A thesis is not required. With special approval, however, a degree candidate may elect to write a thesis with at least 6 credit hours earned under B A 590 (https://catalogs.nmsu.edu/search/?P=BCIS%20590). Master’s Thesis in lieu of B A 590 (https://catalogs.nmsu.edu/search/?P=BCIS%20590) Professional Paper/Presentation.

Students in the on-campus MBA program may elect to pursue a concentration in Information Systems and must take additional coursework beyond that required to complete the MBA degree program. BCIS 502 (https://catalogs.nmsu.edu/search/?P=BCIS%20502) Business Information Systems is a required MBA course and a prerequisite for each of the courses in the concentration.

Any of these courses may also be used to fulfill the MBA elective requirement.

1 This elective must be selected from the approved course list on the MBA web page.

The Graduate School requires that students maintain a minimum cumulative GPA of 3.0 in all courses taken as a graduate student at NMSU. The MBA program requires, in addition, that every candidate for the MBA degree must graduate with at least a minimum cumulative GPA of 3.0 in all courses required for the General MBA degree.
The following course sequencing requirements must be satisfied:

1. B A 590 Professional Paper/Presentation must be completed during the final term of the student’s program and is only open to students who have been accepted into the MBA degree program. ACCT 503 Accounting for Managers, BLAW 502 Legal Environment of Business, BFIN 503 Financial Management and MKTG 503 Marketing Management must be completed prior to enrollment in B A 590 Professional Paper/Presentation.

2. MGMT 590 Strategic Management must be completed at the end of the student’s program of study and is only open to students who have been accepted into the MBA degree program. All MBA coursework other than B A 590 Professional Paper/Presentation must be completed prior to or during the same term as MGMT 590 Strategic Management.

Students requesting transfer credit for any graduate courses taken before admission to the MBA program must submit appropriate written justification, including course descriptions, syllabi, transcripts, etc. Up to nine credits of transfer work may be applied to meet MBA requirements if the credits were earned in a program accredited by AACSB International. "Transfer credits for courses taken after admission to the program are generally not permitted, but advance approval should be requested and may be granted in exceptional situations."

Final Examination for the Degree:

A student may satisfy the Graduate School’s requirement for a final exam by completing the General MBA Degree’s necessary coursework and supplemented or modified requirements for the concentration selected. The following two criteria must be met by the end of their final semester or at the end of a subsequent semester during which graduate-level courses are taken or retaken to meet the specified cumulative GPA.

(1) The student must have a minimum cumulative GPA of 3.0 based on all courses taken as a graduate student at NMSU, including those taken as part of the MBA program (required courses, elective course(s), and courses to fulfill the requirements of an MBA concentration or approved course substitution).

(2) The student must complete all required courses (36 credit hours) with a minimum cumulative GPA of 3.0 for the General MBA (11 required courses and 1 elective course, approved course substitutions, and any approved transfer courses).

A student who fails to meet one or both previous criteria may, during one or more subsequent semesters, take or retake additional graduate-level or MBA-specific courses to increase the cumulative GPA, thereby satisfying the Graduate School’s requirement for a final exam.

Note 1: The General MBA program (excluding concentrations) consists of eleven required courses and one elective course (totaling 36 credits). The MBA elective course consists of 1 graduate business elective (numbered 500 or above) as listed on the MBA web page.

Note 2: The College of Business reserves the right to change the published requirements. Any such changes will be announced and will not be retroactive. Currently, MBA courses are offered once each year except for the elective and some concentration courses. Always consult an academic advisor or department head before registering for classes.

A thesis is not required. With special approval, however, a degree candidate may elect to write a thesis with at least 6 credit hours earned under B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20599).

Students in the on-campus MBA program may elect to pursue a concentration in Public Utility Regulation and must take the following courses. One of these courses will serve as the elective in the MBA program and two of the courses will substitute for courses MGMT 512 (https://catalogs.nmsu.edu/search/?P=MGMT%20512) and B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) in the standard MBA program (because the learning objectives of the utility regulation courses meet the learning objectives of the two basic MBA courses).

This elective must be selected from the approved course list on the MBA web page.

The Graduate School requires that students maintain a minimum cumulative GPA of 3.0 in all courses taken as a graduate student at NMSU. The MBA program requires, in addition, that every candidate for the MBA degree must graduate with at least a minimum cumulative GPA of 3.0 in all courses required for the General MBA degree.
The following course sequencing requirements must be satisfied:

1. B A 590 Professional Paper/Presentation must be completed during the final term of the student's program and is only open to students who have been accepted into the MBA degree program. ACCT 503 Accounting for Managers, BLAW 502 Legal Environment of Business, BFIN 503 Financial Management and MKTO 503 Marketing Management must be completed prior to enrollment in B A 590 Professional Paper/Presentation.

2. MGMT 590 Strategic Management must be completed at the end of the student's program of study and is only open to students who have been accepted into the MBA degree program. All MBA coursework other than B A 590 Professional Paper/Presentation must be completed prior to or during the same term as MGMT 590 Strategic Management.

Students requesting transfer credit for any graduate courses taken before admission to the MBA program must submit appropriate written justification, including course descriptions, syllabi, transcripts, etc. Up to nine credits of transfer work can be applied to meet MBA requirements if the credits were earned in a program accredited by AACSB International. Transfer credits for courses taken after admission to the program are generally not permitted, but advance approval should be requested and may be granted in exceptional situations.

Final Examination for the Degree:

A student may satisfy the Graduate School's requirement for a final exam by completing the General MBA Degree's necessary coursework and supplemented or modified requirements for the concentration selected. The following two criteria must be met by the end of their final semester or at the end of a subsequent semester during which graduate-level courses are taken or retaken to meet the specified cumulative GPA.

(1) The student must have a minimum cumulative GPA of 3.0 based on all courses taken as a graduate student at NMSU, including those taken as part of the MBA program (required courses, elective course(s), and courses to fulfill the requirements of an MBA concentration or approved course substitution).

(2) The student must complete all required courses (36 credit hours) with a minimum cumulative GPA of 3.0 for the General MBA (11 required courses and 1 elective course, approved course substitutions, and any approved transfer courses).

A student who fails to meet one or both previous criteria may, during one or more subsequent semesters, take or retake additional graduate-level or MBA-specific courses to increase the cumulative GPA, thereby satisfying the Graduate School’s requirement for a final exam.

Note 1: The General MBA program (excluding concentrations) consists of eleven required courses and one elective course (totaling 36 credits). The MBA elective course consists of 1 graduate business elective (numbered 500 or above) as listed on the MBA web page.

Note 2: The College of Business reserves the right to change the published requirements. Any such changes will be announced and will not be retroactive. Currently, MBA courses are offered once each year except for the elective and some concentration courses. Always consult an academic advisor or department head before registering for classes.

A thesis is not required. With special approval, however, a degree candidate may elect to write a thesis with at least 6 credit hours earned under B A 599 (https://catalogs.nmsu.edu/search/?P=B%20A%20599).

Students in the on-campus MBA program may elect to pursue a concentration in Public Utility Regulation and must take the following courses. One of these courses will serve as the elective in the MBA program and two of the courses will substitute for courses MGMT 512 (https://catalogs.nmsu.edu/search/?P=MGMT%20512) and B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) in the standard MBA program (because the learning objectives of the utility regulation courses meet the learning objectives of the two basic MBA courses).

Engineering/MBA Program – Dual Degree

Highly motivated undergraduate engineering students who would like to apply their quantitative skills and technical expertise to the business environment should consider the dual degree program offered through the College of Engineering and the College of Business. Undergraduate students who are accepted into this program can, with full time enrollment and careful scheduling of their coursework, complete the MBA degree requirements in as little as one year beyond completion of the BS degree. Information regarding the dual degree program may be obtained from the College of Engineering or the MBA Program Office (GU 114).

Business Administration (Management) - Doctor of Philosophy

Phone: (575) 646-1201

http://business.nmsu.edu/academics/graduate-programs/mgt-phd/ (https://business.nmsu.edu/academics/graduate-programs/mgt-phd/)

The College of Business offers a program leading to a PhD in Business Administration with a concentration in Management. Our program meets the requirements of AACSB international by providing students with advanced management-related theoretical, research and applied knowledge and skills. We are committed to educating researchers, teachers, and scholars who will lead and shape business and organizational life in the decades to come. We prepare you to understand the complexities of business and its social and international contexts while you develop a specialized area of expertise. Our program is flexible in order to align programs of study with job opportunities and students’ interest areas. Research skills are developed through course work and mentoring relationships, as you will work with faculty to pursue joint research according to your interest and faculty members’ expertise. Our faculty prepare students for academic research and teaching careers in managerial and organizational sciences; consulting careers with
required courses

Industrial, governmental, health, or educational institutions; or leadership careers in organizational management and administration.

Business Administration (Marketing) - Doctor of Philosophy

Phone: (575) 646-3341

The College offers a program leading to a Ph.D. degree. The faculty of the PhD Program in Business Administration is committed to training researchers and educators who will shape business scholarship, practice and pedagogy. The program emphasizes preparing candidates to understand the complexities of modern business while they develop a specialized area of expertise in marketing or management. The PhD in Business Administration provides graduates with the opportunity to pursue a variety of career paths within academia and within industry. Currently concentrations are offered in management and marketing, and each admits students independently.

Program Requirements

- demonstrate competency in statistics and research methods;
- complete studies in a major field of concentration chosen from the departments of management or marketing in the College of Business;
- complete studies in a minor field of concentration or interest area that supports the student’s research, teaching and/or career goals;
- pass qualifying exams consisting of a First-Year Paper and a Second-Year Paper, and pass the comprehensive exam; and
- complete and successfully defend a doctoral dissertation.

Other potential courses may be available in the catalog. Discuss with your Sustainability Advisor whether the course would be suitable. Substitutions and exceptions can be made with the approval of the Sustainability faculty advisor and Department Head of Plant & Environmental Sciences Department.

Economics, Applied Statistics, and International Business

Undergraduate Program Information

The Department of Economics, Applied Statistics, and International Business (EASIB) offers undergraduate degrees in two majors in the bachelor of business administration – one in economics and one in

...
international business. The Department also offers a bachelor of arts in economics. Economics majors work in business, government, and the non-profit sector. The economics major is also a good choice for students who plan to attend graduate school in economics, law, business, and other areas. International business is a good major for those interested in working in the international operations of a business or interested in working outside the United States. International Business graduates often obtain jobs in areas such as management or marketing then work in areas related to international aspects of the business.

**Graduate Program Information**

**Graduate Study in Economics**

EASIB cooperates with the Department of Agricultural Economics and Agricultural Business (AEAB) in offering graduate programs in economics, agricultural economics and economic development. The programs are jointly administered by faculty from the two departments. The objective of the master’s program is to prepare students for professional positions in business, government, or research institutions. Our master’s degrees also are good preparation for those considering applying to a Ph.D. program. EASIB offers a Master of Arts in economics. There are three concentrations: regulatory economics, policy analysis, and econometrics. For more information on the Master of Science degree in agricultural economics, refer to the Agricultural Economics (p. 158) section in this catalog. The Doctor of Economic Development, also jointly administered by the EASIB and AEAB, is a unique program that provides advanced training in applied economic development. Graduates find jobs in industry and government.

**Graduate Study in Applied Statistics**

A graduate degree administered directly by EASIB is the Master of Applied Statistics. This degree is designed to produce graduates proficient in current practices in statistics and able to enter directly into positions in industry, government or private business. After completing this degree, a person will have the skills needed to execute data analyses, design experiments, and design and analyze surveys.

**Graduate Study in Business Administration**

The Department of Economics, Applied Statistics, and International Business cooperates with other departments of the College of Business to offer a Master of Business Administration and a Ph.D. in Business Administration. Within the Ph.D. program, the department offers a minor area of study and provides statistics courses to support the doctoral program. More information about these programs is available in this catalog under the Department of Economics (p. 825).

**Degrees for the Department**

**Bachelor Degree(s)**

- Economics - Bachelor of Art in Economics (p. 825)
- Economics - Bachelor of Business Administration (p. 827)
- Economics (Energy Economics) - Bachelor of Business Administration (p. 829)
- Economics (Energy Economics) - Bachelor of Business Administration (Online) (http://catalogs.nmsu.edu/nmsu/business/economics-applied-statistics-international-business/economics-energy-economics-bba-online/)
- International Business - Bachelor of Business Administration (p. 832)

**Master Degree(s)**

- Applied Statistics - Master of Science (p. 835)
- Economics - Master of Arts (p. 836)
- Economics - Master of Arts (Online) (p. 836)
- Economics (Econometrics) - Master of Arts (p. 837)
- Economics (Econometrics) - Master of Arts (Online) (p. 837)
- Economics (Public Policy) - Master of Arts (p. 838)
- Economics (Public Policy) - Master of Arts (Online) (p. 838)
- Economics (Public Utility Policy and Regulation) - Master of Arts (p. 839)
- Economics (Public Utility Policy and Regulation) - Master of Arts (Online) (p. 839)

**Doctoral Degree(s)**

- Economic Development - Doctor of Economic Development (p. 840)

**Minors for the Department**

**Undergraduate**

- Economics - Undergraduate Minor (p. 834)
- International Business - Undergraduate Minor (p. 835)

**Graduate**

- Applied Statistics - Graduate Minor (p. 842)
- Economics - Graduate Minor (p. 842)

**Graduate Certificates**

- Public Utility Regulation and Economics - Graduate Certificate (p. 841)
- Public Utility Regulation and Economics - Graduate Certificate (Online) (p. 841)

**Christopher A. Erickson, Interim Department Head**

**Department of Economics, Applied Statistics and International Business:**

**Professors** L. Blank, Ph.D. (Tennessee, Knoxville)-microeconomic theory, managerial economics, regulatory economics; D. L. Daniel, Ph.D. (Southern Methodist)-nonparametrics; C. Enomoto, Ph.D. (Texas A&M)-econometrics, economic theory; C. A. Erickson, Ph.D. (Arizona State)-economic development, monetary theory, macroeconomics; D. A. Gegan, Ph.D. (Wyoming)-public utility economics, industrial organization; Y. F. Lee, Ph.D. (Southern Illinois-Carbondale)-international finance, international trade, international system, economic development; R. L. Steiner, Ph.D. (Oklahoma State)-likelihood methods, discrete distributions; D. M. VanLeeuwen, Ph.D. (Oregon State)-statistics; B. Widner, Ph.D. (Colorado State)-urban/regional, public finance, development **Associate Professors** C. Gard, Ph.D. (Washington)-biostatistics; R. D. McFerrin, Ph.D. (Texas A & M) - micro theory, American economic history; **Assistant Professors** B. Bai, MS (New Mexico State)-applied statistics; J. Bucheli, Ph.D. (New Mexico)-migration, economic development; L. LaPlue (Tennessee)-international and environmental economics; M. Li, Ph.D. (Pennsylvania State), J. M. Mamkhezi, Ph.D. (New Mexico)-energy, natural resources, environmental; C. Sroka (Ohio State)-count data models Emeritus **Faculty** R. V. Adkisson, Ph.D. (Nebraska)-international, public finance, economic development; K. Brook, Ph.D. (Texas Austin)-macroeconomic theory, monetary policy; D. L. Clason, Ph.D. (Kansas State); W. R. Gould, Ph.D. (North Carolina State)-biological sampling, wildlife and fisheries estimation; M. Ellis, Ph.D. (California-Riverside); B. N. Matta, Ph.D. (Texas-
Applied Statistics Courses

A ST 311. Statistical Applications
3 Credits (3)
Techniques for describing and analyzing economic and biological data; estimation, hypothesis testing, regression and correlation, basic concepts of statistical inference. May be repeated up to 3 credits.
Prerequisite: MATH 1215 or higher.
Learning Outcomes
1. Describe a data set with graphical tools and computed measures.
   Explain the relationship between two numerical variables using correlation and regression. Understand how probability and sampling methods are used to make statistical inferences. Draw inference from a sample to a population using confidence intervals and hypothesis tests. Understand the relationship between population parameters and sample statistics. Understand the basic procedure of data production with sampling and experimental design.

A ST 450. Special Topics
1-4 Credits
Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

A ST 465. Statistical Analysis I
3 Credits (3)
An analytic introduction to the theory and methods of statistical inference. Sampling, frequency distributions (z, t, x2, F), estimation, testing, and simulation. Crosslisted with: A ST 565.
Prerequisite(s): MATH 2530G or consent of instructor.

A ST 466. Statistical Analysis II
3 Credits (2+2P)
Continuation of A ST 465. An analytic introduction to the theory and methods of statistical inference. Sampling, frequency distributions (z, t, x2, F), estimation, testing, and simulation. Crosslisted with: A ST 566.
Prerequisite(s): A ST 465 or consent of instructor.

A ST 498. Independent Study
1-3 Credits
Individual studies directed by consenting faculty with prior approval of the department head. Maximum of 3 credits per semester and a grand total of 3 credits.

A ST 503. SAS Basics
3 Credits (2+2P)
An introduction to the statistical software package, SAS, and its utilization in an interactive computing environment, primarily PC/SAS. Provides a fundamental understanding of the structure of SAS, its data management capabilities, and how to invoke a variety of descriptive and simple statistical SAS procedures.
Corequisite(s): A ST 505.

A ST 504. Statistical Software Applications
1 Credit (1)
Optional Computing course to accompany A ST 506. Computer analysis of topics covered in A ST 505 and A ST 506.
Prerequisite(s): A ST 503.
Corequisite(s): A ST 506.

A ST 505. Statistical Inference I
4 Credits (3+2P)
A qualitative introduction to the concepts and methods of statistical inference. Sampling, frequency distributions (z, t, x2, F), estimation, and testing. One-way analysis of variance. Simple linear regression.
Prerequisite: consent of the instructor.

A ST 506. Statistical Inference II
3 Credits (2+2P)
Introduction to multiple regression; the analysis of variance for balanced studies; multiple comparisons, contrasts, factorials, experimental designs through split plots. May be repeated up to 3 credits.
Prerequisite: A ST 505 and the ability to use a standard computer package such as SAS (may be satisfied by A ST 503) or consent of instructor.

Learning Outcomes
1. Formulate models, construct ANOVA tables for balanced designs, and conduct complete analyses accounting for factorial treatment structures, and standard experimental design structures, including the completely randomized design, the randomized complete block design, completely randomized design with subsampling, the completely randomized design with a covariate, and the split-plot design. Assess model adequacy including assessing constancy of variance and normality assumptions. Choose an appropriate multiple comparisons procedure to control the experiment wise or family wise Type I error rate. Use contrasts to conduct pre-planned comparisons. Identify the experimental unit(s) in an experiment; formulate a model and conduct an analysis appropriately accounting for the experimental unit(s). Conduct a complete analysis of data from a designed experiment and interpret findings.

A ST 507. Advanced Regression
3 Credits (3)
Examination of multiple regression; residual analysis, collinearity, variable selection, weighted least squares, polynomial models, and nonlinear regression: linearizable and intrinsically nonlinear models. May be repeated up to 3 credits.
Prerequisite: A ST 503 and A ST 505 or consent of instructor.

Learning Outcomes
1. Understand the fundamental philosophy behind regression. Conduct a proper regression analysis, including making inferences and predictions. Address common pitfalls in regression, including model assumption and collinearity issues. Use the R language to perform regression analysis.

A ST 509. Statistical Models for Complex Data Structures
3 Credits (3)
Statistical models for data that are not normally distributed or data with correlated observations. Covers generalized linear models for discrete and mixed models for correlated data structures. Analysis of data with unbalanced and missing cells.
Prerequisite: A ST 506 with a grade of B or higher, or A ST 507 with a grade of B or higher.

Learning Outcomes
1. Analyze data using classical regression and generalized linear models. Derive quantities of interest from fitted models. Formulate the appropriate hierarchical model for different analytical goals and data structures. Use statistical software to fit hierarchical models and assess the adequacy of the model. Interpret summaries of fitted hierarchical models.
A ST 511. Statistical Methods for Data Analytics
3 Credits (3)
Statistics fundamentals, with an emphasis on inferential methods, linear regression, and practical applications to data analytics. A ST majors should not take this course if they have already completed A ST 505.
Learning Outcomes
1. Understand descriptive and inferential methods commonly used in data analytics Formulate linear regression models and fit models using statistical software Properly interpret the results of statistical analyses Effectively communicate statistical methods and results orally and in writing

A ST 512. Quantitative Analysis for Business Decisions
3 Credits (3)
Identification, collection, and analysis of an organization's data both internal and external, and use of the resultant information in managerial decision making. Crosslisted with: MGMT 512.
Learning Outcomes
1. Understand statistical methods commonly used in business. Identify statistical considerations in the design of studies. Properly interpret the results of statistical analyses and use results to make decisions regarding business problems. Effectively communicate business decisions orally and in writing, using statistics to defend decisions, as appropriate.

A ST 515. Statistical Analysis with R
3 Credits (3)
Introduction to R data types, basic calculations and programming, data input and manipulation, one and two sample tests, ANOVA, regression, diagnostics, graphics, probability distributions, and basic simulations in the R software environment.
Prerequisite(s): A ST 505 or equivalent with consent of instructor.

A ST 540. Predictive Analytics
3 Credits (3)
This course covers data analytic techniques that can be used to predict and classify observations outside of the original data. Material includes linear and nonlinear regression models, linear and nonlinear classification models, and classification and regression trees. Students will gain hands-on experience using modern software packages to build predictive models and quantify the accuracy of these models.
Prerequisite(s): A ST 507 or consent of instructor.

A ST 550. Special Topics
1-4 Credits
Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

A ST 551. Introduction to Statistical Consulting
1 Credit (1)
Consideration of published material in the consulting process. Restricted to majors. Graded S/U.
Prerequisite: consent of instructor.

A ST 552. Advanced Statistical Consulting
1 Credit (1)
Continuation of A ST 551 with emphasis on dealing with clients in order to identify statistically relevant features of a research study. Restricted to majors. Graded S/U.
Prerequisite: A ST 551.

A ST 553. Practicum in Statistical Consulting
1 Credit (1)
Supervised experience under the guidance of senior faculty. May be repeated for a maximum of 2 credits. Restricted to majors. Graded S/U.
Prerequisite: A ST 552.

A ST 554. Practicum in Statistics
3 Credits (3)
Practical experience in data analysis and the reporting of results; selecting and using statistical methods to analyze and interpret real-world problems; written and oral communication of findings
Prerequisite: A ST 503, A ST 506, A ST 507, and A ST 566.
Learning Outcomes
1. Work with real data to gain substantial experience in data analysis, writing, and presentation. Research and apply a variety of statistical methods, some of which students may not have encountered in prior coursework. Apply knowledge and skills gained throughout the program of study, integrating content from across the MS in A ST curriculum.

A ST 555. Applied Multivariate Analysis
3 Credits (3)
Multivariate analysis of linear statistical models, including MANOVA and repeated measures. Analysis of correlation and covariance structures, including principal components, factor analysis, and canonical correlation. Classification and discrimination techniques. May be repeated up to 3 credits.
Prerequisite: A ST 506 and A ST 504.
Learning Outcomes
1. Understand the details of various multivariate techniques, emphasizing connections to univariate techniques where applicable. Select appropriate multivariate techniques for a given data set and problem. Use statistical software to perform multivariate analyses. Correctly interpret, write about, and present the results of multivariate analyses.

A ST 556. Statistical Analysis I
3 Credits (3)
An analytic introduction to the theory and methods of statistical inference. Sampling, frequency distributions (z, t, x2, F), estimation, testing, and simulation. Crosslisted with: A ST 465.
Prerequisite(s): MATH 2530G or consent of instructor.

A ST 556. Statistical Analysis II
3 Credits (2+2P)
Continuation of A ST 556. Crosslisted with: A ST 466.
Prerequisite(s): A ST 556 or consent of instructor.

A ST 557. Applied Linear Models I
3 Credits (3)
The mean model, including constraints, approach to linear models; nonidentity variance-covariance matrices. Some emphasis on computational aspects and relation to statistical packages.
Prerequisite: A ST 556 or consent of instructor.

A ST 558. Applied Linear Models II
3 Credits (3)
The relation of full to less-than-full rank linear models; complex data structures, including messy data, empty cells, and components of variance: extensions to categorical data analysis and nonparametric methods. Continues some emphasis on computational aspects.
Prerequisite: A ST 557.
A ST 596. Independent Study
1-3 Credits
Individual studies directed by consenting faculty with prior approval by department head. May be repeated for a maximum of 3 credits.
Prerequisite: consent of instructor.

A ST 598. Special Research Problems
1-6 Credits
Individual analytical or experimental projects. Restricted to majors. Graded S/U.

A ST 599. Master's Thesis
1-6 Credits
Thesis.

A ST 609. Linear Model Theory
3 Credits (3)
Theoretical treatment of linear models. Covers fixed effects and mixed effects models; models that are full rank, less than full rank, and overparametrized. Some computational aspects are discussed in relation to statistical packages. Prior to enrollment students should have a basic understanding of undergraduate-level matrix algebra.
Prerequisite: A ST 565, A ST 566, and A ST 509.

Learning Outcomes
1. Derive estimators of model parameters using design matrices, including models that are full rank, less than full rank, and over-parameterized Derive the expectation vector and variance matrix of a linear transformation of a random data vector Derive common test statistics and their distributions for fixed effects and mixed effects models with a balanced design Understand the mathematical properties of variance-covariance matrices and their implications for model estimation and inference Derive and interpret diagnostics for linear models

A ST 616. Computational Statistics
3 Credits (3)
An introduction to topics in computational statistics including: methods for generating random variables, large scale hypothesis testing, resampling, bootstrapping, permutation tests, the Expectation-Maximization algorithm, Markov chain Monte Carlo methods, and computational approaches in Bayesian inference. Includes some applications of computational statistics in the sciences. Previous experience with programming, while helpful, is not required.
Prerequisite: A ST 505 and A ST 566.

Learning Outcomes
1. Conduct large-scale hypothesis testing Generate random numbers and random variables Implement Markov chain Monte Carlo methods for conducting Bayesian inference Import and manipulate data using R Employ bootstrapping methods for making inferences and conduct statistical hypothesis testing using permutation tests

A ST 645. Time Series Methods
3 Credits (3)
Theory and methods for analyzing, modeling, and forecasting time series. Covers ARIMA models, spectral analysis, filtering, and state-space models. Previous experience using the R programming language is helpful but not required. Students should have a basic understanding of undergraduate-level matrix algebra and trigonometry.
Prerequisite: A ST 565 and A ST 507.

Learning Outcomes
1. Explore time series datasets for autocorrelation, cross-correlation, and stationarity Select appropriate models for analyzing and forecasting time series data Identify regular patterns and frequencies in time series data Fit time series models using statistical software Understand mathematical theory underlying time series models

A ST 665. Bayesian Theory
3 Credits (3)
Provides an overview of theory underlying Bayesian inference. Topics include Likelihood and Sufficiency Principles, concepts from decision theory, construction of prior distributions, Bayesian point estimation, tests and confidence regions.
Prerequisite: A ST 565 and A ST 566.

Learning Outcomes
1. Understand the theoretical justification for using Bayesian methods as a means of statistical inference Apply decision-theoretic principles to evaluate estimators under different loss functions Develop prior distributions using the concepts of entropy, conjugacy, and non-informativeness Derive basic point estimators using Bayesian principles Understand testing and confidence region methods used for Bayesian inference

A ST 700. Doctoral Dissertation
1-15 Credits (1-15)
Dissertation for the Applied Statistics doctoral program. Students must have advancement to candidacy in order to enroll in this course. May be repeated up to 36 credits.

Learning Outcomes
1. Make substantive progress towards completing a dissertation that fulfills the requirements for the Applied Statistics doctoral degree.
Economics Courses

ECON 1110G. Survey of Economics
3 Credits (3)
This course will develop students’ economics literacy and teaches students how economics relates to the everyday life of individuals, businesses and society in general. The course will also introduce students to the roles different levels of governments play in influencing the economy. At the conclusion of the course, students will be able to identify economic causes for various political and social problems at national and international levels, and have a better understanding of everyday economic issues that are reported in media and public forums.
Learning Outcomes
1. Gain and demonstrate a contextual understanding of economic terms and concepts.
2. Recognize and analyze common economic issues which relate to individual markets and the aggregate economy.
3. Learn basic economic principles that influence global trading and challenges relating to globalization.
4. Outline the implications of various economic policies on individuals and on economies.
5. Demonstrate ability to use diagrams and graphs to explain economic principles, policies and their applications.
6. Appreciate and understand how individual decisions and actions, as a member of society, affect economies locally, nationally and internationally.
7. Explain the roles of governments in influencing buyer and seller behavior in the market and how government failure occurs when intervention fails to improve or actually worsens economic outcomes.
8. Be able to apply course concepts to interpret, evaluate and think critically about economic events and policies, especially as regularly reported in the media and other public forums.

ECON 2110G. Macroeconomic Principles
3 Credits (3)
Macroeconomics is the study of national and global economies. Topics include output, unemployment and inflation; and how they are affected by financial systems, fiscal and monetary policies.
Learning Outcomes
1. Explain the concepts of opportunity cost, comparative advantage and exchange.
2. Demonstrate knowledge of the laws of supply and demand and equilibrium and use supply and demand curves to analyze responses of markets to external events.
3. Explain the circular flow model and use the concepts of aggregate demand and aggregate supply to analyze the response of the economy to disturbances.
4. Explain the concepts of gross domestic product, inflation and unemployment and how they are measured.
5. Describe the determinants of the demand for money, the supply of money and interest rates and the role of financial institutions in the economy.
6. Define fiscal policy and monetary policies and how these affect the economy.
7. Students will be able to identify the causes of prosperity, growth, and economic change over time and explain the mechanisms through which these causes operate in the economy.

ECON 2120G. Microeconomics Principles
3 Credits (3)
This course will provide a broad overview of microeconomics. Microeconomics is the study of issues specific to households, firms, or industries with an emphasis on the role of markets. Topics discussed will include household and firm behavior, demand and supply/government intervention, market structures, and the efficient allocation of resources.
Learning Outcomes
1. Explain the concept of opportunity cost.
2. Demonstrate knowledge of the laws of supply and demand and equilibrium.
3. Use supply and demand curves to analyze responses of markets to external events.
4. Use supply and demand analysis to examine the impact of government intervention.
5. Explain and calculate price elasticity of demand and other elasticities.
6. Demonstrate an understanding of producer choice, including cost and break-even analysis.
7. Compare and contrast the following market structures: perfect competition, monopoly, monopolistic competition, and oligopoly.
ECON 210H. Principles of Microeconomics Honors
3 Credits (3)
Microeconomic theory and public policy: supply and demand, theory of the firm, market allocation of resources, income distribution, competition and monopoly, governmental regulation of businesses and unions. Must be a Crimson Scholar.
Prerequisite(s): MATH 1220G.
Learning Outcomes
1. Explain the concept of opportunity cost.
2. Demonstrate knowledge of the laws of supply and demand and equilibrium.
3. Use supply and demand curves to analyze responses of markets to external events.
4. Use supply and demand analysis to examine the impact of government intervention.
5. Explain and calculate price elasticity of demand and other elasticities.
6. Demonstrate an understanding of producer choice, including cost and break-even analysis.
7. Compare and contrast the following market structures: perfect competition, monopoly, monopolistic competition, and oligopoly.

ECON 304. Money and Banking
3 Credits (3)
Income measurement and determination, monetary and fiscal policies.
Prerequisite(s): ECON 2110G or ECON 2110H or equivalent.

ECON 311. Intermediate Macroeconomic Theory
3 Credits (3)
Analysis of gross domestic product, the Classical, Keynesian, and Neo-Keynesian theories of income, employment, inflation and growth.
Prerequisite: ECON 2110G or ECON 2110H.
Learning Outcomes
1. Learn the uses and abuses of macroeconomic data Learn the role of economic theory in understanding economic issues and forecasting economic behavior Learn the causes and consequences of short-run economic fluctuations and long-run economic growth Learn the role of government in the macroeconomy By the end of the class, you should be able to describe the state of the macroeconomy and analyze the consequences of economic policy actions from several perspectives

ECON 312. Intermediate Microeconomic Theory
3 Credits (3)
Contemporary economic theory with emphasis upon value and distribution.
Prerequisite(s): ECON 2110G or ECON 2110H or equivalent.

ECON 324V. Developing Nations
3 Credits (3)
Economic analysis of problems related to development of developing nations. Issues such as growth, industrialization, poverty, population, international trade, foreign debt, and international economic relations.

ECON 324V. Developing Nations
3 Credits (3)
Economic analysis of problems related to development of developing nations. Issues such as growth, industrialization, poverty, population, international trade, foreign debt, and international economic relations.

ECON 322. Public Finance
3 Credits (3)
This course will examine the roles of government in modern, market-oriented, mixed economies. It will examine justifications for government participation in resource allocation, income distribution, and economic stabilization focusing primarily on the fiscal functions of government, taxation and public expenditure. Students will apply basic microeconomic analysis to analyze the impacts of public taxation and expenditures on economic decisions made elsewhere in the economy. In this course the emphasis will be on understanding the workings of public finance in fiscal federalist systems like the United States, but the principles taught will be applicable across other economic systems. Prerequisites: ECON 2120G or ECON 2120H

ECON 332. Public Finance
3 Credits (3)
This course will examine the roles of government in modern, market-oriented, mixed economies. It will examine justifications for government participation in resource allocation, income distribution, and economic stabilization focusing primarily on the fiscal functions of government, taxation and public expenditure. Students will apply basic microeconomic analysis to analyze the impacts of public taxation and expenditures on economic decisions made elsewhere in the economy. In this course the emphasis will be on understanding the workings of public finance in fiscal federalist systems like the United States, but the principles taught will be applicable across other economic systems. Prerequisites: ECON 2120G or ECON 2120H

ECON 335V. Business and Government
3 Credits (3)
Relation of government to business through regulation; political, legal, and social implications. Crosslisted with: MGMT 335G

ECON 337V. Natural Resource Economics
3 Credits (3)
Gain insight into important natural resource problems of our time. Apply economic principles to problems in the preservation, use, and development of agricultural, range, mineral, water, forestry, fishery, and environmental resources. Understand the use of cost-benefit analysis for government natural-resource projects, policies, and programs. Same as AEEC 337V.
Prerequisite: ECON 1110G or ECON 2120G or ECON 2120H.

ECON 345. Energy Economics
3 Credits (3)
Examines the economics of energy production including oil, coal, natural gas, renewables, and conservation as a substitute for energy production. Emphasis is on federal and state regulatory framework, and resulting public policy issues from a regional and national perspective.
Prerequisite(s): (ECON 2110G or ECON 2110H), (ECON 2120G or ECON 2120H).

ECON 384V. Water Resource Economics
3 Credits (3)
Use of economic principles to evaluate current and emerging issues in water resources. Applications focus on use of economic methods of analysis to current policy decisions surrounding agricultural, municipal, industrial, and environmental uses of water. Same as AEEC 384V.
Prerequisite: AEEC 1110 or ECON 2120G or ECON 2120H.

ECON 404. Collegiate Advisory Board, Federal Reserve
3 Credits (3)
Students serve on the Collegiate Advisory Board of the El Paso branch of the Federal Reserve Bank of Dallas. Guest speakers provide an overview of the Federal Reserve System, role of monetary policy, and issues facing specific industries in the local, national, and global economies. Students prepare reports, including a final paper, on an assigned industry in the regional or state economy and the current economic performance of their industry. Students must be of junior rank or higher with a GPA of at least 3.5. Consent of Instructor required.
ECON 405. Introductory Econometrics
3 Credits (3)
Multiple regression and correlation applied to economics and business; inference techniques; significance tests; simultaneous equations, estimation, and problems.
Prerequisite: MATH 1350G or A ST 311 (or equivalent).

Learning Outcomes
1. Demonstrate knowledge of probability and statistics and basic expected value theory. Define the relationship between population statistics and sample statistics. Explain the method of ordinary least squares. Understand multiple regression, correlation, inference techniques, and significance tests. Interpret basic econometric results.

ECON 432V. Economics of Health Care
3 Credits (3)
Analysis of the allocation of resources in the field of health and medical care.

ECON 445. Oil and Natural Gas Economics
3 Credits (3)
Examines the economics of oil and gas production. Topics covered include transportation, refining, federal and state regulatory framework, and resulting public policy issues from a regional and national perspective.

Learning Outcomes
1. Oil and Natural Gas Production Oil and Natural Gas Transportation and Storage Advanced oil and gas market analysis Economic analysis of government energy policy and regulation

ECON 449. Open Economy Macroeconomics
3 Credits (3)
This course studies theoretical and empirical macroeconomics in international dimension. It covers from the fundamental concepts of national income and growth, monetary/fiscal and exchange rate policies, foreign exchange markets, international trade and finance, and regionalization/economic integration to the impact analysis of these macroeconomic fundamentals in the open economy. Crosslisted with: I B 449.
Prerequisite(s): BFIN 341 OR ECON 311.

ECON 450. International Economics
3 Credits (3)
Trade and capital flows between countries, international payments, government policy in balance-of-payments and tariff matters, international organizations. Crosslisted with: I B 450
Prerequisite(s): ECON 2110G or ECON 2110H and ECON 2120G or ECON 2120H.

ECON 457. Mathematical Economics
3 Credits (3)
Application of mathematical tools, especially the calculus, to economic theory.
Prerequisite(s): MATH 1430G or equivalent.

ECON 471. Electricity Economics
3 Credits (3)
Regulatory policy and economic analysis related to the Electric Industry. Topics include characteristics of a utility and legal justification for regulation; characteristics and functions of a regulatory commission; history and structure of the industry; technology and network design; revenue requirements; cost allocation; and basic retail rate design. Crosslisted with: ECON 571.
Prerequisite(s): ECON 345.

ECON 489. Senior Economics Seminar
3 Credits (3)
Seminar primarily for economics majors in their final semester. Provides an opportunity to apply economic theory to a broad variety of topics.
Prerequisite(s): ECON 311 or ECON 312.

ECON 490. Selected Topics
1-3 Credits
Current topics in economics. Subject matter to be designated for each semester.

ECON 498. Independent Study
1-3 Credits
Individual studies directed by consenting faculty with the prior approval of the department head. May be repeated for a maximum of 3 credits.
Prerequisite: junior or above standing and consent of instructor.

ECON 503. Managerial Economics
3 Credits (3)
Theory and application of microeconomics to the management of organizations.
Prerequisite(s): MATH 1350G or A ST 311 or equivalent with B or better.

ECON 545. Econometrics II
3 Credits (3)
Application of statistical techniques to estimation of economic relationships: demand functions, production and cost functions, and macroeconomic equations.
Prerequisite(s): ECON 457 and AEEC 540.

ECON 550. Special Topics
1-3 Credits
Seminars in selected current topics in the various areas of economics. Prerequisites vary according to the topic being offered.

ECON 571. Regulatory Policy and Industry Analysis: Electricity I
3 Credits (3)
Regulatory policy and economic analysis related to the Electric Industry. Topics include: characteristics of a utility and legal justification for regulation; characteristics and functions of a regulatory commission; history and structure of the industry; technology and network design; revenue requirements; cost allocation; and basic retail rate design.

ECON 572. Regulatory Policy and Industry Analysis: Water and Natural Gas
3 Credits (3)
Regulatory policy and economic analysis related to the Natural Gas and Water industries. Topics include: history and structure of the industry; technology and network design; revenue requirements; cost allocation; and retail rate design.

ECON 573. Regulatory Policy and Industry Analysis: Electricity II
3 Credits (3)
Regulatory policy and economic analysis related to the Electric Industry. Topics include: optimal generation mix; ancillary services; environmental policies; rate case procedures and strategies for effective testimony; advanced retail rate design; wholesale exchanges; unbundled transmission tariffs; market institutions and how different markets function; state and federal deregulation policies; Federal Energy Regulatory Commission orders and policies; demand-side management; and regulatory treatment of non-traditional retail services. Consent of instructor required.

Prerequisite(s): ECON 571 or consent of instructor.
ECON 574. Advanced Seminar Regulatory Policy and Industry Analysis  
3 Credits (3)  
Advanced seminar and writing course specializing in regulatory policy 
and regulatory casework. Topics include: special policy & regulatory 
issues in telecommunications, electricity, natural gas, and water; 
preparation of written testimony; expert witness effectiveness including 
cross-examination; and contested case management. This course 
involves extensive reading and writing assignments. Consent of 
instructor required.  
Prerequisite(s): ECON 571 or consent of instructor.

ECON 582. Economics of Health Care  
3 Credits (3)  
Analysis of the allocation of resources in the field of health and medical 
care. Taught with ECON 432V with differentiated assignments for 
graduate students.

ECON 596. Independent Study  
3 Credits (3)  
Individual study program. Each offering will cover a subtitle. Maximum of 
3 credits in a semester and 6 credits in a program. Consent of instructor 
required.

Economic Development Courses

ECDV 550. Introduction to Local and Regional Development  
3 Credits (3)  
Serves as the introductory course in the Doctor of Economic 
Development program. Overview of the economic development field.

ECDV 590. Special Topics  
1-3 Credits (1-3)  
Selected topics in the area of Economic Development. Subtitle reflects 
content. May be repeated up to 9 credits. Consent of instructor required.

ECDV 596. Individual Study  
1-3 Credits (1-3)  
Individual studies directed by consenting faculty with the prior approval 
of the Department Head. May be repeated up to 6 credits.

ECDV 651. Economic Development Theory  
3 Credits (3)  
Builds upon a general understanding of microeconomic and 
macroeconomic theory to focus specifically on theories of economic 
development at all levels. Prerequisites: AEEC 501 and 502.

ECDV 661. Regional Economic Modeling  
3 Credits (3)  
Introduction to the tools and methods of regional economic development 
analysis. May be repeated up to 3 credits. Restricted to: ECDV majors.  
Prerequisite(s): AEEC 501, AEEC 502, and AEEC 540.

ECDV 664. Population Economics  
3 Credits (3)  
Examines the causes and consequences of demographic change. 
Examines theories of basic demographic processes, population 
projection and estimation. Consent of instructor required.

ECDV 668. Economic Development Finance  
3 Credits (3)  
Focuses on the tools and methods of economic development finance.

ECDV 670. Research in Economic Development  
3 Credits (3)  
Intense examination of the academic literature on economic development 
at all levels.  
Prerequisites: ECDV 651, ECDV 661 and ECDV 662.

ECDV 671. Sustainable Economic Development  
3 Credits (3)  
Focuses on the interconnections between economic development and 
the environment. Provides a broad set of tools and ideas related to the 
impacts of human activities on the environment.  
Prerequisites: AEEC 501, AEEC 502 and AEEC 540.

ECDV 673. Research Methods  
3 Credits (3)  
An overview of alternative research methods and tools. Students explore 
quantitative and qualitative research methods as alternatives and 
complements to statistical methods. Research design, ethics, and 
presentation are emphasized.  
Prerequisites: AEEC 501, AEEC 502 and AEEC 540.

ECDV 681. Urban Economic Development  
3 Credits (3)  
Examines causes and consequences of economic change in urban and 
metropolitan areas. Covers both theory and tools for analysis.  
Prerequisites: ECDV 651, ECDV 661 and ECDV 662.

ECDV 682. Rural Development  
3 Credits (3)  
Examines causes and consequences of economic change in rural areas, 
communities and small, open economies. Covers both theory and tools 
for analysis.  
Prerequisites: ECDV 651, ECDV 661 and ECDV 662.

ECDV 683. Seminar in National Economic Development  
3 Credits (3)  
Explores specific examples and cases of rural and urban economic 
development. Involves applied analysis of specific rural and/or urban 
economic issues/projects.  
Prerequisites: ECDV 681 and ECDV 682.

ECDV 692. Seminar in Economic Development  
3 Credits (3)  
Seminars in selected topics in economic development. Subtitle reflects 
content. May be repeated up to 9 credits.  
Prerequisite: Completion of at least nine semester hours of ECDV 
courses.

ECDV 694. Internship  
1-9 Credits (1-9)  
Internship in Economic Development. May be repeated up to 9 credits. 
Prerequisite(s): Completion of core requirements of Doctor of Economic 
Development.

ECDV 699. Doctoral Project  
1-9 Credits (1-9)  
Doctoral Project. May be repeated up to 9 credits. Completion of all DED 
coursework and successful completion of comprehensive exams.
International Business Courses

I B 317. International Marketing
3 Credits (3)
Focuses on decisions relating to entering markets, market segmentation, marketing strategies, and tactics in the international arena. Same as MKTG 317.

Learning Outcomes
1. Develop understanding about what is involved in making international marketing decisions, including product, price, promotion, and place decisions to create a marketing mix. Acquire an overview on the contemporary issues in global marketing and the unique challenges faced by marketing managers in the dynamic global environment. Develop insights into how differences in global economic, cultural, social, political, and legal environments can affect marketing decisions. Develop strategic thinking in the context of complex problems and challenges faced by the contemporary global executives and managers. Develop ability to integrate the important global societal dimensions of diversity, environmental concerns, ethics, and technological change into their thinking. Develop knowledge and skills to analyze cross-cultural variables and their impact on international marketing. Discover sources of information for researching and evaluating international markets. Communicate effectively about marketing issues in group discussions, oral presentations and written reports. Work effectively as a team member in analyzing marketing issues. Develop leadership skills necessary to deal with the uncertainty and changes faced by today’s global marketers.

I B 351. International Business
3 Credits (3)
The various aspects of international business, and identification and analysis of problems encountered by multinational companies.
Prerequisite: junior standing or consent of instructor.

I B 398. International Business and Economic Environments
3 Credits (3)
Description and analysis of various world regions, e.g., Pacific Rim, Eastern Europe, South Asia. Region will vary from semester to semester.

I B 449. Open Economy Macroeconomics
3 Credits (3)
This course studies theoretical and empirical macroeconomics in international dimension. It covers from the fundamental concepts of national income and growth, monetary/fiscal and exchange rate policies, foreign exchange markets, international trade and finance, and regionalization/economic integration to the impact analysis of these macroeconomic fundamentals in the open economy. Crosslisted with: ECON 449.
Prerequisite(s): BFIN 341 OR ECON 311.

I B 450. International Economics
3 Credits (3)
Trade and capital flows between countries, international payments, government policy in balance-of-payments and tariff matters, international organizations. Crosslisted with: ECON 450G
Prerequisite(s): ECON 2110G or ECON 2110H and ECON 2120G or ECON 2120H.

I B 475. International Finance
3 Credits (3)
International aspects of financial transactions, decision-making, banking and financial markets. Crosslisted with: BFIN 475 and BFIN 575.
Prerequisite(s): BFIN 341.

I B 489. Senior Seminar in International Business
3 Credits (3)
Capstone class for I B majors. Integration of previous classwork via the examination of case studies and completion of a major project.
Prerequisite: I B core.

Office Location: Business Complex Room 234
Phone: (575) 646-7211
Website: https://business.nmsu.edu/departments/economics.html

Economics - Bachelor of Arts in Economics

The Bachelor of Arts major in Economics is the only bachelor of arts degree offered through the College of Business. It has the advantage of including a large number of general electives. This feature provides great flexibility to the student who, in addition to completing the courses for a major in economics, may wish to take a double major or take courses from a wide variety of other subjects of his or her own choosing. This program is suitable for, among others, students who plan to go to graduate school in economics, law, business, the social sciences or other areas.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix | Title | Credits
--- | --- | ---
**General Education**
| Grades of C- or better are required in general education communications courses. | | |
| **Area I: Communications** | | |
| **English Composition - Level 1** | | |
| Choose one from the following: | 4 |
| ENGL 110G Composition I | |
| ENGL 110H Composition I | |
| ENGL 110M Composition I | |
| **English Composition - Level 2** | | |
| Choose one from the following: | 3 |
| ENGL 2210G Professional & Technical Communication | |
| ENGL 2221G Writing in the Humanities and Social Science | |
| **Oral Communication** | | |
| Choose one from the following: | 3 |
| ACOM 1130G Effective Leadership and Communication in Agriculture | |
| COMM 1115G Introduction to Communication | |
| COMM 1130G Public Speaking | |
| HNRS 2175G Introduction to Communication Honors | |
| **Area II: Mathematics** | | |
| MATH 1220G College Algebra (Foundation Requirement) | 3 |
| **Area III/IV: Laboratory Sciences and Social/Behavioral Sciences** | 10 |
| ECON 2110G Macroeconomic Principles (Credits are counted in Business Core) | |
| ECON 2120G Principles of Microeconomics (Credits are counted in Business Core) | |
Economics majors must earn a minimum cumulative GPA of 2.5 in the 27 credits of departmental requirements.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

**A Suggested Plan of Study for Students**

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and english. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Economics - Bachelor of Business Administration

This program is especially suitable for students who find economics interesting and who intend, perhaps without additional formal education beyond the Bachelor degree, to take jobs in business or government. This degree prepares you for a wide variety of jobs including those leading eventually to positions of executive responsibility. It is also appropriate for those who may choose to seek a Master of Business Administration degree after graduation. It is also a great degree for someone interested in pursuing a career as a lawyer.

In addition to completing general education, (p. 88) College of Business foundation and business core (p. 787), Viewing a Wider World (p. 92) requirements, and general electives (see above), every candidate for the bachelor of business administration in economics must complete each of these courses with a grade of C- or better.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix | Title | Credits
---|---|---
ENGL 1110G | Composition I | 4
**General Education**
Grades of C- or better are required in general education communications courses.

**Area I: Communications**

**English Composition - Level 1**

Choose one from the following:

</tbody>
</table>

1. Prerequisites are required, students are responsible for checking and fulfilling course prerequisites listed in the catalog.

2. See the General Education (p. 88) section of the catalog for a full list of courses.

3. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

4. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

5. Upper Division ECON electives are typically only offered during certain semesters, so students must plan accordingly.

Fall: ECON 337V Natural Resource Economics, ECON 432V Economics of Health Care, ECON 449 Open Economy Macroeconomics

Fall/Summer: ECON 457 Mathematical Economics

Spring: ECON 384V Water Resource Economics

6. **International Business Double Majors:** Students may not receive credit for both ECON 489 Senior Economics Seminar and I B 489 Senior Seminar in International Business. For this reason, students majoring in both Economics and International Business must consult with the Department Head to arrange a suitable substitution.
ECON 1110M Composition I

English Composition - Level 2

ENGL 2210G Professional & Technical Communication 3

Oral Communication

Choose one from the following: 3

ACOM 1130G Effective Leadership and Communication in Agriculture

COMM 1115G Introduction to Communication

COMM 1130G Public Speaking

HNRS 2175G Introduction to Communication Honors

Area II: Mathematics

MATH 1220G College Algebra (Foundation Requirement) 1 3

Area III/IV: Laboratory Sciences and Social/Behavioral Sciences 10

ECON 2110G Macroeconomic Principles (Credits are counted in Business Core)

ECON 2120G Principles of Microeconomics (Credits are counted in Business Core)

Area III: Laboratory Sciences Course (4 credits) 2

Area V: Humanities 7 3

Area VI: Creative and Fine Arts 7 3

General Education Elective

MATH 1430G Applications of Calculus I (must earn a grade of at least C- (foundation requirement)) 1 3

Viewing A Wider World Courses 3 6

Departmental/College Requirements

Foundation Requirements 4

Choose one from the following: 3

If MATH 1350G is taken before MATH 1220G then the Statistics course will satisfy the Area II Requirement and MATH 1220G must be taken as a foundation requirement 1

MATH 1350G Introduction to Statistics

A ST 311 Statistical Applications (Foundation Requirement - doesn’t count as Gen.Ed)

Business Core: Lower Division (minimum grades of C- required)

ACCT 2110 Principles of Accounting I (not recommended for freshman year) 3

ACCT 2120 Principles of Accounting II 3

BCIS 1110 Introduction to Information Systems 3

BUSA 1110 Intro to Business 3

Business Core: Upper Division

BCIS 338 Business Information Systems I 3

BLAW 316 Legal Environment of Business 3

BFIN 341 Financial Analysis and Markets 3

MGMT 309 Human Behavior in Organizations 3

MGMT 449 Strategic Management 3

MKTG 303 Principles of Marketing 3

Choose one from the following: 3

MGMT 344 Production and Operations Management

MGMT 470 Project Management in Organizations

BCIS 485 Enterprise Resource Planning

Upper division Economics or Applied Statistics elective from the following prefixes: A ST (excluding A ST 311), ECON

Upper Division Business elective from the following prefixes: A ST, ACCT, B A, BCIS, BLAW, ECON, BFIN, I B, MGMT, MKTG (excluding A ST 311)

Major Courses 5

ECON 304 Money and Banking 3

ECON 311 Intermediate Macroeconomic Theory 3

ECON 312 Intermediate Microeconomic Theory 3

ECON 405 Introductory Econometrics 3

ECON Upper Division Electives 12

At least two electives must be from the following:

ECON 332 Public Finance

ECON 449 Open Economy Macroeconomics

ECON/I B 450 International Economics

ECON 457 Mathematical Economics

Second Language: (not required)

Electives, to bring the total credits to 120 6 16

Total Credits 120

1

Students may be required to take MATH 1215 Intermediate Algebra, depending on their math placement. MATH 1220G College Algebra or MATH 1430G Applications of Calculus I or MATH 1350G Introduction to Statistics fulfills the general education requirement in math.

2

See the General Education (p. 88) section of the catalog for a full list of courses.

3

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses and how to fulfill this requirement.

4

All Foundation Requirement Courses must be taken, or satisfied with transfer credits, regardless of which Mathematics or Statistics course satisfies the Area II General Education course: MATH 1220G, MATH 1430G and MATH 1350G or A ST 311 must be completed.

5

Economics majors must earn a minimum cumulative GPA of 2.5 in the 27 credits of departmental requirements.

6

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1130G Survey of Mathematics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year

Fall Credits

MATH 1220G College Algebra (C- or better) 1 3

BCIS 1110 Introduction to Information Systems (C- or better) 3

Choose one from the following: 4

ENGL 1110G Composition I (C- or better) 1

ENGL 1110H Composition I (C- or better) 1

ENGL 1110M Composition I (C- or better) 1
Choose one Upper-Division Elective in ECON from the following:

1 Students may be required to take MATH 1215 Intermediate Algebra, depending on their math placement. MATH 1220G College Algebra or MATH 1430G Applications of Calculus I or MATH 1350G Introduction to Statistics fulfills the general education requirement in math.

See the General Education (p. 88) section of the catalog for a full list of courses.
See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses and how to fulfill this requirement.

All Foundation Requirement Courses must be taken, or satisfied with transfer credits, regardless of which Mathematics or Statistics course satisfies the Area II General Education course: MATH 1220G, MATH 1430G and MATH 1350G or A ST 311 must be completed.

Economics majors must earn a minimum cumulative GPA of 2.5 in the 27 credits of departmental requirements.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

**A Suggested Plan of Study for Students**

This roadmap assumes student placement in MATH 110G Survey of Mathematics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and english. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

**Total Credits**

120
Prerequisites are required, students are responsible for checking and fulfilling course prerequisites listed in the catalog.

See the General Education (p. 88) section of the catalog for a full list of courses.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

Upper Division ECON electives are typically only offered during certain semesters, so students must plan accordingly.

Fall: ECON 337V Natural Resource Economics, ECON 432V Economics of Health Care, ECON 449 Open Economy Macroeconomics
Fall/Summer: ECON 457 Mathematical Economics
Spring: ECON 384V Water Resource Economics

International Business Double Majors: Students may not receive credit for both ECON 489 Senior Economics Seminar and I B 489 Senior Seminar in International Business For this reason, students majoring in both Economics and International Business must consult with the Department Head to arrange a suitable substitution.

International Business - Bachelor of Business Administration

The Bachelor of Business Administration in International Business is intended for those who plan to work for businesses with operations abroad or between the United States and foreign countries. The program prepares you for positions requiring knowledge of international payments, foreign exchange markets, global marketing, export and import procedures, and international investments.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above.

In addition to the course work indicated below, students must satisfy the following two requirements:

Second language: Students must demonstrate oral and written proficiency at the intermediate mid-level according to ACTFL (American Council on the Teaching of Foreign Languages) proficiency guidelines.

International experience requirement: Students must engage in an international experience equivalent to a semester abroad in a university where the language of instruction is not English. The department will determine the appropriateness of international experience. Study abroad programs must be pre-approved by IB advisors and the Department Head.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

### First Year

#### Fall
- **MATH 1220G** College Algebra (C- or better) \(^1\) 3
- **BCIS 1110** Introduction to Information Systems (C- or better) 3

Choose one from the following:
- **ENGL 1110G** Composition I (C- or better) \(^1\) 1
- **ENGL 1110H** Composition I (C- or better) \(^1\) 1
- **ENGL 1110M** Composition I (C- or better) \(^1\) 1

Area V: Humanities Course \(^2\) 3
Elective Course \(^3\) 3

**Credits** 16

#### Spring
- **MATH 1430G** Applications of Calculus I (C- or better) \(^1\) 3
- **BUSA 1110** Intro to Business (C- or better) 3

Choose one from the following:
- **ACOM 1130G** Effective Leadership and Communication in Agriculture (C- or better) 3
- **COMM 1115G** Introduction to Communication (C- or better) 3
- **COMM 1130G** Public Speaking (C- or better) 3
- **HNRS 2175G** Introduction to Communication Honors (C- or better) 3

Area III: Laboratory Science Course \(^2\) 3
Area VI: Fine Arts Course \(^2\) 3

**Credits** 16

### Second Year

#### Fall

Choose one from the following:
- **MATH 1350G** Applications of Calculus I (C- or better) \(^1\) 3
- **A ST 311** Statistical Applications (C- or better) 3
- **ECON 2110G** Macroeconomic Principles (C- or better, counts towards Area IV Gen.Ed) 3
- **ACCT 2110** Principles of Accounting I (C- or better) 3
- **ENGL 2210G** Professional & Technical Communication (C- or better, counts towards Area I Gen.Ed) \(^1\) 3

Viewing a Wider World Course \(^4\) 3

**Credits** 15

#### Spring
- **ECON 2120G** Principles of Microeconomics (C- or better, counts towards Area IV Gen.Ed) \(^1\) 3
- **ACCT 2120** Principles of Accounting II 3

**Credits** 3

Fourth Year
Fall
Choose one from the following:  3
ECON 324V  Developing Nations  3
I B 398  International Business and Economic Environments (spring only)  3

BFIN 475  International Managerial Finance (Fall only) or International Finance

Choose one from the following:  3
MGMT 344  Production and Operations Management 1  3
MGMT 470  Project Management in Organizations  3
BCIS 485  Enterprise Resource Planning 1  3
Upper Division Course: Functional Business area  3
Any Business Upper-Division Elective Course (excluding A ST 311) 2  3
ECON 450  International Economics or International Economics

Credits  15

Spring
ECON 449  Open Economy Macroeconomics or Open Economy Macroeconomics 3
MGMT 449  Strategic Management 1  3
Upper-Division Course: Functional Business area  3
Upper-Division Course: Functional Business area  3

Credits  12

Total Credits  120

1 Prerequisites are required, students are responsible for checking and fulfilling course prerequisites listed in the catalog.
2 See the General Education (p. 88) section of the catalog for a full list of courses.
3 Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
4 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.
5 Upper Division ECON electives are typically only offered during certain semesters, so students must plan accordingly.
6 Students are required to take the following in order to meet the requirements for the degree:
   • I B 450 International Economics or ECON 450 International Economics
7 International Business Double Majors: Students may not receive credit for both ECON 489 Senior Economics Seminar and I B 489 Senior Seminar in International Business. For this reason, students majoring in both Economics and International Business must consult with the Department Head to arrange a suitable substitution.

Other Requirements for the Major

Foreign language: Students must demonstrate oral and written proficiency at the intermediate mid-level according to ACTFL (American Council on the Teaching of Foreign Languages) proficiency guidelines. (Process for demonstrating proficiency to be coordinated with the NMSU Department of Languages and Linguistics. Any costs associated with proficiency demonstration will be paid by the student.)

International experience requirement: Students must partake of an international experience equivalent to a semester abroad in a university where the language of instruction is not English. The department will determine appropriateness of international experience. Study abroad programs must be pre-approved by IB advisors and Department Head.

Economics - Undergraduate Minor

The undergraduate minor in economics is appropriate for those who seek a better understanding of how micro- and macro-economic forces influence individuals, business and government decision making. Students thinking of a career in banking and finance, government service, or law will find the minor helpful.

A minor in economics consists of 18 or more credit hours of approved course work in economics (ECON), of which at least 12 are numbered 300 or higher, all completed with a grade of C- or higher. At least 12 credits must be completed at NMSU. This minor is not open to majors in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.

in both the theory and the application of statistics, with an emphasis on experimental design and modeling. Statistical software packages, which are necessary for modern data analysis, are used throughout the curriculum. The program culminates in a capstone course in which students gain experience in analyzing real-world data.

Students from a variety of disciplines, including mathematics, psychology, engineering, and the natural sciences, have successfully completed the MS in applied statistics.

Admission
Requirements for regular admission to the MS in applied statistics include the following:

- A minimum 3.0-grade point average overall or in the last two years of study. Complete graduate and undergraduate transcripts must be supplied.
- Three semesters of calculus, equivalent to NMSU courses MATH 1511G Calculus and Analytic Geometry I, MATH 1521G Calculus and Analytic Geometry II, and MATH 2530G Calculus III, completed with grades of B or better.
- Three letters of reference from former professors or others able to evaluate the student’s academic potential.
- A one- to two-page typewritten letter of application, discussing academic objectives, professional plans, and specific reasons for selecting statistics as a field for advanced study.

In addition to the formal requirements above, some experience in computer programming is strongly recommended.

Applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL). Fluency in written and spoken English is essential to successful completion of the program. Further information regarding the TOEFL can be obtained from https://isss.nmsu.edu/.

Students must choose one of two options to complete the course requirements: the research option or the coursework-only option.

Research Option
Under the research option, the combined research (A ST 598 or A ST 599) and elective credits must equal nine. The number of research credits may vary from four to six, with the remaining credits fulfilled with electives.

International Business - Undergraduate Minor

A minor in international business provides the student with a background in international business that can be useful in many settings given the increasing intensity of globalization. Especially those who wish to find work with large companies with an international presence or for those who may want to own their own business dealing internationally, the minor in international business can help lay the groundwork for a successful career.

A minor consists of 18 or more credit hours of approved course work in the International Business core, all completed with a grade of C- or higher. At least 12 credits must be completed at NMSU. This minor is not open to majors in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.

In addition, I B minors must meet the foreign language proficiency requirement described below.

Students must demonstrate oral and written proficiency in a foreign language at the intermediate mid-level according to the ACTFL (American Council on the Teaching of Foreign Languages) proficiency guidelines. (Process for demonstrating proficiency to be coordinated with the NMSU Department of Languages and Linguistics. Any costs associated with proficiency demonstration will be paid by the student.)

Applied Statistics - Master of Science

The Department of Economics, Applied Statistics and International Business offers the Master of Science (MS) degree in applied statistics. The applied statistics program produces graduates proficient in the practice of statistics and prepared to enter directly into positions in government or industry. Students in the program receive instruction in both the theory and the application of statistics, with an emphasis in both the theory and the application of statistics, with an emphasis
All students in the program must successfully complete a minimum of 30 graduate credits. At least 24 of the credits must be associated with courses numbered 500 or above. All students must meet the requirements specified in the general regulations and requirements for admission to the Graduate School and to candidacy. Students preparing to enter the program are encouraged to complete the following:

1. one course in intermediate microeconomic theory and one course in macroeconomic theory with minimum grades of B;
2. one course in college-level calculus; and
3. one course in statistics, including simple regression.

Those students not having completed these courses may be admitted with the requirement that the deficiencies be completed at the beginning of the graduate program.

The Master of Arts in Economics (regulatory economics) may be completed either face-to-face or online.

All students in the program must successfully complete a minimum of 30 credits including the following:

Economics - Master of Arts (Online)

Candidates for the Master of Arts in economics must successfully complete a minimum of 30 graduate credits (concentrations may require more than 30 graduate credits). At least 12 credits beyond the core courses (AECC 501 Microeconomic Theory, AECC 502 Macroeconomic Theory, AECC 540 Econometrics I) must be earned by taking courses taught by economics faculty members in the Department of Economics, Applied Statistics and International Business. At least two of the three core courses must be completed at NMSU. Twenty-one of the credits must have one of the four following prefixes: AECC, ECON, ECDV, or AG E. At least twenty-four of the credits must be associated with courses numbered 500 or above. All students must meet the requirements specified in the general regulations and requirements for admission to the Graduate School and to candidacy. Students preparing to enter the program are encouraged to complete the following:

1. one course in intermediate microeconomic theory and one course in macroeconomic theory with minimum grades of B;
2. one course in college-level calculus; and
3. one course in statistics, including simple regression.

Those students not having completed these courses may be admitted with the requirement that the deficiencies be completed at the beginning of the graduate program.

The Master of Arts in Economics (regulatory economics) may be completed either face-to-face or online.

Electives, subject to the restrictions above. 21

Total Credits 30

Notes:

1. No more than one course with a grade less than B can be used to fulfill the requirements for the MA Econ degree.
2. ECON 503 Managerial Economics cannot be counted toward the major in Economics.
3. A maximum of nine hours of approved transfer credit (with minimum grades of A) may be applied toward the degree.

Teaching and research assistantships are available to qualified applicants; however, admission to the program does not imply or guarantee an assistantship. It is not necessary to have an undergraduate degree in economics to enter the graduate program or to receive financial assistance.

The Masters of Arts in Economics (no concentration) may be completed either face-to-face or online.

Economics (Econometrics) - Master of Arts

Candidates for the Master of Arts in economics must successfully complete a minimum of 30 graduate credits (concentrations may require more than 30 graduate credits). At least 12 credits beyond the core courses (AECC 501 Microeconomic Theory, AECC 502 Macroeconomic Theory, AECC 540 Econometrics I) must be earned by taking courses taught by economics faculty members in the Department of Economics, Applied Statistics and International Business. At least two of the three core courses must be completed at NMSU. Twenty-one of the credits must have one of the four following prefixes: AECC, ECON, ECDV, or AG E. At least twenty-four of the credits must be associated with courses numbered 500 or above. All students must meet the requirements specified in the general regulations and requirements for admission to the Graduate School and to candidacy. 1. one course in intermediate microeconomic theory and one course in macroeconomic theory with minimum grades of B;
2. one course in college-level calculus; and
3. one course in statistics, including simple regression.

Those students not having completed these courses may be admitted with the requirement that the deficiencies be completed at the beginning of the graduate program. Those students interested in the concentration in regulatory economics are advised to complete two courses in college-level statistics.
Teaching and research assistantships are available to qualified applicants; however, admission to the program does not guarantee an assistantship. It is not necessary to have an undergraduate degree in economics for admission to the graduate program nor to receive financial assistance.

Economics (Public Utility Policy and Regulation) - Master of Arts

Candidates for the Master of Arts in economics must successfully complete a minimum of 30 graduate credits (concentrations may require more than 30 graduate credits). At least 12 credits beyond the core courses (AEEC 501 Microeconomic Theory, AEEC 502 Macroeconomic Theory, AEEC 540 Econometrics I) must be earned by taking courses taught by economics faculty members in the Department of Economics, Applied Statistics and International Business. At least two of the three core courses must be completed at NMSU. Twenty-one of the credits must have one of the following prefixes: AEEC, ECON, ECDV, or AG E. At least twenty-four of the credits must be associated with courses numbered 500 or above. All students must meet the requirements specified in the general regulations and requirements for admission to the Graduate School and to candidacy. Students preparing to enter the program are encouraged to complete the following:

1. one course in intermediate microeconomic theory and one course in macroeconomic theory with minimum grades of B;
2. one course in college-level calculus; and
3. one course in statistics, including simple regression.

Those students not having completed these courses may be admitted with the requirement that the deficiencies be completed at the beginning of the graduate program.

Teaching and research assistantships are available to qualified applicants; however, admission to the program does not guarantee an assistantship. It is not necessary to have an undergraduate degree in economics for admission to the graduate program nor to receive financial assistance.

The Masters of Arts in Economics (regulatory economics) may be completed either face-to-face or online.

Economics (Public Utility Policy and Regulation) - Master of Arts (Online)

Candidates for the Master of Arts in economics must successfully complete a minimum of 30 graduate credits (concentrations may require more than 30 graduate credits). At least 12 credits beyond the core courses (AEEC 501 Microeconomic Theory, AEEC 502 Macroeconomic Theory, AEEC 540 Econometrics I) must be earned by taking courses taught by economics faculty members in the Department of Economics, Applied Statistics and International Business. At least two of the three core courses must be completed at NMSU. Twenty-one of the credits must have one of the following prefixes: AEEC, ECON, ECDV, or AG E. At least twenty-four of the credits must be associated with courses numbered 500 or above. All students must meet the requirements specified in the general regulations and requirements for admission to the Graduate School and to candidacy. Students preparing to enter the program are encouraged to complete the following:

1. one course in intermediate microeconomic theory and one course in macroeconomic theory with minimum grades of B;
2. one course in college-level calculus; and
3. one course in statistics, including simple regression.
Those students not having completed these courses may be admitted with the requirement that the deficiencies be completed at the beginning of the graduate program.

Teaching and research assistantships are available to qualified applicants; however, admission to the program does not imply or guarantee an assistantship. It is not necessary to have an undergraduate degree in economics to be admitted to the graduate program nor to receive financial assistance.

The Masters of Arts in Economics (regulatory economics) may be completed either face-to-face or online.

All students must meet the requirements specified in the general regulations and requirements for admission to the Graduate School and to candidacy, and in addition the following:

- Bachelor's degree or equivalent
- Minimum undergraduate GPA: 3.0/4.0
- GRE or GMAT score is recommended (not required)
- Completion of one undergraduate courses in intermediate microeconomic (ECON 311 Intermediate Macroeconomic Theory or equivalent) and intermediate macroeconomic (ECON 312 Intermediate Microeconomic Theory or equivalent) both with grades of B or better
- Completion of one course in college-level calculus (MATH 1430G Applications of Calculus I or equivalent) and one course in statistics including regression analysis (ECON 405 Introductory Econometrics or equivalent), with grades of B or better in both courses
- Additional coursework in matrix algebra is recommended
- One course in mathematical economics ECON 457 Mathematical Economics (or equivalent), with a grade of B or better
- International students must meet graduate school admission requirements for English proficiency

In addition, all applicants must successfully pass Comprehensive Exams covering the "Microeconomic Core" and the "Macroeconomic and Econometric Core" before taking upper level ECDV courses. The Microeconomic Core exam covers advanced microeconomic theory (AEEC 501 Microeconomic Theory and AEEC 596 Individual Study). The Macroeconomic and Econometric Core covers advanced macroeconomic theory (AEEC 502 Macroeconomic Theory), and econometrics (AEEC 540 Econometrics I and ECON 545 Econometrics II).

Students who have not passed all of these "core" courses with a grade of B or better, or feel the need to study the material further, may take the courses, along with ECON 457 Mathematical Economics during the fall and spring semesters of their first year in the program.

- Comprehensive Exam I covers the "Microeconomic Core": AEEC 501, AEEC 596
- Comprehensive Exam II covers the "Macroeconomics and Econometrics Core", AEEC 502 Macroeconomic Theory, AEEC 540 Econometrics I and ECON 545 Econometrics II
- Students who fail a comprehensive exam may apply to take the exam a second time. Only under special circumstances are students allowed to take a comprehensive exam a third time

### Economic Development - Doctor of Economic Development

The Doctor of Economic Development (DED) is a professional doctorate designed to provide advanced training for economic development professionals.

The Doctor of Economic Development (DED) is designed to prepare students to be professionals in the area of economic development. To receive a DED, students must successfully complete 42 ECDV credits. Successfully passing 2 comprehensive exams (offered twice each summer) is required to register for ECDV courses. The five courses covered by the two exams represent 15 credit hours of course work, which the student may complete at another program or at NMSU.

Public Utility Regulations & Economics - Graduate Certificate (Online)

The certificate in Public Utility Regulation and Economics (PURE) is a professional educational program designed for post-baccalaureate
students pursuing a career in the utility sector, with an electric utility company, natural gas utility, water distribution utility, or with a government agency regulating these types of companies. PURE students must meet the general regulations and minimum requirements for admission to the graduate school and complete 12 credit hours including ECON 503 Managerial Economics cannot be counted toward the minor.

Students pursuing the economics minor must fulfill the course prerequisites before enrolling in the graduate courses.

**Finance**

**Undergraduate Program Information**

Finance is the management of money and cash flow for business organizations, government and individuals. The study of finance involves examining the theory and techniques of managing money, including analysis and management of risk. Finance students learn to apply tools and concepts from mathematics, statistics, economics and accounting to financial decision-making. With this knowledge, finance graduates are in high demand by employers and command some of the highest salaries for college graduates. Depending upon their career goals and interests, finance majors may use the electives in the major to focus their program of study on financial management, personal financial planning, investments, banking, and/or risk management and insurance.

**Degrees for the Department**

Finance - Bachelor of Business Administration (p. 845)

Finance (Banking & Financial Planning) - Bachelor of Business Administration (p. 847)

Finance (Entrepreneurial Finance) - Bachelor of Business Administration (p. 849)

Finance (Financial Analyst) - Bachelor of Business Administration (p. 850)

Finance (Risk Management & Insurance) - Bachelor of Business Administration (p. 851)

**Minors**

Can only be earned by non-finance majors

Entrepreneurship and Innovation - Undergraduate Minor (p. 853)

Finance - Undergraduate Minor (p. 853)

Risk Management and Insurance - Undergraduate Minor (p. 854)

**Open to all majors**

Business Law - Undergraduate Minor (p. 853)

(Contact the Finance Department Head in BC 221 prior to signing up for Business Law Minor)

Finance - Graduate Certificate (p. 854)

**Professor Kenneth Martin, Department Head**

*Professors* de Boyrie, Martin, Query, Sankaran; *Assistant Professors* Clements, Rahman, Yildirim; *College Professors* Pallares, James, Kealy; *College Associate Professor* Fuchs; *College Assistant Professor* Kerr; *Emeritus Professors* Ellis, Oretskin, Fortin

---

### Applied Statistics - Graduate Minor

The minor in applied statistics is designed for graduate students majoring in other fields. It provides credentials that the student is capable of conducting statistical analyses in their area of specialization.

Master's level students wishing to minor in applied statistics at the master's level must have at least 10 credits of 500-level applied statistics courses. In accordance with Graduate School requirements, doctoral students must have at least 12 credits of 500-level applied statistics courses for a minor.

Students wishing to obtain the minor in applied statistics should contact an applied statistics faculty member to recommend appropriate applied statistics course work to be included in the plan of study and to serve as the graduate committee representative from the minor area.

### Economics - Graduate Minor

The graduate minor in economics is appropriate for those who seek a better understanding of how micro- and macro-economic forces influence individuals, business and government decision making. Students interested in public utility regulation, banking and finance, government service, or law will find the minor especially interesting.

Graduate students wishing to earn a minor in economics must complete 12 semester credit hours, including:

## Business Finance Courses

**BFIN 2110. Introduction to Finance**  
3 Credits (3)  
Introduces tools and techniques of financial management. Includes time value of money; financial planning, diversification and risk; debt and equity investment decisions; and financial statement analysis.  
**Prerequisite(s):** OATS 106 or higher; OATS 120 or ACCT 2110; ECON 1110G or ECON 2110G.

### Learning Outcomes
1. Explain the time value of money and its application in decision-making, including calculating present and future values of single payment and series of payments.
2. Identify the major sources of external long-term financing for corporations.
3. Explain risk-return tradeoff as it relates to diversification.
4. Differentiate the role of finance from other related disciplines such as accounting and economics.
5. Demonstrate knowledge of capital markets and securities (debt and equity).
6. Describe basic types of financial ratios and their uses.
7. Demonstrate the ability to prepare cash flows and make qualitative judgments on the relevance of the changes from one time frame to another.

**BFIN 303V. Personal Financial Planning and Investing in a Global Economy**  
3 Credits (3)  
Provides a framework for successful personal financial planning within an individual's career and income. Covers personal money management, federal and state taxation, the mathematics of finance and credit, housing, inflation, insurance, savings, and investments. Majors and minors may not use this course to satisfy their finance requirements.

**BFIN 311. Financial Futures Markets**  
3 Credits (3)  
Same as AEEC 311.

**BFIN 322. Principles of Insurance**  
3 Credits (3)  
Theory and practice of insurance and its economics and social significance; review of the major lines of insurance including life, health, and property liability insurance.

**BFIN 323. Life/Health/Employee Benefits**  
3 Credits (3)  
Approaches to problems of employee security from the perspective of businesses. Topics including pensions, profit-sharing plans, 401(k) plans, group life and health plans, and flexible benefit programs. The course also addresses individual life, health, and annuity contracts within a financial planning context.  
**Prerequisite:** BFIN 322.

**BFIN 324. Property and Liability Insurance**  
3 Credits (3)  
Analysis of property and liability insurance with emphasis on handling of commercial exposures. Review of property and liability company operations including rate making and insurance accounting.  
**Prerequisite:** BFIN 322

**BFIN 325. Real Estate Principles and Law I**  
3 Credits (3)  
Real estate law and the fundamental aspects of the real estate purchase transaction and the real estate lease agreement. Topics include real estate brokerage, marketing of real estate, fundamental legal aspects of real estate, present and future interests, air and water rights, methods of transfer, basics of financing and liens, and real estate leases. Same as BLAW 325.

**BFIN 326. Business Risk Management**  
3 Credits (3)  
The operational risks faced by firms and the study of various methods of handling these risks, including loss prevention, risk retention, self-insurance, corporate insurance programs, and capital markets.  
**Prerequisites:** BFIN 322

**BFIN 341. Financial Analysis and Markets**  
3 Credits (3)  
Financial analysis for business financing and investing decisions.  
**Prerequisites:** ACCT 2110, ECON 2110G, ECON 2120G, MATH 1220G, A ST 311 or MATH 1350G.

**BFIN 355. Investments**  
3 Credits (3)  
**Prerequisite(s):** BFIN 341 with a grade of C- or better.

**BFIN 360. Financial Information Technology**  
3 Credits (3)  
Integrated use of electronic financial information resources with spreadsheet and word processing applications in investigating financial issues and solving financial problems.  
**Prerequisite(s):** a grade of C- or better in BFIN 341 or consent of instructor.

**BFIN 385. Analysis of Financial Markets and Institutions**  
3 Credits (3)  
Analysis of the financial system, emphasizing its institutions and instruments.

**BFIN 391. Finance Internship and Cooperative Education I**  
1-3 Credits  
Introduction and application of finance principles in a work environment. Open only to students in the finance major or minor who will be working with an approved employer in a finance related position, over a period of 12 weeks or at least 300 work hours. Consent of instructor required.

**BFIN 392. Insurance Internship and Cooperative Education I**  
1-3 Credits  
Introduction and application of insurance principles in a work environment. Open only to students in the finance major or insurance minor who will be working with an approved employer in an insurance related position, over a period of 12 weeks or at least 300 work hours. Consent of instructor required. Restricted to Finance majors.

**BFIN 393. Banking Internship and Cooperative Education**  
1-3 Credits (1-3)  
Professional banking experience with opportunities to engage in business analysis and to observe application of business principles in the management of a banking entity or a regulatory agency with banking oversight. Open only to students in the finance major or banking minor who will be working with an approved employer in a banking related position, over a period of 12 weeks or at least 300 work hours. May be repeated up to 3 credits. Consent of Instructor required.
BFIN 406. Theory of Financial Decisions  
3 Credits (3)  
Contemporary financial theory. Firm valuation, investments and financing decisions, risk analysis.  
Prerequisite(s): BFIN 341 with a grade of C- or better.

BFIN 421. Personal Financial Planning for Professionals  
3 Credits (3)  
Introduction to personal financial planning, including goal setting and fact finding, cash management, credit, housing, retirement planning, taxation and estate planning. This course is intended for those planning careers in personal financial advising in one of the various financial services environments.  
Prerequisite(s): BFIN 341, or consent of Instructor.

BFIN 435. Investment Analysis  
3 Credits (3)  
Efficiency of capital markets, modern portfolio management, special topics of current interest to investment analysts.  
Prerequisite: BFIN 355.

BFIN 445. Fixed Income Markets, Instruments and Derivatives  
3 Credits (3)  
Course provides a broad introduction to treasury, corporate, municipal, mortgage backed and asset backed bond markets. The analytical techniques for valuing bonds, quantifying their exposure to changes in interest rate and credit risk exposures and investment decision-making are explored.  
Prerequisite(s): BFIN 341.

BFIN 455. Derivative Markets and Securities  
3 Credits (3)  
Institutional aspects of derivative markets and the arbitrage based pricing of derivative instruments such as stock options, interest rate options, future contracts and swaps. The applied component of the course demonstrates use of these instruments as hedge and/or investment vehicles.  
Prerequisite(s): BFIN 355.

BFIN 470. Real Estate Appraisal  
3 Credits (2+2P)  
This course addresses issues influencing the value of real estate with some emphasis upon rural properties. Topics include courthouse records, property taxes, appraisal methodology, expert courtroom testimony, condemnation, and legal issues. Students will take field trips and write appraisals. Course material is relevant to student in Finance, Accounting, and Pre-Law, as well as Agriculture. Accredited for hours to apply to both pre-licensing and continuing education requirements of the New Mexico Real Estate Commission for both Appraisers and Real Estate Brokers. Crosslisted with: AEEC 470.  
Prerequisite(s): Junior or above standing.

BFIN 475. International Managerial Finance  
3 Credits (3)  
International aspects of financial transactions, decision-making, banking and financial markets. Crosslisted with: I B 475 and BFIN 575.

BFIN 480. Management of Financial Institutions  
3 Credits (3)  
Asset and liability management of financial institutions; emphasis on commercial bank management.  
Prerequisite: BFIN 385 or consent of instructor.

BFIN 490. Selected Topics  
1-3 Credits  
Current topics in finance.  
Prerequisites: vary according to the seminar being offered.

BFIN 498. Independent Study  
1-3 Credits  
Individual studies directed by consenting faculty with the prior approval of the department head. A maximum of 3 credits may be earned.  
Prerequisites: junior or above standing and consent of instructor.

BFIN 500. Concepts in Finance  
1 Credit (1)  
An overview of fundamental principles of finance necessary for prospective MBA students who do not have an undergraduate background in finance. Includes: Time value of money concepts and calculations; risk and calculation of return given appropriate risk measures; bond risk characteristics and calculation of the value of a bond; calculation of the value of common stock (determination as to whether a stock is over-valued or under-valued); and calculation of the costs of capital and capital budgeting problems using the cost of capital.  
Prerequisite(s): admitted to MBA Program or consent of course department.

BFIN 503. Financial Management  
3 Credits (3)  
Theory and application of financial analysis to asset management, project evaluation, capital structure, and dividend policy. Interrelationships among financial and other organizational decisions.  
Prerequisite(s): BFIN 341 with a grade of B or better.

BFIN 511. Advanced Derivative Markets  
3 Credits (3)  
This course examines advanced futures and options strategies for income generation and risk management. Coverage includes a variety of markets, e.g., interest rates, stock indexes, metals, currencies, livestock, and grains. Both technical and fundamental trading strategies are identified and discussed. Same as AEEC/BFIN 311 with additional coursework required at the graduate level. Cannot receive credit for both AEEC/BFIN 311 and AEEC/BFIN 311. Crosslisted with: AEEC 511. May be repeated up to 3 credits.  
Learning Outcomes  
1. Define risk and identify methods of managing risk  
Demonstrate understanding of vocabulary associated with derivatives and derivative markets  
Identify the role that derivative markets play in reducing risk  
Demonstrate a basic understanding of derivative markets including their use in risk management and income generation

BFIN 521. Personal Financial Planning for Professionals  
3 Credits (3)  
Introduction to personal financial planning, including goal setting and fact finding, cash management, credit, housing, retirement planning, taxation and estate planning. This course is intended for those planning careers in personal financial advising in one of the various financial services environments. For Graduate students only  
Learning Outcomes  
1. Describe the financial planning process, assess the external environment, use goals to establish financial direction, and analyze a client’s present financial position. Estimate the impacts of income tax planning strategies, apply the basic process for retirement planning, and define the considerations for estate planning. Evaluate the roles of various insurance products in managing risks, and recognize the professional and ethical aspects of financial planning.
BFIN 535. Investment Concepts
3 Credits (3)
Investments in common stocks and other securities. Risk and return, securities markets, portfolio theory and management. For Graduate students only.

Learning Outcomes

BFIN 545. Fixed Income Markets, Instruments and Derivatives
3 Credits (3)
Course provides a broad introduction to treasury, corporate, municipal, mortgage backed and asset backed bond markets. The analytical techniques for valuing bonds, quantifying their exposure to changes in interest rate and credit risk exposures and investment decision-making are explored. Assignments and exams will be differentiated from the undergraduate cross-listed course. In addition, graduate students are expected to complete a project. For Graduate students only.

Learning Outcomes
1. Describe basic features of a fixed-income security. Describe mechanisms available for issuing bonds in primary markets. Analyze repurchase agreements (repos) and the risks associated with them. Compute invoice prices, yields, spot rates, and forward rates. Compute PVBP, duration and convexity of a bond, duration of a portfolio of bonds. Construct the term-structure of interest rates, Yield curve strategies. Describe the process of calibrating a binomial interest rate tree to match a specific term structure. Explain the principles underlying, and factors that influence, the market's pricing of CDS. Explain and execute interest rate swaps.

BFIN 555. Derivative Markets and Securities
3 Credits (3)
Institutional aspects of derivative markets and the arbitrage based pricing of derivative instruments such as stock options, interest rate options, future contracts and swaps. The applied component of the course demonstrates use of these instruments as hedge and/or investment vehicles. Same as BFIN 455 with differentiated assignments for graduated students. For Graduate students only.

Learning Outcomes
1. Define forward contracts, futures contracts, options (call and puts), swaps, and credit derivatives and compare their basic characteristics. Determine the value at expiration and profit from a long or a short position in a call or put option, or combinations such as straddles, covered calls, spreads, put-call parity etc. Explain how the concepts of arbitrage, replication, and risk neutrality are used in pricing derivatives. Explain how the value of an option is determined using a multiperiod-period binomial model. Describe how the Black-Scholes-Merton model is used to value European options on equities. Interpret each of the option Greeks. Describe how a delta hedge is executed. Define implied volatility and explain how it is used in options trading. Describe a futures contract: long and short positions, hedging, basis risk, and hedge ratios.

BFIN 575. International Managerial Finance
3 Credits (3)
International aspects of financial transactions, decision-making, banking and financial markets. For Graduate students only.

Learning Outcomes
1. Explain and evaluate how the globalization process moves a business from a purely domestic focus in its financial relationships and composition to one truly global in scope. Describe what three major corporate currency exposure arises from multinational business. Define and explain the terms that are used in reference to exchange rates and currency regimes in addition to analyzing the characteristics of an ideal currency. Explain how nations measure their own level of international economic activity and how that is measured by the balance of payments. Show how interest rates and inflation affect each country and currency. Identify the forms of currency quotations used by currency dealers, financial institutions, and agents of all kinds when conducting foreign exchange transactions. Distinguish between spot, forward, swaps, and other types of foreign exchange financial instruments as well as foreign currency futures and options contracts. Demonstrate how both the diversifiable and non-diversifiable risks of an investor’s portfolio may be reduced through international diversification. Evaluate the various internal and external sources of funds available for the financing of foreign subsidiaries.

BFIN 581. Management of Financial Institutions
3 Credits (3)
Asset and liability management of financial institutions; emphasis on commercial bank management. For Graduate students only.

Learning Outcomes

BFIN 589. Special Research Programs
1-3 Credits (1-3)
Current topics in finance. Taught with BFIN 490 with differentiated assignments for graduate students. Consent of instructor required.

BFIN 590. Selected Topics
1-3 Credits (1-3)
Current topics in finance. Taught with BFIN 490 with differentiated assignments for graduate students. Consent of instructor required.

Finance - Bachelor of Business Administration

Finance is the crossroads of economics, strategy and accounting, and the study of how firms and individuals allocate resources over time and under uncertain conditions. The finance curriculum provides a core foundation in corporate finance, investments, and financial institutions. The theory and
concepts are then applied to problem-solving in a variety of areas including financial markets and institutions, corporate finance, international financial management, stock valuation and portfolio allocation, fixed-income markets, derivatives, risk management and insurance, and entrepreneurial finance.

Courses in the BBA in Finance are organized into four concentrations: Financial Analyst, Banking and Financial Planning, Risk Management and Insurance, and Entrepreneurial Finance. Students may pursue one or more concentrations. If a student chooses not to pursue a concentration, they may select four courses from any concentration or any BFIN prefix above BFIN 310.

**Requirements**

Completion of the courses listed below (including any prerequisites) with a minimum cumulative GPA of 2.0 in these courses. At least twelve of the credits for the major must be completed at NMSU.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World, and elective credits to total at least 120 credits with 48 General Education credits, and Writing - Level 1 and Level 2. At least twelve of the credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

**Second Language: (not required)**

Electives, to bring the total credits to 120

**Total Credits**

120

Students may be required to take MATH 1215 Intermediate Algebra, depending on their math placement. MATH 1220G College Algebra or MATH 1430G Applications of Calculus I or MATH 1350G Introduction to Statistics fulfills the general education requirement in math.

See the General Education (p. 88) section of the catalog for a full list of courses.

See the Viewing A Wider World (p. 92) section of the catalog for a full list of courses.
For more information on concentrations see the pages below:
- Banking and Financial Planning (p. 847)
- Entrepreneurial Finance (p. 848)
- Financial Analyst (p. 850)
- Risk Management and Insurance (p. 851)

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Every candidate for this major must fulfill the general education common core (p. 88), College of Business foundation and business core (p. 787), Viewing a Wider World (p. 88) requirements and general electives, in addition to the requirement for the major. Given below is a suggested study plan for a student pursuing a Finance major. If a student chooses to pursue one or more than one concentration, they should choose the electives that pertain to the concentration. If students choose not to pursue a concentration, they may take courses from any concentration or from any BFIN prefix above BFIN 310.

Total Credits 120

1 Students may be required to take MATH 1215 Intermediate Algebra, depending on their math placement MATH 1220G College Algebra or MATH 1430G Applications of Calculus I for MATH 1350G Introduction to Statistics fulfills the general education requirement in math.

2 See the General Education (p. 88) section of the catalog for a full list of courses.

3 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

4 Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
Every candidate for this major must fulfill the general education common core (p. 88), College of Business foundation and business core (p. 787), Viewing a Wider World (p. 88) requirements and general electives, in addition to the requirement for the major. Given below is a suggested study plan for a student pursuing a Finance major. If a student chooses to pursue one or more than one concentration, they should choose the electives that pertain to the concentration. If students choose not to pursue a concentration, they may take courses from any concentration or from any BFIN prefix above BFIN 310.

Finance (Financial Analyst) - Bachelor of Business Administration

Finance is the crossroads of economics, strategy and accounting, and the study of how firms and individuals allocate resources over time and under uncertain conditions. The finance curriculum provides a core foundation in corporate finance, investments, and financial institutions. The theory and concepts are then applied to problem-solving in a variety of areas including financial markets and institutions, corporate finance, international financial management, stock valuation and portfolio allocation, fixed-income markets, derivatives, risk management and insurance, and entrepreneurial finance.

Courses in the BBA in Finance are organized into four concentrations: Financial Analyst, Banking and Financial Planning, Risk Management and Insurance, and Entrepreneurial Finance. Students may pursue one or more concentrations. If a student chooses not to pursue a concentration, they may select four courses from any concentration or any BFIN prefix above BFIN 310.

Requirements

Completion of the courses listed below (including any prerequisites) with a minimum cumulative GPA of 2.0 in these courses. At least twelve of the credits for the major must be completed at NMSU.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Entrepreneurship and Innovation (Business Cluster) - Undergraduate Minor

The Entrepreneurship and Innovation minor is designed to promote entrepreneurship to students across the NMSU campus. This minor will appeal to creative and ambitious students who envision launching and managing their own business or entering careers in innovation-driven fields. The flexible design allows students to complete a designated, approved cluster of related courses that provide a discipline-specific entrepreneurial flavor. Such clusters are under development.

Requirements
Completion of the courses listed below (including any prerequisites) with a minimum cumulative GPA of 2.0 in these courses. At least twelve of the credits for the minor must be completed at NMSU. This minor is not open to students in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.

Prefix | Title | Credits
---|---|---
ENTR 331 | Business Creation and Valuation | 3
MGMT 310V | Entrepreneurial Mindset | 3
BLAW 330 | Entrepreneurial Law | 3

Business Cluster Courses: Choose any 3 from the following 9
- BA 490 | Selected Topics |
- MKTG 312 | Personal Selling |
- MKTG 324 | Product/Service Development |

Total Credits 18

Business Law - Undergraduate Minor

In a world that is increasingly subject to laws and regulations, every business needs employees who are savvy about the laws that affect business. The Business Law minor is comprised of a series of courses designed to provide a strong background in a wide range of laws that business needs to be aware of, and provide students with the ability to recognize – and avoid – legal pitfalls. Additionally, the Business Law minor will provide students with a clear understanding of how legal disputes are resolved and the ability to appreciate the cost and complexity of disputes, and enable students to reduce the costs and complexities by being able to communicate clearly with lawyers about the legal issues.

Requirements
Completion of the courses listed below (including any prerequisites) with a minimum cumulative GPA of 2.0 in these courses. At least twelve of the credits for the minor must be completed at NMSU. This minor is not open to the Bachelor of Individualized Studies and the Bachelor of Applied Studies.

Prefix | Title | Credits
---|---|---
BLAW 316 | Legal Environment of Business | 3
BLAW 313 | Sports and the Law | 3
BLAW 385V | Employment and Consumer Law | 3
BLAW 330 | Entrepreneurial Law | 3

Take any 2 courses from the following: 6
- BLAW 325 | Real Estate Principles and Law I |
- HRTM 304 | Hospitality and Travel Law |
- AECE 314 | Agricultural and Natural Resource Law |
- HNRS 335V | Legal Issues in Modern Society |
- POLS 391 | Constitutional Law |

Total Credits 18

Finance - Undergraduate Minor

The minor in Finance, available to students in most majors (business and non-business), affords students the opportunity to select their minor courses to provide a focus on any one of several sub-specialties within the field of Finance. Faculty advisors in the department can assist students in selecting their Finance electives to provide a focus in financial management, financial planning, or investments. (This minor is not open to majors in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.)

Requirements
Completion of the courses listed below (including any prerequisites) with a minimum cumulative GPA of 2.0 in these courses and a minimum cumulative GPA of 2.0 in the BFIN courses. At least twelve credits for the minor must be completed at NMSU.

Prefix | Title | Credits
---|---|---
ACCT 2110 | Principles of Accounting I | 3
BFIN 341 | Financial Analysis and Markets | 3

Select any three additional, upper division, finance courses 9
- Select any additional upper division business course 3

Select one from the following: 3
- ECON 1110G | Survey of Economics |
- ECON 2110G | Macroeconomic Principles |
Risk Management and Insurance - Undergraduate Minor

The minor in Insurance, available to students in most majors (business and non-business), affords students the opportunity to supplement their major field of study with specialized expertise in the field of risk management and insurance.

Requirements

Completion of the courses listed below (including any prerequisites) with a minimum cumulative GPA of 2.0 in these courses. At least twelve of the credits for the minor must be completed at NMSU. The minor is not available to students in the Bachelor of Individualized Studies or the Bachelor of Applied Studies.

Total Credits 12

Management

Undergraduate Program Information

The major in general business is based on a broad range of course options rather than a narrow focus on a single discipline. Graduates find careers in large and small businesses, in government agencies and in the nonprofit sector. The general business major is well suited to the part-time and working student because it allows the student to select courses that will better meet their individual schedule. The entrepreneurship concentration is ideal for a student interested in starting or acquiring a small business or entering a family business upon graduation. The curriculum provides a focus on small and new enterprises, thus reflecting the entrepreneurial nature of contemporary business in the U.S.

The Department of Management invites you to consider a major in management. Do you like to work with people? Need help solving people problems at work? Hope to start your own business? Want to run an environmental project, or a bank, a store, a farm or a government agency? Are you interested in how people from diverse backgrounds work together to achieve common goals? If you answered yes to any of these questions, you should consider a major in management. The mission of the department is to prepare graduates, with a Bachelor of Business Administration, for management careers in a broad spectrum of New Mexico, national and globally oriented businesses. Management graduates work in small and large agricultural, manufacturing, government, transportation, public utility, merchandising, health care, environmental and communications organizations among others.

The study of management offers the opportunity to develop skills in utilizing human, physical and economic resources to achieve organizational objectives. These are important cross-functional skills in today's competitive job market. Students will acquire the skills and knowledge to develop their potential and to lead others in a common mission. Management majors may choose from program concentrations.
in human resource management, project and supply chain management or small business management and entrepreneurship.

## Degrees for the Department

- **General Business - Bachelor of Business Administration** (p. 858)
- **General Business - Bachelor of Business Administration (Online)** (p. 860)
- **General Business (Entrepreneurship) - Bachelor of Business Administration** (p. 862)
- **Management (Human Resource Management) - Bachelor of Business Administration** (p. 864)
- **Management (Project & Supply Chain Management) - Bachelor of Business Administration** (p. 866)
- **Management (Small Business Management & Entrepreneurship) - Bachelor of Business Administration** (p. 868)

## Minors for the Department

- **Management - Undergraduate Minor** (p. 870)

**Carlo A. Mora-Monge, Ph.D., Interim Department Head**

**Professors** Bishop, Hoffman, Jun; **Associate Professors** Flinchbaugh, Brewer; **Assistant Professors** Pimentel; **College Professor** Driver; **College Assistant Professor** Ortiz

J. Bishop, Ph.D. (Virginia Polytechnic Institute and State University) - Organizational Behavior, Research Methods; B. Brewer, Ph.D. (Arizona State University) - Supply Chain Management, Operations Management; M. Driver, Ph.D. (University of Alabama) - Human Resource Management, Ethics; C. Flinchbaugh, Ph.D. (University of Kansas) - Human Resource Management, Organizational Behavior; J. Hoffman (University of Nebraska) - Strategic Management, Entrepreneurship; M. Jun, Ph.D. (Georgia State University) - Supply Chain Management, Operations Management, L. Ortiz, Ph.D. (University of Texas-Pan American) - Human Resource Management, Small Business Management; V. Pimentel, Ph.D. (Washington State University) - Operations Management, Supply Chain Management.

### Management Courses

**MGMT 2110. Principles of Management**  
3 Credits (3)  
An introduction to the basic theory of management including the functions of planning, organizing, staffing, leading, and controlling; while considering management's ethical and social responsibilities.  

**Learning Outcomes**  
1. Explain the major functions of management including planning, organizing, communications, controlling, motivating, leading, and staffing.  
2. Recognize major developments in the history of management thought.  
3. Describe the basic managerial processes including decision-making and other key skills necessary for managers to perform their roles.  
4. Identify an organization's stakeholders and the importance of social and ethical responsibility of managers.  
5. Explain the formulation and implementation of strategic planning, including the relationship between goals, plans, vision statements, and mission statements.  
6. Describe the strategies managers use to help organizations adapt to changing internal and external environments.  
7. Explain organizational change, forces for change, sources of resistance to change, and the techniques managers can use to implement and facilitate change.

**MGMT 309. Human Behavior in Organizations**  
3 Credits (3)  
Interpersonal and organizational behavior, motivation, communication, team building, leadership, diversity management, legal and ethical issues, and politics in organizations. Credit may not be earned for both MGMT 309 and MGMT 315V.

**MGMT 310V. Entrepreneurial Mindset**  
3 Credits (3)  
This course provides the opportunity to learn to think like an entrepreneur in the broader context of social entrepreneurship, intrapreneurship, creative problem solving, opportunity recognition, and innovation.

**MGMT 332. Human Resources Management**  
3 Credits (3)  
Survey course in human resources management. Includes recruitment, selection, equal employment opportunity, performance appraisal, training, compensation, safety, and union-management relations.

**MGMT 333. Training and Development**  
3 Credits (3)  
Training and development of human resources, including training needs assessment, training approaches and techniques, and evaluation of training effectiveness.

**MGMT 335V. Business and Government**  
3 Credits (3)  
Crosslisted with: ECON 335G

**MGMT 344. Production and Operations Management**  
3 Credits (3)  
Management of physical and human resources; management information systems in operations; applications in various organizations.  
**Prerequisite:** MATH 1350G or A ST 311; and BCIS 338 or BCIS 350.
MGMT 345V. Quality and Competitiveness: An International Perspective
3 Credits (3)
Quality management and competitiveness are studied in manufacturing, services, and the public sector with an international perspective. Topics include: global history of quality, foreign competition and its impact on quality and productivity, quality management and continuous improvement, international operations management, quality assessment, and a review of the emergence of quality and competitiveness in government, education and health care. May be repeated up to 3 credits.

Learning Outcomes
1. Developing critical thinking skills through challenging material and assignments. Foster intelligent inquiry through assignments, participative lectures, team projects. Develop an integration and synthesis of knowledge through applications to case studies and individual assignments. Promote a breadth of knowledge on international developments in quality and competitiveness with a holistic view of quality and its impact on businesses, organizations, nations and individuals.

MGMT 347. Management Functions and Processes
3 Credits (3)
Planning, organizing, directing, and controlling operating units in an organization. Applications to a variety of types of organizations.

MGMT 351. Supply Chain Management
3 Credits (3)
Acquisition and control and delivery of materials, parts, equipment, and services for end use in the organization. Applications to service and manufacturing industries, nonprofit, and governmental institutions.

MGMT 361. Small Business Management
3 Credits (3)
Principles and practice of managing a small enterprise with emphasis on growth and performance.

MGMT 388V. Leadership and Ethics
3 Credits (3)
Exploration of the multifaceted nature of leadership and principal-based ethics in modern society through readings and seminar discussion. May be repeated up to 3 credits.

MGMT 391. Management Internship and Cooperative Education I
1-3 Credits
Application of management skills to the work environment. Open only to students majoring or minoring in management. The amount of academic credit (1-3 cr.) will be determined by the academic experience and not by the work experience. May be repeated for a maximum of 3 credits. Restricted to majors and minors.

Prerequisites: MGMT 309 and consent of instructor.

MGMT 448. Small Business Consulting
3 Credits (3)
Study analysis and presentation of recommendations for solving significant problems confronting small businesses.

Prerequisite(s): Senior standing or consent of instructor.

MGMT 449. Strategic Management
3 Credits (3)
Integrative approach to envisioning the future and shaping strategies for business success.

Prerequisite(s): BCIS 338 or BCIS 350; BLAW 316; BFIN 341; MGMT 309; MKTG 303; and one of the following: MGMT 344 or MGMT 470 or BCIS 485.

MGMT 451. Selection, Placement, and Performance Evaluation
3 Credits (3)
Staffing processes for organizations and the evaluation of employee performance. Use of selection methods and measurement of work behavior.

MGMT 453. Leadership and Motivation
3 Credits (3)
Theories of leadership and motivation. Motivational programs for complex organizations. Relationships between organizational power, authority, and management styles. Crosslisted with: I E 453

MGMT 454. Work Teams in Organizations
3 Credits (3)
Theories of small groups and their application to the work situation. Why and how groups form, grow, communicate, and maintain themselves.

Prerequisite(s): senior or above standing.

MGMT 458. Comparative International Management
3 Credits (3)
Cultural influences on management are examined in a global business environment with a particular emphasis on human behavior in multinational organizations and the management of human resources. Same as I B 458.

MGMT 460. Compensation Management
3 Credits (3)
An overview of wage and salary administration, including job evaluation, wage and salary surveys, program administration, legal aspects of pay systems, and benefits administration.

Prerequisite(s): MGMT 332 or consent of instructor.

MGMT 461. Seminar in Entrepreneurship
3 Credits (3)
For students interested in owning and operating their own business; students desiring hands-on, real-time experience in helping start up a business. Crosslisted with: MKTG 461.

Prerequisite(s): Senior standing or consent of instructor.

MGMT 465. Contemporary Issues in Human Resources Management
3 Credits (3)
Integrative course in human resources management, emphasizing the application of advanced concepts to complex personnel cases.

Prerequisite: MGMT 332.

MGMT 470. Project Management in Organizations
3 Credits (3)
Roles, responsibilities, and techniques of project managers in managing projects effectively. Preparation for professional certification.

MGMT 490. Selected Topics
1-18 Credits (1-18)
Seminars in selected current topics in the various areas of management and administration. Prerequisites vary according to the seminar being offered.

MGMT 491. Management Internship and Cooperative Education II
1-3 Credits
Covers the application of management skills to the work environment. The amount of academic credit (1-3 cr.) will be determined by the academic experience and not by the work experience. May be repeated for a maximum of 3 credits. Restricted to majors and minors.

Prerequisite: MGMT 309 and consent of instructor.
MGMT 498. Independent Study
1-3 Credits
Individual studies directed by consenting faculty with the prior approval of the department head. A maximum of 3 credits may be earned.
Prerequisite(s): junior or above standing and consent of instructor.

MGMT 502. Operations Management
3 Credits (3)
Systems and specialized models applied to the management of production facilities and service operations, including physical and human resources.
Prerequisite(s): Graduate students only.

MGMT 503. Organizational Behavior and Management Processes
3 Credits (3)
Covers the theory and practice related to the successful management of human resources in organizations operating within a dynamic global environment. Course goals include developing alternative frameworks for analyzing issues related to human behavior, management science, and organizational structure and theory.
Prerequisite: Graduate students only.

MGMT 512. Quantitative Analysis for Business Decisions
3 Credits (3)
Identification, collection, and analysis of an organization's data both internal and external, and use of the resultant information in managerial decision making.
Prerequisite: Graduate students only.

MGMT 548. Small Business Consulting
3 Credits (3)
Study, analysis, and presentation of recommendations for solving significant problems confronting small businesses. Same as MGMT 448 with differentiated assignments for graduate students.
Prerequisite(s): Graduate standing.

MGMT 590. Strategic Management
3 Credits (3)
Covers the integration of functional, human, technological, and environmental aspects of business within the framework of management policy and strategy formulation. Formulate, implement, evaluate and control the various functions of the organization from a systems perspective. Understand the external environment and its impact on the organization. Restricted to majors.
Prerequisite: M.B.A. student in his or her final semester.

MGMT 591. Seminar in Entrepreneurship
3 Credits (3)
For students interested in owning and operating their own business; students desiring hands-on, real-time experience in helping start up a business. Same as MGT 461 with differentiated assignments for graduate students. Crosslisted with: MKTG 591.
Prerequisite(s): Graduate standing.

MGMT 598. Special Research Programs
1-3 Credits
Individual investigations either analytical or experimental. A maximum of 6 credits may be earned.
Prerequisite: Consent of instructor.

MGMT 600. Doctoral Research
1-15 Credits (1-15)
This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination. Restricted to management majors. May be repeated up to 88 credits.

MGMT 601. Research in Management
1 Credit (1)
Ph.D. course provides opportunities for significant interaction between Management faculty and Management Ph.D. students. The course also provides opportunities for development of professional scholarly standards, ethics, and critiques, as well as insight into current research areas and topics supported by the Management Department and other relevant disciplinary areas. May be repeated for a maximum of 6 credits. Restricted to Ph.D. students. Graded S/U.

MGMT 640. Instructional Development for Teaching Business
3 Credits (3)
Pedagogical issues and techniques in collegiate business education. Includes course and curriculum development, outcomes assessment, class management, and teaching techniques. Practical issues faced in college instruction. Restricted to doctoral students.

MGMT 645. Seminar in Human Resources Management
3 Credits (3)
Seminar will address current issues in human resources management. Focus on research related to the selection, development, and effective use of human resources. Restricted to doctoral students. May be repeated up to 3 credits.

MGMT 650. Seminar in Organizational Behavior
3 Credits (3)
Seminar will include specific organizational behavior topics; motivation, leadership, group and inter-group relations, and attitude theory. Focus on current research and theory. Restricted to doctoral students. May be repeated up to 3 credits.

Learning Outcomes
1. Varies

MGMT 655. Seminar in Organizational Systems and Theory
3 Credits (3)
Analysis of organizations from a macro perspective. Topics include organizational theory, organizational design, organizational environment, and sociotechnical systems. Restricted to doctoral students. May be repeated up to 3 credits.

MGMT 660. Research Design and Methodology
3 Credits (3)
Topics will include philosophy of science, theory building, and research methods applicable to the study of organizational behavior. Restricted to doctoral students. May be repeated up to 3 credits.

Learning Outcomes
1. Varies

MGMT 661. Qualitative Research Methods
3 Credits (3)
In-depth coverage of selected topics in research methodology, including theory and logic of scientific investigation, grounded theory, action research, and ethnography. Restricted to doctoral students. May be repeated up to 3 credits.

MGMT 665. Seminar in Organizational Systems and Theory
3 Credits (3)
Seminar examines the major problem areas, research findings, and research methodologies of operations management. Focus on the critical evaluation of current theory and methodology. Restricted to Doctoral students. May be repeated up to 3 credits.
MGMT 675. Seminar in Strategic Management  
3 Credits (3)  
Survey of current and classical readings in strategy. Introduces the doctoral level student to strategic issues, strategic topics for research, and publication venues. Restricted to doctoral students. May be repeated up to 3 credits.

MGMT 685. Story Consulting to Organizations  
3 Credits (3)  
Apply various qualitative story and narrative research methods (plot analysis, script analysis, life history, and restoring) to action research consulting project. Students will conduct story assessment and (propose or enact) intervention with a local consenting organization. Restricted to doctoral students.

MGMT 690. Special Topics  
3 Credits (3)  
Seminars in selected current topics in the various areas of management. May be repeated for unlimited credit. Restricted to doctoral students.  
**Prerequisite(s):** Vary according to seminar being offered.

MGMT 698. Special Topics  
1-3 Credits  
**Prerequisite:** consent of instructor.

MGMT 700. Doctoral Dissertation  
1-15 Credits (1-15)  
May be repeated up to 88 credits.  
**Prerequisite:** advancement to candidacy.

1 Students may be required to take MATH 1215 Intermediate Algebra, depending on their math placement. MATH 1220G College Algebra or MATH 1430G Applications of Calculus I or MATH 1350G Introduction to Statistics fulfills the general education requirement in math.

2 See the General Education (p. 88) Section of the catalog for a full list of courses.
A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

General Business - Bachelor of Business Administration (Online)

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

1 Students may be required to take MATH 1215 Intermediate Algebra, depending on their math placement. MATH 1220G College Algebra or MATH 1430G Applications of Calculus I or MATH 1350G Introduction to Statistics fulfills the general education requirement in math.

2 See the General Education (p. 88) Section of the catalog for a full list of courses

3 See the Viewing a Wider World (p. 92) Section of the catalog for a full list of courses
No more than 9 credits may be taken in any one prefix

- Accounting (ACCT)
- Business Administration (B A)
- Business Computer Information Systems (BCIS)
- Business Law (BLAW)
- Economics (ECON)
- Entrepreneurship (ENTR)
- Finance (FIN)
- International Business (I B)
- Management (MGT)
- Marketing (MKTG)

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Note: The general business option is offered through a 2+2 Online Distance Education Degree Completion Program as well. Program information is available on the College of Business website: [http://business.nmsu.edu/academics/undergraduate/online-programs](http://business.nmsu.edu/academics/undergraduate/online-programs) (https://business.nmsu.edu/academic-programs/undergraduate-programs/online-undergraduate-program.html)

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Upper Division Business elective from the following prefixes: A ST, ACCT, B A, BCIS, BLAW, ECON, ENTR, BFIN, I B, MGMT, MKTG (excluding A ST 311) 3

Major Courses
- MGMT 332 Human Resources Management 3
- MGMT 333 Training and Development 3
- MGMT 451 Selection, Placement, and Performance Evaluation 3
- MGMT 460 Compensation Management 3
- BCIS 461 Business Analytics I 3
- MGMT Upper Division Electives 9

Second Language: (not required) 16

Electives, to bring the total credits to 120 5

Total Credits 120

Students may be required to take MATH 1215 Intermediate Algebra, depending on their math placement. MATH 1220G College Algebra or MATH 1430G Applications of Calculus I or MATH 1350G Introduction to Statistics fulfills the general education requirement in math.
A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G Intermediate Algebra and ENGL 1110G Rhetoric and Composition. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

² See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

³ See the General Education (p. 88) section of the catalog for a full list of courses.

¹ Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
1. These courses have prerequisites and it is the students responsibility for checking and fulfilling all course prerequisites listed for these courses.

2. See the General Education (p. 88) section of the catalog for a full list of courses.

3. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

4. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

5. Students who choose to take MGMT 333 Training and Development during Year 4-Fall will take a 3-credit MGT upper-division elective in Year 4-Spring.

   Students who choose to take a 3-credit MGMT upper-division elective during Year 4-Fall will take MGMT 465 Contemporary Issues in Human Resources Management during Year 4-Spring.

**Management (Project & Supply Chain Management) - Bachelor of Business Administration**

Every candidate for this major must fulfill the following requirements in addition to the general education common core, College of Business foundation and the business core, Viewing a Wider World requirements and general electives. Students will choose one or more of the four options that follow.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Management (Small Business Management & Entrepreneurship) - Bachelor of Business Administration

Every candidate for this major must fulfill the following requirements in addition to the general education common core, College of Business foundation, and the business core, Viewing a Wider World requirements and general electives. Students will choose one or more of the four options that follow.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

Students may be required to take MATH 1215 Intermediate Algebra, depending on their math placement. MATH 1220G College Algebra or MATH 1430G Applications of Calculus I or MATH 1350G Introduction to Statistics fulfills the general education requirement in math.

See the General Education (p. 88) section of the catalog for a full list of courses.

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses and how to fulfill this requirement.

All Foundation Requirement Courses must be taken, or satisfied with transfer credits, regardless of which Mathematics or Statistics course satisfies the Area II General Education course: MATH 1220G, MATH 1430G and MATH 1350G or A ST 311 must be completed.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

### A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G Intermediate Algebra and ENGL 1110G Rhetoric and Composition. The content and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

**Total Credits 120**
Graduate Program Information
The College offers a program leading to a Ph.D. degree (Doctor of Philosophy in Business Administration) (p. 816). The faculty of the Ph.D. Program in Business Administration is committed to training researchers and educators who will shape business scholarship, practice, and pedagogy. The program emphasizes preparing candidates to understand the complexities of modern business while they develop a specialized area of expertise in marketing or management. The Ph.D. in Business Administration provides graduates with the opportunity to pursue a variety of career paths within academia and within industry. Currently a concentration is offered in marketing.

Degrees for the Department
Marketing - Bachelor of Business Administration (Online) (p. 876)
Marketing (Advertising) - Bachelor of Business Administration (p. 878)
Marketing (PGA Golf Management) - Bachelor of Business Administration (p. 880)
Marketing (Professional Selling) - Bachelor of Business Administration (p. 881)
Marketing (Strategic Marketing) - Bachelor of Business Administration (p. 882)

Minors for the Department
Advertising - Undergraduate Minor (p. 884)
Marketing - Undergraduate Minor (p. 884)
Professional Selling - Undergraduate Minor (p. 885)

Professor, David Daniel, Department Head
Professors Hyman, Jasso; Associate Professor Niculescu; Assistant Professors Gazzoli, You, Zhu; College Professors Blaugrund, Gavin; College Assistant Professor Holguin; Emeritus Professor Sautter

Marketing Courses
MKTG 1210. Advertising
3 Credits (3)
A survey of currently available advertising media. A psychological approach to consumer persuasion; applied techniques in media selection, layout mechanics, production methods, and campaign structures. Prerequisite: MKTG 2110.

Learning Outcomes
1. Define advertising and the relevant application of psychology in delivering the message. Explain the importance of various advertising media in the marketing mix. Identify and explain the social, ethical and legal issues advertisers must consider. Describe the significance of the marketing function in business. Explain the importance of advertising and other marketing communication tools. Demonstrate application of the planning process as it applies to marketing and advertising. Describe the factors that are weighted when considering the use of radio and television in the creative advertising mix. Describe the relationship between market segment, consumer behavior and selection of advertising campaign types. List the alternative means of reaching a target market and the technical challenges of each.

Management - Undergraduate Minor
The management minor requires 18 upper division credits in management. Business majors must take any six upper-division management courses (3 credits each). The management minor for non-business majors consists of:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MGMT 309</td>
<td>Human Behavior in Organizations</td>
<td>3</td>
</tr>
<tr>
<td>Select five other upper division Management courses</td>
<td>15</td>
<td></td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>18</td>
</tr>
</tbody>
</table>

One 3-credit upper division course in the College of Business may substitute for one of the required five management courses.

At least 12 credits for the minor must be completed at NMSU. This minor is not open to majors in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.

To obtain a Management minor, a grade of C- or better must be attained in the courses required.

Marketing
Undergraduate Program Information
Marketing majors learn skills and knowledge relevant to the co-creation of goods, services, and ideas that uniquely meet the needs and wants of global customer markets and society at large. Career opportunities exist in marketing management, advertising, market research, promotion management, sales and sales management, social media, distribution management, and retailing. The major is designed to allow a great deal of choice so students may emphasize any combinations of these areas.

Most marketing majors enter into careers in business firms, although some find job opportunities in governmental and other nonprofit organizations. Still others become involved in owning and managing their own companies. Opportunities in entrepreneurship and small business are expanding at a rapid pace.
MKTG 1220. Small Business Marketing
3 Credits (3)
An overview of public relations principles, practices and purposes as applied to small business. Topics include basics of news release writing, media awareness, development and maintenance of a positive public image, branding, ethical marketing, and the relationships of public relations with advertising and marketing. Methods and practices used in small business are explored.
Prerequisite: MKTG 2110.
Learning Outcomes
1. Explain the importance of creating and sustaining a positive public awareness and image. Identify public relations practices as they relate to the management and marketing processes. Define branding and discuss its importance for small business. Describe the value of business event management and promotion for small business. Discuss how media relations, public relations, advertising and marketing efforts are interrelated and the importance of each.

MKTG 180. Level 1, PGA's PGM Education Program (Part 1)
3 Credits (3)
Level 1 Part 1 of the PGA PGM Education Program. Introduction to the Policies and Procedures of the PGA Golf Mgt. Program and the PGA of America. Students will complete the PGA Qualifying Level facilitating management 1A (Tournament Ops A, Rules of Golf B, and Career Enhancement B), and the corresponding Work Experience Activities. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.

MKTG 181. Level 1, PGA's PGM Education Program (Part 2)
3 Credits (3)
Level 1 Part 2 of the PGA PGM Education Program. This class will focus on Teaching and Coaching 1, the corresponding PGA Work Experience Activities, and PGA Teaching Seminars. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.

Learning Outcomes
1. Know how students learn and process golf knowledge and skills, and identify the implications for teaching Know how to define and distinguish between learning and performance Understand how juniors learn golf knowledge and skills, and identify implications for teaching Conduct a physical evaluation of a junior golfer and create developmentally appropriate exercise and training programs Establish student/teacher relationships that promote greater student learning and enjoyment Develop a communication style that fits the student and increases instructional effectiveness Analyze student's instructional needs and set clear, purposeful learning and practice goals Know the format for an effective golf lesson Deliver effective explanations and demonstrations during a golf lesson Engage in self-assessment of teaching skills and competencies Recognize the appropriate clubhead path and clubface position information to improve a golfer’s performance Conduct appropriate assessments to determine the short game skill level of the golfer Gain understanding of the short game elements to help lower scores and improve the player Define club performance terms and specifications, including lie angle and clubface angle or position, and describe their effect on ball flight and player performance: Define what information is required to properly assess a player's golf equipment Define club performance terms and specifications, including lie angle and clubface angle or position, and describe their effect on ball flight and player performance: Observe a player’s swinging motion, ball flight, and equipment to evaluate the effectiveness of their equipment.

MKTG 2110. Principles of Marketing
3 Credits (3)
Survey of modern marketing concepts and practices focusing on the marketing mix: product, pricing, promotion, and distribution strategies. Topics include: the marketing environment, consumer behavior, marketing research, target marketing, and the ethical and social responsibilities of marketers. May be repeated up to 6 credits.
Prerequisite: BUSA 1110.
Learning Outcomes
1. Describe the professional, ethical, and social responsibilities of marketers. Explain the role of the product in the marketing mix, including the product life cycle, the relevance of product innovation, and product classifications. Illustrate the role of promotion in the marketing mix, including the communication process and the promotional mix. Explain the role of price in the marketing mix, including pricing objectives, pricing policies, and pricing methods. Describe the operation of channels of distribution and supply chains, including functions of intermediaries and degrees of coverage. Define the concepts of target markets and market segmentation with respect to elements of the marketing mix. Explain the importance of market research and information systems in supporting marketing decision making. Describe the dynamic environment(s) in which marketing decisions must be made.

MKTG 2220. Digital Marketing
3 Credits (3)
This course focuses on planning to create and market a website. Internal marketing topics such as registering with search engines, increasing traffic, segmenting and targeting markets, establishing an online presence, developing a marketing plan and reshaping business for the Web market are covered.
Prerequisite: MKTG 2110.
Learning Outcomes
1. Describe how search engines work. (Use knowledge to make recommendations to a website on how it can improve its organic search rankings - perform search engine optimization). Describe the various methods of online display advertising. Determine the appropriate key performance indicators (KPIs) for any type of website. Describe and implement best practices in marketing to a database of current and potential customers via email. Utilize knowledge of social media tactics to design an effective social media campaign. Implement online reputation management tactics to improve the online reputation of a brand. Develop and present a digital marketing plan for a small, local business.

MKTG 280. Level 1, PGA's PGM Education Program (Part 3)
3 Credits (3)
Level 1 Part 3 of the PGA PGM Education Program. This class will focus on Facility Management 1B (Business Planning A, Customer Relations A, Golf Car A, Merchandising A, Turfgrass A), Level 1 Checkpoint Exams, and the corresponding PGA Work Experience Activities. Students will also be required to provide an internship evaluation report. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.
MKTG 281. Level 2, PGA's PGM Education Program (Part 1)  
3 Credits (3)  
Level 2 Part 1 of the PGA PGM Education Program. This class will focus on Teaching and Coaching 2, Teaching and Coaching Seminars, and the corresponding PGA Work Experience Activities. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.  

Learning Outcomes  
1. Explain how students learn golf knowledge and skills, and identify the implications for teaching.  
2. Explain how students process information when learning golf skills.  
3. Identify and explain the principles of effective practice.  
4. Explain how juniors learn golf knowledge and skills, and identify the implications for teaching.  
5. Structure an effective golf lesson.  
6. Analyze student's instructional needs and set clear, purposeful learning and practice goals.  
7. Deliver effective explanations and demonstrations during a golf lesson.  
9. Recognize and apply the appropriate clubhead path and clubface position information to improve a golfer's performance.  
10. Conduct appropriate assessments to determine the skill level of the golfer.  
11. Demonstrate basic knowledge of anatomy and physiology, and conduct a physical observation to identify movement capabilities and limitations that may affect a golfer's performance.  
12. Define club performance terms and specifications, and describe their effect on ball flight and player performance.

MKTG 303. Principles of Marketing  
3 Credits (3)  
Process, functions, and principles in the current marketing system.  

Learning Outcomes  
1. Understand primary and changing perspectives on marketing and strategic management.  
2. Understand the fundamental principles and theories of marketing.  
3. Develop the capacity to obtain and process relevant information and analytical skills.  
4. Evaluate the impact of interactive media on marketing management.  
5. Apply relevant marketing concepts and analytical tools, identify viable alternatives, make informed choices, and recommend marketing implementation plans.  
6. Develop skills in organizing more effective strategic marketing and in implementing the market planning process.  
7. Develop, evaluate, and implement marketing management strategies in complex environments through recent, popular case study analyses.  
8. Formulate marketing management strategies on critical issues, problems, and business opportunities.  

MKTG 305. Marketing and Food Agricultural Products  
3 Credits (3)  
This course provides a review of marketing principles and techniques used throughout the food and fiber supply chain. The course introduces a broad variety of marketing topics including marketing strategy, consumer behavior, market segmentation, market research, competitive analysis, and the marketing mix. The course serves as a foundation for advanced courses in agricultural marketing. May be repeated up to 3 credits. Crosslisted with: AEEC 305.  

Prerequisite(s): ECON 1110G or ECON 2120G.  

Learning Outcomes  
1. Articulate how agricultural commodities move through the food and fiber supply chain.  
2. Understand the importance of strategic marketing and how organizations within the food and fiber supply chain identify consumers and their preferences.  
3. Understand key marketing concepts used by agribusiness marketers, including SWOT analysis, the marketing mix, advertising and public relations.  
4. Know the basic outline and components of a marketing plan.

MKTG 310. Marketing Research  
3 Credits (3)  
Design, collection analysis, and presentation of research data.  

Prerequisite(s): MATH 1350G and MKTG 303 or consent of instructor.  

Learning Outcomes  
1. Translate a marketing problem into a feasible research question.  
2. Recognize marketing research as a process that involves a sequence of activities, each compatible with the preceding activities.  
3. Compare and contrast alternative research designs.  
4. Identify the sources of marketing information and the various means for gathering such information.  
5. Recognize the biases and limitations of marketing data and basic data analysis.  
6. Interpret univariate and basic bivariate data analysis techniques (i.e., should be able to decide when a technique is appropriate and recognize the managerial implications of analytical results).  
7. Design and execute a basic survey research project.  
8. Assess ethical issues associated with various research approaches.

MKTG 311V. Consumer Behavior  
3 Credits (3)  
The different aspects of consumer behavior and the variables affecting consumer decisions. Analysis of current concepts and models.  

Learning Outcomes  
1. Know the consumer behavior concepts by integrating and adapting theories developed in disciplines such as psychology, sociology, anthropology, and economics.  
2. Use specific tools to tackle and analyze customer issues.  
3. Develop the ability to apply consumer behavior concepts from the perspective of marketing managers and public policy makers.  
4. Increase the awareness of and enhance the ability to make ethical decisions in consumer-related issues.

MKTG 312. Personal Selling  
3 Credits (3)  
Implementation of the promotion process through interpersonal communications between salesperson and prospects. Serving customers by sales representatives.  

Learning Outcomes  
1. Demonstrate how personal selling can strategically enhance interpersonal communication skills, career management, personal productivity.  
2. Identify key issues and trends such as opportunities or threats, for developing emerging sales approaches platforms.
MKTG 313. Retail Management
3 Credits (3)
Investigates retail business operations and focuses on the strategic profit model, store location, layout, display, merchandising, operations, and personnel.
Learning Outcomes
1. Analyze the role of retailing in society and basic retailing principles, ideas, and concepts as they relate to an understanding of our market-driven system. Compare and contrast segmentation and target market selection relative to a specific population product/service for different markets and retailing opportunities. Apply the concepts of the marketing mix to the formulation and evaluation of retailing strategies relative to particular target markets, environments (economic, technological and competitive), and desired positions in market places (both local and global). Areas to be addressed include communication strategy, branding, packaging, pricing, product/service design, methods of delivery and the product life cycle. Relate the concepts of marketing and retailing research, consumer behavior and strategy and their interrelationships. Compare and contrast analysis techniques and judgment that are useful to managers in acting with integrity to make decisions and taking action.

MKTG 314. Advertising Strategy
3 Credits (3)
Utilization of advertising as a business administration function; communication with consumers as a means of attaining marketing goals.
Learning Outcomes
1. Analyze advertising from a consumer perspective. Compare advertising strategy theories and concepts. Evaluate advertising critically and creatively.

MKTG 317. International Marketing
3 Credits (3)
Focuses on decisions relating to entering markets, market segmentation, marketing strategies, and tactics in the international arena. Same as IB 317.
Learning Outcomes
1. Develop understanding about what is involved in making international marketing decisions, including product, price, promotion, and place decisions to create a marketing mix. Acquire an overview on the contemporary issues in global marketing and the unique challenges faced by marketing managers in the dynamic global environment. Develop insights into how differences in global economic, cultural, social, political, and legal environments can affect marketing decisions. Develop strategic thinking in the context of complex problems and challenges faced by the contemporary global executives and managers. Develop ability to integrate the important global societal dimensions of diversity, environmental concerns, ethics, and technological change into their thinking. Develop knowledge and skills to analyze cross-cultural variables and their impact on international marketing. Discover sources of information for researching and evaluating international markets. Communicate effectively about marketing issues in group discussions, oral presentations and written reports. Work effectively as a team member in analyzing marketing issues. Develop leadership skills necessary to deal with the uncertainty and changes faced by today's global marketers.

MKTG 324. Product/Service Development
3 Credits (3)
Covers product innovation, development, commercialization and resource recovery, price determination and administration strategies, and complementing planning processes.
Learning Outcomes
1. Understand the product/service development process. Identify market opportunities for new products. Use structured methods to evaluate and test product concepts. Apply tools learned in class to develop new products/services. Plan the launch of a product and evaluate its impact on the market. Efficiently work with and communicate ideas to team members.

MKTG 354. Sports Marketing
3 Credits (3)
The application of marketing concepts to the sports industry. Topics include fans/customers, products, and promotions across a range of sports.
Learning Outcomes
1. Discuss the domain of sports marketing. Apply basic marketing tools (e.g., research, segmentation) to sports marketing contexts. Recognize, evaluate, and accommodate the perspectives of participants and spectators as sports consumers. Identify appropriate marketing mix options for sports products. Appraise recent sports marketing trends. Plan a career in sports marketing.

MKTG 357. Internet and Social Media Marketing
3 Credits (3)
Focuses on the consumer psychology and marketing strategies at work in advertising and selling brands via the Internet and social media networks.
Learning Outcomes
1. Apply the concepts of the marketing mix to the formulation/evaluation of marketing strategies relative to Social Media policies that combine business objectives with appropriate use of Social Media channels and content. Compare and contrast the history of Social Media and recognize the various platforms of Social Media. Select/defend segmentation and target market selection relative to a specific population product/service that engages target audiences with a marketing message. Analyze business objectives and connect to appropriate Social Media tactics. Evaluate Social Media marketing content to shape the way we connect to and build relationships with users, consumers and businesses. Relate the concepts of marketing research to establish metrics for measuring Social Media marketing success.

MKTG 380. Level 2, PGA's PGM Education Program (Part 2)
3 Credits (3)
Level 2 Part 2 of the PGA PGM Education Program. This class will focus on Facility Management 2 and the corresponding PGA Work Experience Activities. Students will also be required to provide an internship evaluation report. Additional course fee required. Consent of Instructor required. Restricted to: MKTG/PGA Golf Management majors.
Learning Outcomes
1. Define the business at the facility level in terms of vision, core values, facility characteristics and mission. Utilize the four Interaction Strategies in a variety of routine and challenging customer situations. Identify core business areas that support a customer-focused environment. Know the characteristics of a merchandising operation that align with a facility's business plan. Understand how to define, assess, and develop tournament business at a facility.
MKTG 381. Level 3, PGA's PGM Education Program (Part 1)
3 Credits (3)
Level 3 Part 1 of the PGA's PGM Education Program. This class will focus on Teaching and Coaching 3, Teaching and Coaching Seminars, and the corresponding PGA Work Experience Activities. Additional course fee required. Consent of Instructor required. Restricted to: MKTG/PGA Golf Management

Learning Outcomes
1. Explain how various types of feedback function to influence learning
   Define the major variables that influence learning and explain how they operate with implications for practice, learning, and teaching
   Provide effective instructional feedback after students' practice and performance
   Explain how the form, precision, timing, frequency, and regulation of augmented feedback influence learning with implications for teaching and practice conditions
   Explain how the key practice factors influence learning with implication for designing practice conditions
   Establish relationships that promote greater student learning and enjoyment
   Plan long-term developmental programs for beginning and intermediate players
   Communicate effectively with students
   Develop a communication style that increases instructional effectiveness
   Effectively determine and design an appropriate practice routine to the benefit of the golfer
   Effectively determine and assign the appropriate drill or drill with an aid to improve the swing shape of the golfer
   Use relevant technology to promote student learning
   Effectively demonstrate and apply the appropriate specialty shot information to the benefit of the golfer
   Demonstrate basic knowledge of current swing methodologies of noted instructors
   Physical development of junior golfers
   Assess the physical capabilities of adult golfer, describe implications for performance, and provide potential physical adjustments
   Describe how to use bench skills, tools, and technologies for measuring and altering club performance
   Perform analyses and make appropriate alterations to change ball flight, players performance, and teacher effectiveness

MKTG 400. Marketing Internship/Field Experience
3 Credits (3)
Internship of field experience in application of marketing principles. The student must accept an internship before being allowed to enroll in the course. Consent of instructor required. Restricted to MKTG majors.

MKTG 449. Promotion Management
3 Credits (3)
Covers concepts and problems in the use of advertising, internet marketing, social media marketing, personal selling, publicity, and other forms of promotion; planning, coordination, control, and evaluation of effectiveness.

Learning Outcomes
1. Analyze the role of advertising and promotion in society and basic marketing principles, ideas, and concepts as they relate to an understanding of our market-driven system
   Compare and contrast segmentation and target market selection relative to a specific population product/service for different markets and promotional opportunities
   Apply the concepts of the marketing mix to the formulation and evaluation of promotional strategies relative to particular target markets, environments (economic, technological and competitive), and desired positions in market places (both local and global)
   Areas to be addressed include communication strategy, branding, pricing, product/service design, and e-commerce
   Relate the concepts of marketing and advertising research, consumer behavior and strategy and their interrelationships
   Compare and contrast analysis techniques and judgment that are useful to managers in acting with integrity to make decisions and taking action in the promotional environment

MKTG 451. Food and Agribusiness Market Assessment
3 Credits (3)
This course is an application course in which self-managed teams develop and present marketing plans for agribusiness firms. Emphasis on integrating the marketing mix, particularly promotional elements. May be repeated up to 3 credits. Crosslisted with: AECE 451.

Prerequisite(s): AECE 305 or MKTG 305 or consent of instructor.

Learning Outcomes
1. Identify, organize ad conduct market research specific to the project
   Develop an understanding of primary and secondary research collection and analysis
   Exhibit enhanced relationship management, communication skills, and team building
   Develop written communication with final deliverable for implementation into the business world

MKTG 453. Sales Management
3 Credits (3)
The nature of the sales management function in industry. Focuses on intra and interdepartmental sales management activities.

Prerequisite: MKTG 312.

Learning Outcomes
1. Examined the linkage between personal selling, as a basket of activities, and the management of those marketing personnel who do selling (i.e., salespeople).
   Examined the role of the sales force in the achievement of a firm's marketing objectives.
   Undertaken numerous case-based analyses of typical sales management issues, including the hiring, firing, training, motivation, compensation, deployment, and evaluation of the firm's sales personnel.
   Developed decision-making skills and analytic capabilities in the development and management of both sales programs and salespeople.

MKTG 461. Seminar in Entrepreneurship
3 Credits (3)
For students interested in owning and operating their own business; students desiring hands-on, real-time experience in helping start up a business. Crosslisted with MGMT 461.

Prerequisite(s): Senior standing or consent of instructor.
MKTG 462. Advanced Sales
3 Credits (3)
Advanced instruction and skill development in interpersonal communication skills to broaden understanding of the professional sales role (especially in team selling situation), career management, personal productivity, negotiation, and coordination with other functional areas.
Prerequisite: MKTG 312.
Learning Outcomes
1. Students will learn “how” to sell (i.e., the behaviors and planning associated with selling today). Analyze the concept of what/how is perhaps equally important but not nearly as obvious, how and why buyers “buy”. The course focus will be particularly on so-called “business-to-business” (B2B) sales jobs, as that is where many of the most interesting – and lucrative – sales positions reside.

MKTG 480. Level 3, PGA's PGM Education Program (Part 2)
3 Credits (3)
Level 3 Part 2 of the PGA's PGM Education Program. This class will focus on Facility Management 3, the Business Simulation Seminars, and the corresponding PGA Work Experience Activities. Students will also be required to provide an internship evaluation report. Additional course fee required. Consent of Instructor required. Restricted to: MKTG/PGA Golf Management Majors
Learning Outcomes
1. Assess the current state of the business by conducting a SWOT Analysis Describe the golf industry job market and the knowledge and skills required to succeed Identify areas where food services and golf operations should coordinate efforts Determine golf car needs in order to acquire a fleet that supports the facility's mission, customers, and physical characteristics Describe the organizational structure, key departments, reporting relationships, and job descriptions of a facility Utilize industry-proven pricing strategies to meet business objectives Describe the Performance System for supervising and delegating Describe practices that improve the golf course and protect the environment

MKTG 481. PGA Golf Management Final Experience
1 Credit (1)
The following are requirements for successful completion of this senior level PGA Golf Management capstone course: 16 months of internship, completion of the Qualifying Level, Level 1, Level 2, and Level 3 of the PGA's PGM Education Program and successful completion of the PGA's Playing Ability Test. Consent of Instructor required. Restricted to: MKTG/PGA Golf Management Majors
Learning Outcomes
1. Describe the golf industry job market and the knowledge and skills required to succeed Access PGA employment resources and participate in professional growth and development

MKTG 489. Strategy and Policy
3 Credits (3)
Techniques and analysis of marketing strategy and policy planning and formulation. Senior standing or consent of instructor.
Prerequisite(s): MKTG 310.
Learning Outcomes
1. Relate marketing strategy to the environmental constraints and opportunities with which managers must deal Compare marketing strategy theories and concepts Evaluate appropriate strategic marketing decisions in various situations

MKTG 490. Selected Topics
1-18 Credits (1-18)
Covers materials and subjects not offered in regular Marketing courses. Students can take 18 credit hours of MKTG 490 if each class is a different subtitle. A maximum of 18 credit hours can be earned through MKTG 490.

MKTG 498. Independent Study
1-3 Credits
Individual studies directed by consenting faculty with the prior approval of the department head. A maximum of 3 credits may be earned.
Prerequisites: junior or above standing and consent of instructor.

MKTG 503. Marketing Management
3 Credits (3)
Analysis of marketing problems and the integration of organizational resources as well as behavioral and quantitative techniques into the development and implementation of solutions.
Learning Outcomes
1. Identify the fundamental principles and theories of marketing Outline primary and changing perspectives on marketing and strategic management Apply relevant marketing concepts and analytical tools Develop capacity to obtain and process relevant information with enhanced analytical skills Identify viable alternative to make informed choices and recommend marketing implementation plans Evaluate the impact of interactive media on marketing management Develop skills in organizing more effective strategic marketing and implementing the market planning process Practice implementing marketing management strategies in complex environments through case study analyses Formulate marketing management strategies on critical issues, problems, and business opportunities Synthesize perspectives of ethics and social responsibility in adapting to changing environments

MKTG 591. Seminar in Entrepreneurship
3 Credits (3)
For students interested in owning and operating their own business; students desiring hands-on, real-time experience in helping start up a business. Same as MKTG 461 with differentiated assignments for graduate students. Crosslisted with: MGMT 591.
Prerequisite(s): Graduate standing.

MKTG 601. Marketing Management
3 Credits (3)
Covers the conceptual foundations of contemporary marketing management research, concepts, and literature. Fundamental to the understanding of contemporary marketing and the breadth of the field of marketing study.
Learning Outcomes
1. Identify the contemporary principles and theories of marketing strategy research Outline primary guidelines and trendy directions of marketing strategic research Improve theoretical foundation for research development in marketing strategy Develop capacity of analytical and quantitative skills required for empirics Apply relevant marketing theories, concepts and analytical methodology in research development Formulate research ideas pertinent to marketing strategies on critical issues, problems, and phenomena Practice complex research design, theoretical development and empirical operationalization Synthesize perspectives of ethics and social responsibility in scholarly research
### Marketing - Bachelor of Business Administration (Online)

#### Marketing Major

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

*Note: The marketing major is also offered through an Online Distance Education Degree Completion Program. Program information is available on the College of Business website: [https://business.nmsu.edu/academics/undergraduate/online-programs/](https://business.nmsu.edu/academics/undergraduate/online-programs/)*

#### Departmental/College Requirements

**Foundation Requirements**

Choose one from the following: 3 credits

- (If MATH 1350G is taken before MATH 1220G then the Statistics course will satisfy the Area II Requirement and MATH 1220G must be taken as a foundation requirement)
  - MATH 1350G Introduction to Statistics
  - A ST 311 Statistical Applications

**Business Core: Lower Division (minimum grade of C- required)**

- ACCT 2110 Principles of Accounting I
- ACCT 2120 Principles of Accounting II
- BCIS 1110 Introduction to Information Systems
- BUSA 1110 Intro to Business

**Business Core: Upper Division**

- BCIS 338 Business Information Systems I
- BLAW 316 Legal Environment of Business
- BFIN 341 Financial Analysis and Markets
- MGMT 309 Human Behavior in Organizations

---

### MKTG 620. Research- Theory Interface

3 Credits (3)

Theoretical and methodological issues involved in translating a theory into a research study. Prepares Ph.D. students to undertake dissertation research. Consent of instructor required.

### MKTG 625. Consumer Behavior

3 Credits (3)

Extensive reading of seminal and contemporary articles on consumer behavior and developing original research to explore cross-disciplinary issues relevant to the study of marketing.

### MKTG 640. Measurement and Structural Equation Modeling

3 Credits (3)

Explores theories of measurement that underlie all quantitative analysis, including the use of structural equation models. Contrasts classical test theory with item response theory and generalizability theory. Covers PRELIS and LISREL, and critiquing structural equation models by other researchers. May be repeated up to 3 credits.

**Prerequisite:** A ST 505.

### MKTG 670. Marketing Theory

3 Credits (3)

The evolution, development, construction, and evaluation of the major theoretical perspectives of marketing. Fundamental to the understanding of contemporary marketing and preparation for investigations into the nature and role of theory in marketing.

### MKTG 690. Special Topics in Marketing

3 Credits (3)

A seminar on special topics in marketing. The topic of the course will vary according to the needs of the students in the program and the instructor. Ph.D. students may repeat this course up to three times for a maximum total of 9 credits.

### MKTG 698. Selected Topics

1-9 Credits (1-9)

Materials and subjects not offered in regular marketing courses. May be repeated for a maximum of 18 credits under different subtitles.

### MKTG 700. Doctoral Dissertation

1-15 Credits (1-15)

May be repeated up to 88 credits.

**Prerequisite:** advancement to candidacy.

4 See the General Education (p. 88) section of the catalog for a full list of courses.
5 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.
6 Most, but not all, upper-division MKTG courses are offered online. However, most MKTG courses that are offered online are only offered once per year. Most online courses that are available for on-campus majors to take (i.e., not through the NMSU-O campus) have substantially limited enrollment – please plan accordingly.
7 While this course can currently be substituted for by other upper-division MKTG courses, it is likely to be required in future catalogs and taking it is strongly encouraged.

| Total Credits | 120 |

See the General Education (p. 88) of the catalog for a full list of courses.
MATH 1220G College Algebra is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G first.

All Foundation Requirement Courses must be taken, or satisfied with transfer credits, regardless of which Mathematics or Statistics course satisfies the Area II General Education course: MATH 1220G College Algebra, MATH 1430G Applications of Calculus I, and either MATH 1350G Introduction to Statistics or A ST 311 Statistical Applications must be completed.

See the Viewing a Wider World (p. 92) of the catalog for a full list of courses.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

A Suggested Plan of Study for Students

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.
Most, but not all, upper-division MKTG courses are offered online. However, most MKTG courses that are offered online are only offered once per year. Most online courses that are available for on-campus majors to take (i.e., not through the NMSU-O campus) have substantially limited enrollment—please plan accordingly.

While this course can currently be substituted for by other upper-division MKTG courses, it is likely to be required in future catalogs and taking it is strongly encouraged.

Marketing (PGA Golf Management) - Bachelor of Business Administration

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120.5 credits with 58.5 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Note: Students must apply separately to the PGA Golf Management Program for acceptance. Acceptance is limited to the fall of every year.

Total Credits 120.5

¹ See the General Education (p. 88) of the catalog for a full list of courses.

² MATH 1220G College Algebra is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G first.

³ All Foundation Requirement Courses must be taken, or satisfied with transfer credits, regardless of which Mathematics or Statistics course satisfies the Area II General Education course: MATH 1220G College Algebra, MATH 1430G Applications of Calculus I, and either MATH 1350G Introduction to Statistics or A ST 311 Statistical Applications must be completed.

⁴ See the Viewing a World (p. 92) of the catalog for a full list of courses.

⁵ Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120.5 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
Marketing (Professional Selling) - Bachelor of Business Administration

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Note: The marketing major is also offered through an Online Distance Education Degree Completion Program. Program information is available on the College of Business website: http://business.nmsu.edu/academics/undergraduate/online-programs/ (p. 881)

4 Most, but not all, upper-division MKTG courses are offered online. However, most MKTG courses that are offered online are only offered once per year. Most online courses that are available for on-campus majors to take (i.e., not through the NMSU-O campus) have substantially limited enrollment – please plan accordingly.

5 While this course can currently be substituted for by other upper-division MKTG courses, it is likely to be required in future catalogs and taking it is strongly encouraged.

Advertising - Undergraduate Minor

If you are considering the Minor in Advertising, please visit the Department of Marketing, Business Complex, room 209 to arrange a consultation with a Marketing Faculty member for guidance and a suggested Plan of Study for the minor, etc. Students must have a cumulative grade point average of 2.0 in the 18 credits in order to earn the Minor in Advertising. Also, at least twelve credits for the minor must be completed at NMSU.

This minor is not open to majors in the Bachelor of Individualized Studies and the Bachelor of Applied Studies.

Requirements: 18 or more Credit Hours in an approved plan of study.

Prefix  | Title          | Credits
--- | --- | ---
MKTG 303  | Principles of Marketing  | 3
MKTG 311V  | Consumer Behavior  | 3
MKTG 314  | Advertising Strategy  | 3
MKTG 449  | Promotion Management  | 3

Additional credits from any College of Business prefix (including MKTG) 6

Total Credits 18

1 All courses must be upper-division (300 level or above).

Marketing - Undergraduate Minor

If you are considering the Minor in Marketing, please visit the Department of Marketing to arrange a consultation with a Marketing faculty member for guidance, a suggested Plan of Study, or possible course substitutions. Students must have a cumulative grade point average of 2.0 for the 18 credits taken in the minor. At least 12 credits for the minor must be completed at NMSU.

This minor is not available to majors in Individualized Studies or Applied Studies.

Requirements: 18 or more Credit Hours in an approved plan of study.
The College of Engineering comprises six departments:

- Chemical Engineering (p. 889);
- Civil Engineering (p. 902);
- Electrical and Computer Engineering (p. 918);
- Engineering Technology and Surveying Engineering (p. 969);
- Industrial Engineering (p. 1013);
- Mechanical and Aerospace Engineering (p. 1028).

**Mission of the College of Engineering**

The College of Engineering will uphold the land grant mission of NMSU through nationally recognized programs in education, research and professional and public service.

With respect to our undergraduate programs, we will accomplish our mission by focusing on the following goals:

1. To be nationally and internationally recognized for academic and research programs in engineering and engineering technology.
2. To provide world-class engineers and engineering technologists for industrial, government, and academic constituents of the College of Engineering.
3. To be the University of Choice for undergraduate engineering and engineering technology education in the region.
4. To serve as an engine for economic development in New Mexico through the advancement of engineering and technology.

Furthermore, graduates receiving baccalaureate degrees will demonstrate:

- an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- an ability to communicate effectively with a range of audiences
- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

**Undergraduate Student Advisement**

Starting with the fall 2017 semester, students entering the College of Engineering will be advised by the Center for Academic Advising and Student Support (CAASS) located in Garcia Annex. Students may also change majors at the CAASS. Students uncertain about choosing a major may list themselves as undeclared in the College of Engineering and be advised by the CAASS. Undeclared students will be asked to choose a major after two semesters in the college. Students must have a declared major in order to graduate.

**Undergraduate General Education**

With the exception of math and science, the college accepts all coursework approved for inclusion in the New Mexico General Education Requirements: 18 or more Credit Hours in an approved plan of study.

**Professional Selling - Undergraduate Minor**

If you are considering the Minor in Professional Selling, please visit the Department of Marketing to arrange a consultation with a Marketing faculty member for guidance, a suggested Plan of Study, or possible course substitutions. Students must have a cumulative grade point average of 2.0 for the 18 credits in taken in the minor. At least 12 credits for the minor must be completed at NMSU.

This minor is not available to majors in Individualized Studies or Applied Studies.

Requirements: 18 or more Credit Hours in an approved plan of study.

HRTM 301 Hotel, Restaurant, and Tourism Marketing may be substituted.

1. All courses must be upper-division (300 level or above).

- Industrial Engineering (p. 1013);
- Mechanical and Aerospace Engineering (p. 1028).
- Chemical Engineering (p. 889);
- Civil Engineering (p. 902);
- Electrical and Computer Engineering (p. 918);
- Engineering Technology and Surveying Engineering (p. 969);

1. All courses must be upper-division (300 level or above).

**College of Engineering**

Dean - **Lakshmi Reddi, Ph.D., P.E.**

Associate Dean (Academic Programs) - **Antonio (“Tony”) Garcia, Ph.D.**

Associate Dean (Research) - **Hongmei Luo, Ph.D.**

Associate Dean (Outreach and Recruitment) - **Patricia Sullivan, Ph.D.**

Assistant Dean (Student Success and Experiential Learning) - **Gabe Garcia, Ph.D.**

College Chief of Staff - **Linda Fresques**

The College of Engineering comprises six departments:
Common Core. Calculus I, General Chemistry I and Engineering Physics I are required to satisfy areas II and III of the common core.

**S/U Coursework**

The college requires most degree requirements to be taken with traditional grading. Students may take selected humanities and social science courses under the S/U option. Other exceptions are specifically noted in the program descriptions later in this catalog.

**Undergraduate Math Placement**

Entering freshmen are placed into an appropriate math course based upon the results of the Math Placement Exam administered regularly by the NMSU mathematics department. Students with advanced placement or transfer credit for mathematics will be placed accordingly.

**Minors**

Minors are available from most departments within the College of Engineering, and they are outlined in the individual program descriptions.

**Undergraduate Cooperative Education**

After two semesters of satisfactory academic work (2.5 GPA or higher), an engineering student may go on a work phase with one of the many companies or governmental agencies with which the university has co-op agreements. The experience obtained through alternating periods of academic and field work greatly contributes to the preparation of a student for professional life. Work phases are considered to be a vital part of the educational process, and students are counseled in the selection of co-op positions that will lead to progressive learning experiences. Earnings while on work phase provide a source of financial assistance to meet educational expenses.

A significant number of undergraduate engineering students are in the cooperative education program. Students may, with the approval of their department head, earn credit while participating in a co-op work phase. Co-op credits do not normally count toward the degree requirements, but are displayed on the transcript.

**Undergraduate General Academic Requirements**

For regular admission to the university and the College of Engineering, incoming freshman and transfer applicants must meet the university’s qualifications for regular admission as stated in the undergraduate catalog in effect at the time of application. Students admitted to the College of Engineering will be classified by the college as a pre-major until the standard requirements described below for admission to the program major are met.

Pre-major students will be admitted into their respective programs once they have met the following criteria:

- Earn a minimum grade of C- in all of the following courses:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1215G</td>
<td>General Chemistry I Lecture and Laboratory for STEM Majors</td>
<td>4</td>
</tr>
<tr>
<td>ENGL 1110G/1110M</td>
<td>Composition I</td>
<td>4</td>
</tr>
<tr>
<td>MATH 1511G</td>
<td>Calculus and Analytic Geometry I</td>
<td>4</td>
</tr>
</tbody>
</table>

or MATH 1430G (engineering technology)

Any of the above courses with earned AP credit (minimum score of 3) is exempt from the list. Transfer students may meet this criteria with determined passing credit of equivalent courses. Pre-major students will be advised by their EG [major] department.

NMSU College of Engineering reserves the right to independently test any student’s English proficiency upon arrival, including those who have earned scores satisfying minimum admission criteria. If the demonstrated level of English proficiency is not sufficient for academic success as determined by the Center for English Language Programs, support classes may be required to improve proficiency.

Students must earn a minimum cumulative GPA of 2.0 before enrolling in engineering courses numbered 300 or above. Students seeking to continue in engineering upper division courses with a GPA below 2.0 need to meet with the Associate Dean of Academics to create a course plan designed to increase their GPA and meet this criteria.

Students must earn a grade of C- or better in all engineering, technology, math and science courses (including associated prerequisite courses) required for the degree and also courses taken to satisfy the general education requirements for Area I - Communications, Area II - Mathematics/Algebra, and Area III - Laboratory Science. If a grade lower than C- is earned in any of these courses, the student is required to retake the course immediately during the next semester it is offered. An undergraduate student may attempt an engineering, math, or physical science course no more than three times to earn a passing grade of C- or better. Anytime a student earns less than a C-, a meeting with the appropriate engineering academic advisor is required to develop a plan for addressing this issue. If the student fails to pass any of these courses after three attempts, then the student will not be able to continue as an engineering major and will be counseled on other degree options.

**Engineering Transfer Policy**

Policy for engineering majors enrolling in courses at other institutions to meet College of Engineering Departmental Core Requirements.

1. NMSU Policy Manual Chapter 6, section 89, paragraph A. “The decision to award a student credit for work completed at another institution rests with the faculty.”

2. NMSU main campus engineering majors may take core classes at other institutions of higher education to meet NMSU College of Engineering Departmental Core if the NMSU core course cannot accommodate any more eligible students.

3. The following conditions and restrictions apply to any course not taken on the NMSU main campus.
   - The department must approve the course prior to enrollment (student to provide course syllabus and any other documentation to department head).
   - The course must be a class in a program that is accredited by an accreditation commission of ABET, Inc. and cannot be graded S/U.
   - The course must be substantially the same as the equivalent NMSU class and the student must have satisfied all NMSU prerequisite requirements.
   - The student shall provide a corresponding course syllabus and any other documentation required.
• If NMSU prerequisite requirements are not satisfied, credit will be denied regardless of a passing grade for the course at the other institution.

4. In addition to 3 above, the following conditions apply to any on-line course not taken from the NMSU main campus.

• Scheduled exams, if any, shall be proctored.\(^2\)
• If NMSU prerequisite requirements are not satisfied, credit will be denied regardless of a passing grade for the course at the other institution.

1
Core requirements are defined as required departmental, discipline-related, courses within the major.

2
The student may choose to have NMSU proctored exams (https://dl.nmsu.edu/proctored-exams/)

For more information about transferring to New Mexico State University from another accredited institution, visit the NMSU Transfer Center.

Requirements for Graduation
The minimum requirements for undergraduate degrees are:

1. Satisfaction of the university requirements as previously outlined in the Regulations (p. 35) section of this catalog.
2. Satisfaction of the college requirements as outlined under General Academic Requirements, above.
3. Satisfaction of the departmental rules and course requirements as outlined in the individual program descriptions.

NOTE: In order to maintain quality, remain current, and satisfy changes in accreditation criteria, requirements which have been published may be changed. Any such changes will be announced and will not be retroactive. Always consult an academic advisor before registering for classes.

Master’s Accelerated Program
Students who have a GPA of 3.0 or more are eligible for the Master’s Accelerated Program (MAP) in engineering. The MAP allows a student to earn both a bachelor’s and master’s degree in as little as five years.

A master’s degree is increasingly becoming the professional degree of choice for engineering practice. Many employers encourage, or even require, their employees to seek the degree during their early career, and master’s holders often experience increased upward mobility and earn substantially greater salaries as a result.

General requirements:
• It takes 30 to 32 credit hours to complete a master’s degree.
• Up to 12 credits of your undergraduate coursework 450 and above may be counted toward the master’s.
• It’s possible to complete the master’s degree in 2-3 semesters beyond graduation with a bachelor’s degree.

Visit the Master’s Accelerated Program (MAP) (https://honors.nmsu.edu/for-students/masters-accelerated-program-map.html) page for more information.

Graduate Degrees
Graduate study is available in

• Advanced Manufacturing (p. 888),
• Aerospace Engineering (p. 1029),
• Chemical Engineering (p. 890),
• Civil Engineering (p. 903),
• Electrical Engineering (p. 920),
• Environmental Engineering (p. 903),
• Industrial Engineering (p. 1014),
• Information Technology (p. 1012), and
• Mechanical Engineering (p. 1029).

See individual program descriptions for graduate degree requirements.

Bachelor Degrees
Bachelor of Information and Communication Technology (p. 1001)

Bachelor of Information and Communication Technology (Online)

Majors in:

• Information and Communication Technology (Online (p. 1003))
  • Cyber Defense (p. 1004)
  • Network Technologies (p. 1006)
  • Software Development (http://catalogs.nmsu.edu/nmsu/engineering/information-and-communication-technology-software-development-bict-online/)

Bachelor of Science in Engineering

Majors in:

• Aerospace Engineering (p. 1036)
• Chemical Engineering (p. 895)
• Civil Engineering (p. 909)
• Electrical Engineering - Bachelor of Science in Electrical Engineering (p. 930)
  • Electrical Engineering (Communications & Signal Processing ) (p. 932)
  • Electrical Engineering (Computers & Microelectronics ) (p. 934)
  • Electrical Engineering (Control & Power ) ( p. 937)
  • Electrical Engineering (Electromagnetics & Photonics ) (p. 939)
  • Electrical Engineering (Space Systems ) (p. 941)
• Engineering Physics
  • Aerospace (p. 962)
  • Chemical (p. 964)
  • Electrical (p. 966)
  • Mechanical (p. 968)
• Engineering Technology - Civil Degrees
  • Engineering Technology - Civil - Bachelor of Science in Engineering Technology (p. 984)
  • Engineering Technology - Civil (Renewable Energy Technologies) - Bachelor of Science in Engineering Technology (p. 986)
  • Engineering Technology - Civil (Transportation Technology) - Bachelor of Science in Engineering Technology (p. 988)
• Engineering Technology - Electronics and Computer Degrees
  • Engineering Technology - Electronics and Computer - Bachelor of Science in Engineering Technology (p. 990)
• Engineering Technology - Information (p. 992)
• Engineering Technology - Mechanical Degrees
Majors in:

- Aerospace Engineering (p. 1040)
- Aerospace Engineering (Online) (p. 1040)
- Chemical Process Industry (p. 899)
- Chemical Process Industry (Online) (p. 900)
- Civil Engineering (p. 913)
- Civil Engineering (Online) (p. 914)
- Electrical Engineering (p. 944)
- Electrical Engineering (Online) (p. 945)
- Industrial Engineering (p. 1021)
- Industrial Engineering (Online) (p. 1022)
- Mechanical Engineering (p. 1041)
- Mechanical Engineering (Online) (p. 1042)

Advanced Manufacturing - Concentration

The graduate concentration in advanced manufacturing educates students and creates a skilled workforce for the growing needs of new technologies and advanced products in the 21st century. The program provides hands-on experience on designing, adapting, and building parts using advanced materials by including new processes, changing the supply chain, and adapting business models. It also includes the design optimization, materials selection and characterization, process parameter mapping, data analytics, software development, and final part inspection among other concepts. This concentration is maintained by the College of Engineering but is open to any Master’s level major/degree.

5 Electives (Select 500 Level Courses from EE, CHME, IE, CE, or MAE) ¹

Total Credits 30

¹ With Approval of the advisor and instructor

Selection of Advisor

Newly admitted graduate students will be assigned a temporary advisor for the first semester, but they must select a degree option and permanent advisor before registering for the second semester.

In considering a decision about option and advisor, the student should arrange to meet with several members of the graduate faculty during the first six weeks of study to discuss specific educational objectives. The student can use these meetings to become familiar with faculty interests and research projects currently in progress. The faculty member must agree (in writing) to serve as the student’s advisor.

Although there is no oral exam, students will be required to complete an exit-interview with one of Advanced Manufacturing concentration and one graduate faculty member from the master of engineering they select to study.

Doctoral Degree

Doctor of Philosophy

Majors in:

- Aerospace Engineering (p. 1043)
- Engineering
  - Chemical Engineering (p. 900)
  - Civil Engineering (p. 918)
  - Electrical Engineering (p. 949)
  - Industrial Engineering (p. 1026)
  - Mechanical Engineering (p. 1043)

Graduate Certificates

Digital Communications - Graduate Certificate (p. 950)
Digital Signal Processing - Graduate Certificate (p. 950)
Electric Energy Systems - Graduate Certificate (p. 950)
Systems Engineering - Graduate Certificate (p. 1027)
Systems Engineering - Graduate Certificate (Online) (p. 1027)
Telemetry - Graduate Certificate (p. 950)

Undergraduate Minors

- Aerospace Engineering (p. 1039)
- Agricultural Engineering (p. 911)
- Biomedical Engineering (p. 897)
- Brewery Engineering (p. 897)
- Computational Engineering (p. 898)
- Computer Engineering (p. 943)
- Digital Electronic Applications (p. 1010)
- Digital Forensics (p. 1010)
- Electrical Engineering (p. 943)
- Entrepreneurship (p. 1019)
- Environmental Engineering (p. 911)
- Geomatics (p. 1010)
- Information Security Technology (p. 1011)
- Lean Manufacturing and Analytics (p. 1019)
- Manufacturing (p. 1011)
- Materials Engineering (p. 898)
- Mechanical Engineering (p. 1040)
- Nuclear Chemical Engineering (p. 898)
- Pre-Law in Intellectual Property (p. 898)
- Pre-Medicine Studies (p. 899)
- Renewable Energy Technologies (p. 1011)
- Structural Engineering (p. 912)
- Supply Chain and Operations Research Analytics (p. 1020)
- Systems Engineering (p. 1020)

Graduate Minor

- Advanced Manufacturing (p. 1028)
- Materials Engineering (p. 901)

Accreditation

The following programs are accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org/.
- Aerospace Engineering,
- Chemical Engineering,
- Civil Engineering,
- Electrical Engineering,
- Engineering Physics,
- Industrial Engineering,
- Mechanical Engineering, and

The following programs are accredited by the Engineering Technology Accreditation Commission of ABET, https://www.abet.org/.
- Aerospace Engineering – Civil
- Engineering Technology – Electronics and Computer
- Engineering Technology – Information
- Engineering Technology – Mechanical

The following program is accredited by the Applied and Natural Science Accreditation Commission of ABET, https://www.abet.org/.
- Geomatics

The college is a member of the American Society for Engineering Education (ASEE).

Other programs under the College of Engineering, such as Information and Communications Technology, are accredited under the Higher Learning Commission (HLC) institutional accreditation.

New Mexico State University has been accredited by The Higher Learning Commission (HLC) since 1926. The HLC may be contacted at:

The Higher Learning Commission
230 North LaSalle St., Suite 7-500

Chemical & Materials Engineering

Mission

The New Mexico State University Chemical & Materials Engineering Department strives to prepare Chemical Engineering Bachelor of Science graduates to successfully and safely practice the chemical engineering profession, to engage in life-long personal and professional development, and to contribute to the betterment of their community and society.

Undergraduate Program Information

Chemical engineers solve problems by combining the fundamentals of physical sciences (chemistry and physics) and life sciences (biology, microbiology, biochemistry) with the principles of engineering analysis, mathematics, and economics. The curriculum of study leading to the BSCHE continuously builds on prerequisite knowledge. The capstone course requires completion of a series of seven prerequisite courses, each having its own prerequisites. In this manner, the BSCHE produces graduates with highly developed problem-solving capabilities, strong communication and interpersonal skills, and an ability to seek out and assimilate knowledge beyond the classroom. Graduates apply these competencies to solve problems across a wide range of industries in the private and public sectors.

The work of a chemical engineer typically leads to the development of processes that convert raw materials (chemicals) into more useful or valuable products. Chemical engineers are pioneers of modern materials and associated processes that are essential to the fields of:
- nanotechnology;
- fuel cells;
- computer chip manufacture;
- environmental restoration and pollution prevention;
- biomedical, biotechnology and bioengineering;
- pharmaceutical manufacturing;
- food production;
- transportation (automotive and aerospace);
• advanced materials;
• petrochemical and refining;
• chemical synthesis and production; and
• power & energy (including the nuclear industry).

Graduates are also well-prepared to continue the study of law, medicine or advanced engineering topics at the graduate level.

**Undergraduate Program Educational Objectives**

The Chemical & Materials Engineering Department at New Mexico State University strives to produce undergraduates who will:

1. apply their problem-solving and communication skills to chemical engineering industries, government research labs, academia, and related fields;
2. implement safety practices in their work;
3. be on the path to leadership; and
4. build new skills sets through continuing education and professional development.

These Program Educational Objectives (PEOs), which are modified based on input from our constituencies, are consistent with the missions of NMSU, the College of Engineering and the Department of Chemical & Materials Engineering.

**Graduate Program Information**

The Department of Chemical and Materials Engineering offers graduate study leading to the M.E., M.S. and Ph.D. degrees with an emphasis in chemical engineering. Admission to the program is in accord with the general regulations of the Graduate School. The Graduate Record Examination (GRE) General Test is required for all applicants. All graduate students are required to pass all graduate engineering courses with a minimum grade of B-.

All graduate students must select a thesis or dissertation advisor by the end of their first year in the chemical engineering graduate program. Thesis/dissertation may be pursued in absentia at various industrial sites by special arrangement.

Graduate teaching and research assistantships, fellowships and traineeships are available. For consideration for financial assistance, completed applicants must be received by March 1. All support is contingent upon availability, eligibility and satisfactory progress toward the degree.

Each student admitted to the CHME grad program who has an undergraduate degree in a discipline other than chemical engineering must schedule a meeting with the CHME Department Head to identify undergraduate course deficiencies that the student must take to obtain a graduate degree in chemical engineering.

**Graduate Program Educational Objectives**

Chemical & Materials Engineering graduate students must:

1. demonstrate skills in the (1) design of experiments or simulations, (2) collection of experimental/simulated data, (3) development of appropriate models, and (4) make appropriate use of those models;
2. complete an independent research project, resulting in at least a thesis/dissertation and peer-reviewed journal article(s);
3. defend original research in front of a panel of peers and experts;
4. be knowledgeable of the contemporary issues that are relevant to their chosen area of research.

**Degrees for the Department**

**Bachelor Degree(s)**

Chemical Engineering - Bachelor of Science in Chemical Engineering (p. 895)

**Master Degree(s)**

Chemical Process Industry - Master of Engineering in Chemical Process Industry (p. 899)

Chemical Engineering - Master of Science in Chemical Engineering (p. 899)

**Doctoral Degree(s)**

Engineering (Chemical Engineering) - Doctor of Philosophy (p. 900)

**Minors for the Department**

**Undergraduate**

Biomedical Engineering - Undergraduate Minor (p. 897)

Brewery Engineering - Undergraduate Minor (p. 897)

Computational Engineering - Undergraduate Minor (p. 898)

Materials Engineering - Undergraduate Minor (p. 898)

Nuclear Chemical Engineering - Undergraduate Minor (p. 898)

Pre-Law in Intellectual Property - Undergraduate Minor (p. 898)

Pre-Medicine Studies - Undergraduate Minor (p. 899)

**Graduate**

Materials Engineering - Graduate Minor (p. 901)

Interim Department Head: Jessica P. Houston

Associate Department Head: Martha C. Mitchell

**Professors** Garcia, Houston, Luo, Mitchell, Andersen, Brewer, Manz

**Associate Professors** Martinez-Monteagudo, Zhou

**Emeritus Professors** Bhada, Ghasssemi, Johnson, Patton, Rockstraw

**Research Interests:**

P.K. Andersen (Ph.D., University of California, Berkeley) physicochemical hydrodynamics, nuclear chemical engineering, modeling and simulation, education and training.

C.E. Brewer (Ph.D., Iowa State) biomass thermochemical processing, sustainable agriculture, biorenewable resources, brewery engineering.

A.A. Garcia (Ph.D., University of California, Berkeley) drug delivery, diagnostic devices, nanobiotechnology, bioprocessing.

J. P. Houston (Ph.D., Texas A&M) biomedical engineering, biophotonics, flow cytometry.

H. Luo (Ph.D., Tulane) nanostructured materials, thin films, photovoltaics, batteries, electrocatalysts, photocatalysts.

T.A. Manz (Ph.D., Purdue) quantum chemistry simulations of materials, catalysis, and space physics.

S. Martinez-Monteagudo (Ph.D., University of Alberta, Canada) food engineering, valorization of byproduct streams, synthesis of sweeteners, and green extraction methods.

M.C. Mitchell (Ph.D., Minnesota) computer modeling and simulation of molecular-level phenomena, thermodynamic characterization of aerospace fuels, statistical mechanics, engineering education, diversity and inclusion in STEM.

M. Zhou (Ph.D., New Mexico State) gas adsorption and separation, energy storage devices, capacitive deionization.

Registered Professional Engineer

Chemical Engineering Courses

CHME 101. Introduction to Chemical Engineering Calculations
2 Credits (2)
Introduction to the discipline of chemical engineering, including: an overview of the curriculum; career opportunities; units and conversions; process variables; basic data treatments; and computing techniques including computer programming and use of spreadsheets.

Prerequisite(s)/Corequisite(s): MATH 1250G.

CHME 102. Material Balances
2 Credits (2)
Perform material balances in single- and multi-phase, reacting and non-reacting systems under isothermal conditions.

Prerequisite: MATH 1250G, CHME 101.
Prerequisite/Corequisite: CHEM 1215G or CHEM 1216.

CHME 201. Energy Balances & Basic Thermodynamics
3 Credits (3)
Chemical Engineering energy balances; combined energy and material balances including those with chemical reaction, purge and recycle; thermochemistry; application to unit operations. Introduction to the first and second laws of thermodynamics and their applications. May be repeated up to 3 credits.

Prerequisite(s): CHME 102, CHEM 1216 or CHEM 1215G, and MATH 1521G or MATH 1521H.

CHME 305. Transport Operations I: Fluid Flow
3 Credits (3)
Theory of momentum transport. Unified treatment via equations of change. Solution to 1-D problems in viscous flow. Analysis of chemical engineering unit operations involving fluid flow. General design and operation of fluid flow equipment and piping networks. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 392. Prerequisite(s): CHME 201, PHYS 1310G, MATH 2530G. Restricted to: CH E, CHME, CMEG majors.

4 Credits (4)
Theory of heat and mass transport. Unified treatment via equations of change. Analogies between heat and mass transfer. Solution to 1-D problems in heat and mass transfer. Analysis of chemical engineering unit operations involving heat transfer. Design principles for mass transfer equipment. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): CHME 392. Prerequisite(s): CHME 305 and MATH 392. Restricted to: CH E, CHME, CMEG majors.

3 Credits (3)
Theory of mass transport. Mass transfer coefficients. Analysis of chemical engineering unit operations involving mass transfer and separations. Equilibrium stage concept. General design and operation of mass-transfer equipment and separation sequences. May be repeated up to 3 credits.

Prerequisite(s): CHME 303, CHME 306.

CHME 323 L. Transport Operations and Instrumentation Laboratory I
1 Credit (3P)
Laboratory experiments demonstrate the principles of process measurement and instrumentation through the determination of thermodynamic properties, transport phenomena properties, heat transfer, and material physical properties. Treatment of data includes regression techniques, analysis of error, and statistical analysis. May be repeated up to 1 credits.

Prerequisite(s): CHME 306. Prerequisite(s): I E 311. Restricted to: CH E, CHME, CMEG majors.

CHME 324 L. Transport Operations and Instrumentation Laboratory II
1 Credit (3P)
Continuation of CHME 323L. Restricted to: CHME majors.
Prerequisite(s): CHME 323L.

CHME 352 L. Simulation of Unit Operations
1 Credit (1P)
Definition, specification, and convergence of basic unit operations in a process simulator. Course will cover pipe networks, pressure changers, heat exchangers, distillation columns, and chemical reactors.

Prerequisite(s)/Corequisite(s): CHME 307, CHME 441. Restricted to: CHME majors.

CHME 361. Engineering Materials
3 Credits (3)

Prerequisite(s): CHEM 1215G or CHEM 1216 and MATH 1250G.
CHME 391. Industrial Employment
1-2 Credits
Employment in chemical, petroleum, food, biotechnology, materials, environmental, pharmaceutical, or other industry relevant to the discipline, with opportunity for professional experience and training in chemical engineering. Requires written report covering work period approved by employer. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: CHME, CH E majors.
Prerequisite(s): Consent of department head.

CHME 392. Numerical Methods in Engineering
3 Credits (3)
Study and application of numerical methods in solving problems commonly encountered in engineering. The numerical methods are motivated by engineering problems rather than by mathematics. However, sufficient mathematical theory will be provided so that students can appreciate the insight into the techniques and their shortcomings of different methods. MATLAB will be used as the working environment for implementing and performing the numerical methods in computers. This course is an engineering elective open to all engineering majors.
Prerequisite(s)/Corequisite(s): MATH 392.

CHME 395V. Brewing Science and Society
3 Credits (3)
An overview of the science of brewing and the interrelationships between society, technology, business, and the evolution of the current beer market. Topics covered are history of brewing and the interrelationships between societal attitudes, technology, and cultural preferences; beer styles and evaluation techniques; production and characteristics of ingredients used in brewing; brewing unit operations; biochemistry of malting, mashing, and fermentation; engineering in the brewery; homebrewing; and societal and health issues related to beer and alcohol. Students must be at least 21 years of age by the first day of instruction of the semester to enroll in this course.

CHME 412. Process Dynamics and Control
3 Credits (3)
Prerequisite(s): CHME 441.

CHME 423 L. Unit Operations Laboratory I
1 Credit (3P)
Experiments with chemical engineering unit operations including the use of computer data acquisition. Covers control system instrumentation and development of empirical models from process data. Includes written and oral reports. Restricted to: CHME majors.
Prerequisite(s): CHME 307, CHME 441, CHME 324L.

CHME 424 L. Process Control Laboratory
1 Credit (3P)
Experiments with chemical engineering process control including the use of computer data acquisition and closed-loop process control. Covers control system instrumentation. Includes written and oral reports. Restricted to: CHME majors.
Prerequisite(s): CHME 412, CHME 423L.

CHME 441. Chemical Kinetics and Reactor Engineering
3 Credits (3)
Analysis and interpretation of kinetic data and catalytic phenomena. Applied reaction kinetics; ideal reactor modeling; non-ideal flow models. Mass transfer accompanied by chemical reaction. Application of basic engineering principles to design, operation, and analysis of industrial reactors. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): CHME 307. Prerequisite(s): CHEM 313, CHME 303. Restricted to: CHME, CMEG, CH E majors.

CHME 448. Industrial Safety
3 Credits (3)
An introduction to the fundamentals of chemical process safety, including toxicology, industrial hygiene, source models, fires and explosions, relief systems, hazard identification, risk assessment, environmental fate and transport, hazardous waste generation, pollution prevention, and regulatory requirements.
Prerequisite(s): CHEM 1216 or CHEM 1215G.

CHME 449. Intellectual Property for Engineers and Scientists
3 Credits (3)
An overview of intellectual property with an emphasis on patents. Terminology, patentability requirements, invention disclosures, inventorship, scope of claims, patent application content and the patent prosecution process, and post-allowance matters including infringement and enforcement. Taught with CHME 549.
Prerequisite(s): CHEM 1120G, CHEM 1215G, or CHEM 1216; and senior standing in engineering or a fundamental science major; or consent of instructor.

CHME 452. Chemical Process Design & Economic Evaluation
3 Credits (3)
Concepts in chemical engineering process design, including: capital and manufacture cost estimation; discounted cash flows; interest; taxes; depreciation; profitability analysis; project specifications. Restricted to: CHME, CH E majors.
Prerequisite(s): CHME 307, CHME 441.

CHME 452 L. Chemical Process Simulation
1 Credit (1P)
Construction and convergence of chemical processes in a process simulator. Students will understand how to access variables, define and converge design specifications and converge tear/recycle streams.
Prerequisite(s)/Corequisite(s): CHME 452. Prerequisite(s): CHME 352L. Restricted to: CHME majors.

CHME 455. Chemical Plant Design
3 Credits (3)
Design and analysis of integrated process plants. Consideration given to optimizing performance, operability, reliability, safety, control, energy integration, and cost effectiveness. Requires written report covering solution of a capstone design problem. Restricted to: CHME majors.
Prerequisite(s): CHME 452.

CHME 455 L. Chemical Plant Simulation
1 Credit (1P)
Construction, convergence, and optimization of chemical processes in a process simulator. Dynamic process simulation and control.
Prerequisite(s)/Corequisite(s): CHME 455. Prerequisite(s): CHME 412, CHME 452L. Restricted to: CHME majors.
CHME 461. Calculation of Material and Molecular Properties
3 Credits (3)
The aim is to describe and apply techniques for computing common properties of materials and molecules: optimized geometries, transition states, vibrational spectra, energies (electronic, internal energy, enthalpy, and Gibbs free energy), heat capacities, net atomic charges, atomic spin moments, and effective bond orders. These techniques allow one to estimate the thermodynamic properties of a chemical, as well as to compute the mechanisms and energy barriers for chemical reactions and catalytic processes, and to quantify the electronic, magnetic, and chemical ordering in materials. The theory behind these techniques will be described and students will perform hands-on computer exercises using common computational chemistry programs. Taught with CHME 561.
Prerequisite(s): CHEM 1226, MATH 1521G or MATH 1521H, (PHYS 2140 or PHYS 1320G).

CHME 464. Polymer Science & Engineering
3 Credits (3)
This course covers concepts in science and engineering of macromolecules, such as synthesis and chemistry, characterization of molecular weight, morphology, rheology, and mechanical behavior, structure and property relationships, and polymer processing. Taught with CHME 564. May be repeated up to 3 credits.
Prerequisite(s): CHEM 314.

CHME 465. Rheology and Viscoelasticity
3 Credits (3)
Navier-Stokes equation; non-Newtonian fluids; flow fields; rheometry; viscoelastic models; non-linear viscoelasticity; material functions; complex fluids, including emulsions, suspensions and nanocomposites. Taught with CHME 565. Consent of Instructor required.
Prerequisite(s): CHME 306.

CHME 467. Nanoscience and Nanotechnology
3 Credits (3)
This is a lecture/laboratory course designed to present the basic concepts, the techniques and the tools to synthesize and characterize nanometer scale materials, and the latest achievements in current and future nanotechnology applications in engineering, materials, physics, chemistry, biology, electronics and energy. It is intended for a multidisciplinary audience with a variety of backgrounds. This course should be suitable for graduate students as well as advanced undergraduates. Topics covered will include: nanoscience and nanotechnology, nanofabrication, self-assembly, colloidal chemistry, sol-gel, carbon nanotubes, graphene, thin film, lithography, physical vapor deposition, chemical vapor deposition, quantum dots, lithium batteries, X-ray diffraction, scanning electron microscopy, transmission electron microscopy, nanoelectronics, nanophotonics and nanomagnetics, etc. Students must also have completed (EH&S Safety training to include the courses: (1) Employee & Hazard Communication Safety (HazCom); (2) Hazardous Waste Management; and (3) Laboratory Standard) trainings to enroll. Crosslisted with: PHYS 520. May be repeated up to 3 credits.
Prerequisite: (CHEM 1226 or CHEM 1215G), (PHYS 1230G or PHYS 1310G).

CHME 470. Introduction to Nuclear Energy
3 Credits (3)
Atomic and nuclear structure, nuclear stability and radioactivity, nuclear reactions, detection and measurement of radiation, interaction of radiation with matter, radiation doses and hazard assessment, principles of nuclear reactors, and applications of nuclear technology.
Prerequisite(s): CHEM 1215G, MATH 1521G or MATH 1521H.

CHME 471. Health Physics
3 Credits (3)
Introduction to radiation protection, radiation/radioactivity, radioactive decay/fission, interactions of radiation and matter, biological effects of radiation, radiation measurement and statistics, sampling for radiation protection, radiation dosimetry, environmental transport, radiation protection guidance, external and internal radiation protection, and hazards analysis.
Prerequisite(s): MATH 1521G or MATH 1521H, CHME 470.

CHME 476. Nuclear Fuel Cycles
3 Credits (3)
Physical and chemical processes in the conventional nuclear fuel cycle: uranium mining and milling, conversion, enrichment, fuel fabrication, reactor operations, interim storage, reprocessing and recycling, waste treatment and disposal. Alternative fuel cycles and future prospects. Consent of Instructor required.
Prerequisite(s): CHME 470.

CHME 478. Electrochemistry: Basics & Applications
3 Credits (3)
The course will integrate theoretical studies and engineering applications of the mechanisms responsible for electrochemical devices, while identifying technological restrictions to practical applications through a general overview of underlying electrochemistry concepts of various types of energy storage devices, with a few categories discussed in depth. For non-CHME majors, CHEM 1226 (or equivalent) and MATH 1521G. A prerequisite knowledge test will be given in the first class for those who do not have these courses.
Prerequisite: CHME 201 for CHME majors.
Learning Outcomes
1. Gain overview of electrochemical cells and processes Understand Potential and thermodynamics of cells

CHME 479. Corrosion and Degradation of Materials
3 Credits (3)
Failure of engineering materials in aggressive environments. Chemical and electrochemical mechanisms of corrosion. Influence of chemical composition and microstructure on corrosion behavior. Types of corrosion and chemical attack, including uniform corrosion, galvanic corrosion, pitting and other forms of localized corrosion, stress corrosion cracking, and corrosion fatigue. Methods of corrosion mitigation including cathodic protection, coatings, passivation, and corrosion inhibitors. Corrosion in nuclear reactors and nuclear waste repositories.
Prerequisite(s): CHME 361.

CHME 481. Biomedical Engineering and Engineering Healthcare
3 Credits (3)
Orientation to solving human and world health issues with biological engineering systems, tools, and analysis methods. Introduces general concepts including applied biology for engineers, biophotonics, biosensing, bioinstrumentation, tissue and biomaterials engineering, biomedical engineering research practices, and physical bioanalytical methods. Taught with CHME 581. Restricted to: CHME, CH E majors.
Prerequisite(s): CHEM 1226, CHME 201.
CHME 486. Biofuels
3 Credits (3)
Introduction to the fundamentals and applications of biofuels and bioenergy production; biomass resources and their composition, types of biofuels; conversion technologies (thermochemical and biochemical conversion processes); biodiesel production, algae to biofuels; economic and environmental assessments; term paper of selected topics relevant to biofuels. May be repeated up to 3 credits. Consent of Instructor required.
Prerequisite(s): CHME 201.

CHME 490. Senior Seminar
1 Credit (1)
Research seminar attended by graduate students is open to CHME undergraduates who are research active. May be repeated up to 2 credits. Students must be in Senior Standing to enroll in this course.
Prerequisite(s)/Corequisite(s): CHME 498. Restricted to: CHME, CH E majors.

CHME 491. Special Topics
3 Credits (3)
Lecture and/or laboratory instruction on special topics in chemical engineering. May be repeated up to 6 credits. Consent of Instructor required.
Prerequisite(s): Consent of instructor.

CHME 495. Brewing Science & Engineering
3 Credits (3)
Details of beer production, fermentation science, brewery operation, and process design & economics. Engineering considerations including process safety, fermentation kinetics, unit operations, and economics of scale. Beer styles, recipe formulation, product quantification for tax purposes, and brew analytical methods will also be discussed. Crosslisted with: FSTE 430. Restricted to: CH E, CHME, CMEG majors.
Prerequisite(s): CHME 395V, CHME 441, CHME 452.

CHME 495 L. Brewing Science & Technology Lab
1 Credit (3P)
Brewing and brewing operations in a one-barrel brewery. Topics addressed will include brewery safety, characteristics and handling of brewing ingredients, recipe formulation, water treatment, wort preparation, fermentation, waste disposal, and packaging.
Corequisite(s): CHME 495.

CHME 498. Undergraduate Research
1-3 Credits (1-3P)
Provides an opportunity for undergraduate students to work in research or areas of special interest such as design problems and economic studies under the direction of a faculty member. Written report covering work required. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: CHME, CH E majors.
Prerequisite(s): Consent of instructor and department head.

CHME 501. Graduate Thermodynamics for Chemical Engineers
3 Credits (3)
Advanced applications of the first and second law to chemical process systems. The calculus of thermodynamics, equilibrium and stability criteria. Properties relationships for real fluids, both pure materials and mixtures. An introduction to molecular thermodynamics and statistical mechanics. Restricted to: CHME, CH E majors.

CHME 506. Graduate Transport Phenomena(s)
3 Credits (3)

CHME 516. Graduate Numerical Methods in Chemical Engineering
3 Credits (3)
Survey of numerical methods for solving problems commonly encountered in heat and mass transfer, fluid mechanics, and chemical reaction engineering.

CHME 542. Graduate Reactor Analysis and Design (s)
3 Credits (3)
Application and analysis of equations of continuity to multicomponent reaction systems. Introduction to homogeneous and heterogeneous catalysis, single-phase combustion, and shock reaction systems.

CHME 548. Industrial Safety
3 Credits (3)
Same as CHME 448 with graduate-level projects.
Prerequisite(s): CHEM 1216 or CHEM 1215G.

CHME 564. Polymer Science & Engineering
3 Credits (3)
Synthesis, structure, property relationships of synthetic polymers. Taught with CHME 464. May be repeated up to 3 credits.
Prerequisite(s): CHME 201, CHEM 314.

CHME 565. Rheology and Viscoelasticity
3 Credits (3)
This course is an introduction to rheology and viscoelasticity. In particular, the flow behavior of Non-Newtonian Fluids and Viscoelastic Fluids will be covered. Rheometry, the technique for characterization of fluids, will be discussed. Most of the course is quantitative and uses mathematical modeling. Taught with CHME 465.
Prerequisite(s): CHME 306.

CHME 567. Nanoscience and Nanotechnology
3 Credits (3)
This is a lecture/laboratory course designed to present the basic concepts, the techniques and the tools to synthesize and characterize nanometer scale materials, and the latest achievements in current and future nanotechnology applications in engineering, materials, physics, chemistry, biology, electronics and energy. It is intended for a multidisciplinary audience with a variety of backgrounds. This course should be suitable for graduate students as well as advanced undergraduates. Topics covered will include: nanoscience and nanotechnology, nanofabrication, self-assembly, colloidal chemistry, sol-gel, carbon nanotubes, graphene, thin film, lithography, physical vapor deposition, chemical vapor deposition, quantum dots, lithium batteries, X-ray diffraction, scanning electron microscopy, transmission electron microscopy, nanoelectronics, nanophotonics and nanomagnetics, etc. Taught with CHME 467.
Prerequisite(s): (CHEM 1225G or CHEM 1226) and (PHYS 1230G or PHYS 1310G).
CHME 578. Electrochemistry: Basics & Applications
3 Credits (3)
The course will integrate theoretical studies and engineering applications of the mechanisms responsible for electrochemical devices, while identifying technological restrictions to practical applications through a general overview of underlying electrochemistry concepts of various types of energy storage devices, with a few categories discussed in depth. Graduate project required. Student must be graduate students in chemical engineering or instructor approval.

Learning Outcomes
1. gain overview of electrochemical cells and processes understand Potential and thermodynamics of cells

CHME 586. Biofuels
3 Credits (3)
Introduction to the fundamentals and applications of biofuels and bioenergy production; biomass resources and their composition; types of biofuels; conversion technologies (thermochemical and biochemical conversion processes); biodiesel production, algae to biofuels; economic and environmental assessments; term paper of selected topics relevant to biofuels. May be repeated up to 3 credits. Restricted to: CHME, CHE majors.

Prerequisite(s): CHME 201.

CHME 590. Graduate Seminar
1 Credit (1)
Presentations on topics of professional interest in chemical engineering. Includes seminars by faculty, graduate students, and invited speakers from academia, government, and industry. May be repeated up to 6 credits. Restricted to: CHME majors.

CHME 594. Professional Communication in Chemical Engineering
2 Credits (2)
Connections between interpersonal relationships and the effective communication of information. Strategies for formal and informal written and verbal communication in the context of presentations, interviews, reports and publications. Factors affecting non-verbal communication. Special focus will be given to understanding and adapting to the audience's perspective. 2 credits. Open to chemical engineering graduate students or by permission of instructor. This class will prepare you to communicate technical information effectively within a variety of contexts and to a variety of audiences. Class assignments will be partially based on current student needs such as preparing presentations for professional conferences, giving research progress reports, and writing research manuscripts. Restricted to: CHME majors.

Prerequisite(s): CHME graduate student standing.

CHME 595. Chemical Process Design and Business Analysis
3 Credits (3)
Graduate chemical process design principles, emphasizing literature review, patent search, heuristics application, process simulation assistance to process creation, synthesis of reactor and separator trains, second-law analysis, heat and power integration, process equipment mechanical design specifications, process design optimization, cost accounting and capital estimation, annual costs, earnings, and profitability analysis.

Prerequisite(s)/Corequisite(s): CHME 506, CHME 516, CHME 542.

Prerequisite(s): CHME 452, CHME 455 L or equivalent.

CHME 596. Chemical Process Industries Research
1 Credit (1)
Independent graduate-level chemical process design project development, literature search, and proposal/defense.

Prerequisite(s): CHME 595.

CHME 598. Ph.D. Research- Level I
1-9 Credits (1-9)
Individual investigations either analytical or experimental. May be repeated up to 6 credits.

CHME 599. Master's Thesis
1-15 Credits (1-15)
Thesis.

CHME 690. Graduate Seminar
1 Credit (1)
Presentations on topics of professional interest in chemical engineering. Includes seminars by faculty, graduate students, and invited speakers from academia, government, and industry. Required each semester for every Ph.D. student. All candidates for graduate degrees required to give seminar. May be repeated up to 8 credits. Restricted to: CHME majors.

CHME 698. Ph.D. Research- Level II
1-9 Credits (1-9P)
Advanced topics for current research. Course subtitled in the Schedule of Classes. May be repeated up to 99 credits. Consent of Instructor required.

Prerequisite(s): successful completion of Ph D qualifying exam.

CHME 700. Doctoral Dissertation
1-9 Credits (1-9)
Individual research in selected topics of current interest in chemical engineering. Up to 6 of the 18 credits of CHME 700 that are required for the Ph D may be completed before successful completion of comprehensive exam. Thesis/Dissertation Grading.

Learning Outcomes
1. Demonstrate skills in the (1) design of experiments or simulations, (2) collection of experimental/simulated data, (3) development of appropriate models, and (4) make appropriate use of those models; Complete an independent research project, resulting in at least a thesis/dissertation and peer-reviewed journal article(s); Defend original research in front of a panel of peers and experts; Be knowledgeable of the contemporary issues that are relevant to their chosen area of research.

Office Location: Jett Hall 268 (https://map.nmsu.edu/?ct/)

Chemical Engineering - Bachelor of Science in Chemical Engineering

The BS Chemical Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Requirements (Total Credits 124)

In addition to satisfying the requirements of New Mexico State University and the College of Engineering, CHME majors must pass departmental courses with a grade of C- or better.

CHME majors must have completed CHME 201 Energy Balances & Basic Thermodynamics prior to taking any 400-level CHME elective courses.

Degree requirements can also be found summarized in flow diagrams found on the CHME website (https://chme.nmsu.edu/academics/undergrad/chme-flow-diagrams/).

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World
requirements, and elective credits to total at least 124 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

### Electives: (not required)
- **Second Language:** (not required) 0

### Total Credits
- **127**

1. See the General Education (p. 88) section of the catalog for a full list of courses.
2. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I first.
3. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.
4. Also see the 9-credit hour rule at the bottom of the page. CHMEs meet the 9-credit hour rule through the sequence CHEM 313/314/433, and thus only need to complete 3 credits of VWW.

See chme.nmsu.edu/academics/syllabi/#CHME_Elective_Courses

### A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

#### First Year

**Fall**
- **CHME 101** Introduction to Chemical Engineering Calculations 2
- **CHEM 1215G** General Chemistry I Lecture and Laboratory for STEM Majors 4
- **MATH 1511G** Calculus and Analytic Geometry I 4
- **ENGL 1110G** Composition I 4
- **Area VI: Creative and Fine Arts Course** 2 3

**Credits**
- **17**

**Spring**
- **CHME 102** Material Balances 2
- **CHEM 1225G** General Chemistry II Lecture and Laboratory for STEM Majors 4
MATH 1521G Calculus and Analytic Geometry II 4
PHYS 1310G and Calculus-Based Physics I Lab 4
COMM 1115G Introduction to Communication 3

**Credits** 17

**Second Year**

**Fall**

CHME 201 Energy Balances & Basic Thermodynamics 3
CHEM 313 Organic Chemistry I 3
MATH 2530G Calculus III 3
PHYS 1320G and Calculus-Based Physics II Lab 4
ENGL 2210G Professional & Technical Communication 3

**Credits** 16

**Spring**

CHME 303 Chemical Engineering Thermodynamics 4
CHME 305 Transport Operations I: Fluid Flow 3

CHEM 314 Organic Chemistry II 3
CHEM 315 Organic Chemistry Laboratory 2
MATH 392 Introduction to Ordinary Differential Equations 3

**Credits** 17

**Third Year**

**Fall**

CHME 306 Transport Operations II: Heat and Mass Transfer 4
CHME 323 L Transport Operations and Instrumentation Laboratory 1
CHME 361 Engineering Materials 3
CHME 392 Numerical Methods in Engineering 3
CHEM 433 Physical Chemistry I 3
CHME 467 Nanoscience and Nanotechnology 3

**Credits** 18

**Spring**

CHME 307 Transport Operations III: Staged Operations 3
CHME 324 L Transport Operations and Instrumentation Laboratory II 1
CHME 352 L Simulation of Unit Operations 1
CHME 441 Chemical Kinetics and Reactor Engineering 3
Area IV: Social/Behavioral Sciences Course 3
Viewing A Wider World Course 3

**Credits** 14

**Fourth Year**

**Fall**

CHME 412 Process Dynamics and Control 3
CHME 423 L Unit Operations Laboratory 1
CHME 448 Industrial Safety 3
CHME 452 Chemical Process Design & Economic Evaluation 3
CHME 452 L Chemical Process Simulation 1
CHME Elective 3

**Credits** 14

**Spring**

CHME 424 L Process Control Laboratory 1
CHME 455 Chemical Plant Design 3
CHME 455 L Chemical Plant Simulation 1
CHME Elective 3

**Credits** 14

I E 365 Quality Control 3
Area V: Humanities Course 3

**Credits** 14

**Total Credits** 127

1. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I first.
2. See the General Education (p. 88) section of the catalog for a full list of courses.
3. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses
4. Also see the 9-credit hour rule at the bottom of the page. CHMEs meet the 9-credit hour rule through the sequence CHEM 313/314/433, and thus only need to complete 3 credits of VWW.

**Biomedical Engineering - Undergraduate Minor**

The Biomedical Engineering minor-of-study is a 20-credit hour program of study designed to accomplish two objectives:

1. Require courses in basic biology, anatomy, physiology to provide students a basic understanding of life and the design and mechanics/dynamics of the human body. Also required is the only biomedical engineering course taught on the NMSU campus.
2. Permits students to select from a wide range of elective courses numbered above 400 that emphasize engineering topics with application to the design and development of medical devices.

**Total Credits** 20

**Brewery Engineering- Undergraduate Minor**

It has long been recognized that the study of chemical engineering is appropriate to the understanding of a vast range of concepts associated with the brewing industry. In 1935, an article by M. B. Donald described
many of the fundamental process steps for which the BS degree in Chemical Engineering prepares a student to begin work in the industry. The following 18 credit hour minor of study is designed to prepare CHME students for careers in the brewing industry or as a craft brew entrepreneur as per the 4-year curriculum suggestions by the Master Brewer’s Association of the Americas. Elective courses are to be selected from the lists and guidelines maintained on the Brewery Engineering minor of study webpage (https://chme.nmsu.edu/academics/minors/ brewery-engineering/).

### Computational Engineering- Undergraduate Minor

The minor in Computational Engineering is designed to provide students with a concentration in the broad spectrum of computations in engineering, including experience with an object-oriented programming language, a background in computational math techniques, and a number of courses that develop or apply engineering software across a broad base of engineering design problems.

Electives must be taken from the list maintained on the Computational Engineering minor webpage (https://chme.nmsu.edu/academics/minors/computational-engineering/).

### Nuclear Chemical Engineering - Undergraduate Minor

The Nuclear Chemical Engineering minor at New Mexico State University is part of a nuclear education program that addresses the growing demand for engineers and scientists with background in the nuclear industry. A student must pass 18 credits of elective courses with a grade C- or better. The courses are upper division courses. Three elective courses must be selected from the list maintained on the CHME website (http://chme.nmsu.edu/academics/minors/nuclear-chemeng/). No courses may be taken S/U. All prerequisites for the classes must be met or consent of the instructor obtained before enrolling in class.

### Pre-Law in Intellectual Property - Undergraduate Minor

The Pre-Law Intellectual Property minor at New Mexico State University is part of a pre-law education program that addresses the growing demand for lawyers with a strong understanding of a broad cross-section of STEM subjects. A student must pass 19 credits of courses with a grade C- or better chosen from Pre-Law Intellectual Property minor page available on the Chemical and Materials Engineering website. No courses may be taken S/U. All prerequisites for the classes must be met or consent of the instructor obtained before enrolling in class.

Pre-Medicine Studies - Undergraduate Minor

The Pre-Medical School minor at New Mexico State University is part of a pre-medication education program that addresses the growing demand for doctors, surgeons, and biomedical researchers with a strong understanding of a broad cross-section of STEM subjects and who model the human body as a series of interacting chemical process units. This minor of study is designed for students seeking a strong pre-med background (for both MCAT prep and program entry prereq completion) or who may be targeting a graduate degree in biomedical engineering.

A student must pass 22 credits of courses with a grade C- or better. The minor includes 19 credit hours of required courses, and 3 credit hours of elective courses. No courses may be taken S/U. All prerequisites for the classes must be met or consent of the instructor obtained before enrolling in class.

Chemical Engineering - Master of Science in Chemical Engineering

The program of study leading to the MS consists of 32 credits which includes:

- required CHME core graduate courses (14 credits);
- CHME elective courses numbered 455-589 (3 credits);
- other graduate elective courses (9 credits); and
- thesis as CHME 599 Master’s Thesis (6 credits).

Chemical Process Industry - Master of Engineering in Chemical Process Industry

The MECPI is a 30 credit hour coursework and/or project-based degree with flexibility of program design for professionals in the Chemical Process Industry. Proposals for the MECPI may be submitted at https://chme.nmsu.edu/academics/grad/mecpi-degree-plan-proposal/. MECPI requirements are as follows:

CHME coursework (15 cr hr)

- minimum of 12 credit hours of coursework with CHME prefixes above the 500-level (not including CHME 595, 596, 597, or any research credits associated with the MS and Ph D), of which at least six hours must come from the core sequence of CHME 501, 506, 516, 542 (or equivalent content approved in advance by the MECPI committee).
- 3-credit hour course in industrial safety is required. CHME 548 is recommended, though other course options with similar content can be proposed.

Professional Communications (3 cr hr)

Students must complete a minimum of 3 credit hours in professional communications. CHME 594 (2) and CHME 690 (1) are recommended.
to fulfill this requirement, but students may propose 500+ level communications courses beyond CHME to fulfill this requirement.

Open Electives (6 cr hr)
Students are expected to take a minimum of 6 credits of electives from any areas such as business, economics, fundamental sciences, environmental sciences, etc., to be consistent with their personal MECPI theme or emphasis.

Optional Engineering Project Sequence (6 cr hr)
Students will define and execute an engineering project through their employer while taking the following 3-semester course sequence (after completion of a minimum of 12 credit hours of CHME coursework toward the MECPI):

- CHME 595. Chemical Process Design and Business Analysis (3 credit hours) – Develop and present a proposal to demonstrate grasp of graduate-level chemical industry process design and assessment principles, emphasizing appropriate foundational tools (literature review, patent search, heuristics application, process simulation assistance to process creation, synthesis of reactor and separator trains, second-law analysis, heat and power integration, process equipment mechanical design specifications, process design optimization, etc., as appropriate to the proposed project), with a requirement that the project include some form of economic and business assessment of the work.
- CHME 596. Chemical Process Industries Research (1 credit hour) - Independent project development based on proposal approved in CHME 595.
- CHME 597. Advanced Chemical Process Industry Analysis (2 credit hours) - In-depth analysis and defense of a timely commercially-relevant chemical process design, culminating in defense of the work before the MECPI committee.
- MECPI students may replace the project with an additional 6 credit hours of CHME coursework.

Students accepted into the MECPI program may use the online MECPI degree plan proposal form (https://chme.nmsu.edu/academics/grad/mecpi-degree-plan-proposal/) to request a tailored curriculum personalized to their individual needs based on their current or planned employment in the chemical process industries.

Chemical Process Industry - Master of Engineering in Chemical Process Industry (Online)
The MECPI is a 30 credit hour coursework and/or project-based degree with flexibility of program design for professionals in the Chemical Process Industry. Proposals for the MECPI may be submitted at https://chme.nmsu.edu/academics/grad/mecpi-degree-plan-proposal/. MECPI requirements are as follows:

CHME coursework (15 cr hr)
- minimum of 12 credit hours of coursework with CHME prefixes above the 500-level (not including CHME 595, 596, 597, or any research credits associated with the MS and Ph D), of which at least six hours must come from the core sequence of CHME 501, 506, 516, 542 (or equivalent content approved in advance by the MECPI committee).
- 3-credit hour course in industrial safety is required. CHME 548 is recommended, though other course options with similar content can be proposed.

Professional Communications (3 cr hr)
Students must complete a minimum of 3 credit hours in professional communications. CHME 594 (2) and CHME 690 (1) are recommended to fulfill this requirement, but students may propose 500+ level communications courses beyond CHME to fulfill this requirement.

Open Electives (6 cr hr)
Students are expected to take a minimum of 6 credits of electives from any areas such as business, economics, fundamental sciences, environmental sciences, etc., to be consistent with their personal MECPI theme or emphasis.

Optional Engineering Project Sequence (6 cr hr)
Students will define and execute an engineering project through their employer while taking the following 3-semester course sequence (after completion of a minimum of 12 credit hours of CHME coursework toward the MECPI):

- CHME 595. Chemical Process Design and Business Analysis (3 credit hours) – Develop and present a proposal to demonstrate grasp of graduate-level chemical industry process design and assessment principles, emphasizing appropriate foundational tools (literature review, patent search, heuristics application, process simulation assistance to process creation, synthesis of reactor and separator trains, second-law analysis, heat and power integration, process equipment mechanical design specifications, process design optimization, etc., as appropriate to the proposed project), with a requirement that the project include some form of economic and business assessment of the work.
- CHME 596. Chemical Process Industries Research (1 credit hour) - Independent project development based on proposal approved in CHME 595.
- CHME 597. Advanced Chemical Process Industry Analysis (2 credit hours) - In-depth analysis and defense of a timely commercially-relevant chemical process design, culminating in defense of the work before the MECPI committee.
- MECPI students may replace the project with an additional 6 credit hours of CHME coursework.

Students accepted into the MECPI program may use the online MECPI degree plan proposal form (https://chme.nmsu.edu/academics/grad/mecpi-degree-plan-proposal/) to request a tailored curriculum personalized to their individual needs based on their current or planned employment in the chemical process industries.

Engineering (Chemical Engineering) - Doctor of Philosophy
The program of study leading to the Ph.D. is available to students who have either a BS or MS in chemical engineering. Students with a BS must complete 30 course credits and 24 dissertation credits, for a total of 54 credits, including:

- required core CHME courses (14 credits);
- graduate elective courses (12 credits);
- CHME elective courses (3 credits);
• independent research as CHME 698 Ph.D. Research- Level II prior to completion of the comprehensive exam (6 credits);
• dissertation as CHME 700 after completion of the comprehensive exam (18 credits); and
• graduate seminar as CHME 690 Graduate Seminar (1 credit).

Ph.D. students must pass:

1. a qualifying examination within 24 months of starting their Ph.D. studies;
2. a comprehensive examination completed a minimum of nine months prior to the dissertation defense; and
3. an oral defense of the written dissertation before the dissertation committee.

4. PhD candidates in the College of Engineering, who have successfully completed their PhD Qualifier Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:
   - Paper #1: An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student's doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.
   - Paper #2: An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for the Web of Science. Alternatively, one conference paper accepted or published in a national or international conference proceedings.

### Materials Engineering - Graduate Minor

The Materials Engineering minor at New Mexico State University is part of a materials education program that addresses the growing demand for engineers and scientists with understanding of the wide range of materials, their properties and means of characterization. A student must pass 18 credits of courses with a grade C or better. The minor includes one required course (CHME 361 Engineering Materials), and the balance elective courses chosen from menus available on the Chemical and Materials Engineering website (http://chme.nmsu.edu/academics/minors/materials-engineering/) (https://chme.nmsu.edu/academics/minors/materials-engineering/). No courses may be taken S/U. All prerequisites for the classes must be met or consent of the instructor obtained before enrolling in class.

Civil Engineering

Undergraduate Program Information

Mission Statement
The mission of the Civil Engineering Department for the undergraduate program is to offer a high-quality accredited Bachelor of Science (B.S.) degree that prepares our graduates for professional licensure leading to successful civil engineering careers in the industry and government, and for success in graduate education. Toward this end, the Civil Engineering Department will recruit and retain qualified and diverse faculty that are committed to student learning and development, and serve as role models to the undergraduate students.

Continued excellence in our undergraduate program is paramount to our mission by providing a strong technical foundation to our graduates for engineering design and problem solving; preparing quality graduates for licensure and professional careers in civil engineering; implementing modern and effective learning methods; maintaining close student-faculty learning interactions; and instilling life-long learning skills and goals for professional growth after graduation.

Program Educational Objectives
Through NMSU's high-quality accredited civil engineering program, graduates will:

1. Be successfully employed in civil engineering or related careers and will become independent thinkers, ethical leaders, effective communicators, and collaborative professionals.
2. Be prepared to pursue professional licensure, appropriate certifications, graduate degrees, and/or professional development activities by fostering life-long learning skills and strategies.
3. Be competitive with graduates from programs across the world through their experience interacting with recognized faculty and industry professionals, and excelling in intercollegiate activities.
4. Build on fundamental knowledge and apply technical skills across disciplines in civil engineering and related fields to make data-driven decisions using engineering judgement.

Program Criteria
The Civil Engineering curriculum is developed based on the program criteria established collaboratively by the Engineering Accreditation Commission (EAC) of ABET Inc. and the American Society of Civil Engineers (ASCE). The curriculum specifically prepares civil engineering students at the baccalaureate level to graduate with the ability to:

1. Apply knowledge of mathematics through differential equations, calculus-based physics, general chemistry, and probability and statistics to assess uncertainty.
2. Analyze and solve problems in various areas of civil engineering.
3. Conduct experiments associated with civil engineering, as well as analyze and interpret the collected data.
4. Design a system, component, or process in various civil engineering contexts considering sustainability.
5. Explain basic concepts related to project management, business, public policy, and leadership.
6. Analyze issues related to professional ethics and explain the importance of professional licensure.

In accordance with the program criteria of ABET and ASCE, the Civil Engineering faculty responsible for teaching design-oriented courses are qualified in their respective professional areas by means of licensure, or a combination of education and design experience. Furthermore, the faculty are given responsibility and sufficient authority to define, revise, implement, and achieve program objectives.

Graduate Program Information

Mission Statement
The mission of the Civil Engineering Department regarding graduate education is to provide research-based and practice-oriented post-baccalaureate programs leading to Master of Science (M.S.), Master of Engineering (M.E.), and PhD degrees for students in the areas of environmental, geotechnical, structural, transportation, and water resources engineering. Toward this end, the Civil Engineering Department will recruit and retain qualified and diverse faculty that are committed to student learning and development, scholastic and research excellence, and professional service.

Continued excellence in our graduate program is paramount to our mission by providing advanced academic and technical foundations to our graduates; providing interdisciplinary and collaborative research opportunities and teaching experiences; implementing learning methods that promote critical-thinking and problem-solving; seeking external funding to support innovative research and graduate assistantships; and fostering an intellectual and creative environment that values diversity (of people, research and interests) and research ethics.

The Civil Engineering Department offers excellent opportunities for advanced study and professional training in several fields leading to the M.E. in Civil Engineering, M.S. in Civil Engineering, M.S. in Environmental Engineering, and Ph.D. degrees. Students work closely with the faculty on contemporary issues including, but not limited to, applications of machine / deep learning, biogeotechnologies, evapotranspiration monitoring of crops and riparian vegetation, ground stabilization, groundwater recharge, high performance materials, non-destructive testing and evaluation, remote sensing, renewable energy, resilient infrastructure, reservoir evaporation monitoring, riparian rehabilitation, structural health monitoring, sustainable construction, and water treatment and reuse.

The department has excellent facilities for teaching and research purposes including laboratories for mechanical, chemical and biological research. In addition, the department conducts research at various field sites located throughout New Mexico in collaboration with local, state, and federal agencies. Noteworthy features of the graduate programs are the energetic, highly motivated faculty and the low student-faculty ratio. The department regularly has several ongoing research projects of various size and scope employing graduate and undergraduate students. Teaching and research assistantships are available to qualified students and office space is normally provided to M.S. thesis and PhD students.

Students enrolling for graduate studies in civil engineering must have received a bachelor’s degree in engineering or one of the allied fields. A candidate for the M.S. in Civil Engineering or M.S. in Environmental

Engineering degree may choose either a thesis or a non-thesis track. The M.E. in Civil Engineering degree requires only coursework. When a student enrolls for the Ph.D. program, a doctoral committee is formed to assist the student in planning a program appropriate to the student's background and goals and to administer the required examinations. All Ph.D. candidates in civil engineering must have a demonstrated proficiency in English and two research tools. Mutual understanding between the Ph.D. candidate and his or her doctoral committee on the final nature of these two research tools will be on an individual basis.

Master's Accelerated Program
The Master's Accelerated Program (MAP) option provides students the opportunity to complete a B.S. in Civil Engineering and a master's degree (M.E. in Civil Engineering, M.S. in Civil Engineering or M.S. in Environmental Engineering) with 144 to 150 credit hours; the non-accelerated path requires 156 credit hours (B.S. requires 126 credit hours plus the M.E. or M.S. which require 30 credit hours each). Students accepted into this program will follow the normal path of the Civil Engineering undergraduate curriculum, of which up to 12 credit hours comprised of senior-level (> 450) and/or graduate-level (> 500) courses will be counted towards the master's degree; the MAP courses must be approved by the department head and completed with a grade of B or better. When students receive their bachelor's degree in Civil Engineering, there are 18 to 24 credit hours left for the master's degree which can be completed in 2 to 3 semesters for full-time students. Students must apply for admission during the final semester of their junior year and obtain prior approval by the department head to pursue the MAP option.

Degrees for the Department
Bachelor Degree(s)
Bachelor of Science in Civil Engineering (BSCE) (p. 909)

Master Degree(s)
Master of Engineering in Civil Engineering (MECE) (p. 913)
Master of Science in Civil Engineering (MSCE) (p. 915)
Master of Science in Environmental Engineering (MSENVE) (p. 917)

Doctoral Degree(s)
Engineering (Civil Engineering) - Doctor of Philosophy (p. 918)

Minors for the Department
Agricultural Engineering - Undergraduate Minor (p. 911)
Environmental Engineering - Undergraduate Minor (p. 911)
Geotechnical Engineering - Undergraduate Minor (p. 912)
Structural Engineering - Undergraduate Minor (p. 912)
Water Resource Engineering - Undergraduate Minor (p. 913)

Department Faculty Members
Professors Bandini¹ (Assoc. Department Head), Jáuregui¹ (Department Head), Khandan¹, Newtson¹, Papelis (Director of Carlsbad Environmental Monitoring & Research Center), Reddi¹ (Dean of College of Engineering), Samani¹, White¹ (Emeritus), Xu

Associate Professors Bawazir, Cortes, Wang

Assistant Professors Choe¹, Dehghan-Niri, Zhang²

¹Professional Engineer (PE) in United States
²Professional Engineer (PEng) in Canada

Civil Engineering Courses
C E 109. Computer Drafting Fundamentals
3 Credits (2+2P)
Same as DRFT 109, E T 109, SUR 109.

C E 151. Introduction to Civil Engineering
3 Credits (3)
Problem solving and use of computer software for civil engineering applications. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): MATH 1220G.

C E 198. Special Topics
1-3 Credits
May be repeated for a maximum of 6 credits.
Prerequisite: consent of department head.

C E 233. Mechanics-Statics
3 Credits (3)
Engineering mechanics using vector methods. May be repeated up to 3 credits.
Prerequisite(s): MATH 1521G or MATH 1521H, PHYS 1310G and cumulative GPA of 2.0.

C E 234. Mechanics-Dynamics
3 Credits (3)
Kinematics and dynamic behavior of solid bodies utilizing vector methods. May be repeated up to 3 credits. Crosslisted with: M E 234.
Prerequisite(s): C E 233, MATH 1521G or MATH 1521H, PHYS 1310G.

C E 256. Environmental Engineering and Science
3 Credits (3)
Principles in environmental engineering and science: physical chemical systems and biological processes as applied to pollution control. Crosslisted with: ENVS 2111
Prerequisite: CHEM 1215G and MATH 1511G or ENGR 190.

Learning Outcomes
1. To understand the nature of water quality parameters in the context of Civil Engineering and Environmental Science (Water Treatment/ Wastewater Treatment/Environmental Science) To learn to apply engineering and scientific solutions to water quality problems To understand environmental regulations and their consequences on the design of pollution control systems
C E 256 L. Environmental Science Laboratory
1 Credit (1P)
Laboratory experiments associated with the material presented in C E 256. Same as ENVS 2111L.
Corequisite(s): C E 256.

C E 298. Special Topics
1-3 Credits
May be repeated for a maximum of 6 credits.
Prerequisite: consent of department head.

C E 301. Mechanics of Materials
3 Credits (3)
Stress, strain, and elasticity of materials. May be repeated up to 3 credits.
Prerequisite(s): C E 233 or M E 236.

C E 311. Civil Engineering Materials
3 Credits (2+3P)
Introduction to the structure, physical properties, testing and mechanical behavior of civil engineering materials and components made from these materials.
Prerequisite: C E 301.

C E 315. Structural Analysis
4 Credits (3+3P)
Classical analysis of determinate and indeterminate structures; introduction to modern methods of structural analysis using computer programs.
Prerequisite(s): C E 301.

C E 331. Fluid Mechanics and Hydraulics
3 Credits (3)
Prerequisite(s): PHYS 1310G, C E 233.

C E 331 L. Fluid Mechanics and Hydraulics Laboratory
1 Credit (1P)
Fundamentals and Theory of Fluid Mechanics, compressible and incompressible flow of fluids in open and closed conduits.
Prerequisite(s)/Corequisite(s): C E 331. Restricted to: C E majors.

C E 355V. Technology and the Global Environment
3 Credits (3)
A scientific basis for understanding changes in the global environment that result through the complex interactions of natural phenomena and the impacts of the activities of man.
Prerequisites: junior or senior standing, and the general education requirements for math and natural sciences.

C E 356. Fundamentals of Environmental Engineering
3 Credits (3)
Introduction to water treatment and water pollution and the analysis and design of selected treatment processes.
Prerequisite(s): C E 256.

C E 357. Soil Mechanics
3 Credits (2+3P)
Engineering properties of soils, consolidation settlement, compaction, water flow through soils, geostatic stresses, soil shear strength, lateral earth pressure, and soil laboratory testing.
Prerequisite(s): C E 160 or GEOL 1110G, and C E 301.

C E 382. Hydraulic and Hydrologic Engineering
3 Credits (3)
Analysis and design of hydraulic systems, including pipe networks, open channels, regulating structures, and pumping systems. Surface water and groundwater hydrology, analysis and design. May be repeated up to 3 credits.
Prerequisite(s): C E 331 and C E 331 L.

C E 398. Special Topics
1-3 Credits
May be repeated for a maximum of 6 credits.
Prerequisite: consent of department head.

C E 435. Technical Communication for Engineers
3 Credits (3)
The course addresses the fundamentals of communicating technical information that is clear, concise, and concrete to a wide variety of stakeholder types.
Learning Outcomes
1. Ability to write in a way that is clear. Ability to write in a way that is concise. Ability to write in a way that is concrete.
C E 471. Transportation Engineering
3 Credits (3)
Highway and traffic design and systems. Students must be in junior or senior standing to enroll.
Prerequisite: MATH 1521G.

Learning Outcomes
1. Provide understanding of the principles of transportation engineering with a focus on highway engineering and traffic analysis. Provide basic skill set that will allow a student to address most of the transportation problems that are likely to appear in professional practice and on the Fundamentals of Engineering exam (FE) and the Principles and Practice of Engineering exam (PE). Provide foundation for future coursework in transportation should a student wish to pursue further coursework in the field.

3 Credits (3)
Engineering economics, construction and project management.
Prerequisite/Corequisite: C E 357.

Learning Outcomes
1. Understand the time value of money and be able to perform economic analyses on engineering problems to determine whether a given project is worthwhile or to prioritize multiple alternatives based on present worth. Understand the mathematical and ethical implications of benefit/cost and internal rate of return analyses. Estimate durations and requirements of individual construction tasks. Develop construction schedules using Critical Path Method (CPM) Analysis. Understand the legal and ethical concerns involved in economic analysis and construction engineering.

C E 479. Pavement Analysis and Design
3 Credits (3)
Covers stresses and deflections in pavement layers, material characterization, flexible and rigid pavement design by AASHTO, and rehabilitation concepts.
Prerequisite(s): C E 357.

C E 480. Civil Engineering Capstone Design
3 Credits (3)
Culminating multidisciplinary project-oriented capstone design. Ethics, professional development, global issues.
Prerequisite(s)/Corequisite(s): C E 457, C E 471, C E 477. Prerequisite(s): C E 356, C E 382, and either C E 444 or C E 445.

C E 482. Hydraulic Structures
3 Credits (3)
Engineering design of water-regulating structures. Capstone design course. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): C E 477. Prerequisite(s): C E 382.

C E 483. Surface Water Hydrology
3 Credits (3)
Hydrologic cycle and relationships between rainfall and surface water runoff.
Prerequisite: C E 331 or consent of instructor.

C E 485. Design of Earth Dams
3 Credits (3)
Engineering design applied to site selection, foundation inspection and treatment, hydrology and hydraulics, stability, and seepage analysis. Economic and environmental factors. May be repeated up to 3 credits.
Prerequisite(s): C E 357, C E 382.

C E 497. Senior Seminar
1 Credit (1)
Selected topics on the civil engineering profession and orientation for professional practice. Preparation for the FE exam. Students must be able to submit their application for degree while enrolled in this course.

Learning Outcomes
1. Prepare students for professional and ethical aspects of employment or graduate studies.

C E 498. Special Topics
1-3 Credits
May be repeated for a maximum of 9 credits.
Prerequisite: consent of department head.

C E 501. Advanced Mechanics of Materials
3 Credits (3)
Study of stress and strain in two and three dimensions, theories of failure, stress concentrations, unsymmetrical bending, curved beams, beams on elastic foundations, column theories, torsion, thick-wall cylinders. Same as M E 501.
Prerequisites: C E 301, MATH 392.

C E 502. Advanced Mechanics of Steel Structures
3 Credits (3)
Advanced structural mechanics applicable to steel structures. Includes inelastic behavior, plastic analysis, column and frame stability and torsion.
Prerequisite: C E 444.

Learning Outcomes
1. Introduce students to advanced topics in structural mechanics of steel structures that are commonly encountered in structural engineering. Provide the background needed to understand the code requirements applicable to problems in plastic design of steel structures.

C E 503. Special Design and Analysis Program
3-6 Credits
Design and analysis covering subject matter of an approved 450 undergraduate departmental course plus an additional report or project. Course may be subtitled in the Schedule of Classes. May be repeated once for a total of 6 credits.
Prerequisite: consent of instructor/committee.

C E 504. Advanced Engineering Design
3 Credits (3)
Advanced engineering design covering subject matter of a selected capstone undergraduate design course plus an additional report or project. May be subtitled.
Prerequisite: consent of instructor/committee.

C E 506. Advanced Soil Mechanics
3 Credits (3)
Stress and strain analyses in soil, stress paths; drained and undrained shear strengths of granular soils and clays, consolidation, liquefaction, soil improvement.
Prerequisite: C E 457 or consent of instructor.
C E 507. Design of Earth Retaining Structures
3 Credits (3)
Lateral earth pressure theory, soil-reinforcement interaction, and analysis and design of rigid and flexible earth retaining structures for support of fills and excavations, including retaining walls, mechanically stabilized earth (MSE) walls, sheet pile walls, anchored walls, tiebacks and soil nailing.
Prerequisite(s): C E 357.

C E 508. Advanced Soil Behavior
3 Credits (3)
The course covers particle-scale phenomena that govern the macro-scale behavior of soils. Topics covered in the class include classical concepts as well as contemporary advances in soil mechanics. The students will develop a fundamental understanding of soil-water interaction, theories of contact level deformation, and mass and energy transport through granular media. Consent of Instructor required.
Prerequisite(s): C E 357 or Instructor Consent.

C E 509. Deep Foundations
3 Credits (3)
Behavior, analysis and design of pile and pier foundations subjected to axial and lateral loads.
Prerequisite: C E 457 or consent of instructor.

C E 510. Introduction to Nondestructive Testing
3 Credits (3)
This course explores the application of different Nondestructive Testing (NDT) methods in material characterization and product qualification.
Prerequisite(s): C E 311 or CHME 361 or Consent of Instructor.

C E 514. Numerical Methods in Civil Engineering
3 Credits (3)
Mathematical, numerical, and programming foundations of applied numerical methods with a focus on Civil and Environmental Engineering applications using MATLAB.

Learning Outcomes
1. To provide necessary background and skills to use MATLAB as a programming language for engineering problem solving. To introduce classical and some modern methods for civil engineering numerical problem solving. Develop numerical algorithms and programs for solving civil engineering problems involving: (1) multi-dimensional integration, (2) multivariate differentiation, (3) ordinary differential equations, (4) partial differential equations, (5) optimization (6) parameter estimation methods such as linear and nonlinear least square methods.

C E 515. Finite Element Methods
3 Credits (3)
Introduces the finite element method. Topics may include beam, frame, plane stress, plane strain, axisymmetric, and 3-D stress elements. Includes static and dynamic analysis. Uses readily available finite-element software.
Prerequisite: graduate standing or consent of instructor.

C E 531. Open Channel Hydraulics
3 Credits (3)
Theoretical and applied hydraulics of open channels, with emphasis on nonuniform flow, rapidly varied flow, and wave formation.
Prerequisite: C E 382 or consent of instructor.

C E 535. Technical Communication for Engineers
3 Credits (3)
The course addresses the fundamentals of communicating technical information that is clear, concise, and concrete to a wide variety of stakeholder types. Same as C E 435 with differentiated assignments for graduate students.

Learning Outcomes
1. Ability to write in a way that is clear Ability to write in a way that is concise Ability to write in a way that is concrete

C E 544. Advanced Design of Steel Structures
3 Credits (3)
Connection design; beam-column analysis and design; composite construction; and plate girder design.
Prerequisite: C E 444.

Learning Outcomes
1. Introduce students to advanced topics in steel design that are commonly encountered in structural engineering Provide the background needed to practice structural steel design Provide the background needed to understand the code requirements applicable to difficult problems in structural steel design

C E 545. Advanced Concrete Design
3 Credits (3)
Advanced topics in ultimate strength design of reinforced concrete that include: concrete footings, retaining structures, short and long columns, torsion members, deep beams and shear walls, two-way slabs, and shear and moment transfer at slab-column connections.
Prerequisites: C E 445.

Learning Outcomes
1. Introduce students to advanced topics in reinforced concrete design that are commonly encountered in structural engineering Provide the background needed to practice structural concrete design Provide the background needed to understand the code requirements applicable to difficult problems in structural concrete design

C E 547. Bridge Engineering
3 Credits (3)
Topics related to prestressed concrete, reinforced concrete and steel bridge design according to the AASHTO specifications; bridge analysis and evaluation.
Prerequisite: C E 444 or C E 445.

Learning Outcomes
1. Introduce students to topics in bridge design that are commonly encountered in structural engineering Provide the background needed to understand the code requirements applicable to problems in bridge design

C E 554. Wood Design
3 Credits (3)
Theory and design of wood structural members and systems subjected to gravity and lateral loads. Design project required. Taught every other year, alternates with C E 555 - Masonry Design.

C E 557. Water Resources Development
3 Credits (3)
Students function as members of a consulting panel and prepare reports on major water resources development problems. Political, financial, and social aspects of water resources development are considered as well as scientific and technical details.
C E 571. Structural Dynamics
3 Credits (3)
Response of elastic structure to dynamic loading. Moving load, earthquake and blast loading.
Prerequisite: ENGR 234 and C E 315.
Learning Outcomes
1. Introduce students to topics in structural dynamics that are commonly encountered in structural engineering. Provide the background needed to understand the code requirements applicable to problems in seismic and blast-resistant design.

C E 572. Earthquake Engineering
3 Credits (3)
Earthquake characteristics; seismic loads; elastic and inelastic response; analysis and design of buildings for earthquakes.
Prerequisites: graduate standing and consent of instructor.

C E 579. Ground Improvement
3 Credits (3)
The objective of this course is to introduce common ground improvement techniques, including mechanical (compaction, soil reinforcement, preloading and accelerated consolidation) and chemical (cementing, ion-replacement, polymer bonding) stabilization methods, as well as seepage and dewatering. Emphasis will be placed on developing an understanding of the underlying physical and chemical processes involved in each case.
Prerequisite(s): C E 357.

C E 581. Ground Water Hydrology
3 Credits (3)
Mathematical treatment of water flow in porous media. Emphasis on hydraulics of water movement, including pumping and recharge wells, drainage, and water quality.
Prerequisites: MATH 392, G EN 452, and C E 382, or consent of instructor.

C E 582. Statistical Hydrology
3 Credits (3)
Application of statistical techniques to hydrologic data, including distributions, hypothesis testing, linear models, non-parametrics, and time-series and stochastic models. May be repeated up to 3 credits.

C E 585. Slope Stability Analysis and Design
3 Credits (3)
Design of earth slopes, causes of instability, limit equilibrium methods, slope reinforcement (geosynthetics soil nailing, tiebacks), seismic analysis, rock slope stability. Consent of instructor required.
Learning Outcomes
1. Be familiar with the implications of drainage conditions and pore water pressure in the soil as they relate to soil shear strength and slope stability. Be able to recognize the differences between short-term and long-term analyses (total versus effective stress analyses) applied to slope stability. Be able to perform hand calculations of slope stability for very simple cases. Be familiar with the set of input data usually required to perform stability analyses using software. Be able to design soil slopes with various soil profiles and geometry and reinforcement using slope stability software. Recognize and understand the effects of geologic and groundwater conditions on the stability of soil slopes. Understand the mechanisms by which the most common methods of slope stabilization work (tie-backs, soil nailing, geosynthetics).

C E 596. Special Topics
1-3 Credits
May be repeated for a maximum of 6 credits.
Prerequisite: consent of department head.

C E 598. Special Research Programs
1-3 Credits
Individual investigations either analytical or experimental. May be subtitled. Maximum of 3 credits per semester.

C E 599. Master's Thesis
1-15 Credits
Thesis.

C E 600. Doctoral Research
1-15 Credits
Research.

C E 604. Advanced Engineering Topics
3 Credits (3)
In depth study of a topic at the forefront of environmental engineering & science. Journal papers will be critically reviewed and students will be asked to write an analysis of the topic and present their thoughts orally.

C E 614. Advanced Numerical Methods in Civil Engineering
3 Credits (3)
Advanced mathematical, numerical, and programming for applied numerical methods with a focus on Civil and Environmental Engineering applications using MATLAB. Same as C E 514 with differentiated material and assignments for C E 614 students.
Learning Outcomes
1. To provide necessary background and skills to use MATLAB as a programming language for engineering problem solving. To introduce classical and some modern methods for civil engineering numerical problem solving. Develop numerical algorithms and programs for solving civil engineering problems involving: (1) multi-dimensional integration, (2) multivariate differentiation, (3) ordinary differential equations, (4) partial differential equations, (5) optimization (6) parameter estimation methods such as linear and nonlinear least square methods, and (7) time series analysis such as Fourier transform, wavelet, and basic filtering.

C E 615. Advanced Finite Element Methods
3 Credits (3)
Finite element method with emphasis on stress analysis. May include development and use of plane stress, plane strain, and 3-D and shell elements. Includes static, dynamic, and nonlinear analysis.
Prerequisite: graduate standing.

C E 682. Topics in Hydrodynamics II
3 Credits (3)
Selected topics in hydrometeorology, including the transfer of water and energy between the land surface and the lower atmosphere.
Learning Outcomes
1. This course helps lay the foundation for theoretical concepts useful in measurement, analysis and estimation of evaporation/evapotranspiration. Students learn some of the theoretical concepts and relationships useful in the phenomenon of evaporation as well as gain some field experience on measurement of evapotranspiration and open water evaporation.

C E 698. Special Research Programs
1-3 Credits
May be subtitled. May be repeated for a maximum of 9 credits.

C E 700. Doctoral Dissertation
1-15 Credits
Dissertation.
Environmental Engineering Courses

ENVE 450. Aquatic Chemistry
3 Credits (3)
Theoretical aspects of physical chemistry applied to the solution of environmental engineering problems. Emphasis on acid-base reactions, precipitation-dissolution reactions, complexation, and redox reactions. Same as ENVE 550.
Prerequisite: C E 256.
Learning Outcomes
1. Students will be able to use fundamental principles of physical chemistry as applied to acid-base, precipitation-dissolution, complexation, and redox reactions to determine the composition of waters, including natural waters and waters encountered in water and wastewater treatment processes.

ENVE 451. Unit Processes/Operation of Water Treatment
3 Credits (3)
Theory and applications of unit processes in environmental engineering. Physical and chemical water treatment methods are emphasized. Crosslisted with: ENVE 551.
Prerequisite: C E 356.
Learning Outcomes
1. Students will be able to use fundamental reactor design principles to design unit operations for water treatment, including sedimentation, coagulation, flocculation, filtration, and disinfection.

ENVE 452. Unit Processes/Operation of Wastewater Treatment
3 Credits (3)
Theory and applications of unit processes in environmental engineering. Biological wastewater treatment methods are emphasized. Crosslisted with: ENVE 552.
Prerequisite: C E 356.
Learning Outcomes
1. Students will be able to use fundamental reactor design principles to design unit operations for wastewater treatment, including sedimentation, aerobic and anaerobic microbial treatment, and disinfection.

ENVE 456. Environmental Engineering Design
3 Credits (3)
Design of chemical, physical, and biological operations and processes involved in water and wastewater treatment. Student can also be a graduate student to enroll if they have not completed C E 356.
Prerequisite: C E 356.
Learning Outcomes
1. Students will be able to incorporate knowledge from previously taken engineering design and economics courses to complete an environmental design and solve a real world problem. Students will be able to communicate and explain their solution approach to a variety of audiences using different communication methods.

ENVE 459. Environmental Microbiology
3 Credits (3)
An introduction to the diverse roles of microorganisms in natural and engineered environments. The topics include cellular architecture, energetics, and growth; population and community dynamics; water and soil microbiology; biogeochemical cycling; and microorganisms in biodegradation and bioremediation of contaminants. Students must be a Senior or in Graduate Standing to enroll.
Learning Outcomes
1. Students will be able to demonstrate the significance of microbial processes in natural and engineered processes.

ENVE 487. Air Pollution Control Systems Design
3 Credits (3)
An introduction to sources and nature of air pollution, regulations, and risk analysis. Detailed study of air pollution control technologies and design of air pollution control equipment. Students must be a Senior or in graduate standing to enroll.
Learning Outcomes
1. Students will be able to explain the source and nature of air pollution. Students will be able to relate air pollution to regulations using a risk analysis approach. Students will be able to design air pollution control systems.

ENVE 504. Advanced Environmental Engineering Design
3 Credits (3)
Advanced engineering design covering the subject matter of the Environmental Engineering capstone undergraduate design course plus an additional report or project. May be subtitled. Consent of instructor required.
Learning Outcomes
1. Students will be able to incorporate knowledge from previously taken engineering design and economics courses to complete an environmental design and solve a real world problem. Students will be able to communicate and explain their solution approach to a variety of audiences using different communication methods.

ENVE 550. Aquatic Chemistry
3 Credits (3)
Theoretical aspects of physical chemistry applied to the solution of environmental engineering problems. Emphasis on carbonate equilibria solubility, buffering and redox conditions. May be repeated up to 3 credits. Consent of Instructor required. Crosslisted with: ENVE 450.
Prerequisite(s): C E 256.
ENVE 551. Unit Processes/Operation of Water Treatment
3 Credits (3)
Theory and applications with unit processes in environmental engineering. Physical / chemical treatment methods emphasized. May be repeated up to 3 credits. Crosslisted with: ENVE 451.
Prerequisite(s): C E 356.
ENVE 552. Unit Processes/Operation of Wastewater Treatment
3 Credits (3)
Theory and applications with unit processes in environmental engineering. Biological treatment methods emphasized. May be repeated up to 3 credits. Crosslisted with: ENVE 452.
Prerequisite(s): Consent of instructor.
ENVE 556. Advanced Water Treatment and Reuse
3 Credits (3)
Overview of both the theoretical and practical aspects of advanced water treatment technologies and water reuse applications. Basic design features of the processes are presented, with emphasis on the underlying principles, including why and how a process works, what the significant variables are, and what the limitations of the process are. Problem solving skills and technical communication skills are emphasized.
Prerequisite: ENVE 551.
Learning Outcomes
1. Students will be able to design advanced water treatment processes, including membrane filtration, electrodialysis, ion exchange, advanced oxidation, photolysis, and distillation. Students will gain knowledge in water reuse applications including water quality criteria, regulations, and implementation issues.

ENVE 557. Surface Water Quality Modeling
3 Credits (3)
Modeling the impacts of waste disposal practices on surface waters. Emphasis on fate and transport of bacteria, dissolved oxygen, nutrients, and toxicants in rivers, lakes, and tidal waters. Students must be in Graduate standing to enroll.
Learning Outcomes
1. The students will be able to use mathematical models to model the transport of constituents important for water quality, such as bacteria, viruses, nutrients, contaminants, and oxygen, in aqueous environments.

ENVE 558. Special Research Programs
1-3 Credits
Individual investigations either analytical or experimental. May be repeated up to 6 credits.

ENVE 599. Master's Thesis
15 Credits
Thesis. May be repeated for a maximum of 6 credits.

ENVE 630. Fate and Transport of Environmental Contaminants
3 Credits (3)
Modeling of transport phenomena in natural and engineered systems for predicting the fate of contaminants in the air, soil, sediment, and water compartments of the ecosystem.
Prerequisite: ENVE 557.
Learning Outcomes
1. The students will be able to use mathematical models to model the transport of contaminants in gas, aqueous, and soil environments.

Agricultural Engineering Courses
A EN 459. Groundwater, Wells & Pumps
3 Credits (3)
Occurrence and movement of groundwater; design of water wells; selection and specification of pumps and power units.
Prerequisite: C E 382.
Learning Outcomes
1. Understand the occurrence and movement of groundwater in aquifers, and extraction of it. Ability to interpret pump specifications and data Select and detail power units for pumping systems

A EN 478. Irrigation and Drainage Engineering
3 Credits (2+3P)
Design and operation of surface and sprinkler irrigation systems; pumping and conveyances; introduction to principles and practices of drainage systems and wells.
Prerequisite: C E 382 or consent of instructor.

A EN 498. Special Topics
1-3 Credits
May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

Department Contact Information

Civil Engineering - Bachelor of Science in Civil Engineering
Requirements (126 Credits)
In addition to the university requirements for graduation, all students including transfers must satisfy the requirements contained in the academic policies for the NMSU College of Engineering. Students must have a 2.0 grade-point average in all departmental courses and all prerequisites and co-requisites must be taken as required. If a student takes a class and a co-requisite for that class at the same time and does not achieve a grade of C- or better in the co-requisite, the student may take no further classes for which the course or the co-requisite are prerequisite. A student who completes a class three times without achieving a grade of C- or better will be dismissed from the Civil Engineering program, and not allowed to take any Civil Engineering courses from the department.

Students must complete all University degree requirements, which include the following: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 126 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements or elective credits, but may be needed for enrollment in the necessary English and Mathematics coursework.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

1 Courses are typically taught in the Fall semester.

2 Courses are typically taught in the Fall, Spring and Summer semesters.

3 Courses are typically taught in the Fall and Spring semesters.

4 See the Viewing a Wider World (p. 92) section of the catalog to see a full list of courses.

5 Math Placement: MATH 1511G Calculus and Analytic Geometry I is the starting Math course for the degree but students may need to complete any prerequisites prior to enrolling in this course depending on math placement.

6 See the General Education (p. 88) section of the catalog for a full list of courses.

7 Courses are typically taught in the Fall and Summer semesters.

8 See your advisor for more detailed information about selecting elective courses that are approved to fulfill this requirement.

9 Courses are typically taught in the Spring semester.

### Agricultural Engineering - Undergraduate Minor

or A EN 498 | Special Topics |
**Design**
A EN 459 | Groundwater, Wells & Pumps | 3

**Total Credits** 15-16

### Environmental Engineering - Undergraduate Minor

This minor will build upon existing B.S. degree programs at NMSU in engineering and environmental science, and provides further preparation
in modern and emerging technologies for upgrading the Nation’s ageing utilities and infrastructure in the water, energy, and environment sectors. It includes 3 required courses (9 credits) from civil and environmental engineering, and 3 elective courses (9-10 credits) from civil engineering, environmental engineering, environmental science, and/or engineering technology.

### Total Credits

18-19

1 elective courses may be taken in the same department or different departments

2 courses numbered 450 and above may be used to satisfy course requirements for the accelerated master’s degree program (requires department head approval)

3 special topics in Civil Engineering include advanced soil mechanics, advanced soil behavior, ground improvement, design of earth retaining structures, deep foundations, and slope stability analysis (requires consent of department head and instructor)

### Structural Engineering - Undergraduate Minor

This minor builds upon existing B.S. degree programs at NMSU in analysis, construction, and design of civil, mechanical, and aerospace structures. It includes 3 required courses (10 credits) from civil engineering and 3 elective courses (9-10 credits) from civil engineering, aerospace/mechanical engineering, and/or engineering technology.

Civil Engineering - Master of Engineering in Civil Engineering

The Master of Engineering degree in Civil Engineering (M.E. in CE) is a coursework only degree and several courses are offered online. The M.E. in CE degree requires a total of 30-31 credit hours consisting of one professional communications course (3 credit hours); seven technical electives in Civil, Environmental, and/or Agricultural Engineering (21-22 credit hours); and two electives from engineering disciplines outside the department and/or other areas of interest outside the college (6 credit hours).

Civil Engineering - Master of Science in Civil Engineering

In support of the mission and vision statements for the graduate program, the department adopts the following goals for the Master of Science (M.S.) in Civil Engineering degree:

1. Prepare students to fulfill the academic prerequisites specified by the Americans Society of Civil Engineers (ASCE) for Licensure and Professional Practice in Civil Engineering.
2. Prepare students to attain the Body of Knowledge specified by ASCE necessary for entry into the practice of civil engineering at the professional level.
3. Prepare students in conducting applied research in areas relevant to the practice of civil engineering.
4. Prepare students for advanced graduate studies towards a terminal degree.

Students may choose from the geotechnical, structural, or water resources engineering options following the Thesis or Non-Thesis track, requirements of which are specified below. Exceptions to these requirements must be approved by the head of the department. Further information related to the M.S. degree may be found under the Academic Programs of Study (p. 35) section of the catalog.

Option: Geotechnical Engineering

Thesis Track

<table>

</tr>
</tbody>
</table>

| Core Courses | | |
|--------------|---------|
| Select three from the following: | |
| C E 506 | Advanced Soil Mechanics | |
| C E 508 | Advanced Soil Behavior | |
| C E 509 | Deep Foundations | |
| C E 579 | Ground Improvement | |

| Optional Courses | | 12-13 |
| Select four from the following: | |
| C E 452 | Geohydrology | |
| C E 479 | Pavement Analysis and Design | |
| C E 485 | Design of Earth Dams | |
| C E 507 | Design of Earth Retaining Structures | |
| Select 3 credits from courses outside the area or department (450 or higher) | | 3 |

| Research Credits | | 6 |
| Select | |
| C E 599 | Master’s Thesis | |

Total Credits | 30-31 |

1. A course listed as core may be taken as one of the four optional courses if it is not counted already as one of the three core courses.
The optional course outside the area or department must be previously approved by the academic advisor or student's Graduate Committee.

A maximum of 6 credits are counted toward the Master's Degree program.

A course listed as background provides fundamental knowledge to pursue graduate studies in geotechnical engineering but does not satisfy the course requirements for the MS degree (exception: CE 457).

Total credits needed for the Thesis Track are 24 credits of coursework and 6 credits of CE 599 Master's Thesis research.

Non-Thesis Track
The background and core courses for the Non-Thesis Track in Geotechnical Engineering are the same as those listed under the Thesis Track. Under optional courses, Non-Thesis students must select one additional course (i.e., total of five optional courses) from the list provided for the Thesis Track. In addition, Non-Thesis students must complete 3 credits of CE 598 - Special Research Programs in place of 6 credits of CE 599 and pass a final exit exam covering coursework and their research project.

Total credits needed for the Non-Thesis Track are 27 credits of coursework and 3 credits of CE 598 Special Research Programs.

Option: Structural Engineering

Environmental Engineering -
Master of Science in Environmental Engineering

Environmental engineering at New Mexico State University provides unique educational and research opportunities at the graduate level in the fields of water quality, aquatic chemistry, environmental microbiology, water treatment, water pollution control, wastewater treatment, reclamation and reuse, desalination, industrial, hazardous, and solid waste management, groundwater remediation, contaminant fate and transport, resource recovery from waste streams, air pollution control, waste minimization, and pollution prevention. Therefore, course offerings emphasize basic engineering and scientific principles, as well as the design and application of environmental engineering unit operations and processes. Special problems and thesis research are closely matched with faculty expertise and the professional goals of graduate students. The programs of study are specifically designed for individual students, taking advantage of not only the program capabilities, but also of the complementary activities of the university as a whole as well as the student’s professional experience and work environment.

Graduate students satisfy degree requirements in environmental engineering by completing specific core course work. Course work in the graduate program includes the following:

- water and wastewater treatment
- solid and hazardous waste systems design
- environmental chemistry
- environmental microbiology
- environmental contaminant analysis
- industrial pollution control
- fate and transport of pollutants in engineered and natural systems and water quality in surface water and groundwater systems

Additional topics of interest to the students are offered through special topics classes and by courses taught outside of the College of Engineering.

The Master of Science (M.S.) program in Environmental Engineering requires either a thesis or non-thesis practice oriented experience. The thesis track consists of a minimum of 30 semester credit hours, including 6 credit hours of thesis. The non-thesis track is designed primarily for students who are working full time in engineering practice, but is also available to students working part time. This track consists of 30 semester credit hours, including 6 credit hours of an engineering practicum (ENVE 598 Special Research Programs) of which up to 3 credit hours can be earned for a professional engineering design experience. Transfer credit for courses taken elsewhere is evaluated on an individual basis. Up to 6 semester hours of graduate level courses may be used to satisfy M.S. degree requirements provided that the credits were not used towards another degree.

### Required Curriculum

The graduate environmental engineering program of the Civil Engineering Department expects all M.S. students to meet certain requirements in pursuit of an advanced degree. Some of these requirements are related to the quantity, level, and quality of coursework. This Graduate Catalog details what is expected as a minimum for graduation, but it is up to the student and his/her advisor and graduate committee to determine the...
program of study for the student. The student and his/her advisor will create this program of study in the first semester of graduate work.

Students desiring to work toward an advanced degree in environmental engineering must have completed undergraduate preparation similar to that required for a Bachelor of Science degree in an ABET accredited engineering program or must have adequate background, as determined by the graduate faculty of the program. The background courses listed below may be required if the student did not take a similar course at the undergraduate level, as determined by the graduate faculty of the program.

Environmental engineering faculty will form a committee for every entering student. The faculty will evaluate the student’s record and determine which deficiencies or core courses, if any, are needed by the student. The required curriculum consists of 12 credit hours of core courses, 6 credit hours of Master’s Thesis (thesis track) or Special Research Programs (non-thesis track), and 12 credit hours of elective courses. For all professional non-thesis programs, the department head will review the committee’s decision.

Environmental engineering faculty will form a committee for every entering student. The faculty will evaluate the student’s record and determine which deficiencies or core courses, if any, are needed by the student. The required curriculum consists of 12 credit hours of core courses, 6 credit hours of Master’s Thesis (thesis track) or Special Research Programs (non-thesis track), and 12 credit hours of elective courses. For all professional non-thesis programs, the department head will review the committee’s decision.

1
ENVE 598 Special Research Programs: practicum for students pursuing the non-thesis track. ENVE 599 Master’s Thesis: required for students pursuing the thesis track.

2
Elective courses may be taken from any department and must be approved by the student's advisor and graduate committee.

Professional Development Electives for the Non-Thesis Track (outside the College of Engineering)

For students pursuing the non-thesis track, a minimum of 6 credit hours in graduate-level communications, management, economics, or other relevant disciplines are required as part of the 12 elective credit hour requirement. These courses will be selected by the student and must be approved by the student’s advisor and graduate committee.

Engineering (Civil Engineering) - Doctor of Philosophy

In support of the mission and vision statements for the graduate program, the Civil Engineering Department adopts the following goals for the Doctor of Philosophy (Ph.D.) degree:

1. Prepare students to develop and conduct fundamental and applied research to generate innovative and original solutions for civil engineering problems.
2. Prepare students for research-based professional careers or academic careers in the civil engineering discipline.
3. Develop a culture of research/teaching scholarship among students.

Students may specialize in environmental, geotechnical, structural, transportation, or water resources engineering. Further information related to the Ph.D. degree may be found under the Academic Programs of Study (p. 35) section of the catalog.

Additional Requirements

Ph.D. candidates in the College of Engineering, who have successfully completed their Ph.D. Qualifier Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

Paper #1: An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student’s doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.

Paper #2: An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for the Web of Science. Alternatively, one conference paper accepted or published in a national or international conference proceedings.

Electrical and Computer Engineering

Undergraduate Program Information

Overview

The undergraduate electrical engineering program of the Klipsch School is accredited by the Engineering Accreditation Commission of ABET, Inc., and stresses the development of analytical tools and physical concepts required to prepare students for immediate employment or graduate study. The program is flexible, allowing students to choose elective coursework towards concentrations in:

- communications and signal processing,
- computers and microelectronics,
- control and power,
- electromagnetics and photonics, or
- space systems.

Alternatively, students can select "no concentration" for the greatest flexibility in course selection.

Undergraduate Electrical Engineering Program

Educational Objectives

The Klipsch School is dedicated to providing a quality, hands-on, educational experience for our students. Below are the
program educational objectives (PEOs) that describe the expected accomplishments of graduates during their first few years after graduation.

1. Our graduates will obtain relevant, productive employment in the private sector, government and/or pursue an advanced degree.
2. Our graduates will be using their engineering foundation to innovate solutions to the problems of the real world.

Related Areas of Study
Electrical and computer engineering students wishing to broaden their educational experience may elect to earn additional bachelor's degrees in

- Engineering Physics
- Computer Science
- Mathematics
- Physics

Klipsch School students may also choose to earn a minor in one or more of the following fields:

- Computer Engineering
- Computer Science
- Mathematics
- Physics

Students must consult with an academic advisor in the offering department for specific requirements related to additional degrees and minors.

Transfer Credit
Credit earned at other institutions is generally accepted; however the following restrictions apply to transfer credits:

- Engineering credit must be earned at an ABET accredited school.
- Physics must be calculus based.
- If the NMSU requirement includes a lab, the transfer credit must include a lab.
- A grade of C- or better, must have been earned.
- E E Courses numbered 300 or higher, Cornerstone and Capstone courses may not be transferred.
- Transfer credits for courses above 300 level are NOT ACCEPTED.

Master's Accelerated (BS/MS) Program (MAP)
Undergraduate students may apply for acceptance to the Master's Accelerated Program (MAP) after completing 60 semester hours of undergraduate coursework of which a minimum of 25 credit hours must be completed at NMSU. The GPA must be 3.0 or above. The students must meet all other requirements as specified by the program. The MAP program allows up to 12 credits of NMSU coursework (450 level or higher) taken during the undergraduate years to be counted toward the master's program of study. Students must receive a grade of B or higher in the courses to be counted for the graduate degree. The courses must logically fit into the master's program. EE courses that are approved for the MAP program are those EE electives with a corresponding graduate version:

Graduate Program Information
Overview
The Klipsch School of Electrical and Computer Engineering offers graduate work leading to the Master of Science and Doctor of Philosophy degrees. Areas of emphasis for masters and doctoral students are:

- communications,
- computer engineering,
- controls,
- digital signal processing,
- electromagnetics,
- electric energy systems,
- photonics, and
- microelectronics/VLSI.

Research in the above areas currently being conducted by the faculty ensures that doctoral candidates will work on the frontier of knowledge in these areas. The graduate programs are intended to provide broad graduate-level training in electrical engineering. In addition, appropriate courses in computer science, industrial engineering, mathematics, physics and business management may be integrated into a graduate student’s program of study.

Students desiring to work toward an advanced degree in electrical engineering must have completed undergraduate preparation substantially equivalent to that required for the Bachelor of Science in Electrical Engineering degree at this institution. For students with undergraduate degrees in other disciplines, see below. For further information on the Klipsch School of Electrical and Computer Engineering, please consult the webpage http://www.ece.nmsu.edu/ (http://ece.nmsu.edu).
Faculty Research Interests
- **Digital Signal Processing**: Processing and Analysis Of EEG Signals, Time-Frequency Analysis, and Speech Processing.
- **Machine Learning**: Image Processing and Application Of Machine Learning and Deep Learning To Image Analysis, Focusing on Astronomy And Biomedical Image Analysis, Health Care, and Defense.

Support for Graduate Students
A number of teaching assistantships, research assistantships and fellowships are available. Teaching assistants are recommended by individual faculty for selection by the ECE Department’s Graduate Studies Committee. International students must pass university screening prior to being eligible for selection as a TA. Nominations for new TAs are made by the advisor after a student is admitted. Research assistants are hired directly by the faculty member who has received a contract or grant for research.

The College of Engineering awards graduate scholarships and fellowships on behalf of Electrical and Computer Engineering. These include:
- the MIT/Lincoln Laboratory Fellowship,
- the Paul and Valerie Klipsch Grad Scholarship,
- the Admiral Paul Arthur Grad Scholarship, and
- the Barry Neil Rappaport Grad Scholarship.

Applications can be completed on-line at https://scholarships.nmsu.edu/ The priority deadline for the ScholarDollar is March 1. The Electrical Utility Management Program has a limited number of fellowships for students interested in pursuing master’s degrees in electrical energy systems.

Admission
Prospective graduate students for the Master of Science or Doctor of Philosophy in Electrical Engineering must first meet the entrance requirements of the Graduate School. The prospective US graduate student should make formal application to the Graduate Student Services office (http://gradschool.nmsu.edu/http://gradschool.nmsu.edu/). International graduate students must start with the Admissions Office (https://issn.nmsu.edu/#admissions). Official transcripts from all undergraduate and graduate institutions must be sent directly to the Graduate School. International students must also submit their TOEFL (Test of English as a Foreign Language) scores. If the applicant meets the Graduate School’s minimum requirements, the application is sent to the Klipsch School’s Graduate Studies Committee for review. U.S. residents are given every chance of being successful in the pursuit of a graduate degree. If they do not meet the requirements of the Klipsch School, they can enter the Graduate School as “undeclared” where they must demonstrate competence in two or more graduate-level E E courses before they re-apply.

Requirements for Students Without BSEE Degree or Equivalent
Students without a BSEE degree or equivalent preparation will be expected to take classes covering the core knowledge required in our BSEE program. This includes mathematics through differential equations and basic engineering physics. The student’s graduate advisor will prepare an individualized deficiency schedule, based on the student’s academic background and work experience.

The following courses from our undergraduate program will be considered deficiencies for students without a BSEE

Degrees for the Department

Bachelor Degree(s)

Electrical Engineering (No Concentration) - Bachelor of Science in Electrical Engineering (p. 930)

Electrical Engineering (Communications & Signal Processing) - Bachelor of Science in Electrical Engineering (p. 932)

Electrical Engineering (Computers & Microelectronics) - Bachelor of Science in Electrical Engineering (p. 934)
Electrical Engineering Courses

E E 200. Linear Algebra, Probability and Statistics Applications
4 Credits (3+3P)
The theory of linear algebra (vectors and matrices) and probability (random variables and random processes) with application to electrical engineering. Computer programming to solve problems in linear algebra and probability.
Prerequisite: C- or better in ENGR 140 and (MATH 1521G or MATH 1521H or ENGR 190).

Learning Outcomes
1. Perform vector and matrix operations, including matrix inversion, eigen analysis, finding basis and dimension of vector spaces and rank of a matrix, and solving a set of linear equations. Calculate probabilities using probability mass, density, and cumulative distribution functions for single and multiple, discrete and continuous random variables, and relate them to electrical engineering applications. Perform simple parameter estimation, such as finding sample mean and variance, and relate to confidence intervals. Describe random processes in the context of signal processing and communications systems problems. Use MATLAB to solve problems involving linear algebra and probability, including designing and performing simple numerical experiments.

E E 240. Multivariate and Vector Calculus Applications
3 Credits (3)
Vector algebra, cylindrical and spherical coordinates, partial derivatives, multiple integrals. Calculus of vector functions through electrostatic applications. Divergence, gradient, curl, divergence theorem, Stokes’s theorem, Coulomb’s Law, Gauss’s Law, electric field, electric potential. Applications in Matlab.
Prerequisite: C- or better in (MATH 1521G or MATH 1521H or ENGR 190) and ENGR 140.

Learning Outcomes
1. Students will demonstrate conceptual understanding of the fundamental principles and theories in vector calculus. Students will analyze and solve problems using vector calculus in three coordinate systems.

E E 300. Cornerstone Design
2 Credits (1+3P)
Application and realization of engineering principles to a guided team-based design project. Formulation and implementation of test procedures, evaluation of alternate solutions and oral and written communication of the design and test results. Restricted to: E E majors. Restricted to Las Cruces campus only.
Prerequisite: C- or better in ENGR 140 and ENGR 230.

Learning Outcomes
1. Formulate and implement test procedures for validation of requirements. Evaluate alternative design solutions. Document test procedures and design solutions. Implement design to include a printed-circuit board, electronics and coding.
2. Communicate the design and validation both orally and in writing to a wide range of target audiences. Work in teams.
E E 317. Semiconductor Devices and Electronics I
4 Credits (3+3P)
Analysis and design of opamp circuits, diode circuits and single-transistor MOS and BJT amplifiers. Introduction to solid-state semiconductor devices.
Prerequisite: C- or better in ENGR 230 and CHEM 1215G.
Learning Outcomes
2. multi-meters, and oscilloscopes. Writing and documenting laboratory results.

E E 320. Signals and Systems I
3 Credits (3)
Introduction to the modeling and analysis of continuous- and discrete-time signals and systems using time- and frequency-domain methods suitable for both mathematical approaches and computer-aided simulations.
Prerequisite: C- or better in E E 200 and ENGR 230.

Learning Outcomes
1. Understand different types of signals (continuous-time, discrete-time, periodic, etc.) and how these signals are represented mathematically and in a computer. Understand systems representations (e.g., impulse responses), implementations (e.g., convolution and difference/differential equations), and properties (e.g., linearity). Gain insight into transform-domain analysis for signals and systems. Develop the ability to apply transform domain and LTI analysis to simple applications in signal processing, communications, and controls using Matlab.

E E 325. Signals and Systems II
4 Credits (3+3P)
Introduction to communication systems including amplitude and frequency modulation. Introduction to control systems including linear feedback systems, root-locus analysis, and graphical representations. Introduction to digital signal processing including sampling, digital filtering, and spectral analysis.
Prerequisite: C- or better in E E 320 and MATH 392.

Learning Outcomes
1. To model, analyze, simulate, and perform calculations with continuous- and discrete-time systems. To develop an understanding of the fundamental principles, theories, and equations (such as Maxwell’s) governing transmission lines, static and time-varying fields, propagation, reflection and transmission of plane waves, waveguides, and antennas. Students will analyze and solve electromagnetic-related problems by applying fundamental principles, theories, and equations (such as Maxwell’s equations). Students will demonstrate effective team work. Students will demonstrate the use of RF/microwave test equipment to perform basic RF circuit measurements.

E E 333. AC Circuit Analysis and Introduction to Power Systems
3 Credits (2+3P)
Steady-state analysis of AC circuits, three-phase circuits, and an introduction to power systems.
Prerequisite: C- or better in ENGR 230.
Learning Outcomes
1. To introduce students to the basic structure and requirements of any electric power supply system and the nature of power systems engineering and the profession which will establish background for further studies in power systems. To develop an understanding of components in a power system and to understand the basic electromagnetic and electromechanical principles involved in these components. To develop an understanding of the physical-principles— to-electric-equivalent circuit approach to the analysis and design of components and systems. To develop skills in equivalent circuit based analysis techniques building upon competencies developed in prior coursework. To explore analysis and design principles for the complete power system To understand measurement, analysis, simulation and design techniques, through laboratory exercises involving hardware and software.

E E 340. Fields and Waves
4 Credits (3+3P)
Static electromagnetic field. Maxwell’s equation and time-varying electromagnetic fields. Generalized plane wave propagation, reflection, transmission, superposition and polarization. Transmission line theory. Extensions to optical wave propagation. Applications including Time Domain Reflectometry (TDR) and fiber optic transmission. Laboratory experience with RF/microwave test equipment and optical apparatus. 
Prerequisite: C- or better in ENGR 230 and E E 240.

Learning Outcomes
1. Students will demonstrate an understanding of the fundamental principles, theories, and equations (such as Maxwell’s) governing transmission lines, static and time-varying fields, propagation, reflection and transmission of plane waves, waveguides, and antennas. Students will analyze and solve electromagnetic-related problems by applying fundamental principles, theories, and equations (such as Maxwell’s equations). Students will demonstrate effective team work. Students will demonstrate the use of RF/microwave test equipment to perform basic RF circuit measurements.

E E 362. Introduction to Computer Organization
4 Credits (3+3P)
Concepts of modern computer organization, CPU control, pipelining, memory hierarchies, memory mapping, hardware-software interface, and operating systems.
Prerequisite: C- or better in ENGR 120 and MATH 1250G.
Prerequisite/Corequisite: ENGR 140.
Learning Outcomes
1. Be conversant with fundamental concepts of computer organization. Compare and contrast organizational features of different computer. Understand the use of microprocessors and peripheral devices in practical applications.
E E 395. Introduction to Digital Signal Processing
3 Credits (3)
Undergraduate treatment of sampling/reconstruction, quantization, discrete-time systems, digital filtering, z-transforms, transfer functions, digital filter realizations, discrete Fourier transform (DFT) and fast Fourier transform (FFT), finite impulse response (FIR) and infinite impulse response (IIR) filter design, and digital signal processing (DSP) applications. Laboratory will emphasize practical implementation of signal processing including real-time signal processing.
Prerequisite(s): C- or better in E E 325.

E E 400. Undergraduate Research
1-3 Credits
Directed undergraduate research. May be repeated for a maximum of 9 credits.
Prerequisite: consent of the department head.

E E 403. Geometric Algebra
3 Credits (3)
Geometric algebra provides a common mathematical language for many areas of physics (classical and quantum mechanics, electrodynamics, special and general relativity), computer science (graphics, robotics, computer vision), engineering, and other fields. Topics include: the geometric product and multivectors; Euclidean, Lorentzian, Galilean, and Projective Geometries; Complex, Hyperbolic, and Dual Numbers; Quaternions and Rotations.
Prerequisite: C- or better in E E 320.

E E 405. Electricity Markets
3 Credits (3)
Power systems operation in regulated and competitive environments. Topics include: basics of microeconomics; linear programming, duality; electricity market pricing and settlement; RTO operation. Taught with:

Prerequisite(s): C- or better in E E 333 and E E 431.

Learning Outcomes
1. Understand basic microeconomic principles, basics of market power, Cournot equilibrium Understand basics of linear programming, the primal dual problems, economic interpretation of dual variables, basics of mixed integer programming Understand dispatch optimization problems in the electric energy markets including economic dispatch, unit commitment Understand motivation and objectives of market design, including uniform vs. pay-as-bid pricing, locational marginal prices (LMPs), dual of the DCOPF and the various terms (load payment, congestion rent, etc.), pricing issues in non-convex markets, financial transmission rights, ancillary services market

E E 409. Hardware & Software Codesign
3 Credits (3)
This course introduces the concept and techniques of designing electronic systems that integrates both hardware and software components. Topics include nature of hardware and software, dataflow modeling, software and hardware implementations of dataflows, analysis of control flows and dataflows, FSM with Datapath, microprogramming, embedded cores, and trade-offs between hardware and software components, etc. Students gain experience in implementing hardware and software co-design solutions for solving real-world problems through hands-on laboratory/project on a programmable System-on-Chip (SoC) platform that integrates a dual-core ARM Cortex-A9 processor and FPGA fabrics. Students develop a fundamental understanding of state-of-the-art practices in developing codesign solutions to problems that prepare them well for industrial and academic careers in this field.
Prerequisite: C- or better in ENGR 140 and ENGR 130 and E E 362.

Learning Outcomes
1. Formulate and solve problems related to basic concepts and methodologies in hardware/software co-design. Analyze concurrent specification of an algorithm to be partitioned into software (C code) and hardware (HDL) components. Design and implement both the software and hardware components integration as a solution to real-world problems to achieve optimal performance, power and cost. Describe various types of system architectures regarding their attributes including speed, energy, design complexity, design cost, etc. Experience working with commercially available Computer-Aided Design (CAD) development tools such as Xilinx Vivado Experience working in translation between C code and HDL of practical problems and verify/test the solution on FPGA SoC architecture

E E 412. ASIC Design
3 Credits (3)
This course provides students with experiential knowledge of modern application specific integrated circuits. Topics include ASIC packaging and testing, I/O pads and ESD, Verilog programming and simulation, FPGA verification, Register-transfer level synthesis, timing and area optimization, floorplanning and routing, digital interfaces, full custom and standard cell design, post-layout simulation, and PCB schematics and layout. Crosslisted with: E E 512.
Prerequisite(s)/Corequisite(s): E E 480.

E E 431. Power Systems II
3 Credits (3)
Analysis of a power system in the steady-state. Includes the development of models and analysis procedures for major power system components and for power networks. Crosslisted with: E E 542.
Prerequisite(s): C- or better in E E 333.

E E 432. Power Electronics
3 Credits (2+3P)
Basic principles of power electronics and its applications to power supplies, electric machine control, and power systems.
Prerequisite(s)/Corequisite(s): E E 325. Prerequisite(s): C- or better in E E 317 and E E 333.
E E 440. Photovoltaic Devices and Systems
3 Credits (3)
Prerequisite(s): C- or better in E E 317.
Learning Outcomes
1. Name at least three different types of photovoltaic materials and cells; Derive equations governing operation of photovoltaic cells; Design and create electrical engineering drawings for photovoltaic systems of different nameplate capacity; Describe principles of operation of the “balance of the system” (BOS) components of the photovoltaic system.

E E 443. Mobile Application Development
3 Credits (3)
Introduction to mobile application development. Students will develop applications for iOS devices including iPhone and iPad. Topics include object-oriented programming using Swift, model-view-controller (MVC) pattern, view controllers including tables and navigation, graphical user interface (GUI) design, data persistence, GPS and mapping, camera, and cloud and web services. Crosslisted with: E E 593.
Prerequisite(s): C- or better in C S 151 or C S 152 or C S 172 or C S 271 or C S 451 or C S 452.

E E 444. Advanced Image Processing
3 Credits (3)
Advanced topics in image processing including segmentation, feature extraction, object recognition, image understanding, big data, and applications. Crosslisted with: E E 588.
Prerequisite(s): C- or better in E E 446.

E E 446. Digital Image Processing
3 Credits (3)
Two-dimensional transform theory, color images, image enhancement, restoration, segmentation, compression and understanding. Same as E E 596.
Prerequisite: C- or better in E E 325.

E E 447. Neural Signal Processing
3 Credits (3)
Cross-disciplinary course focused on the acquisition and processing of neural signals. Students in this class will be learn about basic brain structure, different brain signal acquisition techniques (fMRI, EEG, MEG, etc.), neural modeling, and EEG signal processing. To perform EEG signal processing, students will learn and use Matlab along with an EEG analysis package. Crosslisted with: E E 597.
Prerequisite(s): C- or better in E E 325.

E E 448. Signal Compression
3 Credits (3)
Fundamentals of information source encoding and decoding. Includes information theory bounds on source coding, lossless coding algorithms, scalar quantizing and vector quantizing.
Prerequisite: E E 200.
Learning Outcomes
1. Formulate and analyze problems related to rate-distortion tradeoffs in compression Formulate and analyze problems related to scalar and vector quantization Formulate and analyze problems related to transform coding Formulate and analyze problems related to entropy coding (Huffman arithmetic) Formulate and analyze problems related to standardized codecs, including MPEG, JPEG, MP3 Formulate and analyze problems related to compressive sensing/sampling

E E 449. Smart Antennas
3 Credits (3)
Smart antenna and adaptive array concepts and fundamentals, uniform and planar arrays, optimum array processing. Adaptive beamforming algorithms and architectures: gradient-based algorithms, sample matrix inversion, least mean square, recursive least mean square, sidelobe cancellers, direction of arrival estimations, effects of mutual coupling and its mitigation. Crosslisted with: E E 549.
Prerequisite(s): C- or better in E E 325 and E E 340.

E E 452. Introduction to Radar
3 Credits (3)
Prerequisite(s): C- or better in E E 325 and E E 340.

E E 453. Microwave Engineering
3 Credits (3)
Techniques for microwave measurements and communication system design, including transmissions lines, waveguides, and components. Microwave network analysis and active device design. Crosslisted with: E E 521.
Prerequisite(s): C- or better in E E 340.

E E 454. Antennas and Radiation
4 Credits (3+3P)
Prerequisite(s): C- or better in E E 340.
E E 458. Hardware Security and Trust
3 Credits (3)
This course introduces and investigates recent technology development for the design and evaluation of secure and trustworthy hardware and embedded systems. Topics include IoT security, cryptography, hardware security primitives, authentication and key generation, invasive and non-invasive attacks and countermeasures, IC piracy and intellectual property protection, hardware trojans, and secure boot. Same as E E 558.
Prerequisite: C- or better in E E 362.

Learning Outcomes
1. Understand the security goals of information security Understand cryptography basics and their applications Formulate and analyze problems related to security threats in integrated circuits, electronic devices and semiconductor supply chain Formulate and analyze problems related to security countermeasures to the threats of integrated circuits and electronic devices Use metrics to measure and assess the security level of security mechanisms or primitives in hardware security applications Analyze and assess potential security vulnerabilities in hardware and embedded systems Learn state-of-art security mechanisms and research topics in the hardware and embedded security area

E E 460. Space System Mission Design and Analysis
3 Credits (3)
Satellite system design, including development, fabrication, launch, and operations. A systems engineering approach to concepts, methodologies, models, and tools for space systems. Students must be in junior standing to enroll.

Learning Outcomes
1. Apply knowledge from science, math and engineering to satellite design. Experience the “system engineering” of satellite design through the design of a space mission. Understand the professional and ethical responsibilities related to satellite design. Understand the impact of satellite related engineering solutions in a global, economic, environmental, and societal context. Maintain a knowledge of contemporary professional, societal and global issues as they relate to satellites.

E E 462. Computer Systems Architecture
3 Credits (3)
The course covers uniprocessors, caches, memory systems, virtual memory, storage systems, with introduction to multiprocessor and distributed computer architectures; models of parallel computation; processing element and interconnection network structures, and nontraditional architectures. Crosslisted with: E E 562.
Prerequisite: C- or better in E E 362.

Learning Outcomes
1. Recognize the basic principles and current practices of computer architectures of processors, memory systems, interconnects, and input/output systems Reason about the issues that influence the architectures of processors, memory systems, interconnects, and input/output systems Evaluate and improve computer system performance through analysis and computer simulation Solve and implement a small research problem in computer architecture.

E E 465. Machine Learning I
3 Credits (3)
An undergraduate-level introduction to machine learning algorithms, including supervised and unsupervised learning methods. Topics covered include clustering, linear regression models, linear discriminant functions, feed-forward neural networks, statistical pattern classification and regression, maximum likelihood, naive Bayes, non-parametric density estimation, mixture models, decision trees, and ensemble learning. Crosslisted with: E E 565.
Prerequisite: C- or better in E E 200.

Learning Outcomes

E E 467. ARM SOC Design
3 Credits (3)
The course aims to produce students who are capable of developing ARM-based SoCs from high level functional specifications to design, implementation and testing on real FPGA hardware using standard hardware description and software programming languages. Crosslisted with: E E 567.
Prerequisite: C- or better in E E 362 and E E 317.

Learning Outcomes
1. Formulate and solve problems requiring knowledge and understanding of ARM processor architectures and ARM-based SoCs Capture the design of ARM-based SoCs in a standard hardware description
2. Conduct low-level software design for ARM-based SoCs and high-level application development Demonstrate the ability to use and choose between different techniques for digital system design and capture; Evaluate implementation results (e.g. speed, area, power) and correlate
3. them with the corresponding high level design and capture; Demonstrate the ability to use a commercial tools to develop ARM-based SoCs

E E 473. Introduction to Optics
3 Credits (3)
The nature of light, geometrical optics, basic optical instruments, wave optics, aberrations, polarization, and diffraction. Elements of optical radiometry, lasers and fiber optics. Crosslisted with: PHYS 473.
Prerequisite(s): C- or better in PHYS 1320G or PHYS 2120.

E E 475. Automatic Control Systems
3 Credits (3)
Prerequisite(s): C- or better in E E 325.

E E 476. Computer Control Systems
3 Credits (3)
Representation, analysis and design of discrete-time systems using time-domain and z-domain techniques. Microprocessor control systems.
Prerequisite(s): C- or better in E E 325.
E E 478. Fundamentals of Photonics
4 Credits (3+3P)
Prerequisite(s): C- or better in PHYS 1320G or PHYS 2120.
Learning Outcomes
1. Understand the fundamentals of the different theories of light including ray, wave, electromagnetic (vector) and photon optics, and how these theories are represented mathematically and on a computer. Develop the ability to perform calculations for the different theories (e.g., ray tracing, wave interference, polarization calculus, photon detection) to determine the propagation characteristics and describe the manipulation of light. Gain insight and experience with materials and devices for manipulating and detecting light (e.g., glass, mirrors, lenses, fiber optics, polarization elements, liquid crystals, semiconductors, and photodiodes). Apply the theoretical, mathematical, and practical understanding of optics to describe real-world applications of light technology with supporting analysis and calculations.

E E 479. Lasers and Applications
4 Credits (3+3P)
Prerequisite(s): C- or better in E E 340 or in PHYS 461.

E E 480. Introduction to Analog and Digital VLSI
3 Credits (3)
Prerequisite: C- or better in E E 362 and E E 317.
Learning Outcomes
1. Explain the basic concepts of CMOS VLSI system design Formulate and solve problems related to pseudo ideal operation of MOS transistors as switches and implementation with transistors of basic and complex Boolean functions Use modern software tools to simulate integrated circuits Formulate and solve problems related to operation and design of basic analog building blocks Formulate and solve problems related to operation and design of basic digital building blocks
2. Formulate and solve problems related to key aspects of performance characteristics (speed, power dissipation, Silicon area...) of VLSI systems and how to size transistors in order to achieve desired performance specifications.

E E 482. Electronics II
3 Credits (3)
Feedback analysis, application of operational amplifiers, introduction to data converters, analog filters, and oscillator circuits.
Prerequisite(s): C- or better in E E 317.

E E 485. Analog VLSI Design
3 Credits (2+3P)
Analysis, design, simulation, layout and verification of CMOS analog building blocks, including references, opamps, switches and comparators. Teams implement a complex analog IC. Crosslisted with: E E 523.
Prerequisite(s): C- or better in E E 320 and E E 480.

E E 490. Selected Topics
1-3 Credits
May be repeated for a maximum of 9 credits. Graduate students may not use credits of E E 490 toward an M.S. or Ph.D. in electrical engineering. Prerequisite: consent of instructor.

E E 493. Power Systems III
3 Credits (3)
Analysis of a power system under abnormal operating conditions. Topics include symmetrical three-phase faults, theory of symmetrical components, unsymmetrical faults, system protection, and power system stability. Taught with E E 543.
Prerequisite(s)/Corequisite(s): E E 431. Prerequisite(s): C- or better in E E 333 or E E 391.

E E 496. Introduction to Communication Systems
3 Credits (3)
Introduction to the analysis of signals in the frequency and time domains. A study of baseband digital transmission systems and digital/analog RF transmission systems. Introduction to telecom systems as well as satellite systems.
Prerequisite(s): C- or better in E E 325.

E E 497. Digital Communication Systems I
3 Credits (3)
Prerequisite(s): C- or better in E E 200 and E E 325.

E E 501. Research Topics in Electrical and Computer Engineering
1 Credit (1)
Ethics and methods of engineering research; contemporary research topics in electrical and computer engineering.

E E 502. Electricity Markets
3 Credits (3)
Power systems operation in regulated and competitive environments. Topics include: basics of microeconomics; linear programming, duality; electricity market pricing and settlement; RTO operation. Recommended foundation: E E 333 and E E 431. Taught with: E E 405.

Learning Outcomes
1. Understand basic microeconomic principles, basics of market power, Cournot equilibrium Understand basics of linear programming, the primal dual problems, economic interpretation of dual variables, basics of mixed integer programming Understand dispatch optimization problems in the electric energy markets including economic dispatch, unit commitment Understand motivation and objectives of market design, including uniform vs. pay-as-bid pricing, locational marginal prices (LMPs), dual of the DCOPF and the various terms (load payment, congestion rent, etc.), pricing issues in non-convex markets, financial transmission rights, ancillary services market
E E 510. Introduction to Analog and Digital VLSI
3 Credits (3)

E E 512. ASIC Design
3 Credits (3)
This course provides students with experiential knowledge of modern application specific integrated circuits. Topics include ASIC packaging and testing, I/O pads and ESD, Verilog programming and simulation, FPGA verification, Register-transfer level synthesis, timing and area optimization, floorplanning and routing, digital interfaces, full custom and standard cell design, post-layout simulation, and PCB schematics and layout. Recommended foundation: E E 480. Crosslisted with: E E 412.

E E 515. Electromagnetic Theory I
3 Credits (3)

E E 516. Electromagnetic Theory II
3 Credits (3)
Continuation of E E 515.

E E 521. Microwave Engineering
3 Credits (3)
Techniques for microwave measurements and communication system design, including transmission lines, waveguides, and components. Microwave network analysis and active device design. Recommended foundation: E E 340. Crosslisted with: E E 453.

E E 523. Analog VLSI Design
3 Credits (2+3P)
Analysis, design, simulation, layout and verification of CMOS analog building blocks, including references, opamps, switches and comparators. Teams implement a complex analog IC. Recommended foundation: E E 320 and E E 480. Crosslisted with: E E 485.

E E 528. Fundamentals of Photonics
4 Credits (3+3P)
Ray, wave and guided optics, lasers and thermal sources, radiometry, photon detection and signal-to-noise ratio. Elements of photonic crystals, polarization, acousto-optics, electro-optics, and optical nanostructures. Taught with E E 478 with differentiated assignments for graduate students. Recommended foundation: Crosslisted with: PHYS 528. Prerequisite(s): (PHYS 1320G or PHYS 2120) and E E 473/PHYS 473.

E E 529. Lasers and Applications
4 Credits (3+3P)
Laser operating principles, characteristics, construction and applications. Beam propagation in free space and fibers. Laser diode construction and characteristics. Hands-on laboratory. Recommended foundation: E E 351 or PHYS 461. Taught with: E E 479 with differentiated assignments for graduate students. Crosslisted with: PHYS 529

E E 534. Power System Relaying
3 Credits (3)

E E 537. Power Electronics
3 Credits (2+3P)
Basic principles of power electronics and its applications to power supplies, electric machine control, and power systems. Recommended foundation: E E 325, E E 317, and E E 333. Crosslisted with: E E 432.

E E 540. Photovoltaic Devices and Systems
3 Credits (3)

Learning Outcomes
1. Name at least three different types of photovoltaic materials and cells; Derive equations governing operation of photovoltaic cells; Design and create electrical engineering drawings for photovoltaic systems of different nameplate capacity; Describe principles of operation of the “balance of the system” (BOS) components of the photovoltaic system.

E E 541. Antennas and Radiation
4 Credits (3+3P)

E E 542. Power Systems II
3 Credits (3)

E E 543. Power Systems III
3 Credits (3)
Analysis of a power system under abnormal operating conditions. Topics include symmetrical three-phase faults, theory of symmetrical components, unsymmetrical faults, system protection, and power system stability. Recommended foundation: E E 431. Crosslisted with: E E 493.

E E 544. Distribution Systems
3 Credits (3)
Concepts and techniques associated with the design and operation of electrical distribution systems. Recommended foundation: E E 542 and E E 543.

E E 545. Digital Signal Processing II
3 Credits (3)
Non-ideal sampling and reconstruction, oversampling and noise shaping in A/D and D/A, finite word length effects, random signals, spectral analysis, multirate filter banks and wavelets, and applications. Recommended foundation: E E 395.
E E 548. Introduction to Radar
3 Credits (3)

E E 549. Smart Antennas
3 Credits (3)

E E 551. Control System Synthesis I
3 Credits (3)
An advanced perspective of linear modern control system analysis and design, including the essential algebraic, structural, and numerical properties of linear dynamical systems.

E E 556. Hardware & Software Codesign
3 Credits (3)
This course introduces the concept and techniques of designing electronic systems that integrates both hardware and software components. Topics include nature of hardware and software, dataflow modeling, software and hardware implementations of dataflows, analysis of control flows and dataflows, FSM with Datapath, microprogramming, embedded cores, and trade-offs between hardware and software components, etc. Students gain experience in implementing hardware and software co-design solutions for solving real-world problems through hands-on laboratory/project on a programmable System-on-Chip (SoC) platform that integrates a dual-core ARM Cortex-A9 processor and FPGA fabrics. Students develop a fundamental understanding of state-of-the-art practices in developing codesign solutions to problems that prepare them well for industrial and academic careers in this field.

Learning Outcomes
1. Formulate and solve problems related to basic concepts and methodologies in hardware/software co-design. Analyze concurrent specification of an algorithm to be partitioned into software (C code) and hardware (HDL) components. Design and implement both the software and hardware components integration as a solution to real-world problems to achieve optimal performance, power and cost. Describe various types of system architectures regarding their attributes including speed, energy, design complexity, design cost, etc. Experience working with commercially available Computer-Aided Design (CAD) development tools such as Xilinx Vivado Experience working in translation between C code and HDL of practical problems and verify/test the solution on FPGA SoC architecture

E E 558. Hardware Security and Trust
3 Credits (3)
This course introduces and investigates recent technology development for the design and evaluation of secure and trustworthy hardware and embedded systems. Topics include IoT security, cryptography, hardware security primitives, authentication and key generation, invasive and non-invasive attacks and countermeasures, IC piracy and intellectual property protection, hardware trojans, and secure boot. Recommended foundation: E E 212. Crosslisted with: E E 458.

E E 562. Computer Systems Architecture
3 Credits (3)
The course covers uniprocessors, caches, memory systems, virtual memory, storage systems, with introduction to multiprocessor and distributed computer architectures; models of parallel computation; processing element and interconnection network structures, and nontraditional architectures. Recommended foundation is E E 212. Crosslisted with: E E 462.

E E 563. Computer Performance Analysis I
3 Credits (3)
Issues involved and techniques used to analyze performance of a computer system. Topics covered include computer system workloads; statistical analysis techniques such as principal component analysis, confidence interval, and linear regression; design and analysis of experiments; queuing system analysis; computer system simulation; and random number generation. Recommended foundation: E E 200 and E E 462.

E E 564. Architectural Concepts II
3 Credits (3)
Advanced topics related to computer architecture, guided by the current literature. Students are expected to have knowledge of computer architectures equivalent to C S 473 and of operating systems equivalent to C S 474. Crosslisted with: C S 573.

Learning Outcomes
1. Be able to explain the features in a modern multicore CPU architecture Be able to utilize hardware counter features of a CPU in performance evaluation Be able to explain the architecture of GPUs and their capabilities and drawbacks Be able to evaluate novel cutting-edge architectural features and designs Be able to present a research paper to an advanced audience

E E 565. Machine Learning I
3 Credits (3)
A graduate-level introduction to machine learning algorithms, including supervised and unsupervised learning methods. Topics covered include clustering, linear regression models, linear discriminant functions, feed-forward neural networks, statistical pattern classification and regression, maximum likelihood, naive Bayes, non-parametric density estimation, mixture models, decision trees, and ensemble learning. Recommended foundation: E E 571 and MATH 480. Crosslisted with: E E 465.

E E 567. ARM SOC Design
3 Credits (3)
The course aims to produce students who are capable of developing ARM-based SoCs from high level functional specifications to design, implementation and testing on real FPGA hardware using standard hardware description and software programming languages. Recommended foundation is E E 212 and E E 317. Crosslisted with: E E 467.

E E 571. Random Signal Analysis
3 Credits (3)
Application of probability and random variables to problems in communication systems, analysis of random signal and noise in linear and nonlinear systems.
E E 572. *Modern Coding Theory*
3 Credits (3)
Error control techniques for digital transmission and storage systems. Introduction to basic coding bounds, linear and cyclic block codes, Reed-Solomon codes, convolutional codes, maximum likelihood decoding, maximum a posteriori probability decoding, factor graphs, low density parity check codes, turbo codes, iterative decoding. Applications to data networks, space and satellite transmission, and data modems. Recommended foundation: E E 200 and E E 496.

E E 573. *Signal Compression*
3 Credits (3)
Fundamentals of information source encoding and decoding. Includes information theory bounds on source coding, lossless coding algorithms, scalar quantizing and vector quantizing.

**Learning Outcomes**
1. Formulate and analyze problems related to rate-distortion tradeoffs in compression. Formulate and analyze problems related to scalar and vector quantization. Formulate and analyze problems related to transform coding. Formulate and analyze problems related to entropy coding (Huffman arithmetic). Formulate and analyze problems related to standardized codecs, including MPEG, JPEG, MP3. Formulate and analyze problems related to compressive sensing/sampling.

E E 576. *Geometric Algebra*
3 Credits (3)
Geometric algebra provides a common mathematical language for many areas of physics (classical and quantum mechanics, electrodynamics, special and general relativity), computer science (graphics, robotics, computer vision), engineering, and other fields. Topics include: the geometric product and multivectors; Euclidean, Lorentzian, Galilean, and Projective Geometries; Complex, Hyperbolic, and Dual Numbers; Quaternions and Rotations.

**Learning Outcomes**
1. Formulate and solve problems related to multivectors and the geometric product while building geometric intuition. Formulate and solve problems related to complex, hyperbolic, and dual numbers as well as quaternions. Formulate and solve problems related to non-Euclidean spaces including Lorentzian, Galilean, and projective geometries.

E E 577. *Fourier Methods in Electro-Optics*
3 Credits (3)
Linear systems theory, convolution and Fourier transformation are applied to one-dimensional and two dimensional signals encountered in electro-optical systems. Applications in diffraction, coherent and incoherent imaging, and optical signal processing. Recommended foundation: E E 320 and E E 528. Crosslisted with: PHYS 577.

E E 578. *Optical System Design*
3 Credits (3)
Optical design software is used to study optical systems involving lenses, mirrors, windows and relay optics. Systems considered include camera lenses, microscopes and telescopes. Recommended foundation: E E/PHYS 473, E E/PHYS 528 and E E/PHYS 577. Crosslisted with: PHYS 578.

E E 581. *Digital Communication Systems I*
3 Credits (3)

E E 582. *Digital Communication Systems II*
3 Credits (3)
Error control techniques for digital transmission and storage systems. Introduction to basic coding bounds, linear and cyclic block codes, Reed-Solomon codes, convolutional codes, maximum likelihood decoding, maximum a posteriori probability decoding, factor graphs, low density parity check codes, turbo codes, iterative decoding. Applications to data networks, space and satellite transmission, and data modems. Recommended foundation: E E 200 and E E 496.

E E 583. *Wireless Communication*
3 Credits (3)
Cellular networks, wireless channels and channel models, modulation and demodulation, MIMO, diversity and multiplexing, OFDM, wireless standards including LTE and WiMAX. Recommended foundation: E E 571 and E E 325.

E E 585. *Telemetering Systems*
3 Credits (3)
Covers the integration of components into a command and telemetry system. Topics include analog and digital modulation formats, synchronization, link effects, and applicable standards. Recommended foundation: E E 395, E E 496, and E E 497.

E E 586. *Information Theory*
3 Credits (3)
This class is a study of Shannon’s measure of information and discusses mutual information, entropy, and channel capacity, the noiseless source coding theorem, the noisy channel coding theorem, channel coding and random coding bounds, rate-distortion theory, and data compression. Restricted to: Main campus only. Crosslisted with: MATH 509

**Prerequisite(s):** E E 571 or MATH 515.

E E 588. *Advanced Image Processing*
3 Credits (3)
Advanced topics in image processing including segmentation, feature extraction, object recognition, image understanding, big data, and applications. Crosslisted with: E E 444.

**Prerequisite(s):** E E 446 or E E 596.

E E 590. *Selected Topics*
1-9 Credits
May be repeated for a maximum of 18 credits.

E E 593. *Mobile Application Development*
3 Credits (3)
Introduction to mobile application development. Students will develop applications for iOS devices including iPhone and iPad. Topics include object-oriented programming using Swift, model-view-controller (MVC) pattern, view controllers including tables and navigation, graphical user interface (GUI) design, data persistence, GPS and mapping, camera, and cloud and web services. Recommended foundation: C S 451 or C S 452. Crosslisted with: E E 443.

E E 596. *Digital Image Processing*
3 Credits (3)
Two-dimensional transform theory, color images, image enhancement, restoration, segmentation, compression and understanding. Crosslisted with: E E 446.

E E 597. *Neural Signal Processing*
3 Credits (3)
Cross-disciplinary course focused on the acquisition and processing of neural signals. Students in this class will learn about basic brain structure, different brain signal acquisition techniques (fMRI, EEG, MEG, etc.), neural modeling, and EEG signal processing. To perform EEG signal processing, students will learn and use Matlab along with an EEG analysis package. Crosslisted with: E E 447.

E E 598. *Master’s Technical Report*
1-9 Credits (1-9)
E E 599. Master's Thesis  
1-15 Credits (1-15)  

E E 600. Doctoral Research  
1-15 Credits  
Research.

E E 615. Computational Electromagnetics  
3 Credits (3)  
The numerical solution of electromagnetics problems. Topics include differential equation techniques, integral equation methods, hybrid techniques, algorithm development and implementation, and error analysis. Particular algorithms, including FEM, finite differences, direct solvers, and iterative solvers, are studied.

E E 690. Selected Topics  
1-9 Credits  
May be repeated for a maximum of 9 credits.

E E 700. Doctoral Dissertation  
1-15 Credits (1-15)  

Name: The Klipsch School of Electrical and Computer Engineering  
Office Location: Thomas and Brown Hall, Rm 106  
1125 Frenger Mall  
Las Cruces, NM 88003  
Phone: (575) 646-3115  
Website: http://ece.nmsu.edu/ (http://ece.nmsu.edu)

Electrical Engineering - Bachelor of Science in Electrical Engineering

Overview  
The Bachelor of Science in Electrical Engineering (B.S. EE) program of the Klipsch School is accredited by the Engineering Accreditation Commission of ABET, Inc. This particular option of the B.S. EE program has "no concentration," giving students the greatest flexibility in course selection.

Electrical Engineering Program Educational Objectives  
Below are the program educational objectives (PEOs) that describe the expected accomplishments of graduate during their first few years after graduation.

1. Our graduates will obtain relevant, productive employment in the private sector, government and/or pursue an advanced degree.
2. Our graduates will be using their engineering foundation to innovate solutions to the problems of the real world.

Requirements (123-125 credits)  
Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 123 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Choose three courses, from three of the five different concentrations, from the following:

Communications & Signal Processing:  
E E 395 or E E 496  
Introduction to Digital Signal Processing  
Introduction to Communication Systems

Computers & Microelectronics:  
E E 462  
Computer Systems Architecture
# A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

## General Education Requirements

- **First Year**
  - General Education Requirement (Area I, IV, V, VI or VWW) | 8 |
  - General Education Requirement (Area I, IV, V, VI or VWW) | 8 |
- **Second Year**
  - General Education Requirement (Area I, IV, V, VI or VWW) | 3 |
  - Choose one Programming course from the following: | 3-4 |
  - C S 151 | C++ Programming | 4 |
  - C S 152 | Java Programming | 4 |
  - C S 153 | Python Programming I | 4 |
  - C S 154 | Python Programming II | 4 |
  - C S 172 | Computer Science I | 4 |
  - C S 271 | Object Oriented Programming | 4 |
  - See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

## Non-Departmental Requirements (in addition to Gen.Ed/VWW)

- **First Year**
  - Composition I | 4 |
  - Introduction to Programming and Embedded Systems | 4 |
  - Introduction to Computer Organization | 4 |
  - Semiconductor Devices and Electronics I | 4 |
  - Signals and Systems II | 4 |
  - Introduction to Digital Signal Processing or Introduction to Communication Systems | 4 |
  - Computer Systems Architecture or Introduction to Analog and Digital VLSI | 4 |
  - Power Systems II or Automatic Control Systems | 4 |
  - Automatic Control Systems | 4 |
  - Introduction to Programming and Embedded Systems | 4 |

## STEM Majors

- **First Year**
  - Programming Elective
  - ENGR Elective
  - E E Elective
  - Biology Requirement (Area D)
  - General Chemistry I Lecture and Laboratory for STEM Majors
  - General Chemistry I Lecture and Laboratory for STEM Majors
  - Calculus and Analytic Geometry I
  - Calculus and Analytic Geometry I

- **Second Year**
  - Calculus and Analytic Geometry II
  - Introduction to Ordinary Differential Equations
  - Calculus -Based Physics I
  - Calculus -Based Physics I Lab
  - Linear Algebra, Probability and Statistics Applications
  - AC Circuit Analysis

- **Third Year**
  - Cornerstone Design
  - Signals and Systems I
  - Fields and Waves
  - Introduction to Computer Organization
  - General Education Requirement (Area I, IV, V, VI or VWW) | 3 |

- **Fourth Year**
  - Engineering Capstone I
  - Between zero and three E E Concentration Courses from the following: | 0-9 |
  - Introduction to Digital Signal Processing or Introduction to Communication Systems
  - Computer Systems Architecture or Introduction to Analog and Digital VLSI
  - Power Systems II or Automatic Control Systems

## Credits

- **First Year**
  - Total Credits: 123-125

- **Second Year**
  - Total Credits: 9-0

- **Third Year**
  - Total Credits: 16-17

- **Fourth Year**
  - Total Credits: 15
Electrical Engineering (Communications and Signal Processing) - Bachelor of Science in Electrical Engineering

Overview
The Bachelor of Science in Electrical Engineering (B.S. EE) program of the Klipsch School is accredited by the Engineering Accreditation Commission of ABET, Inc. This particular concentration in the B.S. EE program gives students the opportunity to explore more deeply the area of communications and signal processing.

Electrical Engineering Program Educational Objectives
Below are the program educational objectives (PEOs) that describe the expected accomplishments of graduates during their first few years after graduation.

1. Our graduates will obtain relevant, productive employment in the private sector, government and/or pursue an advanced degree.
2. Our graduates will be using their engineering foundation to innovate solutions to the problems of the real world.

Requirements (123-125 credits)
Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 123 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix Title Credits
General Education
Area I: Communications
English Composition - Level 1 ENGL 1110G Composition I 4
Area II: Mathematics
MATH 1511G Calculus and Analytic Geometry I 4
Area III/IV: Laboratory Sciences and Social/Behavioral Sciences
CHEM 1215G General Chemistry I Lecture and Laboratory for STEM Majors 1
PHYS 1310G Calculus-Based Physics I 3
& PHYS 1310L and Calculus-Based Physics I Lab 4
Area IV: Social/Behavioral Sciences (3 credits)
Area V: Humanities 3
Area VI: Creative and Fine Arts 3
General Education Elective
MATH 1521G Calculus and Analytic Geometry II 4
Viewing A Wider World
Viewing a Wider World Electives 6
Departmental/College Requirements
Program Specific Requirements
Mathematics and Natural Science
MATH 392 Introduction to Ordinary Differential Equations 3
& PHYS 1320G Calculus-Based Physics II 4
PHYS 1320L and Calculus-Based Physics II Lab 4
ENGR 190 Introduction to Engineering Mathematics 4
EE 200 Linear Algebra, Probability and Statistics Applications 4
EE 240 Multivariate and Vector Calculus Applications 3

E E 496  Introduction to Communication Systems  3
E E Concentration Electives: Choose two courses from the following (one must be an E E course):
  E E 444  Advanced Image Processing
  E E 446  Digital Image Processing
  E E 447  Neural Signal Processing
  E E 460  Space System Mission Design and Analysis
  E E 465  Machine Learning I
  E E 490  Selected Topics (Wireless Communications)
  E E 497  Digital Communication Systems I
  C S 343  Algorithm Design & Implementation
  C S 372  Data Structures and Algorithms
  C S 453  Python Programming I
  C S 475  Artificial Intelligence I
  C S 476  Computer Graphics I
  C S 477  Digital Game Design
  C S 478  Computer Security
  C S 486  Bioinformatics
  MATH 471  Complex Variables
  MATH 472  Fourier Series and Boundary Value Problems
  MATH 473  Calculus of Variations and Optimal Control
  MATH 480  Applied Linear Algebra
  MATH 481  Advanced Linear Algebra
  MATH 491  Introduction to Real Analysis I
  STAT 470  Probability: Theory and Applications

Non-Departmental Requirements (in addition to Gen.Ed/VWW)

Programming Elective
Select one course from the following:  3-4
  C S 151  C++ Programming
  C S 152  Java Programming
  C S 153  Python Programming I
  C S 154  Python Programming II
  C S 172  Computer Science I
  C S 271  Object Oriented Programming

Second Language: (not required)

Electives, to bring the total credits to 123  0

Total Credits  123-125

See the General Education (p. 88) section of the catalog for a full list of courses.

2 MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I first.

3 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

4 STEM Elective: Course at the 300 level or above from E E that is not used to satisfy any other E E program requirement or courses at the 300 level or above from A E, C E, CHME, I E, M E, ASTR, BIOL, CHEM, C S, MATH, PHYS and STAT. Excluded courses include WFW courses and those which are substantially equivalent to an E E course. Click to view a list of excluded STEM Electives (https://ece.nmsu.edu/undergrad-study/BSEE-STEM-electives.html).

5 Students may take C S 153 Python Programming I toward their Programming Elective or C S 453 Python Programming I toward their E E Concentration Electives, but not both.

A Suggested Plan of Study for Students
This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year
Fall Credits
ENGR 190  Introduction to Engineering Mathematics  4
ENGL 1110G  Composition I  4
CHEM 1215G  General Chemistry I Lecture and Laboratory for STEM Majors  4
ENGR 120  DC Circuit Analysis  4

Credits  16

Spring
MATH 1511G  Calculus and Analytic Geometry I  4
General Education Requirement (Area I, IV, V, VI or VWW)  3
ENGR 130  Digital Logic  4
ENGR 140  Introduction to Programming and Embedded Systems  4

Credits  15

Second Year
Fall
MATH 1521G  Calculus and Analytic Geometry II  4
PHYS 1310G & PHYS 1310L  Calculus-Based Physics I and Calculus-Based Physics I Lab  4
E E 200  Linear Algebra, Probability and Statistics Applications  4
ENGR 230  AC Circuit Analysis  4

Credits  16

Spring
MATH 392  Introduction to Ordinary Differential Equations  3
PHYS 1320G & PHYS 1320L  Calculus-Based Physics II and Calculus-Based Physics II Lab  4
1. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I first.

2. See the General Education and Viewing a Wider World (p. 88) section of the catalog for a full list of courses.

3. Students must take both E E 395 Introduction to Digital Signal Processing and E E 496 Introduction to Communication Systems, both of which are offered in the Fall semester.

4. STEM Elective: Course at the 300 level or above from E E that is not used to satisfy any other E E program requirement or courses at the 300 level or above from A E, C E, CHME, I E, M E, ASTR, BIOL, CHEM, C S, MATH, PHYS and STAT. Excluded courses include VWW courses and those which are substantially equivalent to an E E course. Click to view a list of excluded STEM Electives (https://ece.nmsu.edu/undergrad-study/BSEE-STEM-electives.html).

5. Depending on availability of specific courses in the fall or spring semester, students may need to reorganize the ECE Electives, STEM electives, and/or Gen Ed/VWW electives in their final year. Students are strongly advised to consult with their ECE Faculty Mentor for assistance in planning their final year.

6. One Communications & Signal Processing Elective Courses must be from the E E Prefix. Communications & Signal Processing Elective Courses:

   - C S 343 Algorithm Design & Implementation, C S 372 Data Structures and Algorithms, C S 453 Python Programming I, C S 475 Artificial Intelligence I
   - C S 476 Computer Graphics I, C S 477 Digital Game Design, C S 478 Computer Security, C S 486 Bioinformatics
   - MATH 471 Complex Variables, MATH 472 Fourier Series and Boundary Value Problems, MATH 473 Calculus of Variations and Optimal Control, MATH 480 Applied Linear Algebra, MATH 481 Advanced Linear Algebra, MATH 491 Introduction to Real Analysis I
   - STAT 470 Probability: Theory and Applications

Electrical Engineering (Computers and Microelectronics) - Bachelor of Science in Electrical Engineering

Overview
The Bachelor of Science in Electrical Engineering (B.S. EE) program of the Klipsch School is accredited by the Engineering Accreditation Commission of ABET, Inc. This particular concentration in the B.S. EE program gives students the opportunity to explore more deeply the area of computers and microelectronics.

Electrical Engineering Program Educational Objectives
Below are the program educational objectives (PEOs) that describe the expected accomplishments of graduate during their first few years after graduation.

1. Our graduates will obtain relevant, productive employment in the private sector, government and/or pursue an advanced degree.
2. Our graduates will be using their engineering foundation to innovate solutions to the problems of the real world.

Requirements (123-125 credits)
Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 123 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits in courses numbered 300 or above. Developmental coursework in courses numbered 300 or above from A E, C E, CHME, I E, M E, ASTR, BIOL, CHEM, C S, MATH, PHYS, and STAT. Excluded courses include VWW courses and those which are substantially equivalent to an E E course.
Mathematics coursework may be needed in order to take the necessary English and Mathematics course work.

1 MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I first.

2 See the General Education and Viewing a Wider World (p. 88) section of the catalog for a full list of courses.

3 Students must take both E E 462 Computer Systems Architecture and E E 480 Introduction to Analog and Digital VLSI, both of which are offered in the Fall semester.

4 STEM Elective: Course at the 300 level or above from E E that is not used to satisfy any other E E program requirement or courses at the 300 level or above from A E, C E, CHME, I E, M E, ASTR, BIOL, CHEM, C S, MATH, PHYS and STAT. Excluded courses include VWW courses and those which are substantially equivalent to an E E course. Click to view a list of excluded STEM Electives (https://ece.nmsu.edu/undergrad-study/BSEE-STEM-electives.html).

5 Depending on availability of specific courses in the fall or spring semester, students may need to reorganize the ECE Electives, STEM electives, and/or Gen Ed/VWW electives in their final year. Students are strongly advised to consult with their ECE Faculty Mentor for assistance in planning their final year.

6 One Computers & Microelectronics Elective Courses must be from the E E Prefix. Computers & Microelectronics Elective Courses:

- CHME 467 Nanoscience and Nanotechnology

Electrical Engineering (Control & Power) - Bachelor of Science in Electrical Engineering

Overview
The Bachelor of Science in Electrical Engineering (B.S. EE) program of the Klipsch School is accredited by the Engineering Accreditation Commission of ABET, Inc. This particular concentration in the B.S. EE program gives students the opportunity to explore more deeply the area of control and power systems.

Electrical Engineering Program Educational Objectives
Below are the program educational objectives (PEOs) that describe the expected accomplishments of graduate during their first few years after graduation.

1. Our graduates will obtain relevant, productive employment in the private sector, government and/or pursue an advanced degree.
2. Our graduates will be using their engineering foundation to innovate solutions to the problems of the real world.

Requirements (123-124 credits)
Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 123 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

1. See the General Education (p. 88) section of the catalog for a full list of courses.
2. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I first.
3. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.
A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Intermediate Algebra and ENGL 1110G Rhetoric and Composition. The contents and order of this roadmap may vary depending on initial student placement in mathematics and english. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year
Fall
ENGR 190 Introduction to Engineering Mathematics 4
ENGL 1110G Composition I 4
CHEM 1215G General Chemistry I Lecture and Laboratory for STEM Majors 4
ENGR 120 DC Circuit Analysis 4

Credits 15

Spring
MATH 1511G Calculus and Analytic Geometry I 4
General Education Requirement (Area I, IV, V, VI or VWW) 2 3
ENGR 130 Digital Logic 4
ENGR 140 Introduction to Programming and Embedded Systems 4

Credits 16

Second Year
Fall
MATH 1521G Calculus and Analytic Geometry II 4
PHYS 1310G Calculus -Based Physics I 4
PHYS 1310L & PHYS 1310L and Calculus -Based Physics I Lab 4
E E 200 Linear Algebra, Probability and Statistics Applications 4
ENGR 230 AC Circuit Analysis 4

Credits 15

Spring
MATH 392 Introduction to Ordinary Differential Equations 3
PHYS 1320G Calculus -Based Physics II 4
PHYS 1320L & PHYS 1320L and Calculus -Based Physics II Lab 4
E E 240 Multivariate and Vector Calculus Applications 3
Choose one Programming course from the following: 3-4
C S 151 C++ Programming
C S 152 Java Programming
C S 153 Python Programming I
C S 154 Python Programming II
C S 172 Computer Science I
C S 271 Object Oriented Programming
General Education Requirement (Area I, IV, V, VI or VWW) 2 3

Credits 16-17

Third Year
Fall
E E 300 Cornerstone Design 2
E E 320 Signals and Systems I 3
E E 340 Fields and Waves 4
General Education Requirement (Area I, IV, V, VI or VWW) 2 3
General Education Requirement (Area I, IV, V, VI or VWW) 2 3

Credits 15

Spring
E E 317 Semiconductor Devices and Electronics I 4
E E 325 Signals and Systems II 4
E E 362 Introduction to Computer Organization 4
General Education Requirement (Area I, IV, V, VI or VWW) 2 3

Credits 15

Fourth Year
Fall
ENGR 401 Engineering Capstone I 3
E E 431 Power Systems II 3 3
E E 475 Automatic Control Systems 3 3
STEM Elective 4,5 3
General Education Requirement (Area I, IV, V, VI or VWW) 2,5 3

Credits 15

Spring
ENGR 402 Engineering Capstone II 3
Control & Power Elective 4,6 3
Control & Power Elective 4,6 3
STEM Elective 4,5 3
General Education Requirement (Area I, IV, V, VI or VWW) 2,5 3

Credits 15

Total Credits 123-124

1 MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I first.

2 See the General Education and Viewing a Wider World (p. 88) section of the catalog for a full list of courses.

3 Students must take both E E 431 Power Systems II and E E 475 Automatic Control Systems, both of which are offered in the Fall semester.

4 STEM Elective: Course at the 300 level or above from E E that is not used to satisfy any other E E program requirement or courses at the 300 level or above from A E, C E, CHME, I E, M E, ASTR, BIOL, CHEM, C S, MATH, PHYS and STAT. Excluded courses include VWW courses and those which are substantially equivalent to an E E course. Click to view a list of excluded STEM Electives (https://ece.nmsu.edu/undergrad-study/BSEE-STEM-electives.html).

5 Depending on availability of specific courses in the fall or spring semester, students may need to reorganize the ECE Electives, STEM electives, and/or Gen Ed/VWW electives in their final year. Students are strongly advised to consult with their ECE Faculty Mentor for assistance in planning their final year.
One Control & Power Elective Courses must be from the E E Prefix.
Control & Power Elective Courses:
- C S 343 Algorithm Design & Implementation, C S 483
- CHME 361 Engineering Materials
- M E 481 Alternative and Renewable Energy, M E 487 Mechatronics
- MATH 480 Applied Linear Algebra

**Electrical Engineering (Electromagnetics and Photonics) - Bachelor of Science in Electrical Engineering**

**Overview**
The Bachelor of Science in Electrical Engineering (B.S. EE) program of the Klipsch School is accredited by the Engineering Accreditation Commission of ABET, Inc. This particular concentration in the B.S. EE program gives students the opportunity to explore more deeply the area of electromagnetics and photonics.

**Electrical Engineering Program Educational Objectives**
Below are the program educational objectives (PEOs) that describe the expected accomplishments of graduate during their first few years after graduation.

1. Our graduates will obtain relevant, productive employment in the private sector, government and/or pursue an advanced degree.
2. Our graduates will be using their engineering foundation to innovate solutions to the problems of the real world.

**Requirements (124-127 credits)**
Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 124 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Total Credits 124-127

MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I first.

See the General Education and Viewing a Wider World (p. 92) section of the catalog for a full list of courses.
One Electromagnetics & Photonics Elective Courses must be from the E E Prefix. Electromagnetics & Photonics Elective Courses:

- ASTR 402 Introduction to Astronomical Observations and Techniques
- E 449 Smart Antennas, E 452 Introduction to Radar, or E 453 Microwave Engineering, or 478 Fundamentals of Photonics
- E 479 Lasers and Applications
- CHME 467 Nanoscience and Nanotechnology
- M 328 Engineering Analysis II
- MATH 471 Complex Variables, MATH 472 Fourier Series and Boundary Value Problems, MATH 480 Applied Linear Algebra
- PHYS 315 Modern Physics, PHYS 471 Modern Experimental Optics

Depending on availability of specific courses in the fall or spring semester, students may need to reorganize the ECE Electives, STEM electives, and/or Gen Ed/VWW electives in their final year. Students are strongly advised to consult with their ECE Faculty Mentor for assistance in planning their final year.

STEM Elective: Course at the 300 level or above from E E that is not used to satisfy any other E E program requirement or courses at the 300 level or above from A E, C E, CHME, I E, M E, ASTR, BIOL, CHEM, C S, MATH, PHYS and STAT. Excluded courses include VWW courses and those which are substantially equivalent to an E E course. Click to view a list of excluded STEM Electives (https://ece.nmsu.edu/undergrad-study/BSEE-STEM-electives.html).

Students must take both E 454 Antennas and Radiation and E 473 Introduction to Optics, both of which are offered in the Spring semester.

Electrical Engineering (Space Systems) - Bachelor of Science in Electrical Engineering

Overview
The Bachelor of Science in Electrical Engineering (B.S. EE) program of the Klipsch School is accredited by the Engineering Accreditation Commission of ABET, Inc. This particular concentration in the B.S. EE program gives students the opportunity to explore more deeply the area of space systems.

Electrical Engineering Program Educational Objectives
Below are the program educational objectives (PEOs) that describe the expected accomplishments of graduate during their first few years after graduation.

1. Our graduates will obtain relevant, productive employment in the private sector, government and/or pursue an advanced degree.
2. Our graduates will be using their engineering foundation to innovate solutions to the problems of the real world.

Requirements (123-126 credits)

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 123 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Intermediate Algebra and ENGL 1110G Rhetoric and Composition. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

General Education Requirement (Area I, IV, V, VI or VWW) 2,4  

Credits 15  

Total Credits 123-126  

1 MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I first.  

2 See the General Education and Viewing a Wider World (p. 92) section of the catalog for a full list of courses.  

3 One Space Systems Elective Course must be from the E E Prefix. Space Systems Elective Courses:  
   - E E 395 Introduction to Digital Signal Processing, E E 454 Antennas and Radiation, E E 473 Introduction to Optics, E E 478 Fundamentals of Photonics, E E 496 Introduction to Communication Systems  
   - A E 362 Orbital Mechanics  
   - ASTR 401 Topics in Modern Astrophysics  

4 Depending on availability of specific courses in the fall or spring semester, students may need to reorganize the ECE Electives, STEM electives, and/or Gen Ed/VWW electives in their final year. Students are strongly advised to consult with their ECE Faculty Mentor for assistance in planning their final year.  

5 STEM Elective: Course at the 300 level or above from E E that is not used to satisfy any other E E program requirement or courses at the 300 level or above from A E, C E, CHME, I E, M E, ASTR, BIOL, CHEM, C S, MATH, PHYS and STAT. Excluded courses include VWW courses and those which are substantially equivalent to an E E course. Click to view a list of excluded STEM Electives (https://ece.nmsu.edu/undergrad-study/BSEE-STEM-electives.html).  

6 Students must take both E E 460 Space System Mission Design and Analysis and E E 462 Introduction to Astronomical Observations and Techniques which are both offered in the Spring semester.

Total Credits 21-24  

1 Some of the E E Electives have additional pre-requisites
Electrical Engineering - Master of Engineering in Electrical Engineering

Requirements and Options for M.E.E.E. Degree

The Program Educational Objectives for the Master of Engineering Program in Electrical Engineering are:

1. That graduates successfully apply advanced skills and techniques in one or more areas of emphasis.
2. That graduates obtain relevant, productive employment with the private sector or in government and/or pursue additional advanced degrees.

The M.E.E.E. is a coursework-only option for obtaining a master’s degree. The requirement is a total of 30 credits of graduate course work, including passing with a grade of B or better six Graduate Expanded Core Courses from at least three different areas of emphasis. No oral exam is required for the MEEE.

Credits of E E 590 Selected Topics are limited to a total of 6. Other limitations and requirements that apply to all master’s degrees are described elsewhere in this catalog.

Graduate Expanded Core Courses

The MEEE program requires students to take six courses from at least three different areas of emphasis from the list of Graduate Expanded Core Courses. Students who may wish to pursue a Ph.D. in the future are encouraged to include three courses from the MSEE Graduate Core Courses as part of their Graduate Expanded Core; the three MSEE Graduate Core Courses will satisfy one of the requirements for the Ph.D. qualifying exam. The areas of emphasis and credits are listed below for the Graduate Expanded Core Courses with additional specification as to which of those are the MSEE Graduate Core Courses.

Total Credits: 30

1 This course is one of the MSEE Graduate Core Courses. Students pursuing the MEEE who wish to pursue the Ph.D. in the future are encouraged to select three courses from this subset of courses to satisfy one of the requirements for the Ph.D. Qualifying Exam (https://ece.nmsu.edu/grad-study/phd-qualifying.html).

2 This course is included in multiple areas of emphasis. Students may use this course to satisfy one area of emphasis.

Included Prefixes

Graduate course work credits from the following prefixes are permitted for the MEEE degree. If a graduate course outside this list of prefixes logically fits into the MEEE program, see your graduate advisor about requesting an exception.
### College of Agriculture/Consumer/Environmental Sciences
- AECC
- ENVS
- GENE

### College of Arts and Sciences
- ASTR

**Communications**
E E 571  Random Signal Analysis
E E 572  Modern Coding Theory
E E 573  Signal Compression
E E 581  Digital Communication Systems I
E E 583  Wireless Communications
E E 585  Telemetering Systems
E E 586  Information Theory

**Controls & Robotics**
E E 551  Control System Synthesis I
E E 565  Machine Learning I
E E 576  Geometric Algebra
E E 596  Digital Image Processing

**Graduate Electives: choose 3 to 4 courses** 12-9

**Total Credits** 30

---

1 This course is one of the MSEE Graduate Core Courses. Students pursuing the MEEE who wish to pursue the Ph.D. in the future are encouraged to select three courses from this subset of courses to satisfy one of the requirements for the Ph.D. Qualifying Exam (https://ece.nmsu.edu/grad-study/phd-qualifying.html).

2 This course is included in multiple areas of emphasis. Students may use this course to satisfy one area of emphasis.

**Included Prefixes**
Graduate course work credits from the following prefixes are permitted for the MEEE degree. If a graduate course outside this list of prefixes logically fits into the MEEE program, see your graduate advisor about requesting an exception.

Electrical Engineering - Master of Science in Electrical Engineering

M.S.E.E. Degree Options

The Program Educational Objectives for the Master of Science Program in Electrical Engineering are:

1. That graduates successfully apply advanced skills and techniques in one or more areas of emphasis.
2. That graduates obtain relevant, productive employment with the private sector or in government and/or pursue additional advanced degrees.

Two options exist for the Master of Science in Electrical Engineering degree. The requirements for each option are listed below:

Thesis Option:
The Master of Science in Electrical Engineering Thesis Option requires:

1. 24 credits of course work plus 6 credits of E E 599 Master’s Thesis plus oral exam
2. Two graduate core courses and a third breadth elective (or third core course) from three different areas of emphasis

Note that credits of E E 590 Selected Topics are limited to a total of 9, of which at most 6 may be credits for courses that don’t appear as regular classes in the printed schedule. In addition, each area of emphasis may have additional requirements for students in those areas. Other limitations and requirements that apply to all master’s degrees are described elsewhere in this catalog.

Technical Report Option:
The Master of Science in Electrical Engineering Technical Report Option requires:

1. 27 credits of course work plus 3 credits of E E 598 Master’s Technical Report plus oral exam
2. Two graduate core courses and a third breadth elective (or third core course) from three different areas of emphasis

Note that credits of E E 590 Selected Topics are limited to a total of 9, of which at most 6 may be credits for courses that don’t appear as regular classes in the printed schedule. In addition, each area of emphasis may have additional requirements for students in those areas. Other limitations and requirements that apply to all master’s degrees are described elsewhere in this catalog.

Graduate Core Courses and Breadth Electives
The MSEE program requires students to take two graduate core courses from two different areas of emphasis. In addition, either a third graduate core course OR one graduate breadth elective must be taken from a third area of emphasis. If a student wishes to pursue a Ph.D., the third class should come from the list of Graduate Core Courses as preparation for the Ph.D. qualifying exam. The graduate core courses, areas of emphasis, and credits are listed below for the Graduate Core Courses and the Graduate Breadth Electives.

Graduate Core Courses

Prefix | Title | Credits
---|---|---
E E 515 | Electromagnetic Theory I | 3
E E 523 | Analog VLSI Design | 3
E E 528 | Fundamentals of Photonics | 3
or E E 529 | Lasers and Applications | 3
E E 543 | Power Systems III | 3
E E 545 | Digital Signal Processing II | 3
E E 564 | Architectural Concepts II | 3
E E 571 | Random Signal Analysis | 3
E E 551 | Control System Synthesis I | 3

Total Credits 6-9

Graduate Breadth Electives

Prefix | Title | Credits
---|---|---
E E 512 | ASIC Design | 3
E E 537 | Power Electronics | 3
E E 541 | Antennas and Radiation | 3
E E 585 | Telemetering Systems | 3
E E 581 | Digital Communication Systems I | 3
E E 576 | Geometric Algebra | 3

1 The selected Graduate Breadth Elective must be from a different area of emphasis than the two Graduate Core Courses. Alternately, a third Graduate Core Course may be selected.

Included Prefixes
Graduate course work credits from the following prefixes are permitted for the MSEE degree. If a graduate course outside this list of prefixes logically fits into the MSEE program, see your graduate advisor about requesting an exception.

**Engineering (Electrical Engineering) - Doctor of Philosophy**

**Requirements for Ph.D. Degree**

The Program Educational Objectives for the Doctorate in Electrical Engineering are:

1. That graduates obtain relevant, productive employment performing research in academia, government or industry, and/or are teaching at institutions of higher education.
2. That graduates obtain relevant, productive employment with the private sector or in government and/or pursue additional advanced degrees.

The Ph.D. program is open to students with a master’s degree. Exceptionally well qualified students may petition for direct entry to the Ph.D. program without first obtaining a master’s degree.

**Option 1 - Ph.D. with Completed MS Degree**

1. Complete undergraduate deficiency coursework, if the student admitted has both master’s and bachelor’s degrees in fields other than electrical engineering. Complete graduate deficiency coursework, which consists of three graduate core courses from three different areas of emphasis, if the student has a master’s degree in a field other than electrical engineering.

2. Complete a minimum of 18 credits beyond the master’s of graduate course work with the following restrictions:
   a. E E courses must be numbered 500 or higher. Non-E E courses must be 450 or higher.
   b. At least half of the 18 credits must be taken in the Klipsch School (E E).
   c. At most 6 credits may be research, for example, E E 600 Doctoral Research, and E E 590 Selected Topics courses that are not listed as regular courses in the schedule.
   e. If the MS degree is not E E, exclude credits from graduate deficiency coursework.

**Option 2 - Direct Ph.D. with BSEE or Equivalent, but no MS Degree**

2. Complete a minimum of 42 credits of graduate coursework, including the three graduate core courses with the following restrictions:
   a. At least half of the 42 credits must be numbered 500 or higher.
   b. At least half of the 42 credits must be taken in the Klipsch School (E E).
c. At most 9 credits may be research, for example, E E 600 Doctoral Research, and E E 590 Selected Topics courses that are not listed as regular courses in the schedule.

e. Courses excluded from the MSEEE are also excluded from the Ph.D. program.

f. At least half of the credits must be taken with other than a single professor.

Common Requirements for all Ph.D. Candidates

1. Take and pass the Ph.D. Qualifying Exam. It is expected that students will take the qualifying exam within one year of their MSEEE or entering the Ph.D. program. The qualifying exam consists of two components: completing the graduate core (https://ece.nmsu.edu/grad-study/grad-core-courses.html) with a grade of B or better and presenting a written and oral summary of a topical literature review. For more details on the qualifying exam, see Ph.D. Qualifying Exam (https://ece.nmsu.edu/grad-study/phd-qualifying.html).

2. Pass a comprehensive examination. The examination must be written and part oral. The specific format of the exam is at the discretion of the examination committee. It may cover course work, include a proposal for dissertation research, and may be preceded by a written exam.

4. Submit evidence for a minimum of two publications related to the dissertation research, one of which is submitted to an internationally-recognized journal, such as IEEE Transactions, and the second of which may be with a professional conference, such as an IEEE conference. Submissions must be completed prior to the final oral exam. For more details on the publication requirement, see College of Engineering Ph.D. Publication Requirement Form (https://gradschool.nmsu.edu/Current%20Students/College-of-Engineering-Ph.D.-Publication-Requirement-Form1.pdf).

5. Pass a final oral exam which defends the dissertation.

Other limitations and requirements that apply to all Ph.D. degrees are described elsewhere in this catalog.

Digital Communications - Graduate Certificate

Digital Communications focuses on the problem of transmitting information from one place to another through some medium (e.g., RF wireless). This certificate introduces students to the basic theory as well as the application of that theory.

A 3.0 minimum cumulative GPA in four courses (12 credits) as described below will be required for award of this certificate. Dr. Deva Borah, Associate Director of the Electric Utility Management Program and Professor of the Klipsch School of Electrical & Computer Engineering, (575) 646-3919.

Digital Signal Processing - Graduate Certificate

Digital Signal Processing (DSP) focuses on the processing and analysis of digitized signals. This certificate introduces students to the basic theory as well as the application of that theory.

A 3.0 minimum cumulative GPA in four courses (12 credits) as described below will be required for award of this certificate. Dr. Charles Creusere, Frank Carden Chair in Telecommunications and Telemetering and Professor of the Klipsch School of Electrical & Computer Engineering, (575) 646-3919.

Total Credits 12

Electric Energy Systems - Graduate Certificate

Electric Energy Systems in recent times has started to develop a cross-disciplinary aspect due to developments and investments in the areas of renewables and smart electric grid technology. This trend is only likely to intensify over the years. Thus, in addition to the engineers already working in the area of electric energy systems, engineers from other areas in electrical and computer engineering may feel the need to develop core knowledge in the area of Electric Energy Systems, which is provided by this program.

A 3.0 minimum GPA in four courses (12 credits) as described below will be required for the awarding of this certificate. Dr. Sukumar Brahma, Associate Director of the Electric Utility Management Program and Associate Professor of the Klipsch of Electrical and Computer Engineering, (575) 646-7117.

Telemetry - Graduate Certificate

Telemetering is an applied discipline that uses concepts from communications, DSP, and computing to facilitate the transfer of sensed/
measured data from one place to another over a typically wireless channel. This certificate introduces students to the basic theory as well as the application of that theory.

A 3.0 minimum cumulative GPA in four courses (12 credits) as described below will be required for award of this certificate. Dr. Charles Creusere, Frank Carden Chair in Telecommunications and Telemetering and Professor of the Klipsch School of Electrical & Computer Engineering, (575) 646-3919.

Engineering Physics

Undergraduate Program Information

The Engineering Physics program is offered jointly by the Department of Physics and the College of Engineering. The faculty is drawn from the Departments of Physics, Chemical and Materials Engineering, Electrical and Computer Engineering, and Mechanical & Aerospace Engineering.

The B.S. in Engineering Physics confers an engineering credential. Students in the program complete an engineering core curriculum, as well as a rigorous course of study in physics and mathematics. A strong laboratory component prepares students in experimental techniques and technology using state-of-the-art equipment. The B.S. degree in Engineering Physics is accredited by the Engineering Accreditation Commission (EAC) of ABET, Inc.

The goals of the program are:

1. to give students a strong education in the fundamentals of physics, engineering, applied mathematics and computation;
2. to develop skill in real-world problem solving starting from fundamental physical principles;
3. to improve communication skills; and
4. to develop ability to work in a team.

The student must choose one of four concentrations in:

- Aerospace Engineering,
- Chemical Engineering,
- Electrical Engineering, or
- Mechanical Engineering.

Degrees for the Department

Engineering Physics (Aerospace) - Bachelor of Science in Engineering Physics (p. 962)

Engineering Physics (Chemical) - Bachelor of Science in Engineering Physics (p. 964)

Engineering Physics (Electrical) - Bachelor of Science in Engineering Physics (p. 966)

Engineering Physics (Mechanical) - Bachelor of Science in Engineering Physics (p. 968)

Professor, Stefan Zollner, Department Head

Professor, Heinz Nakotte, Engineering Physics Program Head

Physics Courses

PHYS 1111. Introductory Computational Physics
3 Credits (2+2P)
Introduction to computational techniques for the solution of physics-related problems.
Prerequisite(s): a C- or better in MATH 1220G or MATH 1250G or MATH 1511G.

PHYS 1112. Introductory Physics for the Health Sciences
3 Credits (3)
Algebra-level introduction to topics required for the Health Sciences including basic mechanics (including sound, mechanical waves and fluids), heat and thermodynamics, electricity and magnetism, optics and electromagnetic waves, atomic and nuclear physics and applications to medical imaging. Restricted to Community Colleges campuses only.
Prerequisite(s): MATH 1215 or Equivalent.

Learning Outcomes

1. The objective of the course is to familiarize the student with the concepts and methods used in the underlying physics associated with various Health Science disciplines.
2. The course will demonstrate how the basic principles of mechanics, thermodynamics, electricity, magnetism, electromagnetic waves and optics can be applied to solve particular problems in Health Sciences applications. Introduces the student to selected topics in modern physics including quantum physics, atomic and nuclear physics.

PHYS 1115G. Survey of Physics with Lab
4 Credits (3+3P)
Overview of the concepts and basic phenomena of physics. This course provides a largely descriptive and qualitative treatment with a minimum use of elementary mathematics to solve problems. No previous knowledge of physics is assumed. Includes laboratory.

Learning Outcomes

1. Apply concepts of classical mechanics (such as velocity, acceleration, force, inertia, momentum, torque, work, energy) to simple static and dynamic systems.
2. Apply concepts of thermodynamics (such as heat, temperature, internal energy, entropy) to simple processes.
3. Apply concepts of electricity and magnetism (such as fields, potential, charge conservation, static and dynamic induction) to simple circuits, motors, and other simple contrivances.
4. Apply simple geometric and wave optics in simple situations.
5. Test ideas using modern laboratory equipment.
7. Use computers to analyze and report laboratory results.
8. Draw appropriate conclusions from quantitative scientific observations.
9. Accurately and clearly communicate the results of scientific experiments.
PHYS 1125G. Physics of Music
4 Credits (3+2P)
Introduction for non-science majors to basic concepts, laws, and skills in physics, in the context of a study of sound, acoustics, and music.

Learning Outcomes
1. Demonstrate converting units and other aspects of dimensional analysis in the working of numerical problems.
2. Apply basic classical mechanics to static and dynamic fluids, including Archimedes’ principle and Bernoulli’s principle.
3. Apply the general properties of waves to simple models of musical instruments.
4. Demonstrate knowledge of basic operating principles of wind, string, and percussion instruments.
5. Demonstrate knowledge of how objectively measurable properties of sound waves correspond to the perceptions of pitch, loudness, and timbre.
6. Demonstrate understanding of the description of vibrations and waves in terms of Fourier’s Theorem and normal modes.
7. Demonstrate understanding of vocalization in terms of physical principles such as resonance and fluid dynamics.
8. Demonstrate understanding of how the ear works.

PHYS 1230G. Algebra-Based Physics I
3 Credits (3)
An algebra-based treatment of Newtonian mechanics. Topics include kinematics and dynamics in one and two dimensions, conservation of energy and momentum, rotational motion, equilibrium, and fluids.

Learning Outcomes
1. Demonstrate converting units and other aspects of dimensional analysis in the working of numerical problems.
2. Apply principles of Newtonian mechanics to predict and account for simple phenomena modeled by the motion of particles in one and two dimensions.
3. Apply principles of Newtonian mechanics to predict and account for simple phenomena modeled by the motion of a rigid body in two dimensions.
4. Apply Newton’s theory of gravitation to circular orbits and demonstrate understanding of how Kepler’s laws of planetary motion provide the empirical foundation for Newton’s theory.
5. Apply the mathematics of vectors to the principles of Newtonian mechanics.
6. Apply principles of Newtonian mechanics to the case of static and dynamic incompressible fluids, including Archimedes’ and Bernoulli’s principles.

PHYS 1230L. Algebra-Based Physics I Lab
1 Credit (1)
A series of laboratory experiments associated with the material presented in PHYS 1230G.

Prerequisite(s)/Corequisite(s): PHYS 1230G.

Learning Outcomes
1. Explain the scientific method.
2. Test ideas using modern laboratory equipment.
4. Use computers to analyze and report laboratory results.
5. Draw appropriate conclusions from quantitative scientific observations.
6. Accurately and clearly communicate the results of scientific experiments.

PHYS 1240G. Algebra-Based Physics II
3 Credits (3)
The second half of a two semester algebra-based introduction to Physics. This course covers electricity, magnetism and optics.

Prerequisite(s): a C- or better in PHYS 1230G or PHYS 2230G.

Learning Outcomes
1. Be able to state Coulomb’s Law and Gauss’s laws and apply them.
2. Apply the concepts of electric charge, electric field and electric potential to solve problems.
3. Analyze simple DC and AC circuits.
4. Apply the Lorentz force to solve problems.
5. Apply Faraday’s law of induction (and Lenz’s law) to solve problems.
6. Apply ray optics to practical lens systems such as microscopes and corrective lenses.
7. Apply the wave nature of light to the phenomena of reflection, refraction, and diffraction.

PHYS 1240L. Algebra-Based Physics II Lab
1 Credit (1)
A series of laboratory experiments associated with the material presented in PHYS 1240

Prerequisite(s)/Corequisite(s): PHYS 1240G.

Learning Outcomes
1. Explain the scientific method.
2. Test ideas using modern laboratory equipment.
4. Use computers to analyze and report laboratory results.
5. Draw appropriate conclusions from quantitative scientific observations.
6. Accurately and clearly communicate the results of scientific experiments.
PHYS 1310G. Calculus-Based Physics I
3 Credits (3)
A calculus level treatment of classical mechanics and waves, which is concerned with the physical motion concepts, forces, energy concepts, momentum, rotational motion, angular momentum, gravity, and static equilibrium.
**Prerequisite:** a C- or better in MATH 1511G or higher.

**Learning Outcomes**
1. Describe the relationships among position, velocity, and acceleration as functions of time. Use the equations of kinematics to describe motion under constant acceleration. Analyze linear motion using Newton's laws, force, and linear momentum. Analyze rotational motion using torque and angular momentum. Analyze motion using work and energy.

PHYS 1310L. Calculus-Based Physics I Lab
1 Credit (3P)
A series of laboratory experiments associated with the material presented in Calculus-based Physics I. Students will apply the principles and concepts highlighting the main objectives covered in coursework for Calculus-based Physics I.

**Prerequisite(s)/Corequisite(s):** PHYS 1310G.

**Learning Outcomes**
1. Develop a reasonable hypothesis.
2. Work effectively as part of a team.
3. Take measurements and record measured quantities to the appropriate precision.
4. Estimate error sources in experimental techniques.
5. Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools.
6. Determine whether results and conclusions are reasonable.
7. Present experimental results in written form in appropriate style and depth.
8. Experience the relationship between theory and experiment.

PHYS 1311. Problems in Calculus-Based Physics I
0.5-1 Credits (.5-1)
This is a supplemental course for Calculus-based Physics I. May be repeated up to 1 credits.

**Corequisite(s):** PHYS 1310G.

PHYS 1320G. Calculus-Based Physics II
3 Credits (3)
A calculus level treatment of classical electricity and magnetism. It is strongly recommended that this course is taken at the same time as Calculus-based Physics II laboratory.

**Prerequisite:** a C- or better in PHYS 2110 or PHYS 1310G and MATH 1521G or higher.

**Learning Outcomes**
1. Apply the concepts of electric charge, electric field and electric potential to solve problems. Sketch the electric field in the vicinity of point, line, sheet, and spherical distributions of static electric charge. Sketch the magnetic field in the vicinity of line, ring, sheet, and solenoid distributions of steady current. Describe the relationship between electric field and electric potential. Calculate the Lorentz force on a moving charge for simple geometries of the fields and use it to analyze the motion of charged particles. Apply the integral forms of Maxwell’s equations. Calculate the energy of electromagnetic fields. Analyze DC circuits.

PHYS 1320L. Calculus-Based Physics II Lab
1 Credit (3P)
A series of laboratory experiments associated with the material presented in Calculus-Based Physics II. Students will apply the principles and concepts highlighting the main objectives covered in coursework for Calculus-Based Physics II.

**Prerequisite(s)/Corequisite(s):** PHYS 1320G. Prerequisite(s): A C- or better in PHYS 2110L or PHYS 1310L.

**Learning Outcomes**
1. Develop a reasonable hypothesis.
2. Work effectively as part of a team.
3. Take measurements and record measured quantities to the appropriate precision.
4. Estimate error sources in experimental techniques.
5. Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools.
6. Determine whether results and conclusions are reasonable.
7. Present experimental results in written form in appropriate style and depth.
8. Experience the relationship between theory and experiment.

PHYS 1321. Problems in Calculus-Based Physics II
0.5-1 Credits (.5-1)
This is a supplemental course for Calculus-based Physics II.

**Corequisite(s):** PHYS 1320G.

PHYS 2110. Mechanics
3 Credits (3)
Newtonian mechanics.

**Prerequisite(s)/Corequisite(s):** MATH 1511G or higher.

PHYS 2110L. Experimental Mechanics
1 Credit (3P)
Laboratory experiments associated with the material presented in PHYS 2110. Science majors.

**Prerequisite(s)/Corequisite(s):** PHYS 2110.

PHYS 2111. Supplemental Instruction to PHYS 2110
1 Credit (1)
This Optional workshop as a supplement to PHYS 2110. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credit.

**Corequisite:** PHYS 2110.

**Learning Outcomes**
1. Analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. Use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. In the contexts of concepts and physical laws discussed in PHYS 2110, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra.
4. Self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. Develop learning strategies and use metacognition to promote thinking in the discipline.
PHYS 2120. Heat, Light, and Sound  
3 Credits (3)  
Calculus-level treatment of thermodynamics, geometrical and physical optics, and sound. May be repeated up to 3 credits.  
Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G, and MATH 1511G or higher.

PHYS 2120L. Heat, Light, and Sound Laboratory  
1 Credit (3P)  
Laboratory experiments associated with the material presented in PHYS 2120. Science majors.  
Prerequisite: a C- or better in PHYS 2110L or PHYS 1310L.  
Prerequisite/Corequisite: PHYS 2120.

Learning Outcomes  
1. Develop a reasonable hypothesis. Work effectively as part of a team. Take measurements and record measured quantities to the appropriate precision. Estimate error sources in experimental techniques. Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools. Determine whether results and conclusions are reasonable. Present experimental results in written form in appropriate style and depth. Understand the relationship between theory and experiment.

PHYS 2121. Supplemental Instruction to PHYS 2120  
1 Credit (1)  
This optional workshop supplements PHYS 2120 "Heat, Light, and Sound". Students actively apply concepts and methods introduced in PHYS 2120 to problem solving and quantitative analysis. May be repeated up to 1 credit.  
Corequisite: PHYS 2120.

Learning Outcomes  
1. Analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomenon or function.  
2. Use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.  
3. In the contexts of concepts and physical laws discussed in PHYS 2121, apply quantitative analysis to solve problems involving wave propagation and interference, geometric optics, heat transfer and thermodynamics.  
4. Self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.  
5. Develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2140L. Electricity & Magnetism Laboratory  
1 Credit (3P)  
Laboratory experiments associated with the material presented in PHYS 2140.  
Prerequisite: a C- or better in PHYS 2110 or PHYS 1310G.  
Prerequisite/Corequisite: PHYS 2140.

Learning Outcomes  
1. Develop a reasonable hypothesis. Work effectively as part of a team. Take measurements and record measured quantities to the appropriate precision. Estimate error sources in experimental techniques. Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools. Determine whether results and conclusions are reasonable. Present experimental results in written form in appropriate style and depth. Understand the relationship between theory and experiment.

PHYS 2141. Supplemental Instruction to PHYS 2140  
1 Credit (1)  
Optional workshop as a supplement to PHYS 2140. The tutorial sessions focus on reasoning and hands-on problem solving.  
Corequisite: PHYS 2140.

Learning Outcomes  
1. Analyze real-world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomenon or function. Use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text. In the contexts of concepts and physical laws discussed in PHYS 2140, apply quantitative analysis to solve problems, including the use of symmetry to study electric and magnetic fields. Practice concepts of calculus applied to charge and current distributions. Self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments. Develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2140. Electricity and Magnetism  
3 Credits (3)  
Charges and matter, the electric field, Gauss law, the electric potential, the magnetic field, Ampere's law, Faraday's law, electric circuits, alternating currents, Maxwell's equations, and electromagnetic waves. May be repeated up to 3 credits.  
Prerequisite(s)/Corequisite(s): MATH 1521G. Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G, and MATH 1511G or higher.
PHYS 2230G. General Physics for Life Science I
3 Credits (3)
This algebra-based introduction to general physics covers mechanics, waves, sound, and heat. Special emphasis is given to applications in the life sciences. This course is recommended for students in the life sciences and those preparing for the physics part of the MCAT.
Prerequisite: A C or better in MATH 1215 or higher.
Learning Outcomes
1. Modeling: analyze real-world phenomena by deciding what information is relevant and constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain phenomena or function; use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text; critique assumptions and determine how to test the validity of a model and use the comparison of experimental data and prediction to refine the model.
2. Conceptual understanding: describe the motion of any object in terms of displacement, velocity, and acceleration; analyze external forces acting on an object and determine if a system is in equilibrium or relate the net force to changes in motion; predict or analyze motion using conservation laws for energy and momentum; analyze forces and torques for a rigid object in static equilibrium; for a static fluid determine pressure and the buoyant force; apply idealized models of fluid flow to the circulatory system; describe the properties of pressure waves known as sound, apply the model of standing waves to musical instruments and discuss how sound is used to sense the environment; predict qualitative changes in the internal energy of a thermodynamic system when energy has been transferred due to work or heat and justify those predictions using conservation of energy (First law of thermodynamics); identify which heat transfer processes occur in a described situation.
3. Quantitative reasoning: use a physics problem-solving strategy (Identify relevant concepts; Introduce and study simplified models; Use symmetry arguments; Establish the relation between known and unknown quantities; Calculate a quantitative result using appropriate mathematical methods; Self-check reasonableness of assumptions and solutions); use scientific notation accurately and convert units if necessary.
4. Communicating scientific information: interpret or generate graphs or other visual representations and be able to switch between various representations including text, mathematical description, or diagrams.

PHYS 2230L. Laboratory to General Physics for Life Science I
1 Credit (1)
Laboratory experiments in topics associated with material presented in PHYS 2230G.
Prerequisite(s)/Corequisite(s): PHYS 2230G. Restricted to Las Cruces campus only.

PHYS 2231. Supplemental Instruction to General Physics for Life Sciences I
1 Credit (1)
This optional workshop supplements Physics for Life Sciences I. The tutorial sessions focus on reasoning and hands-on problem solving.
Corequisite: PHYS 2230G.
Learning Outcomes
1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. in the contexts of concepts and physical laws discussed in PHYS 2230, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra.
4. self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2240G. General Physics for Life Science II
3 Credits (3)
This algebra-based course covers electricity, magnetism, light, atomic physics, and radioactivity. Special emphasis is given to applications in the life sciences. This course is recommended for students in the life sciences and those preparing for the physics part of the MCAT.
Prerequisite: a C- or better in PHYS 1230G or PHYS 2230G, and MATH 1220G or higher.
Learning Outcomes
1. Modeling: analyze real world phenomena by constructing simplified idealized models (an abstract description) that allow making predictions or explaining a phenomena or function; use multiple representations to build and communicate the model, including sketches, mathematical expressions, diagrams or graphs; decide what information is relevant and critique assumptions and models of others; determine how to test the validity of a model and use comparison of experimental data and prediction to refine the model.
2. Conceptual understanding: electric or magnetic fields can be used to describe interactions of objects that contain charges with their surroundings; changes that occur as a result of interactions are constrained by conservation laws (such as conservation of energy, conservation of charge or conservation of nucleon number); many macroscopic properties of materials can be described using microscopic models or related to their geometry; electromagnetic radiation can be modeled as a wave or as fundamental particles (photons); the direction of propagation of a wave may change when it encounters a boundary surface between two media of different properties (reflection or refraction); the spontaneous radioactive decay of nuclei is described by probability. Quantitative reasoning: apply quantitative analysis and appropriate mathematical reasoning to describe or explain phenomena; use scientific notation accurately and convert units if necessary. Communicating scientific information: interpret or generate graphs or other visual representations (e.g. field lines, equipotential lines) and be able to switch between various representations including text, mathematical description, or diagrams.
PHYS 2240L. Laboratory to General Physics for Life Science II
1 Credit (1)
Laboratory experiments in topics associated with material presented in PHYS 2240.
Prerequisite(s)/Corequisite(s): PHYS 2240G. Restricted to Las Cruces campus only.
PHYS 2241. Supplemental Instruction to General Physics for Life Sciences II
1 Credit (1)
This optional workshop is a supplement to Physics for Life Science II. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.
Corequisite(s): PHYS 2240G.
Learning Outcomes
1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text. in the contexts of concepts and physical laws discussed in PHYS 2240, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra. self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments. develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2996. Special Topics
1-3 Credits
Topics to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.
Learning Outcomes
1. Varies

PHYS 2997. Independent Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.
Learning Outcomes
1. Varies

PHYS 303V. Energy and Society in the New Millennium
3 Credits (3)
Traditional and alternative sources of energy. Contemporary areas of concern such as the state of depletion of fossil fuels; nuclear energy, solar energy, and other energy sources; environmental effects; nuclear weapons; and health effects of radiation. Discussion of physical principles and impact on society. Focus on scientific questions involved in making decisions in these areas. No physics background required.

PHYS 304. Forensic Physics
4 Credits (3+3P)
Theories, laboratory, and field techniques in the area of forensic physics.

PHYS 305V. The Search for Water in the Solar System
3 Credits (3)
Examines the formation, abundance and ubiquity of water in our Solar System stemming from comets, Martian and Lunar poles, Earth's interior and into the outer reaches of the Solar System. Topics will include nuclear synthesis, Solar System formation, remote sensing, as well as past, present and future NASA missions for water.

PHYS 305. Modern Physics
3 Credits (3)
An introduction to relativity and quantum mechanics, with applications to atoms molecules, solids, nuclei, and elementary particles.
Prerequisite: a C- or better in MATH 2530G and PHYS 2140 or PHYS 1320G.
Learning Outcomes
1. Communication: an ability to communicate effectively with a range of audiences. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 315 L. Experimental Modern Physics
3 Credits (1+6P)
Elementary laboratory in modern physics which supports the subject matter in PHYS 315. Required for physics majors. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): PHYS 315. Prerequisite(s): a C- or better in PHYS 2140L or 1320L.

PHYS 316. Supplemental Instructions to PHYS 315
1 Credit (1)
This optional workshop supplements PHYS 315 "Modern Physics". Students actively apply concepts and methods introduced in PHYS 315 to problem solving and quantitative analysis.
Corequisite(s): PHYS 315.

PHYS 325. Intermediate Experimental Physics
3 Credits (1+6P)
An exploration of a variety of experimental techniques in physics with an emphasis on the proper determination of statistical and systematic uncertainties. Students will work in teams and prepare professional written and oral reports of their work. This course cannot be used to replace M E 345 for students majoring in engineering.
Prerequisite(s)/Corequisite(s): PHYS 315. Prerequisite(s): a C- or better in PHYS 2140L or PHYS 1320L.
Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
2. Communication: an ability to communicate effectively with a range of audiences.
3. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
5. Collect, Analyze, and Interpret Data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
PHYS 350. Special Topics
1-3 Credits
Lectures, demonstrations, and discussions on such topics as lasers and holography, energy sources, clouds, and biophysics. May be repeated for a maximum of 12 credits under different subtitles.

PHYS 380. Individual Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

PHYS 395. Intermediate Mathematical Methods of Physics
3 Credits (3)
Introduction to the mathematics used in intermediate-level physics courses. Topics include vector calculus, curvilinear coordinates, matrices, linear algebra, function spaces, partial differential equations, and special functions. This course cannot be used to replace M E 228 or M E 328 for students majoring in engineering. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): MATH 392. Prerequisite(s): a C- or better in MATH 2530G.

PHYS 400. Undergraduate Research
1-3 Credits
May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

PHYS 420. Capstone Project I
3 Credits (3P)
Application of engineering physics principles to a significant design project. Includes teamwork, written and oral communication and realistic technical, economic and public safety requirements.

PHYS 421. Capstone Project II
3 Credits (3P)
Continuation of PHYS 420.

PHYS 450. Selected Topics
1-3 Credits
Readings, lectures or laboratory studies in selected areas of physics. May be repeated for a maximum of 12 credits.

PHYS 451. Intermediate Mechanics I
3 Credits (3)
Newtonian mechanics, including an introduction to the Lagrangian formulation. Topics include central force motion, rigid body motion, noninertial reference frames, oscillating systems, and classical scattering.
Prerequisite(s)/Corequisite(s): MATH 392. Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G, and MATH 2530G.

Learning Outcomes
1. Set up equations of motion for classical mechanical systems and solve them. Identify conserved quantities and understand the circumstances under which they arise (symmetries); in particular, know how to use conservation of energy, momentum, angular momentum to solve problems. Fluently use three-dimensional calculus as a language to do the above; be able to use spherical and cylindrical coordinates. Understand the paradigmatic examples of the harmonic oscillator, central force (in particular, gravitational) motion and rigid body motion, which serve as starting points for investigating more complicated realistic problems.

PHYS 454. Intermediate Modern Physics I
3 Credits (3)
Introduction to quantum mechanics, focusing on the role of angular momentum and symmetries, with application to many atomic and subatomic systems. Specific topics include intrinsic spin, matrix representation of wave functions and observables, time evolution, and motion in one dimension.
Prerequisite: a C- or better in PHYS 315.
Prerequisite/Corequisite: MATH 392 and PHYS 395.

Learning Outcomes
1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 455. Intermediate Modern Physics II
3 Credits (3)
Continuation of subject matter of PHYS 454. Specific topics include rotation and translation in three dimensions, solution of central potential problems, perturbation theory, physics of identical particles, scattering theory, and the interaction between photons and atoms.
Prerequisite: a C- or better in PHYS 454, MATH 392, and PHYS 395.

Learning Outcomes
1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.
PHYS 461. Intermediate Electricity and Magnetism I
3 Credits (3)
The first part of a two-course sequence in classical electrodynamics. Covered topics include static electric and magnetic fields, Laplace's and Poisson's equations, electromagnetic work and energy, Lorentz force, Gauss's, Biot-Savart, and Ampere's laws, Maxwell's equations, as well as electric and magnetic fields in matter.
Prerequisite: a C- or better in PHYS 2140 or PHYS 1320G or equivalent and a C- or better in MATH 2530G.
Prerequisite/Corequisite: MATH 392 and PHYS 395.
Learning Outcomes
1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 462. Intermediate Electricity and Magnetism II
3 Credits (3)
Continuation of subject matter of PHYS 461. Covered topics include Maxwell's equations and their applications, electromagnetic waves, reflection, refraction, dispersion, radiating systems, interference and diffraction, as well as Lorentz transformations and relativistic electrodynamics.
Prerequisite: a C- or better in PHYS 461, MATH 392, and PHYS 395.
Learning Outcomes
1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 468. Intermediate X-ray Diffraction
3 Credits (3)
Introduction to x-ray diffraction and reflectivity spectra. Topics include X-ray sources and detectors, atomic spectra, characteristic x-rays, thermionic emission, synchrotron radiation, instrument components, and beam conditioners. Prerequisite(s): a C- or better in PHYS 315 and PHYS 325.
Learning Outcomes
1. Knowledge of structural properties of materials Experimental x-ray characterization techniques Presentation and writing skills in the discipline Ethics, teamwork, and career opportunities

PHYS 471. Modern Experimental Optics
3 Credits (1+6P)
Cumulative experience course in optics related to the material presented in PHYS 473 and PHYS 489.
Prerequisite: a C- or better in PHYS 315 and (PHYS 315 L or PHYS 325).
Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communication: an ability to communicate effectively with a range of audiences. Ethical and professional responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 475. Advanced Physics Laboratory
3 Credits (1+6P)
Cumulative experience course involving experiments in atomic, molecular, nuclear, and condensed-matter physics.
Prerequisite: a C- or better in PHYS 315 and (PHYS 315 L or PHYS 325).
Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communication: an ability to communicate effectively with a range of audiences. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, Analyze, and Interpret Data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
PHYS 476. Computational Physics
3 Credits (3)
Scientific visualization, numerical differentiation and interpolation, numerical integration, root finding, linear algebra, eigensystems, ODE's, Boundary value problems, PDE's, Monte-Carlo calculations, data description and analysis, Fast Fourier Transforms, and applications to advanced physics problems. Recommended is the knowledge of a programming language.
Prerequisite(s): a C- or better in PHYS 1111 or equivalent and MATH 392.
Learning Outcomes
1. learn how to use computers for solving problems in the physical sciences,
2. obtain skills to implement numerical simulation and modeling strategies,
3. learn how to monitor and analyze data graphically, during and after computation,
4. obtain workflow organization skills needed for the solution of complicated systems.

PHYS 480. Thermodynamics
3 Credits (3)
Thermodynamics and statistical mechanics. Basic concepts of temperature, heat, entropy, equilibrium, reversible and irreversible processes. Applications to solids, liquids, and gases.
Prerequisite: a C- or better in PHYS 2120, PHYS 315, and MATH 2530G.
Learning Outcomes
1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 485. Independent Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

PHYS 488. Introduction to Condensed Matter Physics
3 Credits (3)
Crystal structure, X-ray diffraction, energy band theory, phonons, cohesive energy, conductivities, specific heats, p-n junctions, defects, surfaces, and magnetic, optical, and low-temperature properties.
Prerequisite: a C- or better in PHYS 315.
Learning Outcomes
1. Learn the fundamental concepts of solid-state physics: classification of solids, crystal structure, band structure of solids, lattice vibrations, optical and magnetic properties of solids. Develop an ability to formulate and solve complex problems in solid state physics by applying the fundamental principles of physics and mathematics. Develop and ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 489. Introduction to Modern Materials
3 Credits (3)
Structure and mechanical, thermal, electric, and magnetic properties of materials. Modern experimental techniques for the study of material properties.
Prerequisite: a C- or better in PHYS 315.
Learning Outcomes
1. Learn the fundamental concepts of the physics of modern materials, such as crystal structure, properties of materials, and experimental techniques. Develop an ability to formulate and solve complex problems in the area of physics of modern materials by applying the principles of physics and mathematics. Develop an ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 493. Experimental Nuclear Physics
3 Credits (1+6P)
Cumulative experience course in nuclear physics such as measurement of radioactivity, absorption of radiation, nuclear spectrometry.
Prerequisite: a C- or better in PHYS 315 and (PHYS 315L or PHYS 325).
Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communications: an ability to communicate effectively with a range of audiences. Ethical and professional responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 495. Mathematical Methods of Physics I
3 Credits (3)
Applications of mathematics to experimental and theoretical physics. Topics include vector analysis, Fourier series and transforms, Green's functions, special functions, complex variables, tensor algebra and analysis.
Prerequisite(s): a C- or better in MATH 392 and PHYS 395.
Learning Outcomes
1. Deploy the tools of vector analysis and expansion into complete sets of functions to treat problems arising, e.g., in electrodynamics. Understand the elements of functional analysis underpinning, e.g., quantum mechanics, such as representations, operators and their inverses and spectra. Evaluate integrals of analytic functions using the calculus of residues. Take advantage of the transformation behavior, under symmetry operations, of representations of physical quantities, by casting physical relations in tensor language.

PHYS 500. Special Topics Seminar
1-2 Credits
Treatment of topics not covered by regular courses. Graded S/U. May be repeated.
PHYS 511. Mathematical Methods of Physics I
3 Credits (3)
Applications of mathematics to experimental and theoretical physics. Topics include vector analysis, Fourier series and transforms, Green’s functions, special functions, complex variables, tensor algebra and analysis.

Learning Outcomes
1. Deploy the tools of vector analysis and expansion into complete sets of functions to treat problems arising, e.g., in electrodynamics. Understand the elements of functional analysis underpinning, e.g., quantum mechanics, such as representations, operators and their inverses and spectra. Evaluate integrals of analytic functions using the calculus of residues. Take advantage of the transformation behavior, under symmetry operations, of representations of physical quantities, by casting physical relations in tensor language.

PHYS 520. Nanoscience and Nanotechnology
3 Credits (3)
This is a lecture/laboratory course designed to present the basic concepts, the techniques and the tools to synthesize and characterize nanometer scale materials, and the latest achievements in current and future nanotechnology applications in engineering, materials, physics, chemistry, biology, electronics and energy. It is intended for a multidisciplinary audience with a variety of backgrounds. This course should be suitable for graduate students as well as advanced undergraduates. Topics covered will include: nanoscience and nanotechnology, nanofabrication, self-assembly, colloidal chemistry, sol-gel, carbon nanotubes, graphene, thin film, lithography, physical vapor deposition, chemical vapor deposition, quantum dots, lithium batteries, X-ray diffraction, scanning electron microscopy, transmission electron microscopy, nanoelectronics, nanophotonics and nanomagnetics, etc. Students must also have completed (EH&S Safety training to include the courses: (1) Employee & Hazard Communication Safety (HazCom); (2) Hazardous Waste Management; and (3) Laboratory Standard) trainings to enroll. Crosslisted with: PHYS 520. May be repeated up to 3 credits.
Prerequisite: (CHEM 1226 or CHEM 1215G), (PHYS 1230G or PHYS 1310G),

PHYS 521. Individual Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.
Prerequisites: graduate standing, consent of instructor, and selection of a specific topic prior to registration.

PHYS 551. Classical Mechanics
3 Credits (3)
Lagrangian and Hamiltonian formulation of dynamics. Advanced treatments of most topics listed under PHYS 451, plus canonical transformations and Hamilton-Jacobi theory. PHYS 451 strongly recommended.

PHYS 554. Quantum Mechanics I
3 Credits (3)

PHYS 555. Quantum Mechanics II
3 Credits (3)
Continuation of topics in PHYS 554.
Prerequisites: PHYS 554 or consent of instructor.

PHYS 561. Electromagnetic Theory I
3 Credits (3)
Detailed advanced treatments of most topics listed under PHYS 461, PHYS 462, plus multipole radiation, collisions of charged particles and bremsstrahlung, scattering, and radiation reaction. PHYS 461 and PHYS 462 strongly recommended.

PHYS 562. Electromagnetic Theory II
3 Credits (3)
Continuation of topics in PHYS 561.
Prerequisites: PHYS 561 or consent of instructor.

PHYS 568. Elements of X-ray Diffraction
3 Credits (3)
Same as PHYS 468, but additional work required. Crosslisted with: CHME 588.

PHYS 571. Advanced Experimental Optics
3 Credits (1+6P)
Taught with PHYS 471 with additional work required at the graduate level.

Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communication: an ability to communicate effectively with a range of audiences. Ethical and professional responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 575. Advanced Physics Laboratory
3 Credits (1+6P)
Selected experiments in atomic, molecular, nuclear and condensed-matter physics.

Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communication: an ability to communicate effectively with a range of audiences. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
PHYS 576. Advanced Computational Physics I
3 Credits (3)
Advanced treatment of topics listed under PHYS 476 plus additional work. Applications of numerical methods to advanced physics problems. Recommended is the knowledge of a programming language.

Learning Outcomes
1. learn to numerically solve problems that require higher mathematical and theoretical analysis,
2. experience how graduate research will be advanced and accelerated by the use of scientific computing skills.

PHYS 584. Statistical Mechanics
3 Credits (3)

PHYS 589. Modern Materials
3 Credits (3)
Same as PHYS 489 with differentiated assignments for graduate students. PHYS 554 recommended.

Learning Outcomes
1. Learn the fundamental concepts of the physics of modern materials, such as crystal structure, properties of materials, and experimental techniques. Develop an ability to formulate and solve complex problems in the area of physics of modern materials by applying the principles of physics and mathematics. Develop an ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 591. Advanced High-Energy Physics I
3 Credits (3)
Taught with PHYS 491 with additional work required at the graduate level.
Prerequisite(s): PHYS 555 or consent of instructor.

PHYS 593. Advanced Experimental Nuclear Physics
3 Credits (1+6P)
Advanced experimental investigation of topics such as measurement of radioactivity, absorption of radiation, and nuclear spectrometry.

Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communication: an ability to communicate effectively with a range of audiences. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 597. Space Plasma Physics
3 Credits (3)
Same as PHYS 497 but with added requirements.

PHYS 599. Master’s Thesis
1-15 Credits (1-15)
Thesis.
Engineering Physics (Aerospace) - Bachelor of Science in Engineering Physics

A strong grasp of underlying physical principles behind the development of new technologies is necessary to keep up with new developments in a high-tech world. The Bachelor of Science (B.S.) in Engineering Physics degree program is designed to provide quality education to students for immediate employment with technical jobs in private industries (especially high-tech industries), research laboratories and public sectors. The program trains students with a combination of engineering knowledge, physics principles, mathematical background, problem-solving strategies and effective communication skills. The B.S. in Engineering Physics also provides an excellent preparation for graduate studies in either physics or an engineering discipline.

The B.S. degree in Engineering Physics confers an engineering credential. Students in the program complete an engineering core curriculum, as well as a rigorous course of study in physics and mathematics. A strong laboratory component prepares students in experimental techniques and technology using state-of-the-art equipment. The B.S. degree in Engineering Physics is accredited by the Engineering Accreditation Commission (EAC) of ABET, Inc.

The requirements for the Aerospace concentration are listed below. Students must earn a C- or better in all required courses.

Students must complete all University degree requirements, which include: General Education Requirements, Viewing a Wider World requirements, and elective credits to total at least 121 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

See the General Education (p. 88) section of the catalog for a full list of courses.

MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I first.

PHYS 2110 Mechanics/PHYS 2110L Experimental Mechanics and PHYS 2140 Electricity and Magnetism/PHYS 2140L Electricity & Magnetism Laboratory will not automatically count towards the Area III: Laboratory Science requirement, an exception will be made if students elect to take these courses.

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses. See Alternatives for meeting VWW requirements (nine-credit rule).

### A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

1 These courses may have prerequisites and/or co-requisites, and it is the students responsibility for checking and fulfilling all those requirements.

2 PHYS 2110 Mechanics/PHYS 2110L Experimental Mechanics and PHYS 2140 Electricity and Magnetism/PHYS 2140L Electricity & Magnetism Laboratory will not automatically count towards the Area III: Laboratory Science requirement, an exception will be made if students elect to take these courses.

3 See the General Education (p. 88) section of the catalog for a full list of courses.

4 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.
Engineering Physics (Chemical) - Bachelor of Science in Engineering Physics

A strong grasp of underlying physical principles behind the development of new technologies is necessary to keep up with new developments in a high-tech world. The Bachelor of Science (B.S.) in Engineering Physics program is designed to provide quality education to students for immediate employment with technical jobs in private industries (especially high-tech industries), research laboratories and public sectors. The program trains students with a combination of engineering knowledge, physics principles, mathematical background, problem-solving strategies and effective communication skills. The B.S. in Engineering Physics also provides an excellent preparation for graduate studies in either physics or an engineering discipline.

The BS in Engineering Physics confers an engineering credential. Students in the program complete an engineering core curriculum, as well as a rigorous course of study in physics and mathematics. A strong laboratory component prepares students in experimental techniques and technology using state-of-the-art equipment. The B.S. degree in Engineering Physics is accredited by the Engineering Accreditation Commission (EAC) of ABET, Inc.

The requirements for the Chemical concentration are listed below. Students must earn a C- or better in all required courses.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 123 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I first.
A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change. Full-time students are usually required to take at least 15 credits per semester. This requirement could be satisfied for example by taking a one-credit supplemental instruction course.

First Year

**Semester 1**
- MATH 1511G Calculus and Analytic Geometry I 1 4
- PHYS 2110 Mechanics 4
  & PHYS 2110L Electricity and Experimental Mechanics 1,2 2
- CHME 101 Introduction to Chemical Engineering Calculations 2
- CHEM 1215G General Chemistry I Lecture and Laboratory for STEM Majors 1 4
- **Credits 14**

**Semester 2**
- MATH 1521G or MATH 1521H Calculus and Analytic Geometry II 1 4
  or Calculus and Analytic Geometry II Honors 4
- PHYS 2140 Electricity and Magnetism 4
  & PHYS 2140L and Algebra-Based Physics II Lab 1,2 2
- CHME 102 Material Balances 1 4
- CHEM 1225G General Chemistry II Lecture and Laboratory for STEM Majors 1 4
- **Credits 14**

**Second Year**

**Semester 1**
- MATH 2530G Calculus III 1 3
- PHYS 2120 Heat, Light, and Sound 4
  & PHYS 2120L and Heat, Light, and Sound Laboratory 1 2
- CHME 201 Energy Balances & Basic Thermodynamics 1 3
- ENGL 1110G Composition I 4
- Area IV: Creative and Fine Arts Course 3 3
- **Credits 17**

**Semester 2**
- MATH 392 Introduction to Ordinary Differential Equations 1 3
- PHYS 315 Modern Physics 1 3
- PHYS 325 Intermediate Experimental Physics 3
- CHME 303 Chemical Engineering Thermodynamics 1 4
- CHME 305 Transport Operations I: Fluid Flow 1 3
- **Credits 16**

**Third Year**

**Semester 1**
- PHYS 395 Intermediate Mathematical Methods of Physics 1 3
- PHYS 461 Intermediate Electricity and Magnetism I 1 3
- CHME 306 Transport Operations II: Heat and Mass Transfer 1 4
- CHEM 313 Organic Chemistry I 1 3
- ENGL 2210G Professional & Technical Communication 3
- **Credits 16**

**Semester 2**
- PHYS 462 Intermediate Electricity and Magnetism II 1 3
- CHME 307 Transport Operations III: Staged Operations 1 3
- CHME 352 L Simulation of Unit Operations 1 1
- CHME 361 Engineering Materials 1 3
- CHME 441 Chemical Kinetics and Reactor Engineering I 1 3
- COMM 1115G Introduction to Communication 3
- **Credits 15**

**Fourth Year**

**Semester 1**
- PHYS 451 Intermediate Mechanics I 1 3
- PHYS 454 Intermediate Modern Physics I 1 3
- ENGR 401 Engineering Capstone I 3
- VWW: Viewing a Wider World Course 4 3
- Technical Elective Course 5 3
- **Credits 15**

**Semester 2**
- PHYS 455 Intermediate Modern Physics II 1 3
- ENGR 402 Engineering Capstone II 1 3
- VWW: Viewing a Wider World Course 4 3
- Area IV: Social and Behavioral Science Course 3 3
- Area V: Humanities Course 3 3
- **Credits 15**

**Total Credits 123**

1 These courses may have prerequisites and/or co-requisites, and it is the students responsibility for checking and fulfilling all those requirements.

2 PHYS 2110 Mechanics/PHYS 2110L Experimental Mechanics and PHYS 2140 Electricity and Magnetism/PHYS 2140L Electricity & Magnetism Laboratory will not automatically count towards the Area III: Laboratory Science requirement, an exception will be made if students elect to take these courses.

3 See the General Education (p. 88) section of the catalog for a full list of courses.

4 See the Viewing a Wider World (https://catalogs.nmsu.edu/nmsu/essential-information-students/general-education-courses/ #viewingawiderworldtext) section of the catalog for a full list of courses.

5 Approved technical electives are decided by Engineering Physics advisors.

Approved technical electives are decided by Engineering Physics advisors.
Engineering Physics (Electrical) - Bachelor of Science in Engineering Physics

A strong grasp of underlying physical principles behind the development of new technologies is necessary to keep up with new developments in a high-tech world. The Bachelor of Science (B.S.) in Engineering Physics program is designed to provide quality education to students for immediate employment with technical jobs in private industries (especially high-tech industries), research laboratories and public sectors. The program trains students with a combination of engineering knowledge, physics principles, mathematical background, problem-solving strategies and effective communication skills. The B.S. in Engineering Physics also provides an excellent preparation for graduate studies in either physics or an engineering discipline.

The B.S. in Engineering Physics confers an engineering credential. Students in the program complete an engineering core curriculum, as well as a rigorous course of study in physics and mathematics. A strong laboratory component prepares students in experimental techniques and technology using state-of-the-art equipment. The B.S. degree in Engineering Physics is accredited by the Engineering Accreditation Commission (EAC) of ABET, Inc.

The requirements for the Electrical concentration are listed below. Students must earn a C- or better in all required courses.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World Electives, and elective credits to total at least 125-126 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

| Total Credits | 120 |

1. These courses may have prerequisites and/or co-requisites, and it is the students responsibility for checking and fulfilling all those requirements.

2. PHYS 2110 Mechanics/PHYS 2110L Experimental Mechanics and PHYS 2140 Electricity and Magnetism/PHYS 2140L Electricity & Magnetism Laboratory will not automatically count towards the Area III: Laboratory Science requirement, an exception will be made if students elect to take these courses.

3. See the General Education (p. 88) section of the catalog for a full list of courses.

4. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

5. Technical electives are approved by Engineering Physics advisors.

---

**Engineering Technology and Surveying Engineering**

**Undergraduate Program Information**

**Mission Statement**

The Department of Engineering Technology and Survey Engineering (https://et.nmsu.edu/) (ETSE) mission is to provide a student-centric education through experiential learning to prepare students for a rewarding career. In particular,
• faculty work closely with students and each other to foster a family-like environment;
• unlike traditional engineering, core courses have labs with team projects and hands-on learning experiences; and
• graduates advance to enhanced career opportunities with competitive compensation.

Our goal is to help students from diverse backgrounds reach their potential and become successful engineers, technologists, and leaders in the region and nationwide.

Programs Overview
Under the motto of “linking theory and application,” the ETSE curriculum emphasizes the practical hands-on application of engineering principles and methods. ETSE students learn about designing, building, and testing systems through in-class exercises, hands-on laboratory projects, and teamwork. This approach provides ETSE students a holistic view of their fields and prepares them to be effective real-world problem solvers.

A wide variety of majors, concentrations, and minors are offered by the ETSE Department, including:

Bachelor Degrees with majors and concentration in:

• Civil Engineering Technology (p. 984) (CET)
  • Renewable Energy Technologies (p. 986)
  • Transportation Technology (p. 988)
• Electronics and Computer Engineering Technology (p. 990) (ECET)
• Geomatics (p. 996)
• Information and Communication Technology (p. 1001) (ICT)
  • Cyber Defense (p. 1004)
  • Network Technologies (p. 1006)
  • Software Development (p. 1008)
• Information Engineering Technology (p. 992) (IET)
• Mechanical Engineering Technology (p. 994) (MET)

The Bachelor of Science curricula are developed based on the program criteria established collaboratively by their ABET accreditation commissions (Engineering Technology Association Commission and the Applied and Natural Science Accreditation Commission, respectively) and the programs’ Industrial Advisory Committees (IAC). Visit the ETSE website for further information on ABET accreditation and program criteria.

The Geomatics and ICT programs are 100% online while enrolled at the NMSU main campus or the NMSU Online (https://online.nmsu.edu/) campus. The ETSE online programs allow you to complete your undergraduate education from anywhere, interact with faculty virtually, and access online resources at any time.

Please visit the ETSE Majors, Minors, and Concentrations (https://et.nmsu.edu/majors-and-minors/) website to find more details.

Graduate Program Information

Mission Statement
The mission of the Engineering Technology and Surveying Engineering Department regarding graduate education is to provide a 100% online, asynchronous, professional post-baccalaureate education focused on providing graduates with advanced knowledge and skills that will augment career opportunities. The ETSE department fosters educational excellence and provides working professionals and traditional technology students opportunities to increase their knowledge and skillsets.

Program Overview
The ETSE Department offers the Professional Masters of Information Technology (M-IT) (p. 1012), designed for working IT professionals and students interested in pursuing an advanced technology degree. Topics include system architecture, computer networking, development and application of software tools, cybersecurity, and virtual systems in the context of enterprise IT decision-making.

The M-IT program’s vision is to provide an advanced Information Technology education that is contemporary and relevant to recent IT graduates and long-time IT professionals. The program strives to be accessible in delivery and flexible in the curriculum.

The requirements for enrollment into the Professional Master of Information Technology program are as follows:

• Bachelor’s degree in Information Technology or a closely related field (must submit transcripts)
• Undergraduate GPA of 3.0/4.0 or higher
• Statement of purpose — One page describing your experiences and background, professional goals, and your reason for applying to the M-IT program
• Contact information for two recommendations
• Applicants with an undergraduate GPA greater than 2.5/4.0 but less than 3.0/4.0 may be accepted provisionally on a case-by-case basis.
• Applicants that do not have a Bachelor’s degree in Information Technology or a closely related field but have relevant IT experience may apply. If accepted, the graduate advisor will design a plan of study that may include appropriate leveling courses.
• GRE scores are not required for applicants that have earned their undergraduate degree from an accredited US University.

Master’s Accelerated Program
The Master’s Accelerated Program (MAP) option combines some of the baccalaureate degree requirements in IET or ICT and the professional Master of Information Technology. Visit the Masters Accelerated Program (MAP) (https://honors.nmsu.edu/for-students/masters-accelerated-program-map.html) website for further details. This option will add a pre-application process as detailed below.

Pre-Application Process: Students will submit a “pre-application” to the ETSE department to receive approval for the accelerated professional Master’s program. Students interested in completing the MAP must submit the pre-application within approximately 12 credits of earning a Bachelor’s degree in an IET or BICT; the ETSE department website will include an application form. Qualification for the Bachelor + Masters of IT (B+M-IT) program will be based on the cumulative grade point average in courses taken to that point and recommendations by faculty members listed on the departmental application. Students having a grade point average below 3.0 may be admitted on a case-by-case basis, depending on faculty recommendations and evaluations of the individual’s academic and professional history. Additional factors might be considered when available (e.g., TOEFL/IELTS scores).

Once the ETSE department has reviewed the pre-application, accepted, and notified the applicant of acceptance in the accelerated program, the applicant must formally apply to the graduate school for formal
admission into the M-IT program. Students must apply to the NMSU Graduate School during the final semester of their undergraduate program’s education.

Note: The student must apply to the B+M-IT accelerated program before taking any 450 (and above) level courses.

Degrees for the Department

Bachelor’s Degrees

Engineering Technology
- Engineering Technology - Civil - Bachelor of Science in Engineering Technology (p. 984)
- Renewable Energy Technologies (p. 986)
- Transportation Technology (p. 988)
- Engineering Technology - Electronics and Computer - Bachelor of Science in Engineering Technology (p. 990)
- Engineering Technology - Information - Bachelor of Science in Engineering Technology (p. 992)
- Engineering Technology - Mechanical - Bachelor of Science in Engineering Technology (p. 994)

Geomatics
- Geomatics - Bachelor of Science (Online/Main) (p. 999)

Information and Communication Technology
- Information and Communication Technology - Bachelor of Information and Communication Technology (p. 1001)
- Information and Communication Technology - Bachelor of Information and Communication Technology (Online) (p. 1003)
  - Cyber Defense (p. 1004)
  - Network Technologies (p. 1006)
  - Software Development (p. 1008)

Information Technology
- Information Technology - Master of Information Technology (Online) (p. 1012)

Minors for the Department

Digital Electronic Applications - Undergraduate Minor (p. 1010)
Digital Forensics - Undergraduate Minor (p. 1010)
Geomatics - Undergraduate Minor (p. 1010)
Information Security Technology - Undergraduate Minor (p. 1011)
Manufacturing - Undergraduate Minor (p. 1011)
Renewable Energy Technologies - Undergraduate Minor (p. 1011)

Associate Professor Gabe Garcia (https://myaccount.nmsu.edu/phonebook/?txtFirstName=gabe&txtLastName=garcia&txtEmail=&chkEmployees=Employees)

Assistant Professor Philip Braker (https://myaccount.nmsu.edu/phonebook/?txtFirstName=Philip&txtLastName=Braker&txtEmail=&chkEmployees=Employees)

Associate Professor Barbara Gamillo (https://myaccount.nmsu.edu/phonebook/?txtFirstName=Barbara&txtLastName=Gamillo&txtEmail=&chkEmployees=Employees)

Associate Professor Lisa Higdon (https://myaccount.nmsu.edu/phonebook/?txtFirstName=lis&txtLastName=higdon&txtEmail=&chkEmployees=Employees)

E T 101. Introduction to Engineering Technology and Geomatics
1 Credit (1)
An introduction to geomatics and the various engineering technology disciplines, the engineering approach to problem solving, and the design process. Projects emphasize the importance of teamwork, written & oral communication skills, as well as ethical responsibilities.

Learning Outcomes
1. Various

E T 104. Soldering Techniques
1 Credit (3P)
Fundamentals of soldering, desoldering, and quality inspection of printed circuit boards.

E T 109. Computer Drafting Fundamentals
3 Credits (3+2P)
Crosslisted with: DRFT 109, C E 109 and SUR 109

E T 110. Introduction to 3-D Modeling (Solid Works)
3 Credits (2+3P)
Introduction to SolidWorks, a 3-D modeling software. The foundation for designing mechanical parts and assemblies.

E T 120. Computation Software
2-3 Credits (2-3)
The use of spreadsheet software in the field of engineering technology.

E T 125. Introduction to Renewable Energy
3 Credits (3)
Renewable energy systems, including topics in thermal-solar photovoltaic, wind, geothermal systems, and other current topics. Theory, practical applications, safety considerations and the economics of alternative renewable energy systems compared to conventional systems.
E T 143. Civil/Survey Drafting I
3 Credits (2+2P)
Introduction to drafting in the field of Civil Engineering. Drawings, projects, and terminologies related to topographic mapping, contour drawings, plan, and profiles as street/highway layout. May be repeated up to 3 credits.
Prerequisite: A grade of C- or better in E T 109 or DRFT 109.
Learning Outcomes
1. Students will develop a basic knowledge of AutoCad Civil 3D software as they relate to the civil drafting process. Students will become familiar with a basic understanding of computers, drafting and trigonometry is required. Use of long-term projects will be utilized to simulate real-world work environments to aid the understanding and applying vocabulary on surveying drafting plans An ability to apply current knowledge and adapt to emerging applications of mathematics, science, engineering and technology

E T 153. Fundamentals of Networking Communications
3 Credits (3)
Introduction to networking basics, including computer hardware and software, electricity, networking terminology, protocols, LANs, WANs, OSI model, IP addressing, and design and documentation of basic network and structure cabling.
Learning Outcomes
1. Students will identify network types/protocols utilizing the OSI reference model and compute numbering system network problems. Students will explain issues related to managing and documenting network environments. Students will list, compare, and discuss industry standards for addressing computers on a network. Students will list and distinguish between computer networking historical milestones. Students will identify, compare, and evaluate networking data transport techniques. Students will identify and compare network transmission media and build/evaluate network cabling. Students will discuss IT industry certifications and summarize current technology trends.

E T 154. Construction Methods and Communications
3 Credits (3)
Blueprint reading, specifications, and introduction to materials used in construction.

E T 155. Network Operating Systems I
3 Credits (3+1P)
Introduction to a computer network operating system. May not be used as part of an E T degree program on main campus. Restricted to: Community Colleges only.
Prerequisite(s): E T 120 or E T 122.

E T 156. Introduction to Information Security
2 Credits (2)
This course introduces information security terminology, historical evolution of digital security, types of PC and network system vulnerabilities and types of information loss. In addition, methods of information protection and integrity, intrusion detection, and recovery of data are introduced.
Prerequisite(s)/Corequisite(s): E T 120. Restricted to Community Colleges campuses only.

E T 160. Windows Fundamentals for IET
3 Credits (3)
Fundamental review of the Windows operating system including installation and upgrades as well as managing applications, files, folders, devices and maintenance.

E T 182. Digital Logic
2 Credits (1+2P)
The use of truth tables, Boolean equations, and diagrams to define, simplify, and implement logic-valued functions.
Prerequisite: A grade of C- or better in MATH 1220G or higher.
Learning Outcomes
1. Demonstrate ability to convert numerical values to commonly-used digital representations and their use for arithmetic and logical functions. Demonstrate understanding of Boolean logic functions and truth tables. Demonstrate ability to simplify logic expressions. Demonstrate understanding of sequential logic functions, and the ability to integrate with combinational logic to produce a simple state machine. Familiarity with common integrated circuit issues, such as logic voltage levels, propagation delay, and fan-out.

E T 183. Applied DC Circuits
3 Credits (2+2P)
Application of Ohm's law, Kirchhoff's laws, Thevenin's, and Norton's theorems to the analysis of DC passive circuits. Embedded Lab.
Prerequisite(s)/Corequisite(s): MATH 1220G.

E T 183 L. Applied DC Circuits Lab
1 Credit (2P)
DC applied circuits lab.
Corequisite(s): E T 183.

E T 184. Applied AC Circuits
2-3 Credits (1-2+2P)
Application of circuit laws and theorems to analysis of AC passive circuits. Resonant circuit, polyphase circuit and magnetic circuit topics are introduced. Embedded Lab.
Prerequisite: A grade of C- or better in ENGR 120.
Learning Outcomes
1. Analyze and design AC circuits, including ideal op-amps, using concepts of voltage, current, power, Kirchhoff's laws, and network theorems. Design simple systems involving ac circuits Working and learning in teams.

E T 190. Applied Circuits
4 Credits (3+2P)
Application of Ohm's law, Kirchhoff's laws, and Thevenin's theorems to the analysis of AC and DC passive circuits. Electronic circuit topics are introduced. Embedded lab. May be repeated up to 4 credits.
Prerequisite/Corequisite: A grade of C- or better in MATH 1250G or higher.
Learning Outcomes
1. Analyze and design DC circuits, including ideal op-amps, using concepts of voltage, current, power, Kirchhoff's laws, and network theorems. Design simple systems involving dc circuits. Work and learn in teams.

E T 191. Applied Circuits Laboratory
1 Credit (2P)
Applied Circuits Lab

E T 200. Special Topics
1-3 Credits
Directed study or project. May be repeated for a maximum of 6 credits.
Prerequisite: consent of department head.
ET 210. Intermediate 3-D Modeling (Solid Works)
3 Credits (3)
Intermediate 3-D modeling. Applied modeling of techniques to prepare for SolidWorks certification (CSWA).
Prerequisite(s): ET 110.

ET 217. Manufacturing Processes
3 Credits (3)
Introduction to manufacturing and processing, including: casting, forming, and machining. Emphasis on creating products with the appropriate techniques. Crosslisted with: I E 217.
Prerequisite: ET 110 and MATH 1220G.
Learning Outcomes
1. Various

ET 217 L. Manufacturing Processes Lab
1 Credit (3P)
Hands-on laboratory in machine shop to apply topics from ET 217, including: casting, forming, and machining.
Corequisite: ET 217.

ET 220. Internship
1-6 Credits
Internship requiring an approved number of hours of varied and progressive experience in the field of study. The scope and other requirements of the internship are stated in an individualized syllabus and through a memorandum of understanding between the faculty mentor and the industry partner. May be repeated up to 6 credits. Consent of Instructor required.
Prerequisite(s): ET 283.

ET 240. Applied Statics
3 Credits (3)
Fundamental topics of applied statics, including force system analysis, equilibrium, free body diagrams, methods of joints and sections, distributed loads, friction, centroids, area moments, and shear and moment diagrams.
Prerequisite(s)/Corequisite(s): MATH 1430G or MATH 1511G.
Prerequisite(s): PHYS 1230G or PHYS 1310G.

ET 241. Applied Dynamics
3 Credits (3)
The foundation for understanding particles and bodies in motion and the forces involved, including: projectile motion, Newton’s Laws of Motion, conservation of energy, and impulse and momentum.
Prerequisite: A grade of C- or better in either ET 240 or ENGR 233.
Prerequisite/Corequisite: (MATH 1440 or MATH 1521G or MATH 1521H).

ET 246. Electronic Devices I
4 Credits (3+3P)
Solid-state devices including diodes, bipolar-transistors, and field effect transistors. Use of these devices in rectifier circuits, small signal and power amplifiers.
Prerequisite: A grade of C- or better in one of the following: ET 190 or ET T 184 or ENGR 120.
Learning Outcomes
1. Various

ET 253. Networking Operating Systems II
3 Credits (3+1P)
Introduction to a computer network operating system. May not be used as part of an ET degree program on main campus. Restricted to Community Colleges campuses only.
Prerequisite: ET 120 and ET T 153.
Learning Outcomes
1. Identify Linux utilities and terminology. Use the Linux filesystem. Install, administer, and manage a Linux system. Utilize Linux user/group management. Install software packages. Apply data management skills.

ET 254. Concrete Technology
3 Credits (2+2P)
Fundamentals of aggregates, Portland cement, and asphalt used in design and construction.

ET 255. Linux System Administration
3 Credits (3)
Operating systems applications and interfacing with an introduction to systems administration. Topics include Shell Programming, Programming Tools, Database Management, System Backups, Security, Setup and Maintenance of Linux Servers.
Learning Outcomes
1. Describe the key features of the Linux operating system. Plan the Linux Filesystem to match system requirements. Design BASH scripts to optimize common Linux operations. Interpret Linux performance data to solve hardware and software issues. Students will demonstrate the Core Linux System Administration. Students will be able to link the use of shell commands to managing Linux server daemons and software. Students will apply these concepts to build application servers running Linux, Apache, MySQL, and PHP (LAMP); Tomcat, CUPS print servers; and create backup solutions. Students will apply problem analysis, object-oriented structured logic, and development concepts. Students will demonstrate an understanding of theory and hands-on experience administrating a Linux Based server.

ET 256. Networking Operating Systems III
3 Credits (3+1P)
Introduction to a computer network operating system. May not be used as part of an ET degree program on main campus. Restricted to Community Colleges campuses only.
Prerequisite(s): ET 253.

ET 262. Software Technology I
3 Credits (2+2P)
An introduction to computer programming concepts as applied to engineering technology. Includes basic logic design, algorithm development, debugging and documentation. History and use of computers and their impact on society.
Prerequisite/Corequisite: (ET 182 or ENGR 130) or (MATH 1250G or MATH 1430G).

ET 266. Computer Engineering II
3 Credits (3)
Introduction to computer engineering concepts. Includes basic logic design, algorithm development, debugging and documentation. History and use of computers and their impact on society.
Prerequisite/Corequisite: ET 182 or ENGR 130 or (MATH 1250G or MATH 1430G).
Learning Outcomes
1. Set up and use a rich programming environment for programming with C
Analyze existing code Employ effective use of basic programming and basic troubleshooting Write, debug and test code given software requirements Apply testing and documentation best practices Transfer programming knowledge and apply coding knowledge
E T 272. Electronic Devices II
4 Credits (3+3P)
Operational amplifiers, positive and negative feedback, computer aided circuit analysis. In addition circuits include integrator, differentiators and phase shift networks.
Prerequisite: A grade of C- or better in E T 246.
Prerequisite/Corequisite: MATH 1435 or MATH 1511G.
Learning Outcomes
1. Various

E T 273. Advanced Networking Communications
4 Credits (2+4P)
Explores advanced networking communications to include Wireless Networking, Virtualization and Cloud Computing, Subnets and VLANs, Network Risk Management, Network Security Design, Network Performance, and WANS. The course covers the examination objectives and detailed preparation for students to take the CompTIA Network+ exam.
Prerequisite: E T 153.
Learning Outcomes
1. Identify, describe, and apply wireless transmission characteristics and standards. Explain the benefits of cloud virtualization and cloud computing. Explain the purpose of network segmentation and describe how VLANs work and how they are used. Identify basic concepts of network risk management and configure devices for increased security. Identify network design security features and discuss options in network access control. Use tools to evaluate network performance and discuss best practices for incident response and disaster recovery. Explain characteristics of WAN technology and troubleshoot connection methods.

E T 276. Electronic Communications
3 Credits (2+2P)
Antennas, transmission devices, A-M and F-M transmission and detection, pulse systems, microwave systems.
Prerequisite(s): E T 246.

E T 280. Web Design and Multimedia
3 Credits (3)
Introduction to front-end web development including webpage design, structure, layout, positioning, responsiveness, and foundational layers of how the web works. Video, audio, and other digital presentation tools are covered.
Learning Outcomes

E T 282. Digital Electronics
4 Credits (3+3P)
Applications of digital integrated circuits, multiplexers, counters, arithmetic circuits, and microprocessors.
Prerequisite(s)/Corequisite(s): (E T 190 or E T 184). Prerequisite(s): E T 182.

E T 283. Hardware PC Maintenance
3 Credits (3+1P)
Installing, configuring, troubleshooting, and maintaining personal computer hardware components.
Prerequisite(s): E T 120 or E T 122.

E T 284. Software PC Maintenance
3 Credits (3+1P)
Installing, configuring, troubleshooting, and maintaining personal computer operating systems.
Prerequisite(s): E T 120 or E T 122.

E T 285. Advanced Information Security
3 Credits (3)
The course covers detailed analysis of network security, including security operations and policy adherence; internal and external vulnerabilities; methods of identifying, controlling and managing system access, and the protection of system information.
Prerequisite(s)/Corequisite(s): E T 283. Prerequisite(s): E T 156.

E T 286. Information Security Certification Preparation
4 Credits (4)
The course covers the examination objectives and detailed preparation for a certification in information security.
Prerequisite(s): E T 285.

E T 290. Networking Wireless Communication
3 Credits (3+1P)
This course provides an introduction to wireless networking and communications. Some of the topics covered are protocols, transmission methods, and IEEE 802.11 standards. Wireless LAN (WLAN) fundamentals, devices, and security, cellular telephony, broadband, and satellite communications.
Prerequisite: E T 273.

E T 291. PC Forensics and Investigation
3 Credits (3)
Introduction to computer forensics and investigative fundamentals. Topics include understanding computer forensic and investigation law and requirements, processing crime and incident scenes, and the extraction, preservation, analysis and presentation of computer-related evidence.
Prerequisite(s): E T 120 or E T 122.

E T 300. Special Topics
1-3 Credits
Directed study or project. May be repeated for a maximum of 6 credits.
Prerequisite: consent of department head.

E T 305. Introduction to Product Design
3 Credits (2+3P)
The process of designing an innovative product for a real customer. Working through ideas, prototypes, 3-D models, concept validation, and entrepreneurship.
Prerequisite(s)/Corequisite(s): E T 210, E T 217, and (COMM 1115G or COMM 1130G or AXED 2120G or HNRS 2175G) or consent of instructor for non-MET majors.
E T 306. Fundamental and Applied Thermodynamics
3 Credits (3)
First and second laws, properties of substances, thermodynamic cycles including power generation and refrigeration.
Prerequisite: A grade of C- or better in the following: CHEM 1120G and E T 240 and (MATH 1435 or MATH 1511G) and (PHYS 1240G or PHYS 1320G) and (PHYS 1240L or PHYS 1320L).
Corequisite: E T 306L.
Prerequisite/Corequisite: (E T 262 or ENGR 140), and (MATH 1440 or MATH 1521G).
Learning Outcomes
1. Students will acquire an understanding of the physical concepts and basic principles of fundamental and applied thermodynamics Students will become acquainted with the problem-solving methods and tools in the field of applied thermodynamics Students will gain experience through practice in the implementation of systematic, fundamental approaches to solving problems in applied thermodynamics.

E T 306 L. Thermodynamics Lab
1 Credit (3P)
Applications of thermodynamic theory to lab devices. Practice in testing, instrumentation, and data collection.
Corequisite: E T 306.
Prerequisite/Corequisite: (ENGR 120 or E T 184 or E T 190).
Learning Outcomes
1. To provide the student with practical exposure to some of the fundamental concepts, experimental methods, and instrumentation encountered in the field of thermodynamics To familiarize the student with the development and application of procedures for laboratory work and for the acquisition, processing, evaluation, and (oral and written)presentation of experimental data To give the student additional experience in the preparation of technical reports and oral presentations which are accurate, concise, and informative.

E T 308. Fluid Technology
3 Credits (3)
Application of basic principles of fluid mechanics to practical applied problems.
Prerequisite: A grade of C- or better in both, (MATH 1435 or MATH 1511G) and (E T 240 or ENGR 233).
Learning Outcomes
1. To provide the student with practical exposure to some of the fundamental concepts, experimental methods, and instrumentation encountered in the field of fluid technology. To familiarize the student with the development and application of procedures for laboratory work and for the acquisition, processing, evaluation, and presentation of experimental data. To give the student additional experience in the preparation of technical reports and oral presentations that are accurate, concise, and informative.

E T 308 L. Fluid Technology Lab
1 Credit (3P)
Measurements in fluid statics, dynamics, and hydraulic systems.
Corequisite: E T 308.
Learning Outcomes
1. Various

E T 309V. Manufacturing: History and Technology
3 Credits (3)
The history of manufacturing, the technology on which it is based, and its impact on society.

E T 310. Applied Strength of Materials
3 Credits (3)
Application of principles of strength of materials to practical design and analysis problems.
Prerequisite: A grade of C- or better in E T 240 or ENGR 233.
Prerequisite/Corequisite: ENGR 190 or MATH 1440 or MATH 1521G or MATH 1521H.
Learning Outcomes
1. To obtain knowledge of basic engineering materials and their use in civil and mechanical construction To perform basic structural analysis, stress, strain and deformation calculations as they apply to current engineering practices To conduct appropriate experiments in the laboratory as they apply to strngth of materials and be able to interpret the results. To effectively communicate results of laboratory work and in-class studies in written memoranda, business letters, and formal technical reports. To recognize that the field of engineering materials is constantly changing and therefore, needs to be studied throughout one’s career.

E T 310 L. Applied Strength of Materials Lab
1 Credit (3P)
Testing and analyzing the physical properties of materials. Cursory review of Excel, PowerPoint, FEA, Instron machine, and testing standards.
Corequisite: E T 310.
Learning Outcomes
1. Various

E T 314. Communications Systems I
3 Credits (3)
Circuits and devices used for transmission, reception, and processing of RF signals. May be repeated up to 3 credits.
Prerequisite: A grade of C- or better in both, E T 246 and (MATH 1250G or higher).
Learning Outcomes
1. Learn the basics of analog and digital communication. Explore the fundamental communication concepts with hands-on experiments. Learn about basic antenna theory and satellite communications. Prepare technically sound reports and project.

E T 317. Advanced Manufacturing and Design
3 Credits (3)
Advanced 3-D modeling with current engineering design practices. Students will use SolidWorks add-ins such as CAMWorks, Product Data Management (PDM), and Model-Based Definition in conjunction with Geometric Dimensioning and Tolerancing (GD&T) practices. Students will have the opportunity to take the Certification SolidWorks Professional Exam (CSWP).
Prerequisite(s): E T 210 and E T 217.
E T 324. Signal Processing and Filtering
4 Credits (3+3P)
Application of digital and analog signal conversion models. Discrete time signals and systems. Time and frequency domain concepts. Presentation of Fourier and Z transforms. Application of analog and digital signal filtering with and without feedback.
Prerequisite: A grade of C- or better in E T 272.
Prerequisite/Corequisite: (MATH 1440 or MATH 1521G or MATH 1521H) and ((PHYS 1240G or PHYS 1320G) and (PHYS 1240L or PHYS 1320L)).
Learning Outcomes
1. Analyze signals (e.g. periodic, even) and systems (e.g. causal, linear) and differentiate between discrete and continuous time signals and systems. Determine the impulse response of a differential or difference equation. Apply the convolution theorem for continuous time signals to determine the response of linear systems to any input signal. Evaluate the Fourier series of periodic signals. Analyze the Fourier Transform of energy signals Apply bilateral Laplace transforms for continuous signals Analyze discrete time signals and systems using Z transforms. Apply the Sampling theorem, reconstruction, aliasing, and Nyquist’s theorem to represent continuous-time signals in discrete time so that they can be processed by digital computers Design and analyze signals and systems using the programming language MATLAB and/or Simulink.

E T 328. Kinematics of Machines
3 Credits (2+3P)
Prerequisite(s)/Corequisite(s): E T 305. Prerequisite(s): E T 210 and E T 241.

E T 332. Applied Design of Structures I
4 Credits (3+3P)
An introduction to structural analysis and design. Use of various building codes for development of allowable and factored loads on structures. Allowable stress and strength design concepts for structural components using concrete and steel. Required use of computer software such as spreadsheets, databases, and self-developed programs and design aids.
Prerequisite(s): E T 310 and (MATH 1440 or MATH 1521G or MATH 1521H).

E T 339. Introduction to Digital Forensics and Incident Response
3 Credits (2+3P)
Introduction to the skills required to perform digital forensics and incident response on Windows operating systems. Topics include: live response, evidence acquisition, Windows operating system artifacts, documentation and reporting.
Prerequisite(s): E T 255 and E T 160.

E T 344. Microcomputer Systems
3 Credits (2+3P)
Microcomputer and/or microcontroller systems applications and architectures with a software emphasis using programming languages. May be repeated up to 3 credits.
Prerequisite: A grade of C- or better in both, (E T 182 or ENGR 130) and (MATH 1250G or Higher).
Prerequisite/Corequisite: E T 362.
Learning Outcomes
1. Various

E T 354. Soil and Foundation Technology
4 Credits (3+3P)
Fundamentals of investigation of soil properties and their importance in design, construction, and testing as related to buildings, roads, dams, and other structures. Design of foundations considering slope stability, bearing capacity and settlement.
Prerequisite(s)/Corequisite(s): E T 310. Prerequisite(s): E T 254. Restricted to: E T U, E T E, E T M, C E, E T C majors.

E T 355. Site/Land Development and Layout
3 Credits (3)
Techniques, methods, and takeoffs for infrastructure layout, site plan design, grading, earthwork, utilities, road construction.
Prerequisite(s)/Corequisite(s): DRFT 143 or DRFT 153.

E T 360V. Technology in Business and Society
3 Credits (2+2P)
Examination of how technology affects business and society with specific attention to understanding the role of technical personnel and their interaction with nontechnical personnel.

E T 362. Software Technology II
3 Credits (3)
Topics include problem analysis, object-oriented programming (OOP), structured logic, and development concepts.
Prerequisite: A grade of C- or better in either E T 262 or ENGR 140.
Prerequisite/Corequisite: MATH 1250G or Higher.
Learning Outcomes
1. Set up and use a rich programming environment for programming with Python Analyze existing code Employ effective use of basic programming and basic troubleshooting Employ effective use of Object-Oriented Programming (OOP) and troubleshooting Apply testing and documentation best practices.

E T 377. Computer Networking I
3 Credits (2+2P)
Topics include the principles and structure of the OSI model, IP addressing, media, LANs, TCP/IP networks, routing protocols (RIPv2, EIGRP, OSPF) and their advanced functionality, as well as VLANs and inter-VLAN communication. This course focuses on the architecture of networks, the configuration of devices, how to identify and resolve common issues, and troubleshooting (from physical to transport layers).
Prerequisite: A grade of C- or better in both, (E T 182 or ENGR 130) and (MATH 1250G or Higher).
Learning Outcomes
1. Define and distinguish the role of a network administrator (from other roles in the IT world) Identify the OSI model, its layers, and relationship to TCP/IP model Identify different cable media and networking devices and their use Design, configure, and troubleshoot basic networks. Identify MAC, IPv4, and IPv6 addressing Apply different techniques for IP allocation and subnet design (IPv4) Use Cisco IOS software for basic switch and router configurations Configure and troubleshoot basic setup for static and dynamic routing protocols.

E T 381. Renewable Energy Technologies
3 Credits (3)
Renewable energy systems, including topics in thermal-solar, photovoltaic, wind, geothermal systems, and other current topics. Theory, practical applications, safety considerations and the economics of alternative renewable energy systems compared to conventional systems.
Prerequisite(s): MATH 1220G.
E T 382. Solar Energy Technologies
3 Credits (2+3P)
Solar energy technologies, including topics in passive, solar thermal, and photovoltaic systems. Theory, practical applications, safety considerations and the economics of solar renewable energy systems compared to conventional systems.
Prerequisite(s): MATH 1220G.

E T 384. Wind and Water Energy Technologies
3 Credits (3)
Wind and Water energy technologies, including topics in small and large scale systems. Theory, practical applications, safety considerations and the economics of wind and water renewable energy systems compared to conventional systems.
Prerequisite(s): MATH 1220G.

E T 386. Sustainable Construction and Green Building Design
3 Credits (3)
Sustainable Building materials, methods, and techniques including green architecture and design, codes, standards and specifications.
Prerequisite(s): MATH 1220G.

E T 396. Heat Transfer and Applications
3 Credits (2+3P)
Fundamentals of conduction, convection, and radiation heat transfer. Application of heat transfer, thermodynamics, and fluid mechanics principles to thermal system analysis and design.
Prerequisite(s): E T 306 and E T 308 and PHYS 1240G.

E T 398. Digital Systems
3 Credits (2+3P)
Advanced analysis and design of digital systems using state machine logic, programming of logic devices, implementation and testing. May be repeated up to 3 credits.
Prerequisite: A grade of C- or better in both, (E T 282 or ENGR 230) and (MATH 1250G or higher).
Prerequisite/Corequisite: E T 396 or E T 398.

E T 400. Special Topics
1-3 Credits
Directed study or project. May be repeated for a maximum of 6 credits.
Prerequisite: consent of department head.

E T 401. Heating and Air-Conditioning Systems
3 Credits (3)
HVAC system design including heating and cooling load calculations, psychrometrics, piping, duct layout, and system control. Same as M E 401.
Prerequisite(s): E T 306.
Corequisite(s): E T 396.

E T 402. Instrumentation
3 Credits (2+3P)
Sensors/transducers, signal conditioning and transmission for measurement and control systems. Student project in an area of instrumentation and/or control is required.
Prerequisite(s)/Corequisite(s): E T 396 or E T 398.

E T 407. Applied Power Technologies
4 Credits (3+3P)
Basic elements of modern power systems, energy sources, substation configuration, load cycles, and three-phase circuits. Students will gain experience in power factor correction, transmission line configurations and impendance, voltage regulation of transformers, and the per-unit system. Study of load flow, fault analysis, and economic operations is included.
Prerequisite: A C- or better in (MATH 1430G or MATH 1435 or MATH 1511G) and E T 272 and ((PHYS 1240G or PHYS 1320G) and (PHYS 1240L or PHYS 1320L)).

Learning Outcomes
1. Various

E T 410. Senior Seminar
1 Credit (1)
Transition from academics to business and industry. Graded S/U.
Prerequisite: senior standing in E T.

E T 412. Highway Technology
3 Credits (3)
Road-vehicle performance, geometric alignment, traffic analysis, highway materials, pavement design, and plan and profile development.
Prerequisite(s): E T 354.

E T 418. Applied Hydraulics
3 Credits (3)
Introduction to hydrology, hydraulic equations, hydraulic cross-sections, control structures, and collection and distribution of water, wastewater, and storm runoff using closed conduit and open channel flow.
Prerequisite(s): E T 308.

E T 420. Senior Internship
1-6 Credits
Internship requiring an approved number of hours of varied and progressive experience in the field of study. The scope and other requirements of the internship are stated in an individualized syllabus and through a memorandum of understanding between the faculty mentor and the industry partner. Taken in the senior year of program.
Prerequisites: Senior standing in E T.

E T 421. Senior Project
3 Credits (3)
Project in an area of civil engineering technology conducted under the direction of civil engineering technology faculty member. Project must be one that can be completed within a semester and of sufficient complexity for 3 credits. Taken last semester of program.

E T 426. Analysis and Design of Machine Elements
3 Credits (2+3P)
Analysis and design of power transmission components, including: gears, sprockets, belts, chains, bearings, and shafts. Experiential design project using SolidWorks and Excel modeling.
Prerequisite(s)/Corequisite(s): E T 305. Prerequisite(s): E T 210, E T 241, and E T 310.

E T 432. Applied Design of Structures II
4 Credits (3+3P)
Continuation of E T 332. Design of structural systems and study of their responses. Wood and masonry systems included.
Prerequisite(s): E T 332.
E T 435. Senior Project
3 Credits (2+3P)
Capstone course. Practical application of student’s cumulative knowledge to an assigned design projects. Design principles, teamwork, and project management skills are stressed. Demonstration of written and oral communication skills via project documentation and presentation of results. Must be graduating senior. Consent of instructor required.

E T 439. Advanced Digital Forensics and Incident Response
3 Credits (3)
Advanced topics in digital forensics and incident response. Topics include network analysis and advanced cybersecurity concepts. 
Prerequisite: A grade of C- or better in both, E T 339 and E T 377.

Learning Outcomes
1. Students will become familiar with tools and processes to analyze and detect memory resident processes that include malware, rootkits, and user recoverable data. Students will also have exposure to methods and processes used by hackers to penetrate and compromise targets.

E T 444. Hardware and Software Senior Design
3 Credits (2+3P)
The design, development, implementation, documentation and formal demonstration of a microprocessor-based application to solve an engineering problem. Emphasis on microprocessor architectural concepts and software interfacing. A student project is require
Prerequisite(s): E T 344 and E T 398.

E T 454. Advanced Construction Technology
3 Credits (3)
Contractor design and construction methods concerning formwork, special foundations, shoring, excavations, pilings, steel erection, and various material handling components.
Prerequisite: E T 354 and E T 355.

E T 455. Cost Estimating and Scheduling
3 Credits (3)
Methods and techniques in construction estimating including final bid preparation, construction planning and scheduling using various network methods and other techniques.
Prerequisite: junior or senior standing in E T.

E T 456. Applied Power Technologies
4 Credits (3+3P)
Basic elements of modern power systems, energy sources, substation configuration, load cycles, and three-phase circuits. Students will gain experience in power factor correction, transmission line configurations and impedance, voltage regulation of transformers, and the per-unit system. Study of load flow, fault analysis, and economic operations is included.
Prerequisite: A grade of C- or better in the following: (ENGR 190 or MATH 1435 or MATH 1511G) and E T 272 and ((PHYS 1240G and PHYS 1240L) or (PHYS 1320 and PHYS 1320L)).

Learning Outcomes
1. Various

E T 458. Web Development and Database Applications
3 Credits (3)
Design, planning, and building of interactive and dynamic web applications which are customizable and contain real-time information. Topics include relational databases, object oriented programming, secure-coding practices and web security, user authentication and personalization, as well as front-end and back-end technology integration. 
Prerequisite: A grade of C- or better in both, E T 362 and E T 280.

Learning Outcomes
1. Setting up a development server Read, design, and write code for backend web dev. Design, create, and access databases that support web applications. Implement effective security and authentication on Web applications

E T 459. Construction Technology and Management
3 Credits (3)
This is a Technical Specialty course that builds on topics presented in the construction sequence thus far: E T 154, E T 254, E T 354, and E T 355. The course introduces students to the different civil engineering approach to construction and management, including planning, construction estimating & scheduling, foundations, formwork, concrete work, steel fabrication and erection installation, equipment basics, quality control, and safety. Methods and techniques involved in construction including use of Primavera Project Management® software.
Prerequisite/Corequisite: E T 354 and E T 355.

Learning Outcomes
1. Understand the basic concepts of construction planning, cost estimation, scheduling, and types of project management Obtain basic knowledge on techniques to construct structures based on site condition Develop work breakdown system and quantity take-offs Develop project cost estimation for different construction projects Prepare work schedule for construction project Identify and implement the suitable method and equipment to construct various structures.

E T 463. Advanced Linux and Python Scripting
3 Credits (3)
Advanced Linux Includes installation and maintenance of Unix/Linux/Windows versions of Python. Use of Python to solve numerous engineering problems using Python scripting as infrastructure.
Prerequisite(s): E T 255 and E T 362.

E T 464. Windows Enterprise Administration
3 Credits (3)
Installation, configuration, and maintenance of Windows Enterprise services which includes Active Directory, distributed file systems, SQL Server, Web Server, Authentication Procedures, and enterprise elasticity. Topics covered include: Server Maintenance and Troubleshooting Methodologies.
Prerequisite(s)/Corequisite(s): E T 339. Prerequisite(s): E T 362.

E T 472. Intelligent Transportation Systems (ITS)
3 Credits (3)
Traffic flow theory, telecommunication and information technology application in transportation, system architecture and standards, transportation management, incident and emergency management, corridor management, dynamic route guidance, in-vehicle systems, and traffic signal timing. Consent of instructor required.
E T 475. Special Topics in Information Technology
3 Credits (3)
Contemporary topics in Information Technology.
Prerequisite: A grade of C- or better in both, ((E T 362 or ICT 362) and (E T 377 or ICT 377)), or Consent of Instructor.

Learning Outcomes
1. Students will learn two way Bluetooth, Wi-Fi, and NFC communication technologies. The student will practice building and programming IoT prototype devices. The student will develop customer value proposition and perform one round of customer discovery. The student will prototype their IoT device. The student will demonstrate their IoT device. The student will learn to integrate IoT devices into IT architecture.

E T 477. Computer Networking II
3 Credits (2+2P)
Advanced concepts in computer network design and applications including managing the campus network infrastructure (LANs and virtual LANs), network services (DNS and DHCP), network security and firewall, network monitoring and forensics, wireless networks, high-speed optical networks and Internet.
Prerequisite(s): E T 277 or E T 377.

E T 480. Innovation and Product Development
3 Credits (3)
Experiential product design and development. Students will learn about different types of innovation, business models, and methods for developing products. Students will apply the scientific method to develop a product idea of their own. Students will propose ideas, develop hypotheses, test hypotheses, and iterate until they have validated their product idea or identified a need to pivot.
Prerequisite(s)/Corequisite(s): (COMM 1115G or COMM 1130G or AXED 2120G or HRNS 2175G).

E T 481. Engineering Principles for Elementary Teachers
3 Credits (3)
Introduction to hands-on engineering principles and projects useful for application in the Elementary classroom. Restricted to: Masters of Arts in Education in Elementary Mathematics and Science majors.
Learning Outcomes
1. An ability to engage in the problem-solving process within engineering applications. An ability to put scientific theory into practice within an engineering application. Knowledge of the use of engineering concepts with hands-on activities. An ability to make sense of complex engineering-related phenomenon within an elementary school frame.

E T 482. Manufacturing Technology
3 Credits (2+2P)
Fundamentals of computer aided manufacturing (CAM) and computer numerical control (CNC) machining. Students will learn how to program several variants of CNC machines, using both G/M code programming and computer aided manufacturing software. Emphasis will be on the effective design of parts to be made on CNC machines along with a hands on lab to give students experience on CNC machines. Students will individually design, manufacture, and keep items such as keychains, bottle openers, LED clocks, ergonomic handles, and license plates.
Prerequisite(s): E T 210 and E T 217.

E T 483. Mobile App Programming and Development
3 Credits (3)
Planning and creation of mobile device applications. Programming tools and technical design considerations. Entrepreneurship and App development.
Prerequisite: A grade of C- or better in both, ((E T 362 or ICT 362) and (E T 377 or ICT 377)), or Consent of Instructor.

Learning Outcomes
1. The student will learn to create a modern and flexible mobile device User Interface using Java. The student will develop a high functioning prototype their mobile app. The student will implement a business model canvas including development of a customer value proposition and a minimum of one round of customer discovery. The student will implement database and information storage using a mobile device. The student will implement the developer’s dashboard for their mobile app. Student will publish and monetize their mobile app.

E T 485. White Hat System Testing
3 Credits (3)
System penetration testing and repair. Review of methods utilized to gain access to unprotected systems. Testing system repairs and fixes for future prevention. Test documentation.
Prerequisite: A grade of C- or better in both, ((E T 362 or ICT 362) and (E T 377 or ICT 377)), or Consent of Instructor.

Learning Outcomes
1. The student will practice modern methods for penetration testing. The student will demonstrate advanced ethical hacking methods. The student will evaluate in-place security systems. The student will run-through simulated attacks and system break-ins. The student will learn to prepare detailed reports on system vulnerabilities and weaknesses.

E T 490. Selected Topics
1-3 Credits
Selected topics in engineering technology and related areas.
Prerequisite: consent of instructor.

E T 505. Special Topics in Information Technology
3 Credits (3)
Contemporary topics in Information Technology. Restricted to: M-IT majors. May be repeated up to 9 credits.

Learning Outcomes
1. Various.

E T 539. Advanced Enterprise Security
3 Credits (3)
Advanced enterprise security design and analysis. Identification and minimization of cyber threats. Restricted to: M-IT majors.

E T 551. Enterprise Architecture I
3 Credits (3)
A study of current enterprise architecture methodologies, tools, and techniques. Restricted to: M-IT majors.

E T 552. Enterprise Architecture II
3 Credits (3)
Advanced topics in enterprise architecture including availability, access, and architecture map development. Restricted to: M-IT majors.
Prerequisite(s): E T 551.

E T 555. Virtualization
3 Credits (3)
An analysis and review of system and IT virtualization techniques. Restricted to: M-IT majors.
E T 562. Development and Operations  
3 Credits (3)  
Software development including Python scripting. Operations programming. Restricted to: M-IT majors.

E T 577. Advanced Computer Networking  
3 Credits (3)  
Advanced networking design and analysis. Modernization of infrastructures. Restricted to: M-IT majors.

E T 583. Mobile App Programming and Development  
3 Credits (3)  
Planning and creation of mobile device applications. Programming tools and technical design considerations. Entrepreneurship and App development. Restricted to: M-IT majors.

E T 585. White Hat System Testing  
3 Credits (3)  
System penetration testing and repair. Review of methods utilized to gain access to unprotected systems. Testing system repairs and fixes for future prevention. Test documentation. Restricted to: M-IT majors.

E T 595. Capstone Projects in Information Technology  
3 Credits (3)  
Capstone course. Practical application of student’s cumulative Information Technology knowledge to an assigned design projects. Project management skills.

Learning Outcomes  
1. Various

Information and Communication Technologies Courses

ICT 320. Introduction to Internet Protocols  
3 Credits (3)  
Present a overview of Internet Protocols Applications.

ICT 339. Introduction to Digital Forensics and Incident Response  
3 Credits (3)  
Introduction to the skills required to perform digital forensics and incident response on Windows operating systems. Topics include: live response, evidence acquisition, Windows operating system artifacts, documentation and reporting.  
Prerequisite(s): ICT 360.

ICT 350V. Introduction to Personal Computer Security and Privacy  
3 Credits (3)  
Introduction to Information Security and Privacy – Have you ever wondered what happens to all of your browsing history or data you fill out on websites? What do they do with this data? How do you stop sharing your private information? This class will answer those questions and provide steps to make your online presence more secure.  
Learning Outcomes  
1. Classify security issues, classify privacy protections, evaluate threats and countermeasures based on personal security breaches. Formulate a real-time privacy response. Assess international privacy protections through a multicultural focus.

ICT 352. Software Technology I  
3 Credits (3)  
This course focuses on reading, writing, debugging, testing, and documenting computer programs. May be repeated up to 3 credits.  
Learning Outcomes  
1. Set up a rich programming environment. Analyze existing code and modify/debug/test programs. Employ software documentation and programming best practices.

ICT 355. Linux System Administration  
3 Credits (3)  
Operating systems applications and interfacing with an introduction to systems administration. Topics include Shell Programming, Programming Tools, Database Management, System Backups, Security, Setup, and Maintenance of Linux Servers.  
Learning Outcomes  
1. Create a virtual environment on a host system using VirtualBox. Develop single and multiple Linux Operating Systems within the VirtualBox Virtual Environment. Select applications on production Linux Operating systems. Support the operation of the Linux Operating system using System Administration Techniques.

ICT 360. Operating Systems for ICT  
3 Credits (3)  
Fundamentals of operating systems with Windows and Linux including installation and configuration using the GUI as well as the command line, text editors, file systems, scripting and operating system management.

ICT 362. Software Technology II  
3 Credits (3)  
Topics include problem analysis, object-oriented programming (OOP), structured logic, and development concepts. May be repeated up to 3 credits.  
Prerequisite: A grade of C- or better in ICT 352 or E T 262 or OECS 195 or C S 152 or C S 172.  
Learning Outcomes  
1. Set up and use a rich programming environment for programming with Python. Analyze existing code. Employ effective use of basic programming and basic troubleshooting. Employ effective use of Object-Oriented Programming (OOP) and troubleshooting. Apply testing and documentation best practices.

ICT 364. Windows Enterprise Administration  
3 Credits (3)  
Installation, configuration, and maintenance of Windows Enterprise services which includes Active Directory, distributed file systems, SQL Server, Web Server, Authentication Procedures, and enterprise elasticity. Topics covered include: Server Maintenance and Troubleshooting Methodologies.  
Prerequisite(s)/Corequisite(s): ICT 339. Prerequisite(s): ICT 352.

ICT 377. Computer Networking I  
3 Credits (3)  
Computer network design and applications for LAN, TCP/IP networks, routing and switching technologies, VLANs, and the OSI layers from physical to transport.  
Prerequisite(s)/Corequisite(s): MATH 1220G or above.
ICT 380. Web Design and Multimedia
3 Credits (3)
Introduction to front-end web development including webpage design, structure, layout, positioning, responsiveness, and foundational layers of how the web works. Video, audio, and other digital presentation tools are covered.

**Learning Outcomes**

ICT 435. Senior Project
3 Credits (3)
Capstone course. Practical application of student's cumulative knowledge to an assigned design project. Design principles, teamwork, and project management skills are stressed. Demonstration of written and oral communication skills via project documentation and presentation of results. Must be graduating senior. Consent of Instructor required.

**Prerequisite:** A grade of C- or better in the following: ICT 364 and ICT 462.

**Learning Outcomes**
1. Various

ICT 439. Advanced Digital Forensics and Incident Response
3 Credits (3)
Advanced topics in digital forensics and incident response. Topics include network analysis and advanced cybersecurity concepts.

**Prerequisite:** A grade of C- or better in both, (E T 339 or ICT 339) and (E T 377 or ICT 377).

**Learning Outcomes**
1. Students will become familiar with tools and processes to analyze and detect memory resident processes that include malware, rootkits, and user recoverable data. Students will also have exposure to methods and processes used by hackers to penetrate and compromise targets.

ICT 450. Ethical Hacking
3 Credits (3)
Ethical Hacking and Penetration testing techniques.

**Prerequisite(s):** ICT 339.

ICT 457. Introduction to Information Security Technology
3 Credits (3)
This course provides an overview of security challenges and strategies of countermeasure in the information systems environment. Topics include definition of terms, concepts, elements, and goals incorporating industry standards and practices with a focus on availability, vulnerability, integrity and confidentiality aspects of information systems.

ICT 458. Web Development and Database Applications
3 Credits (3)
Design, planning, and building of interactive and dynamic web applications. Topics include relational databases, object oriented programming, and web security.

**Prerequisite(s)/Corequisite(s):** ICT 362.

ICT 460. Multimedia Tools and Support
3 Credits (3)
Introduction to video, audio and other digital presentation methods. Addresses the latest multimedia technology advances and how they apply to the information and communication technology fields. Sample tools like ffmpeg, and Audacity are covered.

**Prerequisite(s):** ICT 360.

ICT 462. Linux System Administration
3 Credits (3)
Operating system applications and interfacing with an introduction to systems administration. Topics include Shell Programming, Programming Tools, Database Management, System Backups, Security, Setup and Maintenance of Linux Servers.

**Learning Outcomes**
1. Create a virtual environment on a host system using VirtualBox. Develop single and multiple Linux Operating Systems within The VirtualBox Virtual Environment. Select applications on production Linux Operating systems. Support the operation of the Linux Operating system using System Administration Techniques.

ICT 463. Advanced Linux and Python Scripting
3 Credits (3)
Advanced Linux includes installation and maintenance of Unix/Linux/Windows versions of Python. Use of Python to solve numerous engineering problems using Python scripting as infrastructure.

**Prerequisite(s):** ICT 362 and ICT 462.

ICT 477. Computer Networking II
3 Credits (3)
Advanced concepts in computer network design and applications including managing the campus network infrastructure (LANs and virtual LANs), network services (DNS and DHCP), network security as well as network monitoring.

**Prerequisite:** A grade of C- or better in either ICT 377 or E T 377 or CTEC 285.

**Learning Outcomes**

**Surveying Courses**

SUR 143. Civil/Survey Drafting I
3 Credits (2+2P)
Introduction to drafting in the field of Civil Engineering. Drawings, projects, and terminologies related to topographic mapping, contour drawings, plan, and profiles as street/highway layout. May be repeated up to 3 credits.

**Prerequisite:** A grade of C- or better in E T 109 or DRFT 109.

**Learning Outcomes**
1. Students will develop a basic knowledge of AutoCad Civil 3D software as they relate to the civil drafting process. Students will become familiar with a basic understanding of computers, drafting and trigonometry is required. Use of long-term projects will be utilized to simulate real-world work environments to aid the understanding and applying vocabulary on surveying drafting plans. An ability to apply current knowledge and adapt to emerging applications of mathematics, science, engineering and technology.
SUR 222. Introduction to Geomatics
3 Credits (2+3P)
Theory and practice of geomatics as applied to plane surveying in the areas of linear measurements, angle measurements, area determination, differential and trigonometric leveling, and topographic mapping.
Prerequisite: A grade of C- or better in MATH 1250G or higher.
Learning Outcomes
1. Various

SUR 285. Precise Digital Mapping
3 Credits (3)
Photogrammetric Mapping Principles, digital sensor including optical cameras, terrestrial, surveying control, IMU & GPS integration, stereo photography, analytical triangulation, orthorectification, precision and accuracy of measurement systems, sUAS (Small Unmanned Aerial Vehicles) applications to geospatial data collection and practical applications project flight/pre planning, sensor platform, FAA regulations and restrictions, introduction to laser scanning systems. Restricted to Las Cruces campus only.

SUR 292. Legal Principles and Boundary Law I
3 Credits (3)
Fundamentals of real property law; principles of land description; survey evidence and procedure in boundary determination, order of importance of conflicting elements; and liability, ethical and professional principles in boundary surveying; contemporary issues in boundary determination.
Learning Outcomes
1. Understand how the USPLSS was developed and used Be able to locate and identify USPLSS survey monuments Be able to apply single and double proportion methods Be able to subdivide USPLSS sections Be able to read, write and interpret USPLSS legal descriptions

SUR 312. Public Land Survey System Boundaries
3 Credits (3)
Fundamentals of the U.S. Public Land Survey System; rules for the survey of the public lands, field surveys; the rectangular system, corners, monuments, evidence; dependent and independent resurveys, corner restoration; plats and field notes, patents.
Learning Outcomes
1. Demonstrate an understanding of surveying boundary laws Describe procedures for locating real property boundaries Read, interpret and write legal descriptions of real property Perform legal research of case and statutory law Communicate research findings through written and oral presentation

SUR 328. Construction Surveying & Automation Technologies
3 Credits (2+3P)
Prerequisite: A grade of C- or better in both, (SUR 222 or DRFT 222) and (MATH 1435 or MATH 1511G).
Learning Outcomes
1. Various

SUR 330. Computer Applications of Surveying
3 Credits (2+3P)
Advanced application of concepts and tools used in the manipulation of geospatial data in a computer environment. Topics include the use of surveying-specific software applications for problem solving, analysis and generation of spatial data products. Advanced programming skills in a high level language are presented and applied. May be repeated up to 3 credits.
Prerequisite: A grade of C- or better in the following: (E T 109 or DRFT 109) and SUR 222, and (MATH 1435 or MATH 1511G), and (E T 262 or ENGR 140).
Learning Outcomes
1. Various

SUR 351. Spatial Data Adjustment I
3 Credits (3)
Theory of random error in observations/measurements. Use of statistics in spatial data analysis, statistical testing, advanced data structures. Emphasis on computer based problem solving and programming to solve spatial data problems.
Prerequisite: A grade of C- or better in the following: (SUR 222 or DRFT 222) and (MATH 1435 or MATH 1511G) and (A ST 311G or MATH 1350G).
Learning Outcomes
1. Various

SUR 361. Geodesy/Geodetic Control Surveying
3 Credits (3)
Horizontal and vertical control network design and consideration. Understand ellipsoid, geoid, horizontal and vertical datum, coordinates, precise leveling, astronomic, establishment of state plane zones, understanding reporting. Transform data between geodetic Latitude/Longitude, state plane, ground data, perform geodetic computations, ability to design GPS networks utilizing CORS stations, network adjustments. Perform a control survey, process data, adjust network, and prepare control report with Meta-data.
Prerequisite: A grade of C- or better in the following: (SUR 222 or DRFT 222) and (MATH 1435 or MATH 1511G).
Learning Outcomes
1. Various
SUR 401. Ethics and Professionalism in Surveying and Mapping
3 Credits (3)
Ethics as applied to the surveying profession. Includes case studies and problems.
Prerequisite: A grade of C- or better in SUR 312.
Learning Outcomes
1. An ability to identify, formulate, and solve broadly defined technical or scientific problems by applying knowledge of mathematics and science and/or technical topics to areas relevant to the discipline.
2. An ability to develop and conduct experiments or test hypotheses, analyze and interpret data and use scientific judgment to draw conclusions.
3. An ability to communicate effectively with a range of audiences.

SUR 412. Advanced Topics in Boundary Surveying
3 Credits (2+3P)
Advanced land boundary topics including water boundaries, mineral claims, Spanish and Mexican land grants, state and national boundaries. May be repeated up to 3 credits.
Prerequisite: A grade of C- or better in SUR 312.
Learning Outcomes
1. Identify land boundary topics

SUR 450. Senior Project
3 Credits (3)
Research project prepared by student. Includes class presentation. Students will learn how to research after the end of their formal education. Students must be in Senior Standing to enroll.
Learning Outcomes
1. An ability to communicate effectively with a range of audiences.

SUR 451. Spatial Data Adjustment II
3 Credits (3)
Rigorous analysis of the theory of observations as applied to spatial data, application of least squares adjustments, ability to perform statistical analysis to determine accuracy of final product, constrained/free geospatial data integration, error ellipses, and pre-analysis of spatial data acquisition procedures.
Prerequisite: A grade of C- or better in SUR 351.
Learning Outcomes
1. Understand the theory of least squares as applied to survey measurements Understand the relevance of weighting survey observations Be able to adjust vertical, horizontal and 3D networks by least squares Be able to transform coordinates between similar coordinate systems Be able to analyze survey errors and detect survey blunders

SUR 452. Spatial Data Integration and Analysis
3 Credits (3)
Surveying practice under the direction of a licensed, professional land surveyor requiring an approved number of hours. Planned work between the student and the surveyor should be designed to be part of a project that integrates spatial data. An individualized syllabus should be developed collaboratively with the industrial partner and approved by the geomatics faculty. The final deliverable must be certified by the licensed professional land surveyor. A written report by the student is required. Credit is given to past work experience in cases where students can demonstrate that requirements for the practicum are met and should be approved by geomatics faculty.
Learning Outcomes
1. An ability to develop and conduct experiments or test hypotheses, analyze and interpret data and use scientific judgment to draw conclusions.
2. An ability to communicate effectively with a range of audiences.

SUR 461. GNSS Positioning
3 Credits (2+3P)
Logistics of GNSS data collection, the GPS signal, codes and biases, error sources, differences between relative and autonomous GNSS positioning, code phase carrier phase, DGPS static and RTK surveys. Geodetic and GPS standards and specifications GNSS data processing, network adjustments, and evaluation of spatial data accuracy practical applications of GNSS May be repeated up to 3 credits.
Prerequisite(s): SUR 361.

SUR 464. Legal Principles and Boundary Law II
3 Credits (3)
ALTA Surveys and Standards, boundary evidence, order of evidence, Subdivision and Platting Law, Mexican and Spanish land grants, water boundaries, sequential and simultaneous conveyances. Consent of Instructor required.
Prerequisite(s): SUR 312.

SUR 485. Emerging Techniques in Geospatial Technologies
3 Credits (3)
Hydrographic, Altimetry, Space borne Imaging Systems, Mobile Mapping Systems, Mining and Agriculture Surveying Principles, Ranging technologies and applications such as LiDAR, SAR, and Bathymetry. Principles of terrestrial & airborne laser scanning, point cloud data management & extraction, scan registration and processing, and advanced ranging data acquisition systems. Consent of Instructor required.
Prerequisite(s): Senior standing.
Learning Outcomes
1. Outline the different techniques in mapping seabed. Describe the procedure of LiDAR mapping. Outline the remote sensing technologies used in mapping. Recognize the UAV mapping technologies. Produce surveying products from new technologies in geomatics.

Name: Mrs. Lisa Higdon, Engineering Technology and Surveying Engineering (ETSE)

Physical Address:
Ed and Harold Foreman Engineering Complex III
The Civil Engineering Technology (CET) Program at NMSU will prepare graduates with the technical and managerial skills necessary to enter careers in the planning, design, construction, and operation of the built environment and global infrastructure. Graduates with the baccalaureate degree have strengths in their knowledge of design, construction, testing, and operation of buildings and infrastructure with the ability to produce and utilize construction documents, analyze and design systems, specify project methods and materials, perform cost estimates and analyses, and manage technical activities in support of civil projects. Graduates from our ABET-accredited CET program can pursue professional licensure and become professional engineers.

Program Educational Objectives

1. graduates are competent in at least one of the following areas:
   a. Land Development
   b. Infrastructure Development
   c. Heavy Civil Construction
   d. Cost Estimating
   e. Characterization and mechanical properties of construction materials.
2. graduates are proficient in the assessment of Engineering Alternatives.
3. graduates are:
   a. meeting the engineering needs of the region, both in the government and private sectors
   b. leaders in their specialized field of endeavor
4. graduates are pursuing their professional registration (Professional Engineer License)

The Civil Engineering Technology program is accredited (https://et.nmsu.edu/accreditation-and-assessment/degree-accreditation-information/) by the Engineering Technology Accreditation Commission (ETAC) of ABET www.abet.org (http://www.abet.org/)

Concentrations

• Renewable Energy Technologies (p. 986)

Minors

• Renewable energy (p. 1011)
• Geomatics (p. 1010)

Types of jobs that graduates pursue in this field

• Civil Engineer
• Construction Manager
• Project Engineer
• Project Manager
• Design Engineer
• Construction Inspector
• Owner
• Estimator
• Distribution and Sales

Engineering Technology - Civil (No Concentration)

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 123 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Concentrations are “optional” educational sequences that students may choose to focus on particular areas related to CET. Concentrations may often be done without additional credits by judicious use of electives and other optional course requirements.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I/MATH 1435 Calculus and Analytic Geometry II/MATH 1521G Calculus and Analytic Geometry II before enrolling in either option of coursework.

For students wishing to pursue a technical master’s degree, MATH 1511G Calculus and Analytic Geometry I and MATH 1521G Calculus and Analytic Geometry II are recommended and will satisfy both the Area II and General Education Elective requirements. Students who take MATH 1435 Calculus and Analytic Geometry I and MATH 1440 Calculus and Analytic Geometry II, will need to have an exception made for their degree audit.

See the General Education (p. 88) section of the catalog for a full list of courses

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses
### Engineering Technology - Civil (Renewable Energy Technologies) - Bachelor of Science in Engineering Technology

Students must complete all university degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 123 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

1 Students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I/MATH 1435 Applications of Calculus I or MATH 1521G Calculus and Analytic Geometry II/MATH 1440 Applications of Calculus II before enrolling in either option of coursework.

*For students wishing to pursue a technical master's degree, MATH 1511G Calculus and Analytic Geometry I and MATH 1521G Calculus and Analytic Geometry II are recommended and will satisfy both the Area II and General Education Elective requirements. Students who take MATH 1435 Applications of Calculus I and MATH 1440 Applications of Calculus II, will need to have an exception made for their degree audit.

2 See the General Education (p. 88) section of this catalog for a full list of courses.

3 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

Engineering Technology - Civil (Transportation Technology) - Bachelor of Science in Engineering Technology

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 123 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.
A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

2 See the General Education (p. 88) section of this catalog for a full list of courses.
See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

Engineering Technology - Electronics and Computer - Bachelor of Science in Engineering Technology

The Electronics and Computer Engineering Technology (https://et.nmsu.edu/electronics-and-computer-engineering-technology/) (ECET) program includes the design, building, and testing of a wide range of electronic and computer circuits and systems, including hardware/software digital systems, microprocessor systems, analog circuits, renewable energy technologies, micro-controllers, communications devices, applied power systems, signal processing and filter circuits, instrumentation systems, and computer networks. Our program includes a diverse exposure to programming languages, as well as hardware description languages, such as VHDL.

The ECET program is accredited (https://et.nmsu.edu/accreditation-and-assessment/degree-accreditation-information/) by the Engineering Technology Accreditation Commission (ETAC) of ABET. www.abet.org (http://www.abet.org/).

Engineering Technology - Electronics and Computer (No Concentration)

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 122 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits but may be needed in order to take the necessary English and Mathematics coursework.

### Second Language: (not required)

Electives, to bring the total credits to 122

| Total Credits | 122-124 |
Students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I/MATH 1435 Applications of Calculus I or MATH 1521G Calculus and Analytic Geometry II/MATH 1440 Applications of Calculus II before enrolling in either option of coursework.

*For students wishing to pursue a technical master's degree, MATH 1511G Calculus and Analytic Geometry I and MATH 1521G Calculus and Analytic Geometry II are recommended and will satisfy both the Area II and General Education Elective requirements. Students who take MATH 1435 Applications of Calculus I and MATH 1440 Applications of Calculus II, will need to have an exception made for their degree audit.

See the General Education (https://catalogs.nmsu.edu/nmsu/general-education-viewing-wider-world/#associatesbachelorsgetext) section of the catalog for a full list of courses. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses, rules, and alternative options.

Students must select one of the two PHYS course sequences, from the following, in order to meet the 8 credits of the Area III: Laboratory Sciences requirement.

**Algebra-Based Sequence**
- PHYS 1230G Algebra-Based Physics I/PHYS 1230L Algebra-Based Physics I Lab
- PHYS 1240G Algebra-Based Physics II/PHYS 1240L Algebra-Based Physics II Lab

**Calculus-Based Sequence**
- PHYS 1310G Calculus-Based Physics I/PHYS 1310L Calculus-Based Physics I Lab
- PHYS 1320G Calculus-Based Physics II/PHYS 1320L Calculus-Based Physics II Lab

Minors are "optional" educational sequences that permit students to focus on particular areas related to their major. Minors "may" often be done with few additional credits by judicious use of electives and other optional course requirements.

**A Suggested Plan of Study for Students**
This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Applications. It is a vibrant discipline that has a tremendous impact on "Information Engineering" – its principles, technologies, networks, and information-engineering-technology/.

Information Engineering Technology (IET) - Bachelor of Science in Engineering Technology

Engineering Education viewing a wider world/#associatesbachelorsgetext

Students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I or MATH 1521G Calculus and Analytic Geometry II before enrolling in either option of coursework. *For students wishing to pursue a technical master's degree, MATH 1511G Calculus and Analytic Geometry I and MATH 1521G Calculus and Analytic Geometry II are recommended and will satisfy both the Area II and General Education Elective requirements. Students who take MATH 1435 Applications of Calculus I and MATH 1440 Applications of Calculus II, will need to have an exception made for their degree audit.

See the General Education (https://catalogs.nmsu.edu/nmsu/general-education-viewing-wider-world/#associatesbachelorsgetext) section of the catalog for a full list of courses. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses, rules, and alternative options.

Students must select one of the two PHYS course sequences, from the following, in order to meet the 8 credits of the Area III: Laboratory Sciences requirement.

Algebra-Based Sequence
- PHYS 1230G Algebra-Based Physics I
- PHYS 1240G Algebra-Based Physics II

Calculus-Based Sequence
- PHYS 1310G Calculus-Based Physics I
- PHYS 1320G Calculus-Based Physics II

Concentrations are "optional" educational sequences that permit students to focus on particular areas related to their major. Concentrations "may" often be done without additional credits by judicious use of electives and other optional course requirements.

Engineering Technology - Information - Bachelor of Science in Engineering Technology

Information Engineering Technology (IET) (https://et.nmsu.edu/information-engineering-technology/) focusing on the study related to "Information Engineering" – its principles, technologies, networks, and applications. It is a vibrant discipline that has a tremendous impact on the economy as well as society. Information Engineering covers the following areas:

- applied computer programming and coding,
- solutions involving the creation, use, and administration of database technologies,
- information communications & networking environments,
- web and mobile technologies & applications,
- operating systems technologies,
- incident response and digital forensics,
- information security, and
- system integration.

Given the nature of the content in the IET program, students are expected to be familiar and have access to the following:

- a high-speed Internet connection,
- a sound card, 12G of RAM minimum,
- a microphone/Webcam,
- Microsoft Operating System 8.1 or newer and Office ®.

Graduates of the program can expect to enter the workforce with titles that include, but are not limited to Systems or Network Administrator, Project Manager, Database Administrator, Computer Forensics Examiner, Cloud Systems Administrator, and Systems Engineer.

The Information Engineering Technology program is accredited (https://et.nmsu.edu/accreditation-and-assessment/degree-accreditation-information/) by the Engineering Technology Accreditation Commission (ETAC) of ABET www.abet.org. (http://www.abet.org/)

Engineering Technology - Information (No Concentration)

Students must complete all university degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 121 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits but may be needed in order to take the necessary English and Mathematics coursework.

**Technical Electives** (choose from the list below)

- E T 475: Special Topics in Information Technology
- E T 480: Innovation and Product Development
- E T 483: Mobile App Programming and Development
- E T 485: White Hat System Testing
- ICT 320: Introduction to Internet Protocols
- ICT 450: Ethical Hacking

**Second Language**: (not required)

**Electives, to bring the total credits to 120**

**Total Credits**: 121-124

1 See the General Education (https://catalogs.nmsu.edu/nmsu/general-education-viewing-wider-world/#associatesbachelorsgetext) section of the catalog for a full list of courses. See the Viewing A Wider World (p. 92) section of the catalog for a full list of courses.

2 For students wishing to pursue a technical master’s degree, MATH 1511G Calculus and Analytic Geometry I and MATH 1521G Calculus and Analytic Geometry II are recommended and will satisfy both the Area II and General Education Elective requirements. Students who take MATH 1435 Applications of Calculus I MATH 1435 Applications of Calculus I and MATH 1440 Applications of Calculus II, will need to have an exception made for their degree audit. *students may need to take any prerequisites needed to enter the class(es) first.*

3 Elective credit may vary based on Math course selection, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

4 Concentrations and Minors are "optional" educational sequences that students may choose to focus on particular areas related to their major. Concentrations and Minors may often be done without additional credits by judicious use of electives and other optional course requirements.

### A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

### Engineering Technology - Mechanical - Bachelor of Science in Engineering Technology

MET (https://et.nmsu.edu/academics%20/mechanical-engineering-technology.html) majors learn theory and applications in the fields of manufacturing, product design and development, power systems, machinery, and fluid technology. Our students take courses in mechanisms and machines, computer aided modeling, heat transfer, and instrumentation, to name a few. They find employment in the design and testing of tools, engines, machines, and other complex mechanical devices. MET represents one of the broadest engineering technology disciplines. Our MET students also learn by designing and racing mini-baja cars, designing and constructing machines to help our farmers, and even building systems in other countries.

See the General Education section of this catalog for a full list of courses. See the Viewing a Wider World section of this catalog for a full list of courses.
\textbf{Area II: Mathematics} ¹

\begin{itemize}
  \item MATH 1435 Applications of Calculus I ²  \textbf{3 - 4}
  \item or MATH 1511G Calculus and Analytic Geometry I
\end{itemize}

\textbf{Area III: Laboratory Sciences} ¹

\begin{itemize}
  \item CHEM 1120G Introduction to Chemistry Lecture and Laboratory (non majors)
  \item PHYS 1230G Algebra-Based Physics I
  \item & PHYS 1230L and Algebra-Based Physics I Lab
  \item or PHYS 1310G Calculus-Based Physics I
  \item & PHYS 1310L and Calculus-Based Physics I Lab
\end{itemize}

\textbf{Area IV: Social/Behavioral Sciences} ¹

\textbf{Strongly Recommended:}

\begin{itemize}
  \item MATH 1440
  \item General Education Elective
\end{itemize}

\textbf{Area V: Humanities} ¹

\textbf{Strongly Recommended:}

\begin{itemize}
  \item PHIL 1120G Logic, Reasoning, & Critical Thinking
  \item PHIL 2110G Introduction to Ethics
\end{itemize}

\textbf{Area VI: Creative and Fine Arts} ¹

\begin{itemize}
  \item ARTS 1145G Visual Concepts (Strongly Recommended)
\end{itemize}

\textbf{General Education Elective}

\begin{itemize}
  \item MATH 1440 Applications of Calculus II  \textbf{3 - 4}
  \item or MATH 1521G Calculus and Analytic Geometry II
\end{itemize}

\textbf{Viewing A Wider World} ¹

\textbf{Strongly Recommended Courses:}

\begin{itemize}
  \item BFN 303V Personal Financial Planning and Investing in a Global Economy
  \item MGMT 310V Entrepreneurial Mindset
  \item MGMT 388V Leadership and Ethics
  \item MKTG 311V Consumer Behavior
\end{itemize}

\textbf{Departmental/College Requirements}

\begin{itemize}
  \item A ST 311 Statistical Applications  \textbf{3}
  \item ET 101 Introduction to Engineering Technology and Geomatics  \textbf{1}
  \item ET 182 Introduction to Digital Logic  \textbf{2}
  \item ET 184 Applied AC Circuits  \textbf{2}
  \item ET 210 Intermediate 3-D Modeling (Solid Works)  \textbf{3}
  \item ET 217 Manufacturing Processes & 217 L and Manufacturing Processes Lab  \textbf{4}
  \item ET 305 Introduction to Product Design  \textbf{3}
  \item ET 306 Fundamental and Applied Thermodynamics & 306 L and Thermodynamics Lab  \textbf{4}
  \item ET 308 Fluid Technology & 308 L and Fluid Technology Lab  \textbf{4}
  \item ET 310 Applied Strength of Materials & 310 L and Applied Strength of Materials Lab  \textbf{4}
  \item ET 396 Heat Transfer and Applications  \textbf{3}
  \item ET 402 Instrumentation  \textbf{3}
  \item ET 410 Senior Seminar  \textbf{1}
  \item ET 426 Analysis and Design of Machine Elements  \textbf{3}
  \item ENGR 110 Introduction to Engineering Design  \textbf{3}
  \item ENGR 120 DC Circuit Analysis  \textbf{4}
  \item ENGR 140 Introduction to Programming and Embedded Systems  \textbf{4}
  \item ENGR 190 Introduction to Engineering Mathematics  \textbf{4}
  \item ENGR 233 Engineering Mechanics I  \textbf{3}
  \item ENGR 234 Engineering Mechanics II  \textbf{3}
  \item ENGR 401 Engineering Capstone I  \textbf{3}
  \item ENGR 402 Engineering Capstone II  \textbf{3}
  \item IE 451 Engineering Economy  \textbf{3}
  \item PHYS 1240G Algebra-Based Physics II  \textbf{4}
  \item & PHYS 1240L and Algebra-Based Physics II Lab
  \item or PHYS 1320G Calculus-Based Physics II
  \item & PHYS 1320L and Calculus-Based Physics II Lab
\end{itemize}

\textbf{Technical Electives} ¹

\begin{itemize}
  \item ET 317 Advanced Manufacturing and Design  \textbf{3}
  \item ET 381 Renewable Energy Technologies  \textbf{1}
  \item ET 401 Heating and Air-Conditioning Systems  \textbf{3}
  \item ET 480 Innovation and Product Development  \textbf{1}
  \item ET 482 Manufacturing Technology  \textbf{0}
\end{itemize}

\textbf{Electives, to bring the total credits to 122}

\textbf{Total Credits}  \textbf{122-124}

\textbf{1 See the General Education (p. 88) section of the catalog for a full list of courses. See the Viewing a Wider World (p. 92)section of the catalog for a full list of courses.}

\textbf{2 Students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I/MATH 1435 Applications of Calculus I or MATH 1521G Calculus and Analytic Geometry II/MATH 1440 Applications of Calculus II before enrolling in either option of coursework.}

\textbf{*For students wishing to pursue a technical master’s degree, MATH 1511G Calculus and Analytic Geometry I and MATH 1521G Calculus and Analytic Geometry II are recommended and will satisfy both the Area II and General Education Elective requirements. Students who take MATH 1435 Applications of Calculus I and MATH 1440 Applications of Calculus II, will need to have an exception made for their degree audit.}

1. See the General Education (p. 88) section of this catalog for a full list of courses. See the Viewing a Wider World (p. 92) section of this catalog for a full list of courses.
2. Students may need to take any prerequisites needed to enter MATH 1511G Calculus and Analytic Geometry I/MATH 1435 Applications of Calculus I or MATH 1521G Calculus and Analytic Geometry II/MATH 1440 Applications of Calculus II before enrolling in either option of coursework.
3. For students wishing to pursue a technical master’s degree, MATH 1511G Calculus and Analytic Geometry I and MATH 1521G Calculus and Analytic Geometry II are recommended and will satisfy both the Area II and General Education Elective requirements. Students who take MATH 1435 Applications of Calculus I and MATH 1440 Applications of Calculus II, will need to have an exception made for their degree audit.
4. Elective credit may vary based on Math course selection, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

### Concentrations and Minors

Concentrations and Minors are ‘optional’ educational sequences that students may choose to focus in particular areas related to their major. Concentrations and Minors may often be done without additional credits by judicious use of electives and other optional course requirements.

### Geomatics - Bachelor of Science in Geomatics

Geomatics is a rapidly developing engineering discipline that focuses on acquiring and analyzing precise spatial information. Geomatics engineers use a variety of technologies such as Unmanned Aerial Vehicles, Global Navigation Satellite Systems, High-Definition 3D Laser scanners, High-resolution satellite images, and Geographic Information Systems. They measure terrestrial
and three-dimensional positions of points on, above, and below the earth's surface and the distance and angles between them at a high level of precision. Geomatics engineers aid in the design of infrastructure including roads, bridges and legal boundaries for ownership. They provide precise data for natural resource managers, subdivision developers, and coastal monitoring systems.

The program is designed to provide cutting-edge industrial needs as well as to meet the educational requirements for registration as a Professional Land Surveyor in different states.

The mission of the Department of ETSE is to provide men and women with the rigorous, fundamental education needed to enter and succeed in the Geomatics and related professions. To accomplish this mission, the department will introduce students to the theory and application of recognized geomatics principles.

The Geomatics degree is offered online. Students can start as freshmen or transfer. As part of the curriculum requirements, transfer students must complete college-level work that includes General Education Area I, IV, V, and VI (19 credit: see the General Education (https://catalogs.nmsu.edu/nmsu/general-education-viewing-wider-world/#viewingawiderworldtext) section of this catalog for a full list of courses), Calculus I and II (6-8 credit), Physics I (4 -credit), elective science with lab (4 credit), computer drafting (3 credit), statistics (A ST 311 or equivalent: 3 credit), computer programming (3 credit), plane surveying (3 credit), introduction to GIS (3-4 credit), surveying/civil drafting (3 credit), and approved electives to bring total transfer credits to 59.

**Requirements (120 Credits)**

Students must complete all University degree requirements, which include: General Education requirements, Viewing A Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits but may be needed in order to take the necessary English and Mathematics coursework.

Students must also take the Fundamentals of Surveying examination prior to graduation.

See the General Education (p. 88) section of the catalog for a full list of courses. See the Viewing a Wider World (p. 92) section of this catalog for a full list of courses.
For students wishing to pursue a technical master’s degree, MATH 1511G Calculus and Analytic Geometry I (or equivalent) and MATH 1521G Calculus and Analytic Geometry II (or equivalent) are recommended and will satisfy both the Area II and General Education Elective requirements. Students who take MATH 1435 Applications of Calculus I (or equivalent) and MATH 1440 Applications of Calculus II (or equivalent), will need to have an exception made for their degree audit.

*for either Mathematics course selection students may need to take any prerequisites needed to enter the class(es) first.

Or any MATH 400 or above

Transfer students must complete college-level work that includes General Education Area I, IV, V, and VI (19 credit: see the General Education (https://catalogs.nmsu.edu/nmsu/general-education-viewing-wider-world/#viewingawiderworldtext) section of this catalog for a full list of courses), Calculus I and II (6-8 credit), Physics I (4 credit), elective science with lab (4 credit), computer drafting (3 credit), statistics (A ST 311 or equivalent: 3 credit), computer programming (3 credit), plane surveying (3 credit), introduction to GIS (3-4 credit), surveying/civil drafting (3 credit), and approved electives to bring total transfer credits to 59.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case by case basis and students should discuss elective requirements with their academic advisor.

A Suggested Plan of Study for Students

The contents and order of this roadmap may vary depending on the students’ transfer credits, some courses may need to be completed in addition to the ones listed below. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

**Total Credits**

120

See the General Education (p. 92) section of this catalog for a full list of courses. See the Viewing a Wider World (p. 92) section of this catalog for a full list of courses.

For students wishing to pursue a technical master’s degree, MATH 1511G Calculus and Analytic Geometry I (or equivalent) and MATH 1521G Calculus and Analytic Geometry II (or equivalent) are recommended and will satisfy both the Area II and General Education Elective requirements. Students who take MATH 1435 Applications of Calculus I (or equivalent) and MATH 1440 Applications of Calculus II (or equivalent), will need to have an exception made for their degree audit.

*for either Mathematics course selection students may need to take any prerequisites needed to enter the class(es) first.

Or any MATH 400 and above.

Transfer students must complete college-level work that includes General Education Area I, IV, V, and VI (19 credit: see the General Education (https://catalogs.nmsu.edu/nmsu/general-education-viewing-wider-world/#viewingawiderworldtext) section of this catalog for a full list of courses), Calculus I and II (6-8 credit), Physics I (4 credit), elective science with lab (4 credit), computer drafting (3 credit), statistics (A ST 311 or equivalent: 3 credit), computer programming (3 credit), plane surveying (3 credit), introduction to GIS (3-4 credit), surveying/civil drafting (3 credit), and approved electives to bring total transfer credits to 59.

5
Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case by case basis and students should discuss elective requirements with their academic advisor.

**Geomatics - Bachelor of Science in Engineering (Online)**

Geomatics ([https://et.nmsu.edu/academics%20/geomatics-surveying.html](https://et.nmsu.edu/academics%20/geomatics-surveying.html)) is a rapidly developing engineering discipline that focuses on acquiring and analyzing precise spatial information. Geomatics engineers use a variety of technologies such as Unmanned Aerial Vehicles, Global Navigation Satellite Systems, High-Definition 3D Laser scanners, High-resolution satellite images, and Geographic Information Systems. They measure terrestrial and three-dimensional positions of points on, above, and below the earth’s surface and the distance and angles between them at a high level of precision. Geomatics engineers aid in the design of infrastructure including roads, bridges and legal boundaries for ownership. They provide precise data for natural resource managers, subdivision developers, and coastal monitoring systems.

The program is designed to provide cutting-edge industrial needs as well as to meet the educational requirements for registration as a Professional Land Surveyor in different states.

The mission of the Department of ETSE is to provide men and women with the rigorous, fundamental education needed to enter and succeed in the Geomatics and related professions. To accomplish this mission, the department will introduce students to the theory and application of recognized geomatics principles.

The Geomatics degree is offered online. Students can start as freshmen or transfer. As part of the curriculum requirements, transfer students must complete college-level work that includes General Education Area I, IV, V, and VI (19 credit: see the General Education ([https://catalogs.nmsu.edu/nmsu/general-education-viewing-wider-world/#viewingawiderworldtext](https://catalogs.nmsu.edu/nmsu/general-education-viewing-wider-world/#viewingawiderworldtext)) section of this catalog for a full list of courses), Calculus I and II (6-8 credit), Physics I (4 -credit), elective science with lab (4 credit), computer drafting (3 credit), statistics (A ST 311 or equivalent: 3 credit), computer programming (3 credit), plane surveying (3 credit), introduction to GIS (3-4 credit), surveying/civil drafting (3 credit), and approved electives to bring total transfer credits to 59.

**Requirements (120 Credits)**

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits but may be needed in order to take the necessary English and Mathematics coursework.

Students must also take the Fundamentals of Surveying examination prior to graduation.

However, students may end up needing to complete more or less on a case by case basis and students should discuss elective requirements with their academic advisor.

### Information and Communication Technology - Bachelor of Information and Communication Technology (120 credits)

Information and Communication Technology (ICT) (https://et.nmsu.edu/academics%20/information-communication-technology.html) is a distance education degree completion program. The program focuses on the knowledge and experience that is required to design, implement and manage a variety of information systems. The curriculum includes the study of:

- Networking and Network Security,
- Information Security,
- Application and Operating Systems Software,
- System Integration,
- Database Design and Management.

Graduates of the program can expect to enter the workforce with titles that include Systems or Network Administrator, Project Manager, Database Administrator, and Computer Support Specialist.

The ICT program is a distance education program and does not require any on-campus visits. Students who are successful in distance education programs typically are self-motivated, do not rely heavily on face-to-face instruction, work independently, and can remain on schedule. Students must have familiarity with and access to:

- a high-speed Internet connection,
- a sound card, 12G of RAM minimum,
- a microphone/Webcam,
- Microsoft Operating System 8.1 or newer and Office ®.

This program was not designed to be an engineering or engineering technology program, although there is a significant overlap with the engineering technology IET program offered by the department. Thus, the ICT program differs from all other baccalaureate programs offered by departments in the College of Engineering. The ICT program is accredited under NMSU’s umbrella accreditation by the Higher Learning Commission (https://accreditation.nmsu.edu/) of the North Central Association of Colleges and Schools.

The program is designed to be a two-year degree completion educational path to a baccalaureate degree for graduates of computer and technology-related associate degree programs from community colleges or other two-year institutions. It is also a viable degree path for students who have completed the freshmen and sophomore years of computer or technology-related programs at four-year institutions including New Mexico State University.

Students must complete all university degree requirements, which include: General Education requirements, Viewing A Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits but may be needed in order to take the necessary English and Mathematics coursework. The General Education requirements may be completed with transfer credits from any previous institutions.

Electives, to bring the total credits to 120 4

Select 33 credits from typical content courses from an A S or AAS 2,3

Total Credits 120
See the General Education (p. 88) section of the catalog for a full list of courses. NOTE: Students may need to take any prerequisites needed to enter MATH 1220G College Algebra.

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses. Viewing a Wider World (p. 92) courses will form part of the required 48 upper-level credit hours taken as part of the ICT program at NMSU.

Concentrations are optional educational sequences that students may choose to focus on particular areas related to . Concentrations may often be done without additional credits by judicious use of electives and other optional course requirements.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Special Topics courses will include various topics and will require the instructor’s consent. Students pursuing an ICT concentration will need prior faculty advisor approval to ensure the topics covered in that specific term will count towards the desired ICT concentration.

| Total Credits | 120 |

See the General Education (p. 88) section of the catalog for a full list of courses. NOTE: Students may need to take any prerequisites needed to enter MATH 1220G College Algebra.

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses. Viewing a Wider World (p. 92) courses will form part of the required 48 upper-level credit hours taken as part of the ICT program at NMSU.

Concentrations are optional educational sequences that students may choose to focus on particular areas related to . Concentrations may often be done without additional credits by judicious use of electives and other optional course requirements.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Special Topics courses will include various topics and will require the instructor’s consent. Students pursuing an ICT concentration will need prior faculty advisor approval to ensure the topics covered in that specific term will count towards the desired ICT concentration.

Information and Communication Technology (ICT) (https://et.nmsu.edu/academics%20/information-communication-technology.html) is a distance education degree completion program. The program focuses on the knowledge and experience that is required to design, implement and
manage a variety of information systems. The curriculum includes the study of:

- Cybersecurity including Ethical Hacking and Digital Forensics,
- Computer Network design, configuration, and security,
- Operating Systems, System Integration, and Cloud Technologies,
- Applied computer programming and coding.

Graduates of the program can expect to enter the workforce with titles that include Systems or Network Administrator, Project Manager, Database Administrator, and Computer Support Specialist.

The ICT program is a distance education program and does not require any on-campus visits. Students who are successful in distance education programs typically are self-motivated, do not rely heavily on face-to-face instruction, work independently, and can remain on schedule. Students must have familiarity with and access to:

- a high-speed Internet connection,
- a sound card, 12G of RAM minimum,
- a microphone/Webcam,
- Microsoft Operating System 8.1 or newer and Office ®.

This program was not designed to be an engineering or engineering technology program, although there is a significant overlap with the engineering technology IET program offered by the department. Thus, the ICT program differs from all other baccalaureate programs offered by departments in the College of Engineering. The ICT program is accredited under NMSU's umbrella accreditation by the Higher Learning Commission (https://accreditation.nmsu.edu/) of the North Central Association of Colleges and Schools.

The program is designed to be a two-year degree completion educational path to a baccalaureate degree for graduates of computer and technology-related associate degree programs from community colleges or other two-year institutions. It is also a viable degree path for students who have completed the freshmen and sophomore years of computer or technology-related programs at four-year institutions including New Mexico State University.

Students must complete all university degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits but may be needed in order to take the necessary English and Mathematics coursework. The General Education requirements may be completed with transfer credits from any previous institutions.

Digital Electronic Applications - Undergraduate Minor

A grade of C- (or better) is required in each course (may not be taken S/U). All prerequisites must be met before enrolling in a class. Engineering Technology students can meet most of the requirements for this minor by judicious selection of their technical electives.

For non-ECET majors

Geomatics - Undergraduate Minor

Geomatics involves the application of knowledge to the analysis, design and execution of mapping, geomatics, geospatial information systems, and surveying. When performing this work, professionals must have an understanding of: the science of geomatic measurement and analysis; the legal principles of boundary location; the laws related to boundaries and land use; and applicable mathematical and computational theories and principles. Geomatics is made up of positional accuracy, land planning and development concepts pertinent to subdivision science. Geomatics professionals work for private surveying or engineering firms, for City, County, State or Federal Highway Departments, for State Lands Commissions, for the US Forest Service and for the US Bureau of Land Management, among others.

The mission of the Department of ETSE is to provide students with the rigorous, fundamental education needed to enter and succeed in the Geomatics and related professions. To accomplish this mission, the department will introduce students to the theory and application of recognized geomatics principles.
Typical skills gained from Manufacturing Minor coursework include: management and coordination of manufacturing processes, design for manufacturing, fabrication and assembly, product design and development, product specification, operations planning, scheduling, material handling, quality control, testing, evaluation and product validation.

A grade of C- or better is required in each course (may not be taken S/U). All prerequisites must be met before enrolling in a course. Engineering Technology students can meet most of the requirements for this minor by judicious selection of their electives.

### Manufacturing - Undergraduate Minor

The Manufacturing Minor provides students with an augmenting skillset to better facilitate entry-level employment in manufacturing related industries. Students completing the Minor also acquire specialized knowledge needed for successful pursuit of a career in the manufacturing sector.
The objective of this program is to provide opportunities for working professionals and traditional technology students to increase their knowledge and skillsets in the growing field of Information Technology. The professional Masters of Information Technology (M-IT) degree is a non-thesis, 100% online, professional development degree offered by the Department of Engineering Technology and Surveying Engineering (ETSE) in the NMSU College of Engineering. This degree is designed for working IT professionals and students interested in pursuing an advanced technology degree. Topics include system architecture, computer networking, development and application of software tools, cybersecurity, and virtual systems in the context of enterprise IT decision-making.

There are two paths to completing this degree. The first is a traditional program of 30 credits of masters’ level course work for students who currently hold a baccalaureate degree. The second is a baccalaureate to master’s accelerated track. In this track, undergraduates will successfully complete the first three years of an undergraduate baccalaureate program, which coincides with the requirements of the Engineering Technology BS degree in Information Engineering Technology (IET) or the BICT degree in Information and Communication Technology (ICT).

The accelerated track master’s degree in engineering is not available to students who have already earned an undergraduate degree. Upon approval from the Graduate School, in the final year, up to 12 credits of IET/ICT degree’s required or elective courses numbered 450 and above may be considered “dual credits” applying to both the baccalaureate and the M-IT degree. When the student completes the baccalaureate degree and after admission to the M-IT program, the completed dual credit courses will be applied to the Master’s requirements. The final M-IT degree requirements will be chosen to complete the 30 credit requirement. Students will begin taking graduate-level classes when they have junior or senior standing (up to 9 credits). These courses double count, fulfilling requirements for both a baccalaureate and the M-IT degree.

Not available for ECET majors as a required course. Select from other choices

Must be related to a renewable energy field and preapproved by faculty advisor.

If the selected class is outside the student’s college it may also satisfy a Viewing a Wider World requirement.

Information Technology - Master of Information Technology (Online)

The plan of study below was created with working professionals in mind. You will find guidelines for part-time students taking two courses per semester, including summer. Please note that the Masters of Information Technology program can be completed as a full-time student in one calendar year if that is your preference. Contact the program director or faculty advisor for other plans of study options and for further information. The program website is located at https://engr.nmsu.edu/Academics/pmp-it.html.
In addition, the Engineering Accreditation Commission of ABET, Inc. have:

Undergraduate Program Information

Industrial engineers design, develop, install and improve integrated systems. The integrated systems can involve people, equipment, information, financial resources, software, materials, or energy. Industrial engineers work in a variety of manufacturing, health care, utility, retail, government, and research settings, therefore the tools and methods of the industrial engineer are both varied and broad. Industrial Engineers use knowledge and skills in engineering, mathematics, and physical and social sciences. They also use principles and methods of engineering analysis and design to monitor and improve systems. New Mexico State University’s undergraduate degree program in Industrial Engineering prepares students to join the workforce or pursue graduate education while setting the foundation for life-long learning.

Specifically, within 2-3 years of graduation, graduates of the program will have:

• successfully applied various industrial Engineering techniques in an integrated fashion to solve real-world problems in process design and/or improvement;
• been engaged in a successful career sustained by life-long learning experiences

In addition, the Engineering Accreditation Commission of ABET, Inc. criteria in conjunction with the Institute of Industrial Engineers, requires that:

• baccalaureate degree graduates will be able to demonstrate the ability to design, develop, implement and improve integrated systems that include people, materials, information, equipment, and energy;
• industrial engineering curricula include in-depth instruction allowing students to accomplish the integration of systems using appropriate analytical, computational, and experimental practices; and
• that faculty teaching in industrial engineering departments shows evidence of understanding professional practice and stay current in their respective professional areas. Program faculty must have a responsibility and sufficient authority to define, revise, implement and achieve program objectives.

Master’s Accelerated Program: The Master’s Accelerated Program (MAP) option provides excellent opportunities for academically qualified undergraduate students to begin working on a master’s degree during their junior year and senior year. The student must obtain prior approval from the department head before starting the MAP Note that the MAP is only applicable if the student has not yet completed a bachelor’s degree.

Graduate Program Information

The Department of Industrial Engineering offers graduate work leading to the degrees of Master of Engineering in Industrial Engineering (MEIE), Master of Science in Industrial Engineering (MSIE), and Doctor of Philosophy (Ph.D.) with specialization in industrial engineering. Areas of emphasis include

• operations research and simulation analytics,
• manufacturing systems,
• quality and reliability engineering,
• engineering management and systems engineering.

Departmental admission requirements in addition to those of the Graduate School must be considered on an individual basis because of the diversity of backgrounds of applicants in the program. An applicant should meet or correspond directly with the department as a first step in determining his or her specific admission status. Applicants should present mathematics preparation equivalent to 9 credits of calculus for engineers, 3 credits of differential equations, and 3 credits of calculus-based probability and statistics.

The MEIE is a Professional Master’s degree targeting a working professional who wants to pursue a Master’s degree in Industrial Engineering. The minimum credit-hour requirements for the MEIE degree may be met in the following way:

• 30-semester credits of approved course work.

The MSIE is a research-oriented degree. The minimum credit-hour requirements for the MSIE degree may be met in any of the following ways:

• 24-semester credits approved course work and 6-semester credits of thesis (I E 599 Master’s Thesis) for a total of 30-semester credits or
• 27-semester credits approved course work and 3-semester credits of project (I E 598 Special Research Programs) for a total of 30-semester credits.

Approved course work must meet all requirements of the Graduate School, represent a consistent master’s program in relation to a student’s graduate study goals as determined through consultation with the graduate program adviser, and be approved by a program committee of the graduate faculty of the department. Programs in the focus areas of operations research and simulation analytics, manufacturing systems, quality and reliability engineering, or engineering management and systems engineering can be developed with the aid of a faculty advisor.

Departmental facilities and equipment are available to support the research efforts of graduate students, including computer terminals and laboratories. In addition to departmental facilities, supporting facilities
such as the Manufacturing Technology and Engineering Center (MTEC) and five interdisciplinary Research Clusters are available for research work.

The Ph.D. program is research-oriented with the final product being the dissertation. The general information (p. 35) chapter in this catalog describes the Ph.D. degree program. The Ph.D. in Industrial Engineering also includes the following requirements:

- the course work must include at least 12 credits at the 500 level in a related field,
- 6 credits of 600-level research courses covering two areas, and
- 18 credits of 700-level courses following successful completion of the comprehensive examination.

The department does not have any foreign language or research tool requirements. Interested individuals should correspond directly with the department to determine eligibility for admission.

**Degrees for the Department**

**Bachelor Degree(s)**
Industrial Engineering - Bachelor of Science in Industrial Engineering (BSIE) (p. 1017)

**Master Degree(s)**
Industrial Engineering - Master of Science in Industrial Engineering (MSIE) (p. 1023) as a research-oriented degree. If you are interested in pursuing an advanced degree in the engineering sciences or in preparation for a Ph.D., our MS degree is for you.

Industrial Engineering - Master of Engineering in Industrial Engineering (MEIE) (p. 1021) as the coursework-only degree. It is a Professional Master’s degree targeting a working professional who wants to pursue a Master’s degree in Industrial Engineering at New Mexico State University.

**Doctoral Degree(s)**
Engineering (Industrial Engineering) - Doctor of Philosophy (Ph.D.) (p. 1026)

**Minors for the Department**
Entrepreneurship - Undergraduate Minor (p. 1019)

Lean Manufacturing and Analytics - Undergraduate Minor (p. 1019)

Supply Chain and Operations Research Analytics - Undergraduate Minor (p. 1020)

Systems Engineering - Undergraduate Minor (p. 1020)

**Graduate Certificates**
Systems Engineering - Graduate Certificate (p. 1027)

**Hansuk, Sohn, Interim Department Head**

**Professor** Edward Pines; Delia Valles-Rosales

**Associate Professors** Hansuk Sohn (Interim Department Head), John Mullen;

H. Sohn, Interim Department Head, Ph.D. (University of Iowa) – operations research applications in logistics, transportation, and health systems; E. Pines, Ph.D. (Penn State) – quality and continuous improvement, technology policy; J. Mullen, Ph.D. (Iowa State) – stochastic processes, quality improvement, production system design; D. J. Valles-Rosales, Ph.D. (New Mexico State) – manufacturing systems, soft computing technologies, computer integrated manufacturing.

**Industrial Engineering Courses**

I E 151. Computational Methods in Industrial Engineering
3 Credits (3)

History, social implications, and application of computers and an introduction to computer programming, word processing, and database management systems. Satisfies General Education computer science requirement.  
**Prerequisite:** MATH 1220G.

I E 200. Special Problems-Sophomore
1-3 Credits

Directed individual projects. May be repeated for a total of 3 credits.  
**Prerequisite:** consent of faculty member.

I E 217. Manufacturing Processes
3 Credits (3)

Introduction to manufacturing and processing, including: casting, forming, and machining. Emphasis on creating products with the appropriate techniques. Crosslisted with: E T 217.  
**Prerequisite:** E T 110 and MATH 1220G.

**Learning Outcomes**

1. Various

I E 300. Special Problems-Junior
1-3 Credits

Directed individual projects. May be repeated for a total of 3 credits.  
**Prerequisite:** consent of faculty member.

I E 311. Engineering Data Analysis
3 Credits (3)

Methodology and techniques associated with identifying and analyzing industrial data.  
**Prerequisite:** C- or better in MATH 1521G or MATH 1521H or ENGR 190.

**Learning Outcomes**

1. Ability to correctly interpret statistical reports Ability to correctly identify and solve problems involving continuous and discrete probability and random variables. Ability to correctly analyze random samples using methods that include: point estimates, confidence intervals, tests of hypothesis, analysis of variance (ANOVA), and linear regression.

I E 316. Methods Engineering
3 Credits (2+3P)

Methods analysis and design. Work measurement techniques. Job evaluation and wage incentive methods. May be repeated up to 3 credits.  
**Prerequisite(s):** I E 217, I E 311, E T 110.

I E 351. Applied Problem Solving in Industrial Engineering
3 Credits (3)

Application of computational techniques to engineering problems including the use of commercial programs in statistics and applied mathematics. Restricted to majors.  
**Corequisite(s):** I E 311.

I E 365. Quality Control
3 Credits (3)

Statistical analysis of quality in manufacturing. Acceptance sampling and control charts.  
**Prerequisite:** I E 311 or equivalent.
I E 456. Large Scale Systems Engineering
3 Credits (3)
Systems engineering approaches to large-scale complex technological and societal problems. Concepts of interaction and structural graphs, matrices, delta, and Gantt charts. The hall matrix approach, structural concepts, reachability matrices, and cross impact-analysis, modeling and decision making. May be repeated up to 3 credits.

Learning Outcomes
1. Ability to describe the systems engineering standards and best practices Ability to characterize the limitations of the way that current systems engineering is practiced in terms of dealing with lifecycle uncertainty.

I E 459. Systems Thinking and Decision Making
3 Credits (3)
A general introduction to systems engineering. Topics include General Systems Theory, Systems Thinking and emerging concepts, Systems Dynamics approaches for modelling and analyzing non-linear feedback mechanisms in complex systems, and Complexity science and complex adaptive systems. May be repeated up to 3 credits.

Learning Outcomes
1. Ability to understand the complexities of engineering systems, and the implications of change on system behavior Ability to understand the nature of complex systems in respect to people, processes, the environment and development organization Ability to understand Systems Thinking’s’ role and value within organizations Ability to recognize the advantages, as well as the flaws of our present predominant way of thinking (Cartesian), while looking at the changes that would enable us to deal with complex issues in daily practice (Systems Thinking) Ability to recognize the value and limitations of modeling and simulation as well as how to construct and interpret various models to support decision making.

I E 460. Evaluation of Engineering Data
3 Credits (3)
Analysis of engineering systems possessing variability, employing regression, analysis of variance, distribution theory, and experimental design methods.
Prerequisite: I E 311 or equivalent.

I E 466. Reliability
3 Credits (3)
Application of statistical theory to engineering reliability estimation, reliability improvement, and the analysis of reliability test data.
Prerequisite: I E 311 or equivalent.

I E 467. Discrete-Event Simulation Modeling
3 Credits (3)
Basic modeling concepts, organizations of simulations, input data analysis, random variate generation, simulation design and analysis, model validation, output analysis, and management of simulations. Differentiated graduate assignments. May be repeated up to 3 credits. 
Prerequisite(s): I E 311 or equivalent.
I E 468. Advanced Discrete-Event Simulation Applications
3 Credits (3)
Semester long project involving development and application of advanced simulation skills. May be repeated up to 3 credits.
Prerequisite: I E 467.
Learning Outcomes
1. Ability to understand the techniques of computer simulation modeling in the context of hierarchy of knowledge about a system and develop the capability to apply the same to study systems through available computer simulation software

I E 478. Facilities Planning and Design
3 Credits (3)
Plant location methods, total process analysis, process integration, materials handling analysis, and traditional and computerized plant layout methodologies.
Prerequisite(s): I E 316.  
Prerequisite(s)/Corequisite(s): I E 424.
I E 480. Senior Design
3 Credits (2+3P)
Multi-disciplinary team design project for external clients. Involves semester long activities including major design report and presentation.
Prerequisites: senior standing, I E 467.
I E 490. Selected Topics
1-3 Credits
May be repeated for a maximum of 9 credits.
Prerequisite: consent of the head of the department.
I E 505. Directed Readings
1-3 Credits
May be repeated for a maximum total of 6 credits.
Prerequisite: consent of the head of the department.
I E 511. Survey of Industrial Engineering
3 Credits (3)
a project-based course covering methods of engineering, plant layout, production and inventory control, economic analysis, etc. May be repeated up to 3 credits.
Learning Outcomes
1. Ability to apply the various techniques of Industrial Engineering to solve real-life problems

I E 515. Stochastic Processes Modeling
3 Credits (3)
Introduction to the use of stochastic processes in the modeling of physical and natural systems. Use of generating functions, conditional probability and expectation, Poisson processes, random walk models, Markov chains, branching processes, Markov processes, and queuing processes in an applied setting.
Prerequisites: I E 311 or equivalent; and MATH 392 or equivalent.
I E 522. Queuing Systems
3 Credits (3)
Elements and classification of queuing systems, single server models, multi-server models, cost analysis and applications.
Learning Outcomes
1. Ability to model, analyze, and apply solutions to problems involving queuing systems. Ability to read and understand literature in the queueing system analysis field.

I E 523. Advanced Engineering Economy
3 Credits (3)
Theoretical basis for engineering economy methods, problems of cost estimation, replacement, nonmonetary factors, and feasibility studies. Same as C E 523.
I E 524. Advanced Production and Inventory Control
3 Credits (3)
Organization and functions of manufacturing planning and control systems including forecasting, MRP, capacity planning, JIT systems, scheduling and inventory control. Same as I E 424 with differentiated assignments.

I E 525. Systems Synthesis and Design
3 Credits (3)
Examination of the production management complex in terms of its components and the synthesis of these components into an effective operating unit. Development of input-output models representing the basis structure of all production activities.
I E 530. Environmental Management Seminar
1 Credit (1)
Survey of practical and new developments in hazardous and radioactive waste management provided through a series of guest lectures and reports of ongoing research. Same as C E 530, E E 530, CHME 530.
I E 533. Linear Programming
3 Credits (3)
Linear programming problem formulation, simplex algorithm, theory of linear programming, duality, revised simplex algorithm, and sensitivity analysis.
I E 534. Nonlinear Programming
3 Credits (3)
Theoretical and computational methods to solve optimization problems in engineering, statistics, economics, and operations research. Topics include convexity, optimality conditions, Newton's method, Lagrange multipliers, search algorithms for unconstrained and constrained problems, as well as barrier and penalty methods.
Learning Outcomes
1. Ability to model situations which may be solved by nonlinear optimization and to interpret the results in the context of the larger problem. Ability to employ several computer tools to correctly solve nonlinear optimization problems. Ability to read and understand literature in the field of nonlinear optimization. Ability to select appropriate methods and algorithms from a core representative set of methods and tools to solve nonlinear optimization problems

I E 535. Discrete Optimization
3 Credits (3)
Combinatorial Optimization problems using both integer programming and graph theoretic approaches. Emphasis on modeling and computational algorithms.
I E 537. Large Scale Systems Engineering
3 Credits (3)
Systems engineering approaches to large-scale complex technological and societal problems. Concepts of interaction and structural graphs, matrices, delta, and Gantt charts. The hall matrix approach, structural concepts, reachability matrices, and cross impact-analysis, modeling and decision making.
I E 545. Characterizing Time-Dependent Engineering Data
3 Credits (3)
Theory and techniques employed in the characterization of stochastic processes commonly found in engineering applications. Distribution models include exponential, gamma, Weibull, and extreme value. Design and analysis of experiments involving complete and censored data and elevated stress. Analytical techniques include parametric, nonparametric, and graphical approaches with emphasis on modern computer tools. Exact and approximate maximum-likelihood techniques are stressed.

Learning Outcomes
1. Ability to characterize a process, based on data that is time-dependent or sequential in nature.

I E 561. Advanced Safety Engineering
3 Credits (3)
Regulation as well as qualitative, and quantitative methods to achieve and maintain safety in the workplace. Includes liability, worker’s compensation, OSHA, hazard control, safety assessment, cost justification, and system analysis.

Prerequisite: graduate status in engineering.

I E 563. Topics in Engineering Administration
3 Credits (3)
Study of qualitative and quantitative aspects. Consideration given to philosophical, psychological, political and social implications of engineering administrative decisions.

I E 567. Design and Implementation of Discrete-Event Simulation
3 Credits (3)
Basic modeling concepts, organizations of simulations, input data analysis, random variate generation, simulation design and analysis, model validation, output analysis, and management of simulations. Taught with I E 467 with differentiated assignments for graduate students.

I E 571. Advanced Quality Control
3 Credits (3)
Advanced topics in quality control and design of experiments for improvement of quality.

Prerequisite: I E 311 or equivalent.

I E 575. Advanced Manufacturing Processes
3 Credits (3)
Covers major process parameters in casting, forming, machining, and joining. Process economics and selection of processes design and interactions.

Prerequisite: graduate standing.

I E 590. Selected Topics
1-3 Credits
May be repeated for a maximum of 9 credits.

Prerequisite: consent of the head of the department.

I E 598. Special Research Programs
1-3 Credits
Individual analytical or experimental investigations. May be repeated for a maximum total of 6 credits.

Prerequisite: consent of instructor.

I E 599. Master’s Thesis
1-15 Credits
Thesis.

I E 610. Topics in Operations Research
3 Credits (3)
Selected topics of current interest, to be designated by subtitle. May be repeated for a maximum of 6 credits.

I E 620. Topics in Computer Modeling
3 Credits (3)
Selected topics of current interest, to be designated by subtitle. May be repeated for a maximum of 6 credits.

I E 630. Topics in Engineering Management
3 Credits (3)
Selected topics of current interest, to be designated by subtitle. May be repeated for a maximum of 6 credits.

I E 690. Selected Topics
1-15 Credits
May be repeated.

Prerequisite: consent of department head.

I E 700. Doctoral Dissertation
15 Credits
Dissertation.

Office Location: 201 Foreman Engineering Complex

Industrial Engineering - Bachelor of Science in Industrial Engineering

Requirements (121 credits)

In addition to the university requirements for graduation, a student must have at least a 2.0 grade-point average in all departmental courses.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 121 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

A Suggested Plan of Study for Students

This roadmap is a semester-by-semester planning guide for Industrial Engineering major. It assumes student placement in MATH 151G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in Mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from semester to semester and may be subject to modification or change. Roadmaps should be reviewed in consultation with your advisor.

First Year

Credits

Fall
ENGL 1110G Composition I 4
MATH 151G Calculus and Analytic Geometry I 4
CHEM 1215G General Chemistry I Lecture and Laboratory for STEM Majors 4
ENGR 190 Introduction to Engineering Mathematics 4

Credits 16

Spring
MATH 1521G Calculus and Analytic Geometry II 4
PHYS 1310G Calculus-Based Physics I and Calculus-Based Physics I Lab 4
I E 151 Computational Methods in Industrial Engineering 3
Area V: Humanities Course 2 3
ENGR 110 Introduction to Engineering Design 3

Credits 17

Second Year

Fall
Choose one from the following: 4

Credits
CHEM 1225G General Chemistry II Lecture and Laboratory for STEM Majors 4
PHYS 1320G Calculus-Based Physics II and Calculus-Based Physics II Lab 4
MATH 2530G Calculus III 3
ENGR 233 Engineering Mechanics I 3
ENGL 2210G Professional & Technical Communication 3
Area VI: Creative and Fine Arts Course 2 3

Credits 16

Second Language: (not required)
Electives, to bring the total credits to 121 0

Total Credits 121-122
### Third Year

#### Fall
- **MATH 392** Introduction to Ordinary Differential Equations  3
- **I E 316** Methods Engineering  3
- **I E 351** Applied Problem Solving in Industrial Engineering  3
- **I E 365** Quality Control  3
- Choose one Engineering Elective Course  3

#### Credits 15

#### Spring
- **I E 423** Engineering Operations Research II  3
- **I E 424** Manufacturing Systems  3
- **I E 451** Engineering Economy  3
- **I E 460** Evaluation of Engineering Data  3
- **MATH 480** or **MATH 2415** Applied Linear Algebra or Introduction to Linear Algebra  3

#### Credits 15

### Fourth Year

#### Fall
- **I E 413** Engineering Operations Research I  3
- **I E 467** Discrete-Event Simulation Modeling  3
- **ENGR 401** Engineering Capstone I  3
- Choose one from the following:  3-4
  - **BIOL 2110G** Principles of Biology: Cellular and Molecular Biology
  - **GEOL 1110G** Physical Geology
  - **PHYS 2120** Heat, Light, and Sound
- Viewing A Wider World Course  3

#### Credits 15-16

#### Spring
- **I E 478** Facilities Planning and Design  3
- **Engineering Elective**  3
- **ENGR 402** Engineering Capstone II  3
- Viewing A Wider World Course  3

#### Credits 12

#### Total Credits 121-122

1 MATH 1511G Calculus and Analytic Geometry I is the starting Math course for the degree but students may need to complete any prerequisites prior to enrolling in this course depending on math placement.

2 See the General Education (p. 88) Section of the catalog for a full list of courses.

3 Engineering Electives:
   - ENGR 234 Engineering Mechanics II
   - C E 301 Mechanics of Materials
   - M E 234 Mechanics-Dynamics
   - M E 240 Thermodynamics

4 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses

5 See your adviser for more detailed information about selecting the engineering elective course that is approved to fulfill this requirement.

### Entrepreneurship - Undergraduate Minor

The Entrepreneurship Minor is designed to promote entrepreneurship to students across the NMSU campus. The Department of Industrial Engineering coordinates an engineering cluster of electives to support the three required classes offered by the College of Business.

<table>
<thead>
<tr>

</table>
The Department of Industrial Engineering offers the Master of Engineering (M.E. in IE) as the coursework-only degree. It is a Professional Master's degree targeting a working professional who wants to pursue a Master's degree in Industrial Engineering at New Mexico State University.

The program of study leading to the M.E. in IE degree consists of 30 credits. At least 50% of the course work must be taken from the Approved IE Department Course List. This means that students can take up to five electives from engineering disciplines outside the department and/or other areas of interest outside the college.

The M.E in IE degree is also offered by distance education for qualified applicants. The courses with section numbers M70 - M79 are designated as online.

Although there is no oral exam, students will be required to complete an exit interview with an IE faculty member.

Note that NMSU reserves the right to change the program requirements without prior notice. Information in the NMSU Graduate Catalog takes precedence over any other information.

**Selection of Advisor**

During the first 12 credit hours in the Industrial Engineering Graduate Program, all master's degree students must select a permanent advisor. This must be done prior to registration for the fifth course the student takes. In selecting an advisor, the student should communicate with several members of our graduate faculty to discuss specific program objectives. The student should also use these contacts to become familiar with faculty research projects that are currently in progress. The faculty member must consent to serve as the student's advisor in writing. A list of the graduate faculty of the department with their areas of interest is found on the IE web page at https://ie.nmsu.edu/.

**Submission of Programs**

After completing 12 credits of graduate coursework, a permanent "Program of Study for Masters Students" form must be submitted to the Graduate School. Acceptance of this program admits the student to candidacy for the degree.

**Prefix** | Title | Credits
--- | --- | ---
I E | Business Analytics I | 3
I E | Business Analytics II | 3

1 The optional courses outside the department and/or the college should be previously approved by the academic advisor. See your advisor for more detailed information about selecting elective courses.

Industrial Engineering - Master of Engineering in Industrial Engineering (Online)

The Department of Industrial Engineering offers the Master of Engineering (M.E. in IE) as the coursework-only degree. It is a Professional Master's degree targeting a working professional who wants to pursue a Master's degree in Industrial Engineering at New Mexico State University.

The program of study leading to the M.E. in IE degree consists of 30 credits. At least 50% of the course work must be taken from the Approved IE Department Course List. This means that students can take up to five electives from engineering disciplines outside the department and/or other areas of interest outside the college.

The M.E in IE degree is also offered by distance education for qualified applicants. The courses with section numbers M70 - M79 are designated as online.

Although there is no oral exam, students will be required to complete an exit interview with an IE faculty member.

Note that NMSU reserves the right to change the program requirements without prior notice. Information in the NMSU Graduate Catalog takes precedence over any other information.

Admission

Students seeking regular admission to graduate study in Industrial Engineering must meet departmental admission requirements in addition to those of the Graduate School (https://catalogs.nmsu.edu/nmsu/graduate-school/). The departmental requirements are listed below:

- A student holds a bachelor's degree in Engineering from a school accredited by the Accreditation Board for Engineering and Technology (ABET) and has taken a course in calculus-based probability and statistics, or a student holds a bachelor's degree from an accredited school and meets the math prerequisites of the Department of Industrial Engineering. The prerequisites are: 9 hours in calculus; 3 hours in differential equations; and 3 hours in calculus-based probability and statistics. All students must have a grade point average of 3.0 or above (based on A=4.0) during their last 60 hours of undergraduate study.
- A letter of intent should be written providing the department with information why the student wants to pursue a graduate degree, and professional and academic plans/goals.

Note that up to 15 credits may be transferred in if the student was enrolled in an approved graduate program. An applicant should meet or correspond directly with the IE graduate faculty as a first step in determining his or her specific admission status.

Procedure

Upon being admitted to graduate work in the department, the student will be assigned a temporary advisor until a permanent advisor is selected. Students should contact the department prior to the time of registration, so that preliminary advising can be done without pressure or haste.

Selection of Advisor

During the first 12 credit hours in the Industrial Engineering Graduate Program, all master's degree students must select a permanent advisor. This must be done prior to registration for the fifth course the student takes. In selecting an advisor, the student should communicate with several members of our graduate faculty to discuss specific program objectives. The student should also use these contacts to become familiar with faculty research projects that are currently in progress. The faculty member must consent to serve as the student's advisor in writing. A list of the graduate faculty of the department with their areas of interest is found on the IE web page at http://www.nmsu.edu/~ie/.

Submission of Programs

After completing 12 credits of graduate coursework, a permanent "Program of Study" form must be submitted to the Graduate School. Acceptance of this program admits the student to candidacy for the degree.

Approved IE Department Course List (Note that courses are listed under their area of primary focus but may address other areas. See course descriptions for more details.)

| Operation Research |
|-------------------|-----------------|
| I E 515 | Stochastic Processes Modeling |
| I E 522 | Queuing Systems |
| I E 525 | Systems Synthesis and Design |
| I E 533 | Linear Programming |
| I E 534 | Nonlinear Programming |
| I E 535 | Discrete Optimization |
| I E 567 | Design and Implementation of Discrete-Event Simulation |

Applied Statistics

| I E 460 | Evaluation of Engineering Data |
| I E 466 | Reliability |
| I E 545 | Characterizing Time-Dependent Engineering Data |

Design and Manufacturing

| I E 478 | Facilities Planning and Design |
| I E 524 | Advanced Production and Inventory Control |
| I E 571 | Advanced Quality Control |
| I E 575 | Advanced Manufacturing Processes |

Engineering Management

| I E 523 | Advanced Engineering Economy |
| I E 530 | Environmental Management Seminar |
| I E 537 | Large Scale Systems Engineering |
| I E 561 | Advanced Safety Engineering |
| I E 563 | Topics in Engineering Administration |

Depending on contents, the following two courses are applicable to any of the above four areas:

| I E 505 | Directed Readings |
| I E 590 | Selected Topics |

Optional Electives

| E E 500-level (With approval of advisor and instructor) |
| M E 500-level (With approval of advisor and instructor) |
| C E 500-level (With approval of advisor and instructor) |
| ACCT 500-level (With approval of advisor and instructor) |
| BCIS 500-level (With approval of advisor and instructor) |
| BFIN 500-level (With approval of advisor and instructor) |
| MGMT 500-level (With approval of advisor and instructor) |
| C S 500-level (With approval of advisor and instructor) |

Note that NMSU reserves the right to change the program requirements without prior notice. Information in the NMSU Graduate Catalog takes precedence over any other information.
The optional courses outside the department and/or the college should be previously approved by the academic advisor. See your advisor for more detailed information about selecting elective courses.

Requirements for Graduation

It is the responsibility of the student to complete all forms before submitting them to the IE department. Blank forms will not be accepted.

1. Application for Diploma (Degree) At the start of the semester in which you are to graduate you must file an Application for Diploma (Degree) and fee with the NMSU Registrar Office. To find the application as well as deadlines, log onto MyNMSU (https://my.nmsu.edu/) and click on the Student and Financial Aid tab, then under QuickLinks select Student Records. Filing dates are on the Graduate School Calendar that is maintained on the Graduate School website.

2. Program of Study – After you have completed 12 NMSU credits, you are required to complete a form entitled Program of Study for Masters Students. This form is found on the NMSU Graduate School (https://gradschool.nmsu.edu/) web page: Under the “Current Students” pull-down menu at the top, choose “Graduate Forms”

3. Schedule Your Master’s Exam – Whether you write a thesis, complete a project or take all course work, you must schedule a final examination during the last semester of your course work/research. Examination committee rules are in the Graduate Catalog: You should plan to have your adviser, a second IE graduate faculty member, and an external (outside the IE department) faculty member. The external member will also serve as the Dean of the Graduate School’s Representative. To ensure that a Faculty Member is currently a member of the Graduate Faculty and their appointment expiration date please visit Graduate Faculty & Staff Directory on the Graduate School (https://gradschool.nmsu.edu/) web page: Under the “Faculty and Staff” pull-down menu at the top, choose “Graduate Faculty & Staff Directory”. The schedule dates are found on the Graduate School (https://gradschool.nmsu.edu/) web page: Under the “Current Students” pull-down menu at the top, choose “Graduate School Calendar”.

4. Other Forms – Additional forms can be found on the Graduate School website (http://gradschool.nmsu.edu/).

To schedule and take your exam:

- Schedule a 2-hour time block that is convenient for you and your selected faculty committee. Students are responsible for contacting and scheduling their committee members.
- Schedule use of the IE Conference Room, Room 279 EC III, with the Industrial Engineering Secretary. At that time, if you are presenting a project or thesis, schedule the use of any equipment you may require such as the In Focus projector, laptop, etc.
- Complete the Masters Final Examination Form. The exam form is also available on the Graduate School (https://gradschool.nmsu.edu/) website. You must schedule your exam a minimum of 10 working days in advance. This means your form must be at the Graduate School at that time.
- Consult with your adviser to discuss your examination. This can be by phone or e-mail.
- Be on time for your examination. If you’re using equipment for presenting research, you should arrive early to set up.

Please plan to attend, with your family and friends, the College of Engineering’s Sociedad de Ingenieros ceremony that is held to recognize our engineering graduates. This ceremony is held the Friday evening before Graduation.

Industrial Engineering - Master of Science in Industrial Engineering (Online)

The Department of Industrial Engineering offers the Master of Science (M.S.) in Industrial Engineering with focus areas of manufacturing, operations research and engineering management. Students may choose one of two options for completing their M.S. degree and the requirements for each option are listed below:

- Thesis option: 24 credits of course work plus 6 credits of IE 599 Master’s Thesis.
- Project Option: 27 credits of course work plus 3 credits of IE 598 Special Research Programs.

Whether students write a thesis or complete a project, the program of study leading to the M.S. degree consists of 30 credits. At least 50% of the course work must be taken from the Approved IE Department Course List. This means that students can take up to five electives from engineering disciplines outside the department and/or other areas of interest outside the college.

Note that NMSU reserves the right to change the program requirements without prior notice. Information in the NMSU Graduate Catalog takes precedence over any other information.

Admission

Students seeking regular admission to graduate study in Industrial Engineering must meet departmental admission requirements in addition to those of the Graduate School (https://catalogs.nmsu.edu/nmsu/graduate-school/). The departmental requirements are listed below:

- A student holds a bachelor’s degree in Engineering from a school accredited by the Accreditation Board for Engineering and Technology (ABET) and has taken a course in calculus-based probability and statistics, or a student holds a bachelor’s degree from an accredited school and meets the math prerequisites of the Department of Industrial Engineering. The prerequisites are: 9 hours in calculus; 3 hours in differential equations; and 3 hours in calculus-based probability and statistics. All students must have a grade point average of 3.0 or above (based on A=4.0) during their last 60 hours of undergraduate study.
- You must write a statement of intent describing your intended research. This statement should be 200-300 words and should discuss your graduate research interests and suggest a faculty member who might advise your research. Refer to the research interests of IE graduate faculty for possible advisors. You will not be admitted if you do not submit this statement, as it is part of your application for admission.

Note that up to 15 credits may be transferred if the student was enrolled in an approved graduate program. An applicant should meet or correspond directly with the IE graduate faculty as a first step in determining his or her specific admission status.

Procedure

Upon being admitted to graduate work in the department, the student will be assigned a temporary advisor until a permanent advisor is selected.
Students should contact the department prior to the time of registration, so that preliminary advising can be done without pressure or haste.

**Selection of Advisor**

During the first 12 credit hours in the Industrial Engineering Graduate Program, all master’s degree students must select a permanent advisor. This must be done prior to registration for the fifth course that the student takes. In selecting an advisor, the student should communicate with several members of the IE graduate faculty to discuss specific program objectives. The student should also use these contacts to become familiar with faculty research projects that are currently in progress. The faculty member must consent to serve as the student’s advisor in writing. A list of the department graduate faculty along with their areas of interest is found on the IE web page (https://ie.nmsu.edu/).

**Submission of Programs**

After completing 12 credits of graduate coursework, a permanent “Program of Study” form must be submitted to the Graduate School. Acceptance of this program admits the student to candidacy for the degree.

**Approved IE Department Course List**

Note that courses are listed under their area of primary focus but may address other areas. See course descriptions for more details.

### Operations Research

| I E 515     | Stochastic Processes Modeling              |         |
| I E 522     | Queuing Systems                            |         |
| I E 525     | Systems Synthesis and Design               |         |
| I E 533     | Linear Programming                         |         |
| I E 534     | Nonlinear Programming                      |         |
| I E 535     | Discrete Optimization                      |         |
| I E 567     | Design and Implementation of Discrete-Event Simulation | |

### Applied Statistics

| I E 460     | Evaluation of Engineering Data             |         |
| I E 466     | Reliability                                |         |
| I E 545     | Characterizing Time-Dependent Engineering Data | |

### Design and Manufacturing

| I E 478     | Facilities Planning and Design             |         |
| I E 524     | Advanced Production and Inventory Control  |         |
| I E 571     | Advanced Quality Control                   |         |
| I E 575     | Advanced Manufacturing Processes           |         |

### Engineering Management

| I E 523     | Advanced Engineering Economy               |         |
| I E 530     | Environmental Management Seminar           |         |
| I E 537     | Large Scale Systems Engineering            |         |
| I E 561     | Advanced Safety Engineering                |         |
| I E 563     | Topics in Engineering Administration       |         |

Depending on contents, the following two courses are applicable to any of the above four areas:

| I E 505     | Directed Readings                          |         |
| I E 590     | Selected Topics                            |         |

### Optional Electives

1. The optional courses outside the department and/or the college should be previously approved by the academic advisor. See your advisor for more detailed information about selecting elective courses.

**Requirements for Graduation**

It is the responsibility of the student to complete all forms before submitting them to the IE department. Blank forms will not be accepted.

1. **Application for Diploma (Degree)** At the start of the semester in which you are to graduate you must file an Application for Diploma (Degree) and fee with the NMSU Registrar Office. To find the application as well as deadlines, log onto MyNMSU (https://my.nmsu.edu/) and click on the Student and Financial Aid tab, then under QuickLinks select Student Records. Filing dates are on the Graduate School Calendar that is maintained on the Graduate School web site.

2. **Program of Study** – After you have completed 12 NMSU credits, you are required to complete a form entitled Program of Study and Committee for Master’s Students (http://gradschool.nmsu.edu/wp-content/uploads/sites/5/2015/04/masters_program_of_study.pdf). This form is found on the NMSU Graduate School Forms (http://gradschool.nmsu.edu/graduate-forms/web-page).

3. **Schedule Your Master’s Exam** – Whether you write a thesis, complete a project or take all course work, you must schedule a final examination during your last semester of course work/research. Examination committee rules are in the Graduate Catalog and schedule dates are found on the Graduate School Deadlines (http://gradschool.nmsu.edu/deadlines/deadlines.htm). You should plan to have your advisor, a second IE graduate faculty member, and an external (outside the IE department) faculty member. The external member will also serve as the Dean of the Graduate School’s Representative. To ensure that a Faculty Member is currently a member of the Graduate Faculty and their appointment expiration date please visit http://gradschool.nmsu.edu/gradfac1.htm.

4. **Other Forms** – Additional forms can be found on the Graduate School website (http://gradschool.nmsu.edu/).

**To schedule and take your exam:**

- Schedule a 2-hour time block that is convenient for you and your selected faculty committee. **Students are responsible for contacting and scheduling their committee.**
- Schedule use of the IE Conference Room, Room 279 EC III, with the Industrial Engineering Secretary. At that time, if you are presenting a project or thesis, schedule the use of any equipment you may require such as the In Focus projector, laptop, etc.
- Complete the Master’s Final Examination Form (http://gradschool.nmsu.edu/wp-content/uploads/sites/5/2015/04/masters_final_examination_form.pdf). You must schedule your exam a minimum of 10 working days in advance. This means your form must be at the Graduate School at that time.
of every program:
years (mostly full-time) earning your degree. Below are the key milestones
of a Ph.D. Program

Time Line for a Ph.D. Program
Individual programs vary, however, you can expect to spend three to five
years (mostly full-time) earning your degree. Below are the key milestones
of every program:

1. Admittance to the program and begin course work. In coordination
with your academic advisor, select 500 level courses to help you
prepare for the Qualifying Exam. This would include IE topics on the
general part of the exam, as well as topics related to your intended
research.
2. Pass qualifying examination. If you enter the program in Summer or
Fall, you must take the qualifying examination in January. If you enter
in Spring, you must take the qualifying examination in August. Details
regarding the examination may be obtained from the department
office. If you do not pass the examination on your first attempt, you
may be allowed, based on the recommendation of the faculty, to
take the exam again the next time it is offered. If you do not pass the
examination on your second attempt, you will be dropped from the
Ph.D. program.
3. Form your committee and prepare a research proposal. During this
time, you are expected to be a full-time student. The Graduate School
requires at least one academic year of residency as defined in the
Graduate Catalog. You should take at least six credits of I E 600
level courses. At this time, you should expect to file your Program of
Study with the Graduate School.
4. Pass the comprehensive examination. The comprehensive
examination consists of two parts: written and oral presentation of
your research proposal. You must pass the examination within 24
months of passing the qualifying examination. You may not take 700
level courses until you have passed both parts of your comprehensive
examination.
5. Conduct research, write the dissertation, pass the final
examination. During this time your advisor and committee guide
your work. During this time, you are enrolled for I E 700 courses. Your
program must include a minimum of 18 credits of I E 700 Doctoral
Dissertation. There is a minimum time span of one year between the
comprehensive examination and the final oral examination (e.g., the
dissertation defense). If more than five years have passed since you
passed the comprehensive examination, you may be required to pass
another comprehensive examination.

Ph.D. Qualifying Exam
1. Format
   • Exam offered in two parts:
     • Foundations of IE, all day Thursday
     • IE Specific area exam: all day Friday.
2. Content
   • IE Foundation Portion of the Exam (all students will take an identical
examination for the foundation portion) Foundation portion consists of four
   areas:
     • Operations Research Deterministic and Stochastic
     • Probability and Statistics
     • Industrial Engineering Theory
     • Combination of questions from one or all of these four areas.
       Selection of Manufacturing, Engineering Economy, Process
       Improvement, Methods.
   • IE Research Topics Portion of the Exam (Each student taking the
     qualifier must select two of the topics listed below for testing at least
     6 weeks before the exam is offered. The student will work with his or
     her advisor on selecting the topics. The advisor must submit the two
     selected areas to the Chair of the Examining Committee at least one
     month before the exam is offered.)
     • Manufacturing
     • Computer/Simulation Modeling
     • Stochastic Operations Research
     • Queuing Theory
     • Design Optimization (product, facility, process, etc.)
     • Algorithmic Optimization (Dynamic cases)
     • Quality Control
     • Systems Integration and Control
     • Facility Design and Layout
     • Reliability

Additional Requirements
Ph.D. candidates in the College of Engineering, who have successfully
completed their Ph.D. Qualifying Examination after January 1, 2018, must
satisfy a publication requirement which requires two papers:

Paper #1: An archival paper accepted or published in any journal
listed in the source publication list for the Web of Science, or
a refereed Journal or Conference Proceeding approved by the
student’s doctoral committee and the cognizant Department
Head(s), before the Doctorate of Philosophy final examination. The
candidate should be listed as the lead author in Paper #1.

Paper #2: An additional archival paper submitted, accepted, or
published in any journal listed in the source publication list for
the Web of Science. Alternatively, one conference paper accepted
or published in national or international conference proceedings.
Systems Engineering - Graduate Certificate

Program Availability

This distance education program is available to working professionals who have undergraduate degrees in engineering, engineering technology, and related fields. It is also an option for persons with graduate degrees who seek career renewal. Systems engineering provides a unique opportunity for working professionals to integrate their work experience with advanced coursework.

Program Objectives

The objectives of this program are:

- To provide technical professionals an opportunity to advance their careers through advanced education in systems engineering.
- To develop and improve relationships with the College of Engineering's constituencies by offering a program that addresses a known need for professional graduate-level development.
- To provide an opportunity for non-traditional students to consider advancing their education in areas that will foster their career development.
- To enable program students to become aware of current faculty research in systems engineering areas.

Requirements

A 3.0 minimum cumulative GPA in four courses as described below will be required for award of the Systems Engineering Graduate Certificate Program.

Admission to the NMSU Graduate School

Students must apply and be admitted to NMSU as a non-degree student to take classes. For more information, contact:

NMSU Graduate School
Box 30001, MSC 3G
Las Cruces, NM 88003
(575) 646-2736
http://gradschool.nmsu.edu/

To complete the Certificate Program, students must be admitted to the Graduate School as certificate students. If you are considering pursuing a degree in electrical or industrial engineering, you should contact that department for admissions requirements and advising.

### Mechanical Engineering and Aerospace Engineering

#### Undergraduate Program Information

The mission of the Mechanical and Aerospace Engineering Department at New Mexico State University is threefold:

- to educate those who will advance knowledge and become the future leaders of industry and academia;
- to conduct both basic and applied research in mechanical and aerospace engineering and related interdisciplinary areas; and
- to provide service to the profession, to the State of New Mexico, to the country, and to the future development of engineering worldwide.

A critical focus within the department is to afford undergraduates of varying backgrounds and abilities every opportunity for achieving success in the mechanical and aerospace engineering professions. To address this focus, the faculty of the Mechanical and Aerospace Engineering Department, with input from other constituents, have established the following program educational objectives that inform the overall undergraduate programs:

- Our graduates will gain relevant employment and/or pursue a graduate degree.
- Our graduates will advance in their level of workplace responsibility.

### Graduate Program Information

Graduate programs of study are available leading to the degrees of

- Doctor of Philosophy in Aerospace Engineering
- Doctor of Philosophy in Engineering with a concentration in Mechanical Engineering.
- Master of Science in Aerospace Engineering.
- Master of Science in Mechanical Engineering.
- Master of Engineering in Aerospace Engineering.
- Master of Engineering in Mechanical Engineering.

Areas of active research in mechanical engineering include the following:

- experimental fluids with application to wind power,
- computational fluid dynamics,
- energy systems and components,
- thermal management,
- space transportation,
- modeling and analysis of machining processes,
- micromechanics and cross property connections,
- computational mechanics with application to material properties,
- renewable energy,
- nonlinear dynamics and vibration,
- reduced order modeling in multibody dynamics,
- structural dynamics and fluids,
• robotics,
• composite materials and nanomaterials.

Areas of active research in aerospace engineering include the following:
• computational, theoretical, and experimental aerodynamics,
• vortex dynamics,
• flow control,
• aeroelasticity and flutter,
• space dynamics and control,
• spacecraft motion estimation,
• propulsion,
• ground simulation of reduced gravity environments,
• structural health monitoring, and
• unmanned aerial systems.

Laboratory facilities supporting graduate research include a large low-speed wind tunnel, a large water channel, a robotics, controls and UAS lab, a reduced gravity simulation lab, a space dynamics and controls lab, and a composite materials lab. A mechanical testing lab is also available in the College of Engineering.

In addition to fulfilling the basic requirements for admission to the Graduate School, applicants are expected to have an undergraduate degree equivalent to a BS in mechanical or aerospace engineering from a university accredited by ABET. Graduate students whose BS degree is in a discipline other than A E or M E will normally be required to take undergraduate courses in M E or A E in order to prepare for graduate course work; such undergraduate preparatory work will be determined by the graduate coordinator on a case by case basis. A candidate for the master’s degree can choose one of two options: a thesis option or a course-only option. Both options require a minimum of 30 credits of graduate study.

Doctoral candidates must complete a program of study determined by the student and his or her advisory committee. The student must successfully pass a written qualifying examination (administered during the student’s first year of full-time study) and an oral comprehensive examination administered after approximately 80 percent of the course work is completed. The student must submit and defend an acceptable dissertation based on independent investigation in a field of study approved by the advisory committee. The requirements for the MS and Ph.D. degrees are stated below.

Degrees for the Department
Bachelor Degree(s)
Aerospace Engineering - Bachelor of Science in Aerospace Engineering (p. 1036)
Mechanical Engineering - Bachelor of Science in Mechanical Engineering (p. 1038)

Master Degree(s)
Aerospace Engineering - Master of Engineering (p. 1040)
Aerospace Engineering - Master of Engineering (Online) (p. 1040)
Mechanical Engineering - Master of Engineering (p. 1041)
Mechanical Engineering - Master of Engineering (Online) (p. 1042)

Aerospace Engineering - Master of Science in Aerospace Engineering (p. 1042)
Mechanical Engineering - Master of Science in Mechanical Engineering (p. 1043)

Doctoral Degree(s)
Aerospace Engineering - Doctor of Philosophy (p. 1043)
Engineering (Mechanical Engineering) - Doctor of Philosophy (p. 1043)

Minors for the Department
Aerospace Engineering - Undergraduate Minor (p. 1039)
Mechanical Engineering - Undergraduate Minor (p. 1040)

Department Head: Jay Frankel, Ph. D.
Associate Department Head: Young Lee, Ph. D.

Professors
Chaitanya, Frankel, Y. H. Park; Associate Professors Abdelkefi, Drach, Garcia, Gross, Kota, Kuravi, Lee, Shashikanth, Shu; Assistant Professors Alaie, Haghsheenas-Jaryani, H. J. Park, Sun, Wang; College Assistant Professors Armstrong

A. Abdelkefi, Ph.D. (Virginia Tech)– Nonlinear dynamics, energy harvesting, aeroelasticity, fluid-structure interaction, vibration and controls; S. Alaie, Ph.D. (UNM)– Implantable microsensors, advanced manufacturing and medical devices; T. Armstrong, Ph.D. (NMSU)– Mechanics of materials, military aircraft Systems, engineering education; V. Chaitanya, Ph.D. (Johns Hopkins)– Materials characterization, materials degradation, corrosion, electrochemistry, failure analysis, energy, bioengineering, additive manufacturing, food-energy-water nexus; B. Drach, Ph.D. (New Hampshire)– Mechanics of composite materials, multi-scale modeling and characterization; J. Frankel, Department head, Ph.D. (Virginia Tech)– Heat transfer, hypersonics; G. V. Garcia, Ph.D. (Texas A&M)– Damage detection, experimental mechanics, vibration; A. Gross, DeNgr. (Aachen)– Computational fluid dynamics, fluid mechanics, aircraft design and propulsion, unmanned aerial systems, wind energy; M. Haghsheenas-Jaryani, Ph.D. (UT Arlington)– Soft robotics, bio-inspired and bio-mimetic robotics, dynamics and control; K. Kota, Ph.D. (Central Florida)– Heat transfer enhancement on engineered surfaces, energy efficiency, thermal management, water desalination, surface micro-manufacturing; S. Kuravi, Ph.D. (Central Florida)– Renewable energy, thermal systems, concentrating solar power, thermal desalination, energy storage; Y. S. Lee, Associate Department Head, Ph.D. (Illinois Urbana-Champaign)– Nonlinear dynamics, fluid-structure interactions; Y. H. Park, Ph.D. (Iowa)– Design optimization, computational solid mechanics, atomistic and molecular simulations; H. J. Park, Ph.D. (Michigan)– Dynamics, optimal control; B. Shashikanth, Ph.D. (Southern California)– Fluid mechanics, dynamical systems, controls; F. Shu, Ph.D. (Purdue)– Experimental fluid dynamics, biofluidics, microfluidics, flow control, and turbulent flow; L. Sun, Ph.D. (Brigham Young)– Unmanned systems, towed cable systems, sensor network, cooperative estimation and control, optimal control; Y. Wang, Ph.D. (Penn State)– Computational fluid dynamics, multi-phase & reacting flows, aerospace propulsion, bio/ micro-Fluidics.
Aerospace Engineering Courses

A E 339. Aerodynamics I
3 Credits (3)
Fluid properties, conservation equations, incompressible 2-dimensional flow; Bernoulli’s equation; similarity parameters; subsonic aerodynamics: lift and drag, analysis and design of airfoils. Restricted to: A E majors. May be repeated up to 3 credits.
Prerequisite: C- or better grades in (M E 237 or ENGR 234) and (M E 228 or PHYS 395).

Learning Outcomes
1. Ability to apply knowledge of mathematics, science, and engineering; Ability to design and conduct experiments, as well as to analyze and interpret data; Ability to design a system, component or process to meet desired needs within realistic constraints; Ability to identify, formulate, and solve engineering problems.

A E 362. Orbital Mechanics
3 Credits (3)
Dynamics of exoatmospheric flight of orbiting and non-orbiting bodies; 2-body orbital dynamics and Kepler’s laws; orbits in 3 dimensions; orbit determination; orbit design and orbital maneuvers; lunar and interplanetary trajectories. May be repeated up to 3 credits.
Prerequisite: C- or better grades in (M E 228 or PHYS 395), (M E 237 or ENGR 234), and M E 261.

A E 363. Aerospace Structures
3 Credits (3)
Advanced concepts of stress and strain, introduction to the analysis of aero structures, complex bending and torsion, thin walled sections and shells, computational techniques. May be repeated up to 3 credits.
Prerequisite: C- or better grades in C E 301.

A E 364. Flight Dynamics and Controls
3 Credits (3)
Fundamentals of airplane flight dynamics, static trim, and stability; spacecraft and missile six degree of freedom dynamics; attitude control of spacecraft. May be repeated up to 3 credits.
Prerequisite: C- or better grades in (M E 228 or PHYS 395), (M E 237 or ENGR 234), and M E 261.

A E 400. Undergraduate Research
1-3 Credits (1-3)
Performed with the direction of a department faculty member. May be repeated for a maximum of 6 credits.
Prerequisite(s): Consent of faculty member.

A E 405. Special Topics
3 Credits (3)
Topics of modern interest to be offered by the departmental staff. Consent of instructor required.

A E 419. Propulsion
3 Credits (3)
Propulsion systems, thermodynamic cycles, combustion, specific impulse; principles of gas turbines, jet engines, and rocket propulsion systems. May be repeated up to 3 credits.
Prerequisite: C- or better grades in A E 439.

A E 424. Aerospace Systems Engineering
3 Credits (3)
Basic principles of top down systems engineering and current practice; preliminary and detailed design of aircraft and space vehicles, including requirement, subsystem interaction, and integration, tradeoffs, constraints and non-technical aspects. May be repeated up to 3 credits.
Prerequisite: C- or better grades in A E 362.

A E 428. Aerospace Capstone Design
3 Credits (3+2P)
Team Project-analysis, design, hands-on build test, evaluate.
Prerequisite(s)/Corequisite(s): A E 447. Prerequisite(s): A E 363 and A E 424.

A E 439. Aerodynamics II
3 Credits (3)
Principles of compressible flow, momentum and energy conservation; thermal properties of fluids; supersonic flow and shock waves; basics of supersonic aerodynamics. May be repeated up to 3 credits.
Prerequisite: C- or better grades in (A E 339 or M E 338), M E 240, and M E 328.

A E 447. Aerofluids Laboratory
3 Credits (2+3P)
Use of subsonic wind tunnels and other flow to study basic flow phenomena and methods of fluid measurement and visualization.
Prerequisite(s)/Corequisite(s): A E 439. Prerequisite(s): M E 345.
A E 451. Aircraft Design
3 Credits (3)
Conceptual design of aircraft based on existing designs, empirical relationships, and theory. Dimensioning, structural design, and performance analysis of major subcomponents such as fuselage, wing, and propulsion system. Static stability and control analysis.
Prerequisite(s): A E 339 and A E 363.

A E 452. Control System Design
3 Credits (3)
Introduction to the control of dynamical systems, with a focus on mechanical and aerospace systems, including basic systems theory, controllability / observability, feedback and stabilization, PID controls, root-locus plot, and Bode diagram.
Prerequisite: M E 261, M E 328 and (M E 237 or ENGR 234).

A E 464. Advanced Flight Dynamics and Controls
3 Credits (3)
Advanced airplane flight dynamics and stability control system design, longitudinal and lateral autopilots, missile/rocket control systems, and guidance systems.
Prerequisite(s): A E 364 or consent of instructor.

A E 509. Individualized Study
3 Credits (3)
Individualized study covering specialized topics in aerospace engineering. Consent of instructor required. Restricted to A E & M E majors.

A E 510. Special Topics
1-6 Credits (1-6)
Topics in aerospace engineering. May be repeated for a maximum of 6 credits. Consent of instructor required.

A E 527. Linear Systems Theory
3 Credits (3)
Introduction to control of linear multi-input-multi-output (MIMO) systems. Topics include representation of system dynamics using the state-space model, linearization, internal and input-to-output stability, controllability, observability, optimal control, linear quadratic regulator, and observer. May be repeated up to 3 credits.
Learning Outcomes
1. Students are able to design linear multi-input-multi-output (MIMO) control systems.

A E 564. Advanced Flight Dynamics and Controls
3 Credits (3)
Advanced airplane flight dynamics and stability control system design, longitudinal and lateral autopilots, missile / rocket control systems, and guidance systems. May be repeated up to 3 credits.
Prerequisite(s): A E 364 or consent of instructor.

A E 598. Special Research Programs
1-3 Credits (1-3)
Individual investigations, either analytical or experimental. May be repeated for a maximum of 6 credits. Restricted to A E & M E majors.

A E 599. Master's Thesis
1-15 Credits (1-15)

A E 600. Doctoral Research
1-15 Credits (1-15)
This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination. Graded: Thesis/Dissertation.

A E 700. Doctoral Dissertation
15 Credits (15)

Mechanical Engineering Courses

M E 159. Graphical Communication and Design
2 Credits (1+3P)
Sketching and orthographic projection. Covers detail and assembly drawing techniques, working drawings, dimensioning, tolerance specification, and design projects.
Prerequisite(s)/Corequisite(s): MATH 1250G.

M E 210. Electronics and System Engineering
3 Credits (2+3P)
Introduction to microcontrollers, measurement systems, motion actuators, sensors, electric circuits, and electronic devices and interfacing. Students required to work individually and in teams to design and test simple electromechanical systems. Restricted to Las Cruces campus only. May be repeated up to 3 credits.
Prerequisite: C- or better grade in MATH 1521G or MATH 1521H or ENGR 190.

M E 222. Introduction to Product Development
3 Credits (2+3P)
Introduction to modern methods used in the realization of products. Traditional manufacturing processes, such as metal stamping, turning, milling, and casting are reviewed. Modern methods of rapid prototyping and model making are discussed in context of computer-aided design. Techniques for joining metals, plastics, and composites are discussed. Role of quality control is introduced. May be repeated up to 3 credits.
Prerequisite: C- or better grades in M E 159 or E T 110.

Learning Outcomes
1. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
M E 228. Engineering Analysis I  
3 Credits (3)  
Introduction to engineering analysis with emphasis on engineering applications. Topics include ordinary differential equations, linear algebra, and vector calculus with focus on analytical methods. May be repeated up to 3 credits.  
Prerequisite: C- or better grades in MATH 2530G.  
Learning Outcomes  
1. Ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

M E 234. Mechanics-Dynamics  
3 Credits (3)  
Kinematics and dynamic behavior of solid bodies utilizing vector methods.  
Prerequisite(s)/Corequisite(s): MATH 2530G. Prerequisite(s): C E 233.

M E 236. Engineering Mechanics I  
3 Credits (3)  
Force systems, resultants, equilibrium, distributed forces, area moments, friction, and kinematics of particles. May be repeated up to 3 credits.  
Prerequisite(s)/Corequisite(s): PHYS 1310G. Prerequisite(s): MATH 1521G or MATH 1521H.

M E 237. Engineering Mechanics II  
3 Credits (3)  
Kinetics of particles, kinematics and kinetics rigid bodies, systems of particles, energy and momentum principles, and kinetics of rigid bodies in three dimensions. May be repeated up to 3 credits.  
Prerequisite(s)/Corequisite(s): MATH 2530G. Prerequisite(s): M E 236.

M E 240. Thermodynamics  
3 Credits (3)  
First and second laws of thermodynamics, irreversibility and availability, applications to pure substances and ideal gases. May be repeated up to 3 credits.  
Prerequisite: C- or better grades in PHYS 1310G.  
Learning Outcomes  
1. Ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

M E 261. Mechanical Engineering Problem Solving  
3 Credits (2+3P)  
Introduction to programming syntax, logic, and structure. Numerical techniques for root finding, solution of linear and nonlinear systems of equations, integration, differentiation, and solution of ordinary differential equations will be covered. Multi function computer algorithms will be developed to solve engineering problems. May be repeated up to 3 credits.  
Prerequisite: C- or better grades in MATH 1521G or MATH 1521H or ENGR 190.  
Learning Outcomes  
1. Ability to apply knowledge of mathematics, science, and engineering;  
   Ability to identify, formulate, and solve engineering problems;  
   Ability to use the techniques, skills and modern tools necessary for engineering practice.

M E 326. Mechanical Design  
3 Credits (3)  
Design methodology and practice for mechanical engineers. May be repeated up to 3 credits. C- or better grades are required for all the prerequisite courses.  
Prerequisite: (M E 237 or ENGR 234) and C E 301.  
Learning Outcomes  
1. Ability to design a system, component or process to meet desired needs within realistic constraints; Ability to function on multidisciplinary teams; Understanding of professional and ethical responsibility; Knowledge of contemporary issues.

M E 328. Engineering Analysis II  
3 Credits (3)  
Advanced engineering analysis with emphasis on engineering applications. Topics include systems of ordinary differential equations, Fourier analysis, partial differential equations, and functions of complex variable with focus on analytical methods. May be repeated up to 3 credits.  
Prerequisite: C- or better grades in M E 228.  
Learning Outcomes  
1. Ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

M E 331. Intermediate Strength of Materials  
3 Credits (3)  
Covers stress and strain, theories of failure, curved flexural members, flat plates, pressure vessels, buckling, and composites. May be repeated up to 3 credits.  
Prerequisite(s): C E 301 and M E 328.

M E 332. Vibrations  
3 Credits (3)  
Vibration of single and n-degree of freedom systems considering free, forced, and damped motion. Lagrange's equations. Dynamic stability. Controls. Matrix iteration. May be repeated up to 3 credits.  
Prerequisite(s): M E 328, M E 237, and M E 261.

M E 333. Intermediate Dynamics  
3 Credits (3)  
Three dimensional kinematics and kinetics, orbital motion, Lagrange's equations, dynamic stability, and controls. May be repeated up to 3 credits.  
Prerequisite(s): M E 328 and M E 237.

M E 338. Fluid Mechanics  
3 Credits (3)  
Properties of fluids. Fluid statics and fluid dynamics. Applications of the conservation equations continuity, energy, and momentum to fluid systems. Restricted to: M E majors. May be repeated up to 3 credits.  
Prerequisite: (C- or better grade in M E 237 or ENGR 234) and (C- or better grade in M E 228 or PHYS 395).  
Learning Outcomes  
1. Ability to apply knowledge of mathematics, science, and engineering;  
   Ability to design and conduct experiments, as well as to analyze and interpret data; Ability to design a system, component or process to meet desired needs within realistic constraints; Ability to identify, formulate, and solve engineering problems.
M E 340. Applied Thermodynamics
3 Credits (3)
Thermodynamic cycles, Maxwell relations, Gibbs and Helmholtz functions, mixtures, psychometrics, chemical reactions, chemical equilibrium. May be repeated up to 3 credits.
Prerequisite: C- or better grades in M E 240.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

M E 341. Heat Transfer
3 Credits (3)
Fundamentals of conduction, convection, and radiation. Design of heat transfer systems. May be repeated up to 3 credits.
Prerequisite: C- or better grades in M E 240, (C- or better grades in M E 338 or A E 339), and (C- or better grades in M E 228 or PHYS 395).
Learning Outcomes
1. Students have the ability to apply knowledge of mathematics, science, and engineering; Students have the ability to identify, formulate, and solve engineering problems.

M E 345. Experimental Methods I
3 Credits (2+3P)
Emphasis on experimental techniques, basic instrumentation, data acquisition and analysis, and written presentation of results. Includes experiments in dynamics and deformable body mechanics. May be repeated up to 3 credits.
Prerequisite: C- or better grades in M E 228 or PHYS 395), (C- or better grades in M E 210 or PHYS 2140), and (C- or better grades in M E 237 or ENGR 234).
Prerequisite/Corequisite: C E 301.
Learning Outcomes
1. Ability to design and conduct experiments, as well as to analyze and interpret data; Ability to communicate effectively; Ability to use the techniques, skills and modern tools necessary for engineering practice.

M E 349. MAE Career Seminar
1 Credit (1)
Seminar course covering topics relevant to mechanical and aerospace engineering juniors (job placement, interviewing techniques, resume preparation, etc.). Restricted to: M E and A E majors.
Prerequisite(s): Junior Standing.

M E 400. Undergraduate Research
1-3 Credits
Performed with the direction of a department faculty member. May be repeated for a maximum of 6 credits.
Prerequisite: consent of faculty member.

M E 401. Heating/Air-Conditioning System
3 Credits (3)
HVAC system design including heating and cooling load calculations, psychometrics, piping, duct layout, and system control. May be repeated up to 3 credits.
Prerequisite(s): M E 340 and M E 341.

M E 405. Special Topics
3 Credits (3)
Topics of modern interest to be offered by the departmental staff. May be repeated up to 12 credits.
Prerequisite(s): Senior standing.

M E 425. Design of Machine Elements
3 Credits (3)
Design of machine elements through the application of mechanics. Fatigue and theories of failure. Design projects assigned. May be repeated up to 3 credits.
Prerequisite: C- or better grades in M E 326.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors

M E 426. Design Project Laboratory I
3 Credits (6P)
Students address a design problem in which innovation and attention to detail are emphasized. Solution of the problem entails applications of mechanics and/or the thermal sciences.
Prerequisite(s)/Corequisite(s): M E 425.

M E 427. Design Project Laboratory II
3 Credits (6P)
Continuation of M E 426.
Prerequisite: M E 426.

M E 445. Experimental Methods II
3 Credits (2+3P)
Emphasis on experimental techniques, instrumentation and data acquisition in fluid mechanics, heat transfer, and thermodynamics. Laboratory results will be presented in written and verbal formats. May be repeated up to 3 credits.
Prerequisite: C- or better grades in (M E 338 or A E 339), M E 340, M E 341, and M E 345.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics An ability to communicate effectively with a range of audiences An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

M E 449. Mechanical Engineering Senior Seminar
1 Credit (1)
Senior seminar course covering topics relevant to graduating mechanical engineering seniors (job placement, interviewing techniques, resume preparation).
Prerequisite: senior standing.
M E 452. Control System Design
3 Credits (3)
Introduction to the control of dynamical systems, with a focus on mechanical and aerospace systems, including basic systems theory, controllability / observability, feedback and stabilization, PID controls, root-locus plot, and Bode diagram.
Prerequisite: M E 261, M E 328 and (M E 237 or ENGR 234).
Learning Outcomes
1. Construct a block diagram to find a transfer function for a dynamical system; Analyze control systems by utilizing various linear control theories such as root-locus design method, bode / Nyquist plots, and lead / lag compensation techniques; Design and simulate automatic control systems for mechanical and aerospace engineering applications.

M E 456. Experimental Modal Analysis
3 Credits (3)
Emphasis on hands-on techniques for structural vibration tests for practical applications. Interpretation of experimental results by means of advanced signal processing tools, basic system identification methodology, and reduced-order modeling procedures. May be repeated up to 3 credits.
Prerequisite(s): M E 332, M E 228, and M E 261, or consent of instructor.

M E 457. Engineering Failure Analysis
3 Credits (3)
Introduction to failure theories and causes. Topics include general procedures for failure analysis, ductile and brittle modes of failure, elements of fracture mechanics, fractography, and failures in various engineering applications due to fatigue, wear, corrosion, design or processing defects. May be repeated up to 3 credits.
Learning Outcomes
1. Students will learn how to systematically conduct failure analysis, identify cause(s) of failure, suggest remedial steps to prevent failures and/or improve performance for a variety of engineering applications involving metals, polymers, ceramics and composites.

M E 458. Properties and Mechanical Behavior of Materials
3 Credits (3)
Learning Outcomes
1. Students will learn how to correlate mechanical behavior of materials with their microstructure, processing history and composition. As practicing engineers, they will be able to recognize impact of operating conditions, predict life span, and design materials to improve reliability and efficiency. They will be able to select appropriate materials for a given application from class of materials such as metals, polymers, ceramics and composites.

M E 460. Applied Finite Elements
3 Credits (3)
Introduction to the practical aspects of structural finite element modeling. Course focuses on providing a working knowledge of how to effectively incorporate finite element techniques into the design process. May be repeated up to 3 credits. Crosslisted with: M E 518.
Prerequisite(s): M E 425.

M E 481. Alternative and Renewable Energy
3 Credits (3)
Current and future energy needs of the United States and the world will be considered primarily from the standpoint of renewable energy sources such as solar, wind, ocean, and biomass. Technical, economic, and environmental aspects of each technology will be addressed.
Prerequisite(s): M E 341, and (M E 338 or A E 339).

M E 486. Introduction to Robotics
3 Credits (3)
This course provides students with an introduction to the theories and methods for analysis, design, and control of robotic manipulators. This course is devoted to understanding the spatial descriptions and transformations, kinematics, and dynamics of these mechanisms and how to practically implement these concepts into actual robotic manipulators.
Prerequisite: M E 328 and (ENGR 234 or M E 237).
Learning Outcomes
1. Model and analyze the kinematics and dynamics of robotic manipulators; Program and control these robotic platforms; Apply the theoretical methods into industrial robots; Implement the knowledge and experiences in real-world engineering projects.

M E 487. Mechatronics
3 Credits (2+3P)
Introduction to the analysis and design of computer-controlled electromechanical systems, including data acquisition and conversion, force and motion sensors, actuators, mechanisms, feedback control, and robotic devices. Students required to work in teams to construct and test simple robotic systems. May be repeated up to 3 credits.
Prerequisite(s): M E 210 and M E 345.

M E 502. Elasticity I
3 Credits (3)
Introduction to stress tensor, strain tensor, constitutive law, energy theorems, plane stress and plane strain. Also covers torsion of shafts and propagation of stress waves in elastic solids.

M E 503. Thermodynamics
3 Credits (3)
A comprehensive study of the first and second laws of thermodynamics, nonequilibrium processes, equations of state, and statistical thermodynamics.

M E 504. Continuum Mechanics
3 Credits (3)
Basic introduction to the Mechanics of Continuous Media. Its aim is to prepare the student for more advanced courses in Solid and Fluid Mechanics. The topics to be covered include: introduction to Cartesian tensors, tensor algebra and calculus; Lagrangian and Eulerian kinematics; Cauchy and Piola-Kirchhoff stresses; general principles of conservation; constitutive theory for ideal fluids, Newtonian and non-Newtonian fluids, finite and linear elasticity.

M E 509. Individualized Study
3 Credits (3)
Individualized study covering specialized topics in mechanical and aerospace engineering. Consent of instructor required.

M E 510. Special Topics
1-6 Credits
Topics in mechanical engineering. May be repeated for a maximum of 6 credits.
Prerequisite: consent of the department head.
M E 511. Dynamics
3 Credits (3)
An advanced study of the dynamical behavior of systems of particles and rigid bodies, with emphasis on the theoretical background of dynamics.

M E 512. Vibrations
3 Credits (3)
Free and forced vibrations for discrete and continuous systems with single or multiple degrees of freedom. Introduction to nonlinear and random vibration and solution techniques for such systems.

M E 517. Nonlinear Dynamics and Chaos
3 Credits (3)
Singular points, periodic solutions, stability, and local bifurcations for ODEs and maps; phase space methods, invariant manifolds, and Poincaré maps; nonsmooth, periodic, time-delay, and Hamiltonian systems; perturbation, averaging, and harmonic balance methods; center manifold reduction and normal forms; strange attractors, Liapunov exponents, attractor dimension; dissipative and Hamiltonian chaos

M E 518. Finite Element Analysis
3 Credits (3)
Introduction to finite element method. Topics include mathematical modeling, variational formulation, shape functions, truss, beam, solid, and shell elements. Includes static, dynamic, and nonlinear analysis. May be repeated up to 3 credits. Crosslisted with: M E 460.

M E 527. Linear Systems Theory
3 Credits (3)
Introduction to control of linear multi-input-multi-output (MIMO) systems. Topics include representation of system dynamics using the state-space model, linearization, internal and input-to-output stability, controllability, observability, optimal control, linear quadratic regulator, and observer. May be repeated up to 3 credits.

M E 530. Intermediate Fluid Mechanics
3 Credits (3)
Application of exact and empirical solutions to fundamental flow problems, including viscous and inviscid behavior. These applications establish a theoretical basis for the origin and physical role of common terms in the governing equations.

M E 533. Computational and Theoretical Fluid Mechanics
3 Credits (3)
Application of fluid mechanics theory and computational approaches to advanced flow problems, including viscous/inviscid and laminar/turbulent behavior. Complex flow problems addressed through development of a theoretical formulation, followed by application of computational fluid dynamic (CFD) tools, and finally presentation and validation of solution data. 
Prerequisite: M E 530 or consent of instructor.

M E 536. Hydrodynamic Stability and Turbulence
3 Credits (3)
Introduction to fundamentals of hydrodynamic stability, classical linear stability analysis of parallel shear flows and rotating flows, nonlinear stability, basic concepts in turbulence theory 
Prerequisite(s): M E 533.

M E 540. Intermediate Heat Transfer
3 Credits (3)
Fundamentals of conduction, convection, and radiation heat transfer. Emphasis on the application of combined heat transfer to the solution of problems not accessible at the undergraduate level.

M E 557. Engineering Failure Analysis
3 Credits (3)
Introduction to failure theories and causes. Topics include general procedures for failure analysis, ductile and brittle modes of failure, elements of fracture mechanics, fractography, and failures in various engineering applications due to fatigue, wear, corrosion, design or processing defects. May be repeated up to 3 credits.

M E 558. Properties and Mechanical Behavior of Materials
3 Credits (3)
Understanding the microstructure of engineering materials and their influence on mechanical behavior. Topics include Material Structure and Physical Properties, Thermodynamics and Kinetics of Materials, Mechanical Properties, Strengthening Mechanisms, Time and Temperature Dependent Behavior, Degradation, Fatigue, and Fracture. May be repeated up to 3 credits. 
Prerequisite: CHME 361.

M E 570. Engineering Analysis I
3 Credits (3)
Introduction to engineering analysis with emphasis on engineering applications. Topics include linear algebra, linear ordinary differential equations, and linear partial differential equations with focus on analytical methods.

M E 580. Engineering Analysis II
3 Credits (3)
Engineering analysis with emphasis on engineering applications. Topics include analytical and numerical methods in linear and nonlinear ordinary and partial differential equations. 
Prerequisite: M E 570 or consent of instructor.

M E 587. Mechatronics
3 Credits (2+3P)
Introduction to the analysis and design of computer-controlled electromechanical systems, including data acquisition and conversion, force and motion sensors, actuators, mechanisms, feedback control, and robotic devices. Students required to work in teams to construct and test simple robotic systems. Crosslisted with: M E 487.

M E 598. Special Research Programs
1-3 Credits
Individual investigations, either analytical or experimental. May be repeated for a maximum of 6 credits.

M E 599. Master's Thesis
15 Credits
Thesis.

M E 600. Doctoral Research
1-15 Credits
This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination.

M E 698. Special Research Programs
1-3 Credits
May be repeated for a maximum of 6 credits.

M E 700. Doctoral Dissertation
15 Credits
Dissertation.
Aerospace Engineering - Bachelor of Science in Aerospace Engineering

The aerospace engineering program prepares students for a range of professional engineering careers in aerospace and related professions. The aerospace engineering curriculum covers the important classical areas of low and high speed aerodynamics, propulsion, orbital mechanics, flight mechanics and control, aerospace structures and laboratory practice. In addition, the principles of systems engineering and design that are necessary to conceive, design, analyze and troubleshoot complex engineering systems are covered extensively and are considered to be especially important in the overall educational experience. Students will also be encouraged to participate in significant non-classroom experiences, including:

- co-ops and internships;
- industrial and laboratory field trips;
- guest speakers from outside NMSU;
- the New Mexico Space Grant Program;
- special seminar programs on current topics in aerospace.

Aerospace engineers find employment in areas of launch vehicles, space vehicles and missions, aircraft systems design, land and sea vehicle design, robotics and automated manufacturing, safety and other areas. The aerospace engineering background also allows graduates to pursue careers in non-aerospace fields of engineering. Graduates of the aerospace engineering program will be prepared to apply the following skills to problems of interest either in the industry or research and development:

- engineering sciences,
- mathematics,
- computational methods,
- modern experimental methods,
- effective communication skills and
- systems engineering principles.

The aerospace engineering program is also intended to prepare students to pursue graduate study, which can be of significant benefit in the aerospace profession. The general goals of the aerospace engineering program, as well as the program educational objectives, are the same as those stated above for the mechanical engineering program.

Requirements (121 Credits)

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 121 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

In addition to the NMSU and College of Engineering requirements for graduation, a student must obtain a minimum grade of C- in all math, science, and engineering courses applied toward their B.S. in AE and/or ME minor.

Mechanical Engineering - Bachelor of Science in Mechanical Engineering

The mechanical engineering program prepares students for a wide range of professional engineering careers in such areas as: research and development; design; facilities operation and maintenance; management; and production. Graduates of the program will be prepared to apply engineering sciences, mathematics, computational methods, modern experimental methods, and effective communication skills to problems of interest in industry as well as government or scholarly topics. Employment opportunities for graduates are extensive. These opportunities include: energy and utility; manufacturing; automotive; aerospace; defense and space; research and development; and many others. The emphasis in the curriculum is on engineering sciences (solid mechanics, thermal sciences, fluid mechanics and materials science); mathematics; engineering analysis; engineering design; general sciences; and communication balanced with general education topics and electives. Graduates of the program will also be prepared for graduate studies (subject to grade-point and standardized test qualifications). Students will be prepared to take the fundamentals of engineering examination (and are encouraged to do so) as a step towards professional registration.

Requirements (121 Credits)

In addition to the NMSU and College of Engineering requirements for graduation, a student must obtain a minimum grade of C- in all math, science and engineering courses applied toward their B.S in ME and/or AE minor.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 121 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Total Credits 30

1 Graduate M E courses may be substituted for A E courses with the approval of the Graduate Program Coordinator.

2 If course is not in A E or M E program, approval of the Graduate Program Coordinator is required.

Selection of Permanent Advisor

Newly admitted graduate students will be assigned a temporary advisor for the first semester, but they must select a degree option and permanent advisor before registering for the second semester.

In considering a decision about option and advisor, the student should arrange to meet with several members of the graduate faculty during the first six weeks of study to discuss specific educational objectives. The student can use these meetings to become familiar with faculty interests and research projects currently in progress. The faculty member must agree (in writing) to serve as the student’s advisor.

All students must pass a final examination. The final examination is to be conducted by the student’s advisory committee and is taken after completing all coursework.

Total Credits 30

Up to 6 credits of A E graduate courses may be substituted with the approval of the Graduate Coordinator. All course must be 500 level or above. The program of study may include up to 6 credits of M E 510 (special topics courses offered formally on a one-time basis) with the approval of the Graduate Coordinator.

Publication Requirement: a refereed conference paper accepted or a refereed journal article in review or accepted by graduation. The M.S. thesis can be a reformatted version of this paper. Exceptions may be made on a case by case basis by the department head.

Selection of Permanent Advisor

Newly admitted graduate students will be assigned a temporary advisor for the first semester, but they must select a degree option and a permanent advisor before registering for the second semester.

When considering a decision about a degree option and an advisor, the student should arrange to meet with several members of the graduate faculty during the first six weeks of study to discuss specific educational objectives. The student can use these meetings to become familiar with faculty research interests and research projects currently in progress. The faculty member must agree (in writing) to serve as the student’s advisor.

All students must pass a final examination. The final examination is to be conducted by the student’s advisory committee and is taken after completing all thesis work.

Aerospace Engineering - Doctor of Philosophy

The student’s academic program is not judged satisfactory unless it prepares the student to contribute to the advancement of knowledge in the field of Aerospace Engineering. The degree of Doctor of Philosophy is indicative of distinguished achievement in the areas of scholarship and original research. Therefore, a dissertation of high quality is required of all doctoral students in Aerospace Engineering. Students must follow the degree requirements listed below to complete the Ph.D. course of study.

- A minimum of 36 credit hours of coursework (500 level or above) beyond the Bachelor of Science degree, at least 18 of which must support the student’s research area.

- A minimum of 24 credit hours of research, A E 700 Doctoral Dissertation, which may include a maximum of 6 credit hours of A E 600 Doctoral Research. A E 600 Doctoral Research is intended for those students who have not completed the qualification examination, a prerequisite for A E 700 Doctoral Dissertation.

- A student is required to have one refereed journal paper accepted and a second one accepted or in review by graduation. The Ph.D. dissertation can be a compilation and reformatted version of these published or accepted journal papers. Exceptions may be made on case by case basis by the Department Head.

Ph.D. Program Transfer Credits

A student who has completed a Master of Science degree in M E, A E, or a closely related field may transfer up to 24 credits of graduate coursework, approved by the student’s advisor, into a Ph.D. program of study.

Selection of Permanent Ph.D. Advisor

Newly admitted graduate students will be assigned a temporary advisor for the first semester. The student must select a permanent advisor before registering for the second semester. In selecting a permanent advisor, the student should arrange to meet with several members of the graduate faculty during the first six weeks of enrollment to discuss specific objectives. The student should use these meetings to become familiar with faculty research interests and research projects currently in progress. The faculty member must consent (in writing) to serve as the student’s advisor.

Policies governing the Ph.D. written qualifying examination, the Ph.D. written and oral comprehensive examination, the student’s Ph.D. committee, and the Ph.D. dissertation are contained in the department’s Graduate Program website.

Additional Requirements

Ph.D. candidates in the College of Engineering, who have successfully completed their Ph.D. Qualifier Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

Paper #1: An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student’s doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.

Paper #2: An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for the Web of Science. Alternatively, one conference paper accepted or published in a national or international conference proceedings.

Engineering (Mechanical Engineering) - Doctor of Philosophy

The student’s academic program is not judged satisfactory unless it prepares the student to contribute to the advancement of knowledge in the field of Mechanical Engineering. The Degree of Doctor of Philosophy is indicative of distinguished achievement in the areas of scholarship and original research. Therefore, a dissertation of high quality is required of all doctoral students in Mechanical Engineering. Students must follow the degree requirements listed below to complete the Ph.D. course of study.
• A minimum of 36 credit hours of coursework (500 level or above) beyond the Bachelor of Science degree, at least 18 of which must support the student’s research area.
• A minimum of 24 credit hours of research, M E 700 Doctoral Dissertation, which may include a maximum of 6 credit hours of M E 600 Doctoral Research. M E 600 Doctoral Research is intended for those students who have not completed the qualification examination, a prerequisite for M E 700 Doctoral Dissertation.
• A student is required to have one refereed journal paper accepted and a second one accepted or in review by graduation. The Ph.D. dissertation can be a compilation and reformatted version of these published or accepted journal papers. Exceptions may be made on case by case basis by the Department Head.

Ph.D. Program Transfer Credits
A student who has completed a Master of Science degree in M E, A E, or a closely related field may transfer up to 24 credits of graduate coursework, approved by the student’s advisor, into a Ph.D. program of study.

Selection of Permanent Ph.D. Advisor
Newly admitted graduate students will be assigned a temporary advisor for the first semester. The student must select a permanent advisor before registering for the second semester. In selecting a permanent advisor, the student should arrange to meet with several members of the graduate faculty during the first six weeks of enrollment to discuss specific objectives. The student should use these meetings to become familiar with faculty research interests and research projects currently in progress. The faculty member must consent (in writing) to serve as the student’s advisor.

Policies governing the Ph.D. written Qualifying Examination, the Ph.D. written and oral comprehensive examination, the student’s Ph.D. committee, and the Ph.D. dissertation are contained in the department’s Graduate Program website.

Additional Requirements
Ph.D. candidates in the College of Engineering, who have successfully completed their Ph.D. Qualifying Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

Paper #1: An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student’s doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.

Paper #2: An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for the Web of Science. Alternatively, one conference paper accepted or published in a national or international conference proceedings.

College of Health, Education and Social Transformation
Dean - Yoshitaka Iwasaki
Interim Associate Dean for Academic Affairs - Phillip Post
Interim Associate Dean for Academic Affairs - Teresa Keller

Interim Associate Dean for Research - Jill McDonald
Interim Associate Dean for Research - Anita Hernandez
Co- Director of Research Operations and Fiscal & Data Management - Juanita Hannan
Co- Director of Research Operations and Fiscal & Data Management - Aida Lopez
Coordinator, Educational Support and Resource Center - Margo Trevino-Torres
Coordinator of Student and Academic Programs - Patrick Mendoza

The College of Health, Education, and Social Transformation (HEST) was established in 2021 to serve students, faculty, and staff whose efforts are aimed at improving individual, societal, and policy outcomes. The college was formed by combining the previous College of Education and College of Health and Social Services, as well as the Department of Sociology from the College of Arts & Sciences. We offer stackable credentials, certificates, and degrees in the following areas: Communication disorders; counseling and educational psychology; kinesiology; nursing; public health; social work; sociology; and teacher preparation, administration, and leadership (TPAL).

General Undergraduate Requirements
1. Complete at least 120 - 132 acceptable credits, including a minimum of 48 credits in courses numbered 300 or above. NMSU Viewing the Wider World (VWW) classes are included in the 48-credit hour requirement.
2. Minimum GPA varies per degree program. Please refer to your department/school for application, admission, and/or program GPA requirements. Each department has information about minimum GPA, program prerequisites, and program-specific testing requirements. Application to a HEST program does not automatically end in acceptance.
3. Satisfy New Mexico general education requirements. Detailed degree maps, program information, and curricula are available in the HEST Undergraduate Resource Center and the Center for Academic Advising and Support Services (CAASS).
4. Students must complete all professional education courses and all courses in their teaching field or major degree with a grade of C- or better.
5. All students, including transfer students, must complete the last 30 semester credits required for the baccalaureate degree within the New Mexico State University system. The four-year Servicemen’s Opportunity College Program students are not exempt from this regulation.
6. Students in teacher preparation programs (including secondary education minors), Nursing, Social Work, and Public Health must apply and be accepted into these programs based on a set of prerequisites and a competitive admission process. For information about these application and admission processes, please refer to each department’s information in this catalog.
7. In addition, if department faculty at any time determine that a student is performing below expected program standards in a particular skill, that department may require that a plan for remediation be developed to promote student success.
General Education Requirements (non-teacher education programs)
1. Nine-ten credits in General Education Area I: Communication
2. Three credits in General Education Area II: Mathematics
3. Four credits in General Education Area III: Laboratory Science
4. Three credits from General Education Area IV: Social/Behavioral Sciences
5. Three-four credits from either General Education Area III: Laboratory Science or Area IV: Social/Behavioral Sciences
6. Three credits in General Education Area V: Humanities
7. Three credits in General Education Area VI: Creative and Fine Arts
8. Three-four additional credits from a General Education Elective (excluding Area I: Communications and cross-listed courses)

General Education Requirements (teacher education programs)
1. Nine-ten credits in General Education Area I: Communication
2. Six credits in General Education Area II: Mathematics
3. Eight credits in General Education Area III: Laboratory Science
4. Nine credits from General Education Area IV: Social/Behavioral Sciences
5. Nine credits from General Education Area V: Humanities and Area VI: Creative and Fine Arts

HEST department programs may require more credit hours or additional courses specific to the major. Check the departmental pages for degree requirements in each program of study.

While the ultimate responsibility for planning an academic program in compliance with university, college, and departmental requirements rests with the student, the College recognizes the importance of sound and accessible advising for academic programs. Students formally admitted to a HEST major are provided academic advising within the department of that major. Students not formally admitted to a program of professional studies are advised by CAASS.

Transferring Undergraduate Courses
Certain courses within the curricula offered by HEST programs have been identified as transferable from NMSU to other public two-year and four-year institutions in New Mexico. The equivalent course at other institutions can be identified using the common course number. Similarly, students from other institutions can use the common course number to identify education courses that can be transferred to NMSU.

The School of Nursing offers the New Mexico Nursing Education Consortium (NMNEC) state-wide.

Preprofessional Programs
NMSU offers a number of programs designed for transfer to professional schools through its undergraduate colleges. The programs that are administered by the HEST are Pre-Nursing, Pre-Social Work, Pre-Public Health Sciences. Students new to NMSU, or who are working toward completion of their respective departmental pre-requisites are able to declare a pre-professional major in HEST. Once pre-requisites have been satisfied, an application process is required specific to each major. Application details and requirements are available through the “Academic Departments” link on the HEST website (http://health.nmsu.edu), and also through the Central Advising Center (CAASS).

Graduate Work
HEST offers curricula leading to the degrees of:

- Master of Arts,
- Master of Science,
- Specialist in Education,
- Doctor of Education
- Doctorate of Nursing Practice,
- Doctor of Philosophy.

Those interested in pursuing graduate degrees should consult the Graduate Catalog for full information at https://catalogs.nmsu.edu/nmsu/graduate-school/

Bachelor Degrees

Bachelor of Applied Studies
Majors in:
- Zero to Four (Early Childhood) (p. 1237)

Bachelor of Arts
Major in
- Sociology (p. 1308)
- Sociology (Online) (p. 1310)

Bachelor of Arts in Dance
Major in:
- Dance
  - DanceSport (p. 1114)
  - Contemporary Dance (p. 1117)

Bachelor of Public Health
Bachelor of Public Health (Online)

Bachelor of Science
Major in:
- Educational Leadership (p. 1241)

Bachelor of Science in Counseling and Community Psychology (p. 1070)
Bachelor of Science in Counseling and Community Psychology (Online) (p. 1072)

Bachelor of Science in Education
Majors in:
- Communication Disorders (p. 1087)
- Early Childhood Education (p. 1239)
- Elementary Education (plus Bilingual and/or TESOL Endorsement)
  - Language Arts K-8 (p. 1243)
  - Math K-8 (p. 1245)
Majors in:
- Master of Arts
- Masters Degrees
- Bachelor of Social Work
- Bachelor of Science in Nursing
- Bachelor of Science in Kinesiology

Major in:
- Kinesiology
- Exercise Science (p. 1120)
- Performance Psychology (p. 1122)

Graduate Minors

- Educational Administration (Higher Education) (p. 1286)
- Educational Administration (Pk-12) (p. 1287)
- Educational Administration (Doctoral) (p. 1287)
- Gerontology (p. 1179)
- Integrated Behavioral Health Care (p. 1078)
- Spanish Counseling (p. 1079)
- Special Education (p. 1287)
- U.S.-Mexico Border Health Issues (p. 1179)

Accreditation

The programs offered by HEST provide undergraduate students with a broad general education with an emphasis on professional preparation in various disciplines. These programs are nationally accredited, while some require approval by the State of New Mexico. These programs include:

Teacher Preparation: The university's teacher preparation program, which involves several colleges and is directed by the College Health, Education, and Social Transformation, was re-accredited in 2018 by the Council for the Accreditation of Education Preparation Programs (CAEP). The undergraduate and graduate programs that prepare individuals for licensure to work in public and private schools in New Mexico have been approved by the New Mexico State Public Education Department.

Counseling and Educational Psychology: The Master of Arts (MA) in Clinical Mental Health Counseling, accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP); the Specialist in Education (Ed.S.) in school psychology, accredited by the National Association of School Psychologists (NASP) and the doctoral (Ph.D.) program in counseling psychology accredited by the American Psychological Association (APA). The post-doctoral program in Clinical Psychopharmacology holds APA designation.

Health and Social Services: The baccalaureate degree program in the School of Nursing is accredited by the Commission of Collegiate Nursing Education (CCNE). The New Mexico Board approves the undergraduate program in Nursing of Nursing.

The baccalaureate degree program in the School of Social Work is accredited by the Council on Social Work Education (CSWE). The Bachelor of Public Health and Masters of Public Health degree programs
Pre-Health - Undergraduate Minor

The Pre-Health minor is designed to be useful for undergraduate students interested in attending health-related professional schools (i.e., medical, dental, physical therapy, etc.). The courses selected for the minor represents content that will help prepare students to apply to and attend health-related professional schools.

Requirements

A minor in Pre-Health must include 22 credits from the listed courses work below.

Total Credits 22-23

1 Any prerequisites for courses on the list must be satisfied before taking listed courses.
2 PHYS 2230G General Physics for Life Science I/PHYS 2230L Laboratory to General Physics for Life Science I should be taken in the fall semester before taking PHYS 2240G General Physics for Life Science II/PHYS 2240L Laboratory to General Physics for Life Science II in the following spring semester.

Recommendations for VWW courses (not required):

- PHLS 3130V Global Environmental Health Issues
- PHLS 4620V Cross-Cultural Aspects of Health
- ANTH 357V Medical Anthropology
- GNDR 381V Women’s Health Issues/PHLS 3120V Women’s Health Issues (cross-listed class)
- GNDR 433V Sex, Gender and Culture
- ECON 432V Economics of Health Care
- SOCI 3120V Introduction to Population Studies
- SOCI 3245V Comparative Family Systems

Counseling and Education Psychology

Undergraduate Program Information

The Bachelor of Science (B.S.) in Counseling and Community Psychology (CCP) prepares students to work at the bachelors level with a focus on interpersonal skills, case management, awareness of mental health issues, understanding human behavior, and multicultural awareness. Alternatively, the CCP undergraduate major prepares students for graduate school in order to become practitioners in the field of psychology with an additional focus on research and professional psychology practice opportunities.
Graduate Program Information

The major thrust of the Counseling and Educational Psychology (CEP) Department is the preparation of personnel for work in counseling, school psychology, counseling psychology and related areas. Five graduate degrees are available:

1. Masters of Arts (M.A.) in Clinical Mental Health Counseling
2. Specialist in Education (Ed.S.) in School Psychology
3. Doctor of Philosophy (Ph.D.) in Counseling Psychology
4. Doctor of Philosophy (Ph.D.) in School Psychology
5. Postdoctoral Masters of Science (M.S.) in Clinical Psychopharmacology

Departmental Admission Requirements

Admission requirements and procedures are specific to each degree program in the Department of Counseling and Educational Psychology. Applicants must meet the basic admission requirements of the Graduate School before they are considered for admission to CEP graduate programs. To be considered for admission to CEP Graduate Programs, application requirements may include, but are not limited to the following:

1. Completion and submission of NMSU on-line graduate application form and fee
2. Unofficial transcript from every college or university you have attended. If the program decides to recommend you for admission, official transcripts must be submitted to the Graduate School. You will not be considered admitted until after the Graduate School has reviewed these materials and made a final decision.
3. Letters of recommendation from persons familiar with the applicant's academic and/or professional record (please check with the degree program to determine the number needed)
4. Curriculum vitae or resume that includes a list of completed upper-division and/or graduate coursework related to counseling, school psychology, counseling psychology or related professions.
5. Letter of intent and/or statement of purpose (please check with the degree program to determine what the content should include)
6. Writing Sample (please check with the degree program to determine what type of writing sample is needed)
7. Interviews are required as a part of the selection process

For more information about the CEP Department contact the department office or visit the departmental website. For questions related to degree programs admission procedures and requirements please contact the Program Director and/or Program Admissions Director; program websites indicate contact information for these individuals.

CEP Departmental Policy on Enrollment Restrictions for Graduate Courses

Restricted Enrollment:

Due to student demand, limited university resources and the nature of graduate training programs which lead to licensure in the helping professions, enrollment in CEP graduate level courses is restricted to those graduate students who have been admitted to both the Graduate School, as well as to the particular academic program.

This restriction also applies to persons who may wish to audit a course. It is anticipated that certain situations may warrant an exception from the general rule limiting enrollment. The process to obtain an exception is provided in the following section.

Exception Criteria and Process:

Exceptions to this policy may be granted by the department head, provided a screening process similar and equally rigorous to that required for admission to the program is performed. An exception must be requested prior to enrollment and shall include:

1. Consideration and validation of the reason provided by the individual requesting to enroll, which must include academic and professional qualifications relevant to the professional level of study. For example, active licensure as a psychologist is required to audit or register for courses in the postdoctoral program in Psychopharmacology.
2. Agreement from the individual that they will comply with all program requirements imposed for those who are admitted to the program, such as a background check.
3. Examples of justifications that will be considered sufficient to warrant an exception and permit students to register for graduate courses in CEP include:
   a. Previous admission by NMSU for purposes of a graduate minor in the helping professions. For example, the Minor in Integrated Behavioral Healthcare, which is also open to graduate students previously admitted to Social Work, Public Health, Nursing, and Marriage and Family Therapy programs.
   b. Licensed graduates of the Postdoctoral MS of Clinical Psychopharmacology program who need continuing education credits to maintain competency.
4. Written, including electronic, approval from the:
   a. Course Instructor,
   b. Program Director, and
   c. CEP Department Head.

Degrees for the Department

Bachelor Degree(s)

Counseling and Community Psychology - Bachelor of Science (p. 1070)
Counseling and Community Psychology - Bachelor of Science (Online) (p. 1072)

Master Degree(s)

Clinical Mental Health Counseling - Master of Arts (p. 1075)
Clinical Psychopharmacology - Master of Science (Post Doctoral) (Online) (p. 1075)

Specialist Degree(s)

School Psychology - Specialist in Education (p. 1078)

Doctoral Degree(s)

Counseling Psychology - Doctor of Philosophy (p. 1076)
School Psychology - Doctor of Philosophy (p. 1077)

Minors for the Department

Undergraduate

Counseling and Educational Psychology - Undergraduate Minor (p. 1075)

Graduate

Integrated Behavioral Health Care - Graduate Minor (p. 1078)
Spanish Counseling - Graduate Minor (p. 1079)
Counseling and Educational Psychology

CEPY 1120G. Human Growth and Behavior
3 Credits (3)
Introduction to the principles of human growth and development throughout the life span. May be repeated up to 3 credits.

Learning Outcomes
1. Students will demonstrate an understanding of the scientific study of processes of change and stability throughout the human lifespan (i.e., Human Development). Students will demonstrate a familiarity with the generally recognized stages of human development from conception to death. Students will be able to demonstrate understanding of the normal and exceptional patterns of human development. Students will be able to understand and operationalize the research regarding the identified stages of human development as they relate to gender and multicultural issues.

CEPY 1150. Career Excellence
1 Credit (1)
Professional career curriculum to assist students in developing an understanding and ability to articulate who they are as emerging professionals through personal assessment activities. The focus will be on providing students with tools and strategies for reflection, planning, and goal-setting. Course does not count toward CEP minor. Spring only course offering. Restricted to: College of Education Majors only majors. Restricted to Las Cruces campus only.

Learning Outcomes
1. Demonstrate an understanding of the relationship between academic and professional career success. Express a familiarity with professionalism and career culture and communicate a comprehension of various professional career skills. Apply material learned to other aspects to professional excellence. Develop a career life plan that will highlight goals, taking into account life circumstances. Become competent in appropriate professional communication.

CEPY 1160. Academic Excellence
1 Credit (1)
The course is designed to provide you students with a foundation in their personal academic process. The course will assist students in developing an understanding and ability to articulate who they are as beginning college students through personal assessment activities. The focus will be on providing students with tools and strategies for reflection, planning, and goal-setting. Topics discussed will include time management, study skills, test taking skills, stress management, motivational and academic discipline skills, interpersonal skills, teachers and families through functional behavior supports, training, and consultation in school and community settings. Students will be able to develop an academic life plan that will highlight goals, taking into account life circumstances. Become competent in appropriate academic communication.
CEPY 2110. Learning in the Classroom  
3 Credits (3)  
This class introduces you to the basic principles of learning, including cognition, motivation, and assessment. You will examine the relationships between theory, research, and practice in learning, memory, child development, motivation, and educational assessment for the school setting. This course will provide the student with concepts and principles of educational psychology that will form a framework for thinking about learning and instruction and how theories of learning are connected to classroom situations. May be repeated up to 3 credits.  
Learning Outcomes  
1. Define learning and compare and contrast the factors that cognitive, behavioral, and humanistic theories believed to influence the learning process, giving specific examples of how these principles could be used in the classroom. Observe and reflect upon the teaching learning processes in economically, socially, culturally and educationally diverse classroom populations in order to develop a current understanding of students and families in public and private school. Discuss how theories of information processing and cognitive theories of learning can impact memory, study strategies, and how certain teaching techniques can help students learn. Compare teacher-centered and student-centered approaches to learning, and to identify a positive learning environment. Identify various methods to motivate students and create effective learning environments. Use major concepts of child and adolescent development, human learning, and social and cultural influences in planning and implementing classroom instruction, strategies, and management. Evaluate the best means of accommodating instruction to meet individual needs and differences. Students will examine how learning style, cultural and social issues and learning disabilities impact the learner’s effectiveness in the classroom setting. Explain different types of assessment used to assess learning and provide examples of effective assessment practices.  
1. Discuss the relationship between motivation and classroom management.

CEPY 2120. The Preschool Child  
3 Credits (3)  
Survey of psychological development from conception to age five. May be repeated up to 3 credits.  
Learning Outcomes  
1. Demonstrate an understanding of major theories of early childhood development. Demonstrate an understanding of recognized stages of human development from prenatal to preschool years. Explore cultural influences that may create variability in human development. Apply major theories to themselves and reflect on their early childhood development.

CEPY 2130. Adolescence - School Setting  
3 Credits (3)  
This course is designed to present the student with an introduction to the area of adolescent development with an emphasis on the positive aspects of this life stage. Students will be encouraged to be reflective on the topics presented in class that will include issues on diversity, culture, health, and well-being, emerging adulthood and suggestions for improving the lives of adolescents. May be repeated up to 3 credits.  
Learning Outcomes  
1. Students will become knowledgeable about the historical background of adolescent development. Students will become knowledgeable about the major theories related to adolescence. Students will evaluate different developmental theories and their fit across cultures as you reflect on your personal experiences through discussions and videos you will watch. Students will identify key developmental milestones, conflicts, and concepts of each chapter presented by utilizing critical thinking skills as you complete summary questions. Students will define relevant terms, ideas, and concepts in the study of adolescent development through quizzes and homework assignments.

CEPY 2140. Explorations of Counseling & Community Psychology  
3 Credits (3)  
An introduction and exploration of various career options and functions within the mental health disciplines to aid in professional development. Emphasis will be placed on depth and scope of the choices available including research, teaching, community work, public policy, and clinical work and prevention (e.g. counseling, psychotherapy, assessment, consultation). May be repeated up to 6 credits.  
Learning Outcomes  
1. Acquire knowledge of historical and contemporary issues which affect the provision of mental health services by members of diverse mental health disciplines including clinical, counseling, school, and community psychologists, clinical mental health counselors, and others. Acquire knowledge pertaining to education and training requirements for various disciplines. Acquire survey-level knowledge of psychological assessment, measurement, and treatment. Acquire survey-level knowledge of various inquiry approaches applicable to research pertaining to mental health and well-being—both at the individual and community level. Understand the mental health recovery model and explore the lived experiences of individuals with mental health problems in contemporary society. Understand the principles of sensitivity and respect for diverse populations as integral to professional practice in diverse mental health disciplines and settings, including practice in educational and community settings.
CEPY 2140H. Exploration of CCP
3 Credits (3)
An exploration of careers, activities, & techniques in counseling, school, and community psychology. Taught with CEPY 2140 with differentiated instruction and/or independent project to be determined. Restricted to Las Cruces campus only.

Learning Outcomes
1. Demonstrating knowledge of the basic functions of careers in counseling, community and school psychology. Establishing a familiarity with the educational requirements necessary for a career in counseling, community, and school psychology. Acknowledging and enhancing sensitivity and respect for diverse populations in various counseling areas; including educational and community settings. Beginning to develop the interpersonal skills needed to succeed in the counseling, community and school psychology professions.

CEPY 3110. Sex Roles in Education
3 Credits (3)
Physiological, psychological, and political aspects of sex role socialization and the effects of these factors on personal development. May be repeated up to 3 credits.

CEPY 3210V. Human Relations Training
3 Credits (3)
Gain skills, knowledge, and sensitivity for living and working with others. May be repeated up to 3 credits.

CEPY 4110V. Introduction to Counseling
3 Credits (3)
Principles of counseling for nonmajors. May be repeated up to 3 credits.

CEPY 4120. Introduction of Mindfulness Practice
3 Credits (3)
Students will learn about contemplative practices through learning and participation in various mindfulness practices. Engages students in a practice or experience that leads to reflection and, thus, acquired knowledge about themselves, others, and group functioning. May be repeated up to 3 credits.

CEPY 4130. Addictions Prevention and Recovery
3 Credits (3)
Understanding addictions process, prevention, and recovery, including biological, interpersonal and sociological influences, and intervention strategies. May be repeated up to 3 credits.

CEPY 4140. Family Guidance
3 Credits (3)
Systems based guidance procedures for enhancing family strengths and development, and application of family guidance procedures for prevention and remediation of problems. May be repeated up to 3 credits.

Prerequisite: CEPY 1120G.

CEPY 4150. Psychology, Multiculturalism and Counseling
3 Credits (3)
Understanding social identities such as race, ethnicity, sexual orientation, age, social class and spirituality as it relates to psychosocial development, academic achievement and counseling.

CEPY 4997. Independent Study
1-6 Credits (1-6)
Individual study directed by consenting faculty. May be repeated up to 6 credits.

CEPY 4998. Internship in Counseling & Community Psychology
1-6 Credits (1-6)
Students will explore in more depth the fields of counseling, community, and school psychology professions by completing an internship. Through the completion of the internship students will gain hands on work experience, enhance sensitivity for respect with working with diverse populations, and hone their interpersonal skills needed to succeed in the counseling, community, and school psychology professions. May be repeated up to 6 credits.

CEPY 5110. Introduction to Counseling
3 Credits (3)
Overview of counseling theory, techniques, ethics, and professional issues. Same as CEPY 4110V. This course is open to all majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.

CEPY 5120. Human Development
3 Credits (3)
Theory and research regarding cognitive, social, and emotional development across the lifespan with emphasis on enhancing human development. Non majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes
1. Students will understand and be able to apply the major theories and research that attempt to explain chronological constancy and change in human beings, with emphasis on practical applications and implications. Students will build a foundational knowledge of human development for adaptation to the professional fields of education, counseling, and psychology. Students will explore the universality and cultural variations in human development from conception to death. Students will learn about the factors which facilitate and impede healthy physical, cognitive, social, and affective/emotional development.
CEPY 5130. Multicultural Counseling
3 Credits (3)
Understanding age, gender, ethnicity, socioeconomic status and culture in relation to human development, education, and counseling. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes
1. Awareness will be accomplished by assisting students in the exploration and identification of students’ individual cultural assumptions (i.e. WORLDVIEW) in relation to people diverse from themselves. This will be accomplished via modeling, observations, readings, group processing and other experiential exercises. Knowledge will be accomplished by exploring the question, “What is Multiculturalism” in its many forms, roles, and relationships. It will begin with the examination of the psychology of multiculturalism and the requirements of cultural competency in intercultural communications. In addition, a review of various theories of diversity (i.e. identity development, acculturation, worldview, bilingualism, and disability, to name a few) will be embedded in readings, assignments, and class discussion. Exploration of various diverse populations will also be integrated into this course. Skills will focus on “How to” of multicultural competency and its practical applications to everyday interactions. Students will learn about basic issues related to assumptions that are used in communication intra-cultural and intercultural interactions.

CEPY 5150. The Art & Science of Mindfulness
1-3 Credits (1-3)
In this course students will learn about contemplative practices by learning about and participating in various mindfulness practices for self-care and to increase well-being. Students will learn about psychological theories and research that support the use of mindfulness in helping others increase their well-being. Students will learn how to teach mindfulness to others. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes
1. To learn about mindfulness practices for self-care. To incorporate mindfulness practices into daily life. To learn how mindfulness practices may increase well-being. To increase students’ knowledge of mindfulness theory and research. To develop skills to teach mindfulness to others.

CEPY 5160. Organization and Administration of School Counseling Services
3 Credits (3)
Procedures for establishing and maintaining counseling programs in the schools. Professional and ethical issues in school counseling and group laboratory experience to enhance self-awareness and interpersonal skills for effective professional relationships. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes
1. Students will learn about the history of school guidance/counseling and apply that knowledge to assess current trends and the quality of services provided in counseling programs with respect to the changing needs of today’s diverse systems. Students will learn to develop and administer a school guidance/counseling program according to professional and ethical standards developed by The American School Counseling Association’s (ASCA) National Model of School Counseling. Students will be introduced to a variety of technology-based career development applications, educational resources and research to promote academic advancement and social-emotional well-being. Additionally, students will explore the use of technology designed to implement, monitor, and evaluate a comprehensive school counseling program. Students will gain an understanding of effective teamwork within a school setting including theories, models, and processes of consultation and change with teachers, administrators, and other school personnel. Students will explore strategies and methods of advocacy with families and communities designed to empower them to address issues of social justice within an educational system. Students will build a framework for facilitating school-level individual and group counseling services. They will analyze and interpret trends in academic achievement by understanding the cultural context of the school environment as it relates to groups of students and to institutional functioning.
CEPY 5170. Professional Issues in Mental Health Counseling
3 Credits (3)
History, roles, organizational structures, settings, ethics, standards, laws, and credentialing related to mental health counseling. Group laboratory experience to enhance self-awareness and interpersonal skills for effective professional relationships. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes
1. Students should understand and demonstrate understanding of the expectations and requirements of their new professional identity. Students should demonstrate knowledge of history and philosophy of the counseling profession and its specialty areas. Students should demonstrate understanding of the multiple professional roles and functions of counselors across specialty areas, and their relationships with human service and integrated behavioral health care systems, including inter-agency and inter-organizational collaboration and consultation. Students should demonstrate knowledge and understanding of counselors’ roles and responsibilities as members of interdisciplinary community outreach and emergency management response teams. Students should demonstrate knowledge and understanding of the role and process of the professional counselor advocating on behalf of the profession; advocacy processes needed to address institutional and social barriers that impede access, equity, and success for clients.

CEPY 5180. Addictions Counseling
3 Credits (3)
Emphasis on alcohol and other psychoactive substance abuse. Also includes eating disorders, gambling, and other addictive behaviors. Covers review of psychopharmacology, assessment, and diagnosis with the major focus on treatment and professional issues. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes
1. Recognize the potential for substance use disorders to mimic and coexist with a variety of medical and psychological disorders. Know the disease concept and etiology of addiction and co-occurring disorders. Identify standard screening and assessment instruments for substance use disorders and process addictions.

CEPY 5210. Research Methods
3 Credits (3)
Develop research and program evaluation including critical literature review, generating questions, quantitative and qualitative methodology, analysis, and writing proposals. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes
1. Students will understand how to critically evaluate research relevant to the practice of clinical mental health counseling. Become knowledgeable of models of program evaluation for clinical mental health programs. Demonstrate knowledge of evidence-based treatments and basic strategies for evaluating counseling outcomes in clinical mental health counseling. Apply relevant research findings to inform the practice of clinical mental health counseling. Develop measurable outcomes for clinical mental health counseling programs, interventions, and treatments. Analyze and use data to increase the effectiveness of clinical mental health counseling interventions and programs.

CEPY 5220. Appraisal Theory and Technique
3 Credits (3)
Selection, administration, and interpretation of tests and other assessment methods. Topics include reliability, validity, norms, cultural factors, and ethics related to appraisal. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes
1. Basic concepts of standardized and non-standardized testing and other assessment techniques, including norm-referenced and criterion-referenced assessment, environmental assessment, performance assessment, individual and group test and inventory methods, psychological testing, and behavioral observations (II-G-seven-b) Statistical concepts, including scales of measurement, measures of central tendency, indices of variability, shapes and types of distributions, and correlations (II-G-seven-c): Reliability (i.e., theory of measurement error, models of reliability, and the use of reliability information) (II-G-seven-d) Validity (i.e., evidence of validity, types of validity, and the relationship between reliability and validity) (II-G-seven-e) Social and cultural factors related to the assessment and evaluation of individuals, groups, and specific populations (II-G-seven-f) Ethical strategies for selecting, administering, and interpreting assessment and evaluation instruments and techniques in counseling (II-G-seven-g)
CEPY 5230. Counseling Theory and Technique
3 Credits (3)
Major theories of counseling with an emphasis on development of the ability to offer theory-based counseling and consultation. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes
1. Students will demonstrate the ability to foster counseling and helping relationships that are based on studies of the counseling process in a multicultural society and include an orientation to wellness and prevention as desired counseling goals. Students will be able to apply theories and models of counseling, including a systems approach, to conceptualize clients, help select appropriate counseling interventions, and so the student begins to develop a personal model of counseling based on current professional research and practice with the aid of processes provided in this course. Students will demonstrate the ability to foster counseling and helping relationships that include essential interviewing, counseling, and case conceptualization skills as well as developing the ability to provide professional feedback in consultation with other trainees. Students will demonstrate the ability to foster counseling and helping relationships that include developmentally relevant counseling treatment or intervention plans, the development of measurable outcomes for clients, and evidence-based counseling strategies and techniques for prevention and intervention Students will be able to demonstrate counselor characteristics and behaviors that influence helping processes. Students will demonstrate knowledge and ability to provide suicide prevention, crisis intervention, trauma-informed, and community-based strategies, such as Psychological First Aid.

CEPY 5235. Counseling Theory and Techniques for School Psychologists
3 Credits (3)
Major theories of counseling with an emphasis on development of the ability to offer theory-based counseling and consultation. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes
1. The student will demonstrate an understanding of their psychosocial and cultural context and how such phenomena influence their values, beliefs and, therefore, theoretical orientation. The student will demonstrate the ability to examine and apply critical perspectives related to counseling theory and techniques. The student will be able to compare and contrast various theoretical perspectives in the area of counseling children and adolescents in school settings. The student will demonstrate the development of skills leading toward becoming a culturally responsive practitioner in the area of counseling with individuals from a variety of diverse backgrounds. The student will be able to identify, describe, and apply legal and ethical issues relevant to practice in the area of counseling children and adolescents in diverse settings.

CEPY 5240. Child and Adolescent Counseling Theory and Technique
3 Credits (3)
Counseling theory and technique applied to children and adolescents from a developmental perspective in school and mental health settings. Restricted to CEP graduate students. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes
1. Students will demonstrate understanding of their psychosocial and cultural context and how such phenomena influence their values, beliefs and, therefore, theoretical orientation to counsel children and adolescents. Students will examine and apply critical perspectives related to counseling children and adolescents. Students will compare and contrast various theoretical perspectives in the area of counseling children and adolescents. Students will develop a knowledge base leading toward becoming a culturally responsive practitioner in the area of counseling with individuals from a variety of diverse backgrounds. Students will identify, describe, and apply legal and ethical issues relevant to practice in the area of counseling children and adolescents in various settings. Students will collaborate with others in the process of developing relevant treatment plans and providing counseling services to children and adolescents in diverse settings.

CEPY 5250. Family Therapy Theory and Technique
3 Credits (3)
Major theories of family therapy and associated assessment, intervention and evaluation techniques. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes
1. Students will be able to explain a systems perspective and differentiate family and other systems theories and major models of family and related interventions. Students will be able to demonstrate and apply an understanding of the family life cycle and impact on family and individual functioning. Students will be able to prepare and utilize various forms of assessment for families and couples, including observation, collection of collateral information, and interviewing. Students will be able to illustrate awareness of skill in the use of formal and informal assessment measures used in family and couple counseling. Students will be able to summarize evidence-based interventions and treatments for family and couple counseling. Students will be able to analyze multicultural counseling theories and techniques for diverse family types and apply multicultural and family theories to one's own experience. Students will be able to demonstrate an ability to communicate and relate effectively with families and couples. Students will be able to describe ethical issues related to counseling families and couples and be able to identify a process to make sound judgments.
CEPY 5260. Group Work Theory and Technique
3 Credits (3)
Didactic and experiential learning in group theory and practice, which involves experiences in group participation and leadership. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.
Learning Outcomes
1. Provide students with an intellectual understanding of group work theory and technique. Provide students with an experiential understanding of group work. To help students develop specific group facilitation competencies

CEPY 5270. Diagnosis and Treatment Planning
3 Credits (3)
Appraisal and conceptualization of mental disorders and other problems through diagnostic interviewing using the DSM. Treatment planning for counseling with children, adolescents, and adults. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.
Learning Outcomes
1. Students will know the etiology, the diagnostic process and nomenclature, treatment, referral, and prevention of mental and emotional disorders. Students will know the principles, models, and documentation formats of biopsychosocial case conceptualization and treatment planning. Students will understand current literature that outlines theories, approaches, strategies, and techniques shown to be effective when working with specific populations of clients with mental and emotional disorders. Students will understand the basic classifications, indications, and contraindications of commonly prescribed psychopharmacological medications so that appropriate referrals can be made for medication evaluations and so that the side effects of such medications can be identified. Students will know the principles of the diagnostic process, including differential diagnosis, and the use of current diagnostic tools, such as the current edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM). Students will understand the established diagnostic criteria for mental and emotional disorders, and describes treatment modalities and placement criteria within the continuum of care. Students will know the impact of co-occurring substance use disorders on medical and psychological disorders. Students will understand the relevance and potential biases of commonly used diagnostic tools with multicultural populations. Students will understand appropriate use of diagnosis during a crisis, disaster, or other trauma-causing event. Students will be able to differentiate between diagnosis and developmentally appropriate reactions during crises, disasters, and other trauma-causing events.

CEPY 5280. Primary Care Psychology
3 Credits (3)
Didactic and experiential learning in primary care psychology issues. Through this course students will learn about the cultural necessity of the integration of mental and physical health issues and multidisciplinary collaboration. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.
Learning Outcomes
1. Students will demonstrate the following primary care psychology competency within the context of addressing integrated behavioral health care: Biologic bases of behavior as related to health/illness and coping Students will demonstrate the following primary care psychology competency within the context of addressing integrated behavioral health care: Psychological bases of behavior as related to health/illness and coping Students will demonstrate the following primary care psychology competency within the context of addressing integrated behavioral health care: Sociocultural bases of behavior as related to health/illness and coping Students will demonstrate the following primary care psychology competency within the context of addressing integrated behavioral health care: Understanding and application of inter-professional collaboration Students will demonstrate the following primary care psychology competency within the context of addressing integrated behavioral health care: A knowledge of substance use disorders, particularly opioid use disorder and treatment in a primary care setting Students will demonstrate the following primary care psychology competency within the context of addressing integrated behavioral health care: How to utilize telemedicine effectively
CEPY 5310. Appraisal of Psychoeducational Achievement in a Diverse Society
3 Credits (3)
Advanced theory and use of norm and criterion referenced instruments in the classroom: planning of prescriptive and educational programs. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. Restricted to CEP graduate majors. May be repeated up to 3 credits.

Learning Outcomes
1. Define assessment and describe the steps in the assessment process. Practitioner Describe a flowchart for the screening/referral/evaluation process according to New Mexico regulations. Research, Pedagogy Describe the uses of criterion and norm-referenced instruments as well as alternative forms of assessment (observation, curriculum based assessment and informal techniques). Practitioner, Effectiveness Identify and discuss instruments/assessment procedures appropriate for use in identifying academic achievement, learning aptitude, vocational aptitude, performance in specific areas, and social emotional functioning. Effectiveness Identify appropriate instruments/assessment procedures required for the exceptionality recognized under New Mexico regulations. Effectiveness Administer and score twenty-four instruments in reading, math, written language and processing and to utilize these results in completing test interpretations and psycho-educational reports. Effectiveness Interpret, report, and utilize assessment date in special education programming. Reflection, Pedagogy Determine the assessment needs of students who are speakers of languages other than English. Diversity Evaluate a test, write a review, and demonstrate and explain it in class. Practitioners 1 Synthesize information gathered through comprehensive assessment procedures into a practical whole.

Assessment, Evaluation

CEPY 5320. Career/Life Planning and Vocational Assessment
3 Credits (3)
Vocational choice theories, relationship between career choice and life style, sources of occupational and educational information, and approaches to decision making and values clarification. Laboratory involves supervised interpretation of vocational assessment. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean.

Learning Outcomes
1. Career development theories and decision-making models. Career, vocational, educational, occupational and labor market information resources, and career information systems. Career development program planning, organization, implementation, administration, and evaluation. Interrelationships among and between work, family, and other life roles and factors, including the role of multicultural issues in career development. Career and educational planning, placement, follow-up, and evaluation. Assessment instruments and techniques relevant to career planning and decision making. Career counseling processes, techniques, and resources, including those applicable to specific populations in a global economy.

CEPY 5985. Counseling Practicum
1-6 Credits (1-6P)
Supervised experience of counseling and consultation. Weekly individual and group supervision involves review of audio, video, and/or live sessions and case presentations. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 6 credits.

Prerequisite: CEPY 5230.

Learning Outcomes
1. Understands ethical and legal considerations specifically related to the practice of clinical mental health counseling. Understands a variety of models and theories related to clinical mental health counseling, including the methods, models, and principles of clinical supervision. Understands the management of mental health services and programs, including areas such as administration, finance, and accountability. Demonstrates the ability to apply and adhere to ethical and legal standards in clinical mental health counseling. Recognizes the importance of family, social networks, and community systems in the treatment of mental and emotional disorders. Uses the principles and practices of diagnosis, treatment, referral, and prevention of mental and emotional disorders to initiate, maintain, and terminate counseling. Applies multicultural competencies to clinical mental health counseling involving case conceptualization, diagnosis, treatment, referral, and prevention of mental and emotional disorders. Applies effective strategies to promote client understanding of and access to a variety of community resources. Demonstrates appropriate use of culturally responsive individual, couple, family, group, and systems modalities for initiating, maintaining, and terminating counseling. 1 Demonstrates the ability to use procedures for assessing and managing suicide risk. 1 Applies current record-keeping standards related to clinical mental health counseling. 1 Provides appropriate counseling strategies when working with clients with addiction and co-occurring disorders. 1 Demonstrates the ability to recognize his or her own limitations as a clinical mental health counselor and to seek supervision or refer clients when appropriate. 1 Maintains information regarding community resources to make appropriate referrals. 1 Advocates for policies, programs, and services that are equitable and responsive to the unique needs of clients. 1 Demonstrates the ability to modify counseling systems, theories, techniques, and interventions to make them culturally appropriate for diverse populations. 1 Knows the principles and models of assessment, case conceptualization, theories of human development, and concepts of normalcy and psychopathology leading to diagnoses and appropriate counseling treatment plans. 1 Understands various models and approaches to clinical evaluation and their appropriate uses, including diagnostic interviews, mental status examinations, symptom inventories, and psychoeducational and personality assessments. 1 Demonstrates skill in conducting an intake interview, a mental status evaluation, a biopsychosocial history, a mental health history, and a psychological assessment for treatment planning and caseload management. 2 Demonstrates appropriate use of diagnostic tools, including the current edition of the DSM, to describe the symptoms and clinical presentation of clients with mental and emotional impairments. 2 Demonstrates the ability to conceptualize an accurate multi-axial diagnosis of disorders presented by a client and discuss the differential diagnosis with collaborating professionals.
CEPY 5990. Advanced Counseling Practicum
3-6 Credits (3-6P)
Supervised experience of appraisal and individual, family, and/or group counseling and consultation serving child, adolescent, and/or adult clients. Weekly individual and group supervision involves review of counseling sessions and case presentations. This course will carry a subtitle to reflect the practicum setting. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. Restricted to CEP graduate majors. May be repeated up to 6 credits.
Prerequisite: CEPY 5985 or consent of instructor.

Learning Outcomes
1. Obtain a minimum of one-hundred and fifty clinical hours including sixty hours of direct service (face-to-face) with clients appropriate to the program. For students enrolled in only six credits, this translates to three-hundred clinical hours, including one-hundred and twenty hours of direct service. Obtain one hour a week of individual supervision with the on-site supervisor and a minimum of one and a half hours per week of group supervision with a program faculty member. Students will have the opportunity to become familiar with a variety of professional activities in addition to direct service such as record keeping, information and referral, in-service, and staff meeting. Students will have an opportunity to gain supervised experience in the use of a variety of professional resources such as assessment instruments, technologies, professional literature, and research. Students receive a formal evaluation by site supervisor and program faculty member. Students will have opportunity to work with clients who represent the ethnic and demographic diversity of their community. Students will formally evaluate their supervisors and learning experience at the end of their internship experiences. Students will be covered by professional liability insurance while enrolled in this course. Students will adhere to ethical standards of ACA and related entities, and applications of ethical and legal considerations in professional counseling. Students will have an opportunity to apply concepts of mental health education, consultation, collaboration, outreach and prevention strategies, and community mental health advocacy.

CEPY 5997. Special Research Programs
1-6 Credits (1-6)
Individual investigations either analytical or experimental. Maximum of 6 credits per semester and total of 9 credits overall. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 9 credits.

Learning Outcomes
1. Learning outcomes will vary depending on course content.

CEPY 5998. Counseling Internship
3-12 Credits (3-12)
Supervised experience in a professional counselor role in a school or agency. Students perform all counselor functions including appraisal, individual/family/group counseling, consultation, administration, program development, research, and/or evaluation. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 12 credits.
Prerequisite: CEPY 5990.

Learning Outcomes
1. Obtain a minimum of six-hundred clinical hours including two-hundred and forty hours of direct service (face-to-face) with clients appropriate to the program. For students enrolled in only six credits, this translates to three-hundred clinical hours, including one-hundred and twenty hours of direct service. Obtain one hour a week of individual supervision with the on-site supervisor and a minimum of one and a half hours per week of group supervision with a program faculty member. The student has the opportunity to become familiar with a variety of professional activities in addition to direct service such as record keeping, information and referral, in-service, and staff meeting. The student has an opportunity to gain supervised experience in the use of a variety of professional resources such as assessment instruments, technologies, professional literature, and research. Students receive a formal evaluation by site supervisor and program faculty member. Students will have opportunity to counsel clients who represent the ethnic and demographic diversity of their community. Students will formally evaluate their supervisors and learning experience at the end of their internship experiences. Students will be covered by professional liability insurance while enrolled in internship. Students will adhere to ethical standards of ACA and related entities, and applications of ethical and legal considerations in professional counseling. Students will have an opportunity to apply concepts of mental health education, consultation, collaboration, outreach and prevention strategies, and community mental health advocacy.

CEPY 5999. Master's Thesis
1-15 Credits (1-15)
Thesis. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 88 credits.

Learning Outcomes
1. To develop and complete master’s research thesis.
CEPY 6120. Human Development
3 Credits (3)
Same as CEPY 5120 with differentiated assignments for Ed.S and Ph.D. students. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes
1. Students will understand and be able to apply the major theories and research that attempt to explain chronological constancy and change in human beings, with emphasis on practical applications and implications. Students will build a foundational knowledge of human development for adaptation to the professional fields of education, counseling, and psychology. Students will explore the universality and cultural variations in human development from conception to death. Students will learn about the factors which facilitate and impede healthy physical, cognitive, social, and affective/emotional development.

CEPY 6130. Psychology of Multiculturalism
3 Credits (3)
In this advanced course for post-master’s graduate students in applied fields of psychology, students will apply psychological concepts related to multiculturalism as well as critical race theories, feminist theories, queer theories, and liberation theories to understand intersecting social identities. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. Restricted to: SPSY, C EP, CEP majors.

Learning Outcomes
1. Students will understand and apply multicultural and pluralistic characteristics within and among diverse groups nationally and internationally. Students will understand and apply theories and models of multicultural counseling, cultural identity development, and social justice and advocacy. Students will understand and apply multicultural counseling competencies. Students will understand and apply the impact of heritage, attitudes, beliefs, understandings, and acculturative experiences on an individual’s views of others. Students will understand and apply the effects of power and privilege for counselors and clients. Students will understand and apply help-seeking behaviors of diverse clients. Students will understand the impact of spiritual beliefs on clients’ and counselors’ worldviews. Students will understand and apply strategies for identifying and eliminating barriers, prejudices, and processes of intentional and unintentional oppression and discrimination.

CEPY 6140. Cognitive & Affective Basis of Behavior
3 Credits (3)
This course provides an overview of cognitive and affective bases of behavior as well as the integration of cognition and affect in psychological processes. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, program director, department head, and graduate school dean. Restricted to CEP graduate majors. May be repeated up to 3 credits.

Learning Outcomes
1. Students will be able to identify key concepts of cognition such as memory, attention and learning. Students will identify the functions and roles of affect and emotional expression. Students will understand the connection between cognition and affect and how these two areas of human function influence each other. Students will be able to integrate and apply research findings and implications in the study of cognition and affect to practical experiences. Students will apply models and theories of cognition and affect to understanding and predicting behavior.

CEPY 6150. Psychology of Social Identities
3 Credits (3)
Theory, research and practice from feminist and multicultural perspectives will examine the integration of social identities such as gender, sexual orientation, race, ethnicity, age, social class, spirituality, and ability in relation to counseling psychology. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. Restricted to: CEP graduate majors. May be repeated up to 3 credits.

Learning Outcomes
1. Heighten the student's awareness of multiple social identities, worldview beliefs, and other within-group variables. Aid the student in developing a knowledge base in the realms of social psychology and multicultural research, culturally-responsive interventions and professional practice. Provide experiences for the application of this awareness and knowledge as a means of developing the skills necessary for being a reflective decision-maker, creative problem solver, and responsive service provider for diverse individuals in a variety practice settings and intervention modalities.

CEPY 6160. History and Systems of Psychology
3 Credits (3)
History and systems of psychology related to contemporary applied psychology. This course will focus largely on the history of modern psychology and on the major systems (or schools) of psychology. Restricted to CEP graduate majors.

Learning Outcomes
1. Effectively discuss historical and philosophical antecedents and contexts of psychology and compare and contrast multiple perspectives on important issues in this field. Apply global awareness to this topic (e.g., intersecting identities; how interlocking oppressions vary by epoch, continent, nation, cultural group, region, organizational system, etc.) Develop professional arguments; support opinions with reason and personal experience; and demonstrate higher order thinking and creative engagement (for definitions of terms like analyze, synthesize, evaluate, and create. Develop thoughtful inquiries that inspire scholarly discourse and further investigation; consider which types of evidence are needed to find answers; and effectively facilitate respectful, thought-provoking discussions of controversial and debatable topics.
CEPY 6170. Psychology of Poverty
3 Credits (3)
This course is designed to examine the nature, extent and impact of poverty on Southwestern populations and across the United States in relation to assessment and interventions and its impact on the education and psychological well-being of children and families. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to: SPSY, C EP, CEP majors.
Learning Outcomes
1. Students will learn how views of poverty have evolved in history. Students will be aware and demonstrate the skills of the different methods used to measure and understand poverty. Students will identify and apply relevant issues from education, health disparities, and criminal justice related to the psychology of poverty. Students will evaluate and present their own self-awareness and understanding of their worldview of poverty, along with their interpretation of information of poverty. Students will conduct self-assessments regarding their range of liberalism/conservatism; implicit bias and how it impacts their interpretation of information of poverty. Students will understand and lead discussions as to why poverty remains so prevalent in U.S. society. Students will be able to articulate the within group differences and similarities of racial and ethnic backgrounds or family types that are susceptible to poverty. Students will learn successful interventions in working with children, adolescents and families impacted by the psychology of poverty.

CEPY 6180. Clinical Psychopharmacology
3 Credits (3)
Basic biological aspects of psychopharmacology with applications to clinical populations and treatment implications. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.
Learning Outcomes
1. Students will be able to understand and apply concepts related to basic neuroanatomy, neurochemistry, and neurophysiology. Students will be able to understand and apply basic knowledge related to the neurobiology and neuropharmacology of major drug groups used in the treatment of CNS diagnoses; including, but no limited to, antidepressants, antipsychotics, anxiolytics, anticonvulsants, and natural remedies or herbal supplementation. Students will recognize the strengths and weaknesses of a wide range of research methodologies to screen compounds and test the mechanisms of action of drugs. Students will understand the drug development process from target identification to FDA approval and ongoing safety surveillance. Students will appreciate how pharmacological investigation informs the understanding of the underlying pathology of the illness. Students will access, critique, and assimilate evidence from scientific studies as it relates to translational neuroscience and the search for promising targets for psychotropic drugs. Students will become familiar with the indication, contraindication, therapeutic drug monitoring, and effectiveness of medications across DSM-V classifications. As well as psychotropic drug tapering or switching. The implications of patient characteristic and medical co-morbidities are addressed. Students will share informed opinions about advances and challenges in experimental (off-label) psychopharmacology; and of their opinions of integrated psychotherapy or combined medicine. Students will work effectively with peers and Instructor; as part of multidisciplinary learning environment.
CEPY 6185. Ethics, Law & Professional Issues in School Psychology
3 Credits (3)
This course provides an introduction and overview of the profession of school psychology with emphasis on the roles, functions, and competencies of the school psychologist within the context of legal and ethical practice. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean.

Learning Outcomes
1. Students will demonstrate an understanding of various professional issues, role functions, and historical contexts related to the field of school psychology. Students will demonstrate the ability to examine and apply critical perspectives related to various professional issues, role functions, and the historical contexts associated with the field of school psychology. Students will explore best practices associated with school psychology role functions and practices. Students will demonstrate the development of skills leading her or him toward becoming a culturally responsive practitioner in the field of school psychology. Students will obtain knowledge of the National Association of School Psychologists (NASP) Principles of Professional Ethics (2020) and the American Psychological Association's Ethical Principles of Psychologists and Code of Conduct (2010; 2016 amendments) and learn to apply these principles to specific areas of practice such as assessment, direct and indirect intervention, consultation, and research. Students will understand complexities of ethical and legal issues occurring in school settings and will develop ethical decision-making skills. Students will demonstrate knowledge of the provisions of state and federal statutes such as the Individuals with Disabilities Education Improvement Act (2004), Every Student Succeeds Act (2017) and Section 504of the Rehabilitation Act of 1973 as well as other case laws related to the practice of school psychology and learn how to apply these mandates to the practice of school psychology. Students will understand the importance of developing awareness of the legal and ethical issues affecting their professional identity and the need to remain current on these issues throughout their careers as school psychologists. Students will continue to emerge as critical thinkers, reflective decision-makers, and creative problem-solvers, in general.

CEPY 6190. Ethical/Professional Issues in Counseling Psychology
3 Credits (3)
History of counseling psychology, scientist-practitioner model, American Psychological Associations Ethical Principles of Psychologists and Code of Conduct. Focus on current ethical, professional, and scientific issues. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. Restricted to: CEP majors. May be repeated up to 3 credits.

Learning Outcomes
1. Students will be knowledgeable of and act in accordance with the current version of the APA Ethical Principles of Psychologists and Code of Conduct, relevant laws, regulations, rules, and policies governing health service psychology at the organizational, local, state, regional, and federal levels, and relevant professional standards and guidelines; Recognize ethical dilemmas as they arise, and apply ethical decision-making processes in order to resolve the dilemmas; Conduct self in an ethical manner in all professional activities. Students will develop an understanding of how their own personal/cultural history, attitudes, and biases may affect how they understand and interact with people different from themselves; Apply knowledge of the current theoretical and empirical knowledge base as it relates to addressing diversity in all professional activities including research, training, supervision/consultation,and service. Students will be expected to behave in ways that reflect the values and attitudes of psychology, including integrity, deportment, professional identity, accountability, lifelong learning, and concern for the welfare of others; Engage in self-reflection regarding one's personal and professional functioning and engage in activities to maintain and improve performance, well-being, and professional effectiveness Students will be expected to produce and comprehend oral, nonverbal, and written communications that are informative and well-integrated; demonstrate a thorough grasp of professional language and concepts; Demonstrate effective interpersonal skills and the ability to manage difficult communication well.

CEPY 6210. School Psychology Research and Program Evaluation
3 Credits (3)
Survey and analysis of research and program evaluation procedures in school psychology. Critical review of literature, formulating questions, quantitative and qualitative methodology, and data analysis as foundations for reading research literature and generating research, program evaluation, and/or grant proposals. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes
1. Students will advance their foundational knowledge of research methodology and research design. Students will develop skills and knowledge to conduct comprehensive literature reviews. Students will critique scientific research studies by applying attained knowledge in research methodology and design. Students will produce a research proposal they will conduct in their areas of interest within the field of school psychology. Students will present a research proposal that will conduct within the field of school psychology. Students will demonstrate skills and knowledge for program evaluation by developing a program evaluation plan. Students will demonstrate knowledge and skills necessary to conduct single-subject design studies.
CEPY 6220. Spanish for Mental Health Professionals
3 Credits (3)
This course emphasizes the vocabulary for Mental Health Professionals to include academic, psychological and medical terminology. Students will incorporate Spanish terms in assessment and treatment plans through role plays. Further, the course will include an overview of the use of interpreters and translators in working with culturally and linguistically diverse clientele. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to: SPSY, CEP majors. May be repeated up to 3 credits.

Prerequisite: Enrolled in Bilingual School Psychology Training Grant with instructor consent.

Learning Outcomes
1. Students will be able to demonstrate brief, basic conversation in Spanish using mental health and health-care related expressions and terminology. Students will be able to understand and respond to relevant cultural and linguistic client concerns related to presenting issues. Students will be able to increase their Spanish speaking capabilities when engaged in their professional roles (e.g. conducting clinical interviews, gathering mental health histories, conducting assessments and delivering interventions using various theoretical frameworks). Students will understand cultural and social factors that influence the practitioner-client relationship and communication with Latinx clients. Students will be able to engage effectively in role play situations involving application of concepts learned.

CEPY 6240. Child and Adolescent Counseling Theory and Technique
3 Credits (3)
Taught with CEPY 5240 with differentiated assignments for Ed.S and Ph.D students. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes
1. Students will be able to demonstrate an understanding of their psychosocial and cultural context and how such phenomena influence their values, beliefs and, therefore, theoretical orientation to counsel children and adolescents. Students will be able to demonstrate the ability to examine and apply critical perspectives related to counseling children and adolescents. Students will be able to compare and contrast various theoretical perspectives in the area of counseling children and adolescents. Students will be able to demonstrate the development of a knowledge base leading toward becoming a culturally responsive practitioner in the area of counseling with individuals from a variety of diverse backgrounds. Students will be able to identify, describe, and apply legal and ethical issues relevant to practice in the area of counseling children and adolescents in various settings. Students will be able to collaborate with others in the process of developing relevant treatment plans and providing counseling services to children and adolescents in diverse settings.

CEPY 6250. Family Therapy Theory and Technique
3 Credits (3)
Taught with CEPY 5250 with differentiated assignments for Ed.S and Ph.D students. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes
1. Students will demonstrate their comprehension of a systems perspective that provides an understanding of family and other systems theories and major models of family and related interventions. Students will demonstrate an understanding of the family life cycle and impact on family and individual functioning. Students will demonstrate an awareness of and develop skills with various forms of assessment for families and couples, including observation, collection of collateral information, and interviewing. Students will demonstrate an awareness of and develop skills in using formal and informal assessment measures used in family and couple counseling. Students will develop conceptual skills that demonstrate an understanding of theory and implementation of interventions. Students will demonstrate knowledge about evidenced-based interventions and treatments for family and couple counseling. Students will demonstrate their understanding of multicultural counseling theories and techniques for family and marital counseling. Students will be able to apply multicultural and family theories to their own experience in an effort to improve your counseling work. Students will demonstrate that they can communicate and relate effectively to families and couples. Students will be able to design and implement outreach and psychoeducational interventions to families and couples. Students will demonstrate their knowledge related to ethical issues surrounding counseling families and couples and be able to make sound judgments.

CEPY 6260. Consultation
3 Credits (3)
Didactic and experimental trainings in theory-based consultation. Supervision provided by faculty involves audio, video, and/or live observation consultation activities and case presentations. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.
CEPY 6265. Diagnostic Class
3 Credits (3)
Emphasis on developing the knowledge, skills, and necessary application abilities related to diagnosis and associated interventions related to mental health and psychopathology issues that impact a student's ability to navigate the education setting. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes
1. Students will be expected to demonstrate the knowledge of the etiology, the diagnostic process and nomenclature, treatment, referral, and prevention of mental and emotional disorders. Students will be expected to demonstrate knowledge of the principles, models, and documentation formats of biopsychosocial case conceptualization and treatment planning. Students will be expected to demonstrate understanding of current literature that outlines theories, approaches, strategies, and techniques shown to be effective when working with specific populations of clients with mental and emotional disorders. Students will be expected to demonstrate understanding of basic classifications, indications, and contraindications of commonly prescribed psychopharmacological medications so that appropriate referrals can be made for medication evaluations and so that the side effects of such medications can be identified. Students will be expected to demonstrate knowledge of the principles of the diagnostic process, including differential diagnosis, and the use of current diagnostic tools, such as the current edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM). Students will be expected to demonstrate understanding of the established diagnostic criteria for mental and emotional disorders, and describes treatment modalities and placement criteria within the continuum of care. Students will be expected to demonstrate knowledge of the impact of co-occurring substance use disorders on medical and psychological disorders. Students will be expected to demonstrate understanding of the relevance and potential biases of commonly used diagnostic tools with multicultural populations. Students will be expected to demonstrate understanding of the appropriate use of diagnosis during a crisis, disaster, or other trauma-causing events. 1 Students will be expected to differentiate between diagnosis and developmentally appropriate reactions during crises, disasters, and other trauma-causing events.

CEPY 6270. Diagnosis and Treatment Planning
3 Credits (3)
Taught with CEPY 5270 with differentiated assignments for Ph.D. students. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes
1. Students will be expected to demonstrate knowledge of the etiology, the diagnostic process and nomenclature, treatment, referral, and prevention of mental and emotional disorders. Students will be expected to demonstrate knowledge of the principles, models, and documentation formats of biopsychosocial case conceptualization and treatment planning. Students will be expected to demonstrate practice of using the DSM 5 to create differential diagnoses. Students will be expected to construct an initial treatment plan based upon a systemic and differential diagnosis. Students will be expected to formulate a culturally relevant diagnosis and treatment plan. Students will be expected to discuss the barriers to assessment and treatment, as it relates to mental illness stigma.

CEPY 6320. Career/Life Planning and Vocational Assessment
3 Credits (3)
Taught with CEPY 5320 with differentiated assignments for Ed.S and Ph.D. students. Restricted to CEP graduate students. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes
1. Knowledge and understanding of career development theories and decision-making models. Knowledge and understanding of career, vocational, educational, occupational and labor market information resources, and career information systems. Knowledge and understanding of career development program planning, organization, implementation, administration, and evaluation. Knowledge and understanding of interrelationships among and between work, family, and other life roles and factors, including the role of multicultural issues in career development. Knowledge and understanding of career and educational planning, placement, follow-up, and evaluation. Knowledge and understanding of assessment instruments and techniques relevant to career planning and decision making. Knowledge and understanding of career counseling processes, techniques, and resources, including those applicable to specific populations in a global economy.
CEPY 6330. Academic & Behavioral Assessment & Intervention
3 Credits (3)
This course introduces basic concepts, methods, and applications of academic and behavior assessment and intervention. Students will learn how to conduct functional/informal assessments of academic and behavior and how to write behavior and academic plans. Methods appropriate for assessment and intervention of school-age children will be emphasized. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to: CEP graduate majors.

Learning Outcomes
1. Students will gain and demonstrate knowledge on how behavior assessment fits within psychological/psycho-educational assessment. Students will demonstrate the ability to examine and apply critical perspectives related to educational assessment. Students will learn the rational, defining features and theoretical underpinnings of behavioral assessment. Students will learn how to conduct and complete functional assessments of behavior. Students will learn how to develop and evaluate a satisfactory positive behavior intervention plan. Students will develop and/or learn techniques of behavioral observation. Students will learn how to integrate behavioral observation findings with other assessment methods.

CEPY 6340. Appraisal of Cognitive Functioning
3 Credits (3)
Selection, administration, scoring, interpretation, and report writing using individual tests of intelligence. Moderator variables, such as acculturation, ethnic identity development, and world view are also incorporated. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes
1. Students will become knowledgeable about the historical background of intelligence testing. Students will become knowledgeable about the major theories of intelligence. Students will be able to discuss orally and in writing the pros and cons of intelligence testing and will be able to support the discussion with specific facts and research. Students will be able to select “appropriate” intellectual assessment instruments for children, adolescents, and adults. Students will be able to state pertinent information relative to these major intelligence tests such as age range, standardization, reliability, and validity. Students will demonstrate mastery of administration, scoring, and interpretation of various norm-referenced cognitive assessment instruments while taking into consideration the cultural context of the individual. The student will be able to demonstrate the ability to integrate information into meaningful written reports.

CEPY 6350. Appraisal of Personality
3 Credits (3)
Selection, administration, scoring, interpretation, and report writing using major objective and projective tests of personality. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes
1. Knowledge of the current theoretical and empirical knowledge base as it relates to addressing diversity in all professional activities including research, training, supervision/consultation, and service. Produce and comprehend oral, nonverbal, and written communications that are informative and well-integrated; demonstrate a thorough grasp of professional language and concepts. Demonstrate current knowledge of diagnostic classification systems, functional and dysfunctional behaviors, including consideration of client strengths and psychopathology. Demonstrate understanding of human behavior within its context (e.g., family, social, societal and cultural). Demonstrate the ability to apply the knowledge of functional and dysfunctional behaviors including context to the assessment and/or diagnostic process. Select and apply assessment methods that draw from the best available empirical literature and that reflect the science of measurement and psychometrics; collect relevant data using multiple sources and methods appropriate to the identified goals and questions of the assessment as well as relevant diversity characteristics of the service recipient. Interpret assessment results, following current research and professional standards and guidelines, to inform case conceptualization, classification, and recommendations, while guarding against decision-making biases, distinguishing the aspects of assessment that are subjective from those that are objective. Communicate orally and in written documents the findings and implications of the assessment in an accurate and effective manner sensitive to a range of audiences.
CEPY 6410. Introduction to Qualitative Research
3 Credits (3)
This course is intended to be an introduction to qualitative research methods for persons wishing to understand, apply, and conduct qualitative studies with human subjects in the fields of counseling and psychology. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes
1. Students will understand the importance of applying and conducting culture-centered and ethical psychological research among persons from ethnic, linguistic, and racial minority backgrounds. Students will understand the shift that has taken place in the past century from ignoring cultural variables to that of valuing the vast amounts of uncharted knowledge that is contained therein. Students will gain a deeper understanding of the qualitative paradigm that informs research and the way we conduct and consume it. Students will understand the components that make up good qualitative research considering carefully the variables that inform the proposed outcome of the study. Students will assess the benefit of research to the entities, individuals and communities being studied. Students will learn to be grounded in the empirical and conceptual literature on the ways that culture influences the variables under investigation, as well as psychological and social science research traditions and skills. Students will be aware of their cultural assumptions on which their research questions are based (Egharevba, 2001). Students will learn to be aware of, and if appropriate, to apply indigenous theories when conceptualizing research studies. They are encouraged to include members of cultural communities when conceptualizing research, with particular concern for the benefits of the research to the community (Fontes, 1998; LaFromboise, 1988). Students will learn to consider the psychological (rather than demographic) contextual factors of race, ethnicity, language, gender, sexual orientation, socio-economic status, and other social dimensions of personal experience in conceptualizing their research design (Fouad Brown, 2000; Quintana et al., 2001). 1 Students will strive to recognize and incorporate research methods that most effectively complement the worldview and lifestyles of persons who come from a specific cultural and linguistic population; e.g., quantitative and qualitative research strategies (Hoshmand, 1989; Marin Marin, 1991; Ponterotto Casas, 1991). 1 Students will learn to consider culturally sensitive assessment techniques and data-generating procedures.

1 In analyzing and interpreting data from research studies and in proposed research, students will learn to consider cultural influences as possible explanations for their findings. 1 Students will learn the importance of considering the benefit to participants, and to include participants in the interpretation of results. They are encouraged to find ways for the results to be of benefit to the community, and to represent the participants’ perspectives accurately and authentically.

CEPY 6420. Psychometrics
3 Credits (3)
An introduction to psychometrics, including topics such as theory and techniques of psychological measurement, scale and inventory construction, reliability, validity, evaluation of measurement quality, classical and contemporary measurement theory, and standardization. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean.

Learning Outcomes
1. Students will acquire knowledge and skills in psychometrics.
   Students will understand and apply psychometric theory through the completion of instrument evaluation, instrument development, and factor analysis projects.

CEPY 6425. Counseling Psychology Research
3 Credits (3)
Survey and analysis of research and program evaluation procedures in counseling psychology. Critical review of literature, formulating questions, quantitative and qualitative methodology, and data analysis are covered as a foundation for reading research literature and generating research, program evaluation, and/or grant proposals. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.

Learning Outcomes
1. Students refine their foundational knowledge of research methods.
   Students learn how to conduct comprehensive literature reviews in counseling psychology. Students learn about sampling procedures and their limitations. Students refine their knowledge about measurement applied to research (including the reliability, validity, norms and cultural relevance of measurement procedures). Students refine their knowledge of statistics and the application of statistics to deriving conclusions from research data. Students learn about ethical issues related to conducting research. Students apply knowledge and skills in the areas described above to the critique of counseling psychology research. Students apply knowledge and skills in the areas described above to the development of a draft proposal for research they can conduct in their area of interest within counseling psychology. Students present and defend a proposal for research in counseling psychology.
CEPY 6430. Advanced Statistics  
3 Credits (3)  
An intermediate course focusing on more advanced theories and techniques of inferential statistics as applied to education and psychology. Includes ANOVA, planned contrasts, ANCOVA, simple regression, and non-parametrics. Both hand calculation and computer packages will be employed. Open to all College of Education majors. May be repeated up to 3 credits.  

Learning Outcomes  
1. Students will understand how to describe procedural steps to submit proposals to the IRB at NMSU. Students will be able to create data files and use SPSS to clean and examine datasets to assess data quality. Students will be understand how to plan to address a research question, identify appropriate statistical tests and variables. Students will be able to use SPSS to run statistical analyses to examine differences in means or relationships between two variables. Students will understand how to assess assumptions and interpret findings of these analyses. Students will understand key concepts, such as statistical significance, error, effect size, sample size, and statistical power.of analytic approaches, findings, and interpretations of the data Students will be able to effectively communicate using scientific writing and accurate portrayal of the data in terms.  

CEPY 6440. Multivariate Statistics  
3 Credits (3)  
Theories and techniques of multivariate statistics as applied to education and psychology. Includes multiple regression, logistic regression, MANOVA, factor analysis, and structural equation modeling. Computer packages will be the primary tool for data analysis. Open to all majors of the College of Education. May be repeated up to 3 credits.  

Learning Outcomes  
1. To be able to construct statistical models, both non-multivariate (e.g., multiple regression) and multivariate (e.g., MANOVA, MANCOVA), and carry out the analysis using statistical software (e.g., SPSS, R). To be able to interpret results of both non-multivariate and multivariate analyses, in the context of the data. To be able to generate original research questions that can be answered with quantitative methods discussed in this course. To be able to carry out a quantitative method discussed in this course to answer a research question(s), and to be able to appropriately interpret the results. To be able to read published research in your field of study that makes use of multivariate methods, and critically interpret the results based on the claims and evidence provided.  

CEPY 6450. Educational Experimentation  
3 Credits (3)  
Same as ELAD 6910. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 3 credits.  

Learning Outcomes  
1. Reflect on abilities to identify and effectively manage strengths and potential barriers that may impact progress on dissertation by thorough analyzing strengths and barriers and developing an action plan. Conceptualize a dissertation topic that is germane to the field of Counseling Psychology and provide a convincing argument supporting the need for such research. Conduct extensive and systematic literature searches for previous research and theory relevant to dissertation topic. Write a comprehensive outline and annotated bibliography of the literature that incorporates the most relevant research and theoretical work associated with dissertation topic to inform literature review. Clearly state research questions and hypotheses that will be examined in dissertation. Create a detailed and comprehensive action plan that adheres to APA ethical guidelines for research that a reader can use to replicate dissertation study (i.e., method section). Demonstrate understanding of the importance of having a diverse sample. Present dissertation research to the class in a simulated proposal meeting. Become more adept at providing support and challenge to student peers during weekly seminars and simulated proposal meetings. 1 Identify strategies for choosing and working with your dissertation committee effectively. 1 Demonstrate your knowledge of APA writing style.  

CEPY 6510. Practicum in School Psychology: Psychoeducational  
1-6 Credits (1-6)  
Supervised practicum in psychological and educational evaluation. Skill development in ecological assessment, including interviewing, observations micro-counseling, acculturation, world view, and ethnic identity formation. Graded: S/U Grading (S/U, Audit). Restricted to CEP graduate majors. May be repeated up to 6 credits.  
Prerequisite: CEPY 6340, CEPY 5310.  
Learning Outcomes  
1. Students will demonstrate sound diagnostic reasoning and data based decision-making through the formulation of possible preliminary hypotheses and testing of hypotheses via use of appropriate assessment methods. Students will demonstrate skills in planning appropriate assessments, taking into consideration contextual factors, referral concerns, and background information; and will select appropriate evaluation methods. Students will demonstrate skills related to devising and implementing evidence-based academic interventions for students in need. Students will demonstrate sensitivity in regards to cultural diversity and diversity of values, as well as begin the process of being culturally responsive in their professional practices. Students will become familiar with and practice in accordance with best practices and relevant standards of the profession. Students will become familiar with the application of state special education rules and regulations. Students will identify and apply relevant legal and ethical responsibilities and requirements. Students will demonstrate effective interpersonal skills with clients and colleagues, appropriate to the functioning as a professional school psychologist.
CEPY 6520. Field Experience in Educational Diagnostics
1-6 Credits (1-6)
CEPY 6520 is designed to provide students with supervised school-based experiences and practices. The goal of the course is for students to master the competencies required for the delivery of academic services in the educational diagnostician role. The specific emphases in this course are placed on a data-based decision-making skills, psychoeducational assessment activities, and academic interventions. Under faculty and school-system staff supervisions, students will assume service delivery responsibilities and with increasing independence will respond to the diagnostic and intervention needs of students. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 6 credits.

Prerequisite: CEPY 6340 and CEPY 5310.

Learning Outcomes
1. Students will demonstrate sound diagnostic reasoning and data-based decision-making through the formulation of possible preliminary hypotheses and testing of hypotheses via use of appropriate assessment methods. Students will demonstrate skills in planning appropriate assessments, taking into consideration contextual factors, referral concerns, and background information; and will select appropriate evaluation method. Students will demonstrate skills related to devising and implementing evidence-based academic interventions and provide recommendations for students in need. Students will demonstrate sensitivity in regards to cultural diversity and diversity of values, as well as begin the process of being culturally competent in their professional practices. Students will become familiar with and practice in accordance with best practices and relevant standards of the profession. Students will become familiar with the application of state special education rules and regulations. Students will identify and apply relevant legal and ethical responsibilities and requirements. Students will demonstrate effective interpersonal skills with clients and colleagues.

CEPY 6530. Practicum in School Psychology: Psychological
1-6 Credits (1-6)
School-based supervised experience for the advanced student. Provides experiences in various roles and models of service delivery (group, multifaceted, integrative, family assessment) expected of school psychologists. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. Restricted to: CEP graduate majors. May be repeated up to 6 credits.

Learning Outcomes
1. Enhance the knowledge and skill students already possess and aid in the development of new knowledge and skills (related to psychological, behavioral needs of students). Provide students with the opportunity to respond to supervision and use supervision in a constructive manner. Provide students with the opportunity to share experiences as school psychologists in training in a supportive environment. Provide the students with the opportunity to engage in learning activities that will assist them in functioning independently as school psychologists (i.e., data-based decision-making and accountability). Provide the instructor with the opportunity to observe the student’s ability to plan and execute successful interventions and demonstrate diagnostic skills. Students will be able to establish a counseling relationship with students’ clients through the provision of individual and/or group counseling as stated on their IEP’s. Students will be exposed to current issues, theories, and practices in the field of school psychology. Students will be able to integrate theory/ research and practice via case presentations. Students will be able to demonstrate knowledge and integration of technology in their practice as school psychologist. 1 Students will refine their skills in working with culturally and linguistically diverse students, families, educators, and other professionals.

CEPY 6540. Advanced Multicultural School Psychology Field Experience
3 Credits (3)
Supervised school psychology field experience including appraisal diagnosis, case conceptualization, treatment planning, theory-based counseling and evaluation from a multicultural perspective with diverse populations. Supervision provided by doctoral psychologist faculty involves audio, video, and/or live observation of sessions and case presentations. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. Restricted to CEP graduate majors.

Prerequisite: CEPY 6510, CEPY 6530.

Learning Outcomes
1. Students will enhance the knowledge and skill they already possess and aid in the development of new knowledge and skills (related to psychological, behavioral needs of students). Students will respond to supervision and use supervision in a constructive manner. Students will share experiences as school psychologists in training in a supportive environment. Students will engage in learning activities that will assist them in functioning independently as doctoral-level school psychologists (i.e., data-based decision-making and accountability).
CEPY 6550. Counseling Psychology Theory/Practicum  
1-6 Credits (1-6)  
Theories of counseling and psychotherapy and their application during supervised counseling with clients. Supervision provided by doctoral psychologist faculty involves audio, video, and/or live observation of counseling sessions and case presentations. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 6 credits.  
Learning Outcomes  
1. Students will refine their understanding of counseling theory and hone counseling skills through readings, lecture, demonstration, case presentation, and supervised counseling experiences. Students will learn about and employ a variety of evidence-based approaches to counseling and psychotherapy that have historically been used by counseling psychologists. Students will reflect on their development of an approach to counseling that is effective, theoretically sensible, and personally congruent.

CEPY 6560. Group Work Theory/Practicum  
1-6 Credits (1-6)  
Application of theory in group work with clients and in supervising group leaders in training. Supervision provided by doctoral psychologist faculty involves audio, video, and/or live observation of counseling sessions and case presentations. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. Restricted to CEP majors. May be repeated up to 6 credits.  
Prerequisite: CEPY 6550.  
Learning Outcomes  
1. Apply the basic elements of group theory to small groups, including principles of group dynamics, group process components, developmental stage theories, group member roles and behaviors, and therapeutic factors. Demonstrate effective leadership skills and intervention strategies in simulated class discussions to actual group sessions in the community. Possess knowledge of ethical and professional issues encountered by group leaders. Develop awareness of the relative advantages of group work for clients and counselors, as well as other practical advantages; discern when group may not be the preferred modality for clients. Distinguish characteristics of various group theories and approaches. Identify relevant socio-cultural factors and multicultural considerations in group work and its impact on theory, process, and group leadership skills. Communicate how they have improved their skill development relative to self-awareness and group leadership. Have knowledge of professional group organizations, certifications (Certified Group Psychotherapist), and be able to effectively market group skills in preparation for the pre-doctoral internship year.

CEPY 6570. Advanced Counseling Psychology Practicum  
1-6 Credits (1-6P)  
Supervised counseling psychology experience including appraisal, diagnosis, case conceptualization, treatment planning, theory-based counseling and evaluation. Supervision provided by doctoral psychologist faculty involves audio, video, and/or live observation of counseling sessions and case presentations. Restricted to CEP graduate majors. Graded: S/U Grading (S/U, Audit). May be repeated up to 12 credits.  
Prerequisite: CEPY 6560.  
Learning Outcomes  
1. To increase skill level in clinical work with individual/group/couple therapy and initial intakes through practice, formal supervision, and group case discussion. To integrate one's theoretical orientation into a brief practice therapy model and to improve treatment planning ability. To improve treatment planning ability by increasing knowledge and integration of empirically supported interventions. To increase exposure and use of assessment procedures and tools in clinical work. To be cognizant of cultural/diversity issues with clients and develop enough self-awareness to respond effectively to a wide range of clients. To examine professional identity concerns as they arise and increase one's knowledge base about specific areas of clinical interest. To adhere to APA's Ethical Principles of Psychologists and Code of Conduct and Specialty Guidelines for the Delivery of Service by Counseling Psychologists and Guidelines for Providers of Psychological Services to Ethnic, Linguistic, and Culturally Diverse Populations, and to develop a more applied understanding of them. To increase one's knowledge of relevant Mental Health Statutes and the Board of Psychologist Examiners Rules and Regulations for the state in which you are practicing (NM or TX). To demonstrate self-awareness and self-reflection through ongoing self-evaluation of counseling skills. 1 To learn how to design and implement outreach presentations and to gain experience in consulting with interdisciplinary staff. 1 To become familiar with and acquire practice with career counseling and the use of career inventories.
CEPY 6580. Supervision Theory and Practicum  
1-6 Credits (1-6)
Didactic and experimental training in theory-based supervision. Supervision provided by doctoral psychologist faculty involves audio, video, and/or live observation of supervision sessions and case presentations. Restricted to CEP graduate majors. May be repeated up to 6 credits.
Prerequisite: CEPY 6530 or CEPY 6570.
Learning Outcomes  
1. Students will be able to conceptualize the counseling supervision process. Students will be able to understand the differences between various models of counseling supervision in order to develop a clearly conceptualized supervision theory/style. Students will be able to establish an effective supervisory relationship.
2. Students will be able to demonstrate a variety of appropriately used supervision interventions.
3. Students will be able to demonstrate self-awareness through ongoing self-assessment of supervisory skills and self-reflection of your experience.
4. Students will be able to accurately assess your supervisee's abilities and developmental level.
5. Students will be able to be cognizant of cultural/diversity issues with supervisees and develop enough self-awareness to respond effectively to such issues in both supervision and counseling.
6. Students will be able to provide clear and timely feedback to your supervisee based on your on-going assessment.
7. Students will be able to demonstrate the ability to write accurate and timely supervision process and progress notes.
8. 1 Students will be able to understand the differences between various models of consultation.
9. 1 Students will be able to understand the major issues in consulting and its place within the counseling profession, including orienting students to their professional identities.
10. 1 Students will be able to understand how to orient students to their professional identities (school psychology, counseling psychology, or counseling). In addition, this course also provides supervisors an orientation to the counseling profession, including its history, counseling professional associations (e.g., the American Counseling Association), counseling licensure, roles counselors full in the community, and the difference between counseling and other related professions.

CEPY 6590. Behavioral Health Practicum  
1-6 Credits (1-6)
An intensive supervised experience in providing behavioral health services at an on or off campus interdisciplinary health setting. Supervision provided by doctoral level psychologist faculty in collaboration with other team disciplines' supervising faculty involves audio, video, and/or live observation of counseling sessions and team interventions and case presentations. Restricted to CEP graduate majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 6 credits.
Learning Outcomes  
1. Students will be able to apply a Biopsychosocial model of health and illness to case conceptualizations, treatment plans, and interventions at individual, group, and systemic levels. Students will learn and use motivational interviewing to support patient behavior change. Students will learn strategies to employ telehealth services. Students will learn behavioral strategies for Opiate Use Disorder. Students will learn and perform a functional assessment of patient problems. Students will learn and apply evidence-based brief behavior change interventions (e.g. goal setting, self-monitoring, stimulus control, positive reinforcement, guided imagery, progressive muscle relaxation, mindfulness, social support). Students will describe and demonstrate behavioral health consultation skills. Students will demonstrate understanding of health disparities and social justice issues relevant to health care setting, patient population, and service delivery models. Students will learn about ethical considerations for psychologists in health care settings.

CEPY 6610. Internship in School Psychology  
1-12 Credits (1-12)
Supervised experience in school psychology. Restricted to CEP graduate majors. May be repeated up to 12 credits.
Prerequisite: CEPY 6510, CEPY 6530.
Learning Outcomes  
1. Varies

CEPY 6620. Internship in Counseling Psychology I  
1-18 Credits (1-18)
Full-time equivalent of one-half calendar year of internship preferably in an APA-approved or APA-equivalent site. Available to Ph.D. students who have successfully completed their comprehensive exams. Restricted to CEP graduate majors. May be repeated up to 18 credits.
Learning Outcomes  
1. Students will complete the full-time equivalent of one calendar year internship at a site accredited by the American Psychological Association (APA) that has been matched with the student through the APPIC process.

CEPY 6630. Internship in Counseling Psychology II  
1-18 Credits (1-18)
Full-time equivalent of one-half calendar year of internship preferably in an APA-approved or APA-equivalent site. Available to Ph.D. students who have successfully complete their comprehensive exams. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, program director, department head, and graduate school dean. May be repeated up to 18 credits.
Learning Outcomes  
1. Varies by site.
CEPY 6640. Doctoral Internship in School Psychology
6-12 Credits (6-12)
Supervised doctoral internship experience in school psychology. 1800 to 2000 clock hours are completed on a full-time basis. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to CEP graduate majors. May be repeated up to 12 credits.
Prerequisite: CEPY 6510, CEPY 6530, CEPY 6540.
Learning Outcomes
1. Varies by site.

CEPY 6996. Selected Topics
1-6 Credits (1-6)
Offered under various subtitles which indicate the subject matter covered. A maximum of 6 credits in any one semester and a total of 18 credits overall. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 18 credits.
Learning Outcomes
1. Varies

CEPY 6999. Ed.S. Thesis
1-15 Credits (1-15)
Study and research at the Specialist in Education level. Each problem to be designated by a qualifying subtitle. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 88 credits.
Learning Outcomes
1. Varies

CEPY 7000. Doctoral Dissertation
1-15 Credits (1-15)
Dissertation. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 88 credits.
Learning Outcomes
1. Varies

Office Location: O'Donnell Hall, Suite 222

Counseling and Community Psychology - Bachelor of Science

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 3000 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.
Choose one from the following:

- FCSC 400
- SOCI 3240
- CEPY 4198
- CEPY 4150
- CEPY 4140
- CEPY 4130
- CEPY 4110V
- CEPY 4120
- CEPY 3110
- CEPY 2140
- CEPY 2130
- CEPY 2120
- CEPY 2110

Core Courses

- CEPY 2110 Learning in the Classroom
- CEPY 2120 The Preschool Child
- CEPY 2130 Adolescence - School Setting
- CEPY 2140 Explorations of Counseling & Community Psychology
- CEPY 3210V Human Relations Training
- CEPY 3110 Sex Roles in Education
- CEPY 4120 Introduction of Mindfulness Practice
- CEPY 4110V Introduction to Counseling
- CEPY 4130 Addictions Prevention and Recovery
- CEPY 4140 Family Guidance
- CEPY 4150 Psychology, Multiculturalism and Counseling
- CEPY 4998 Internship in Counseling & Community Psychology

Electives, to bring to the total credits to 120

1. A grade of C- or better is required for all CCP core courses.
2. MATH 1220G College Algebra (or any MATH higher math course, excluding MATH 1130G Survey of Mathematics) is required for the degree but students may need to take any prerequisites needed to enter either MATH 1220G College Algebra or higher (excluding MATH 1130G Survey of Mathematics) first.
3. CEPY 3210V Human Relations Training and CEPY 4110V Introduction to Counseling may not be used as a VWW.
4. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
5. Electives for CCP program are selected from list of approved electives.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

### Second Year

#### Semester 1
- CEPY 2140 Explorations of Counseling & Community Psychology 3
- Area III: Laboratory Science Course ² 4
- An additional Area IV: Social and Behavioral Science Course (see list from non-departmental requirements) ³ 3
- Choose from one of the following: ³
  - ENGL 2130G Advanced Composition
  - ENGL 2210G Professional & Technical Communication ¹
  - ENGL 2221G Writing in the Humanities and Social Science ¹
  - ENGL 2215G Advanced Technical and Professional Communication

CEPY Approved Elective Course ⁴ 3

**Credits** 16

#### Semester 2
- CEPY 2130 Adolescence - School Setting 3
- PHIL 2110G Introduction to Ethics 3
- Area III: Laboratory Science Course ² 4
- CEPY Approved Elective Course ⁴ 3
- CEPY Approved Elective Course ⁴ 3

**Credits** 16

### Third Year

#### Semester 1
- CEPY 3210V Human Relations Training 3
- CEPY 4130 Addictions Prevention and Recovery (Fall Only) 3
- Viewing a Wider World Course ⁵ 3
- Choose from one of the following: ⁵
  - PSYC 310 Experimental Methods ¹
  - FCSC 400 Research Methods in Family and Consumer Sciences

CEPY Approved Elective Course ⁴ 3

**Credits** 15-16

#### Semester 2
- CEPY 3110 Sex Roles in Education 3
- CEPY 4140 Family Guidance 3
- CJUS 416 Global Perspectives on Youth and Drug Use 3
- CEPY Approved Elective Course ⁴ 3
- CEPY Approved Elective Course ⁴ 3

**Credits** 15

### Fourth Year

#### Semester 1
- CEPY 4120 Introduction of Mindfulness Practice 3
- CEPY 4110V Introduction to Counseling 3
- CEPY 4998 Internship in Counseling & Community Psychology 3
- SOCI 3240 Sociology of the Family 3

CEPY Approved Elective Course ⁴ 3

**Credits** 15

#### Semester 2
- CEPY 4150 Psychology, Multiculturalism and Counseling 3

### Credits 12

### Total Credits 120-121

1. These courses may have prerequisites and/or co-requisites, and it is the students responsibility for checking and fulfilling all those requirements.
2. See the General Education (p. 88) section of the catalog for a full list of courses.
3. See the Non-Departmental Requirements (p. 1070) section of the Requirements tab for the program.
4. Select from approved CEP Department list (https://cep.nmsu.edu/academic-programs/counseling-and-community-psychology (https://cep.nmsu.edu/academic-programs/counseling-and-community-psychology.html)/).
5. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

**Counseling and Community Psychology - Bachelor of Science (Online)**

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 3000 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

**Prefix** | **Title** | **Credits**

### Counseling and Education Psychology - Undergraduate Minor

A minor in Counseling and Educational Psychology (CEP) is available to the student receiving a bachelor’s degree from another department in the university. The minor in CEP is designed to be useful to the undergraduate who is preparing to enter one of the helping professions such as psychology, education, social work, criminal justice or nursing. A total of 18 credits is required to obtain the CEP minor, of which, at least 9 credits must be at 300 level or above.

Students must earn a B- or better in all CEP minor courses.

Contact the CEP office for more information on the minor application process or see CEP Minor website (https://cep.nmsu.edu/academic-programs/minor-in-counseling-and-educational-psychology.html)

Total Credits 60

### Clinical Psychopharmacology - (Post-Doctoral) Master of Science (Online)

The curriculum for the Postdoctoral Master of Science in Clinical Psychopharmacology (MSCP) degree program is modeled on the American Psychological Association (APA) recommended curriculum, adopted in 1998, set forth by the Blue Ribbon Task Force (comprised of national experts in psychopharmacology including physicians, psychiatrists, Department of Defense Demonstration Project prescribing psychologists, neuroscientists, pharmacists and nurses). In addition, the NMSU program adheres to all regulations set forth by the New Mexico Board of Psychologist Examiners and the New Mexico Board of Medical Examiners. And is designed in congruence with New Mexico state law for prescribing psychologists. The program is dynamic, changing with the field, and has been modified according to recommended revisions of the American Psychological Association in 2009, then again in 2019 (https://www.apa.org/education/grad/rxp-designation-criteria.pdf). The MSCP program qualifies students to pursue licensure as clinical mental health counselors with the New Mexico Counseling and Therapy Practice Board.

Annual application deadline: February 1

For more information on program application requirements and process, see Clinical Mental Health Counseling, M.A., program website (https://cep.nmsu.edu/academic-programs/counseling-guidance-m-a.html).

### Requirements

The 60-credit counseling curriculum requires two years full-time study or three years part time study on campus, and covers the following areas: human development, appraisal; diagnosis and treatment planning; individual, family and group counseling; consultation; career/life planning; research; and professional issues. Specialized training and supervised experience is offered in mental health agencies, hospitals, and in schools.

Total Credits 60
is an APA Designated Postdoctoral Psychopharmacology Education and Training Program. New Mexico State University is only one of three university programs in the country with said designation status.

This program includes two separate degree tracks: clinical and non-clinical.

**Non-Clinical Track**
The non-clinical track includes two (2) years of coursework and requires the ASPPB governed, national Psychopharmacology Examination for Psychologists (PEP).

**Clinical Track**
The clinical track includes two (2) years of coursework (including hands-on experiential lab training in neurosciences, pathophysiology, and physical assessment), embedded supervised clinical fieldwork, and a final experiential lab training in neurosciences, pathophysiology, and clinical.

The two aims of the program are:
1. To prepare entry level counseling psychologists who are self-reflective and competent in both the practice and science of the profession.
2. To prepare counseling psychologists who think critically about the socio-cultural context of their work and promote social justice.

**Program Requirements**
CEP faculty conduct periodic reviews of students’ progress in the programs, including their academic performance, counseling and psycho-educational skills, professionalism and ethics. Deficits identified through faculty reviews may result in recommendations that students engage in remedial work or that they pursue alternative career goals.

**Total Credits** 33

**Annual application deadline:** December 15

For more information on program application requirements and process, see Counseling Psychology, Ph.D., program website (https://cep.nmsu.edu/academic-programs/counseling-psychology-phd.html).

**Counseling Psychology - Doctor of Philosophy**

The CEP Department offers a doctoral program that leads to a Ph.D. in Counseling Psychology. The program is accredited by the American Psychological Association. For more information on this accreditation contact

The Office of Program Consultation and Accreditation
American Psychological Association
750 1st Street, NE
Washington, DC 20002
Phone: (202) 336-5979.

The program is based on the scientist-practitioner model through which both research and service delivery skills are acquired. Graduates of the program are prepared to conduct research, provide service, teach and supervise. The program prepares students for licensure as psychologists. The two aims of the program are:

1. To prepare entry level counseling psychologists who are self-reflective and competent in both the practice and science of the profession.
2. To prepare counseling psychologists who think critically about the socio-cultural context of their work and promote social justice.

The mission of the School Psychology doctoral program is to prepare school psychologists as scientists, practitioners and advocates for mental health and social justice in health service psychology settings, including public schools. The program addresses state and national shortages of personnel who are fully credentialed to serve the needs of children with disabilities. The primary goal of the school psychology program is to prepare scholars to become problem-solvers with the essential entry-level competencies to serve in the schools and agencies that serve school age populations.

The program develops 3 major components: 1) Knowledge of psychological and educational foundations; 2) Skills in data-based decision-making, assessment, consultation, intervention and research; and 3) The capacity to apply knowledge and skills to promote mental health and development and prevent school failure and other disabling conditions. Specifically, the program will accomplish the following goals.

1. Prepare and graduate highly qualified school psychologists to meet the academic and psychological needs of infants, toddlers, children, youth and their families from diverse backgrounds (i.e., high need children with disabilities).
2. Increase the number of personnel who demonstrate the competencies needed to provide high-quality instruction, evidence-based interventions and services for children with disabilities.
3. Retain scholars in a high quality-training program to increase the numbers of school psychologists including scholars from bilingual and traditionally underrepresented backgrounds.
4. Provide the workforce needed to meet state licensure for Level 3 school psychologists.

Annual Application Deadline: January 15
School Psychology - Specialist in Education

The CEP Department offers a School Psychology program that leads to a Specialist in Education (Ed. S.) degree. The program is accredited through the National Association of School Psychologists. The program provides additional education beyond the M.A. to prepare professionals for licensure as school psychologists in New Mexico and throughout the United States. The School Psychology program prepares its candidates to work with preschoolers, children, adolescents and families. The various settings where School Psychologists are employed include public schools and other organizations that require advanced assessment, counseling, consultation and other interventions. The program trains its candidates to serve students with diverse educational, psychological and emotional needs from various backgrounds. Such training also includes working with all school personnel to help make education a positive and rewarding experience for their students. Students admitted to the School Psychology program also have the opportunity to achieve a Masters degree in Counseling and Guidance with a concentration in Educational Diagnostics on the way to obtaining the specialist degree. Students would need to complete additional curricular, field experiences and degree requirements.

Annual application deadline: January 15

For more information on program application requirements and process, see School Psychology, Ed.S., program website:

https://cep.nmsu.edu/academic-programs/school-psychology.html

Integrated Behavioral Health Care - Graduate Minor

The Minor in Integrated Behavioral Health Care, offered through the Counseling and Educational Psychology (CEP) department, is open to graduate students enrolled in CEP programs Clinical Mental Health Counseling, School Psychology, Counseling Psychology and to graduate students who are enrolled in Social Work, Public Health, Nursing and Marriage and Family Therapy programs.

It was established in the interest of meeting the needs of graduate students in the health professions who are receiving, or seeking training in, interdisciplinary or interprofessional collaborations with other healthcare disciplines. The provision of integrated behavioral health services fits within the university’s broader goal of meeting the needs of the citizens of New Mexico and the department’s commitment to graduating competent service providers who can be effective members of a health care team.

Students will successfully complete 9 credits of coursework specific to this program of study in order to obtain a Minor in Integrated Behavioral Health Care. For application and coursework details, please contact the CEP department office or visit the departmental website at https://cep.nmsu.edu.

Through the courses in this minor students develop knowledge and skills in the following areas:

1. Apply the biopsychosocial model of health and illness with primary care patients,
2. Apply knowledge regarding the mind-body connection to address such issues as stress management, emotion regulation and sleep medicine,
3. Apply culturally responsive behavioral assessment/interventions,
4. Demonstrate behavioral health consultation skills with other health care providers, and
5. Develop interprofessional collaboration skills that include understanding the roles of all healthcare professionals and learning how to communicate effectively in order to engage in service delivery as a team.

Prerequisites

In order to begin the Minor courses, students must currently be enrolled in a Behavioral Health program. There are no other prerequisites.
How to Apply

If you are interested in pursuing a minor in Integrated Behavioral Healthcare, you should complete the attached application and return it to the IBH Minor coordinator, Eve Adams (eadams@nmsu.edu). It is best to meet with the program coordinator before enrolling in relevant coursework, but it is possible to obtain the minor after taking one of the courses in the program of study. The application form allows the CEP department to keep track of potential minors in order to determine what courses need to be offered at any given time. To declare the Minor with the Graduate School, the student should list all relevant completed coursework on the Program of Study form that is submitted to the Graduate School prior to graduating. This form must be signed by Dr. Adams. A IBH Minor faculty member is also required to sit on the student’s graduate committees, including the comprehensive exam and the dissertation proposal and defense exams.

Program of Study

Students will successfully complete 9 credits of work from the courses listed below in order to obtain a Minor in Integrated Behavioral Health Care.

Prefix | Title | Credits
--- | --- | ---
| **Core Courses** | | 9
| Choose 9 credits from the following: | | 
| CEPY 5150 | The Art & Science of Mindfulness | 
| CEPY 5280 | Primary Care Psychology | 
| CEPY 5997 | Special Research Programs | 
| or CEPY 6996 | Selected Topics | 
| CEPY 6590 | Behavioral Health Practicum | 
| **Total Credits** | | 9

CEPY 5150 The Art & Science of Mindfulness (1-3 s.h.) In this course, students learn about contemplative practices by learning about and participating in various mindfulness practices. This course engages students in a practice or experience that leads to reflection and, thus, acquired knowledge about themselves, others, and group functioning. The students learn how to increase well-being through mind-body integration, and they learn how to teach others mindfulness techniques. Students are required to explore the research on mindfulness for some medical condition or for its use with a specific population. This course has been taught in the spring semester, for five years, to CEP, MSW, MPH, and FCS students.

CEPY 5280 Primary Care Psychology (3 s.h.) Didactic and experiential learning in primary care psychology issues. Through this course students will learn about the cultural necessity of the integration of mental and physical health issues and multidisciplinary collaboration. Activities include 1) guest speakers on American Indian Health, the Mexican Healthcare System, and Integrated Care in primary care settings; 2) visits to 2 interdisciplinary, integrative, border community health centers; 3) shadowing residents at the Family Medicine Center and observing the integration of psychological and medical aspects of the cases observed; and 4) exposure to the interventions of Motivational Interviewing and Mindfulness-Based Stress Reduction. CEP, MSW, and MPH trainees have enrolled in this course, taught during the fall semester, over the last 11 years.

CEPY 5997 Special Research Programs (1-6 s.h.) CEPY 6996 Selected Topics (1-6 s.h.). This course will require students to spend a minimum of 6 hours per week at a primary care site, providing counseling, assessment, supervision, or psychoeducational services. The Minor coordinator must approve all placements. CEP students have enrolled in this course over the last 4 years. This course is available fall, spring and summer. During the summer, a special section of this course is subtitled, “Interprofessional Immersion” as CEP, DNP, and Family Medicine and PharmD residents learn interprofessional competencies related to providing geriatric care. This special section has been offered for two summers.

CEPY 6590 Behavioral Health Practicum (1-6 s.h.). An intensive supervised experience in providing behavioral health services at an on or off campus interdisciplinary health setting. This course will provide students the opportunity to participate in a supervised service-learning experience within community-based, interdisciplinary, primary care settings that serve medically underserved and high-risk groups. Students write and present a case study utilizing the biopsychosocial model of health. MSW and CEP students are placed in community-based organizations with Family Medicine residents or other medical personnel in order to provide integrated care. This course has been offered in the spring semester for the last 11 years.

Spanish Counseling - Graduate Minor

The Minor in Spanish Counseling, offered through the Counseling and Educational Psychology department is open to graduate students who are enrolled in CEP’s Counseling, School Psychology, and Counseling Psychology programs, and to graduate students who are enrolled in Social Work and Marriage and Family Therapy programs. It was established in the interest of meeting the needs of bilingual counseling students who seek training in the provision of Spanish language mental health services.

In order to begin the Minor courses, students must currently be enrolled in a Mental Health program as described above. They must demonstrate intermediate level Spanish language skills as evidenced by the Spanish Placement Exam and an oral interview with the program coordinator. Advanced level in Spanish counseling skills is required for the completion of the Minor. If a student feels that he/she needs to improve his/her level of academic Spanish prior to completing the required course work, or if the program coordinator determines that it is necessary, the student has the option of taking additional Spanish courses through the Languages and Linguistics department. Students will be required to take Spanish language courses until they have satisfied this requirement. Please note that online courses will not fulfill this requirement.

Prerequisites

In order to begin the Minor courses, students must currently be enrolled in a Mental Health program as described above. They must demonstrate intermediate level Spanish language skills as evidenced by the Spanish Placement Exam and an oral interview with the program coordinator. Advanced level in Spanish counseling skills is required for the completion of the Minor. If a student feels that he/she needs to improve his/her level of academic Spanish prior to completing the required course work, or if the program coordinator determines that it is necessary, the student has the option of taking additional Spanish courses through the Languages and Linguistics department. Students will be required to take Spanish...
language courses until they have satisfied this requirement. Please note that online courses will not fulfill this requirement.

**How to Apply**

If you are interested in pursuing a minor in Spanish Counseling and, you should complete the attached application and return it to the program coordinator. You are advised to meet with the program coordinator before enrolling in relevant coursework. This form apprizes the CEP’s department of your intention to pursue the Minor. To declare the Minor with the Graduate School, the student should list all relevant completed coursework on the Program of Study form that is submitted to the Graduate School prior to graduating. The form needs to be signed by the student’s Academic Advisor, Dept. Head, Minor Faculty and Academic College Dean before submitting to the Graduate School. A Minor Faculty member is also required to sit on the committee for the student’s Final Exam. For Doctoral students, this includes orals, dissertation proposal and defense exams.

**Application:** Spanish Counseling Minor Application Form ([https://cep.nmsu.edu/academic-programs/Spanish-Counseling-Minor-Application-Form.pdf](https://cep.nmsu.edu/academic-programs/Spanish-Counseling-Minor-Application-Form.pdf))

**Program of Study**

Students will successfully complete 9 credits of coursework specific to this program of study in order to obtain a Minor in Spanish Counseling. Courses will be taught by culturally competent faculty, adjunct professors, or community mental health professionals in the aforementioned disciplines. Students will choose one course from each of the following components: 1) Counseling language development, 2) Clinical experience, and 3) Sociocultural experiences.

**Total Credits** 9

**Component #1: Counseling Language Development**

CEPY 6220 Spanish for Mental Health Professionals This course will help students acquire the necessary Spanish language skills needed to function as Spanish-speaking mental health professionals. The course will cover psychological terminology, concepts, and theories in Spanish. Examination of the professional roles of bilingual mental health professionals and their roles within Latina/o and underserved communities will also be addressed in this course.

CEPY 5230 Counseling Theory and Technique This course will assist students in learning and practicing basic, culturally-appropriate micro counseling skills in Spanish through individual, dyad, and small group participation.

**Component #2: Clinical Experience**

CEPY 5997 Special Research Programs/ CEPY 6996 Selected Topics This course will require students to spend a minimum of 6 hours per week at a bilingual site, providing counseling, assessment, or supervision services within a variety of clinical settings that serve Spanish-speaking populations. The Minor coordinator must approve all placements. This course will also integrate a Spanish-speaking student process group for bilingual counseling students. In this group, students will have the opportunity to develop bilingual multicultural counseling competencies. Students may also present clinical cases, theoretical perspectives, interventions or techniques in Spanish and receive feedback and support from other bilingual members. A summer semester immersion experience in providing counseling services in Spanish in a Latin American and/or primarily Spanish-speaking country may be substituted for this experience.

Students have the option of completing their clinical hours for this course over 2 semesters if so desired. The course requires an additional 6 clinical hours/week (if taken in one semester) or 3 clinical hours/week (if class is taken over the course of two semesters).

**Note:** This course is not to replace required practicum or internship experiences necessary for degree completion. Students are allowed to count hours they are accruing for their internship and/or practicum as long as they are (1) enrolled in both courses [598/698 and either 578/675 or 580/684] (2) are meeting the requirements for the 598/698 course [i.e. attending class meetings, etc.] and (3) a separate log is kept documenting work with Spanish speaking clients; this log also has to be signed by both 598/698 instructor and site supervisor.

CEPY 6590 Behavioral Health Practicum This course will provide students the opportunity to participate in a supervised service-learning experience within community-based, interdisciplinary, primary care settings that serve medically underserved and high-risk groups. Students will each write and present a case study in Spanish regarding a Spanish-speaking client; this log also has to be signed by both 598/698 instructor and site supervisor.

CEPY 5996 Special Topics This course will allow students to develop and practice skills in Spanish relevant to working with children and families in the child welfare system with a focus on the child protection process. Students will receive bilingual supervision regarding various topics such as training in Motivational Interviewing and discussion of Spanish-speaking clients from their practicum experience.

SOWK 5996 Special Topics This course will allow students to develop and practice skills in Spanish relevant to working with children and families in the child welfare system with a focus on the child protection process.

FCST 525 Supervised Clinical Practice This course offers supervised clinical experience in Marriage and Family Therapy.

**Component #3: Sociocultural Experiences**

SPAN 547 Advanced Hispanic Film/SPAN 548 Advanced U.S.-Hispanic Film Advanced study of major films from Spain and Spanish-America and/or by Hispanics of the U.S.

SPAN 557 Advanced Study in Chicano Literature Study of all genres of Chicano literature.
Information for Prospective Students
The Master of Arts (M.A.) program in Speech-Language Pathology: Communication Disorders at New Mexico State University is accredited by the Council on Academic Accreditation (CAA) in Speech-Language Pathology of the American Speech-Language-Hearing Association (ASHA) (http://www.asha.org/), 2200 Research Boulevard, #310, Rockville, MD 20850, 800-498-2071 or 301-296-5700.

Please apply to our graduate program in Communication Disorders via the NMSU Graduate School (https://apply.nmsu.edu/apply/). The deadline for applications is February 1st of each year.

Bachelor Degree(s)
Communication Disorders - Bachelor of Science in Education (p. 1087)

Master Degree(s)
Communication Disorders - Master of Arts (p. 1089)

Interim Department Head: Dr. Heike Lehnert-LeHouillier

Professors: Dr. Boutsen; Associate Professors: Dr. Lehnert-LeHouillier; Assistant Professors: Dr. Shivabasappa, Dr. Wilson; College Assistant Professors: Mrs. Muñoz, Mrs. Lopez, Mrs. Verdoza, Emeritus Professors: Dr. Farmer, Dr. Valdez

Dr. Boutsen, Ph.D. (Southern Illinois University): motor speech disorders, voice disorders, fluency disorders, anatomy and physiology of speech mechanisms;

Dr. Lehnert-Lehouillier, Ph.D. (State University of New York at Buffalo): speech science, speech sound disorders, phonetics, autism spectrum disorders;

Mrs. Lopez, M.A., (New Mexico State University): pediatric speech and language disorders;

Mrs. Muñoz, M.A. (New Mexico State University): clinical education, dysphagia, adult neurogenic disorders;

Dr. Shivabasappa, Ph.D. (All India Institute of Speech and Hearing, University of Mysore): pediatriic language disorders, bilingualism, literacy

Mrs. Verdoza, M.A. (New Mexico State University): pediatric speech and language disorders, pediatric feeding and swallowing disorders

Dr. Wilson, Ph.D. (University of New Mexico): pediatric language disorders, transcranial direct current stimulation, autism spectrum disorders;

*All courses outlined in the Program of Study have to be taken face-to-face. However, Spanish Counseling Minor Committee will review individual requests for any exceptions to this requirement.

Communication Disorders
General Information
The NMSU Program in Communication Disorders offers an undergraduate program leading to a Bachelor of Science degree and a graduate program leading to a Master’s degree in Communication Disorders. The Master’s degree in Communication Disorders satisfies the educational requirements to obtain state licensure and national certification in Speech-Language Pathology.

Further information regarding the fields of Audiology and Speech-Language Pathology may be obtained on the American Speech-Language-Hearing Association (http://www.asha.org) website. Information about the NM license requirements can be found on the website of the New Mexico Regulations & Licensing Department (http://www.rld.state.nm.us/boards/speech_language_pathology_audiology_and_hearing_aid Dispensing_practices.aspx).

Undergraduate Information
The NMSU undergraduate program in Communication Disorders offers a pre-professional Bachelor of Science degree that prepares students for graduate work in Speech-Language Pathology or Audiology. Students who complete a Bachelor’s degree in Communication Disorders may either go on to complete a Master’s degree in Speech-Language Pathology, complete a doctoral degree in Audiology, or complete additional supervised clinical hours to become a Speech-Language Pathology Assistant (SLPA) or an Apprentice of Speech Language Pathology (ASL). Currently, the State of New Mexico does not license Speech-Language Pathology Assistants, but it may do so in the future.

Students who have declared a major in Communication Disorders are required to successfully complete a minimum of 120 credits for the Bachelor of Science degree in Communication Disorders. This includes a minimum of 48 upper division credits as well as a minimum of 9 credits from an approved list of electives.

Graduate Information
The Department of Communication Disorders at NMSU offers a Master’s degree in Speech-Language Pathology which meets the educational requirements for certification by the American Speech-Language-Hearing Association (ASHA) (https://www.asha.org/#https://wwwashaorg/) as well as the educational requirements for state licensure. Students entering the graduate program with an undergraduate major in Communication Disorders can expect to complete the program in two years (including the summer between the two years) and be awarded a Masters of Arts in Communication Disorders with a specialization in Speech-Language Pathology. To complete this course of study, each student is expected to meet the program’s academic and clinical competency criteria which are aligned with the requirements of state and national certifying bodies for licensure and clinical certification. The graduate program for students without a background in Communication Disorders is generally one year longer because one year of leveling is required.

*Further information can be found on the website of the American Speech-Language-Hearing Association (http://www.asha.org) or by the Council on Academic Accreditation (CAA) in Speech-Language Pathology of the American Speech-Language-Hearing Association (ASHA) (http://www.asha.org/).
Sign Language Courses

SIGN 1110. American Sign Language I
3 Credits (3)
American Sign Language I is an introductory level language course in the language of the American Deaf Culture. Content includes ASL vocabulary and conversational skills; linguistic features of ASL; and skills in narrative/storytelling. In-class activities, comprehension and expressive examinations, narrative and storytelling assignments in addition to semester projects are venues for students to demonstrate their learning. In addition, Deaf Culture and Deaf Community issues are addressed. May be repeated up to 3 credits.

Learning Outcomes
1. Engage in basic conversations using ASL, such as introducing oneself, exchanging personnel information, and talking about one’s surroundings. Demonstrate the use of grammatical structures, including spatial referencing, use of classifiers, role shifting, ASL syntax, and non-manual signals (NMS). Demonstrate clear sign production using an understanding of sign parameters: handshapes, movement, location, palm orientation, and NMS in targeted lexicon. Demonstrate the use of basic ASL vocabulary and expressions necessary for conversations about real-life situations. Evaluate and provide feedback concerning peers’ and one’s own uses of ASL. Develop culturally-appropriate behaviors and conversation strategies within a variety of contexts for interacting with people who are Deaf. Demonstrate effective use of comprehension and expressive ASL skills through narrative and/or storytelling activities. Describe issues of the American Deaf community and Culture.

SIGN 1120. American Sign Language II
3 Credits (3)
American Sign Language II is a continuation course that builds on concepts and skills developed in American Sign Language I. Students gain further exposure to ASL structure and grammar, and Deaf Culture and the Deaf community. Emphasis is on increasing students’ ability to comprehend other signers and express themselves with more elaboration when conversing or presenting in ASL. May be repeated up to 3 credits.

Prerequisite: SIGN 1110 or consent of instructor.

Learning Outcomes
1. Further develop basic conversational skills in ASL, taking on more complicated topics. Apply knowledge of ASL grammar, including classifiers, spatial referencing and agreement, role shifting, and non-manual markers. Develop ASL vocabulary, fingerspelling, number, narrative and storytelling skills. Evaluate and provide feedback concerning peers’ and one’s own uses of ASL. Demonstrate effective use of comprehension and expressive ASL skills through conversation, discussion, narrative and/or storytelling activities. Demonstrate knowledge and appreciation of the American Deaf community and ASL. Through first-hand experience in the American Deaf community and ASL, relate and reflect on perspectives of the community.

SIGN 2110. American Sign Language III
3 Credits (3)
This is an intermediate level course in American Sign Language (ASL). Expected areas of intermediate skill and knowledge development include: language comprehension and production, conversational use, narratives, ASL language features and further knowledge of and interaction with Deaf culture and the Deaf community. May be repeated up to 3 credits.

Prerequisite: SIGN 1120.

Learning Outcomes
1. Demonstrate intermediate ASL vocabulary, conversation and narrative/storytelling skills. Demonstrate fundamental ASL features including visual/spatial orientation, constructed dialogue and action, spatial referencing, classifiers, non-manual behaviors and syntax/word order. Demonstrate appropriate use of cultural behaviors and conversational strategies. Translate written and spoken English to ASL and vice versa. Self-evaluate and provide feedback to peers concerning ASL usage. Examine the culture of the American Deaf community through engaging in community activities and its language.

Speech & Hearing Science Courses

SPHS 2110. Introduction to Communication Disorders
3 Credits (3)
This introductory course provides an overview of common speech, language, and hearing disorders in children and adults including etiologies, characteristics, prevention, identification, assessment and intervention. The course provides an overview of the field of speech-language pathology and audiology. May be repeated up to 3 credits.

Learning Outcomes
1. Describe normal human communication anatomy and processes as they relate to speech and language production. Describe the nature of speech, language, and hearing disorders and differences. Describe the principles of prevention, assessment and intervention of communication disorders. List requirements for licensure, certification, and other relevant professional credentials. Exhibit basic knowledge of contemporary professional issues in speech-language pathology. List possible psychosocial implications of various communication disorders. Identify cultural, educational, legal, and ethical issues related to communication disorders. Describe the scope of practice of speech-language pathologists and audiologists.

SPHS 4510. Phonetics
3 Credits (3)
The science of phonetics, including work with the International Phonetic Alphabet. May be repeated up to 3 credits.

Prerequisite: C- or better in SPHS 2110; Cumulative GPA of 3.2 or better.

Learning Outcomes
1. Students will learn and be able to describe the linguistic and articulatory characteristics of speech sounds. Students will be able to identify, recall and extrapolate information about the biological bases of speech sound production.
SPHS 4520. Audiology
3 Credits (3)
Anatomy and physiology of the auditory system, bases of auditory disorders, and basic audiometric procedures. Restricted to: C DS, C D majors. May be repeated up to 3 credits.
Prerequisite: B or better in SPHS 2110, and a minimum of 3.2 GPA.
Learning Outcomes
1. Describe the properties of sound. Define the terms used to describe hearing and hearing loss. Describe the anatomy and physiology of the auditory system at an introductory level. Identify basic audiometric procedures. Interpret basic audiometric test findings. Recognize common auditory (and related) disorders. Discuss basic approaches to managing auditory (and related) disorders.

SPHS 4610. Language Acquisition
3 Credits (3)
This course introduces students to the study of the development of language, speech, and communication. Includes language sampling. May be repeated up to 3 credits.
Prerequisite: C- or better in SPHS 2110; Cumulative GPA of 3.2 or higher.
Learning Outcomes
1. Describe the development of phonology, semantics, morphology, syntax, and pragmatics. Describe biological, cognitive, social aspects of language acquisition. Describe the current methods for studying language acquisition and critically evaluate their contributions to our understanding of how children learn language. Describe and critically evaluate current theories of language acquisition in relation to the available data and to each other. Apply basic observational methods to draw conclusions about a child’s level of language knowledge.

SPHS 4620. Speech and Hearing Science
3 Credits (3)
Basic concepts and theories in acoustics, speech production and speech perception. Includes laboratory experience with instrumental measurement and analysis of speech systems. May be repeated up to 3 credits.
Prerequisite: C- or better in SPHS 2110, SPHS 4510, SPHS 4520; and minimum 3.2 GPA.
Learning Outcomes
1. Students will learn basic acoustic physics and be able to describe simple harmonic motion, complex waveforms, and resonances. Students will learn about the acoustic consequences of the three articulatory parameters tongue height, tongue advancement, and lip rounding during vowel production in order to be able to understand the acoustic properties of vowels and diphthong acoustics. Students will learn the acoustic properties of English consonants including stops, fricatives, affricates, liquids, glides, and nasals. Students will learn about speech perception, including categorical perception, theories of speech perception as well as some basic psychoacoustic properties such as the decibel scale.

SPHS 4710. Speech and Language Disorders
3 Credits (3)
Bases, symptoms, etiologies, and clinical management of issues related to disorders of articulation, phonology, voice and resonance, and fluency. Restricted to: C DS, C D majors. May be repeated up to 3 credits.
Prerequisite: B or better in SPHS 2110, SPHS 4510, SPHS 4520, SPHS 4620, and SPHS 4610; and minimum 3.2 GPA.
Learning Outcomes
1. Demonstrate knowledge of the nature of speech and language disorders including the etiologies, characteristics, anatomical/physiological, acoustic, psychological, developmental, and linguistic and cultural correlates. Demonstrate knowledge of the principles and methods of prevention, assessment, and intervention for people with communication disorders.

SPHS 4720. Anatomy and Physiology of Speech Mechanisms
3 Credits (3)
Structure and function of systems underlying human speech sound production and processing, including respiratory, phonatory, and articulatory components. May be repeated up to 3 credits.
Prerequisite: C- or better in SPHS 2110, SPHS 4510, SPHS 4520, SPHS 4620, and SPHS 4610; and minimum 3.2 GPA.
Learning Outcomes
1. Students will learn and be able to identify respiratory anatomy important for speech production. Students will be able to identify, recall and extrapolate information about respiratory physiology. Students will learn and be able to identify laryngeal anatomy important for speech production. Students will be able to identify, recall and name important physiological mechanisms for controlling vocal function. Students will learn and be able to identify supraglottal anatomy important for speech production. Students will be able to identify, recall and name physiologic events about resonance and articulation.

SPHS 4810. Clinical Methods and Procedures
3 Credits (3)
Guidelines and procedures associated with the clinical and supervisory processes. Provide opportunities to complete the supervised clinical observation requirement for participation in clinical practicum. Restricted to: C DS, C D majors. May be repeated up to 3 credits.
Prerequisite: B or better in SPHS 2110, SPHS 4510, SPHS 4520, SPHS 4620, SPHS 4610; and minimum 3.2 GPA.
Learning Outcomes
1. Demonstrate basic use of professional terminology in the area of Speech-Language Pathology. Demonstrate knowledge of principles and techniques of the observation of nonverbal and verbal behavior of clients and clinicians using oral and written reporting, as well as in-class discussions. Complete twenty-five clock hours of supervised clinical observation of speech, language, and hearing services.
**SPHS 4820. Neural Bases of Communication Disorders**  
3 Credits (3)  
Study of the neuroanatomy and neurophysiology of communication and communication disorders. Includes review of the central nervous system and peripheral nervous system relationship to speech motor control, language, and hearing. Restricted to: CDS, CD majors. May be repeated up to 3 credits.  
**Prerequisite:** B or better in SPHS 2110, SPHS 4510, SPHS 4520, SPHS 4610, SPHS 4620, SPHS 4710, SPHS 4720, SPHS 4810 and minimum 3.2 GPA.  
**Learning Outcomes**  
1. Demonstrate knowledge of the gross anatomy and physiology of the central, peripheral, autonomic nervous systems. Understand the clinical manifestations associated with injury/disease to a given regions/systems within the nervous system.

**SPHS 4830. Aural Rehabilitation**  
3 Credits (3)  
Overview of hearing aids and amplification devices including cochlear implants. Review of the bases and psychosocial aspects of hearing loss. Clinical management of hearing loss consistent with ASHA’s scope of practice for SLPs. Restricted to: CDS, CD majors. May be repeated up to 3 credits.  
**Prerequisite:** B or better in SPHS 2110, SPHS 4510, SPHS 4520, SPHS 4620, SPHS 4610, SPHS 4710, SPHS 4720, SPHS 4810; and minimum 3.2 GPA.  
**Learning Outcomes**  
1. Define and use the appropriate terminology when discussing hard of hearing and deafness. Describe and explain the effects of hearing impairment on speech-language acquisition and auditory/speech perception. Describe the effects of hearing impairment on various aspects of life (e.g., cognitive, educational, occupational, and psychosocial aspects in all age ranges). Identify the communication needs and develop a basic understanding of common intervention options including communication strategies, auditory training, speech reading, hearing aids, assistive devices, and cochlear implantation. Be acquainted with the relevant public laws.

**SPHS 504. Speech and Language Disorders**  
3 Credits (3)  
Bases, symptoms, etiologies, and clinical management of issues related to disorders of articulation, phonology, voice and resonance, and fluency. Restricted to: CDS, CD majors. May be repeated up to 3 credits.  
**Prerequisite:** B or better in SPHS 2110, SPHS 4510, SPHS 4520, SPHS 4620, and SPHS 4610; and minimum 3.2 GPA.  
**Learning Outcomes**  
1. Demonstrate knowledge of testing statistics and basic concepts in psychometric assessment. Formulate, implement and summarize one complete successful and efficient assessments: including pre-planning meeting, interview design and implementation, administration of instruments, analysis and integration of results and report writing. Review, summarize and critique one assessment tool for design, use, interpretation and cultural/linguistic inclusivity to classmates. Given case study information, students will be able to: choose an appropriate instrument from assessment tools reviewed; develop an assessment plan for a client; write a report and develop treatment goals.

**SPHS 5130. Pediatric Language and Disorders**  
3 Credits (3)  
Normal communication development of neonates, infants, toddlers, and preschoolers; etiologies, and treatment of cognitive, linguistic and social elements of communication problems in family systems. Restricted to: CDS, CD majors. May be repeated up to 3 credits.  
**Prerequisite:** Minimum grade of B and an overall GPA of 3.0 or higher.  
**Learning Outcomes**  
1. Demonstrate a working knowledge of the major theories of language acquisition and theoretical perspectives of disorders. Demonstrate an understanding of the aspects related to dialect and second language acquisition of English. Demonstrate knowledge of the core principles of language assessment for the pediatric population (zero-five year old). Summarize and interpret content material relating to pediatric language development/disorders.

**SPHS 5120. Assessment of Communication Disorders**  
3 Credits (3)  
Diagnostic theories and management of communication disorders using standardized and descriptive methodology. Includes the practice of interviewing, testing, and oral and written reporting. Restricted to: CDS, CD majors. May be repeated up to 3 credits.  
**Prerequisite:** A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.  
**Learning Outcomes**  
1. Demonstrate knowledge of the concepts of research ethics and integrity including protection of human subjects. Demonstrate comprehension of concepts of evidence-based practice. Locate, use, and critically evaluate library and online sources that support the investigation of research questions pertinent to speech-language and hearing science. Interpret basic single variable and two-variable statistical procedures appropriate for single and group designs. Read, abstract, and critically evaluate pertinent research.
SPHS 5140. Speech Sound Disorders
3 Credits (3)
Advanced study of the symptoms, etiologies, assessment, and clinical management of speech sound disorders including those due to cleft palate and disorders of resonance. May be repeated up to 3 credits.
Prerequisite: A minimum grade of B in all graduate courses and a minimum overall GPA of 3.0 is required.

Learning Outcomes
1. Course Goals – Fulfillment of the following Standards of the American Speech-Language-Hearing Association (ASHA): IV-B, IV-C, IB-D, and IV-F: Students will be able to explain the classification of speech sounds based on different phonological theories, and they will be able to phonetically transcribe standard and non-standard speech. Summative Assessment: Test I (IV-B, IV-C) Students will be able to describe the impact of anatomical, motor, sensory, cognitive-linguistic, and social factors in speech development, and developmental profiles associated with developmental and syndromic conditions. Summative Assessment: Test 2 (IV-C) Students will be able to identify appropriate assessment tools and practice their use for the diagnosis of speech sound disorders. Formative Assessment: Project 1 (IV-D) Students will learn to research different treatment approaches for the successful remediation of speech sound disorders and to integrate research into evidence-based clinical practice. Formative Assessment: Research Article Presentation Treatment Presentation (IV-F) Students will familiarize themselves with current research in the area of speech sound disorders as well as foundational original research papers in the field. Formative Assessment: Research Article Presentation (IV-F)

SPHS 5210. School Age Language and Disorders
3 Credits (3)
Normal communication learning development of elementary, secondary, and postsecondary students; etiologies, diagnosis, and treatment of interpersonal communication and language-based academic disorders. Restricted to: C DS,C D majors. May be repeated up to 3 credits.
Prerequisite: A minimum grade of B in all graduate courses and an overall GPA of 3.0 or higher.

Learning Outcomes
1. Demonstrate a working knowledge of legislation governing service provision in the schools (IDEIA, NCLB) and implementation practices (IEP, five-hundred-four plan, RtI). Demonstrate knowledge of normal language development of school-age children. Demonstrate understanding of language disorders relevant to school-age children. Demonstrate knowledge of evidence-based intervention methodologies for the treatment of language disorders in the school-aged population.

SPHS 5220. Aphasia & Cognitive Linguistic Disorders
3 Credits (3)
Etiologies, diagnosis, assessment, and treatment of adult aphasia and cognitive-linguistic disorders. Restricted to: C DS,C D majors. May be repeated up to 3 credits.
Prerequisite: A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

Learning Outcomes
1. Describe the nature, prevention, assessment, and intervention of aphasia and cognitive communication disorders in adults. Describe cognitive and social aspects of communication, psychological, neurologic, and cultural correlates, as well as other types of diversity (i.e., age, gender, etc.) as it relates to aphasia in adults. Describe the nature of normal cognitive processing, including attention, memory. Apply theory of cognitive and social aspects of communication, psychological, neurologic, and cultural correlates, as well as other types of diversity (i.e., age, gender, etc.) as it relates to aphasia and cognitive communication disorders. Identify ethical issues related to treatment regarding aphasia and cognitive communication disorders.

SPHS 5230. Fluency Disorders
3 Credits (3)
Speech fluency development and the disorders of stuttering, cluttering, and neurogenic dysfluency. Restricted to: C DS,C D majors.
Prerequisite: A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

Learning Outcomes
1. Define/describe terminology and nomenclature associated with the study of human fluency disorders. Identify constitutional and environmental conditions that contribute to fluency disorders. Propose methods of assessing and treating the affective, behavioral and cognitive aspects of fluency disorders across the lifespan, including the use of augmentative devices for fluency. Be able to explain the role of counseling in treating fluency disorders and how that role changes with the age of the client. Be able to explain the role of counseling in treating fluency disorders and how that role changes with the age of the client.

SPHS 5310. Introduction to Augmentative and Alternative Communication
3 Credits (3)
Assessment and intervention for children and adults with developmental disabilities; Alternative communication strategies and systems for individuals with severe speech and/or language impairments. Restricted to: C DS,C D majors. May be repeated up to 3 credits.
Prerequisite: Graduate standing; overall GPA of 3.0.

Learning Outcomes
1. Understand and consider physical and psycho-social, linguistic, and cognitive characteristics of AAC users. Describe assessment methods to determine the best fit of AAC systems to meet the needs of AAC users. Understand how to provide training in the use of various AAC systems for AAC users, their families, and caregivers and educators.
SPHS 5320. Cognitive-Linguistic Communication Disorders
3 Credits (3)
Topics include attention, memory, executive function, and underlying neuropathologies, with emphasis on assessment, diagnosis, prognosis, treatment and recovery processes in cognitive communication disorders related to traumatic brain injury, dementia, and right hemisphere brain damage. Restricted to: C DS,C D majors. May be repeated up to 3 credits. 
Prerequisite: A course grade of B or higher in all graduate courses and an overall GPA of 3.0.

Learning Outcomes
1. Compare, contrast, and differentiate neural bases and etiologies for TBI, RHD, and Dementia. Assess deficits in cognitive-linguistic communicative competence. Recommend and design appropriate management plans for individuals with cognitive-linguistic impairments. Recognize the significance of culture, age, and ethnicity on the assessment and treatment of cognitive-linguistic communication disorders. Reflect on and prepare clients and families for the impact of cognitive-linguistic impairments and re-entry to school, work, family, and/or the community.

SPHS 5330. Dysphagia
3 Credits (3)
Study of the anatomy and physiology of swallowing and upper aerodigestive systems. Review of the bases and etiologies of child and adult swallowing disorders, including diagnosis, assessment, and treatment. Restricted to: C DS,C D majors. May be repeated up to 3 credits. 
Prerequisite: A course grade of B- or higher in all graduate courses and an overall GPA of 3.0.

Learning Outcomes

SPHS 5340. Motor Speech Disorders
3 Credits (3)
Advanced studies of dysfunction of the nervous system that affect speech. Includes evaluation, diagnosis, and treatment of speech apraxias and dysarthrias. Restricted to: C DS,C D majors. May be repeated up to 3 credits. 
Prerequisite: A course grade of B or higher in all graduate courses and an overall GPA of 3.0.

Learning Outcomes
1. Recognize evaluate motor speech disorders - differentiating between flaccid, spastic, unilateral upper motor neuron, ataxic, hypokinetic, hyperkinetic, mixed dysarthria, as well as apraxia. Identify the etiology of the various motor speech disorders. Demonstrate knowledge of methods to assess the various subsystems (resonance, articulation, phonation, and respiration) and determine relative contribution of each system to the motor speech disorder. Demonstrate knowledge of various interventions for clients with various motor speech disorders.

SPHS 5350. Voice Disorders/Head and Neck Anomalies
3 Credits (3)
Advanced studies of anatomy and physiology of the vocal tract with emphasis on diagnosis, assessment, and treatment of voice disorders, laryngectomy, cleft palate, and other oral-facial anomalies. Restricted to: C DS,C D majors. May be repeated up to 3 credits. 
Prerequisite: A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

Learning Outcomes
1. Recognize and describe relevant anatomy and physiology of normal voice production, including laryngeal and respiratory anatomy and physiology Identify and discuss structural, neurologically-based, and functional voice disorders. Demonstrate knowledge of approaches to assess voice disorders, including objective and subjective measures. Explain and demonstrate selected intervention techniques for voice disorders.

SPHS 5410. Professional Issues and Multicultural Practices in Communication Disorders
3 Credits (3)
This course includes a range of topics pertinent to students entering professional practice as speech-language pathologists including current legal, cultural, ethical, and clinical service provision issues. Restricted to: C DS,C D majors. May be repeated up to 3 credits. 
Prerequisite: Minimum of 3.0 GPA.

Learning Outcomes
1. Describe current issues in professionalism, ethics, and liability in the profession of Speech-Language Pathology. Understand setting-specific employment issues, including working with culturally and linguistically diverse populations. Understand the procedures necessary for obtaining licensure and certification by state and national agencies, as well as maintenance requirements for licensure and certification in Speech-Language Pathology.

SPHS 5510. Advanced Spanish Morpho-Syntax for Education Professionals
3 Credits (3)
This class has been designed for Heritage Speakers of Spanish who work in educational settings. It will cover the essential linguistic theory and fundamental structures of the Spanish language. This includes, but is not limited to, verb morphology, morphosyntactic and syntactic structures. The main goal of this course is to determine what usages fall within the norms of an individual's speech community, or if there are elements that fall outside those norms. Students have to be fluent in Spanish as course will be conducted in Spanish.

SPHS 5520. Best Practices in Bilingual/Multicultural Assessment for Practitioners
3 Credits (3)
The purpose of this course is to provide future speech-language pathologists, educational diagnosticians and special educators with a foundation for evaluating the linguistic, cognitive and academic skills of students from any cultural linguistic background. The course covers a review of the literature on best practices for working with interpreters during assessments. Practitioners will be expected to gather qualitative information about cultural/linguistic and educational histories of school-age children and integrate those results with the results of standardized tests. Restricted to: C DS,C D majors. May be repeated up to 3 credits.
SPHS 5988. Clinical Education
1 Credit (1)
This course is specifically designed to target the knowledge base necessary to initiate clinical practicum in the CD Program. The learning objectives are based upon the Council of Academic Accreditation in Audiology and Speech-language Pathology (CAA) standards and knowledge areas. These learning outcomes are developed to assist students in clinical practicum and are specific to the services provided to clients of the NMSU Edgar R. Garrett Speech and Hearing Center. Restricted to: C DS,C D majors. May be repeated up to 2 credits.
Corequisite: SPHS 5990.
Learning Outcomes
1. Demonstrate an understanding of successful strategies to work with families and clients from various clinical settings/cultural backgrounds. Demonstrate an understanding of ethical and confidential service delivery. Identify characteristics of properly written clinical reports. Demonstrate skill in oral and written or other forms of communication sufficient for entry into professional practice. Demonstrate knowledge of entry level and advanced certifications, licensure, and other relevant professional credentials.

SPHS 5989. Externship in Communication Disorders
3-9 Credits (3-9)
This course is designed to provide opportunities for the developing clinician to provide treatment to and evaluations for clients in a full term externship experience under the supervision of a licensed SLP. Restricted to: C DS majors. May be repeated up to 9 credits.
Learning Outcomes
1. Various

SPHS 5990. Practicum in Speech-Language Pathology
1-4 Credits (1-4)
Supervised clinical practice in a variety of speech, language, and hearing disorders. Practicum includes diagnostic, treatment, and management work through direct patient/client contact. Attendance at weekly clinical staff meetings is required. Restricted to: C DS,C D majors. May be repeated up to 15 credits.
Prerequisite: Good standing in the graduate school; a course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.
Learning Outcomes
1. Various

SPHS 5996. Special Topics
1-9 Credits (1-9)
Individual and/or group study of special topics identified by subtitle. Restricted to: C DS majors. May be repeated up to 9 credits.
Prerequisite: Prior arrangement with faculty; a course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.
Learning Outcomes
1. Various

SPHS 5999. Master’s Thesis
1-15 Credits (1-15)
Thesis. May be repeated up to 88 credits.
Learning Outcomes
1. Various

Name: Dr. Heike Lehner-LeHouillier, Interim Department Head
Name: TBA, Administrative Assistant

Communication Disorders - Bachelor of Science in Education

The Communication Disorders curriculum provides specialized preparation for students who plan to enter a graduate program in speech-language pathology or audiology. Students supplement their academic study of typical communication development, communication disorders, and clinical management with observation of the clinical experience in the department’s Edgar R. Garrett Speech and Hearing Center and/or via alternative clinical education such as virtual patients. Students must maintain a B or better in all CD courses and maintain a cumulative GPA of 3.2 or higher, to remain in the program.

The undergraduate program provides approximately one-half of the academic requirements needed for certification by the American Speech-Language-Hearing Association and licensure by the New Mexico Regulations & Licensing Department. Certification and licensure at state and national levels require completion of the master’s degree. Details regarding certification are available from the American Speech-Language-Hearing Association (http://www.asha.org/certification/) (ASHA), and the New Mexico Regulations & Licensing Department (http://www.rld.state.nm.us/boards/speech_language_pathology_audiology_and_hearing_aid_dispensing_practices.aspx).

Professional employment opportunities for speech-language pathologists and audiologists are numerous within settings such as school systems, community clinics, medical centers, hospitals, private practice, residential programs, and schools for individuals with disabilities.

Program Requirements

Required coursework (120 credits; minimum 48 upper-division credits)

Electives to meet the 120 minimum credit hours for this degree can either come from any minor that a student chooses to pursue or any other elective courses not counting elsewhere towards the degree. Recommended minors for this degree are Linguistics, Spanish, or CEP.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

**Total Credits**

120

1. MATH 1220G College Algebra is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G first.

2. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

3. SPAN 1110 Spanish I/SPAN 1120 Spanish II or an advanced Spanish course

4. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

**A Suggested Plan of Study for Students**

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

---

1 These courses may have prerequisites and/or co-requisites, and it is the students' responsibility for checking and fulfilling all those requirements.
2 See the General Education (p. 88) section of the catalog for a full list of courses.
3 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

### Communication Disorders - Master of Arts

Students entering the graduate program with an undergraduate major in Communication Disorders can expect to complete the program in two years and be awarded a Masters of Arts in Communication Disorders with a specialization in Speech-Language Pathology. The graduate program for students without a Communication Disorders background is generally one year longer because one year of leveling is required. Enrollment in graduate courses in Communication Disorders is limited to students who have been accepted into the graduate program in Communication Disorders. To complete this course of study, each student is expected to meet the program's academic and clinical competency criteria which are aligned with the requirements of state and national certifying bodies for licensure and clinical certification. Details regarding certification are available from the American Speech-Language-Hearing Association (http://www.asha.org/certification/) (ASHA), and the New Mexico Regulations & Licensing Department (http://www.rld.state.nm.us/boards/speech_language_pathology_audiology_and_hearing_aid Dispensing_practices.aspx).

The Master of Arts education program in speech-language pathology at New Mexico State University is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association (ASHA), 2200 Research Boulevard, #310, Rockville, MD 20850, 800-498-2071 or 301-296-5700.
Program Requirements
The traditional Master's degree plan requires a minimum of 62 graduate credit hours and the completion of at least 400 clinical hours.

Leveling Program
The Leveling Program is designed for students with an undergraduate degree other than Communication Disorders. The courses to be taken during the leveling year are listed below. In addition to these courses, students who did not complete at least one 3 credit hour course in all of the following subjects: Biology, Physics or Chemistry, and Statistics prior to starting the leveling program, should plan on completing these courses as well.

Kinesiology

Undergraduate Program Information
The Department of Kinesiology provides students with the education necessary to pursue careers in allied health sciences (Athletic Training, Medical School, Physician’s Assistant, Physical and Occupational Therapy, Chiropractic Medicine, Nursing, Ultrasound, Radiography; etc.) Physical Education, Dance and a variety of careers in the fitness and wellness industry. Details of the degree programs and their respective concentrations are provided below.

The department also offers minors in Dance and Exercise Science.

Graduate Program Information
The PhD in Kinesiology encompasses opportunities for focused study in physiological, biomechanical, psychological, and pedagogical domains of human movement. Program emphasis is placed on the acquisition of skills needed for high quality research and innovative teaching. Students are expected to become proficient in research methods within their respective areas of interests. The program prepares students for postdoctoral or faculty positions in higher education, or positions in applied sport and clinical settings. Students are expected to work with specific faculty members to explore interests in Exercise Physiology, Biomechanics, Strength & Conditioning, Sport Psychology, Motor Behavior, Aging, Physical Education, and Dance.

Admission
The Department of Kinesiology offers a Doctorate of Philosophy (PhD) in Kinesiology. To maximize consideration for admittance (for a recommended August start date), candidates should submit applications by January 15 of that same year.

Students are admitted to graduate study on the basis of their potential for achievement in research, scholarship and teaching. The most promising applicants will be accepted. Because the number of students that the department can successfully accommodate is limited, it will not always be possible to admit all qualified applicants. The admissions committee will consider any material that a candidate for admission wishes to present. Application forms and instructions are available here: http://prospective.nmsu.edu/graduate/apply/index.html. The minimum application consists of the following:

1. A completed Graduate School admission application.
2. Complete transcripts of all college work, reflecting a bachelors and a masters degree - preferred (or 30 hours of graduate work) in a related field of study, and a minimum cumulative GPA of 3.0 in prior degree programs.
3. Scores on the Graduate Record Examination (GRE) (there is no minimum requirement; however, scores will be considered during the admission process).
4. Three letters of recommendation from professors, employers or others who are qualified to evaluate your potential for successful graduate work.
5. A curriculum vitae or resume.
6. A personal statement explaining how graduate work at NMSU fits your educational and career goals.
7. A reference to the specific member whose work is of particular interest to you.
8. A letter of support from at least one faculty member from the Department of Kinesiology and Dance indicating an interest in guiding you through your program of studies.

Degrees for the Department
Bachelor Degree(s)
Dance (DanceSport) - Bachelor of Arts in Dance (p. 1114)
Dance (Contemporary Dance) - Bachelor of Arts in Dance (p. 1117)
Kinesiology (Exercise Science) - Bachelor of Science in Kinesiology
(p. 1120)

Kinesiology (Performance Psychology) - Bachelor of Science in Kinesiology
(p. 1122)

Kinesiology (Physical Education) - Bachelor of Science in Kinesiology
(p. 1124)

**Master Degree(s)**

Athletic Training - Master of Science (p. 1127)

**Doctoral Degree(s)**

Kinesiology - Doctor of Philosophy (p. 1128)

**Minors for the Department**

Dance - Undergraduate Minor (p. 1126)

Exercise Science - Undergraduate Minor (p. 1127)

**Faculty and Administration**

**Department Head:** Phillip G. Post, PhD

**Graduate Faculty**

- Christopher A. Aiken, PhD, Kinesiology Program Director (Assistant Professor - Motor Behavior, Louisiana State University)
- Hillary Yoder, PhD, (Assistant Professor - Exercise Physiology, The University of Alabama)
- Jemin Kim, PhD (Assistant Professor - Biomechanics, Texas Women's University)
- Sang-Rok Lee, PhD (Associate Professor - Exercise Physiology, Florida State University)
- Kimberly L. Oliver, PhD (Professor - Physical Education, Virginia Polytechnical Institute)
- Phillip G. Post, PhD (Professor - Sports Psychology, University of Tennessee)
- Peter Smoak, PhD (Assistant Professor - Exercise Physiology, University of Northern Colorado)
- Larissa True, PhD Graduate Program Coordinator, (Associate Professor - Motor Behavior, Michigan State University)

**Instructional Faculty**

- Raquel S. Aranda, MS, (College Assistant Professor - Physical Education, New Mexico State University)
- Michael Gregory, MA, Clinical Coordinator AT (College Instructor - Athletic Training, New Mexico State University)
- Shon Meyer, MS, (College Associate Professor - Kinesiology, University of Idaho)
- Kimberly O'Connell, MS, Athletic Training Program Director, (College Associate Professor - Athletic Training, California University of Pennsylvania)
- Amy Wright, MA, Dance Program Director (Visiting Assistant Professor - Dance - Sam Houston State University)

**Department Head:** Phillip G. Post, PhD

**Graduate Faculty**

- Christopher A. Aiken, PhD, Kinesiology Program Director (Assistant Professor - Motor Behavior, Louisiana State University)
- Hillary Yoder, PhD, (Assistant Professor - Exercise Physiology, The University of Alabama)
- Jemin Kim, PhD (Assistant Professor - Biomechanics, Texas Women's University)
- Sang-Rok Lee, PhD (Associate Professor - Exercise Physiology, Florida State University)
- Kimberly L. Oliver, PhD (Professor - Physical Education, Virginia Polytechnical Institute)
- Phillip G. Post, PhD (Professor - Sports Psychology, University of Tennessee)
- Peter Smoak, PhD (Assistant Professor - Exercise Physiology, University of Northern Colorado)
- Larissa True, PhD Graduate Program Coordinator, (Associate Professor - Motor Behavior, Michigan State University)

**Dance Courses**

**DANC 1106. Dance Appreciation**

3 Credits (3)

This course introduces the student to the diverse elements that make up the world of dance, including a broad historic overview, roles of the dancer, choreographer and audience, and the evolution of the major genres. Students will learn the fundamentals of dance technique, dance history, and a variety of dance aesthetics. Restricted to: Main campus only. May be repeated up to 3 credits.

**Learning Outcomes**

1. Explain a range of ideas about the place of dance in our society.
2. Identify and apply critical analysis while looking at significant dance works in a range of styles. Identify dance as an aesthetic and social practice and compare/contrast dances across a range of historical periods and locations. Recognize dance as an embodied historical and cultural artifact, as well as a mode of nonverbal expression, within the human experience across historical periods and cultures. Use dance to consider contemporary issues and modes of thought.

**DANC 1130. Ballet I**

1 Credit (1)

This course is the beginning level of ballet technique. Students learn the basic fundamentally and performance skills of ballet techniques, which may include flexibility, strength, body alignment, coordination, range of motion, vocabulary, and musicality. May be repeated for a maximum of 2 credits.

**Learning Outcomes**

1. Apply fundamental movements of ballet techniques.
2. Enhance flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, range of motion, and musicality.
3. Employ basic theories of classical ballet placement and proper alignment.
4. Develop basic ballet terminology, variations in timing and changes of facing, and barre and center combinations.

**DANC 1131. Introduction to Ballroom Dance**

1 Credit (1)

Introduction to ballroom dance for non dance majors. Students will learn basic ballroom technique and partnering work. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

**Learning Outcomes**

1. Learn to dance Figures 1-7 in 3 American Style Ballroom dances
2. Develop rhythmic accuracy in movement
3. Develop the skills to adapt to a variety of dance partners
4. Develop adequate social and recreational dance skills
5. Develop proper carriage, poise, and grace that pertain to Ballroom dance
6. Learn to recognize Ballroom music and its application for the appropriate dances
7. Understand different possibilities for dance variations and their applications to a variety of Ballroom dances
8. Understand and appreciate the process of creating original patterns and variations
9. Expand his/her knowledge of dance forms through attending two (2) NMSU Dance Department performances and writing a critique on one of the performances
10. Enjoy the process
DANC 1135. Introduction to Argentine Tango
1 Credit (1)
Introduction to skills and techniques of Argentine Tango.

Learning Outcomes
1. Learn to dance figures from Argentine Tango.
2. Develop a “style.
3. Gain deeper understanding of the Elements of Dance Technique
4. Develop rhythmic accuracy in movement, ability to dance on time
   discover phrasing
5. Further lead follow skills that will enable you to dance at more
   advanced levels
6. Learn practice performance dance skills
7. Understand and appreciate the process of creating original
   amalgamations
8. Expand your knowledge of other dance forms by attending required
   (2) NMSU Dance Department performances and writing a critique of
   one (1) performance
9. Enjoy the process!

DANC 1140. Flamenco I
1 Credit (1)
This course introduces the student to the art of flamenco and its cultural
features and significance. Students will learn the fundamentals of this
art form and introductory techniques and skills, which may include
handwork, footwork, postures, and specific dances. May be repeated for a
maximum of 2 credits.

Learning Outcomes
1. Demonstrate a basic level of competency in the principles of
   alignment, anatomy, coordination, mobility, stability, and stamina.
2. Demonstrate fundamental flamenco techniques relative to spatial
   awareness, rhythm, phrasing, and sequencing.
3. Demonstrate competency with basic flamenco movement vocabulary.
4. Perform a variety of flamenco dances, poses, steps, hand
   movements, and combinations.

DANC 1150. Modern Dance I
1 Credit (1)
Modern Dance techniques and styles. Students are introduced to proper
warm-up techniques, body alignment, control and flexibility. Students
work with various rhythms and combinations of movements. The course
emphasizes dance technique and creative experience. The history,
terminology and philosophy of Modern Dance are also discussed. May be
repeated for a maximum of 2 credits.

Learning Outcomes
1. Use a more developed sense of muscle control and strength, stretch
   and balance, coordination.
2. Demonstrate and verbalize an increased awareness of Modern Dance
   techniques
3. Execute dance phrases, combining several movements and in more
   than one rhythm.
4. Demonstrate an increased awareness of musicality while dancing
   and use Modern Dance Techniques creatively.

DANC 1155. Introduction to Hip-Hop Dance
1 Credit (1)
This course provides an atmosphere of safety and encouragement in
which students can express creativity and individuality through hip-hop
dance. No previous dance experience required. May be repeated up to 4
credits. Restricted to Las Cruces campus only.

Learning Outcomes
1. Demonstrate appropriate strength, stamina, balance, body alignment,
   and flexibility
2. Demonstrate creativity, independent thinking and self-motivation as
   these pertain to hip-hop dance
3. Apply appropriate integration of cognitive and kinesthetic skills
4. Execute sage and creative hip-hop dance movements

DANC 1185. Beginning Country Western Dance
1 Credit (1)
Beginning Country Western dance, including Country Western two-step,
nightclub two-step, polka, and Country Western line dance. May be
repeated up to 2 credits. Restricted to Las Cruces campus only.

Learning Outcomes
1. Learn to dance figures in Country Western Dances.
2. Develop a “style.
3. Gain deeper understanding of the Elements of Dance Technique
4. Develop rhythmic accuracy in movement, ability to dance on time
   discover phrasing
5. Further lead follow skills that will enable you to dance at more
   advanced levels
6. Learn practice performance dance skills
7. Understand and appreciate the process of creating original
   amalgamations
8. Expand your knowledge of other dance forms by attending required
   (2) NMSU Dance Department performances and writing a critique of
   one (1) performance
9. Enjoy the process!
**DANC 1235. Intro to West Coast Sw**
1 Credit (1)
Students will learn to dance the smooth style of Swing. The West Coast Swing may be danced to ANY style of music that has a beat (Country, R&B, Hip Hop, Disco, House). Also featured is the Hustle (fast paced and exhilarating). May be repeated up to 4 credits. Restricted to Las Cruces campus only.

**Learning Outcomes**
1. Learn to dance figures from both West Coast Swing and Hustle
2. Develop a "style" in both West Coast Swing and Hustle.
3. Gain deeper understanding of the Elements of Dance Technique
4. Develop rhythmic accuracy in movement, ability to dance on time discover phrasing
5. Further lead follow skills that will enable you to dance at more advanced levels
6. Learn practice performance dance skills
7. Understand and appreciate the process of creating original amalgamations
8. Expand your knowledge of other dance forms by attending required (2) NMSU Dance Department performances and writing a critique of one (1) performance
9. Enjoy the process!

**DANC 1460. Dance for Musical Theater I**
1 Credit (1)
This course provides students with an understanding of the Tap and Jazz Dance technique for use in Musical Theater and other performance genres at the beginning level. This course is designed for students to gain knowledge and understanding of Tap and Jazz Dance as art forms. May be repeated up to 2 credits.

**Learning Outcomes**
1. An understanding of traditional styles of dance used for musical theater.
2. An understanding of anatomy, kinesiology, and development of movement principles.
3. Improvement of muscular strength, flexibility, and elasticity.
4. An understanding of motion awareness and movement vocabulary.

**DANC 2114. Dance Sport I**
1 Credit (1)
Performance-based, team formation dance in a variety of Latin and ballroom dances. May be repeated up to 4 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

**Learning Outcomes**
1. Practice a variety of Ballroom and Latin dances to be expressed socially, competitively and on stage Adapt and communicate with a variety of dance partners Learn skills for successful partnership Practice advanced level technique in all styles of DanceSport Develop awareness of "what is good dancing" Create original choreography for both stage and competition Self-assess -learn to be your own best teacher Self-coach -learn to coach self through four stages of development Develop musicality skills, including rhythmic accuracy and timing 1 Work as a team to make sure that no one is left behind while furthering your leadership abilities 1 Promote DanceSport in the community and in the world as a healthy and fun lifestyle alternative 1 Develop valuable life skills such as enrollment, registration teamwork 1 Enhance cognitive thinking as described by Robert J. Sternberg’s triarchic theory of intelligence 1 Learn to act and perform as a “professional” dancer 1 Produce creative spring dance concert

**DANC 2130. Ballet II**
2 Credits (2)
Intermediate level of ballet technique; Introduction of more advanced Ballet vocabulary at barre/center work; increase flexibility, strength, body alignment, and coordination for practice of steps/combinations with variations in timing and changes of facing. Restricted to Las Cruces campus only.

**Learning Outcomes**
1. A successful student will be able to understand and execute with accuracy all the steps presented on the take home quizzes and are encouraged and expected to attend at least two semesters of each level in order to advance to the next level of ballet technique.

**DANC 2130L. Ballet Technique II Lab**
1 Credit (1)
This course is designed for the acquisition of intermediate level ballet technique and skill development. May be repeated up to 2 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

**Learning Outcomes**
1. An increased level of technical proficiency in ballet
2. A greater understanding and knowledge of ballet vocabulary
3. Increased flexibility and range of motion
4. Increased strength
5. Increased awareness of body alignment

**DANC 2140. Flamenco II**
2 Credits (2)
The structure of flamenco through choreographies that represent the basic flamenco dance forms: Fandangos de Huelva, Alegrias, Solea “por” Bulerias, and Tientos/Tangos. The course will also cover intermediate flamenco technique including footwork, palmas as (hand claps), braceo (movement of the arms), and floreo (movement of the hands). May be repeated up to 8 credits.

**Prerequisite:** DANC 1140.

**Learning Outcomes**
1. Demonstrate the ability to dance a short Fandangos de Huelva
2. Demonstrate the ability to dance a short Alegrias or Solea por Bulerias
3. Demonstrate the ability to dance a short Tientos/Tangos
4. Demonstrate an intermediate level of Pal mas, Braceo, Floreo, Taconeo
DANC 2140L. Flamenco Dance II Lab
1 Credit (1)
This course is designed for the acquisition of intermediate level Flamenco dance technique and skill development. May be repeated up to 2 credits. Consent of Instructor required. Restricted to Las Cruces campus only.
Prerequisite(s): DANC 1140 or instructor permission.
Learning Outcomes
1. Intermediate to advanced understanding of musical structures, enabling the identify of 12-count from 8 count rhythms.
2. An ability to present the styles of Sevillanas and Tangos as well as other Flamenco Spanish folk dances popular in Spain today.
3. An ability to utilize and present the arm work (brazeo), hand work (floreo) and hand clapping (palmas) from the various styles (palos) being explored.
4. An ability to build the footwork (taconeo), marking (marcaje) and turns (vueltas) that dancers create in response to the song (cante) and guitar tones.
5. An introductory ability to use castanets as the rhythmic accompaniment of their dance performance.

DANC 2142. Classical Spanish II
2 Credits (1+3P)
The study of theory, techniques, and practice of Classical Spanish at the intermediate level. Includes historical and cultural contexts of this art form. May be repeated up to 8 credits. Consent of Instructor required. Restricted to Las Cruces campus only.
Prerequisite(s): DANC 1140.
Learning Outcomes
1. Knowledge of basic Classical Spanish vocabulary
2. Understanding of the basic differences between Classical Spanish dance and Ballet techniques
3. Increased coordination and rhythmic accuracy
4. Knowledge of the onomatopoeia of castanets
5. Ability to perform a Classical Spanish Dance piece with castanets

DANC 2142L. Spanish Dance II Lab
1 Credit (1P)
This course is designed for the acquisition of intermediate level Spanish dance technique and skill development. May be repeated up to 2 credits. Restricted to Las Cruces campus only.
Learning Outcomes
1. Knowledge of basic Classical Spanish vocabulary
2. Understanding of the basic differences between Classical Spanish dance and Ballet techniques
3. Increased coordination and rhythmic accuracy
4. Knowledge of the onomatopoeia of castanets
5. Ability to perform a Classical Spanish Dance piece with castanets

DANC 2145. Hip Hop Dance Ensemble I
1 Credit (1)
Performance-based instruction for students pursuing a career in hip hop dance. Instruction includes dance repertory and choreography for stage, commercial/industry, and competitive dance areas. May be repeated up to 4 credits. Consent of Instructor required.
Learning Outcomes
1. The artistry of the dancer
2. The art and interpretation of the choreography
3. An understanding of various hip-hop isolations, footwork, and basic movements dance movement vocabulary
4. Increased awareness of stage presence and projection for different avenues of hip hop such as stage, commercial, and competition
5. An understanding of behind the scene workings of a dance performance
6. How to critically reflect

DANC 2150. Modern Dance II
2 Credits (2)
Modern II is designed to further the student's abilities in modern dance technique, to enhance efficient use of weight and momentum, to release held patterns in the body's mechanics, to enrich spatial awareness, and to begin work on performance techniques.
Learning Outcomes
1. Improve accuracy in alignment and shape Improve precision in space, in timing and rhythm, and in focus/intent Learn combinations and movement dynamics quickly Begin to integrate performance techniques while working in the classroom setting Use a concentrated attitude and an open, creative mind to approach the work in an artistic manner unique to your abilities Listen, see and apply all the information given within one class period and over the semester Self-awareness and mindfulness: how much space do you take in the class and why? How aware are you of those around you, and those you are dancing with? Release of weight to create controlled momentum Locating center and moving from there

DANC 2150L. Modern Dance Technique II Lab
1 Credit (1P)
This course is designed for the acquisition of intermediate level modern dance technique and skill development. May be repeated up to 2 credits. Consent of Instructor required. Restricted to Las Cruces campus only.
Learning Outcomes
1. Replication of movement phrases
2. Understanding of the anatomy and kinesiology principles of movement
3. Movement initiation and movement motivation
4. Static and dynamic balance
5. Modern dance movement vocabulary
6. Temporal, spatial, effort and motion awareness
7. Artistic expression by way of movement intent, imagery, and interpretation
DANC 2157. Intermediate Hip-Hop Dance
2 Credits (2)
This course is for students who have experience in Hip-Hop dance. The movement material will cover West coast and Southern styles with the inclusion of the history and evolution of Hip-Hop dance. May be repeated up to 8 credits. Restricted to Las Cruces campus only.

Learning Outcomes
1. How he/she has developed his/her hip-hop personality
2. How she/he has improved confidence through this style of dance
3. How he/she has integrated core initiation with other body parts
4. How she/he uses space, time, effort and relationship to express movement ideas
5. How he/she has improved muscular control and strength
6. How she/he has physically embodied Hip-Hop movement vocabulary
7. How he/she has improved group dynamics and leadership
8. How she/he has enhanced creativity and imagination
9. How he/she has physically embodied Hip-Hop movement vocabulary

DANC 2250. Contemporary Dance Ensemble I
1 Credit (1)
Performance-based instruction for students pursuing a career in contemporary dance. Instruction includes contemporary dance repertory and choreography for stage, outdoor arenas, and site-specific areas. May be repeated up to 4 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Learning Outcomes
1. (Performance) An understanding of the artistry of the dancer
2. (Performance) An understanding of the art and interpretation of choreography
3. (Performance) An improvement of movement performance skill
4. (Performance) An understanding of various dance movement vocabulary
5. (Performance) An increased awareness of stage presence and projection
6. (Performance) An understanding of technical stage production
7. (Production) An understanding of costume design and construction
8. (Production) An understanding of behind the scene workings of a dance performance

DANC 2251. Spanish Dance Ensembles I
1 Credit (1)
Performance-based instruction for students pursuing a career in dance with an emphasis in Spanish Dance. Instruction includes dance repertory and choreography for stage, outdoor arenas, and site-specific areas. May be repeated up to 4 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Learning Outcomes
1. An understanding of the artistry of the dancer
2. An understanding of the art and interpretation of choreography
3. An improvement of movement performance skill
4. An understanding of various dance movement vocabulary
5. An increased awareness of stage presence and projection
6. An understanding of technical stage production
7. An understanding of behind the scene workings of a dance performance
8. An understanding of the marketing and promotional aspects of performance
9. An understanding of costume design and construction

DANC 2265. Principles of Choreography I
3 Credits (3)
Solo dance choreography technique. The course must be passed with a grade of C- or higher. Offered only in Fall semester during even years.

Learning Outcomes
1. ability to create original choreographic material for solo work (289) or group work (389), understanding of how to create a movement theme/motif, and ability to take improvisational material and turn it into choreography

DANC 2270. Improvisation I
2 Credits (2)
Development of movement improvisational skills with complex examination of improvisational structures. Offered only in Fall semester during odd years.

Learning Outcomes
1. An understanding of the movement potential of the body
2. An understanding of the principles of motion
3. An awareness of movement
4. An understanding of static and dynamic balance
5. An understanding of temporal, spatial, effort and motion awareness
6. An understanding of group dynamics
7. An awareness and skill of movement motivation
8. An improvement of static and dynamic balance
9. An understanding of the principles of motion
10. An awareness and skill of movement motivation

DANC 2310. Bronze American Rhythm
2 Credits (2)
Bronze level American Rhythm patterns, techniques, and partnering with emphasis on elements of dance. May be repeated up to 6 credits.

Learning Outcomes
1. Learn to dance the Bronze DIVIDA Manual in American Rhythm
2. Develop Bronze level dance technique
3. Gain deeper understanding of the Elements of Dance Develop rhythmic accuracy in movement, ability to dance on time discover phrasing
4. Further develop lead follow skills that will enable you to dance at more advanced levels

DANC 2311. Bronze American Smooth
2 Credits (2)
Bronze level American Smooth patterns, technique, and partnering with an emphasis on the elements of dance. May be repeated up to 4 credits.

Learning Outcomes
1. Learn to dance the Bronze DIVIDA Manual in International Latin
2. Develop Bronze level dance technique
3. Gain deeper understanding of the Elements of Dance Develop rhythmic accuracy in movement, ability to dance on time discover phrasing
4. Further develop lead follow skills that will enable you to dance at more advanced levels

DANC 2320. Bronze International Latin
2 Credits (2)
This is the style of Latin dance that is danced around the globe and is featured in the World DanceSport Championships. Students will learn the Bronze Level figures and techniques in four (4) International Style dances: Rumba, Cha Cha, Samba & Jive. May be repeated up to 6 credits.

Learning Outcomes
1. Learn to dance the Bronze DIVIDA Material for the International Latin Syllabus
2. Develop Bronze level dance technique
3. Gain deeper understanding of the Elements of Dance Develop rhythmic accuracy in movement, ability to dance on time discover phrasing
4. Further develop lead follow skills that will enable you to dance at more advanced levels
DANC 2321. Bronze International Standard
2 Credits (2)
This is the style of Ballroom dance that is performed around the globe and is featured in the World DanceSport Championships. Learn the Bronze Level figures and techniques in five (5) International Style dances: Waltz, Tango, Viennese Waltz, Foxtrot & Quickstep. Students will focus on understanding technical elements of dance, memorizing and performing routines. May be repeated up to 6 credits.

Learning Outcomes
1. Learn to dance the Bronze DIVIDA Manual in International Standard Develop Bronze level dance technique Gain deeper understanding of the Elements of Dance Develop Smooth accuracy in movement, ability to dance on time discover phrasing Further develop lead follow skills that will enable you to dance at more advanced levels

DANC 2460. Dance for Musical Theater II
2 Credits (2)
This course provides students with an understanding of the Tap and Jazz Dance technique for use in Musical Theater and other performance genres at the intermediate level. This course is designed for students to gain knowledge and understanding of Tap and Jazz Dance as art forms. May be repeated up to 4 credits. Consent of Instructor required.
Prerequisite(s): DANC 1460 or consent of instructor.
Learning Outcomes
1. An understanding of traditional styles of dance used for musical theater.
2. An understanding of anatomy, kinesiology, and development of movement principles
3. Improvement of muscular strength, flexibility, and elasticity
4. An understanding of motion awareness and movement vocabulary

DANC 3110. DanceSport Pedagogy: Smooth
3 Credits (3)
In this teacher education course, students will begin to develop skills necessary in becoming a successful, professional Ballroom Dance Instructor. Students will gain technical mastery of Bronze level figures in the four (4) American Style Smooth Ballroom Dances to include the Waltz, Foxtrot, Tango and Viennese Waltz. Students will gain practical teaching experience in the area of Group Class Instruction with required in class practicums. May be repeated up to 12 credits.
Prerequisite: DANC 2311.
Learning Outcomes
1. Students will understand several philosophies of teaching They will gain teaching skills through practical experience. The students will teach both group and private lessons. The student will gain knowledge about learning styles.

DANC 3114. Dance Sport II
1 Credit (1)
Advanced performance-based, team formation dance in a variety of Latin and social dances.
Prerequisite: Consent of instructor and audition-based.
Learning Outcomes
1. Strengthen the students’ ability to prepare for show and medleys formation routines, Develop the skills required to learn choreography quickly, commitment to excellence and unity within a team. to proudly representing NMSU

DANC 3130. Ballet Technique III
3 Credits (3)
The study of intermediate/advanced classical ballet technique including vocabulary, history and practical application of functional anatomy.
Prerequisite: DANC 2130 or consent of instructor.
Learning Outcomes
1. A student will learn advanced mastery of ballet skills and be able to demonstrate their skillset through performance

DANC 3130L. Ballet Technique III Lab
1 Credit (1)
This course is designed for the acquisition of advanced level ballet technique and skill development. May be repeated up to 6 credits.
Prerequisite: DANC 2130.
Learning Outcomes
1. Develop ballet technique at intermediate/advanced level.

DANC 3140. Flamenco III
3 Credits (3)
Advanced study in flamenco dance technique, its cultural history and pedagogy methods. May be repeated up to 12 credits. Consent of Instructor required.

DANC 3140L. Flamenco Dance III Lab
1 Credit (1)
This course is designed for the acquisition of advanced level Flamenco dance technique and skill development. May be repeated up to 2 credits. Consent of Instructor required.

DANC 3142. Classical Spanish Dance III
3 Credits (3)
Advanced study of Classical Spanish Dance with castanets, cultural history, and pedagogy methods. A expanded focus on integration of different classical genres with focus on solo work. May be repeated up to 12 credits. Consent of Instructor required. Prerequisite(s): DANC 2142

DANC 3142L. Spanish Dance III Lab
1 Credit
This course is designed for the acquisition of advanced level Spanish dance technique and skill development. May be repeated up to 2 credits. Consent of Instructor required.

DANC 3145. Flamenco Structure and Improvisation
3 Credits (3)
A Study of various elements necessary in an improvisational setting in Flamenco. Using a cross section of Flamenco forms as a format. Students study the compass of each palo, then move to several traditional letras appropriate to these forms.
Prerequisite: DANC 2140 or Consent of Instructor.
Learning Outcomes
1. Students will demonstrate an ability to perform the appropriate movement sequences that are dictated by the cadence of the Cante/ song. They will gain an understanding of the basic cross-section of cante forms to have a complete foundation for performance and presentation especially from the perspective of improvisation.
DANC 3150. Modern Dance III
3 Credits (3)
The study of intermediate/advanced modern dance technique using the lenses of Laban and Bartinieff movement analysis and principles, functional anatomy, and imagery to increase modern vocabulary, skill development, performance accuracy, and artistic expression. May be repeated up to 6 credits.
Prerequisite(s): DANC 2150 or consent of instructor.
Learning Outcomes
1. How he/she has developed his/her unique personal voice in modern dance
2. How he/she has improved confidence through this style of dance
3. How he/she has integrated core initiation with other body parts
4. How he/she uses space, time, effort and relationship to express movement ideas
5. How he/she has improved muscular control and strength
6. How he/she has physically embodied modern movement vocabulary

DANC 3150L. Modern Dance Technique III Lab
1 Credit (1)
This course is designed for the acquisition of intermediate/advanced level modern dance technique and skill development. May be repeated up to 6 credits.
Prerequisite: DANC 2150.
Learning Outcomes
1. To advance student skillset in the art of modern dance

DANC 3155. Hip Hop Dance Ensemble II
1 Credit (1)
Advanced performance-based instruction for students pursuing a career in hip hop dance. Instruction includes dance repertory and choreography for stage, commercial/industry, and competitive dance areas. May be repeated up to 4 credits. Consent of Instructor required.

DANC 3157. Advanced Hip Hop Dance
3 Credits (3)
The study of advanced hip hop dance covering West coast and Southern styles with the inclusion of the history and evolution of Hip-Hop dance. May be repeated up to 9 credits. Consent of Instructor required.
Prerequisite(s): DANC 2157.

DANC 3175. Dance Studio Management
3 Credits (3)
The study and practice of studio management. Includes the study of financial procedures, marketing, entrepreneurship, leadership, management, fund-raising, and other related topics. Offered Spring odd years only. May be repeated up to 3 credits.

DANC 3250. Contemporary Dance Ensemble II
1 Credit (1)
Advanced performance-based instruction for students pursuing a career in contemporary dance. Instruction includes contemporary dance repertory and choreography for stage, outdoor arenas, and site-specific areas. May be repeated up to 6 credits. Consent of Instructor required.

DANC 3251. Spanish Dance Ensemble II
1 Credit (1)
Performance-based instruction for students pursuing a career in dance with an emphasis in Spanish Dance. Instruction includes dance repertory and choreography for stage, outdoor arenas, and site-specific areas. May be repeated up to 4 credits. Consent of Instructor required.

DANC 3255. Principles of Choreography II
3 Credits (3)
Continued investigation of the choreographic process with an emphasis on group choreography. Course must be passed with a grade of C or higher. Consent of Instructor.
Prerequisite: DANC 2265.
Learning Outcomes
1. To learn advanced concepts associated with choreography of dance

DANC 3310. Silver American Rhythm
3 Credits (3)
Silver level American Rhythm patterns and technique with emphasis on performance. May be repeated up to 9 credits.
Prerequisite: DANC 2310.
Learning Outcomes
1. To enhance advanced dance sport skills beyond Bronze Level

DANC 3311. Silver American Smooth
3 Credits (3)
Silver level American Smooth patterns and technique with emphasis on performance. May be repeated up to 9 credits.
Prerequisite: DANC 2311.
Learning Outcomes
1. Advance introductory skill levels and enhancing technique towards Gold level

DANC 3320. Silver International Latin
3 Credits (3)
Students will learn Silver Level syllabus figures in four (4) International Style dances: Rumba, Cha Cha, Samba & Jive and Bronze Level figures in Paso Doble. Continued training and practice in International Style Latin dance technique. May be repeated up to 9 credits.
Prerequisite: DANC 2320.
Learning Outcomes
1. Learn and work towards mastery for the four different styles of dances in Dance Sport

DANC 3321. Silver International Standard
3 Credits (3)
Learn Silver Level syllabus figures in the five (5) International Style Standard dances: Waltz, Tango, Viennese Waltz, Foxtrot & Quickstep. Students will focus on increased technical understanding to increase their ability in partnering and musicality. May be repeated up to 9 credits.
Prerequisite: DANC 2321.

DANC 3325. Silver American Rhythm
3 Credits (3)
Silver level American Smooth patterns and technique with emphasis on performance. May be repeated up to 9 credits.
Prerequisite: DANC 2310.
Learning Outcomes
1. To enhance advanced dance sport skills beyond Bronze Level

DANC 3460. Dance For Musical Theater III
3 Credits (3)
This course provides students with an understanding of the Tap and Jazz Dance technique for use in Musical Theater and other performance genres at the intermediate level. This course is designed for students to gain knowledge and understanding of Tap and Jazz Dance as art forms. May be repeated up to 9 credits.
Prerequisite(s): DANC 2460 or consent of instructor.
Learning Outcomes
1. An understanding of traditional styles of dance used for musical theater.
2. An understanding of anatomy, kinesiology, and development of movement principles
3. Improvement of muscular strength, flexibility, and elasticity
4. An understanding of motion awareness and movement vocabulary
DANC 3510V. World Dance
3 Credits (3)
Examination of dance forms from a cross-cultural perspective, focusing on the role of dance in different cultures around the globe. Same as HNRS 347V. May be repeated up to 3 credits.

Learning Outcomes
1. An understanding of the social importance of dance in diverse cultural settings. A familiarity with the importance of dance as a vehicle through which various identities (i.e. cultural, gender and personal), roles (i.e. social and status) and values (i.e., personal and cultural) are identified and expressed. An understanding of dance as a form of non-verbal communication. The ability to discuss and compare culture’s dance forms. The ability to recognize how other art forms, religions, and political climates affect cultural identity.

DANC 4250. Dance Pedagogy: Dance Technique
3 Credits (3)
Students will learn to develop a curriculum design, apply teaching methods, and structure lesson plans for teaching specific dance styles. Course must be passed with a grade of C- or higher.

Learning Outcomes
1. Student will be able to demonstrate how to properly teach a specific dance style.

DANC 4265. Advanced Choreographic Project
1-6 Credits (1-6)
Individual directed studies in choreography with a culminating performance. May be repeated up to 6 credits. Consent of Instructor required.

DANC 4310. Gold American Rhythm
3 Credits (2+2P)
Advanced level American Rhythm dance technique and partnering work with choreography and performance emphasized. Includes cultural history and pedagogy methods. May be repeated up to 6 credits.

Prerequisite: DANC 3310.

Learning Outcomes
1. To enhance dance sport skills beyond Silver Rhythm

DANC 4311. Gold American Smooth
3 Credits (3)
Gold level American Smooth technique and choreography with an emphasis on performance and competition dancing. May be repeated up to 9 credits.

Prerequisite: DANC 3311.

Learning Outcomes
1. Continue to work towards mastery of dance sport perfection through advanced training

DANC 4320. Gold International Latin
3 Credits (3)
Students will complete all syllabus figures through the Gold level in the Rumba, Cha Cha, Samba, Jive and Paso Doble. Advanced training and practice in International Style Latin dance technique. May be repeated up to 9 credits.

Prerequisite: DANC 3320.

DANC 4321. Gold International Standard
3 Credits (3)
Students will learn Gold Level syllabus figures in the five (5) International Style Standard dances: Waltz, Tango, Viennese Waltz, Foxtrot & Quickstep. Students will focus on physical and cognitive mastery of standard dance technique and elements as well as high-level performance ability, musicality and choreography. May be repeated up to 9 credits.

Prerequisite: DANC 3321.

DANC 4610. DanceSport Certification Preparation
3 Credits (3)
The Professional Certification process offers extraordinary benefits to dance teachers, deeply enriching their dancing and teaching, and greatly expanding their career opportunities. This intensive course is designed to fully prepare students in taking the DVIDA and/or ISTD exams in the Smooth, Rhythm, Standard or Latin dances depending on course offered. See subtitle for specific style being taught in schedule of classes. May be repeated up to 12 credits.

DANC 4710. Senior Culminating Experience
2 Credits (2)
Exit course for graduating seniors. Students will apply comprehensive knowledge of performance and production and/or pedagogy experience, to culminate in a dance production and/or teaching project. May be repeated up to 4 credits. Restricted to: DANC majors.

DANC 4990. Flamenco Practicum
1 Credit (1)
Directed learning experiences for careers in Spanish Dance. May be repeated up to 4 credits. Consent of Instructor required.

DANC 4996. Special Topics
1-3 Credits (1-3)
Specific subjects to be announced in the Schedule of Classes. May be repeated up to 3 credits.

Learning Outcomes
1. Varies

DANC 4997. Problems
1-6 Credits (1-6)
Problems in dance education, dance pedagogy, dance performance and independent work in their solutions. May be repeated up to 6 credits.

Learning Outcomes
1. Varies

DANC 5114. DanceSport Ensemble
1 Credit (1)
Advanced Rehearsal and performance of DanceSport choreography with emphasis on formation and competition dances. May be repeated up to 6 credits.

DANC 5130. Advanced Theory of Ballet Technique
1-6 Credits (1-6)
Advanced study of dance pedagogy and theory with practice in ballet technique. May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: DANC 4130.

DANC 5140. Advanced Theory of Flamenco Technique
1-6 Credits (1-6)
Advanced study of dance pedagogy and theory with practice in Flamenco technique. May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: DANC 3140.
DANC 5142. Advanced Theory of Classical Spanish Dance Technique
3 Credits (3)
Advanced study of dance pedagogy and theory with practice in Classical Spanish Dance technique. May be repeated up to 9 credits. Consent of Instructor required. Crosslisted with: DANC 3142.

DANC 5145. Advanced Theory of Flamenco Dance Structures and Improvisation
3 Credits (3)
The advanced study of various elements necessary in an improvisational setting in Flamenco dance. Using a cross section of Flamenco musical forms as a format. Students study the compass of each palo, then move to several traditional letras appropriate to these forms. May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: DANC 3145.

DANC 5147. Advanced Theory of Modern Dance Technique
1-6 Credits (1-6)
Advanced study of dance pedagogy and theory with practice in Modern dance technique. May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: DANC 4150.

DANC 5150. Advanced Theory of Hip Hop Dance Ensemble
1 Credit (1)
Rehearsal and performance of Hip Hop repertory with emphasis on hip hop structures, artistic expression, and athletic versatility. May be repeated up to 6 credits.

DANC 5155. Advanced Theory of Flamenco Dance Structures and Improvisation
3 Credits (3)
The advanced study of various elements necessary in an improvisational setting in Flamenco dance. Using a cross section of Flamenco musical forms as a format. Students study the compass of each palo, then move to several traditional letras appropriate to these forms. May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: DANC 3145.

DANC 5250. Dance Ensemble III
1 Credit (1)
Rehearsal and performance of dance repertory with emphasis on advanced understanding of musicality, dynamic phrasing, artistic expression, and athletic versatility within a broad range of styles. May be repeated up to 4 credits. Consent of Instructor required.

DANC 5251. Advanced Spanish Dance Ensemble
1 Credit (1)
Rehearsal and performance of Spanish Dance repertory with emphasis on flamenco structures, artistic expression, and athletic versatility. May be repeated up to 6 credits.

DANC 5310. Advanced Theory of American Rhythm Technique
1 Credit (1)
Advanced study of dance pedagogy and theory with practice in American Rhythm technique
Learning Outcomes
1. Student will demonstrate advanced techniques in American Rhythm style

DANC 5311. Advanced Theory of American Smooth Technique
1 Credit (1)
Advanced study of dance pedagogy and theory with practice in American Smooth technique
Learning Outcomes
1. Student will be able to demonstrate specific skills in American Smooth Techniques

DANC 5320. Advanced Theory of International Style Latin American
1 Credit (1)
Advanced study of International Latin American technique, styling, and partnering skills.
Learning Outcomes
1. Student will be able to demonstrate advanced skills in Latin American Dance

DANC 5321. Advanced Theory of International Style Ballroom
1 Credit (1)
Advanced study of International Ballroom technique, styling, and partnering skills.
Learning Outcomes
1. Student will be able to demonstrate advanced skills in Ballroom techniques

DANC 5510. Movement Research Investigation
3 Credits (3)
Preparation for writing a master's thesis or dissertation. Writing of three chapters: Chapter 1 - Introduction of topic under review, Chapter 2 - literature review, Chapter 3 - application of the literature review in the teaching or performance profession. May be repeated up to 3 credits. Consent of Instructor required.

DANC 5550. Advanced Theory of Dance Pedagogy
3 Credits (3)
Advanced study of dance pedagogy theory and practice. To be conducted during the students second semester.
Learning Outcomes
1. Student will be able to demonstrate skill sets both academically and through practical demonstration by teaching various age groups in the art of dance

DANC 5710. Dance Administration and Leadership
2 Credits (2)
The study and investigation of both management and leadership theories and how to apply these theories in practice.

DANC 5900. Master’s Thesis
1-6 Credits (1-6)
This course is for graduate dance students who choose to write a thesis instead of a performance or teaching project. May be repeated up to 6 credits. Thesis/Dissertation Grading.

DANC 5992. Directed Studies
1-4 Credits (1-4)
Supervised projects and/or research in theoretical studies, inclusive of community service projects. May be repeated up to 4 credits. Consent of Instructor required.

DANC 5996. Special Topics
1-6 Credits (1-6)
Specific subjects offered in addition to standard academic curriculum. Course title to be announced in the Schedule of Classes. May be repeated up to 6 credits. Consent of Instructor required.

DANC 5998. Dance Internship
2 Credits (2)
Internship opportunities in either dance education, dance performance/production, or dance administration. Internship site determined by both Director of Dance Program and graduate student. Consent of Instructor required.
DANC 6998. Dance Internship II
3 Credits (3)
Internship opportunities in either dance education, dance performance/production, or dance administration. Internship site determined by both Director of Dance Program and graduate student. May be repeated up to 3 credits.

Physical Education Courses

PHED 1110. Dance:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1230. Individual Sport:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1290. Team Sport:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1310. Swim I:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1320. Aqua Fit:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1410. Yoga:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1430. Pilates:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1510. Training:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1620. Fitness:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1630. Career Fitness:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 10 credits.
Learning Outcomes
1. Varies

PHED 1670. Aerobics:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1830. Running:
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 4 credits.
Learning Outcomes
1. Varies

PHED 1910. Outdoor Experience
1 Credit (1)
Individual sections vary based on topic content; “audience”; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 2996. Special Topics
1-3 Credits (1-3)
Specific subjects to be announced in the Schedule of Classes. Each offering will carry appropriate subtitle. May be repeated up to 6 credits.
Learning Outcomes
1. Varies
Sports Medicine (Athletic Training & Kinesiology)

SPMD 1110. Introduction to Athletic Training
3 Credits (3)
Introduction to the principles of athletic training. May be repeated up to 3 credits.

Learning Outcomes
1. Understand the historical development of athletic training and sports medicine. Understand the knowledge and experiences needed to become a Certified Athletic Trainer. Understand the specific responsibilities and duties of an athletic trainer. Understand the diverse jobs settings within the profession of athletic training. Understand the relationship between the athletic trainer and the sports medicine team. Understand some of the general and specific injuries and medical conditions that occur in athletics; their causes, signs and symptoms, treatments, rehabilitation, and prevention. Understand some of the contemporary issues and problems facing the athletic training profession.

SPMD 1120. Medical Terminology
3 Credits (3)
Study of the structure of medical language with emphasis on sports medicine-related terminology. To include analysis and interpretation of medical documentation. Restricted to: Las Cruces campus only.

Learning Outcomes
1. Master the fundamentals of word analysis, including the separation of terms into word roots or combining forms, common prefixes, and suffixes.
2. Differentiate types of medical terms and the relationships among terms.
3. Develop a proficiency in the use of physiological and anatomical terms as reflected in medical documents.
4. Master the terms, words, phrases, and symbols that describe the human body in its various states of health and disease, including essential anatomical terms.

SPMD 1190. Clinical Practicum I
2 Credits (2)
Introduction to the clinical aspects of the athletic training education program. Must maintain at least 3.0 GPA. May be repeated up to 4 credits.

Learning Outcomes
1. The Athletic Training Program application procedures. The ability to perform selected taping and wrapping techniques. Knowledge of HIPAA guidelines, pre-participation physical examinations, environmental illnesses, the history of Athletic Training and its governing bodies, Evidence Based Practice and its implications in the field of athletic training, evaluation procedures for the injured athlete, NMSU AT program and its affiliated clinical sites. Proper documentation for the athletic training environment including SOAP notes.

SPMD 1195. Clinical Practicum II
3 Credits (3)
Athletic training related content and psycho-motor skills are introduced, enhanced, and assessed in the classroom and clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses while providing increased depth of understanding and clinical practice. Must maintain a 3.0 GPA. May be repeated up to 3 credits.

Learning Outcomes
1. Demonstrate knowledge and skill in emergency situation prevention, recognition, and management. Demonstrate proficiency in basic skills of musculoskeletal injury recognition and management. Demonstrate competency in basic pre-participation exam skills, including but not limited to taking vital signs. Demonstrate competency in wound care and first aid.
SPMD 1310. Introduction to Kinesiology  
3 Credits (3)  
An introduction to the field of Kinesiology which will explore areas such as exercise physiology, sport and exercise psychology, motor behavior, biomechanics, strength and conditioning, exercise prescription, as well as professional and graduate programs, and allied health and applied careers opportunities.

Learning Outcomes

SPMD 1350. Social Foundations of Physical Activity  
3 Credits (3)  
Historical and cultural foundations and vocational, scientific, and educational data on careers in health education, physical education, and recreation.

Learning Outcomes

SPMD 2210L. Anatomy and Physiology Laboratory  
1 Credit (1P)  
Students will engage in activities designed to enhance appreciation of the anatomical structures related to the content areas for SPMD 2210. Restricted to Las Cruces campus only.

Learning Outcomes

SPMD 2210. Anatomy and Physiology I  
3 Credits (3)  
Detailed study of the structure and function of the human musculoskeletal, cardiovascular, respiratory, and peripheral nervous systems. Designed specifically for students interested in allied health professions.

Learning Outcomes

SPMD 2310. Emergency Response in Sports Medicine  
2 Credits (2)  
Designed to provide knowledge and experience in emergency care procedures, blood borne pathogens, and first aid. Students will receive certification in CPR/AED for the Professional Rescuer and in First Aid, upon successful completion of course. May be repeated up to 4 credits.  
Prerequisite: Consent of Instructor.

Learning Outcomes

SPMD 2310L. Anatomy and Physiology Laboratory  
1 Credit (1P)  
Students will demonstrate through writing the ability to apply the issues discussed in class to their specific fields in ways that benefit society. (Evaluation) (Standard 9 e, g, l, m) 1 Students
Learning Outcomes
1. Recognize the importance of incorporating positive fitness/wellness habits within one's lifestyle in terms of enhancing longevity, disease prevention, and overall quality of life. Examine various physiological benefits and adaptations to such factors as muscular strength, muscular endurance, cardiovascular fitness, flexibility, and body composition when certain stimuli are applied to each. Assessment of these characteristics will be witnessed primarily in practical experiences within the course's laboratory settings. Identify current trends and/or health patterns within society in regards to scientific findings, declination in health habits, and increases in health ailments. Compare various nutritional concepts, specifically proper dietary habits and their impact on weight management aspects. Describe the role physical activity and sport specific training play on competitive athletic performance.

SPMD 2310. Career Preparation
1 Credit (1)
From concept to implementation: Career exploration, setting up degree plans, finding graduate programs, developing professional resumes, writing letters of application, seeking letters of recommendation, and interview preparation.

Learning Outcomes
1. Career opportunities within human movement and allied health fields Chose both a primary and secondary career of their interest Search for appropriate graduate schools to match their career choices Create a plan by aligning their undergraduate curriculum with their career choices Explore additional education (dual majors, minors, and certifications specific to their chosen field) Study and create a professional resume Create a curriculum vita as a historical reference for future job prospects Write a professional letter of application for jobs and school applications Learn how to seek "outstanding" letters of recommendation 1 Study appropriate interview protocol 1 Practice interviews (one on one, panel and group)

SPMD 3010. Orthopedic Examination, Evaluation and Diagnosis of Lower Extremity Injuries
4 Credits (3+1P)
Examines normal human anatomy, mechanisms of athletic injury, and deviation from normal anatomy following athletic injury to the lower extremity. Must maintain at least 3.0 GPA. Consent of Instructor required.

Learning Outcomes
1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the lower extremity Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries. Determine and apply therapeutic interventions designed to maximize the patient's participation and health-related quality of life. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries.

SPMD 3090. Clinical Practicum III
3 Credits (3)
Athletic training psychomotor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Must maintain a 3.0 GPA. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes
1. Practice sessions are conducted to assist the student in achieving clinical proficiency skills. Depending on the difficulty level, selected clinical proficiencies will be evaluated in this clinical. For those proficiencies indicated, students will need to show proficiency either in this clinical or in a later clinical class.

SPMD 3093. Clinical Practicum IV
3 Credits (3)
Athletic training psychomotor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Must maintain a 3.0 GPA. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes
1. Identify and locate muscles, tendons, ligaments and bony structures. Demonstrate basic evaluation skills, including but not limited to: taking a history, observation, differential diagnoses, palpation, ROM, neurological/circulation, MMT, special tests, clinical impression, plan. Demonstrate taping, bracing skills, appropriate emergency care skills, select and properly fit athletic equipment, appropriate removal of athletic equipment in the event of an emergency, the ability to develop and answer a clinically relevant question.

SPMD 3110. Racquet Sports
2 Credits (2)
Knowledge and skills related to the racquet sports of tennis, badminton, and pickleball with emphasis on developmental strategies and skill performance that influences pedagogical content knowledge. Administrative issues will be addressed.
SPMD 3120. Theory and Technique of Lifelong Outdoor Leisure Activities
2 Credits (2)
Knowledge and skills related to lifelong outdoor leisure activities, including the examination of environmental science and awareness, kinesiology, and fundamental motor skills.

SPMD 3130. Theory and Technique of Sports and Games
2 Credits (2)
Knowledge and skills related to team sports and games, with emphasis on developmental strategies and skill performance that influence pedagogical content knowledge. Administrative issues will also be addressed.

SPMD 3140. Designing Student Centered Afterschool Physical Activity Clubs
3 Credits (3)
Knowledge, skills and field based practical application for creating student centered and student designed after school physical activity clubs.

SPMD 3150. Theory and Technique of Dance and Rhythms
2 Credits (2)
Knowledge and skills related to dance and rhythms, with emphasis on the analysis of dance elements and its role in physical education.

SPMD 3160. Elementary School Physical Education
3 Credits (2+2P)
Methods for teaching physical education at the elementary level. Primary focus on creating a learning environment for the acquisition and enhancement of developmentally appropriate locomotor, manipulative, and nonmanipulative skills. Field experience included. Consent of Instructor required.
Prerequisite: GPA of 2.5.

Learning Outcomes
1. All course objectives are linked to the InTASC Teaching Standards
2. Improve your knowledge of K-5 physical education content, disciplinary concepts, and tools of inquiry related to the development of a physically educated person (Standard 4 j, k, l, n, o; Standard 5 i, Standard 6 j; Standard 7 g, k, l; Standard 8 i; Standard 9 o).
3. Improve your knowledge of and ability to plan instruction based on curriculum goals/objectives and students’ experiences. (Standard 1 a, b, d, e, h, i; Standard 2 a, b, c, g, e; Standard 4 j, m, n, o; Standard 5 j, k; Standard 9 a, c, h, i)
4. Improve your ability to design and teach developmentally appropriate K-5 physical education curriculum for diverse learners. (Standard 1 a, b, d, e, h, j; Standard 2 a, b, c, d, f, g, h, j, k, l, m; Standard 4 b, c, d, e, f; Standard 5 b, d, h, r; Standard 7 a, b, c, d, e, g, h, j, k, l, n, q)
5. Improve your knowledge of, and ability to, teach a variety of manipulative, nonmanipulative and locomotor skills and concepts. (Standard 7 a, b, c, d, e, g, h, j, k, l, n, q; Standard 8 i)
6. Improve your ability to teach using a variety of strategies such as cooperative learning, problem-based learning, direct instruction, etc. that facilitate learning (Standard 8 a, b, d, e, f, h, l, j, k, l, m, n, s)

SPMD 3210. Anatomy and Physiology II
3 Credits (3)
Detailed study of the structure and function of the human endocrine, immune, digestive, reproductive, integumentary, central nervous and renal systems. Designed specifically for students interested in allied health professions.
Prerequisite: SPMD 2210 or consent of instructor.

Learning Outcomes
1. Students will demonstrate knowledge through testing, practical skills and demonstration an understanding in visceral anatomy and physiological functioning.

SPMD 3210L. Anatomy and Physiology II Lab
1 Credit (1)
The students will develop skills in palpating various bony landmarks as well as origins and insertions of major soft tissues. In addition, problem based learning scenarios will be used to complement the SPMD 3210 lecture material and thereby further students understanding of certain physiologic systems including neural, digestive, reproductive, endocrine, and integumentary.
Prerequisite: SPMD 2210; SPMD 2210L; or approved transfer equivalent.

Learning Outcomes
1. To demonstrate through practical application and demonstration a comprehensive understanding of visceral operations and diseases.

SPMD 3250. Introduction to Exercise Science: Exercise Physiology and Biomechanics
3 Credits (3)
This course serves to provide a broad introduction to both the physiology of exercise and the mechanics of human movement. The conceptual framework of the course will allow for the development of a broad knowledge base regarding these concepts and the latter portions of the course will focus on real world application of the concepts.

Learning Outcomes
1. Students will learn a basic introduction to both exercise physiology and biomechanics and be able to demonstrate their knowledge of the introductory topics by providing real world examples.
SPMD 3310. Lifetime Activities
2 Credits (2)
Knowledge and skills related to the lifetime activities of swimming, weight training, and other fitness promoting activities with emphasis on learning progressions.
Prerequisite: GPA 2.5.

Learning Outcomes
1. All course objectives are linked to the InTASC Teaching Standards
   Improve your ability to design and teach developmentally appropriate fitness lesson plans for diverse learners (e.g. aerobics, yoga, strength training). (Standard 7 a, b, c, l, j Standard 8 a, b, d) Improve your ability to modify instructions, lesson plans and tasks based on students’ strengths and needs. (Standard 1 b, Standard 3 e, Standard 7 b, c, i, j, l, Standard 8 a, b, d) Improve your knowledge of, and ability to teach a variety fitness content (Standard 7 a, g, h, k, l, n) Improve your ability to plan effective lesson plans to insure equity and sensitivity to students with diverse characteristics. This includes structuring a safe, educational environment that facilitates learning for all students. (Standard 3, e, Standard 7 q, i) Improve your ability to use self-assessment and peer-assessment to reflect on your teaching and plan for adaptations/adjustments (Standard 8 b, d, Standard 9 g). Improve your ability to evaluate and modify instructional resources and curriculum to better meet the needs of their students. (Standard 4 f, Standard 7 g, Standard 8 a)

SPMD 3350. Inferential Statistics in Sport and Exercise Science
3 Credits (3)
Statistical concepts and methods basic to experiential research to include normal distribution, z-tests, t-tests, analysis of variance and regression analysis. An understanding of sport and exercise science theory is required for students enrolling in this course.

Learning Outcomes
1. Upon successful completion of this course the student will be able to competently assess exercise data using a variety of techniques that include measures of central tendency, variability, distributional assessments, correlation, regression, and mean testing (t-test and ANOVA).

SPMD 3410. Exercise Physiology
3 Credits (3)
Basic physiological principles as they apply to exercise and fitness programs. Laboratory experiences included. Requires 2.75 GPA.
Prerequisite: SPMD 2210 or SPMD 2250; GPA 2.75.

Learning Outcomes
1. To gain knowledge of the structure and function of the body systems (muscle, cardiorespiratory, etc.). To gain knowledge related to the body system in reference to acute bout of exercise (responses), as well as following chronic exposure to exercise (adapts). To understand laboratory procedures used to study the body system. To be able to integrate knowledge related to the function of each system and apply this information to humans undergoing exercise training.

SPMD 3450. Biomechanics
3 Credits (3)
The application of anatomical, mechanical and electrical concepts to better understand the fundamental nature of human movement.
Prerequisite: SPMD 2210 and GPA of 2.75.

Learning Outcomes
1. Learn the basic anatomical, kinematic, and kinetic concepts Learn how the human body generates mobility Learn the kinematic concepts, laws, and principle that govern the human body motion Learn the kinetic concepts laws, and principle that govern the human body motion Learn the forces acting on the body in a fluid and how the human body motion is affected Learn how to utilize the principles and concepts to solve problems

SPMD 3450L. Biomechanics Laboratory
1 Credit (1)
This course serves to provide an introduction to human movement and its analysis. The conceptual framework of the course will allow for the application of anatomical, mechanical, and electrical concepts in order to better understand the fundamental nature of movement.
Prerequisite: SPMD 2210; GPA 2.75.

Learning Outcomes
1. Use physical laws of motion to quantitatively analyze human performance. Use physical descriptors of movement to qualitatively analyze human performance. Apply principles of kinetics kinematics to solve problems of human motion. Gain exposure to the various data collection and analysis tools in biomechanics. Apply critical thinking skills to problem solving and writing assignments. Use teamwork to complete an experimental motion analysis projects.

SPMD 3550. Psychology of Sport
3 Credits (3)
Development of coaching techniques to enhance sport performance based on understanding and use of psychological principles.
Prerequisite: GPA 2.75.

Learning Outcomes
1. Identify psychological characteristics associated with peak performance Describe and explain factors practitioners should consider when diagnosing, designing, and implementing a mental training intervention. Recognize and define the psychological constructs of –for example but not limited to–concentration, confidence, motivation, stress/anxiety, and arousal Understand how personality attributes and the environment affect human performance and injury rehabilitation

SPMD 3610. Health and Exercise Psychology
3 Credits (3)
The course examines the reciprocal relationship among physical activity, exercise behavior, and psychological determinants associated with adopting and maintaining an exercise program. Topics include theories of behavioral change, exercise psychology interventions, the benefits/pitfalls of exercise, and psychological factors influencing patient rehabilitation.
Prerequisite: GPA 2.75.

SPMD 3650. Motor Development
3 Credits (3)
Covers development of motor skills from infancy through maturity. Focus on the principles of motor development, early motor behavior, stage theory, and assessment. Field experiences will augment lecture and readings.
Prerequisite: GPA 2.5.
SPMD 3710. Motor Learning
3 Credits (3)
An examination of the theoretical foundations and related literature that underline the learning, performing, and retention of motor skills with implications for effective teaching and coaching.

Prerequisite: GPA 2.5.

Learning Outcomes
1. Assess functional differences between motor skill types
2. Compare motor control theories and how they control human movement.
3. Critically evaluate current research in motor learning
4. Assess practice schedules and provide recommendations on how practice might be improved in both therapy and sport settings.
5. Compare the pros and cons for retention and transfer testing.
6. Examine the influence of attention on skill performance and debate the role of attention on motor skill preparation.

SPMD 4010. Orthopedic Examination, Evaluation and Diagnosis of Upper Extremity Injuries
4 Credits (3+1P)
Examine normal human anatomy, mechanisms of athletic injury, and deviation from normal anatomy following athletic injury to the upper extremity. Must maintain a 3.0 GPA. Consent of Instructor required.

Learning Outcomes
1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis, and treatment of injuries involving the upper extremity.
2. Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient.
3. Demonstrate knowledge and skills necessary to evaluate and provide immediate management of acute injuries.
4. Determine a therapeutic intervention designed to maximize the patient’s participation and health-related quality of life.
5. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries and optimize their patients’ overall health and quality of life.

SPMD 4015. Therapeutic Exercise
3 Credits (3)
The physiological effects, indications, contraindications, dosage, and maintenance of therapeutic modalities related to the treatment of athletic or activity-related injuries. Must maintain a 3.0 GPA. May be repeated up to 3 credits.

Learning Outcomes
1. Apply appropriate clinical reasoning to the selection of therapeutic exercises based upon evidence-based practice guidelines, relevant physical findings, indications, contradictions, and precautions.
2. Demonstrate appropriate application of therapeutic exercises and techniques including selection, application, patient instruction, and documentation.
3. Design an individualized therapeutic exercise program incorporating appropriate modifications for tissue repair timelines, physiological and psychological factors, and any additional clinical findings.
4. Demonstrate effective assessment skills to determine safe levels of physical activity for patients.

SPMD 4020. Orthopedic Examination, Evaluation and Diagnosis of Core, Spine and Head Injuries
3 Credits (3)
Advanced clinical assessment techniques and applications. Must maintain at least a 3.0 GPA. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes
1. Students will incorporate advanced clinical reasoning skills and apply clinical prediction rules as appropriate.
2. Interpret and apply physical examination findings for appropriate treatment or referral.
3. Apply clinical knowledge for diagnosing injuries and illness of the core, spine, head, and face.

SPMD 4025. Pharmacology in Athletic Training
2 Credits (2)
An introduction to general medical conditions and pharmacological applications in the athletic training setting. Emphasis on the laws governing the development and distribution, indications, contraindications, precautions, and interactions of prescription and over-the-counter medications. Must maintain a 3.0 GPA. May be repeated up to 2 credits.

Learning Outcomes
1. Describe the principles of pharmacology as they relate to the field of sports medicine.
2. Demonstrate the uses and abuses of drugs in sports.
3. Formulate a philosophical and ethical base of thinking in reference to the field of athletic training as it relates to pharmacology.
4. Describe federal, state and local laws, regulations and procedures for proper storage, disposal, transportation, dispensing and documentation for prescription and nonprescription medications.

SPMD 4030. Organization and Administration in Athletic Training
3 Credits (3)
An introduction to management, leadership, financial strategies, professional development and legal issues related to the athletic training setting. Must maintain 3.0 GPA. May be repeated up to 3 credits.

Learning Outcomes
1. Demonstrate mastery of health care management concepts.
2. Demonstrate comprehension of legal and ethical issue in Athletic Training and healthcare management.
3. Construct policies and procedures relevant to running an athletic training clinic or organization.
4. Summarize appropriate human resources policies relevant to athletic training staffing.
SPMD 4090. Clinical Practicum V
3 Credits (3)
Athletic training psychomotor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Must maintain a 3.0 GPA. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes
1. Utilize critical thinking skills and apply relevant clinical evidence in the evaluation, treatment and rehabilitation of athletic injuries of the upper extremity. Perform a comprehensive evaluation of the upper extremity to include the shoulder, elbow, forearm, wrist and hand; and then design a specific plan of treatment, and rehabilitation program for injuries and conditions of the upper extremity. Demonstrate an understanding of the referral process as warranted in situations dealing with athletic injuries. Demonstrate an understanding of professional communication as it relates to rehabilitation, plan of care documentation and the referral process. Demonstrate an understanding of the time commitment needed to perform as an ATC by completing the clinical hours required for this course.

SPMD 4093. Clinical Practicum VI
3 Credits (3)
Athletic training psycho-motor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Students might complete a general medical rotation with this course. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes
1. Recognition of general medical conditions including emergent physical and psychological conditions for intervention, referral or return to play criteria as appropriate. Demonstrate proper clinical examination techniques for the assessment of general medical conditions including signs and symptoms of catastrophic and emergent conditions. Develop and implement prevention strategies for at-risk individuals and large groups. Demonstrate professional communication skills as related to athletic training including both written and verbal communication. Define and utilize evidence-based practice in the clinical decision making process.

SPMD 4095. Clinical Practicum VII
3 Credits (3)
Athletic training psycho-motor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Students may complete a general medical rotation as part of this course. Must maintain a 3.0 GPA. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes
1. Be prepared to sit for the Board of Certification (BOC) examination. Confidently understand the BOC exam format, and method of delivery. Meet the requirements to maintain certification, including evidence based practice requirements and continuing education units and their reporting cycles. Demonstrate competence in the following educational content areas for the practice of Athletic Training: evidence-based practice, prevention and health promotion, clinical examination and diagnosis, acute care of injury and illness, therapeutic interventions, psychosocial strategies and referral, healthcare administration, professional development and responsibility.
SPMD 4250. Principles of Strength and Conditioning
3 Credits (3)
Application of research, theory, and methods of high-intensity, resistive overload training. Performance-specific topics include management, nutrition. Requires SPMD 2250 or SPMD 3410; GPA of 2.75.

Prerequisite: SPMD 2250 or SPMD 3410: GPA 2.75.

Learning Outcomes
1. Examine both applied and theoretical practices implemented towards various strength and conditioning concepts based on National Strength and Conditioning Association (NSCA) guidelines. Discuss various acute and chronic adaptations to the above said applied and theoretical practices to include, but not limited to, musculoskeletal adaptation, muscular power output, speed and agility characteristics, plyometric training, body composition characteristics, and cardiovascular characteristics, among many others. Recognize strength and conditioning adaptations regarding special populations, such as youth, female, and elderly populations.

SPMD 4250L. Principles of Strength and Conditioning Laboratory
1 Credit (2P)
An applied examination of the theory, principles, rules and regulations associated with various strength and conditioning exercises to include but not limited to Olympic lifting, powerlifting, bodybuilding, plyometrics, speed, agility and speed-endurance development. Lab required for Kinesiology majors. GPA of 2.75.

Prerequisite: SPMD 2250 or SPMD 3410; GPA 2.75.

Learning Outcomes
1. Examine applied practices towards various human performance concepts based on National Strength and Conditioning Association (NSCA) guidelines. Assess various physiological adaptations to the above applied practices, including muscular hypertrophy, muscular power output, speed and agility drills, plyometric training, body composition assessment, and non-traditional training modes, among numerous others. Demonstrate proficiency towards proper administration of performance assessments and exercises to participants of various skill levels as well as possess the capability of instruction and demonstration of said assessments and exercises.

SPMD 4350. Exercise Testing and Prescription
3 Credits (3)
This combined lecture and lab class introduces students to the scientific basis for and principles of exercise testing and prescription. The focus is on basic approaches to exercise testing and prescription for healthy adults, while application to some special populations with chronic disease will be discussed.

Prerequisite: SPMD 3410 or consent of instructor; GPA 2.75.

Learning Outcomes
1. Examine the appropriate administration of exercise tests for the assessment of health-related and performance-related fitness. Apply principles pertaining to appropriate exercise prescription for the general population of healthy adults. Analyze the psychological determinants of appropriate exercise programming. Demonstrate the ability of proper diagnosis and interpretation towards a standard 12-lead ECG reading, including heart rates, heart rhythms, and common arrhythmias. Assist every course participant in the preparation processes to sit for any of ACSM’s credential-based exams.

SPMD 4410. Exercise for Special Populations
3 Credits (3)
Fundamentals of kinesiology adapted for adults with various diseases and disabilities. Focus will be on the application of exercise assessment and prescription for selected conditions.

Prerequisite: SPMD 3410 or consent of instructor; GPA of 2.75.

Learning Outcomes
1. Pathophysiology of various cardiovascular, pulmonary, metabolic, skeletal muscle, orthopedic, and mental diseases. Diagnostic testing of various diseases. Medical management of various diseases. Exercise testing and prescription for a variety of chronic disease states.

SPMD 4450. Pathophysiology and Human Function(s)
3 Credits (3)
Students will discuss basic concepts of pathophysiology such as inflammation & repair, infectious diseases, neoplasms, and diseases of specific physiological systems. In addition, students will discuss a variety of case studies, and in so doing will be able to relate pathophysiologic conditions to symptoms, activity restrictions and disability.

Prerequisite: SPMD 2210; SPMD 2210L; SPMD 3410; GPA 2.75.

SPMD 4510. Neurophysiology and Human Function
3 Credits (3)
Students will discuss neurological control of human movement. Topics will include central and peripheral nervous system functions, with particular emphasis given to somatosensory afferent and motor efferent control. In addition, students will develop an understanding of the techniques employed to assess neurologic function in various patient populations.

Prerequisite: SPMD 2210; SPMD 2210L; SPMD 3410; and GPA of 2.75.

SPMD 4550. Exploring Extreme Human Performance
3 Credits (3)
A reading, writing and documentary based course studying human’s quest and the related sacrifices associated with participating in extreme performance activities such as the Olympics, wakeboarding, snowboarding, military special forces, ultra-run events, marathons, etc. Consent of Instructor required.

Prerequisite: Consent of instructor and GPA 2.75.

SPMD 4610. Research Seminar
3 Credits (3P)
Capstone course for Kinesiology/Pre-Health minors. Consent of Instructor required.

Prerequisite: GPA 2.75.

Learning Outcomes
1. The Student Learning Outcomes are dependent on instructor and specific direction of course with individual group of students, similar to an independent study/research/practicum experience.
SPMD 4805. Emergency Response
2 Credits (2)
Comprehensive approach to the identification of risk factors, preparation of emergency action plans, and recognition and care of emergency medical conditions including those that may lead to sudden death. This is a hybrid course combining online instructional components and clinical skills experience including clinical safety (blood-borne pathogens, ECC, first-aid, etc), and on-field emergency management. Consent of Instructor required.

Learning Outcomes
1. Identify the individuals involved in the Emergency Response Team
   Construct the components of an effective Emergency Action Plan.
   Assess the scene and patient during an emergency situation.
   Demonstrate proper universal precautions and wound care.
   Demonstrate effective Cardiopulmonary Resuscitation, AED use.
   Demonstrate effective Rescue Breathing Airway Management techniques. Demonstrate effective splinting techniques. Demonstrate understanding of the techniques utilized in cervical stabilization
   Identify components of acute care for general medical and orthopedic emergencies

SPMD 4997. Problems
1-3 Credits (1-3)
Independent study in either Kinesiology and/or Athletic Training May be repeated up to 9 credits.

Learning Outcomes
1. Varies

SPMD 4998. Internship
6 Credits (6P)
A part-time internship in an approved wellness, fitness, athletic, recreation, research lab or other program as agreed upon by the internship supervisor. The student will gain experience in all phases of management and operation. This is a 6-hour internship which can be repeated for an additional 6-credit hours at the same or a different location allowing the student to gain one or multiple field experiences. Field instructor supervision will oversee the students performance. This internship may require relocation to a site outside of the Las Cruces area.

Learning Outcomes
1. Students will apply their academic program didactic knowledge, skills and abilities at a professional site gaining hands-on learning experiences under the supervision of a practicing professional
   Students will learn in a working environment such that the internship becomes the capstone of their undergraduate education allowing them practical experience in a career field of their choice.

SPMD 5005. Foundations of Athletic Training
3 Credits (3)
This course provides an introduction to clinical decision making and covers standard techniques and procedures for the evaluation and diagnosis of musculoskeletal injuries and common illnesses, injury prevention concepts, documentation and management. Consent of Instructor required.

Learning Outcomes
1. Demonstration of clinical decision making skills Articulation of standard techniques and procedures for evaluation and diagnosis Produce standardized documentation of clinical findings.

SPMD 5010. Graduate Athletic Training Seminar I
1-3 Credits (1-3)
Advanced seminar topics in athletic training. Students will explore generalized topics within the field of athletic training under the direct supervision of a Commission on Accreditation of Athletic Training Education (CAATE) accredited Athletic Training Program. Students may engage in teaching and research opportunities in unique areas. Students may explore athletic training topics within the classroom or independently through designated resources May be repeated up to 3 credits.

Learning Outcomes
1. Demonstrate increased knowledge within the designated topic areas identified for the semester. Demonstrate increased skill in teaching or academic preparation techniques as identified for the semester.

SPMD 5015. Graduate Athletic Training Seminar II
1-3 Credits (1-3)
Advanced seminar topics in athletic training. Students will explore more specialized topics within the field of athletic training under the direct supervision of a Commission on Accreditation of Athletic Training Education (CAATE) accredited Athletic Training Program. Students should be prepared to further explore topics previously covered in SPMD 5310 (Graduate Athletic Training Seminar I) Students may engage in teaching and research opportunities in unique areas. Students may explore athletic training topics within the classroom or independently through designated resources. May be repeated up to 3 credits.

Learning Outcomes
1. Demonstrate increased knowledge within the designated topic areas identified for the semester. Demonstrate increased skill in teaching or academic preparation techniques as identified for the semester.

SPMD 5020. Graduate Athletic Training Research I
1-3 Credits (1-3)
Advanced research topics in athletic training. Students will explore research and evidence based practices within the field of athletic training. Students will work under the direct supervision of a Commission on Accreditation of Athletic Training Education (CAATE) accredited Athletic Training Program faculty member. Students should be prepared to further explore research topics within a specific discipline with the intent of disseminating and sharing information with the athletic training community. topics previously covered in SPMD 5310 (Graduate Athletic Training Seminar I) Students may engage in teaching and research opportunities in unique areas May be repeated up to 3 credits.

Learning Outcomes
1. Demonstrate increased knowledge within the designated topic areas identified for the semester. Demonstrate increased skill in assessing and conducting research for the athletic training community

SPMD 5025. Graduate Athletic Training I
1-3 Credits (1-3)
Advanced clinical experiences and education in athletic training. Students will examine topics in athletic training in conjunction with faculty members within the Commission on the Accreditation of Athletic Training Education (CAATE) Athletic Training Program at New Mexico State University . Assessment of Athletic Training Program clinical proficiencies as described by the National Athletic Trainers’ Association Education Council. May be repeated up to 3 credits.

Learning Outcomes
1. Demonstrate increased knowledge within the designated topic areas identified for the semester. Demonstrate increased skill in teaching or academic preparation techniques as identified for the semester.
SPMD 5030. Graduate Athletic Training II
3 Credits (3)
Advanced clinical experiences and education in athletic training. Assessment of Athletic Training Program clinical proficiencies as described by the National Athletic Trainers’ Association Education Council. May be repeated up to 3 credits.
Learning Outcomes
1. Demonstrate increased knowledge within the designated topic areas identified for the semester. Demonstrate increased skill in teaching or academic preparation techniques as identified for the semester.

SPMD 5050. Clinical Education I
3 Credits (3)
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice. Consent of Instructor required.
Learning Outcomes
1. Demonstrate basic evaluation, taping, bracing and emergency care skills. Select and properly fit protective equipment for a variety of injury and sport scenarios. Demonstrate proper equipment removal for emergency care of the injured athlete. Perform a pre-participation examination including physical evaluation, documentation and referral if needed.

SPMD 5120. Lower Extremity Injury Evaluation + Lab
4 Credits (4)
This course provides a comprehensive approach to the pathomechanics, clinical examination, diagnosis, role of clinical outcome measures and appropriate medical referral and treatment of orthopedic injuries and other conditions to the lower extremity. Consent of Instructor required.
Learning Outcomes
1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the lower extremity. Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries. Determine and apply therapeutic interventions designed to maximize the patient’s participation and health-related quality of life. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries.

SPMD 5150. Clinical Education II
3 Credits (3)
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.
Prerequisite: SPMD 5050.
Learning Outcomes
1. Students will become effective practitioners in the field of Athletic Training and Sports Medicine by utilizing critical thinking strategies based in evidence based practice theories combined with pedagogical knowledge of the concepts in Athletic Training. Students will utilize their clinical experience and knowledge of injury evaluation to enhance their athletic training skills working with an athletic population under the supervision of a preceptor.

SPMD 5180. Therapeutic Interventions I
4 Credits (3+1P)
Stud of physical rehabilitation theory and techniques used as therapeutic intervention for orthopedic injuries and conditions.
Learning Outcomes
1. Demonstrate appropriate application techniques for therapeutic modalities to include thermal, electrical, ultrasound and mechanical therapeutic modalities. Demonstrate proper clinical assessment techniques to establish treatment and rehabilitation plans for a variety of orthopedic injuries and conditions including proper documentation procedures. Demonstrate knowledge of the physiological and pathological processes of trauma, wound healing and tissue repair and their role/implications within the therapeutic intervention process.

SPMD 5205. Evidence Based Practice
2 Credits (2)
This course investigates the concepts of evidence based practice as it relates to musculoskeletal assessment, diagnosis and therapeutic interventions with a primary focus on clinician- and patient-oriented outcome measures and appropriate referral decisions. Students will explore primary literature focused on clinical questions related to a comprehensive approach to injury evaluation.
Learning Outcomes
1. Define evidence-based practice as it relates to athletic training clinical practice. Explain the role of evidence in the clinical decision-making process. Describe and differentiate the types of quantitative and qualitative research, research components, and levels of research evidence. Describe a systematic approach (eg, five step approach) to create and answer a clinical question through review and application of existing research. Develop a relevant clinical question using a pre-defined question format (eg, PICO= Patients, Intervention, Comparison, Outcomes; PIO = Patients, Intervention, Outcomes).

SPMD 5220. Upper Extremity Injury Evaluation + Lab
4 Credits (3+1P)
This course provides a comprehensive approach to the pathomechanics, clinical examination, diagnosis, role of clinical outcome measures and appropriate medical referral and treatment of orthopedic injuries and other conditions to the upper extremity. Consent of Instructor required.
Learning Outcomes
1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the upper extremity. Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries. Determine a therapeutic intervention designed to maximize the patient’s participation and health-related quality of life. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries and optimize their patient’s overall health and quality of life.
SPMD 5250. Clinical Education III
3 Credits (3)
Integration of clinical competencies during an immersive, supervised, field-based experience in athletic training to link theory into practice.
Prerequisite(s): SPMD 5150.
Learning Outcomes
1. Students will be proficient in the day-to-day operations of an athletic training room. This immersive experience will prepare students for future employment as full-time athletic trainers. Students will demonstrate skills in all aspects of athletic training including patient-centered care, clinical examination, diagnosis and intervention, prevention, health promotion and wellness and healthcare administration.

SPMD 5280. Therapeutic Interventions II
4 Credits (3+1P)
A detailed study of the physiological effects, indications, contraindication, dosage, and maintenance of modern therapeutic devices related to the treatment and rehabilitation of orthopedic injuries and conditions.
Prerequisite: SPMD 5180.
Learning Outcomes
1. Demonstrate proper clinical assessment techniques to establish treatment and rehabilitation plans for a variety of orthopedic injuries and conditions including proper documentation procedures. Demonstrate knowledge of the physiological and pathological processes of trauma, wound healing and tissue repair and their role/implications within the therapeutic intervention process. Design treatment plans based upon sound clinical assessment and appropriate selection of modalities that address the physiological and psychological needs of the patient. Demonstrate competence with the collection and analysis of baseline and post-treatment data to evaluate and interpret treatment outcomes based upon principles of evidence-based practice. Demonstrate competence with the application of a wide variety of modalities including patient preparation, modality application and modification based upon clinical findings using principles of evidence-based practice.

SPMD 5310. Inferential Statistics in Sports and Exercise Science
3 Credits (3)
This course serves to provide an introduction to statistical analyses. The conceptual framework of the course will allow for the application of a variety of statistical concepts in order to better understand the nature of data associated with scientific literature publications. Consent of Instructor
Learning Outcomes
1. Upon successful completion of this course the student will be able to competently assess exercise data using a variety of techniques that include measures of central tendency, variability, distributional assessments, correlation, regression, and mean testing (t-test and ANOVA).

SPMD 5350. Principles of Strength and Conditioning
3 Credits (3)
Application of research, theory, and methods of high-intensity, resistance training. Performance-specific topics include management, nutrition, exercise prescription, periodization, lifting techniques, testing, and evaluation. Course will emphasize standards set forth by the National Strength and Conditioning Association preparing students interested in sitting for the NSCA certification examinations. Consent of Instructor
Learning Outcomes
1. Understanding of general physiology and its responses to acute and chronic exercise Understanding of cardiovascular effects of exercise, training and sport Understanding of strength training affects on special populations such as youth, women and the elderly Understanding of musculoskeletal changes from exercise, training and sport Practicality and application of power and strength training Comprehension of training programs and how they pertain to different training aspects Demonstrate principles of plyometrics and training Understand and demonstrate principles of periodization

SPMD 5410. Biomechanics
3 Credits (3)
The application biomechanical analysis of human movement as it relates to human performance through the use of anatomical, mechanical and electrical concepts. Consent of Instructor
Learning Outcomes
1. The student will be able to competently assess physical anatomy, analyze linear and angular forces, examine gait, understand the relationships between kinetics and kinematics, understand how muscle and bone architecture impact human movement, and be familiar with the utilization of various data collection methods used in evaluating and improving human movement.

SPMD 5450. Exercise for Special Populations
3 Credits (3)
Fundamentals of kinesiology adapted for adults with various diseases and disabilities. Focus will be on the application of exercise assessment and prescription for selected conditions. Consent of Instructor
Learning Outcomes
1. To develop an understanding of the pathophysiology of various cardiovascular, pulmonary, metabolic, skeletal muscle, orthopedic, and mental diseases. To provide a medical perspective in the treatment and management of individuals with these conditions in which exercise therapy may be beneficial. To provide a sound understanding of exercise testing and prescription for a variety of chronic disease states. To be able to assess, interpret, and evaluate case studies of diseased individuals and to develop comprehensive rehabilitation programs based on this information. To develop the ability to articulate/present information of various diseases/conditions in a professional manner both formally and in a one-on-one setting.
SPMD 5510. Psychology of Sport  
3 Credits (3)  
Development of coaching techniques to enhance sport performance based on understanding and use of psychological principles. Consent of Instructor  
Learning Outcomes  
1. Identify psychological characteristics associated with peak performance. Describe and explain factors practitioners should consider when diagnosing, designing, and implementing a mental training intervention. Recognize and define the psychological constructs of—for example but not limited to—concentration, confidence, motivation, stress/anxiety, and arousal. Understand how personality attributes and the environment affect human performance and injury rehabilitation.

SPMD 5550. Skill Acquisition and Performance  
3 Credits (3)  
Behavioral and physiological examination factors that influence the acquisition and performance of motor skills. Consent of Instructor  
Learning Outcomes  
1. Describe and explain the principles and processes underlying skilled performance.Know the factors to consider when diagnosing, designing, and assessing learning experiences. Understand the elements of an effective instructional plan for skill acquisition.

SPMD 6005. Athletic Training Research I  
2 Credits (2)  
Instruction and development of research skills through the study of published reports and readings in athletic training and related fields. Consent of Instructor required.  
Learning Outcomes  
1. Describe a systematic approach (eg, five step approach) to create and answer a clinical question through review and application of existing research. Develop skill in utilizing multiple scales for critical appraisal of literature and research studies. Develop a relevant clinical question utilizing a predefined question format and conduct a literature review on the subject. Describe multiple forms of research, research and literature resources and the differences between narrative reviews, systematic reviews and meta analyses. Describe and apply concepts of diagnostic accuracy and clinical prediction rules as they pertain to patient centered care and evidence based practice.

SPMD 6010. Organization and Administration in Athletic Training  
2 Credits (2)  
Organization and administration of athletic training services including management, leadership, financial, human resources, facility, information technology and risk management.  
Learning Outcomes  
1. Students will employ values consistent with the NATA code of ethics for all health care administration actions. Demonstrate knowledge of legal, ethical and risk management concepts in athletic training and health care administration. Demonstrate mastery of a variety of health care management concepts. Demonstrate comprehension of fiscal management strategies, resource management and facility design as it relates to athletic training.

SPMD 6020. Evaluation of the Head, Neck, Spine and Torso  
3 Credits (3)  
This course provides a comprehensive approach to the pathomechanics, clinical examination, diagnosis, role of clinical outcome measures and appropriate medical referral and treatment of orthopedic injuries and other conditions to the head, neck and spine.  
Prerequisite: SPMD 5220.  
Learning Outcomes  
1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the head, neck, spine and torso. Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries and illnesses. Determine a therapeutic intervention designed to maximize the patient’s participation and health-related quality of life. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries and optimize their patients’ overall health and quality of life.

SPMD 6050. Clinical Education IV  
3 Credits (3)  
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.  
Prerequisite(s): SPMD 5150.  
Learning Outcomes  
1. Students will become effective practitioners in the field of Athletic Training and Sports Medicine by utilizing critical thinking strategies based in evidence based practice theories combined with pedagogical knowledge of the concepts in Athletic Training. Students will utilize their clinical experience and knowledge of injury evaluation to enhance their athletic training skills working with an athletic population under the supervision of a preceptor.

SPMD 6110. Professional Preparation  
3 Credits (3)  
Knowledge and skills for successful pursuit of athletic training credentials, employment and continuing professional competency; emphasis on current topics and issues contributing to the professional preparation of athletic training. Student must be enrolled in their final semester of the MSAT program to enroll in this course.  
Learning Outcomes  
1. Students will create a profile with the Board of Certification (BOC) in preparation for their BOC Examination. Students will analyze their individual strengths and weaknesses through practice examinations in order to prepare for a successful challenge of the BOC Examination. Students will demonstrate knowledge of basic human resources policies and procedures and the hiring process for athletic trainers. Students will self-assess professional competence and create professional development plans according to personal and professional goals and requirements.
SPMD 6150. Clinical Education V
3 Credits (3)
Integration of clinical competencies with classroom instruction and a supervised field-based experience in athletic training to link theory into practice.
Prerequisite(s): SPMD 6050.
Learning Outcomes
1. Students will become effective practitioners in the field of Athletic Training and Sports Medicine by utilizing critical thinking strategies based in evidence-based practice theories combined with pedagogical knowledge of the concepts in Athletic Training. Students will utilize their clinical experience and knowledge of injury evaluation to enhance their athletic training skills working with an athletic population under the supervision of a preceptor. Students will demonstrate professional behaviors congruent with the ethical standards of the profession of athletic training. Students will develop, implement, and revise policies that pertain to prevention, preparedness, and response to medical emergencies and other critical incidents.

SPMD 6280. General Medical Conditions & Therapeutic Medications
3 Credits (3)
Pathophysiology, assessment, and appropriate intervention and referral for general medical conditions and disabilities; common diagnostic tests and imaging assessment tools; commonly used therapeutic medications.
Prerequisite: SPMD 5280.
Learning Outcomes
1. Recognition of general medical conditions including emergent physical and psychological conditions for intervention, referral or return to play criteria as appropriate. Demonstrate proper clinical examination techniques for the assessment of general medical conditions including signs and symptoms of catastrophic and emergent conditions. Demonstrate knowledge of common therapeutic medications and the general medical conditions they treat within the fields of athletic training and sports medicine. Demonstrate knowledge of the principles of pharmacology, including pharmacokinetics and pharmacodynamics, as they relate to the fields of athletic training and sports medicine. Demonstrate knowledge of federal, state and local laws, regulations and procedures for proper storage, disposal, transportation, dispensing and documentation dealing with prescription and non-prescription medications.

SPMD 6310. The Social Construction of the Body
3 Credits (3)
This course will explore how people’s health and physical activity experiences and choices are often shaped by cultural narratives and expectations of the male and female body. Designed for graduate students in allied health and physical activity professions.

SPMD 6350. Advanced Exercise Physiology
3 Credits (3)
Detailed study of the integrated response of neuromuscular, cardiovascular and respiratory systems to acute and chronic exercise, nutrition and environmental conditions with a strong emphasis on laboratory experience. Consent of Instructor
Learning Outcomes
1. Fundamental concepts about nutrition and its application to human performance Advanced understanding of nutrition and its association with human bioenergetics Human bioenergetics and its responsibility for performance enhancement and outcomes Energy transfer and expenditure under various physical and environmental conditions Pulmonary and cardiovascular responses to exercise Cardiovascular and cellular adaptations to altitude

SPMD 6410. Cardiovascular Physiology
3 Credits (3)
This graduate level course provides an in-depth study of cardiovascular structure and function. The course assumes that students have a strong background in human physiology. Topics include, but are not limited to: cellular structure of the heart and vascular system; cardiac function, including electrophysiology of the heart; vascular function; neurohumoral control of the heart and circulation, organ blood flow, exchange function of the microcirculation; the impact of common cardiovascular diseases on cardiovascular structure and function, and cardiovascular adaptations to chronic exercise. Consent of Instructor
Learning Outcomes
1. The student will demonstrate a comprehensive knowledge cardiovascular structure and function The student will be able to relate common cardiovascular pathophysiology to cardiovascular functional impairments and physical functional limitations. The student will be able to discuss chronic exercise training adaptations on the cardiovascular system and their value as a treatment strategy for cardiovascular diseases.

SPMD 6450. Skeletal Muscle: Structure and Function
3 Credits (3)
Basic muscle morphology and physiology with molecular and cellular adaptations in skeletal muscle as consequences to varying exercise regimens. Consent of Instructor
Learning Outcomes
1. To gain knowledge of the structure and function of skeletal muscle To gain knowledge related to the skeletal muscle in reference to cellular and molecular responses and adaptations to exercise To understand laboratory procedures used to study muscle metabolism To develop ability to scientifically critique published papers and present them in a professional manner
Dance (DanceSport) - Bachelor of Arts in Dance

Students must complete all University degree requirements including General Education and Viewing a Wider World coursework. All students are required to take Dance Core Courses (which include, but are limited to, classes from all dance concentrations) and courses from their concentration area. Cross training develops dancers who are well rounded professionals, competitors, and teachers. The B.A. prepares students for a professional performance and/or teaching career, as well as the appropriate background to pursue advanced degrees in teaching, performance, choreography and other related fields. Grades of C- or better are required in Area 1: ENGL 1110G Composition I; Area II: Mathematics; as well as Dance Core Courses and Dance Concentration Courses. The College of Education requires a minimum GPA of 2.5 for graduation. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Students must complete a minimum of 120 credits with 48 credits in courses numbered 3000 (300) or above.

DanceSport or Ballroom Dance is the study of partner dancing in four different styles: Social or American Rhythm and Smooth and International Latin American and Standard Ballroom. This includes social dances such as Night Club, Two-Step, Salsa, Swing, Argentine Tango and more. This concentration trains students in dance techniques for careers in dance education (teaching), dance production and professional performance and competition.

The DanceSport concentration consists of 102 credits earned through General Education, VWW, Dance Core, Dance Technique in addition to 18 credits of Electives totaling a minimum of 120 credit hours.

### Departmental Requirements

**General Education**

- Student can take any general education course under each area as listed in the undergraduate course catalog. Courses that are required are listed here.
- Area I: Communications (10 credits)
  - ENGL 1110G Composition I
  - English Composition - Level 2
- Area II: Mathematics (3-4 credits)
- Area III/IV: Laboratory Sciences and Social/Behavioral Sciences (10-11 credits)
  - Area III: Laboratory Sciences Course (4 credits)
  - Area IV: Social/Behavioral Sciences Course (3 credits)
  - Either an Area III/IV: Laboratory Sciences Course or Social/Behavioral Sciences Course (3 or 4 credits)
- Area V: Humanities (3 credits)
- Area VI: Creative and Fine Arts (3 credits)
- DANC 1110G Dance Appreciation (Required)
- General Education Elective (Must have a “G” distinction) (3-4 credits)
- Viewing A Wider World (6 credits)

**Dance Requirements**

- All dance majors regardless of concentration are required to take the following courses:
  - DANC 1130 Ballet I or DANC 2130 Ballet II
  - DANC 1140 Introduction to Flamenco and Classical Spanish Dance or DANC 2140 Flamenco II
  - DANC 1150 Modern Dance I or DANC 2150 Modern Dance II
  - DANC 2142 Classical Spanish II

**Dance (DanceSport) - Bachelor of Arts in Dance**

Students must complete all University degree requirements including General Education and Viewing a Wider World coursework. All students are required to take Dance Core Courses (which include, but are limited to, classes from all dance concentrations) and courses from their concentration area. DANC Elective Course(s) 3-10
Electives, to bring the total credits to minimum of 120 4 18

Total Credits 120

Elective credit may vary based on General Education course selection, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Students who choose to complete the elective credits with a Minor from another department/program will have to meet the minimum number of credits that are required for that minor. This may increase the total number of credits for graduation.

A Suggested Plan of Study for Students - Even Start Year

This roadmap assumes student placement in MATH 1130G Survey of Mathematics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

---

5

Students who choose to complete the elective credits with a Minor from another department/program will have to meet the minimum number of credits that are required for that minor. This may increase the total number of credits for graduation.

*Elective credit could also be more or less than what is listed based on the General Education course selection.

A Suggested Plan of Study for Students - Odd Start Year

### Total Credits
| Credits | 120-127 |

These courses may have prerequisites and/or co-requisites, and it is the students’ responsibility for checking and fulfilling all those requirements.

See the General Education (p. 88) section of the catalog for a full list of courses.

See the Requirements (p. 1114) tab for a full list of courses that meet the DanceSport Techniques Course requirement.

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

Students who choose to complete the elective credits with a Minor from another department/program will have to meet the minimum number of credits that are required for that minor. This may increase the total number of credits for graduation.

*Elective credit could also be more or less than what is listed based on the General Education course selection.*

### Dance (Contemporary Dance) - Bachelor of Arts in Dance

Students must complete all University degree requirements including General Education and Viewing a Wider World coursework. All students are required to take Dance Core Courses (which include, but are limited to, classes from all dance concentrations) and courses from their concentration area. Cross training develops dancers who are well rounded professionals, competitors, and teachers.

The B.A. prepares students for a professional performance and/or teaching career, as well as the appropriate background to pursue advanced degrees in teaching, performance, choreography and other related fields. Grades of C- or better are required in Area 1: ENGL 1110G Composition I, Area II: Mathematics; as well as Dance Core Courses and Dance Concentration Courses. The College of Health, Education and Social Transformation requires a minimum GPA of 2.5 for graduation. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Contemporary Dance is the study of ballet, modern, hip hop, jazz, and tap. Students are trained in dance technique, dance education (teaching) and dance production. This concentration prepares dancers for pursuit of an advanced degree or a professional and/or teaching career.

Students must complete a minimum of 120 credits with 48 credits in courses numbered 3000 (300) or above. The Contemporary Concentration consists of 102 credits earned through General Education, VWW, Dance Core, Dance Technique in addition to 18 credits of Electives totaling a minimum of 120 credit hours.

<tbody>
<tr>
<td>All dance majors regardless of concentration are required to take the following courses</td>
</tr>
<tr>
<td>Dance 1130</td>
</tr>
<tr>
<td>or Dance 2130</td>
</tr>
</tbody>
</table>
A Mathematics General Education course is required for the degree but students may need to take any prerequisites needed to enter the Mathematics course of their course.

3

See the Viewing a Wider World (p. 92) Section of the catalog for a full list of courses.

4

Elective credit may vary based on General Education course selection, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

5

Students who choose to complete the elective credits with a Minor from another department/program will have to meet the minimum number of credits that are required for that minor. This may increase the total number of credits for graduation.

### A Suggested Plan of Study for Students - Even Start Year

This roadmap assumes student placement in MATH 1130G Survey of Mathematics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Students who choose to complete the elective credits with a Minor from another department/program will have to meet the minimum number of credits that are required for that minor. This may increase the total number of credits for graduation.

*Elective credit could also be more or less than what is listed based on the General Education course selection.

Kinesiology (Exercise Science) - Bachelor of Science in Kinesiology

The Bachelor of Science in Kinesiology degree program can be completed in one of three concentration areas: Exercise Science, Performance Psychology or Physical Education. For the required number of concentration area credit hours see the program descriptions below. Regardless of the concentration, students are required to complete 120 total semester hours for the Kinesiology degree. Additionally, students pursuing a Kinesiology degree will be responsible to ensure that they complete 48 upper division credits (3000 (300) and 4000 (400) level courses). Kinesiology students must maintain a minimum 2.75 GPA in order to enroll in most upper division SPMD courses. ENGL 1110G, Area II courses, Kinesiology Core courses, Concentration Area courses and Approved Electives must be completed with a grade of C- or better.

Successful completion of the Kinesiology degree will support a variety of careers in health sciences, biomedical research, and teaching.

Information about Kinesiology and potential employment opportunities may be obtained at the Department of Kinesiology and Dance in the Activity Center 204, phone 646-2215.

Students must complete all University degree requirements, which include: General Education, Viewing a Wider World, and program specific courses to total a minimum of 120 credits with 48 credits in courses numbered 3000 (300) or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Exercise Science Concentration is the preferred pathway for anyone seeking careers in Allied Health Fields (e.g. Medical Doctor, Doctor Osteopathic, Physical/Occupational Therapy, Chiropractic, Physicians Assistant, Athletic Training, etc.) as well as Human Performance (e.g. Strength and Conditioning, Corporate Fitness, Personal Training)

---

**Kinesiology (Performance Psychology) - Bachelor of Science in Kinestiology**

The Bachelor of Science in Kinesiology degree program can be completed in one of three concentration areas: Exercise Science, Performance Psychology or Physical Education. For the required number of concentration area credit hours see the program descriptions below. Regardless of the concentration, students are required to complete 120 total semester hours for the Kinesiology degree. Additionally, students pursuing a Kinesiology degree will be responsible to ensure that they complete 48 upper division credits (3000 (300) and 4000 (400) level courses). Kinesiology students must maintain a minimum 2.75 GPA in order to enroll in most upper division SPMD courses. ENGL 1110G, Area II courses, Kinesiology Core courses, Concentration Area courses and Approved Electives must be completed with a grade of C- or better.

Successful completion of the Kinesiology degree will support a variety of careers in health sciences, biomedical research, and teaching.

Information about Kinesiology and potential employment opportunities may be obtained at the Department of Kinesiology and Dance in the Activity Center 204, phone 646-2215.

Students must complete all University degree requirements, which include: General Education, Viewing a Wider World, and program specific courses to total a minimum of 120 credits with 48 credits in courses numbered 3000 (300) or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

With a concentration in Performance Psychology, students can also receive a Minor in Psychology. Official Minor documentation and verification of completion must be approved through the Department of Psychology.

Electives, to bring the total credits to 120 |

### Total Credits | 120-122 |

1. See the General Education (p. 88) section of the catalog for a full list of courses.
2. A Mathematics General Education course is required for the degree but students may need to take any prerequisites needed to enter the course of their choosing first.
3. Students who select A ST 311 Statistical Applications or SPMD 3350 Inferential Statistics in Sport and Exercise Science will need to take an additional General Education course to complete the requirement.
4. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.
5. Courses used for PSY minor cannot also be used for credit as electives.
6. A list of approved electives can be found on the degree plans.

Degree plans can be found at 1) Center for Academic Advising and Student Support (Garcia Annex), 2) College of Education (O’Donnell Hall) Advising Center, 3) Kinesiology Website (https://kind.nmsu.edu/kin/ (https://kind.nmsu.edu/)).

### A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

These courses may have prerequisites and/or co-requisites, and it is the students responsibility for checking and fulfilling all those requirements.

See the General Education (p. 88) section of the catalog for a full list of courses.

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

A list of approved electives can be found at [https://kind.nmsu.edu/kin/](https://kind.nmsu.edu/).
With a concentration in Physical Education and successfully meeting state requirements, students will be eligible to teach in the school system (e.g. Elementary, Middle and High School settings).

Total Credits: 18

1. Official minor documentation must be completed with the Department of Kinesiology and Dance. Upon completion of all coursework, final signature approval must be obtained by the Department Head or Kinesiology Program Director.

2. Many courses above such as SPMD 3410, SPMD 3450, SPMD 3450L, SPMD 3710, SPMD 4210, SPMD 4250, SPMD 4250L, SPMD 4350 and SPMD 4410 all require SPMD 2210 Anatomy and Physiology I as a prerequisite.

Athletic Training - Master of Science

The Master of Science in Athletic Training program will begin admitting students into the program starting Spring 2023 as they move curriculum to align with the change in licensure requirements. Interested students can contact the Athletic Training Program Director, Kim O'Connell (kbrock@nmsu.edu).

The MSAT program at NMSU will consist of a minimum of 60 credit hours of coursework to be completed primarily in the home department of KinD at NMSU through both traditional and hybrid courses. The program provides a two (2) year comprehensive exposure to AT using a three-faceted approach. In developing the proposed MSAT curriculum for NMSU, the curricula of 18 other AT graduate level professional programs (see section 3.5 for a list of schools), along with CAATE educational standards, were reviewed to guide the current MSAT proposal. The three-faceted approach includes the following:

1. In-class components that provide the theoretical and laboratory coursework background in the areas of injury prevention and care,
injury evaluation and treatment, and therapeutic interventions of athletic injuries.

2. Clinical components that provide a progressive approach with observation, integrative and immersive experiences in clinical settings both on and off-campus internships.

3. A capstone component that will be the successful challenge of the national Board of Certification (BOC) exam.

**Kinesiology - Doctor of Philosophy Coursework**

The PhD in Kinesiology requires a minimum of 36 credit hours of formal coursework (beyond a masters degree) and an expected 24 credit hours of research and dissertation work. Thus, the minimum expected credit hour accumulation is 60 credit hours.

At least 12 credit hours must come from graduate courses in the department of Kinesiology and Dance, and the student must have at least one course in each of the foundational knowledge content areas (CA) in Kinesiology, including:

1. Relationships among physical activity, health and quality of life
2. Scientific foundations for study of physical activity and human movement
3. Social, cultural and historical context of the study of physical activity
4. Practice of physical activity

At least 12 credit hours must be taken in research methodologies, at least 3 credits of which must be in experimental statistics, and at least 3 credits from a qualitative methods course(s). There are many options for these courses on the NMSU campus that will permit the student to meet this requirement.
The remaining 12 credit hours are taken at the direction of the student’s advisor and committee, and agreed upon at the time of the student’s qualifying exam (see below).

Examinations
Students seeking the Doctor of Philosophy degree in Kinesiology must pass a (1) Qualifying Examination that must be completed before accumulating more than 24 credit hours towards their degree, a (2) Comprehensive Exam including written and/or oral elements that must be completed prior to beginning a final dissertation project, and a (3) Final Exam that features the defense of their final dissertation study.

Dissertation
The candidate for the degree of Doctor in Philosophy in Kinesiology must complete a dissertation in a focused area of study. The student and his/her committee members must agree upon the dissertation topic and approval of the dissertation requires consent of the plurality of the student’s committee members. The student must complete a minimum of 18 dissertation credit hours.

Nursing
Undergraduate Program Information
NMSU’s School of Nursing (SON) offers a Bachelor of Science in Nursing (BSN) degree. The degree plan provides two options to accommodate either the beginning nursing student and the beginning nursing student with a baccalaureate degree in another major. Students graduating from the two options are eligible to take the NCLEX-RN® examination for licensure as a registered nurse upon completion of their program of studies. This BSN degree is also offered at two additional satellite sites at NMSU Grants, NM and NMSU Alamogordo, NM.

The BSN degree program is approved by the New Mexico Board of Nursing and accredited by the Commission on Collegiate Nursing Education (CCNE). Approval by the New Mexico Board of Nursing is required for graduates to be eligible to take the National Council Licensure Examination (NCLEX-RN®) for licensure as a registered nurse. Accreditation by the CCNE assures prospective students and employers that the program has met national education standards.

The NMSU SON is a full member of the New Mexico Nursing Education Consortium (NMNEC) and offers the NMNEC BSN curriculum.

NMSU pre-nursing and transfer students should contact the pre-nursing advisors in the Center for Academic Advising and Student Support (CAASS) at Garcia Center for information on the pre-nursing curriculum. Second degree students should contact the School of Nursing Advising Center (https://schoolorfnursing.nmsu.edu/nursing/son-pages/SON-Advising-Center.html) to determine eligibility for the Pathways or Roadrunner options. Contact the School of Nursing Advising Center (https://schoolorfnursing.nmsu.edu/nursing/son-pages/SON-Advising-Center.html) for the BSN program application (all options) and information about the HESI A2 Entrance Exam, Military students, and specific questions about the nursing program.

School of Nursing Advising Office: HSS 110, 575-646-3812, nursing@nmsu.edu

Application and Admission Requirements: Traditional 4-year BSN Program
Application and admission requirements for the four-year BSN program are as follows:

1. Obtain admission to NMSU.
2. Satisfy NMSU basic academic competency requirements in English and Math.
3. Completed or in the last semester of nursing prerequisite courses (see BSN degree plan (https://schoolorfnursing.nmsu.edu/nursing/son-pages/BSN-4-Sem-Degree-plan-2022-2023-revised-2021-11-11.pdf)).
4. Prerequisite science courses must have been completed within the past seven years at the time of application.
5. Minimum nursing prerequisite course GPA 2.75 or above, which includes grades earned from all higher education institutions.
6. Minimum of C- grade in all prerequisite and general education courses
8. Submit a complete BSN program application and all supporting documents by the program deadline (see below). No incomplete applications will be considered.
Students should meet with a School of Nursing advisor to determine eligibility to apply to the five-semester BSN program and to obtain the BSN program application.

Application deadlines:

- February 1st—for consideration for Fall admission to the nursing major (Las Cruces campus Roadrunner option)
- September 1st—for consideration for Spring admission to the nursing major (Las Cruces Pathways applicants only)

For more information on the application/admission policies and procedures, please visit the School of Nursing website (https://schoolofnursing.nmsu.edu/nursing/son-pages/bsn-program.html).

NOTES: Admission to the BSN program is competitive and available seats in each class are limited. Admission scores are based primarily on nursing prerequisite GPA and scores on the HESI A2 Entrance Exam. Any applicant not admitted to the nursing major may reapply during the next admission cycle. Applicants for fall semester admission may not finish nursing prerequisites in the summer session immediately preceding the fall semester in which they wish to be admitted.

Application and Admission Requirements: Second Degree Options (Roadrunner and Pathways)

The Nursing Program offers two options for 2nd degree seeking students. Both programs are designed for students who already have a Bachelor's degree in another major but would like to pursue a Bachelor of Science in Nursing (BSN). The Roadrunner option starts in the summer semester and is completed in 19 months. Students in the Pathways option are admitted with the traditional 4-year BSN students in fall and spring semesters. Please refer to the School of Nursing website (https://schoolofnursing.nmsu.edu/nursing/son-pages/2nd-degree-BSN-options.html) for more information about the two options.

Application and admission requirements for the Roadrunner and Pathways BSN options are as follows:

1. Obtain admission to NMSU as a second bachelor's degree-seeking student.
2. Have a minimum GPA of 3.0 on a 4.0 scale for first bachelor's degree.
3. Achieve a B grade in all nursing prerequisite courses: Anatomy and Physiology or A&P I and A&P II (8 credits), Microbiology with lab, and Statistics (3 credits). Roadrunner applicants must have completed Pathophysiology (4-6 credits) prior to the start of the program.
4. Nursing prerequisite courses must not be older than 7 years at the time of application. Pathway applicants must complete at least two prerequisites prior to application. Roadrunner applicants must complete three prerequisites prior to application.
5. Completion of the HESI-A2 Admission Exam (https://schoolofnursing.nmsu.edu/nursing/son-pages/bsn-program.html) (Biology, Chemistry, Math and all English sections) by the application deadline with a score of > 75% in each section.
6. Submit a complete BSN program application and all supporting documents by the program deadline (see below). No incomplete applications will be considered.

Application deadlines:

- February 1st—for consideration for Fall admission to the nursing major (Las Cruces, Grants and Alamogordo Pathways applicants)
leadership, policy advocacy, informatics, and systems thinking. Nurses with the DNP degree are prepared to lead efforts to make healthcare system changes and improve patient outcomes. Nurses with the MSN degree who are working in APRN or non-APRN roles are encouraged to apply. Upon admission, a review of supervised contact hours obtained in the MSN degree will be conducted. Students will be notified regarding the number of supervised clinical contact hours required in the program to meet the minimum requirement of 1000 supervised total contact hours.

BSN-DNP

The BSN Doctor of Nursing Practice (DNP) option allows baccalaureate-prepared RNs to assume advanced practice nursing (APRN) roles within the health care arena in the following specialty areas: Family Nurse Practitioner, Psychiatric-Mental Health Nurse Practitioner and Nurse Anesthesiology. In this DNP concentration, students must take courses in advanced pathophysiology, advanced assessment, and advanced pharmacology, in addition to specialty courses within their area of study. The clinical training consists of over 1000 supervised clinical contact hours completed in the student’s clinical specialty and related areas.

Please visit the School of Nursing website (https://schoolofnursing.nmsu.edu/nursing/son-pages/DNP-Program.html) or contact the Nursing Graduate Advisor for more information about application and admission requirements at 575-646-7770.

Application deadline: March 15th for a fall semester start

Post-Graduate APRN Certificates

This program is for currently certified Master’s or doctorally-prepared nurse practitioners, certified nurse midwives, and certified registered nurse anesthetists who wish to obtain the coursework needed to sit for certification in another specialty Post-Graduate certificates are offered in the following specialties: Family Nurse Practitioner and Psychiatric-Mental Health Nurse Practitioner.

Please visit the School of Nursing website (https://schoolofnursing.nmsu.edu/nursing/son-pages/APRN-Program.html) or contact the Nursing Graduate Advisor for more information about application and admission requirements at (575) 646-7770.

Application deadline: March 15th for a fall semester start

PhD in Nursing Science Degree

The intent of the nursing PhD program is to prepare individuals who can assume leadership roles in academia, to support scholarship in teaching, research, and professional service activities. The focus of the program is on nursing scholarship that promote the development of new knowledge directed at improving nursing care outcomes for individuals, families, communities and systems. Holistic nursing scholarship as it relates to improving the care of individuals, families, groups and communities experiencing or at risk for health disparities is emphasized. Students in the PhD program complete a dissertation.

The School of Nursing is not currently admitting students to the PhD in Nursing Science degree program.

Degrees for the Department

Bachelor Degree(s)

Nursing - Bachelor of Science in Nursing (p. 1154)

Master Degree(s)

Nursing Leadership and Administration - Master of Science in Nursing (Online) (p. 1157)

Doctoral Degree(s)

Nursing Practice - Doctor of Nursing Practice (Online) (p. 1157)

Nursing Practice (Family Nurse Practitioner) - Doctor of Nursing Practice (Online) (p. 1158)

Nursing Practice (Nurse Anesthesiology) - Doctor of Nursing Practice (http://catalogs.nmsu.edu/nmsu/health-education-social-tranformation/nursing/nursing-practice-nurse-anesthesiology-dnp/) (p. 1159)

Nursing Practice (Population Health Leadership) - Doctor of Nursing Practice (Online) (MSN-DNP track) (p. 1159)

Nursing Practice (Psychiatric/Mental Health Nurse Practitioner) - Doctor of Nursing Practice (Online) (p. 1160)

Post Graduate APRN Certificate(s)

Family Nurse Practitioner - Post-Masters Certificate (APRN) (Online) (p. 1161)

Psychiatric/Mental Health Nurse Practitioner - Post Graduate Certificate (APRN) (Online) (p. 1162)

NMNC 3110. Introduction to Nursing Concepts
3 Credits (3)
This course introduces the nursing student to the concepts of nursing practice and conceptual learning. Same as NMNC course number: NMNC 1110. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.
Corequisite: NMNC 3120, NMNC 3135.
Learning Outcomes
1. Integrate knowledge from nursing pre- and co-requisites into a conceptual learning model. Apply conceptual learning to select nursing concepts. Define personal values, beliefs, and attitudes about health and wellness. Describe importance of identifying patient safety issues. Describe roles and values of nursing and members of the health care team. Describe standards and regulations that apply to nursing practice.

NMNC 3120. Evidence-Based Practice
3 Credits (3)
The focus of this course is the principles of evidence-based nursing practice. It includes the identification of clinical practice problems, the evaluation of available evidence, and the integration of evidence with clinical expertise and patient preferences in application to practice. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.
Corequisite: NMNC 3110, NMNC 3135.
Learning Outcomes
1. Examine integrating evidence-based practice with diverse patients’ values. Identify clinical practice problems and issues. Explain the research process. Describe how evidence is generated through the research process. Appraise evidence and standards of care that support best clinical outcomes and patient safety. Utilize informatics to access evidence-based practice guidelines.

NMNC 3135. Principles of Nursing Practice
4 Credits (4)
This course introduces the nursing student to the application of concepts through clinical skills in seminar, laboratory, and/or clinical settings. Principles of communication, assessments, safety, and interventions including accurate calculation, measurement, and administration of medications will be included. Same as NMNC course number: NMNC 1135. Restricted to: BSN, BSNP, and BSNR Majors. May be repeated up to 4 credits.
Corequisite: NMNC 3110, NMNC 3120.
Learning Outcomes
1. Describe the different types and characteristics of communication in professional nursing practice. Utilize the concepts presented in Level One nursing courses in the application to the care of the patient. Demonstrate the principles of safety during the implementation of nursing skills. Demonstrate the learned skills in patient based scenarios. Utilize the nursing process to provide safe and effective care.

NMNC 3210. Health and Illness Concepts I
3 Credits (3)
This course will focus on health and illness concepts across the lifespan. Concepts covered are related to homeostasis/regulation, sexuality/reproductive, protection/movement, and emotional processes. Same as NMNC course number: NMNC 1210. May be repeated up to 3 credits.
Prerequisite: NMNC 3110, NMNC 3120, NMNC 3135.
Corequisite: NMNC 3220, NMNC 3230, NMNC 3235.
Learning Outcomes
1. Describe the scope, risk factors, physiologic processes, attributes, and clinical management of selected concepts and exemplars across the lifespan. Discuss evidence-based practices and health care standards of care related to the concepts/exemplars of the course. Explain the collaboration necessary related to the concepts/exemplars of the course. Utilize informatics and resources related to the concepts/exemplars of the course. Integrate considerations of normal physiology and healthy adaptations into nursing practice of patients across the lifespan.

NMNC 3220. Health Care Participant
3 Credits (3)
This course introduces the nursing student to the attributes of the health care participant as an individual, a family, or a community. Same as NMNC course number: NMNC 1220. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.
Prerequisite: NMNC 3110, NMNC 3120, NMNC 3135.
Corequisite: NMNC 3210, NMNC 3230, NMNC 3235.
Learning Outcomes
1. Identify values, beliefs and attitudes toward health and illness of the health care recipient. Articulate the role of nursing in relation to the health of vulnerable populations and elimination of health disparities. Describe the protective and predictive factors which influence the health of families, groups, communities, and populations. Describe the use of evidence-based practices to guide health teaching, health counseling, screening, outreach, disease and outbreak investigation, referral, and follow-up throughout the lifespan. Describe the use of information and communication technologies in preventive care. Examine the health care and emergence preparedness needs of the local community and in the state of New Mexico. Identify clinical prevention and population-focused interventions with attention to effectiveness, efficiency, cost-effectiveness, and equity.
NMNC 3230. Nursing Pharmacology
3 Credits (3)
This course introduces the nursing student to pharmacologic nursing practice from a conceptual approach. Same as NMNC course number: NMNC 1230. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.
Prerequisite: NMNC 3110, NMNC 3120, NMNC 3135.
Corequisite: NMNC 3210, NMNC 3220, NMNC 3235.
Learning Outcomes
1. Identify the nurse’s professional role related to pharmacotherapeutics in diverse populations across the lifespan. Identify safety issues and minimize risk potential associated with pharmacotherapeutics and complementary and alternative medicine. Utilize evidence-based information integrating pharmacologic and pathophysiologic concepts to guide medication therapeutics. Describe healthcare system protocols related to pharmacotherapeutics. Identify methods of communication with the healthcare team related to pharmacotherapeutics. Utilize informatics systems related pharmacotherapeutics. Describe common classes of drugs that are used in health care, including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics.

NMNC 3235. Assessment and Health Promotion
4 Credits (4)
This course introduces the nursing student to the assessment of and the health promotion for the health care participant as an individual, a family, or a community. This course uses seminar, laboratory and/or clinical settings. Same as NMNC course number: NMNC 1235. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 4 credits.
Prerequisite: NMNC 3110, NMNC 3120, NMNC 3135.
Corequisite: NMNC 3210, NMNC 3220, NMNC 3230.
Learning Outcomes
1. Assess physical health including a focus on the health/illness beliefs, values, attitudes, developmental level, functional ability, culture, and spirituality of the participant. Assess family health including a focus on family health history, environmental exposures, and family genetic history to identify current and future health problems. Collaborate with a community to assess their health needs. Utilize community assessment data and evidence-based practice as basis for identifying community health needs. Document health assessments in electronic health record or written formats. Share community assessment data with other health care professionals to identify needed interventions. Explain the role of the nurse in relation to advocacy for the health care recipient. Analyze education materials for health literacy concerns.

NMNC 4310. Health & Illness Concepts II
3 Credits (3)
This course covers health and illness concepts across the lifespan with the focus on chronic conditions. Concepts covered are related to oxygenation and hemostasis, homeostasis and regulation, protection and movement, and cognition and behavior processes. Same as NMNC course number: NMNC 2310. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.
Prerequisite: NURS 328, NMNC 3210, NMNC 3220, NMNC 3230, NMNC 3235.
Corequisite: NMNC 4320, NMNC 4335.
Learning Outcomes
1. Relate the scope, risk factors, physiologic processes, attributes, and clinical management of selected concepts and exemplars across the lifespan. Investigate evidenced-based practice, standards of nursing care, and factors to improve safety related to selected concepts and exemplars. Examine how members of the health care team collaborate in the delivery of care related to selected concepts and exemplars. Discuss available technology for the delivery of nursing care related to selected concepts and exemplars. Apply selected health and illness concepts to the nursing care of patients across the lifespan.

NMNC 4320. Professional Nursing Concepts I
3 Credits (3)
This course covers foundational concepts for professional development, including selected professional attributes and care competencies. Same as NMNC course number: NMNC 2320. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.
Prerequisite: NURS 328, NMNC 3210, NMNC 3220, NMNC 3230, NMNC 3235.
Corequisite: NMNC 4310, NMNC 4335.
Learning Outcomes
1. Examine the ethical values, virtues, principles, and policies that guide the moral delivery of health care. Relate the nurse’s interpretation of patient needs, concerns, and health problems with nursing decisions. Discuss the factors which motivate individuals, groups, and organization to deliver quality nursing care. Determine how interactions of healthcare team members provide quality patient care.
NMNC 4335. Care of Patients with Chronic Conditions
4 Credits (8P)
The focus of this course is to provide safe, evidence-based nursing care for patients with chronic conditions, across the lifespan in a variety of settings. This course builds upon curricular concepts. This course is a combination of lab and clinical. Same as NMNC course number: NMNC 2335. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 4 credits.
Prerequisite: NURS 328, NMNC 3210, NMNC 3220, NMNC 3230, NMNC 3235.
Corequisite: NMNC 4310, NMNC 4320.
Learning Outcomes
1. Demonstrate ethical practice in the delivery of nursing care to patients with chronic conditions. Apply understanding of the principles of safe nursing care for patients with chronic conditions. Demonstrate knowledge of appropriate evidence-based protocols when providing nursing care to patients with chronic conditions. Apply understanding of appropriate health care policy, finance, and regulatory environments in the care of patients with chronic conditions. Communicate effectively with patients with chronic conditions and health care team members. Demonstrate an understanding of the technology used in the care of patients with chronic conditions. Utilize the nursing process to deliver nursing care to patients with chronic conditions.

NMNC 4410. Health & Illness Concepts III
4 Credits (4)
This course will cover health and illness concepts, with the focus on acute conditions across the lifespan. Concepts covered are related to homeostasis/regulation, oxygenation/hemostasis, protection/movement, and emotional processes. Same as NMNC course number: NMNC 2410. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 4 credits.
Prerequisite: NMNC 4310, NMNC 4320, NMNC 4335.
Corequisite: NMNC 4410, NMNC 4445.
Learning Outcomes
1. Anticipate health care participant’s risk for potentially harmful situations related to the concepts/exemplars of the course. Integrate evidence-based practices and health care standards of care related to the concepts/exemplars of the course. Differentiate the multiple roles of the health care team related to the concepts/exemplars of the course. Integrate use of appropriate technology related to the concepts/exemplars of the course. Integrate risk factors, concepts, physiologic processes, patient attributes, and clinical management of the exemplars covered in this course.

NMNC 4435. Clinical Intensive I
4 Credits (4)
This is the first of two Level Four clinical courses in which the student will apply the curricular concepts in the management of care participants with acute conditions across the lifespan. Same as NMNC course number: NMNC 2435. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 4 credits.
Prerequisite: NMNC 4310, NMNC 4320, NMNC 4335.
Corequisite: NMNC 4410, NMNC 4445.
Learning Outcomes
1. Integrate nursing practice concepts into their professional nursing practice. Integrate diverse patient values into plan of care for patients with acute illness. Interpret and analyze factors and system contributions that impact the quality and safety of nursing practice. Integrate an evidence-based approach in the delivery and evaluation of nursing care to acutely ill patients across the lifespan. Evaluate the use of policies and procedures within the acute care settings. Effectively collaborate with the health care team in the delivery of patient care. Integrate use of appropriate technology for the delivery of nursing care to acutely ill patients.

NMNC 4445. Clinical Intensive II
4 Credits (4)
This is the second of two Level Four clinical courses in which the student will apply the curricular concepts in the management of care participants with acute conditions across the lifespan. Same as NMNC course number: NMNC 404. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 4 credits.
Prerequisite: NMNC 4310, NMNC 4320, NMNC 4335.
Corequisite: NMNC 4410, NMNC 4445.
Learning Outcomes
1. Integrate nursing practice concepts into their professional nursing practice. Integrate diverse patient values into plan of care for patients with acute illness. Interpret and analyze factors and system contributions that impact the quality and safety of nursing practice. Integrate an evidence-based approach in the delivery and evaluation of nursing care to acutely ill patients across the lifespan. Evaluate the use of policies and procedures within the acute care settings. Effectively collaborate with the health care team in the delivery of patient care. Integrate use of appropriate technology for the delivery of nursing care to acutely ill patients.

NMNC 4510. Concept Synthesis
3 Credits (3)
This course focuses on the synthesis of curricular concepts in the care of complex patients. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.
Prerequisite: NMNC 4410, NMNC 4435, NMNC 4445.
Corequisite: NMNC 4520, NMNC 4535, NMNC 4545.
Learning Outcomes
1. Synthesize curricular concepts into patient-centered nursing practice that is appropriate for diverse individuals, families, and communities. Synthesize the evidence base into nursing care of patients across the lifespan. Evaluate leadership principles that integrate the application of health care policies and standards. Evaluate effectiveness of interprofessional collaboration in the delivery of health care for quality patient outcomes. Evaluate technologies for the management of information and in the delivery of patient care.
NMNC 4520. Professional Nursing Concepts II
3 Credits (3)
This course covers policy concepts for professional nursing. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.
Prerequisite: NMNC 4410, NMNC 4435, NMNC 4445.
Corequisite: NMNC 4510, NMNC 4535, NMNC 4545.
Learning Outcomes
1. Integrate principles of quality improvement and safety into nursing practice within health care organizations and systems. Demonstrate leadership behaviors through the application of policies that apply to health care delivery. Synthesize care delivery concepts to improve quality patient outcomes and professional nursing practice. Analyze impact of health care delivery systems on patient care outcomes. Compare and contrast health care policies and evidence-based practice.

NMNC 4535. Clinical Intensive III
4 Credits (4)
The focus of this clinical course is application of the curricular concepts in the management of care participants with complex conditions across the lifespan. Same as NMNEC course no.: NMNEC503. Restricted to: BSN, BSNP, BSNR, NURS majors. May be repeated up to 4 credits.
Prerequisite: NMNC 4410, NMNC 4435, NMNC 4445.
Corequisite: NMNC 4510, NMNC 4520, NMNC 4545.
Learning Outcomes
1. Integrate diverse patient values into plan of care for patients with complex illness. Interpret and analyze factors and system contributions that impact the quality and safety of nursing practice. Integrate an evidence-based approach in the delivery and evaluation of nursing care to patients with complex illness across the lifespan. Evaluate the use of policies and procedures within the complex care setting. Effectively collaborate with the health care team in the delivery of patient care. Integrate use of appropriate technology for the delivery of nursing care to patients with complex illness.

NMNC 4545. BSN Capstone
4 Credits (4)
The synthesis, integration, and application of concepts to professional nursing practice will be applied in the final clinical course to ensure readiness to enter practice. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 4 credits.
Prerequisite: Successful completion of all previous nursing courses.
Corequisite: NMNC 4510, NMNC 4520, NMNC 4535.
Learning Outcomes
1. Synthesize and integrate nursing practice concepts into their professional nursing practice. Engage in professional nursing practice that is patient-centered and appropriate for diverse individual, families, and communities. Integrate principles of quality improvement and safety into nursing practice within health care organizations and systems. Deliver nursing care that is evidence-based. Demonstrate leadership behaviors through the application of policies that apply to health care delivery. Engage in effective interprofessional collaboration in the delivery of health care for quality patient outcomes. Utilize technologies for the management of information and in the delivery of patient care.

Nursing Courses
NURS 1110. Pre-Nursing Freshman Seminar
1 Credit (1)
This Freshman seminar provides an introduction to the university and its resources, an orientation to the pre-nursing curriculum, and overview of concepts for professional nursing practice. Emphasis is placed on exploring the nurse’s role as an integral member of the healthcare team across multiple contexts and settings, and developing a professional identity. Consent of Instructor required.
Learning Outcomes
1. Develop strategies for transitioning to university life and a pathway to the nursing program, through evaluating knowledge, skill, and experience strengths and deficits. Understand the role nurses and other interprofessional partners play in addressing issues regarding the patient experience across multiple healthcare settings. Identify and examine cultural, professional and personal beliefs and values of nurses as they relate to patient care and working in multidisciplinary teams. Begin to explore nursing careers in a variety of healthcare settings, across the nation.

NURS 120. Introduction to Pharmacology
3 Credits (3)
General principles of pharmacology including methods of administration, effect on the body, interactions with other drugs, and classification of drugs. Focus on the health care provider’s role in safe pharmacologic intervention. May be repeated up to 3 credits. Crosslisted with: HIT 120. Restricted to Community Colleges campuses only.

NURS 130. Foundations of Pharmacology
3 Credits (3)
This course provides the nursing student with an introduction to the foundations of pharmacology including: science of drug action, principles of medication administration, accurate calculation of drug doses, medication therapy across the lifespan, application of medications to treat health alterations, normal and adverse responses by the client to medication therapy, medication safety, medication regulation, national patient safety goals, and appropriate nursing interventions to achieve the desired goals of medication therapy. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: Community Colleges only.
Corequisite(s): NURS 147 & NURS 149. Restricted to: NUR majors.

NURS 134. Foundation of Nursing Skills and Assessment
3 Credits (1+6P)
This course provides nursing students with introductory nursing knowledge related to performance of nursing skills and assessment including: techniques of fundamental nursing care, basic and intermediate nursing skills, and foundational physical assessment techniques associated with care across the lifespan. Open to students who have been accepted into the nursing program. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.
Corequisite(s): NURS 136 & NURS 137 or permission of the Program Director.
NURS 136. Foundations of Nursing Practice
6 Credits (4+6P)
This course will introduce the nursing student to foundational theoretical concepts of professional nursing practice, the nursing process, and foundational nursing skills. It includes developmental concepts related to clients across the lifespan. Clinical experiences in the simulation lab, long-term care, the community, and rehabilitation settings will provide the student with the opportunity to apply learned skills to provide total care to meet needs of one adult client and to develop care planning skills related to actual problems. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NURSING majors. Restricted to Carlsbad campus only.
Corequisite(s): NURS 134, NURS 137.

NURS 137. Care of Geriatric Patient
3 Credits (3)
This course will introduce the nursing student to foundational concepts of age-appropriate/specific care of the older adult who represents the largest population of individuals placing demands on the healthcare system. It includes basic and complex concepts and issues related to care of the older client across the care continuum, provision of cost-effective care in a resource sparse environment. Only students who have been admitted to the nursing program may enroll in this course. Students must be enrolled into the nursing program to enroll in this course. Restricted to: NURS majors. Restricted to Community Colleges campuses only.
Corequisite(s): NURS 134 & NURS 136.

NURS 140. Pathophysiology for Allied Health Professionals
3 Credits (3)
Introduction to the nature of disease and its effect on body systems. Deals with the disease processes affecting the human body via an integrated approach to specific disease entities. Includes a review of normal functions of the appropriate body systems. Diseases are studied in relationship to their etiology, pathology, physical signs and symptoms, diagnostic procedures, complication, treatment modalities, and prognosis. Restricted to Allied Health and Health Information Technology majors. Restricted to Community Colleges campuses only.

NURS 146. Common Health Deviations
6 Credits (4+6P)
Common health deviations and the manner by which they alter various body functions are explored. The role of the licensed practical nurse in assisting clients with common health deviations is presented. Ethical and legal implications and the role of the practical nurse are also considered. The licensed practical nursing student will utilize the application of knowledge to client care situation both in the subacute and acute care settings. The nursing process is presented as a guide for coordinating client care. Grade of C or better. May be repeated up to 6 credits. Restricted to: NURSING majors. Restricted to Carlsbad campus only.
Prerequisite(s): NURS 153, NURS 156, NURS 154, NURS 157, and NURS 210 or consent of program director.

NURS 147. Adult Health I
6 Credits (4+6P)
This course focuses on application of the nursing process and theoretical concepts of care for adults with commonly occurring health problems. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to continue development of: prioritization skills, proficiency in performance of nursing skills, collaborative skills with clients, families, peers and health care team members, care planning skills related to patient actual, psychosocial, and potential problems in the delivery of total nursing care to meet needs of one adult client. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NURS majors. Restricted to Community Colleges campuses only.
Corequisite(s): NURS 130, NURS 147 lab, & NURS 149.

NURS 149. Mental Health Nursing
3 Credits (2+3P)
This course will allow the nursing student to develop skills necessary to provide nursing care for clients with mental health problems in various health care settings including: common mental health disorders, psychosocial dysfunction, psychosocial safety/substance abuse issues, violence, suicide, restraints, developmental age related pathophysiology, psychopharmacology, cultural/religious considerations, grief/loss, promotion of mental health, and therapeutic communication. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to develop ability to develop: proficiency in performance of nursing skills, collaborative skills with clients, families, peers and health care team members, care planning skills related to patient actual, psychosocial, and potential problems in the delivery of total nursing care to meet needs of one client across the life span with acute/chronic mental health needs. Students must be concurrently enrolled in both the lecture and lab sections of this course. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program in order to enroll in the course. Restricted to: NURS majors. Restricted to Community Colleges only.
Corequisite(s): NURS 130, NURS 147, & NURS 149L.

NURS 150. Medical Terminology
3 Credits (3)
Understanding of the basic elements of medical words. Use of medical abbreviations. Same as OEHO 120 and BOT 150. May be repeated up to 3 credits. Crosslisted with: BOT 150, AHS 120 and HIT 150.

NURS 153. Medication and Dosage Calculation
1 Credit (1)
Techniques of dosage calculation for medication and fluid administration. RR applicable. Students must meet NMSU basic skills requirement in mathematics to enroll in this course.
Corequisite(s): NURS 156 and NURS 154.

NURS 154. Physical Assessment
2 Credits (2)
Beginning techniques of physical assessment by systems will be presented using the nursing process as a guide for providing safe client centered care throughout the life span. Grade of C or better is required. May be repeated up to 2 credits. Restricted to: NURSING majors. Restricted to Carlsbad campus only.
Prerequisite(s): BIOL 1130 or BIOL 2210.
Corequisite(s): NURS 153, NURS 156.
NURS 155. Special Topics
1-4 Credits
Specific subjects to be announced in the Schedule of Classes.

NURS 156. Basic Nursing Theory and Practice
6 Credits (4+6P)
Introduction to the nursing profession and the beginning skills of nursing practice as it relates to normalcy. The nursing process is presented as a means of guiding the student in providing safe client centered care. Ethical and legal aspects of nursing practice are also included. Basic clinical nursing skills will be presented and practiced in the nursing lab. The student will perform these skills with clients in an actual health care setting. May be repeated up to 6 credits. Consent of Program Director requires. Restricted to: NURSING majors. Restricted to Carlsbad campus only.
Corequisite(s): NURS 153, NURS 154.

NURS 157. Maternal/Child Health Deviations
8 Credits (6+6P)
This course introduces the student to the concepts and principles of nursing care of the family from conception to adolescence. Utilizing the assessment, analyzing, planning, and implementation phases of the nursing process (the Care map), the student focuses on the supportive-educative nursing system to assist members of the family in meeting self-care requisites and how they are affected by the health deviations common to each developmental level beginning with conception and ending with adolescence. Knowledge gained in theoretical instruction is then applied to the patient care situation. After an introduction to the necessary clinical skills in the campus laboratory setting, students will participate in clinical experiences with the focus on the family from conception to adolescence. The assessment, analysis, planning, and implementation phases of the nursing process are emphasized as a tool to assist patients in meeting universal and developmental self-care requisites. Utilizing the nursing process, the student provides safe, client-centered care to diverse clients and families. Theoretical instruction is applied to client care situations. Students collaborate with clients, families, and the interdisciplinary team in meeting health care needs. Experiences may occur in the physician’s office, local health department, day care centers, schools, or the hospital. Grade of C or better required. Restricted to: NURSING majors. Restricted to Carlsbad campus only.
Prerequisite: NURS 156, NURS 153, and NURS 154.

Learning Outcomes
1. Determine how values of clients, families and medical personnel impact the involvement of clients in their health care related to maternal/child and pediatric clients. Implement individualized client care utilizing an evidenced based approach related to maternal/child and pediatric clients. Choose health protection, health promotion, and disease prevention strategies in the care of maternal/child and pediatric clients. Apply the scope, risk factors, physiologic processes, and clinical management strategies to maternal/child and pediatric clients. Choose resources for continuity of client care related to maternal/child and pediatric clients. Give examples of significant information to report to other disciplines. Apply the principles of delegation in the provision of client care with maternal/child and pediatric clients. Utilize evidenced based information to implement a plan of care and employ nursing interventions for maternal/child and pediatric clients. Use the principles of ethical practice in the delivery of nursing care for maternal/child and pediatric clients. Apply policies, procedures and standards of care related to maternal/child and pediatrics in the provision of client care. Apply nursing interventions to reduce risk of harm to self and others related to maternal/child and pediatric clients. Choose available technology for delivery of nursing care related to maternal/child and pediatric clients.

NURS 201. Special Topics
1-4 Credits
Specific topics to be announced in the Schedule of Classes. May be repeated for a maximum of 10 credits. Restricted to: Community Colleges only.
Prerequisite: admission to the nursing program.

NURS 209. Independent Study
1-4 Credits
Individual studies to meet identified student needs. May be repeated for a maximum of 10 credits. Restricted to: Community Colleges only.
Prerequisite: admission to the nursing program.
NURS 210. Pharmacological Requisites of the Childbearing Family
1 Credit (1)
Basic concepts of pharmacology including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics, and their relationship to nursing care will be discussed focusing on medications commonly utilized with the childbearing family. Medication classes to be discussed include labor and delivery, analgesic, vitamins, respiratory, gynecological, endocrine, and anti-microbial/anti-infective drugs. Grade of C or better required.
Prerequisite(s): NURS 153, NURS 154 and NURS 156.
Corequisite(s): NURS 157.
Learning Outcomes
1. Effective communication skills in reading, writing, listening, and speaking. Basic critical thinking skills including problem identification, evidence acquisition, evidence evaluation, and reasoning/conclusion. An understanding of personal and social responsibility. An ability to apply the fundamental concepts of quantitative reasoning in mathematics and science. Appropriate information and digital literacy, and skills for personal and professional use.

NURS 211. Pharmacological Requisites of Simple Health Deviations
1 Credit (1)
Basic concepts of pharmacology including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics, and their relationship to nursing care are addressed focusing on medications related to the psychiatric, gastrointestinal, musculoskeletal, gynecological, hematological, and anti-neoplastic client. Grade of C or better required. Restricted to: Carlsbad campus only.
Prerequisite(s): BIOL 2210 and BIOL 2225 and NURS 153, NURS 154, NURS 156, NURS 157 and NURS 210.
Corequisite(s): NURS 246 and NURS 258.

NURS 212. Pharmacological Requisites of Complex Health Deviations
1 Credit (1)
Basic concepts of pharmacology including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics, and their relationship to nursing care is examined focusing on medications related to complex health deviations. Drug classes to be discussed include cardiovascular, renal, endocrine, and neurological. Grade of C or better required.
Prerequisite(s): NURS 153, NURS 154, NURS 156, NURS 157, NURS 246, NURS 258, NURS 210 and NURS 211.
Corequisite(s): NURS 256 and NURS 260.
Learning Outcomes
1. Apply principles of teaching/learning in educating clients on the use, adverse effects and interactions of pharmacotherapeutic agents used to treat complex health deviations. Collaborate with members of the health care team in the delivery of pharmacotherapeutics to clients with complex health deviations. Give examples of commonly prescribed drugs used to treat clients with complex health deviations and related pharmacokinetics and pharmacodynamics. Discuss the relationship between the use of pharmacotherapeutics and the treatment of disease in clients with complex health deviations. Identify safety issues and minimize risk potential associated with pharmacotherapeutics.

NURS 224. Maternal Child Nursing
5 Credits (4+3P)
This course provides the intermediate nursing student with an in-depth review of care of the childbearing woman, family structures and roles, and nursing care of the child from birth through adolescence. Emphasis includes the care of pre-partum, intra-partum and postpartum clients, the neonate and health deviations in pediatric clients. Clinical experiences in the simulation lab, the community, and acute care settings will provide the student with the opportunity to apply learned skills to provide total care to meet needs of up to two adult, neonatal, or pediatric clients and to apply care planning skills related to actual, psychosocial and potential problems. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.
Corequisite(s): NURS 235 & NURS 236.

NURS 226. Adult Health II
6 Credits (4+6P)
This course focuses on application of nursing process and theoretical concepts of care for adults with complex health alterations. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to apply prioritization skills, maintain proficiency in performance of nursing skills, collaborative skills with clients, families, peers and health care team members, and care planning skills related to patient actual, psychosocial, and potential problems in the delivery of nursing care to meet needs of three adult clients. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.
Corequisite(s): NURS 224 & NURS 235.

NURS 235. Nursing Leadership and Management
1 Credit (1)
This course introduces the intermediate nursing student to professional practice principles of nursing leadership and management including: health policy and politics, fiscal management & budgeting, conflict management, decision making, interdisciplinary practice, working with teams, roles in disaster planning and management, application of standards of care to risk management, organization of care delivery, health care systems, processes, and practice environments. May be repeated up to 1 credits. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to Community Colleges campuses only.
Corequisite(s): NURS 224, NURS 226.
NURS 236. Nursing Preceptorship - Adult Health III
6 Credits (2+12P)
This course is the final course involving care of the patient with acute or chronic illness. It focuses on care of patients with complex or multi-system problems allowing the graduating nursing student to discuss and apply all the skills learned in previous nursing courses. After successfully passing the HESI exam, students have clinical practice with preceptor in various health care settings. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to: organize care of a group of clients, maintain proficiency in performance of nursing skills, collaborate with clients, families, peers and health care team members, and support care planning skills related to patient actual, psychosocial, and potential problems in the delivery of nursing care to meet needs of the preceptors group of clients. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program and have successfully completed all level 1, 2 and 3 nursing courses may enroll in this course. Clinical may include inpatient or outpatient care, days, evenings, nights, or weekend experiences. Students are required to work the preceptors assigned schedule. NCLEX Review must be done concurrently. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.
Corequisite(s): NURS 201.

NURS 246. Health Deviations I
7 Credits (4+9P)
Introduction to medical/surgical clients, whose health care needs are routine and predictable. Focus is on simple health deviations, including concepts relative to health promotion and maintenance. The nursing process is utilized to provide evidenced based, safe client centered care. Students are expected to apply clinical judgment, communicate and collaborate with clients and the interdisciplinary team in providing care for a group of two to three clients. Grade of C or better required. May be repeated up to 7 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only.
Prerequisite(s): NURS 153, NURS 156, NURS 154, NURS 157 and NURS 210.
Corequisite(s): NURS 211,NURS 258.

NURS 256. Health Deviations II
8 Credits (6+12P)
Concepts and principles applied to clients with complex health deviations. Building upon knowledge gained in NURS 246, focus will be on acutely ill clients. The nursing process continues to serve as a guide to provide safe, client centered care. The student collaborates with the interdisciplinary team in all aspects of client care. Student experiences the role of the staff nurse under the guidance and direction of the nursing instructor. Grade of C or better required. May be repeated up to 8 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only.
Prerequisite(s): NURS 153, NURS 154, NURS 156, NURS 157, NURS 210, NURS 211, NURS 246, and NURS 258.
Corequisite(s): NURS 212,NURS 260.
Learning Outcomes
1. Apply each step of the nursing process as a method of organizing the nursing care for patients with complex health deviations. Discuss the patient’s health care needs that occur as a result of complex health deviations. Explain methods the nurse can employ in allowing the patient to assume the right and responsibility for his own care. Incorporate the concepts and principles derived from the biological, developmental, social, nutritional and computer sciences and nursing knowledge that relate to the nursing care of patients with complex health deviations. Explain the roles and functions of the members of the health care team including ancillary personnel as they relate to the care of patients with complex health deviations. Explain the rationale for the performance of the following technical skills: a. EKG monitoring; b. Rhythm strip interpretation; c. Hemodynamic monitoring and interpretation; d. Tracheal suctioning Recognize the nurse’s role in establishing a therapeutic relationship with patients experiencing complex health deviations.

NURS 258. Psychosocial Requisites: A Deficit Approach
3 Credits (2+3P)
Nursing theory and practice as it relates to the care of the client experiencing psychosocial health deviations. The role of the nurse is discussed along with the ethical and legal aspects of care for the client with psychosocial disorders. Building upon the communication skills of listening and responding, the student develops the therapeutic skills of interpersonal relationships. Grade of C or better is required. May be repeated up to 3 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only.
Prerequisite(s): NURS 153, NURS 154, NURS 156, NURS 157, NURS 210, and NURS 246.
Corequisite(s): NURS 211,NURS 246.
NURS 260. Management of Patients with Health Deviations
2 Credits (2)
A capstone course to the nursing program in which principles in management and delegation to less prepared personnel is explored. A review of leadership roles, legal issues, quality initiatives, informatics and scope of practice is included. Preparation for the NCLEX is an integral portion of the course. Grade of C or better is required. May be repeated up to 2 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only. 
Prerequisite(s): NURS 211, NURS 246, and NURS 258.
Corequisite(s): NURS 212, NURS 256.

Learning Outcomes
1. Discuss nursing practice concepts relevant to the practice of professional nursing. Evaluate principles of quality improvement and safety into nursing practice within healthcare organizations and systems. Apply leadership concepts through the application of policies that apply to healthcare delivery. Promote a culture of safety through anticipating and eliminating potentially harmful situations. Collaborate in systems analysis when clinical errors or near misses occur to reduce harm, minimize blame, and encourage transparency. Integrate evidence in determining best clinical practice. Demonstrate basic knowledge of healthcare policy, finance, and regulatory environments, including local, state, national, and global healthcare trends. Use an ethical framework to evaluate the impact of policies of healthcare, especially for vulnerable populations.

NURS 3110. Human Pathophysiology Foundation for Nursing
4 Credits (4)
Human pathophysiology concepts of adaptation and alteration in function and structure across the life span and their implications for nursing practice. Restricted to: BSNR, BSN, BSNP or consent of instructor majors. May be repeated up to 4 credits. 
Prerequisite: Grade of C- or better in both (BIOL 353 & BIOL 2221/BIOL 354), or (BIOL 2210 & BIOL 2225), or (SPMD 2210 & SPMD 3210).
Corequisite: NMNC 3110, NMNC 3135.

NURS 3996. Special Topics
1-9 Credits (1-9)
Specific subjects to be announced in the Schedule of Classes. May be repeated up to 21 credits.

Learning Outcomes
1. Varies

NURS 4110. Strategies for Student Success
3 Credits (3)
This course is designed to assist and support students as they identify learning needs and develop a plan for successfully mastering nursing knowledge. Course activities and assignments will be designed to address student’s self-identified learning goals to enhance their opportunity for success. Restricted to NURS, BSN, BSNP, BSNR majors. May be repeated up to 3 credits.

NURS 4997. Independent Study
1-3 Credits (1-3)
Individual studies with prior approval of department head. May be repeated up to 3 credits.

Learning Outcomes
1. Varies

NURS S110. Evidence-Based Practice for Healthcare Leaders
3 Credits (3)
This course is designed to prepare nurse administrators and other healthcare leaders with the skills and knowledge needed to critically analyze and synthesize scholarly evidence to promote high quality evidence-based practice. May be repeated up to 3 credits.

Learning Outcomes
1. Utilize information sources, such as bibliographic databases and electronic resources and experts, to locate existing knowledge relevant to healthcare and nursing practice. Critically appraise selected research designs, methods of data collection (quantitative and qualitative), and data analytic methods in relation to selected clinical practice and healthcare systems problems. Discuss the relevance of theory and conceptual frameworks to health care research and practice. Evaluate the use of evidence-based practice models to investigate clinical practice and healthcare systems problems. Discuss the ethical, cultural, and professional concerns with human subjects in nursing research and considerations for evidence-based practice. Propose a clinical practice change utilizing evidence-based practice guidelines.

NURS S115. Quality Improvement for Healthcare Leaders
3 Credits (3)
This course is designed to prepare nurse administrators and other healthcare leaders with the skills and knowledge needed to critically analyze and synthesize scholarly evidence to promote high quality evidence-based practice. Restricted to: exclude Online MSN in Nursing Administration majors.

Learning Outcomes
1. Explain the value of improvement science in healthcare and its impact on healthcare quality. Articulate the role of administrators in leading and facilitating change in healthcare systems through quality improvement processes. Compare and contrast conceptual models and frameworks that guide quality improvement work in healthcare systems. Articulate the principles for selecting a systems-level problem for continuous quality improvement action. Demonstrate the use of quality improvement methods, tools and clinical data to address a systems-level problem in the clinical setting. Understand the role of health policy and national standards in guiding quality improvement initiatives.

NURS S120. Nursing Informatics
3 Credits (3)
This course is provides the foundational knowledge necessary to integrate systems and information technologies. Topics include informatics, knowledge management, healthcare information systems/telehealth including the electronic health record. Focuses on using available technology to enhance safety and monitor the health status and outcomes of populations. Restricted to: NURS, NUSC, NURP majors. May be repeated up to 3 credits.

NURS S125. Health Policy for Advanced Nursing Practice
3 Credits (3)
Course provides a conceptual approach to understanding health policy including the social, legal, political and ethical factors that influence policy development. Strategies for influencing policy direction and change are examined. Restricted to: NURS, NUSC, NURP majors. May be repeated up to 3 credits.
NURS 5130. Promoting Health Behavior  
3 Credits (3)  
Emphasis is on the role of the advanced practice nurse in facilitating health behavior change. The impact of health status on health behavior, ethical issues relate to health promotion, and the processes for promoting healthy behaviors are explored. Theoretical models of behavior change and primary, secondary, and tertiary prevention concepts serve as a basis for developing nursing interventions that promote behavior change. May be repeated up to 3 credits.

NURS 5210. Advanced Leadership in Healthcare  
3-5 Credits (3+1-2P)  
Analysis of leadership theories as they pertain to the nurse executive and the advanced practice nurse in complex health care organizations. Emphasis will be placed on organizational change and conflict management in working with interdisciplinary health care teams. Clinical component included for DNP students only. Restricted to: NURS,NUSC,NURP majors. May be repeated up to 5 credits.

NURS 5220. Management of Human and Fiscal Resources in Nursing  
4 Credits (3+3P)  
This graduate level course examines and applies contemporary concepts of human and fiscal resource management for the nurse administrator. Focus is placed on achieving quality outcomes through effective management of human assets and organizational resources in health care settings. The course includes a clinical component. May be repeated up to 4 credits.

NURS 5230. Seminar in Nursing Administration- Roles  
3 Credits (3)  
Role preparation for the nurse administrator as manager, leader, collaborator and change agent. Synthesis of concepts from management and nursing as a basis for role effectiveness in nursing administration. May be repeated up to 3 credits.  
Corequisite: NURS 5240.

NURS 5240. Advanced Field Work in Nursing  
1-3 Credits (1P)  
A practicum in Nursing Administration. Application of concepts from management and nursing to the clinical, educational, or community setting. Restricted to: MSN, DNP, PHD majors. May be repeated up to 12 credits.  
Prerequisite: NURS 5210.  
Corequisite: NURS 5230.

NURS 5996. Special Topics  
1-3 Credits (1-3)  
Specific subjects to be announced in the Schedule of Classes. May be repeated up to 12 credits.

NURS 5997. Independent Study  
1-10 Credits (1-10)  
Individual studies and directed research with prior approval of department head. May be repeated up to 20 credits.

NURS 6110. Introduction to Population Health  
1 Credit (1)  
This required course for the Doctor of Nursing Practice program prepares the student to implement specialty population-based disease prevention and health promotion activities to achieve national and international goals of improving worldwide health status. The course focuses on a spectrum of issues affecting health, which include emerging infectious diseases, emergency preparedness, disparities in health and healthcare services, and the impact of behavior and lifestyle choices on health.  
Learning Outcomes  
1. Analyze data to identify potential and emerging health hazards in individuals and communities. Evaluate care delivery models to address disease prevention and population health. Identify gaps in the care of individuals, aggregates, or populations. Identify gaps in the care of individuals, aggregates, or populations.

NURS 6120. Quality Improvement in Healthcare for Nurse Practitioners  
3 Credits (3)  
This course prepares nurse practitioners and other advanced practice nurses to be leaders of interprofessional teams engaged in the process of continuous quality improvement in healthcare settings. Healthcare quality improvement principles and practice will focus on improving patient care and outcomes, lowering costs, reducing health disparities, and increasing access to healthcare. May be repeated up to 3 credits.  
Learning Outcomes  
1. Explain the value of improvement science in healthcare and its impact on healthcare quality. Articulate the role of the doctorally-prepared Advance Practice Registered Nurse in leading and facilitating change in healthcare systems through quality improvement processes. Compare and contrast conceptual models and frameworks that guide quality improvement work in healthcare systems. Articulate the principles for selecting a systems-level problem for continuous quality improvement action. Demonstrate the use of quality improvement methods, tools and clinical data to address a systems-level problem in the clinical setting. Analyze the role of health policy and national standards in guiding quality improvement initiatives.
NURS 6125. Evidence-Based Practice for Nurse Practitioners
3 Credits (3)
This course is designed to prepare nurse practitioners and other advanced practice nurses with the skills and knowledge needed to critically analyze and synthesize scholarly evidence to promote high quality evidence-based practice. Restricted to: Family Nurse Practitioner; Psych/Mental Health Nursing; Nursing Practice; Family Nurse Practitioner Certificate; and Psych/Mental Health Nursing Certificate majors.
Prerequisite: NURS 6120.
Learning Outcomes
1. Utilize information sources, such as bibliographic databases and electronic resources and experts, to locate existing knowledge relevant to healthcare and nursing practice. Critically appraise selected research designs, methods of data collection (quantitative and qualitative), and data analytic methods in relation to selected clinical practice and healthcare systems problems. Discuss the relevance of theory and conceptual frameworks to health care research and practice. Evaluate the use of evidence-based practice models to investigate clinical practice and healthcare systems problems. Discuss the ethical, cultural, and professional concerns with human subjects in nursing research and considerations for evidence-based practice. Propose a clinical practice change utilizing evidence-based practice guidelines.

NURS 6130. Epidemiology for Advanced Nursing Practice
2 Credits (2)
Emphasis is on the practical application of the principles of epidemiology in the measurement and evaluation of population health. Epidemiological literature will be critiqued and synthesized to evaluate population-based public health nursing problems. Issues related to disease surveillance, causation, genetic patterns, screening and social trends in population health will be examined. Use of existing data bases and technology programs are covered. Restricted to: NURP, NURS, NUSC majors. May be repeated up to 2 credits.

NURS 6135. Interdisciplinary Leadership and Role Development for Practice Excellence
3 Credits (3)
This required course prepares students for organizational and systems leadership and knowledge and skills critical to role development in independent and inter and intra-disciplinary practice. Content includes communication, conflict resolution, collaboration and negotiation, leadership, and team functioning to maximize success in the establishment of safe, effective patient-centered care in complex environments.
Learning Outcomes
1. Evaluate interdisciplinary care delivery models from a systems perspective using evidence-based findings. Incorporate principles of specialty practice management, quality improvement, and interdisciplinary teamwork in order to meet the health needs of the specialty population served. Analyze effective strategies for the management of ethical dilemmas, incorporation of sensitivity to diverse cultures, and elimination of health disparities. Differentiate among the multiple roles in advanced nursing practice. Evaluate leadership styles in a team environment in the analysis of complex practice and organizational issues. Incorporate consultative and leadership skills with inter and intra-disciplinary teams to facilitate change.

NURS 6150. Advanced Anatomy
2 Credits (2)
This course presents an extensive exploration of human anatomy from a topographical and regional perspective. The knowledge gained in this course serves as a foundation for advanced clinical assessment for anesthesia practice, clinical decision-making, and patient management.
Learning Outcomes
1. Describe the regional organization and topography of anatomical structures within key clinical regions of the human body with a focus on neurovascular anatomy and internal organs. Describe the structure and function the central nervous system and the distribution of all of the major peripheral nerves in the body. Identify the relationship between palpable anatomical landmarks and the deep anatomy of the head, neck, thorax, abdomen, pelvis and limbs. Identify major anatomical structures in the human body using radiographs, ultrasound, CT, MRI images.

NURS 6155. Advanced Physiology
4 Credits (4)
This course presents an extensive exploration of anatomy and physiology of the human body's organs and systems. Topics are covered from a molecular, cellular, tissue, organ, and system perspective. Individual differences in physiology as related to culture, gender, race, age, and genetics will also be covered. The knowledge gained in this course serves as a foundation for advanced clinical assessment, pharmacology, clinical decision-making, and patient management.
Learning Outcomes
1. Identify structures and normal physiologic functions of the human body organs and systems. Demonstrate knowledge of the concept of homeostasis. Summarize the complexities of normal human physiologic multi-system interactions. Recognize physiologic differences related to culture, gender, race, age, and genetics. Discuss how principles of normal physiology impact advance practice nursing care of individuals.

NURS 6210. Professional Roles for Advanced Practice Clinical Nursing
3 Credits (3)
This course will focus on providing an in depth understanding of the legal, historical, political, social, and ethical aspects of advanced practice nursing. Traditional and emerging roles for advanced practice nursing are examined. Students must be Admitted to the DNP program. Restricted to DNP majors. May be repeated up to 3 credits.
Prerequisite: NURS 6430 OR NURS 6520.
NURS 6215. Professional Aspects of Nurse Anesthesiology Practice
3 Credits (3)
This course examines professional role development of the nurse anesthetist with an emphasis on the history and evolution of nurse anesthesiology practice, as well as scope, standards, legal aspects, ethics, quality, and regulations. Professional advocacy topics and the business of anesthesiology practice will be appraised. This course also addresses the risks of the role related to wellness and substance use disorder. Cultural competence modules for healthcare workers will be completed during this course.

Learning Outcomes
1. Discuss the history and evolution of nurse anesthesiology practice.
   - Analyze the professional components of nurse anesthesiology practice, emphasizing scope, standards, legal aspects, ethics, and regulation. Differentiate between state, national, and international anesthesia organization roles and functions. Identify quality assessment tools in anesthesiology practice. Compare various business models of anesthesia, reimbursement methods, payment policies, reimbursement, and nurse anesthesiology practice patterns. Examine the impact of wellness and substance use disorder on anesthesia providers. Demonstrate cultural awareness and sensitivity of patient background characteristics including, but not limited to race, ethnicity, socioeconomic status, age, gender and sexuality. Discuss selected current issues affecting nurse anesthesiology practice.

NURS 6220. Advanced Pathophysiology for Clinical Nursing
3 Credits (3)
In-depth study of the physiological and pathological bases of altered health states of patients across the life span. Case studies facilitate application of complex concepts to clinical nursing practice. Restricted to: NURS, NUSC, NURP majors. May be repeated up to 3 credits.

NURS 6225. Advanced Health Assessment
2 Credits (2)
This course is designed to assist students to refine history taking, psychosocial assessment and physical assessment skills. Content focuses on assessment of individuals throughout the lifespan. Emphasis is placed on detailed health history taking, differentiation, interpretation and documentation of normal and abnormal findings. May be repeated up to 4 credits.
Corequisite: NURS 6226.

Learning Outcomes
1. Analyze and use the most effective communication methods to obtain a health history and to develop a therapeutic relationship. Differentiate variations in normal and abnormal health and physical data. Demonstrate advanced clinical judgment by using data from the health and physical assessment to design and implement clinically safe and patient-focused interventions.

NURS 6226. Advanced Health Assessment Practicum
1 Credit (1P)
Assessment skills for advanced clinical practice. Emphasis on assessment of patients across the life span. May be repeated up to 3 credits.
Corequisite: NURS 6225.

Learning Outcomes
1. Conduct a comprehensive and systematic assessment of health and illness in complex situations. Collect and interpret health data related to the health history, chief complaint, and history of the present illness. Use effective communication methods to obtain a health history and to develop a therapeutic relationship Assess variations in normal and abnormal health and physical data. Document advanced clinical judgment by using data from the health and physical assessment to determine a health status.

NURS 6230. Advanced Clinical Pharmacology
3 Credits (3)
Principles of clinical pharmacology for advanced clinical practice. Focus on pharmacology as it relates to human physiology and pathophysiology across the lifespan. Restricted to: NURS, NUSC, NURP majors. May be repeated up to 3 credits.

NURS 6235. Advanced Pathophysiology for Nurse Anesthesiology Practice
4 Credits (4)
This course focuses on pathophysiology of diseases relevant to nurse anesthesiology practice. Evidence-based practice resulting from relevant research will be incorporated in discussions related to anesthesia management of patients with health status alterations. Students will utilize this information to build a foundation for anesthesia clinical reasoning and principles of nurse anesthesiology practice.

Learning Outcomes
1. Analyze the relationship between normal physiology and pathologic consequences produced by selected disease states. Demonstrate understanding of selected biochemical, genetic, and cellular mechanisms that lead to common health alterations that occur in individuals across the lifespan. Identify various pathologic alterations relevant to anesthesia practice. Integrate the clinical application of pathophysiology into the practice of nurse anesthesiology. Discuss the relationship between pathophysiology of various systems and anesthesia planning and management.
**NURS 6240. Advanced Health Assessment for Nurse Anesthesiology Practice**  
3 Credits (3)  
This course focuses on development of knowledge and skills necessary to conduct comprehensive and focused health assessments for patients across the lifespan with special attention given to nurse anesthesiology practice. Principles of conducting detailed health histories, physical examinations, and diagnostic study interpretations will be featured. Students will obtain and document detailed culturally sensitive health histories and physical examinations. They will use critical thinking to identify and/or interpret pertinent diagnostic studies related to alterations in health patterns. Emphasis is placed on differentiation between normal and abnormal health history, physical assessment, and diagnostic findings.  
**Learning Outcomes**  
1. Demonstrate a systematic approach to the collection and documentation of data for health history and physical assessment. Collect and interpret health data related to the health history, history of the present illness, laboratory and other diagnostic findings. Document relevant findings for both comprehensive and focused health histories and physical assessments. Identify potential anesthesia risks based on patient health history, physical exam findings, and current literature. Conduct and document a comprehensive preanesthesia evaluation to include health and surgical history, physical examination, and interpretation of diagnostic data using effective communication.

**NURS 6245. Advanced Pharmacology for Nurse Anesthesiology Practice**  
4 Credits (4)  
This course builds upon the advanced clinical pharmacology course and is designed to provide an evidence-based in-depth foundation of pharmacology and its application to anesthesiology practice across the lifespan. The primary focus will be on topics such as pharmacodynamics, pharmacokinetics, pharmacotherapeutics, pharmacy, and toxicology of currently used anesthetic agents.  
**Learning Outcomes**  
1. Identify general pharmacokinetic, pharmacodynamic, pharmacogenetic, and pharmacotherapeutic principles related to anesthetic agents and adjunct drugs. Discuss the uptake and distribution of primary anesthetic agents and adjunct drugs. Summarize indications/contraindications for selected anesthetic agents and adjunct drugs. Calculate accurate doses of selected anesthetic agents and adjunct drugs. Review potential adverse effects and drug interactions of selected anesthetic agents and adjunct drugs. Describe evidence-based anesthetic considerations of anesthetic agents and adjunct drugs used for various procedures and various patients across the lifespan with diverse comorbidities and demographics.

**NURS 6250. Healthcare Policy and Ethics**  
3 Credits (3)  
This course examines complex challenges faced in the US healthcare system for nurses in advanced practice roles within an ethical framework. Ethical, social, and political issues that affect the provision of health care, communities, and society are critically analyzed with an emphasis on interprofessional roles in health care. Concepts that support advocating for social justice, reducing healthcare disparities, improving quality, promoting ethical aspects of care, and cost containment are overarching themes in the course discussions and assignments. Students use self-reflection, case studies and presentations to apply ethical principles, develop healthcare policy recommendations to improve care access, and reduce disparities in professional practice and population health.  
**Learning Outcomes**  
1. Analyze the historical evolution of health care systems and their influence on the development of institutional, local, state, federal and international health policy. Critique socioeconomic, legal, ethical, and political issues relevant to policymaking and provision of equitable, safe, and quality health care at the local, state, and national levels. Assess health policies, infrastructure, financing, and complex systems in the US in contrast to other nations. Critically analyze bioethical issues in clinical practice settings as they impact policy, disparities, advocacy, ethics, improved patient outcomes and reduced costs. Synthesize the principle of human rights and ethics in conduct of health care research and policy design. Interpret the value and importance of advanced practice nursing role(s) to policy makers, health care professionals, and consumers.

**NURS 6255. Innovations and Health Care Organizations**  
3 Credits (3)  
Examines complexity and innovation within health care systems, health care delivery, and population health. Areas of focus are systems, organizations, health disparities, and ethical decision making. Emphasis is on improvement in services and outcomes. Restricted to: NURS, NUSC, NURP majors. May be repeated up to 3 credits.

**NURS 6260. Population Health and the Environment**  
3 Credits (3)  
This course will examine and evaluate prevention strategies, healthcare quality measures, diversity principles, and patient safety considerations related to population health. There is a focus on how environmental health can be integrated into nursing education, practice, research, and policy/advocacy efforts. Students will explore community, environmental, cultural, and socioeconomic dimensions of care as evidenced by completion of a community assessment.  
**Prerequisite:** NURS 6110.  
**Learning Outcomes**  
1. Analyze theoretical frameworks/conceptual models for relevance to population health. Analyze the impact of a population health focus on the health of individuals, families and communities. Differentiate the impact of biologic factors, the natural environment, built environment and altered environment on health. Describe the impact of discrimination, sexism, and racism on equity and inclusion in healthcare and on health. Analyze the relationship between human health, animal health and ecosystem health. Apply the principles of patient and community engagement for population health improvement Discriminate between population growth, health and development as factors in global health. Examine institutional, local/state/federal, and global policies that address the relationship between population health and the environment.
NURS 6265. Strategic and Financial Planning for Population Health Programs
3 Credits (3)
This course explores the role of nurses in advanced nursing practice within a rapidly changing healthcare system. Theories of leadership, quality, risk outcomes, and financial structures for healthcare organizations are discussed providing a framework for change within advanced nursing practice specialties. Accounting, finance, and marketing principles are presented enabling students to complete a financial plan for an evidence based practice change.
Prerequisite: NURS 6270.

Learning Outcomes
1. Use the principles of population focused program planning, development, implementation, and evaluation to develop an evidence-based population focused strategy to address a health priority issue. Analyze the potential influence of cultural, ethical, and public health policy issues when working with diverse populations. Analyze aspects of organizational culture and planned change that may influence success of planned interventions. Evaluate feasibility issues related to implementing planned interventions such as cost, time, and available resources. Integrate principles of program evaluation to determine impact and sustainability of evidence-based interventions. Analyze the impact of financial models on costs, quality and health outcomes.

NURS 6270. Clinical Data Management and Analysis
2 Credits (2)
This required course provides students with the knowledge base to understand, collect, manage, and measure clinical data. Students will explore data collection and management processes, levels of measurement, basic statistics, and measurement for improvement in order to effectively use clinical data. Data entry exercises employed through analytical tools and statistical software packages will allow the students practice and apply the basic data management and analysis skills needed for the evaluation of clinical data and evidence-based practice.

Learning Outcomes
1. Apply principles of sound data collection and management. Create a database to collect and aggregate data. Apply levels of measurement. Perform basic statistics including descriptive, parametric, and non-parametric statistics. Perform basic analysis of aggregate population level data. Use common tools (excel) and statistical software packages (SPSS) for data collection, entry, management, and analysis.

NURS 6305. Introduction to the DNP Project
1 Credit (1)
This required course is designed to assist the student in exploring a clinical problem and selecting an area of interest within a practice specialization, and in demonstrating professional competencies related to an area of interest to begin foundational development of the DNP scholarly project. The student will document previously acquired abilities and competencies while developing an understanding of the DNP project process. Students will work towards selection of a setting (hospital, long-term, primary care or community health agency) where concepts, theories, and principles of leadership, administration, and management can be applied.

Learning Outcomes
1. Examine the role of the DNP in the development and implementation of evidence based change of practice projects. Identify a DNP Project practice site and clinical advisor. Develop a portfolio demonstrating expertise in the specialty area of interest and understanding of a clinical problem.

NURS 6307. DNP Project Practicum
1-3 Credits (1-3P)
This leadership practicum courses provide for the development of a population health leader as demonstrated through the DNP project. The student will conduct an assessment of a population, community and/or organization where evidence-based leadership activities may be employed. Once a problem or issue is identified in the practice setting, the student will develop an evidence-based project designed to positively impact population-specific and/or patient care outcomes. After approval of the DNP project proposal, the student will implement an evidence-based project designed to positively impact population health and/or patient/client care outcomes. The culmination of the DNP project is evaluation and dissemination of the evidence-based changes. May be repeated up to 9 credits.

Learning Outcomes
1. Demonstrate competence in the role of population health leader who delivers advanced practice nursing, including educators, clinicians, administrators, and translators of research. Execute the DNP Project that meets the needs of diverse populations Collaborate with DNP committee and the organization to establish an intra- and inter-professional continuous quality improvement process for achievement of the desired outcomes. Exhibit consistent professional behavior, performance, accountability, and responsibility within a population health leadership role.
NURS 6310. DNP Project I
1 Credit (1)
This is the first in a three-course series that culminates in the implementation, evaluation and dissemination of scholarly work that demonstrates the student’s synthesis of the Essentials of Doctoral Education for Advanced Practice Nursing (i.e., the DNP Essentials). The project must use evidence to improve clinical practice, healthcare delivery and/or patient outcomes. Upon completion of this course, students will identify a problem in healthcare, explore the existing evidence and develop a preliminary proposal for a project that demonstrates synthesis of DNP coursework and lays the groundwork for future scholarship. 
Prerequisite: NURS 6120 and NURS 6125.
Learning Outcomes
1. Systematically review the existing evidence pertaining to selected clinical problem, generating a written review of the existing evidence. Identify a theoretical framework or model that will guide the development of a solution or intervention and/or the execution of the DNP project. Identify a theoretical framework or model that will guide the development of a solution or intervention and/or the execution of the DNP project. Defend the DNP project proposal in front of the student’s project committee and submit to IRB.

NURS 6320. DNP Project II
1 Credit (1)
This is the second in a three-course series that culminates in the implementation, evaluation and dissemination of scholarly work that demonstrates the student’s synthesis of the Essentials of Doctoral Education for Advanced Practice Nursing (i.e., the DNP Essentials). The project must use evidence to improve clinical practice, healthcare delivery and/or patient outcomes. Upon completion of this course, students will have designed and defended a plan for implementation and evaluation of the proposed project, submitted an IRB application, and initiated the project upon obtaining IRB approval. 
Prerequisite: NURS 6310.
Learning Outcomes
1. Execute the approved DNP project implementation and evaluation plan. Develop a plan for local, regional and/or national dissemination of the DNP project outcomes as scholarly work. Identify the DNP Essentials that are represented in the project and describe how the project addressed the requirement.

NURS 6330. DNP Project III
1 Credit (1)
This is the third in a three-course series that culminates in the implementation, evaluation and dissemination of scholarly work that demonstrates the student’s synthesis of the Essentials of Doctoral Education for Advanced Practice Nursing (i.e., the DNP Essentials). The project must use evidence to improve clinical practice, healthcare delivery and/or patient outcomes. Upon completion of this semester, students will demonstrate the ability to execute the proposed project plan. If additional time is needed to complete the proposed DNP project, the student must register for NURS 6340 in subsequent semesters until the project outcomes are successfully defended in front of the project committee.
Prerequisite: NURS 6320.
Learning Outcomes
1. Defend the DNP project outcomes in front of the student’s project committee and a public audience. Generate a comprehensive written paper (i.e., professional manuscript, white paper, or technical report) that outlines the DNP project problem statement, objectives, review of evidence, implementation, and outcomes.

NURS 6340. Clinical Scholarly Project
1-4 Credits (1-4)
Building on the practice expertise of the DNP student, this series of credits is to provide the student with the opportunity to design an innovative clinical practice improvement project/program addressing an actual health care concern. Through mentored activities, the DNP student will identify, develop, implement, evaluate, and disseminate an independent analytic. Graded: S/U Grading (S/U, Audit). Students must be admitted to the DNP program. Restricted to: NURP majors. May be repeated up to 4 credits.

NURS 6350. Health Needs of Special Populations
2 Credits (2)
This course provides an overview of infant, child, adolescent, adult, and older adult health including conceptual and theoretical foundation for advanced practice. Developmental changes that occur throughout infancy, childhood, adolescence, adults, and older adults will be explored along with an overview of interventions that are used to maintain optimal health. May be repeated up to 4 credits.
Prerequisite: NURS 6510.
Learning Outcomes
1. Analyze historical and current child, adolescent, geriatric health services and policies within diverse groups and populations. Apply theoretical and conceptual frameworks related to the physical, psychosocial, and developmental issues of special populations and their families to clinical practice scenarios. Critique selected research findings relevant to the physical, psychosocial, and developmental needs of children, adolescents, older adults and families for the promotion, restoration and maintenance of health. Demonstrate inter-professional collaboration skills relative to the developmental, physical, psychosocial, cultural, ethical, and spiritual needs of children, adolescents, older adults and families as applied to diverse presentations (normal and abnormal anatomical, physiologic, motor, cognitive, psychological and social). Analyze interventions for children, adolescents, older adults and families during wellness/illness states for culturally and developmentally appropriate screening/assessment strategies. Analyze evidenced-based, individualized interventions for effective communication skills with children, adolescents, older adults and families.

NURS 6351. Health Needs of Special Populations Practicum
2 Credits (2P)
This course provides an overview of infant, child, adolescent, adult, and older adult health needs and interventions that promote and support optimal health. The conceptual and theoretical foundation for advanced practice with individuals and families across the lifespan is emphasized, including pharmaco-therapeutic and integrated bio-psychosocial interventions for diverse populations across the continuum of care. May be repeated up to 4 credits.
Learning Outcomes
1. Integrate, implement and evaluate evidence-based therapeutic interventions in complex acute care/outpatient practice situations with children, adolescents, older adults, and patients with mental illness and substance abuse disorders Demonstrate advanced clinical judgment based on current standards of practice. Synthesize clinical judgment, systems thinking, and accountability to provide evidenced based care Develop and sustain therapeutic relationships with patients across the life span (child, adolescents, young adult, adult, older adult, seniors) and other professional to optimize patient-centered outcomes.
NURS 6405. Psychopharmacology for Advanced Practice  
3 Credits (3)  
Principles of clinical psychopharmacology with emphasis on clinical application of major drug classifications including decision making, prescribing, drug monitoring and patient education. May be repeated up to 3 credits.  

NURS 6410. PMHNP Across the Lifespan I  
3 Credits (3)  
This is the first in a series of three didactic for the psychiatric mental health nurse practitioner (PMHNP) student. This course introduces the PMHNP student to the scope and standards of practice; legal and ethical issues; comprehensive psychiatric assessment and evaluation; developmental theories; and the theory and practice of psychotherapy. Emphasis is placed on individuals across the lifespan from diverse populations. May be repeated up to 6 credits.  
Prerequisite: NURS 6220, NURS 6230.  
Corequisite: NURS 6411.  
Learning Outcomes  
1. Synthesize the current scientific evidence along with theoretical models for personality development into therapeutic interventions within a healthy environment. Promote and evaluate the role of the Advanced Practice Nurse in the management of evidence-based interventions with individuals experiencing psychosocial and neurobiological disorders. Apply theoretical concepts and psychotherapeutic modalities to develop age appropriate therapeutic alliances with mental health individuals during developmental transitions and life-style adjustments across the lifespan, including focus on vulnerable populations at risk for mental health problems, based on current evidence and clinical practice guidelines. Evaluate strategies to promote the negotiation of mutually acceptable and collaborative treatment plans. Apply evidence-based findings to develop and improve practice.  

NURS 6411. PMHNP Across the Lifespan I Practicum  
3 Credits (3P)  
This is the first in a series of three clinical practicum courses for the psychiatric mental health nurse practitioner (PMHNP) student. This course provides the family psychiatric nurse practitioner student opportunities to work with a preceptor to gain advanced practice skills in individual therapies, comprehensive psychiatric evaluation, personality development concepts, dual diagnoses and psychotherapy principles; including management of health promotion, health maintenance and disease prevention activities. May be repeated up to 6 credits.  
Prerequisite: NURS 6220, NURS 6230.  
Learning Outcomes  
1. Demonstrate self-awareness of core professional values and ethical/legal standards in the implementation of the nurse practitioner role and identifies and maintains professional boundaries to preserve the integrity of the therapeutic process. Integrate history, laboratory and physical exam data with the knowledge of pathophysiology and psychopathology of acute and chronic diseases across the life span, to construct comprehensive and concise biopsychosocial assessments and diagnosis of individuals with common psychiatric disorders. Demonstrate dynamic theoretical concepts and psychotherapeutic modalities to develop age-appropriate therapeutic alliances with individuals and families during developmental transitions and life-style adjustments across the lifespan.  

NURS 6420. PMHNP Across the Lifespan II  
3 Credits (3)  
This is the second in a series of three didactic courses for the psychiatric mental health nurse practitioner (PMHNP) student. This course provides further theoretical foundations, knowledge and evidence-based practice experiences in differential diagnosis for mental health conditions; family and group therapy; and integrated management of mental health conditions. Emphasis is placed on working with families from diverse populations. May be repeated up to 6 credits.  
Prerequisite: NURS 6410.  
Corequisite: NURS 6421.  
Learning Outcomes  
1. Evaluate core professional values and ethical/legal standards in the implementation of the nurse practitioner role, identifying and maintaining professional boundaries to preserve the integrity of the therapeutic process. Integrate history, laboratory and physical exam data with the knowledge of pathophysiology and psychopathology of acute and chronic diseases across the life span, to construct comprehensive and concise biopsychosocial assessments and diagnosis of individuals with common psychiatric disorders. Identify age appropriate theoretical concepts and psychotherapeutic modalities to develop age-appropriate therapeutic alliances with individuals and families during developmental transitions and life-style adjustments across the lifespan.  

NURS 6421. PMHNP Across the Lifespan II Practicum  
3-4 Credits (3-4P)  
This is the second in a series of three clinical practicum courses for the psychiatric mental health nurse practitioner (PMHNP) student. This course provides gain knowledge and evidence-based practice experiences in differential diagnosis for mental health conditions; family and group therapy; and integrated management of mental health conditions. The course involves working with a preceptor to develop and implement comprehensive treatment plans that include psychotherapy and psychopharmacology in inpatient and/or outpatient settings. May be repeated up to 8 credits.  
Prerequisite: NURS 6411.  
Learning Outcomes  
1. Demonstrate self-awareness of core professional values and ethical/legal standards in the implementation of the nurse practitioner role and identifies and maintains professional boundaries to preserve the integrity of the therapeutic process. Integrate history, laboratory and physical exam data with the knowledge of pathophysiology and psychopathology of acute and chronic diseases across the life span, to construct comprehensive and concise biopsychosocial assessments and diagnosis of individuals with common psychiatric disorders. Demonstrate interdisciplinarity communication and care coordination by seeking consultation with colleagues to improve clinical outcomes for individuals with mental health problems and psychiatric disorders. Recognize cultural diversity, spiritual preferences, values, and beliefs to create a climate of patient-centered care demonstrating confidentiality, privacy, comfort, emotional support, mutual trust, and respect. Apply theoretical concepts and psychotherapeutic modalities to develop age-appropriate therapeutic alliances with individuals and families during developmental transitions and life-style adjustments across the lifespan based on current evidence and clinical practice guidelines. Demonstrate increasing independence in the application of supportive, psychodynamic principles, cognitive-behavioral and other evidence-based psychotherapy/ies to both brief and long-term individual encounters, family therapy and group therapy.
NURS 6430. PMHNP Across the Lifespan III
1 Credit (1)
This third course in the series of PMHNP didactic courses provides further knowledge and skills for the psychiatric nurse practitioner student to refine competencies in neuropsychology, assessment, diagnosis and treatment. Emphasis will be placed on individuals, families and groups across the lifespan in a multicultural environment. May be repeated up to 5 credits.
Prerequisite: NURS 6420.
Corequisite: NURS 6431.
Learning Outcomes
1. Synthesize current scientific evidence, differential and diagnostic reasoning along with theoretical models for group dynamics into therapeutic interventions. Apply theoretical concepts, evidence-based psychotherapeutic modalities, and knowledge of psychopharmacology to develop comprehensive treatment plans for psychiatric patients across the lifespan. Evaluate the role of the advanced practice nurse in the management of evidence-based interventions with groups and individuals experiencing psychosocial and neurobiological disorders.

NURS 6431. PMHNP Across the Lifespan III Practicum
3-4 Credits (3-4P)
Integrate history, laboratory and physical exam data with the knowledge of pathophysiology and psychopathology of acute and chronic diseases across the life span, to construct comprehensive and concise biopsychosocial assessments and diagnosis of individuals with common psychiatric disorders. Demonstrate interdisciplinary communication and care coordination by seeking consultation with colleagues to improve clinical outcomes for individuals with mental health problems and psychiatric disorders. Apply theoretical concepts and psychotherapeutic modalities to develop age-appropriate therapeutic alliances with individuals and families during developmental transitions and life-style adjustments across the lifespan based on current evidence and clinical practice guidelines. Recognize cultural diversity, spiritual preferences, values, and beliefs to create a climate of patient-centered care demonstrating confidentiality, privacy, comfort, emotional support, mutual trust, and respect. Demonstrate increasing independence in the application of supportive, psychodynamic principles, cognitive-behavioral and other evidence-based psychotherapies to both brief and long-term individual encounters, family therapy and group therapy. Demonstrate knowledge of psychotherapeutic theories and concepts by independently conducting psychotherapy with individuals with mental illness or at risk for mental health problems, under the supervision of a preceptor. Apply theoretical concepts, evidence-based psychotherapeutic modalities, and knowledge of psychopharmacology to develop, implement and document comprehensive treatment plans. May be repeated up to 8 credits.
Prerequisite: NURS 6421.
Corequisite: NURS 6430.
Learning Outcomes
1. Demonstrate self-awareness of core professional values and ethical/legal standards in the implementation of the nurse practitioner role, identifying and maintaining professional boundaries to preserve the integrity of the therapeutic process. Independently integrate history, laboratory and physical exam data with the knowledge of pathophysiology and psychopathology of acute and chronic diseases across the life span, to construct comprehensive and concise biopsychosocial assessments and diagnosis of individuals with common psychiatric disorders. Demonstrate interdisciplinary communication and care coordination by seeking consultation with colleagues to improve clinical outcomes for individuals with mental health problems and psychiatric disorders. Apply theoretical concepts and psychotherapeutic modalities to develop age-appropriate therapeutic alliances with individuals and/or families during developmental transitions and life-style adjustments across the lifespan based on current evidence and clinical practice guidelines. Demonstrate theoretical concepts, evidence-based psychotherapeutic modalities, and knowledge of psychopharmacology to independently develop, implement and document comprehensive treatment plans.
NURS 6450. Advanced Concepts in the Treatment of Substance Use Disorders
1 Credit (1)
This course examines scope of practice, epidemiology, cultural issues, and common co-occurring psychiatric, medical and legal problems related to substance use disorders, including opioid use disorder. Students will review theories and research as the basis for psychometric screening and evidence-based interventions, including medication-assisted treatment for substance use disorders. Emphasis is placed on individuals across the lifespan from diverse populations. Consent of Instructor required.

Learning Outcomes
1. Demonstrate the significance of professionalism and self-awareness by maintaining professional, ethical and legal standards, preserving the integrity of the therapeutic process, demonstrating commitment to the health and well-being of individuals and society ethical practice, and upholding high personal standards of behavior. Recognize addictive disorders as developmental biopsychosocial disorders using a model of interconnection encompassing neurobiology, genetic, medical and mental health co-morbidities, familial, social, environmental, cultural, spiritual influences as contributors of substance use disorders. Apply an evidence-based approach to detecting substance use disorders by recognizing medical, psychological, social, and functional indicators of subclinical addiction disorders through use of validated standardized substance use disorder screening instruments, and accurately interpret screening results indicative of hazardous and harmful substance use. Integrate positive substance use screening results with therapeutic and counseling strategies appropriate to the patient's readiness to change, by assessing the patient's background, ethnicity, and belief system to accommodate and respect the values and attitudes of various cultures. Recognize the indications, contraindications, duration and utilization of evidence-based medication-assisted treatment and pharmacotherapy for substance use disorders including medications for acute withdrawal and relapse prevention. Diagnose substance use disorders and existing co-occurring mental health and/or medical disorders, and match appropriate level or care, secure consultation and referrals for specialty treatment of addiction and other medical and psychiatric conditions.

NURS 6505. Women's Health
3 Credits (3)
The course will examine patient and family perspectives as well as health care system variables and societal issues that affect the organization and delivery of women's health care. Students will engage in critical analysis of the evidence base concerning psychosocial and spiritual concerns and barriers to and opportunities for improving women's health care across the diverse settings in which health care is delivered. Focus on evidence-based approaches to the primary care management of women. May be repeated up to 3 credits.

NURS 6510. FNP Across the Lifespan I
3 Credits (3)
This is the first in a series of three didactic courses for the family nurse practitioner (FNP) student. This course introduces the FNP student to the scope and standards of practice; legal and ethical issues; differential diagnosis; as well as the identification and management of specific symptoms and conditions. Emphasis is placed on individuals across the lifespan from diverse populations. May be repeated up to 6 credits.
Prerequisite: NURS 6220, NURS 6230.
Corequisite: NURS 6511.

Learning Outcomes
1. Apply evidence-based knowledge and theory related to the prevention, diagnosis and management of selected common acute health problems in clients across the lifespan. Plan collaborative case to assist clients and their families from diverse backgrounds to maximize functional health status Formulate patient centered therapeutic plans based on holistic health assessment, risk reduction and safety for the treatment and prevention of select, uncomplicated and common, acute illnesses. Evaluate the current use of professional values, leadership, and ethical/legal/policy standards in the implementation of the advanced practice role.

NURS 6511. FNP Across the Lifespan I Practicum
3 Credits (3P)
This is the first in a series of three clinical courses for the family nurse practitioner (FNP) student. This is the first in a series of three clinical courses for the family nurse practitioner (FNP) student. This course involves working with a preceptor to advance skills in patient history taking, performing physical assessments, and interpreting laboratory and other test results. Development of a plan of care with health promotion components is also expected. 1 P = 64 clock hours of practicum. May be repeated up to 6 credits.
Prerequisite: NURS 6220, NURS 6230.
Corequisite: NURS 6510.

Learning Outcomes
1. Integrate, implement and evaluate evidence-based therapeutic interventions in complex acute care practice situations. Develop and sustain therapeutic relationships with patients across the life span (child, adolescents, young adult, adult, older adult, seniors) and other professional to optimize patient-centered outcomes. Demonstrate advanced clinical judgment based on current standards of practice. Synthesize clinical judgment, systems thinking, and accountability to provide evidenced based care.
NURS 6520. FNP Across the Lifespan II
3 Credits (3)
This is the second in a series of three didactic courses for the family nurse practitioner (FNP) student. This course provides further theoretical foundations, knowledge and evidence-based practice experiences in the differential diagnosis and management of acute and chronic diseases. Emphasis is placed on individuals across the lifespan from diverse populations. Building on knowledge and skills from the previous course, students will be expected to manage patients with an increasing complexity of health issues and multiple co-morbidities. May be repeated up to 8 credits.
Prerequisite: NURS 6510.
Corequisite: NURS 6521.
Learning Outcomes
1. Integrate knowledge of pathophysiologic and psychosocial changes associated with common chronic health problems into immersion in practice decision-making. Demonstrate an advanced knowledge base of normal changes and common patterns across the life span, including the physiologic, psychological, social, and spiritual domains. Demonstrate an advanced knowledge base of common pathologies across the life span, and the diagnosis and treatment of common chronic health problems, including referral and follow-up. Evaluate the relationships between access, cost, quality, and safety and their influence on health care.

NURS 6521. FNP Across the Lifespan II Practicum
3-4 Credits (3-4P)
This is the second in a series of three clinical courses for the family nurse practitioner (FNP) student. This course builds on knowledge and skills from the previous course, students will be expected to manage patients with an increasing complexity of health issues and multiple co-morbidities. This course involves working with a preceptor to refine skills in assessment and differential diagnosis as well as the development and implementation of comprehensive treatment plans, that include referrals to other specialties and services. May be repeated up to 6 credits. NURS 6511.
Prerequisite: NURS 6520.
Corequisite: NURS 6521.
Learning Outcomes
1. Integrate knowledge of pathophysiologic and psychosocial changes associated with common chronic health problems into clinical decision-making. Demonstrate an advanced knowledge base of normal changes and common patterns across the life span, including the physiologic, psychological, social, and spiritual domains. Demonstrate an advanced knowledge base of common pathologies across the life span, and the diagnosis and treatment of common chronic health problems, including referral and follow-up. Translate knowledge of acute and chronic illness to the development, implementation and documentation of appropriate comprehensive treatment plans, including referrals to other specialties and services. Use self-reflection to evaluate progress in professional development as an integral member of the interprofessional team. Integrate ethical principles in decision-making and demonstrate core professional values in the implementation of the nurse practitioner role.

NURS 6530. FNP Across the Lifespan III
1 Credit (1)
This is the final didactic course for the family nurse practitioner (FNP) student. The course continues the development of knowledge and skills for the nurse practitioner student for the assessment and management of selected common acute and chronic health conditions across the lifespan. Emphasis will be placed on primary health care of individuals and their families in a multicultural environment. This course includes preparation for the FNP board certification exam. May be repeated up to 5 credits.
Prerequisite: NURS 6520, NURS 6521.
Corequisite: NURS 6531.
Learning Outcomes
1. Integrate knowledge of pathophysiologic and psychosocial changes associated with common chronic health problems into clinical decision-making. Demonstrate an advanced knowledge base of normal changes and common patterns across the life span, including the physiologic, psychological, social, and spiritual domains. Demonstrate an advanced knowledge base of common pathologies across the life span, and the diagnosis and treatment of common chronic health problems, including referral and follow-up. Translate knowledge of acute and chronic illness to the development, implementation and documentation of appropriate comprehensive treatment plans, including referrals to other specialties and services. Use self-reflection to evaluate progress in professional development as an integral member of the interprofessional team. Integrate ethical principles in decision-making and demonstrate core professional values in the implementation of the nurse practitioner role.

NURS 6531. FNP Across the Lifespan III Practicum
3-4 Credits (3-4P)
This is the final clinical course for the family nurse practitioner (FNP) student. In this course, the student works with a preceptor to develop mastery of skills required to assess, diagnose and manage acute and chronic conditions in primary care settings. Advancement of knowledge and skills attained through previous practicum experiences, as well as this final course, produces a capable, qualified provider, who will transition into a safe, novice, primary care nurse practitioner. May be repeated up to 8 credits.
Prerequisite: NURS 6521.
Corequisite: NURS 6530.
Learning Outcomes
1. Apply theoretical concepts of patient-centered care with emphasis on health promotion, disease prevention, guidance/counseling, disease management, and palliative care during developmental transitions and life-style adjustments. Incorporate primary/secondary prevention guidance into comprehensive treatment plans for patients across the lifespan. Integrate history, physical examination laboratory and other test data with knowledge of pathophysiologic of acute and chronic diseases/conditions to develop appropriate differential diagnoses. Identify pharmacological interventions in the treatment and management of illness for diverse populations. Integrate evidence-based clinical guidelines into the diagnosis and management of illness in patients across the lifespan. Translate knowledge of acute and chronic illness to the development, implementation and documentation of appropriate comprehensive treatment plans, including referrals to other specialties and services.
NURS 6610. Nurse Anesthesiology Principles I
3 Credits (3)
This is the first of four sequential nurse anesthesiology principles courses and introduces the student to advanced nursing practice in anesthesia with integration of theoretical perspectives from anatomy, physiology, physics, chemistry, and related mathematics. This course focuses on the development of foundational knowledge to deliver safe, effective anesthesia care across the lifespan. Emphasis is on perioperative preparation, management, and evaluation of the patient, anesthetizing area, and equipment.

Learning Outcomes
1. Review fundamentals of safe evidence-based anesthesia practice related to anesthesia techniques, airway management techniques, perioperative patient/anesthetizing area preparation, anesthesia planning, safety measures, appropriate use of equipment and monitoring devices, and anesthesia complications. Demonstrate a comprehensive equipment check and proper utilization and/or interpretation of anesthesia delivery systems, airway equipment, monitoring devices, communication techniques, documentation, and patient positioning. Assess patient fluid status and calculate, initiate, and manage fluid/blood component therapy. Examine chemistry, physics, biochemistry, and imaging principles and their relationship to anesthesia.

NURS 6620. Nurse Anesthesiology Principles II
3 Credits (3)
This is the second of four sequential nurse anesthesiology principles courses and builds upon knowledge gained from previous courses. This course emphasizes evidence-based anesthesia techniques, complications, and considerations for a variety of patients undergoing a variety of procedures such as intraabdominal, extrathoracic, neck, extracranial, orthopedic, perineal, pelvic, laser, non-operating room, and ambulatory. This course also focuses on providing students with a foundation to incorporate safe, evidence-based regional anesthesia techniques, including ultrasound-guided principles, into their clinical practice. Enhanced recovery after anesthesia and hypotensive techniques will be examined.

Learning Outcomes
1. Discuss the integration of anesthesia principles, pathophysiology, physiology, and pharmacology for the planning of safe evidence-based anesthesia care for diverse patients undergoing a variety of surgical procedures. Describe the indications and benefits of neuraxial and peripheral nerve blockade for diverse populations, as well as management of associated complications. Identify via ultrasound key anatomy relevant to peripheral nerve blockade and demonstrate proper approach to performing common neuraxial and peripheral nerve blockade techniques.

NURS 6630. Nurse Anesthesiology Principles III
3 Credits (3)
This is the third of four sequential nurse anesthesiology principles courses and builds upon knowledge gained from previous courses. This course emphasizes evidence-based anesthesia techniques, complications, and considerations for special populations across the lifespan including neonatal, pediatric, obstetric, geriatric, and obese patients.

Learning Outcomes
1. Discuss the integration of anesthesia principles, pathophysiology, physiology, and pharmacology for the planning of safe evidence-based anesthesia care for special populations across the lifespan undergoing a variety of surgical procedures. Identify modifications required for anesthesia planning and management of special populations across the lifespan related to their physiology, comorbidities, and congenital anomalies as applicable. Discuss management of anesthesia complications related to special populations across the lifespan. Integrate anesthesia research and best practice guidelines into anesthesia planning for special populations across the lifespan.

NURS 6640. Nurse Anesthesiology Principles IV
3 Credits (3)
This is the final of four sequential nurse anesthesiology principles courses and builds upon knowledge gained from previous courses. This course emphasizes evidence-based anesthesia techniques, complications, and considerations for more complex procedures including thoracic, vascular, neuroskeletal, diagnostic/therapeutic, trauma, burns, organ procurement/transplantation, and other pertinent procedures.

Learning Outcomes
1. Discuss the integration of anesthesia principles, pathophysiology, physiology, and pharmacology for the planning of safe evidence-based anesthesia care for diverse patients undergoing a variety of complex procedures. Identify common comorbid conditions of patients undergoing complex procedures. Examine anesthesia techniques, considerations, and complications (and their management) of diverse patients undergoing a variety of complex procedures. Integrate anesthesia research and best practice guidelines into anesthesia planning for diverse patients undergoing a variety of complex procedures.
NURS 6710. Nurse Anesthesiology Clinical Residency I
3 Credits (3P)
This is the first of six clinical residency courses and provides students with the opportunity to begin developing the advanced nursing practice role in anesthesiology. Students are expected to integrate didactic knowledge learned in previous courses and co-requisite courses into perianesthesia care of the patient. Students begin to incorporate evidence-based research practices with an emphasis on patient safety and vigilance, culturally competent care of the patient throughout the peri-anesthesia continuum, interpersonal communication, and integration of critical and reflective thinking of an anesthesia provider.

Learning Outcomes
1. Integrate knowledge of anesthesiology principles, anatomy, physiology, pathophysiology, and pharmacology into evidence-based anesthesia planning and delivery of safe anesthesia care. Conduct a comprehensive history and physical assessment and formulate an evidence-based anesthesia plan of care based on the patient’s underlying health status, culturally relevant information, and the surgical or medical procedure. Administer safe evidence-based, culturally competent perianesthesia care to a variety of patients undergoing surgical and medical procedures with guidance.

NURS 6720. Nurse Anesthesiology Clinical Residency II
3 Credits (3P)
This is the second of six clinical residency courses and builds upon the didactic knowledge, clinical knowledge, and foundational concepts developed in Clinical Residency I and in-hospital experiences. Students continue to incorporate evidence-based research practices with an emphasis on patient safety and vigilance, culturally competent care of the patient throughout the peri-anesthesia continuum, interpersonal communication, and integration of critical and reflective thinking of an anesthesia provider. Students progressively assume more responsibility for patients as they gain skills and knowledge.

Learning Outcomes
1. Integrate knowledge of anesthesiology principles, anatomy, physiology, pathophysiology, and pharmacology into evidence-based anesthesia planning and delivery of safe anesthesia care. Conduct a comprehensive history and physical assessment and formulate an evidence-based anesthesia plan of care based on the patient’s underlying health status, culturally relevant information, and the surgical or medical procedure. Administer safe evidence-based, culturally competent perianesthesia care to a variety of patients undergoing surgical and medical procedures with guidance.

NURS 6730. Nurse Anesthesiology Clinical Residency III
3 Credits (3P)
This is the third of six clinical residency courses and builds upon the didactic knowledge, clinical knowledge, and foundational concepts developed in previous clinical residency courses and in-hospital experiences. Students continue to incorporate evidence-based research practices with an emphasis on patient safety and vigilance, culturally competent care of the patient throughout the peri-anesthesia continuum, interpersonal communication, and integration of critical and reflective thinking of an anesthesia provider. As students complete clinical experiences in various specialties, they will provide anesthesia services to patients with more complex alterations in health patterns requiring more expertise in anesthesia management.

Learning Outcomes
1. Integrate knowledge of anesthesiology principles, anatomy, physiology, pathophysiology, and pharmacology into evidence-based anesthesia planning and delivery of safe anesthesia care. Conduct a comprehensive history and physical assessment and formulate an evidence-based anesthesia plan of care based on the patient’s underlying health status, culturally relevant information, and the surgical or medical procedure. Administer safe evidence-based, culturally competent perianesthesia care to a variety of patients undergoing surgical and medical procedures with minimal guidance.

NURS 6740. Nurse Anesthesiology Clinical Residency IV
4 Credits (4P)
This is the fourth of six clinical residency courses and builds upon the didactic knowledge, clinical knowledge, and foundational concepts developed in previous clinical residency courses and in-hospital experiences. Students continue to incorporate evidence-based research practices with an emphasis on patient safety and vigilance, culturally competent care of the patient throughout the peri-anesthesia continuum, interpersonal communication, and integration of critical and reflective thinking of an anesthesia provider. As students complete clinical experiences in various specialties, they will provide anesthesia services autonomously to patients with more complex alterations in health patterns requiring more expertise in anesthesia management.

Learning Outcomes
1. Integrate knowledge of anesthesiology principles, anatomy, physiology, pathophysiology, and pharmacology into evidence-based anesthesia planning and delivery of safe anesthesia care. Conduct a comprehensive history and physical assessment and formulate an evidence-based anesthesia plan of care based on the patient’s underlying health status, culturally relevant information, and the surgical or medical procedure. Administer safe evidence-based, culturally competent perianesthesia care to a variety of patients undergoing surgical and medical procedures. Autonomously demonstrate basic anesthesia skills/techniques and incorporate new skills. Autonomously identify perianesthesia patient physiologic alterations and/or equipment alterations and initiate appropriate management utilizing evidence-based problem solving and decision making. Autonomously provide anesthesia services in a rural community. Use effective communication and documentation skills with diverse patients, families, other healthcare workers, and ancillary personnel to facilitate safe patient care. Demonstrate integrity, ethics, honesty, and accountability in professional interactions.
NURS 6750. Nurse Anesthesiology Clinical Residency V
4 Credits (4P)
This is the fifth of six clinical residency courses and builds upon the didactic knowledge, clinical knowledge, and foundational concepts developed in previous clinical residency courses and in-hospital experiences. Students continue to incorporate evidence-based research practices with an emphasis on patient safety and vigilance, culturally competent care of the patient throughout the peri-anesthesia continuum, interpersonal communication, and integration of critical and reflective thinking of an anesthesia provider. Students are expected to provide anesthesia services independently to patients with more complex alterations in health patterns requiring more expertise in anesthesia management.
Learning Outcomes
1. Integrate knowledge of anesthesiology principles, anatomy, physiology, pathophysiology, and pharmacology into evidence-based anesthesia planning and delivery of safe anesthesia care. Conduct a comprehensive history and physical assessment and formulate an evidence-based anesthesia plan of care based on the patient’s underlying health status, culturally relevant information, and the surgical or medical procedure. Independently administer safe evidence-based, culturally competent perianesthesia care to a variety of patients undergoing surgical and medical procedures. Independently demonstrate basic anesthesia skills/techniques and incorporate new skills. Independently identify perianesthesia patient physiologic alterations and/or equipment alterations and initiate appropriate management utilizing evidence-based problem solving and decision making. Independently provide anesthesia services in a rural community. Use effective communication and documentation skills with diverse patients, families, other healthcare workers, and ancillary personnel to facilitate safe patient care. Demonstrate integrity, ethics, honesty, and accountability in professional interactions.

NURS 6760. Nurse Anesthesiology Clinical Residency VI
4 Credits (4P)
This is the final clinical residency course and builds upon the didactic knowledge, clinical knowledge, and foundational concepts developed in previous clinical residency courses and in-hospital experiences. Students continue to incorporate evidence-based research practices with an emphasis on patient safety and vigilance, culturally competent care of the patient throughout the peri-anesthesia continuum, interpersonal communication, and integration of critical and reflective thinking of an anesthesia provider. Students are expected to provide anesthesia services independently to patients with more complex alterations in health patterns requiring more expertise in anesthesia management.
Learning Outcomes
1. Integrate knowledge of anesthesiology principles, anatomy, physiology, pathophysiology, and pharmacology into evidence-based anesthesia planning and delivery of safe anesthesia care. Conduct a comprehensive history and physical assessment and formulate an evidence-based anesthesia plan of care based on the patient’s underlying health status, culturally relevant information, and the surgical or medical procedure. Independently administer safe evidence-based, culturally competent perianesthesia care to a variety of patients undergoing surgical and medical procedures. Independently demonstrate basic anesthesia skills/techniques and incorporate new skills. Independently identify perianesthesia patient physiologic alterations and/or equipment alterations and initiate appropriate management utilizing evidence-based problem solving and decision making. Independently provide anesthesia services in a rural community. Use effective communication and documentation skills with diverse patients, families, other healthcare workers, and ancillary personnel to facilitate safe patient care. Demonstrate integrity, ethics, honesty, and accountability in professional interactions.

NURS 6770. Rural Health Anesthesiology Seminar
2 Credits (2)
This course focuses on unique issues and challenges surrounding the provision of nurse anesthesiology services in rural communities. Topics covered include working with scarce resources, needs of individuals/populations living in rural communities, regulatory issues, health policy, reimbursement practices, cultural issues, technology, and local/state/federal aspects that impact rural nurse anesthesiology practice.
Learning Outcomes
1. Define unique needs of individuals and/or populations living in rural communities. Identify challenges of working with scarce resources. Discuss regulatory, policy, reimbursement, and cultural issues unique to rural nurse anesthesiology practice. Illustrate local, state, and/or federal issues that impact rural nurse anesthesiology practice.
NURS 6771. Anesthesiology Integration/Clinical Correlation I
2 Credits (2)
This course is the first of a two-course sequence and is designed to further develop critical thinking skills and foster continued integration of theoretical knowledge into clinical practice. Clinically relevant evidence-based research and anesthesiology topics will be presented by students and faculty. This course also includes student participation in discussion of clinical experiences and case presentations. Students will critically analyze, synthesize, and evaluate the knowledge gained in all previous nurse anesthesiology courses in preparation for the comprehensive exam, national certification examination, and clinical practice.

Learning Outcomes
1. Demonstrate the ability to critically review pertinent literature and its application to clinical practice. Deliver case-based presentations that incorporate current evidence-based best practices and culturally relevant information. Synthesize knowledge gained from previous nurse anesthesiology coursework. Analyze performance on the comprehensive exam. Create an action plan to pass the National Certification Exam.

NURS 6772. Anesthesiology Integration/Clinical Correlation II
2 Credits (2)
This course is the second of a two-course sequence and continues to further develop critical thinking skills and foster continued integration of theoretical knowledge into clinical practice. Clinically relevant evidence-based research and anesthesiology topics will be presented by students and faculty. This course also includes student participation in discussion of clinical experiences and case presentations. Students will continue to critically analyze, synthesize, and evaluate the knowledge gained in all previous nurse anesthesiology courses in preparation for the national certification examination and clinical practice.

Learning Outcomes
1. Demonstrate the ability to critically review pertinent literature and its application to clinical practice. Deliver case-based presentations that incorporate current evidence-based best practices and culturally relevant information. Demonstrate consistent professional growth and development through discussion, presentation, interaction, and individual and/or group participation. Complete the student self-evaluation of graduate standards form. Implement the previously created action plan to pass the NBCRNA NCE and revise it as needed.

NURS 6990. Advanced Practice Nursing Immersion
1-4 Credits (1-4)
Practicum experience for advanced practice students. Focus will be on a practice issue chosen by the student for further development as an evidence-based doctoral project. Clinical practice hours as needed to meet DNP requirements. Up to 24 credits may be completed by student. Restricted to: NURP majors. May be repeated up to 24 credits.

Prerequisite: NURS 6220, NURS 6530 or enrollment in post-masters track.

NURS 6993. Doctoral Nursing Seminar
1-3 Credits (1-3)
Seminar to build nursing scholarship skills, consisting of a series of 1 credit seminars that are taken as part of the doctoral degree plan. May be repeated up to 7 credits.

NURS 6997. Independent Study
1-6 Credits (1-6)
Individual studies and directed research with prior approval of department head. May be repeated up to 12 credits.

NURS 7000. Doctoral Dissertation
1-9 Credits (1-9)
Dissertation may be repeated to maximum of 30 credits. Minimum requirements are 21 credit hours. Comprehensive examine is included within these 21 credits. May be repeated up to 30 credits.

Learning Outcomes
1. Varies

NURS 999. Practical Nursing Requirements Completed
99 Credits
A phantom course created to indicate a student has met Practical Nursing requirements. Used to indicate this in academic history to replace an administrative message not converted from SOLAR to VISTAS. 01/97 May be repeated up to 99 credits.

Learning Outcomes
1. N/A

Nursing - Bachelor of Science in Nursing

Four-Year Curriculum Plan Courses
A grade of C- or better is required for all courses in the curriculum. Students must also complete six elective credits from the Part III Viewing a Wider World general education category.

Math basic academic skills requirement must be satisfied.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 122 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix Title Credits
General Education
Area I: Communications
English Composition - Level 1 1
English Composition - Level 2 1
Oral Communication 1
Area II: Mathematics
Choose one from the following: 2
MATH 1220G College Algebra
MATH 1430G Applications of Calculus I
MATH 1250G Trigonometry & Pre-Calculus
MATH 1511G Calculus and Analytic Geometry I
MATH 1521G Calculus and Analytic Geometry II
or MATH 1521H Calculus and Analytic Geometry II Honors
1
2
3-4
Choose one combination of courses from the following:

### Anatomy and Physiology Requirement

- NUTR 2110

### Non-Departmental Requirements (in addition to Gen.Ed/VWW)

- NMNC 4545
- NMNC 4535
- NMNC 4520
- NMNC 4510

### Level 5

- NMNC 4445
- NMNC 4435
- NMNC 4410

### Level 4

- NMNC 4335
- NMNC 4320
- NMNC 4310

### Level 3

- NMNC 4235
- NMNC 4230
- NMNC 4220
- NMNC 4210

### Level 2

- NMNC 4120
- NMNC 4110

### Nursing Electives-3 credits (Specific List of Courses from Nursing Advisor)

- BIOL 2511
- BIOL 2512

### Second Language: (not required)

Electives, to bring the total credits to 122

| Total Credits | 122-127 |

### View A Wider World

1. MATH 1350G Introduction to Statistics
2. MATH 2350G Statistical Methods
3. A ST 311 Statistical Applications

### Microbiology Requirement

Choose one from the following:

- BIOL 2210 Microbiology
- & BIOL 2210L Microbiology Lab
- BIOL 2220 Public Health Microbiology
- & BIOL 2220L and General Microbiology Laboratory
- BIOL 311 General Microbiology
- & 311 L General Microbiology Laboratory

### Formal Acceptance required before taking NURSING courses

The NMSU School of Nursing participates in the New Mexico Nursing Education Consortium. The nursing curriculum offered is the NMNEC Statewide Curriculum Plan.

**Note:** A grade of C- or better is required for all courses in the curriculum. You must also complete 6 elective credits from the Part III  View A Wider World general education category.

1. An applicant who is not a U.S. citizen or who has been convicted of a felony is advised to contact the appropriate State Board of Nursing regarding eligibility for licensure.
2. Clinical clearances are required for all students prior to admission and concurrent with each semester of studies. These include: current immunizations; background screening; drug testing; individual health insurance coverage; current CPR status; various health agency orientations, as well as other requirements mandated by clinical affiliation agreements. Failure to complete and provide documentation within timelines established by the School of Nursing may prevent admission to/or continuation within the nursing program.
3. Students are required to make a satisfactory score on nationally-normed, standardized tests before application. In the last semester of the curriculum, students are required to take a comprehensive/standardized exam and to make a satisfactory score on this exam prior to their final clinical experience.

4. Newly admitted students are required to attend an orientation session which occurs prior to the start of classes for their first nursing semester.

5. School-wide activities begin 1-3 days prior to the start of classes. Attendance is required.

### A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

1. These courses may have prerequisites and/or co-requisites, and it is the students responsibility for checking and fulfilling all those requirements.

2. See the General Education (p. 88) section of the catalog for a full list of courses.

3. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.
Nursing Leadership & Administration - Master of Science in Nursing (Online)

The Master's of Science in Nursing (MSN) provides graduate level education and training in the field of Nursing Leadership and Administration. Students enrolled in the Nursing Leadership and Administration MSN program acquire the knowledge and experience to assume leadership positions in a wide range of health care systems and fulfill the fundamental requirements to secure middle and top-level administrative positions in health care agencies. The MSN in Nursing Leadership and Administration degree option is available to nurses who possess an RN license and a Bachelor of Science degree in Nursing (BSN). Courses for this degree are delivered through distance education (i.e., online), which allows nurses to advance their careers while working and remaining in their communities.

For application information, visit the School of Nursing website (https://schoolofnursing.nmsu.edu/) or contact the Nursing Graduate Advisor for more information about application and admission requirements at (575) 646-7770.

Nursing Practice - Doctor of Nursing Practice (Online)

The DNP is a doctoral degree for nurses at the highest level of nursing practice. The American Association of Colleges of Nursing (AACN) has proposed that the DNP degree will be the level of entry for all advanced practice nurses by 2020. Practice-focused doctoral nursing programs prepare leaders for the highest level of practice and is the terminal practice degree. The post-MSN to DNP track is for advanced practice registered nurses (APRN's) who wish to earn the terminal clinical degree in nursing.
For application information, visit the School of Nursing website (https://schoolofnursing.nmsu.edu/) or contact the Nursing Graduate Advisor for more information about application and admission requirements at (575) 646-7770.

New Mexico State University is a full member of the National Council of State Authorization Reciprocity Agreements consortium (SARA). Students will need to check the NMSU SARA website (https://online.nmsu.edu/state_authorization/Check%20Your%20State.html) before application to determine if NMSU has a reciprocity agreement with their home state before application is made.

**Nursing Practice (Family Nurse Practitioner) - Doctor of Nursing Practice (Online)**

The Doctor of Nursing Practice (DNP) is a doctoral degree for nurses at the highest level of nursing practice. The American Association of Colleges of Nursing (AACN) has proposed that the DNP degree will be the level of entry for all advanced practice nurses by 2020. Practice-focused doctoral nursing programs prepare leaders for the highest level of practice and is the terminal practice degree. The core DNP courses prepare the DNP graduate for Population Health Leadership. Although the coursework for these programs is web-based, the clinical component consists of over 1000 contact hours. Anyone interested in pursuing a nurse practitioner doctorate must make certain that they can accommodate the intensive time commitment that these programs require.

The Family Nurse Practitioner track prepares nurses for advanced practice through a course of study focused on the health care of families across the lifespan. The courses in this specialty focus on advanced health assessment, advanced pathophysiology, advanced pharmacology, and management of acute and chronic illness in families. These courses are combined with specialty seminars and clinical experiences that emphasize the physiological and psychosocial impact of illness on the patient and family. Graduates are prepared to sit for the Family Nurse Practitioner certification exam.

In order to complete the DNP program, each student is required to generate a project that reflects their advanced coursework in leadership, research translation, and clinical knowledge and skills.

New Mexico State University is a full member of the National Council of State Authorization Reciprocity Agreements consortium (SARA). Students will need to check the NMSU SARA website (https://online.nmsu.edu/state_authorization/Check%20Your%20State.html) before application to determine if NMSU has a reciprocity agreement with their home state before application is made. State Boards of Nursing may regulate NMSU’s ability to have APRN students in clinical practice in the home state of out of state students. Please refer to the National Council of State Boards of Nursing’s APRN Distance Education Requirements (https://www.ncsbn.org/13662.htm) website and contact with Nursing Graduate Advisor to confirm eligibility to conduct clinical training in states outside of New Mexico.

For application information, visit the School of Nursing website (https://schoolofnursing.nmsu.edu/) or contact the Nursing Graduate Advisor for more information about application and admission requirements at (575) 646-7770.

1 NURS 6307 DNP Project Practicum can be repeated each semester for no more than 9 credits

New Mexico State University is a full member of the National Council of State Authorization Reciprocity Agreements consortium (SARA). Students will need to check the NMSU SARA website (https://online.nmsu.edu/state_authorization/Check%20Your%20State.html) before application to determine if NMSU has a reciprocity agreement with their home state before application is made.

Nursing Practice (Psychiatric/Mental Health) - Doctor of Nursing Practice (Online)

The Doctor of Nursing Practice (DNP) is a doctoral degree for nurses at the highest level of nursing practice. The American Association of Colleges of Nursing (AACN) has proposed that the DNP degree will be the level of entry for all advanced practice nurses by 2020. Practice-focused doctoral nursing programs prepare leaders for the highest level of practice and is the terminal practice degree. The core DNP courses prepare the DNP graduate for Population Health Leadership. Although the coursework for these programs is web-based, the clinical component consists of over 1000 contact hours. Anyone interested in pursuing a nurse practitioner doctorate must make certain that they can accommodate the intensive time commitment that these programs require.

The Psychiatric/Mental Health Nurse Practitioner track prepares nurses for advanced practice with a focus on mental health issues across the lifespan. The curriculum builds upon four core PMHNP competencies: advanced health assessment (physical and psychosocial); diagnosis (diagnosis of mental disorders, pathophysiology, and neurophysiology); psychotherapy (individual, group, and family); and medication management (pharmacology and psychopharmacology). Other courses develop competencies in health care systems, best-practice research utilization and translation, and health care quality improvement. Graduates are prepared to sit for the Psychiatric/Mental Health Nurse Practitioner Exam.

In order to complete the DNP program, each student is required to generate a project that reflects their advanced coursework in leadership, research translation, and clinical knowledge and skills.

New Mexico State University is a full member of the National Council of State Authorization Reciprocity Agreements consortium (SARA). Students will need to check the NMSU SARA website (https://online.nmsu.edu/state_authorization/Check%20Your%20State.html) before application to determine if NMSU has a reciprocity agreement with their home state before application is made. State Boards of Nursing may regulate NMSU’s ability to have APRN students in clinical practice in the home state of out of state students. Please refer to the National Council of State Boards of Nursing’s APRN Distance Education Requirements (https://www.ncsbn.org/13662.htm) website and contact with Nursing Graduate Advisor to confirm eligibility to conduct clinical training in states outside of New Mexico.

For application information, visit the School of Nursing website (https://schoolofnursing.nmsu.edu/) or contact the Nursing Graduate Advisor for more information about application and admission requirements at (575) 646-7770.

**Family Nurse Practitioner - Post-Masters Certificate (Online)**

Post Graduate APRN Certificate Program: This program is for currently certified Master’s or doctorally-prepared nurse practitioners, certified nurse midwives, and certified registered nurse anesthetists who wish to obtain the coursework needed to sit for certification in another specialty. The Post-Graduate certificate consists of 18 credit hours which includes a minimum of 500 clinical hours. When applying to the Post-Graduate APRN Certificate program, please select “Graduate Certificate” in the application system. Please note that the clinical hours are “required” for national certification and cannot be waived or negotiated.
The Family Nurse Practitioner track prepares nurses for advanced practice through a course of study focused on the health care of families across the lifespan. The courses in this specialty focus on advanced health assessment, advanced pathophysiology, advanced pharmacology, and management of acute and chronic illness in families. These courses are combined with specialty seminars and clinical experiences that emphasize the physiological and psychosocial impact of illness on the patient and family. Graduates are prepared to sit for the Family Nurse Practitioner certification exam.

For application information, visit the School of Nursing website (https://schoolofnursing.nmsu.edu/online-doctor-of-nursing/) or contact the Nursing Graduate Advisor for more information about application and admission requirements at (575) 646-7770.

### Psychiatric/Mental Health Nurse Practitioner - Post-Masters Certificate (Online)

The Psychiatric/Mental Health Nurse Practitioner specialty prepares nurses for advanced practice with a focus on mental health issues across the lifespan. The curriculum builds upon four core PMHNP competencies: advanced health assessment (physical and psychosocial); diagnosis (diagnosis of mental disorders, pathophysiology, and neurophysiology); psychotherapy (individual, group, and family); and medication management (pharmacology and psychopharmacology). Other courses develop competencies in health care systems, best-practice research utilization and translation, and health care quality improvement. Graduates are prepared to sit for the Psychiatric/Mental Health Nurse Practitioner Certification Exam.

For application information, visit the School of Nursing website (https://schoolofnursing.nmsu.edu/online-doctor-of-nursing/) or contact the Nursing Graduate Advisor for more information about application and admission requirements at (575) 646-7770.

#### Prefix | Title | Credits
--- | --- | ---
NURS 6510 | FNP Across the Lifespan I | 3
NURS 6511 | FNP Across the Lifespan I Practicum | 3
NURS 6520 | FNP Across the Lifespan II | 3
NURS 6521 | FNP Across the Lifespan II Practicum | 3
NURS 6530 | Health Needs of Special Populations | 2
NURS 6531 | FNP Across the Lifespan III Practicum | 3

**Total Credits**: 18

#### First Year

**Fall**

- NURS 6510 | FNP Across the Lifespan I | 3
- NURS 6511 | FNP Across the Lifespan I Practicum | 3

**Credits**: 6

**Spring**

- NURS 6520 | FNP Across the Lifespan II | 3
- NURS 6521 | FNP Across the Lifespan II Practicum | 3
- NURS 6350 | Health Needs of Special Populations | 2

**Credits**: 8

**Summer**

- NURS 6530 | FNP Across the Lifespan III | 1
- NURS 6531 | FNP Across the Lifespan III Practicum | 3

**Credits**: 4

**Total Credits**: 18

#### Notes

- Certificate students must complete 576 hours of supervised clinical practicum hours. 1 credit in a clinical course = 64 hours of clinical practicum.
- For PMHNP certificate students, NURS 514 Psychopharmacology for Advance Practice is optional because the New Mexico Higher Education Department limits graduate certificates to 18 credits. However, it is strongly recommended that students take this course to prepare them to meet the prescriptive practice and medication management competencies on the PMHNP certification exam.

New Mexico State University is a full member of the National Council of State Authorization Reciprocity Agreements consortium (SARA). Students will need to check the NMSU SARA website (https://online.nmsu.edu/state_authorization/Check%20Your
Public Health Sciences

Undergraduate Program Information

The curriculum in public health prepares students for careers in community and public health programs, also in voluntary, private and governmental agencies. Upon completion of the degree, the graduate is eligible to take the national Certified Health Education Specialist (CHES) examination administered by the National Commission for Health Education Credentialing, Inc. The Bachelor of Public Health program is fully accredited by the Council on Education for Public Health (CEPH).

Students seeking admission to the Bachelor of Public Health degree in the Department of Public Health Sciences at NMSU are first admitted as pre-public health (PPHL) students. Students keep this designation until they have met the following admissions requirements:

1. A cumulative grade-point average of at least 2.5 after completing specified general education coursework (the common core).
2. A grade of C- or better in prerequisite departmental courses

3. A grade of C- or better in MATH 1215 Intermediate Algebra.
4. A grade of B or better in MATH 1350G Introduction to Statistics or A ST 311 Statistical Applications.
5. Entrance Exam: A score of 37% or better on the Conventions of Written English assessment and 75% or better on the Math assessment.
6. Submission of an application packet that includes
   a. a brief personal statement of interest in the profession, and
   b. a completed application for the Bachelor of Public Health degree program.

The Bachelor of Public Health (BPH) degree program accepts applicants during the Spring and Fall semesters. The deadlines for accepting application packets are September 15th for Spring admission and February 15th for Fall admission. All applications must be submitted to the Program Advisor at the Center for Academic Advising and Student Support at Garcia Center. Courses are offered both face-to-face and online.

Applicants may receive a conditional acceptance into the program if they are currently enrolled in the last of the required prerequisites at the time they submit an application to the Bachelor of Public Health degree program. Such conditional acceptance will be revoked if the applicant does not successfully complete each of the prerequisite courses.

Students must attain a grade of C- or better in all required PHLS core coursework.

Failure to obtain a satisfactory grade of C or better in any two PHLS courses could be grounds for dismissal from the program. Any student who receives two or more grades of D or F in required PHLS core courses must petition, in writing, to continue as a major.

Graduate Program Information

The Department of Public Health Sciences offers the Master of Public Health degree (MPH) in the Health Behavior and Health Promotion concentration and the Health Management, Administration, and Policy concentration. The degree program prepares public health professionals to function in a variety of settings, including health programs at the local, state, and federal government levels; profit and nonprofit organizations and agencies; worksite settings; and educational institutions. The MPH program is fully accredited by the Council on Education for Public Health (CEPH).

Students may participate in either the full-time on-campus MPH program with HBHP concentration, or either of the part-time (i.e., two courses/semester) online programs including HBHP concentration or the HMAP concentration. All coursework for online degrees can be completed off-campus utilizing web-based technologies aimed at meeting the needs of working students and others for whom a campus-based program is not an option.

Admissions Requirements

In addition to meeting all admissions requirements of the Graduate School, applicants must meet the following departmental requirements:

- Complete a short personal statement describing the applicant’s reasons for wishing to pursue the MPH degree at NMSU. Any paid or volunteer work performed in a public health or related agency setting should also be described in detail, including length of work and descriptions of the work typically performed as part of the job.
- Submit at least three letters of reference from former faculty and/or employers.

Applications are now completed online. Go to http://gradschool.nmsu.edu/. For more information, contact the Graduate Coordinator at mphapps@nmsu.edu, or visit the website: publichealth.nmsu.edu (https://publichealth.nmsu.edu).

Héctor Luis Díaz, Acting Department Head

Professors  Khubchandani, Kopera-Frye, McDonald, Palacios, Tomaka;  Associate Professor  Wilson;  Assistant Professors  Magoc, Reagan, Rahman, Shaver, Shin, Stimatze; College Professor  Latz

E. England-Kennedy Ph.D (University of Arizona, Tucson) - homelessness and health, suicide prevention, social and environmental justice, health equity;  K. Kopera-Frye, PhD (Wayne State University) - gerontology, health promotion and obesity among ethnically diverse groups, rural health, substance abuse;  J. McDonald, PhD (U Washington) - epidemiology;  D. Magoc, PhD (U. of Texas at El Paso) – active living, health behavior;  R. Palacios, PhD (U. of Texas at El Paso) – cancer survivorship, masculinity and health, cultural adaptations;  H. Rahman, MD (Rangpur Medical College, Bangladesh), PhD (University of South Florida) - toxicology;  C. Shaver, DHA, IHC (Central Michigan University); Rural public health, opioid use disorder, global health systems; Julie Reagan, PhD, JD, MPH (U. of Texas Health Science Center at Houston; U. of Houston Law Center) – Public Health Law, Health Policy & Management, Healthcare Administration;  D.Y. Shin, PhD (University of Alabama, Birmingham) - healthcare management;  T. Stimatze. Ph.D. (New Mexico State U.) biostatistics, J. Tomaka, PhD (U. of Buffalo), Graduate Coordinator – health behavior, program evaluation;  S.L. Wilson, PhD (Southern Methodist U.) – health policy, rural health, international health, health disparities

Public Health Sciences Courses

PHLS 1110G. Personal Health & Wellness
3 Credits (3)
A holistic and multi-disciplinary approach towards promoting positive lifestyles. Special emphasis is placed on major problems that have greatest significance to personal and community health. Topics to include nutrition, stress management, fitness, aging, sexuality, drug education, and others. May be repeated up to 3 credits.

Learning Outcomes

1. Students will identify, describe and explain human health behaviors and how they are influenced by social structures, institutions, and processes within the contexts of complex and diverse communities. Students should: Develop an understanding of self and the world by examining content and processes used by social and behavioral sciences to discover, describe, explain, and predict human behaviors and social systems. Students will articulate how beliefs, assumptions, and values are influenced by factors such as politics, geography, economics, culture, biology, history, and social institutions. Students should: Enhance knowledge of social and cultural institutions and the values of their society and other societies and cultures in the world. Students will describe ongoing reciprocal interactions among self, society, and the environment. Students should: Understand the interdependent nature of the individual, family/social group, and society in shaping human behavior and determining quality of life. Students will apply the knowledge base of the social and behavioral sciences to identify, describe, explain, and critically evaluate relevant issues, ethical dilemmas, and arguments. Students should: Articulate their role in a global context and develop an awareness and appreciation for diverse value systems in order to understand how to be good citizens who can critically examine and work toward quality of life within a framework of understanding and justice.
PHLS 2110. Foundations of Health Education  
3 Credits (3)  
Role and responsibility of the health educator with emphasis on small group dynamics, oral and written communication skills, building community coalitions and introduction to grant writing. Taught with PHLS 375. Cannot receive credit for both PHLS 2110 and PHLS 375. May be repeated up to 3 credits.  
**Prerequisite:** PHLS 1110G, or consent of instructor.  

**Learning Outcomes**  
1. Define health, three levels of prevention, health education and health promotion, and describe the major determinants of health. Describe the 7 major areas of responsibility, major competencies and sub-competencies of a professional health educator and the CHES's possible roles in various community health settings. Describe and examine the historical context and development of the profession of health education. Identify and critique major processes and practices of health education programming. Describe the steps involved in conducting needs assessments, program and intervention planning, implementation, and program evaluation. Identify, examine and describe elected health behavior change theories and models and explore possible applications in health education practice. Describe and discuss the process of community mobilization and building of a community coalition. Identify health issues and describe effective methods/strategies in health education advocacy. Describe and discuss the future trends and issues in the professional preparation and practice of professional health educators. 1 Demonstrate effective and appropriate oral and written communication skills for health education professionals.

PHLS 2120. Essentials of Public Health  
3 Credits (3)  
The course will focus on principles and major areas if public health, including ecological and total personal concept of health care system, epidemiological approaches to disease prevention and control. Consent of Instructor required. May be repeated up to 3 credits.  

**Learning Outcomes**  
1. Understand the sources of public health data, and how to interpret that information. Access existing health related data. Analyze health related data. Identify populations for health education programs. Incorporate data analysis and principles of community organization. Interpret results from evaluation and research. Infer implications from findings for future health–related activities. Have a basic understanding of health topics faced by various populations.

PHLS 3110V. Human Sexuality  
3 Credits (3)  
Examination of human sexuality from a variety of perspectives: cultural, sociological, physiological and psychological. Issues examined from viewpoints such as gender, individual, family, and professional roles. May be repeated up to 3 credits.

PHLS 3120V. Women’s Health Issues  
3 Credits (3)  
A focus on the unique issues and problems that confront women today and how they affect the health of women. Crosslisted with: GNDR 381V. May be repeated up to 3 credits.

PHLS 3130V. Global Environmental Health Issues  
3 Credits (3)  
Introduction to global environmental health challenges in the 21st century with an emphasis on environmental problems as they affect public health and personal well-being. May be repeated up to 3 credits.

PHLS 3210. Foundations of Community Health Education  
3 Credits (3)  
Role and responsibility of the health educator, with emphasis on small-group dynamics, oral and written communication skills, building community coalitions, and an introduction to grant writing. Equivalent to PHLS 2110 for prerequisite purposed. May be repeated up to 3 credits.

PHLS 3220. Foundations of Public Health  
3 Credits (3)  
The course will focus on principles and major areas of public health, including ecological concepts of healthcare systems and epidemiological approaches to disease promotion and control. Equivalent to PHLS 2120 for prerequisites. May be repeated up to 3 credits.

PHLS 4130. Environmental Health  
3 Credits (3)  
Introduction to environmental health designed to address public health issues. May be repeated up to 3 credits. Restricted to: PH,PHL majors.  
**Prerequisite:** PHLS 3220 or PHLS 2120.

PHLS 4210. Methods of Community Health Education  
3 Credits (3)  
Responsibilities of health educators, analysis of social forces affecting health needs, application of wide range of health education methods and instructional media, and program implementation skills. Restricted to: Public Health majors. May be repeated up to 3 credits.  
**Prerequisite:** PHLS 3220 or PHLS 2120.

PHLS 4310. Biometrics and Health Research  
3 Credits (3)  
Critical analysis of community health research and related methodologies. Restricted to: Public Health majors. May be repeated up to 3 credits.  
**Prerequisite:** (MATH 1350G) or MATH 2350G or A ST 311.

PHLS 4320. Epidemiology  
3 Credits (3)  
Epidemiologic approaches to disease prevention and control. Factors influencing health status. Restricted to: PHL majors. May be repeated up to 3 credits.  
**Prerequisite:** PHLS 3220 or PHLS 2120.

PHLS 4410. Administration of Health Programs  
3 Credits (3)  
Covers administrative responsibilities, organizational theory, strategic planning, and systems theory as applied to the administration of a variety of health programs. Restricted to: PHL majors. May be repeated up to 3 credits.  
**Prerequisite:** PHLS 3220, PHLS 2120, or consent of instructor.

PHLS 4420. Health Program Planning  
3 Credits (3)  
Planning and development of community health education interventions for behavior change at the individual, family, social network levels of practice. Emphasis on applying program-planning models and designs into a grant-writing project. Restricted to: Public Health majors. May be repeated up to 3 credits.  
**Prerequisite:** PHLS 3210 or PHLS 2120 and PHLS 4430.

PHLS 4430. Theoretically-Based Interventions  
3 Credits (3)  
Identifying and developing interventions to problematic health-related behaviors. Restricted to: Public Health majors. May be repeated up to 3 credits.  
**Prerequisite:** PHLS 3220 or PHLS 2120.
PHLS 4440. Health Program Evaluation and Research
3 Credits (3)
Covers the application of research and evaluation models for decision-making program and policy development of community health education interventions. Focus on the individual, family, and social network levels of practice. May be repeated up to 3 credits.
Prerequisite: PHLS 4420.

PHLS 4510. Public Health Seminar in Community Health Education
1 Credit (1)
Critical analysis of issues in CHE and health care. Readings focus on social, economic, cultural, and political issues as they affect the profession and practice. Emphasis on future, local, national, and international health trends. Restricted to: Public Health majors. May be repeated up to 1 credit.
Prerequisite: PHLS 4520, PHLS 4420, and PHLS 4430 or consent of instructor.

PHLS 4515. Problems in Health Education
3 Credits (3)
Provides opportunity for synthesis of program planning, implementation, and evaluation methodologies in the preparation and delivery of health education topics. Some field trips will be required. Restricted to: PHL majors. May be repeated up to 3 credits.
Prerequisite: Either PHLS 3220, PHLS 2120, PHLS 4440, PHLS 4430, or consent of instructor.

PHLS 4610. Health Disparities: Determinants and Interventions
3 Credits (3)
Investigates: descriptions of health disparities and measurement issues; physical environmental factors, behavioral and emotional variables; impact of aging of the populations, increased racial and ethnic diversity, and technological developments; intervention strategies and evaluation results. May be repeated up to 3 credits.

PHLS 4620V. Cross-Cultural Aspects of Health
3 Credits (3)
An examination of health practices from a variety of cultural perspectives: communication, observation, research, and assimilation. Issues to be addressed will be examined from a number of viewpoints, such as individual, family, community, and professional roles. May be repeated up to 3 credits.

PHLS 4630. International Health Problems
3 Credits (3)
Comparison of domestic health programs and problems with those in other parts of the world; emphasis on political parameters and delivery processes. Additional attention is focused on the health issues of the U.S.-Mexico border. Taught with PHLS 5630. May be repeated up to 3 credits.
Prerequisite: PHLS 3220 or PHLS 2120 or consent of instructor.

PHLS 4640. Rural Health Issues
3 Credits (3)
Comprehensive overview of rural health services with Southwestern United States and New Mexico focus. Taught with PHLS 5640. May be repeated up to 3 credits.

PHLS 4650. Coping with Loss and Grief: A Cross-Cultural Perspective
3 Credits (3)
A cross-cultural perspective to death, loss and grief. Hospice philosophy of caring for the dying will be included. Taught with PHLS 5650. May be repeated up to 3 credits.

PHLS 4660. U.S.-Mexico Border Health Issues
3 Credits (3)
Interdisciplinary analysis of the impact of living conditions and health issues of communities along the U.S.-Mexico border and of the strategies and initiatives to address these issues. Problem-based learning, case analysis, lecture, guest speakers, computer based instruction, and field trips. Taught with PHLS 5660 May be repeated up to 3 credits.

PHLS 4710. Introduction to Gerontology
3 Credits (3)
Social, psychological, and physiological aspects of aging, with an interdisciplinary emphasis on health promotion. Demographic characteristics of the aging population. Taught with PHLS 5710. May be repeated up to 3 credits.

PHLS 4720. Health Promotion for the Older Adult
3 Credits (3)
Common health concerns and lifestyle issues relevant to older adults. Facts about the content area, health behaviors, and practices to promote health and prevent disease; program development strategies applicable to a variety of settings. Taught with PHLS 5720. May be repeated up to 3 credits.

PHLS 4730. Adulthood and Aging
3 Credits (3)
Normal transitions in later life; those occurring from 40 years of age to the end of life are discussed. Changes in interpersonal relationships and adaptations commonly made by individuals and meeting those alterations are presented through research findings, case studies, and autobiographies. Taught with PHLS 5730. May be repeated up to 3 credits.

PHLS 4740. Aging and Public Policy
3 Credits (3)
Exploration of public policies relating to elders, historical development, current status and trends in public policy for this age group. Impact of political behavior of elders on policy making and implementing processes. May be repeated up to 3 credits.

PHLS 4810. Infectious and Noninfectious Disease Prevention
3 Credits (3)
History, etiology, and prevention of diseases affecting humans. Restricted to: Public Health majors. Taught with PHLS 5810. May be repeated up to 3 credits.
Prerequisite: PHLS 3220 or PHLS 2120, PHLS 4320 and Consent of Instructor.

PHLS 4820. Health Informatics
3 Credits (3)
The application of technology to engage communities and individuals in behavioral and environmental change processes. The course will focus on the use of technology to describe the magnitude of health problems and their sources; analyze risk factors; identify community strengths from which strategies may be defined and tools created to intervene, prevent problems, and promote health and well-being; and continuously evaluate, refine, and implement what works. Taught with PHLS 5820. Restricted to: Restricted to Public Health majors. May be repeated up to 3 credits.
Prerequisite: PHLS 3220 or PHLS 2120 or consent of instructor.
PHLS 4996. Special Topics  
3 Credits (3)  
Specific subjects to be announced in the Schedule of Classes. May be repeated up to 12 credits.  
**Learning Outcomes**  
1. Varies  

PHLS 4997. Independent Study  
1-6 Credits (1-6)  
Individual studies with prior approval of department head. May be repeated up to 12 credits.  
**Learning Outcomes**  
1. Varies  

PHLS 4998. Community Health Education Field Experience  
1-6 Credits (1-6)  
Senior-standing community health education majors will integrate and apply various concepts related to actual community health education practice. Experience aims to prepare students to integrate the competencies and responsibilities of community health education. Approximately 55 hours at field agency required per credit hour. Restricted to: Public Health majors. May be repeated up to 6 credits.  
**Prerequisite:** PHLS 4210 or concurrent enrollment.  
**Learning Outcomes**  
1. Varies  

PHLS 5110. Community and Psychosocial Aspects of Public Health  
3 Credits (3)  
Social, behavioral, and educational aspects of disease prevention and health promotion programs. Restricted to MPH majors. May be repeated up to 3 credits.  

PHLS 5120. Biostatistical Applications in Public Health  
3 Credits (3)  
Quantitative methods for public health students including tabular, graphical, and numerical descriptive methods, random sampling, principles of statistical inference, confidence intervals, statistical tests of hypothesis through analysis of variance and regression. Restricted to MPH majors. May be repeated up to 3 credits.  

PHLS 5130. Epidemiological Approaches to Disease Control and Prevention  
3 Credits (3)  
Basic epidemiological principles applicable to infectious and noninfectious disease. Descriptive techniques and analytic designs, and application of statistical and epidemiological investigation methods included. Restricted to MPH majors. May be repeated up to 3 credits.  

PHLS 5140. Health Services System: Administration and Organization  
3 Credits (3)  
This course focuses on using a systems approach to identify and analyze factors and interrelationships that influence the operation of health services organizations. Specific attention is to administrative structures and operations, finance and quality among public health departments, hospitals, multi-institutional systems, integrated health systems and strategic alliances. May be repeated up to 3 credits.  

PHLS 5150. Environmental Public Health Issues  
3 Credits (3)  
Environmental health issues from a public health perspective. Restricted to MPH majors. May be repeated up to 3 credits.  

PHLS 5210. Foundations of Public Health Education  
3 Credits (3)  
Social, behavioral, and educational aspects of disease prevention and health promotion. Includes history and theoretical basis of health education. May be repeated up to 3 credits.  

PHLS 5220. Techniques of Health Communication/Education  
3 Credits (3)  
Application of a wide range of communication and education theories/methods, including program planning and evaluation, in public health programming. Restricted to: MPH majors. May be repeated up to 3 credits.  
**Prerequisite:** PHLS 5110.  

PHLS 5230. Community Organization in Public Health  
3 Credits (3)  
Strategies for identifying and involving community leaders, community needs assessment, small area analysis and planning, and community-level development strategies. Restricted to: MPH majors. May be repeated up to 3 credits.  
**Prerequisite:** PHLS 5110.  

PHLS 5240. Health Program Planning  
3 Credits (3)  
Covers process of successful public health education program planning and grant writing. Restricted to: MPH majors. May be repeated up to 3 credits.  
**Prerequisite:** PHLS 5110.  

PHLS 5250. Evaluative Approaches in Public Health  
3 Credits (3)  
Survey and analyses of health testing and evaluation procedures, uses and limitations of knowledge and attitude tests, behavioral inventories, check lists, questionnaires, interviews, and other techniques. Restricted to: MPH majors. May be repeated up to 3 credits.  
**Prerequisite:** PHLS 5120.  

PHLS 5260. Research and Resources in Community Health  
3 Credits (3)  
Exploration of available public health research studies, data, results and implications. Restricted to MPH majors. May be repeated up to 3 credits.  
**Prerequisite:** PHLS 5120.  

PHLS 5310. Principles of Health Program Management  
3 Credits (3)  
This course prepares the student to assume a supervisory role in the management of health and human services programs. The course will cover essential management functions such as leadership, organizational assessment, planning, decision-making, organizational structure, budgeting, marketing, and human resource management. May be repeated up to 3 credits.  

PHLS 5320. Health Services Organization and Delivery  
3 Credits (3)  
This course includes the framework of the United States healthcare system; organization and administration of health services; alternate ways of organizing and financing health systems; the roles of the government and free market on health care services; and the barriers to health services delivery. May be repeated up to 3 credits.
PHLS 5330. Public Health Finance and Budget Management  
3 Credits (3)  
Introduces health care accounting and finance to non-financial students. Students are exposed to the financial structure of health care organizations and the environment within which they operate. Instruction also introduces the use of accounting and financial information in investor-owned and not-for-profit organizations in the health care industry. Topics include understanding the creation and interpretation of financial statements, financial accounting and reporting requirements, financial analysis, budgeting, and resource allocation. May be repeated up to 3 credits.

PHLS 5340. Public Health Law and Ethics  
3 Credits (3)  
This course examines major legal and ethical concepts and their impact on public health policy and practice. The course examines governmental authority, at various jurisdictional levels, to improve public health. This course will focus on public health law in the United States. Restricted to: MPH majors. May be repeated up to 3 credits. Learning Outcomes  
1. Varies

PHLS 5350. Public Health Policy Analysis  
3 Credits (3)  
Covers issues related to U.S. health policy and allocation of resources. Examination of local, state, and federal public health and health care funding. Assessment of impact of health policy on health education, medical practice, and the workplace. May be repeated up to 3 credits.

PHLS 5610. Health Disparities: Determinants and Interventions  
3 Credits (3)  
Investigates: descriptions of health disparities and measurement issues; physical environmental factors, behavioral and emotional variables; impact of aging of the populations, increased racial and ethnic diversity, and technological developments; intervention strategies and evaluation results. Taught with: PHLS 4610. May be repeated up to 3 credits.

PHLS 5620. Cross-Cultural Aspects of Health  
3 Credits (3)  
An examination of health practices from a variety of cultural perspectives; communication, observation, research, and assimilation. Issues to be addressed will be examined from a number of viewpoints, such as individual, family, community, and professional roles. May be repeated up to 3 credits.

PHLS 5630. International Health Problems  
3 Credits (3)  
Comparison of domestic health programs and problems with those in other parts of the world; emphasis on political parameters and delivery processes. Additional attention is focused on the health issues of the U.S.-Mexico border. Taught with: PHLS 4630. May be repeated up to 3 credits.

PHLS 5635. International Health Practicum  
1-3 Credits (1-3)  
Intensive examination of health practices and beliefs from a cultural perspective. Focus on health structure, index of diseases, morbidity, mortality and epidemiological approaches to planning. Required travel (personal travel, lodging, and related expenses are extra). May be repeated up to 3 credits.

PHLS 5640. Rural Health Issues  
3 Credits (3)  
Comprehensive overview of rural health services with southwestern United States and New Mexico focus. Taught with: PHLS 4640. May be repeated up to 3 credits. Learning Outcomes  
1. Varies

PHLS 5650. Coping with Loss and Grief: A Cross-Cultural Perspective  
3 Credits (3)  
A cross-cultural perspective to death, loss and grief. Hospice philosophy of caring for the dying will be included. Taught with: PHLS 4650.

PHLS 5660. U.S. - Mexico Border Health Issues  
3 Credits (3)  
Interdisciplinary analysis of the impact of living conditions and health issues of communities along the U.S.-Mexico border and of the strategies and initiatives to address these issues. Problem-based learning, case analysis, lecture, guest speakers, computer based instruction, and field trips. Taught with: PHLS 4660. May be repeated up to 3 credits.

PHLS 5670. Introduction to Gerontology  
3 Credits (3)  
Social, psychological, and physiological aspects of aging with an interdisciplinary emphasis on health promotion. Demographic characteristics of the aging population. May be repeated up to 3 credits.

PHLS 5680. Health Promotion for the Older Adult  
3 Credits (3)  
Common health concerns and lifestyle issues relevant to older adults. Facts about the content area, health behaviors, and practices to promote health and prevent disease; program development strategies applicable to a variety of settings. May be repeated up to 3 credits.

PHLS 5690. Adulthood and Aging  
3 Credits (3)  
Normal transitions in later life; those occurring from 40 years of age to the end of life are discussed. Changes in interpersonal relationships and adaptations commonly made by individuals and meeting those alterations are presented through research findings, case studies, and autobibliographies. May be repeated up to 3 credits.

PHLS 5810. Infectious and Noninfectious Disease Prevention  
3 Credits (3)  
History, etiology, and prevention of diseases affecting humans. Consent of Instructor required. May be repeated up to 3 credits.

PHLS 5820. Health Informatics  
3 Credits (3)  
The application of technology to engage communities and individuals in behavioral and environmental change processes. The course will focus on the use of technology to describe the magnitude of health problems and their sources; analyze risk factors; identify community strengths from which strategies may be defined and tools created to intervene, prevent problems, and promote health and well-being; and continuously evaluate, refine, and implement what works. May be repeated up to 3 credits.
PHLS 5830. Public Health Preparedness and Response
3 Credits (3)
This course is designed to teach students about the role of public health in emergency preparedness and response. It focuses on the nature of public emergencies as well as how the various sectors have in responding to them. One purpose of this online course is to introduce students to the basics of disaster preparedness and responding to disasters, and to build a base for further development in responder training. The course provides training and resources for a basic understanding of the Incident Command System (ICS) and National Incident Management System (NIMS). May be repeated up to 3 credits.

PHLS 5996. Special Topics
3 Credits (3)
Specific subjects to be announced in the Schedule of Classes. Restricted to MPH majors. May be repeated up to 12 credits.

Learning Outcomes
1. Varies

PHLS 5997. Independent Study
1-6 Credits (1-6)
Individual studies with prior approval of department head. Consent of instructor required. May be repeated up to 6 credits.

Learning Outcomes
1. Varies

PHLS 5998. Field Experience
1-4 Credits (1-4)
Student will work in a public health setting under the supervision of an experienced public health professional and will use acquired knowledge and skills to conduct a project which addresses a specific public health problem or program need. Projects are agreed upon by the student and faculty. Consent of department head required. Restricted to MPH majors. May be repeated up to 4 credits.

Learning Outcomes
1. Varies

PHLS 5999. Master's Thesis
1-6 Credits (1-6)
Minimum of 4 credits required but may be repeated for a maximum of 6 credits. May be repeated up to 6 credits.

Learning Outcomes
1. Varies

Public Health - Bachelor of Public Health

Departmental Requirements
Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework. You are required to complete the following Public Health Sciences core courses.

Departmental Electives
Elective PHLS courses 4

Second Language: (not required)
Electives, to bring the total credits to 120 5

| Total Credits | 120-122 |

1

See the General Education (p. 88) section of the catalog for a full list of courses

2

MATH 1350G Introduction to Statistics or MATH 2350G Statistical Methods is required for the degree but students may first need to take any prerequisites needed to enter MATH 1350G or MATH 2350G.

3

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses

4

Students are encouraged to select additional PHLS courses to satisfy the elective requirement. Students with an associate degree in an allied health field may transfer up to 24 credit hours of electives.

5

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

## Additional Requirements

All students are required to complete an exit survey please see the department for more information.

## A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1215 Intermediate Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

### Total Credits

| Total Credits | 120-122 |
Public Health - Bachelor of Public Health (Online)

Departmental Requirements

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework. You are required to complete the following Public Health Sciences core courses.

Prefix Title Credits
General Education
Area I: Communications 10
| English Composition - Level 1 | 1 |
| English Composition - Level 2 | 2 |
| Oral Communication | 1 |
Area II: Mathematics
| MATH 1350G Introduction to Statistics | 3 |
| or MATH 2350G Statistical Methods | 3 |
Area III/IV: Laboratory Sciences and Social/Behavioral Sciences 10-11
| PHLS 1110G Personal Health & Wellness | 3 |
Area III: Laboratory Sciences Course (4 credits) 1
| Either an Area III/IV: Laboratory Sciences Course or Social/Behavioral Sciences (4 or 3 credits) | 3 |
Area V: Humanities 1
| 3 |
Area VI: Creative and Fine Arts 1
| 3 |
General Education Elective 1
| 3-4 |
Viewing a Wider World Courses 3
| 6 |
Departmental/College Requirements

Prerequisite Courses
| PHLS 2110 Foundations of Health Education | 3 |
| or PHLS 3210 Foundations of Community Health Education | 3 |
| PHLS 3220 Foundations of Public Health | 3 |
| or PHLS 2120 Essentials of Public Health | 3 |
| MATH 1215 Intermediate Algebra | 3 |
Public Health Education Core
| PHLS 4820 Health Informatics | 3 |
| PHLS 4420 Health Program Planning | 3 |
| PHLS 4210 Methods of Community Health Education | 3 |
| PHLS 4810 Infectious and Noninfectious Disease Prevention | 3 |
| PHLS 4440 Health Program Evaluation and Research | 3 |
| PHLS 4998 Community Health Education Field Experience | 6 |
| PHLS 4610 Health Disparities: Determinants and Interventions | 3 |
| PHLS 4640 Rural Health Issues | 3 |
| PHLS 4650 Coping with Loss and Grief: A Cross-Cultural Perspective | 3 |
| PHLS 4660 U.S.-Mexico Border Health Issues | 3 |

Cultural Foundations Course Requirements

Select 3 credits from the following:
| PHLS 4610 Health Disparities: Determinants and Interventions | 3 |
| PHLS 4640 Rural Health Issues | 3 |
| PHLS 4650 Coping with Loss and Grief: A Cross-Cultural Perspective | 3 |

Additional Requirements

All students are required to complete an exit survey please see the department for more information.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1215 Intermediate Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for
students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

### Elective Courses

Elective courses may include other 5000-level courses from other departments. Some PHLS 5000-level courses are cross-listed with PHLS 4000 level courses (e.g. PHLS 4640 Rural Health Issues and PHLS 5640 Rural Health Issues). Students who have previously taken one of these 4000 level courses at NMSU, may not take the corresponding 5000 level MPH course for degree completion credit. Select elective and optional courses may also be available during summer sessions.

### Thesis Option:

Elective ³

Total Credits 36

¹ PHLS 5210 Foundations of Public Health Education is a prerequisites for PHLS 5250 Evaluative Approaches in Public Health for HBHP students, but not required for HMAP students. The student will need a prerequisite hold released for registration.

² To provide flexibility, PHLS 5998 Field Experience can be done in Spring 2 or Summer 2.

³ For those who have not had any statistics courses it is strongly recommended that they complete PHLS 5120 Biostatistical Applications in Public Health as their elective.

Note that students who complete the Graduate Certificate are eligible to sit for the Certified Public Health (CPH) examination.

Apply online at http://gradschool.nmsu.edu (http://gradschool.nmsu.edu/). International students are required to contact the Center for International Programs at (575) 646-5480.

Public Health - Graduate Certificate

The graduate certificate program in public health is not an official graduate degree offered by NMSU but rather a focused collection of courses that enrolled students complete in public health. These courses are designed to provide and/or enhance students' knowledge of and skills in public health practice. Those students who successfully complete the previously listed courses receive a certificate of completion statement on their official transcript and a formal certificate from the university.

School of Teacher Preparation, Administration and Leadership (TPAL)

School of Teacher Preparation, Administration, and Leadership

The NMSU College of Health, Education, and Social Transformation's School of Teacher Preparation, Administration, and Leadership (TPAL) is devoted to the preparation of master educators, administrators and leaders for public, private, and governmental institutions. Graduates are prepared to serve as teachers, directors of instruction and curriculum, subject matter specialists, supervisors of student teaching, educational leaders, and university professors. The School of TPAL offers multiple undergraduate and graduate degree programs and pathways within several academic units including Curriculum and Instruction, Educational Leadership and Administration, Special Education, and the Teacher Education Program.

Vision

We serve the State of New Mexico, borderlands and global communities with socially responsive scholarship, innovative programs, and collaborative initiatives in education that foster and enhance the capacity of educators and communities to advance equity, democracy, and social justice in education and society.

Mission

As a School within a land-grant and Hispanic Serving Institution, we support and advocate for equitable education for all, especially historically marginalized and multicultural/multilingual communities and students with exceptionalities. We accomplish this through teaching, scholarship, public service, the preparation of teachers and leaders, and collaborations across the disciplines and with our constituents.

TPAL Undergraduate Programs

Freshmen Admission Requirements

First Steps – Admission to NMSU

In order to earn a license to teach, one must complete a bachelor's degree, so the first step is to apply to the university and declare a major (Undergraduate Admissions (http://admissions.nmsu.edu/)). Our undergraduate students are advised by the Center for Academic Advising and Student Support (https://advising.nmsu.edu/), and students have several choices of majors. To apply for undergraduate admission and to see complete admissions information, please see NMSU's Undergraduate Admissions (https://admissions.nmsu.edu/how-to-apply/first-time-freshmen/). First time freshmen are eligible for regular admission to NMSU if they are a graduate of an accredited high school and meet one of the following Freshman Admission Requirements listed below:

- A cumulative high school GPA of 2.75, or
- ACT composite score of 21 or SAT score of 1060, or
- Ranked in the top 20 percent of their graduating class

Bachelor Programs with Teacher Licensure

The primary function of the undergraduate programs in the School of TPAL is the preparation of licensed teachers for elementary and secondary schools. This process includes a broad general education, professional education and teaching specializations.

Undergraduate Teaching Majors in the School of TPAL include the Bachelor of Science in Education with majors in:

- Early Childhood Education – Age 3 to 3rd grade (https://tpal.nmsu.edu/degree-programs/undergraduate-programs/ug-ece.html)
- Elementary Education – K to 8th grade (https://tpal.nmsu.edu/degree-programs/undergraduate-programs/ug-eed.html)
- Secondary Education: 7th to 12th grade (https://tpal.nmsu.edu/degree-programs/undergraduate-programs/ug-sed.html)
- Special Education: Pre-K to 12th grade (https://tpal.nmsu.edu/degree-programs/undergraduate-programs/ug-sped.html) with concentrations in Science, Language Arts, Math Education, and Social Studies

TEACHER EDUCATION PROGRAM (TEP)

Undergraduate teaching majors who approach the completion of 60 credits are eligible to apply for the Teacher Education Program (https://tpal.nmsu.edu/admissions/tep-admission.html) (TEP). To complete the degree (and become licensed to teach), undergraduate students must be admitted to the competitive TEP (https://tpal.nmsu.edu/admissions/tep-admission.html). Applicants who successfully complete the minimum requirements for TEP admission must submit a professional portfolio to be reviewed by the TEP Admission Committee.
The following minimum criteria must be met:

- GPA of 2.75 or higher
- Earn a C- or better in TEP prerequisites (see the packet for complete list)
- The candidate can apply to TEP as early as their 2nd semester of sophomore year. Candidates may submit their electronic portfolio during the semester in which they are enrolled in the last of the prerequisites.
- Candidates need to have completed at least 60 credits to start TEP coursework but can apply when finishing the last of those 60 credits.
- The candidate must have attempted the Praxis Core Academic Skills Exam: Reading (passing score 156), Math (passing score 150), and Writing (passing score 162). Register at https://www.ets.org/praxis/nm (https://www.ets.org/praxis/nm/) for the Praxis exams.
- The candidate must get a current degree check with a current date and signature from Dr. Margo Trevino-Torres in the College of Education Educational Support & Resource Center office in O’Donnell Hall #121 (call for an appointment – 575 646-3404).

The Undergraduate TEP Packet, explaining the components of the portfolio that are necessary to be considered for admission by the TEP (https://tpal.nmsu.edu/admissions/tep-admission.html) Admission Committee does not ensure admittance into any teaching program. Applicants are encouraged to develop a strong student portfolio, achieve the highest GPA possible and present the portfolio in a professional manner. Packets are also available at the Undergraduate Advisement Office of the College of Education, located in O’Donnell Hall, Room 121. Portfolio submission takes place twice a year 3rd Friday of September for the Fall and 3rd Friday of February for the Spring semester. For specific dates each semester, contact the Teacher Education Program office at (575) 646-2669 or the Undergraduate Advisement Office at (575) 646-3404. Applicants should be aware that admission to the TEP is competitive and admission is based upon available faculty resources.

STUDENT TEACHING
Student Teaching is the final semester of the degree, and is a requirement for licensure. Student Teaching applications (https://tpal.nmsu.edu/degree-programs/undergraduate-programs/stia.html) are submitted one year prior to the actual student teaching semester, and students must be admitted to the TEP in order to apply for student teaching. Application deadlines are October 9 for fall student teaching and March 9 for spring student teaching. Applications are submitted to the Undergraduate Advisement Office.

For more information, contact the Education Undergraduate Advisement Center located on the first floor of O’Donnell Hall, Room 101 (575) 646-3404.

Non-Licensure Bachelor Programs
Two additional Bachelor degrees are available to undergraduate students who do not wish to obtain teacher licensure.

Bachelor of Applied Studies (Early Childhood Education Zero-Four Non-Licensure)
There is an identified need for prepared educators to serve young children from birth to four years of age in settings outside of the public school in childcare centers, Head Start, and other agencies. The School of TPAL offers a non-licensure concentration, with the Bachelor of Applied Studies degree for the Zero to Four years old Early Childhood Tract (https://catalogs.nmsu.edu/nmsu/health-education-social-transformation/tpal/applied-studies-ztf-bas/). This non-licensure concentration serves private and public childcare, early intervention programs, and Head Start.

The entry requirements and early coursework for the ECED Licensure and ECED Non-Licensure tracts are identical. During the first two years of the ECED programs, students concentrate on their general education requirements while also taking early childhood education classes. This professional education component acquaints students with the psychological, social, cultural, developmental, and cognitive aspects of early childhood. Students also begin to take field experience courses with child study requirements. Once students reach the 60 credit threshold, they can either opt for the Licensure tract by applying to the TEP or continue on with the Non-Licensure coursework.

Applied Studies students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. All ECED courses must be successfully completed with a grade of C- or better. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Bachelor of Science (Educational Leadership)
The Bachelor of Science (BS) in Educational Leadership (https://ela.nmsu.edu/) prepares students to work at the bachelor’s level in areas such as university or community college career services, admissions, financial aid, and advising. This program develops educational leaders who are passionate about strengthening their leadership to improve student achievement and helps foster positive and sustained relationships with students, institutions, school districts and surrounding communities. This is a social justice-driven program geared to strengthen leadership skills for individuals involved in various educational disciplines. The non-licensure degree will provide graduates with abilities to lead in all facets of higher education. The program offers an innovative, structured approach to leadership in higher educational programs.

Undergraduate Minors
In addition to the Bachelor degrees, the School of TPAL also offers the following two undergraduate minors:

- Educational Leadership – Undergraduate Minor (https://ela.nmsu.edu/academic-programs/under-grad-minor.html)

School of TPAL Graduate Programs
The School of TPAL offers numerous graduate programs and pathways for post-baccalaureate students. The following programs are listed in the order of Master of Arts degrees, Graduate Certificates, and Doctoral degrees.

Master of Arts Degrees

School of Teacher Preparation, Administration, and Leadership (TPAL):
Associate Professor, Rick Marlatt, Interim Director, School of Teacher Preparation, Administration, and Leadership

Professors: Araujo, Baptiste, Haynes Writer, A. Hernandez, Osanloo; Associate Professors: Fahrenbruck, Flores Carmona, Guillaume, Huerta-Charles, Marlatt, Parra, Rutledge, Salas, Williams Pichon; Assistant Professors: Engeldowl, Gray, Ibarra Johnson, Kew, Lucero, Matute-Chavarria, Neville, Pando, Thomas; College Professor: Cifuentes, College Associate Professors: Bagwell, Gorham-Blanco, Hannan, C. Hernandez; College Assistant Professors: Mason, Moreno, Rodriguez-Strawn; College Instructors: Martinez-Griego, Owens; Emeritus Professors: Armendáriz, Cahill, Chavez-Chavez, Dominguez, González, Ivory, Reyes, Torres, Townley, Wiburg

B. Araujo, Ph.D. (New Mexico State University) - teacher education, social studies, bilingual education; L. Bagwell, Ph.D. (New Mexico State University) - early childhood education; H. P. Baptiste, Ed.D. (Indiana University) – science elementary; L. Cifuentes, Ph.D. (University of North Carolina, Chapel Hill) - learning and instructional design, educational technologies, collaborative learning; C. Engeldowl, Ph.D. (University of Missouri) - mathematics education; M.L. Fahrenbruck, Ph.D. (University of Arizona) – language, reading & culture; J. Flores-Carmona, Ph.D. (University of Utah) - culture and society, sociology of education; T. Gorham Blanco, Ph.D. (University of Wyoming) - mathematics education and pre-service teacher preparation; P. Gray, Ed.D. (University of Texas-San Antonio) - principaship, culturally responsive leadership, race and leadership; R. Guillaume, Ph.D. (New Mexico State University) - student development theory, biracial/multicultural identity development, higher education administration; J.M. Hannan, Ph.D. (New Mexico State University) – distance education administration, best practices in teaching distance education, student services for distance education students; J.L. Haynes Writer, Ph.D. (University of New Mexico) – critical multicultural & social justice education, Indigeneity, Native American education teacher preparation; A. Hernandez (Stanford University) – elementary literacy, sociolinguistics, bileracy-multliteracy, and teacher professional development; C.M. Hernandez, Ph.D. (Kansas State University) – science education; L. Huerta-Charles, Ph.D. (New Mexico State University) – multicultural/bilingual education; S. Ibarra-Johnson, Ph.D. (University of New Mexico) - bilingual education, bi/multilingual development, translanguaging pedagogy; K. Kew, Ph.D. (Boston College) – educational change and reform, educational leadership, school culture, micro-politics; L. Lucero (University of Texas-El Paso) – teaching, learning, and culture, with a concentration in math/science, technology/LGBTQ+studies; Barbara Martinez-Griego, ABD (New Mexico State University) - Bilingual education/leadership/cultural and linguistic responsive education and practices, intersectionality; R. Marlatt, Ph.D. (University of Nebraska-Lincoln) – language, literacy and culture; L. Mason, Ed.D. (University of Northern Colorado) - visual impairment, orientation and mobility, literacy; M. Matute-Chavarria, Ph.D. (University of Nevada, Las Vegas) - special education, culturally responsive practices, and the intersections of race, disability, and family; M. Neville, Ph.D. (Michigan State University) - secondary English, language, and literacy teacher education; equity-oriented curriculum and instruction; A.F. Osanloo, Ph.D. (Arizona State University) – educational equity, educational leadership and policy, social justice leadership; critical race theory; A. Owens, Ph.D. (University of Texas at El Paso) - literacy/bi-literacy, educational equity in special education awareness for teachers and principals; M. Pando, Ph.D. (Texas Tech University) - bilingual education; J.L. Parra, Ed.D. (Pepperdine University) – online teaching & learning; technology integration; teacher/faculty professional development, innovative & transformative education; D. Rodriguez-Strawn, Ph.D. (New Mexico State University) - higher education administration, service learning practitioner, SLED program developer, teaching higher education, doctoral programs coordinator; D. Rutledge, Ph.D. (University of Colorado-Boulder) – learning technologies, international education, bilingual education/TESOL; L. Salas, Ph.D. (New Mexico State University) - bilingual and multicultural special education, early childhood special education; R. Thomas (University of Missouri-Kansas City) - early childhood education, critical literacy; auto-ethnography; H. Williams Pichon, Ph.D. (University of New Orleans) # higher education administration, access and persistence of historically underrepresented groups in higher education, college student development, research

Emeritus Professors
A.L. Armendáriz, Ph.D. (University of New Mexico - emeritus) – school administration, leadership development, organizational theory; E. Cahill, Ph.D. (Kent State University) – early childhood education, community education; R. Chavez Chavez, Ph.D. (New Mexico State University - emeritus) – curriculum theory, foundations, and multicultural education; R. Dominguez, Ph.D. (New Mexico State University - emeritus) - educational administration, higher education, community college administration, leadership development; M.L. González, Ph.D. (New Mexico State University) – leadership in public school administration, multicultural organizations; L.V. Reyes, Ph.D. (New Mexico State University - emeritus) – early childhood education and critical pedagogy; C.T. Townley, Ph.D. (University of Michigan - emeritus) – knowledge management, higher education, M. Torres, Ph.D. (University of New Mexico - emeritus) – critical theory, research as praxis; K. Wiburg, Ed.D. (International University - emeritus) – technology, learning design, mathematics education.

Early Childhood Education Courses

ECED 1110. Child Growth, Development, and Learning
3 Credits (3)
This basic course in the growth, development, and learning of young children, prenatal through age eight, provides students with the theoretical foundation for becoming competent early childhood professionals. The course includes knowledge of how young children grow, develop and learn. Major theories of child development are integrated with all domains of development, including biological-physical, social, cultural, emotional, cognitive and language. The adult’s role in supporting each child’s growth, development and learning is emphasized. May be repeated up to 3 credits.

Learning Outcomes
1. Incorporate understanding of developmental stages, processes, and theories of growth, development, and learning into developmentally appropriate practice. A.one Demonstrate knowledge of the interaction between maturation and environmental factors that influence physical, social, emotional, cognitive, and cultural domains in the healthy development of each child. A.two Demonstrate knowledge of the significance of individual differences in development and learning. Demonstrate knowledge of how certain differences may be associated with rate of development and developmental patterns associated with developmental delays and/or specific disabilities. A.three Demonstrate knowledge of the similarities between children who are developing typically and those with diverse abilities. A.four Demonstrate knowledge of the many functions that language serves in the cognitive, social, and emotional aspects of development in the formative years. A.seven Demonstrate knowledge of the developmental sequence of language and literacy, including the influence of culture and home factors. A.eight Demonstrate knowledge of how children acquire and use verbal, non-verbal, and alternative means of communication. A.nine Demonstrate knowledge of the relationship among emotions, behaviors, and communication skills to assist children in identifying and expressing their feelings in appropriate ways. A.ten 1 Use appropriate guidance to support the development of self-regulatory capacities in young children. A.eleven

ECED 1115. Health, Safety, and Nutrition
2 Credits (2)
This course provides information related to standards and practices that promote children’s physical and mental well-being sound nutritional practices, and maintenance of safe learning environments. It includes information for developing sound health and safety management procedures for indoor and outdoor learning environments for young children. The course examines the many scheduling factors that are important for children’s total development, healthy nutrition, physical activity, and rest. May be repeated up to 2 credits.

Learning Outcomes
1. Recognize and respond to each child’s physical health, intellectual and emotional well-being, and nutritional and safety needs. B.one Articulate an understanding of indoor and outdoor learning environments that provide opportunities for children to put into practice healthy behaviors (physically, socially and emotionally). B.two Use appropriate health appraisal and management procedures and makes referrals when necessary. B.three Recognize signs of emotional distress, child abuse, and neglect in young children and use procedures appropriate to the situation, such as initiating discussions with families, referring to appropriate professionals, and, in cases of suspected abuse or neglect, reporting to designated authorities. B.four Establish an environment that provides opportunities and reinforcement for children's practice of healthy behaviors that promote appropriate nutrition and physical and psychological well-being. B.five Provide a consistent daily schedule for rest/sleep, as developmentally appropriate. B.six Implement health care and educational activities for children and families based on health and nutritional information that is responsive to diverse cultures. B.seven Assist young children and their families, as individually appropriate, in developing decision-making and interpersonal skills that enable them to make healthy choices and establish health-promoting behaviors. B.eight
ECED 1120. Guiding Young Children
3 Credits (3)
This course explores various theories of child guidance and the practical applications of each. It provides developmentally appropriate methods for guiding children and effective strategies and suggestions for facilitating positive social interactions. Strategies for preventing challenging behaviors through the use of environment, routines and schedule will be presented Emphasis is placed on helping children become self- responsible, competent, independent, and cooperative learners and including families as part of the guidance approach. May be repeated up to 3 credits.
Learning Outcomes
1. Apply knowledge of cultural and linguistic diversity and the significance of socio-cultural and political contexts for development and learning and recognize that children are best understood in the contexts of family, culture and society. A.six Demonstrate knowledge of the many functions that language serves in the cognitive, social, and emotional aspects of development in the formative years. A.seven Demonstrate knowledge of the relationship among emotions, behaviors, and communication skills to assist children in identifying and expressing their feelings in appropriate ways. A.ten Use appropriate guidance to support the development of self-regulatory capacities in young children. A.eleven Recognize and respond to each child's physical health, intellectual and emotional well-being, and nutritional and safety needs. B.one Demonstrate knowledge and skill in building positive, reciprocal relationships with families. C.one Demonstrate knowledge of and respect for variations across cultures, in terms of family strengths, expectations, values, and child-rearing practices. C.four Demonstrate the ability to incorporate the families’ desires and goals for their children into classroom or intervention strategies. C.seven Demonstrate knowledge and skills in developmentally appropriate guidance techniques and strategies that provide opportunities to assist children in development positive thoughts and feelings about themselves and others through cooperative interaction with peers and adults. E.three 1 Demonstrate understanding of the influence of the physical setting, schedule, routines, and transitions on children and use these experiences to promote children's development and learning. E.seven 1 Demonstrate knowledge of assessment techniques, interpretation of assessment information in the application of this

ECED 1125. Assessment of Children and Evaluation of Programs
3 Credits (3)
This basic course familiarizes students with a variety of culturally appropriate assessment methods and instruments, including systematic observation of typically and non-typically developing children. The course addresses the development and use of formative and summative assessment and evaluation instruments to ensure comprehensive quality of the total environment for children, families, and the community. Students will develop skills for evaluating the assessment process and involving other teachers, professionals and families in the process. May be repeated up to 3 credits.
Prerequisite: ECED 1110 and (ENGL 1110G or ENGL 1110H or ENGL 1110M).
Learning Outcomes
1. Demonstrate ability to choose valid tools that are developmentally, culturally, and linguistically appropriate; use the tools correctly; make appropriate referrals; and interpret assessment results, with the goal of obtaining valid, useful information to inform practice and decision making. F.one Demonstrate knowledge of maintaining appropriate records of children's development and behavior that safeguard confidentiality and privacy. F.two Demonstrate knowledge of the educator's role as a participating member of the assessment process as described and mandated by state and federal regulations for Individual family service plans (IFSP) and individual education plans (IEP). F.three Demonstrate understanding of the influences of environmental factors, cultural/linguistic differences, and diverse ways of learning on assessment outcomes. F.four Involve the family and, as appropriate, other team members in assessing the child's development, strengths, and needs in order to set goals for the child. F.five Articulate an understanding of the distinctions and definitions of assessment concepts (e.g., screening, diagnostic assessment, standardized, testing, accountability assessment). F.six Apply understanding of assessment concepts toward selection of appropriate formal assessment measures, critiquing the limitations of inappropriate measures, and discussing assessment issues as part of interdisciplinary teams. F.seven Articulate an understanding that responsible assessment is legally and ethically grounded and guided by sound professional. It standards is collaborative and open with the goal of supporting diverse children and families. F.eight Demonstrate knowledge of assessment techniques, interpretation of assessment information in the Application of this data to curriculum development and/or intervention planning. F.nine 1 Demonstrate knowledge of a variety of techniques and procedures to evaluate and modify program goals for young children and their families. F.ten 1 Demonstrate knowledge and use of program evaluation to ensure comprehensive quality of the total Environment for children, families, and the community. F.eleven Use both self and collaborative evaluations as part of ongoing program evaluations. F.twelve
ECED 1130. Family and Community Collaboration
3 Credits (3)
This beginning course examines the involvement of families and communities from diverse cultural and linguistic backgrounds in early childhood programs. Ways to establish collaborative relationships with families in early childhood settings is discussed. Families’ goals and desires for their children will be supported through culturally responsive strategies. May be repeated up to 3 credits.

Prerequisite: ECED 1110 and (ENGL 1110G or ENGL 1110H or ENGL 1110M).

Learning Outcomes
1. Demonstrate knowledge and skill in building positive, reciprocal relationships with families. C.one Articulate an understanding of a safe and welcoming environment for families and community members. C.two Develop and maintain ongoing contact with families through a variety of communication strategies. C.three Demonstrate knowledge of and respect for variations across cultures, in terms of family strengths, expectations, values, and child-rearing practices. C.four Articulate understanding of the complexity and dynamics of family systems. C.five Demonstrate understanding of the importance of families as the primary educator of their child. C.six Involve families and community members in contributing to the learning environment. C.nine Demonstrate ability to communicate to families the program’s policies, procedures, and those procedural safeguards that are mandated by state and federal regulations. C.eleven Apply knowledge of family theory and research to understand family and community characteristics including socioeconomic conditions; family structures, relationships, stressors, and supports (including the impact of having a child with diverse abilities); home language and ethnicity. C.twelve Demonstrate knowledge of and skill to access community resources that assist families and contribute directly or indirectly to children’s positive development such as mental health services, health care, adult education, English language instruction, and economic assistance. C.thirteen Demonstrate effective written and oral communication skills when working with children, families, and early care, education, and family support professionals. E.fourteen Demonstrate a commitment to leadership and advocacy for excellence in programs and services for young children and their families. G.six

ECED 2110. Professionalism
2 Credits (2)
This course provides a broad-based orientation to the field of early care and education. Early childhood history, philosophy, ethics and advocacy are introduced. Basic principles of early childhood systems are explored. Multiple perspectives on early care and education are introduced. Professional responsibilities such as cultural responsiveness and reflective practice are examined. May be repeated up to 2 credits.

Learning Outcomes
1. Recognize signs of emotional distress, child abuse, and neglect in young children and use procedures appropriate to the situation, such as initiating discussions with families, referring to appropriate professionals, and, in cases of suspected abuse or neglect, reporting to designated authorities. B.four Demonstrate ability to communicate to families the program’s policies, procedures, and those procedural safeguards that are mandated by state and federal regulations. C.eleven Use both self and collaborative evaluations as part of ongoing program evaluations. F.twelve Demonstrate ability to adhere to early childhood professional codes of ethical conduct and issues of confidentiality. G.one Demonstrate awareness of federal, state, and local regulations, and public policies regarding programs and services for children birth through eight years of age. G.two Demonstrate understanding of conditions of children, families, and professionals; the historical and current issues and trends; legal issues; and legislation and other public policies affecting children, families, and programs for young children and the early childhood profession. G.three Demonstrate critical reflection of one’s own professional and educational practices from community, state, national, and global perspectives. G.four Demonstrate understanding of the early childhood profession, its multiple historical, philosophical, and social foundations, and how these foundations influence current thought and practice. G.five Demonstrate knowledge in technology resources to engage in ongoing professional development. G.seven
ECED 2115. Introduction to Language, Literacy, and Reading  
3 Credits (3)
This course is designed to prepare early childhood professionals for promoting children's emergent literacy and reading development. Through a developmental approach, the course addresses ways in which early childhood professionals can foster young children's oral language development, phonemic awareness, and literacy problem solving skills, fluency, vocabulary, and comprehension. This course provides the foundation for early childhood professionals to become knowledgeable about literacy development in young children. Instructional approaches and theory-based and research-based strategies to support the emergent literacy and reading skills of native speakers and English language learners will be presented. May be repeated up to 3 credits.  
Prerequisite: ECED 1110 and (ENGL 1110G or ENGL 1110H, or ENGL 1110M).

Learning Outcomes
1. Demonstrate knowledge of the many functions that language serves in the cognitive, social, and emotional aspects of development in the formative years. A. seven Demonstrate knowledge of the developmental sequence of language and literacy, including the influence of culture and home factors. A. eight Demonstrate knowledge of how children acquire and use verbal, non-verbal, and alternative means of communication. A. nine Develop partnerships with family members to promote early literacy in the home. C. eight Establish partnerships with community members in promoting literacy. C. ten Demonstrate knowledge of the reading and writing components of emergent literacy at each developmental level. D. four Provide and use anti-bias materials/literature and experiences in all content areas of the curriculum. D. seven Create and manage a literacy-rich environment that is responsive to each child's unique path of development. E. nine Use a variety of strategies during adult-child and child-child interactions and facilitate communication and dialogue of expressive language and thought. E. ten 1 Demonstrate a variety of developmentally appropriate instructional strategies that facilitate the development of literacy skills. E. eleven

ECED 2120. Curriculum Development through Play Birth through Age 4 (PreK)  
3 Credits (3)
The beginning curriculum course places play at the center of curriculum in developmentally appropriate early childhood programs. It addresses content that is relevant for children birth through age four in developmentally and culturally sensitive ways of integrating content into teaching and learning experiences. Information on adapting content areas to meet the needs of children with special needs and the development of IFSPs is included. Curriculum development in all areas, including literacy, numeracy, the arts, health, science, social skills, and adaptive learning for children, birth through age four, is emphasized. Consent of instructor required. May be repeated up to 3 credits.  
Prerequisite: ECED 1110 and (ENGL 1110G or ENGL 1110H or ENGL 1110M).

Corequisite: ECED 2121.

Learning Outcomes
1. Use appropriate guidance to support the development of self-regulatory capacities in young children. A. eleven Demonstrate knowledge of relevant content for young children and developmentally appropriate ways of integrating content into teaching and learning experiences for children from birth to four years of age. D. one Demonstrate the integration of knowledge of how young children develop and learn with knowledge of the concepts, inquiry tools, and structure of content areas appropriate for different developmental levels. D. two Adapt content to meet the needs of each child, including the development of individualized family service plans (IFSP) or individualized education plans (IEP) for children with diverse abilities through the team process with families and other team members. D. six Demonstrate knowledge of varying program models and learning environments that meet the individual needs of all young children, including those with diverse abilities. E. one Create environments that encourage active involvement, initiative, responsibility, and a growing sense of autonomy through the selection and use of materials and equipment that are suitable to individual learning, developmental levels, diverse abilities, and the language and cultures in New Mexico. E. two Create and manage inclusive learning environments that provide individual and cooperative opportunities for children to construct their own knowledge through various strategies that include decision-making, problem solving, and inquiry experiences. E. four Demonstrate understanding that each child's creative expression is unique and can be encouraged through diverse ways, including creative play. E. five Plan blocks of uninterrupted time for children to persist at self-chosen activities, both indoors and outdoors. E. six Demonstrate understanding of the influence of the physical setting, schedule, routines, and transitions on children and use these experiences to promote children's development and learning. E. seven 1 Use and explain the rationale for developmentally appropriate methods that include play, small group projects, open-ended questioning, group discussion, problem solving, cooperative learning and inquiry experiences to help young children develop intellectual curiosity, solve problems, and make decisions. E. eight 1 Demonstrate a variety of developmentally appropriate instructional strategies that facilitate the development of emergent literacy skills. E. eleven 1 Demonstrate knowledge of assessment techniques, interpretation of assessment information in the application of this data to curriculum development of intervention planning. F.
ECED 2121. Curriculum Development through Play Birth through Age 4 (PreK) Practicum
2 Credits (2)
The beginning practicum course is a co-requisite with the course Curriculum Development through Play – Birth through Age 4. The field based component of this course will provide experiences that address curriculum content that is relevant for children birth through age four in developmentally and culturally sensitive ways of integrating content into teaching and learning experiences. Information on adapting content areas to meet the needs of children with special needs and the development of IFSPs is included. Curriculum development in all areas, including literacy, numeracy, the arts, health, science, social skills, and adaptive learning for children, birth through age four, is emphasized. Consent of instructor required. May be repeated up to 2 credits.
Prerequisite: ECED 1110 and (ENGL 1110G or ENGL 1110H or ENGL 1110M).
Corequisite: ECED 2120.
Learning Outcomes
1. Provide a variety of activities that facilitate development of the whole child in the following areas: Physical/motor, social/emotional, language/cognitive and adaptive/living skills. A.five Develop, implement and evaluate an integrated curriculum that focuses on children's development and interests, using their language, home experiences, and cultural values. D.five Provides and uses anti-bias materials and literature, and experiences in all content areas of the curriculum. D.seven Create and manage inclusive learning environments that provide individual and cooperative opportunities for children to construct their own knowledge through various strategies that include decision-making, problem solving, and inquiry experiences. E.four Demonstrate understanding that each child's creative expression is unique and can be encouraged through diverse ways, including creative play. E.five Plan blocks of uninterrupted time for children to persist at self-chosen activities, both indoors and outdoors. E.six Demonstrate understanding of the influence of the physical setting, schedule, routines, and transitions on children and use these experiences to promote children's development and learning. E.seven Use and explain the rationale for developmentally appropriate methods that include play, small group projects, open-ended questioning, group discussion, problem solving, cooperative learning and inquiry experiences to help young children develop intellectual curiosity, solve problems, and make decisions. E.eight

ECED 2130. Curriculum Development and Implementation Age 3 (PreK) through Grade 3
3 Credits (3)
The curriculum course focuses on developmentally appropriate curriculum content in early childhood programs, age 3 through third grade. Development and implementation of curriculum in all content areas, including literacy, numeracy, the arts, health and emotional wellness, science, motor and social skills, is emphasized. Information on adapting content areas to meet the needs of children with special needs and the development of IEP's is included. Consent of instructor required. May be repeated up to 3 credits.
Prerequisite: ECED 1110, ECED 2120 and ECED 2121 (ENGL 1110G or ENGL 1110H or ENGL 1110M).
Corequisite: ECED 2131.
Learning Outcomes
1. Use appropriate guidance to support the development of self-regulatory capacities in young children. A.Eleven Demonstrate the integration of knowledge of how young children develop and learn with knowledge of the concepts, inquiry tools, and structure of content areas appropriate for different developmental levels. D.Two Demonstrate knowledge of what is important in each content area, why it is of value, and how it links with early and later understandings within and across areas. D.Three Demonstrate knowledge of the language, reading and writing components of emergent literacy at each developmental level. D.Four Adapt content to meet the needs of each child, including the development of individualized family service plans (IFSP) or individualized education plans (IEP) for children with diverse abilities through the team process with families and other team members. D.Six Demonstrate knowledge of varying program models and learning environments that meet the individual needs of all young children, including those with diverse abilities. E.One Create environments that encourage active involvement, initiative, responsibility, and a growing sense of autonomy through the selection and use of materials and equipment that are suitable to individual learning, developmental levels, diverse abilities, and the language and cultures in New Mexico. E.Two Create and manage inclusive learning environments that provide individual and cooperative opportunities for children to construct their own knowledge through various strategies that include decision-making, problem solving, and inquiry experiences. E.Four Demonstrate understanding that each child's creative expression is unique and can be encouraged through diverse ways, including creative play. E.Five Plan blocks of uninterrupted time for children to persist at self-chosen activities, both indoors and outdoors. E.Six Demonstrate understanding of the influence of the physical setting, schedule, routines, and transitions on children and use these experiences to promote children's development and learning. E.Seven Demonstrate knowledge of developmentally appropriate uses of technology, including assistive technology. E.Twelve Demonstrate knowledge of assessment techniques, interpretation of assessment information in the application of this data to curriculum development of intervention planning. F.Nine
ECED 2131. Curriculum Development and Implementation Age 3 (PreK) through Grade 3 Practicum
2 Credits (2)
The beginning practicum course is a co-requisite with the course Curriculum Development and Implementation: Age 3 through Grade 3. The field based component of this course will provide experiences that address developmentally appropriate curriculum content in early childhood programs, age 3 through third grade. Development and implementation of curriculum in all content areas, including literacy, numeracy, the arts, health and emotional wellness, science, motor and social skills is emphasized. Information on adapting content areas to meet the needs of children with special needs and the development of IEPs is included. Consent of instructor required. May be repeated up to 2 credits.

Prerequisite: ECED 1110 (ENGL 1110G or ENGL 1110H or ENGL 1110M), ECED 2120, and ECED 2121.
Corequisite: ECED 2130.

Learning Outcomes
1. Provide a variety of activities that facilitate development of the whole child in the following areas: Physical/motor, social/emotional, language/cognitive and adaptive/living skills. A.Five Develop, implement and evaluate an integrated curriculum that focuses on children's development and interests, using their language, home experiences, and cultural values. D.Five Provides and uses anti-bias materials and literature, and experiences in all content areas of the curriculum. D.Seventeen Create and manage inclusive learning environments that provide individual and cooperative opportunities for children to construct their own knowledge through various strategies that include decision-making, problem solving, and inquiry experiences. E.Four Demonstrate understanding that each child's creative expression is unique and can be encouraged through diverse ways, including creative play. E.Five Plan blocks of uninterrupted time for children to persist at self-chosen activities, both indoors and outdoors. E.Six Demonstrate understanding of the influence of the physical setting, schedule, routines, and transitions on children and use these experiences to promote children's development and learning. E.Seventeen Use and explain the rationale for developmentally appropriate methods that include play, small group projects, open-ended questioning, group discussion, problem solving, cooperative learning and inquiry experiences to help young children develop intellectual curiosity, solve problems, and make decisions. E.Eight

ECED 2140. Effective Program Development for Diverse Learners and their Families Practicum
2 Credits (2)
Provides opportunities for students to apply knowledge gained from Curriculum for Diverse Learners and their Families in a practicum setting. Consent of instructor required. Restricted to ECED majors. May be repeated up to 2 credits.

Corequisite: ECED 2140.

Learning Outcomes
1. Describe the requirements to maintain and enhance the physical and mental health, safety, and nutrition components of a program: Demonstrate knowledge of facility management to include evaluation, maintenance, security, and meeting applicable codes; Demonstrate knowledge of planning for appropriate indoor and outdoor environments; Identify ways to support early childhood educators in the selection of appropriate materials and equipment for the environment; Demonstrate knowledge of the impact of the environment on children's learning and development. Demonstrate knowledge of early care and education curriculum that is individually, culturally, linguistically, and developmentally responsive: Describe a variety of curriculum goals and teaching strategies; Describe the importance of ongoing curriculum assessment and planning, and collaboration with teachers, families and community entities; Identify ways to support early childhood educators in curriculum assessment and planning. Demonstrate knowledge of family/community involvement in effective program development: Describe the importance of supporting families as partners in early care and education program development; Describe both informal and formal communication systems with families that encourage information sharing and joint decision making; Identify strategies for resolving conflicts and supporting families with diverse backgrounds and parenting expectations; Identify the range of family needs including transitional periods; Identify within the community the network to support families with their special needs; Describe a “family friendly” inclusive philosophy Demonstrate knowledge of a director's role as an educational leader in an inclusive setting: Describe what a director does in supporting the instructional component of the program for children, staff, and families; Identify resources that a director might use to keep current with information relating to the instructional component of the program; Describe ways to involve teachers in instructional decision making.

ECED 2215. Program Management
3 Credits (3)
This course emphasizes the technical knowledge necessary to develop and maintain an effective early care and education program. It focuses on sound financial management and vision, the laws and legal issues that affect programs, and state and national standards such as accreditation. Consent of instructor required. May be repeated up to 3 credits.

Learning Outcomes
1. Develop a comprehensive program philosophy. Demonstrate the ability to develop systems that are effective for quality program operation. Create a program budget and understand the Income and Expense sides and what affects each part. Model best practices that integrate various leadership styles.
ECED 2280. Professional Relationships
3 Credits (3)
This course addresses staff relations that will foster diverse professional relationships with families, communities and boards. Topics of staff recruitment, retention, support and supervision will lay the foundation for positive personnel, family and community relationships. Consent of instructor required. May be repeated up to 3 credits.
Corequisite: ECED 2281.
Learning Outcomes
1. Interview an administrator and write a paper describing personnel management, staff support, supervision, and professional development. Identify and describe ethical and legal requirements in maintaining a professional relationship with subordinates, the community, clients, and fellow administrators. Identify and describe technologies which may be used in an early childhood setting. Identify and describe legal and ethical considerations in the employment of others.

ECED 2281. Professional Relationships Practicum
2 Credits (2)
Practical experience in the development of staff relationship that will foster professional relationships with families, communities and boards. Issues of staff recruitment, retention, support and supervision will lay a foundation for positive personnel management. Consent of instructor required. Restricted to ECED majors.
Corequisite(s): ECED 2280.
Learning Outcomes
1. Demonstrate knowledge of personnel management, staff support, supervision, and professional development within a diverse and inclusive organization: Describe methods for recruiting and retaining a diverse staff; Describe job descriptions for each position; Review a sampling of personnel policies and procedures; Review a variety of staff handbooks; Explain why on-going system of supervision should include regular meetings for professional goal setting, self-assessment, and feedback; Review program needs to effectively manage the work of the program including scheduling, covering ratios, initial orientation, in-service, staff meeting, etc. Demonstrate an awareness of appropriate communication and collaboration skills: Improve written and oral communication skills; Describe strategies for resolving conflicts; Explain how to promote consensus building as a decision making process. Demonstrate knowledge that promotes effective professional relationships with families, communities, and board members. Describe methods for demonstrating respect, understanding, and appreciation for all people; Identify the aspects of culture that facilitate relationship building among people; Describe how to build a common vision and develop long range program plans with parents, staff, board, and the community; Communicate program goals to visitors, prospective parents, volunteers, and board members; Describe how public relations and marketing strategies can impact programs; Review assessment tools that identify needs for early care, education and family support; Develop a personal professional development plan; Describe methods to work effectively with a board and advisory group. Demonstrate knowledge of technology uses and skill acquisition: Describe how to use technology resources to engage in ongoing professional development and lifelong learning; Describe how you will use technology to communicate and collaborate in your leadership role.
ECED 3210. Emergent Literacy
3 Credits (2+2P)
This advanced course is designed to prepare early childhood professionals to study literacy development, specifically oral language, writing and reading. This course focuses on children from birth through age 4, including children with special needs. Through a developmental approach, the course addresses: 1) recent theory and research that translates into practical strategies, assessment materials and preparation of rich literacy environments, 2) the socio-cultural contexts in which children develop literacy, 3) culturally, linguistically and developmentally appropriate literacy curricula, 4) processes used to determine the appropriateness of various literacy strategies, 5) assessment, evaluation, and accountability and 5) literacy leadership. May be repeated up to 3 credits.
Prerequisite: ECED 2115.
Learning Outcomes
1. Demonstrate knowledge of the developmental sequence of language and literacy, including the influence of culture and home factors. A. eight Knowledge of how children acquire and use verbal, non-verbal and alternative means of communication. A. nine Develop partnerships with family members to promote early literacy in the home. C. eight Establish partnerships with community members in promoting literacy. C. ten Knowledge of the language, reading and writing components of emergent literacy at each developmental level. D. four Create and manage a literacy-rich environment that is responsive to each child’s unique path of development. E. nine Use a variety of language strategies during adult-child and child-child interactions and facilitate dialogue of expressive language and thought. E. ten A variety of developmentally appropriate instructional strategies that facilitate the development of emergent literacy skills. E. eleven Demonstrate and facilitate conceptual understanding of family roles in the development of their infant and toddler, including support for family acquisition of knowledge concerning infant and toddler’s growth, learning and development and cultural and linguistic diversity represented within the home setting. H. one 1 Apply theoretical knowledge and ability to provide screening and assessment unique for infants and toddlers. H. two 1 Articulate and demonstrate conceptual understanding of respectful, responsive, and reciprocal interactions that serve as basis for infant/toddler curriculum and learning environments. H. five 1 An understanding and applications of flexible teaching approaches that span a continuum from child-initiated to adult-directed and from free exploration to scaffolded support or teacher modeling. I. three 1 Link child characteristics, needs, and interests with informal opportunities to build children's language, concept development, and skills. I. five 1 Establish priorities for high-quality and meaningful language and pre-literacy experiences across the developmental continuum, using language, pre-reading and pre-writing to facilitate skill development while strengthening children's cultural identity. I. eleven 1 Knowledge of second-language acquisition and bilingualism including the diversity of home language environments. I. twelve Conceptual knowledge of the principles and standards derived from professional organizations for curriculum decision-making. I. fifteen

ECED 4110. Working with Young Children with Special Needs, Ages 3-8
3 Credits (3)
Addresses competencies for working with young children with exceptionalities, ages three-eight, and their families. Public school, private school, Head Start and other models are included. Taught with ECED 5110. Restricted to: TEP-ECED majors. May be repeated up to 3 credits.
Prerequisite: SPED 3105.
Corequisite: ECED 4120.
Learning Outcomes
1. Demonstrate knowledge of the significance of individual differences in development and learning.
2. Demonstrate knowledge of how certain differences may be associated with rate of development and developmental patterns associated with developmental delays or specific disabilities. Demonstrate knowledge of the similarities between children who are developing typically and those with diverse disabilities.

ECED 4120. Assessment of Young Children, Birth-Eight
3 Credits (3)
Covers instruments and procedures for assessing young children and their families in order to determine atypical development. Screening, diagnosis, program planning, placement and evaluation issues are covered. May be repeated up to 3 credits.
Prerequisite: ECED 3105.
Corequisite: ECED 4110.
Learning Outcomes
1. Understand the technical aspects of early childhood assessments Conduct and utilize assessments Collaborate with other professionals

ECED 4210. Integrated Early Childhood Curriculum
4 Credits (4)
This advanced course focuses on developmentally appropriate content, learning environments, and curriculum implementation for children birth through age 4. It emphasizes integration of content areas (the arts, literacy, math, health/emotional wellness, science, social studies, motor, and adaptive living skills) and the development of rich learning environments for infants, toddlers, and preschool children. Restricted to ECED majors and minors. May be repeated up to 4 credits.
Prerequisite: ECED 1115, ECED 2120, ECED 2121, ECED 2130, ECED 2131, ECED 2110, and ECED 1120.
Corequisite: ECED 4211.
Learning Outcomes
1. Develop, implement and evaluate an integrated curriculum that focuses on children's development and interests, using their language, home experiences, and cultural values. D. five Create and manage inclusive learning environments that provide individual and cooperative opportunities for children to construct their own knowledge through various strategies that include decision-making, problem solving, and inquiry experiences. E. four

ECED 3996. Special Topics
1-3 Credits (1-3)
Each course will be identified by a qualifying subtitle. A maximum of 3 credits in any one semester and a grand total of 6 credits. May be repeated up to 6 credits.
Learning Outcomes
1. Engage in the study of an ECED topic.
**ECED 4211. Integrated Curriculum Practicum**  
**2 Credits (2)**

The advanced practicum course is a field-based course that will provide opportunities for the integration of content areas (the arts, literacy, math, health/emotional wellness, science, social studies, motor, and adaptive living skills) and the development of rich learning environments for infants, toddlers, and preschool children. Restricted to ECED majors and minors. May be repeated up to 2 credits.  
**Prerequisite:** ECED 1115, ECED 2120, ECED 2121, ECED 2130, ECED 2131, ECED 2110, ECED 1120.  
**Corequisite:** ECED 4210.  
**Learning Outcomes**

1. Develop, implement, and evaluate an integrated curriculum that focuses on children’s development and interests, using their language, home experiences, and cultural values. D.five Create and manage inclusive learning environments that provide individual and cooperative opportunities for children to construct their own knowledge through various strategies that include decision-making, problem solving, and inquiry experiences. E.four Demonstrate understanding of the influence of the physical setting, schedule, routines, and transitions on children and use these experiences to promote children’s development and learning. E.seven Use and explain the rationale for developmentally appropriate methods that include play, small group projects, open-ended questioning, group discussion, problem solving, cooperative learning and inquiry experiences to help young children develop intellectual curiosity, solve problems, and make decisions. E.eight Demonstrate an understanding and application of flexible teaching approaches that span a continuum from child-initiated to adult-directed and from free exploration to scaffolded support or teacher modeling. I.three

**ECED 4250. Teaching and Learning Math and Science**  
**4 Credits (4)**

Standards, principles, and practices in teaching mathematics and science to young children in preschool through grade 3. An emphasis is placed on developing a content-rich integrated math and science curriculum that focuses on children’s development and interests, includes appropriate content, processes, environment, and materials with an emphasis on problem-solving as the major means of constructing basic concepts. Field experience required. May be repeated up to 4 credits.  
**Corequisite:** ECED 4310, ECED 4260, ECED 4320.  
**Learning Outcomes**

1. The arithmetic of real numbers and their subsets of rational numbers, integers, and whole numbers including a large repertoire of interpretations of the four basic operations and ways they can be applied, and an understanding of place value and its implications for ordering numbers and estimation. H.two.a.i Three dimensional geometry based on the concept of distance, and two dimensional geometry as a method of drawing plans and representing three dimensional objects H.two.a.ii Measurement of length, perimeter, area, time, weights, and temperature H.two.a.iii Handling money problems such as cost and unit price. H two.a.iv Demonstrate understanding and skill in the constructions of solids, measurements of their volumes and surface areas, drawing their projections, and making plans for their construction; defining relevant variables and writing formulas describing their relationships in problem-solving activities; and using measurement tools and appropriate techniques for recording data and displaying results. H two.b Facilitate curriculum with open-ended activities that promote children’s expansion of the material learned, and in which children learn to use a variety of mathematical skills and concepts, including problem solving, reasoning, and logic. H.two.c Provide opportunities for children to learn how to use tools, technology, and manipulatives in problem solving. H two.d Establish a classroom environment of respect for cultural diversity and gender equity in which all children develop skills in communicating, discussing, and displaying mathematical ideas. H two.e Demonstrate understanding and apply the fundamental concepts in the subject matter of science including physical, life, and earth and space sciences as well as concepts in science and technology, science in personal and social perspectives, the history and nature of science, the unifying concepts of science, and the inquiry process scientists use in discovery of new knowledge to build a base for scientific inquiry. H two.a.i Demonstrate sound knowledge and skills in using technology as a teaching and learning tool. I.seven 1 Demonstrate the ability to identify and communicate a problem, and to design, implement, and evaluate a solution. H three.b 1 Demonstrate the ability to integrate a variety of technologies into planned science activities. H three.c 1 Establish a classroom environment of respect for cultural diversity and gender equity where all children participate fully in science learning. H three.d Support play in young children’s learning and development from age Pre-K-grade three. I.six 1 Demonstrate sound knowledge and skills in using technology as a teaching and learning tool. I.seven 1 Demonstrate the ability to analyze and critique early childhood curriculum experiences in terms of the relationship of the experiences to the research base and professional standards. I.nine 1 Facilitate family involvement so that families are engaged with curriculum planning, assessing of children’s learning, and planning for children’s transitions to new programs. I.twelve 1 Demonstrate conceptual knowledge of the principles and standards derived from professional content organizations (zero to three, NAECY, DEC) for curriculum-decision making. I.thirteen 1 Demonstrate the use of reflective practice. I.fourteen
ECED 4260. Teaching and Learning Social Studies, Fine Arts and Movement
3 Credits (3)
The course focuses on the aims, scope, and integration of methods of teaching social studies, the fine arts and movement across the curriculum. This course emphasizes an integrated approach to teaching the what and why of social studies; assessing student learning; planning units, lessons, and activities; effective instructional strategies; and knowledge of social studies content. Concepts of expressive art include the visual arts, music, movement and drama. May be repeated up to 3 credits.
Corequisites: ECED 4310, ECED 4250, ECED 4320.

Learning Outcomes
1. Demonstrate an understanding of the principles of teaching and learning processes that underscore social studies concepts and can translate these into meaningful learning activities focusing on inquiry, authenticity, and collaboration. H.four.a Demonstrate understanding that social studies encompass history, geography, anthropology, archeology, economics, political science, psychology, sociology, and the interdisciplinary relationship of all facets of social studies. H.four.b Demonstrate understanding that the definition of social studies requires that children be socially aware of and are active participants in local, state, national, and global issues; and that children recognize and respect diverse local and global perspectives concerning cultures other than their own. H.four.c Implement a variety of teaching strategies to assist children to use multiple resources including primary (e.g., documents, artifacts/regalia, direct observation, human resources, personal background) and secondary (e.g., books, newspapers, internet) as part of the inquiry/research process. H.four.d Create curriculum experiences that provide opportunities for children to appreciate the historical development of democratic values, institutions, nations, and cultures. H.four.e Demonstrate the ability to plan for and engage children in activities that require them to formulate, analyze, synthesize, and critique issues by using well-reasoned, clearly supported arguments, policies, and positions. H.four.f Demonstrate the ability to plan for and engage children in the presentation of social studies knowledge using a variety of sign systems including writing, charts, graphs, maps, art, music, drama, dance, and technology. H.four.g Demonstrate an understanding and implementation of arts activities such as history, art making, appreciation, and criticism through dance, music, theater, and the visual arts, appropriate to young children's developmental levels interests. H.five. Demonstrate knowledge of the distinctions, connections, and integration between arts disciplines and arts experiences and encourages study and active participation that leads to skill development and appreciation. H.five.b 1 Facilitate curriculum in which children communicate at a basic level in the four (4) art disciplines of dance, music, theater, and visual arts, including knowledge and skills in the use of basic vocabularies, materials, tools, techniques, and thinking processes of each discipline. H.five.c 1 Create a classroom environment with exemplary works of art from a variety of cultures and historical periods and provide opportunities for students to discuss and respond to them. H.five.d 1 Demonstrate an understanding of motor skill development in young children and apply knowledge of age and developmentally appropriate psychomotor and cognitive activities. H.five.e 1 Create and use appropriate instructional cues and prompts for motor skills, rhythms, and physical activity. H.five.f 1 Apply an understanding of child development knowledge coupled with child performance data to make informed instructional decisions. H.five.g 1 Support play in young children's learning and development from age Pre-K - grade three. I.six 1 Demonstrate sound knowledge and skills in using technology as a teaching and learning tool. I.seven 1 Demonstrate the ability to analyze and critique early childhood curriculum experiences in terms of the relationship of the experiences to the research base and professional standards. I.nine 1 Facilitate family involvement.

ECED 4310. Early Primary Field Placement
2 Credits (4P)
The field practicum is a co-requisite course with Teaching and Learning Reading and Writing; Teaching and Learning Math and Science; Teaching and Learning Social Studies, Fine Arts and Movement. The field based component will provide experiences that address curriculum content and practice teaching that is relevant for early primary children in developmentally and culturally sensitive ways. Graded: S/U Grading (S/U, Audit). Restricted to: TEP-ECED majors. May be repeated up to 2 credits.
Corequisite: ECED 4250, ECED 4260, ECED 4320.

Learning Outcomes
1. Demonstrate the ability to work collaboratively with educational assistants, volunteers, and others to individualize the curriculum and to meet program goals. Demonstrate skill in collaboration with professionals from other disciplines (e.g., mental health, psychology, speech and language) when planning curriculum and teaching strategies for young children with diverse abilities. Demonstrate an understanding and application of flexible teaching approaches that span a continuum from child-initiated to an adult-directed and from free exploration to scaffolded support or teacher modeling. Apply an understanding of young children's need for balance, order, depth, variety, and challenge through curriculum planning, routines, and scheduling (e.g., daily, weekly, and longer-term). Link child characteristics, needs, and interests with informal opportunities to build children's language, concept development, and skills. Apply knowledge to create environments that enrich and extend children's play including intervention strategies (i.e., questioning), respect of cultural diversity and gender equity. Support play in young children's learning and development from age Pre-K - grade three. Demonstrate the ability to promote positive social interactions and engage children in learning activities while actively working to increase social and emotional competence of all children. Demonstrate the ability to analyze and critique early childhood curriculum experiences in terms of the relationship of the experiences to the research base and professional standards. Facilitate family involvement so that families are engaged with curriculum planning, assessing of children's learning, and planning for children's transitions to new programs. 1 Demonstrate conceptual knowledge of the principles and standards derived from professional content organizations (zero to three, NAECY, DEC) for curriculum-decision making. Demonstrate the use of reflective practice.
ECED 4320. Teaching and Learning Reading and Writing
3 Credits (3)
The foundation of this course is on understanding the reading process including the relationship between reading, writing, listening, and speaking; individual needs and abilities in reading instruction; and how to organize classrooms and select materials to support literacy development. Concepts of phonemic awareness, phonic instruction, vocabulary development, fluency and comprehension are integrated with the developmentally appropriate use of authentic assessment techniques, language/literacy immersion, and multicultural children's literature. May be repeated up to 3 credits.

Prerequisite: ECED 2115.
Corequisite: ECED 4310, ECED 4250, ECED 4260.

Learning Outcomes
1. This course will focus on the following New Mexico early childhood teacher education competencies and New Mexico State University's conceptual framework for teacher preparation. Articulate an understanding of developmental theories and processes and their implications for appropriate methods of teaching reading in the K-third grade classroom. Demonstrate knowledge of various instructional approaches and strategies for promoting literacy within an integrated curriculum framework. Provide and use anti-bias literacy materials and experiences, including primary language materials. Plan appropriate whole group, small group, and individual activities that include appropriate accommodations for working with children with special needs. Understand and articulate the concept of emergent literacy and the processes toward becoming an authentic reader and writer. Understand the role of family in literacy development. Respect and promote the use of the child's home language for learning. Demonstrate knowledge of, and use effectively, a wide range of literacy assessment strategies and instruments to determine a child's strengths and areas of need. Engage in reflection on current theoretical perspectives on the reading process and the role of print literacy in schools and our society. Our focus will be on rigorous inquiry about literacy education in U.S. schools and methods of literacy instruction. We will be examining how invisible cultural, historical, political, and social contexts have influenced and continue to influence teachers and schools. In your observations of reading and literacy education in your field experience it is critical that you become aware of these subtle but pervasive influences. To achieve this, we will focus our inquiry this semester on the following questions: What is literacy in early childhood education? Is that different from literacy outside of school? How do young children use and pursue literacy? How do I promote literacy for all the children with whom I work?

ECED 4810. Student Teaching/Seminar Early Childhood
3 Credits (3)
Discussion of early childhood school issues related to student teaching. May be repeated up to 3 credits.

Learning Outcomes
1. Synthesis of knowledge and skills appropriate to teaching in PreK - 3rd grade educational settings.

ECED 4996. Topics
3 Credits (3)
Offered under various subtitles which indicate the subject matter to be covered. May be repeated up to 9 credits.

Learning Outcomes
1. Engage in the study of an ECED topic.

ECED 4998. Field Experience (Infants Pre-K)
1 Credit (1)
Supervised field experiences in early childhood settings: infants, toddlers, and pre-K programs. May be repeated up to 1 credit.

Learning Outcomes
1. Engage in an ECED field experience.
ECED 5110. Working with Young Children with Special Needs, Ages 3-8
3 Credits (3)
Addresses competencies for working with young children with exceptionalities, ages three eight, and their families. Public school, private school, Head Start and other models are included. Taught with ECED 4110 with differentiated assignments for graduate students. May be repeated up to 3 credits.

Learning Outcomes
1. Demonstrate knowledge of the significance of individual differences in development and learning. Demonstrate knowledge of how certain differences may be associated with rate of development and developmental patterns associated with developmental delays or specific disabilities. A.three Demonstrate knowledge of the similarities between children who are developing typically and those with diverse disabilities. A.four Demonstrate knowledge of how children acquire and use verbal, non-verbal, and alternative means of communication. A.nine Demonstrate understanding of the importance of families as the primary educator of their child. C.six Demonstrate the ability to incorporate the families’ desires and goals for their children into classroom or intervention strategies. C.seven Demonstrate ability to communicate to families the program's policies, procedures, and those procedural safeguards that are mandated by state and federal regulations. C.eleven Apply knowledge of family theory and research to understand family and community characteristics including socioeconomic conditions, family structures, relationships, stressors, and supports (including the impact of having a child with divers abilities), home language, and ethnicity. C.twelve Adapt content to meet the needs of each child, including the development of individualized family service programs (IFSP) or individualized education programs (IEP) for children with diverse abilities through the team process with families and other team members. D.six 1 Create environments that encourage active involvement, initiative, responsibility, and a growing sense of autonomy through the selection and use of materials and equipment that are suitable to individual learning, developmental levels, diverse abilities, and the language and cultures in New Mexico. E.two 1 Create and manage inclusive learning environments that provide individual and cooperative opportunities for children to construct their own knowledge through various strategies that include decision-making, problem solving, and inquiry experiences. E.four 1 Demonstrate knowledge of developmentally appropriate uses of technology, including assistive technology. E.twelve 1 Demonstrate knowledge of maintaining appropriate records of children's development and behavior that safeguards confidentiality and privacy. F.two 1 Demonstrate knowledge of the educator's role as a participating member of the assessment process as described and mandated by state and federal regulations for individual family service programs (IFSP) and individual service programs (IEP). F.three 1 Articulate an understanding that responsible assessment is legally and ethically grounded and guided by sound professional standards. It is collaborative and open with the goal of supporting diverse children and families. F.eight 1 Demonstrate knowledge of a variety of techniques and procedures to evaluate and modify program goals for young children and their families. F.ten 1 Demonstrate ability to work collaboratively as an advocate with families and IFSP and IEP team members to provide developmentally supportive environments. H.three 1 Demonstrate content knowledge (e.g., art, music, movement, science, math, literacy, social studies, and technology) and familiarity with a wide variety of resources in academic disciplines and apply that knowledge in the development, implementation, and evaluation of curriculum. I.one

ECED 5120. Assessment of Young Children, Birth Eight
3 Credits (3)
Covers instruments and procedures for assessing young children and their families in order to determine atypical development. Screening, diagnosis, program planning, placement and evaluation issues are covered. Same as ECED 4120. May be repeated up to 3 credits.

Prerequisite: ECED 5110 or consent of instructor.

Learning Outcomes
1. UNDERSTAND THE TECHNICAL ASPECTS OF EARLY CHILDHOOD ASSESSMENTS -Define and understand the benefits and concerns of assessment, types of assessment, and best practices for early childhood assessments and their targeted populations. CONDUCT AND UTILIZE ASSESSMENTS- Demonstrate proficiency in using a variety of assessment tools to: screen children; assess current skill levels; determine strengths and weaknesses; supplement assessments when warranted; and incorporate data for instructional plans. COLLABORATE WITH OTHER PROFESSIONALS – Utilize transdisciplinary practices with all vested participants when conducting screenings, evaluations, and making recommendations. COLLABORATE WITH FAMILIES- Demonstrate proficiency in obtaining information from parents about their expectations, needs, and priorities when assessing and making early childhood instructional recommendations. EVALUATE PROGRAMS- Implement best practices in program design, advocate for children's services, and articulate/ safeguard student IFSP/IEPs according to each child's developmental needs.

ECED 5130. Working with Parents of Young Children
3 Credits (3)
Techniques for setting up home and classroom visitations, communicating with parents, and establishing special programs. May be repeated up to 3 credits.

Learning Outcomes
1. Demonstrate a deep understanding of the theory, philosophy and goals of multicultural education Develop a knowledge base of the essential concepts to address language, culture, class, gender, and exceptionalities within the theoretical constructs of multicultural education. Develop a personal and social astuteness to the characteristics of culturally, linguistically, and ethnically distinct students while keeping in mind the uniqueness of their persona within a contextually rich school and community milieu. Explore multicultural education strategies that well enhance one's future pedagogical repertoire. Provide learning opportunities to develop multicultural and cross-cultural perspectives for application into future learning environments. Develop an active sense of commitment to collaborative efforts in order to best meet our goals as committed learners and educators who will teach with and facilitate multicultural curriculum in a variety of pluralistic settings. Develop an array of perspective skills in order to accommodate the dynamics of culture change, pluralism, cultural sensitivity, and cultural democracy that occur within classrooms. Demonstrate growth in the dispositions identified in the “Teacher Candidate Disposition” document.
ECED 5210. Leadership and Advocacy in Early Childhood
3 Credits (3)
The course explores a multidisciplinary approach to early childhood educational leadership, advocacy and change. The course focuses on leadership in its many forms: in teaching, administration, policy, research, and ethics. In addition, we will examine the theory and practice of change to gain an understanding of what contributes to advocating for policy and community change. Students will gain a deeper understanding of themselves as leaders, and ways to improve early education to promote social justice in programs and systems serving families and young children. May be repeated up to 3 credits.
Learning Outcomes
1. Examine and evaluate a multidisciplinary approach to early childhood educational leadership. Examine leadership in its many forms: in teaching, administration, policy, research, and ethics. Utilize theory and practice of advocacy leadership for policy and community change. Develop a statement of leadership philosophy.

ECED 5220. Play in the Early Childhood Curriculum
3 Credits (3)
Advanced exploration of the development of curriculum based on children's play. A means of exploring and learning the patterns of human living, communications, and experiences congruous with developing interests and capacities. Restricted to majors. May be repeated up to 3 credits.
Learning Outcomes
1. Incorporate understanding of play stages, development, and theories of play in early childhood education into developmentally appropriate practice. (I.A) Demonstrate knowledge of the different types of play (sociodramatic, constructive, rough tumble, games with rule) and their uses in classrooms to promote learning. (I.B) Demonstrate knowledge of the significance of guiding young children's play to enhance learning in early childhood classrooms. (I.C) Demonstrate knowledge of social influences on play and young children's development of gender identity. Provide and use anti-bias materials and experiences in all areas of the curriculum. (I.D) Provide a variety of play activities that facilitate development of the whole child in all areas, physical/motor, social/emotional, language/cognitive and adaptive/living skills. (I.E) Apply knowledge of cultural and play diversity and the significance of socio-cultural political contexts for development and learning and recognize that children are best understood in the contexts of family, culture, and society. (I.F) Demonstrate knowledge of the many functions play serves in the cognitive, social, and emotional aspects of development in the formative years. Develop and demonstrate skills in selecting quality play activities for young children. (I.G) Demonstrate knowledge of the developmental sequences of play development, including the influence of culture and home factors. (I.H) Demonstrate knowledge of how young children acquire and use technology play to promote learning. (I.I) Demonstrate knowledge of how play is used to support standards and assessment in early childhood education. (I.J)

ECED 5230. Curriculum in Early Childhood Education
3 Credits (3)
Development and implementation of curriculum and materials for teaching young children. May be repeated up to 3 credits.
Learning Outcomes
1. Understand and implement appropriate ECED curriculum.

ECED 5310. Issues in Early Childhood Education
3 Credits (3)
Examines current trends and problems through readings of theoretical, empirical, and applied literature. May be repeated up to 3 credits.
Learning Outcomes
1. Examine the foundations of literacy development in early childhood. Analyze sociocultural and critical perspectives in early literacy research, theory, and practice. Apply grounded perspectives on topical issues in literacy development in early childhood. Evaluate the literacies embedded in your own teaching/learning and the ones embedded in the communities in which they work. Create sound theoretical and methodological frameworks in an early literacy project. Identify and use various genres in children's literature.
**ECED 5410. Seminar on Child Development, Assessment and Well-being of Young Children**

3 Credits (3)

This course will reintroduce you to the world of young children in a variety of early childhood settings. It focuses on early childhood development, observation of young children and evaluation of classrooms, child well-being, and the many ways in which children learn. Sessions will bridge theory to practice as we explore your internship experiences and gain deeper understanding of your role as an early care and education professional. May be repeated up to 3 credits.

**Learning Outcomes**

1. Incorporate understanding of developmental stages, process, and theories of growth, development, and learning into developmentally appropriate practice. Demonstrate knowledge of the interaction between maturation and environmental factors that influence physical, social, emotional, cognitive, and cultural domains in the healthy development of each child. Demonstrate knowledge of the similarities between children who are developing typically and those with special needs. Provide a variety of activities that facilitate development of the whole child in the following areas: physical/motor, social/emotional, language/cognitive, and adaptive/living skills. (I.E) Demonstrate knowledge of the many functions that language serves in the cognitive, social, and emotional aspects of development in the formative years. (I.G) Demonstrate knowledge of the developmental sequence of language and literacy, including the influence of culture and home factors. (I.H) Recognize signs of emotional distress, child abuse, and neglect in young children and use procedures appropriate to the situation, such as initiating discussions with families, referring to appropriate professionals, and, in cases of suspected abuse or neglect, reporting to designated authorities. B.four Demonstrate ability to adhere to early childhood education professional codes of ethical conduct and issues of confidentiality. G.one Demonstrate awareness of federal, state, and local regulations, and public policies regarding programs and services for children birth through eight years of age. G.two Demonstrate critical reflection of one’s own professional and educational practices from community, state, national, and global perspectives. G.four Demonstrate knowledge in technology resources to engage in ongoing professional development. G.seven Articulate an understanding of indoor and outdoor learning environments that provide opportunities for children to put into practice healthy behaviors (physically, socially, and emotionally). B.two Use appropriate health appraisal and management procedures and make referrals when necessary. B.three Establish an environment that provides opportunities and reinforcement for children’s practice of healthy behaviors that promote appropriate nutrition and physical and psychological well-being. B.five Implement health care and educational activities for children and families based on health and nutritional information that is responsive to diverse cultures. B.seven

**ECED 5420. Science/Math Curriculum**

3 Credits (2+2P)

Methods and materials for developmentally appropriate practices in teaching science and math for young children. May be repeated up to 3 credits.

**Learning Outcomes**

1. Synthesis of knowledge and skills appropriate to teaching in PreK - third grade educational settings.

**ECED 5510. Advanced Teaching and Learning of Literacy**

3 Credits (3)

This advanced graduate early literacy course reviews the reading process including the relationship between reading, writing, listening, and speaking; individual needs and abilities in reading instruction; and how to organize classrooms and select materials to support literacy development. Concepts of phonemic awareness, phonics instruction, vocabulary development, fluency and comprehension are integrated with the developmentally appropriate use of authentic assessment techniques, language/literacy immersion, and multicultural children’s literature.

**Learning Outcomes**

1. This course will focus on the following New Mexico early childhood teacher education competencies and New Mexico State University’s conceptual framework for teacher preparation. Articulate an understanding of developmental theories and processes and their implications for appropriate methods of teaching reading in the K-third grade classroom. Demonstrate knowledge of various instructional approaches and strategies for promoting literacy within an integrated curriculum framework. Provide and use anti-bias literacy materials and experiences, including primary language materials. Plan appropriate whole group, small group, and individual activities that include appropriate accommodations for working with children with special needs. Understand and articulate the concept of emergent literacy and the processes toward becoming an authentic reader and writer. Understand the role of family in literacy development. Respect and promote the use of the child’s home language for learning. Demonstrate knowledge of, and use effectively, a wide range of literacy assessment strategies and instruments to determine a child’s strengths and areas of need. 1 Engage in reflection on current theoretical perspectives on the reading process and the role of print literacy in schools and our society. Our focus will be on rigorous inquiry about literacy education in U.S. schools and methods of literacy instruction. We will be examining how invisible cultural, historical, political, and social contexts have influenced and continue to influence teachers and schools. In your observations of reading and literacy education in your field experience it is critical that you become aware of these subtle but pervasive influences. To achieve this, we will focus our inquiry this semester on the following questions: What is literacy in early childhood education? Is that different from literacy outside of school? How do young children use and pursue literacy? How do I promote literacy for all the children with whom I work?
ECED 5520. Literacy Development in Early Childhood  
3 Credits (3)  
Advanced theory, research, and practice relating to early childhood reading. May be repeated up to 3 credits.  
Learning Outcomes  
1. This course will focus on the following New Mexico early childhood teacher education competencies and New Mexico State University’s conceptual framework for teacher preparation. Articulate an understanding of developmental theories and processes and their implications for appropriate methods of teaching reading in the K-third grade classroom. ECED 5810. Student Teaching/Seminar  
3 Credits (3)  
Provides student teaching experience in a variety of settings with young children ages birth 8. Restricted to: TEP-ECED majors. Students must be admitted into student teaching to enroll. May be repeated up to 3 credits.  
Learning Outcomes  
1. Our mission is to serve the people of New Mexico through education, research, extension education, and public service with specific emphasis on innovative practices, overcoming barriers to learning, international activities, technology, and literacy for the diverse populations of New Mexico, surrounding states and border communities.  

ECED 6110. History and Philosophy of Early Childhood Education  
3 Credits (3)  
Critical analysis of the historical development and philosophical underpinnings of the field of early childhood education as it relates to current practice. Restricted to doctoral-level students of any major. May be repeated up to 3 credits.  
Learning Outcomes  
1. Examine the historical figures in early childhood education that have influenced current practices and discourses. Identify theoretical, scientific, and philosophical foundations in early childhood education that have defined childhood learning and development. Critically examine the history of institutions and federal policies of early childhood education within the context of multiculturalism  

ECED 6596. Selected Topics in Early Childhood Education  
1-6 Credits (1-6)  
Offered under various subtitles. May be repeated up to 6 credits.  
Learning Outcomes  
1. Engage in the study of an ECED topic.  

Education Courses  
EDUC 1110. Freshman Orientation  
1 Credit (1)  
Introduction to the university and to the College of Education. Discussion of planning for individualized education program and field experience. Restricted to Las Cruces campus only. May be repeated up to 1 credit.  
Learning Outcomes  
1. Demonstrates knowledge of and uses theories, approaches, methods, and techniques for teaching, reading, writing, and other academic skills in English and the native language. Demonstrates knowledge of and applies management techniques appropriate to classrooms containing students who have varying levels of proficiency and academic experience in both languages. Community/ Family Involvement: The bilingual teacher: (a) Recognizes the importance of parental and community involvement for facilitating the learner’s successful integration to his/her school environment. (b) Demonstrates knowledge of the teaching and learning patterns of the students’ home environment and incorporates these into the instructional areas of program. Assessment: The bilingual teacher: (a) Assesses oral and written language proficiency in academic areas in both languages utilizing the results for instructional placement, prescription, and evaluation. (b) Evaluates the growth of the learner’s native and second language in the context of the curriculum. (c) Continuously assesses and adjusts her or his own language use in the classroom in order to maximize learner comprehension and verbal participation
EDUC 1120. Introduction to Education  
2 Credits (2)  
Introduction to the historical, philosophical, sociological foundations of education, current trends, and issues in education; especially as it relates to a multicultural environment. Students will use those foundations to develop effective strategies related to problems, issues and responsibilities in the field of education. Restricted to Las Cruces campus only. May be repeated up to 2 credits.  
Learning Outcomes  
1. Describe the teaching and learning of various American education settings including early childhood, elementary, middle school, high school, and special education. Describe how teachers use educational theory and the results of research of students’ learning. Explain the techniques for establishing a positive and supportive environment in the classroom. Identify and describe instructional strategies supported by current research to promote thinking skills of all learners. Recognize the teachers’ role and responsibilities in an increasingly diverse, multicultural society.

EDUC 1140. Math for Paraprofessionals  
3 Credits (3)  
Applied math skills for paraprofessionals working with children. May be repeated up to 3 credits.  
Prerequisite: CCDM 103 N.  
Learning Outcomes  
1. Students will plan developmentally appropriate math activities for young children. Students will plan adaptations to math activities for children with diverse abilities. Students will demonstrate understanding of recent research in methods of teaching mathematics. Students will demonstrate understanding of early childhood theories as they relate to the teaching of mathematics. Students will demonstrate understanding of unique needs of children from diverse economic or cultural backgrounds.

EDUC 1150. Math for Paraprofessionals II  
3 Credits (3)  
Applied math skills for paraprofessionals working under the direction of a teacher. May be repeated up to 3 credits.  
Prerequisite: EDUC 1140.  
Learning Outcomes  
1. Students will plan developmentally appropriate math activities for young children. Students will plan adaptations to math activities for children with diverse abilities. Students will demonstrate understanding of recent research in methods of teaching mathematics. Students will demonstrate understanding of early childhood theories as they relate to the teaching of mathematics. Students will demonstrate understanding of unique needs of children from diverse economic or cultural backgrounds.

EDUC 1185. Introduction to Secondary Education and Youth  
3 Credits (3)  
Introductory course for students considering a career in secondary education. Includes historical, philosophical, and sociological foundations, program organization, critical dispositions, and understanding the context of schools and youth. Practicum required. Restricted to: Secondary Ed majors. Traditional Grading with RR.  
Learning Outcomes  
1. Articulate the attributes of an education professional entering the field. Differentiate and summarize the major educational philosophies and historical events that have influenced the progression of educational practice. Describe the role of law in education with emphasis on the rights and responsibilities of teachers and learners. Develop a preliminary personal philosophy of teaching and learning. Discuss the characteristics and roles of the teacher, the student, and the school in today’s education. Identify effective teaching methods, instructional strategies and learning styles. Evaluate the Lesson Planning Process using various lesson planning templates, formats, and rubrics. Explain classroom management techniques. Identify different types of diversity in the classroom environment. Describe how learning differences are manifested in schools. Describe how teachers use multiple methods of assessment to engage learners in their own growth, to monitor learner progress 1 Describe how teachers use multiple methods of assessment to modify instruction and inform decision making. 1 Identify the role of Standards and High Stakes Testing in the life of an educational professional. 1 Complete 24 hours internship in a classroom, preferably a bilingual classroom. 1 Document and reflect on your observations throughout your internship. 1 Construct an individualized map to teacher licensure in the State of New Mexico.

EDUC 1195. Field Experience I  
1 Credit (1)  
Introduction to public school teaching, school visits, classroom observations and discussion seminar. May be repeated up to 1 credit.  
Learning Outcomes  
1. Demonstrate an understanding of personal attitudes and motivations for entering the field of education. Identify effective teaching strategies that enhance student learning outcomes. Identify classroom management techniques and learning styles. Develop observational skills and reflective thinking skills. Evaluate instructional methods that enhance upper level thinking skills in children.

EDUC 1995. Special Topics in Education  
1 Credit (1)  
Supervised study in a specific area of interest. Each course shall be designated by a qualifying subtitle. May be repeated up to 9 credits.  
Learning Outcomes  
1. Varies

EDUC 1998. Internship I  
3 Credits (3)  
Supervised experience in elementary education settings. May be repeated up to 3 credits.  
Learning Outcomes  
1. Varies
EDUC 2710. Pre-Teacher Preparation
3 Credits (3)
Assists students in developing the necessary competencies needed for acceptance to the Teacher Education Program. Course content includes basic skill development, test taking skills, and completion of teacher preparation packet. May be repeated up to 6 credits.

Learning Outcomes
1. Investigate the process and requirements of the Teacher Education Program Read critically about teacher’s experiences and write brief reactions Discuss philosophies of education and draft a written personal philosophy of education Discuss the nature of education for students with diverse languages, cultures and bilingualism Draft personal position statements concerning education for students with disabilities and diverse cultures

EDUC 2998. Internship II
3 Credits (3)
Supervised experience in junior high settings. May be repeated up to 3 credits.
Prerequisite: must be a co-op student.

Learning Outcomes
1. Varies

EDUC 3110V. Multicultural Issues in Society
3 Credits (3)
Conceptual manifestations of culture, race, ethnicity, class, gender, exceptionalities, language, and bilingualism within and across society. May be repeated up to 3 credits.

Learning Outcomes
1. Understand what is meant by “multicultural education” and respond to: TEP-EED majors. May be repeated up to 3 credits.

EDUC 3120. Multicultural Education
3 Credits (2+2P)
The conceptual manifestations of culture, race and ethnicity, class, gender, sexual orientation, exceptionalities, language, bilingualism, and global citizenship within the schooling process. May be repeated up to 3 credits.

Learning Outcomes
1. Understand what is meant by “multicultural education” and respond to: issues and challenges involved as learners, educators, and education stakeholders; Reflect on definitions of power and privilege, critique understandings of difference, and examine the multi-faceted ways in which multicultural education can be enacted in pedagogy, curriculum, and educational organizations; Examine the intersections between race, class, gender, sexuality, language, and citizenship status and try to assess their impact on teaching and learning; Evaluate their own identities, biases, and position in the curricula and schooling experience.

EDUC 3210. Multicultural Education
3 Credits (2+2P)
The conceptual manifestations of culture, race and ethnicity, class, gender, sexual orientation, exceptionalities, language, bilingualism, and global citizenship within the schooling process. May be repeated up to 3 credits.

Learning Outcomes
1. Understand what is meant by “multicultural education” and respond to: issues and challenges involved as learners, educators, and education stakeholders; Reflect on definitions of power and privilege, critique understandings of difference, and examine the multi-faceted ways in which multicultural education can be enacted in pedagogy, curriculum, and educational organizations; Examine the intersections between race, class, gender, sexuality, language, and citizenship status and try to assess their impact on teaching and learning; Evaluate their own identities, biases, and position in the curricula and schooling experience.

EDUC 3210. Sheltered English Instruction for the ESL Classroom
3 Credits (3)
Addresses the acquisition of English proficiency by speakers of other languages. May be repeated up to 3 credits.

EDUC 3220. Language, Literacy, and Culture in the ESL Classrooms
3 Credits (3)
Framework and strategies for developing the written abilities of second language learners. May be repeated up to 3 credits.

EDUC 3996. Special Topics in Education
1-3 Credits (1-3)
Offered under various subtitles in the Schedule of Classes. May be taken for a maximum of 3 cr per semester and a total of 6 credits overall. May be repeated up to 6 credits.

Learning Outcomes
1. Engage in the study of a specific education topic.

EDUC 3997. Secondary Field Experience
3 Credits (2+2P)
Develop professional skills, dispositions, and understanding of secondary bilingual youth, content, and pedagogy through discussion seminar and interactions with public education mentor teachers. Focused observations, study of classroom language and culture, introduction to lesson planning and student assessment. Requires 32 hours of practicum field experience. Taught with: BLED 3110. May be repeated up to 3 credits.

Learning Outcomes
1. Understand and implement effective practices in secondary education.

EDUC 4310. Methods of Teaching Elementary School Science
3 Credits (2+2P)
Methods and materials for teaching elementary school science. Includes components of lessons and the use of multimedia. Students must complete 9 hours of science from biology, chemistry, physics, and earth sciences, with no more than 3 hours from any one department. Restricted to: TEP-EED majors. May be repeated up to 3 credits.

Learning Outcomes
1. Create, teach, and assess research based, hands-on, elementary science lessons; Create, teach, and assess research based, hands-on, elementary science lessons that meet the diverse needs of all learners in all aspects of science instruction; Develop assessment tools to evaluate learner’s science knowledge; Identify and use appropriate NMSTEM Ready!State science standards for lesson planning; Integrate science with all subjects; Discuss the advantages and the importance of membership in national/international professional organizations(e.g. NSTA) as well as subscribing to professional journals; Identify science educational resources available using a variety of technological tools to enhance learning; Demonstrate competence and confidence in teaching science; Demonstrate basic classroom management skills.
EDUC 4320. Methods of Teaching Elementary School Mathematics
3 Credits (3)
Content, theories of cognition, and instructional approaches for the teaching of mathematics in the elementary grades.
Prerequisite: MATH 1134.
Learning Outcomes
1. Identify what makes a ‘good mathematical task’, and how a good task can support students’ learning; Understand how children make sense of key mathematics concepts; Understand how tools (including manipulatives, calculators, and other technology) assist children in their thinking and problem solving; Identify your role as a teacher in a math classroom; Practice teaching elementary mathematics activities using a constructivist approach and reflect upon your teaching; Adjust lessons and instruction based on students’ needs; Develop a stance of inquiry, explore habits of mind, examine and your own mathematical knowledge and develop the mathematical knowledge needed for effective teaching; Experience mathematics through thinking, reasoning, discourse/communicating, and developing math ideas with understanding so that as teachers you can facilitate learning as you work with students in this process; Begin to develop your knowledge and skills to effectively support ALL learners; in particular students with special needs and bilingual/English Language Learners in mathematics

EDUC 4330. Methods of Teaching Elementary School Social Studies
3 Credits (2+2P)
Focus on social studies curriculum and instruction including student-centered approaches, active learning, educational technology, non-contextual curriculum, integration, multicultural education, authentic assessment, and practical applications. May be repeated up to 3 credits.
Learning Outcomes
1. Understanding of equity and social justice through Social Studies education; Navigating the public-schools and how to integrate Social Studies lessons; Lesson planning and delivering Social Studies instruction; How to evaluate information found online for quality and truth; and Critiquing instructional materials and resources.

EDUC 4410. Teaching Science at the Middle and High School Level
3 Credits (2+2P)
Integrating content knowledge and pedagogy for the middle and high school teacher in science. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of science for students in grades 6-12. Practicum required. Taught with EDUC 5410. May be repeated up to 3 credits.
Learning Outcomes
1. Understand and implement effective practices for teaching and learning in the secondary science classroom.

EDUC 4420. Teaching Mathematics at the Middle and High School Level
3 Credits (2+2P)
Integrating content knowledge and pedagogy for the middle and high school teacher in mathematics. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of mathematics. Practicum required. Taught with EDUC 5420. May be repeated up to 3 credits.
Learning Outcomes
1. Understand and implement effective practices for teaching and learning in the secondary mathematics classroom.

EDUC 4430. Teaching Social Studies at the Middle and High School Level
3 Credits (2+2P)
Integrating content knowledge and pedagogy for the middle and high school teacher in social studies. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of social studies. Practicum required. Taught with EDUC 5430. May be repeated up to 3 credits.
Learning Outcomes
1. Understand and implement effective practices for teaching and learning in the secondary social studies classroom.

EDUC 4440. Teaching Language Arts at the Middle and High School Level
3 Credits (2+2P)
Implications of cognition and language development for appropriate secondary instructional practices. Focus on construction of meaning, student-centered response to literature, writing process, print and oral language development, based on socio-psycholinguistic research and theory. Practicum required. Taught with EDUC 5440. May be repeated up to 3 credits.
Learning Outcomes
1. Students will evaluate ELA and SS resources and synthesize important domains of education, including history, seminal texts, current events/trends, and formative learning theories such as global learning. Students will summarize classroom literacy, language, and culture of ELA/SS classrooms. Students will identify authentic assessment and effective instructional strategies and materials that can be used to deliver engaging lessons in ELA/SS reading, writing, and literature study. Students will justify their personal teaching philosophy in relation to the study of the history of ELA/SS education, literacy learning theories, teaching pedagogy, and field experiences. Students will assemble a professional, culminating reflective portfolio that demonstrates the ability to self-assess strengths and needs based on the NM-Teach standards.

EDUC 4450. Data Literacy and Assessment
3 Credits (3)
Methods for selecting, constructing, and using multiple methods of assessment to monitor learner progress and improve student learning. Students will learn to analyze and use classroom and standardized assessment data to understand patterns and gaps in learning, to guide planning and instruction, and employ technology to support practice. May be repeated up to 6 credits.
Learning Outcomes
1. Understand and implement effective data literacy and assessment procedures.

EDUC 4520. Contemporary Issues in Education
3 Credits (2+2P)
Discussion of contemporary issues including: classroom management, motivation, conferences, professional organizations, professional ethics, community influences, cultural pluralism, reform movements, instructional influences, and educational technology. Requires field experience component in a school or community setting. May be repeated up to 3 credits.
Learning Outcomes
1. Understand important issues and practices in contemporary education.
EDUC 4530. Science for Educators
3 Credits (3)
This course will focus on the exploration of key central science concepts and how to connect learners to resources, tools of inquiry, and collaborative problem solving related to authentic local and global issues in classroom, lab, and digital science environments. Topics include: The nature of science, Physical Science, Life Science, Earth and Space Science.
Learning Outcomes
1. Understand primary science content and knowledge for K-12 classrooms.

EDUC 4810. Elementary Student Teaching
9 Credits (9)
Synthesis of knowledge and skills appropriate to teaching in elementary schools. May be repeated up to 9 credits.
