless of major; details are provided above. Admission to the program is in accord with the general regulations of the Graduate School. Foreign students must receive a minimum score of 570 on the paper-based or 230 on the computer-based Test of English as a Foreign Language (TOEFL) examination. Any applicant who does not have an adequate undergraduate background in geography will be required to make up the deficiencies. Applicants must submit three letters of recommendation and a formal statement of intent to the Department as part of the application process. Please contact Dr. Daniel Dugas, Geography Graduate Director (ddugas@nmsu.edu) if you have any questions about the program.

The Department is a sponsor of the interdisciplinary graduate degree program, which offers both MS and Ph.D. degrees in water science and management. Program details, application procedures, and funding resources are listed under the program description that is part of the College of Agricultural Consumer and Environmental Sciences, the lead College for the program. Interested students are encouraged to contact Dr. Christopher Brown, at (575) 646-1892 or brownchr@nmsu.edu, for more information.

The Department is also a participant in the Western Regional Graduate Program (WRGP) supported by the Western Interstate Commission of Higher Education (WICHE). The WRGP is a tuition-reciprocity arrangement that enables students that are legal residents in WICHE states (Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington and Wyoming) to attend NMSU and pay the resident tuition rate, instead of the nonresident rate that an out-of-state student would normally pay.

The Department has a contract research laboratory (Spatial Applications Research Center-SpARC) and a state-of-the-art computer teaching laboratory, both of which support the full suite of ESRI and ENVI geo-spatial analytical software. The SpARC laboratory employs graduate students who work with local and state governments and research agencies, as well as with businesses on applied geography projects. Our teaching laboratory supports graduate students engaged in course work and research projects. The Department has good working relationships

with the Water Resources Research Institute, the Jornada Experimental Range, the Physical Sciences Laboratory, and other units on campus. The Department has its own field equipment and field vehicle, which graduate students can use to support their thesis research. The potential for financial support exists for graduate students in Geography through teaching assistantships and research assistantships. Inquiries regarding the program and assistantships should be directed to the Dr. Daniel Dugas, Geography Graduate Director (ddugas@nmsu.edu). Financial aid questions should be addressed to the Office of Financial Aid at NMSU.

Degrees for the Department

Geography - Bachelor of Science (p. 298)

Geography - Master of Applied Geography (p. 300)

Minors for the Department

Geography - Undergraduate Minor (p. 300)

Geographic Information Science and Technology - Undergraduate Minor (p. 298)

Geographic Information Science and Technology - Graduate Minor (p. 298)

Associate Professor, Carol Campbell, Department Head

Professors DeMers; **Associate Professors** Brown, Buenemann, Campbell; **Assistant Professors** Dugas; **Adjunct Faculty** Rango, Whitford; **Professor Emeritus** Czerniak, Wright

C. P. Brown, Ph.D., (California-Santa Barbara/San Diego State)– geographic information systems, water resources, U.S.-Mexico border environmental issues; M. Buenemann, Ph.D. (Oklahoma)– geographic information science and technology, land change science, drylands; C. L. Campbell, Department Head, Ph.D. (UCLA)– biogeography, landscape ecology, remote sensing; M. N. DeMers, Ph.D. (Kansas)– geographic information science, landscape ecology, geographic education; D. Dugas, Ph.D. (Oregon)– geomorphology, physical geography;

Emeritus Faculty– R.J. Czerniak, Ph.D. (Colorado-Boulder)– land use and transportation planning, Europe, urban geography; J. B Wright, Ph.D. (California- Berkeley)– environmental conservation, cultural geography, American West

GEOG 111G. Geography of the Natural Environment 4 Credits (3+3P)

Introduction to the physical processes that shape the human environment: climate and weather, vegetation dynamics and distribution, soil development and classification, and geomorphic processes and landform development.

GEOG 112G. World Regional Geography 3 Credits

Overview of the physical geography, natural resources, cultural landscapes, and current problems of the world's major regions. Students will also examine current events at a variety of geographic scales.

GEOG 120G. Culture and Environment 3 Credits

Study of human-environmental relationships: how the earth works and how cultures impact or conserve nature. Introduction to relationships between people and natural resources, ecosystems, global climate change, pollution, and conservation.

GEOG 257. Introduction to Weather Science**4 Credits (3+3P)**

Introduction to Earth's atmosphere and the dynamic world of weather as it happens. Working with current meteorological data delivered via the Internet and coordinated with learning investigations keyed to the current weather; and via study of select archives. Crosslisted with: SOIL 257 and AGRO 257

Prerequisite(s): None.

GEOG 259. Introduction to Oceanography**4 Credits (3+3P)**

Introduces the origin and development of the ocean and marine ecological concepts. Examines physical processes such as waves, tides, and currents and their impact on shorelines, the ocean floor, and basins. Investigates physical processes as they relate to oceanographic concepts. Includes media via the Internet and laboratory examination of current oceanic data as an alternative to the actual oceanic experience. Students will gain a basic knowledge and appreciation of the ocean's impact on the world's ecology.

GEOG 281. Map Use: Reading, Analysis and Interpretation**3 Credits (2+3P)**

Exploration of the cartographic medium. Development of critical map analysis and interpretation skills, and map literacy. Comprised of traditional lecture, labs, and map use projects.

GEOG 291. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

GEOG 295. Introduction to Climate Science**4 Credits (3+3P)**

Examines fundamentals and related issues of Earth's climate system, climate variability, and climate change. Develops solid understandings of Earth's climate system framed in the dynamic, Earth system based approach to the science.

GEOG 315V. World Agriculture and Food Problems**3 Credits**

Same as AG E 315V.

GEOG 325V. New Mexico and the American West**3 Credits**

Examination of the cultural and historical patterns, economic activities and physical characteristics of New Mexico with comparisons made with other western states.

GEOG 326. U.S. National Parks**3 Credits**

Exploration of origins, landscapes, ecosystems, management issues, and conflicts in U.S. National Parks. The regional geography of the United States as seen through the creation and protection of biologically and culturally significant lands.

GEOG 328V. Geography of Latin America**3 Credits**

Explores Latin America from a geographical perspective, integrating environmental, cultural and socioeconomic factors in an in-depth study of the development of the region and contemporary issues and challenges facing the region.

GEOG 331V. Europe**3 Credits**

Focus on the cultural continent of Europe, from Iceland to the Ural Mountains and from Archangel, Russia., to Malta. An overview of climate, geology, topography, soils, and vegetation, as well as a brief historical geography of the continent. Current environmental, social, and political issues of Europe will be discussed. A series of regional studies is also offered.

GEOG 351. Fundamentals of Biogeography**3 Credits**

Floristic and physiognomic characteristics of the Earth's major ecosystems and their distributions; ecosystem dynamics, evolution, and physical environment; field and laboratory techniques including remote sensing. Taught with GEOG 557.

GEOG 353. Geomorphology**3 Credits (2+3P)**

Examination of the principle theories and concepts of landform creation; exploration of the roles of structure, processes, climate, and time in the formation of various types of landforms. Taught with GEOG 553. Crosslisted with: GEOL 353

Prerequisite(s): GEOL 111G and GEOG 111G.

GEOG 357. Climatology**3 Credits**

Elements and controls of climate. Energy and hydrologic cycles, general circulation, climate classification, distribution of climate types, microscale effects, applications. Same as AGRO 357, SOIL 357.

Prerequisites: MATH 120.

GEOG 361V. Economic Geography**3 Credits**

The geographic relationships of supply and demand resources, population, and transportation. Site analysis and decision-making in different economic systems and cultures and how these decisions affect the environment and the location of economic activities.

GEOG 363V. Cultural Geography**3 Credits**

The world's diverse cultural landscapes. Emphasis on the connections between social, political, religious, and agricultural patterns and the impact of societies on the natural environment.

GEOG 365V. Urban Geography**3 Credits**

The global historical development of urban areas, as well as the changing functions of today's cities. A comparison between the North American city system and cities in Europe, Asia, and South America, including the development of the city form, the internal spatial organization of commercial, residential, and industrial areas, and socio-economic and political factors.

GEOG 373. Introduction to Remote Sensing**4 Credits (3+3P)**

Introduction to the theory, techniques, and applications of remote sensing. Topics include electromagnetic radiation; remote sensing systems; remote sensing of the biosphere, hydrosphere, atmosphere, lithosphere, and cultural landscapes. Course includes lectures and also labs focused on the basic analysis and interpretation of remote sensing products. Taught with GEOG 573. May be repeated up to 4 credits.

GEOG 381. Cartography and Geographic Information Systems**4 Credits (3+3P)**

Design and construction of thematic maps. Introduction to cartographic principles in lecture. Emphasis on map-making using GIS software in the labs. Taught with GEOG 571. May be repeated up to 4 credits.

GEOG 382. Aerial Photo Interpretation**3 Credits (2+3P)**

Introduction to use and analysis of aerial photographs. Emphasis on physical features and cultural patterns.

GEOG 401. Internship/Co-op**1-3 Credits (1-3)**

Provides an opportunity whereby students work with a local, regional, or federal agency, or private sector firm on applied geographic work, under the supervision of an agency or firm professional and a geography faculty member. Consent of instructor required.

GEOG 435. Environmental Planning**3 Credits**

Exploration of planning tools that advance the management of land and water resources, meeting current societal needs, while also minimizing damage to nature and society. Class activities include applied exercises that explore contemporary planning issues, including land conservation, natural hazards, biophysical analysis, water resource management, Federal land issues, and remediation of Superfund sites. Crosslisted with: GEOG 535.

GEOG 441. System Design for Geographic Information Science and Technology (GIS&T)**3 Credits**

A critical aspect of GIS is its ability to provide the necessary products within the organization within which it is implemented. This is an in-depth analysis of currently accepted planning methodologies designed to create a successful implementation of GIS inside organizations. Taught with GEOG 581.

Prerequisite(s): GEOG 481 or consent of instructor.

GEOG 452. Landscape Ecology**4 Credits (3+2P)**

Analysis of the structure, function and change of natural and anthropogenic landscapes. Patches, corridors, matrix and network, spatial organization, landscape dynamics, and role of disturbance in overall functioning of landscapes. Role of landscape heter. Taught with GEOG 552.

Prerequisite(s): Either GEOG 351, BIOL 301, or other basic ecology course or consent of instructor.

GEOG 455. Southwest Environments**3 Credits**

The U.S. Southwest: physical and human geography, coupled human-environment interactions, causes and consequences of environmental issues, and implications for sustainable development. Taught with GEOG 555. May be repeated up to 3 credits. Consent of Instructor required.

GEOG 467. Transportation Geography**3 Credits**

Nature and distribution of land, air and water transport facilities and their importance in regional development.

Prerequisite: GEOG 120G or consent of instructor.

GEOG 472. Soil Morphology and Classification**4 Credits (2+2P)**

Same as SOIL 472. May be repeated up to 4 credits. Crosslisted with: SOIL 472.

Prerequisite(s): SOIL 252.

GEOG 473. Advanced Remote Sensing**4 Credits (3+3P)**

Introduction to advanced topics in digital image processing, analysis, interpretation, and visualization. Topics include geometric and radiometric correction, image enhancement, image classification, change detection, and accuracy assessment. Lectures focus on the discussion of advanced remote sensing concepts, techniques, and applications; labs are applications-oriented. Taught with GEOG 573. May be repeated up to 4 credits.

GEOG 481. Fundamentals of Geographic Information Science and Technology (GIS & T)**4 Credits (3+3P)**

Fundamentals of computer-based systems which organize, analyze, and present spatially referenced data. Taught with GEOG 578.

Prerequisite(s): GEOG 281 or GEOG 381.

GEOG 482. Geodatabase Design**3 Credits (2+3P)**

A practical introduction to designing geodatabases. The course takes you through the eleven steps of geodatabase design divided into four stages: thematic characterization; developing the database elements, relationships and properties; capture and collection; and finally, implementation and documentation. Taught with GEOG 572.

Prerequisite(s): Geog 481 or consent of instructor.

GEOG 483. Field Explorations in Geography**3 Credits**

A field-based class where students complete exercises in physical, human, and environmental geography in the Southwest. May be offered as a two-week intensive class where students are away from Las Cruces and camping; or may be offered with weekend field trips depending on the instructor. A lab fee for transportation and other expenses is required. Taught with GEOG 583. May be repeated up to 3 credits.

GEOG 488. GIS and Water Resources**3 Credits**

Explores a range of GIS tools, routines, and data structures and then applies them to a range of research questions and management issues in the area of Water Resources. The class has both a lecture and laboratory component, and students will have opportunities to explore a range of GIS tools in formal lab exercises and a project in the student's area of interest. Crosslisted with: GEOG 588.

GEOG 491. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits. Consent of instructor required.

GEOG 492. GIS&T Applications and Modeling**3 Credits**

Group oriented class in which students conduct an applied research project in GIS application or modeling area of choice and conduct focused library research. Taught with GEOG 521

Prerequisite(s): GEOG 481 or Consent of Instructor.

GEOG 493. Special Problem Research**1-3 Credits**

For advanced and exceptional students. Research, and preparation of a paper in some phase of geography. A maximum of 6 credits may be earned. Consent of instructor required.

GEOG 495. Directed Readings**1-3 Credits**

Individual study through selected readings. A maximum of 6 credits may be earned. Consent of instructor required.

GEOG 501. Research Design and History of Geographic Thought**3 Credits**

Understanding and application of the research process, including conceptualization and definition of a research problem, study designs, data sources, data collection, and report writing in development of geographic thought.

GEOG 521. GIS & T Applications and Modeling**3 Credits**

Group oriented class in which students conduct an applied research project in a GIS application or modeling area of choice and conduct focused library research. Taught with GEOG 492.

Prerequisite(s): GEOG 481, or consent of instructor.

GEOG 535. ENVIRONMENTAL PLANNING**3 Credits**

Exploration of planning tools that advance the management of land and water resources, meeting current societal needs, while also minimizing damage to nature and society. Class activities include applied exercises that explore contemporary planning issues, including land conservation, natural hazards, biophysical analysis, water resource management, Federal land issues, and remediation of Superfund sites. Crosslisted with: GEOG 435.

GEOG 552. Landscape Ecology**4 Credits (3+2P)**

Analysis of the structure, function and change of natural and anthropogenic landscapes. Patches, corridors, matrix and network, spatial organization, landscape dynamics, and role of disturbance in overall functioning of landscapes. Role of landscape heterogeneity in landscape management. Taught with GEOG 452.

Prerequisite(s): Either GEOG 351, BIOL 301, or other basic ecology course or consent of instructor.

GEOG 553. Geomorphology**3 Credits (2+3P)**

Examination of the principle theories and concepts of landform creation; exploration of the roles of structure, processes, climate, and time in the formation of various types of landforms. Taught with GEOG 353.

Prerequisite(s): GEOG/GEOL 353 or GEOG/GEOL 111G.

GEOG 555. Southwest Environments**3 Credits**

The U.S. Southwest: physical and human geography, coupled human-environment interactions, causes and consequences of environmental issues, and implications for sustainable development. Taught with GEOG 455. May be repeated up to 3 credits.

GEOG 557. Fundamentals of Biogeography**3 Credits**

Floristic and physiognomic characteristics of the Earth's major ecosystems and their distributions; ecosystem dynamics, evolution, and physical environment; field and laboratory techniques including remote sensing. Taught with GEOG 351.

GEOG 571. Cartography and Geographic Information Systems**4 Credits (3+3P)**

Graduate level design and construction of thematic maps. Introduction to cartographic principles in lecture. Emphasis on map-making using GIS software in the labs. Taught with GEOG 381. May be repeated up to 4 credits.

GEOG 572. Geodatabase Design**3 Credits (2+3P)**

Graduate level introduction to designing geodatabases. The course takes you through the eleven steps of geodatabase design divided into four stages: thematic characterization; developing the database elements, relationships and properties; capture and collection; and finally implementation and documentation. Taught with GEOG 482. Consent of instructor required.

Prerequisite(s): GEOG 481.

GEOG 573. Introduction to Remote Sensing**4 Credits (3+3P)**

Graduate level introduction to the theory, techniques, and applications of remote sensing. Topics include electromagnetic radiation; remote sensing systems; remote sensing of the biosphere, hydrosphere, atmosphere, lithosphere, and cultural landscapes. Course includes lectures and also labs focused on the basic analysis and interpretation of remote sensing product. Taught with GEOG 373. May be repeated up to 4 credits.

GEOG 578. Fundamentals of Geographic Information Science and Technology (GIS & T)**4 Credits (3+3P)**

Graduate level fundamentals of computer-based systems that organize, analyze, and present spatially referenced data. Taught with GEOG 481.

Prerequisite(s): GEOG 571 or consent of instructor.

GEOG 581. System Design for Geographic Information Science and Technology (GIS & T)**3 Credits**

A critical aspect of GIS is its ability to provide the necessary products within the organization within which it is implemented. This is an in-depth analysis of currently accepted planning methodologies designed to create a successful implementation of GIS inside organizations. Taught with GEOG 441.

Prerequisite(s): GEOG 481 or consent of instructor.

GEOG 582. Advanced Remote Sensing**4 Credits (3+3P)**

Graduate level introduction to advanced topics in digital image processing, analysis, interpretation, and visualization. Topics include geometric and radiometric correction, image enhancement, image classification, change detection, and accuracy assessment. Lectures focus on the discussion of advanced remote sensing concepts, techniques, and applications; labs are applications-oriented. May be repeated up to 4 credits.

GEOG 583. Field Explorations in Geography**3 Credits**

A graduate level field-based class where students complete exercises in physical, cultural, and environmental geography in the Southwest. May be offered as a two-week intensive class where students are away from Las Cruces and camping; or may be offered with weekend field trips depending on the instructor. A lab fee for transportation and other expenses is required. May be repeated up to 3 credits.

GEOG 585. Advanced Spatial Analysis**3 Credits (3+2P)**

Introduction to basic spatial and aspatial descriptive statistics, statistical analysis of point and area patterns, critical review of quantitative research in geography, and exploration of advanced spatial analysis routines including cluster analysis, hot/cold spot analysis, and spatially weighted regression.

Prerequisite(s): STAT 251 or A ST 311; or consent of instructor.

GEOG 588. GIS and Water Resources**3 Credits**

This is a graduate level class that explores a range of GIS tools, routines, and data structures and then applies them to a range of research questions and management issues in the area of Water Resources.

The class has both a lecture and laboratory component, and students will have opportunities to explore a range of GIS tools in formal lab exercises and a project in the student's area of interest. Crosslisted with: GEOG 488.

GEOG 595. Directed Readings**1-3 Credits**

Advanced individual study through selected readings. May be repeated for a maximum of 6 credits.

GEOG 596. Residency**3-12 Credits**

A contractual learning experience in the public or private sector under the supervision of a field supervisor and two faculty members. Restricted to majors. PR/U grading only.

GEOG 598. Selected Topics**1-3 Credits**

Readings, discussions, lectures or laboratory studies of selected geographic themes. May be repeated for unlimited credit.

GEOG 599. Master's Thesis**12 Credits**

Supervised individual study of a student's thesis topic. May be repeated for an unlimited number of credits.

Name: Geography Office

Office Location: Breland Hall rm 137

Geographic Information Science and Technology - Graduate Minor

The Department of Geography offers a minor in Geographic Information Science and Technology (GIS&T), and this minor is available for all graduate students. To earn a minor in GIS&T, the following courses are required, combining for a total of 14 credits. Students may not take any of these courses S/U, and students must earn a grade of at least B- in all of these classes.

Requirements

GEOG 573	Introduction to Remote Sensing	4
GEOG 578	Fundamentals of Geographic Information Science and Technology (GIS & T)	4
Select 6 credits from the following:		6
GEOG 521	GIS & T Applications and Modeling	

GEOG 571	Cartography and Geographic Information Systems	
GEOG 572	Geodatabase Design	
GEOG 581	System Design for Geographic Information Science and Technology (GIS & T)	
GEOG 582	Advanced Remote Sensing	
GEOG 588	GIS and Water Resources	
GEOG 598	Selected Topics	
Total Credits		14

Geographic Information Science and Technology - Undergraduate Minor

The Department of Geography offers a minor in Geographic Information Science and Technology (GIS&T); this option applies for non-geography majors only. To earn a minor in GIS&T, the following courses are required.

Note: A grade of C- or better is required for all courses taken for the minor. Students may not take any of these courses S/U.

Departmental Requirements

GEOG 373	Introduction to Remote Sensing	4
GEOG 381	Cartography and Geographic Information Systems	4
GEOG 481	Fundamentals of Geographic Information Science and Technology (GIS & T)	4
GEOG 482	Geodatabase Design	3
Select 6-7 credits from the following:		6-7
GEOG 441	System Design for Geographic Information Science and Technology (GIS&T)	
GEOG 473	Advanced Remote Sensing	
GEOG 488	GIS and Water Resources	
GEOG 492	GIS&T Applications and Modeling	
Total Credits		21-22

Geography - Bachelor of Science

The department offers two concentrations for the major in Geography, please see below for more information.

Concentration: Geographic Information Science and Technology (GIS & T)

The Geographic Information Science and Technology (GIS&T) Concentration offers a solid foundation in geographic thought and human and physical geography, and provides students with advanced knowledge and skills in spatial analysis and modeling through the use of geographic information systems and remote sensing tools and concepts. Preparation for advanced studies is also provided.

Departmental Requirements

GEOG 111G	Geography of the Natural Environment	4
GEOG 112G	World Regional Geography	3
or GEOG 120G	Culture and Environment	
GEOG 281	Map Use: Reading, Analysis and Interpretation	3

GEOG 373	Introduction to Remote Sensing	4
GEOG 381	Cartography and Geographic Information Systems	4
GEOG 481	Fundamentals of Geographic Information Science and Technology (GIS & T)	4
GEOG 482	Geodatabase Design	3
Select 6-7 credits from the following:		6-7
GEOG 441	System Design for Geographic Information Science and Technology (GIS&T)	
GEOG 473	Advanced Remote Sensing	
GEOG 488	GIS and Water Resources	
GEOG 491	Special Topics	
GEOG 492	GIS&T Applications and Modeling	
Select 9-10 credits from the following: ¹		9-10
<i>Physical Geography (PG)</i>		
GEOG 351	Fundamentals of Biogeography	
GEOG 353	Geomorphology	
GEOG 357	Climatology	
GEOG 452	Landscape Ecology	
<i>Human Geography (HG)</i>		
GEOG 361V	Economic Geography	
GEOG 363V	Cultural Geography	
GEOG 365V	Urban Geography	
GEOG 467	Transportation Geography	
<i>Human Environment Geography (HEG)</i>		
Select one from the following:		3
GEOG 325V	New Mexico and the American West	
GEOG 326	U.S. National Parks	
GEOG 328V	Geography of Latin America	
GEOG 331V	Europe	
GEOG 483	Field Explorations in Geography	
Non-Departmental Requirements		
Select one from each of the following 3 categories:		3
Choose a Statistics class		
A ST 251G	Statistics for Business and the Behavioral Sciences (or)	
STAT 251G	Statistics for Business and the Behavioral Sciences (or)	
A ST 311	Statistical Applications	
ENGL 218G	Technical and Scientific Communication	3
or ENGL 318G	Advanced Technical and Professional Communication	
MATH 142G	Calculus for the Biological and Management Sciences	3
or MATH 190G	Trigonometry and Precalculus	
Second Language Requirement		4-18
Electives		
Select sufficient electives to total 120 credits, including 48 upper-division credits.		51
Total Credits		107-123

¹ Select either one Physical Geography (PG) class and two Human Geography (HG) classes, OR two Physical Geography (PG) classes and one Human Geography (HG) class.

Second Language Requirement

Option 1

Complete up to 112 (for non- native speakers; this course may require a 111 course as a prerequisite); or up to 113 (for heritage speakers)

Option 2

Complete six additional upper division credits in Geography beyond the major requirements.

Concentration: Human/Environment Relationships (HER)

The Human Environment Relationships Concentration offers a solid foundation in geographic thought and geospatial analysis and provides students with advanced knowledge and skills for assessing human and environmental systems and the coupled and complex interactions between people and the environment. Preparation for advanced graduate studies is also provided.

Departmental Requirements

GEOG 111G	Geography of the Natural Environment	4
GEOG 112G	World Regional Geography	3
GEOG 120G	Culture and Environment	3
GEOG 281	Map Use: Reading, Analysis and Interpretation	3
GEOG 381	Cartography and Geographic Information Systems	4
GEOG 455	Southwest Environments	3

Human Geography (HG)

Select two from the following: ¹		6
GEOG 361V	Economic Geography	
GEOG 363V	Cultural Geography	
GEOG 365V	Urban Geography	
GEOG 467	Transportation Geography	

Physical Geography (PG)

Select 6-7 credits from the following: ¹		6-7
GEOG 351	Fundamentals of Biogeography	
GEOG 353	Geomorphology	
GEOG 357	Climatology	
GEOG 452	Landscape Ecology	

Human-Environment Geography (HEG)

Select two from the following: ¹		6
GEOG 325V	New Mexico and the American West	
GEOG 326	U.S. National Parks	
GEOG 328V	Geography of Latin America	
GEOG 331V	Europe	
GEOG 483	Field Explorations in Geography	

Non-Departmental Requirements

ENGL 218G	Technical and Scientific Communication	3
or ENGL 318G	Advanced Technical and Professional Communication	
MATH 121G	College Algebra	3

Select one from the following:		3
A ST 251G	Statistics for Business and the Behavioral Sciences (or)	
STAT 251G	Statistics for Business and the Behavioral Sciences (or)	
A ST 311	Statistical Applications	
Second Language Requirement		4-18
Electives		
Select sufficient electives to total 120 credits, including 48 upper-division credits.		54
Total Credits		105-120

¹ HER students will also take one more class from the Human, Physical, or Human Environment Geography class areas.

Second Language Requirement

Option 1

Complete up to 112 (for non- native speakers; this course may require a 111 course as a prerequisite); or up to 113 (for heritage speakers)

Option 2

Complete six additional upper division credits in Geography beyond the major requirements.

Geography - Master of Applied Geography

The basic requirement for the Master of Applied Geography is a minimum of 30 graduate credits, including 6 thesis credits and a successful thesis defense. Students choosing the thesis option are required to file a digital copy of the thesis and thesis data that will be archived on the Departmental Website and the Departmental server. A non-thesis option requires 36 graduate credits with a minimum of 3 credits of professional residency and an approved final residency report. Students choosing the non-thesis option are required to file a digital copy of their residency report that will be archived on the Departmental Website and the Departmental server. All candidates must maintain an overall GPA of 3.00 or higher. All candidates must also receive a grade of B or better in the following required courses: GEOG 501 Research Design and History of Geographic Thought; GEOG 585 Advanced Spatial Analysis; and one graduate-level GIS&T course, either prior to entering the program or before graduation. A total of at least 15 credits must be earned in courses numbered 500 and above, and no more than 9 credits of the 30 (thesis option) or 36 (non-thesis option) can be earned outside of geography.

Geography - Undergraduate Minor

The Department of Geography offers a minor in Geography to interested undergraduate students from departments outside of Geography. To earn a minor in Geography, the following courses are required. *Note: A grade of C- or better is required for all courses taken for the minor. Students may not take any of these courses S/U.*

Departmental Requirements		
GEOG 111G	Geography of the Natural Environment	4
GEOG 112G	World Regional Geography	3
or GEOG 120G	Culture and Environment	
Select 3-4 credits from the following:		3-4

GEOG 281	Map Use: Reading, Analysis and Interpretation	
GEOG 381	Cartography and Geographic Information Systems	
GEOG 481	Fundamentals of Geographic Information Science and Technology (GIS & T)	
Physical Geography (PG)		
Select one from the following:		3-4
GEOG 351	Fundamentals of Biogeography	
GEOG 353	Geomorphology	
GEOG 357	Climatology	
GEOG 452	Landscape Ecology	
Human Geography (HG)		
Select one from the following:		3
GEOG 361V	Economic Geography	
GEOG 363V	Cultural Geography	
GEOG 365V	Urban Geography	
GEOG 467	Transportation Geography	
Human-Environment Geography (HEG)		
Select one from the following:		3
GEOG 325V	New Mexico and the American West	
GEOG 326	U.S. National Parks	
GEOG 328V	Geography of Latin America	
GEOG 331V	Europe	
GEOG 483	Field Explorations in Geography	
Total Credits		19-21

Geological Sciences

Undergraduate Program Information

Students may follow one of three courses of study in geology. The first track is a BS in Geology with the option in Geological Sciences.

This is a traditional geology curriculum, in which students take geology classes, augmented with calculus, physics, and chemistry. The second track is a BS in Geology with the option in Earth and Environmental Systems. Students take geology classes, augmented with a variety of environmental, economic, and political classes. The third track is a BS in Geology with the option in Earth Science Education. Students take geology and education classes, and are certified to teach science at New Mexico middle and high schools after completing the BS and one year of graduate work in the College of Education.

Students earning the BS in Geology, any option, may also earn the Undergraduate Research Certificate in the Department of Geological Sciences. Completion of the Undergraduate Research Certificate includes completion of an undergraduate research project, participation in the department's undergraduate research meetings and one of the following:

1. a senior thesis;
2. a manuscript submitted for a publication; or
3. an oral or poster presentation at a national or regional meeting.

Undergraduate Research Certificates are presented at the department's annual awards ceremony.

The Department of Geological Sciences also cooperates with the Department of Physics in offering a BS degree in physics with a

concentration in geophysics. Requirements are listed in the Department of Physics (p. 387) section of this catalog.

Graduate Program Information

The Department of Geological Sciences offers graduate study leading to the Master of Science degree in geology. Admission to the program is in accord with the general regulations of the Graduate School. The Graduate Record Examination (verbal, quantitative, and analytical writing only) is required.

Degrees for the Department

Geology - Bachelor of Science (p. 303)

Geology - Master of Science (p. 305)

Minors for the Department

Geology - Undergraduate Minor (p. 306)

Professor, Nancy J. McMillan, Department Head

Professors Amato, McMillan; **Associate Professor** Ramos; **Assistant Professors** Burgette, Hampton, Johnson; **Adjunct Professors** Davis, Witcher; **Emeritus Faculty** Giordano, Lawton, Mack

N. J. McMillan, Department Head, Ph.D. (Southern Methodist)– igneous petrology, geochemistry; J. M. Amato, Ph.D. (Stanford)– structural geology, tectonics; F. C. Ramos, Ph.D. (California- Los Angeles)– isotope geochemistry, petrology; R. J. Burgette, Ph.D. (Oregon)- neotectonics; B.A. Hampton, Ph.D. (Purdue)- sedimentology, tectonics; E.R. Johnson, Ph.D. (Oregon)- igneous petrology, volcanology; T. Giordano, Ph.D. (Emeritus) (Penn State) - low temperature geochemistry, ore deposits; T.F. Lawton, Ph.D. (Emeritus) (Arizona)- stratigraphy, basin analysis; G.H. Mack, Ph.D. (Emeritus) (Indiana-Bloomington)- sedimentary petrology, sedimentology.

GEOL 111G. Introductory to Geology

4 Credits (3+3P)

Covers the fundamental principles of physical geology, including the origin of minerals and rocks, geologic time, rock deformation, and plate tectonics. May be repeated up to 4 credits.

GEOL 212G. The Dynamic Earth

4 Credits (3+3P)

Introduction to earth systems. Geology and the solid earth, geologic time and earth history, water and the world oceans, atmosphere and weather, the solar system. Community Colleges only.

GEOL 220. Special Topics

1-3 Credits

Specific subjects to be announced in the Schedule of Classes. Community Colleges only. May be repeated for a maximum of 12 credits. May be repeated up to 12 credits.

GEOL 295. Environmental Geology

3 Credits

Earth processes that affect humans and their works, properties of rocks and soils, use and application of environmental geologic data.

GEOL 305V. Fossils and the Evolution of Life

3 Credits

Examination of the fossil record within the context of geologic time. Special emphasis on critical evaluation of possible terrestrial and extra-terrestrial causes for the evolution of plants and animals and for periods of mass extinction.

GEOL 310. Mineralogy

3 Credits (2+3P)

Crystallography and the physical and chemical aspects of minerals.

Prerequisite(s): GEOL 111G and CHEM 111G.

GEOL 312. Optical Mineralogy

3 Credits (2+3P)

Principles of optical mineralogy as applied to the identification and characterization of rock-forming minerals.

Prerequisite or Corequisite: GEOL 310.

GEOL 320. Special Topics

1-3 Credits

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

GEOL 335V. Earthquakes, Volcanoes, Hurricanes, and Floods: The Role of Natural Hazards in Civ Past and Present

3 Credits

This class will provide an introduction to geologic hazards and natural disasters, their effects on society and the attempts at preparation and mitigation for these events. Hazards to be covered include earthquakes, volcanic eruptions, floods, landslides, hurricanes, tsunamis and others.

GEOL 353. Geomorphology

3 Credits

Same as GEOG 353.

GEOL 360. General Geochemistry

3 Credits

The chemistry of the earth and its parts, with emphasis on geochemical systems and cycles, distribution of the elements, and mineral equilibria. Crosslisted with: CHEM 360

Prerequisite(s): CHEM 111G or CHEM 110G.

GEOL 399. Igneous and Metamorphic Petrology

3 Credits (2+3P)

Mineralogical composition, classification, and genesis of igneous and metamorphic rocks.

Prerequisite(s): GEOL 312 for geology majors, GEOL 310 for majors other than geology.

GEOL 401. Geology Colloquium

1 Credit

Presentations by visiting speakers and students. May be repeated up to 6 credits.

GEOL 420. Stratigraphy and Sedimentology

3 Credits (2+3P)

Identification and interpretation of sedimentary rocks with emphasis on classification, deposition, and stratal geometry.

Prerequisite: GEOL 310.

GEOL 424. Soil Chemistry

3 Credits

Same as SOIL 424, CHEM 424.

GEOL 434. Tectonics of Sedimentary Basins

3 Credits

Origin of sedimentary basins with emphasis on subsidence mechanisms, geometry of basin fill, depositional systems and tectonic setting. Course includes two off-campus field trips. Crosslisted with: GEOL 534.

Prerequisite(s): GEOL 420.

GEOL 441. Tutorial Geology**2 Credits (1+3P)**

Participation in teaching lower-division laboratories and conducting tutorial sessions. May be repeated for a total of 4 credits.

Prerequisite: junior or above standing and nomination by faculty.

GEOL 444. GIS for Geology**3 Credits**

Tools-based introduction to using GIS software for solving problems in geology. Emphasis on effectively portraying and analyzing geologic maps. One required field trip. Crosslisted with: GEOG 544.

Prerequisite(s): GEOL 470.

GEOL 449. The Geological Profession**1 Credit**

Investigation of graduate school and employment opportunities, writing the resume, conduct at interviews, and ethics of the profession. Also outcomes assessment exit exams. For graduating seniors only.

GEOL 452. Geohydrology**4 Credits (3+2P)**

Origin, occurrence, and movement of fluids in porous media assessment of aquifer characteristics. Development and conservation of ground water resources, design of well fields. Crosslisted with: C E 452 and E S 452.

Prerequisite(s): Junior or senior.

GEOL 455. Undergraduate Research**1-3 Credits**

Geological research and field projects for the advanced student. May be repeated for a total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

GEOL 465. Isotope Geochemistry**3 Credits**

Geochemistry of stable and radiogenic isotopes and its application to a wide range of problems in the earth and planetary sciences.

Prerequisite(s): CHEM 112G, GEOL 360, GEOL 399.

GEOL 470. Structural Geology**3 Credits (2+3P)**

Deformation of rocks of the earth. **Prerequisite:** GEOL 310

GEOL 471. Volcanology**3 Credits**

Identification and interpretation of volcanic deposits (including air fall, ash flow tuffs, surges, lava flows), with focus on how the characteristics of these deposits can reveal eruption styles and eruption dynamics. Other topics covered include: magma migration and storage, volcanic hazards, volcano monitoring and volcanoes and climate. Crosslisted with: GEOL 571.

Prerequisite(s): GEOL 399.

GEOL 475. Geology of Mineral Resources**3 Credits (2+3P)**

Introduction to ore deposits and industrial rocks and minerals; genesis, mining methods, estimation of reserves, exploration, and economic aspects of selected commodities.

Prerequisite: GEOL 399.

GEOL 477. Special Problems**1-3 Credits**

Selected advanced topics of current interest or importance. May be repeated for a total of 6 credits.

Prerequisite: consent of instructor.

GEOL 478. Petroleum Systems and Stratigraphy**3 Credits (2+3P)**

Sedimentation, stratigraphy, depositional environments, and tectonics in relation to the occurrences and exploration of hydrocarbons. Course includes two off-campus field trips. May be repeated up to 3 credits.

Prerequisite(s): GEOL 420.

GEOL 479. Environmental Soil Chemistry**3 Credits**

Same as SOIL 479.

GEOL 480. Seminar**1-3 Credits**

Supervised study of a subject not covered by regular courses. For organized group meetings treating selected advanced topics. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

GEOL 482. Zuhl Collection Internship**1-3 Credits (1-3)**

Applied experience working with the Zuhl Collection of rocks, minerals, fossils, and petrified wood, supervised by the Director of the Zuhl Collection. Activities include tours, display development, research on aspects of the collection, and other work in the museum. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: GEOL majors.

GEOL 490. Field Geology**3 Credits**

Mapping, instrumentation, and interpretation of geology in the field.

Prerequisites: either GEOL 420 and GEOL 470.

GEOL 491. Tectonic Evolution of North America**3 Credits**

Current ideas regarding the plate-tectonic evolution of North America from Archean through Holocene time, emphasizing the use of regional stratigraphy and structural geology to interpret mountain building, magmatism, and basin development.

Prerequisites: GEOL 111G, GEOL 399, GEOL 420 and GEOL 470.

GEOL 495. Geology Field Camp**4 Credits**

Three week intensive summer course. Geologic mapping in a site-based setting, emphasizing spatial relations, cross-section construction, and preparation of geologic reports. **Prerequisite:** GEOL 490

GEOL 499. Senior Thesis**1-3 Credits**

Writing a formal paper describing original geologic research conducted under supervision of a faculty advisor. Restricted to majors.

Prerequisite: consent of instructor.

GEOL 501. Geology Colloquium**1 Credit**

Presentations by visiting speakers and graduate students.

GEOL 520. Selected Topics**1-3 Credits**

Selected topics in geology. May be repeated for unlimited credit.

Prerequisites: graduate standing and consent of instructor.

GEOL 534. Tectonics of Sedimentary Basins**3 Credits**

Origin of sedimentary basins with emphasis on subsidence mechanisms, geometry of basin fill, depositional systems and tectonic setting. Course includes two off-campus field trips. Restricted to: GEOL majors.

Prerequisites: GEOL 420 or equivalent or consent of instructor.

GEOL 544. GIS FOR GEOLOGY**3 Credits**

Tools-based introduction to using GIS software for solving problems in geology. Emphasis on effectively portraying and analyzing geologic maps. One required field trip. Crosslisted with: GEOL 444.

Prerequisite(s): GEOL 470 or equivalent.

GEOL 553. Applied Geomorphology**3 Credits (2+3P)**

Same as GEOG 553.

GEOL 562. Analytical Geochemistry**3 Credits**

Techniques used to determine the major element, trace element and isotopic composition of rocks and minerals and the determination of mineral structure.

GEOL 565. Isotope Geochemistry**3 Credits**

Trace element partitioning and isotope systematics applied to problems in petrology and ore genesis.

GEOL 567. Global Geochemical Systems**3 Credits**

Generation of major element, trace element, and isotopic signatures of igneous rocks in different tectonic settings and propagation or destruction of those signatures by sedimentary and metamorphic processes.

GEOL 571. Volcanology**3 Credits**

Identification and interpretation of volcanic deposits (including air fall, ash flow tuffs, surges, lava flows), with focus on how the characteristics of these deposits can reveal eruption styles and eruptions dynamics. Other topics covered include: magma migration and storage, volcanic hazards, volcano monitoring and volcanoes and climate. Crosslisted with: GEOL 471.

Prerequisite(s): GEOL 399 or equivalent.

GEOL 578. Petroleum Systems and Stratigraphy**3 Credits (2+3P)**

Sedimentation, stratigraphy, depositional environments and tectonics in relation to the occurrences and exploration of hydrocarbons. Course includes two off-campus field trips.

Prerequisite(s): GEOL 420.

GEOL 582. Plate Tectonics**3 Credits**

Plate tectonics as a fundamental model for geological activity on a dynamic earth. Focuses on plate tectonic theory development and mechanisms, plus modern analogs of ancient processes.

GEOL 585. Geochronology**3 Credits**

The principles, analytical methods, and interpretation of the most common geochronologic methods.

GEOL 598. Special Research Programs**1-3 Credits**

Investigations into contemporary geological problems. May be repeated for unlimited credit.

Prerequisites: graduate standing and consent of instructor.

GEOL 599. Master's Thesis**15 Credits**

Thesis research.

Geology - Bachelor of Science

Concentration: Geological Sciences

The concentration in geological sciences is a broad field of study that prepares students for employment by energy and mineral industries, environmental and water resource companies, federal, state and local governments, as well as service companies that utilize earth resources. Qualified students are also prepared for graduate study in the geological sciences.

Departmental Requirements¹

GEOL 111G or HON 219G	Introductory to Geology Earth, Time, and Life	4
GEOL 305V	Fossils and the Evolution of Life	3
GEOL 310	Mineralogy	3
GEOL 312	Optical Mineralogy	3
GEOL 360	General Geochemistry	3
GEOL 399	Igneous and Metamorphic Petrology	3
GEOL 420	Stratigraphy and Sedimentology	3
GEOL 449	The Geological Profession	1
GEOL 470	Structural Geology	3
GEOL 490	Field Geology	3
GEOL 491	Tectonic Evolution of North America	3
GEOL 495	Geology Field Camp	4

Elective Requirements¹

Select 12 credits from the following:		12
C E 357	Soil Mechanics	
GEOL 295	Environmental Geology	
GEOL 335V	Earthquakes, Volcanoes, Hurricanes, and Floods: The Role of Natural Hazards in Civ Past and Present	
GEOL 353	Geomorphology	
GEOL 424 or GEOL 479	Soil Chemistry Environmental Soil Chemistry	
GEOL 434	Tectonics of Sedimentary Basins	
GEOL 444	GIS for Geology	
GEOL 452	Geohydrology	
GEOL 465	Isotope Geochemistry	
GEOL 475	Geology of Mineral Resources	
GEOL 478	Petroleum Systems and Stratigraphy	
GEOL 480	Seminar	
SOIL 252	Soils	

Nondepartmental Requirements¹

CHEM 111G or CHEM 115	General Chemistry I ² Principles of Chemistry I	4
CHEM 112G or CHEM 116	General Chemistry II ² Principles of Chemistry II	4
Select one of the following (8 or 6 credits):		8

MATH 191G & MATH 192G	Calculus and Analytic Geometry I and Calculus and Analytic Geometry II	
MATH 235 & MATH 236	Calculus for the Technical Student I and Calculus for the Technical Student II	
PHYS 211G or PHYS 215G	General Physics I Engineering Physics I	3
PHYS 212G or PHYS 216G	General Physics II Engineering Physics II	3
PHYS 211GL or PHYS 215GL	General Physics I Laboratory Engineering Physics I Laboratory	1
PHYS 212GL or PHYS 216GL	General Physics II Laboratory Engineering Physics II Laboratory	1
Select 8 credits from two semesters of a foreign language (111, 112) or high school equivalent (2 years)		8
Select 3-4 credits from the following:		3-4
C S 150	C Programming	
C S 151	C++ Programming	
C S 152	Java Programming	
C S 153	Python Programming I	
C S 155	Internet Programming I	
C S 158	R Programming I	
C E 151	Introduction to Civil Engineering	
E E 161	Computer Aided Problem Solving	
GEOG 381	Cartography and Geographic Information Systems	
STAT 271G	Statistics for Psychological Sciences	
STAT 371	Statistics for Engineers and Scientists I	
Select sufficient electives, including those selected to satisfy the college and university requirements, to total 120 credits, of which 48 must be upper-division (300 or above).		36
Total Credits		119-120

¹ May not be taken S/U and a grade of C- or better must be earned.

² CHEM 115 Principles of Chemistry I and CHEM 116 Principles of Chemistry II: Preferred

Students must work closely with their advisors in order to plan programs that allow them to meet all requirements and earn sufficient upper-division credit.

Concentration: Earth and Environmental Systems

The concentration in geological sciences provides students with scientific insight as a foundation for careers in environmental earth science, environmental policy and resource management. Qualified students are also prepared for graduate study in these areas. This concentration does not prepare students for graduate study in the geological sciences; these students should follow the curriculum in the Geological Sciences Concentration.

Departmental Requirements ¹

GEOL 111G or HON 219G	Introductory to Geology Earth, Time, and Life	4
GEOL 305V	Fossils and the Evolution of Life	3
GEOL 310	Mineralogy	3

GEOL 335V	Earthquakes, Volcanoes, Hurricanes, and Floods: The Role of Natural Hazards in Civ Past and Present	3
GEOL 360	General Geochemistry	3
GEOL 399	Igneous and Metamorphic Petrology	3
GEOL 420	Stratigraphy and Sedimentology	3
GEOL 449	The Geological Profession	1
GEOL 470	Structural Geology	3
GEOL 491	Tectonic Evolution of North America	3
Elective Requirements ¹		
Select 9 credits from the following:		9
GEOL 295	Environmental Geology	
GEOL 312	Optical Mineralogy	
GEOL 353	Geomorphology	
GEOL 424 or GEOL 479	Soil Chemistry Environmental Soil Chemistry	
GEOL 434	Tectonics of Sedimentary Basins	
GEOL 452	Geohydrology	
GEOL 465	Isotope Geochemistry	
GEOL 475	Geology of Mineral Resources	
GEOL 478	Petroleum Systems and Stratigraphy	
GEOL 480	Seminar	
GEOL 490	Field Geology	
GEOL 495	Geology Field Camp	
C E 357	Soil Mechanics	
SOIL 252	Soils	
SPED 350	Introduction to Special Education in a Diverse Society	
Nondepartmental Requirements ¹		
A ST 311	Statistical Applications	3
AG E 337V or AG E 384V	Natural Resource Economics Water Resource Economics	3
BIOL 111G	Natural History of Life	3
CHEM 111G	General Chemistry I	4
ECON 252G	Principles of Microeconomics	3
GEOG 120G	Culture and Environment	3
GEOG 381	Cartography and Geographic Information Systems	4
PHYS 211G	General Physics I	3
PHYS 211GL	General Physics I Laboratory	1
Select 8 credits from two semesters of a foreign language (111, 112) or high school equivalent (2 years)		8
Select two from the following:		6
GOVT 324	Environmental Policy	
GOVT 343	Congress and the Legislative Process	
GOVT 395	Law and Society	
GOVT 399	New Mexico Law	
Select sufficient electives, including those selected to satisfy the college and university requirements, to total 120 credits, of which 48 must be upper-division (300 or above).		41
Total Credits		120

¹ May not be taken S/U and a grade of C- or better must be earned.

Students must work closely with their advisors in order to plan programs that allow them to meet all requirements and earn sufficient upper-division credit.

Concentration: Earth Science Education

The concentration in earth science education is a collaboration between the Department of Geological Sciences and the Department of Curriculum and Instruction in the College of Education. In this option, students earn a Secondary Licensure as well as a BS in Geology, and become qualified to teach the Broad Sciences at the middle and high school levels. Students take one year of graduate classes in the College of Education to complete the Secondary Licensure.

Departmental Requirements ¹

GEOL 111G or HON 219G	Introductory to Geology Earth, Time, and Life	4
GEOL 305V	Fossils and the Evolution of Life	3
GEOL 310	Mineralogy	3
GEOL 335V	Earthquakes, Volcanoes, Hurricanes, and Floods: The Role of Natural Hazards in Civ Past and Present	3
GEOL 360	General Geochemistry	3
GEOL 399	Igneous and Metamorphic Petrology	3
GEOL 420	Stratigraphy and Sedimentology	3
GEOL 444	GIS for Geology	3
GEOL 449	The Geological Profession	1
GEOL 470	Structural Geology	3
GEOL 491	Tectonic Evolution of North America	3

Nondepartmental Requirements ¹

ASTR 105G or ASTR 110G	The Planets Introduction to Astronomy	4
BIOL 111G	Natural History of Life	3
BIOL 111GL	Natural History of Life Laboratory	1
BIOL 313 or BIOL 322	Structure and Function of Plants Zoology	3
C EP 110G	Human Growth and Behavior	3
C EP 210	Educational Psychology	3
CHEM 111G or CHEM 115	General Chemistry I ² Principles of Chemistry I	4
CHEM 112G or CHEM 116	General Chemistry II ² Principles of Chemistry II	4
EDLT 368	Integrating Technology with Teaching	3
EDUC 315	Multicultural Education	3
EDUC 381	Secondary Field Experience	3
PHYS 211G or PHYS 215G	General Physics I Engineering Physics I	3
PHYS 212G or PHYS 216G	General Physics II Engineering Physics II	3
PHYS 211GL or PHYS 215GL	General Physics I Laboratory Engineering Physics I Laboratory	1
PHYS 212GL or PHYS 216GL	General Physics II Laboratory Engineering Physics II Laboratory	1

Select 8 credits from two semesters of a foreign language (111, 112) or high school equivalent (2 years) 8

Select sufficient electives, including those selected to satisfy the college and university requirements, to total 120 credits, of which 48 must be upper-division (300 or above).	38
--	----

Total Credits	120
---------------	-----

¹ May not be taken S/U and a grade of C- or better must be earned.

² CHEM 115 Principles of Chemistry I and CHEM 116 Principles of Chemistry II: Preferred.

Students must work closely with their advisors in order to plan programs that allow them to meet all requirements and earn sufficient upper-division credit.

After completing the BS in Geology, Concentration Earth Science Education, students should apply and be admitted to the Graduate School in the Department of Curriculum and Instruction, and be admitted to the Teacher Education Program (TEP). For additional details, see the Curriculum and Instruction (p. 463) portion of the NMSU Graduate Catalog.

Secondary Teaching Licensure

To earn the Secondary Teaching Licensure, students must complete these courses and pass the NMTA Basic Skills, NMTA General Knowledge, and NMTA Content Knowledge Licensure Exams:

Required Courses

EDUC 505	Classroom Management	3
EDUC 509	Teaching Methods Laboratory	3
EDUC 510	Internship/Student Teaching	6
EDUC 563	Teaching Science at the Middle and High School Level	3
RDG 514	Content Area Literacy	3
SPED 480	Secondary Curriculum, Methods, and Materials for Special Education in a Diverse Society	3

Total Credits	21
---------------	----

Geology - Master of Science

A candidate for a master's degree must complete a minimum of 30 graduate credits, including a minimum of 6 credits for thesis (GEOL 599 Master's Thesis). No more than 5 thesis credits may be taken in any one semester. Early selection of a research advisor is encouraged. A thesis proposal must be approved by the advisor and the candidate's committee before registering for thesis credits. At least 15 credits must be earned in courses numbered 500 or above, and at least 15 credits must be earned in geology. Students are expected to participate in the department's colloquium each semester. The department offers excellent laboratory facilities for research in mineralogy, igneous petrology, geochemistry, stratigraphy, geochronology, and sedimentology. Available are a large, fully equipped rock preparation laboratory, mineral separation laboratory, plus computer, geochemical and petrographic labs. Major equipment includes a Gemeni heavy mineral separation table, X-Ray Fluorescence Spectrometry (XRF), Laser-Induced Breakdown Spectroscopy (LIBS), a class 1000 clean lab, Thermal Ionization Mass Spectrometry (TIMS) and Laser-Ablation Multi-Collector Inductively Coupled Plasma Mass Spectrometry (LA-MC-ICP-MS). The department maintains its own fleet of field vehicles. Also available are computing facilities that include an HP color plotter and GIS system. Financial support is available to graduate students in geology through teaching and research assistantships and

scholarships. Inquiries regarding financial aid should be directed to the graduate advisor.

Geology - Undergraduate Minor

A student cannot earn a BS in Geology and also earn a minor in Geology.

Required Courses

GEOL 111G	Introductory to Geology	4
or HON 219G	Earth, Time, and Life	
GEOL 305V	Fossils and the Evolution of Life	3
Select 12 credits from the following:		12
GEOL 295	Environmental Geology	
GEOL 310	Mineralogy	
GEOL 312	Optical Mineralogy ¹	
GEOL 335V	Earthquakes, Volcanoes, Hurricanes, and Floods: The Role of Natural Hazards in Civ Past and Present	
GEOL 353	Geomorphology	
GEOL 360	General Geochemistry	
GEOL 399	Igneous and Metamorphic Petrology ¹	
GEOL 420	Stratigraphy and Sedimentology ¹	
GEOL 434	Tectonics of Sedimentary Basins	
GEOL 444	GIS for Geology	
GEOL 465	Isotope Geochemistry ¹	
GEOL 470	Structural Geology ¹	
GEOL 475	Geology of Mineral Resources ¹	
GEOL 477	Special Problems (variable credit) ¹	
GEOL 478	Petroleum Systems and Stratigraphy ¹	
GEOL 480	Seminar (variable credit) ¹	
GEOL 490	Field Geology ¹	
GEOL 491	Tectonic Evolution of North America ¹	
GEOL 495	Geology Field Camp ¹	
Total Credits		19

¹ Courses with Geology prerequisites other than GEOL 111G Introductory to Geology or HON 219G Earth, Time, and Life.

Government

Undergraduate Program Information

The study of government and political science blends the strengths of a liberal arts education while preparing students for a career in their field. Career opportunities can include positions in: federal, state, and local government; public administration and public service; and in public policy analysis.

The government major program calls for a thorough preparation in the study of government as described below with the opportunity for those interested in specific careers to concentrate in one of the subfields:

- American government and politics,
- public law,
- public administration and policy,
- comparative politics,
- political theory and

- international relations.

The department also offers a supplementary major in law and society, which is supportive of law-related careers.

A government minor program involving 18 credits of course work is also offered. A subfield minor or a general minor may be selected. In addition, the department participates in an interdisciplinary minor in Contemporary Social Studies.

Graduate Program Information

The Department of Government offers two degrees:

- the Master of Arts (MA) in government and
- the Master of Public Administration (MPA) and
- a graduate minor in Security Studies.

The programs are designed to prepare students both for diverse careers in the public sector and for further training at the doctoral level. The MPA program is accredited by the Network of Schools of Public Policy, Affairs and Administration (NASPAA), a distinction held by fewer than one-quarter of MPA programs nationwide. The MPA program offers joint degrees

- with the Department of Criminal Justice (MPA/MCJ) and
- with the Department of History (MPA/ MA in Public History).

Students in a joint degree program can earn two master's degrees with fewer credits than would be required to earn those degrees independently.

Admission

Prospective graduate students in either the MA or MPA should demonstrate a 3.0 grade point average for the second half of their undergraduate course work. For students with a GPA of less than 3.0, GRE scores are required, though this requirement may be waived if the undergraduate degree was awarded more than five years before applying. Applicants to either program are required to submit an application online. See instructions at: <http://prospective.nmsu.edu/graduate/apply/index.html>. Applications include three letters of recommendation, a writing sample, and a personal statement concerning their interest in pursuing a graduate degree. Additional information concerning program requirements and the admission process can be obtained from either the department's MA chair or MPA director. Under exceptional circumstances the department may exempt students from the minimal requirements. Application for admission to the Graduate School should clearly indicate the program in which the student wishes to enroll. Applications for admission to the MPA program are reviewed twice a year, once in the Fall semester and once in the Spring semester.

Students interested in a joint degree option must apply and be accepted in to the two departments separately, and indicate their interest on their applications in one of the joint degree programs.

General Requirements

Students in both the MA and MPA programs select either a thesis or non-thesis option. Students planning on continuing their studies in a doctoral program or wishing to establish expertise related to a specific career objective are strongly encouraged to select the thesis option. The non-thesis option is suggested for students desiring immediate employment or seeking to enhance their current employment situations. Course work outside the department must have prior advisor approval to ensure a well-

integrated program of study. Complete information on the requirements for either program should be obtained directly from the department. Most MA and MPA courses are offered in the evening.

Minors

The Department of Government offers a general undergraduate Government minor and specialized sub field minors. In addition, the department participates in an interdisciplinary minor in Contemporary Social Studies with History and other departments.

A student cannot earn both a B.A. in Government and a general minor in Government. Government majors may pursue a subfield minor in the department, however, they cannot double count any upper division courses in Government toward the minor.

Degrees for the Department

Government - Bachelor of Arts (p. 313)

Law and Society - Supplemental Major (p. 314)

Government - Master of Arts (p. 314)

Public Administration - Master of Public Administration (p. 315)

MPA-MCJ Program - Dual Degree (p. 315)

MPA-MA Public History Program - Dual Degree (p. 315)

Minors for the Department

American Government and Politics - Undergraduate Minor (p. 313)

Comparative Politics - Undergraduate Minor (p. 313)

International Relations - Undergraduate Minor (p. 314)

Political Theory - Undergraduate Minor (p. 315)

Public Administration - Undergraduate Minor (p. 316)

Public Law - Undergraduate Minor (p. 316)

Contemporary Social Studies - Undergraduate Minor (p. 313)

Government - Undergraduate Minor (p. 314)

Security Studies - Graduate Minor (p. 316)

Professor, Neil Harvey, Department Head

Professors Butler, Harvey, Slaton; **Associate Professors** Medina, Rosendorf; **Assistant Professors** Conner, Hirschauer; **College Professor** Seckler; **Emeritus Professors** Baker, Lapid, Taggart, Winn

N. Harvey, Ph.D., Department Head (Essex)– Mexican politics, comparative politics, Latin America; N. Baker, (emeritus) Ph.D. (Tulane)– public law, American politics, presidency; G. Butler, Ph.D., (Catholic)– political theory, American politics; T. Conner, Ph.D., (Oklahoma) - public administration, Native American politics, public budgeting; S. Hirschauer, Ph.D., (Old Dominion University) - International relations, security studies, gender, migration and identity, comparative politics; Y. Lapid, (emeritus) Ph.D., (Columbia)– international relations theory, comparative foreign policy, international organizations; C. Medina (Univ. Colorado Denver) Ph.D., – public administration, public policy, education policy, qualitative methods; N. Rosendorf, Ph.D., (Harvard) international relations, cultural diplomacy, US foreign policy; K. Seckler, J.D. (Univ. of New Mexico)- Law and Society, New

Mexico state and local government, US Supreme Court, US and NM Constitutions; C. Slaton, Ph.D., (Hawaii) - American politics, American political thought, university and community engagement, public administration, conflict resolution; W. Taggart, (emeritus) Ph.D., (Florida State)– public administration, public policy, American politics; R. G. Winn, (emeritus), Ph.D., (Arizona State)– public administration, policy analysis, environmental policy

GOVT 100G. American National Government

3 Credits

Class critically explores political institutions and processes including: the U.S. constitutional system; legislative, executive and judicial processes; political parties, elections, media, policy making, civic participation, popular and group influence

GOVT 101. Introductory Government Seminar

1 Credit

Introduction to the government major. Designed to assist students in planning college experience and preparing for professional or advanced educational opportunities upon graduation. Graded: S/U. Restricted to: Main campus only.

GOVT 110G. Introduction to Political Science

3 Credits

This class covers fundamental concepts such as justice, sovereignty and power; political theories and ideologies; and government systems that range from democratic to authoritarian.

GOVT 150G. American Political Issues

3 Credits

Major contemporary problems of American society and their political implications.

GOVT 160G. International Political Issues

3 Credits

Current developments and issues in world politics.

GOVT 201. Special Topics

3 Credits

Specific topics to be announced in Schedule of Classes. Community Colleges only. May be repeated for a maximum of 12 credits.

GOVT 300. Political Research Skills

3 Credits

Introduction to methods of political analysis and fundamentals of research design, including basic methods for the collection and analysis of political data.

GOVT 308. Prepping for Law School Admissions Test

1 Credit

This workshop helps students prepare to take the Law School Admissions Test and apply for law school. Graded: S/U.

GOVT 313. Model United Nations

3 Credits

Issues related to the United Nations and international law/organizations through simulations, discussions and research projects.

Prerequisites: GPA of 2.5 or better and consent of instructor.

GOVT 314. Advanced Model UN

3 Credits

Advanced topics, research and preparation for Model United Nations activities. Consent of instructor required. Restricted to: Main campus only.

Prerequisite(s): GOVT 313, minimum GPA 2.5.

GOVT 315. Politics and Film**3 Credits**

Exploration of political themes, images, and representation in film and other media. May be repeated for a maximum of 6 credits under different subtitles.

GOVT 320. Domestic Policy**3 Credits**

The course examines how U.S. public policy is made, including the players, politics, issues and power critical to the policy process. An interactive class that bridges theory and political action. Restricted to: Main campus only.

GOVT 321. Topics in Public Policy**3 Credits**

Course examines issues in public policy. May be repeated under different subtitles.

GOVT 324. Environmental Policy**3 Credits**

This introductory course explores environmental policy issues. Students study perspectives of policy-makers, political activists and policy analysts, and apply policy models to solve pressing environmental problems. Focus may be on U.S. or global concerns.

GOVT 325. Education Policy and Politics**3 Credits**

Overview of current pressing policy issues and political debates on education in the U.S., including school choice, vouchers, accountability, and affirmative action. Multiple topics and perspectives covered, with political economy as the main approach.

GOVT 330. Introduction to Public Administration**3 Credits**

What is public administration? Course examines public service, focusing on federal and state government. Issues include management and leadership, personnel, bureaucratic politics, organizational theory, personnel, budgeting and administrative law. Restricted to: Main campus only.

GOVT 331. Special Topics in Public Administration**3 Credits**

Special topics in public administration. May be repeated for a maximum of 6 credits under different subtitles.

GOVT 335. Management of Nonprofit Organizations**3 Credits**

This course provides an overview of a range of nonprofit management concerns and practices. Students will be challenged to assess their own theories of nonprofit accountability and excellence, while confronting critical issues facing the sector. Activities are designed to expand the management skills of students by offering analytical tools and knowledge, and providing opportunities to test the application of these skills.

GOVT 340. American State and Local Government**3 Credits**

Development, structure, functions, and contemporary problems.

GOVT 341. Special Topics: American Politics**3 Credits**

Course examines contemporary issues and trends in American government and politics. May be repeated under different subtitles.

GOVT 343. Congress and the Legislative Process**3 Credits**

This class reviews the history, structure, membership, operation, power and culture of the American Congress. Restricted to: Main campus only.

GOVT 344. The American Presidency**3 Credits**

A comprehensive overview of the U.S. presidency, including powers, electoral politics, decision-making styles, domestic and foreign policy, and relations with Congress, courts, media and interest groups.

GOVT 345. The Supreme Court**3 Credits**

This class studies the history and operation of the Supreme Court, as well as landmark cases that have shaped American government and the Court.

GOVT 348. Political Parties and Interest Groups**3 Credits**

Organization, principles, and functions of political parties and interest groups in the U.S.

GOVT 350. Special Topics in American Government**3 Credits**

Special topics in American government. May be repeated for a maximum of 6 credits under different subtitles.

GOVT 351. Campaigns and Elections**3 Credits**

Dynamics of campaigns and electoral politics, and their relationship to the formulation of public policy.

GOVT 353. Women, Politics and Administration**3 Credits**

An examination of women's participation in U.S. electoral politics as voters, candidates, and officeholders; political activism in issue-based movements and strategies for affecting public policy; leadership as administrators and managers in public service agencies. Also explores the influence of feminism in changing women's roles socially, legally, and politically. Crosslisted with: W S 453

GOVT 354. American Indian Politics**3 Credits**

Introduction to American Indian tribal governments, politics, policy, and administration; historical and contemporary leadership of Indian Nations; and the history and current status of American Indian-U.S. relations. Students learn about Native peoples' cultural responses, forms of resistance, and adaptations to colonization. Restricted to: Main campus only.

GOVT 360. International Relations**3 Credits**

Introduction to world politics; fundamental international issues and problems.

GOVT 361. Special Topics in International Relations**3 Credits**

Course examines contemporary issues in international relations. May be repeated under different subtitles.

GOVT 362. International Political Economy**3 Credits**

Political factors in international economic relations; theories of political economy.

GOVT 364. National Security Policy**3 Credits**

Evolution of U.S. national security policy; problems in defining national interests and related allocation of resources.

GOVT 366. American Foreign Policy**3 Credits**

Formulation, content and rationale of current foreign policies of the U.S.

GOVT 367. Terrorism**3 Credits**

An introductory course using an interdisciplinary framework to explore definitions, historical roots, contemporary manifestations and future trends in political terrorism.

GOVT 368. Fundamentals of Intelligence Studies**3 Credits**

Introductory survey of the major theoretical approaches and substantive issues in intelligence studies.

GOVT 369. Nationalism, Ethnic Cleansing, and Genocide in 20th Century**3 Credits**

Same as HIST 377.

GOVT 370. Comparative Politics**3 Credits**

Introduction to functional approaches to comparing similarities and differences among political systems.

GOVT 371. Latin American Politics**3 Credits**

Basic structure of politics in major Latin American countries; role of groups, including church, labor, and parties.

GOVT 372. Special Topics in Comparative Politics**3 Credits**

Course examines contemporary issues in comparative politics. May be repeated under different subtitles. Restricted to: Main campus only.

GOVT 373. Resistance Movements in World Politics**3 Credits**

Research on violent and non-violent resistance movements around the world. Focus on their origins, demands, ideologies, strategies and impacts in the post-Cold War context of economic globalization, US military power and new geopolitical dynamics.

GOVT 374V. The European City: History and Culture**3 Credits**

Course presents the rich, complex history and cultures of European cities from ancient to modern times, lining these cities to crucial issues in European history.

GOVT 375. Self Determination and Minority Rights**3 Credits**

Comparative study of ethnic relations, minority rights, identity, citizenship and political representation.

GOVT 378. U.S.-Mexico Border Politics**3 Credits**

Comparative perspectives applied to the problems of the U.S.-Mexican border.

GOVT 379. Mexican Politics**3 Credits**

Introduction to the politics and government of contemporary Mexico.

GOVT 380V. Contemporary World Political Ideologies**3 Credits**

Introduction to the prevailing political ideologies in the modern world and the ways in which modern nations operating under one or more of these ideologies attempt to answer fundamental questions about the allocation and distribution of rights, liberties, and other things of value. In addition, the course work and discussions attempt to address recent political, social, and economic events in various areas of the world.

GOVT 381. Special Topics in Political Theory**3 Credits**

Course explores special topics or theorists in political theory. May be repeated under different subtitles.

GOVT 382. Classical Political Thought**3 Credits**

Analysis of main currents in political thought from ancient Greece and Rome to the high Middle Ages.

GOVT 383. Modern Political Thought**3 Credits**

Historical and theoretical examination of political ideas and ideologies from Machiavelli to Nietzsche. Topics include liberalism, conservatism, romanticism, communism, and Nihilism.

GOVT 384. Contemporary Political Thought**3 Credits**

Examination of major currents in political theory from early twentieth century to the present. Includes positivism, fascism, neo-liberalism, and varieties of postmodernism.

GOVT 385. American Political Thought**3 Credits**

Introduction to major American thinkers and historical currents from colonial time to the present.

GOVT 386. Political Economy**3 Credits**

Analysis of political ideas concerning the role of the state in management of national economies, in both European and American contexts.

GOVT 387. Religion and Politics**3 Credits**

Survey of major points of interaction between politics and religion in the U.S., using theoretical, historical, and institutional analysis.

GOVT 390. Special Topics in Public Law**3 Credits**

Course examines various issues in public law. May be repeated under different subtitles.

GOVT 391. Constitutional Law**3 Credits**

The class explores the reasoning and political context of the Supreme Court cases that define the distribution and limits of governmental powers and duties under the U.S. Constitution, including separation of powers and federalism. Restricted to: Main campus only.

GOVT 392. Civil Liberties**3 Credits**

The course examines the reasoning and political context of major Supreme Court cases defining constitutional rights of free speech, religious liberty, free press and criminal procedural rights.

GOVT 394. Judicial Process**3 Credits**

Class examines the structure, function and purpose of the American judicial system. Restricted to: Main campus only.

GOVT 395. Law and Society**3 Credits**

Class critically explores the development, role and impact of law on our society, covering different theories of law, conceptions of justice and the values they reflect. These models are then applied to current legal issues. Not a class in legal reasoning, but one where students evaluate their beliefs about the legal system. Restricted to: Main campus only.

GOVT 396. International Law**3 Credits**

Nature, growth, and scope of law of nations, rights and obligations of states in peace and war, current issues.

GOVT 399. New Mexico Law**3 Credits**

New Mexico legal system, court structure and procedures; legal terms and concepts; constitutional, criminal, mass media, historical and social issues relating to New Mexico. Same as C J 399, HIST 399, JOUR 399, and SOC 399.

GOVT 405. Directed Readings**1-3 Credits**

Individualized readings. Course subtitled. May be repeated for a maximum of 6 credits. Graded S/U. Consent of instructor required.

GOVT 406. Independent Study**1-3 Credits**

Individualized research. Course subtitled. May be repeated for a maximum of 6 credits. Consent of instructor required.

GOVT 407. Workshop**1-6 Credits**

Focus on skills related to careers in government and political science. Specific topics announced in the Schedule of Classes; may be repeated for a total of 6 credits. Only 3 credits apply toward government major or minor requirements. Graded S/U.

GOVT 410. Internship**1-12 Credits**

Hands-on experience working with public agencies, political campaigns, elected officials & non-profits. May be repeated for a maximum of 12 credits; only 3 credits apply toward government major or minor requirements. Consent of instructor required. Graded: S/U.

Prerequisite(s): Completion of 12 government credits, 2.5 GPA, junior and above standing.

GOVT 411. Service Learning Experience**3 Credits**

Experiential learning through a community service project. May be subtitled to reflect service activity. May be repeated for a total of 6 credits; only 3 credits apply toward government major or minor requirements.

Prerequisites: completion of 12 government credits, junior or above standing, and consent of instructor.

GOVT 412. Practicum in Student Government**3 Credits**

Research of issues in student government. Consent of instructor required. Graded: S/U.

Prerequisite(s): Student government participation, completion of 12 GOVT credits, junior or senior standing.

GOVT 415. Senior Seminar**2 Credits**

Review and integration of political skills acquired in the Government Department. Students will prepare a professional portfolio for entry into the workforce, advanced study, and civic participation. S/U Grading (S/U, Audit).

GOVT 465. Peru: From Incas to Inca Kola**3 Credits**

Explores issues of cultural and national identity in Peru from the Incas to the present, focusing on the modern period. Themes include indigenous resistance and adaptation to colonial rule, nationalism, militarism, terrorism, globalization, and the drug trade. Same as ANTH 459 and HIST 459.

GOVT 468. Rebels, Guerrillas, and Terrorists in Modern Latin America**3 Credits**

Explores history of rebels in Latin America. Examines guerilla struggles attaining national dimension. Focus on modern events, including Peru's Shining Path, Columbia's FARC, and Mexico's Zapatistas. Same as HIST 331.

GOVT 469. Globalization**3 Credits**

Analysis of the globalization process. Covers theories of globalization, the global economy, political globalization, global culture, transnational social movements, transnational migration and world labor market, global cities, and local-global linkages. Same as SOC 489.

GOVT 473. Germany**3 Credits**

Political, social, and cultural developments from the eighteenth century to the present, with emphasis on the Nazi era. Same as HIST 383.

GOVT 474. European Politics**3 Credits**

Politics in European countries, European integration, post-communist states, regionalism and border politics.

GOVT 493. Mass Communications Law**3 Credits**

Same as JOUR 493 and COMM 493.

GOVT 502. Research Methods in Government**3 Credits**

Contemporary methods of political analysis, including mathematical and statistical techniques and computer applications. MPA students must complete this class with a B- or better. MA students must complete either GOVT 502 or GOVT 503 with a B- or better.

GOVT 503. Qualitative Research Methods**3 Credits**

An overview of qualitative research methods such as fieldwork, ethnography, content analysis, case studies, focus groups and grounded theory. Introduces students to epistemology (the study of knowledge) and to basic components of research design. Explores activist scholarship, ethical dilemmas in research, and software tools for computer assisted analysis. Especially useful for students preparing theses, dissertation, or other research projects. MA students must complete either GOVT 503 or GOVT 502 with a B- or better.

GOVT 505. Directed Readings**1-3 Credits**

Selected topics in government. May be repeated for a total of 6 credits. Graded S/U.

Prerequisite: consent of instructor.

GOVT 510. Internship**1-6 Credits**

Assignment with a public agency and research report. Only 3 credits apply toward degree requirements. Graded S/U.

Prerequisite: approval of graduate advisor.

GOVT 517. Selected Topics in Government**3 Credits**

Selected issues which may cross sub-fields of the discipline. May be repeated for a total of 6 credits.

GOVT 519. Proseminar in Public Administration**3 Credits**

Review of classic and contemporary theory and practice in public administration. Application of written and oral skills to the presentation and defense of essays on various aspects of public administration. To be completed with a B- or better.

Prerequisite(s): 30 credits of M.P.A.

GOVT 522. Public Sector Economics I**3 Credits**

Same as AEEC 522.

GOVT 523. Public Sector Economics II**3 Credits**

Same as AEEC 523.

GOVT 524. American Indian Politics**3 Credits**

Introduction to American Indian tribal governments, politics, policy, and administration; historical and contemporary leadership of Indian Nations; and the history and current status of American Indian-U.S. relations. Students learn about Native peoples' cultural responses, forms of resistance, and adaptations to colonization.

GOVT 526. Women, Politics and Administration**3 Credits**

Examination of women's participation in U.S. electoral politics as voters, candidates, and officeholders; their political activism in issue-based movements and strategies for affecting public policy; leadership as administrators and managers in public service agencies. Course also covers the influence of feminism in changing women's roles socially, legally, and politically.

GOVT 527. Issues in Public Management**3 Credits**

Selected issues in public management. May be repeated under different subtitles for a total of 6 credits.

GOVT 530. Seminar in Public Policy**3 Credits**

Survey of the political, administrative, and technical aspects of policy making in government. MA students taking GOVT 530 as part of their core requirements must complete the class with a B- or better.

GOVT 535. Education Policy and Politics**3 Credits**

Overview of current pressing policy issues and political debates on education in the U.S., including school choice, vouchers, accountability, and affirmative action. Multiple topics and perspectives covered, with political economy the main approach.

GOVT 536. Public Policy and Indigenous Communities**3 Credits**

Indigenous communities are found throughout North, Central and South America. This course addresses the history, development and governance of these communities. Different sections of the course may choose to focus on different indigenous communities. All courses will consider the principles of governance internal to indigenous communities as well as the governing relationships between indigenous communities and modern states.

GOVT 537. Issues in Public Policy**3 Credits**

Selected issues in public policy. May be repeated under a different subtitle for a total of 6 credits.

GOVT 540. Seminar in Public Administration**3 Credits**

Survey course on the theory and practice of program, personnel, and financial management in government and the private, nonprofit sector. MA students taking Govt 540 as part of their core requirements must complete the class with a B- or better.

GOVT 541. Public Budgeting**3 Credits**

Budgetary processes; budget classification, analysis, and evaluation. MPA students must complete this class with a B- or better.

GOVT 542. Public Sector Human Resources Management**3 Credits**

Exploration of public personnel systems and practices, including job analysis, compensation, performance evaluation, recruitment, and labor-management relations. MPA students must complete this class with a B- or better.

GOVT 543. Skills Workshop**1-6 Credits**

Focus on management of task skills in selected areas of public administration. Specific topics will appear in the Schedule of Classes; may be repeated for a total of 6 credits.

GOVT 544. Public Policy Analysis**3 Credits**

Environment of policy analysis; various descriptive and quantitative designs for analyzing and evaluating public policy. Problems of policy analysis. MPA students must complete this class with a B- or better.

Prerequisite(s): GOVT 502 or consent of instructor.

GOVT 547. Government Organizations**3 Credits**

Historical overview and present applications of organization theory in public management. MPA students must complete this class with a B- or better.

GOVT 548. Public Sector Leadership**3 Credits**

Theories and styles of leadership.

GOVT 549. Ethics in Government**3 Credits**

Examination of standards, perspectives, and issues for ethical decision-making in public agencies. MPA students must complete this class with a B- or better.

GOVT 550. Seminar in American Politics**3 Credits**

Overview of American political institutions. Includes study of American constitutional theory; legislative, executive, and judicial functions and processes; political parties and interest groups; and public policy formulation. MA students taking Govt 550 as part of their core requirements must complete the class with a B- or better.

GOVT 553. Issues in American Politics**3 Credits**

Selected issues in American Politics. May be repeated under a different subtitle for a total of 6 credits.

GOVT 560. Seminar in International Relations Theory**3 Credits**

A critical overview of leading approaches and controversies in international relations theory. The purpose of the course is to introduce students to contending theoretical perspectives and conceptual frameworks that help make sense of contemporary world politics. MA students taking Govt 560 as part of their core requirements must complete the class with a B- or better.

GOVT 561. Nations and Soft Power**3 Credits**

Course employs historical, theoretical and practical “best/worst practices” lenses to deal with key questions, such as how do the US and other states present themselves to the world? What are “soft power” and “national reputation management”? How does one build or damage a country’s image and “brand”? What are “public diplomacy” and “cultural diplomacy”, and how do they factor into the foreign relations of the US and other states?

GOVT 562. Advanced Issues in Security and Intelligence Studies**3 Credits**

Selective issues in comparative security and intelligence studies.

GOVT 563. Issues in International Relations**3 Credits**

Selected issues in international relations. May be repeated under a different subtitle for a total of 6 credits.

GOVT 564. Advanced National Security Policy**3 Credits**

Major topical, theoretical, and regional issues in national security policy.

GOVT 566. Advanced Issues in American Foreign Policy**3 Credits**

Major topical, theoretical, and regional issues in American foreign policy. May be repeated for a maximum of 6 credits under different subtitles.

GOVT 567. Terrorism and Political Violence**3 Credits**

An advanced graduate course using an interdisciplinary framework to explore definitions, historical roots, contemporary manifestations and future trends in political terrorism. The course seeks to understand modern-day terrorism as a form of political violence.

GOVT 569. Advanced Issues in Globalization**3 Credits**

Analysis of the globalization process. Covers theories of globalization; global economy; political globalization; global culture; transnational social movements; transnational migration and world labor market; global cities; local-global linkages. Same as SOC 589.

GOVT 570. Seminar in Comparative Politics**3 Credits**

Examination of methods used for comparing various types of political entities. Investigation of criteria needed to examine a concept across cultures or national boundaries. MA students taking Govt 570 as part of their core requirements must complete the class with a B- or better.

GOVT 571. Seminar in Latin American Politics**3 Credits**

Overview of the political structures of the Latin American region. Addresses a number of contemporary issues facing Latin American states, including interest groups, the church, labor, political parties, U.S.-Latin American relations, political development.

GOVT 573. Resistance Movements in World Politics**3 Credits**

Advanced research on violent and non-violent resistance movements around the world. Focus on origins, demands, ideologies, strategies and impacts in the post-Cold War context of economic globalization, US military power and new geopolitical dynamics.

GOVT 574. Contemporary Comparative Studies**3 Credits**

Major topical, theoretical, and regional issues in international politics. May be repeated once.

GOVT 575. Issues in Comparative Politics**3 Credits**

Selected issues in comparative politics. May be repeated under a different subtitle for a total of 6 credits.

GOVT 578. Seminar in the U.S.-Mexican Border**3 Credits**

An analysis of the political environment along the United States-Mexico border and a survey of the literature available for a number of contemporary issues.

GOVT 579. Seminar in Mexican Politics**3 Credits**

Advanced research on politics and government of Mexico.

GOVT 580. Seminar in Political Theory**3 Credits**

Examination of major issues in political theory, including democracy, sovereignty, classical and modern traditions of thought. May be repeated with different subject matter. MA students taking GOVT 580 as part of their core requirements must complete the class with a B- or better.

GOVT 587. Seminar in Religion and Politics**3 Credits**

Historical, theoretical and comparative analyses of the interaction between politics and religion.

GOVT 590. Seminar Public Law and Legal Systems**3 Credits**

Focus on U.S. Constitutional Law and other national legal systems. MA students taking Govt 590 as part of their core requirements must complete the class with a B- or better.

GOVT 591. Law for Administrators**3 Credits**

Case-law definitions of the legal roles and powers of public administrators.

GOVT 593. Issues in Public Law**3 Credits**

Selected issues in public law. May be repeated under a different subtitle for a total of 6 credits.

GOVT 596. International Law**3 Credits**

Nature, growth and scope of law of nations; rights and obligations of states in peace and war; current issues.

GOVT 598. Special Research Programs**1-3 Credits**

Individual investigations either theoretical, analytical or experimental. Three credits may be taken per semester for a total of 6 credits for thesis students, and 9 credits for non-thesis students. Consent of instructor required.

GOVT 599. Master's Thesis**1-15 Credits**

Thesis.

GOVT 415	Senior Seminar (take in final year)	2
Electives		
Select additional credits in government to bring total credits in major to 33, including 20 upper-division.		9
Total Credits		33

¹ Majors should complete these lower level requirements before registering for upper-division government credits.

² A list of approved options is available in the department office.

Degree Requirements

General Education Courses	35
Viewing a Wider World Courses	6
Departmental Requirements (listed above):	33
Second Language Requirement at the 212/214 level or the 300-level ³	3
Electives: to bring total to 120, of which 48 credits are upper-division	43
Total Credits	120

³ The second language requirement is a minimum of 3 credits, please see the College of Arts and Sciences (p. 176) pages for discussion of the ways to pass this requirement.

Note: Students may not count S/U grades taken in their major unless the particular course is regularly graded S/U. All courses must be passed with grades of C- or better. In addition, while research methods courses taken outside of the department may count toward the methods requirement, only GOVT 300 Political Research Skills counts toward the 33 credits in the major.

Up to twelve hours of internship credit are available. However, only three hours count toward the major. Internship guidelines are available in the department office and on the Government Department web page, <http://deptofgov.nmsu.edu/>.

Government - Master of Arts

The MA program provides general course work in each of the major fields of political science. Students may choose either the thesis option, under which they complete 30 credits of course work plus 6 thesis credits (GOVT 599 Master's Thesis), or the nonthesis option, with 30 credits of course work plus 6 hours of special research credit (GOVT 598 Special Research Programs) or 6 hours of approved internship credit (GOVT 510 Internship). Both the thesis and nonthesis options require a final oral examination; the non thesis option requires a written examination as well. The program provides a broad-based foundation in political science while allowing students to pursue specific areas of interest.

Requirements

Flexibility in planning a program of study is permitted to meet the educational needs of a diverse student population. Structured areas of emphasis are available in several topical areas, including Latin American and international affairs. Students may also take a graduate minor in Security Studies. Information on these areas and the graduate minor may be obtained from the Department of Government. No more than 9 credits taken outside the department will be counted toward the degree.

Requirements

GOVT 502	Research Methods in Government	3
or GOVT 503	Qualitative Research Methods	
Select three from the following:		9
GOVT 530	Seminar in Public Policy	
GOVT 550	Seminar in American Politics	
GOVT 560	Seminar in International Relations Theory	
GOVT 570	Seminar in Comparative Politics	
GOVT 580	Seminar in Political Theory	
GOVT 590	Seminar Public Law and Legal Systems	
Additional credits subject to advisor approval ¹		18
Thesis/Non-Thesis		
Select one from the following:		6
GOVT 599	Master's Thesis	
GOVT 598	Special Research Programs	
or GOVT 510	Internship	
Total Credits		36

¹ The remaining credits required for the degree are selected subject to advisor approval to satisfy particular academic interests or career goals.

Government - Undergraduate Minor

Required Courses

GOVT 100G	American National Government	3
or HON 249G	American Politics in a Changing World	
GOVT 110G	Introduction to Political Science	3
or HON 248G	The Citizen and the State: Great Political Issues	
Select 12 additional credits, of which at least 9 are upper division, including 3 upper division courses from different subfields.		12
Total Credits		18

The subfield series include courses in the 20/30 series (public administration and policy), 40/50 series (American government and politics), 60 series and HON 304V Dilemmas of War and Peace (international relations), 70 series (comparative politics), 80 series, including GOVT 380V Contemporary World Political Ideologies (political theory), and 90 series (public law).

International Relations - Undergraduate Minor

Students pursuing a subfield minor may count a maximum of 3 credits in an independent studies course or an internship. Students may request permission to substitute courses between subfields, subject to approval of the Department of Government undergraduate committee.

Code	Title	Credits
Required Courses		
GOVT 100G	American National Government	3
or HON 249G	American Politics in a Changing World	
GOVT 110G	Introduction to Political Science	3
or HON 248G	The Citizen and the State: Great Political Issues	
Select 12 additional credits, of which at least 9 are upper division, including 3 upper division courses from the same subfield.		12
Total Credits		18

The subfield series include courses in the 20/30 series (public administration and policy), 40/50 series (American government and politics), 60 series and HON 304V Dilemmas of War and Peace (international relations), 70 series (comparative politics), 80 series, including GOVT 380V Contemporary World Political Ideologies (political theory), and 90 series (public law).

Law and Society - Supplemental Major

The Department of Government also coordinates a supplementary major in law and society that may be taken in addition to a regular major. The program is designed to allow students to combine law-related classes offered across a range of departments and disciplines. It is of particular interest to undergraduates interested in law school or who contemplate careers in fields closely related to the legal profession, such as government, politics, social work or law enforcement.

Requirements

The supplementary major consists of 24 credits chosen from the courses listed below. At least 18 credits must be earned in upper-division courses and 6 credits must be earned from listed courses outside the student's primary major. Candidates for the Law and Society degree must declare

their supplementary major prior to completing the last 9 credits of the program.

Core Courses

Select three from the following: 9

C J 205	Criminal Law
GOVT 395	Law and Society
GOVT 391	Constitutional Law
GOVT 394	Judicial Process
C J 306	Criminal Procedural Law
or GOVT 392	Civil Liberties
or JOUR 493/ HON 377V	Mass Communications Law

Communication Skills

Select one from the following: 3

COMM 351	Persuasion Theory and Practice
ENGL 311G	Advanced Composition
PHIL 448	Writing Philosophy

Critical Thinking Skills

Select one from the following: 3

GOVT 382	Classical Political Thought
PHIL 211G	Informal Logic
PHIL 312	Formal Logic

Jurisprudence

Select one from the following: 3

C J 307	Law of Evidence
C J 424	Forensic Law
GOVT 385	American Political Thought
PHIL 376	Philosophy of Law
PSY 330	Psychology and the Law
SOC 391	Crime and Society

Legal Policy Issues

Select two from the following: 6

BLAW 316	Legal Environment of Business
BLAW 385V	Consumers and the Law
C J 250	Courts and the Criminal Justice System
C J 332	Correctional Law
C J/GOVT/ JOUR/HIST 399	New Mexico Law
GOVT 345	The Supreme Court
GOVT 387	Religion and Politics
GOVT 390	Special Topics in Public Law
GOVT 396	International Law
HON 335V	Legal Issues in Modern Society
HRTM 304	Hospitality and Travel Law
PHIL 100G	Philosophy, Law and Ethics
PHIL 320	Social and Political Philosophy
SOC 392	Juvenile Delinquency

Total Credits 24

MPA-MA Public History Program - Dual Degree

The MPA-MA Public History Option Program requires completion of a minimum of 57 credits of approved course work from the Departments of Government and History, including completing internship credits in both programs. Interested applicants should consult with the MPA director or the director of the Public History Program for additional information.

MPA-MCJ Program - Dual Degree

The MPA-MCJ joint degree option requires completion of a minimum of 57 credits of approved course work from the Departments of Government and Criminal Justice. Students interested in this option should meet with the MPA director or criminal justice graduate advisor for additional information.

Political Theory - Undergraduate Minor

Students pursuing a subfield minor may count a maximum of 3 credits in an independent studies course or an internship. Students may request permission to substitute courses between subfields, subject to approval of the Department of Government undergraduate committee.

Code	Title	Credits
Required Courses		
GOVT 100G or HON 249G	American National Government American Politics in a Changing World	3
GOVT 110G or HON 248G	Introduction to Political Science The Citizen and the State: Great Political Issues	3
Select 12 additional credits, of which at least 9 are upper division, including 3 upper division courses from the same subfield.		12
Total Credits		18

The subfield series include courses in the 20/30 series (public administration and policy), 40/50 series (American government and politics), 60 series and HON 304V Dilemmas of War and Peace (international relations), 70 series (comparative politics), 80 series, including GOVT 380V Contemporary World Political Ideologies (political theory), and 90 series (public law).

Public Administration - Master of Public Administration

The MPA program is accredited by NASPAA. The MPA is designed to provide students with the managerial and analytical skills, in addition to ethical and professional values, necessary to meet the increased demand for skilled public administrators. Candidates who follow this professional program must complete a minimum of 42 credits, consisting of core courses, electives and either an internship or a thesis.

Requirements

Because students have divergent career goals, a thesis or internship option is offered. The thesis option requires an additional 18 credits of course work, 6 credits of thesis (GOVT 599 Master's Thesis), and a written examination covering the thesis and course work. The internship option also requires an additional 18 credits of course work, 3 credits of internship (GOVT 510 Internship), and a written examination covering the internship and course work. Students who fail their written examination must take an oral exam. As part of the course work, students selecting

the internship option must take GOVT 519 Proseminar in Public Administration (3 credits that count toward the 42 total) during the latter part of their studies, and are required to earn a B- grade or higher in that course.

With approval, students may include up to 12 credits of relevant course work from other departments to be counted toward the total credits required for the MPA. These credits may be selected to form a graduate minor in another academic discipline.

Core Courses

---------------	----

Candidates with inadequate preparation for graduate study in public administration may be required to take appropriate undergraduate and graduate courses as part of, or in addition to, a regular program of study. Applicants to the MPA program will be advised of any such requirements at the time of admission.

Public Administration - Undergraduate Minor

Students pursuing a subfield minor may count a maximum of 3 credits in an independent studies course or an internship. Students may request permission to substitute courses between subfields, subject to approval of the Department of Government undergraduate committee.

Code	Title	Credits
Required Courses		
GOVT 100G or HON 249G	American National Government American Politics in a Changing World	3
GOVT 110G or HON 248G	Introduction to Political Science The Citizen and the State: Great Political Issues	3
Select 12 additional credits, of which at least 9 are upper division, including 3 upper division courses from the same subfield.		12
Total Credits		18

The subfield series include courses in the 20/30 series (public administration and policy), 40/50 series (American government and politics), 60 series and HON 304V Dilemmas of War and Peace

(international relations), 70 series (comparative politics), 80 series, including GOVT 380V Contemporary World Political Ideologies (political theory), and 90 series (public law).

Public Law - Undergraduate Minor

Students pursuing a subfield minor may count a maximum of 3 credits in an independent studies course or an internship. Students may request permission to substitute courses between subfields, subject to approval of the Department of Government undergraduate committee.

Additional Courses

Other graduate courses may become available during the year which may be substituted for the above listed courses. Consideration may be made on a case-by-case basis.

History

Undergraduate Program Information

An undergraduate degree in history prepares students for careers in: teaching; law; public service; management; journalism; education; communications; travel counseling; and library, museum and archival staff work. Students master skills including the ability to read critically, to formulate arguments, to conduct historical research, and to synthesize arguments and create novel interpretations.

Graduate Program Information

The Department of History offers graduate work leading to the Master of Arts degree. In addition to fulfilling the basic requirements for admission to the Graduate School, applicants must present undergraduate passage of at least 12 credits in history with grades of B or higher, including 6 upper division history credits. Those lacking this preparation must normally make up deficiencies before beginning graduate course work. Candidates who choose a course of study requiring a foreign language will be responsible for their own language preparation.

Students applying for admission to the graduate program in history are required to submit an application form and a transcript to the Graduate School and a strong writing sample, three letters of recommendation ideally from History faculty members at NMSU or other institutions, and a two-to-three page statement of purpose to the Department of History, approximately four months in advance of the desired enrollment date. Applicants for graduate assistantships and fellowships must submit a letter of application, a transcript, and three letters of recommendation to the department by February 15 for the fall semester, and by October 15 for the spring semester. Students who are not applying for graduate assistantships and fellowships may apply at any time for acceptance into the graduate program.

Degrees for the Department

History - Bachelor of Arts (p. 327)

History - Master of Arts (p. 328)

Public History and Public Administration - Joint M.A. Degree (p. 329)

Minors for the Department

Contemporary Social Studies - Undergraduate Minor (p. 326)

History - Undergraduate Minor (p. 329)

History - Graduate Minor (p. 327)

Professors Bronstein, Hammond, Horodowich, Hunner, Malamud
Associate Professors Brooks, Garcia-Bryce, Orzoff; **Assistant Professors** Kopp, **College Professors** E. Masson, Tollefson, Pitcaithley, Schneider-Hector

J. L. Bronstein, Ph.D. (Stanford)– U.S., Britain; N. M. Brooks, Ph.D. (Columbia)– Russia/Soviet Union, modern Europe, modern science; I. Garcia-Bryce, Ph.D. (Stanford)– Latin America, Peru; K. J. Hammond, Ph.D. (Harvard)– China, East Asia; E. Horodowich, Ph.D. (Michigan-Ann Arbor)– early modern Europe, Mediterranean; J. Hunner, Ph.D. (New Mexico) public history, New Mexico; P. Kopp, Ph.D. (Nevada-Reno)- US, environmental, public history; M. Malamud, Ph.D. (California-Berkeley)– ancient, medieval, Islam; A. Orzoff, Ph.D. (Stanford)– twentieth-century Europe, Eastern Europe, intellectual history.

HIST 101G. Roots of Modern Europe

3 Credits

Economic, social, political, and cultural development from earliest times to about 1700.

HIST 102G. Modern Europe

3 Credits

Economic, social, political, and cultural development from 1700 to the present.

HIST 110G. Making History

3 Credits

General introduction to history: how historians carry out research and develop interpretations about the past.

HIST 111G. Global History to 1500

3 Credits

Global economic, social, political and cultural developments to 1500. Thematic approach.

HIST 112G. Global History Since 1500

3 Credits

Global economic, social, political and cultural developments since 1500. Thematic approach.

HIST 201G. Introduction to Early American History

3 Credits

History of the United States to 1877, with varying emphasis on social, political, economic, diplomatic, and cultural development.

HIST 202G. Introduction to Recent American History

3 Credits

History of the United States since 1877, with varying emphasis on social, political, economic, diplomatic, and cultural development.

HIST 211G. East Asia to 1600

3 Credits

History of China, Korea, Vietnam, and Japan from earliest times through the sixteenth century. Emphasis on cultural and political developments and their social and economic contexts, and the interaction between East Asian societies.

HIST 212G. East Asia since 1600

3 Credits

History of China, Korea, Vietnam, and Japan from the sixteenth through the twentieth centuries. Emphasis on internal development of each country, as well as the social and political impact of Western Imperialism, and the emergence of each country's unique version of modern society.

HIST 221G. Islamic Civilizations to 1800

3 Credits

History of Islamic civilizations to 1800.

HIST 222G. Islamic Civilizations since 1800

3 Credits

History of Islamic civilizations since 1800.

HIST 261. New Mexico History

3 Credits

Economic, political, and social development of New Mexico from exploration to modern times. Community Colleges only.

HIST 269. Special Topics

1-3 Credits

Specific subjects to be announced in the Schedule of Classes. Community Colleges only. May be repeated for a maximum of 12 credits.

HIST 300. Special Topics**1-9 Credits (1-9)**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 18 credits.

HIST 302V. Science in Modern Society**3 Credits**

The social impact of scientific activity and thought from Newton to the present. The growth of modern scientific institutions; the political and social context of modern science. ENGL 111G recommended.

HIST 304. The Global Cold War**3 Credits**

Survey of the global history of the Cold War. The emergence of the USSR and US as global superpowers, their involvement in the end of the European great-power empire, the rise of petropolitics and the nuclear era, modern terrorism, and the creation of the First, Second and Third Worlds all have their roots in the Cold War. Although the Iron Curtain ran through Europe, with the Berlin Wall considered its main front, the Cold War's impact was not limited to Europe. Proxy wars were fought all over the world; the globe became a set or arenas of contestation. Students will carefully read historical documents as well as textbooks and literary works; in addition to close analysis of different kinds of sources, we will explore different kinds of historical writing.

HIST 309. American Indian History I**3 Credits**

Cultural and social change from before contact with Europeans to 1840.

HIST 310. American Indian History II**3 Credits**

Federal Indian policy, tribal histories, and the emergence of Pan-Indianism from 1840 to present.

HIST 311V. Colonial Latin America**3 Credits**

Social, political, and economic development from Columbus to the Wars of Independence. Research paper required.

HIST 312V. Modern Latin America**3 Credits**

Post-revolutionary developments in the nineteenth and twentieth centuries; the role of Latin America in world affairs and the Inter-American system. Research paper required.

HIST 313. Making the American West**3 Credits**

Development of the American West from 1803 to 1900 with emphasis on conquest, federal and corporate roles in western development, environmental change, and the Mythic West. Includes meetings outside regular class time to view feature-length films.

HIST 315. From the Wild West to the Atomic West**3 Credits**

Explores the transformation of the West with particular attention to the roles of race, class, gender and culture. Includes meetings outside regular class time to view feature-length films.

HIST 316. History of Women in the American West**3 Credits**

Experiences and interactions among Native American, Spanish/Mexican, immigrant, and Anglo-American women in the American West from 1500 to the present. Same as WS 316.

HIST 321. History of Korea**3 Credits**

Social, political, and cultural history of Korea from earliest times through twentieth century. Emphasis on the interaction between Korean traditions and influences from China and the West.

HIST 323. Cultural History of Later Imperial China**3 Credits**

Covers art and literature of China from the Tang Dynasty (618-907) through the eighteenth century. Developments in cultural theory and practice are traced in the context of the social and economic changes fostering an understanding of Chinese cultural history and its legacy in East Asia today.

HIST 323 L. Splendor of Imperial China**1 Credit**

This course consists of a FLIP trip to China, Spring 2014 which will explore the significant sites of imperial Chinese culture by spending 14 days traveling in China. Crosslisted with: ART 311 L and HIST 323.

HIST 324. History of Modern Terrorism in the Middle East and Europe**3 Credits**

Historical analysis of the motives, methods, organization, and actions of terrorist groups.

HIST 325. History of the Arab-Israeli Conflict**3 Credits**

History of the causes, course, and consequences of the Arab-Israeli conflict.

HIST 329. History of Egypt**3 Credits**

History of Egypt from ancient times to the present.

HIST 330V. Introduction to Religious Studies**3 Credits**

Provides an overview of old and new methods and theories for the study of religion. Exposure to the ways groups of people in diverse cultural systems construct and change their religious traditions to serve practical and meaningful ends. Same as SOC 330V and ANTH 330V.

HIST 331. Rebels, Guerrillas, and Terrorists in Modern Latin America**3 Credits**

Explores history of rebels in Latin America. Examines guerilla struggles attaining national dimension. Focus on modern events, including Peru's Shining Path, Colombia's FARC, and Mexico's Zapatistas. Same as GOVT 468.

HIST 334. Art and Life in Renaissance Italy**3 Credits**

Examines how Italian Renaissance textual and visual culture offered Europe new ways of seeing and portraying itself, 1350-1550. Topics include: Florence, Venice, Rome, Leonardo, Michelangelo, Titian, humanism, the Medici, and republican and courtly culture. Same as ART 444.

HIST 338. World War I**3 Credits**

Cultural, social, and intellectual background and impact of World War I. Military and diplomatic events of the war. Consequences of the war.

HIST 339. World War II**3 Credits**

Social, cultural and political aspects of World War II, in addition to traditional military events. Emphasis on U.S. involvement.

HIST 340. American Economic History**3 Credits**

The rise of big business and organized labor, increasing price rigidities, and growing government intervention. Same as ECON 340.

HIST 341. American Agricultural History**3 Credits**

From Colonial times to the present, with emphasis upon historical development, politics, and legislation, especially in recent times.

HIST 342. Early American Military History**3 Credits**

Emphasis on American wars up to and including the Civil War, and on the factors contributing to the development of modern military systems.

HIST 343. Recent American Military History**3 Credits**

Emphasis on American wars since the Civil War, and on factors contributing to the development of modern military systems.

HIST 346. The Jacksonian Era 1800-1840**3 Credits**

Jeffersonian period, War of 1812. Social, political, and economic history of the Jacksonian era.

HIST 347. Civil War Era 1840-1877**3 Credits**

Mexican-American War, development of secession, American Civil War, Reconstruction.

HIST 353. Colonial Mexico**3 Credits**

Covers major social, political, economic and cultural topics including pre-Columbian civilizations, early European incursions and indigenous responses, economic systems and labor exploitation, religion and spirituality, and resistance to colonial rule. Sixteenth to nineteenth centuries.

HIST 354. Modern Mexico**3 Credits**

Examines interactions of peasants, women, indigenous peoples, and economically/politically dominant groups within the Mexican state from 1810 to the present. Assesses the contentious relationship between Mexico and the United States, focusing on the Mexican-U.S. border.

HIST 356. The Mexican Revolution**3 Credits**

Examines the history of modern Mexico through the lens of the Mexican Revolution, 1910-1920. Course covers military, political, social, cultural and economic developments that shaped Mexico during and after the Revolution.

HIST 361. Afro-American History I**3 Credits**

African background, slave trade, slavery; Civil War and Reconstruction; free blacks in a white society to about 1900.

HIST 362. Afro-American History II**3 Credits**

Black Americans in the United States in the twentieth century; segregation; black leaders, organizations, methods and goals; white reaction; the struggle for equality.

HIST 365. Cold War Europe**3 Credits**

Course deals with the Cold War's bipolar international climate as well as the individual paths charted by each European nation in response. Events, leaders, thinkers, ideas and developments will all be featured.

HIST 366V. British Imperialism**3 Credits**

Survey of the activities of the British empire from the 16th century through the 20th century, with emphasis on Ireland, North America and India. Assesses the impact of imperial activities on British domestic politics, culture and social history, and the process and impact of decolonization.

HIST 367. Mexican-Americans in the United States**3 Credits**

Emigration; reception; impact upon society, politics, economics, and culture.

HIST 368. Teaching History**3 Credits**

Philosophical and practical issues of teaching history are explored. Designed to help prospective teachers at all levels clarify their views about studying history. A variety of pedagogical strategies for teaching history are explored.

HIST 369. History of Latinos in the United States**3 Credits**

Development of Latino communities since 1500 in what is today the U.S. Emphasis on 1846 to present, and on Mexican Americans, Puerto Ricans, and Cuban Americans. Major themes: race, colonialism, immigration, nationalism, class, culture, gender, and politics.

HIST 371. Ancient Greece**3 Credits**

Social, cultural, and political history of Greece from the Minoan to Hellenistic periods.

HIST 372. The Roman World**3 Credits**

Republic and Empire; Rome as a world power; institutional, cultural, and intellectual contributions; decline and fall.

HIST 373. Islam and the West: Cultural Contacts, Conflicts and Exchanges**3 Credits**

Examines interactions, encounters and cross-fertilization between the Islamic world and the West from the seventh to the twenty-first centuries. Course includes origins of Islam, relationships between Islam, Judaism, and Christianity, and concludes with the post 9/11 present. May be repeated up to 3 credits.

HIST 374V. The European City: History and Culture**3 Credits**

Course presents the rich, complex history and cultures of European cities from ancient to modern times, linking these cities to crucial issues in European history. Crosslisted with HON 374V, GEOG 374V, GOVT 374V.

HIST 376. Great Battles That Shaped Europe**3 Credits**

Considers the most significant battles in the West from the 13th century BCE (Troy) to the 16th century CE (Spanish Armada).

HIST 379. History of Italy: Rome to the Twentieth Century**3 Credits**

Analyses the history of Italy from the Etruscan period (600 BCE) through the Roman Empire and Renaissance period to the 21st century CE.

HIST 382V. Modern Russia**3 Credits**

Domestic policies and foreign relations from mid-nineteenth century to the present with emphasis on the Soviet period.

HIST 383. Germany**3 Credits**

Political, social, and cultural developments from the eighteenth century to the present, with emphasis on the Nazi era. Same as GOVT 473.

HIST 385. The Spanish Borderlands**3 Credits**

Examines historical relationships between Native American and Hispanic peoples in northern Mexico, American Southwest and other border regions from 1500s to 1821.

HIST 386. New Mexico History**3 Credits**

Economic, political and social development of New Mexico from exploration to modern times.

HIST 387. Spain**3 Credits**

From pre-Roman times to the modern era.

HIST 388. Women in Europe I**3 Credits**

The roles of women and constructions of gender in medieval and early modern Europe, 1100 - 1550. Examines how conceptions of gender and sexuality both shaped and were shaped by political and social transformations in European history. Same as W S 388.

HIST 390V. The Holocaust**3 Credits**

The attack upon European Jews by Adolf Hitler and the National Socialist Party in Germany and occupied Europe from his accession to chancellor in 1933 until the end of the Third Reich in 1945.

HIST 391. Twentieth Century World History**3 Credits**

Includes globalization; imperialism; World Wars I and II and the changing roles of Europe: the Cold War; decolonization; the rise and collapse of Communism; new social and intellectual movements; and the growing roles of East Asia, India, Latin America, Africa and the Middle East. Thematic examples.

HIST 392. Tudor-Stuart England, 1485-1715**3 Credits**

British history from 1485-1715, including the development of the monarchy and Parliament, the Protestant Reformation, the English Civil War and Restoration, and culture and society.

HIST 394. Victorian and Edwardian Britain, 1815-1914**3 Credits**

Evolution of constitutional monarchy; industrialism and imperialism; repose and reform; increased influence of an intellectual elite and the emergence of the Labor Party.

HIST 395. From Rule Britannia to Cool Britannia: Twentieth-Century Britain**3 Credits**

Edwardian Era, World War I; Reconversion, the 1926 General Strike; the Great Depression and appeasement; Churchill and the war against Nazi Germany; nationalization and the Welfare State.

HIST 397. Introduction to Public History**3 Credits**

Surveys how historians do history in museums, archives, government agencies, and in communities. Hands-on experience provides students a better understanding of history and how historians work outside of the classroom. Seminar project required.

HIST 398. Historians and History**3 Credits**

General historiography and philosophy of history; historical methodology, research, and writing; bibliographical aids and their uses. May be repeated up to 3 credits. Restricted to: HIST majors.

HIST 399. New Mexico Law**3 Credits**

Same as GOVT 399, C J 399, JOUR 399, and SOC 399.

HIST 400. Special Topics**1-9 Credits (1-9)**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 18 credits.

HIST 401. Environmental History**3 Credits**

Seminar discusses how the natural environment and people have shaped each other, and how people have perceived and imagined the natural world. May focus upon one specific topic or area. Course includes a field trip outside regular class times.

HIST 402. Special Topics in European History**3 Credits**

Special topics in European history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 403. Special Topics in Middle Eastern History**3 Credits**

Special topics in Middle Eastern history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 404. Special Topics in Asian History**3 Credits**

Special topics in Asian history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 406. Special Topics in United States History**3 Credits**

Special topics in United States history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 408. Cultures of Africa**3 Credits**

Explores the rich history and cultural diversity of the continent of Africa. The course first examines the historical processes that have shaped modern Africa, including the evolution of modern humans in Africa, the origins of agriculture and pastoralism, the formation of indigenous African states, the slave trade, and European colonialism. The course also looks at contemporary African societies, including hunter-gatherer, pastoral, and farming/fishing peoples. In addition, contemporary issues facing modern Africa such as famine and agricultural policy, the status of women, and environmental changes such as deforestation are discussed. Crosslisted with: ANTH 404

HIST 410. New Mexico History for Educators**3 Credits**

Course provides content and innovative techniques for teachers of New Mexico history. Covers pre-contact Native American history through Spanish Colonial and Mexican periods through the twentieth century.

HIST 411. Making the American West**3 Credits**

This seminar course explores the history of disease, dying, death and funeral practices, and may include such topics as the social and cultural histories of murder, suicide, epidemics, death in wartime, the death penalty, and/or the corpse. The class may be taught with a different national or chronological focus in different semesters. Crosslisted with: HIST 513.

HIST 412. Travel Writing**3 Credits**

Explores how writers describe their travels with an emphasis on the history of a place. Semester paper required. Crosslisted with: HIST 512.

HIST 413. Native American History**3 Credits**

Seminar explores the history of Native Americans, including tribal conflicts, interactions with Europeans and Euro-Americans, land loss, degradation of natural resources, federal Indian policy, pan-Indian movements, cultural resistance and revitalization, and modern tribal economies.

HIST 415. Western American History**3 Credits**

Seminar explores the development of the American West with emphasis on conquest, federal and corporate impact on the West, environmental changes, and the mythic West. Includes extra class meetings to view feature-length films.

HIST 417. The Mongol Empire**3 Credits**

Examines the history and legacy of the Mongol World Empire founded by Chinggis Khan and his sons, and the dynasties that came to dominate Inner Asia in its wake. Crosslisted with: HIST 517.

HIST 419. Central Asia**3 Credits**

An introduction to the political, cultural and social history of the Central Asian region from pre-history to the present, including coverage of the empires of the Mongols, Tamerlane and their successors. Crosslisted with: HIST 519.

HIST 420. History of Women and Gender**3 Credits**

Seminar discusses the position of women and the roles of both sexes in a specific historical and geographic setting. Course emphasizes the ways in which women and gender were both central to and fundamentally affected by all political and social transformations in history.

HIST 423. The History of Food**3 Credits**

Considers the history of the production and consumption of food in the West from the Neolithic Age to the present with an emphasis on the historical relationships between food, gender, social class, social identity and nationalism. Crosslisted with: HIST 523.

HIST 424. History of Art, Thought and Literature**3 Credits**

Seminar discusses a variety of artistic and literary expressions in their historical contexts and focuses on the ways in which cultural forms both reflect and construct the broader historical trends that surround them.

HIST 425V. History of Magic and Witchcraft in Medieval and Renaissance Europe**3 Credits**

Examines history of popular and scientific beliefs about magic and witchcraft in medieval and early modern Europe. Includes origins of occult Western sciences; Arabic sources of medieval magic; the occult sciences in scholasticism; witchcraft and scholasticism; witchcraft and medieval theology, witch hunts of the 16th and 17th centuries; and the decline of belief in magic and witchcraft. Emphasis on boundaries that defined and separated magic, science, and religion in Western thought from late antiquity through the Scientific Revolution. Crosslisted with: HON 425.

HIST 428. History of Terrorism in Modern Europe and the Middle East**3 Credits**

Analyzes causes, methods, and consequences of terrorism in Europe and the Middle East from the Reign of Terror in the French Revolution to Al-Qaeda, Hamas and Hezbollah in the contemporary Middle East and beyond.

HIST 431. History of Race and Ethnicity**3 Credits**

Seminar explores the historical social construction of race and ethnicity, and their relationship to other systems of social difference such as class and gender. Course will examine popular and academic theories of race and ethnicity as well as historical concrete effects of racial and ethnic differences in society.

HIST 432. United States Labor History to 1877**3 Credits**

Seminar discussions explore United States labor and working-class history to 1877, including such topics as pre-industrial and industrial labor, slavery, debt peonage, indentured servitude, and housework. May explore the history of labor organization, working-class culture and leisure activities, and responses to labor issues by the state.

HIST 433. United States Labor History Since 1877**3 Credits**

Seminar discussions explore United States labor and working-class history since 1877, including such topics as industrial labor, debt peonage, and housework. May explore the history of labor organization, working-class culture and leisure activities, and responses to labor issues by the state.

HIST 434. Urban History**3 Credits**

Seminar discusses cities as complex catalysts for cultural, political, and scientific development, both within cities themselves and more broadly for their nations and regions. Course deals with such topics as the relationship between social organization and physical space; city development, morphology and dynamics; and the cultural and intellectual history of cities.

HIST 435. History of War and Revolution**3 Credits**

Seminar covers historical dynamics of violent social, political, and economic transitions. May focus upon a particular war or upheaval, such as World War II or the French Revolution, or may examine more generic characteristics of conflict and radical change across many historical examples. Extensive readings in scholarly literature. Research projects relating to specific course contents.

HIST 436. Nations and Nationalism**3 Credits**

Seminar examines major theories of nationalism from the nineteenth century to the twenty-first century. Course includes nationalist case studies, from liberal nationalist state-building to ethnic cleansing in the Balkans.

HIST 438. Antiquity and Modernity**3 Credits**

Seminar explores links between earlier and more recent historical periods. Examples may include the Renaissance rediscovery of ancient Rome or the early modern Chinese reassessment of its classical Confucian heritage. Readings include ancient sources and the modern reception of such works, and the scholarly assessment of these processes. Individual research projects required in areas of student interests.

HIST 443. The Cold War in Latin America**3 Credits**

Seminar discusses Latin American political history during the Cold War. Course focuses on how Latin Americans (individuals, parties, militaries, states) acted in an increasingly politicized arena defined by growing United States concerns over Cuban and Soviet influence in the area.

HIST 448. Nuclear Nation**3 Credits**

Explores post-World War II history and the impact atomic energy has had on the United States and the world.

HIST 449. Readings**1-3 Credits**

Individual study of selected readings and problems. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

HIST 453. Cuba: Colony to Castro**3 Credits**

Economic, social, and political development of Cuba and other colonies and nations in the Caribbean with emphasis on recent events.

HIST 455. Brazil**3 Credits**

Economic, social, and political development of Brazil since independence. The influence of Brazil in the international arena.

HIST 459. Peru: From Incas to Inca Kola**3 Credits**

Explores issues of cultural and national identity in Peru from the Incas to the present, focusing on the modern period. Themes include indigenous resistance and adaptation to colonial rule, nationalism, militarism, terrorism, globalization, and the drug trade. Same as ANTH 459 and GOVT 465.

HIST 471. China through the Ming Dynasty**3 Credits**

History of China from origins to Ming dynasty, (1368-1644). Cultural and political development with emphasis on social and economic contexts and long term trends.

HIST 472. China in the Modern World**3 Credits**

History of China from seventeenth through twentieth centuries. Rise and fall of the Manchu Qing dynasty, internal dynamics of social and political change in nineteenth and twentieth centuries, impact of Western Imperialism, and development of the Peoples Republic since 1949.

HIST 473. History of Japan**3 Credits**

History of Japan through twentieth century. Political and cultural developments and their social and economic contexts. Chinese influence on early Japan, rise of Samurai and Shogunate, impact of Western Imperialism, and emergence of modern Japan.

HIST 474. Gender in East Asian History**3 Credits**

Examines the position of women and the social roles of both sexes in traditional China and Japan, and traces the changes taking place in those societies in the course of modernization in the last century and a half. Scholarly literature and works of Chinese and Japanese literature in translation and cinema used. Same as W S 474.

HIST 475. History of the Global Political Economy**3 Credits**

Traces development of global systems of economic interaction and the rise of European military and political dominance in the 18th and 19th centuries. Emphasis on East and South Asian roles in early modern history, and on challenges to European dominance in the 20th and 21st centuries.

HIST 479. Oral History**3 Credits**

Oral history through readings, discussions, and interviews. Semester project required that includes an interview and transcript.

HIST 481. Time Traveling Through New Mexico's Past**3 Credits**

Teaches historians and educators how to make history come alive. Semester project includes role playing characters and activities from a past era with local schools and museums.

HIST 483. Historic Preservation**3 Credits**

Study of community development, the historic preservation movement, and the built environment. Field project.

HIST 486. Interpreting Historic Places for the Public**3 Credits**

Explores historic site interpretation, the scholarship and philosophy of historic interpretation, and the nature of heritage interpretation for historic places.

HIST 489. Projects in History**3 Credits**

Individual projects in history. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

HIST 500. Special Topics**1-9 Credits (1-9)**

Specific subjects to be announced in the Schedule of Classes. Graduate research paper required. May be repeated for a maximum of 12 credits.

HIST 503. The Jacksonian Era, 1800-1840**3 Credits**

Jeffersonian period, War of 1812. Social, political, and economic history of the Jacksonian era. Graduate research paper required.

HIST 504. Civil War Era, 1840-1877**3 Credits**

Mexican-American War, development of secession, American Civil War, Reconstruction. Graduate research paper required.

HIST 507. The History of Food**3 Credits**

Considers the history of the production and consumption of food in the West from the Neolithic Age to the present, with an emphasis on the historical relationships between food, gender, social class, social identity and nationalism. Crosslisted with: HIST 423.

HIST 508. Environmental History**3 Credits**

Seminar discusses how the natural environment and people have shaped each other, and how people have perceived and imagined the natural world. May focus upon one specific topic or area. Course includes a field trip outside regular class times.

HIST 509. Native American History**3 Credits**

Seminar explores the history of Native Americans, including tribal conflicts, interactions with Europeans, and Euro-Americans, land loss, degradation of natural resources, federal Indian policy, pan-Indian movements, cultural resistance and revitalization, and modern tribal economies.

HIST 510. New Mexico History for Educators**3 Credits**

Course provides advanced content and innovative techniques for teachers of New Mexico history. Covers pre-contact Native American history through Spanish Colonial and Mexican periods through the twentieth century.

HIST 511. Making the American West**3 Credits**

Development of the American West from 1803 to 1900, with emphasis on conquest, federal and corporate roles in western development, environmental change, and the mythic West. Includes extra class meetings to view feature-length films. Graduate research paper required.

HIST 512. Travel Writing**3 Credits**

Explores how writers describe their travels with an emphasis on the history of a place. Semester paper required. Crosslisted with: HIST 412.

HIST 513. American Social and Cultural History to 1900**3 Credits**

This seminar course explores the history of disease, dying, death and funeral practices, and may include such topics as the social and cultural histories of murder, suicide, epidemics, death in wartime, the death penalty, and/or the corpse. The class may be taught with a different national or chronological focus in different semesters. Crosslisted with: HIST 411.

HIST 516. History of Latinos in the United States**3 Credits**

Development of Latino communities since 1500 in what is today the United States. Emphasis on 1846 to present, and on Mexican Americans, Puerto Ricans, and Cuban Americans. Major themes: race, colonialism, immigration, nationalism, class, culture, gender, and politics. Graduate research paper required.

HIST 517. U.S. Immigration from the Caribbean since 1868**3 Credits**

Examines the history and legacy of the Mongol World Empire founded by Chinggis Khan and his sons, and the dynasties that came to dominate Inner Asia in its wake. Crosslisted with: HIST 417.

HIST 518. From the Wild West to the Atomic West**3 Credits**

Explores the transformation of the West, with particular attention to the roles of race, class, gender, and culture. Includes extra class meetings to view feature-length films. Graduate research paper required.

HIST 519. History of Women in the American West**3 Credits**

An introduction into the political, cultural and social history of the Central Asian region from pre-history to the present, including coverage of the empires of the Mongols, Tamerlane and their successors. Crosslisted with: HIST 419.

HIST 520. History of Women and Gender**3 Credits**

Seminar discusses the position of women and the roles of both sexes in specific historical and geographic setting. Course emphasizes the ways in which women and gender were both central to and fundamentally affected by all political and social transformations in history.

HIST 524. Art, Thought and Literature**3 Credits**

Seminar discusses a variety of artistic and literary expressions in their historical contexts and focuses on the ways in which cultural forms both reflect and construct the broader historical trends that surround them.

HIST 525. History of Magic and Witchcraft in Medieval and Renaissance Europe**3 Credits**

Examines history of popular and scientific beliefs about magic and witchcraft in medieval and early modern Europe. Includes origins of occult Western sciences; Arabic sources of medieval magic; the occult sciences in scholasticism; witchcraft and scholasticism; witchcraft and medieval theology, witch hunts of the 16th and 17th centuries; and the decline of belief in magic and witchcraft. Emphasis on boundaries that defined and separated magic, science, and religion in Western thought from late antiquity through the Scientific Revolution.

Prerequisite: HIST 101G.

HIST 527. Labor History**3 Credits**

Seminar discussions explore labor and working-class history, including such topics as pre-industrial labor, slavery, debt peonage, indentured servitude, and housework. May explore the history of labor organization, working-class culture and leisure activities, and responses to labor issues by the state.

HIST 528. History of Terrorism in Modern Europe and the Middle East**3 Credits**

Advanced analyses of causes, methods, and consequences of terrorism in Europe and the Middle East from the Reign of Terror in the French Revolution to Al-Qaeda, Hamas, and Hezbollah in the contemporary Middle East and beyond.

HIST 530. Antiquity and Modernity**3 Credits**

Seminar explores link between earlier and more recent historical periods. Examples may include the Renaissance rediscovery of ancient Rome or the early Chinese reassessment of its classical Confucian heritage. Readings include ancient sources and the modern reception of such works, and the scholarly assessment of these processes. Individual research projects required in areas of student interests.

HIST 535. War and Revolution**3 Credits**

Seminar covers historical dynamics of violent social, political and economic transitions. May focus upon a particular war or upheaval, such as World War II or the French Revolution, or may examine more generic characteristics of conflict and radical change across many historical examples. Extensive readings in scholarly literature. Research projects relating to specific course contents.

HIST 536. Nations and Nationalism**3 Credits**

Seminar examines major theories of nationalism from the nineteenth to the twenty-first centuries. Course includes nationalist case studies, from liberal nationalist state-building to ethnic cleansing in the Balkans.

HIST 538. Special Topics in European History**3 Credits**

Advanced special topics in European history to be announced in the schedule of classes. May be repeated for a maximum of 12 credits.

HIST 540. Special Topics in Middle Eastern History**3 Credits**

Advanced special topics in Middle Eastern history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 541. Intellectual History of Modern Europe**3 Credits**

Culture and ideas in Europe from 1600 to the present, from the Scientific Revolution to Postmodernism, including ideas and their expression in science, art, literature, and politics. Graduate research paper required.

HIST 543. Special Topics in Asian History**3 Credits**

Advanced special topics in Asian history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 544. Special Topics in Latin American History**3 Credits**

Advanced special topics in Latin American history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 545. Special Topics in United States History**3 Credits**

Advanced special topics in United States history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 546. World War I**3 Credits**

Cultural, social, and intellectual background and impact of World War I. Military and diplomatic events of the war. Consequences of the war. Graduate research paper required.

HIST 547. World War II**3 Credits**

Social, cultural and political aspects of World War II, in addition to traditional military events. Emphasis on U.S. involvement. Graduate research paper required.

HIST 548. Nuclear Nation**3 Credits**

Explores post-World War II history and the impact that atomic energy has had on the United States and the world.

HIST 549. Graduate Readings**1-3 Credits**

Individual study of selected readings and problems. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

HIST 549 L. Splendors of Imperial China**1 Credit**

This course consists of a FLIP trip to China, Fall 2014 which will explore the significant sites of imperial Chinese culture by spending 14 days traveling in China. Consent of Instructor required. Crosslisted with: HIST 323 L and ART 511 L.

HIST 551. Colonial Mexico**3 Credits**

Political, economic, and social development from the Aztecs to 1821. Graduate research paper required.

HIST 552. Modern Mexico**3 Credits**

From independence to the present, with emphasis on the Revolution. Graduate research paper required.

HIST 553. Cuba: Colony to Castro**3 Credits**

Economic, social, and political development of Cuba and other colonies and nations in the Caribbean, with emphasis on recent events. Graduate research paper required.

HIST 555. Brazil**3 Credits**

Economic, social, and political development of Brazil since independence. The influence of Brazil in the international arena. Graduate research paper required.

HIST 557. The Mexican Revolution**3 Credits**

Origins, causes, and scope of the Mexican Revolution, including leading personalities, with emphasis on the U.S.-Mexican border. Graduate research paper required.

HIST 559. Peru: From Incas to Inca Kola**3 Credits**

Crosslisted with: ANTH 559 and GOVT 565

HIST 560. History of Egypt**3 Credits**

Advanced study of history of Egypt from ancient through modern times. Includes the study of Egypt's interactions with the Middle East and the West, as well as its legacy for both civilizations.

HIST 561. Islam and the West: Cultural Contacts, Conflicts and Exchanges**3 Credits**

Examines interactions, encounters and cross-fertilization between the Islamic world and the West from the seventh to the twenty-first centuries. Course includes origins of Islam, relationships between Islam, Judaism, and Christianity, and concludes with the post 9/11 present.

Prerequisites: C or higher grade in HIST 221G or HIST 222 or HIST 461; or enrollment in one of these courses at the same time as enrollment in HIST 561.

HIST 566. British Imperialism**3 Credits**

Survey of the activities of the British empire from the 16th century through the 20th century, with emphasis on Ireland, North America and India. Assesses the impact of imperial activities on British domestic politics, culture and social history, and the process and impact of decolonization.

HIST 568. Urban History**3 Credits**

Seminar discusses cities as complex catalysts for cultural, political, and scientific development, both within cities themselves and more broadly for their nations and regions. Course deals with such topics as the relationship between social organization and physical space; city development, morphology and dynamics; and the cultural and intellectual history of cities.

HIST 570. The Cold War in Latin America**3 Credits**

Seminar discusses Latin American political history during the Cold War. Course focuses on how Latin Americans (individuals, parties, militaries, states) acted in an increasingly politicized arena defined by growing United States concerns over Cuban and Soviet influence in the area.

HIST 571. China through the Ming Dynasty**3 Credits**

History of China from origins to Ming Dynasty, 1368-1644. Cultural and political development with emphasis on social and economic contexts and long term trends. Research paper required.

HIST 572. China in the Modern World**3 Credits**

Covers the history of China from 17th through 20th centuries. Rise and fall of the Manchu Qing dynasty, internal dynamics of social and political change in the 19th and 20th centuries, impact of Western imperialism, and development of the Peoples Republic since 1949. Research paper required.

HIST 573. History of Japan**3 Credits**

Covers the history of Japan through the 20th century. Political and cultural developments and their social and economic contexts. Chinese influence on early Japan, rise of Samurai and Shogunate, impact of Western imperialism, and the emergence of modern Japan. Research paper required.

HIST 574. Gender in East Asian History**3 Credits (3+2P)**

Examines the position of women and the social roles of both sexes in traditional China and Japan, and traces the changes taking place in those societies in the course of modernization in the last century and a half. Scholarly literature and works of Chinese and Japanese literature (in translation) and cinema used. Same as W S 574.

HIST 575. History of the Global Political Economy**3 Credits**

Traces development of global systems of economic interaction and the rise of European dominance in the 18th and 19th centuries. Emphasis on East and South Asian roles in early modern history, and on challenges to European dominance in the 20th and 21st centuries.

HIST 576. The Holocaust**3 Credits**

Advanced study of the attack on European Jews by Adolf Hitler and the National Socialist Party in Germany and occupied Europe from his accession as chancellor in 1933 until the end of the Third Reich in 1945.

HIST 578. Modern Russia**3 Credits**

Domestic policies and international relations from the mid-nineteenth century to the present with emphasis on the Soviet experience.

HIST 579. Oral History**3 Credits**

Oral history through readings, discussion, and interviews. Course project required that includes an interview and transcription.

HIST 580. Graduate Research Projects**1-6 Credits (1-6)**

Intensive investigation of a selected area of history, including the completion of a research paper or a public history project. Consent of instructor required.

HIST 581. Time Traveling Through New Mexico's Past**3 Credits**

Instructs historians and educators on how to make history come alive. Semester project includes role playing characters and activities from a past era with local schools and museums.

HIST 582. History and Memory**3 Credits**

Seminar examines the interplay of memory and history. Explores how various nations and people construct the narratives of their past.

HIST 583. Advanced Historic Preservation**3 Credits**

Covers the community development, the historic preservation movement, and the built environment. Field project and additional graduate work.

HIST 585. Public History Internship**3 Credits**

Individual project in an area of public history, including a final written report. Research project required. May be repeated for a maximum of 9 credits.

Prerequisite: consent of instructor.

HIST 586. Interpreting Historic Places for the Public**3 Credits**

Advanced study of historic site interpretation, the scholarship and philosophy of historic interpretation, and the nature of heritage interpretation for historic places.

HIST 587. United States Labor History to 1877**3 Credits**

Seminar discussions explore United States labor and working-class history to 1877, including such topics as pre-industrial and industrial labor, slavery, debt peonage, indentured servitude and housework. May explore the history of labor organization, working-class culture and leisure activities, and responses to labor issues by the state.

HIST 588. United States Labor History since 1877**3 Credits**

Seminar discussions explore United States labor and working-class history since 1877, including such topics as pre-industrial and industrial labor, slavery, debt peonage, indentured servitude and housework. May explore the history of labor organization, working-class culture and leisure activities and responses to labor issues by the state.

HIST 590. Reading Seminar: Borders, Boundaries and Frontiers**3 Credits**

Explores questions and issues concerning different kinds of borders, boundaries and frontiers. Introduces relevant theoretical literature and considers specific places and times through case studies, including U.S.-Mexico border. Restricted to students in HIST program.

HIST 591. Reading Seminar: Modernity and its Discontents**3 Credits**

Examines the problem of modernization and the meaning of becoming and being modern, including positive and negative effects on individuals, cultures, environments and societies.

HIST 592. Reading Seminar: Nature and Society
3 Credits

Considers how humans and nature have reshaped each other, how people have perceived nature, how different cultures have understood their relationships to nature, and how social groups and nations have struggled over natural resources. Takes a comparative, transnational approach.

HIST 593. Reading Seminar: History, Myth and Memory
3 Credits

Course analyzes the complex and often contested process of writing national histories, creating national heroes, and forging collective memories. Students assess written texts, memorials, parades and celebrations.

HIST 594. Public History Seminar
3 Credits

Introduction to the discipline of public history, including its methodology and literature. Fieldwork is required.

HIST 596. Research Seminar
3 Credits

Research seminar teaches students the process of conducting original historical research with primary source documents. Students will then use these research skills to produce a polished chapter or article-length manuscript. Restricted to HIST majors.

HIST 597. Public History Article
1-9 Credits (1-9)

Researching and writing an article suitable for publication about a student's public history internship or other topic of interest within the field of public history.

HIST 598. Craft of History: Historical Theories, Methods, and Criticism (f)
3 Credits

Introduction to historical theories, methodologies, criticism, and skills essential to graduate study in history. Required for all history graduate students; restricted to history majors.

HIST 599. Master's Thesis
15 Credits
Thesis.

Name: Mary Holguin, Department Secretary

Office Location: Breland Hall Room 237

Contemporary Social Studies - Undergraduate Minor

This minor focuses on world issues since 1900. Students must pass one course taken from each of the five departments listed below, plus an additional course taken from any of the five areas or a course that is approved by the Department of History, with grades of C- or higher. Courses must not be taken on an S/U basis unless they are automatically S/U for all students. Students may substitute an appropriate subtitled special topics course, an independent readings or projects course, or an Honors course in any area with the permission of the head of the department offering the courses in that area.

Requirements

Criminal Justice

Select one from the following: 3

C J 322	Organized Crime
C J 451	Border Violence and Justice
C J 452	Upper World Crime
C J 453	Women and Justice

Geography

Select one from the following: 3

GEOG 325V	New Mexico and the American West
GEOG 328V	Geography of Latin America
GEOG 331V	Europe
GEOG 363V	Cultural Geography
GEOG 365V	Urban Geography

Government

Select one from the following: 3

GOVT 324	Environmental Policy
GOVT 343	Congress and the Legislative Process
GOVT 344	The American Presidency
GOVT 345	The Supreme Court
GOVT 354	American Indian Politics
GOVT 360	International Relations
GOVT 366	American Foreign Policy
GOVT 371	Latin American Politics
GOVT 378	U.S.-Mexico Border Politics
GOVT 391	Constitutional Law
GOVT 392	Civil Liberties
GOVT 394	Judicial Process
GOVT 469	Globalization

History

Select one from the following: 3

HIST 302V	Science in Modern Society
HIST 331	Rebels, Guerrillas, and Terrorists in Modern Latin America
HIST 338	World War I
HIST 339	World War II
HIST 356	The Mexican Revolution
HIST 362	Afro-American History II
HIST 365	Cold War Europe
HIST 382V	Modern Russia
HIST 383	Germany
HIST 390V	The Holocaust
HIST 391	Twentieth Century World History
HIST 395	From Rule Britannia to Cool Britannia: Twentieth-Century Britain
HIST 433	United States Labor History Since 1877
HIST 448	Nuclear Nation
HIST 481	Time Traveling Through New Mexico's Past (twentieth century topics only)

Sociology

Select one from the following: 3

SOC 361V	Social Issues in the Rural Americas
SOC 371	Race and Ethnic Relations
SOC 374V	Comparative Family Systems
SOC 375	Social Inequality

SOC 376V	Social Change	
SOC 381	Individual and Society	
SOC 392	Juvenile Delinquency	
SOC 430	Social Movement Theory	
SOC 458V	Comparative Global Family Systems	
SOC 459	Advanced Issues in Sex and Gender	
SOC 465V	Environmental Sociology	
SOC 470	Sociology of Latinos/as in the United States	
SOC 474	Sociology of Organizations	
SOC 477	Sociology of Education	
SOC 479	Sociology Perspectives on the U.S.-Mexico Border	
SOC 489	Globalization	
Select an additional course from any of the five areas above or a course approved by the Department of History. ¹		3
Total Credits		18

¹ with grades of C- or higher

History - Bachelor of Arts

The undergraduate history major consists of at least 42 credits in the major field, 24 credits of which must be numbered 300 or above. All courses must be passed with grades of C- or higher, and none may be taken on an S/U basis. Electives must be carefully selected by the student and approved by a Department of History advisor so that the student's program is well tailored to individual goals. All majors must be advised prior to registration.

Among the upper-division courses that majors take, one or more (in addition to HIST 398 Historians and History) must require a research-based paper or papers. In fulfilling their research requirements, majors must write one research-based paper or papers which together total at least 20 pages.

Departmental Requirements

Select two from the following:		12
HIST 101G & HIST 102G	Roots of Modern Europe and Modern Europe	
HIST 111G & HIST 112G	Global History to 1500 and Global History Since 1500	
HIST 201G & HIST 202G	Introduction to Early American History and Introduction to Recent American History	
HIST 211G & HIST 212G	East Asia to 1600 and East Asia since 1600	
HIST 221G & HIST 222G	Islamic Civilizations to 1800 and Islamic Civilizations since 1800	
HIST 311V & 311V	Colonial Latin America and Colonial Latin America	
HIST 398	Historians and History ¹	3
Select at least one undergraduate seminar from the following:		3
HIST 401	Environmental History	
HIST 413	Native American History	
HIST 415	Western American History	
HIST 420	History of Women and Gender	

HIST 424	History of Art, Thought and Literature	
HIST 431	History of Race and Ethnicity	
HIST 432	United States Labor History to 1877	
HIST 433	United States Labor History Since 1877	
HIST 434	Urban History	
HIST 435	History of War and Revolution	
HIST 436	Nations and Nationalism	
HIST 438	Antiquity and Modernity	
HIST 443	The Cold War in Latin America	
Select six additional 3-credit upper division History courses, at least 1 of which must be a course numbered 400 or above. ^{2,3}		18
Second Language Requirement at the 212/214 level or the 300-level ⁴		3
Electives		
Select sufficient electives to bring total credits to 120, including 48 upper-division credits.		81
Total Credits		120

¹ Should be taken in junior year after consultation with advisor. Course prerequisite is ENGL 311G Advanced Composition.

² No more than nine upper division credits (with exception of HIST 398 Historians and History) may be from any particular field of History. Students may count additional credits in a particular field of History if they pass more than the minimal number of required upper division credits for the degree.

³ **Majors must pass a total of 18 upper division History credits** (not including HIST 311V Colonial Latin America, HIST 312V Modern Latin America, and HIST 398 Historians and History) with at least 6 at the 400 level.

⁴ Please see College of Arts and Sciences (p. 176) pages for discussion of the ways to pass this requirement.

Secondary Licensure

History majors who are planning on pursuing certification as public school teachers should take the following six courses in preparation. These six courses will complete approximately half of the course work necessary for students to earn teaching licensure in New Mexico. After completing the undergraduate degree in History with a grade point average of 2.5 or above, the student should apply to the Graduate School for admission to the Department of Curriculum and Instruction and the Teacher Education Program in the College of Education to pursue the remaining courses needed to complete secondary licensure.

Required Courses

EDUC 315	Multicultural Education	3
EDLT 368	Integrating Technology with Teaching	3
SPED 350	Introduction to Special Education in a Diverse Society	3
EDUC 381	Secondary Field Experience	3
EDUC 530	Exploration in Education ¹	3
Total Credits		15

¹ Recommended for senior year or as a graduate student.

History - Graduate Minor

Students may earn a graduate minor in History by passing the following courses:

Craft of History	3
Select one from the following:	3
HIST 590 Reading Seminar: Borders, Boundaries and Frontiers	
HIST 591 Reading Seminar: Modernity and its Discontents	
HIST 592 Reading Seminar: Nature and Society	
HIST 593 Reading Seminar: History, Myth and Memory	
Select two additional 3-credit 500-level and above courses	6
Total Credits	12

Graduate students in History must maintain a 3.0 grade point average in their History courses. A graduate student earning a C or lower grade in one History course will receive a letter of warning. A graduate student earning two or more C or lower grades in History courses or whose History grade point average falls below 3.0 will be removed from the History graduate program. Students must earn at least one B or higher grade in a seminar during their first year in the graduate program, and must take at least one seminar during each year in which they are enrolled in the program. If a graduate student receives one U (Unsatisfactory) grade on his/her thesis or internship, the student will receive a written warning, and if a student received two or more U grades on his/her thesis or internship, the student will be removed from the program.

History - Master of Arts

Thesis Program

Thirty-six credits (27 of which must be at the 500 level) are required for the thesis program:

Select at least 3 credits from Public History courses above the 500 level	3
Select four History Graduate Seminars including the following:	
Craft of History seminar	3
Select two from the following:	6
HIST 590 Reading Seminar: Borders, Boundaries and Frontiers	
HIST 591 Reading Seminar: Modernity and its Discontents	
HIST 592 Reading Seminar: Nature and Society	
HIST 593 Reading Seminar: History, Myth and Memory	
HIST 596 Research Seminar	3
Select a maximum of 6 credits in related fields outside the Department of History ¹	6
Select 9 credits at the 500-level or above in the Department of History	9
HIST 599 Master's Thesis	6
Total Credits	36

¹ With permission of the graduate advisor, a maximum of 6 credits may be taken in related fields from courses numbered 450 and above outside the Department of History.

A student choosing the thesis program must receive permission for his/her thesis by passing a thesis proposal defense after earning 12 graduate credits in History. The department will provide guidelines for the thesis defense. A student choosing the thesis program must pass a final oral examination over graduate course work and the thesis. All graduate students will be required to present a research paper in a public forum approved by the department's Graduate Director.

Public History Concentration

Thirty-six credits (27 of which must be at the 500 level) are required for the Public History concentration:

Select four History Graduate Seminars including the following:	
Public History Seminar	3
Craft of History Seminar	3
Research Seminar	3
Select one from the following:	3
HIST 590 Reading Seminar: Borders, Boundaries and Frontiers	
HIST 591 Reading Seminar: Modernity and its Discontents	
HIST 592 Reading Seminar: Nature and Society	
HIST 593 Reading Seminar: History, Myth and Memory	
HIST 585 Public History Internship	3
Select a maximum of 9 credits (450-and above) outside the Department of History ²	9
Preparation of an article of scholarly quality	3
Select 9 credits from courses numbered 500 and above in the Department of History	9
Total Credits	36

² with permission of the Director of the Public History Program

Students in the Public History concentration must collectively pass 18 credits of nonpublic history courses, including the nonpublic history seminars noted above. They must collectively pass 18 credits in public history, which must include the public history seminar, the internship, and the article. The scholarly article is developed through work in the internship and will be of peer reviewed journal quality. The public history credits may include a maximum of 9 graduate level (450 -and-above) credits outside the Department of History with permission of the Director of the Public History Program. A student choosing the Public History concentration must pass an article proposal defense about the proposed scholarly article during the first semester after completion of the internship. The department will provide guidelines for the article defense. A student choosing the Public History specialization must give a public presentation of a portfolio that includes his/her work and the scholarly article, and must pass an oral examination over graduate course work, the internship, and the article. Students who receive a Master's degree in this track will have a specialization in Public History added to their transcripts.

Dual Track M.A. (Public History AND Thesis)

Students choosing to pursue both the thesis track and Public History concentration must complete the course hours required for the public history concentration, perform an internship, and defend the proposed thesis before undertaking it using guidelines provided by the department, present the public history portfolio at a public presentation, complete the thesis, and defend their course work, thesis and public history portfolio at a final oral examination. In order to satisfactorily complete both programs, such students would complete 39 credits, including three hours of internship credit and six hours of thesis work.

Select four History Graduate Seminars including the following:

Public History Seminar	3
Craft of History Seminar	3
Research Seminar	3
Select one from the following:	3

HIST 590	Reading Seminar: Borders, Boundaries and Frontiers	
HIST 591	Reading Seminar: Modernity and its Discontents	
HIST 592	Reading Seminar: Nature and Society	
HIST 593	Reading Seminar: History, Myth and Memory	
HIST 585	Public History Internship	3
Select a maximum of 9 credits (450-and above) outside the Department of History ²		9
Preparation of an article of scholarly quality		3
Select 3 credits at the 500 level from courses in the Department of History		3
HIST 599	Master's Thesis	6

Total Credits 36

History - Undergraduate Minor

A student may not earn both a bachelor's degree in the Department of History and a minor in History.

Requirements

Select two from the following:		6
HIST 101G	Roots of Modern Europe	
HIST 102G	Modern Europe	
HIST 111G	Global History to 1500	
HIST 112G	Global History Since 1500	
HIST 201G	Introduction to Early American History	
HIST 202G	Introduction to Recent American History	
HIST 211G	East Asia to 1600	
HIST 212G	East Asia since 1600	
HIST 221G	Islamic Civilizations to 1800	
HIST 222G	Islamic Civilizations since 1800	
Select 12 credits in History (at least 9 credits are numbered 300 and above)		12
Total Credits		18

Note: All courses must be passed with grades of C- or above. No courses may be taken S/U.

Public History and Public Administration - Dual M.A. Degree

The Department of History and the Department of Government offer a dual degree in which students who are accepted into both of these programs may simultaneously earn both a Master of Arts in History degree with the Public History specialization, and a Master of Public Administration degree. The dual degree requires 57 total credits, while students who pursued both degrees as separate degrees would need to pass at least 72 credits. Students earning the dual degrees must pass a joint oral examination after passing required courses and completing internship credits in both programs. Students interested in the dual degree program should consult with the Director of the Public History Program and the Director of the Master of Public Administration Program.

Interdisciplinary Studies Undergraduate Program Information

The Interdisciplinary Studies Department extends New Mexico State University's reach beyond traditional academic programs to provide educational opportunities for students to meet their academic, professional and personal learning goals. The Interdisciplinary Studies Department offers flexible degree programs in the **Bachelor of Applied Studies** and the **Bachelor of Individualized Studies**, giving students the opportunity to develop their own interdisciplinary studies program, appropriate to their unique educational and career goals.

The Interdisciplinary Studies Department also offers a **Bachelor of Arts in Gender & Sexuality Studies** and an **Undergraduate Minor in Gender & Sexuality Studies**. The Gender & Sexuality Studies Program at NMSU is an interdisciplinary program focusing on the study of women, gender and sexuality in a global context. Classes in Gender & Sexuality Studies focus on women, gender and other categorical differences, multicultural learning, critical thinking and the integration of theory and practice.

The Interdisciplinary Studies Department offers a new **Undergraduate Minor in International Studies**, an interdisciplinary program enabling students, regardless of their major area of study, to develop a broad understanding of the rapidly changing global environment by proving a curriculum that encompasses the social, political, cultural and economic forces at work in an increasingly interdependent world.

Minors Recommended for BAS & BIS Majors. Students seeking a Bachelor of Applied Studies or the Bachelor of Individualized Studies degree are encouraged to complete one or more minors offered through various NMSU colleges. A minor is designated on a transcript and consists of a minimum of 18 credits, nine of which must be upper-division. Courses required to complete a minor may be in a single department or interdepartmental, are offered through various NMSU colleges, and are subject to availability. Students seeking to complete a minor must have the minor verified, prior to graduation, by the college academic department administering the minor. Specific requirements for minors may be obtained from the academic department administering a specific minor, the academic department's college dean's office, and in the college departmental listings of this catalog. *Note:* The College of

Business allows *only* the Business Administration minor for BAS and BIS majors.

Degrees for the Department

Applied Studies - Bachelor of Applied Studies (p. 333)

Gender & Sexuality Studies - Bachelor of Arts (p. 333)

Individualized Studies - Bachelor of Individualized Studies (p. 334)

Minor for the Department

Gender & Sexuality Studies - Undergraduate Minor (p. 334)

Gender & Sexuality Studies - Graduate Minor (p. 334)

International Studies - Undergraduate Minor (p. 335)

Professor, Patti Wojahn, Department Head

Professor, Laura A. Williams, Gender & Sexuality Studies Program Director

Professors C. Bejarano, J. Maupin, P. Wojahn; **Associate Professors** M. Hamzeh, M.C. Jonet; **Assistant Professor** L. Williams

W S 201G. Introduction to Women's Studies

3 Credits

Analysis of the status of women in society today and history and consequences of gender stratification and inequality from the perspectives of sociology, anthropology, psychology, political science, and other sciences.

W S 202G. Representing Women Across Cultures

3 Credits

Historical and critical examination of women's contributions to the humanities, with emphasis on the issues of representation that have contributed to exclusion and marginalization of women and their achievements. Crosslisted with: HON 218

W S 273. Sex and Gender

3 Credits

Same as SOC 273.

W S 316. History of Women in the American West

3 Credits

Experiences and interactions among Native American, Spanish/Mexican, immigrant, and Anglo-American women in the American West from 1500 to the present. Same as HIST 316.

W S 325. Topics in Feminist Philosophy

3 Credits

Same as PHIL 325.

W S 345. Victimology

3 Credits

Same as C J 345.

W S 350. Special Topics

3 Credits

The topic of course will vary and will be indicated by subtitle. May be cross-listed with relevant courses at the 300-level from any specific department. May be repeated under different subtitle(s).

W S 356. Women and Politics

3 Credits

Political socialization of children; women's past and present participation in the public sphere; gender-related public policy issues.

W S 357. Gender and Society

3 Credits

Overview of issues related to gender including how gender is constructed and reproduced in our society. Gender is examined from social psychological and institutional perspectives. Same as SOC 357.

W S 359. Psychology of Women

3 Credits

Same as PSY 359.

W S 360. Masculinities Studies

3 Credits

Explores how contemporary American culture constructs manhood and masculinity. Interrogates ideas and enactments of masculinity, especially as they intersect with race/ethnicity, class, and sexuality. The class asks how sexuality, gender construction, and sex roles inform our understanding of masculinity, as well as how masculinity relates to social power.

W S 374V. Comparative Family Systems

3 Credits

Same as SOC 374V.

W S 380V. Women Writers

3 Credits

Same as ENGL 380V.

W S 381V. Women's Health Issues

3 Credits

Same as HL S 380V.

W S 382. Women in Mass Media

3 Credits

Same as JOUR 380.

W S 388. Women and Europe I

3 Credits

Same as HIST 388.

W S 397. Law and Sex

3 Credits

Sex-based discrimination and the impact of constitutional and statutory provisions and their judicial interpretations and executive orders and implementations. Same as GOVT 397.

W S 401. Women & Immigration

3 Credits (3)

Exploration of experiences of women immigrants as gender, race and class became increasingly important aspects of US immigration policies in the early 19th century. Explores role of gender in today's immigration experience.

W S 402. Transnational Feminisms

3 Credits (3)

Explores dimensions of gender, race, class, and sexuality in conjunction with nationalisms, anti-capitalist struggles, religious fundamentalism, militarism, globalization, eco-critique, and the politics of resistance and social movements.

W S 403. Gender & Horror

3 Credits (3)

Explores cultural anxieties and crises through the genre of horror as they relate to issues of gender, sexuality, feminism, and race. Traces ways horror films represent and reconfigure notions of sexuality and gender and ways they reinforce and/or challenge social norms.

W S 404. Arab-Muslim Feminisms**3 Credits**

Develops a historical understanding of arab-muslim feminisms and homosexuality in Islam. Explores and uses critical feminist theories, language, and methods to counter interlocking discourses of Islamophobia, gendering, and homophobia affecting arab-muslim women.

W S 405. Alternative Genders and Sexualities**3 Credits**

Introduces students to cultural study in the academic fields of Gay, Lesbian, Bisexual, Transgender (GLBT) and Queer Studies. Examines academic texts as well as literature and film from different historical moments and social/ global sites.

W S 406. Women and Human Rights**3 Credits**

Analysis of human rights violations and injustices as they relate to the lives of girls and women. Examines international political, legal, economic and socio-cultural implications of violence that target women and girls. Focusing on different countries, discusses social, political, economic, and human rights.

W S 407. Gender and Graphic Narrative**3 Credits**

Examines graphic novels that disrupt stereotypical ideas about genre, gender, race, class sexuality, as well as common notions about comics. Considers texts that address underrepresented experiences.

W S 408. Food and Representation**3 Credits**

Examines contemporary food writing as a way to study identity, social structures, and notions of acceptability. Explores how constructions of food shape bodies, desires, and notions of belonging.

W S 411. Gender and Migration**3 Credits**

Explores multiple experiences of forced migration and displacement. Examines violence, structural dislocation, neoliberalism, globalization, economic collapse and civil war. Discusses local, regional and global responses to creating meaningful change in communities most affected by migration.

W S 420. Girls, Women and Crime**3 Credits (3)**

Critical social science analysis of concepts of violence and justice as experienced by women impacted by the criminal justice system. Restricted to C J, W S majors. Crosslisted with: C J 420

W S 422. Advanced Study in a Literary Form or Genre**3 Credits**

Same as ENGL 422. May be repeated for a maximum of 6 credits.

W S 433. Women, Gender, and Culture**3 Credits**

Same as ANTH 433.

W S 450. Special Topics**3 Credits**

The topic of course will vary and will be indicated by subtitle. May be cross-listed with relevant courses at the 400-level from any specific department. May be repeated under different subtitle(s).

W S 451. Women's Studies Practicum**3 Credits**

Supervised field work in community setting relating to women. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

W S 453. Women and Politics**3 Credits**

Crosslisted with: GOVT 353

W S 454. Women Crossing Borders**3 Credits**

Experiences of women who cross class, race, cultural, national, or sexual borders including theories regarding women's Interactions across borders. Emphasis will vary with professor and discipline.

W S 455. Feminist Research Methods**3 Credits**

Feminist research practices and methodologies utilized in various disciplines. Definitions of research, what constitutes valid inquiry, how research can be feminist, and what it means to do interdisciplinary work.

W S 459. Advanced Issues in Sex and Gender**3 Credits**

Same as SOC 459.

W S 461. Women s Studies: Independent Study**3 Credits**

Individual study of selected topic and writing of research paper. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

W S 465. Sex, Gender and the Body**3 Credits**

Examines forces at work in defining and differentiating gender, race, sexuality. How ideas about what is 'natural' and 'normal' for men and women shifted over time. Considers different discourses shaping embodied experiences and categories of identity.

Prerequisite(s): None.

W S 468. Global Sexualities**3 Credits**

Generates a global context to focus on sexual identity and orientation, sexual identity politics, romantic relationships, patterns of sexual behavior, sexual regulation and the impact of different cultures on individual sexualities. Taught with W S 568. Crosslisted with: SOC 468

W S 469. Gender and Sexuality in Hispanic Film**3 Credits**

The study of gender and sexual orientation issues in relation to identity as portrayed in Hispanic cinema. Taught in Spanish but assignments accepted in English. Crosslisted with: SPAN 469

W S 471. Seminar in Feminist Theory**3 Credits**

Current feminist theory. Topic changes by semester. Course subtitled in the Schedule of Classes. Prerequisite: None

W S 474. Gender in East Asian History**3 Credits**

Same as HIST 474.

W S 481. Hate Crimes and Hate Groups**3 Credits**

Explores the phenomenon of hate-motivated violence. Examines the hate crime laws, organized hate groups and social theories attempting to explain violent hate.

W S 482. Gender and Popular Culture**3 Credits**

Intensive study of the representations of gender in popular culture. Examines the historical, aesthetic, and cultural contexts of these representation and the various critical and theoretical lenses we use to understand them. Repeatable under different subtitles. May be repeated up to 99 credits.

W S 484. Women's Literature**3 Credits**

Intensive study of literature by women, in particular historical, aesthetic, cultural, or intellectual contexts. Repeatable under different subtitles. Crosslisted with: ENGL 481

W S 501. Advanced Women & Immigration**3 Credits (3)**

Advanced exploration of experiences of women immigrants as gender, race and class became increasingly important aspects of US immigration policies in the early 19th century. Explores role of gender in today's immigration experience.

W S 502. Advanced Transnational Feminisms**3 Credits (3)**

Advanced analysis of dimensions of gender, race, class, and sexuality in conjunction with nationalisms, anti-capitalist struggles, religious fundamentalism, militarism, globalization, eco-critique, and the politics of resistance and social movements.

W S 503. Advanced Gender & Horror**3 Credits (3)**

Advanced analysis of anxieties and crises through the genre of horror as they relate to issues of gender, sexuality, feminism, and race. Traces ways horror films represent and reconfigure notions of sexuality and gender and ways they reinforce and/or challenge social norms.

W S 504. Advanced Arab-Muslim Feminisms**3 Credits**

Advanced study of historical and contemporary arab-muslim feminisms and homosexuality in Islam. Explores and uses critical feminist theories, language, and methods to counter interlocking discourses of Islamophobia, gendering, and homophobia affecting arab-muslim women.

W S 505. Advanced Alternative Genders and Sexualities**3 Credits**

Advanced study of the academic fields of Gay, Lesbian, Bisexual, Transgender (GLBT) and Queer Studies. Examines academic texts as well as literature and film from different historical moments and social/ global sites.

W S 506. Advanced Women and Human Rights**3 Credits**

Advanced analysis of human rights violations and injustices as they relate to the lives of girls and women. Intensive examination of international political, legal, economic and socio-cultural implications of violence that target women and girls. Focusing on different countries, explores social, political, economic, and human rights.

W S 507. Advanced Gender and Graphic Narrative**3 Credits**

Advanced examination of graphic novels that disrupt stereotypical ideas about genre, gender, race, class sexuality, as well as common notions about comics. Considers texts that address underrepresented experiences.

W S 508. ADVANCED FOOD PRESENTATION**3 Credits**

Advanced examination of contemporary food writing as a way to study identity, social structures, and notions of acceptability. Intensive exploration of how constructions of food shape bodies, desires, and notions of belonging.

W S 511. Advanced Gender and Migration**3 Credits**

Advanced exploration of multiple experiences of forced migration and displacement. Intensive examination of violence, structural dislocation, neoliberalism, globalization, economic collapse and civil war. Discusses local, regional and global responses to creating meaningful change in communities most affected by migration.

W S 520. Advanced Girls, Women & Crime**3 Credits (3)**

Advanced critical social science analysis of concepts of violence and justice as experienced by women impacted by the criminal justice system. Crosslisted with: C J 520

W S 522. Graduate Study in a Literary Form or Genre**3 Credits**

Same as ENGL 522.

W S 533. Advanced Issues in Women, Gender, and Culture**3 Credits**

Same as ANTH 533.

W S 545. Advanced Victimology**3 Credits**

Study of the risk factors in crime victimization, the impact of crimes upon victims, and the role of the victim in the criminal justice system, consideration of the impact of criminal justice policy on victim outcomes. Same as CJ 545.

W S 550. Special Topics**3 Credits**

The topic of course will vary and will be indicated by subtitle. May be cross-listed with relevant courses at the 500-level from any specific department. May be repeated under different subtitle(s).

W S 554. Advanced Issues in Women Crossing Borders**3 Credits**

Experiences of women who cross class, race, cultural, national, or sexual borders including theories regarding women's interactions across borders.

W S 555. Advanced Feminist Research Methods**3 Credits**

Advanced feminist research practices and methodologies utilized in various disciplines. Definitions of research, what constitutes valid inquiry, how research can be feminist, and what it means to do interdisciplinary work.

W S 561. Independent Graduate Research in Women's Studies**3 Credits**

Individual study of selected topics and writing of a research paper. May be repeated for a maximum of 6 credits. Graded S/U.

Prerequisite: consent of instructor.

W S 565. Advanced Sex, Gender & the Body**3 Credits (3)**

Advanced examination of forces at work in defining and differentiating gender, race, sexuality. How ideas about what is 'natural' and 'normal' for men and women shifted over time. Considers different discourses shaping embodied experiences and categories of identity.

W S 567. Global Sexualities**3 Credits**

Generates a global context to focus on sexual identity and orientation, sexual identity politics, romantic relationships, patterns of sexual behavior, sexual regulation and the impact of different cultures on individual sexualities. Taught with W S 468. Crosslisted with: SOC 568

W S 569. Gender and Sexuality in Hispanic Film**3 Credits**

The study of gender and sexual orientation issues in relation to identity as portrayed in Hispanic cinema. Taught in Spanish but assignments are accepted in English. Crosslisted with: SPAN 569

W S 571. Advanced Seminar in Feminist Theory**3 Credits**

Current feminist theory. Topic changes by semester. Course subtitled in the Schedule of Classes.

W S 574. Gender in East Asian History**3 Credits**

Same as HIST 474 with differentiated assignments for graduate students. Required for graduate credit.

W S 582. Gender and Popular Culture**3 Credits**

Intensive study of the representations of gender in popular culture. Examines the historical, aesthetic, and cultural contexts of these representation and the various critical and theoretical lenses we use to understand them. Repeatable under different subtitles. Crosslisted with: ENGL 582

W S 584. Women's Literature**3 Credits**

Intensive study of literature by women, in particular historical, aesthetic, cultural, or intellectual contexts. Repeatable under different subtitles. Crosslisted with: ENGL 581

Applied Studies - Bachelor of Applied Studies

The Bachelor of Applied Studies (BAS) degree promotes the mission and purpose of NMSU by making available flexible degree options and by providing a pathway of study for community college graduates with technical and applied degrees from an accredited institution. The BAS degree helps minimize credit loss for associate degree graduates when pursuing a baccalaureate degree at NMSU. The student population targeted for this program differs significantly from traditional degree programs at NMSU. The BAS offers opportunity for current and prospective students, and welcomes those employed full-time, completing their upper division coursework at a distance, veterans, active duty military personnel or active duty family, transfers from other institutions or returning to college after time away.

To Declare a BAS

Students entering the BAS program are required to:

- Have an Associate of Applied Science or a similar degree from a regionally accredited institution
- Have completed the English and Mathematics Basic Skills Requirements of NMSU (see Regulations - Basic Academic Skills (p. 53))
- Declare the BAS degree by the last date to drop with a "W" in a student's final semester of study (see the NMSU Academic Calendar for date)

Degree Requirements

- Complete the total number of credits as determined by your academic advisor (*Note: a maximum of 30 credit hours in course subjects offered by the NMSU College of Business may be counted towards the degree.*)
- Pass all courses approved with a grade of C- or higher

To graduate from the Bachelor of Applied Studies program, you must:

- Complete a minimum of 120 credit hours (or more, depending on your program of study)
- Complete a minimum of 48 credit hours of upper-division courses (300-499 level) including six hours of Viewing a Wider World from two separate colleges at NMSU
- Complete a minimum of 36 upper-division credit hours beyond General Education Core requirements with a grade of C- or better
- Complete the university's general education core requirements (at least 35 credit hours of approved New Mexico Common Core courses)
- Not have completed the requirements, or be a candidate, for another baccalaureate degree

Gender and Sexuality Studies - Bachelor of Arts

Note: Women's Studies has changed its name to Gender & Sexuality Studies. Its course prefix (W S) remains the same but will soon change to the prefix GNDR. Many course titles will be changing as well to reflect the broader focus on genders and sexualities.

Gender & Sexuality Studies is an interdisciplinary program focusing on the study of women, gender and sexuality in a global context from multiple disciplinary perspectives. Classes in Gender & Sexuality Studies explore the relations, practices, theories, and institutions concerning gender and other interesting categories of identity and difference. The Gender & Sexuality Studies Program also works collaboratively with other academic units to cross-list a range of courses. The benefits of a Gender & Sexuality Studies degree include strong critical-thinking and analytical skills developed in a student-centered environment that encourages independent thought; as well as insights into questions of gender, sexuality, race and ethnicity, class, ability, nation and power. Graduates of Gender & Sexuality Studies find successful careers in a range of fields including the advocacy, arts, business, counseling, education, health care, media, politics and law, social work, psychology and sports. The Gender & Sexuality Studies program offers a major and a minor, described below.

Degree requirements for the major include

- 9 credit hours of required Gender & Sexuality Studies courses;

- 9 credit hours of Gender & Sexuality Studies electives; and
- 18 credit hours from a number of cross-listed courses offered both by Gender & Sexuality Studies and by other programs/departments.
- The total credit hour requirement for the major is 36 credit hours with 21 hours at the upper division level. All requirements must be completed with a grade of C- or higher.

Required Core Courses

W S 201G	Introduction to Women's Studies	3
or W S 202G	Representing Women Across Cultures	
W S 455	Feminist Research Methods	3
or W S 465	Sex, Gender and the Body	
W S 471	Seminar in Feminist Theory	3

Electives

Select three from the following:		9
W S 401	Women & Immigration	
W S 402	Transnational Feminisms	
W S 403	Gender & Horror	
W S 450	Special Topics	
W S 454	Women Crossing Borders	
Electives from upper division W S and cross-listed courses		18
Total Credits		36

Gender and Sexuality Studies - Graduate Minor

Gender & Sexuality focuses on the intersectional study of women, gender, race, sexuality, and other categories of identity and difference in national and global contexts. The Gender and Sexuality Studies minor complements other graduate programs such as Anthropology, Art, Communication Studies, Criminal Justice, Education, English, Government, History, Psychology, Public Health Sciences, Social Work, Sociology, and many others.

The purpose of the Gender and Sexuality Studies Minor is to:

1. Enable students to develop a documented emphasis of their academic training in the field of Gender and Sexuality studies.
2. Develop specialized knowledge through the interdisciplinary curriculum offered by Gender and Sexuality Studies.
3. Explore how gender and sexuality functions within societies.
4. Apply and integrate ideas and knowledge about the intersectional study of gender and sexuality into diverse academic fields.

Master's and Doctoral minor candidates:

Required Core Course

W S 571	Advanced Seminar in Feminist Theory	3
---------	-------------------------------------	---

For a Master's Degree minor candidate:

6 additional credit hours from upper level Gender & Sexuality Studies courses or courses cross-listed with Women's Studies and other departments/programs are required. (9 credit hours total)

For a Doctoral Degree minor candidate:

9 additional credit hours from upper level Gender & Sexuality Studies courses or courses cross-listed with Women's Studies and other departments/programs are required. (12 credit hours total)

Gender and Sexuality Studies - Undergraduate Minor

A minor in Gender & Sexuality Studies consists of 18 credit hours of approved course work in Gender & Sexuality Studies of which at least 12 are upper division (300 level or above).

Required Core Courses

W S 201G	Introduction to Women's Studies	3
or W S 202G	Representing Women Across Cultures	

Select one from the following: 3

W S 471	Seminar in Feminist Theory	
W S 402	Transnational Feminisms	
W S 455	Feminist Research Methods	
W S 465	Sex, Gender and the Body	

Select 12 credits from the following: 12

W S 401	Women & Immigration	
W S 402	Transnational Feminisms	
W S 403	Gender & Horror	
W S 450	Special Topics	
W S 454	Women Crossing Borders	

Total Credits 18

Note: A student may not earn a bachelor's degree in Gender & Sexuality Studies and also earn a minor in Gender & Sexuality Studies.

Individualized Studies - Bachelor of Individualized Studies

The Bachelor of Individualized Studies (BIS) prepares students for 21st century challenges. The degree was created to serve students desiring an academic degree not already offered at NMSU. Students served by the BIS are those with extensive, comprehensive or eclectic academic and career interests. Self-motivated and self-directed students work closely with an advisor to select classes each semester with the intent of graduating in a timely manner. Recommended and chosen courses should be organized to meet the unique educational needs of the student, be it professional advancement within an existing career, academic preparation for graduate or professional programs, designing a strategy for career change or efficiently utilizing prior university credits to complete a Bachelor Degree.

A well-designed individualized curriculum emphasizes the value of approaching complex issues from multiple perspectives, equipping students with the requisite critical and analytical skills to become effective problem solvers in their chosen field of study or career. Each student should select courses designed to integrate academic and career goals into a cohesive degree program.

Extensive flexibility in program design implies increased individual responsibility for the BIS student. BIS students must be active

participants in their academic experience, simultaneously pursuing a skill-set demonstrating:

- Coherent expression of ideas in writing;
- Capacity to conduct systematic and objective inquiry within their program of study;
- Ability to tolerate ambiguity within the design and implementation of a program of study;
- Proactive communication with the academic advisor;
- Commitment to effective follow-through on tasks related to program of study design and implementation.

To Declare a BIS

Students entering the BIS degree program work in consultation with a BIS advisor and complete a series of courses building on the applicant's existing coursework and complementing the applicant's education or career goals.

Deadline for Declaring BIS Major: Students must declare the BIS degree by the last date to drop with a "W" in a student's final semester of study (see *NMSU Academic Calendar* for date).

Degree Requirements

- Complete the total number of credits as determined by your academic advisor and reflected in your Program of Study. (*Note: a maximum of 30 credit hours in courses offered by the NMSU College of Business may be counted towards the degree, inclusive of courses used to satisfy NMSU General Education Core Requirements*)
- Complete a minimum of 120 credit hours. (*Note: total credits earned may exceed 120 dependent upon the developed Program of Study*).
- Complete a minimum of 48 credit hours of upper-division courses (courses numbered 300 – 499) including six credit hours of Viewing a Wider World curriculum from two separate colleges at NMSU.
- Complete a minimum of 36 upper-division credit hours beyond the NMSU General Education Core Requirements with a grade of C- or better.
- Complete the University's General Education Core Requirements (*minimum of 35 credit hours of approved New Mexico Common Core courses*).
- Student may not have completed the requirements, or be a candidate, for another baccalaureate degree at NMSU.

International Studies - Undergraduate Minor

A minor in International Studies consists of 18 credit hours of approved interdisciplinary course work of which at least 12 are upper division (300 level or above). No more than 3 credits of Independent Study may be applied to the minor and only 2 courses (6 credits) may be double counted with the course of the student's major(s). Students must maintain a minimum 2.5 GPA.

Required Coursework

Introductory Course:

Journalism and Mass Communications

Undergraduate Program Information

Studies in Journalism and Mass Communications prepares students for careers in mass media, including news/editorial (print and online), broadcasting, advertising, public relations and photojournalism. Students study these disciplines and learn the trends and changes in the industry, such as how they converge on the internet. The curriculum emphasizes the skills of gathering, evaluating and disseminating information and related skills. Students also are instructed in the theory, law, history and professional guidelines of mass media.

Degrees for the Department

Journalism and Mass Communications - Bachelor of Arts (p. 338)

Minors for the Department

Journalism and Mass Communications - Undergraduate Minor (p. 339)

Professor, Chung, Department Head

Associate Professors Berman, Lamonica, Mellen (<http://web.nmsu.edu/~rpmellen>); **Assistant Professor** Cardenas, Phillips; **College Assistant Professor** Miller, Perez; **Professor Emeritus** McCleneghan, Thayer
Instructors Faivre, B. Page, Porter, Tallman; **News22 Director** Miller; **Spanish News22 Director** Perez

JOUR 102. Grammar for Journalists 2 Credits

Instruction of basic grammar, spelling and punctuation. Required for all journalism students with an ACT English score below 25, SAT Verbal below 570, or students who have not taken ACT/SAT tests. Restricted to Las Cruces campus only.

JOUR 105G. Media and Society 3 Credits

Functions and organization of the mass media system in the United States; power of the mass media to affect knowledge, opinions, and social values; and the impact of new technologies.

JOUR 110. Introduction to Mass Media Writing 3 Credits (2+2P)

Preparation of copy for broadcasting, print, advertising, and public relations. Introduction to Web applications. Restricted to Las Cruces campus only.

Prerequisite(s): JOUR 102 or ACT score of 25 and above or SAT score of 570 and above.

JOUR 201. Introduction to Multimedia 3 Credits

Provide students with the basic skills to produce multimedia packages using text, photos, audio and video, as well as social media for professional purposes. Intensive hands-on class using editing software such as Adobe Premiere, Adobe Audition and Photoshop. May be repeated up to 3 credits.

Prerequisite(s): JOUR 110 or Consent.

JOUR 210. Newswriting for Print and Internet 3 Credits (2+2P)

Intensive laboratory practice in writing news for print media as well as Internet news sites. Restricted to Las Cruces campus only.

Prerequisite(s): JOUR 102 or ACT score of 25 and above or SAT score of 570 and above and JOUR 110.

JOUR 300. Introduction to Advertising 3 Credits

Role of IMC (integrated marketing communications) in marketing of goods, services, and organizations. Creative process, strategic planning media, message design, consumer behavior, and social issues of IMC.

JOUR 302. Video Production 3 Credits

Classroom instruction on basic studio and single camera video productions, with focus on practical aspects of news production. Lab experience in camera basics, studio functions and digital video editing. Includes practical experience through crew assignments on the live student-produced newscast, News22, which airs on KRWG-TV, a PBS affiliate station. May be repeated up to 3 credits.

JOUR 306. Feature Writing for magazines and Newspapers 3 Credits

The preparation of feature stories for newspapers and magazines. How to develop a variety of stories, research topics, interview sources, polish writing and market work. May be repeated for a maximum of 6 credits.

Prerequisite(s): JOUR 210 or consent of instructor.

JOUR 310. Intermediate Print Reporting 3 Credits

News writing and field reporting for print and Web applications. Instruction in community coverage, reporter responsibility, ethics and news values.

Prerequisite(s): JOUR 210.

JOUR 312. Advertising/Copywriting 3 Credits

Creative process, strategic thinking, and principles of advertising in execution of copy, storyboards, and layouts for clients.

Prerequisite(s): JOUR 110 or consent.

JOUR 314. Broadcast Reporting**3 Credits**

Writing, editing, producing, announcing and reporting of TV and radio news. May be repeated up to 3 credits.

Prerequisite(s): JOUR 210 or Consent of Instructor.

JOUR 315. News 22**1-3 Credits (1-3)**

Write, report, produce, anchor, shoot and edit video for live student television newscast airing on KRWG, public television for Southern New Mexico sports, weather, and news.

Prerequisite(s): JOUR 314 or JOUR 330 or instructor consent.

JOUR 317. News Editing**3 Credits**

Extensive, directed practice in various aspects of computer editing for printed publication. Headline writing, copy editing, design, and layout.

Prerequisite(s): JOUR 210.

JOUR 319. Intro Photography**3 Credits**

Introduction to photography emphasizing composition, basic camera technique, language of photography and storytelling. Photojournalism emphasis. Basic camera and processing techniques and skills. May be repeated up to 3 credits.

JOUR 320. Photojournalism**3 Credits**

Communication photography for magazine, news, advertising/public relations and other communication needs. Digital Photography, lighting techniques, photo-editing software, and web site skills. Students provide camera and flash. May be repeated up to 3 credits.

Prerequisite(s): JOUR 319 or Consent of instructor.

JOUR 321. Media Graphic Design**3 Credits**

Concepts and design skills useful for all aspects of journalism - print media and newsletters, basics of Photoshop and introduction to Web design. May be repeated up to 3 credits.

JOUR 330. Electronic News Gathering**3 Credits (2+4P)**

Overview of technical and aesthetic skills and journalism basics needed for shooting and editing on-location news productions. Single camera videography and nonlinear/digital editing.

Prerequisite(s): JOUR 302 or permission of instructor.

JOUR 350. History of Mass Media**3 Credits**

Historical overview of mass media with emphasis on roots of journalism, technological developments, and American role in international media.

JOUR 374. Principles of Public Relations**3 Credits**

Introduction to public relations as a communication process that builds relationships between organizations and their publics. Explores basic techniques, strategies, and tactics used in businesses, nonprofits, and in government.

Prerequisite(s): JOUR 110.

JOUR 377V. Mass Media Ethics**3 Credits**

Philosophical and moral examination of problems relating to mass media. Use of case study method to analyze media situations; development of framework for media professionalism.

JOUR 380. Women and the Mass Media**3 Credits**

Portrayal and participation of women in mass media from colonial to contemporary times. Same as W S 450.

JOUR 399. New Mexico Law**3 Credits**

Same as C J 399, GOVT 399, HIST 399, and SOC 399.

JOUR 407. Media Internship**3 Credits**

Paid supervised work with a mass communications organization. Students who take JOUR 407 may not take JOUR 408.

Prerequisite: consent of internship coordinator.

JOUR 408. Media Practicum**1-3 Credits**

Unpaid supervised work with a mass communications organization. May be repeated for a maximum of 3 credits.

Prerequisite: consent of internship coordinator.

JOUR 412. Documentary Photojournalism**3 Credits**

Production of documentary photography for web, print, books and exhibition emphasizing storytelling techniques. Multimedia and Web site techniques. Field Trips to produce material for the Small Village New Mexico project (SVNM). Produce Term projectbook. May be repeated up to 3 credits.

Prerequisite(s): JOUR 319.

JOUR 414. RTV Scriptwriting/Performance**3 Credits**

Writing and delivery of news scripts for radio and television. Focus on anchoring announcing, voice technique and performance.

Prerequisite(s): JOUR 314 or consent of instructor.

JOUR 423. Advanced Digital Reporting**3 Credits**

Advanced in-depth news reporting techniques utilizing multimedia and reliable sources. Internet publishing of professional quality journalism. Preparation of professional resumes and news clippings. May be repeated up to 3 credits.

Prerequisite(s): JOUR 310 or 306 or consent of instructor.

JOUR 425. Media Planning and Buying**3 Credits**

Covers the principles of media planning for an IMC campaign and procedures for purchasing ad time or space.

Prerequisite(s): JOUR 300 or consent of instructor.

JOUR 427. Multimedia Publishing**3 Credits**

Writing-based course stresses the online telling of a story in many ways: text, photography, slide shows, audio and video news gathering, editing and posting.

Prerequisite(s): JOUR 201.

JOUR 460. Public Relations Promotion in Sports**3 Credits**

Examination of sports as a business and how public relations promotion is executed in professional sports franchises.

JOUR 476. Public Relations Campaigns**3 Credits**

Utilizing the principles and techniques of public relations to research and develop a comprehensive plan for a long-term national, regional, or local campaign. May be repeated up to 3 credits. Restricted to: Restricted to Journalism majors.

Prerequisite(s): JOUR 210, JOUR 374.

JOUR 484. Public Opinion**3 Credits**

Seminar on forces which help form public opinion; individual projects in attitude measurement; measuring effectiveness of mass communication.

JOUR 489. Mass Media Research**3 Credits**

Examination of the role of empirical research in solving mass communication problems. Survey techniques, field studies, content analysis, data analysis.

JOUR 490. Advertising Campaigns**3 Credits**

Capstone course utilizing all previous instruction to create and develop plans for a long-term national or local IMC (Integrated Marketing Communications) campaign. Consent of instructor required.

Prerequisite(s): JOUR 300 and 312 or consent of instructor.

JOUR 493. Mass Communications Law**3 Credits**

Examination of legal issues relating to mass media in the United States. Invasion of privacy, libel, sedition, copyright, and advertising regulation. Same as COMM 493, GOVT 493.

JOUR 494. Special Topics**3 Credits**

Specific subjects to be announced in the Schedule of Classes.

JOUR 495. Mass Communication Theory**3 Credits**

Theoretical approaches to mass communications. Examination of media effects, audiences, media socialization.

JOUR 499. Independent Study in Mass Communications**1-3 Credits**

Individual study directed by consenting instructor with prior approval of department head. May be repeated for a maximum of 6 credits.

Prerequisites: 2.5 GPA and consent of instructor.

- JOUR 476 Public Relations Campaigns: capstone class for students specializing in PR;
- JOUR 490 Advertising Campaigns: capstone class for students specializing in advertising.

⁷ Refer to the Arts & Sciences College Degree Requirements (p. 176) for specifics.

Journalism and Mass Communications - Undergraduate Minor

Students may not earn both a Bachelor of Arts in Journalism and Mass Communications and minor in Journalism and Mass Communications.

Required Courses

JOUR 102	Grammar for Journalists ¹	2
JOUR 105G	Media and Society	3
JOUR 110	Introduction to Mass Media Writing	3
JOUR 210	Newswriting for Print and Internet	3
Upper division JOUR courses		9
Total Credits		18

¹ JOUR 102 Grammar for Journalists: for those with ACT English score below 25 or SAT below 570; Note: students must pass JOUR 102 Grammar for Journalists or have an ACT score of 25+ or 570+ SAT score prior to enrolling in JOUR 110 Introduction to Mass Media Writing, and higher writing-based JOUR courses and to earn a Journalism and Mass Communications Minor.

Languages and Linguistics Undergraduate Program Information

Programs of study in the Department of Languages and Linguistics prepare students for a diverse number of professions and provide them with critical skills that compliment many careers in an increasingly interdependent and global marketplace. Students also increase their awareness of the important role language plays in human interaction on individual and global levels.

The major curriculum plans in each language include balanced groups of courses in language, linguistics, literature and culture. Students may choose to major, double major or minor in French, German or Spanish.

College Second Language Requirement

To meet the second language requirement, the student must do one of the following:

- Non-Heritage language speakers should complete the normal language course sequence: 111, 112, 211, 212. Students should enter the sequence at their proficiency level. Heritage language speakers should complete the 113, 213, 214 sequence. Students who successfully complete either SPAN 113 Spanish for Heritage Learners I or SPAN 213 Spanish for Heritage Learners II or SPAN 214 Spanish for Heritage Learners III may not take SPAN 111 Elementary Spanish I, SPAN 112 Elementary Spanish II, SPAN 211 Intermediate Spanish I or SPAN 212 Intermediate Spanish II for credit.
- Challenge the 212 level of Arabic, Chinese, French, German, Japanese, Latin or Spanish, or the 214 level of Portuguese, or Spanish for Heritage Speakers.
- Obtain college certification of completion of three consecutive years of one second language at the high school level with a grade of C- or higher.
- Obtain, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at New Mexico State

University. The student must demonstrate reading, writing, listening and speaking skills in the language at a minimum of the 212 or equivalent level through examination.

- Obtain certification of a working knowledge of a Native American language from the American Indian program director or as attested by a Native American Elder.
- Pass an upper-division course (numbered 300 or above- does not include directed reading, independent study, practicum or Viewing a Wider World courses) taught in a second language by the Department of Languages and Linguistics.
- Pass C D 476 American Sign Language III with a grade of C- or better
- In the case of a foreign student who is required to take the TOEFL exam, the dean will automatically waive the second language requirement if the student scores 500 or above or the equivalent.
- ESL or English language may not be used to fulfill the language requirement.
- Students should satisfy the language requirement as soon as possible and take the necessary courses in the sequence indicated by the advisor.

Graduate Program Information

The Department of Languages and Linguistics offers a Master of Arts in Spanish, which may be completed through our program on the main campus or completely online. Students are asked to specialize in either linguistics or literature. For non-thesis students, a specialization consists of a minimum of 27 credit hours, for thesis students, a specialization consists of a minimum of 24.

Admission Requirements

Admission requirements include a BA in Spanish. An undergraduate Grade Point Average (GPA) of 3.0 or above, which includes at least 12 semester hours of upper-division undergraduate courses in Spanish with a GPA of at least 3.0. Students must also satisfy general requirements of the Graduate School and submit the proper electronic online application and transcripts at the Graduate School website. Students must also complete a secondary admission packet (also submitted online through the Graduate School electronic application portal), which should include:

- A current resume (C.V.) in Spanish
- Three (3) letters of recommendation from qualified professionals (written within the last six months), preferably from past professors, that address the applicant's academic record.
- A writing sample in Spanish (critical or creative writing texts). If you do not have a six-page paper, you may submit multiple shorter works totaling six pages.
- A Language Evaluation Form (available for download at the departmental website) completed and signed by a qualified language evaluator. If you have an official ACTFL OPI rating certificate, this may be submitted in lieu of the Language Evaluation Form.
- An introductory letter in Spanish to include:
 - A brief biography of one or two paragraphs along with your goals and objectives for obtaining a Master's degree in Spanish
 - A statement of interest in either the residential (on-campus) program or the online program
 - A statement of your prospective area of interest (Linguistics or Literature), and
- Your declaration of interest in being considered for a Graduate Teaching Assistantship (this option is only available for the residential [on-campus] program).

Only completed applications will be reviewed. Again, all materials should be submitted via the Graduate School electronic application portal. No materials should be sent directly to the department. Applying to the program does not guarantee admission to the program. It is the applicant's responsibility to ensure that all materials have been submitted correctly.

Application deadlines: September 15 for admission for the following Spring semester (which begins in January), and January 15 for admission for the following Fall semester (which begins in August). Students will be advised upon their formal acceptance into the program.

Department Requirements for a Minor in French, German, or Spanish

A minor requires 18 hours of course work in the target language.

Degrees for the Department

Foreign Languages - Bachelor of Arts (p. 347)

Chicano Studies - Supplementary Major (p. 347)

Latin American Studies - Supplementary Major (p. 349)

Linguistics - Supplementary Major (p. 350)

Spanish - Master of Arts (p. 350)

Minors for the Department

French - Undergraduate Minor (p. 348)

German - Undergraduate Minor (p. 348)

Linguistics - Undergraduate Minor (p. 350)

Spanish - Undergraduate Minor (p. 352)

Professor, Glenn W. Fetzer, Department Head

Professors Fouillade, Garcia, MacGregor-Mendoza, Pollack; **Associate Professors** Herrera, Waltermire; **Assistant Professors** Deshors, Moreno, Wheeler; **College Professor** Longwell; **College Associate Professor** Buchenau; **College Assistant Professors** Pedersen, Zollner

Longwell, Graduate Director, M.A. (New Mexico State University); J. M. García, Ph.D. (Kansas); S. Herrera, Ph.D. (New Mexico); P. MacGregor-Mendoza, Ph.D. (Illinois- Urbana-Champaign); G. Moreno, Ph.D. (Arizona); B. Pollack, Ph.D. (California-Santa Barbara); M. Waltermire, Ph.D. (New Mexico); E. Wheeler, Ph.D. (California-Santa Barbara)

FREN 111. Elementary French I
4 Credits

French language for beginners.

FREN 112. Elementary French II
4 Credits

French language for beginners.

Prerequisite: C or better in FREN 111.

FREN 211. Intermediate French I**3 Credits**

Speaking, reading and writing.

Prerequisite: C or better in FREN 112.

FREN 212. Intermediate French II**3 Credits**

Speaking, reading and writing.

Prerequisite: C or better in FREN 211.

FREN 306. Topics in French Culture and Civilization**3 Credits**

Selected topics focusing on French culture and civilization. Topics identified in the Schedule of Classes. May be repeated for a maximum of 6 credits.

Prerequisite: FREN 212 or consent of instructor.

FREN 315. French Grammar**3 Credits**

A thorough review of French grammar through the study of grammatical elements and the use of grammatical exercises.

Prerequisite(s): FREN 212 or consent of instructor.

FREN 325. Intermediate Conversation**3 Credits**

French conversation through intensive oral practice with emphasis on vocabulary acquisition and pronunciation.

Prerequisite: FREN 212 or consent of instructor.

FREN 341. Introduction to French Linguistics**3 Credits**

This course aims to introduce the basic concepts of contemporary linguistics and to show how the French language functions in regard to form and meaning.

Prerequisite(s): FREN 212.

FREN 352. French Phonetics**3 Credits**

Systematic description of modern French pronunciation. Corrective exercises for foreign learners. Formal study of spelling/pronunciation relationships.

Prerequisite(s): FREN 212 or consent of instructor.

FREN 360. French Cinema**3 Credits**

The evolution of contemporary French cinema. A critical understanding of film as an art form and as cultural expression.

Prerequisite: FREN 212 or consent of instructor.

FREN 362. Contemporary French Culture**3 Credits**

Institutions, lifestyles and popular attitudes in modern France.

Prerequisite(s): FREN 212 or consent of instructor.

FREN 365V. Perspectives in French Culture**3 Credits**

Examines components of French culture through literature, films and other sources. Taught in English. Does not satisfy Arts and Sciences second language requirement. Does not satisfy French major or minor requirements.

FREN 378. Studies in Francophone Cultures**3 Credits**

Studies of representative Francophone cultures through their history, literature, music and films.

Prerequisite(s): FREN 212 or consent of instructor.

FREN 381. Survey of French Literature I**3 Credits**

Literary movements, authors and selected texts of the Middle Ages through the eighteenth century.

Prerequisite(s): FREN 212 or consent of instructor.

FREN 382. Survey of French Literature II**3 Credits**

Literary movements, authors and selected texts of the nineteenth and twentieth centuries.

Prerequisite(s): FREN 212 or consent of instructor.

FREN 385. French Civilization**3 Credits**

A detailed study of important events in French civilization from its origins to the twentieth century through the study and discussion of history, literature, fine arts and politics.

Prerequisite(s): FREN 212 or consent of instructor.

FREN 386. Contemporary Women Writers in French**3 Credits**

Exploration of literary texts by contemporary women writers in France and the Francophone world; emphasizes the cultural contexts that have defined women's relationship to writing. Selections will vary from year to year.

Prerequisite(s): FREN 212 or consent of instructor.

FREN 425. Advanced French Conversation**3 Credits**

Mastery of spoken French language through discussion of personal readings and group work to develop vocabulary, syntactical and conversational skills. The class is conducted entirely in French.

Prerequisite(s): FREN 325 or consent of instructor.

FREN 449. Special Problems**1-3 Credits**

Directed reading for graduate students in specific field to satisfy language requirement for master's or doctoral programs.

FREN 451. Special Topics in French**1-3 Credits**

Selected topics relating to the cultures or literatures of the countries where French is spoken will be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

FREN 453. Independent Studies in French**1-3 Credits**

Individualized, self-paced projects for advanced students. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

FREN 462. Advanced Contemporary French Culture**3 Credits**

Advanced study of institutions, lifestyles and popular attitudes in modern France. Emphasis on everyday life rather than prestigious monuments in civilizations.

Prerequisite: FREN 212 or consent of instructor.

FREN 466. Introduction to French Linguistics**3 Credits**

This course aims to introduce the basic concepts of contemporary linguistics and to show the French language functions with regard to form and meaning. Consent of instructor required.

Prerequisite(s): Advanced level in French.

FREN 471. The French Novel**3 Credits**

Development of the novel and analysis of selected texts with emphasis on the nineteenth and twentieth centuries.

Prerequisite(s): FREN 212 or consent of instructor.

FREN 472. The French Short Story**3 Credits**

Study and discussion of French short stories through the ages.

Prerequisite(s): FREN 212 or consent of instructor.

FREN 478. Studies in Francophone Cultures Around the World**3 Credits**

Advanced studies of representative Francophone cultures through their history, literature, music and films.

Prerequisite(s): FREN 212 or consent of instructor.

FREN 486. Advanced Contemporary Women Writers in French**3 Credits**

Advanced study of literary texts by contemporary women writers in France and the Francophone world; emphasizes the cultural contexts that have defined women's relationship to writing. Selections will vary from year to year.

Prerequisite(s): FREN 212 or consent of instructor.

SPAN 101. Beginning Spanish Conversation**3 Credits**

Beginning conversation and intensive oral practice for non-degree seeking students, and SPAN 111 and SPAN 112 students who desire additional conversational practice. This course does not count toward the NMSU second language requirement and is not open to native Spanish speakers without permission of instructor. Restricted to: Community colleges.

SPAN 111. Elementary Spanish I**4 Credits (4)**

Spanish for beginners. Speaking and writing common interactions in predictable settings using basic vocabulary and verb tenses. Communicate in Spanish both orally and in writing sufficiently well so as to be able to make yourself understood by native speakers accustomed to dealing with non-native speakers. In spontaneous conversation and in writing, students will be able to produce a few sentences. **Prerequisite(s):** Not open to Spanish-speaking students except by consent of instructor.

Prerequisite: language placement and/or assessment by departmental examination.

SPAN 112. Elementary Spanish II**4 Credits (4)**

Spanish for beginners. Speaking and writing common interactions in predictable settings using basic vocabulary and verb tenses, including talking about events in the past and possible recommendations for the future. Communicate in Spanish both orally and in writing sufficiently well so as to be able to make yourself understood by native speakers accustomed to dealing with non-native speakers. In spontaneous conversation and in writing, students will be able to produce a variety of sentences and form context appropriate to open-ended questions. **Prerequisite(s):** Not open to Spanish-speaking students except by consent of instructor.

Prerequisite: language placement and/or assessment by departmental examination or a C- or better in SPAN 111.

SPAN 113. Spanish for Heritage Learners I**3 Credits**

Emphasis on development of heritage Spanish language skills learned at home and/or in the community. Covers listening comprehension, development of vocabulary and cultural activities to help strengthen heritage language and culture. Students who have previously earned a C or better in SPAN 111 or SPAN 112 may not receive credit for this course.

SPAN 115. Elementary Spanish I for Hotel, Restaurant and Tourism Managers**4 Credits**

Beginning Spanish for HRTM majors only. Will count towards HRTM degree language requirement. Does not count towards language requirement for other majors. Restricted to: Main campus only. Restricted to HRTM majors.

SPAN 211. Intermediate Spanish I**3 Credits (3)**

Speaking, reading and writing. Not open to Spanish-speaking students except by consent of instructor.

Prerequisite: language placement and assessment by departmental examination or C or better in SPAN 112.

SPAN 212. Intermediate Spanish II**3 Credits (3)**

Speaking, reading and writing. Not open to Spanish-speaking students except by consent of instructor.

Prerequisite: language placement and assessment by departmental examination or C or better in SPAN 211.

SPAN 213. Spanish for Heritage Learners II**3 Credits**

Emphasis on development of heritage language skills learned at home and/or in the community. Covers spoken Spanish, reading activities and grammar skills to build on existing knowledge of the language.

SPAN 214. Spanish for Heritage Learners III**3 Credits**

Continued development of heritage Spanish language skills learned at home and/or in the community. Emphasis on reading, writing and critical thinking skills. Review of grammar points will also be stressed in preparation for upper level courses.

SPAN 305. Topics in Hispanic Civilization**3 Credits (3)**

Group study of selected topics focusing on Hispanic culture and civilization. Topics announced in the Schedule of Classes. May be repeated for a maximum of 6 credits.

Prerequisite: SPAN 212 or SPAN 214 or consent of instructor.

SPAN 306. Special Topics**3 Credits**

Group study of Spanish for specialized purposes (e.g. court interpreting, professional language for bilingual teachers, technical writing for the business community). Course subtitled in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite: SPAN 212 or SPAN 214 or consent of instructor.

SPAN 312. Grammar for Heritage/Native Speakers of Spanish**3 Credits**

For students who have been exposed to Spanish at home or in the community. Review of grammatical concepts and analysis of both spoken and written Spanish. Students cannot receive credit for both SPAN 312 and SPAN 313.

Prerequisite(s): SPAN 214 or consent of instructor.

SPAN 313. Spanish Grammar**3 Credits**

A review of the rules of Spanish grammar. Students cannot receive credit for both SPAN 312 and SPAN 313.

Prerequisite: SPAN 212 or SPAN 214 or consent of instructor.

SPAN 314. Spanish Composition**3 Credits**

Development of written Spanish skills. Students cannot receive credit for both SPAN 314 and SPAN 315.

Prerequisite(s): SPAN 312 or SPAN 313.

SPAN 315. Composition for Heritage/Native Speakers of Spanish**3 Credits**

Discussions of history, and current political and cultural topics pertaining to the Hispanic world. Emphasis on development of writing skills in formal Spanish. Students cannot receive credit for both SPAN 314 and SPAN 315. Fulfills departmental requirement for SPAN 314.

Prerequisite(s): SPAN 312 or SPAN 313.

SPAN 325. Advanced Conversation**3 Credits (3)**

Intensive oral practice. Not open to heritage/native speakers of Spanish.

Prerequisite(s): SPAN 212 or consent of instructor.

SPAN 327. Spanish in the Community**3 Credits**

Emphasis on use of Spanish outside the classroom in the local communities. Activities include but are not limited to oral histories, language mentoring in schools, assisting with cultural activities and language research.

Prerequisite(s): Basic communicative fluency in Spanish as determined by departmental advisor.

SPAN 340. Introduction to Spanish Linguistics**3 Credits**

General aspects of Spanish linguistics: traditional, descriptive, historical and dialectal.

Prerequisite(s): SPAN 312 or SPAN 313.

SPAN 350. Introduction to Chicano Studies**3 Credits**

Covers Mexican-American life including language, history, education, politics and literature.

Prerequisite: SPAN 312 or SPAN 313.

SPAN 352. Spanish in Social Contexts**3 Credits**

The study of Spanish in the contexts of the societies in which it is spoken.

Prerequisite: SPAN 312 or SPAN 313.

SPAN 353. Spanglish**3 Credits**

Covers lexical borrowing, code choice, language loss and maintenance, and bilingual cognition.

Prerequisite(s): SPAN 312 or SPAN 313.

SPAN 360. Introduction to Latin American Studies**3 Credits**

Offers an introduction to topics in Latin American Studies including language, culture, literature, history, sociology and anthropology. Course is taught in English. Spanish majors and minors may receive credit towards degree requirements by submitting course work in Spanish (SPAN 312 or SPAN 313 recommended for SPAN majors or minors).

SPAN 361. US-Mexico Border Culture- Literature and /or Culture**3 Credits**

Study of major authors and/or cultural trends in the U.S.-Mexico border. Selected subject to be identified by subtitle in the Schedule of Classes. May be repeated up to 6 credits.

Prerequisite(s): SPAN 312 or SPAN 313.

SPAN 363. US-Hispanic Culture**3 Credits**

Study of major artistic and cultural trends among US-Hispanics. Selected topics to be identified by subtitle in the Schedule of Classes. May be repeated for a total of 6 credits under a different subtitle.

Prerequisite(s): SPAN 312 or SPAN 313.

SPAN 364V. Culture and Civilization of Mexico**3 Credits**

Familiarization with culture, civilization and regions of Mexico. History, geography, art, literature, folklore, customs, economics and politics of each region. Impact of Mexican culture and civilization on the Southwest United States. Taught in English. Does not satisfy Arts and Sciences second language requirement.

SPAN 365V. Culture and Civilization of Spanish America**3 Credits**

Familiarization with culture, civilization and regions of Spanish America. Study of history, geography, art, literature, folklore, customs, economics and politics of each region. Impact of Spanish American culture and civilization on the Southwest United States. Taught in English. Does not satisfy College of Arts and Sciences second language requirement.

SPAN 380. Introduction to Hispanic Literature**3 Credits**

Works in Spanish, all genres and periods. How to read literature in all forms.

Prerequisite: SPAN 312 or SPAN 313.

SPAN 385. Introduction to Chicano/US-Mexican Literature**3 Credits**

Introduction to the study of major works by Chicano/US-Mexican authors.

Prerequisite: SPAN 312 or SPAN 313.

SPAN 388. Contemporary Hispanic Literature**3 Credits**

Study of Peninsular and Spanish-American literature from the 20th century to the present.

Prerequisite(s): SPAN 312 or SPAN 313.

SPAN 393. Introduction to Translation and Interpretation**3 Credits**

General aspects of translation and interpretation from English to Spanish and Spanish to English. Selected subject to be identified by subtitle in the Schedule of Classes. May be repeated up to 6 credits.

Prerequisite(s): SPAN 312 or SPAN 313.

SPAN 399. Independent Studies in Literature, Language, or Culture**1-3 Credits**

Individualized, self-paced projects for advanced students. Students must present formal proposal of study. May be repeated for a maximum of 6 credits.

Prerequisite: SPAN 312 and SPAN 313.

SPAN 410. Mitos y Leyendas Indigenas**3 Credits**

Survey in Spanish language of indigenous poetry, myths and legends from Pre-Columbian times to present.

Prerequisite(s): SPAN 312 or SPAN 313.

SPAN 411. Creative Writing
3 Credits

Creative writing in Spanish.

Prerequisite(s): SPAN 314 or SPAN 315 and SPAN 380.

SPAN 412. Spanish-American Poetry
3 Credits

Study of major works by Spanish-American poets.

Prerequisite: SPAN 312 or SPAN 313.

SPAN 413. Mexican Literature
3 Credits

Study of major works by Mexican authors.

Prerequisite: SPAN 312 or SPAN 313.

SPAN 415. Spanish-American Women Writers
3 Credits

All genres of Spanish-American literature written by women.

Prerequisite: SPAN 312 or SPAN 313.

SPAN 416. Nineteenth Century Spanish-American Literature
3 Credits

Study of major works by Spanish-American authors of the 19th century.

Prerequisite: SPAN 312 or SPAN 313.

SPAN 418. Spanish-American Short Story
3 Credits

Study of major short stories by Spanish-American authors.

Prerequisite: SPAN 312 or SPAN 313.

SPAN 419. Spanish American Drama
3 Credits

Study of major works by Spanish-American dramatists.

Prerequisite(s): SPAN 312 or SPAN 313.

SPAN 420. Hispanic Micro Fiction
3 Credits

Study of micro fiction works by Hispanic Authors and creative writing workshop related to micro fiction.

Prerequisite(s): SPAN 314 or SPAN 315 and SPAN 380.

SPAN 421. Culture and Literature of New Mexico
3 Credits

The study of the development and flourishing of New Mexican culture and literature.

Prerequisite(s): SPAN 312 or SPAN 313.

SPAN 422. Literature of the Mexican Revolution
3 Credits

Study of Mexican authors dealing with the Mexican Revolution.

Prerequisite: SPAN 312 or SPAN 313.

SPAN 424. Post-Modern Hispanic Literature
3 Credits

The study of Post-Modern experimental literary genres, from Post-boom to the present.

Prerequisite(s): SPAN 314 or SPAN 315.

SPAN 425. Conquest, Colonial and Indigenous Literatures
3 Credits

The study of literary and cultural works of the Spaniard Conquest and Latin American Indigenous cultures.

Prerequisite(s): SPAN 314 or SPAN 315.

SPAN 426. Spanish-American Novel
3 Credits

Study of major works by Spanish-American novelists.

Prerequisite: SPAN 312 or SPAN 313.

SPAN 427. Chicano Literature
3 Credits

Study of Chicano/US-Mexican authors.

Prerequisite(s): SPAN 312 or SPAN 313.

SPAN 428. U.S. Latino Culture and Literature
3 Credits

The study of major works by Latino writers in the U.S.

Prerequisite(s): SPAN 312 or SPAN 313.

SPAN 439. Topics in Applied Spanish Linguistics
3 Credits

Group study of selected topics to be identified by subtitle in the Schedule of Classes. May be repeated once under different subtitle for a maximum of 6 credits.

Prerequisite: SPAN 340.

SPAN 445. Dialectos del Espanol
3 Credits

In-depth exploration of Spanish dialects including their formal characteristics, historical formation and regional variation.

Prerequisite(s): SPAN 340 or SPAN 461.

SPAN 447. Hispanic Film
3 Credits

Study of major films from Spain and Spanish-America. Restricted to: Main campus only.

SPAN 448. U.S.-Hispanic Film
3 Credits

Study of major films about and/or by Hispanics of the U.S. Restricted to: Main campus only.

SPAN 449. Special Problems
1-3 Credits

Directed reading for graduate students in their specific fields to satisfy language requirement for master's or doctoral programs. May be repeated for a maximum of 6 credits.

SPAN 450. Mexican Cultures
3 Credits

Different aspects of Mexican Culture. Selected topic to be identified by subtitle in the Schedule of Classes. May be repeated for a total of 6 credits under a different subtitle.

Prerequisite(s): SPAN 312 or SPAN 313.

SPAN 451. Hispanic Cultures
3 Credits

Issues in Hispanic cultures of the U.S., Spanish-America and Spain. Also focuses on U.S.-Mexico border culture. Selected topics to be identified by subtitle in the Schedule of Classes. May be repeated up to 6 credits.

Prerequisite(s): SPAN 314 or SPAN 315.

SPAN 457. Strategies for Teaching Spanish for Heritage/Native Speakers
3 Credits

Overview of the main theories, research, pedagogical approaches, assessment and practice concerning the teaching of Spanish to heritage learners and native speakers. Taught with SPAN 597.

Prerequisite(s): SPAN 314 or SPAN 315.

SPAN 460. Spanish Language Acquisition
3 Credits

Research and theories of acquisition of Spanish as a first or second language.

Prerequisite: LING 200 or SPAN 340, or consent of instructor.

SPAN 461. Introduction to Spanish Phonetics**3 Credits**

An introduction to Spanish phonetics including basic dialectal variation and comparison with English.

Prerequisite: SPAN 340.

SPAN 470. Methods for Teaching Literature to Spanish Heritage Learners**3 Credits**

Current methods for teaching literature to Spanish for Heritage Learners (SHL).

Prerequisite(s): SPAN 314 or SPAN 315 and SPAN 380.

SPAN 490. Special Topics**3 Credits**

Selected topic to be identified by subtitle in the Schedule of Classes. May be repeated up to 6 credits.

Prerequisite(s): SPAN 312 or SPAN 313.

SPAN 491. History of the Spanish Language**3 Credits**

The development of Spanish from its origins.

Prerequisite(s): SPAN 340.

SPAN 492. Structure of Spanish**3 Credits**

Topics in Spanish linguistics including phonology, morphology, syntax and semantics.

Prerequisite(s): SPAN 314 or SPAN 315 or SPAN 340.

SPAN 493. Studies in U.S. Spanish**3 Credits**

Linguistic issues and studies of U.S. Spanish-speaking communities. Taught with SPAN 593.

Prerequisite(s): SPAN 340.

SPAN 500. Methods of Research and Literary Criticism**3 Credits**

Advanced methods of research and literary criticism.

SPAN 507. Technology Enhanced Language Learning**3 Credits**

Strategies for enhancing language learning with emerging technologies. Course is taught in Spanish.

SPAN 508. Teaching Literature with Technology**3 Credits**

Strategies and techniques for enhancing the teaching of all literature genres using emerging technologies. Course is taught in Spanish. Co/

Prerequisite(s): SPAN 507, and/or consent of instructor.

SPAN 509. Teaching Culture with Technology**3 Credits**

Strategies and techniques for enhancing the teaching of culture using emerging technologies. Course is taught in Spanish. Co/

Prerequisite(s): SPAN 507, and/or consent of instructor.

SPAN 510. Assessing the National Standards**3 Credits**

Analysis of the National Standards for Foreign Language Learning (the 5 Cs) in the 21st Century. Course will also cover the Integrated Performance Assessment as applied to the national standards. Other assessments will be reviewed to evaluate effectiveness in all levels of Spanish language classrooms.

SPAN 512. Contemporary Spanish-American Poetry**3 Credits**

Readings and interpretation of Spanish-American poetry from the 20th century to the present.

SPAN 520. Hispanic Micro Fiction**3 Credits**

Advanced study of micro fiction works by Hispanic Authors and creative writing workshop related to micro fiction.

SPAN 521. Advanced Culture and Literature of New Mexico**3 Credits**

The advanced study of the development and flourishing of New Mexican culture and literature.

SPAN 528. Advanced U.S. Latino Culture and Literature**3 Credits**

The advanced study of major works by Latino writers in the U.S.

SPAN 540. Introduccion a la Linguistica**3 Credits**

Introduces students to the foundational topics of linguistic study with particular reference given to the Spanish language: properties of language and communication, morphology, syntax, phonetics, phonology, language variation and change.

Prerequisite(s): Eligibility to take graduate level courses.

SPAN 545. Advanced Dialectos del Espanol**3 Credits**

Advanced research of Spanish dialects including their formal characteristics, historical formation and regional variation.

SPAN 547. Advanced Hispanic Film**3 Credits**

Advanced study of major films from Spain and Spanish-America. Restricted to: Main campus only.

SPAN 548. Advanced U.S.-Hispanic Film**3 Credits**

Advanced study of major films about and/or by Hispanics of the U.S. Restricted to: Main campus only.

SPAN 551. Advanced Hispanic Cultures**3 Credits**

Advanced study on Hispanic cultures of the U.S., Spanish-America and/or Spain. Selected topic to be identified by subtitle. Taught with SPAN 451. May be repeated up to 6 credits.

SPAN 552. Advanced Literature of the Mexican Revolution**3 Credits**

Study of Mexican authors dealing with the Mexican Revolution. Restricted to: Main campus only.

SPAN 555. Advanced Conquest, Colonial and Indigenous Literatures**3 Credits**

The advanced study of literary and cultural works of the Spaniard Conquest and Latin American Indigenous cultures.

SPAN 556. Advanced 19-Century Spanish-American Literature**3 Credits**

Study of major works by Spanish-American authors of the 19th century.

SPAN 558. Bilinguismo**3 Credits**

Examines the topics of bilingualism from a psycholinguistic perspective including the development of the bilingual brain, lexical acquisition, retrieval and storage, and experimental techniques in measuring language competence.

Prerequisite(s): SPAN 540 or consent of instructor.

SPAN 560. Advanced Spanish Language Acquisition**3 Credits**

Advanced research and theories of acquisition of Spanish as a first or second language.

Prerequisite(s): SPAN 540.

SPAN 561. Advanced Spanish Phonetics**3 Credits**

Advanced study of Spanish phonetics, including basic dialectal variation and comparisons with English.

SPAN 562. Advanced Spanish Phonology**3 Credits**

An advanced formal examination of the sound system of Spanish including formal characterizations, dialectal variation and laboratory data.

SPAN 563. Advanced Study in Mexican Literature**3 Credits**

Mexican literature from the Pre-Columbian period to the present.

SPAN 564. Advanced Post-Modern Hispanic Literature**3 Credits**

The advanced study of Post-Modern experimental literary genres, from Post-boom to the present.

SPAN 566. Contemporary Spanish-American Novel**3 Credits**

The Spanish-American novel from the 20th century to the present.

SPAN 567. Advanced Study in Chicano Literature**3 Credits**

Study of all genres of Chicano literature.

SPAN 570. Advanced Study in Technical Translation**3 Credits**

Translation of a variety of non-literary texts from English to Spanish and from Spanish to English. Course is taught in Spanish.

SPAN 573. Advanced Study in Creative Writing**3 Credits**

Advanced creative writing in Spanish.

SPAN 580. Research Methodology in Spanish Linguistics**3 Credits**

Study and practical application of techniques in linguistic research.

SPAN 581. Advanced Hispanic Modernism and Avant-Garde Literature**3 Credits**

The advanced study of major prose works by Latin American Modernist and Avant-Garde authors.

SPAN 583. Advanced Study in Spanish-American Women Writers**3 Credits**

All genres of Spanish-American literature written by women. Research paper required.

Chicano Studies - Supplementary Major

This program consists of 24 credits from the lists below. Advisor: Dr. Spencer R. Herrera, Languages and Linguistics.

Core Requirements

Select three from the following: 9

SPAN 327	Spanish in the Community
SPAN 448	U.S.-Hispanic Film
HIST 367	Mexican-Americans in the United States
HIST 369	History of Latinos in the United States
SOC 470	Sociology of Latinos/as in the United States
SPAN 350	Introduction to Chicano Studies

Culture and Literature

Select two from the following: 6

ART 320	Art and Architecture in Pre-Columbian Meso-America
ENGL 339V	Chicana/o Literature
ENGL 394V	Southwestern Literature
ENGL 458	Latino/a Literature and Culture
SPAN 361	US-Mexico Border Culture- Literature and /or Culture
SPAN 385	Introduction to Chicano/US-Mexican Literature
SPAN 427	Chicano Literature
SPAN 450	Mexican Cultures
SPAN 451	Hispanic Cultures
SPAN 428	U.S. Latino Culture and Literature
SPAN 470	Methods for Teaching Literature to Spanish Heritage Learners

Applicable upper-division honors courses

Applicable upper-division "special topics" courses

Social Studies

Select 6 credits from the following: 6

C J 414	Race, Crime and Justice
C J 451	Border Violence and Justice
GOVT 378	U.S.-Mexico Border Politics
GOVT 399	New Mexico Law
HIST 261	New Mexico History
HIST 369	History of Latinos in the United States
HIST 400	Special Topics
HIST 410	New Mexico History for Educators
SOC 371	Race and Ethnic Relations
SPAN 353	Spanglish
SPAN 361	US-Mexico Border Culture- Literature and /or Culture
SPAN 493	Studies in U.S. Spanish

Applicable upper-division honors courses

Applicable upper-division "special topics" courses

Electives

Select one from the following: 3

ANTH 313	Ancient Mexico
C EP 517	Multicultural Counseling ¹
EDUC 315	Multicultural Education
EDUC 344	Issues in Schooling for Bilingual Learners
ENGL 394V	Southwestern Literature
GEOG 325V	New Mexico and the American West
GOVT 399	New Mexico Law
HIST 311V	Colonial Latin America
HIST 483	Historic Preservation
PHLS 462	Hispanic Health Issues
PHLS 469	U.S.-Mexico Border Health Issues
SPAN 457	Strategies for Teaching Spanish for Heritage/Native Speakers
W S 454	Women Crossing Borders

Total Credits 24

¹ Only with prior written permission of instructor, department head and course dean.

Independent study, honors or special topics courses may be chosen with the approval of the advisor for Supplementary Majors in Chicano Studies, the head of the Department of Languages and Linguistics, and the College of Arts and Sciences. As departments add new courses they may be included in the program.

Foreign Languages - Bachelor of Arts Departmental Requirements for Majors

- Select at least one option: French, Spanish or German
- Complete LING 200G Introduction to Language
- Complete a second language through the 212 level (214 in Portuguese or Spanish for Heritage Speakers)
- Viewing a Wider World courses (FREN 365V Perspectives in French Culture, GER 333V German Culture through Cinema, SPAN 364V Culture and Civilization of Mexico, SPAN 365V Culture and Civilization of Spanish America) do not satisfy requirements for a major in Foreign Languages
- Electives sufficient to bring the total number of credits to 120, including 48 upper-division credits

Departmental Requirements for Double Majors

A double major means a major in a department outside Languages and Linguistics in combination with a major in Foreign Languages. Students with double majors are exempt from LING 200G Introduction to Language and second language requirement.

- Viewing a Wider World courses (FREN 365V Perspectives in French Culture, GER 333V German Culture through Cinema, SPAN 364V Culture and Civilization of Mexico, SPAN 365V Culture and Civilization of Spanish America) do not satisfy the requirement for a double major in Foreign Languages

- Electives sufficient to bring the total number of credits to 120, including 48 upper-division credits

Concentration: French Requirements

24 FREN credits (at least one class each in the following areas):

Requirements	
Language Studies	
Select at least one from the following:	
FREN 315	French Grammar
FREN 325	Intermediate Conversation
FREN 352	French Phonetics

SPAN 447	Hispanic Film	
SPAN 448	U.S.-Hispanic Film	
SPAN 450	Mexican Cultures	
Electives		
Select 6 credits from SPAN 300 or 400 level courses ¹		6
Total Credits		24

¹ SPAN 364V Culture and Civilization of Mexico and SPAN 365V Culture and Civilization of Spanish America do not count, as they are taught in English.

French - Undergraduate Minor

Students must pass at least 18 credits of FREN courses of which at least 12 credits are upper division. Students may not count FREN 111 Elementary French I or FREN 112 Elementary French II, but may count FREN 211 Intermediate French I and/or FREN 212 Intermediate French II. A student whose primary language for a Bachelor of Arts in Foreign Languages is French may not also earn a minor in French.

Required Courses	
One upper division course in French or Francophone Culture	3
One upper division course in French language studies	3
One upper division course in French or Francophone Literature	3
One additional upper-division class in one area above	3
Select 9 additional credits from French courses chosen with the help of an advisor	9
Total Credits	21

German - Undergraduate Minor

Students must pass at least 18 credits of GER courses of which at least 12 credits are upper division. Students may not count GER 111 Elementary German I or GER 112 Elementary German II, but may count GER 211 Intermediate German I and/or GER 212 Intermediate German

II. A students whose primary language for a Bachelor of Arts in Foreign Languages is German may not also earn a minor in German.

Required Courses

Select at least 18 credits of GER courses of which at least 12 credits are upper division	18
---	----

Total Credits	18
---------------	----

Latin American Studies - Supplementary Major

This program consists of 24 credits drawn from the lists below of which 18 credits must be numbered 300 or above. In addition, students must satisfy the College of Arts and Sciences Second Language Requirement. Advisor: Mark Milliorn, Languages and Linguistics.

Options

There are two options based on the section chosen by the student:

Option 1

Concentration in Latin American Language, Culture and Literature (Spanish or Portuguese):

- 12 credits from Section 1
- 12 credits from Section 2, (*Note: No more than 6 credits may be taken in a single department*)

Option 2

Concentration in one major (e.g., history, government, economics, health science, anthropology, sociology) included in Latin American Social Sciences and Art:

- 12 credits in the chosen area of Section 2 (if the major is government, one of these courses may be ECON 325V Economic Development of Latin America)
- 6 credits from another area (or areas) of Section 2
- 6 credits from Section 1

Both options require that the student take at least two Spanish or Portuguese courses above 300-level.

Section 1: Latin American Language, Culture and Literature

Only 3 credits will count.

SPAN 416	Nineteenth Century Spanish-American Literature	3
----------	--	---

SPAN 418	Spanish-American Short Story	3
----------	------------------------------	---

SPAN 419	Spanish American Drama	3
----------	------------------------	---

SPAN 421	Culture and Literature of New Mexico	3
----------	--------------------------------------	---

SPAN 422	Literature of the Mexican Revolution	3
----------	--------------------------------------	---

SPAN 424	Post-Modern Hispanic Literature	3
SPAN 425	Conquest, Colonial and Indigenous Literatures	3
SPAN 426	Spanish-American Novel	3
SPAN 447	Hispanic Film	3

In both sections, independent studies, honors or special topics courses may be chosen with the approval of the Supplementary Major in Latin American Studies advisor, the head of the Department of Languages and Linguistics, and the College of Arts and Sciences. As departments add new courses they may be included in the program.

Linguistics - Supplementary Major

This program consists of 24 credits drawn from the lists below. In addition, students must satisfy the College of Arts and Sciences Second Language Requirement. Advisor: Dr. Patricia MacGregor-Mendoza, Languages and Linguistics.

Core Requirements

LING 200G	Introduction to Language	3
LING 301	Introduction to Psycholinguistics	3
LING 302V	Language and Society	3
LING 303	Exploring Language Systems	3

Electives

Select 12 credits from the following: ¹ 12

ANTH 320	Anthropological Linguistics	
C D 374	American Sign Language I	
C D 375	American Sign Language II	
C D 476	American Sign Language III	
C S 409	Independent Study ²	
C S 471	Programming Language Structure I	
C S 479	Special Topics ²	
COMM 305	Communication Research Methods	
COMM 351	Persuasion Theory and Practice	
COMM 370	Organizational Communication	
COMM 376	Communication and Culture	
COMM 384	Interpersonal Communication	
COMM 440	Political Communication	
COMM 450	Technologies of Human Communication	
COMM 460	Deception and Communication	
COMM 465	Nonverbal Communication	
COMM 475	International Communication	
COMM 480	Health Communication	
COMM 484	Verbal Communication	
COMM 490	Independent Study ²	
COMM 491	Selected Topics ²	
EDUC 483	Second Language Acquisition	
ENGL 451	Practicum in the Grammar of American English	
ENGL 452	History of the English Language	
FREN 352	French Phonetics	
GER 451	Special Topics in German ²	
GER 453	Independent Studies in German ²	
LING 451	Independent Studies in Linguistics ²	

PHIL 312	Formal Logic	
PHIL 315	Philosophy of Language	
PHIL 346	Philosophy of Mind	
PORT 453	Independent Luso-Brazilian Studies ²	
PSY 401	Directed Readings ²	
SPAN 340	Introduction to Spanish Linguistics	
SPAN 352	Spanish in Social Contexts	
SPAN 353	Spanglish	
SPAN 439	Topics in Applied Spanish Linguistics	
SPAN 460	Spanish Language Acquisition	
SPAN 461	Introduction to Spanish Phonetics	
SPAN 491	History of the Spanish Language	
SPAN 492	Structure of Spanish	
SPAN 493	Studies in U.S. Spanish	

Total Credits 24

¹ At least 3 hours must be at the 400 level. No more than 6 hours may be from the department where the student is obtaining his/her major.

² Special topics, independent studies, and directed readings must be approved by the Department of Languages and Linguistics.

Linguistics - Undergraduate Minor

The department offers a minor in linguistics.

Required Courses

LING 200G	Introduction to Language	3
Select two from the following:		6
LING 301	Introduction to Psycholinguistics	
LING 302V	Language and Society	
LING 303	Exploring Language Systems	

Select 9 credits with the help of an advisor from related fields 9

¹ Total Credits 18

¹ See list of electives for the supplementary major in Linguistics.

Spanish - Master of Arts

The degree plan requires a minimum of 36 credits in Spanish, of which at least 30 must be earned at the 500 level, and the remainder above the 450 level. The courses should be concentrated in the student's chosen area of study (linguistics or literature) as each student will be tested on a reading list that corresponds to each area study. A thesis is optional. Students authorized to complete a thesis may count a maximum of 6 credits of thesis work toward the degree. At the present time, the thesis option is not available for online-only students. There are no required core courses at this time and a student should work closely with his/her advisor and the Graduate Director to establish an appropriate individual degree plan.

All students in either the on-campus or online program may complete a minor at the master's level by taking 9 credits (3 courses) at the 500 level or above, in another area (department) of study, or within the department itself. For instance, a student studying linguistics may wish to obtain a minor in literature or a student studying literature may wish to obtain a minor in linguistics. In either case, the minor credits count as part of the 36 total credits required for the degree. In all cases, the student should

work closely with the Graduate Director to ensure his/her particular plan of study is acceptable to the program.

Linguistics Area of Study

Select 12 from the following:

36

SPAN 507	Technology Enhanced Language Learning
SPAN 508	Teaching Literature with Technology
SPAN 509	Teaching Culture with Technology
SPAN 510	Assessing the National Standards
SPAN 540	Introducción a la Lingüística
SPAN 545	Advanced Dialectos del Español
SPAN 558	Bilingüismo
SPAN 560	Advanced Spanish Language Acquisition
SPAN 561	Advanced Spanish Phonetics
SPAN 562	Advanced Spanish Phonology
SPAN 570	Advanced Study in Technical Translation
SPAN 580	Research Methodology in Spanish Linguistics
SPAN 584	Spanish Morphosyntax
SPAN 585	Language Assessment
SPAN 589	Spanish Sociolinguistics
SPAN 591	Advanced Study in History of the Spanish Language
SPAN 592	Advanced Structure of Spanish
SPAN 593	Advanced Studies in U.S. Spanish
SPAN 594	Theory and Methodology of Spanish Pedagogy
SPAN 597	Advanced Strategies for Teaching Spanish for Heritage/Native Speakers

Total Credits

36

Literature Area of Study

Select 12 from the following:

36

SPAN 500	Methods of Research and Literary Criticism
SPAN 512	Contemporary Spanish-American Poetry
SPAN 520	Hispanic Micro Fiction
SPAN 521	Advanced Culture and Literature of New Mexico
SPAN 528	Advanced U.S. Latino Culture and Literature
SPAN 547	Advanced Hispanic Film
SPAN 548	Advanced U.S.-Hispanic Film
SPAN 552	Advanced Literature of the Mexican Revolution
SPAN 555	Advanced Conquest, Colonial and Indigenous Literatures
SPAN 556	Advanced 19-Century Spanish-American Literature
SPAN 563	Advanced Study in Mexican Literature
SPAN 564	Advanced Post-Modern Hispanic Literature
SPAN 566	Contemporary Spanish-American Novel

SPAN 567	Advanced Study in Chicano Literature
SPAN 573	Advanced Study in Creative Writing
SPAN 581	Advanced Hispanic Modernism and Avant-Garde Literature
SPAN 583	Advanced Study in Spanish-American Women Writers
SPAN 586	Contemporary Spanish-American Essay
SPAN 587	Contemporary Spanish-American Short Story
SPAN 588	Contemporary Spanish-American Drama

Total Credits

36

Courses that may apply to either area include SPAN 590 Advanced Special Topics (see subtitles in schedule of courses to confirm subject of the course) SPAN 598 Independent Reading, Research, and/or Creative Writing, SPAN 599 Master's Thesis (both courses require a course proposal and prior approval).

Additional Language Requirement

For both the on-campus and online degrees, the department requires that students fulfill a second language requirement (in addition to English and Spanish) by following an approved course of study. Typically, this is completed by taking a four-semester course of study, but may vary according to the languages available.

Options for completing this requirement include taking classes at a local Community College or University, or online. Some students have met this requirement by studying abroad through NMSU. Students should consult the Graduate Director to establish a plan and discuss how this requirement will be met. *Note: evidence of fulfilling the second language requirement must be provided to the Graduate Director BEFORE taking final examinations.*

English Language Requirement

International students are required to demonstrate proficiency in English and meet all international admissions requirements prior to beginning their program of study. Please see the section of the Graduate Catalog on international admissions requirements and scores required for either the TOEFL or IELTS exam. *Note: evidence of fulfilling the English Language Requirement must be provided to the Graduate Director AND the Graduate School BEFORE taking final examinations.*

Final Examinations

Students must successfully complete a final department examination (generally during the final semester of coursework) that is partially written and partially oral. Please consult the Graduate Director for specific information on dates and format for these exams. Final examinations are only available during the Fall and Spring semesters.

Areas of Interest/Reading List

As stated previously, each student needs to select an area of interest: Linguistics or Literature. At the end of the student's degree, the final examinations (written and oral) will be based on the readings from the readings list in the student's selected area of study. For example, a student that has opted to specialize in literature is responsible for reading all the materials on the Literature Reading List. Likewise, a student that has opted to specialize in linguistics is responsible for reading all the

materials on the Linguistics Reading List. The student is responsible for the reading list that was in place the year he or she started the program.

Each student is responsible for covering the reading materials listed. Please contact the Graduate Director for a detailed reading. Note that the list is dated, so make sure to refer to the correct list that covers the year/semester the student started the program. The student is responsible for covering ALL the readings even if the student did not cover them as part of work done in class.

Graduate Assistantships

For the on-campus program only, the department awards graduate assistantships to qualified students. For this financial assistance, the student works up to 20 hours a week in departmental programs, chiefly in the teaching of elementary and intermediate Spanish courses in either the Heritage Language sequence or Spanish as a second Language sequence. Students interested in being considered for an assistantship should clearly state this interest in their introduction letter during the application process. The department offers a limited number of assistantships, and students should remember that not everyone that applies for this award receives one. Maintaining the award depends on the student's successful performance both academically and in the classes he/she teaches and is evaluated on a semester-by-semester basis. Students who receive an assistantship are required to take SPAN 594 Theory and Methodology of Spanish Pedagogy (see course description) as part of their degree plan in order to help them prepare for teaching classes at NMSU.

Spanish - Undergraduate Minor

Students must pass at least 18 credits of SPAN courses of which at least 12 credits are at either the 300 or 400 level. Students may not count SPAN 111 Elementary Spanish I or SPAN 112 Elementary Spanish II, but may count SPAN 211 Intermediate Spanish I and/or SPAN 212 Intermediate Spanish II. A student whose primary language for a Bachelor of Arts in Foreign Languages is Spanish may not also earn a minor in Spanish.

Required Courses

SPAN 312	Grammar for Heritage/Native Speakers of Spanish	3
or SPAN 313	Spanish Grammar	
SPAN 314	Spanish Composition	3
or SPAN 315	Composition for Heritage/Native Speakers of Spanish	

Electives

Select 12 credits from SPAN 300 or 400 level courses ¹	12
Total Credits	18

¹ Up to 6 elective credits may be at the 200 level. SPAN 364V Culture and Civilization of Mexico and SPAN 365V Culture and Civilization of Spanish America do not count for a minor in Spanish as they are taught in English.

Mathematical Sciences

Undergraduate Program Information

In addition to meeting University and College requirements, students earning a Bachelor of Science in Mathematics must fulfill the core departmental requirements and choose from one of three emphases:

- General,
- Applied Mathematics or
- Actuarial Science and Insurance.

Students must earn a grade of C- or better in all departmental and nondepartmental courses for any degree in the Department of Mathematical Sciences.

Graduate Program Information

The Department of Mathematical Sciences offers graduate instruction leading to the Master of Science degree, and Doctor of Philosophy degree. Possible areas of study are various topics in pure mathematics and applied mathematics, statistics and mathematics education. Students may also pursue an interdisciplinary program of study. Our program has 50 to 60 graduate students, most of them supported by a combination of teaching assistantships, research assistantships, fellowships and job opportunities at nearby teaching or research units.

For more information on our programs and on our working environment, and to learn more about the research interests of the faculty, please see our web site at www.math.nmsu.edu (<https://www.math.nmsu.edu>), phone us at (575) 646-3901, or write to:

Graduate Secretary
Department of Mathematical Sciences
NMSU
Las Cruces, NM 88003-8001
Email: gradcomm@nmsu.edu

Students applying for regular admission to graduate study in mathematics are expected to have 24 credits of upper-division courses in mathematics and statistics, including a three-credit course in modern analysis and a three-credit course in modern algebra. Students who do not meet these requirements may be admitted with deficiencies and allowed to complete the requirements at New Mexico State University.

Applications must be submitted online, see <http://prospective.nmsu.edu/graduate/apply/>. The minimum application to be admitted as a regular graduate student in mathematics includes:

1. a completed Graduate School admission application
2. complete transcripts of all undergraduate and graduate work
3. application fee
4. three letters of recommendation from professors, employers, or others who are qualified to judge potential for graduate work in mathematics
5. a one-page statement of educational objectives

Although GRE subject test scores are not required for admission, applicants are encouraged to submit them, if available. The test scores may be used to help allocate available teaching assistantships among entering students.

To ensure full consideration for admission, candidates should submit their applications by the following deadlines.

Application Deadlines-Domestic Applicants

Semester	Admission Only	Admission/Financial Aid
Fall	July 1	February 1
Spring/Summer	October 1	October 1

Application Deadlines-International Applicants

Semester	Admission Only	Admission/Financial Aid
Fall	February 1	February 1
Spring/Summer	October 1	October 1

Degrees for the Department

Mathematics - Bachelor of Science (p. 360)

Applied Mathematics - Supplemental Major (p. 359)

Mathematics - Master of Science (p. 363)

Mathematics - Doctor of Philosophy (p. 362)

Minors for the Department

Mathematics - Undergraduate Minor (p. 364)

Professor, Joseph Lakey, Department Head

Professors Baggett, Barany, Bezhanishvili, DeBlassie, Giorgi, Harding, Lakey, Lodder, Morandi, Olberding, Smits, Wang; **Associate Professors** Ballyk, Fouli, Salamanca-Riba, Stanford, Tian; **Assistant Professors** Cahill, Contreras, Dai, Michalowski; **College Professors** Fulte, Mostafa, Zimmerman; **College Associate Professors** Stuart; **College Assistant Professors** Ausbrooks, Villaverde, White-Hosford; **College Instructors** Reece

J. Lakey, Department Head, Ph.D. (Maryland)– applied harmonic analysis; P. Baggett, Ph.D. (Colorado)– mathematics education; M. Ballyk, Ph.D. (McMaster)– mathematical biology and ecology; E. Barany, Ph.D. (Ohio State)– mathematical physics; G. Bezhanishvili, Ph.D. (Tokyo Institute of Technology)– logic; S. Dai, Ph.D., (Maryland)– partial differential equations, applied math; R. DeBlassie, Ph.D. (MIT)– Probability; L. Fouli, Ph.D. (Purdue)– commutative algebra; T. Giorgi, Ph.D. (Purdue)– applied mathematics; J. Harding, Ph.D. (McMaster)– logic and foundations; G. Lodder, Ph.D. (Stanford)– algebraic topology; N. Michalowski, Ph.D. (Chicago)– partial differential equations, harmonic analysis, probability; P. Morandi, Ph.D. (California-San Diego)– algebra; B. Olberding, Ph.D. (Wesleyan)– commutative algebra, valuation theory and module theory; S. Salamanca-Riba, Ph.D. (M.I.T.)– Lie groups and representation theory; R. Smits, Ph.D. (Purdue)– probability, harmonic analysis; T. Stanford, Ph.D. (Columbia)– low dimensional topology; T. Wang, Ph.D. (Windsor)– mathematical statistics. Associated Faculty: Annie Selden, Ph.D. (Clarkson)– mathematics education; John Selden, Ph.D. (Georgia)– mathematics education.

MATH 101. General Supplemental Instruction I

1 Credit

Collaborative workshop for students enrolled in Intermediate Algebra. S/U Grading (S/U, Audit).

Corequisite(s): MATH 120.

MATH 102. General Supplemental Instruction II

1 Credit

Collaborative workshop for students enrolled in College Algebra. S/U Grading (S/U, Audit).

Corequisite(s): MATH 121G.

MATH 107. Topics in Mathematics

1-3 Credits

Topics to be announced in the Schedule of Classes. Maximum of 3 credits per semester. Total credit not to exceed 6 credits. Community Colleges only.

Prerequisite: consent of instructor.

MATH 111. Fundamentals of Elementary Mathematics I

3 Credits

Numbers and the four operations of arithmetic. Understanding and comparing multiple representations of numbers and operations, in particular how these representations build from whole numbers to integers to fractions and decimals. Applying properties of numbers and operations in contextual situations. Reasoning, communicating, and problem solving with numbers and operations. Applications to ratio, and connections with algebra. Taught primarily through student activities and investigations. Restricted to: EDUC,EPAR,E ED,ECED majors.

Prerequisite(s): ENGL 111G and grade of C or better in MATH 120.

MATH 112G. Fundamentals of Elementary Math II

3 Credits

Geometry and measurement. Multiple approaches to solving problems and understanding concepts in geometry. Analyzing and constructing two- and three-dimensional shapes. Measurable attributes, including angle, length, area, and volume. Understanding and applying units and unit conversions. Transformations, congruence, and symmetry. Scale factor and similarity. Coordinate geometry and connections with algebra. Reasoning and communicating about geometric concepts. Taught primarily through student activities and investigations.

Prerequisite(s): C or better in MATH 111.

MATH 120. Intermediate Algebra

3 Credits

Linear and algebraic functions as they arise in real world problems. Exponential and logarithmic functions. Equations and inequalities and their solutions considered symbolically, graphically and numerically.)

Prerequisite: adequate score on the Mathematics Placement Examination (see note above).

MATH 121G. College Algebra

3 Credits

Fundamental concepts of functions, including algebraic and graphical properties. Fitting functions to data. Finding zeroes and extreme values. Solving systems of equations.

Prerequisites: Adequate math placement score or C or better in MATH 120.

MATH 142G. Calculus for the Biological and Management Sciences

3 Credits (2+2P)

Review of functions. Derivatives, exponential and logarithmic functions, antiderivatives and indefinite integrals, basic ordinary differential equations and growth models, with an emphasis on applications. Includes a significant writing component.

Prerequisite(s): C or better in MATH 121G.

MATH 190G. Trigonometry and Precalculus**4 Credits (3+2P)**

Elementary functions used in the sciences with emphasis on trigonometric functions and their inverses. Polar coordinates. Complex numbers and Euler's formula. Analytic geometry and vectors.

Prerequisite: adequate score on Mathematics placement exam or a C or better in MATH 121G (see note at beginning of this section).

MATH 191G. Calculus and Analytic Geometry I**4 Credits**

Limits and continuity, theory and computation of derivatives, applications of derivatives, extreme values, critical points, derivative tests, L'Hopital's Rule.

Prerequisite(s): C or better in MATH 190G.

MATH 192G. Calculus and Analytic Geometry II**4 Credits**

Riemann sums, the definite integral, antiderivatives, fundamental theorems, techniques of integration, applications of integrals, improper integrals, Taylor polynomials, sequences and series, power series and Taylor series.

Prerequisite(s): C or better in MATH 191G.

MATH 192GH. Calculus and Analytic Geometry II Honors**4 Credits (3+1P)**

A more advanced treatment of the material of MATH 192G with additional topics. Consent of Instructor required. Restricted to Las Cruces campus only.

Prerequisite(s): Consent of Department.

MATH 200. Directed Study**1-3 Credits**

May be repeated for a maximum of 6 credits. Graded S/U.

Prerequisite: consent of the instructor.

MATH 210G. Mathematics Appreciation**3 Credits**

Mathematics and its role in the development and maintenance of civilization.

Prerequisites: High school algebra, and an adequate score on the Mathematics Placement Examination.

MATH 215. Fundamentals of Elementary Mathematics III**3 Credits**

Probability, statistics, ratios, and proportional relationships. Experimental and theoretical probability. Collecting, analyzing, and displaying data, including measurement data. Multiple approaches to solving problems involving proportional relationships, with connections to number and operation, geometry and measurement, and algebra. Understanding data in professional contexts of teaching. Taught primarily through student activities and investigations.

Prerequisite(s): C or better in MATH 112.

MATH 235. Calculus for the Technical Student I**3 Credits**

Intuitive differential and integral calculus with applications to engineering.

Prerequisite: C or better in MATH 190G.

MATH 236. Calculus for the Technical Student II**3 Credits**

A continuation and extension of the material in MATH 235.

Prerequisites: C or better in MATH 235 or in MATH 192G.

MATH 242. Calculus for the Biological and Management Sciences II**3 Credits**

Calculus of functions of several variables, techniques of integration, differential equations, infinite series. Applications.

Prerequisite: C or better in MATH 142G.

MATH 275G. Spirit and Evolution of Mathematics**3 Credits**

Same as HON 275G.

MATH 279. Introduction to Higher Mathematics**3 Credits**

Logic; sets, relations, and functions; introduction to mathematical proofs.

Prerequisite(s): C- or better in MATH 192.

MATH 280. Introduction to Linear Algebra**3 Credits**

Systems of equations, matrices, vector spaces and linear transformations. Applications to computer science.

Prerequisite(s): Grade of C- or better in MATH 192G.

MATH 291G. Calculus and Analytic Geometry III**3 Credits**

Vector algebra, directional derivatives, approximation, max-min problems, multiple integrals, applications, cylindrical and spherical coordinates, change of variables.

Prerequisite: grade of C or better in MATH 192G.

MATH 292. Calculus and Analytic Geometry IV**3 Credits**

Vector calculus, linear algebra, selected topics. Community Colleges only.

Prerequisite: grade of C or better in MATH 291G or equivalent.

MATH 300. Readings**1-3 Credits**

A selection of readings and reports in the mathematical sciences, the breadth and depth of which is deemed to fit the needs of the student. Graded S/U.

Prerequisite: consent of instructor.

MATH 313. Fundamentals of Algebra and Geometry I**3 Credits (3+1P)**

Covers algebra combined with geometry based on measurements of distance (metric geometry). Secondary mathematics education majors may take course as a math elective. MATH 313 does not substitute for other required math courses. Does not fulfill requirements for major in mathematics.

Prerequisites: MATH 111 and MATH 112G.

MATH 316. Calculus with Hands-on Applications**3 Credits**

This course, primarily for prospective teachers, is taught in an interactive laboratory format. Students design and construct physical objects for which the planning stage requires calculus techniques. All numerical computations are carried out on graphing calculators. Meets simultaneously with MATH 516, primarily for practicing teachers. Secondary math education majors may take course as a math elective. MATH 316 does not fulfill requirements for majors in mathematics. Consent of instructor required.

MATH 331. Introduction to Modern Algebra**3 Credits**

Elements of abstract algebra, including groups, rings and fields.

Prerequisite: C or better in MATH 279 and MATH 280.

MATH 332. Introduction to Analysis**3 Credits**

Development of the real numbers, a rigorous treatment of sequences, limits, continuity, differentiation, and integration.

Prerequisite: C or better in MATH 192G and MATH 279.

MATH 377. Introduction to Numerical Methods**3 Credits**

Basic numerical methods for interpolation, approximation, locating zeros of functions, integration, and solution of linear equations. Computer-oriented methods will be emphasized.

Prerequisites: grade of C or better in MATH 192G and some programming experience.

MATH 391. Vector Analysis**3 Credits**

Calculus of vector valued functions, Green's and Stokes' theorems and applications.

Prerequisite: grade of C or better in MATH 291G.

MATH 392. Introduction to Ordinary Differential Equations**3 Credits**

Introduction to differential equations and dynamical systems with emphasis on modeling and applications. Basic analytic, qualitative and numerical methods. Equilibria and bifurcations. Linear systems with matrix methods, real and complex solutions.

Prerequisite: C or better in MATH 192G or B or better in MATH 236.

MATH 400. Undergraduate Research**1-3 Credits**

May be repeated for a maximum of 6 credits. Graded S/U.

Prerequisite: consent of faculty member.

MATH 401. Special Topics**1-3 Credits (1-3)**

Specific subjects to be announced in the Schedule of Classes. May be used to fulfill a course requirement for the mathematics major.

Prerequisite: An upper division MATH or STAT course, and consent of instructor.

MATH 411V. Great Theorems: The Art of Mathematics**3 Credits**

Adopts the view of mathematics as art, using original sources displaying the creation of mathematical masterpieces from antiquity to the modern era. Original sources are supplemented by cultural, biographical, and mathematical history placing mathematics in a broad human context. Same as HON 411G.

Prerequisites: Grades of B or better in MATH 192G and any upper division MATH/STAT course, with overall GPA of 3.2 or better, or consent of instructor.

MATH 421. Financial Mathematics I**3 Credits**

Types of derivatives, forwards and futures, options, returns and payoffs, Arrow-Debre, complete and incomplete markets, the one period model, the binomial option pricing model, binomial trees, martingales and sub martingales, Brownian motion, stochastic integrals, the Ito integral, Ito's dilemma, the Black-Scholes model, the Black-Scholes formula, European options, American options, free boundary problems, variational inequalities. This course is offered simultaneously with MATH 521.

Prerequisite(s): C or better in STAT 371 and either MATH 280 or MATH 480 or consent of instructor.

MATH 422. Financial Mathematics II**3 Credits**

Bonds, swaps, exotic options, barrier options, Asian options, look back options, options with transaction costs, Fokker Plank theory, computing expectations, the Heath-Jarrow- Morton theorem, the Ho-Lee model, stochastic volatility models, exponential-affine models, numerical methods. This course is offered simultaneously with MATH 522.

Prerequisite: C or better in MATH 421 or consent of instructor

MATH 423. Numerical Optimization and Applications to Financial Mathematics**3 Credits**

Dynamic optimization of a monopolist, trading off inflation and unemployment, the optimal adjustment of labor demand, infinite planning horizon, the optimal investment path of a firm, the optimal social saving behavior, phase-diagram analysis, optimal control theory, the political business cycle, the dynamics of a revenue-maximizing firm, economic examples of state-space constraints. This course is offered simultaneously with MATH 523.

Prerequisite(s): C- or better in MATH 421.

MATH 430. Combinatorial Mathematics**3 Credits**

Methods for solving combinatorial construction and enumeration problems. Topics include Ramsey theory, generating functions, matchings, and block designs.

Prerequisite(s): C- or better in MATH 330 or C- or better in MATH 331 or C- or better in MATH 332.

MATH 451. Introduction to Differential Geometry**3 Credits**

Applies calculus to curves and surfaces in three dimensional Euclidean space.

Prerequisite(s): C- or better in each of MATH 280 and MATH 391, or consent of instructor.

MATH 452. Foundations of Geometry**3 Credits**

Topics in projective, axiomatic Euclidean or non-Euclidean geometries. Restricted to: Main campus only.

Prerequisite(s): C or better in MATH 331 or MATH 332.

MATH 453. Introduction to Topology**3 Credits**

Introduction to topological spaces and metric spaces, with connections to analysis, geometry, and the classification of surfaces.

Prerequisite(s): C- or better in MATH 332 or consent of instructor.

MATH 454. Mathematical Logic**3 Credits**

Propositional calculus and the first order predicate calculus, including Godel's completeness theorem for the latter, and additional topics at the option of the instructor.

Prerequisite(s): C or better in MATH 331 or MATH 332, or consent of instructor.

MATH 455. Elementary Number Theory**3 Credits**

Covers primes, congruences and related topics.

Prerequisite: grade of C or better in MATH 331 or consent of instructor.

MATH 457. Applications of Modern Algebra**3 Credits**

Topics may include coding theory, cryptography, graph theory, or symmetry groups. May be repeated up to 9 credits.

Prerequisite(s): C or better in Math 331 or consent of instructor.

MATH 459. Survey of Geometry**3 Credits**

Basic concepts of Euclidean geometry, ruler and compass constructions. May include topics in non-Euclidean geometry. For non-math majors. Restricted to: Main campus only.

Prerequisite(s): C or better in MATH 331 or MATH 332.

MATH 466. Lattice Theory**3 Credits**

Introduction to partially ordered sets, distributive, modular, and Boolean lattices.

Prerequisite(s): C- or better in MATH 330 or C- or better in MATH 331 or C- or better in MATH 332 or consent of instructor.

MATH 471. Complex Variables**3 Credits**

A first course in complex function theory, with emphasis on applications.

Prerequisite(s): C- or better in MATH 391 or C- or better in both MATH 392 and MATH 291.

MATH 472. Fourier Series and Boundary Value Problems**3 Credits**

Fourier series and methods of solution of the boundary value problems of applied mathematics.

Prerequisite(s): C- or better in MATH 392.

MATH 473. Calculus of Variations and Optimal Control**3 Credits**

Euler's equations, conditions for extrema, direct methods, dynamic programming, and the Pontryagin maximal principle.

Prerequisite(s): C- or better in MATH 392.

MATH 480. Matrix Theory and Applied Linear Algebra**3 Credits**

An application driven course, whose topics include rectangular systems, matrix algebra, vector spaces and linear transformations, inner products, and eigenvalues and eigenvectors. Applications may include LU factorization, least squares, data compression, QR factorization, singular value decomposition, and search engines.

Prerequisite(s): C or better in any 300-level course with a MATH or STAT prefix.

MATH 481. Advanced Linear Algebra**3 Credits**

Rigorous treatment of vector spaces and linear transformations including canonical forms, spectral theory, inner product spaces and related topics.

Prerequisite: grade of C or better in MATH 331.

MATH 491. Introduction to Real Analysis I**3 Credits**

Rigorous discussion of the topics introduced in calculus. Sequences, series, limits, continuity, differentiation.

Prerequisite: grade of C or better in MATH 332 or consent of instructor.

MATH 492. Introduction to Real Analysis II**3 Credits**

Continuation of MATH 491. Integration, metric spaces and selected topics.

Prerequisite(s): C- or better in MATH 491 or consent of instructor.

MATH 498. Directed Reading**1-6 Credits**

May be repeated for a maximum of 6 credits. Graded S/U.

MATH 501. Introduction to Differential Geometry**3 Credits**

Same as MATH 451 with additional work for graduate students.

MATH 502. Foundations of Geometry**3 Credits**

Same as MATH 452 with additional assignments for graduate students.

MATH 503. Introduction to Topology**3 Credits**

Same as MATH 453 with additional work for graduate students.

MATH 504. Mathematical Logic**3 Credits**

Same as MATH 454 with additional assignments for graduate students.

MATH 505. Elementary Number Theory**3 Credits**

Same as MATH 455 with additional assignments for graduate students.

MATH 506. Lattice Theory**3 Credits**

Same as MATH 466 with additional assignments for graduate students.

MATH 507. Applications of Modern Algebra**3 Credits**

Taught with MATH 457 with additional work for graduate students. May be repeated up to 9 credits.

Prerequisite(s): C or better in MATH 331 or consent of instructor.

MATH 509. Information Theory**3 Credits**

This class is a study of Shannon's measure of information and discusses mutual information, entropy, and channel capacity, the noiseless source coding theorem, the noisy channel coding theorem, channel coding and random coding bounds, rate-distortion theory, and data compression.

Restricted to: Main campus only. Crosslisted with: E E 586

Prerequisite(s): E E 571 or STAT 515.

MATH 511. Fundamentals of Elementary Mathematics I**3 Credits (3+1P)**

Topics from real numbers, geometry, measurement, and algorithms, incorporating calculator technology. Intended for K-8 teachers. As part of course students mentor MATH 111 undergraduates. Does not fulfill degree requirements for M.S. in mathematics.

MATH 512. Fundamentals of Elementary Mathematics II**3 Credits (3+1P)**

Real numbers, geometry, and statistics, incorporating calculator technology. Intended for K-8 teachers. Students serve as mentors to MATH 112 undergraduates. Does not fulfill degree requirements for M.S. in mathematics.

MATH 513. Fundamentals of Algebra and Geometry I**3 Credits (3+1P)**

Algebra and metric geometry, incorporating appropriate calculator technology. Intended for K-8 teachers. Students serve as mentors to MATH 313 undergraduates. Does not fulfill degree requirements for M.S. in mathematics.

MATH 516. Calculus with Hands-on Application**3 Credits**

This course, primarily for in-service teachers, is taught in an interactive laboratory format. Students design and construct physical objects for which the planning stage requires calculus techniques. All numerical computations are carried out on graphing calculators. Meets simultaneously with Math 316, primarily for prospective teachers. Does not fulfill degree requirements for M.S. in Mathematics.

Prerequisite(s): MATH 511 and MATH 512 or consent of instructor.

MATH 517. Complex Variables**3 Credits**

Same as MATH 471 with additional work for graduate students.

MATH 518. Fourier Series and Boundary Value Problems**3 Credits**

Same as MATH 472 with additional work for graduate students.

MATH 519. Calculus of Variations and Optimal Control**3 Credits**

Same as MATH 473 with additional work for graduate students.

MATH 521. Financial Mathematics I: Portfolio Optimization**3 Credits**

Complete and incomplete markets, optimal investment paths, dynamic optimization, the Black-Scholes model, European options, American options.

Prerequisite: STAT 515 and either MATH 280 or MATH 480.

MATH 522. Financial Mathematics II**3 Credits**

Bonds, Swaps, Exotic options, Barrier options, Asian options, Lookback options, options with transaction costs, Fokker Plank theory: computing expectations, The Heath-Jarrow-Morton theorem, the Ho-Lee model, Stochastic volatility models, Exponential-Affine models, numerical methods.

Prerequisite: MATH 521.

MATH 523. Numerical Optimization and Applications to Financial Mathematics**3 Credits**

Dynamic optimization of a monopolist, trading off inflation and unemployment, the optimal adjustment of labor demand, infinite planning horizon, the optimal investment path of a firm, the optimal social saving behavior, phase-diagram analysis, optimal control theory, the political business cycle, the dynamics of a revenue-maximizing firm, economic examples of state-space constraints. This course is offered simultaneously with MATH 423.

Prerequisite: MATH 521.

MATH 525. Advanced Linear Algebra**3 Credits**

Same as MATH 481 with additional work for graduate students.

Prerequisite: grade of C or better in MATH 331.

MATH 527. Introduction to Real Analysis I**3 Credits**

Same as MATH 491 with additional work for graduate students.

MATH 528. Introduction to Real Analysis II**3 Credits**

Same as MATH 492 with additional work for graduate students.

MATH 530. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be for unlimited credit with approval of the department.

MATH 531. Ordinary Differential Equations**3 Credits**

Linear algebra and linear ordinary differential equations, existence and uniqueness of solution, smooth dependence on initial conditions, flows, introduction to smooth dynamical systems.

Prerequisites: MATH 392 and MATH 527, or consent of instructor.

MATH 532. Partial Differential Equations**3 Credits**

The basic equations of mathematical physics. Elliptic, hyperbolic, and parabolic equations. Characteristic surfaces. Well-posed problems.

Prerequisite: MATH 518 or consent of instructor.

MATH 534. Nonlinear Programming**3 Credits**

Theoretical and computational methods to solve optimization problems in engineering, statistics, economics, and operations research. Topics include convexity, optimality conditions, Newton's method, Lagrange multipliers, search algorithms for unconstrained and constrained problems, as well as barrier and penalty methods.

MATH 540. Directed Reading**1-6 Credits**

May be repeated for a maximum of 6 credits. Consent of instructor required. Graded: S/U.

MATH 541. Topology I**3 Credits**

Connectedness and compactness of topological spaces, introduction to the quotient topology, elementary homotopy theory, the fundamental group, the Seifert-van Kampen theorem

Prerequisite(s): MATH 525 and MATH 528, or consent of instructor.

MATH 542. Topology II**3 Credits**

Covering spaces and their classification, singular homology, degree theory, Brouwer's fixed point theorem, CW-complexes and cellular homology, and other applications.

Prerequisite(s): MATH 541 or consent of instructor.

MATH 555. Differentiable Manifolds**3 Credits**

Differentiable structures, tangent bundles, vector fields and differential equations. Additional topics may include differential forms, De Rham cohomology, Riemannian geometry, and topics chosen by the instructor. May be repeated for a maximum of 9 credits. Consent of instructor required.

Prerequisite(s): MATH 525 and MATH 528, or consent of instructor.

MATH 557. Axiomatic Set Theory**3 Credits**

A detailed study of Zermelo-Fraenkel and Bernays set theories.

Prerequisite: MATH 504 or equivalent.

MATH 562. History and Theories of Mathematics Education**3 Credits**

A study of the history of the mathematics taught in American schools, including an examination of authentic original textbooks and the changes in their content and the approach to the subject over time, together with writings of people who have influenced the development and changes of mathematics education. Theories of learning mathematics, and current issues in mathematics education.

Prerequisite(s): Restricted to graduate students.

MATH 563. Algebra with Connections**3 Credits**

Connections between Algebra and other K-12 curriculum strands, especially Geometry and Probability / Data Analysis. Apply algebraic modeling and reasoning to a variety of mathematical problem solving situations. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.

Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 564. From Number to Algebra**3 Credits**

The progression from Number to Algebra in the K-12 curriculum as a concrete-to-abstract progression. Key concepts considered across the grade levels include the different uses of variables, equivalence in different contexts, patterns, and ratios. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.

Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 566. Data Analysis with Applications**3 Credits**

Statistical concepts and terminology in professional uses of data by teachers, such as standardized test score reports and educational research; visual displays of data; measures of variation and central tendency; consideration of how K-12 topics in Data Analysis are developed from one grade level to the next. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.

Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 567. From Measurement to Geometry**3 Credits**

The progression from Measurement to Geometry in the K-12 curriculum as a concrete-to abstract progression. Important concepts such as angle, length, and area progress from concrete, measurable situations to more abstract problems which require reasoning and proof. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.

Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 568. Using Number Throughout the Curriculum**3 Credits**

Understand number concepts more deeply by seeing many examples of those concepts applied in other content strands. Develop mathematical knowledge and understanding to build a repertoire of ways for students to practice and review basic number skills and concepts as part of later, more advanced courses. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.

Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 569. Geometry with Connections**3 Credits**

Connections between Geometry and other K-12 curriculum strands, especially Algebra and Probability / Data Analysis. Address key attributes of geometric concepts by considering their connections within and across grade levels. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.

Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 581. Algebra I**3 Credits**

Examines groups, commutative rings, solvability of polynomials, Galois theory, ruler and compass constructions.

Prerequisite/corequisite: MATH 525.

MATH 582. Algebra II**3 Credits**

Group actions, fundamental theorem of finite Abelian groups, Sylow theorems, solvable groups, noncommutative rings, Noetherian rings, unique factorization domains, modules, tensor products.

Prerequisite: MATH 581.

MATH 583. Introduction to Commutative Algebra and Algebraic Geometry**3 Credits**

Introduction to the basic notions and techniques of modern algebraic geometry, including the necessary commutative algebra foundation. Topics likely to include algebraic and projective varieties, Nullstellensatz, morphisms, rational and regular functions, local properties. Other topics may include Noether normalization, dimension theory, singularities, sheaves, schemes, Grobner bases. May be repeated up to 9 credits.

Prerequisite(s): MATH 581 or consent of instructor.

MATH 584. Representation Theory**3 Credits**

Topics from representation theory of finite or infinite groups. May be repeated for a maximum of 9 credits.

Prerequisite: consent of instructor.

MATH 585. Universal Algebra**3 Credits**

Universal algebra and category theory. Theorems of Birkhoff and Tarski relating equational classes, free algebras and their construction through homomorphisms, subalgebras and products. Topics from model theory, sheaf theory and representation by subdirect products. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

MATH 586. Nonlinear Dynamics I**3 Credits**

Introduction to nonlinear dynamics and deterministic chaos. Core topics include stability and bifurcations; chaos in one dimensional maps; universality and re-normalization group. Further topics include symbolic dynamics, fractals, sensitive dependence on initial data, self-organization and complexity and cellular automata. Knowledge of differential equations and linear algebra is desired. May be repeated up to 6 credits.

MATH 591. Complex Analysis I**3 Credits**

Rigorous treatment of complex differentiation and integration, properties of analytic functions, series and Cauchy's integral representations.

Prerequisites: MATH 517 and MATH 528, or consent of instructor.

MATH 592. Complex Analysis II**3 Credits**

Harmonic functions, product representations, conformal mappings, Riemann's mapping theorem, Riemann surfaces, and selected other topics.

Prerequisite: MATH 591 or consent of instructor.

MATH 593. Measure and Integration**3 Credits**

Measure spaces, measurable functions, extension and decomposition theorems for measures, integration on measure spaces, absolute continuity, iterated integrals.

Prerequisite: MATH 528 or consent of instructor.

MATH 594. Real Analysis**3 Credits**

Differentiation, L_p spaces, Banach spaces, measure and topology, other selected topics.

Prerequisite: MATH 593.

MATH 599. Master's Thesis**15 Credits**

Thesis.

MATH 600. Doctoral Research**1-15 Credits**

Research.

MATH 643. Topology III**3 Credits**

Topics may include higher homotopy groups, fibrations, cohomology operations and obstruction theory, spectral sequences, or others chosen by instructor. May be repeated for a maximum of 9 credits.

Prerequisites: MATH 542 or consent of instructor.

MATH 655. Topics in Differential Geometry**3 Credits**

Representation theory of Lie groups, Riemannian geometry, or another topic chosen by instructor. Content varies. May be repeated for a maximum of 9 credits.

Prerequisite: MATH 555 or consent of instructor.

MATH 683. Homological Algebra**3 Credits**

Basic topics in homological algebra and category theory. May be repeated for a maximum of 9 credits.

Prerequisite: MATH 542 or MATH 582 or consent of instructor.

MATH 695. Introduction to Functional Analysis I**3 Credits**

Banach spaces. The three basic principles: uniform boundedness principle, closed graph/open mapping theorems, Hahn-Banach theorem.

Prerequisites: MATH 541 and MATH 594, or consent of instructor.

MATH 696. Introduction to Functional Analysis II**3 Credits**

Continuation of MATH 695. Topics selected from topological vector spaces, Hilbert space, spectral theory, Banach algebras, and distribution theory.

Prerequisite: MATH 695 or consent of instructor.

MATH 698. Selected Topics**1-15 Credits**

Selected topics.

MATH 700. Doctoral Dissertation**1-15 Credits**

Dissertation.

Applied Mathematics - Supplemental Major

The program consists of 24 credits in the designated list of courses. To earn a supplementary major in applied mathematics a student must earn 15 credits from Categories I.A and I.B of which at least 9 credits must be from Category I.B. A student must also earn 9 credits from the Category II list of related disciplines. The courses in Category II may be taken from any combination of areas. A student may not earn a bachelor's degree in mathematics and also a supplementary major in applied mathematics.

Requirements*Category I.A.*

Select two from the following:

6

MATH 377	Introduction to Numerical Methods
MATH 391	Vector Analysis
MATH 392	Introduction to Ordinary Differential Equations
MATH 421	Financial Mathematics I
STAT 371	Statistics for Engineers and Scientists I

Category I.B.

Select three from the following:

9

MATH 331	Introduction to Modern Algebra
MATH 332	Introduction to Analysis
MATH 422	Financial Mathematics II
or MATH 423	Numerical Optimization and Applications to Financial Mathematics
MATH 430	Combinatorial Mathematics
MATH 451	Introduction to Differential Geometry
MATH 453	Introduction to Topology
MATH 454	Mathematical Logic
MATH 471	Complex Variables
MATH 472	Fourier Series and Boundary Value Problems
MATH 473	Calculus of Variations and Optimal Control
MATH 480	Matrix Theory and Applied Linear Algebra
STAT 470	Probability: Theory and Applications
STAT 480	Statistics: Theory and Applications

Category II

Select 9 credits from the following Related disciplines:

9

C E 315	Structural Analysis
C E 331	Fluid Mechanics and Hydraulics
C E 356	Fundamentals of Environmental Engineering
C E 382	Hydraulic and Hydrologic Engineering
C S 372	Data Structures and Algorithms
C S 476	Computer Graphics I
C S 486	Bioinformatics
C S 491	Parallel Programming
CHME 305	Transport Operations I: Fluid Flow
CHME 306	Transport Operations II: Heat and Mass Transfer
CHME 412	Process Dynamics and Control
CHME 441	Chemical Kinetics and Reactor Engineering
CHEM 433	Physical Chemistry I
CHEM 434	Physical Chemistry II
CHEM 456	Inorganic Structure and Bonding
ECON 405	Introductory Econometrics
ECON 457	Mathematical Economics
ECON 498	Independent Study (with approval)
E E 312	Signals and Systems I
E E 314	Signals and Systems II
E E 395	Introduction to Digital Signal Processing
E E 473	Introduction to Optics

E E 475	Automatic Control Systems
E E 476	Computer Control Systems
E E 496	Introduction to Communication Systems
E E 497	Digital Communication Systems I
FIN 355	Investments
FIN 385	Analysis of Financial Markets and Institutions
FIN 406	Theory of Financial Decisions
FIN 435	Investment Analysis
I E 365	Quality Control
I E 413	Engineering Operations Research I
I E 423	Engineering Operations Research II
I E 460	Evaluation of Engineering Data
I E 466	Reliability
M E 332	Vibrations
M E 333	Intermediate Dynamics
M E 338	Fluid Mechanics
M E 341	Heat Transfer
PHYS 395	Intermediate Mathematical Methods of Physics
PHYS 451	Intermediate Mechanics I
PHYS 454	Intermediate Modern Physics I
PHYS 455	Intermediate Modern Physics II
PHYS 461	Intermediate Electricity and Magnetism I
PHYS 462	Intermediate Electricity and Magnetism II
PHYS 473	Introduction to Optics
PHYS 476	Computational Physics
PHYS 480	Thermodynamics
PHYS 485	Independent Study
PHYS 495	Mathematical Methods of Physics I
PHYS 497	Introduction to Space Plasma Physics
SUR 351	Introductory Spatial Data Adjustment I
SUR 451	Advanced Survey Measurements, Analysis, and Adjustments
SUR 461	GNSS Positioning
C S 510	Automata, Languages, Computability ¹
C S 570	Analysis of Algorithms ¹

Total Credits 24

¹ Student must be eligible to take 500-level courses.

Mathematics - Bachelor of Science

Core Departmental Requirements

MATH 191G	Calculus and Analytic Geometry I	4
MATH 192G	Calculus and Analytic Geometry II	4
MATH 291G	Calculus and Analytic Geometry III	3
MATH 279	Introduction to Higher Mathematics	3
MATH 280	Introduction to Linear Algebra	3

Total Credits 17

Notes

Some students may be able to bypass one or more courses in the calculus sequence MATH 191-192-291. The calculus sequence, Introduction to Higher Mathematics, and Linear Algebra provide knowledge that is basic to further work, and students are advised to complete them or their equivalent as early as possible.

Students planning to enter a graduate program in Mathematics should select the General Emphasis. In any case, such students are strongly advised to take both MATH 331 Introduction to Modern Algebra and MATH 332 Introduction to Analysis, since these courses are required by most programs, and should take as many as possible of the following courses

MATH 481	Advanced Linear Algebra	3
MATH 491	Introduction to Real Analysis I	3
MATH 492	Introduction to Real Analysis II	3

Students planning to do graduate work in Mathematics are encouraged to take French or German to meet the requirement of a second language.

Concentration: Actuarial Science and Insurance

The concentration in Actuarial Science and Insurance draws on courses from mathematics and business to prepare students for a mathematical career in insurance. The coursework in this emphasis focuses on the analysis of risk and its applications to insurance finance. Students fulfilling the requirements for the Actuarial Science and Insurance Concentration earn a minor in Risk Management and Insurance.

Departmental Requirements

MATH 331	Introduction to Modern Algebra	3
or MATH 332	Introduction to Analysis	
STAT 371	Statistics for Engineers and Scientists I	3
STAT 470	Probability: Theory and Applications	3
STAT 480	Statistics: Theory and Applications	3

Departmental Electives

Select at least an additional 9 credits of approved upper-division courses prefixed MATH or STAT, excluding the following: ¹

MATH 300	Readings	
MATH 313	Fundamentals of Algebra and Geometry I	
MATH 316	Calculus with Hands-on Applications	
MATH 400	Undergraduate Research	
MATH 459	Survey of Geometry	
STAT 400	Undergraduate Research	

Nondepartmental Requirements

ACCT 221	Financial Accounting	3
ACCT 222	Management Accounting	3
BLAW 316	Legal Environment of Business	3
or BLAW 385V	Consumers and the Law	
E E 161	Computer Aided Problem Solving	4
ECON 251G	Principles of Macroeconomics	3
ECON 252G	Principles of Microeconomics	3
FIN 322	Principles of Insurance	3
FIN 341	Financial Analysis and Markets	3

Select one from the following: 3

FIN 326	Business Risk Management
FIN 323	Life/Health/Employee Benefits
FIN 324	Property and Liability Insurance

Insurance Electives

Select 6 credits from the following: 6

FIN 303V	Personal Financial Planning and Investing in a Global Economy
or FIN 421	Personal Financial Planning for Professionals
FIN 323	Life/Health/Employee Benefits
FIN 324	Property and Liability Insurance
FIN 391	Finance Internship and Cooperative Education I

Total Credits 55

¹ MATH 401 Special Topics must be approved by the department for credit towards the major. At least 6 of the MATH and STAT credit hours must be numbered higher than 400.

Concentration: Applied Mathematics

The Applied Mathematics concentration is intended to prepare students planning a mathematically oriented career upon graduation. The coursework in this concentration provides a foundation in mathematics important in many scientific and engineering applications.

Departmental Requirements

MATH 377	Introduction to Numerical Methods	3
MATH 392	Introduction to Ordinary Differential Equations	3
MATH 471	Complex Variables	3
MATH 472	Fourier Series and Boundary Value Problems	3
STAT 371	Statistics for Engineers and Scientists I	3
STAT 470	Probability: Theory and Applications	3

Departmental Electives

Select at least 6 credits of approved additional upper-division courses prefixed MATH or STAT, excluding the following: ² 6

MATH 300	Readings
MATH 313	Fundamentals of Algebra and Geometry I
MATH 400	Undergraduate Research
MATH 459	Survey of Geometry
STAT 400	Undergraduate Research

Nondepartmental Requirements

Select a minimum of 12 credit hours of electives to form a coherent cluster in an applied area from the following: ³ 12

Examples of acceptable clusters:

Signals

E E 161	Computer Aided Problem Solving
Select 9 credits from the following:	
E E 280	DC and AC Circuits
E E 312	Signals and Systems I
E E 395	Introduction to Digital Signal Processing
E E 496	Introduction to Communication Systems

Structures

C S 172	Computer Science I
---------	--------------------

or E E 161	Computer Aided Problem Solving
------------	--------------------------------

Select 9 credits from the following:

PHYS 215G	Engineering Physics I
C E 233	Mechanics-Statics
C E 301	Mechanics of Materials
C E 315	Structural Analysis
C E 365	Intermediate Structural Analysis

Operations Research

E E 161	Computer Aided Problem Solving
---------	--------------------------------

Select three from the following:

I E 311	Engineering Data Analysis
I E 365	Quality Control
I E 413	Engineering Operations Research I
I E 423	Engineering Operations Research II
I E 460	Evaluation of Engineering Data

Algorithm Theory

C S 172	Computer Science I
C S 272	Introduction to Data Structures
C S 370	Compilers and Automata Theory
C S 372	Data Structures and Algorithms

Bioinformatics

BIOL 211G	Cellular and Organismal Biology
BIOL 211GL	Cellular and Organismal Biology Laboratory
C S 486	Bioinformatics

Select 6 credits from the following:

C S 172	Computer Science I
C S 272	Introduction to Data Structures
C S 370	Compilers and Automata Theory
C S 371	Software Development
C S 372	Data Structures and Algorithms

Computer Systems

C S 172	Computer Science I
---------	--------------------

Select 9 credits from the following:

C S 271	Object Oriented Programming
or C S 272	Introduction to Data Structures
C S 371	Software Development

Select 6-7 credits from the following:

C S 370	Compilers and Automata Theory
C S 474	Operating Systems I
C S 475	Artificial Intelligence I
C S 476	Computer Graphics I
C S 482	Database Management Systems I
C S 484	Computer Networks I
C S 485	User Interface Design

Total Credits 36

² MATH 401 Special Topics must be approved by the department for credit towards the major. At least 6 of the MATH and STAT credit hours must be numbered higher than 400.

- ³ Students may propose clusters subject to departmental approval. A cluster must contain either C S 172 Computer Science I or E E 161 Computer Aided Problem Solving. A major or minor in any of the following fields (along with C S 172 Computer Science I or E E 161 Computer Aided Problem Solving) will also fulfill the Cluster Electives requirement: Computer Science, Physics, Biology, Chemistry and Biochemistry, Chemical Engineering, Engineering Physics, Electrical and Computer Engineering, Industrial Engineering, Mechanical Engineering, Civil Engineering, Economics and Finance.

Concentrations: General Mathematics

Students seeking a foundation in pure mathematics and flexibility in the curriculum are encouraged to pursue the General Mathematics Concentration. Students choosing this emphasis should work closely with a faculty advisor to select courses appropriate to their interests.

Departmental Requirements

MATH 331	Introduction to Modern Algebra	3
MATH 332	Introduction to Analysis	3

Departmental Electives

Select at least 18 additional upper-division credits of approved courses prefixed MATH or STAT, excluding: ⁴ 18

MATH 300	Readings	
MATH 313	Fundamentals of Algebra and Geometry I	
MATH 316	Calculus with Hands-on Applications	
MATH 400	Undergraduate Research	
MATH 459	Survey of Geometry	
STAT 400	Undergraduate Research	

Nondepartmental Requirements for the Major ⁵

Second Language Requirement at the 212/214 level or above ⁶

C S 172	Computer Science I	4
C S 272	Introduction to Data Structures	4

Total Credits 32

- ⁴ MATH 401 Special Topics must be approved by the department for credit towards the major. At least 12 of the MATH and STAT credits must be numbered higher than 400.

- ⁵ A grade of C- or better must be earned.

- ⁶ Majors in the General Emphasis must pass the second language requirement at the 212/214 level or above, as described in the College Degree Requirements (p. 176) for the College of Arts and Sciences.

Note: It is strongly recommended that mathematics majors in the General Mathematics Concentration consider a minor or second major in an area that uses mathematics, such as physics or computer science. All programs should be planned with the guidance of a departmental advisor. More information is available at www.math.nmsu.edu. (<https://www.math.nmsu.edu>)

Mathematics - Doctor of Philosophy

Candidates for the Ph.D. degree in the Department of Mathematical Sciences must pass

- a qualifying examination,
- three comprehensive written examinations,
- a comprehensive oral examination,

- a series of courses, and
- a final oral doctoral thesis examination.

These are briefly described below. For more information, see the Graduate School requirements in this catalog, and the Mathematics Graduate Student handbook at www.math.nmsu.edu (<https://www.math.nmsu.edu>).

Qualifying Examination

Every student admitted to the Ph.D. program must complete the Ph.D. oral qualifying examination. Its purpose is to determine the areas in which the student shows strength or weakness, as well as the ability to assimilate subject matter presented at the graduate level. Students who complete their mathematics master's degree at NMSU may request, at the time of applying for their master's oral final examination, that the Master's examination also fulfill the Ph.D. qualifying examination requirement. In all other cases, towards the end of the student's first semester in the Ph.D. program, the student and his or her advisor will convene an oral examination with three examiners, the examiners being the advisor and some of the student's current or past instructors. As a result of the Qualifying examination, the department will take one of the following actions:

1. admit the student to further work toward the Ph.D.;
2. recommend that the student's program be limited to a Master's degree;
3. recommend a reevaluation of the student's progress after the lapse of one semester; or
4. recommend a discontinuation of the student's graduate program in mathematics.

Written Comprehensive Examinations

Candidates for the Ph.D. degree must pass written comprehensive examinations in three of the seven areas of algebra, complex analysis, differential equations, logic and foundations, real analysis, statistics and topology. To ensure adequate breadth, a combination of three comprehensive examinations must include real analysis, and at least one of algebra and topology.

The seven examinations are based on the following comprehensive examination sequence courses:

Algebra

MATH 525	Advanced Linear Algebra	3
MATH 581	Algebra I	3
MATH 582	Algebra II	3

Complex Analysis

MATH 517	Complex Variables	3
MATH 591	Complex Analysis I	3
MATH 592	Complex Analysis II	3

Differential Equations

MATH 518	Fourier Series and Boundary Value Problems	3
MATH 531	Ordinary Differential Equations	3
MATH 532	Partial Differential Equations	3

Logic and Foundations

MATH 504	Mathematical Logic	3
MATH 557	Axiomatic Set Theory	3

MATH 585	Universal Algebra	3
Real Analysis		
MATH 527	Introduction to Real Analysis I	3
MATH 528	Introduction to Real Analysis II	3
MATH 593	Measure and Integration	3
MATH 594	Real Analysis	3
Probability and Statistics		
STAT 562	Foundations of Probability	3
STAT 571	Continuous Multivariate Analysis	3
Topology		
MATH 541	Topology I	3
MATH 542	Topology II	3

Full time students should complete the comprehensive written exams in the first two years. Those who have not made substantial progress towards completion of their written exams at the start of the fifth semester may be removed from the program. Students who have not completed the written exams by the start of the sixth semester will normally have any departmental funding revoked.

Exams are offered every August and January. A student must register to take exams in the semester prior to taking the exams. A student has three consecutive examination periods to complete the written comprehensive exam requirements (Example: if s/he starts in August, s/he has the August, January and August examination periods to complete the exams). This does not extend the time limit mentioned above. Students will normally not be given more than two attempts at any one exam.

Course Requirements

Before graduation, a student must pass a total of four comprehensive exam sequences, but needs to take the comprehensive examinations in only three of them. In addition, a student must pass four more (one-semester) MATH/STAT courses from the seven comprehensive exam sequences listed above.

A student may pass any of the four comprehensive examination sequences before enrolling as a Ph.D. student, but the four additional courses have to be passed after enrolling as a Ph.D. student.

The following courses will not count towards the course requirements:

Any course below MATH 501

MATH 511	Fundamentals of Elementary Mathematics I	3
MATH 512	Fundamentals of Elementary Mathematics II	3
MATH 513	Fundamentals of Algebra and Geometry I	3
MATH 516	Calculus with Hands-on Application	3
MATH 563	Algebra with Connections	3
MATH 564	From Number to Algebra	3
MATH 566	Data Analysis with Applications	3
MATH 567	From Measurement to Geometry	3
MATH 568	Using Number Throughout the Curriculum	3
MATH 569	Geometry with Connections	3
MATH/STAT 540	Directed Reading	1-6
MATH 599	Master's Thesis	15

MATH 600	Doctoral Research	1-15
MATH 700	Doctoral Dissertation	1-15

Students and advisors are encouraged to consider further courses beyond this minimum.

Oral Comprehensive Exam

The student must take this exam at the end of the semester after completing the written comprehensive exams. The student should present a proposed direction for thesis work.

Final Oral Exam

This should be an exam over the student's thesis and administered by the same committee of the oral comprehensive exam.

Mathematics - Master of Science

The Master's degree is designed to increase one's knowledge and understanding of mathematics beyond the Bachelor's degree level. It also prepares a student for future graduate work.

A candidate for a master's degree may select up to two minors in addition to the major. A minimum of 8 credits of graduate work is necessary for a minor.

Minimum Requirements for the Master's Degree

1. In fulfillment of the Graduate School requirement of a minimum of 30 semester credits of course work, the student must take at least 24 credits of mathematics or statistics, numbered above 500.
2. At most 6 credits of individual study courses such as MATH 540 Directed Reading may be used to fulfill the course requirement.
3. MATH 511 Fundamentals of Elementary Mathematics I through MATH 516 Calculus with Hands-on Application, and MATH 563 Algebra with Connections through MATH 569 Geometry with Connections may not be used to fulfill any of these requirements.
4. The student's program of study must be approved by the departmental Graduate Studies Committee.
5. The student must successfully complete a final master's examination.

Minimum Requirements

MATH 525	Advanced Linear Algebra ¹	3
MATH 527	Introduction to Real Analysis I ¹	3
MATH 528	Introduction to Real Analysis II ¹	3
MATH 581	Algebra I ¹	3
Select two of the following:		6
MATH 582	Algebra II	
MATH 591	Complex Analysis I	
MATH 592	Complex Analysis II	
MATH 531	Ordinary Differential Equations	
MATH 532	Partial Differential Equations	
MATH 557	Axiomatic Set Theory	
MATH 585	Universal Algebra	
STAT 562	Foundations of Probability	
STAT 571	Continuous Multivariate Analysis	
MATH 593	Measure and Integration	

MATH 594	Real Analysis	
MATH 541	Topology I	
MATH 542	Topology II	
Select an additional 6 credits from 500-level or above courses		6
Total Credits		24

¹ The student must complete, transfer or challenge these courses.

The Master's Final Examination

The Master's final examination is an oral examination administered by the student's committee and covers the student's coursework. The student's committee consists of at least three departmental members and a Graduate faculty member from another department who serves as the Dean's representative. If the student has a minor area of study, then a member must come from the minor department. The examination is restricted to course work presented in the student's program of studies. When a master's thesis has been written, the master's final exam will be in part an oral defense of the thesis and in part a general examination of the candidate's course work. The oral exam must be completed at least 10 days prior to the end of the semester in which the candidate wishes to receive the degree.

Mathematics - Undergraduate Minor

A student must pass 18 or more credit hours in MATH and STAT courses, with at least 9 of the credits in upper division courses and three of those 9 credits in courses numbered above 400.

Requirements

Select 18 credits or more in MATH and STAT courses, with at least 9 of the credits in upper division courses and three of those 9 credits in courses numbered above 400:¹

The following courses are excluded from the minor:

Courses numbered below MATH 190		
MATH 200	Directed Study	
MATH 210G	Mathematics Appreciation	
MATH 300	Readings	
MATH 313	Fundamentals of Algebra and Geometry I	
MATH 316	Calculus with Hands-on Applications	
MATH 400	Undergraduate Research	
MATH 459	Survey of Geometry	
MATH 498	Directed Reading	
STAT 400	Undergraduate Research	
Select one from the following (at most):		3
STAT 251G	Statistics for Business and the Behavioral Sciences	
STAT 271G	Statistics for Psychological Sciences	
STAT 371	Statistics for Engineers and Scientists I	
Total Credits		18

¹ MATH 401 Special Topics must be approved by the department for credit toward the minor. Any course taught outside the Department of Mathematical Sciences but cross-listed with a MATH or STAT course, must also be approved by the department for credit toward the minor. A student may not earn a bachelor's degree in mathematics or a supplementary major in applied mathematics and also earn a minor in mathematics.

Military Science

Undergraduate Program Information

The Military Science program leads to a commission as an officer in the Army Reserve, National Guard or Active Duty Army. The program consists of four parts:

1. the student's academic major,
2. nondepartmental courses of value to the military service,
3. courses in military science and
4. a six-week Leader Development and Assessment course.

The department offers a four-year program divided into two parts: the basic course (two years) and the advanced course (two years). Selected students may qualify for the two-year program with prior military service or successful completion of a six-week summer Leaders' Training Course. Financial assistance and scholarships are available for qualified individuals. Students should contact the Department of Military Science to obtain additional information.

Requirements

Courses should be taken in sequence, normally one per semester. The student's Military Science advisor will recommend course sequence. Military Science students must sign up for and attend courses plus laboratories. Departmental requirements may not be taken S/U.

Basic Course Freshman

M SC 110	Introduction to Military Science	2
M SC 111	Introduction to Leadership	2

Basic Course Sophomore

M SC 210	Self/Team Development	3
M SC 211	Leadership in Action and Team Building	3
M SC 225	Directed Studies	1-3

Advanced Course Junior

M SC 310	Leading Small Organizations I	3
M SC 310 L	Advanced Course Leadership Laboratories	1
M SC 320	Leading Small Organizations II	3
M SC 320 L	Leading Small Organization Lab	1
M SC 325	Advanced Directed Studies	1-3
M SC 350	Leadership Internship II	1-6

Advanced Course Senior

M SC 401	Leadership Challenges and Goal Setting	3
M SC 401 L	Advanced Course Leadership Laboratories	1
M SC 402	Transition to Lieutenant	3
M SC 402 L	Transition to Lieutenant Lab	1
M SC 425	Practicum	1-4
M SC 465	Leading Small Organization - Graduate Level	3
M SC 465 L	Advanced Course Leadership Lab - Graduate Level	1
M SC 501	Leadership Challenges and Goal Setting	3

Nondepartmental Requirements

Select one course in Military History to meet Professional Military Education requirements. ¹	3
Total Credits	40-52

¹ See your Military Science advisor for specific courses.

Minors for the Department

Military Science - Undergraduate Minor (p. 366)

LTC Blanca E. Reyes, Department Head

Assistant Professors and Staff MAJ George W. Childs, MSG Ray L. Miller, SFC Scott Thrasher, SGT Brandon Cadena, CPT Michael Rivera, Mr. John Martin, Lisa I. Anthony, Patti Alarcon

M SC 110. Introduction to Military Science

2 Credits (2+1P)

Concepts of leadership, including basic drill, fitness sessions, rappelling, first aid, map reading, and basic marksmanship. Optional physical fitness sessions and weekend exercises.

M SC 111. Introduction to Leadership

2 Credits (2+1P)

Learning and application of leadership, as well as relating organizational ethics to effective leadership using communication skills to improve individual performance. Optional physical fitness sessions and weekend exercises.

M SC 210. Self/Team Development

3 Credits (3+1P)

Learning and application of leadership skills to building effective teams, using oral/written skills, planning, and coordination of group efforts. Include advanced first aid, land navigation, and basic military tactics. Leadership Lab and three physical fitness sessions per week required.

M SC 211. Leadership in Action and Team Building

3 Credits (3+1P)

Individual and team aspects of military tactics in small unit operations. Use of radio, movement, planning for safety/security and pre-execution checks. Continued leadership development and techniques for training others. Leadership Lab and three physical fitness sessions per week required.

M SC 225. Directed Studies

1-3 Credits

Individual directed studies under supervision of designated faculty. May be repeated for a maximum of 12 credits. No S/U option.

Prerequisite: GPA 2.5 or better.

M SC 310. Leading Small Organizations I

3 Credits

Practical opportunities to lead small groups in situations of graduated complexity. Use of small unit defensive tactics and opportunities to conduct training for lower division students. Leadership Lab M SC 310L, three physical fitness sessions per week, and weekend exercises required.

Prerequisite: must meet Basic Course of Military Science requirements.

Corequisite: M SC 310L.

M SC 310 L. Advanced Course Leadership Laboratories

1 Credit

Planning, coordination, execution and evaluation of training and activities with basic course students and ROTC program. Students develop and refine leadership skills in positions of responsibility. Open only to students taking M SC 310.

Corequisite: M SC 310.

M SC 320. Leading Small Organizations II

3 Credits

Delegation and supervision based on leadership case studies that require planning and adaptation to the unexpected in organizations under stress. Use of ethical decision making to enhance team performance. Leadership Lab M SC 310L, three physical fitness sessions per week, and weekend exercises required.

Prerequisite: M SC 310 or consent of instructor.

Corequisite: M SC 320L.

M SC 320 L. Leading Small Organization Lab

1 Credit

Practice and refinement of leadership skills. Different roles assigned for students at different levels in the program. Planning, coordination, execution and evaluation of training and activities with basic course students and ROTC program. Open to students taking M SC 320.

Corequisite: M SC 320.

M SC 325. Advanced Directed Studies

1-3 Credits

Directed individual study of advanced subjects. May be repeated for a maximum of 12 credits. No S/U option.

Prerequisite: GPA 2.5 or better.

M SC 350. Leadership Internship II

1-6 Credits (1-6)

Six-week paid internship conducted at an Army installation. Leadership-course environment is highly structured and demanding. Stresses leadership at small-unit levels under varying conditions. Evaluations during this required internship weigh heavily in type of commission and branch assignment offered.

Prerequisite(s): M SC 310, M SC 310L, M SC 320, and M SC 320L.

M SC 401. Leadership Challenges and Goal Setting

3 Credits

Planning, conducting and evaluating activities of the ROTC cadet organization, including the articulation of goals, and actuation of plans to attain them. Assessment of organizational skills and development of strategies to improve group cohesion through learning and application of Army policies and programs. M SC 401L, three physical fitness sessions per week, and weekend exercises required.

Prerequisite: M SC 320 or consent of instructor.

Corequisite: M SC 401L.

M SC 401 L. Advanced Course Leadership Laboratories

1 Credit

Different roles assigned for students at different levels in the program. Practice and refinement of leadership skills. Planning coordination, execution and evaluation of training and activities with basic course students and ROTC program. Open only to students taking M SC 401.

Corequisite: M SC 401.

M SC 402. Transition to Lieutenant**3 Credits**

Continues methodology from M SC 401. Identification and resolution of ethical dilemmas along with counseling and motivation techniques. Examination of tradition and law as these issues relate to the Army officer and prepare the student to be a successful Army lieutenant. Leadership Lab M SC 402L, three physical fitness sessions per week and weekend exercises required.

Prerequisite: M SC 401 or consent of instructor.

Corequisite: M SC 402L.

M SC 402 L. Transition to Lieutenant Lab**1 Credit**

Different roles assigned for students at different levels in the program. Practice and refinement of leadership skills. Planning, coordination, execution, and evaluation of training and activities with basic course students and ROTC program. Open only to students taking M SC 402.

Corequisite: M SC 402.

M SC 425. Practicum**1-4 Credits**

Independent projects conducted under the direction of designated faculty, and concerned with analysis of selected leadership or management problems. May be repeated for a maximum of 16 credits. No S/U option.

M SC 465. Leading Small Organization - Graduate Level**3 Credits**

Practical opportunities to lead small groups in situations of graduated complexity. Use of small unit defensive tactics and opportunities to conduct training for graduate students. Leader Lab M SC 465L, three physical fitness sessions per week and weekend exercises required. Research paper required. No S/U option.

Prerequisite: consent of PMS.

Corequisite: M SC 465L.

M SC 465 L. Advanced Course Leadership Lab - Graduate Level**1 Credit**

Planning, coordination, execution and evaluation of training and activities with basic course students and ROTC program. Students develop and refine leadership skills in positions of responsibility. Open only to students taking M SC 465.

Prerequisite: consent of PMS.

Corequisite: M SC 465.

M SC 501. Leadership Challenges and Goal Setting**3 Credits (3+1P)**

Planning, conducting, and evaluating activities of ROTC cadet organization. Articulation of goals and plans to attain them. Assessment of organizational skills and development of strategies to improve group cohesion. Leadership lab, three physical fitness sessions per week, weekend exercise, and research paper required. Consent of instructor required.

Prerequisite(s): Consent of PMS.

Corequisite(s): M SC 401L.

M SC 502. Transition to Lieutenant**3 Credits (3+1P)**

Continuation of M SC 501. Identification and resolution of ethical dilemmas. Counseling and motivation techniques. Examination of tradition and law for officers. Leadership lab, three physical fitness sessions per week, weekend exercises, and research paper required. Consent of instructor required.

Prerequisite(s): Consent of PMS.

Corequisite(s): M SC 402L.

Military Science - Undergraduate Minor

The minor in Military Science is administered by the Department of Military Science (Army ROTC) in the College of Arts and Sciences. To obtain a minor in Military Science a student must complete a total of 19 credits, all of which must be upper division. A grade of C- or better must be obtained for each course. The only credits in which a grade of S will be accepted is M SC 350 Leadership Internship II. Students should contact the Department of Military Science to obtain additional information.

Molecular Biology Graduate Program Information

Students of the molecular life sciences seek to reduce complex biological processes to a set of understandable molecular or chemical structure and function relationships. Integration of this knowledge into the context of complex living tissues interacting with the environment is the ultimate goal. This requires that the expertise from many diverse traditional disciplines be directed along converging experimental lines. The Ph.D. program in molecular biology is designed to facilitate an interdisciplinary approach to graduate research, utilizing both traditional techniques and the latest advances in biotechnology, including the extraordinary power of recombinant DNA methodology. Participants in this program will take core courses in biochemistry, molecular biology and cell biology. Subsequent course work will be tailored for the individual student, depending upon his or her research emphasis. Participation in regular seminar programs will be expected to provide students with the widest possible scientific background. Financial aid, in the form of a limited number of MB teaching and research assistantships, is available on a competitive basis. Research Assistantships may also be available from individual faculty within the Molecular Biology (MB) program. Only the most competitive students are admitted with assistantship support.

The MB program offers curricula leading to the MS and Ph.D. degrees in the areas of biochemistry, molecular genetics, molecular biology, cell biology, bioinformatics, and microbiology. Admission to the MB Program without deficiency is based on an undergraduate program essentially equivalent to that pursued by an undergraduate major in chemistry, biology, agronomy, horticulture, biochemistry, or microbiology at this university. An entering student is required to complete the Graduate Record Examination (General Aptitude). Undergraduate deficiency courses must be passed with a minimum grade of B.

Applicants are strongly encouraged to contact at least three individual program faculty before applying to identify a prospective advisor and laboratory in which to pursue graduate research. Previous course records and GPA standings (typically minimum of 3.3/4.0), GRE scores (typically minimum of 300 combined verbal and quantitative), TOEFL scores of foreign applicants (typically minimum of 550 on the paper-based or 213 on the computer-based), a letter of interest from the applicant that identified faculty laboratories of interest, and three letters of reference

regarding research performance or potential are weighted heavily during the selection process.

Students with a BS degree in one of the disciplines listed above can expect to earn the MS degree in about 30 credits, including at least 6 credits of thesis research. The Ph.D. degree can be earned in about 30 to 40 credits of formal course work, plus additional thesis research credits, for a minimum total of 75 credits beyond the BS. Because research is central in both the MS and Ph.D. curricula, early selection of a research advisor is required. Ph.D. degree candidates will successfully complete a written and oral qualifying examination based on their proposed research and the subject matter in the core courses (below) at the end of the first year of study. Also at this time, the master's or doctoral committee is organized to assist in planning a program appropriate to the background and goals of the student. Ph.D. candidates will subsequently complete a comprehensive written examination and oral examination approximately at the end of the second year of study. A final, formal presentation and oral defense of the original research documented in the MS or Ph.D. thesis completes the degree requirements.

Degrees for the Department

Molecular Biology - Master of Science (p. 369)

Molecular Biology - Doctor of Philosophy (p. 368)

Minors for the Department

Bioinformatics (with Computer Science) - Graduate Minor (p. 368)

Molecular Biology - Graduate Minor (p. 369)

Molecular Biology- Undergraduate Minor (p. 369)

A. Ashley, Ph.D. (Colorado State University)– Department of Chemistry and Biochemistry– cellular response to DNA replication stress and damage; maintenance of genomic integrity in eukaryotes; R. Ashley, Ph.D. (Colorado State University)– Department of Animal and Range Sciences– progesterone's actions mediated by membrane receptors, and chemokines' effects in early pregnancy and breast cancer; R. Creamer, Ph.D., (University of California-Davis)– Department of Entomology Plant and Weed Science– plant virology, fungal endophytes; D. Cowley, Ph.D. (University of Wisconsin-Madison)– Department of Fish, Wildlife and Conservation Ecology – ecological and conservation genetics; J. Curtiss, Ph.D. (University of Colorado-Boulder)– Department of Biology– molecular genetics of eye development; K. A. Hanley, Ph.D. (University of California San Diego)– Department of Biology– emerging vector-borne viruses; I. Hansen, Ph.D. (University of Wurzburg, Germany)– Department of Biology– molecular vector biology; S. Hanson (Wisconsin)– Department of Entomology Plant and Weed Science– viral plant pathogens; J. Hernandez Gifford, Ph.D. (Washington State University)– Department of Animal and Range Sciences– reproductive physiology; O. Holguin, Ph.D. (New Mexico State University)– Department of Plant and Environmental Sciences– biochemistry including etabolomics and proteomics with a focus on chemical analysis technique; J. Houston, Ph.D. (Texas A&M University)– Department of Chemical & Materials Engineering– biomedical engineering, flow cytometry, fluorescence dynamics, biophotonics, and instrumentation development; K. Houston, Ph.D. (University of Texas)– Department of Chemistry and Biochemistry– hormonal carcinogenesis; E. Indriolo, Ph.D. (Purdue University) – Department of Biology – plant signaling, molecular biology; P. Lodato, Ph.D. (University of Chile)– Department of Biology– understanding post-transcriptional mechanisms regulating the assembly of the T3SS and Shiga toxin production; G. Lopez-Martinez, Ph.D. (Ohio State University)–

Department of Biology– short and long-term effects that single and repeated bouts of environmental stress can have on animals; S. Lusetti, Ph.D. (University of Wisconsin-Madison)– Department of Chemistry and Biochemistry– DNA replication, recombination and repair; B. A. Lyons, Ph.D. (Cornell University)– Department of Chemistry and Biochemistry– structure and function relationships in breast and liver cancer cell signaling pathways; P. Mera, Ph.D. (University of Wisconsin-Madison)– Biochemistry/Toxicology– identify genetic modules that control cell proliferation in pathogenic bacteria in order to uncover novel targets for new antibiotics; B.G. Milligan, Ph.D. (University of California-Davis)– Department of Biology– plant evolutionary biology; M. K. Nishiguchi, Ph.D. (University of California-Santa Cruz)– Department of Biology– molecular and ecological basis of speciation, coevolution of symbiotic relationships; N. Pietrasiak, Ph.D. (University of California-Riverside)– Department of Plant and Environmental Sciences– cyanobacterial phylogenetics, molecular ecology of terrestrial algae, biocrusts; J. Randall, Ph.D. (New Mexico State University)– Department of Plant and Environmental Sciences– molecular plant physiology and plant/microbe interactions; I. Ray, Ph.D. (Wisconsin-Madison)– Department of Plant and Environmental Sciences– plant genetic engineering, primary and secondary metabolism, stress, legumes; C. Sengupta-Gopalan, Ph.D. (Ohio State)– Department of Plant and Environmental Sciences– nitrogen-fixation, plant-bacterial interactions; E. E. Serrano, Ph.D. (Stanford)– Department of Biology– neuroscience, genetics, science and ethics; C. B. Shuster, Ph.D., Program Director (Tufts University)– Department of Biology– regulation of mitosis and cytokinesis, role of the cytoskeleton during early development; G. Smith, Ph.D. (North Carolina State)– Department of Biology– environmental gene probes, microbial biodegradation; A. Summers, Ph.D. (University of Nebraska-Lincoln) – Department of Animal and Range Sciences– identification of strategic supplementation time points and nutrients during gestation to improve progeny growth, development and reproduction; W. Van Voohries, Ph.D. (Arizona)– Molecular Biology Program– animal and algae physiology; J. Xu, Ph.D. (Second Military Medical University, China)– Department of Biology– functional genomics and population genetics of mosquito-malaria interactions; E. Yukl (Oregon Health and Science University) – Department of Chemistry and Biochemistry– structural biology and bioinorganic chemistry; J. Zhang, Ph.D. (University of Arkansas)– Department of Plant and Environmental Sciences– cotton genetics, genomics and molecular biology

MOLB 448. Special Research Problems

1-3 Credits

Individual investigation, theoretical or experimental, under the supervision of a molecular biology faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

MOLB 520. Molecular Cell Biology

3 Credits

Same as BIOL 520.

MOLB 542. Biochemistry I

3 Credits

Same as BCHE 542. B or better required.

MOLB 545. Molecular and Biochemical Genetics

3 Credits

Same as BCHE 545 and BIOL 545.

MOLB 546. Biochemistry II

3 Credits

Same as BCHE 546.

MOLB 550. Topics in Molecular Biology**1-3 Credits**

Selected topics of current interest in field of molecular biology for master's level students.

MOLB 590. Discussions in Molecular Biology**1 Credit**

Oral presentations of ongoing research and/or research proposal for the masters thesis. Must be repeated twice for masters and three times for doctoral students. Graded by 2 options: S/U or Letter Grade

MOLB 597. Laboratory Rotations/Research Discussions**1-3 Credits**

All entering students are required to take at least one credit, during their first semester, in which they will circulate through at least three different labs working on assigned problems and discussing research programs. May be repeated for a maximum of 4 credits. Graded S/U.

MOLB 598. Special Research Programs**1-3 Credits**

Individual investigation, experimental or theoretical, under the supervision of a molecular biology faculty member. Course may be repeated up to a total of 6 credits with committee approval.

MOLB 599. Master's Thesis**15 Credits**

Experimental and scholarly research leading to the preparation of a master's thesis.

MOLB 600. Molecular Biology Research**1-15 Credits**

Laboratory research efforts prior to successful completion of doctoral comprehensive exam.

MOLB 650. Advanced Topics in Molecular Biology**1-3 Credits**

Discussions and lectures on topics of current interest in molecular biology for doctoral students.

MOLB 698. Advanced Research Projects**1-9 Credits**

Individualized special research assignments for doctoral-level students. Up to 9 credits, with approval of committee. Graded S/U.

MOLB 700. Doctoral Dissertation Research**15 Credits**

Research for doctoral students after completing comprehensive exams.

Bioinformatics (with Computer Science) - Graduate Minor

The Bioinformatics minor is jointly offered with the Department of Computer Science and consists of 9 credit hours for Master's students and 12 credit hours for Ph.D. students, including BIOL 550 Special Topics/GENE 452 Applied Bioinformatics, and additional courses selected from those listed at <http://research.nmsu.edu/molbio/>. The courses selected will depend on whether the student is majoring in a biological or non-biological science and include courses from the graduate Computer Science and Molecular Biology curricula. Please inquire with the Molecular

Biology Program office for the most recent requirements for the bioinformatics minor.

Molecular Biology - Doctor of Philosophy

Phase I Core Courses

MOLB 520	Molecular Cell Biology	3
MOLB 542	Biochemistry I	3
MOLB 545	Molecular and Biochemical Genetics	3

Molecular Biology Tier II Courses

Select at least 9 credits from the following: 9

AGRO 506	Plant Genetics
AGRO 516	Molecular Analysis of Complex Traits
ANSC 602	Advanced Reproductive Physiology (fo)
ANSC 602 L	Molecular Techniques in Reproductive Physiology (fo)
ANSC 621	Metabolic Functions and Dysfunctions (fe)
BCHE 494	Biochemical Genetics Laboratory
BCHE 546	Biochemistry II
BCHE 645	Nucleic Acid Metabolism
BCHE 647	Physical Biochemistry
BIOL 451	Physiology of Microorganisms
BIOL 470	Developmental Biology
BIOL 474	Immunology
BIOL 475	Virology
BIOL 477	Applied and Environmental Microbiology
BIOL 478	Molecular Biology of Microorganisms
BIOL 490	Neurobiology
BIOL 541	Professional Development Seminar
BIOL 550	Special Topics
BIOL 577	Advanced Topics in Environmental Microbiology
BIOL 590	Advanced Neurobiology
BIOL 698	Selected Topics
CHEM 516	Physical Organic Chemistry
CHEM 517	Synthetic Organic Chemistry
EPWS 486	Plant Virology
MOLB 546	Biochemistry II
MOLB 550	Topics in Molecular Biology
MOLB 650	Advanced Topics in Molecular Biology
TOX 461	Toxicology I

Other Course Requirements

A ST 505	Statistical Inference I (or equivalent course)	4
MOLB 590	Discussions in Molecular Biology	1
MOLB 597	Laboratory Rotations/Research Discussions	1-3
MOLB 599	Master's Thesis ¹	6
PHIL 540	Science and Ethics (or equivalent course)	1-3

Total Credits 31-35

¹ MS candidates must enroll for 6 credits MOLB 599 Master's Thesis. May register for additional credits to maintain full-time status.

The Molecular Biology program also offers formal minors in molecular biology or bioinformatics.

Molecular Biology - Graduate Minor

The Molecular Biology Minor consists of 10 credit hours including MOLB 545; either MOLB 520 or MOLB 542; any of the tier II courses; and one MOLB 590 seminar.

Required Courses

MOLB 545	Molecular and Biochemical Genetics	3
MOLB 520 or MOLB 542	Molecular Cell Biology Biochemistry I	3
MOLB 590	Discussions in Molecular Biology	1

Molecular Biology Tier II Courses

Select one from the following:		3
AGRO 506	Plant Genetics	
AGRO 516	Molecular Analysis of Complex Traits	
ANSC 602	Advanced Reproductive Physiology (fo)	
ANSC 602 L	Molecular Techniques in Reproductive Physiology (fo)	
ANSC 621	Metabolic Functions and Dysfunctions (fe)	
BCHE 494	Biochemical Genetics Laboratory	
BCHE 546	Biochemistry II	
BCHE 645	Nucleic Acid Metabolism	
BCHE 647	Physical Biochemistry	
BIOL 451	Physiology of Microorganisms	
BIOL 470	Developmental Biology	
BIOL 474	Immunology	
BIOL 475	Virology	
BIOL 477	Applied and Environmental Microbiology	
BIOL 478	Molecular Biology of Microorganisms	
BIOL 490	Neurobiology	
BIOL 541	Professional Development Seminar	
BIOL 550	Special Topics	
BIOL 577	Advanced Topics in Environmental Microbiology	
BIOL 590	Advanced Neurobiology	
BIOL 698	Selected Topics	
CHEM 516	Physical Organic Chemistry	
CHEM 517	Synthetic Organic Chemistry	
EPWS 486	Plant Virology	
MOLB 546	Biochemistry II	
MOLB 550	Topics in Molecular Biology	
MOLB 650	Advanced Topics in Molecular Biology	
TOX 461	Toxicology I	

Total Credits 10

Molecular Biology - Master of Science

The MB program offers curricula leading to the MS and Ph.D. degrees in the areas of biochemistry, molecular genetics, molecular biology, cell biology, bioinformatics, and microbiology. Admission to the MB Program without deficiency is based on an undergraduate program essentially equivalent to that pursued by an undergraduate major in chemistry, biology, agronomy, horticulture, biochemistry, or microbiology at this university. An entering student is required to complete the Graduate Record Examination (General Aptitude). Undergraduate deficiency courses must be passed with a minimum grade of B.

Applicants are strongly encouraged to contact at least three individual program faculty before applying to identify a prospective advisor and laboratory in which to pursue graduate research. Previous course records and GPA standings (typically minimum of 3.3/4.0), GRE scores (typically minimum of 300 combined verbal and quantitative), TOEFL scores of foreign applicants (typically minimum of 550 on the paper-based or 213 on the computer-based), a letter of interest from the applicant that identified faculty laboratories of interest, and three letters of reference regarding research performance or potential are weighted heavily during the selection process.

Students with a BS degree in one of the disciplines listed above can expect to earn the MS degree in about 30 credits, including at least 6 credits of thesis research. Because research is central in both the MS and Ph.D. curricula, early selection of a research advisor is required. The master's committee is organized to assist in planning a program appropriate to the background and goals of the student. A final, formal presentation and oral defense of the original research documented in the MS thesis completes the degree requirements.

MS candidates must enroll in MOLB 599 Master's Thesis for 6 credits. May register for additional credits to maintain full-time status.

Molecular Biology- Undergraduate Minor

Undergraduate Minor in Molecular Biology:

The Molecular Biology Program offers opportunities for students to gain theoretical training and hands-on experience in the methods of molecular biology, cellular biology, and/or bioinformatics. A formal undergraduate minor in Molecular Biology is offered and is described below; a grade of C or better is required to certify the courses. A minor in Bioinformatics is currently under development; for planning purposes, please refer to the program office for the most recent drafts of the Bioinformatics minor requirements.

This program consists of a minimum of 18 hours, distributed through five or six areas.

Organic Chemistry: 4-5

CHEM 314	Organic Chemistry II
CHEM 315	Organic Chemistry Laboratory
CHEM 211	Organic Chemistry

Introductory Genetics: 3

AGRO 305	Principles of Genetics
ANSC 305	Principles of Genetics
BIOL 305	Principles of Genetics

HORT 305	Principles of Genetics	
Cell Biology:		3

Total Credits		18-19

¹ Additional credit hours from the following, or additional courses from any of the above five areas, as needed to meet a minimum of 18 credit hours

Successful completion of the minor will be certified by the Molecular Biology Program. A grade of "C" or better is required of all minor courses.

Music

Undergraduate Program Information

Mission Statement

The mission of the Music Department at NMSU is:

1. to prepare students for careers in music education, business and/or performance;
2. to give the student body opportunities to perform, study, create and experience music;
3. to enhance the cultural lives of our constituency by performance of superior music; and
4. to create an artistic environment which fosters the development of personal realizations we believe to be essential to the fabric of a healthy society.

All students are required to meet the State Common Core as well as the College of Arts and Sciences general education requirement (p. 176) as listed in earlier sections of this catalog. Please see a Music Department advisor for a specific list of courses.

Admission into the Program

For a student to be officially accepted as a Music major or minor, he/she must do the following:

- perform an audition for a panel of no less than three Music faculty members
 - one of whom must be the director of his/her program area
 - one of whom must be the applied teacher of the student's principal instrument

- provide recommendation letters from at least two music professionals
- take a Music Theory placement exam

Any student declaring Music as his/her major may be accepted for a one-semester probationary period. During that first semester, the Music faculty will determine if the student has the necessary skills and work ethic to continue as a major. The student's course work, ensemble participation and applied jury will be the basis for the decision to allow the student to continue or not.

Departmental Requirements for all Bachelor's Degrees (Music Core)

A student must earn a grade of C- or better in all departmental requirements for any degree in the Department of Music. All students wishing to pursue a music degree must audition and take the theory placement exam. Contact the department for current audition requirements.

Students enrolled in this department's major(s) or minor(s) may count credits in required applied courses toward their degrees beyond the normal maximum of 9 credits allowed in the College of Arts and Sciences. However, if students change major(s) or minor(s) or do not complete the requirements for the minor at the time of graduation, they may only count a maximum of 9 credits of the applied/occupational credits toward graduation.

Recital Requirements for all Music Degrees

Bachelor of Music

All performance majors are required to give a half recital (30 minutes of music) in the junior year and a full recital (60 minutes of music) in the senior year. Students taking the Music Business option will give a half recital in their major performance area.

Bachelor of Music Education

All music education majors will give a half recital (30 minutes of music) in their major performance area.

Applied Music Requirements for All Music Degrees

All Music degrees require at least two semesters of applied music study at the 430 level.

All students enrolling in applied music will audition and obtain permission from an applied teacher before enrolling for applied music credit.

Students may obtain further information by contacting the music department.

Other Music Requirements, Fees and Regulations

1. A Piano Proficiency Examination is required of all music majors. Each student must enroll in Functional Piano or Applied Piano every semester, until the Proficiency is passed. Detailed requirements may be obtained from the Department of Music office. Students must pass the piano Proficiency Exam before presenting a Senior Recital.
2. Qualitative grade-point average for graduation in music is 2.0 or higher. All grades in required music courses must be C- or better.
3. A Music Theory Placement Examination is required of all entering freshman and transfer students.
4. An instrument rental fee is charged each semester for students using university instruments. Consult the music department concerning these fees.

5. All applied students pay an additional fee. Consult the music department concerning these fees.
6. Outside groups and individuals must have special permission to use music department facilities. Contact the music office for additional information.

Music Ensembles

All students majoring or minoring in Music, must enroll and participate in the ensemble appropriate for their particular degree plan. The appropriate ensemble will be determined by degree requirements in consultation with the student's advisor and ensemble directors. The student must enroll each and every semester he/she is considered full-time until the degree requirements are met, for a minimum of 8 semesters (7 semester for Music Education majors). Any student receiving any kind of financial assistance through the Music Department must enroll each and every semester while he/she is attending NMSU. Music Education Students will not receive Music Scholarship funds during their semester of Student Teaching. For more information, contact the Music Office.

Music Scholarships and Awards

A limited number of performance stipends and other music scholarships are available to any full-time registered student and are awarded through the department. Amounts awarded will reflect excellence and achievement in performance, determined by audition—either in person or by a recording—and references.

For more information on performance stipends and other music scholarships and awards, write to:

Department of Music
PO Box 30001, MSC 3 F
Las Cruces, New Mexico 88003-8001
E-mail: music@nmsu.edu.

Graduate Program Information

The Master of Music degree is offered in the following areas of study: Conducting, Music Education and Performance. Applicants are expected to have an undergraduate degree in music or music education equivalent to that represented by the BM or BME degree from New Mexico State University. The music department does not require the Graduate Record Exam, but does expect each applicant to possess graduate-level language and writing skills. For admission into the Master of Music degree program, all applicants must have an undergraduate GPA of at least 3.0 and submit at least three letters of recommendation from music professionals. An audition, either in person or by recording, is required for entrance into the Performance or Conducting programs. Auditions will be based upon, but not limited to, prescribed repertory.

For acceptance into the Music Education program, the applicant must have completed a Bachelor of Music Education degree comparable to the one offered by NMSU or take the requisite undergraduate courses at NMSU leading to state licensure before enrolling in graduate courses. (Contact the Music Department for details.)

Note: The degree offered is a Master of Music. The student's official transcript and diploma will only indicate that degree. The area of study (Conducting, Music Education, Performance) will not be included as part of the official degree title.

Recital Requirements for Performance and Conducting

A graduate recital plus an analytical paper are required of all candidates in Performance and Conducting. Students must be enrolled in their applied area during the semester the recital is given. A minimum of 60

minutes of music is required for all Performance recitals. A minimum of three major works for the appropriate ensemble is required for all Conducting recitals. The recital may only be given after at least 6 hours of graduate applied or conducting courses have been successfully completed.

Program of Study and Committee Selection

After admission, each student must successfully complete MUS 471 Graduate Theory Review before subsequent enrollment in other music theory courses. He or she must also successfully complete MUS 477 Graduate Music History Review before subsequent enrollment in other music history courses.

During the first semester of study, a tentative Program of Study is planned, documented and filed by the student in consultation with the advisor in his or her major field. The Program of Study is subject to approval by the Music Department Head and the Graduate Music Committee. The student will also select, in consultation with his or her advisor, an advisory committee consisting of the advisor, and two additional faculty members.

Candidacy

In order to qualify for candidacy the student (except those in the online Music Education program) must meet the Graduate School requirement of 12 credits of graduate work in residence and must show evidence of a satisfactory quality of work in the required courses, demonstrate the desired progress in his or her performance area and, where required, submit a recital program, thesis topic, or project proposal for approval.

Thesis

A thesis is optional in Music Education and is encouraged for students considering completion of a terminal degree. Music Education candidates not writing a thesis must develop and complete an approved project before the oral examination.

Final Examination

All Master of Music candidates must take a final comprehensive oral examination. The final oral examination may not be scheduled until the graduate recital (with analytical paper) is completed or a final draft of the Music Education project or thesis has been approved by the candidate's advisor.

Fees

Fees, in addition to tuition, will be assessed for all applied hours and recitals. (Consult the Music Department for details).

Degrees for the Department

Music - Bachelor of Music (p. 379)

Music Education - Bachelor of Music Education (p. 382)

Music - Master of Music (p. 381)

Minors for the Department

Music - Undergraduate Minor (p. 381)

Professor, Lon W. Chaffin, Department Head

Professors Borchert, Kaplan, Klein, Romero, Shearer; **Associate Professors** Bugbee, Daughtrey, Flanery, Joy, Martinez-Rios, Spitzer, Vega-Albela;

Assistant Professors Espinoza, Gollo, L. Van Winkle; **College Associate Professors** Taylor; **College Instructor** Brennan

L. Chaffin, Department Head, Ph.D. (Texas Tech)– theory, composition; L. Borchert, D.M.A. (Florida State)– clarinet, history; K. Brennan, D.M.A. (Michigan State)–double reeds, theory; F. Bugbee, D.M.A. (Eastman School of Music)– percussion, history; S. Daughtrey, D.M. (Indiana University)– vocal coordinator, diction, pedagogy; J. Flanery, D.M.A. (Kentucky)–Director of Choral Studies, conducting; S. Gollo (Conservatoire de Musique, Switzerland)–Orchestra Director, violin; N. Joy, M.M. (NMSU)– horn, Music Education; A. Kaplan, Ph.D. (NYU Manhattan School of Music)– low brass; J. Martinez-Rios, M.M (Western Michigan)– viola; F. Romero, D.M.A. (University of Oklahoma)– trumpet, jazz; J. Shearer, D.M.A. (Eastman School of Music)– graduate coordinator, history; L. Spitzer, D.M.A. (USC)– piano, history; R. Taylor, D.M.A (Arizona)– saxophone, theory; L. Van Winkle, D.M.A. (Arizona) flute, ear-training; D. Vega-Albela M.M. (Western Michigan)–violin

MUS 101G. An Introduction to Music

3 Credits

An introduction to music for the non-music major to encourage the enjoyment of listening to and understanding the world's great music from the past to the present.

MUS 102. Fundamentals of Music

3 Credits

Introduction to music notation, meter and rhythm, scales, intervals, triads, seventh chords, fundamentals of harmonic progression, and aural skills. For students with little or no music theory background. Traditional Grading with RR.

MUS 103. Ear Training I

1 Credit

To develop the ability to accurately hear, identify, sing and notate musical elements including rhythm, melody, intervals and harmony Traditional Grading with RR. Restricted to Las Cruces campus only.

Prerequisite(s): Passing the Theory Placement exam or making a C or better in MUS 102.

MUS 104. Ear Training II

1 Credit

To develop the ability to accurately hear, identify, sing and notate musical elements including rhythm, melody, intervals and harmony Restricted to Las Cruces campus only.

Prerequisite(s): Grade of C- or better in MUS 103.

MUS 105. Music Theory I

3 Credits

Introduction to vocabulary and syntax of 4-voice 18th c. chorale music through study and harmonic analysis.

Prerequisite(s): Passing the Theory Placement exam or making a C or better in MUS 102.

MUS 106. Music Theory II

3 Credits

Expansion of vocabulary and syntax of 4-voice 18th c. chorale music through study, harmonic analysis, and part writing.

Prerequisite(s): Grade of C or better in MUS 105.

MUS 117. Jazz Improvisation

2 Credits

Techniques for extemporaneous playing; jazz harmonic practice. Traditional Grading with RR. Restricted to Las Cruces campus only.

Prerequisite(s): A grade of C or better in MUS 103 and MUS 105.

MUS 121. Concert and Recital Laboratory

0.5 Credits

Serves as a resource and performance lab for all applied areas of musical study. Music majors are expected to perform during the weekly student recital and must attend a designated number of musical performances during the semester. May be repeated up to 4 credits. Restricted to: Music and Music Education majors. S/U Grading with RR. Restricted to Las Cruces campus only.

MUS 130. Applied Music

1-2 Credits

Private or group instruction for non-music majors, secondary instruments, and music majors preparing for 200-level applied music. May be taken for unlimited credit.

MUS 141. Class Voice I

1 Credit

Group instruction in voice and vocal pedagogy for instrumental Music Education majors, offering basic principles of healthy vocal production with particular attention to diction, development of vocal range, and the ability to impart that knowledge to elementary, junior and/or high school age students. Restricted to: Music Education majors. Traditional Grading with RR. Restricted to Las Cruces campus only.

MUS 145. Functional Piano I

2 Credits

Scales, chords, memorization. Harmonization of simple melodies with the ability to play simple melodies and rhythms. May be taken for unlimited credit. Restricted to music majors. No S/U option.

MUS 146. Functional Piano II

2 Credits

Scales, chords, memorization. Harmonization of simple melodies with the ability to play simple melodies and rhythms. May be taken for unlimited credit. Restricted to music majors. No S/U option.

Prerequisite: MUS 145 or consent of instructor.

MUS 147. Functional Piano III

2 Credits

For music majors preparing for the Piano Proficiency Examination. May be taken for unlimited credit. Restricted to music majors. No S/U option.

Prerequisite: MUS 146 or consent of instructor.

MUS 150. Orchestra

1 Credit

Participation in the Las Cruces Symphony at NMSU. This is a full symphony orchestra concentrating on masterworks of the literature. May be taken for unlimited credit.

MUS 151. Philharmonic Orchestra

1 Credit

The University Philharmonic Orchestra is open to all students and performs a wide variety of standard orchestral literature. The orchestra performs each semester and the objectives include refining technique, stylistic characteristics, intonation, balance, bowings, color, rhythmic integrity and dynamics. May be repeated up to 10 credits. Restricted to Las Cruces campus only.

Prerequisite(s): by audition only.

MUS 160. University Singers

1 Credit

Select concert and touring choir of undergraduate and graduate students performing a cappella and accompanied choral literature. May be repeated up to 10 credits. Restricted to Las Cruces campus only.

Prerequisite(s): By audition only.

MUS 161. Concert Choir**1 Credit**

Campus choir composed of both music and non-music majors. Emphasis on vocal techniques, sight-singing, and basics of choral musicianship. May be taken for unlimited credit.

MUS 162. Master Works Chorus**1 Credit**

Combination campus and community chorus. This group will perform the major chorale compositions for orchestra and/or wind ensemble. May be taken for unlimited credit.

MUS 163. Jazz Ensembles**1 Credit**

Performance ensemble that explore repertoire written for big band, including (but not limited to) dance band, swing, and contemporary compositions. May be repeated up to 10 credits. Restricted to Las Cruces campus only.

Prerequisite(s): By audition only.

MUS 164. Chamber Ensembles**1 Credit**

Small groups of singers and/or instrumentalists that perform chamber music. May be repeated up to 16 credits. Restricted to Las Cruces campus only.

Prerequisite(s): by audition only.

MUS 170. Wind Symphony**1 Credit**

This elite ensemble of 50 highly qualified graduate and undergraduate students performs a varied repertoire of the highest quality literature for winds. Members will also perform concerts of chamber winds literature each semester. This ensemble is dedicated to professional level performance while fostering the musical growth of its members. Conducted by the Director of Bands, this group serves as the flagship for the entire university bands program. May be repeated up to 10 credits. Restricted to Las Cruces campus only.

Prerequisite(s): By audition only.

MUS 171. Roadrunner Revue Pep Band**1 Credit**

For both music and nonmusic majors. Opportunity to perform a variety of music in a showband setting. May be taken for unlimited credit.

Prerequisite: by audition only; contact band office for date and time.

MUS 172. Marching Band**1 Credit**

For both music and nonmusic majors. Opportunity to perform all varieties of music in a contemporary styled marching unit. May be taken for unlimited credit.

MUS 174. Percussion Ensemble**1 Credit**

Study and performance of contemporary percussion ensemble literature. May be repeated up to 5 credits. Restricted to Las Cruces campus only.

Prerequisite(s): by audition only.

MUS 180. Symphonic Band**1 Credit**

This is a select large ensemble, chosen by audition. It provides a challenging musical environment for skilled performers by programming repertoire that ranges from works for chamber winds, to standards of the wind band literature, to cutting edge literature. Conducted by the Associate Director of Bands, this ensemble is comprised of music majors and non-music majors alike and provides the less experienced student an opportunity to hone and refine performance skills. May be repeated up to 10 credits. Restricted to Las Cruces campus only.

Prerequisite(s): By audition only.

MUS 181. Campus Band**1 Credit**

This is a non-auditioned ensemble designed to meet the needs of students from all majors across campus. Music majors are encouraged to enroll while performing on a secondary instrument. Marching band members are also encouraged to take the course to build skills and leadership. This ensemble provides an educational experience and serves as an outlet for students who wish to remain musically active in a less intense setting. May be repeated up to 10 credits. Restricted to Las Cruces campus only.

MUS 201G. History of Jazz in Popular Music: A Blending of Cultures
3 Credits

Jazz in popular music as it relates to music history and the development of world cultures.

MUS 202. An Introduction to World Music, Jazz and Music Research
3 Credits

Introduces world music and jazz within a historical and cultural context, considering significant musical figures, forms, genres, styles, and representative works. A major component will be the development of effective research and scholarly writing skills for the music major or minor. May be repeated up to 3 credits. Restricted to: Music majors and minors. majors. Restricted to Las Cruces campus only.

MUS 203. Ear Training III**1 Credit**

Continuation of MUS 104, advanced sight singing, dictation. Restricted to Las Cruces campus only.

Prerequisite(s): Grade of C- or better in MUS 104.

MUS 204. Ear Training IV**1 Credit**

Continuation of MUS 203, advanced sight singing, dictation. Restricted to Las Cruces campus only.

Prerequisite(s): Grade of C or better in MUS 203 and MUS 205.

MUS 205. Music Theory III
3 Credits

Analysis of Baroque and Classical Music. Vocabulary and syntax of 18th and 19th c. Western art music through study, chordal/formal analysis, and composition. Restricted to Las Cruces campus only.

Prerequisite(s): Grade of C or better in MUS 106.

MUS 206. Music Theory IV
3 Credits

Analysis of Romantic, Post-Romantic, Impressionist, and Twelve-Tone Music. Vocabulary and syntax of late 19th and early 20th c. Western art music through study, micro/macro analysis, and composition. Restricted to Las Cruces campus only.

Prerequisite(s): Grade of C or better in MUS 205.

MUS 207. Music History and Literature: Antiquity through Baroque
3 Credits

Surveys Western art music within a historical and cultural context, considering significant musical figures, forms, genres, styles, and representative works from antiquity through the end of the Baroque era. An additional emphasis will be given to effective research and scholarly writing skills. Restricted to: M ED, MUS majors.

Prerequisite(s): A grade of C- or better in MUS 103, 105, and 202.

MUS 230. Applied Music I
1-4 Credits

Individual instruction to develop technique, musicianship, performance and improvisational skills, as well as knowledge of significant repertoire. May be repeated up to 16 credits. Consent of Instructor required.

Restricted to: Music and Music Education majors. Traditional Grading with RR. Restricted to Las Cruces campus only.

Prerequisite(s): Audition.

MUS 250. Introduction to Music Education
2 Credits

Overview of the basic principals and practices of the music education profession in K-12 settings, emphasizing philosophy and history of music education, methodologies commonly utilized in school curricula, music in special education, classroom/rehearsal management and lesson planning. Explores many aspects of public school teaching through class discussions and directed observations. Restricted to Las Cruces campus only.

MUS 251. Opera Workshop
1 Credit

Study, translation, analysis, rehearsal and performance of opera. May be repeated up to 10 credits. Restricted to Las Cruces campus only.

Prerequisite(s): by audition only.

MUS 260. Special Topics I
1-3 Credits

Emphasis on special areas of music; designed for highly motivated students. May be taken for unlimited credit.

MUS 261. Functional Piano IV
2 Credits

For music majors preparing for Piano Proficiency Examination. May be taken for unlimited credit. Restricted to music majors. No S/U option.

Prerequisite: MUS 147 or consent of instructor.

MUS 262. Diction I
2 Credits

Introduction to the international phonetic alphabet, and its application to English, Italian, Spanish, and Latin song literature. Main campus only. Restricted to Las Cruces campus only.

MUS 263. Diction II
2 Credits

Advanced grammar and detailed study of Italian, German and French diction and song literature for vocal students. Restricted to music majors. Main campus only.

Prerequisite: MUS 262 or consent of instructor.

MUS 273. Introduction to Music Technology
1 Credit

Introduction to uses of technology in musical settings. Practical applications in digital music notation, MIDI sequencing, and digital audio recording. Restricted to: MUS, M ED majors. Traditional Grading with RR. Restricted to Las Cruces campus only.

Prerequisite(s): MUS 105.

MUS 301. Marching Band Techniques
2 Credits

This course will help students develop the techniques needed to administer and teach all aspects of a contemporary high school marching band. This includes drill conception and design, instruction, organization, and administration. Stylistic varieties of marching fundamentals, show conception, fundamentals of charting and teaching drill, computer-aided drill design, traditional show design, contemporary show design, rehearsal techniques, and organizational concepts. Restricted to: Music, Music Education majors. Traditional Grading with RR.

MUS 302. Music History and Literature: Classic through Romantic
3 Credits

Surveys Western art music within a historical and cultural context, considering significant musical figures, forms, genres, styles, and representative works from the beginnings of the Classic era through the end of the Romantic era. An additional emphasis will be given to effective research and scholarly writing skills. Restricted to: Music Majors and Minors majors.

Prerequisite(s): A grade of C- or better in MUS 207.

MUS 303. Music History and Literature: 20th Century Through the Present
3 Credits

Surveys Western art music within a historical and cultural context, considering significant musical figures, forms, genres, styles, and representative works from the beginning of the 20th Century through the Present. An additional emphasis will be given to effective research and scholarly writing skills. Restricted to: MUS minors and majors.

Prerequisite(s): A grade of C- or better in MUS 302.

MUS 315. Brass Techniques I
1 Credit

Methods and techniques of teaching high brass instruments, for music education majors. Main campus only.

MUS 316. Brass Techniques II
1 Credit

Methods and techniques of teaching low brass instruments, for music education majors. Main campus only.

MUS 317. Woodwind Techniques I
1 Credit

Methods and techniques of teaching high woodwind instruments, for music education majors. Main campus only.

MUS 318. Woodwind Techniques II
1 Credit

Methods and techniques of teaching saxophone and double reed instruments, for music education majors. Main campus only.

MUS 319. String Techniques I
1 Credit

Methods and techniques of teaching low string instruments, for music education majors. Main campus only.

MUS 320. String Technique II
1 Credit

Methods and techniques of teaching high string instruments, for music education majors. Main campus only.

MUS 321. Instrumental Techniques for Vocal Music Education Majors
2 Credits

Methods of teaching brass, woodwind, percussion, stringed and fretted instruments for vocal music education majors. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUS 322. Guitar Methods**1 Credit**

Methods and techniques of teaching guitar, for Music Education majors. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUS 323. Percussion Technique I**1 Credit**

Methods and techniques of teaching percussion instruments with a focus on snare drum, timpani and accessory. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUS 324. Percussion Technique II**1 Credit**

Methods and techniques of teaching percussion instruments with a focus on keyboard percussion, marching percussion and drum set. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUS 325. Beginning Conducting**1 Credit**

A study of the fundamentals of conducting and rehearsal strategies with an emphasis on beginning technique applicable to all ensembles. Reading of musical scores with application via laboratory ensemble experience is included. Restricted to: Music and Music Education majors. Traditional Grading with RR.

Prerequisite(s): A grade of C or better in MUS 204 and 206.

MUS 326. Instrumental Conducting**3 Credits**

Will continue from MUS 325 in the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques as it relates to the instrumental ensemble. The class will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. May be repeated up to 3 credits. Restricted to: MUS, M ED majors. Traditional Grading with RR.

Prerequisite(s): A grade of C- or better in MUS 325.

MUS 327. Choral Conducting**3 Credits**

Continuation of conducting study with emphasis on choral rehearsal techniques, ensemble management, and literature. Restricted to: Music and Music Education majors. Traditional Grading with RR.

Prerequisite(s): A grade of C or better in MUS 325.

MUS 330. Applied Music II**1-4 Credits**

Continuation from MUS 230. Individual instruction to develop technique, musicianship, performance and improvisational skills, as well as knowledge of significant repertoire. May be repeated up to 16 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

Prerequisite(s): A grade of C or better in MUS 230 plus a juried audition.

MUS 339. Survey of Music Business**3 Credits**

Survey of career options and exploration of current events/trends within the Music Industry. Non-Music Business majors may be admitted with instructor's approval.

MUS 340. Junior Recital**1 Credit**

Public solo performance under the supervision of the appropriate applied instructor. 30 minutes of musical performance is required. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

Corequisite(s): MUS 330.

MUS 346. Elementary Music Methods**2 Credits**

Lesson planning, curriculum, teaching methodology, materials, and procedures for teaching music in an elementary school. Emphasis on methodology of Koday and Orff, teaching in a multicultural setting, and developing reflective practitioners. This course requires field experience in the public schools. Restricted to: Music Education majors.

Prerequisite(s): A grade of C or better in MUS 250 and passing the TEP exam.

MUS 349. Secondary Music Methods**2 Credits**

Lesson planning, curriculum, teaching methodology, materials, and procedures for teaching music in the middle school and high school. Emphasis on teaching in a multicultural setting and developing reflective practitioners. Restricted to: Music Education majors.

Prerequisite(s): A grade of C or better in MUS 346.

MUS 350. Chamber Music**1 Credit**

Small performing ensembles that may include strings, woodwinds, brass, pianos, percussion, and voices. May be repeated up to 16 credits.

Prerequisite(s): by audition only.

MUS 351. Opera Workshop**1 Credit**

Study, translation analysis, rehearsal and performance of opera. May be repeated up to 10 credits.

Prerequisite(s): by audition only.

MUS 360. Special Topics II**1-3 Credits**

Emphasis on special areas of music; designed for highly motivated students. May be taken for unlimited credit.

MUS 361. Concert Choir II**1 Credit**

Composed of both music and nonmusic majors. Emphasis on vocal techniques, sight-singing, and basics of choral musicianship. Students must assume leadership role. May be repeated up to 88 credits.

Prerequisite(s): by audition only.

MUS 362. Philharmonic Orchestra II**1 Credit**

The University Philharmonic Orchestra is open to all students and performs a wide variety of standard orchestral literature. The orchestra performs each semester and the objectives include refining technique, stylistic characteristics, intonation, balance, bowings, color, rhythmic integrity and dynamics. May be repeated up to 10 credits.

Prerequisite(s): by audition only.

MUS 363. Jazz Ensembles II**1 Credit**

Performance ensemble that explore repertoire written for big band, including (but not limited to) dance band, swing, and contemporary compositions. May be repeated up to 10 credits.

Prerequisite(s): by audition only.

MUS 365. Composition I**2 Credits**

Significant forms for various media. Emphasis on structural aspects of original composition. Restricted to: M ED, MUS majors.

Prerequisite(s): A grade of B or better in MUS 105.

MUS 366. Composition II**2 Credits**

Applied larger forms. Emphasis on larger vocal and instrumental works.

Prerequisite(s): B or better in MUS 365.

MUS 368. University Singers II**1 Credit**

Select concert and touring choir of undergraduate and graduate students performing a cappella and accompanied choral literature. May be repeated up to 10 credits. Consent of Instructor required.

Prerequisite(s): by audition only.

MUS 370. Wind Symphony II**1 Credit**

This elite ensemble of 50 highly qualified graduate and undergraduate students performs a varied repertoire of the highest quality literature for winds. Members will also perform concerts of chamber winds literature each semester. This ensemble is dedicated to professional level performance while fostering the musical growth of its members. Conducted by the Director of Bands, this group serves as the flagship for the entire university bands program. May be repeated up to 10 credits.

Prerequisite(s): by audition only.

MUS 372. Marching Band II**1 Credit**

Composed of both majors and nonmajors. Opportunity to perform all varieties of music in a contemporary style marching unit. May be repeated up to 5 credits. Consent of Instructor required. Traditional Grading with RR.

MUS 374. Percussion Ensembles II**1 Credit**

Study and performance of contemporary percussion ensemble literature. Students must assume a leadership role. May be repeated up to 5 credits.

Prerequisite(s): by audition only.

MUS 380. Symphonic Band II**1 Credit**

This is a select large ensemble, chosen by audition. It provides a challenging musical environment for skilled performers by programming repertoire that ranges from works for chamber winds, to standards of the wind band literature, to cutting edge literature. Conducted by the Associate Director of Bands, this ensemble is comprised of music majors and non-music majors alike and provides the less experienced student an opportunity to hone and refine performance skills. May be repeated up to 10 credits.

Prerequisite(s): by audition only.

MUS 381. Campus Band II**1 Credit**

This is a non-auditioned ensemble designed to meet the needs of students from all majors across campus. Music majors are encouraged to enroll while performing on a secondary instrument. Marching band members are also encouraged to take the course to build skills and leadership. This ensemble provides an educational experience and serves as an outlet for students who wish to remain musically active in a less intense setting. May be repeated up to 10 credits.

MUS 386. Applied Music Pedagogy and Literature I**2 Credits**

Methods, materials, problems, literature, and techniques in teaching individual lessons. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUS 390. Survey of Wind Literature**2 Credits**

An examination of beginning to advanced literature for wind bands with an emphasis on the needs of middle and high school ensembles. It will include a means to determine the quality of a piece as well as the standardized level of difficulty (grading). Restricted to: Music and Music Education majors.

Prerequisite(s): A grade of C- or better in MUS 204 and 206.

MUS 391. Survey of Orchestral Literature**2 Credits**

An examination of beginning to advanced literature for both string orchestra and symphony orchestra with an emphasis on the needs of middle and high school ensembles. A means to determine the quality of a piece as well as the standardized level of difficulty (grading) will be included. Restricted to: Music and Music Education majors.

Prerequisite(s): A grade of C- or better in MUS 204 and 206.

MUS 392. Survey of Choral Literature**2 Credits**

An examination of beginning to advanced literature for choir with an emphasis on the needs of middle and high school ensembles. A means to determine the quality of a piece as well as the standardized level of difficulty (grading) will be included. Restricted to: Music and Music Education majors.

Prerequisite(s): A grade of C- or better in MUS 204 and 206.

MUS 413. Form and Analysis**3 Credits**

Forms in tonal music and basic analytic techniques including music from diverse cultures and media.

Prerequisite(s): A grade of C- or better in MUS 204 and MUS 206.

MUS 415. Orchestration**3 Credits**

Scoring for full orchestra and various instrumental combinations with consideration of instrument timbres, strengths, weaknesses and ranges. Restricted to: Music and Music Education majors.

Prerequisite(s): A grade of C or better in MUS 204 and 206.

MUS 417. Studio Accompanying**2 Credits**

Practical application of collaborative piano skills in a studio setting for Piano Performance majors. May be repeated up to 8 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUS 420. Music of the Middle Ages and Renaissance**3 Credits**

An overview of the music of the Middle Ages and Renaissance eras with an emphasis on history and literature.

Prerequisite(s): MUS 303.

MUS 421. Music of the Baroque Era**3 Credits**

An overview of the music of the Baroque era with an emphasis on history and literature.

Prerequisite(s): MUS 303.

MUS 422. Music of the Classic Era**3 Credits**

An overview of the music of the Classic era with an emphasis on history and literature.

Prerequisite(s): MUS 303.

MUS 423. Music of the Romantic Era**3 Credits**

An overview of the music of the Romantic era with an emphasis on history and literature.

Prerequisite(s): MUS 303.

MUS 424. Music of the Twentieth Century**3 Credits**

An overview of the music of the Twentieth Century with an emphasis on history and literature. Consent of Instructor required.

Prerequisite(s): MUS 303.

MUS 429. Opera and Music Drama**3 Credits**

Lyrical drama of the Greeks through works of Wagner and Verdi to contemporary opera.

Prerequisite: MUS 303 or consent of instructor.

MUS 430. Applied Music III**1-4 Credits**

Continuation from MUS 330. Individual instruction to develop technique, musicianship, performance and improvisational skills, as well as knowledge of significant repertoire. May be repeated up to 16 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

Prerequisite(s): A grade of C or better in MUS 330 plus a juried audition.

MUS 440. Senior Recital**1-2 Credits (1-2)**

Public solo performance under the supervision of the appropriate applied instructor. 60 minutes of musical performance is required for enrollment of 2 hours credit. 30 minutes of musical performance is required for enrollment of 1 hour credit. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

Corequisite(s): MUS 430.

MUS 441. Supervised Studio Teaching**2 Credits**

Teaching of private lessons under supervision. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUS 450. Research Methods**3 Credits**

Introduction to methodology of music research. Emphasis on important scholarly resources and academic writing. Restricted to majors. Main campus only. No S/U option.

Prerequisite: consent of instructor.

MUS 451. Orchestra II**1 Credit**

Las Cruces Symphony at NMSU, a full symphony orchestra concentrating on masterworks of the literature. Students must assume a leadership role. May be repeated up to 88 credits.

Prerequisite(s): by audition only.

MUS 455. Music Business Internship**3 Credits**

Capstone course for the Music Business degree. Working with the music business coordinator, students must have been accepted as an intern in a music business setting before enrolling. Credit given for the internship based on criteria developed for each placement. Restricted to majors. S/U only.

Prerequisites: MUS 330 and piano proficiency.

MUS 465. Composition III**2 Credits**

Emphasis on extended compositional techniques, serialization, and modern counterpoint. Consent of Instructor required. Restricted to: Music majors. Traditional Grading with RR.

MUS 466. Composition IV**2 Credits**

New music notation and techniques. Open forms, aleatory concepts. Consent of Instructor required. Restricted to: Music majors. Traditional Grading with RR.

Prerequisite(s): MUS 465.

MUS 470. Special Topics III**1-3 Credits**

Designed for highly motivated students. Independent study and individual guidance. May be taken for unlimited credit.

MUS 471. Graduate Theory Review**3 Credits**

Comprehensive and accelerated study of modes, diatonic harmony, and classical form of the common practice period. Restricted to: Music majors. Traditional Grading with RR.

MUS 475. Intermediate Conducting**3 Credits**

Serves as a bridge from undergraduate conducting study to the graduate level. Advanced undergraduate students may enroll to learn how the graduate program in conducting functions. The course also serves as the introductory experience for newly admitted graduate conducting majors. After successful completion of this course, students will be able to: Study musical scores from a conducting perspective; Demonstrate effective predetermined gestures and movements; Lead an ensemble; Research and give presentations related to composers and their music; Demonstrate advanced knowledge of conducting practices.

Prerequisite(s): A grade of C- or better in MUS 326 or 327.

MUS 476. Music Cultures of the World: History and Criticism**3 Credits**

Listening, criticism, and analysis of musical cultures around the world. Emphasis on non-Western musical traditions and folk music of the world. Open to all majors.

MUS 477. Graduate Music History Review**3 Credits**

Comprehensive and accelerated study of music history from antiquity to the present. Restricted to: Music majors. Traditional Grading with RR.

MUS 486. Applied Music Pedagogy and Literature II**2 Credits**

Methods, materials, problems, literature, and techniques in teaching individual lessons. Consent of Instructor required. Restricted to: Music majors. Traditional Grading with RR.

MUS 498. Independent Study**1-3 Credits**

For students with a strong musical background wishing to explore content beyond the traditional curriculum. Restricted to majors. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

MUS 511. Survey of Traditional Harmony**3 Credits**

Tonal harmony in common practice and theory of the late 17th, 18th, and early 19th centuries. Restricted to: Music majors. Traditional Grading with RR.

Prerequisite(s): A grade of B or better in MUS 471.

MUS 513. Twentieth Century Art Music**3 Credits**

Analytical techniques, structural design and compositional materials from Debussy to the Minimalist school in historical context. Restricted to: Music majors.

Prerequisite(s): A grade of B or better in MUS 471.

MUS 514. Advanced Composition**3 Credits**

Original composition in 20th century idioms.

Prerequisite: MUS 466.

MUS 518. Seminar in Music Theory**3 Credits**

Varying topics in Music Theory, providing a more specific and in-depth study of the particular topic. May be repeated up to 6 credits. Restricted to: Music majors. Traditional Grading with RR.

Prerequisite(s): A grade of B or better in MUS 471.

MUS 519. Seminar in Music History**3 Credits**

Varying topics in Music History, providing a more specific and in-depth study of the particular topic. May be repeated up to 6 credits. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUS 477.

MUS 520. Music of the Middle Ages and Renaissance: History and Literature**3 Credits**

An overview of the music of the Middle Ages and Renaissance with an emphasis on history and literature. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUS 477.

MUS 521. Music of the Baroque Era: History and Literature**3 Credits**

An overview of the music of the Baroque Era with an emphasis on history and literature.

MUS 522. Music of the Classical Era: History and Literature**3 Credits**

An overview of the music of the Classical era with an emphasis on history and literature. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUS 477.

MUS 523. Music of the Romantic Era: History and Literature**3 Credits**

An overview of Romantic era music, with an emphasis on history and literature. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUS 477.

MUS 527. History and Analysis of the Symphony**3 Credits**

Historical background and development of the symphony from its inception (ca. 1740s) to mid-twentieth century. Analysis of major works by significant composers with emphasis on Sonata form. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUS 471 and 477.

MUS 528. The Symphony in Historical Context**3 Credits**

Considers the historical development of the symphony, as a musical genre, from its inception to the 20th century. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUS 477.

MUS 529. Opera and Music Drama**3 Credits**

Lyric drama of the Greeks through works of Wagner and Verdi to contemporary opera. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUS 477.

MUS 530. Seminar in Music Education**3 Credits**

Varying topics in Music Education, providing a more specific and in-depth study of the particular topic. Restricted to: MUS majors.

MUS 531. Music in Elementary Schools**3 Credits**

This course is designed to provide experiences which will help the student gain skills to appropriately enhance the musical growth of children in K–6 classrooms. The course participants personal skill and understanding of musical concepts will be developed; musical needs and capabilities of young children will be investigated; methods of teaching music to young children will be explored. Restricted to: MUS (Music Ed track only) majors.

MUS 535. Current Issues in Music Education**3 Credits**

This course examines the rich and challenging complexities of music teaching and learning from a variety of perspectives. Educational theory to pedagogical inquiry of current educational practice will be examined, calling students to critically reflect on such professional activities as lesson planning, curriculum design, repertoire choice, program assessment, advocacy in the arts, and student evaluation. Restricted to: MUS (Music Ed track only) majors.

MUS 540. Graduate Recital/Analytical Paper**4 Credits**

This course is for students completing a Master of Music with a Performance emphasis. A public recital will be given and an accompanying research paper will be submitted. Restricted to: MUS majors.

MUS 574. Advanced Choral Conducting I**3 Credits**

This course will continue the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUS 475.

MUS 575. Advanced Choral Conducting II**3 Credits**

This is the final course in preparation for the student's graduate conducting concert. It will continue the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUS 574.

MUS 576. Advanced Instrumental Conducting I**3 Credits**

The role of the conductor is to lead, react to, alter, and reinforce the performance of the ensemble. This course will continue in the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUS 475.

MUS 577. Advanced Instrumental Conducting II**3 Credits**

The role of the conductor is to lead, react to, alter, and reinforce the performance of the ensemble. This course will continue in the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUS 576.

MUS 578. Advanced Choral Literature**2 Credits**

An examination of significant choral works from 1200 to the present, including composers, genres, and historical context. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUS 475.

MUS 579. ADV INSTR LIT**2 Credits**

An examination of significant instrumental works from the Baroque period to the present, including composers, genres, and historical context. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUS 475.

MUS 580. Ensemble Performance**1 Credit**

Performance in university ensembles. May be repeated up to 99 credits.

Prerequisite(s): by audition only.

MUS 582. Applied Music**2-4 Credits**

For music majors, individual instruction, including improvisation skills and techniques. Students may enroll for 2 or 4 credits. May be repeated for a maximum of 16 credits.

Prerequisites: audition and consent of instructor.

MUS 586. Applied Music Pedagogy and Literature III**2 Credits**

Methods, materials, problems, literature, and techniques in teaching individual lessons. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUS 486.

MUS 590. Supervised Studio Teaching**2 Credits**

Teaching of private lessons under supervision.

MUS 598. Special Research Programs**1-4 Credits**

May be taken for unlimited credit.

MUS 599. Master's Thesis**15 Credits**

Thesis.

Music - Bachelor of Music

The Bachelor of Music (BM) curriculum is designed to prepare students for performance careers and private studio teaching and serves as a foundation for advanced study toward master's and doctoral degrees: M.M., D.M.A., or Ph.D in Music. In addition, the BM degree may lead to positions as professional entertainers or teachers at the college and university levels, or lead to music related work in the business world.

Concentration: Instrumental Performance

Requirements - Basic Music and Performance

Music Theory and Ear Training

MUS 103	Ear Training I	1
MUS 105	Music Theory I	3
MUS 203	Ear Training III	1
MUS 205	Music Theory III	3
MUS 104	Ear Training II	1
MUS 106	Music Theory II	3
MUS 204	Ear Training IV	1
MUS 206	Music Theory IV	3
MUS 413	Form and Analysis	3

History and Literature

MUS 202	An Introduction to World Music, Jazz and Music Research	3
MUS 207	Music History and Literature: Antiquity through Baroque	3
MUS 302	Music History and Literature: Classic through Romantic	3
MUS 303	Music History and Literature: 20th Century Through the Present	3
One 400-level music history course		3

Techniques

MUS 273	Introduction to Music Technology	1
MUS 325	Beginning Conducting	1
MUS 326 or MUS 327	Instrumental Conducting Choral Conducting	3
MUS 386	Applied Music Pedagogy and Literature I	2
MUS 415	Orchestration	3
MUS 441	Supervised Studio Teaching	2

MUS 486	Applied Music Pedagogy and Literature II	2
Performance		
MUS 121	Concert and Recital Laboratory (take for eight semesters for a total of 4 credits)	4
MUS 230 & MUS 330 & MUS 430	Applied Music I and Applied Music II and Applied Music III (Applied Music (Instrumental) must take for a total of 20 credits)	20
MUS 340	Junior Recital	1
MUS 440	Senior Recital	1-2
Applied or Functional Piano		4
Instrumental Ensemble		12
Total Credits		90-91

Note:

- All Music Majors must take MUS 430 for a minimum of 2 semesters.
- Music Performance students must take MUS 440 (Senior Recital) for 2 credits.

Piano Proficiency

- Students must pass Piano Proficiency before presenting a Senior Recital.
- Students must enroll for Functional Piano until the Proficiency is passed.

Science Requirement

- Students must complete PHYS 120G Introduction to Acoustics.

Concentration: Piano Performance Requirements - Basic Music and Performance

Music Theory and Ear Training

MUS 103	Ear Training I	1
MUS 105	Music Theory I	3
MUS 203	Ear Training III	1
MUS 205	Music Theory III	3
MUS 104	Ear Training II	1
MUS 106	Music Theory II	3
MUS 204	Ear Training IV	1
MUS 206	Music Theory IV	3
MUS 413	Form and Analysis	3

History and Literature

MUS 202	An Introduction to World Music, Jazz and Music Research	3
MUS 207	Music History and Literature: Antiquity through Baroque	3
MUS 302	Music History and Literature: Classic through Romantic	3

Performance		
MUS 121	Concert and Recital Laboratory (take for eight semesters for a total of 4 credits)	4
MUS 230 & MUS 330 & MUS 430	Applied Music I and Applied Music II and Applied Music III (Applied Music (vocal) must take for a total of 19 credits)	19
MUS 340	Junior Recital	1
MUS 440	Senior Recital	1-2
Choral Ensembles		6
Opera Ensembles		6
Applied or Functional Piano		4
Support Courses		
FREN 111	Elementary French I	4
GER 111	Elementary German I	4
Total Credits		93-94

Note:

- All Music Majors must take MUS 430 for a minimum of 2 semesters.
- Music Performance students must take MUS 440 (Senior Recital) for 2 credits.

Piano Proficiency

- Students must pass Piano Proficiency before presenting a Senior Recital.
- Students must enroll for Functional Piano until the Proficiency is passed.

Science Requirement

- Student must complete PHYS 120G Introduction to Acoustics.

Music - Master of Music**Area of Study: Conducting****Required Courses**

MUS 471	Graduate Theory Review ¹	3
MUS 477	Graduate Music History Review ¹	3
MUS 527	History and Analysis of the Symphony	3
Music Theory		3
Music History and Literature		3
Conducting		9

MUS 450	Research Methods	3
MUS 580	Ensemble Performance	1
MUS 540	Graduate Recital/Analytical Paper	4
Total Credits		32

- ¹ Students must make a B or better before taking additional music theory/music history courses.

Choral Conducting Requirement:

- Choral Conducting students will substitute a Choral Literature course for MUS 527.

Area of Study: Music Education**Requirements**

Students must make the grade of B or better in a course for it to count toward degree completion.

Required Courses

MUS 471	Graduate Theory Review ²	3
MUS 477	Graduate Music History Review ²	3
Music Theory		3
Music History and Literature		3
Music Education		9
Approved Elective		3
MUS 450	Research Methods	3
MUS 598	Special Research Programs	4
or MUS 599	Master's Thesis	
Total Credits		31

- ² Students must make a B or better before taking additional music theory/music history courses.

Area of Study: Performance**Requirements**

MUS 471	Graduate Theory Review ³	3
MUS 477	Graduate Music History Review ³	3
Music Theory		3
Music History and Literature		3
Applied		8
Pedagogy and Literature		4
MUS 450	Research Methods	3
MUS 580	Ensemble Performance	1
MUS 540	Graduate Recital/Analytical Paper	4
Total Credits		32

- ³ Students must make a B or better before taking additional music theory/music history courses.

Music - Undergraduate Minor

A student may not earn both a bachelor's degree in the Department of Music and a minor in Music.

Required Courses

MUS 202	An Introduction to World Music, Jazz and Music Research	3
MUS 103	Ear Training I	1
MUS 105	Music Theory I	3
MUS 104	Ear Training II	1
MUS 106	Music Theory II	3
Upper division elective credits		9
Applied music		2
Ensemble		2
Total Credits		24

Music Education - Bachelor of Music Education

The Bachelor of Music Education (BME) is a diversified four- to five-year degree program of teaching, performance, and specialized studies in music. The goal of this degree is to prepare the student for certification to teach music in the public schools, and serves as a foundation for advanced study toward master's and doctoral degrees: M.M., M.M.E., D.M.A. or Ph.D in music education.

Concentration: K-12 – Instrumental

Requirements: Basic Music and Performance

Music Theory and Ear Training

MUS 103	Ear Training I	1
MUS 104	Ear Training II	1
MUS 203	Ear Training III	1
MUS 204	Ear Training IV	1
MUS 105	Music Theory I	3
MUS 106	Music Theory II	3
MUS 205	Music Theory III	3
MUS 206	Music Theory IV	3
MUS 413	Form and Analysis	3

History and Literature

MUS 202	An Introduction to World Music, Jazz and Music Research	3
MUS 207	Music History and Literature: Antiquity through Baroque	3
MUS 302	Music History and Literature: Classic through Romantic	3
MUS 303	Music History and Literature: 20th Century Through the Present	3

Techniques

MUS 141	Class Voice I	1
MUS 273	Introduction to Music Technology	1
MUS 301	Marching Band Techniques	2
MUS 322	Guitar Methods	1
MUS 325	Beginning Conducting	1
MUS 326	Instrumental Conducting	3
MUS 415	Orchestration	3
Select five from the following:		5
MUS 315	Brass Techniques I	
MUS 316	Brass Techniques II	
MUS 317	Woodwind Techniques I	

MUS 318	Woodwind Techniques II	
MUS 319	String Techniques I	
MUS 320	String Technique II	
MUS 323	Percussion Technique I

- Students must pass the TEP Exam before taking MUS 346 Elementary Music Methods or MUS 349 Secondary Music Methods.
- Students must present Senior Recital before student teaching.

Science Requirement

- Students must complete PHYS 120G Introduction to Acoustics.

Philosophy

Undergraduate Program Information

A major in philosophy serves not only as preparation for further graduate study in philosophy but also as an area of concentration in a liberal arts program. A philosophy major is appropriate for students planning to attend medical school as well as for those students interested in a career that requires critical reading and argument analysis. Such careers include business, theology and above all, law.

While the course requirements for the major should meet the ends of the liberal arts student, those students interested in graduate study in philosophy or in a career in law are encouraged to seek advice from a faculty advisor as early in their career as possible.

A minor program in philosophy requiring 18 hours of course work is also offered as well as a minor in Ethics. For more information visit the Department of Philosophy's web page at [www.nmsu.edu/ \(http://www.nmsu.edu/~philos/~philos/\)](http://www.nmsu.edu/~philos/~philos/).

Degrees for the Department

Philosophy - Bachelor of Arts (p. 386)

Minors for the Department

Ethics - Undergraduate Minor (p. 386)

Philosophy - Undergraduate Minor (p. 386)

Timothy Cleveland, Department Head

Professors Cleveland, Walker; **Associate Professor** Keleher, Vessel; **Assistant Professors** Klockseim; **College Associate Professor** Noonan

PHIL 100G. Philosophy, Law and Ethics

3 Credits

An introduction to practical problems in moral, social, political, and legal philosophy. Topics to be discussed may include ecology, animal rights, pornography, hate speech on campus, same-sex marriage, justice, abortion, terrorism, treatment of illegal immigrants, and New Mexican Aboriginal Peoples' land claims.

PHIL 101G. The Art of Wondering**3 Credits**

Introduction to some of the main problems of philosophy, with an emphasis on critical thinking. Philosophy conceived as an aid to living in this world with oneself and with others.

PHIL 124G. Philosophy of Music**3 Credits**

This is an introductory course in the philosophy of music. This course will survey three questions: What is music? Why is music important? How can we distinguish good music from bad music? We will draw examples from a wide variety of musical genres, from classical music, jazz and blues to punk and rap. Students will be encouraged to apply philosophical theorizing to think about their preferred musical form.

PHIL 136G. The Quest for God**3 Credits**

An effort to understand the religious life; a consideration of some of the traditional approaches to God and what it means to be religious.

PHIL 201G. Introduction to Philosophy**3 Credits**

Selected problems within the main branches of philosophy: metaphysics, theory of knowledge, ethics. Practice given in critical thinking.

PHIL 211G. Informal Logic**3 Credits**

Logical analysis of ordinary language, construction of definitions, argumentation, analysis of fallacious modes of thought and basic rhetorical considerations.

PHIL 223G. Ethics**3 Credits**

The philosophical explication of morality. Significant ethical systems developed in the history of Western thought.

PHIL 302. Business Ethics**3 Credits**

An analysis of the ethical issues that arise in contemporary business life, including the obligations businesses and employees have to each other, consumers, society and the environment.

PHIL 303. Asian Philosophy**3 Credits**

Survey of the most important philosophies of the East; emphasis is on the basic teachings.

PHIL 305. Philosophy and Literature**3 Credits**

Examination of philosophical ideas as presented in selected literary works and literary criticism.

PHIL 306. Philosophy Through Film**3 Credits**

An exploration of a range of philosophical issues through the use of film. Topics include personal identity and memory, faith and the problem of evil, free will and moral responsibility, and the meaning of life. Films may include *The Prestige*, *Memento*, *The Third Man*, *A Clockwork Orange*, *Fight Club*, and *Synecdoche, New York*.

PHIL 312. Formal Logic**3 Credits**

Introduction to symbolic logic and its application in the analysis of arguments in scientific and ordinary discourse.

PHIL 315. Philosophy of Language**3 Credits**

A critical examination of philosophical inquiries into the syntactic, semantic, and pragmatic dimensions of language.

PHIL 316. Philosophy of Mathematics**3 Credits**

Survey of traditional philosophical problems and views concerning the nature of mathematics including such questions as: What is the nature of mathematical knowledge? What is mathematical truth? What is a number? What is proof? What is the relationship between logic and mathematics?

PHIL 320. Social and Political Philosophy**3 Credits**

This course critically examines such fundamental concepts as liberty, equality and human rights.

PHIL 321. Biomedical Ethics**3 Credits**

Examines ethical dimensions of such issues as abortion, euthanasia, and physician-assisted suicide; informed consent as a condition of treating patients and experimenting on subjects; genetic engineering; and alternative reproductive methods, including surrogate motherhood. Also considers what implications moral theories have for these issues.

PHIL 322. Environmental Ethics**3 Credits**

Explores the ethical and topical issues raised by mining and grazing, air and water pollution, factory farming, global warming, and treatment of animals. It also studies some recent ecological movements such as ecofeminism, social ecology, and deep ecology.

PHIL 323V. Engineering Ethics**3 Credits**

The moral legal responsibilities of engineers to clients, employers, the public, and the environment. Topics include criteria for judging when risk is acceptable, the duty to safeguard public health and welfare, conflicts of interest, and whistle-blowing.

Prerequisite: Junior standing or higher.

PHIL 325. Topics in Feminist Philosophy**3 Credits**

Philosophical treatment of issues concerning women, gender, and feminism. Topics may include social and political equality, pornography and freedom of speech, ethical issues raised by reproductive technologies, and feminist critiques of science.

PHIL 327. Ethics and Sports**3 Credits**

Examines contemporary ethical issues related to sports, including the relationship between morally right action and that required for competitive success, strong paternalism in sports, fair play, doping, sportsmanship, and the impact of sports on society.

PHIL 328. Applied Ethics**3 Credits**

Examines the implications of utilitarianism, Kantian ethics, natural law theory, and other moral theories for controversial moral issues such as the death penalty, euthanasia, abortion, genetic engineering, gay marriage, affirmative action, and pornography.

PHIL 330. Ethics and Biomedical Research**3 Credits**

Explores some ethical issues raised by biological and biomedical research. Topics include: possible abuses of genetic engineering, cloning, and genetically modified foods; experimentation on humans and informed consent; animal experimentation; honesty in research and conflicts of interest; and intellectual property.

PHIL 331. Philosophy of Religion**3 Credits**

The nature, fundamental concepts, and problems of religion. Emphasis on the significance of religion for creative and practical value.

PHIL 332. Ethics and Global Poverty**3 Credits**

Philosophical scrutiny of and moral reflection on various aspects of global poverty and foreign aid. For example: Is poverty fundamentally a lack of income, or can it be understood as a failure to meet basic needs, or as a lack of valuable freedom? Do human rights exist? What, if any, are the moral obligations of rich countries to poor countries? Can foreign aid be immoral? How should the answers to these questions influence public policy? Restricted to: Main campus only.

PHIL 341. Ancient Philosophy**3 Credits**

Introduction to the philosophies of the pre-Socratics, Socrates, Plato, Aristotle, with brief discussion of the Epicureans and Stoics.

PHIL 344. Modern Philosophy**3 Credits**

Foundations of contemporary thought: introduction to the philosophies of Descartes, Bacon, Spinoza, Leibniz, Locke, Berkeley, Hume, Kant, and Hegel.

PHIL 346. Philosophy of Mind**3 Credits**

Examination of some of the most influential accounts of the mind, focusing on such issues as the relation between the mind and the body, mental causation and consciousness.

PHIL 350. Epistemology**3 Credits**

Introduction to epistemology. The philosophical critique of alleged ways of knowing. An examination of the nature of truth.

PHIL 351. Philosophy of Science**3 Credits**

Philosophical examination of the methodology of science. The logical, metaphysical, epistemological, and ethical critique of science and its impact on human affairs.

PHIL 361. Special Topics**3 Credits**

Specific subjects announced in the Schedule of Classes. May be repeated for a maximum of 9 credits.

PHIL 363. Independent Studies**1-3 Credits**

For students with some background in philosophy. Independent work in a specific area. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

PHIL 373. Ethical Theory**3 Credits**

The critical examination of the justification of ethical theories with particular attention to the language of moral discourse.

PHIL 376. Philosophy of Law**3 Credits**

Ethical, logical, and epistemological implications of law, together with an analysis of the rhetoric of legal practice.

PHIL 380. Metaphysics**3 Credits**

Introduction to metaphysics: a treatment of such issues as the meaning of existence, the mind-body problem, the problem of universals, and free will versus determinism.

PHIL 397. Existentialism**3 Credits**

The origins of existentialist thought in philosophy and literature, including the thought of Nietzsche, Kierkegaard, Dostoyevsky, Camus, and Sartre. The course covers topics in ethics and political philosophy, metaphysics, philosophical psychology, philosophy of religion, and other sub-disciplines of philosophy.

PHIL 413. Modal Logic**3 Credits**

A formal introduction to the logic of necessity, possibility, and impossibility: the syntactic and semantic aspects of the formal modal systems T, S4, S5, as well as their philosophical implications.

PHIL 448. Writing Philosophy**3 Credits**

A workshop on writing philosophy papers. Includes how to read and understand philosophical writing, organize a paper effectively, present a clear and forceful argument, and avoid common mistakes.

Prerequisite(s): completed 18 hours of philosophy credit.

PHIL 463. Independent Studies**1-3 Credits**

For students with a strong background in philosophy. Independent work in a specific area. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

PHIL 505. Advanced Studies in Philosophy and Literature**3 Credits**

Examination of philosophical issues (e.g. personal identity, free will, moral dilemmas, the meaning of life) as presented in selected literary works and literary criticism. Consent of Instructor required.

PHIL 532. Advance Studies in Ethics and Global Poverty**3 Credits**

Advanced philosophical scrutiny of and moral reflection on various aspects of global poverty and foreign aid. For example: Is poverty fundamentally a lack of income, or can it be understood as a failure to meet basic needs, or as a lack of valuable freedom? Do human rights exist? What, if any, are the moral obligations of rich countries to poor countries? Can foreign aid be immoral? How should the answers to these questions influence public policy? Restricted to: Main campus only.

PHIL 540. Science and Ethics**1-3 Credits (1-3)**

Ethical concerns facing researchers in the basic and applied biological sciences. Coverage of responsible conduct in research including scientific integrity and research misconduct, mentor/trainee responsibilities, data management, authorship, publication practices, human subjects, animal welfare, intellectual property, conflicts of interest and effort and collaborative science. Emphasis on ethical reasoning skills. Discussion of ethical and societal implications of issues selected from a broad range of contemporary research areas (genetics, reproductive biology, environmental sciences, nanoscience, drug discovery, bioengineering, neuroscience). Subtitled. May be repeated for a maximum of 12 credits.

Name:**Office Location:****Phone:** (575) 646-4616**Website:** <http://www.nmsu.edu/~philos/>

Ethics - Undergraduate Minor

A student who earns a Bachelor of Arts in Philosophy may not also earn a minor in Ethics.

Required Courses

PHIL 101G	The Art of Wondering	3
or PHIL 201G	Introduction to Philosophy	
PHIL 211G	Informal Logic	3
or PHIL 312	Formal Logic	
PHIL 373	Ethical Theory	3
Select three from the following, of which at least two must be upper division: ¹		9
C J 425	Issues in Ethics, Law, and Criminal Justice	
HON 225G	History of Ethics	
HON 304V	Dilemmas of War and Peace	
HON 306V	Science, Ethics and Society	
JOUR 377V	Mass Media Ethics	
PHIL 302	Business Ethics	
PHIL 321	Biomedical Ethics	
PHIL 322	Environmental Ethics	
PHIL 323V	Engineering Ethics	
PHIL 327	Ethics and Sports	
PHIL 328	Applied Ethics	
PHIL 330	Ethics and Biomedical Research	
PHIL 332	Ethics and Global Poverty	
SUR 401	Ethics and Professionalism in Surveying and Mapping	
Total Credits		18

¹ Students may earn up to 3 credits in this category from special topics or Honors courses approved by the head of the Department of Philosophy.

Philosophy - Bachelor of Arts

General Education Requirements ¹		35
Viewing a Wider World Requirement ¹		6
Departmental Requirements		
<i>Introductory Philosophy</i>		
PHIL 101G	The Art of Wondering	3
or PHIL 201G	Introduction to Philosophy	
<i>Ethics</i>		
Select one from the following:		3
PHIL 320	Social and Political Philosophy	
PHIL 373	Ethical Theory	
PHIL 376	Philosophy of Law	
<i>Logic</i>		
PHIL 211G	Informal Logic	3
or PHIL 312	Formal Logic	
<i>History of Philosophy</i>		
Select one from the following:		3
HON 227G	Plato and the Discovery of Philosophy	
PHIL 341	Ancient Philosophy	
PHIL 344	Modern Philosophy	
<i>Applied Ethics</i>		
Select one from the following:		3
PHIL 302	Business Ethics	
PHIL 321	Biomedical Ethics	
PHIL 322	Environmental Ethics	
PHIL 323V	Engineering Ethics

PHIL 315	Philosophy of Language	
PHIL 316	Philosophy of Mathematics	
PHIL 346	Philosophy of Mind	
PHIL 350	Epistemology	
PHIL 351	Philosophy of Science	
PHIL 380	Metaphysics	
<i>Philosophical Writing</i>		
PHIL 448	Writing Philosophy	3
Additional Requirements		
Select at least an additional 12 credits in philosophy, 6 of which are courses numbered 300 or above or the following HON courses:		12
Electives		
Select sufficient electives to bring total to 120, including 48 upper-division. ²		43
Total Credits		120

¹ For more information about General Education Courses, please see the General Education Courses (p. 47) section of the catalog.

² HON 225G, HON 227G and HON 228G will also satisfy this requirement.

Philosophy - Undergraduate Minor

A student who earns a Bachelor of Arts in Philosophy may not also earn a minor in Philosophy.

Required Courses

PHIL 101G	The Art of Wondering	3
or PHIL 201G	Introduction to Philosophy	
PHIL 211G	Informal Logic	3
or PHIL 312	Formal Logic	
Select one from the following:		3
PHIL 223G	Ethics	
PHIL 328	Applied Ethics	
PHIL 373	Ethical Theory	
Select 9 credits from Philosophy at the 300 or above level		9
Total Credits		18

Physics

Undergraduate Program Information

A bachelor's degree in physics provides the basis for careers in industry, teaching, the military, government or for study toward advanced degrees in physics or engineering. It should also provide the skills that recipients of physics degrees have listed as among the most important in obtaining their current positions, including problem solving ability, computer skills, mathematical skills, and laboratory skills, as well as knowledge of physics.

The Physics Department requires Physics BA and Physics BS students to have some knowledge of a second language. To meet this requirement, the student must do one of the following:

- Complete the introductory second language course sequence, 111 and 112, for any language taught at NMSU (or PORT 213 Portuguese for Romance Language Students I; or SPAN 113 Spanish for Heritage Learners I for heritage speakers). Students should enter the sequence at their proficiency level.
- Challenge the 112 level of any second language taught at NMSU (or PORT 213 Portuguese for Romance Language Students I; or SPAN 113 Spanish for Heritage Learners I for heritage speakers).
- Obtain college certification of completion of two years of one second language at the high school level with a grade of C- or higher in the second year level.
- Obtain, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.
- Obtain certification of a working knowledge of a Native American language from the American Indian program director.
- Successfully complete a regular university course taught in a language other than English. A student can receive credit only once for the same course taught in two languages.
- Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.
- Pass C D 375 American Sign Language II, with a grade of C- or better.
- In the case of a foreign student who is required to take the TOEFL exam, the dean will automatically waive the second language requirement.

Further information about the department may be found on the web at www.physics.nmsu.edu (<http://www.physics.nmsu.edu>). All incoming

(new or transfer) students must schedule an orientation meeting with the department head and/or the undergraduate program head before their first semester at NMSU. All students will be assigned a faculty advisor in the physics department to discuss course selection, career resources, internships and coops, and other topics.

Graduate Program Information

The Department of Physics offers programs in many areas of emphasis leading to the MS and Ph.D. degrees. Admission to these programs is competitive and selection of applicants is based on undergraduate and/or previous graduate grade-point averages, performance on the general and subject Graduate Record Examination, other evidence of prior academic and research accomplishments submitted by the applicant, and references, as well as, in the case of applicants for the doctoral program, matching of the applicant's research interests, as described by the student's statement of purpose, to the Department's research activities.

All degree-seeking graduate students must satisfy the relevant Graduate School requirements, pass a qualifying examination based on undergraduate physics courses at the 400 level, successfully complete a 3-credit, 500-level laboratory, and demonstrate or develop knowledge of computer programming. Additional course requirements are described below; courses taken S/U may not be used to satisfy any of the degree requirements, including the lab requirement for Master's and Ph.D. students.

The qualifying and comprehensive examination outcomes are decided by vote of the entire faculty, based on the recommendations of the corresponding examination committees. For the qualifying examination, the faculty may decide that

- a student pass at the doctoral level;
- pass at the master's level;
- be requested to retake the exam at the next available opportunity; or
- terminate graduate study.

For the written part of the comprehensive examination, the faculty may decide that

- a student be given an unconditional pass;
- be given a conditional pass, with the requirement that the student produce additional evidence of research accomplishments during the oral part of the exam before being granted admission to candidacy;
- repeat the written part the next time it is offered; or
- terminate graduate study.

In addition, the faculty may decide to discontinue financial support to a student based on the student's performance on the qualifying or comprehensive examination. Students will receive written notification of the exam's outcome from the Graduate Physics Program Head within 30 days of the exam. Appeals must be addressed to the Physics Department Head within 30 days of receiving written notification of the exam's outcome and will be decided by the physics faculty.

A student granted an unconditional or conditional pass on the written part of the comprehensive examination must take the oral part in the same semester that the written part was taken; the student's Ph.D. committee makes the final decision, following the oral part of the comprehensive examination, on admission of the student to the candidacy to the doctoral degree.

Students may choose areas of emphasis from a variety of experimental, theoretical and computational research programs in the department. The current major research areas of the department include atmospheric physics, condensed matter physics/materials science, geophysics, optics, particle and nuclear physics, physics education, and others. These research projects are supported by multimillion-dollar funding by various federal agencies and two national laboratories within the state of New Mexico: Los Alamos National Laboratory and Sandia National Laboratories. In addition to the in-house research, the department conducts collaborative research programs with

- The Brookhaven National Laboratory,
- The Center for Integrated NanoTechnologies,
- Los Alamos National Laboratory,
- Sandia National Laboratories,
- The Thomas Jefferson Laboratory,
- Fermilab,
- Air Force Research Laboratory and
- other national and international laboratories.

The MS in Physics with a concentration in Space Physics program provides students with a strong foundation in physics with an intensive focus on space physics. Graduate study in space physics at the master's level prepares graduates for continued and specialized study toward the doctorate program in space-related fields as well as for challenges they will confront in space industrial and government settings.

The department is housed in a newly-renovated building which contains research laboratories, classrooms, offices and a computational laboratory.

Degrees for the Department

Physics - Bachelor of Arts (p. 393)

Physics - Bachelor of Science (p. 394)

Engineering Physics - Bachelor of Science in Engineering Physics (p. 393)

Physics - Master of Science (p. 395)

Physics - Doctor of Philosophy (p. 395)

Minors for the Department

Physics - Undergraduate Minor (p. 396)

Professor, Stefan Zollner, Department Head

Professor, Matthias Burkardt, Undergraduate Program Head

Associate Professor, Vassilios Papavassiliou, Graduate Program Head

Professor, Heinz Nakotte, Engineering Physics Program Head

Professors M. Burkardt, Kieffer, Nakotte, Pate, Vasiliev, Zollner; **Associate Professors** Engelhardt, Hearn, Kanim, Papavassiliou, Urquidi; **Assistant Professors** Cooper, Fohrtung; **College Professors** Burkardt, DeAntonio; **Emeritus Faculty** Burleson, Gibbs, Goedecke, Kanim, Kyle, Liefeld, Ni,

S. Zollner, Department Head, Ph.D. (Stuttgart)– experimental condensed matter and applied physics; V. Papavassiliou, Graduate Program Head, Ph.D. (Yale)– nuclear and particle physics; C. W. Bruce, Ph.D. (New Mexico State)– applied optics; M. Burkardt, Ph.D. (Erlangen)– theoretical nuclear

and particle physics; M. DeAntonio, Ph.D. (New Mexico State)– applied optics; M. Engelhardt, Ph.D. (Erlangen)– computational nuclear and particle physics; E. Fohrtung, Ph.D. (Freiburg)– materials science, neutron and X-ray scattering; G. H. Goedecke, Ph.D. (Rensselaer)– theoretical physics, optics; T. M. Hearn, Ph.D. (Cal Tech)– seismic tomography, seismology; S. Kanim, Ph.D. (University of Washington)– Physics Education; B. Kieffer, Ph.D. (Michigan)– computational condensed matter physics, mineral physics; H. Nakotte, Ph.D. (Amsterdam)– materials science, neutron scattering; J. Ni, Ph.D. (Cornell)– geophysics, seismology; S. F. Pate, Ph.D. (Pennsylvania)– nuclear and particle physics; J. Urquidi, Ph.D. (Texas Tech)– materials science, neutron and X-ray scattering; I. Vasiliev, Ph.D. (Minnesota)– computational materials science; X. Wang, Ph.D. (Hua-zhong Normal)– nuclear and particle physics

PHYS 110G. The Great Ideas of Physics

4 Credits (3+3P)

Conceptual, quantitative, and laboratory treatments of the great ideas and discoveries that have influenced lives and changed perceptions of nature, from Johannes Kepler's laws of planetary motion and Isaac Newton's and Albert Einstein's laws of motion and gravity to the modern concepts of the quantal structure of nature and the big bang universe.

PHYS 120G. Introduction to Acoustics

4 Credits (3+2P)

Lecture, demonstration, and laboratory treatment of the general properties of waves, the production, transmission, and reception of sound waves, including musical and vocal sounds, and characteristics of the human ear and several kinds of sources.

PHYS 150. Elementary Computational Physics

3 Credits (2+2P)

Introduction to computational techniques for the solution of physics-related problems.

Prerequisite(s): a C- or better in MATH 121G.

PHYS 203. Supplemental Instruction to PHYS 213

0.5-1 Credits (.5-1)

Optional workshop as a supplement to PHYS 213. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.

Corequisite(s): PHYS 213.

PHYS 204. Supplemental Instruction to PHYS 214

0.5-1 Credits (.5-1)

Optional workshop as a supplement to PHYS 214. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.

Corequisite(s): PHYS 214.

PHYS 205. Supplemental Instruction to PHYS 215G

0.5-1 Credits (.5-1)

Optional workshop as a supplement to PHYS 215G. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.

Corequisite(s): PHYS 215G.

PHYS 206. Supplemental Instruction to PHYS 216G

0.5-1 Credits (.5-1)

Optional workshop as a supplement to PHYS 216G. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.

Corequisite(s): PHYS 216G.

PHYS 211G. General Physics I

3 Credits

Non-calculus treatment of mechanics, waves, sound, and heat. Knowledge of simple algebra and trigonometry is required.

PHYS 211GL. General Physics I Laboratory**1 Credit**

Laboratory experiments in topics associated with material presented in PHYS 211G.

Prerequisite(s)/Corequisite(s): PHYS 211G.

PHYS 212G. General Physics II**3 Credits**

Non-calculus treatment of electricity, magnetism, and light.

Prerequisite(s): PHYS 211G or PHYS 221G.

PHYS 212GL. General Physics II Laboratory**1 Credit**

Laboratory experiments in topics associated with material presented in PHYS 212G.

Prerequisite(s)/Corequisite(s): PHYS 212G.

PHYS 213. Mechanics**3 Credits**

Newtonian mechanics. Pre/

Corequisite(s): MATH 191G.

PHYS 213 L. Experimental Mechanics**1 Credit**

Laboratory experiments associated with the material presented in PHYS 213. Science majors. Pre/

Corequisite(s): PHYS 213.

PHYS 214. Electricity and Magnetism**3 Credits**

Charges and matter, the electric field, Gauss law, the electric potential, the magnetic field, Ampere's law, Faraday's law, electric circuits, alternating currents, Maxwell's equations, and electromagnetic waves. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 192G. Prerequisite(s): a C- or better in PHYS 213 or PHYS 215G.

PHYS 214 L. Electricity and Magnetism Laboratory**1 Credit**

Laboratory experiments associated with the material presented in PHYS 214.

Prerequisite(s)/Corequisite(s): PHYS 214. Prerequisite(s): a C- or better in PHYS 213L or PHYS 215GL.

PHYS 215G. Engineering Physics I**3 Credits**

Calculus-level treatment of kinematics, work and energy, particle dynamics, conservation principles, simple harmonic motion. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in MATH 191G.

PHYS 215GL. Engineering Physics I Laboratory**1 Credit**

Laboratory experiments associated with the material presented in PHYS 215G. Students wishing to use the PHYS 215G-216G sequence to satisfy the basic natural science general education requirement must register for either PHYS 215GL or PHYS 216GL. Pre/

Corequisite(s): PHYS 215G.

PHYS 216G. Engineering Physics II**3 Credits**

A calculus-level treatment of topics in electricity, magnetism, and optics. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in PHYS 213 or PHYS 215G and MATH 192G.

PHYS 216GL. Engineering Physics II Laboratory**1 Credit**

Laboratory experiments associated with the material presented in PHYS 216G.

Prerequisite(s)/Corequisite(s): PHYS 216G. Prerequisite(s): A C- or better in PHYS 213L or PHYS 215GL.

PHYS 217. Heat, Light, and Sound**3 Credits**

Calculus-level treatment of thermodynamics, geometrical and physical optics, and sound. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in PHYS 213 or PHYS 215G.

PHYS 217 L. Experimental Heat, Light and Sound**1 Credit**

Laboratory experiments associated with the material presented in PHYS 217. Science majors.

Prerequisite(s)/Corequisite(s): PHYS 217. Prerequisite(s): a C- or better in PHYS 213L or PHYS 215GL.

PHYS 221G. General Physics for Life Sciences I**3 Credits**

This algebra-based introduction to general physics covers mechanics, waves, sound, and heat. Special emphasis is given to applications in the life sciences. This course is recommended for students in the life sciences and those preparing for the physics part of the MCAT.

Prerequisites: a C or better in MATH 120 or higher.

PHYS 221GL. Laboratory to General Physics for Life Science I**1 Credit**

Laboratory experiments in topics associated with material presented in PHYS 221G.

Prerequisite(s)/Corequisite(s): PHYS 221G. Restricted to Las Cruces campus only.

PHYS 222G. General Physics for Life Sciences II**3 Credits**

This algebra-based course covers electricity, magnetism, light, atomic physics, and radioactivity. Special emphasis is given to applications in the life sciences. This course is recommended for students in the life sciences and those preparing for the physics part of the MCAT.

Prerequisite: PHYS 211G or PHYS 221G.

PHYS 222GL. Laboratory to General Physics for Life Sciences II**1 Credit**

Laboratory experiments in topics associated with material presented in PHYS 222G.

Prerequisite(s)/Corequisite(s): PHYS 222G. Restricted to Las Cruces campus only.

PHYS 223. Supplemental Instruction to PHYS 221**1 Credit**

This optional workshop supplements Physics for Life Sciences I. The tutorial sessions focus on reasoning and hands-on problem solving.

Corequisite(s): PHYS 221G.

PHYS 224. Supplemental Instruction to PHYS 222**1 Credit**

This optional workshop is a supplement to Physics for Life Science II. The tutorial sessions focus on reasoning and hands-on problem solving.

Corequisite(s): PHYS 222G.

PHYS 280. Independent Study**1-3 Credits**

Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

PHYS 290. Special Topics**1-3 Credits**

Topics to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

PHYS 303V. Energy and Society in the New Millennium**3 Credits**

Traditional and alternative sources of energy. Contemporary areas of concern such as the state of depletion of fossil fuels; nuclear energy, solar energy, and other energy sources; environmental effects; nuclear weapons; and health effects of radiation. Discussion of physical principles and impact on society. Focus on scientific questions involved in making decisions in these areas. No physics background required.

PHYS 304. Forensic Physics**4 Credits (3+3P)**

Theories, laboratory, and field techniques in the area of forensic physics.

PHYS 305V. The Search for Water in the Solar System**3 Credits**

Examines the formation, abundance and ubiquity of water in our Solar System stemming from comets, Martian and Lunar poles, Earth's interior and into the outer reaches of the Solar System. Topics will include nuclear synthesis, Solar System formation, remote sensing, as well as past, present and future NASA missions for water.

PHYS 315. Modern Physics**3 Credits**

An introduction to relativity and quantum mechanics, with applications to atoms molecules, solids, nuclei, and elementary particles. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in MATH 291 and PHYS 214 or PHYS 216G.

PHYS 315 L. Experimental Modern Physics**3 Credits (1+6P)**

Elementary laboratory in modern physics which supports the subject matter in PHYS 315. Required for physics majors. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): PHYS 315. Prerequisite(s): a C- or better in PHYS 214L or 216GL.

PHYS 350. Special Topics**1-3 Credits**

Lectures, demonstrations, and discussions on such topics as lasers and holography, energy sources, clouds, and biophysics. May be repeated for a maximum of 12 credits under different subtitles.

PHYS 380. Individual Study**1-3 Credits**

Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

PHYS 395. Intermediate Mathematical Methods of Physics**3 Credits**

Introduction to the mathematics used in intermediate-level physics courses. Topics include vector calculus, curvilinear coordinates, matrices, linear algebra, function spaces, partial differential equations, and special functions. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 392. Prerequisite(s): a C- or better in MATH 291G.

PHYS 400. Undergraduate Research**1-3 Credits**

May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

PHYS 420. Capstone Project I**3 Credits**

Application of engineering physics principles to a significant design project. Includes teamwork, written and oral communication and realistic technical, economic and public safety requirements.

PHYS 421. Capstone Project II**3 Credits**

Continuation of PHYS 420.

PHYS 450. Selected Topics**1-3 Credits**

Readings, lectures or laboratory studies in selected areas of physics. May be repeated for a maximum of 12 credits.

PHYS 451. Intermediate Mechanics I**3 Credits**

Vector calculus, Lagrangian and Hamiltonian formulations of Newtonian mechanics. Topics include central force motion, dynamics of rockets and space vehicles, rigid body motion, noninertial reference frames, oscillating systems, relativistic mechanics, classical scattering, and fluid mechanics. Pre/

Prerequisite(s): PHYS 213 or PHYS 215G, and MATH 291G.

Corequisite(s): MATH 392.

PHYS 454. Intermediate Modern Physics I**3 Credits**

Introduction to quantum mechanics, focusing on the role of angular momentum and symmetries, with application to many atomic and subatomic systems. Specific topics include intrinsic spin, matrix representation of wave functions and observables, time evolution, and motion in one dimension. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 392 and PHYS 395. Prerequisite(s): a C- or better in PHYS 315.

PHYS 455. Intermediate Modern Physics II**3 Credits**

Continuation of subject matter of PHYS 454. Specific topics include rotation and translation in three dimensions, solution of central potential problems, perturbation theory, physics of identical particles, scattering theory, and the interaction between photons and atoms. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in PHYS 454.

PHYS 461. Intermediate Electricity and Magnetism I**3 Credits**

The first part of a two-course sequence in classical electrodynamics. Covered topics include static electric and magnetic fields, Laplace's and Poisson's equations, electromagnetic work and energy, Lorentz force, Gauss's, Biot-Savart, and Ampere's laws, Maxwell's equations, as well as electric and magnetic fields in matter. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 392 and PHYS 395. Prerequisite(s): a C- or better in PHYS 214 or PHYS 216G or equivalent and a C- or better in MATH 291G.

PHYS 462. Intermediate Electricity and Magnetism II**3 Credits**

Continuation of subject matter of PHYS 461. Covered topics include Maxwell's equations and their applications, electromagnetic waves, reflection, refraction, dispersion, radiating systems, interference and diffraction, as well as Lorentz transformations and relativistic electrodynamics. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in PHYS 461.

PHYS 467. Nanoscience and Nanotechnology**3 Credits**

See CHME 467. Crosslisted with: CHME 467.).

Prerequisite(s): CHEM 112 and (PHYS 211 or PHYS 215) and (EH&S Safety training to include the courses: (1) Employee & Hazard Communication Safety (HazCom); (2) Hazardous Waste Management; and (3) Laboratory Standard.

PHYS 468. Intermediate X-ray Diffraction**3 Credits**

Introduction to x-ray diffraction and reflectivity spectra. Topics include X-ray sources and detectors, atomic spectra, characteristic x-rays, thermionic emission, synchrotron radiation, instrument components, and beam conditioners. Crosslisted with: CHME 488.

Prerequisite(s): a C- or better in PHYS 315 and PHYS 315L.

PHYS 471. Modern Experimental Optics**3 Credits (1+6P)**

Advanced laboratory experiments in optics related to the material presented in PHYS 473.

Prerequisite(s): PHYS 315 and PHYS 315L.

PHYS 473. Introduction to Optics**3 Credits**

The nature of light, Geometrical optics, basic optical instruments, wave optics, aberrations, polarization, and diffraction. Elements of optical radiometry, lasers and fiber optics. Crosslisted with: E E 473

Prerequisite(s): PHYS 216G or PHYS 217.

PHYS 475. Advanced Physics Laboratory**1-3 Credits (1+6P)**

Advanced undergraduate laboratory involving experiments in atomic, molecular, nuclear, and condensed-matter physics. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in PHYS 315 and 315L.

PHYS 476. Computational Physics**3 Credits**

An introduction to finite difference methods, Fourier expansions, Fourier integrals, solution of differential equations, Monte Carlo calculations, and application to advanced physics problems.

Prerequisite(s): PHYS 150 or equivalent and MATH 392.

PHYS 477. Fiber Optic Communication Systems**4 Credits (3+3P)**

See E E 477 Crosslisted with: E E477.

Prerequisite(s): C- or better in E E 315 or PHYS 461.

PHYS 478. Fundamentals of Photonics**4 Credits (3+3P)**

See E E 478. Crosslisted with: E E478.

Prerequisite(s): PHYS 216G or PHYS 217.

PHYS 479. Lasers and Applications**4 Credits (3+3P)**

See E E479 Crosslisted with: E E479.

Prerequisite(s): C- or better in E E 315 or PHYS 461.

PHYS 480. Thermodynamics**3 Credits**

Thermodynamics and statistical mechanics. Basic concepts of temperature, heat, entropy, equilibrium, reversible and irreversible processes. Applications to solids, liquids, and gases.

Prerequisites: PHYS 217, PHYS 315 and MATH 291G.

PHYS 485. Independent Study**1-3 Credits**

Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

PHYS 488. Introduction to Condensed Matter Physics**3 Credits**

Crystal structure, X-ray diffraction, energy band theory, phonons, cohesive energy, conductivities, specific heats, p-n junctions, defects, surfaces, and magnetic, optical, and low-temperature properties.

Prerequisite(s): PHYS 315.

PHYS 489. Introduction to Modern Materials**3 Credits**

Structure and mechanical, thermal, electric, and magnetic properties of materials. Modern experimental techniques for the study of material properties.

Prerequisite: PHYS 315.

PHYS 491. High Energy Physics I**3 Credits**

Particle detectors, accelerators, and experimental techniques. Fundamental particles and interactions. Symmetries in particle physics. Quark model of hadrons. Electroweak theory. Strong interactions and QCD. Nuclear interactions at high energies. Grand unification. Super symmetry.

Prerequisite(s): PHYS 455.

PHYS 493. Experimental Nuclear Physics**3 Credits (1+6P)**

Selected experimental investigations in nuclear physics such as measurement of radioactivity, absorption of radiation, nuclear spectrometry.

Prerequisite(s): PHYS 315 and PHYS 315L.

PHYS 495. Mathematical Methods of Physics I**3 Credits**

Applications of mathematics to experimental and theoretical physics. Topics selected from: complex variables; special functions; numerical analysis; Fourier series and transforms, Laplace transforms.

Prerequisite(s): MATH 392 and PHYS 395.

PHYS 497. Introduction to Space Plasma Physics**3 Credits**

Properties of plasmas, especially those in the heliosphere such as the solar wind, planetary magnetospheres and ionospheres, cosmic rays, and the Sun. Topics include both independent-particle and fluid descriptions of plasmas such as magnetohydrodynamics, the solar cycle and solar flares, planetary magnetic substorms and aurorae, Van Allen radiation belts, shocks in the solar wind, and wave propagation in plasmas.

Prerequisite(s): (PHYS 461 or E E 351) and MATH 392.

PHYS 500. Special Topics Seminar**1-2 Credits**

Treatment of topics not covered by regular courses. Graded S/U. May be repeated.

PHYS 511. Mathematical Methods of Physics I**3 Credits**

Same as PHYS 495. Additional work required at a more advanced level.

PHYS 520. Selected Topics**1-3 Credits**

Formal treatment of graduate-level topics not covered in regular courses. May be repeated for a maximum of 9 credits.

Prerequisites: graduate standing, consent of instructor, and selection of a specific topic prior to registration.

PHYS 521. Individual Study**1-3 Credits**

Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.

Prerequisites: graduate standing, consent of instructor, and selection of a specific topic prior to registration.

PHYS 527. Fiber Optic Communication Systems**4 Credits (3+3P)**

Same as E E 527 Crosslisted with: E E 527

PHYS 528. Fundamentals of Photonics**4 Credits (3+3P)**

Same as E E 528. Crosslisted with: E E 528.

PHYS 529. Lasers and Applications**4 Credits (3+3P)**

Same as E E 529 Crosslisted with: E E 529

PHYS 551. Classical Mechanics**3 Credits**

Lagrangian and Hamiltonian formulation of dynamics. Advanced treatments of most topics listed under PHYS 451, plus canonical transformations and Hamilton-Jacobi theory. PHYS 451 strongly recommended.

PHYS 554. Quantum Mechanics I**3 Credits**

Wave function, indeterminacy, classical limit. Schrodinger equation. Atomic and nuclear systems. Angular momentum, intrinsic spin, identical particles. Scattering theory. Mathematical formalism, symmetry and conserved quantities. Perturbation theory. Dirac theory, introduction to quantized fields. PHYS 451 and PHYS 454 strongly recommended.

PHYS 555. Quantum Mechanics II**3 Credits**

Continuation of topics in PHYS 554.

Prerequisites: PHYS 554 or consent of instructor.

PHYS 561. Electromagnetic Theory I**3 Credits**

Detailed advanced treatments of most topics listed under PHYS 461, PHYS 462, plus multipole radiation, collisions of charged particles and bremsstrahlung, scattering, and radiation reaction. PHYS 461 and PHYS 462 strongly recommended.

PHYS 562. Electromagnetic Theory II**3 Credits**

Continuation of topics in PHYS 561.

Prerequisites: PHYS 561 or consent of instructor.

PHYS 567. Nanoscience and Nanotechnology**3 Credits**

See CHME 567. Crosslisted with: CHME 567.

PHYS 568. Elements of X-ray Diffraction**3 Credits**

Same as PHYS 468, but additional work required. Crosslisted with: CHME 588.

PHYS 571. Advanced Experimental Optics**3 Credits**

Taught with PHYS 471 with additional work required at the graduate level. Consent of Instructor required.

Prerequisite(s): PHYS 473 or PHYS 562.

PHYS 575. Advanced Physics Laboratory**1-3 Credits (1+6P)**

Selected experiments in atomic, molecular, nuclear and condensed-matter physics.

PHYS 576. Advanced Computational Physics I**3 Credits**

Advanced treatment of topics listed under PHYS 476, plus additional required work. Applications of numerical methods to complex physical systems. Recommended knowledge of Fortran or C, and MATH 377 or MATH 392. Same as PHYS 476, but additional work required.

PHYS 577. Fourier Methods in Electro-Optics**3 Credits**

Same as E E 577 Crosslisted with: E E 577

PHYS 578. Optical System Design**3 Credits**

See E E 578. Crosslisted with: E E 578

PHYS 584. Statistical Mechanics**3 Credits**

Thermodynamics review. Probability, entropy, equilibrium. Canonical and grand canonical ensembles. Classical and quantum statistics. Degenerate and classical gases. Application to the equilibrium properties of solids, liquids, and gases. Kinetic theory and transport processes.

PHYS 588. Condensed Matter Physics**3 Credits**

Same as PHYS 488, but additional work required.

Prerequisite(s): PHYS 554 or consent of instructor.

PHYS 589. Modern Materials**3 Credits**

Same as PHYS 489 with differentiated assignments for graduate students.

Prerequisite: PHYS 554 or consent of instructor.

PHYS 591. Advanced High-Energy Physics I**3 Credits**

Taught with PHYS 491 with additional work required at the graduate level.

Prerequisite(s): PHYS 555 or consent of instructor.

PHYS 592. Advanced High-Energy Physics II**3 Credits**

Continuation of topics in PHYS 591

Prerequisite(s): PHYS 591.

PHYS 593. Advanced Experimental Nuclear Physics**3 Credits (1+6P)**

Advanced experimental investigation of topics such as measurement of radioactivity, absorption of radiation, and nuclear spectrometry.

PHYS 597. Space Plasma Physics**3 Credits**

Same as PHYS 497 but with added requirements.

PHYS 599. Master's Thesis**15 Credits**

Thesis.

PHYS 600. Research**1-15 Credits**

Doctoral research. May be repeated.

PHYS 620. Advanced Topics in Physics**1-3 Credits**

Advanced formal treatment of topics not covered in regular courses. May be repeated for a maximum of 9 credits.

Prerequisite: consent of instructor.

PHYS 650. General Relativity I**3 Credits**

Basic foundations and principles of general relativity, derivation of the Einstein field equations and their consequences, the linearized theory, the Bel-Petrov classification of the curvature tensor, derivation of the Schwarzschild solution and the four basic tests of general relativity.

Prerequisite(s): PHYS 511 or PHYS 561 or consent of instructor.

PHYS 680. Independent Study**1-3 Credits**

Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: graduate standing or consent of instructor.

PHYS 688. Advanced Condensed Matter Physics**3 Credits**

Continuation of the advanced condensed matter physics presented in PHYS 588. Topics include electronic structure methods, optical, magnetic, and transport properties of solids, semiconductors, crystalline defects, nanostructures, and noncrystalline solids. PHYS 588 strongly recommended.

PHYS 689. Advanced Modern Materials**3 Credits**

Advanced topics in the physics of modern materials, such as crystalline, amorphous, polymeric, nanocrystalline, layered, and composite materials and their surfaces and interfaces.

Prerequisites: PHYS 555, PHYS 588, or consent of instructor.

PHYS 691. Quantum Field Theory I**3 Credits**

Path integrals, gauge invariance, relativistic quantum mechanics, canonical quantization, relativistic quantum field theory, introduction to QED.

Prerequisites: PHYS 555 and PHYS 562, or consent of instructor.

PHYS 692. Quantum Field Theory II**3 Credits**

QED, running coupling constant, QCD, electroweak theory, asymptotic freedom, deep inelastic scattering, basic QCD phenomenology, path integrals in quantum field theory, lattice QCD.

Prerequisite: PHYS 691 or consent of instructor.

PHYS 700. Doctoral Dissertation**15 Credits**

Dissertation.

Engineering Physics - Bachelor of Science in Engineering Physics

The Bachelor of Science in Engineering Physics is a joint degree program of the Department of Physics and the College of Engineering. This degree is ideal preparation for technical careers in high-tech industries,

research laboratories, and the public sector. It also provides an excellent preparation for graduate studies in physics or engineering. A full description of the program requirements can be found in the College of Engineering (p. 563) section of this catalog.

Physics - Bachelor of Arts

The curriculum for the Bachelor of Arts degree is designed for students who would like to have a firm foundation in physics combined with study in another area and greater flexibility in choosing elective courses. The program requires a minor in a second field of study chosen by the student in consultation with an advisor.

Nondepartmental Requirements¹

MATH 191G	Calculus and Analytic Geometry I	4
MATH 192G	Calculus and Analytic Geometry II	4
MATH 291G	Calculus and Analytic Geometry III	3
MATH 392	Introduction to Ordinary Differential Equations	3

Select 18 credits from a Minor in a second field from another department	18
--	----

Department Requirements¹

PHYS 150	Elementary Computational Physics	3
PHYS 213	Mechanics	3
PHYS 213 L	Experimental Mechanics	1
PHYS 214	Electricity and Magnetism	3
PHYS 214 L	Electricity and Magnetism Laboratory	1
PHYS 217	Heat, Light, and Sound	3
PHYS 217 L	Experimental Heat, Light and Sound	1
PHYS 315	Modern Physics	3
PHYS 315 L	Experimental Modern Physics	3
PHYS 395	Intermediate Mathematical Methods of Physics	3
PHYS 451	Intermediate Mechanics I	3
PHYS 454	Intermediate Modern Physics I	3
PHYS 455	Intermediate Modern Physics II	3
PHYS 461	Intermediate Electricity and Magnetism I	3
PHYS 462	Intermediate Electricity and Magnetism II	3
PHYS 480	Thermodynamics	3

Electives

Select sufficient electives to bring total number of credits to 128, including 48 upper-division.	54
---	----

Total Credits	128
---------------	-----

¹ May not be taken S/U and must earn a grade of C- or better.

Suggested Minors for the Bachelor of Arts Physics Major

Basic Science Minor— A minor in a related scientific field broadens the overall knowledge of the student majoring in physics. Some departments which offer such minors are astronomy, chemistry, computer science, geology and mathematics.

Prehealth Minor— Students wishing to attend a medical or dental post-graduate school are strongly encouraged to obtain a minor in

a life science field such as biochemistry, biology, human biology or microbiology.

Prelaw Minor— Students wishing to attend a post-graduate law school should obtain a minor in a law-related field, such as government, accounting, finance, international business or a Supplementary Major in Law and Society (24 credits).

Physics - Bachelor of Science

A Bachelor of Science degree in physics at NMSU prepares a student well for graduate study in physics, geophysics, or engineering or for a variety of careers in research and teaching. Specialization in one of the emphasis areas should increase employability at the BS level.

Nondepartmental Requirements ¹

MATH 191G	Calculus and Analytic Geometry I	4
MATH 192G	Calculus and Analytic Geometry II	4
MATH 291G	Calculus and Analytic Geometry III	3
MATH 392	Introduction to Ordinary Differential Equations	3

Select one of the following: 8

CHEM 111G & CHEM 112G General Chemistry I and General Chemistry II

CHEM 115 & CHEM 116 Principles of Chemistry I and Principles of Chemistry II (or higher-level courses)

Department Requirements ¹

PHYS 150	Elementary Computational Physics	3
PHYS 213	Mechanics	3
PHYS 213 L	Experimental Mechanics	1
PHYS 214	Electricity and Magnetism	3
PHYS 214 L	Electricity and Magnetism Laboratory	1
PHYS 217	Heat, Light, and Sound	3
PHYS 217 L	Experimental Heat, Light and Sound	1
PHYS 315	Modern Physics	3
PHYS 315 L	Experimental Modern Physics	3
PHYS 395	Intermediate Mathematical Methods of Physics	3
PHYS 451	Intermediate Mechanics I	3
PHYS 454	Intermediate Modern Physics I	3
PHYS 455	Intermediate Modern Physics II	3
PHYS 461	Intermediate Electricity and Magnetism I	3
PHYS 462	Intermediate Electricity and Magnetism II	3
PHYS 480	Thermodynamics	3

Select an additional 6 credits in physics or geophysics numbered 300 or above 6

Advanced Laboratory

Select at least 3 credits from the following (in any combination): 3

PHYS 471 Modern Experimental Optics

PHYS 475 Advanced Physics Laboratory

PHYS 493 Experimental Nuclear Physics

Electives

Select sufficient electives to bring total number of credits to 128, including 48 upper-division. 55

Total Credits 128

¹ May not be taken S/U and must earn a grade of C- or better.

Students who plan to pursue graduate study in physics or geophysics are strongly advised to take one or more senior-level courses in optics, nuclear physics, space physics, condensed matter physics, geophysics, or computational physics.

Students who plan to seek employment at the B.S. level are advised to take one of the following concentration area curricula in addition to the general and departmental requirements. The program of study should be chosen by the student in consultation with an advisor. Some recommended courses are listed below.

Concentration: Applied Optics

Required Courses

PHYS 473	Introduction to Optics	3
PHYS 478	Fundamentals of Photonics	4
PHYS 479	Lasers and Applications	4

Total Credits 11

Concentration: Applied Physics

The program of study in applied physics is planned by the student and the physics advisor and includes classes in electrical and mechanical engineering along with classes in computer science.

Concentration: Computational Physics

Required Courses

C S 157	Topics in Software Programming and Applications	3
or C S 150	C Programming	
C S 171G	Introduction to Computer Science	4
MATH 279	Introduction to Higher Mathematics	3
PHYS 476	Computational Physics	3

Total Credits 13

Concentration: Geophysics

Required Courses

GEOL 111G	Introductory to Geology	4
GPHY 340V	Planet Earth	3
GPHY 450	Selected Topics ²	3

Total Credits 10

² For the geophysics concentration, students must take at least three credits of GPHY 450 Selected Topics.

Concentration: Materials Science

Required Courses

CHME 361	Engineering Materials	3
PHYS 475	Advanced Physics Laboratory ³	3
PHYS 488	Introduction to Condensed Matter Physics	3

PHYS 489	Introduction to Modern Materials	3
Total Credits		12

³ For the materials science concentration, students must take three credits of PHYS 475 Advanced Physics Laboratory.

Geophysics courses are offered by the Department of Physics and are listed under "Geophysics" in the course description chapter of this catalog.

Dual Degree (BS/MS) Program

This program option is designed to provide a means for PHYS undergraduates to obtain both a BS and an MS degree with 146 credits (normally: BS=128 credits, MS=30 credits). Students electing this option will follow the regular undergraduate BS in physics curriculum, except that they take the advanced laboratory course at the 5XX level to meet their BS requirements. They also apply nine other credits of their undergraduate courses numbered 450 and higher towards their MS degree, requiring only an additional 18 credits for the MS. These 18 credits can be obtained in two semesters (and perhaps one summer term to write and defend an MS thesis). Students interested in this dual degree must be admitted to the MS in Physics graduate program and must fulfill all degree requirements for the MS in Physics.

Physics - Doctor of Philosophy

For the Ph.D. degree, students must also pass the doctoral comprehensive examination, carry out original research, complete a dissertation, and pass a final oral examination. They must also pass or transfer at least 36 credits in formal courses numbered above 500 in physics/geophysics, including 24 credits of core graduate courses, and complete at least 6 credits of formal courses numbered above 600. The total number of credits, including formal and informal course credits and a minimum of 18 dissertation credits, must be at least 72. Financial support is available to graduate students in physics through teaching and research assistantships and fellowships. Inquiries about these opportunities should be directed to the graduate program director.

Requirements

Core Courses

PHYS 511	Mathematical Methods of Physics I	3
PHYS 551	Classical Mechanics	3
PHYS 554	Quantum Mechanics I	3
PHYS 555	Quantum Mechanics II	3
PHYS 561	Electromagnetic Theory I	3
PHYS 562	Electromagnetic Theory II	3
PHYS 576	Advanced Computational Physics I	3
PHYS 584	Statistical Mechanics	3
Total Credits		24

Physics - Master of Science

For the master's degree, students must also successfully complete or transfer at least 30 course credits and pass a final oral examination or the doctoral comprehensive examination. Of these 30 credits, at least 21 must be in physics/geophysics, at most 3 may be for individual study or other informal courses, at most 6 may be for a thesis, and at most 9

may be numbered between 450 and 499. Students must successfully complete

PHYS 576	Advanced Computational Physics I	3
or PHYS 476	Computational Physics	
Select 3 credits from the following:		3
PHYS 571	Advanced Experimental Optics	
PHYS 575	Advanced Physics Laboratory	
PHYS 593	Advanced Experimental Nuclear Physics	

A Master's thesis is optional. PHYS 599 Master's Thesis credits will not count toward the 21 credits in physics/geophysics and can only be counted toward the 30 credits for a Master's degree if a student selects the thesis option and successfully defends a Master's thesis. PHYS 700 Doctoral Dissertation credits can be used as a substitute for PHYS 599 Master's Thesis credits.

Concentration: Space Physics Requirements

See above section for general requirements for the Master's degree.

For the master's degree with a concentration in Space Physics, students must successfully complete the following physics core and specialized courses:

Physics Core

PHYS 551	Classical Mechanics	3
PHYS 593	Advanced Experimental Nuclear Physics	3
PHYS 511	Mathematical Methods of Physics I	3
or PHYS 495	Mathematical Methods of Physics I	
PHYS 497	Introduction to Space Plasma Physics	3
or PHYS 597	Space Plasma Physics	
PHYS 554	Quantum Mechanics I	3
or PHYS 454	Intermediate Modern Physics I	
PHYS 561	Electromagnetic Theory I	3
or PHYS 461	Intermediate Electricity and Magnetism I	
PHYS 584	Statistical Mechanics	3
or PHYS 480	Thermodynamics	

Specialization Electives

Select a minimum of three from the following:		9
ASTR 535	Observational Techniques I (f)	
ASTR 575	Computational Astrophysics	
ASTR 620	Planetary Science I	
ASTR 698	Special Topics.	
E E 460	Space System Mission Design and Analysis	
GPHY 540	Physics of the Earth and Planetary Interiors	
M E 533	Computational and Theoretical Fluid Mechanics	
PHYS 576	Advanced Computational Physics I	
or PHYS 476	Computational Physics	
PHYS 591	Advanced High-Energy Physics I	
or PHYS 491	High Energy Physics I	

Total Credits

30

Physics - Undergraduate Minor

A student cannot earn a BA or a BS in Physics and a minor in Physics. The minor in Physics requires a minimum of 18 credits distributed as follows:

Requirements

PHYS 213	Mechanics	3
or PHYS 215G	Engineering Physics I	
PHYS 214	Electricity and Magnetism	3
or PHYS 216G	Engineering Physics II	
PHYS 315	Modern Physics	3
Select 9 credits from the following:		9
PHYS 217	Heat, Light, and Sound	
Other Physics or Geophysics courses numbered 300 or above		
Select 0-6 credits from the following: ¹		0-6
A E 362	Orbital Mechanics	
C E 301	Mechanics of Materials	
CHME 361	Engineering Materials	
CHME 470	Introduction to Nuclear Energy	
CHME 471	Health Physics	
CHME 475	Nuclear Reactor Theory	
CHEM 431	Physical Chemistry	
or CHEM 431 H	Physical Chemistry Honors	
CHEM 433	Physical Chemistry I	
or CHEM 433 H	Physical Chemistry I Honors	
CHEM 434	Physical Chemistry II	
E E 310	Engineering Analysis II	
E E 351	Fields and Waves	
E E 425	Introduction to Semiconductor Devices	
E E 473	Introduction to Optics	
E E 478	Fundamentals of Photonics	
E E 479	Lasers and Applications	
M E 333	Intermediate Dynamics	
M E 338	Fluid Mechanics	
M E 340	Applied Thermodynamics	
Total Credits		18-24

¹ Other courses may be chosen with the approval of the Physics department head.

Psychology

Undergraduate Program Information

Students may take a major in psychology either as an area of emphasis in a liberal arts program or in preparation for further graduate education leading to professional careers in psychology. A major in psychology may be appropriate for the liberal arts student who wishes to pursue a career involving extensive social interaction and requiring solutions to people-related problems. Such careers include law, business, parenting, government, education, and management. Professional careers in psychology generally require some post-baccalaureate education. These careers include provision of clinical and counseling services, conducting research, applying research findings in industrial or government settings,

and doing teaching and research in colleges and universities. All students, but especially those planning to apply to graduate school, are encouraged to take PSY 310 Experimental Methods, no later than the Spring semester of their junior year.

Requirements for the Bachelor of Arts in Psychology are listed here (p. 400). Satisfying these requirements should provide an adequate exposure to psychology for the liberal arts student and a basic foundation for students seeking a career in psychology. Students wishing to prepare for a professional career in psychology are especially encouraged to work closely with an advisor, as early as possible.

Graduate Program Information

Admission

The Department of Psychology offers graduate work leading to the Master of Arts and Doctor of Philosophy degrees. To maximize consideration for admittance, candidates should submit applications by January 15. Note that the Psychology Department does not offer training in counseling or clinical psychology.

Students will be admitted to graduate study on the basis of their potential for achievement in research, scholarship and teaching. The most promising applicants will be accepted. The number of students that the department can successfully accommodate is limited, therefore it will not always be possible to admit all qualified applicants. The admissions committee will consider any material that a candidate for admission wishes to present.

Students with bachelor degrees should apply for admittance to the master's program even if their eventual goal is a Ph.D. Students with a master's degree in psychology-related disciplines or from other institutions may apply directly to the Ph.D. program.

A completed Graduate School admission application (<https://gradschool.nmsu.edu/apply>) (online only) should include all of the following:

1. Complete transcripts of all college work (minimum 3.0 GPA).
2. Scores on the General Graduate Record Examination. Applicants to the MA program are most likely to be considered with minimum scores of 155 Verbal, 156 Quantitative, 4.5 Analytical Writing. Applicants to the PhD program are most likely to be admitted with minimum scores of 158 Verbal, 159 Quantitative, and 4.5 Analytical Writing. Scores on the GRE Psychology test are not required.
3. Three letters of recommendation from professors, employers or others qualified to evaluate your potential for graduate work.
4. A letter explaining your research interests and experience, career goals, and an indication of the faculty member(s) whose work is of particular interest to you.
5. A curriculum vitae or résumé.
6. A writing sample (e.g., a paper you wrote for a course, a senior thesis, or a master's thesis) uploaded through online application system. Ideally, the sample should demonstrate your ability to write clearly about psychological research.

As per NMSU Graduate School policy, admission to the doctoral program is conditional upon passing a qualifying exam. In Psychology this generally involves giving a presentation about a completed, empirical Masters thesis project to an examining committee. Also, If there are perceived gaps in preparedness, once at NMSU, candidates may be

asked to complete certain coursework/research projects to address deficiencies.

A number of potential minors are available to interested students, including a minor in statistics (p. 431). Additional information about a minor may be found in the listing of the home department in this catalog.

Degrees for the Department

Psychology - Bachelor of Arts

Psychology - Master of Arts (p. 402)

Psychology - Doctor of Philosophy (p. 401)

Minors for the Department

Psychology - (p. 402) Undergraduate Minor (p. 402)

Psychology - (p. 402) Graduate Minor (p. 402)

Associate Professor, Dominic A. Simon, Department Head

Professors Thompson, Trafimow; **Associate Professors** Dolgov, Guynn, Ketelaar, Kroger, MacDonald, Madson, Marks; **Assistant Professors** Chen, Hout; **Emeritus Faculty** Cowie, Johnston, McDonald, Paap, Schvaneveldt, Stephan

D.A. Simon, Department Head, Ph.D. (California- Los Angeles)– cognition, learning and performance; J. Chen (Purdue) – human performance, decision making, automation, cyber security; I. Dolgov, Ph.D. (Arizona State University)– perception and action, natural user interfaces, embodied cognition, human factors; M. J. Guynn, Ph.D. (New Mexico)– human memory; M.C. Hout, Ph.D. (Arizona State University) - visual cognition; T. Ketelaar, Ph.D. (Michigan)– social psychology, emotion; J. K. Kroger, Ph.D. (California- Los Angeles)– biopsychology, cognitive neuropsychology; J. MacDonald (Purdue)– engineering psychology, auditory perception; L.J. Madson, Ph.D. (Iowa State)– scholarship of teaching & learning, gender, sexuality; M.J. Marks, Ph.D. (Illinois, Urbana-Champaign)– social psychology, sexual behaviors, relationships; L.A. Thompson, Ph.D.(California-Santa Cruz)– developmental psychology, cognitive psychology; D.Trafimow, Ph.D. (Illinois, Urbana-Champaign)– social cognition.

PSY 201G. Introduction to Psychology

3 Credits

Methods and principles of behavior. Topics include human evolution and development, biopsychology, perception, learning, thinking, motivation, social interaction, and the diagnosis and treatment of abnormal behavior.

PSY 266. Applied Psychology

3 Credits

Explanation of the psychological principles of everyday living. Emphasizes motivation, learning of intelligent behavior, and applications of psychology to social issues. Community Colleges only.

PSY 274. A Study of Substance Abuse through Service Learning

3 Credits

Physiological and psychological impact of drug use on human behavior. Emphasizes practical applications of intervention and prevention in the community. Community Colleges only.

PSY 290. Psychology of Adjustment

3 Credits

Analyzes the responses people have to conflict, emotional stress, and frustration. It focuses on adapting to these problems and examines both normal and neurotic responses. Community College campus only.

PSY 301. Introduction to Psycholinguistics

3 Credits

Psychological aspects of language, including linguistic theories of grammar, psychological factors influencing language performance, primary language acquisition and the relationship of language to thought processes. Same as LING 301.

Prerequisites: PSY 201G and one of: STAT 251G, STAT 271G, or A ST 311; and PSY 310 or consent of instructor.

PSY 302. Abnormal Psychology

3 Credits

Introduces the types, causes, and treatment of mental disorders. Descriptions and explanations of the neuroses, affective disorders and the psychoses. Case histories are also analyzed.

Prerequisites: PSY 201G, MATH 120 and ENGL 111G.

PSY 310. Experimental Methods

4 Credits (2+4P)

The basic skills of literature search, experimental design, research methodology, and research reporting are emphasized; includes laboratory.

Prerequisite(s): PSY 201G, and either STAT 251G, STAT 271G, or A ST 311.

PSY 311. Advanced Research Seminar

4 Credits (2+4P)

Psychological research in conjunction with designing, conducting, writing, and presenting an independent research project. May also include various computer applications. Will discuss issues regarding application to graduate programs. Course should be taken no later than the first semester of senior year.

Prerequisite: PSY 310.

PSY 315. Emotion

3 Credits

An overview of the past century of research on human emotion from William James to Antonio Damasio. Explores a cognitive science perspective on emotion that includes questions about developmental, physiological, and evolutionary aspects of emotion and an exploration of the proximate and ultimate functions of emotion. Topics range from understanding the feeling component of emotion to understanding the role of facial displays of emotion.

Prerequisite(s): PSY 201G, and one of: STAT 251, STAT 271, or A ST 311G, and PSY 310 or consent of instructor.

PSY 317. Social Psychology

3 Credits

Ways in which people are influenced by the behavior of others are analyzed. Includes aggression, altruism, conformity, attraction, sexual behavior, prejudice, and nonverbal behavior.

Prerequisites: PSY 201G, MATH 120, and ENGL 111G.

PSY 320. Learning

4 Credits (3+2P)

Covers: habituation, Pavlovian conditioning, Thorndikian learning, stimulus generalization, transfer of training, and the learning and forgetting of related and unrelated material.

Prerequisites: PSY 201G, and one of: STAT 251G, STAT 271G, or A ST 311, and PSY 310.

PSY 321. Psychology of Personality**3 Credits**

Introduces personality theories and supporting research. Psychoanalytic, physiological, and behavioral theories as they apply to personality are examined. Focuses on normal personality functioning.

Prerequisites: PSY 201G, and one of: STAT 251G, STAT 271G, or A ST 311, and PSY 310.

PSY 324. Sexual Behavior**3 Credits**

Examines viewpoints of the evolution, control and function of human sexual behavior. Includes human sexuality, reproduction, male-female conflicts and the social implications of sex. **Prerequisites:** PSY 201G, MATH 120, and ENGL 111G

PSY 325. Health Psychology**3 Credits**

Life stress, surgical stress, coronary-prone behavior, biofeedback, pain control, psychosocial approaches to geriatrics and cancer, behavioral treatments for addictions, obesity, and interpersonal issues in health care.

Prerequisite: PSY 201G.

PSY 330. Psychology and the Law**3 Credits**

Discretionary practices in the judicial system including pretrial procedures, jury selection, jury decision making, eyewitness testimony, insanity, expert witnesses, and probation judgments.

Prerequisite: PSY 201G.

PSY 340. Cognitive Psychology**3 Credits**

Review of research and theory in the study of human cognitive processes. Topics include information processing, pattern recognition, memory, attention, language, problem solving, decision making, and reasoning.

Prerequisites: PSY 201G, and one of: STAT 251G, STAT 271G, or A ST 311, and PSY 310.

PSY 342. Cognitive Neuroscience**3 Credits**

Introduction to the study of the neural mechanisms underlying cognitive processes. Topics include relations between neural processes and attention, perception, memory, thinking and language; measuring changes in electrical activity, blood flow, and metabolism in the brain during cognition; the problem of consciousness; and evolutionary perspectives.

Prerequisites: PSY 201G and PSY 310.

PSY 350. Developmental Psychology: Conception through Childhood**3 Credits**

Covers a wide range of topics concerning human psychological development from conception through childhood with special emphasis on current research and theory.

Prerequisite: PSY 201G.

PSY 351. Developmental Psychology: Adolescence through Old Age**3 Credits**

Covers a wide range of topics concerning human psychological development from adolescence through old age with special emphasis on current research and theory.

Prerequisite: PSY 201G.

PSY 359. Psychology of Women**3 Credits**

Examines theories and research on the psychological functioning of women in North American society. Influential theories of gender in psychology and current controversies in the psychological literature. Topics include women's development across the lifespan, women and work, women's physical and mental health and sexuality, the victimization of women, gender stereotypes, biological, social, and cultural influences on women's behavior, and gender comparisons in abilities and personality. Same as W S 359.

Prerequisite: PSY 201G.

PSY 370. Special Topics**1-3 Credits**

May be taken under different subtitles announced in the Schedule of Classes for unlimited credit. May be repeated for a maximum of 12 credits.

Prerequisite: PSY 201G.

PSY 375. Psychology and the Brain**3 Credits**

An exploration of how the brain produces thinking, emotion, and behavior.

Prerequisite(s): PSY 201G, and one of: STAT 251G, STAT 271G, or A ST 311 or consent of instructor.

PSY 376. Evolutionary Psychology**3 Credits**

This course introduces the student to the science of Evolutionary Psychology. In this class we will explore how evolutionary psychologists think about a variety of topics ranging from our capacity for (and appreciation of) art, emotions, and beauty to an exploration of the "design" of our minds in regards to mating, status striving, social behavior and cultural production.

Prerequisite(s): PSY 201G, and one of: STAT 251, STAT 271, or A ST 311G, and PSY 310 or consent of instructor.

PSY 380. Perception**4 Credits (4+4P)**

Primary emphasis on vision. Topics include measurement of sensations, development of visual-motor coordination, reading, speech perception, picture perception, illusions, 3-dimensional space, and causes and consequences of visual abnormalities.

Prerequisites: PSY 201G, and one of: STAT 251G, STAT 271G, or A ST 311, and PSY 310.

PSY 383. Memory**3 Credits**

Examines facets of human memory from the information processing viewpoint, including encoding, storage, and retrieval and memory-aiding techniques.

Prerequisites: PSY 201G, and one of: STAT 251G, STAT 271G, or A ST 311, and PSY 310 or consent of instructor.

PSY 384. Perceptual and Cognitive Development**3 Credits**

Development across the lifespan in perception, memory, attention, reasoning, language and academic skills.

Prerequisites: PSY 201G, and one of: STAT 251G, STAT 271G, or A ST 311, and PSY 310 or consent of instructor.

PSY 400. Research**1-3 Credits**

Individual research projects supervised by a department faculty member. May be repeated for a maximum of 6 credits.

Prerequisites: PSY 310 and consent of instructor.

PSY 401. Directed Readings**1-3 Credits**

May be repeated for a maximum of 6 credits.

Prerequisites: PSY 201G and consent of instructor.

PSY 402. Field Experience**1-3 Credits**

Working with preschool, juvenile delinquent, handicapped, aged, convict, or mentally ill. Approximately five hours scheduled work per week per credit. May be repeated to 6 credits.

Prerequisites: 6 psychology credits and consent of instructor.

PSY 417V. Intercultural Relations**3 Credits**

Exploration of cultural and subcultural differences from a psychological perspective. Emphasis on modern cultural settings. Issues may include: ethnocentrism, stereotyping, intercultural communication, culture shock, cultural differences, nonverbal behavior, conflict management, and developing intercultural interaction skills.

Prerequisite: PSY 201G.

PSY 430. Human-Computer Psychology**3 Credits**

Theories, methodologies, and data from psychology applicable to interface design, with an emphasis on construction and application of conceptual psychological models.

Prerequisites: PSY 201G, and one of: STAT 251G, STAT 271G, or A ST 311, and PSY 310 or consent of instructor.

PSY 440. History and Systems of Psychology**3 Credits**

History of scientific method emphasizing outstanding methodological problems of contemporary science, especially psychology. Also covers recent history of psychology and development of schools of psychology.

Prerequisites: PSY 201G, and one of: STAT 251G, STAT 271G, or A ST 311, and PSY 310 or consent of instructor.

PSY 442. Thinking**3 Credits**

Research and theory pertaining to human thinking and problem solving. Effective problem-solving methods and common obstacles to problem solving are analyzed.

Prerequisites: PSY 201G and PSY 310.

PSY 445. Clinical Psychology**3 Credits**

Basic theories in clinical psychology and techniques of psychotherapy.

Prerequisites: PSY 201G, PSY 302, and one of: STAT 251G, STAT 271G, or A ST 311, and PSY 310 or consent of instructor.

PSY 450. Senior Thesis**3 Credits**

A laboratory or field research project conducted under faculty supervision. Requires written research proposal, conduct of research, data analysis, and final written report. May be repeated for a maximum of 6 credits.

Prerequisites: PSY 310, 6 additional psychology credits, consent of supervising faculty member, and junior or above standing.

PSY 470. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

PSY 507. Quantitative Methods in Psychology I**3 Credits**

Statistical concepts emphasizing distributions and methods most appropriate to the data, models, and theories in psychology. Emphasis on distributions, probability and basic inferential statistics in Psychological research.

Prerequisite(s): An elementary statistics course or consent of instructor.

PSY 508. Quantitative Methods in Psychology II**3 Credits**

Statistical concepts emphasizing distributions and methods most appropriate to the data, models, and theories in psychology. Emphasis on Analysis of Variance (ANOVA) in Psychological research.

Prerequisite(s): PSY 507 or equivalent.

PSY 509. Quantitative Methods in Psychology III**3 Credits**

Statistical concepts emphasizing distributions and methods most appropriate to the data, models, and theories in psychology. Emphasis on multiple regression in Psychological research.

Prerequisite(s): PSY 507 or equivalent.

PSY 510. Computer Methodology**3 Credits**

Use of computers in psychological research with emphasis on developing experimental control programs.

PSY 520. Learning**3 Credits**

Classical areas of learning, including instrumental and classical conditioning paradigms, habituation, reinforcement variables, stimulus generalization and transfer, and memory.

PSY 522. Sensation and Perception**3 Credits**

Stimulus and decision variables in judging auditory and visual events. Topics include: detection of signals; signal intensity versus perceived strength; size, shape, and movement perception; reading and listening.

PSY 523. Methods in Cognitive Psychology**3 Credits**

Experimental and correlational methodologies appropriate for investigating cognitive psychological theories and problems.

Prerequisite(s): PSY 524 or consent of instructor.

PSY 524. Cognitive Psychology**3 Credits**

Examines theoretical and empirical work on human cognition. Topics include: information processing theories, pattern recognition, memory, attention, language, problem solving, decision making, and reasoning.

PSY 525. Behavioral Neuroscience**3 Credits**

The biological basis of behavior with an emphasis on human cognitive functioning.

PSY 527. Social Psychology**3 Credits**

Current and traditional theories, research findings, and research methodologies of social psychology.

PSY 529. Methods in Social Psychology**3 Credits**

Experimental, quasi-experimental, and correlational methodologies appropriate for investigating social psychological theories and problems.

Prerequisite(s): Graduate student in psychology or consent of instructor.

PSY 530. Human-Computer Interaction

3 Credits

Issues associated with human-computer interface design. Concepts, methods, and data from HCI, cognitive psychology, human factors, artificial intelligence, and psycholinguistics that apply.

PSY 531. Human Memory

3 Credits

Current and traditional theories and research findings related to human memory.

PSY 535. Developmental Psychology

3 Credits

Examines theoretical and empirical work in lifespan developmental psychology, with an emphasis on perceptual and cognitive development, language development, and social cognitive development.

PSY 540. History and Systems of Psychology

3 Credits

History of scientific method emphasizing outstanding methodological problems of contemporary science, especially psychology. Covers recent history of psychology and development of schools of psychology.

PSY 543. Cognitive Neuroscience

3 Credits

Introduction to the study of the neural mechanisms underlying cognitive processes. Topics include relations between neural processes and attention, perception, memory, thinking and language; measuring change in electrical activity, blood flow, and metabolism in the brain during cognition; the problem of consciousness; and evolutionary perspectives.

PSY 547. Engineering Psychology

3 Credits

Covers concepts, methods, and findings of human performance. Treats the human as a subsystem that receives, stores and processes information, makes decisions, and acts within a human-machine environment system.

PSY 550. Teaching of Psychology

3 Credits

This class serves both new and experienced teachers. It will help new teachers design and conduct a successful course and help experienced teachers improve their teaching.

PSY 570. Special Topics

1-3 Credits

Specific subjects to be announced in the Schedule of Classes.

PSY 590. Research Seminar in Psychology

1 Credit (1)

Presentations on research by students, faculty, and guest speakers. May be repeated for credit.

PSY 598. Special Research Programs

1-3 Credits

Individual investigations either analytical or experimental. May be repeated for credit.

PSY 599. Master's Thesis

15 Credits

Thesis.

PSY 600. Doctoral Research

1-15 Credits

This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination.

PSY 698. Special Research Programs

1-3 Credits

Individual investigations either analytical or experimental. May be repeated for credit.

PSY 700. Doctoral Dissertation

15 Credits

Dissertation.

Psychology - Bachelor of Arts
General Requirements

Students must receive a C- or better in courses used to satisfy the departmental and nondepartmental requirements of the psychology major. Students must also complete all University degree requirements, which include: General Education requirements (p. 47), Viewing a Wider World requirements (p. 47), and elective credits to total 120 credits with 48 of them being upper division.

Departmental Requirements

PSY 201G	Introduction to Psychology	3
Select one from the following:		3
PSY 302	Abnormal Psychology	
PSY 350	Developmental Psychology: Conception through Childhood	
PSY 440	History and Systems of Psychology	
<i>Research Methods</i>		
PSY 310	Experimental Methods ¹	4
PSY 311	Advanced Research Seminar	4
<i>Basic Mechanisms</i>		
Select 3 credits from the following: ²		3
PSY 301	Introduction to Psycholinguistics	
PSY 375	Psychology and the Brain	
PSY 376	Evolutionary Psychology	
PSY 380	Perception	
<i>Acquisition and Use of Knowledge</i>		
Select 3 credits from the following: ²		3
PSY 320	Learning	
PSY 340	Cognitive Psychology	
PSY 383	Memory	
PSY 442	Thinking	
<i>Understanding Behavior</i>		

Select one from the following: ²	3
PSY 315 Emotion	
PSY 317 Social Psychology	
PSY 321 Psychology of Personality	
Additional Electives ³	11
Nondepartmental Requirements	
Select one from the following:	3
STAT 251G Statistics for Business and the Behavioral Sciences	
STAT 271G Statistics for Psychological Sciences	
A ST 311 Statistical Applications	
Philosophy course 300-level or above ⁴	3
At least three credits of introductory biology	3
Select one from the following: ⁵	4
BIOL 101G Human Biology	
& 101GL and Human Biology Laboratory	
BIOL 111G Natural History of Life	
& 111GL and Natural History of Life Laboratory	
BIOL 211G Cellular and Organismal Biology	
& 211GL and Cellular and Organismal Biology Laboratory ⁶	
Second Language Option	13-15
Total Credits	60-62

¹ PSY 310 Experimental Methods: prerequisite of PSY 201G Introduction to Psychology

² requirements are to be met after the student has completed PSY 310 Experimental Methods (which has prerequisites of PSY 201G Introduction to Psychology, and either STAT 251G Statistics for Business and the Behavioral Sciences or STAT 271G Statistics for Psychological Sciences or A ST 311 Statistical Applications

³ Additional electives to bring total credits in psychology to at least 34, with at least 24 of those 34 credits being upper division.

⁴ PHIL 346 Philosophy of Mind or PHIL 351 Philosophy of Science recommended

⁵ A course that includes a laboratory is highly recommended, and is required if intended to satisfy Gen Ed Area III

⁶ Prerequisite: CHEM 110G Principles and Applications of Chemistry or CHEM 111G General Chemistry I or CHEM 115 Principles of Chemistry I

Second Language

Students seeking the BA in Psychology must meet the second language requirement by completing one of the following three skills requirements:

Option 1: Traditional Language Track

Options as described in Section III of College Degree Requirements under College Degree Requirements under College of Arts and Sciences (i.e. typically through 212 or 214 or Arts & Sciences Certification, Option B).

Option 2: Computer Science Track

C S 153	Python Programming I	3
C S 154	Python Programming II	3
C S 158	R Programming I	3
C S 159	R PROGRAMMING II	3

Under special circumstances, alternative combinations of CS courses may be approved by the Department Head

Total Credits	12
---------------	----

Option 3: Math Track

MATH 121G	College Algebra	3
MATH 190G	Trigonometry and Precalculus	4
MATH 191G	Calculus and Analytic Geometry I	4
MATH 192G	Calculus and Analytic Geometry II	4
Total Credits		15

Psychology - Doctor of Philosophy

The Ph.D. in psychology is offered in the major areas of cognitive, engineering and social psychology. Ph.D. candidates are required to:

Core Course: (corresponding to the student's area of study)

PSY 524	Cognitive Psychology
PSY 527	Social Psychology
PSY 547	Engineering Psychology

Quantitative Methods Sequence:

PSY 507	Quantitative Methods in Psychology I	3
PSY 508	Quantitative Methods in Psychology II	3
PSY 509	Quantitative Methods in Psychology III	3

Content Courses:

PSY 520	Learning
PSY 522	Sensation and Perception
PSY 525	Behavioral Neuroscience
PSY 530	Human-Computer Interaction
PSY 531	Human Memory
PSY 535	Developmental Psychology
PSY 540	History and Systems of Psychology
PSY 543	Cognitive Neuroscience

Experimental/Quantitative Methods: (additional)

PSY 510	Computer Methodology
PSY 523	Methods in Cognitive Psychology
PSY 529	Methods in Social Psychology
PSY 550	Teaching of Psychology

Comprehensive Examination: ¹

Work related training requirement: ²

Final Oral Examination: ³

Dissertation:	18+
PSY 700	Doctoral Dissertation

¹ pass written and oral components of the comprehensive exam

² complete a work-related training requirement (i.e. complete an internship of at least 10 weeks duration, or teach at least one 3-credit undergraduate course independently: pre-teaching requirements listed here)

³ pass a final oral examination that consists primarily of an evaluation of the dissertation and the candidate's defense of it, but may extend over the entire field of the candidate's study,

Students are encouraged to register for one credit of PSY 590 Research Seminar in Psychology each semester.

Graduate courses fall into five categories:

Core: PSY 524 Cognitive Psychology, PSY 527 Social Psychology, PSY 547 Engineering Psychology

Quantitative methods: PSY 507 Quantitative Methods in Psychology I, PSY 508 Quantitative Methods in Psychology II, PSY 509 Quantitative Methods in Psychology III

Experimental Methods: PSY 510 Computer Methodology, PSY 523 Methods in Cognitive Psychology, , PSY 550 Teaching of Psychology

Content: PSY 520 Learning, PSY 522 Sensation and Perception, PSY 525 Behavioral Neuroscience, PSY 530 Human-Computer Interaction, PSY 531 Human Memory, PSY 535 Developmental Psychology, PSY 540 History and Systems of Psychology, PSY 543 Cognitive Neuroscience,

Supervised research (PhD): PSY 600 Doctoral Research, PSY 698 Special Research Programs, PSY 700 Doctoral Dissertation

When offered, PSY 570 Special Topics may be considered content, quantitative methods, or experimental methods, depending on the specific course content.

Psychology - Graduate Minor

Students may earn a minor in psychology at the MA or Ph.D. level by completing the following:

Required Coursework

Three courses from the following:

PSY 524	Cognitive Psychology ¹	3
PSY 527	Social Psychology ¹	3
PSY 547	Engineering Psychology ¹	3
PSY 520	Learning	3
PSY 522	Sensation and Perception	3
PSY 525	Behavioral Neuroscience	3
PSY 530	Human-Computer Interaction	3
PSY 531	Human Memory	3
PSY 535	Developmental Psychology	3
PSY 540	History and Systems of Psychology	3
PSY 543	Cognitive Neuroscience	3

¹ At least one course must be PSY 524 Cognitive Psychology, PSY 525 Behavioral Neuroscience or PSY 547 Engineering Psychology.

Psychology- Master of Arts

The department offers an MA degree in general experimental psychology. The program provides students with sufficient electives to emphasize a particular sub-area of experimental psychology. The program is designed to provide graduates with the tools and knowledge necessary for further training at the doctoral level or for employment in industry or government.

MA students are required to complete:

First Year Research Project

PSY 598	Special Research Programs	4-6
---------	---------------------------	-----

Core Course (corresponding to the student's area of study):

PSY 524	Cognitive Psychology	3
PSY 527	Social Psychology	
PSY 547	Engineering Psychology	

Two other Content Courses:

PSY 520	Learning	6
PSY 522	Sensation and Perception	
PSY 525	Behavioral Neuroscience	
PSY 530	Human-Computer Interaction	
PSY 531	Human Memory	
PSY 535	Developmental Psychology	
PSY 540	History and Systems of Psychology	
PSY 543	Cognitive Neuroscience	

The Quantitative Methods Sequence:

PSY 507	Quantitative Methods in Psychology I	3
PSY 508	Quantitative Methods in Psychology II	3
PSY 509	Quantitative Methods in Psychology III	3

Research Thesis:

PSY 590	Research Seminar in Psychology ¹	6
---------	---	---

¹ Students are also encouraged to register for one credit of PSY 590 Research Seminar in Psychology each semester.

Graduate courses fall into five categories:

Core: PSY 524 Cognitive Psychology, PSY 527 Social Psychology, PSY 547 Engineering Psychology

Quantitative Methods: PSY 507 Quantitative Methods in Psychology I, PSY 508 Quantitative Methods in Psychology II, PSY 509 Quantitative Methods in Psychology III

Experimental Methods: PSY 510 Computer Methodology, PSY 523 Methods in Cognitive Psychology, PSY 550 Teaching of Psychology

Content: PSY 520 Learning, PSY 522 Sensation and Perception, PSY 525 Behavioral Neuroscience, PSY 530 Human-Computer Interaction, PSY 531 Human Memory, PSY 535 Developmental Psychology, PSY 540 History and Systems of Psychology, PSY 543 Cognitive Neuroscience,

Supervised Research (MA): PSY 598 Special Research Programs, PSY 599 Master's Thesis

When offered, PSY 570 Special Topics may be considered content, quantitative methods, or experimental methods, depending on the specific course content.

Psychology - Undergraduate Minor

A student must pass at least 18 credits in Psychology courses with grades of C- or higher, and at least 9 of those credits must be upper division. A student may not earn both a BA in Psychology and a minor in Psychology.

Sociology

Undergraduate Program Information

The undergraduate major in sociology is broad in scope. It prepares students for a variety of public and private sector employment

opportunities including market research, personnel management, human relations, law enforcement and health services. Successful students often use their major as pre-professional preparation for advanced degrees in law, business, education, counseling and other social science based careers. Courses are offered both online and on campus.

Graduate Program Information

The program is designed to prepare students for doctoral study in sociology as well as employment in research and applied areas of the field. In addition to the on-campus program, we also offer an online MA for students who are unable to attend in person. Through small seminars, on campus graduate students engage in discussions of subjects that often result in thesis and internship topics. In online seminars, small classes allow for in-depth discussions that can generate ideas for research as well as knowledge for applied work environments. In both online and on-campus settings, faculty members and students work toward the mutual goal of developing the full potential of each student.

The Southwest and Border Region

Our unique location attracts faculty and students who are interested in peoples of the southwest, particularly Hispanics/Latinos and Native Americans. In addition, our proximity to the U.S.-Mexico border provides an ideal laboratory for the examination of such issues as globalization, transnational migration and the consequences of border development.

Social Inequality

Our faculty members examine the intersection of race, class and gender oppression in their teaching and research, with special attention to educational, rural/urban, ecological and global disparities. One goal of this examination is to address social problems such as poverty and racial/ethnic inequality.

Program Options and Requirements

Students seeking a master's degree in sociology should have taken undergraduate courses in methods and statistics or their equivalent. Students who have not taken these courses should complete them before beginning their graduate study or as soon as possible in consultation with the sociology graduate director.

Graduate students in sociology have two program options, thesis or non-thesis. Faculty consider the students special interests and career plans in advising regarding their choice of program options. The thesis option is typically selected by students who intend to pursue a Ph.D. degree, while the non-thesis option is commonly pursued by those desiring immediate employment in research and applied areas in business, government, education, social welfare and health. The non-thesis, coursework only option is currently the only option available for on-line MA students. All students must pass a final master's examination.

Degrees for the Department

Sociology - Bachelor of Arts (p. 407)

Sociology - Master of Arts (p. 408)

Minors for the Department

Contemporary Social Studies - Undergraduate Minor (p. 407)

Sociology - Undergraduate Minor (p. 409)

Professor, David G. LoConto, Department Head

Professor LoConto; **Associate Professors** Ortiz, Rice, Steinkopf-Rice, Way; **Assistant Professors** Arnett, Newby, Pelak; **College Assistant Professor** Hovey; **Emeritus Professor** Hoffman, Loustaunau

D. LoConto, Ph.D. (Oklahoma State University) – classical American social thought, popular culture, social psychology; S. Arnett, Ph.D. (University of Notre Dame) – education, race and ethnicity, social inequalities; K. Hovey, Ph.D. (University of New Mexico) – rural and urban communities, social control, criminological theory; C. A. Newby, Ph.D. (University of Texas at Austin) – race/ethnicity/minority relations, immigration, demography; D. Ortiz, Ph.D. (University of Notre Dame) – social movements, political sociology, Latin America; C. Pelak, Ph.D. (Ohio State University) – social inequalities, race and ethnicity, sociology of sport; J. Steinkopf-Rice, Ph.D. (Washington State University) – gender, globalization, communities; J.C. Rice, Ph.D. (Washington State University) – environment, society and technology, political sociology; S. Way, Graduate Program Director, Ph.D. (University of Arizona) – education, gender, juvenile delinquency.

SOC 101G. Introductory Sociology

3 Credits

Introduction to social theory, research, methods of analysis, contemporary issues in historical and cross-cultural contexts. Covers groups, deviance, inequality, family, gender, social change, and collective behavior.

SOC 201G. Contemporary Social Problems

3 Credits

Introduction to the fundamentals of social analysis through the analysis of contemporary American social problems. Emphasis on methods of analysis and cross-national comparisons showing that the social problems studied are common to all societies. Covers racism, violence, poverty, crime, health care, and substance abuse.

SOC 258. Current Issues in Marriage and Family

3 Credits

Examination of contemporary American family life, including courtship, marriage, divorce, and child rearing. Community Colleges only.

SOC 262. Issues in Death and Dying

3 Credits

Major personal and social issues related to the process of dying in our culture. Community Colleges only.

SOC 263. Human Sexuality

3 Credits

Introduction to cultural and personal aspects of human intimacy, sexuality and the life cycle, sexual variation, and sexually transmitted diseases. Community Colleges only.

SOC 269. Sexualities and Society

3 Credits

Examines various sexualities from a sociological perspective. Topics include sexual identity, intimate relationships, sexual desire, sexual behavior, the sex industry, and the politics of sexuality. Discussion of selected topics is grounded in both macro and micro sociological viewpoints. Restricted to: Main campus only.

SOC 273. Sex and Gender

3 Credits

Analysis of changes, behaviors, and stereotypes of women and men in contemporary Western societies. Same as W S 273.

SOC 330V. Introduction to Religious Studies**3 Credits**

Provides an overview of old and new methods and theories for the study of religion. Exposure to the ways groups of people in diverse cultural systems construct and change their religious traditions to serve practical and meaningful ends. Same as ANTH 330V and HIST 330V.

SOC 336V. Sociology of Pop Culture**3 Credits**

This course will provide students with a sociological look at creation, distribution, and effects of popular culture that have shaped, preserved, and conveyed distorted images of social class, race, gender and history to unwary consumers.

SOC 350. Sociological Foundations**3 Credits**

Focus is on becoming a sociologist including career opportunities, thinking critically about society, and conducting sociological inquiry. Emphasis is on identifying and using resources available to sociologists, communication skills for sociologists and acquisition of basic analytic techniques. Restricted to BA Sociology majors.

Prerequisite(s): SOC 101G or consent of instructor.

SOC 351. Sociological Theory**3 Credits**

Analysis of the main historical themes underlying contemporary sociological theory. May be repeated up to 3 credits.

Prerequisite(s): SOC 101G.

SOC 352. Social Research: Methods**3 Credits**

An introduction to research design and data collection strategies commonly employed in the social sciences. Topics include experiments, survey research and various other quantitative and qualitative methods. May be repeated up to 3 credits.

Prerequisite(s): SOC 101G.

SOC 353. Sociological Research: Analysis**3 Credits**

Elementary data analysis class emphasizing descriptive and inferential statistical techniques commonly employed in the social sciences. Topics range from one variable analysis through regression and correlation analysis of two variables. May be repeated up to 3 credits.

Prerequisite(s): SOC 101G.

SOC 357. Gender and Society**3 Credits**

Overview of issues related to gender, including how gender is constructed and reproduced in our society. Gender is examined from social psychological and institutional perspectives. Same as W S 357.

SOC 359. Sociology of the Family**3 Credits**

Family patterns, dynamics, and processes in North American and other contemporary families. Emphasis on diversity.

SOC 360V. Introduction to Population Studies**3 Credits**

Determinants and consequences of changes in fertility, mortality and migration patterns. Introduction to techniques of demographic analysis. Focus on U.S. and world population issues and their relation to social, cultural, and economic systems.

SOC 361V. Social Issues in the Rural Americas**3 Credits**

Same as ANTH 361V.

SOC 362. Urban Society in a Global World: Problems, Prospects, and Promises**3 Credits**

Identification and analysis of the causes and consequences of social issues in urban environments including poverty, crime, terrorism, urban social policy, suburban flight, disinvestment, and deindustrialization. Special emphasis on global forces affecting global urban environments around the world.

SOC 365. Environmental Sociology**3 Credits**

Societal responses to environmental problems including social adjustments to natural and technological hazards, socio-cultural aspects of technological risk and impact assessment, and emergence of environmental social movements.

SOC 371. Race and Ethnic Relations**3 Credits**

Dynamics of racial prejudice and patterns of racial and ethnic interaction in the United States.

SOC 374V. Comparative Family Systems**3 Credits**

A comparative analysis of family forms and characteristics in various societies. An examination of the diversity of family practices among ethnic and class groups in the United States. Same as W S 374G.

SOC 375. Social Inequality**3 Credits**

Analysis of the social distinctions arising from sex, age, occupation, and ethnicity. Emphasis on indicators of social class and patterns of social mobility.

SOC 376V. Social Change**3 Credits**

Explanations of autonomous and directed social change as occurring at the individual, organizational, societal, and international levels. Case studies from around the world.

SOC 381. Individual and Society**3 Credits**

Ways people influence each other and the mutual interaction of the individual and society. Topics include attitudes, attitude change, conformity, liking and friendship patterns.

SOC 390. Sociology of Childhood**3 Credits**

This course examines theories, methods, and empirical research in several areas of the sociology of childhood. Major themes are: (1) how social structure constrains children's lives, (2) how children negotiate, share, and create culture, and (3) how children's experiences vary within and across societies.

SOC 391. Crime and Society**3 Credits**

Analysis of crime at the interpersonal, organizational, and social structure levels in society. Exploration of contemporary images of crime in mass media. Examination of connections between race, class, gender, and crime in U.S. society.

SOC 392. Juvenile Delinquency**3 Credits**

Nature, extent, and causes of juvenile delinquency; juvenile justice; modern methods of treatment; programs of prevention.

SOC 393. Youth and Society**3 Credits**

Comparative historical analysis of social, economic and cultural forces affecting young people. Emphasis on organizational and institutional effects on the well being of children and young adults.

SOC 394V. Sports and Society: A Global Perspective**3 Credits**

A critical examination of sports in a global context, emphasizing the social and cultural factors that shape the world of sports and the consequences of sports for societies. Course examines issues of social inequality, violence, media and corporate influence, religion and sports, and the student-athlete experience.

SOC 401. Introduction to Sociological Practice**3 Credits**

The application of sociological theory and research method. May be taught as service learning course. May be repeated up to 3 credits. Restricted to: SOC majors.

Prerequisite(s): SOC 101G, senior standing or consent of instructor.

SOC 409. COMMUNITY DEVELOPMENT**3 Credits**

This is a holistic view of community development with an emphasis upon how economic development efforts can become more inclusive and sustainable. Topics include examining what 'community' means, community development versus economic development, and alternative economic activities.

Prerequisite(s): SOC 101G.

SOC 430. Social Movement Theory**3 Credits**

Overview of key theories in past and present social movement research. Includes a focus on rational or spontaneous choice theories, resource mobilization, and new social movement theories. Theoretical perspectives focus on analyses of case studies including women s movement, civil rights, and environmental movements.

SOC 448. Special Topics**3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

SOC 449. Directed Readings**1-3 Credits**

Individual readings or research for either majors or nonmajors. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

SOC 457. Gender, Science, and Technology**3 Credits**

How gender, science and technology are interrelated social constructions. Science and technology are examined as social institutions. Explanations for different rates of participation based on race, class and gender are explored. Same as: W S 467.

SOC 458V. Comparative Global Family Systems**3 Credits**

The study of families around the world. The comparison will include how capitalism and power differentials have affected the course of family history, gender relations, and family life today.

SOC 459. Advanced Issues in Sex and Gender**3 Credits**

Comprehensive examination of current gender identity and gender stratification issues. Same as W S 459.

SOC 460. Sociology of Religion**3 Credits**

Examination of religion in its social context to understand the intricate relations of religion, culture and U.S. society. Recommended preparatory courses: SOC 101G, SOC 273, SOC 376, ANTH 125G.

SOC 464. Human Society and the Environment**3 Credits**
