Prerequisite(s): CHEM 314 and CHEM 431 or CHEM 433; or BCHE 395 or equivalent.

BCHE 545. Molecular and Biochemical Genetics
3 Credits (3)
An accelerated treatment of the molecular basis of gene expression. Discussion of chemical, enzymological, and genetic techniques of molecular biology. Same as BIOL 545.
Prerequisite: BCHE 542 or equivalent.

BCHE 546. Biochemistry II
3 Credits (3)
Intermediary metabolism: catabolic and anabolic pathways of carbohydrates, lipids, amino acids, and nucleic acids, including their regulation.
Prerequisite: BCHE 542 or BCHE 395 with consent of instructor.

BCHE 590. Discussions in Biochemistry
1 Credit (1)
Current research problems in biochemistry. May be repeated for a maximum of 6 credits. Graded: S/U Grading (S/U, Audit).

BCHE 598. Special Research Programs
1-3 Credits
May be repeated for a maximum of 6 credits. Same as CHEM 598. Graded S/U.

BCHE 599. Master's Thesis
15 Credits
May be repeated for a maximum of 6 credits. Same as CHEM 599.

BCHE 600. Research
1-15 Credits
May be repeated for a maximum of 20 credits. PR/U grading. Same as CHEM 600.

BCHE 647. Physical Biochemistry
3 Credits (3)
Fundamental applications of physical chemistry to the investigation of biological metabolites and biological macromolecules, including proteins, oligo-nucleotides, and molecular arrays with an emphasis on understanding biological functions based on chemical structures. Taught with BCHE 451.
Prerequisite(s): ‘C’ or better in CHEM 431 or CHEM 433 or BCHE 542.

BCHE 649. Topics in Biochemistry
1-3 Credits
Selected topics of current interest designated by title and credit. May be repeated for a maximum of 3 credits.

BCHE 650. Advanced Seminar
1 Credit (1)
Discussion of biochemical research in progress that relates to a doctoral candidate’s thesis research. Intended for students who have earned a master’s degree or the equivalent and has made significant research progress for preparation of the doctoral dissertation. May be repeated for a maximum of 3 credits.

BCHE 700. Doctoral Dissertation
20 Credits
May be repeated for a maximum of 20 credits. Graded PR/U. Same as CHEM 700.

Chemistry Courses
CHEM 1111. Basic Chemistry
3 Credits (3)
For students whose preparatory science or math training has been deficient. Does not meet the chemistry requirement in any curriculum.
Prerequisite: Enhanced ACT composite score of at least 18 or a grade of C- or better in CCDM 114 N.
Learning Outcomes
1. The goals and objectives for CHEM 1111 are to equip students with the necessary problem solving skills to be successful in CHEM 1215G/1225G
CHEM 1120G. Introduction to Chemistry Lecture and Laboratory (non majors)
4 Credits (3+3P)
This course covers qualitative and quantitative areas of non-organic general chemistry for non-science majors and some health professions. Students will learn and apply principles pertaining, but not limited to, atomic and molecular structure, the periodic table, acids and bases, mass relationships, and solutions. The laboratory component introduces students to techniques for obtaining and analyzing experimental observations pertaining to chemistry using diverse methods and equipment.
Prerequisite: CCDM 114N or A S 103 or MATH 1215 or higher.
Learning Outcomes
1. (Lecture) Use the different systems of measurements and perform conversions within the same system of measurement and between different systems of measurements
2. (Lecture) Identify elements from their name or symbol, use the periodic table to describe reactivity patterns of elements and to predict compound formation.
3. (Lecture) Describe the basic structure of an atom using subatomic particles, and apply these concepts to nuclear reactions.
4. (Lecture) Describe ion formation and the difference between covalent and ionic compounds. Name and write formulas for ionic and simple molecular compounds.
5. (Lecture) Write and balance chemical reactions. Use balanced reactions in stoichiometric calculations.
6. (Lecture) Describe the differences between the solid, liquid and gas phases. Use the gas laws in calculations, and apply these laws to everyday situations.
7. (Lecture) Explain different types of energy, and how energy is released or absorbed in a reaction
8. (Lecture) Describe acid and base behavior.
9. (Lecture) Explain the intermolecular attractive forces that determine physical properties; apply this knowledge to qualitatively evaluate these forces and predict the physical properties that result.
10. (Lecture) Explain the intermolecular attractive forces that determine physical properties; apply this knowledge to qualitatively evaluate these forces and predict the physical properties that result
11. (Laboratory) Practice concepts associated with laboratory safety, including the possible consequences of not adhering to appropriate safety guidelines.
12. (Laboratory) Demonstrate the computational skills needed to perform appropriate laboratory related calculations to include, but not be limited to determining the number of significant figures in numerical value, solving problems using values represented in exponential notation, solving dimensional analysis problems, and manipulating mathematical formulas as needed to determine the value of a variable.
13. (Laboratory) Perform laboratory observations (both qualitative and quantitative) using sensory experience and appropriate measurement instrumentation (both analog and digital).
14. (Laboratory) Record quantitatively measured values to the correct number of significant figures and assign the correct units.
15. (Laboratory) Master basic laboratory techniques including, but not limited to weighing samples (liquid and solid), determining sample volumes, measuring the temperature of samples, heating and cooling a sample or reaction mixture, decantation, filtration, and titration.
16. (Laboratory) Draw appropriate conclusions based on data and analyses.
17. 1Present experimental results in laboratory reports of appropriate length, style and depth, or through other modes as required.
18. 1Determine chemical formulas and classify different types of
CHEM 1121. General Supplemental Instruction I
1 Credit (1)
Collaborative workshop for students in General Chemistry I. Course does not count toward departmental degree requirements. May be repeated for a maximum of 2 credits.
Corequisite(s): CHEM 1215G.
CHEM 1122. General Supplemental Instruction II
1 Credit (1)
Collaborative workshop for students in General Chemistry II. Course does not count toward departmental degree requirements. May be repeated for a maximum of 2 credits.
Corequisite(s): CHEM 1225G.
CHEM 1123. Principles of Supplemental Instruction III
1 Credit (1)
Collaborative workshop for students in CHEM 1120G, Principles and Applications of Chemistry. Course does not count toward departmental degree requirements. May be repeated for maximum of 2 credits.
Corequisite(s): CHEM 1120G.
CHEM 1215G. General Chemistry I Lecture and Laboratory for STEM Majors
4 Credits (3+3P)
This course covers descriptive and theoretical chemistry.
Prerequisite: (1) grade of C- or better in MATH 1215 or higher, or a Mathematics Placement Exam Score adequate to enroll in mathematics courses beyond MATH 1215.
Learning Outcomes
1. Use dimensional analysis, the SI system of units and appropriate significant figures to solve quantitative calculations in science. Understand the differences between physical and chemical changes to matter. Classify types of matter. Understand the scientific method in the context of scientific discoveries. Explain the structure of atoms, isotopes and ions in terms of subatomic particles. Analyze how periodic properties (e.g. electronegativity, atomic and ionic radii, ionization energy, electron affinity, metallic character) and reactivity of elements results from electron configurations of atoms. Understand the creation of different types of compounds (ionic and molecular), comparing and contrasting their structures, naming schemes and formulas. Apply knowledge of electronic structure to determine molecular spatial arrangement and polarity. Understand bulk pure substances, their properties and their states of matter by understanding and identifying intermolecular forces. Apply kinetic molecular theory to relate atomic level behavior to macroscopic properties. Introduce the mole and apply the mole concept to amounts on a macroscopic and a microscopic level. Understand mixtures, solubility by considering intermolecular forces and expressing concentration in molarity. Identify different reaction types. Apply the law of conservation of mass to reactions. Perform stoichiometry on balanced reactions. Laboratory Student Learning Outcomes Demonstrate and apply concepts associated with laboratory safety, including the possible consequences of not adhering to appropriate safety guidelines. Demonstrate the computational skills needed to perform appropriate laboratory related calculations to include, but not be limited to determining the number of significant figures in numerical value with the correct units, solving problems using values represented in exponential notation, solving dimensional analysis problems, and manipulating mathematical formulas as needed to determine the value of a variable. Perform laboratory observations (both qualitative and quantitative) using sensory experience and appropriate measurement instrumentation (both analog and digital). Prepare solutions with an acceptable accuracy to a known concentration using appropriate glassware. Master basic laboratory techniques including, but not limited to weighing samples (liquid and solid), determining sample volumes, measuring the temperature of samples, heating and cooling a sample or reaction mixture, decantation, filtration, and titration. Draw conclusions based on data and analyses from laboratory experiments. Relate laboratory experimental observations, operations, calculations, and findings to theoretical concepts presented in the complementary lecture course.

CheM 1216. General Chemistry I Lecture and Laboratory for CHEM Majors
4 Credits (3+3P)
As the first of a two-semester sequence, this course teaches fundamental concepts in chemistry, including the electronic structure of atoms, chemical periodicity, nature of chemical bonds, molecular structure, the three phases of matter, etc. Designed for majors in chemical and other physical sciences, including engineering. May be appropriate for the life science major. It is assumed that the students are familiar with college algebra, chemical nomenclature, stoichiometry, and scientific measurements. The laboratory component is designed to complement the theory and concepts presented in lecture, and will introduce students to techniques for obtaining and analyzing experimental observations pertaining to chemistry using diverse methods and equipment.
Prerequisite(s): Eligible to take MATH 1250G and an ACT composite score of 22 or higher.
Learning Outcomes
1. Apply the mole concept to amounts at a microscopic level and use this to perform stoichiometric calculations for reactions in solution, gases and thermochemistry. Calculate solution concentrations in various units. Apply the gas laws and kinetic molecular theory to relate atomic level behavior to macroscopic properties. Explain the electronic structure of atoms, isotopes and ions in terms of its subatomic particles. Analyze how periodic properties (e.g. electronegativity, atomic and ionic radii, ionization energy, electron affinity, metallic character) and reactivity of elements results from electronic configurations of atoms. Understand the nature of chemical bonds (ionic and covalent). Apply knowledge of electronic structure to determine molecular structure and polarity. Understand the formation of different phases of matter and the underlying fundamental intermolecular interactions. Describe physical states and changes, and distinguish these from chemical changes. Describe the energy conversions that occur in chemical reactions and state changes, relating heat of reaction to thermodynamic properties such as enthalpy and internal energy; apply these principles to measure and calculate energy changes in reaction. 1 Apply principles of general chemistry to specific real-world problems in environment, engineering and health-related fields.
CHEM 1225G. General Chemistry II Lecture and Laboratory for STEM Majors
4 Credits (3+3P)
This course is intended to serve as a continuation of general chemistry principles for students enrolled in science, engineering, and certain preprofessional programs. The course includes, but is not limited to a theoretical and quantitative coverage of solutions and their properties, kinetics, chemical equilibrium, acids and bases, entropy and free energy, electrochemistry, and nuclear chemistry. Additional topics may include (as time permits) organic, polymer, atmospheric, and biochemistry. The laboratory component is designed to complement the theory and concepts presented in lecture, and will introduce students to techniques for obtaining and analyzing experimental observations pertaining to chemistry using diverse methods and equipment.
Prerequisite(s): C- or better in CHEM 1215G.
Learning Outcomes
1. Explain the intermolecular attractive forces that determine physical properties and phase transitions, and apply this knowledge to qualitatively evaluate these forces from structure and to predict the physical properties that result. Calculate solution concentrations in various units, explain the effects of temperature, pressure and structure on solubility, and describe the colligative properties of solutions, and determine solution concentrations using colligative property values and vice versa. Describe the dynamic nature of chemical equilibrium, and apply LeChatelier’s Principle to predict the effect of concentration, pressure and temperature changes on equilibrium mixtures as well as describe the equilibrium constant and use it to determine whether equilibrium has been established, and calculate equilibrium constants from equilibrium concentrations and vice versa. Describe the different models of acids and base behavior and the molecular basis for acid strength, as well as apply equilibrium principles to aqueous solutions, including acid/base and solubility reactions, and calculate pH and species concentrations in buffered and unbuffered solutions. Explain titration curves as well as calculate concentrations of reactants. Explain and calculate the thermodynamic functions, enthalpy, entropy and Gibbs free energy, for a chemical system, and relate these functions to equilibrium constants Student Learning Outcomes – Laboratory Demonstrate and apply concepts associated with laboratory safety, including the possible consequences of not adhering to appropriate safety guidelines. Demonstrate the computational skills needed to perform appropriate laboratory related calculations to include, but not be limited to determining the number of significant figures in numerical value with the correct units, solving problems using values represented in exponential notation, solving dimensional analysis problems, and manipulating mathematical formulas as needed to determine the value of a variable. Perform laboratory observations (both qualitative and quantitative) using sensory experience and appropriate measurement instrumentation (both analog and digital). Prepare solutions with an acceptable accuracy to a known concentration using appropriate glassware. Perform basic laboratory operations related to, but not limited to, colligative properties of solutions, chemical equilibria, acid/base titrations, electrochemistry. Draw conclusions based on data and analyses from laboratory experiments. Relate laboratory experimental observations, operations, calculations, and findings to theoretical concepts presented in the complementary lecture course.
CHEM 1226. General Chemistry II Lecture and Laboratory for CHEM Majors
4 Credits (3+3P)
As the second of a two-semester sequence, this course teaches fundamental concepts in chemistry, including solutions, equilibria, electrochemistry, thermodynamics and kinetics. Designed for majors in chemical and other physical sciences, including engineering. May be appropriate for the life science major. It is assumed that the students are familiar with college algebra, chemical nomenclature, stoichiometry, and scientific measurements. The laboratory component is designed to complement the theory and concepts presented in lecture, and will introduce students to techniques for obtaining and analyzing experimental observations pertaining to chemistry using diverse methods and equipment.
Prerequisite(s): C- or better in CHEM 1216.
Learning Outcomes
1. Describe the colligative properties of solutions and explain them using intermolecular forces. Determine solution concentrations using colligative property values and vice versa. Explain rates of reactions, rate laws, and half-life; determine the rate, rate law and rate constant of a reaction and calculate concentration as a function of time and vice versa. Understand the principle of catalysis. Explain the collision model of reaction dynamics, including activation energy, catalysts and temperature; Derive a rate law from a reaction mechanism and evaluate the consistency of a mechanism with a given rate law. Describe the dynamic nature of chemical equilibrium and its relation to reaction rates; apply Le Chatelier’s Principle to predict the effect of concentration, pressure and temperature changes on equilibrium mixtures. Describe the equilibrium constant and use it to determine whether equilibrium has been established; calculate equilibrium constants from equilibrium concentrations (including pressures) and vice versa. Describe the different models of acids and base behavior, and the molecular basis for acid strength.
CHEM 2111. Explorations in Chemistry
1 Credit (1)
The major intent of this course is to deepen your interest in chemistry and make you aware of research and career opportunities in the field. During this semester we hope to discuss both old and new developments in chemistry that impact our lives. We also want to build our communication skills that are so necessary in our profession. Graded S/U.
CHEM 2115. Survey of Organic Chemistry and Laboratory
4 Credits (3+3P)
This course is a one-semester survey of organic and biological chemicals. Students will be introduced to nomenclature, molecular structure, properties, and reactions of hydrocarbons, alcohols, carbonyls, organic acids and bases, carbohydrates, lipids, and proteins. The handling of organic chemicals, simple organic reactions, tests for functional groups, and synthesis will be learned in the laboratory component of this course.
Prerequisite: C- or better in CHEM 1225G or CHEM 1226.
Learning Outcomes
1. Identify common organic functional groups. Translate between the IUPAC names and structures of simple organic molecules.
2. Predict the products of certain organic chemical reactions from reagents and conditions presented. Predict physical and chemical behavior of organic molecules based on structure. Synthesize several classes of organic compounds in the laboratory that were previously studied in the lecture component of this course. Recognize and name the four basic bioorganic units and certain of their derivatives and macromolecules. Construct 3 dimensional models of organic compounds. Understand and apply safety principles associated with Organic Chemistry laboratory operations and activities. Present experimental results in laboratory reports of appropriate length, style and depth, or through other modes as required.
3. Draw/recognize stereochemistry and explain its relevance to bioorganic molecules.

CHEM 2120. Integrated Organic Chemistry and Biochemistry
3 Credits (3)
This course is a one-semester introduction to Organic Chemistry and Biochemistry designed for students in health and environmental occupations. The course surveys organic compounds in terms of structure, physical, and chemical properties, followed by coverage of the chemistry of specific classes of organic compounds in the biological environment. Students will apply course concepts to everyday organic and biochemical chemistry problems in preparation for careers in health and environmental fields.
Prerequisite: CHEM 1120G or CHEM 1215G.
Learning Outcomes
1. Identify and name basic organic compounds.
2. Construct/draw organic compounds from the names.
3. Predict the products of certain organic chemical reactions from reagents and conditions presented.
4. Recognize and name the four basic bioorganic units and certain of their derivatives and macromolecules.
5. Compare and contrast the function and location of the four bioorganic units and their macromolecules and cofactors.
6. Draw/recognize stereochemistry and explain its relevance to bioorganic molecules.
7. Discuss the pathways and functions of some of the cellular metabolic processes.
8. Recognize and describe metabolic cellular processes and macromolecular structure with respect to health and/or disease state.

CHEM 2226. General Chemistry III
3 Credits (2+3P)
Quantitative aspects of general chemistry: solid state structure, equilibrium, thermodynamics, and kinetics. Required of chemical science majors who have taken CHEM 1215G/1225G.
Prerequisite: CHEM 1225G.
Learning Outcomes
1. Describe the process of scientific inquiry
2. Solve problems scientifically
3. Communicate scientific information
4. Apply quantitative analysis to scientific problems
5. Apply scientific thinking to real world problems
CHEM 314. Organic Chemistry II
3 Credits (3)
An in-depth focus on reactions and mechanisms as they relate to organometallic compounds, alcohols, ethers, ketones, aldehydes, carboxylic acid derivatives, and amines. May be repeated up to 3 credits.
Prerequisite(s): C- or better in CHEM 313.

Learning Outcomes
1. Identify several new functional groups and other key features of organic compounds Interpret 1H/13C NMR, IR, UV-Vis, and Mass spectrometry data and have the ability to correlate structural elements with spectral features Understand the chemical reactivity and reaction mechanisms relating, but not limited, to organometallic compounds, alcohols, ethers, ketones, aldehydes, carboxylic acids, and amines. Mechanistic highlights include: etherification, acetal formation/removal, alcohol oxidation, carbonyl addition reactions, enolate (and related) reactions, formation of carboxylic acid derivatives, and nucleophilic acyl substitution processes. Apply these mechanistic and reactivity considerations to these same groups when they appear as substructures in larger biologically-important molecules (e.g. carbohydrates, amino acids, and lipids). Design concise, three to five step syntheses of simple organic molecules using reactions learned in both CHEM 313 and 314 Qualitatively assess stability, solubility properties, chemical reactivity, spectral properties, and potential reactions that would lead to preparation, simply via visual inspection of structure.

CHEM 315. Organic Chemistry Laboratory
2 Credits (6P)
Techniques, preparative and analytical methods in organic chemistry. May be repeated up to 2 credits.
Prerequisite(s)/Corequisite(s): CHEM 314. Prerequisite(s): C- or better in CHEM 313 or consent of instructor.

CHEM 351. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.
Prerequisite: consent of instructor.

CHEM 356. Descriptive Inorganic Chemistry
3 Credits (3)
Occurrence and properties of the elements and the chemistry of their compounds.
Prerequisite(s): (CHEM 1225G or CHEM 1226) and (CHEM 2115 or CHEM 313).

CHEM 357. Synthetic Inorganic Laboratory
2 Credits (6P)
Explores synthesis and analysis of main group and transition metal inorganic compounds. Inorganic laboratory and spectroscopic techniques will be used.
Prerequisites: CHEM 356.

CHEM 371. Analytical Chemistry
4 Credits (2+6P)
The fundamentals of quantitative chemical analysis.
Prerequisite(s): C- or better in CHEM 1225G or CHEM 1226.

CHEM 422. Environmental Chemistry
3 Credits (3)
Chemistry of organic and metal ion pollutants in the environment and principles important to their remediation including bioremediation. Restricted to: Main campus only. Crosslisted with: ENVS 422
Prerequisite(s): CHEM 1225G and either CHEM 2115 or CHEM 313.

CHEM 424. Soil Chemistry
3 Credits (3)
Same as SOIL/GEOL 424.

CHEM 431. Physical Chemistry
3 Credits (3)
Principles that govern the physical and chemical behavior of matter. May not be counted toward Bachelor of Science degree in Chemistry.
Prerequisite(s): CHEM 1226 or CHEM 2226; MATH 1521G; PHYS 1240G or PHYS 2240G or PHYS 2140 or PHYS 1320G.

CHEM 431 H. Physical Chemistry Honors
3 Credits (3)
Same as CHEM 431. Additional work to be arranged.
Prerequisite(s): CHEM 1226 or CHEM 2226; MATH 1521G or MATH 1521H; PHYS 1240G or PHYS 2240G or PHYS 2140 or PHYS 1320G.

CHEM 433. Physical Chemistry I
3 Credits (3)
Laws and theories underlying chemical phenomena.
Prerequisite(s): CHEM 1226 or CHEM 2226; MATH 2140 or PHYS 1320G, or consent of instructor.

CHEM 435. Physical Chemistry Laboratory
2 Credits (6P)
Prerequisite: concurrent registration in CHEM 434.

CHEM 441. Advanced Research
1-3 Credits (3+9P)
Investigation of chemical problems and the development of special techniques. May be repeated for a maximum of 3 credits.
Prerequisites: consent of instructor, 16 credits of chemistry and 3.0 GPA in chemistry for nonmajors.

CHEM 443. Senior Seminar
1 Credit (1)
Discussions of current chemical research, impact of chemistry on society and/or ethics as applied to chemists. Each student will present a written and an oral report on an approved topic.
Prerequisite: CHEM 431 or CHEM 433.

CHEM 451. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.
Prerequisite: consent of instructor.

CHEM 455. Independent Studies
1-3 Credits
Independent studies directed by consulting faculty.
Prerequisite: consent of instructor.

CHEM 456. Inorganic Structure and Bonding
3 Credits (3)
Theoretical principles and a systematic study of the periodic table.
Prerequisite: CHEM 356 or CHEM 431 or CHEM 433.
CHEM 471. Instrumental Methods of Analysis  
4 Credits (3+3P)  
Analytical techniques, including optical and procedures.  
Prerequisites: CHEM 371 and either PHYS 1240G or PHYS 1320G.

CHEM 475. Central Concepts in Chemistry - Safety  
1 Credit (1)  
Students will obtain university safety training plus departmental-specific safety guidelines for the research laboratory.  
Learning Outcomes  
1. Students completing this course will be knowledgeable of all safety guidelines delineated by the University, College, and Department.  
2. When possible accident case-studies will be incorporated within the curriculum.

CHEM 476. Central Concepts in Chemistry - Research Ethics  
1 Credit (1)  
Students will complete Federal Agency (NSF, NIH, etc.) on-line training modules in responsible conduct in research and discuss relevant case-studies of research misconduct.  
Learning Outcomes  
1. Completion of this class will yield researchers fully aware of federal and professional guidelines regarding the ethical conduction and dissemination of data and conclusions.

CHEM 477. Central Concepts in Chemistry - Professional Development  
1 Credit (1)  
Students will receive basic instruction in research dissemination strategies (presentations) and career planning.

3 Credits (3)  
This course will provide the students with a detailed examination of several topics in chemical energetics. These topics include: (1) basic thermodynamics concepts, (2) statistical thermodynamics (3) chemical equilibria, and (4) intermolecular interactions.  
Learning Outcomes  
1. Students completing this course will gain an understanding of chemical thermodynamics and equilibria as they relate to all areas of chemistry.

CHEM 502. Central Concepts in Chemistry - Structure  
3 Credits (3)  
This course will provide the students with a detailed examination of several topics in chemical reactivity. These topics include: (1) principles of chemical bonding and (2) organic, inorganic and biochemical structure determination.  
Learning Outcomes  
1. Students completing this course will understand the fundamental components of molecular interactions and their impact on molecular structure and function in all areas of chemistry.  
2. In addition, they will learn the theory and practice of physical techniques used to determine molecular structure.

CHEM 503. Central Concepts in Chemistry - Dynamics  
3 Credits (3)  
This course will provide the students with a detailed examination of several topics in chemical reactivity. These topics include: (1) basic kinetic concepts, (2) fundamental gas phase kinetics (3) organic, inorganic and biochemical reaction mechanisms.  
Learning Outcomes  
1. Students who successfully complete this course will understand the fundamentals of chemical dynamics: from simple gas or solution phase reaction mechanisms to biomolecular interactions.

CHEM 504. Central Concepts in Chemistry - Measurements  
3 Credits (3)  
This course will provide the students with a detailed examination of several topics in chemical measurements. These topics include: (1) spectroscopic, electrochemical and chromatographic techniques, (2) statistical methods of measurement and validation relevant to biomolecules, synthetic polymers and mixtures.  
Learning Outcomes  
1. The collection of quantitative data is central to all subdisciplines of chemistry.  
2. Students completing this course will understand the basic principles of chemical measurements and the uncertainties inherently associated with those measurements.  
3. They will also gain knowledge of tools available to minimize those uncertainties in data interpretation.

CHEM 507. Chemistry of the Elements  
3 Credits (3)  
Discussion of the reactions and structures of inorganic compounds.

CHEM 510. Graduate Student Seminar  
1 Credit (1)  
Research seminar for graduate students in Chemistry. Enrollment required each semester for all graduate students. Masters or Doctoral candidates presenting a research seminar enroll for a letter grade. All other participating students enroll using the S/U grading option.  
Learning Outcomes  
1. Graduate students will gain experience organizing a research presentation. Graduate students will develop oral presentation skills.

CHEM 514. Organic Structure Determination  
3 Credits (3)  
Modern spectroscopic techniques for characterization of organic compounds.

CHEM 515. Modern Organic Chemistry  
3 Credits (3)  
Recent developments in synthesis and theoretical principles of organic chemistry.

CHEM 516. Physical Organic Chemistry  
3 Credits (3)  
Physical organic chemistry.
CHEM 520. Comprehensive Literature Review Seminar for Graduate Students
1 Credit (1)
Graduate student presents a literature review on an approved topic. The seminar presentation will include cover new developments of primary significance to the topic based on current research papers and culminate in a testable hypothesis. A passing grade allows the student to take the comprehensive exam.

Learning Outcomes
1. Student will prepare an abstract of their presentation understandable to a broad chemistry/biochemistry audience.
2. Student will demonstrate a reasonable understanding of every concept introduced.
3. Student will present a well-organized topic leading to a logical hypothesis.
4. Student will demonstrate the ability to develop a data-supported hypothesis.

CHEM 521. Chemical Instrumentation
3 Credits (2+3P)
Theory and application of electronic devices to chemical analysis.

CHEM 526. Advanced Analytical Chemistry
3 Credits (3)
Equilibria, and the theories of gravimetric, volumetric, and instrumental analysis.

CHEM 527. Separations
3 Credits (3)
Covers the fundamentals of separation methods and relationships to modern analytical techniques such as gas chromatography and liquid chromatography.

CHEM 529. Spectrochemical Analysis
3 Credits (3)
Fundamentals, instrumentation, and applications of spectrochemical analysis.

CHEM 537. Quantum Chemistry
3 Credits (3)
Fundamentals of quantum mechanics.
Prerequisite: consent of instructor.

CHEM 538. Chemical Kinetics
3 Credits (3)
Empirical analysis of rate measurements, collision theory, transition state theory, and chain reactions.

CHEM 598. Special Research Programs
1-3 Credits
Individual investigations, either analytical or experimental. Graded S/U.

CHEM 599. Master’s Thesis
15 Credits
Thesis preparation.

CHEM 600. Research
1-15 Credits
Course used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination.

CHEM 619. Topics in Organic Chemistry
1-3 Credits
Selected topics of current interest designated by subtitle.

CHEM 629. Advanced Topics in Analytical Chemistry
3 Credits (3)
Discussion of advanced topics in the field of analytical chemistry. May be repeated with different subtitles. Consent of instructor required.

CHEM 639. Topics in Physical Chemistry
1-3 Credits
Selected topics of current interest designated by subtitle.

CHEM 700. Doctoral Dissertation
17 Credits
Dissertation preparation.

Phone: (575) 646-2505
Email: chembche@nmsu.edu
Website: https://chemistry.nmsu.edu

Biochemistry - Bachelor of Science

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework. All departmental and nondepartmental requirements may not be taken S/U and must earn a C- or better final grade.

Prefix | Title | Credits
--- | --- | ---
**CHEM** | 313 | Organic Chemistry I
| 314 | Organic Chemistry II
| 315 | Organic Chemistry Laboratory
| 371 | Analytical Chemistry
| 140 | Introduction to Biochemistry

        - CSCI 1410G
        - CSCI 1411G

For more information, please contact the Chemistry Department at chembche@nmsu.edu or visit their website at https://chemistry.nmsu.edu.
BCHE 395 Biochemistry I 3
BCHE 396 Biochemistry II 3
BCHE 424 Experimental Biochemistry I 3
BCHE 425 Experimental Biochemistry II 3
BCHE 440 Biochemistry Seminar 1

Physical Chemistry Requirement, select one from the following: 6
CHEM 433 Physical Chemistry I
& CHEM 434 and Physical Chemistry II
CHEM 431 Physical Chemistry
& CHEM 456 and Inorganic Structure and Bonding
CHEM 431 Physical Chemistry
& CHEM 356 and Descriptive Inorganic Chemistry
CHEM 431 Physical Chemistry
& BCHE 432 and Physical Biochemistry

Elective requirement: select one from the following additional classes 3
not used to fulfill another departmental requirement:
BCHE 432 Physical Biochemistry
BCHE 451 Special Topics
CHEM 451 Special Topics (by petition only)

Non-Departmental Requirements (in addition to Gen.Ed/VWW)
AST 311 Statistical Applications 3
BIOL 2110G Principles of Biology: Cellular and Molecular Biology 4
& BIOL 2110L and Principles of Biology: Cellular and Molecular Biology Laboratory
BIOL 311 General Microbiology 3
BIOL 311 L General Microbiology Laboratory 2
BIOL 305 Principles of Genetics 3
or GENE 320 Hereditary and Population Genetics
BIOL 377 Cell Biology 3

Select one from the following: 3
PHYS 2110 Mechanics 5
PHYS 1230G Algebra-Based Physics I
PHYS 2230G General Physics for Life Science I
PHYS 1310G Calculus -Based Physics I

Select one from the following: 3
PHYS 2140 Electricity and Magnetism 6
PHYS 1240G Algebra-Based Physics II
PHYS 2240G General Physics for Life Science II
PHYS 1320G Calculus -Based Physics II

Select one from the following: 1
PHYS 2110L Experimental Mechanics 7
PHYS 1230L Algebra-Based Physics I Lab
PHYS 2230L Laboratory to General Physics for Life Science I
PHYS 1310L Calculus -Based Physics I Lab

Select one from the following: 1
PHYS 2140L Electricity & Magnetism Laboratory 7
PHYS 1240L Algebra-Based Physics II Lab
PHYS 2240L Laboratory to General Physics for Life Science II
PHYS 1320L Calculus -Based Physics II Lab

Second Language Requirement: (not required)

Electives, to bring the total credits to 120
Select sufficient electives to bring total credits to 120, including 48 upper division.

Total Credits 120

1 See the General Education (p. 88) section of the catalog for a full list of courses
2 MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G first.
3 CHEM 1216 General Chemistry I Lecture and Laboratory for CHEM Majors and CHEM 1226 General Chemistry II Lecture and Laboratory for CHEM Majors are recommended and are acceptable General Education substitutions for CHEM 1215G General Chemistry I Lecture and Laboratory for STEM Majors and CHEM 1225G General Chemistry II Lecture and Laboratory for STEM Majors but will need a degree audit exception that can be coordinated with your advisor.
4 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses
5 PHYS 2110 Mechanics is the recommended Physics I course for B.S. majors. PHYS 1230G Algebra-Based Physics I, PHYS 2230G General Physics for Life Science I, and PHYS 1310G Calculus -Based Physics I are acceptable and are recommended in the decreasing order listed.
6 PHYS 2140 Electricity and Magnetism is the recommended Physics II course for B.S. majors. PHYS 1240G Algebra-Based Physics II, PHYS 2240G General Physics for Life Science II, and PHYS 1240G Algebra-Based Physics II are acceptable and are recommended in the decreasing order listed. Students are highly cautioned to check prerequisites for the individual courses when schedule planning.
7 Students are strongly encouraged to verify prerequisite/corequisite requirements for Physics labs when schedule planning.

Second Language Requirement
For the Bachelor of Science with a major in Biochemistry there is no second language requirement for the degree.

A Suggested Plan of Study for Students
This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year
Semester 1 Credits
ENGL 1110G Composition I 1 4
MATH 1511G Calculus and Analytic Geometry I 1 4
CHEM 1216 General Chemistry I Lecture and Laboratory for CHEM Majors 4
BCHE 140 Introduction to Biochemistry 1

Area IV: Social and Behavioral Science Course 2 3

Credits 16
Semester 2

- MATH 1521G or MATH 1521H: Calculus and Analytic Geometry II Honors
- BIOL 2110G & BIOL 2110L: Principles of Biology: Cellular and Molecular Biology
- CHEM 1226: General Chemistry II Lecture and Laboratory for CHEM Majors
- Elective Course

Area V: Humanities Course

Second Year

Semester 1

- ENGL 2215G: Professional & Technical Communication
- BIOL 305: Principles of Genetics
- CHEM 313: Organic Chemistry I
- Choose from one of the following:
  - PHYS 2110 & PHYS 2110L: Mechanics and Experimental Mechanics
  - PHYS 1240L, PHYS 1240G, & PHYS 1240L: Algebra-Based Physics I and Algebra-Based Physics I Lab
  - PHYS 2240G & PHYS 2240L: General Physics for Life Science I
  - PHYS 1310G & PHYS 1310L: Calculus-Based Physics I and Calculus-Based Physics I Lab

Area VI: Creative and Fine Arts Course

Semester 2

- COMM 1115G: Introduction to Communication
- CHEM 314 & CHEM 315: Organic Chemistry II and Organic Chemistry Laboratory
- Choose from one of the following:
  - PHYS 2140 & PHYS 2140L: Electricity and Magnetism and Electricity & Magnetism Laboratory
  - PHYS 1240G & PHYS 1240L: Algebra-Based Physics II and Algebra-Based Physics II Lab
  - PHYS 2240G & PHYS 2240L: General Physics for Life Science II and Laboratory to General Physics for Life Science I
  - PHYS 1320G & PHYS 1320L: Calculus-Based Physics II and Calculus-Based Physics II Lab

Elective Course

Third Year

Semester 1

- A ST 311: Statistical Applications
- BIOL 377: Cell Biology
- BCHE 395: Biochemistry
- CHEM 371: Analytical Chemistry
- Elective Course

Semester 2

- BCHE 396: Biochemistry II
- BIOL 311 & BIOL 311 L: General Microbiology and General Microbiology Laboratory
- VWW: Viewing a Wider World Course

Fourth Year

Semester 1

- BCHE 440: Biochemistry Seminar
- BCHE 424: Experimental Biochemistry I
- Elective Course

Semester 2

- VWW: Viewing a Wider World Course
- BCHE 425: Experimental Biochemistry II
- BCHE 432: Physical Biochemistry
- BCHE 451: Special Topics

Elective Course

Credits

Total Credits

1 These courses may have prerequisites and/or co-requisites, and it is the students responsibility for checking and fulfilling all those requirements.
2 See the General Education (p. 88) section of the catalog for a full list of courses.
3 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.
4 The BCHE 432 Physical Biochemistry is highly recommended for all Biochemistry majors. This course can be used to satisfy the physical chemistry requirement after taking CHEM 431 Physical Chemistry requirement. If another course is used (e.g. CHEM 356 Descriptive Inorganic Chemistry) then BCHE 432 Physical Biochemistry should be used to satisfy the Biochemistry Elective requirement.

Chemistry - Bachelor of Arts

The Bachelor of Arts curriculum is designed to provide flexibility with less depth in chemistry, physics, and mathematics. The program may be used by students planning extensive study in other areas and requires emphasis in a second field of study. Students who complete a Bachelor of Science in Biochemistry and wish to complete the Bachelor of Arts in Chemistry must complete 3 additional upper division chemistry credits that are not counted in the Bachelor of Science in Biochemistry. All departmental and nondepartmental requirements may not be taken S/U and must earn a C- or better final grade.
## Requirements

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

**Total Credits:** 120

1. See the General Education (p. 88) section of the catalog for a full list of courses
2. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G first.
3. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses
4. CHEM 1216 General Chemistry I Lecture and Laboratory for CHEM Majors and CHEM 1226 General Chemistry II Lecture and Laboratory for CHEM Majors are recommended and are acceptable General Education substitutions for CHEM 1215G General Chemistry I Lecture and Laboratory for STEM Majors and CHEM 1225G General Chemistry II Lecture and Laboratory for STEM Majors but will need a degree audit exception that can be coordinated with your advisor.
5. BCHE 341 Survey of Biochemistry or BCHE 395 Biochemistry I can be used as Chemistry elective
6. PHYS 2110 Mechanics is the Physics I course recommended for all Chemistry majors. PHYS 1230G Algebra-Based Physics I, PHYS 2230G General Physics for Life Science I, and PHYS 1310G Calculus-Based Physics I are acceptable and are recommended in the decreasing order listed.
7. PHYS 2140 Electricity and Magnetism is the Physics II course recommended for all Chemistry majors. PHYS 1240G Algebra-Based Physics II, PHYS 2240G General Physics for Life Science II, and PHYS 1240G Algebra-Based Physics II are acceptable and are recommended in the decreasing order listed. Students are highly cautioned to check prerequisites for the individual courses when schedule planning.
8. Students are strongly encouraged to check prerequisite/corequisite requirements for Physics labs when schedule planning.
The Emphasis area is composed of courses outside either chemistry or biochemistry degrees (non-departmental and departmental requirements cannot be used for emphasis area credit). These courses must have a common theme, which complement (whenever possible) principles learned on either chemistry or biochemistry. For example, astronomy and physics courses could be taken as an emphasis area in astrophysics. See a faculty mentor for approval of the courses to be used for an emphasis area. A minimum of 18 credits can be used as an Emphasis area (which could constitute a minor in some cases), but at least nine credits must be upper - division.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Second Language Requirement
For the Bachelor of Arts with a major in Chemistry there is no second language requirement for the degree.

A Suggested Plan of Study for Students
This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. | MATH 392 | Introduction to Ordinary Differential Equations ¹ | |
| C S 172 | Computer Science I ¹ | |

| Credits | 13-14 |

| Total Credits | 120-122 |

These courses may have prerequisites and/or co-requisites, and it is the students responsibility for checking and fulfilling all those requirements.

See the General Education (p. 88) section of the catalog for a full list of courses.

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

Students who need to enroll in 15 credits a semester for Financial Aid purposes will need to enroll in additional elective credits to meet that requirement.

Biochemistry - Undergraduate Minor

The courses of the Biochemistry minor represent core biochemical content. A student cannot earn a bachelor's degree in Biochemistry or Chemistry and also earn a minor in Biochemistry. A student cannot earn minors in both Biochemistry and Chemistry.
The courses of the Chemistry minor represent core chemical content. A student cannot earn a bachelor's degree in Chemistry or Biochemistry and also earn a minor in Chemistry. A student cannot earn minors in both Biochemistry and Chemistry.

**Chemistry - Undergraduate Minor**

The required courses for the Chemistry minor are as follows:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1215G</td>
<td>General Chemistry I Lecture and Laboratory for STEM Majors</td>
<td>4</td>
</tr>
<tr>
<td>or CHEM 1216</td>
<td>General Chemistry I Lecture and Laboratory for CHEM Majors</td>
<td></td>
</tr>
<tr>
<td>CHEM 1225G</td>
<td>General Chemistry II Lecture and Laboratory for STEM Majors</td>
<td>4</td>
</tr>
<tr>
<td>or CHEM 1226</td>
<td>General Chemistry II Lecture and Laboratory for CHEM Majors</td>
<td></td>
</tr>
</tbody>
</table>

Select one from the following:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 313</td>
<td>Organic Chemistry I</td>
<td>3</td>
</tr>
<tr>
<td>&amp; CHEM 314</td>
<td>Organic Chemistry II</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 2115</td>
<td>Survey of Organic Chemistry and Laboratory</td>
<td></td>
</tr>
</tbody>
</table>

**Additional Courses**

Select sufficient additional upper division CHEM/BCHE credits to bring total credits to at least 18

**Total Credits** 18-20

The following courses do not count towards a minor in Chemistry:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1111</td>
<td>Basic Chemistry</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 1120G</td>
<td>Introduction to Chemistry Lecture and Laboratory (non majors)</td>
<td>4</td>
</tr>
<tr>
<td>CHEM 2226</td>
<td>General Chemistry III</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 2991</td>
<td>Introduction to Research</td>
<td>1-3</td>
</tr>
<tr>
<td>CHEM 351</td>
<td>Special Topics</td>
<td>1-3</td>
</tr>
<tr>
<td>CHEM 443</td>
<td>Senior Seminar</td>
<td>1</td>
</tr>
</tbody>
</table>

Chemical and Supplemental Instruction (SI) courses are not accepted.

**Courses provisionally allowed:**

<table>

<tr>
<td>BCHE 441</td>
<td>Advanced Research (3 credits maximum)</td>
<td>1-3</td>
</tr>
</tbody>
</table>

**Chemistry - Master of Science**

The Master of Science in Chemistry is offered in the major emphasis areas of analytical, inorganic, organic, and physical chemistry, and biochemistry. The M.S. degree can be obtained through either a thesis option or a non-thesis option. Both options require at least 30 credits of course work. The thesis option program is designed to teach students modern approaches to chemistry and biochemistry (courses), experimental methods to problem-solving (research), and communication skills in the discipline (seminars and colloquia). All M.S. candidates are required to complete the courses below, pass a qualifying exam at the end of the first year, and pass a final comprehensive examination. Thesis-option students additionally complete a written thesis.

**Required Courses**

</table>

**Total Credits** 30-51

1. Discussions in Chemistry participation is required in BCHE 590
2. Seminar presentation is required in at least one of following courses: CHEM 510 Graduate Student Seminar, CHEM 520 Comprehensive Literature Review Seminar for Graduate Students, or BCHE 540 Seminar in Biochemistry.
Additional courses in subsequent years are chosen based on major emphasis area, through consultation with the thesis committee or an advisor.

Require only for the thesis option: CHEM 599 Master’s Thesis or BCHE 599 Master’s Thesis

Information about additional course requirements: Through consultation with the thesis committee (thesis option) or an advisor (non-thesis option), students must complete 3-9 additional course credits. These courses can include BCHE 542 Biochemistry I, BCHE 545 Molecular and Biochemical Genetics, BCHE 546 Biochemistry II, BCHE 647 Physical Biochemistry or BCHE 649 Topics in Biochemistry (Biochemistry); CHEM 507 Chemistry of the Elements (Inorganic); CHEM 514 Organic Structure Determination, CHEM 515 Modern Organic Chemistry, CHEM 516 Physical Organic Chemistry, or CHEM 619 Topics in Organic Chemistry (Organic); CHEM 521 Chemical Instrumentation CHEM 526 Advanced Analytical Chemistry, CHEM 527 Separations, CHEM 529 Spectrochemical Analysis, or CHEM 629 Advanced Topics in Analytical Chemistry (Analytical); and, CHEM 537 Quantum Chemistry, CHEM 538 Chemical Kinetics, or CHEM 639 Topics in Physical Chemistry (Physical).

Chemistry - Doctor of Philosophy

The Ph.D. in chemistry is offered in the major emphasis areas of analytical, inorganic, organic, and physical chemistry and biochemistry. The graduate program is designed to teach students modern approaches to chemistry and biochemistry (courses), experimental methods to problem-solving (research), and communication skills in the discipline (seminars and colloquia). Ph.D. candidates are required to complete the courses below, pass a qualifying exam at the end of the first year, pass both a written and oral comprehensive exam before the fourth year, and prepare a written thesis and pass a final oral examination.

Beginning in the second semester, all Ph.D. students must enroll in 1 credit of CHEM 510 Graduate Student Seminar, attending each semester. Students are required to prepare a formal presentation of their research work no fewer than twice during graduate study, typically in the 3rd and 4th years. Satisfactory performance in this course also requires attendance of all departmental seminars.

At least 18 credits must be either CHEM 700 Doctoral Dissertation or BCHE 700 Doctoral Dissertation. 700-level research credits are taken after the completion of the comprehensive exam. Remaining credits can be CHEM 600 Research or BCHE 600 Research.

Information about additional course requirements: Through consultation with the thesis committee, students must complete 6-12 additional course credits. These courses can include BCHE 542 Biochemistry I, BCHE 545 Molecular and Biochemical Genetics, BCHE 546 Biochemistry II, BCHE 647 Physical Biochemistry or BCHE 649 Topics in Biochemistry (Biochemistry); CHEM 507 Chemistry of the Elements (Inorganic); CHEM 514 Organic Structure Determination, CHEM 515 Modern Organic Chemistry, CHEM 516 Physical Organic Chemistry, or CHEM 619 Topics in Organic Chemistry (Organic); CHEM 521 Chemical Instrumentation CHEM 526 Advanced Analytical Chemistry, CHEM 527 Separations, CHEM 529 Spectrochemical Analysis, or CHEM 629 Advanced Topics in Analytical Chemistry (Analytical); and, CHEM 537 Quantum Chemistry, CHEM 538 Chemical Kinetics, or CHEM 639 Topics in Physical Chemistry (Physical).

Communication Studies

Undergraduate Program Information

Communication Studies focuses on the complex role that human communication plays in everyday life.

The undergraduate program in Communication Studies is designed to enhance students’ interpersonal skills, presentation skills, and critical thinking skills. The successful graduate should be able to work effectively with people, assimilate, organize and analyze information, solve problems, make effective presentations and show potential for leadership. The program prepares students for careers in several professions, such as training and development, public relations, law, advertising and sales, government service, mediation, customer relations, human resources, international service, fundraising, and the ministry.

Graduate Program Information

The Master of Arts in Communication Studies provides students with a social scientific approach to the study of human interaction, using
quantitative and qualitative methods. Our curriculum is designed to explore how communication takes place interpersonally, within organizations, within our political system, and between and within cultures. Students take courses in interpersonal communication, organizational communication, political communication, and/or cultural communication. All graduate students take courses in communication theory and research methods. In addition, students can take courses in topic areas such as conflict management, small group communication, persuasion, and nonverbal communication.

The program offers a wide variety of courses allowing students an opportunity to select topics pursuant to their special interests. In addition to courses, students have the opportunity to obtain practical experience by participating in professional activities offered by the department; for example, graduate teaching assistantships, research, and colloquia.

**Master's Accelerated Program Information**

The Master's Accelerated Program is an opportunity for qualified, advanced undergraduate students to begin graduate study while still enrolled as an undergraduate student. Students accepted into the program will be able to take up to 12 credits that can be applied to a Master's degree in Communication Studies at New Mexico State University. This equates to one third of the required credits to obtain a graduate degree in Communication Studies at NMSU.

**Student Qualifications**

Potential MAP students must meet the minimum qualifications for the program as outlined in the Graduate School policy concerning MAP programs. In addition to these qualifications, students must meet the following requirements in order to be eligible for application to the MAP program.

- Must be a junior or senior
- Must have a GPA of 3.25 or higher
- Must apply to the program with sufficient time to take the 12 credit hours that will be applied toward the overall program of study. Students will not be able to retroactively apply credits to MAP program.
- Must participate in the Developing New Scholars Program (DSNP), offered by the Graduate School and Honor’s College.
- Consult with the Department Head on Courses eligible and complete the Graduate School form.
- Meet with your financial aid advisor, if they receive financial aid, as financial aid awards may have to be adjusted based on course registration.

**Eligible courses for the MAP Program in Communication Studies**

- Students must take the graduate-level equivalent of any undergraduate course. Eligible courses include:
  - COMM 540 Seminar in Political communication
  - COMM 550 Seminar in Communication Technologies
  - COMM 557 Seminar Strategic Communication
  - COMM 562 Seminar in Family Communication
  - COMM 565 Seminar in Nonverbal Communication
  - COMM 571 Seminar in Sports Communication
  - COMM 591 Special Topics
  - COMM 595 Communication Internship for Graduate Students

**Eligible courses for the MAP Program in Communication Studies**

- Students who are accepted into the Communication Studies MAP program will only be allowed to matriculate into the graduate program in Communication Studies at NMSU.
- Students who enroll in a MAP program other than Communication Studies will not be able to apply those credits toward a graduate degree in Communication Studies at NMSU.

**Degrees for the Department**

**Bachelor Degree(s)**

- Communication Studies - Bachelor of Arts (p. 431)
- Communication Studies - Bachelor of Arts (Online) (p. 434)

**Master Degree(s)**

- Communication Studies - Master of Arts (p. 436)
- Communication Studies (Leadership Communication) - Master of Arts (Online) (p. 438)

**Minors for the Department**

**Undergraduate**

- Communication Studies - Undergraduate Minor (p. 436)

**Graduate**

- Communication Studies - Graduate Minor (p. 439)

**Department Head:** Greg G. Armfield

**Professors** J. Flora, A. Hubbell, **Associate Professor** G. Armfield, **Assistant Professor** S. Lee, G. Morales, **Professor Emeritus** K. Hacker

Greg G. Armfield, Ph.D. (University of Missouri-Columbia) – communication and sport and organizational communication

Jeanne Flora, Ph.D. (University of Kansas) – family communication and interpersonal communication

Anne Hubbell, Ph.D. (Michigan State University) – health communication and organizational communication

Sangwon Lee, Ph.D. (University of Wisconsin-Madison) – Digital Media Technologies and Political Communication

Gabriela Morales, Ph.D. (University of New Mexico) – Communication and Culture and Health Communication

**Communication Studies Courses**

**COMM 1115G. Introduction to Communication**

3 Credits (1+2P)

This survey course introduces the principles of communication in the areas of interpersonal, intercultural, small group, organizational, public speaking, mass, and social media. May be repeated up to 3 credits.

**Learning Outcomes**

1. Describe basic communication terms, forms and concepts. Identify basic communication research methods and theories. Explain the significance of ethics and diversity in communication processes. Apply various concepts and skills in multiple communication contexts
COMM 1130G. Public Speaking
3 Credits (3)
This course introduces the theory and fundamental principles of public speaking, emphasizing audience analysis, reasoning, the use of evidence, and effective delivery. Students will study principles of communication theory and rhetoric and apply them in the analysis, preparation and presentation of speeches, including informative, persuasive, and impromptu speeches. May be repeated up to 3 credits.

Learning Outcomes
1. Demonstrate effective speech preparation. Demonstrate effective speech delivery through use of language, nonverbal elements and the creation of presentation aids. Analyze a potential audience and tailor a speech to that audience. Evaluate presentations according to specific criteria. Explain common propaganda techniques and logical fallacies, and identify them in the speeches of others. Recognize diversity and ethical considerations in public speaking.

COMM 2110. Communication Theory
3 Credits (3)
This course provides an exploration of major theories, concepts and methods of research in the study of human communication. May be repeated up to 3 credits.

Learning Outcomes
1. Identify, explain, and illustrate key concepts and principles of the major traditions of communication theory. Analyze practical problems and situations using theories. Integrate research correctly and ethically from credible sources to support the primary purpose of communication.

COMM 2111. Introduction to the Communication Major
1 Credit (1)
This is a one-credit course for new Communication Studies majors. It helps them get acquainted with the department, the department head (professor for this course, the professors, other students, and the department student organizations. It also deals with degree mapping and career mapping and any problems the students are having in their first year. Finally, the students learn about the the Communication Studies discipline and various communication careers they can pursue with their degree. The class meets one day each week for one hour. Restricted to: Communication Studies majors. Restricted to Las Cruces campus only.

Learning Outcomes
1. To give you some knowledge about your major and this department.
2. To help you learn more about the study of human communication in general and we approach it in our various courses.
3. To make you comfortable with the department, its professors and graduate students, as well as staff.
4. To assist you in finding important resources for earning your degree in Communication Studies with a high GPA.
5. To engage you and your concerns in earning your degree.
6. To advise you in ways that match your goals with the department goals.

COMM 2996. Special Topics
1-3 Credits
Specific subjects and credits to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Learning Outcomes
1. Varies

COMM 2997. Independent Study
1-3 Credits
Individualized, self-paced projects for students with a special interest in communication topics. May be repeated for a maximum of 6 credits.

Prerequisites: COMM 1115G and sophomore standing.

Learning Outcomes
1. Varies

COMM 305. Communication Research Methods
3 Credits (3)
Introductory course in communication research. Emphasis on how to be an effective consumer of research. May be repeated up to 3 credits.

Learning Outcomes
1. Become an intelligent consumer of research: have the ability to read, comprehend, demonstrate understanding and critically evaluate communication and other research reported in scholarly journals and published documents as well as in the popular press.

COMM 310. Communication Theory and Discovery
3 Credits (3)
The course explores the nature of communication science, major communication theories, and how communication research is conducted and interpreted.

Learning Outcomes
1. Understand philosophical underpinnings of communication theories and methods Understand the relationship between theory and research methods in the field of communication Apply concepts, theories, and research findings to various contexts outside of the classroom Become an intelligent consumer of research: have the ability to read, comprehend, demonstrate understanding and critically evaluate communication and other research reported in scholarly journals and published documents as well as in the popular press.

COMM 351. Persuasion Theory and Practice
3 Credits (3)
Training in understanding and applying the principles and techniques of argumentation and persuasion. May be repeated up to 3 credits.

Learning Outcomes
1. Identify and explain key concepts and theories in persuasion Apply concepts, theories, and research findings to various contexts outside of the classroom Create persuasive messages utilizing principles from one or more of the theories covered in class Become a critical consumer of persuasive messages and persuasive campaigns.

COMM 370. Organizational Communication
3 Credits (3)
Communication strategies and patterns of private and governmental organizations, including research on the communication process. May be repeated up to 3 credits.

Learning Outcomes
1. Evaluate the organizational theory, concepts, and research discussed in class and their implications for the field of organizational communication. Explain the role communication plays in each of the organizational communication processes discussed in class. Critically assess communication practices within all types of organizations. Evaluate the ethical issues brought forth in organizational communication
COMM 376. Communication and Culture
3 Credits (3)
Cultural and intercultural communication theory and behavior, with a concentration on the development of specific communication skills which should facilitate effective intercultural communication. May be repeated up to 3 credits.
Learning Outcomes
1. Define culture and other related concepts. Explain processes of enculturation and acculturation. Apply the concepts to one's own experience. Create new ways of presenting material about culture and communication.

COMM 377. Conflict Management
3 Credits (3)
Communication strategies to manage and negotiate conflict in intrapersonal, interpersonal, group, and organizational settings. May be repeated up to 3 credits.
Learning Outcomes
1. Analyze the role of communication in conflict and conflict management processes. Analyze the components of conflict that lead to constructive or destructive communication patterns. Evaluate the effectiveness and appropriateness of strategies, methods, and responses that are appropriate to a given conflict situation.

COMM 384. Interpersonal Communication
3 Credits (3)
Theories of interpersonal communication and relational communication including study of relevant models, contexts and constructs. May be repeated up to 3 credits.
Learning Outcomes
1. To define and describe communication and interpersonal communication. To identify and describe concepts and behaviors related to nonverbal, verbal, relational, interpretive, role, self, and goal competence in the context of interpersonal communication. To compare and apply concepts of interpersonal communication competence by reflecting on examples from communication in personal and everyday relationships. To define, apply, and analyze concepts of family communication competence in media portrayals of, and in one's own experience of, family communication. To define, apply, and analyze concepts of romantic communication competence in either a personal romantic relationship or in the example of a couple observed/interviewed.

COMM 425. Small Group Communication
3 Credits (3)
Principles and methods of modern group discussion with emphasis on the role of the group in problem solving. May be repeated up to 3 credits.
Learning Outcomes
1. Recognize and develop a complex understanding of the theories and principles of group communication. Become an intelligent consumer of group research literature. Adopt and articulate a clearly developed communication perspective toward group research. Gain an understanding of the within-group phenomena.

COMM 440. Political Communication
3 Credits (3)
Presidential and congressional campaigns, political persuasion techniques, political advertising, power in language, and media aspects of political information. Ideology, resistance to political manipulation, and dependence of democracies on communication. May be repeated up to 3 credits.
Learning Outcomes
1. Identify and explain key concepts in political communication, and apply that knowledge to your own life experiences and views on the world. Read and critically analyze current research in political communication. Become informed and critical consumers of political messages and the news media.

COMM 450. Technologies of Human Communication
3 Credits (3)
Development and evolution of human communication technologies from prehistory through the future of computer-mediated communication networks. Examines behavioral, cognitive, social, cultural, and political issues of new communication technologies and their use and management. May be repeated up to 3 credits.
Learning Outcomes
1. Understand the key concepts, theories, and research findings regarding scholarly investigations of new media technologies. Apply concepts, theories, and research findings related to social media to a variety of social issues and one's own lived experiences. Develop the ability to think about social media critically and analytically. Learn how to effectively communicate ideas, information, and messages through new media technologies (particularly, social media platforms) in order to achieve a specific goal. Articulate the benefits and drawbacks of living in a digital world.

COMM 457. Strategic Communication
3 Credits (3)
This course covers history, theory, and research related to the use of strategic organizational communication to change attitudes. The course is a survey course designed to help you understand how organizations create targeted, creative, research-based communication to accomplish their objectives. Students will examine the role of communication in organizational planning and execution of advertising, marketing, public relations, and social change. Strategic Communication provides insight into how communicators use critical and creative thinking to gather, organize, evaluate and deliver information in a culturally diverse world. May be repeated up to 3 credits.
Learning Outcomes
1. Understand the role and functions of Strategic Communication in a culturally diverse world.

COMM 460. Deception and Communication
3 Credits (3)
Deceptive communication including nonverbal indicators of lies, types of lies, and influence of relationships on lying behavior and interpretation. May be repeated up to 3 credits.
Learning Outcomes
1. Students will acquire basic knowledge of research on Deception. Students will be able to identify reasons for why people lie. Students will be able to apply the course concepts to real world situations. Students will be able to tell the difference between what is “true” and what is “false” about how we deceive in the popular press and movies/TV. Students will learn about THE two theories in the area of Deception and be able to differentiate between them.
COMM 462. Family Communication
3 Credits (3)
A communication perspective on traditional and nontraditional family configurations, roles, interaction patterns, and conflict. Includes an examination of media depictions of families and family interaction, as well as current social and political issues related to the family. May be repeated up to 3 credits.

Learning Outcomes
1. To develop a communication perspective on the family as a system.
2. To identify and distinguish between theories of family interaction.
3. To recognize and explain how family communication patterns and processes affect communication between family members.
4. To analyze communication processes that are unique to family subsystems such as romantic, parent-child, sibling, and extended family relationships.
5. To analyze the role of family interaction in the development and course of mental and physical health problems.
6. To analyze theories of family stress and the impact of specific family stressors on family interaction and well-being.
7. To apply theories and concepts to real-life scenarios.

COMM 465. Nonverbal Communication
3 Credits (3)
Study of and experimentation with nonverbal aspects of human communication as vital components of the total communication process. May be repeated up to 3 credits.

Learning Outcomes
1. To analyze nonverbal channels of communication between persons, including channels such as the voice, face, eyes, posture, gestures, space, territory, clothing, paralanguage, and touch.
2. To analyze how nonverbal behaviors collectively communicate functions such as dominance, deception, intimacy, and turn-taking.
3. To analyze individual and social factors affecting the production of nonverbal behaviors, and the effects of such behaviors on others’ attitudes, perceptions, cognitions, and relationships.
4. To analyze the origins of nonverbal communication, by examining developmental trends, continuities with other animal species, cultural similarities and differences, and physiological bases.
5. To examine applications of nonverbal research and theory to infant development, personality, gender, relational satisfaction, relationship development, culture, aging, and social media.

COMM 470. Leadership Communication
3 Credits (3)
Examination of traditional theories and concepts of leader-follower dynamics; presentation of cognitive, systems, and symbolic interpretative views of leadership with an emphasis on persuasion and motivation in leader-follower interactions. May be repeated up to 3 credits.

Learning Outcomes
1. Apply leadership concepts and theories. Analyze leadership philosophies. Identify the fundamental ways leadership is practiced in organizations. Assess your own leadership traits and behaviors. Develop your own personal leadership philosophy.

COMM 471. Sports Communication
3 Credits (3)
This course provides a senior-level exploration of the role sports and sports communication plays in contemporary culture. Readings will examine the interrelationship between sports and media in society, the identities that fans assume when engaging in fanship and sports viewership, the pervasiveness of sports communication practices in the sports industry, the role of media in story telling, and the way cultural identifiers of class, ethnicity, and gender play out in the media. This is taught with COMM 571. May be repeated up to 3 credits.

Learning Outcomes
1. Evaluate the historical impact of sports on society. Understand the evolution of sports media and ESPN and its impact on American culture. Assess existing and future sports communication research and media theory. Assess the current trends in sports media and the culture of sports. Transfer knowledge of sports communication to a critical appreciation of sports media; including the study of image repair and framing theory.

COMM 475. International Communication
3 Credits (3)
Exploration of the forms and channels of communication is substantially influenced by international cultural and political factors. Covers: global communication technology; news, information, and entertainment flows; and international diplomacy and negotiation. May be repeated up to 3 credits.

Learning Outcomes
1. Demonstrate an understanding of the history of international communications, and the
2. issues and controversies that have appeared. Demonstrate an understanding of the international agencies responsible for the regulation of media, including content, and technologies.

COMM 477. Environmental Communication
3 Credits (3)
Examines the link between communication and environment within the context of communication scholarship. Topics include sense of place, cultural approaches to interacting with environment as well as exploring current themes surrounding environment. May be repeated up to 3 credits.

Learning Outcomes
1. Identify ways in which public discourses socially construct relationships between nature and humans. Demonstrate an understanding of critical and cultural approaches to environmental communication.
2. Identify key issues in environmental conflicts, risk communication, and democratic participation in policy-making. Demonstrate an ability to critically evaluate environmental advocacy, deliberation, and public relations.
COMM 480. Health Communication
3 Credits (3)
Examination of central issues in communication theory and practice as applied to health care. Includes communication in health care organizations, media dissemination of health information, role of communication in disease prevention and health promotion, and symbolic meaning of illness within cultures. May be repeated up to 3 credits.

Learning Outcomes
1. Students will gain an understanding of health communication theories and concepts. Students will be able to apply theories and concepts to a real-world health issue. Students will be able to differentiate among health communication theories and concepts.

COMM 485. International Teaching Assistant Development
3 Credits (3)
International teaching assistants will receive instruction in communicative skills to enable them to meet their responsibilities at NMSU. Course includes lectures, seminars, video-taped presentations, and tutorial sessions emphasizing pedagogic and presentation skills and styles.

Prerequisite: consent of instructor.

COMM 490. Independent Study
1-3 Credits (1-3)
Individualized, self-paced projects for advanced students. Students must be in junior standing to enroll. May be repeated up to 6 credits.

Prerequisite: COMM 1115G.

Learning Outcomes
1. The student will study a selected topic and conduct a literature review or comparable research assignment. The student must demonstrate both quantity and quality of knowledge and understanding of the topic in a final written paper.

COMM 491. Selected Topics
1-6 Credits (1-6)
Individual and/or group study of selected topics. To be identified by subtitle. May be repeated up to 12 credits.

Learning Outcomes
1. Gain basic knowledge regarding the group study or selected topic as identified by the course subtitle. Gain expert insight into the selected topic identified by the course subtitle.

COMM 495. Communication Internship
3 Credits (3)
Internship opportunity to apply what has been learned to a real-world situation. Students must be in junior standing to enroll. May be repeated up to 6 credits.

Learning Outcomes
1. Apply course concepts and discussion topics to the internship experience. Differentiate between good and poor communication skills. Evaluate the complex communication phenomena within the workplace. Apply a valuable experiential education outside of the classroom.

COMM 496. Communication Internship
3 Credits (3)
Internship opportunity to apply what has been learned to a real-world situation. Students must be in junior standing to enroll. May be repeated up to 6 credits.

Learning Outcomes
1. Apply course concepts and discussion topics to the internship experience. Differentiate between good and poor communication skills. Evaluate the complex communication phenomena within the workplace. Apply a valuable experiential education outside of the classroom.

COMM 505. Research Methods
3 Credits (3)
Seminar in the quantitative study of human communication phenomena, research design, and statistical analysis. May be repeated up to 3 credits.

Learning Outcomes
1. Understand the logic of social science research. Compare different research methods (experiment, survey, content analysis, and so on). Develop and write clear hypotheses. Understand how to assess the validity and reliability of measures. Design a survey to test your hypotheses. Use statistical analyses to answer questions in the field of communication. Discuss the limitations of your study and the implications for your conclusions. Become a better consumer of statistics and social science research.

COMM 506. Qualitative Research Methods in Communication
3 Credits (3)
Survey of qualitative research methods in the study of human communication, including historical and critical approaches, interviewing, participant-observation, and communication ethnography. Students apply methods to their own research. May be repeated up to 3 credits.

Learning Outcomes
1. Learn about the nature and application of qualitative research in social and organizational research. Learn to conceptualize qualitative research and to formulate problem statements and research questions. Learn how to design a qualitative research study. Learn about qualitative data collection procedures—observation, interviews, focus group interviews, and collection and use of documents and archival data. Apply research design and data collection skills by undertaking a pilot research study.

COMM 540. Seminar in Political Communication
3 Credits (3)
Political communication theory, research, and issues. Empirical studies of campaigns, movements, news media, voter decision-making, political participation, socialization, and knowledge. Political theory, field research, communication science findings and research methods. May be repeated up to 3 credits.

Learning Outcomes
1. Identify and explain key concepts in political communication, and apply that knowledge to your own life experiences and views on the world. Read and critically analyze current research in political communication. Become informed and critical consumers of political messages and the news media.
COMM 550. Seminar in Communication Technologies
3 Credits (3)
Seminar on design, usage, and social impact of electronic mail, communication through computer networks, and new technologies of organizational communication such as group decision support systems (GDSS). Each student will study an actual application of a major communication technology in an organization. May be repeated up to 3 credits.

Learning Outcomes
1. Understand the key concepts, theories, and research findings regarding scholarly investigations of new media technologies. Apply concepts, theories, and research findings related to social media to a variety of social issues and one's own lived experiences. Develop the ability to think about social media critically and analytically. Learn how to effectively communicate ideas, information, and messages through new media technologies (particularly, social media platforms) in order to achieve a specific goal. Articulate the benefits and drawbacks of living in a digital world.

COMM 551. Seminar in Persuasion
3 Credits (3)
Work with an actual persuasion campaign, such as public information, political, or commercial marketing campaigns. Includes case studies of large-scale persuasion efforts, current theoretical models of persuasion processes, and methods for studying, evaluating, and refining messages for optimal effects. May be repeated up to 3 credits.

Learning Outcomes
1. Become a critical consumer of persuasive messages and persuasive campaigns. Create persuasive messages utilizing principles from one or more of the theories covered in class. Apply concepts, theories, and research findings to various contexts outside of the classroom.

COMM 557. Seminar Strategic Communication
3 Credits (3)
This course covers history, theory, and research related to the use of strategic organizational communication to change attitudes. The course is a survey course designed to help you understand how organizations create targeted, creative, research-based communication to accomplish their objectives. Students will examine the role of communication in organizational planning and execution of advertising, marketing, public relations, and social change. Strategic Communication provides insight into how communicators use critical and creative thinking to gather, organize, evaluate, and deliver information in a culturally diverse world. Graduate students will be required to fulfill advanced research and presentation requirements. May be repeated up to 3 credits.

Learning Outcomes
1. Understand the role and functions of Strategic Communication in a culturally diverse world.

COMM 562. Seminar in Family Communication
3 Credits (3)
This course examines cutting edge research on family communication, as well as classic theories and research findings that have influenced and revolutionized the way scholars conceptualize family interaction. Topics include basic family communication processes, communication in family subsystems, communication during family stress, and the role of family interaction in health and well-being. Students will explore how family relationships are built, maintained, and destroyed by communication as well as the potentially important and long lasting effects of family relationships on individuals.

COMM 565. Seminar in Nonverbal Communication
3 Credits (3)
This course focuses on human physical behaviors as the basis of communication between persons. This physical behavior includes such variables as the voice, face, eyes, posture, gesture, space, territory, clothing, and touch. The content of the course considers the individual and social factors affecting the production of such behaviors, and the effects of such behaviors on others' attitudes, perceptions, cognitions, and relationships. Applications of research and theory in nonverbal communication to infant development, personality, sex differences, marital satisfaction, relationship development, culture, aging, and brain functioning are also studied throughout the course.

COMM 570. Seminar in Organizational Communication
3 Credits (3)
Communication strategies and patterns of private and governmental organizations, including research on communication systems. May be repeated up to 3 credits.

Learning Outcomes
1. Recognize and develop a complex understanding of the theories and principles of organizational culture and communication. Become an intelligent consumer of organizational culture. Plan, design, execute, interpret, and/or critically evaluate the conclusions of an original organizational communication research project. Adopt and articulate a clearly developed communication perspective toward organizational research.

COMM 571. Seminar in Sports Communication
3 Credits (3)
This seminar provides a graduate-level exploration of the role sports and sports communication plays in contemporary culture. Readings will examine the interrelationship between sports and media in society, the identities that fans assume when engaging in fanship and sports viewing, the pervasiveness of sports communication practices in the sports industry, the role of media in story telling, and the way cultural identifiers of class, ethnicity, and gender play out in the media. This is taught with COMM 471. May be repeated up to 3 credits.

Learning Outcomes
1. Evaluate the historical impact of sports on society. Understand the evolution of sports media and ESPN and its impact on American culture. Assess existing and future sports communication research and media theory. Assess the current trends in sports media and the culture of sports. Transfer knowledge of sports communication to a critical appreciation of sports media; including the study of image repair and framing theory.

COMM 576. Seminar on Communication and Culture
3 Credits (3)
Cultural and intercultural communication theory and research. Focuses on discovering and describing distinctive ways of speaking within and between cultures. May be repeated up to 3 credits.

Learning Outcomes
1. Discuss the practical application of the study of culture.
COMM 583. Seminar in Theories of Communication  
3 Credits (3)  
The theories covered in this course are intended to provide you with a foundational background for future graduate courses that will explore theoretical and topical areas of study in more depth. May be repeated up to 3 credits.  
**Learning Outcomes**  
1. Learn how theories are developed, analyzed, evaluated, and applied.  
2. Be able to assess, synthesize, and evaluate communication theories.  
3. Gain a broad overview of the field of human communication theory.  
4. Appreciate the diversity of theoretical ideas within communication literature. Develop a deeper understanding through the exploration of selected topics. Begin to solidify a theoretical stance of your own that will motivate and guide further studies.

COMM 584. Seminar in Interpersonal Communication  
3 Credits (3)  
Theories of interpersonal communication and communication within a relationship, including study of relevant models, contexts, and constructs. May be repeated up to 3 credits.  
**Learning Outcomes**  
1. To define interpersonal communication, explore relationship types, and analyze demographic trends in personal relationships.  
2. To examine the human need for interpersonal relationships, as well as social networks, the development of social skills, and the role of social support.  
3. To analyze how people develop and communicate their identity within relationships.  
4. To examine the role of communication in developing and maintaining relationships, with a focus on relational stages, turning points, dialectics, uncertainty, expectations, self-disclosure, affection, intimacy, influence, conflict, power, as well as cultural influences to close relationships.  
5. To analyze relational hurt, relational transgressions, relational deterioration, and termination from a communication perspective.  
6. To analyze and review current theory and peer-reviewed research in interpersonal communication.  
7. To examine practical applications of interpersonal communication that have the potential to help or harm people, and to explore the gaps and links between theory and practice.

COMM 590. Independent Study  
1-6 Credits (1-6)  
Individualized, self-paced projects. May be repeated up to 99 credits.  
**Learning Outcomes**  
1. The student will study a selected topic and conduct a literature review or comparable research assignment. The student must demonstrate both quantity and quality of knowledge and understanding of the topic in a final written paper.

COMM 591. Special Topics  
1-9 Credits (1-9)  
Individual and/or group study of special topics. To be identified by subtitle. May be repeated up to 99 credits.  
**Learning Outcomes**  
1. Gain basic knowledge regarding the group study or selected topic as identified by the course subtitle. Gain expert insight into the selected topic identified by the course subtitle.

COMM 595. Communication Internship for Graduate Students  
3 Credits (3)  
Internship opportunity to apply what students have learned to the real world. May be repeated up to 3 credits.  
**Learning Outcomes**  
1. Apply course concepts and discussion topics to the internship experience.  
2. Differentiate between good and poor communication skills. Evaluate the complex communication phenomena within the workplace. Apply a valuable experiential education outside of the classroom.

COMM 598. MA Project  
1-6 Credits (1-6)  
Project credits are used for the master's degree project option. May be repeated up to 6 credits.  
**Learning Outcomes**  
1. Propose and defend the project during the first semester. Complete and defend the project during the second semester.

COMM 599. Master's Thesis  
1-15 Credits (1-15)  
Thesis. May be repeated up to 88 credits.  
**Learning Outcomes**  
1. Submit Thesis Proposal and defend the first semester of enrollment. Complete Thesis and defend during the second semester of enrollment.

Department Head: Greg G. Armfield, Ph.D.

Department Phone: (575) 646-2801

**Communication Studies - Bachelor of Arts**  
In addition to completing the general education requirements of the university and the college, students majoring in communication studies are required to complete 21 credits of core COMM courses and 15 credits of COMM electives for a total of 36 credits. Any exception to these policies requires department head approval.  
All COMM courses must be completed with a grade of C- or better.  
**Undergraduate Course Rotation:**

**Fall**
- COMM 310 Communication Theory and Discovery
- COMM 376 Communication and Culture
- COMM 384 Interpersonal Communication

**Spring**
- COMM 351 Persuasion Theory and Practice
- COMM 370 Organizational Communication
**COMM 495 Communication Internship**

**Requirements**

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

1. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

**Second Language Requirement**

For the Bachelor of Arts in Communication Studies there is a one year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

**Option 4:**
Participate in an experiential learning study abroad course sponsored by NMSU or an approved International Internship that enhances the students' cultural competency through cultural understanding and experience. Please meet with the head of the Department of Communication Studies for information. Students must pass the course with a C- or higher.

**Option 5:**
Pass (with a C-or higher) any three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.

**Option 6:**
Obtain college certification of completion of two years of a second language at the high school level with a grade of C- or higher in the second-year level.

**Option 7:**
By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

**Option 8:**
By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.

**Option 9:**
In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

---

**A Suggested Plan of Study for Students**

This roadmap assumes student placement in MATH 1130G Survey of Mathematics and ENGL 1110G Rhetoric and Composition. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Communication Studies - Master of Arts

The department offers thesis, comprehensive exam, and applied project options in its Masters of Arts program. All options require a minimum of 36 credits, which includes not only Communication Studies courses but at least one course from outside the department. The thesis option requires at least 30 credits of coursework, 6 credits of thesis hours (COMM 599 Master’s Thesis), and an oral defense of the thesis and coursework. The comprehensive exam option requires 36 credits of coursework, plus six hours of written examination, followed by an oral defense. The applied project option requires at least 30 credits of coursework, 6 credits of project hours (COMM 598 MA Project) and an oral defense of the project and coursework. All options require a minimum of 30 credit hours of Communication Studies courses.

Select 15 credits from Communication Studies electives for the thesis option. Take 15 credits plus at least 3 credits from related disciplines for the comprehensive exam option. Two courses (6 credits) for courses that have numbers 450+ can be counted. For all options, a total of 36 credits is required.

An M.A. Tracking Form for thesis, comprehensive exam, and applied project options is found on the department website (https://comm.nmsu.edu/graduate-programs/MA-Tracking-Form-UPDATED-SP19.pdf):

Graduate course rotation:

Fall
COMM 540 Seminar in Political communication
COMM 570 Seminar in Organizational Communication
COMM 583 Seminar in Theories of Communication

Spring
COMM 505 Research Methods/COMM 506 Qualitative Research Methods in Communication
COMM 576 Seminar on Communication and Culture
COMM 584 Seminar in Interpersonal Communication

Communication Studies - Undergraduate Minor

A minor in Communication Studies consists of 18 credits; at least 9 of those credits must be in courses numbered 300 or above. All courses must be completed with grades of C- or better.

In order to graduate, students will need a total of 36 credits, of which 30 credits must be from COMM coursework. Please consult your advisor about your specific requirements and how to complete them in order to graduate.

A GPA of 3.0 or better must be maintained overall and grades in each course must be a B or better.

### Entrance Requirements for Graduate Study in Communication Studies

Students wishing to enroll in the Master program in Communication Studies must meet the following criteria:

1. Hold a BA or BS degree, from an accredited institution of higher learning; Social Science disciplines are preferred
2. Hold a minimum grade point average of 3.00

*The Graduate Record Exam (GRE) General Test is not required for admission; however, existing GRE scores that are high will strengthen a candidate’s application and are highly regarded in the awarding of Graduate Assistantships.*

### Communication Studies (Analysis and Decision-Making) - Master of Arts (Online)

The professional master’s degree in organizational leadership is designed to equip students to develop effective leadership skills in individual, group, team, and organizational contexts for professionals who work in organizations of any type (private, government, non-profit). The concentration in Analysis and Decision-Making is designed to enhance professional skillsets in a time of dynamic change in global business, diversity, technology, and digital skills. The degree requires 30 credit hours of coursework, at least 15 credits of coursework must be completed in the Communication Studies Department, and the final 3 credits of coursework must be project hours (COMM 598 MA PROJECT). All courses are offered online and taught asynchronously in 8-week formats. If a student utilizes option two below, any concentration or certificate can be combined with 15 hours of communication studies courses to complete.

This multidisciplinary concentration in Analysis and Decision-Making requires 15 credits of coursework across three colleges and departments. All courses are offered online and taught asynchronously in 8-week formats. A GPA of 3.0 or better must be maintained overall and grades in each course must be a B or better.

Communication Studies (Leadership Communication) - Master of Arts (Online)

The professional master’s degree in organizational leadership is designed to equip students to develop effective leadership skills in individual, group, team, and organizational contexts for professionals who work in organizations of any type (private, government, non-profit). The program will help students master effective leadership in a time of dynamic change in global business, diversity, technology, and digital skills. The degree requires 30 credit hours of coursework, at least 15 credits of coursework must be completed in the Communication Studies Department, and the final 3 credits of coursework must be project hours (COMM 598 MA PROJECT). All courses are offered online and taught asynchronously in 8-week formats. If a student wishes up to 15 credits of courses taken outside of Communication Studies can count toward the degree as long as the Leadership Communication Concentration is completed in Communication Studies.

This concentration requires 15 credits of coursework in Communication Studies. All courses are offered online and taught asynchronously in 8-week formats. A GPA of 3.0 or better must be maintained overall and grades in each course must be a B or better. Two courses (6 credits) with numbers 450+ can be counted.

Communication Studies - Graduate Minor
Students who wish to take a minor in Communication Studies will need to accumulate a minimum of 9 graduate credits in Communication Studies courses. Students are encouraged to contact the Communication Studies Department Head for direction in the selection of courses.

Computer Science
Computer Science is the area of study that encompasses all of the theory and practice of computing. The mission of the Department of Computer Science at New Mexico State University is to provide formal education in the core disciplines of computer science, as well as to prepare our graduates for research, development and academic careers. For more information on the Department of Computer Science, please visit the web site https://computerscience.nmsu.edu.

Undergraduate Program Information
The undergraduate computer science programs prepare students for graduate study in computer science and for employment in positions involving the design, construction and application of computer systems. Undergraduate degree programs include a Bachelor of Science (ABET accredited), Bachelor of Arts, Bachelor of Science in Cybersecurity, four minor degree tracks, and seven concentrations. The B.S. degree is the traditional computer science degree program, while the B.A. degree offers a more open, flexible degree plan that is easier to combine with studies in other disciplines. The minors are for non-Computer Science majors and offer specialized tracks in algorithm theory, bioinformatics, computer systems and software development. The concentrations are for Computer Science majors and provide a focus on specialized areas such as algorithm theory, artificial intelligence, big data and data science, networking, cybersecurity, human computer interaction, and software development. With technology underpinning almost every area of human endeavor today, students across NMSU should consider pursuing a minor or at least taking some computer science courses. Computer science majors should review their programs of study in consultation with their advisors each semester, preferably using the most recent Undergraduate Catalog.

Graduate Program Information
The department offers both Master of Science and Doctor of Philosophy graduate degrees in computer science, along with a Master of Science in Bioinformatics. We also encourage students in other disciplines to do a graduate minor in computer science. Graduate students typically work closely with a faculty member in a specific area of research. The department offers expertise in several research areas, such as: artificial intelligence and knowledge representation; computer and wireless networks; data mining and machine learning; game design and human-computer interaction; bioinformatics; high performance computing; software engineering and programming languages; theory of computing; and assistive technologies.

A number of laboratories have been established to coordinate research activities, including
- the Knowledge representation, Logic and Advanced Programming (KLAP) lab;
- the Play and Interactive Experiences for Learning (PixL) lab;
- the Knowledge Discovery and Data Mining (KDD) lab;
- the Programming Languages, Environments, and Automated Software Engineering (PLEASE) lab;
- the Bioinformatics Research lab;
- the Multimedia Management lab;
- the Cryptography, Privacy and Security Research (CrySPR) lab; and
- the Network and Systems Optimization Lab (NSOL).

Department members are also directing the iCREDITS interdisciplinary Center of Research Excellence in Design of Intelligent Technologies for Smartgrids, offering educational and research opportunities in smartgrids.

Entrance Requirements for Graduate Study in Computer Science
The Graduate Record Exam (GRE) General Test is not required for admission; however, high GRE scores will strengthen a candidate's application and are highly regarded in the awarding of Graduate Assistantships. To be admitted without undergraduate deficiencies, an entering student must have completed undergraduate preparation substantially equivalent to that required for the Bachelor of Science degree in Computer Science at New Mexico State University; in particular, this includes courses equivalent to

Deficiencies should be satisfied as early in the student graduate program as possible, through the regular undergraduate courses, the C S 460 - C S 468 transition courses, or through tests administered by faculty members in the relevant areas. Students should consult with their Graduate Advisor to address issues related to deficiencies. Deficiencies are also assigned to applicants whose transcripts denote low grades in selected areas. Admission is often denied to candidates with little background in Computer Science. Instructions for prospective applicants can be found at https://computerscience.nmsu.edu.
**Entrance Requirements for Graduate Study in Bioinformatics**

The Graduate Record Exam (GRE) General Test is not required for admission; however, high GRE scores will strengthen a candidate’s application and are highly regarded in the awarding of Graduate Assistantships. Students wishing to enroll in the Master program in Bioinformatics must meet the following criteria:

1. Hold a BS degree, from an accredited institution of higher learning, in either a computational field (e.g., Computer Science) or in life sciences (preferably Biology, Biochemistry, or Environmental Sciences)
2. Hold a minimum grade point average of 3.2

Applicants will be expected to provide a Career statement, motivating the interest in bioinformatics and a minimum of three letters of reference.

**Graduate Assistantships**

Graduate assistantships (in the form of Teaching and Research assistantships) are expected to be available during the academic year. Inquiries should be addressed to the departmental Graduate Committee. Research assistantships are available at the discretion of individual research project leaders in the Department or elsewhere on campus. Submitting detailed vitae, letters of reference, and GRE test scores are encouraged when applying for any assistantship.

**Degrees for the Department**

**Bachelor Degree(s)**

- Computer Science - Bachelor of Arts (p. 454)
- Computer Science - Bachelor of Science (p. 456)
- Computer Science (Algorithm Theory) - Bachelor of Science (p. 459)
- Computer Science (Artificial Intelligence) - Bachelor of Science (p. 462)
- Computer Science (Big Data and Data Science) - Bachelor of Science (p. 464)
- Computer Science (Computer Networking) - Bachelor of Science (p. 467)
- Computer Science (Cybersecurity) - Bachelor of Science (p. 470)
- Computer Science (Human Computer Interaction) - Bachelor of Science (p. 472)
- Computer Science (Software Development) - Bachelor of Science (p. 475)
- Cybersecurity - Bachelor of Science (p. 477)

**Bachelor-Master Degree(s)**

- Computer Science - Bachelor of Science/Master of Science (p. 479)

**Master Degree(s)**

- Bioinformatics - Master of Science (p. 481)

**Data Analytics**

- Professional Master of Data Analytics (483)
- Master of Data Analytics (Online)

**Doctoral Degree(s)**

Computer Science - Doctor of Philosophy (p. 487)

**Minors for the Department**

**Undergraduate**

A student cannot earn more than one of the undergraduate minors unless they pass at least 6 credits in the second minor beyond the requirements of the first minor. The maximum number of undergraduate minors that a student may earn is two. Most courses for the minors listed below have prerequisites. Please check the undergraduate catalog for individual course prerequisites. Students interested in pursuing a computer science minor are encouraged to pick up more information at the departmental office.

- Algorithm Theory - Undergraduate Minor (p. 480)
- Bioinformatics - Undergraduate Minor (p. 480)
- Computer Systems - Undergraduate Minor (p. 481)
- Software Development - Undergraduate Minor (p. 481)

**Graduate**

Computer Science - Graduate Minor (p. 488)

**Faculty**

**Professor Son Tran, Department Head**

**Professors**

- Cook, Pontelli, Misra, Song, Tran

**Associate Professors**

- Cao, Pivkina, Toups

**Assistant Professors**

- Hamdi, Hamilton, Le, Nagarkar, Reynolds, Vishwanathan, Wang

**College Professor, Distinguished Steiner; College Associate Professor, Cooper**

H. Cao, Ph.D. (Hong-Kong) – data mining, databases, data integration, applied machine learning; J. Cook, Ph.D. (Colorado) – software engineering, high performance computing; S. Hamdi, Ph.D. (Georgia State) – machine learning, data mining, deep learning, graph representation learning; W. Hamilton, Ph.D. (Texas A&M) – media design, online communities, online education, and video game design/culture; T. Le, Ph.D. (Singapore Management University, Singapore) – data mining and machine learning, dimensionality reduction, visualization, topic models, embedding and generative models; S. Misra, Ph.D. (Arizona State) – communication networks, social networks, high performance computing, security and privacy; P. Nagarkar, Ph.D. (Arizona State) – query optimization, indexing, data analytics, big data; I. Pivkina, Ph.D. (Kentucky) – artificial intelligence, computer science education, data mining; E. Pontelli, Ph.D. (New Mexico State) – parallel processing, logic programming, knowledge representation, bioinformatics, assistive technologies; J. Reynolds (UIUC) – network and security; M. Song, Ph.D. (Washington) – statistical computing, systems biology, bioinformatics, computer vision; Z. Toups, Ph.D. (Texas A&M) – digital games, human-computer interaction, mixed reality; S. Tran, Department Head, Ph.D. (Texas-El Paso) – artificial intelligence, knowledge representation, planning, logic programming, non-monotonic reasoning; R. Vishwanathan, Ph.D. (North Texas) – cryptography, theoretical and applied, security, privacy; T. Wang, Ph.D. (University of South Florida) – cyber-physical system security, web security, network security.

**College Faculty:**

- S. Cooper, Ph.D. (New Mexico State) – computer networks; E. Steiner, Ph.D. (Oklahoma State) – computer science education
Computer Science Courses

C S 111. Computer Science Principles
4 Credits (3+2P)
This course provides a broad and exciting introduction to the field of computer science and the impact that computation has today on every aspect of life. It focuses on exploring computing as a creative activity and investigates the key foundations of computing: abstraction, data, algorithms, and programming. It looks into how connectivity and the Internet have revolutionized computing and demonstrates the global impact that computing has achieved, and it reveals how a new student in computer science might become part of the computing future.
Prerequisite(s): MATH 1215 or higher.

C S 117. Introduction to Computer Animation
3 Credits (3)
Introductory course for learning to program with computer animation as well as learning basic concepts in computer science. Students create interactive animation projects such as computer games and learn to use software packages for creating animations in small virtual worlds using 3D models. Recommended for students considering a minor/major in computer science or simply interested in beginning computer animation or programming.

C S 151. C++ Programming
3 Credits (2+2P)
Introduction to object-oriented programming in the C++ language. The focus will be on preparing students to use C++ in their own areas. No prior programming experience is required. Taught with C S 451.
Prerequisite: MATH 1215 or higher.

Learning Outcomes
1. Use various data types and the corresponding operations. Write C++ programs that contain expressions, program control, functions, arrays, and input/output
2. Explain basic object-oriented programming concepts. Demonstrate proficiency in using classes, inheritance, pointers, streams, and recursion

C S 152. Java Programming
3 Credits (2+2P)
Programming in the Java language. May be repeated up to 3 credits.
Prerequisite(s): MATH 1215 or higher.

C S 153. Python Programming I
3 Credits (3)
This course is an introduction to programming in the Python language, covering fundamental scripts, data types and variables, functions, and simple object creation and usage. The focus will be on preparing students to use Python in their own areas. No prior programming experience is required. Taught with C S 453.
Prerequisite: MATH 1215 or higher.

Learning Outcomes
1. Develop an algorithm to solve a problem
2. Demonstrate the ability to use Python data types: int, float, strings, and lists; and the built-in functions associated with those data types
3. Edit and debug programs using the Spyder IDE for Python
4. Implement algorithms using the Python features of assignment, input, output, branches, loops, and functions
5. Explain the fundamental concepts of object-oriented programming with Python
6. Design and implement Python classes based on given attributes and behaviors
7. Work with existing Python modules such as math, random, and os
8. Write Python programs that input data from files and store results in files

C S 154. Python Programming II
3 Credits (3)
This course covers advanced Python programming, including classes, objects, and inheritance, embedded programming in domain applications, database interaction, and advanced data and text processing. The focus will be on preparing students to use Python in their own areas.
Prerequisite(s): C S 153 or C S 453.

C S 158. R Programming I
3 Credits (3)
This course is an introduction to data processing in the R language, covering fundamental script configuration, data types and data collections, R control structures, and basic creation of graphs and data visualizations. This course will not focus on the statistical capabilities of R, though some basic statistical computations will be used.
Prerequisite(s): MATH 1220G.

C S 171G. Introduction to Computer Science
4 Credits (3+2P)
Computers are now used widely in all area of modern life. This course provides understanding of the theoretical and practical foundations for how computers work, and provides practical application and programming experience in using computers to solve problems efficiently and effectively. The course covers broad aspects of the hardware, software, and mathematical basis of computers. Weekly labs stress using computers to investigate and report on data-intensive scientific problems. Practical experience in major software applications includes an introduction to programming, word processing, spreadsheets, databases, presentations, and Internet applications.
Prerequisite(s): MATH 1130G or MATH 1215 or higher.

C S 172. Computer Science I
4 Credits (3+2P)
Computational problem solving; problem analysis; implementation of algorithms using Java. Object-oriented concepts, arrays, searching, sorting, and recursion. Taught with C S 460
Prerequisite: (A C or better in either MATH 1250G or MATH 1430G) OR (A C or better in MATH 1220G and a 1 or better in the CS Placement Test).

Learning Outcomes
1. Develop algorithms to solve problems
2. Implement algorithms using the fundamental programming features of sequence, selection, iteration, and recursion
3. Apply an understanding of primitive and object data types
4. Design and implement classes based on given attributes and behaviors
5. Explain the fundamental concepts of object-oriented programming

C S 209. Special Topics.
1-3 Credits
May be repeated for a maximum of 12 credits.
C S 271. Object Oriented Programming  
4 Credits (3+2P)
Prerequisite: At least a C- in C S 172 or E E 112.

Learning Outcomes
1. Develop an algorithm to solve a problem. Implement algorithms using the C and C++ languages including imperative and object-oriented language features. Beyond what was learned in C S 172, E E 112, or E E 161 demonstrate a noticeable increase in understanding of problem analysis and program design. Demonstrate proficiency in using control structures including if statements (single selection), switch (multiple selection), and loops (repetition). Demonstrate proficiency in using arrays and functions Create UML class and relationship diagrams. Design a class to model a real-world person, place, thing, or event. Use editing and debugging software to create, debug, and test C and C++ programs. Understand the basic terminology used in object-oriented programming. 1 Create a make file to build an executable from a set of C or C++ source files.

C S 272. Introduction to Data Structures  
4 Credits (3+2P)
Design, implementation, use of fundamental abstract data types and their algorithms: lists, stacks, queues, deques, trees; imperative and declarative programming. Internal sorting; time and space efficiency of algorithms. Taught with C S 463.
Prerequisite: At least a C- in C S 172, or placement.

Learning Outcomes
1. Be able to implement and use lists Be able to implement and use stacks Be able to implement and use queues Be able to implement and use trees Be able to perform the run time analysis of basic algorithms using Big O notation Be able to implement, use, and analyze searching algorithms Be able to solve a problem recursively Take a problem statement from a user and convert it into a Java program that fulfills the user’s needs Create object oriented Java classes that effectively separate and hide implementation details from client applications

C S 273. Machine Programming and Organization  
4 Credits (3+2P)
Computer structure, instruction execution, addressing techniques; programming in machine and assembly languages. Taught with C S 464.
Prerequisite: At least a C- in C S 172 or E E 112.

Learning Outcomes
1. Describe the architecture of a microcontroller, the interconnections between the components, and the basic units inside the CPU Use signed and unsigned numbers, the associated branching instructions, and the corresponding flags in the status register Explain immediate, direct, indirect addressing modes, their opcode and operands, and their utilities Map high-level programming language features to assembly instructions, including loops, conditionals, procedure calls, value and reference parameter passing, return values, and recursion Interface with I/O devices including LED and sensors via digital input and output, and analog-to-digital conversion Program timers/ counters and interrupts to control real-time applications Design an assembly program

C S 278. Discrete Mathematics for Computer Science  
4 Credits (3+2P)
Discrete mathematics required for Computer Science, including the basics of logic, number theory, methods of proof, sequences, mathematical induction, set theory, counting, and functions. Taught with C S 465.
Prerequisite: At least C- in C S 172.

Learning Outcomes
1. Use logic to specify precise meaning of statements, demonstrate the equivalence of statements, and test the validity of arguments Construct and recognize valid proofs using different techniques including the principle of mathematical induction Use summations, formulas for the sum of arithmetic and geometric sequences Explain and apply the concepts of sets and functions Apply counting principles to determine the number of various combinatorial configurations

C S 343. Algorithm Design & Implementation  
3 Credits (3)
Prerequisite: At least a C- in C S 272, or consent of instructor.

Learning Outcomes
1. Be able to use and implement sorting algorithms Be able to design and implement graph algorithms Be able to design and implement algorithms using the divide-and-conquer technique Be able to design and implement algorithms using the greedy technique Be able to design and implement algorithms using the dynamic programming technique Be able to use and implement balanced search trees Be able to use and implement hashing techniques Be able to perform the run time analysis of basic algorithms using Big O notation

C S 370. Compilers and Automata Theory  
4 Credits (3+2P)
Methods, principles, and tools for programming language processor design; basics of formal language theory (finite automata, regular expressions, context-free grammars); development of compiler components. Taught with C S 466.
Prerequisite: At least a C- in C S 271, C S 272, and C S 273.

Learning Outcomes
1. Understand the language theory concepts of regular languages, context free languages, regular expressions, context free grammars, and formal language hierarchy Use Thompson’s construction to convert from regular expression to NFA, and subset construction to convert from NFA to DFA Apply recursive descent parsing in programming a parser of a small grammar Understand the ideas in LL and LR parsing of context-free language classes Understand and use table-driven top-down (LL(1)) and bottom up (SLR) parsing to parse a sentence
C S 371. Software Development
4 Credits (3+2P)
Software specification, design, testing, maintenance, documentation; informal proof methods; team implementation of a large project. Taught with C S 468.
Prerequisite: At least a C- in C S 271 and C S 272.
Learning Outcomes
1. Understand and explain the activities and structure of different styles of software development processes, including waterfall, (spiral,) iterative, and agile methodologies
2. Apply requirements knowledge and techniques to create functional and non-functional requirements for a software system
3. Apply high and low level design ideas to create an object-oriented design of a software system
4. Use good design and programming ideas to implement individual and team software systems in compiled OOP languages
5. Apply white and black box testing techniques and tools to individual and team software development
6. Use UML class diagrams (and sequence diagrams) to capture aspects of system design and/or requirements (domain)
7. Use practical software development tools, including version control systems, automated build tools, and testing tools

C S 382. Modern Web Technologies
3 Credits (3)
In this course, we will take a full-stack approach to modern web application design. We will start with the fundamentals including HTML5, CSS3, Javascript, JSON, and the underlying networking concepts and protocols driving the modern web. We will then move on to more advanced topics including javascript backend development with Node.js, NoSQL database design with MongoDB, cloud computing, and responsive web design. Finally, we cover advanced topics including the design and implementation of browser extensions and real-time web technologies like WebRTC and WebSockets. Consent of Instructor required. Taught with: C S 532.
Learning Outcomes
1. Understand the fundamental technologies and operation of the web.
3. Be fluent in the application of emerging web technologies like browser extensions, WebSockets, and WebRTC. Use existing materials and references on the web to learn new skills.

C S 372. Data Structures and Algorithms
4 Credits (3+2P)
Prerequisite: At least a C- in CS 272 and C S 278.
Learning Outcomes
1. Analyze the growth of functions via asymptotic notation
2. Evaluate the asymptotic running time of a given algorithm
3. Solve recurrence relations of the kinds encountered in algorithm analysis
4. Design algorithms using the divide-and-conquer technique
5. Design algorithms using the greedy technique
6. Design algorithms using the dynamic-programming technique
7. Use and analyze balanced binary search trees
8. Analyze the design, correctness, and time complexity of basic graph algorithms

C S 380. Introduction to Cryptography
3 Credits (3)
The course covers basic cryptographic primitives, such as symmetric, public-key ciphers, digital signature schemes, and hash functions, and their mathematical underpinnings. Course helps students understand basic notions of security in a cryptographic sense: chosen plaintext and chosen ciphertext attacks, games, and reductions. Course also covers computational number theory relevant to cryptography. Consent of Instructor required. Taught with: C S 525.
Prerequisite: C S 278 (or equivalent) with a C or better.
Learning Outcomes
1. Describe basic cryptographic primitives, including symmetric ciphers, asymmetric ciphers, digital signatures, message authentication codes, and hash functions.
2. Understand the mathematical, fundamental underpinnings of cryptography, and how to reason about the security of crypto primitives: indistinguishability (IND) properties of ciphertexts, CPA/CCA games, and reductions to fundamental math assumptions.
3. Be able to discuss number theory/algebra underpinning the design of cryptographic primitives, in some depth.

C S 409. Independent Study
1-6 Credits (1-6)
Faculty supervised investigation, to culminate in a written report. May be repeated up to 6 credits.
Prerequisite(s): Written agreement with faculty supervisor.

C S 419. Computing Ethics and Social Implications of Computing
1 Credit (1)
An overview of ethics for computing majors includes: history of computing, intellectual property, privacy, ethical frameworks, professional ethical responsibilities, and risks of computer-based systems.
Prerequisite: At least a C- in C S 371.
Learning Outcomes
1. Understand the fundamental technologies and operation of the web.
3. Be fluent in the application of emerging web technologies like browser extensions, WebSockets, and WebRTC. Use existing materials and references on the web to learn new skills.

C S 448. Senior Project
4 Credits (4)
Capstone course in which C S majors work in teams and apply computer science skills to complete a large project. Restricted to: C S majors.
Prerequisite: At least a C- in C S 370 and C S 371.
Learning Outcomes
1. Apply design and development principles in the construction of software systems of varying complexity. Apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the tradeoffs involved in design choices. Design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs.
2. Use current techniques, skills, and tools necessary for computing practice. Analyze a problem, and identify and define the computing requirements appropriate to its solution. Function effectively as teams to accomplish a common goal. Communicate effectively with a range of audiences.
C S 449. Senior Thesis
4 Credits (4)
Capstone course in which C S majors apply computer science skills to complete a research project, culminating in a written thesis report. Restricted to: C S majors.
Prerequisite: At least a C- in C S 370 and C S 371.
Learning Outcomes
1. Apply design and development principles in the construction of software systems of varying complexity. Apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the tradeoffs involved in design choices. Design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs. Use current techniques, skills, and tools necessary for computing practice. Analyze a problem, identify, and define the computing requirements appropriate to its solution. Communicate effectively with a range of audiences via presentations and technical reports.

C S 451. C++ Programming
3 Credits (3)
Programming in the C language. Taught with C S 151. Required more advanced graduate work than C S 151. Recommended for nonmajors only. Not for CS undergraduate students.
Learning Outcomes
1. Use various data types and the corresponding operations. Write C++ programs that contain expressions, program control, functions, arrays, and input/output. Explain basic object-oriented programming concepts. Demonstrate proficiency in using classes, inheritance, pointers, streams, and recursion.

C S 452. Java Programming
3 Credits (2+2P)
Programming in the Java language. More advanced than C S 152. Recommended for nonmajors only. Not for CS undergraduate standing. May be repeated up to 3 credits.

C S 453. Python Programming I
3 Credits (3)
This course is an introduction to programming in the Python language, covering fundamental scripts, data types and variables, functions, and simple object creation and usage. The focus will be on preparing students to use Python in their own areas. For graduate students only. Has more advanced work than C S 154, and does not count towards CS major requirements. Not for CS undergraduate students. May be repeated up to 3 credits. Restricted to: exclude C S majors.
Prerequisite(s): C S 153 or C S 453.

C S 454. Python Programming II
3 Credits (3)
This course covers advanced Python programming, including classes, objects, and inheritance, embedded programming in domain applications, database interaction, and advanced data and text processing. The focus will be on preparing students to use Python in their own areas. For graduate students only. Has more advanced work than C S 154, and does not count towards CS major requirements. Not for CS undergraduate students. May be repeated up to 3 credits. Restricted to: exclude C S majors.
Prerequisite(s): C S 153 or C S 453.

C S 458. R Programming I
3 Credits (3)
This course is an introduction to data processing in the R language, covering fundamental script configuration, data types and data collections, R control structures, and basic creation of graphs and data visualizations. This course will not focus on the statistical capabilities of R, though some basic statistical computations will be used. For graduate students only. Has more advanced work than C S 158. Does not count towards CS major requirements. May be repeated up to 3 credits.
Prerequisite(s): Good understanding of college algebra or higher.

C S 460. Computer Science I Transition
3 Credits (3)
Computational problem solving; problem analysis; implementation of algorithms. Recursive structures and algorithms. For C S graduate students only; cannot be used to meet a C S student's program of study. Taught with C S 172.
Learning Outcomes
1. Develop algorithms to solve problems. Implement algorithms using the fundamental programming features of sequence, selection, iteration, and recursion. Apply an understanding of primitive and object data types. Design and implement classes based on given attributes and behaviors. Explain the fundamental concepts of object-oriented programming.

C S 462. Object Oriented Programming Transition
3 Credits (3)
Prerequisite: At least a C- in C S 172 or C S 460 or consent of instructor.
Learning Outcomes
1. Develop an algorithm to solve a problem. Implement algorithms using the C and C++ languages including imperative and object-oriented language features. Demonstrate a noticeable increase in understanding of problem analysis and program design beyond what was learned in C S 172, E E 112, or E E 161. Demonstrate proficiency in using control structures including if statements (single selection), switch (multiple selection), and loops (repetition). Demonstrate proficiency in using arrays and functions. Create UML class and relationship diagrams. Design a class to model a real-world person, place, thing, or event. Use editing and debugging software to create, debug, and test C and C++ programs. Understand the basic terminology used in object-oriented programming. Create a make file to build an executable from a set of C or C++ source files.
C S 463. Introduction to Data Structures Transition
3 Credits (3)
Design, implementation, use of fundamental abstract data types and their algorithms: lists, stacks, queues, deques, trees; imperative and declarative programming. Internal sorting; time and space efficiency of algorithms. Cannot be used in a C S student’s program of study. Consent of Instructor required. Taught with C S 272.
Prerequisite: At least a C- in C S 172 or C S 460 or consent of instructor.
Learning Outcomes
1. Be able to implement and use lists
2. Be able to implement and use stacks
3. Be able to implement and use queues
4. Be able to implement and use trees
5. Be able to perform the run time analysis of basic algorithms using Big O notation
6. Be able to implement, use, and analyze searching algorithms
7. Be able to solve a problem recursively
8. Take a problem statement from a user and convert it into a Java program that fulfills the user’s needs
9. Create object oriented Java classes that effectively separate and hide implementation details from client applications

C S 464. Machine Programming and Organization Transition
3 Credits (3)
Computer structure, instruction execution, addressing techniques; programming in machine and assembly languages. Cannot be used in a C S student’s program of study. Consent of Instructor required. Taught with C S 273.
Prerequisite: At least a C- in C S 172 or C S 460 or consent of instructor.
Learning Outcomes
1. Describe the architecture of a microcontroller, the interconnections between the components, and the basic units inside the CPU
2. Use signed and unsigned numbers, the associated branching instructions, and the corresponding flags in the status register
3. Explain immediate, direct, indirect addressing modes, their opcode and operands, and their utilities
4. Map high-level programming language features to assembly instructions, including loops, conditionals, procedure calls, value and reference parameter passing, return values, and recursion
5. Interface with I/O devices including LED and sensors via digital input and output, and analog-to-digital conversion
6. Program timers/counters and interrupts to control real-time applications
7. Design an assembly program

C S 465. Discrete Math for Computer Science Transition
3 Credits (3)
Logical connectives, sets, functions, relations, graphics, trees, proofs, induction, and application to computer science. For C S graduate students only. Cannot be used in a C S student’s program of study. Consent of Instructor required. Taught with C S 278.
Prerequisite: At least a C- in C S 172 or C S 460 or consent of instructor.
Learning Outcomes
1. Use logic to specify precise meaning of statements, demonstrate the equivalence of statements, and test the validity of arguments
2. Construct and recognize valid proofs using different techniques including the principle of mathematical induction
3. Use summations, formulas for the sum of arithmetic and geometric sequences
4. Explain and apply the concepts of sets and functions
5. Apply counting principles to determine the number of various combinatorial configurations

C S 466. Compilers and Automata Transition
3 Credits (3)
Methods, principles, and tools for programming language processor design; basics of formal language theory (finite automata, regular expressions, context-free grammars); development of compiler components. For C S graduate students only; cannot be used in a students program of study. Taught with C S 370.
Prerequisite: At least a C in (C S 271 or C S 462), in (C S 272 or C S 463), in (C S 273 or C S 464), or consent of instructor.
Learning Outcomes
1. Understand the language theory concepts of regular languages, context free languages, regular expressions, context free grammars, and formal language hierarchy
2. Use Thompson’s construction to convert from regular expression to NFA, and subset construction to convert from NFA to DFA
3. Analyze searching algorithms
4. Apply a parser of a small grammar
5. Understand the ideas in LL and LR parsing of context-free language classes
6. Understand and use table-driven top-down (LL(1)) and bottom up (SLR) parsing to parse a sentence

C S 468. Software Development Transition
3 Credits (3)
Software specification, design, testing, maintenance, documentation; informal proof methods; team implementation of a large project. For C S graduate students only. Cannot be used in a C S student’s program of study. Consent of Instructor required. Taught with C S 371.
Prerequisite: At least a C in (C S 271 or C S 462), in (C S 272 or C S 463), or consent of instructor.
Learning Outcomes
1. Understand and explain the activities and structure of different styles of software development processes, including waterfall, (spiral,) iterative, and agile methodologies
2. Apply requirements knowledge and techniques to create functional and non-functional requirements for a software system
3. Apply high and low level design ideas to create an object-oriented design of a software system
4. Use good design and programming ideas to implement individual and team software systems in compiled OOP languages
5. Apply white and black box testing techniques and tools to individual and team software development
6. Use UML class diagrams (and sequence diagrams) to capture aspects of system design and/or requirements (domain)
7. Use practical software development tools, including version control systems, automated build tools, and testing tools
C S 469. Data Structure and Algorithms Transition
3 Credits (3)
Prerequisite: At least a C- in C S 272 or C S 463, in C S 278 or C S 465, or consent of instructor.

Learning Outcomes
1. Analyze the growth of functions via asymptotic notation Evaluate the asymptotic running time of a given algorithm Solve recurrence relations of the kinds encountered in algorithm analysis Design algorithms using the divide-and-conquer technique Design algorithms using the greedy technique Design algorithms using the dynamic-programming technique Use and analyze balanced binary search trees Analyze the design, correctness, and time complexity of basic graph algorithms

C S 471. Programming Language Structure I
3 Credits (3)
Syntax, semantics, implementation, and application of programming languages; abstract data types; concurrency. Not for C S graduate students.
Prerequisite: At least a C- in C S 370 and C S 371.

Learning Outcomes
1. Improve the background for choosing appropriate programming languages for certain classes of programming problems Increase the ability to learn new programming languages Critically evaluate what paradigm and language are best suited for a new problem Demonstrate the use of the primary segments for a running program Apply the principles of functional programming Apply the principles of logic programming Program a simple parallel program with threads Program in at least five different programming languages Program in C to demonstrate architecture details

C S 473. Architectural Concepts I
3 Credits (3)
Comparison of architectures to illustrate concepts of computer organization; relationships between architectural and software features. Not for C S graduate students.
Prerequisite: At least a C- in C S 273 and C S 370.

Learning Outcomes
1. Explain the concepts in instruction set architecture Analyze the behavior of pipelined CPU data path and control Analyze behavior and performance of memory hierarchies with different cache designs Describe the implementation of binary integer and floating point representation and arithmetic Identify and analyze performance of instruction level parallelism and multi-core parallelism Describe virtual memory and architectural support for operating systems Understand the organization of various kinds of secondary storage devices, and their performance and tradeoffs Create software that demonstrates performance of architectural features and evaluate the effects of software change

C S 474. Operating Systems I
3 Credits (3)
Operating system principles and structures, and interactions with architectures. Not for C S graduate students.
Prerequisite: At least a C- in C S 273, C S 371, and C S 372.

Learning Outcomes
1. Explain OS control and management of hardware resources Explain OS management and execution of processes Explain OS control and management of real and virtual memory Explain classical concurrency issues and their solutions Analyze and implement threads Analyze OS interaction with networks and architecture

C S 475. Artificial Intelligence I
3 Credits (3)
Fundamental principles and techniques in artificial intelligence systems. Intelligent Agents; solving problems by searching; local search techniques; game-playing agents; constraint satisfaction problems; knowledge representation and reasoning. Further selected topics may also be covered. Not for C S graduate students. Taught with C S 505.
Prerequisite: At least a C- in C S 272 and C S 278.

Learning Outcomes
1. Use various search algorithms commonly used in problem-solving Use methods for solving constraint satisfaction problems Use propositional and first-order logic to represent knowledge Use logical inference methods to derive conclusions from a knowledge base Use adversarial search for game-playing agents Analyze the different search strategies Design and Implement heuristic search for problem-solving

C S 476. Computer Graphics I
3 Credits (3)
Languages, programming, devices, and data structures for representation and interactive display of complex objects. Not for C S graduate students. Taught with C S 506.
Prerequisite: At least C- in C S 370 or C S 371.

Learning Outcomes

C S 477. Digital Game Design
3 Credits (3)
An introduction to digital game design. Topics include design, development, and playtesting of games. The course is structured to use team-based learning. Not for C S graduate students. Taught with C S 517.
Prerequisite/Corequisite: C S 371.

Learning Outcomes
1. Describe, analyze, and/or critique games with a consistent vocabulary Design, develop, and playtest games Understand the formal systems of games Communicate game designs through demonstrations and presentations
C S 478. Computer Security
3 Credits (3)
Introduction to the art and science of computer security. Fundamentals of computer security including elementary cryptography, authentication and access control, security threats, attacks, detection and prevention in application software, operating systems, networks and databases. Not for C S graduate students. Taught with C S 513.
Prerequisite: At least a C- in C S 272, C S 273 or consent of instructor.
Learning Outcomes
1. Describe fundamental concepts in security and privacy
2. Understand requirements of security in different contexts
3. Describe practical implementation challenges in security/privacy system design
4. Explain at a high-level symmetric and public key cryptography
5. Explain various access control mechanisms such as authentication, authorization
6. Understand aspects of secure system design that a computer programmer/engineer needs to account for

C S 479. Special Topics
1-12 Credits
Topics announced in the Schedule of Classes. May be repeated under different subtitles. Not for C S graduate students. May be repeated up to 12 credits.

C S 480. Linux System Administration
3 Credits (3)
Basic system administration for Linux environments. Topics include user managements, file systems, security, backups, system monitoring, kernel configuration and other relevant aspects of system administration. Not for Computer Science graduate students.
Learning Outcomes
1. Be able to properly set up, configure, and maintain a Linux-based set of networked computers with shared resources
2. Understand the significance of proper administration of systems and its impact on users, their data and computational resources, and the security of the overall installation

C S 481. Visual Programming
3 Credits (3)
Design and implementation of programs using visual (i.e. dataflow or diagrammatic) programming techniques, with an emphasis on real-time data processing. Students will learn how to design visual programs, including how to handle cycles and state maintenance, and will learn to process audio, video, and other data using visual programs. Not for C S graduate students. Taught with C S 518.
Prerequisite: At least a C- in C S 272 and C S 278.
Learning Outcomes
1. Develop software in graph-based visual environments
2. Understand flows of control in visual programming environments
3. Use signals, digital and analog, to drive software
4. Communicate software design and evaluation with presentations, demos, and reports

C S 482. Database Management Systems I
3 Credits (3)
Database design and implementation; models of database management systems; privacy, security, protection, recovery. Not for C S graduate students. Taught with C S 502.
Prerequisite: At least a C- in C S 272 and C S 278.
Learning Outcomes
1. Utilize the basic concepts of relational database model
2. Utilize database query languages (e.g. SQL)
3. Identify data integrity and security requirements
4. Analyze, capture, and model user requirements for building database systems using conceptual models
5. Design and normalize relational schemas
6. Apply application models to implement a database system

C S 484. Computer Networks I
3 Credits (3)
Fundamental concepts of computer communication networks: layered network architecture, network components, protocol stack and service. Example of application, transport, network and data link layers, protocols primarily drawn from the Internet (TCP, UDP, and IP) protocol multimedia networks; network management and security. Not for C S graduate students. Taught with C S 504.
Prerequisite: At least a C- in C S 272 and C S 273.
Learning Outcomes
1. Explain the layered model of networking using the OSI and TCP/IP models
2. Describe the purpose and concepts of each layer in the OSI and TCP/IP models
3. Describe IP as a particular network layer protocol
4. Describe the need for link layer protocols
5. Describe Ethernet (11) and WiFi (15) as particular data link layer protocols
6. Describe and analyze routing and routing issues
7. Describe and analyze data link layer switching
8. Describe the need for application protocols such as HTTP
9. Explain other network issues such as multicasting and audio/video data streaming
10. Implement socket-based network programs

C S 485. Human-Centered Computing
3 Credits (3)
Covers iterative, human-centered interface design, including prototyping and evaluation. Basics of graphic design and visualization. Not for C S graduate students. Taught with C S 515.
Prerequisite: At least C- in C S 371.
Learning Outcomes
1. Describe, analyze, and/or critique a device interface using a design vocabulary
2. Enact a human-centered process of interaction design: gather data; develop a data-driven design; iterate design through testing; evaluate results
3. Conduct human-computer interaction research by proposing, developing, and conducting experiments; analyzing data; and developing synthesized results
4. Communicate design and evaluation with presentations, demos, and reports
5. Implement a variety of interaction techniques
C S 486. Bioinformatics
3 Credits (3)
Introduction to bioinformatics and computational biology. Computational approaches to sequences analysis, protein structure prediction and analysis, and selected topics from current advances in bioinformatics. Not for C S graduate students. Taught with C S 516.
Prerequisite: At least a C- in C S 272 and C S 278.
Learning Outcomes
1. Explain the biology motivation of a bioinformatics question Formulate a computational problem and its solution to address a molecular biology question Implement basic bioinformatics algorithms such as sequence alignment, pattern matching, and genome assembly Evaluate the performance of a bioinformatics algorithm on real data sets Argue the correctness of a bioinformatics algorithm Analyze the complexity of a bioinformatics algorithm

C S 487. Applied Machine Learning I
3 Credits (3)
An introductory course on practical machine learning. An overview of concepts for both unsupervised and supervised learning. Topics include classification, regression, clustering, and dimension reduction. Classical methods and algorithms such as linear regression, neural networks, support vector machines, and ensemble approaches. Recent techniques such as deep learning. Focused on applying of machine learning techniques in application domains. Not for Graduate Majors. Taught with: C S 519.
Prerequisite: At least a C- in C S 272, MATH 1511G; or consent of instructor.
Learning Outcomes
1. Implement and utilize different data processing techniques Differentiate and assess several dimension reduction techniques Utilize several classifiers (SVM, Decision tree, k-Nearest Neighbor, and logistic regression) and differentiate their advantages and disadvantages Explain and demonstrate regression analysis Describe and illustrate clustering approaches Apply ensemble learning approaches
2. Implement several neural network classifiers, including deep learning models

C S 488. Introduction to Data Mining
3 Credits (3)
Techniques for exploring large data sets and discovering patterns in them. Data mining concepts, metrics to measure its effectiveness. Methods in classification, clustering, frequent pattern analysis. Selected topics from current advances in data mining. Taught with C S 508.
Prerequisite: At least a C- in C S 272 and C S 278.
Learning Outcomes
1. Explain and recognize different data mining tasks such as data pre-processing, visualization, classification, regression, clustering, association rules, and anomaly detection Apply classical data mining / machine learning algorithms for classification, clustering, association rules, and anomaly detection Evaluate and compare the performance of different data mining / machine learning algorithms Utilize data mining algorithms to analyze data in real applications using a data mining tool

C S 489. Bioinformatics Programming
3 Credits (3)
Computer programming to analyze high-throughput molecular biology data including genomic sequences, bulk and single-cell transcriptome, epigenome, and other omics data. Quality control, library size normalization, confounding effect removal, clustering, statistical modeling, trajectory inference, and visualization. Taught with C S 509. May be repeated up to 3 credits.
Learning Outcomes
1. Write R scripts and functions to manipulate biological sequences, genome annotation, and gene expression data Perform high-throughput data analysis with established R packages Detect differential gene expression on RNA sequencing data Perform single-cell RNA sequencing data analysis (quality control, library size normalization, confounding effect removal, modeling) Assess statistical significance of analytical results Create automatic data analysis pipeline to link multiple software packages

C S 491. Parallel Programming
3 Credits (3)
Programming of shared memory and distributed memory machines; tools and languages for parallel programming; techniques for parallel programming; parallel programming environments. Not for C S graduate students. Taught with C S 521.
Prerequisite: At least a C- in C S 370 or consent of instructor.
Learning Outcomes
1. Describe existing parallel architectures including shared memory versus distributed memory platforms Apply basic techniques for organizing parallel computations Apply basic techniques for performance measurement and theoretical limitations of parallelism Explain alternative parallel techniques and hardware Perform performance Analysis of different parallel programming techniques Program shared memory machines using threads, processes, and the OpenMP library Program using a message passing paradigm and obtain working knowledge of the Message Passing Interface (MPI)

C S 493. Algorithm Design and Implementation
3 Credits (3)
This course introduces the basic knowledge of designing classical algorithms and implementing these algorithms using a programming language. In particular, the course teaches various data structures, including graphs and balanced binary search trees, and efficient schemes to implement these data structures. This course also teaches basic algorithm design techniques including divide-and-conquer, greedy scheme, and dynamic programming. This course covers graph algorithms, including graph traversals (depth-first search and breadth-first search), connectivity, shortest paths, and minimum spanning trees. Graduate standing. Not for CS students. Taught with C S 343.
Prerequisite: At least a C- in C S 272, or Consent of Instructor.
Learning Outcomes
1. Be able to use and implement sorting algorithms Be able to design and implement graph algorithms Be able to design and implement algorithms using the divide-and-conquer technique Be able to design and implement algorithms using the greedy technique Be able to design and implement algorithms using the dynamic programming technique Be able to use and implement balanced search trees Be able to use and implement hashing techniques Be able to perform the run time analysis of basic algorithms using Big O notation
C S 494. Introduction to Smart Grids
3 Credits (3)
This course is an introduction to the technologies and design strategies associated with the Smart Grid. The emphasis will be on the development of communications, energy delivery, coordination mechanisms, and management tools to monitor transmission and distribution networks. Topics include: Smart grid introduction and evolution; Power systems; Networking and transport control; Artificial intelligence & agent coordination; Data mining for smart grids. Taught with C S 514.
Prerequisite: At least a C- in C S 272 and a C- in E E 230; or Consent of instructor.

Learning Outcomes
1. Get basic understanding of how conventional power system is operated and protected
2. Understand and use basic knowledge of the different units in smart grids

C S 496. Cloud and Edge Computing
3 Credits (3)
The course presents a top-down view of cloud computing, from applications and administration to programming and infrastructure. Its main focus is on the concepts of networking and parallel programming for cloud computing and large scale distributed systems which form the cloud infrastructure. The topics include: overview of cloud computing, cloud systems, parallel processing in the cloud, distributed storage systems, virtualization, security in the cloud, and multicore operating systems. Students will study state-of-the-art approaches to cloud computing followed by large cloud corporations, namely Google, Amazon, Microsoft, and Yahoo. Students will also apply what they learn through project developments using Amazon Web Services. Not for graduate CS majors. Taught with: C S 522.
Prerequisite: At least a C- in C S 372; background in C S 484/C S 504 is preferred or consent of instructor.

Learning Outcomes
1. The emphasis of the course will be on the understanding the concepts and the engineering trade-offs involved in the design of cloud computing systems
2. Cloud deployment models, cloud service models (software-as-a-service, infrastructure-as-a-service, protocol-as-a-service), cloud architecture, cloud-edge security, service level agreements, and load balancing in cloud and datacenters
3. Learn about cloud computing, especially what are their fundamental components, how these components interact, and how the technology is evolving for the future (edge computing, cloudlets, mobile edge computing, etc.).

C S 504. Computer Networks I
3 Credits (3)
Fundamental concepts of computer communication networks: layered network architecture, network components, protocol stack and service. Example of application, transport, network and data link layers, protocols primarily drawn from the Internet (TCP, UDP, and IP) protocol suite; local and wide area networks, wireless and mobile networks, multimedia networks; network management and security; taught with C S 484; requires more advanced graduate work than C S 484. Students are expected to have solid knowledge of data structures, machine-level programming. Knowledge of statistics (at the level of MATH 371 or MATH 470) is recommended.

Learning Outcomes
1. Explain the layered model of networking using the OSI and TCP/IP models
2. Describe the purpose and concepts of each layer in the OSI and TCP/IP models
3. Describe IP as a particular network layer protocol
4. Describe TCP and UDP as particular transport layer protocols
5. Describe Ethernet (802-11) and WiFi (802-15) as particular data link layer protocols
6. Describe and analyze routing and routing issues
7. Describe and analyze data link layer switching
8. Describe the need for application protocols such as HTTP
9. Explain other network issues such as multicasting and audio/video data streaming
10. Implement socket-based network programs

C S 505. Artificial Intelligence I
3 Credits (3)
Fundamental principles and techniques in artificial intelligence systems. Knowledge representation formalisms; heuristic problem solving techniques; automated logical deduction; robot planning methods; algorithmic techniques for natural language understanding, vision and learning; taught with C S 475; requires more advanced graduate work than C S 475. Students are expected to have strong knowledge of algorithms and data structures (at the level of C S 372).

Learning Outcomes
1. Use various search algorithms commonly used in problem-solving
2. Use methods for solving constraint satisfaction problems
3. Use propositional and first-order logic to represent knowledge
4. Use logical inference methods to derive conclusions from a knowledge base
5. Use adversarial search for game-playing agents
6. Analyze the different search strategies
7. Design and implement heuristic search for problem-solving

C S 506. Computer Graphics I
3 Credits (3)
Languages, programming, devices, and data structures for representation and interactive display of complex objects. Taught with C S 476. Requires more advanced graduate work than C S 476. Students are expected to have knowledge of compilers design and software engineering equivalent to C S 370 and C S 371.

Learning Outcomes
1. Techniques used in three-dimensional graphics
2. Computer Graphics implementation algorithms
3. Computer Graphics implementation algorithms
C S 508. Introduction to Data Mining
3 Credits (3)
Techniques for exploring large data sets and discovering patterns in them. Data mining concepts, metrics to measure its effectiveness. Methods in classification, clustering, frequent pattern analysis. Selected topics from current advances in data mining. Students are expected to have a preparation in Discrete Mathematics and Data Structures equivalent to C S 272 and C S 278. Requires more advanced graduate work than C S 488. Taught with: C S 488.

Learning Outcomes
1. Explain and recognize different data mining tasks such as data pre-processing, visualization, classification, regression, clustering, association rules, and anomaly detection
2. Apply classical data mining / machine learning algorithms for classification, clustering, association rules, and anomaly detection
3. Evaluate and compare the performance of different data mining / machine learning algorithms
4. Utilize data mining algorithms to analyze data in real applications using a data mining tool

C S 509. Bioinformatics Programming
3 Credits (3)
Computer programming to analyze high-throughput molecular biology data including genomic sequences, bulk and single-cell transcriptome, epigenome, and other omics data. Quality control, library size normalization, confounding effect removal, clustering, statistical modeling, trajectory inference, and visualization. Taught with C S 489. Requires more advanced graduate work than C S 489.

Learning Outcomes
1. Write R scripts and functions to manipulate biological sequences, genome annotation, and gene expression data Perform high-throughput data analysis with established R packages Detect differential gene expression on RNA sequencing data Perform single-cell RNA sequencing data analysis (quality control, library size normalization, confounding effect removal, modeling) Assess statistical significance of analytical results Create automatic data analysis pipeline to link multiple software packages

C S 510. Automata, Languages, Computability
3 Credits (3)
Regular and context-free languages, pushdown and finite-state automata, Turing machines, models of computation, halting problems. Students are expected to have knowledge of compilers design and algorithms equivalent to C S 370 and C S 372.

Learning Outcomes
1. Describe the language accepted by an automaton or generated by a regular expression or a context-free grammar Design automata, regular expressions and context-free grammars accepting or generating a certain language Prove properties of languages, grammars, and automata with formal mathematical methods Convert between equivalent deterministic and non-deterministic finite automata, and regular expressions Convert between equivalent context-free grammars and pushdown automata Define Turing machines performing simple tasks

C S 513. Computer Security
3 Credits (3)
Introduction to the art and science of computer security. Fundamentals of computer security including elementary cryptography, authentication and access control, security threats, attacks, detection and prevention in application software, operating systems, networks and databases. Taught with C S 478. Requires more advanced graduate work than C S 578. Recommended knowledge of materials in C S 272 and C S 273. May be repeated up to 3 credits.

Prerequisite: At least a C in C S 273 or consent of instructor.

Learning Outcomes
1. Describe fundamental concepts in security and privacy Understand requirements of security in different contexts Describe practical implementation challenges in security/privacy system design Explain at a high-level symmetric and public key cryptography Explain various access control mechanisms such as authentication, authorization Understand aspects of secure system design that a computer programmer/engineer needs to account for

C S 514. Introduction to Smart Grids
3 Credits (3)
This course is an introduction to the technologies and design strategies associated with the Smart Grid. The emphasis will be on the development of communications, energy delivery, coordination mechanisms, and management tools to monitor transmission and distribution networks. Topics include: Smart grid introduction and evolution; Power systems; Networking and transport control; Artificial intelligence & agent coordination; Data mining for smart grids. Taught with C S 494. Requires more advanced work than C S 494.

Prerequisite: At least a C- in C S 272 and a C- in E E 230; or Consent of instructor.

Learning Outcomes
1. Get basic understanding of how conventional power system is operated and protected
2. Understand and use basic knowledge of communication techniques in smart grids
3. Understand and use basic knowledge for the coordination of the different units in smart grids
4. Understand and apply data mining techniques for protecting smart grids
C S 515. Human-Centered Computing
3 Credits (3)
Covers iterative, human-centered interface design, including prototyping and evaluation. Basics of graphic design and visualization. Taught with C S 485. Requires more advanced graduate work than C S 485 with an emphasis on studying recent research in human-computer interaction. Students are expected to have knowledge of software engineering equivalent to C S 371.

Learning Outcomes
1. Describe, analyze, and/or critique a device interface using a design vocabulary
2. Enact a human-centered process of interaction design: gather data; develop a data-driven design; iterate design through testing; and evaluate results
3. Conduct human-computer interaction research by proposing, developing, and conducting experiments; analyzing data; and developing synthesized results
4. Communicate design and evaluation with presentations, demos, and reports
5. Implement a variety of interaction techniques

C S 516. Bioinformatics
3 Credits (3)
Introduction to bioinformatics and computational biology. Computational approaches to sequences analysis, protein structure prediction and analysis, and selected topics from current advances in bioinformatics; taught with C S 486; requires more advanced graduate work than C S 486. Students are expected to have knowledge of algorithms and data structures equivalent to C S 372 or exposure to Biology (equivalent to BIOL 2310 or BIOL 311).

Learning Outcomes
1. Explain the biology motivation of a bioinformatics question
2. Formulate a computational problem and its solution to address a molecular biology question
3. Implement basic bioinformatics algorithms such as sequence alignment, pattern matching, and genome assembly
4. Evaluate the performance of a bioinformatics algorithm on real data sets
5. Argue the correctness of a bioinformatics algorithm
6. Analyze the complexity of a bioinformatics algorithm

C S 517. Digital Game Design
3 Credits (3)
An introduction to digital game design. Topics include design, development, and playtesting of games. The course is structured to use team-based learning. Taught with C S 477. Requires more advanced graduate work than C S 477 with deeper attention to a team game project.

Learning Outcomes
1. Describe, analyze, and/or critique games with a consistent vocabulary
2. Design, develop, and playtest games
3. Understand the formal systems of games
4. Communicate game designs through demonstrations and presentations

C S 518. Visual Programming
3 Credits (3)
Design and implementation of programs using visual (i.e. dataflow or diagrammatic) programming techniques, with an emphasis on real-time data processing. Students will learn how to design visual programs, including how to handle cycles and state maintenance, and will learn to process audio, video, and other data using visual programs. Students must be in graduate standing to enroll. Taught with C S 481. Requires more advanced graduate work than C S 481.

Learning Outcomes
1. Develop software in graph-based visual environments
2. Understand flows of control in visual programming environments
3. Use signals, digital and analog, to drive software
4. Communicate software design and evaluation with presentations, demos, and reports

C S 519. Applied Machine Learning I
3 Credits (3)
An introductory course on practical machine learning. An overview of concepts for both unsupervised and supervised learning. Topics include classification, regression, clustering, and dimension reduction. Classical methods and algorithms such as linear regression, neural networks, support vector machines, and ensemble approaches. Recent techniques such as deep learning. Focused on applying of machine learning techniques in application domains. Taught with: C S 487. Requires more advanced graduate work than C S 487.

Learning Outcomes
1. Implement and utilize different data processing techniques
2. Differentiate and assess several dimension reduction techniques
3. Utilize several classifiers (SVM, Decision tree, k-Nearest Neighbor, and logistic regression) and differentiate their advantages and disadvantages
4. Explain and demonstrate regression analysis
5. Describe and illustrate clustering approaches
6. Apply ensemble learning approaches
7. Implement several neural network classifiers, including deep learning models

C S 521. Parallel Programming
3 Credits (3)
Programming of shared memory and distributed memory machines; tools and languages for parallel programming; parallelizing compilers; parallel programming environments; taught with C S 491; requires more advanced graduate work than C S 491. Students are expected to have knowledge of programming and machine organization equivalent to C S 271 and C S 273.

Learning Outcomes
1. Describe existing parallel architectures including shared memory versus distributed memory platforms
2. Apply basic techniques for organizing parallel computations
3. Apply basic techniques for performance measurement and theoretical limitations of parallelism
4. Explain alternative parallel techniques and hardware
5. Perform performance Analysis of different parallel programming techniques
6. Program shared memory machines using threads, processes, and the OpenMP library
7. Program using a message passing paradigm and obtain working knowledge of the Message Passing Interface (MPI)
C S 522. Cloud and Edge Computing
3 Credits (3)
The course presents a top-down view of cloud computing, from applications and administration to programming and infrastructure. Its main focus is on the concepts of networking and parallel programming for cloud computing and large scale distributed systems which form the cloud infrastructure. The topics include: overview of cloud computing, cloud systems, parallel processing in the cloud, distributed storage systems, virtualization, security in the cloud, and multicore operating systems. Students will study state-of-the-art approaches to cloud computing followed by large cloud corporations, namely Google, Amazon, Microsoft, and Yahoo. Students will also apply what they learn through project developments using Amazon Web Services. Might have additional requirements for graduate students. To enroll in this course a background in C S 484/C S 504 is preferred or have consent from the instructor. Taught with: C S 496. Requires more advanced graduate work than C S 496.

Learning Outcomes
1. The emphasis of the course will be on the understanding the concepts and the engineering trade-offs involved in the design of cloud computing systems
2. Cloud deployment models, cloud service models (software-as-a-service, infrastructure-as-a-service, protocol-as-a-service), cloud architecture, cloud-edge security, service level agreements, and load balancing in cloud and datacenters
3. Learn about cloud computing, especially what are their fundamental components, how these components interact, and how the technology is evolving for the future (edge computing, cloudlets, mobile edge computing, etc.).

C S 525. Introduction to Cryptography
3 Credits (3)
The course covers basic cryptographic primitives, such as symmetric, public-key ciphers, digital signature schemes, and hash functions, and their mathematical underpinnings. Course helps students understand basic notions of security in a cryptographic sense: chosen plaintext and chosen ciphertext attacks, games, and reductions. Course also covers computational number theory relevant to cryptography. Consent of Instructor required. Taught with: C S 380. Requires more advanced graduate work than C S 380.

Prerequisite: C S 278 (or equivalent) with a C or better.

Learning Outcomes
1. Describe basic cryptographic primitives, including symmetric ciphers, asymmetric ciphers, digital signatures, message authentication codes, and hash functions. Understand the mathematical, fundamental underpinnings of cryptography, and how to reason about the security of crypto primitives: indistinguishability (IND) properties of ciphertexts, CPA/CCA games, and reductions to fundamental math assumptions; Be able to discuss number theory/algebra underpinning the design of cryptographic primitives, in some depth.

C S 531. Principles of Virtual Reality
3 Credits (3)
This course is an introduction to building systems and doing research in/on virtual reality. We cover system design, development, and evaluation, with an emphasis on recent research in the space. We cover a range of methods, qualitative and quantitative, in order to develop insights into effective VR designs. Students in this class will develop a foundation in VR development; learn about current topics in VR; and design, develop, evaluate, and report on a VR system. Consent of Instructor required. Crosslisted with: C S 381.

Prerequisite(s): CS 485 (or equivalent).

Learning Outcomes
1. Design and develop systems in virtual reality.
2. Understand the variety of development techniques in VR.
3. Understand the state-of-the-art in VR systems.
4. Communicate understanding of people, designs, and evaluations through presentations, demos, and/or reports.

C S 532. Modern Web Technologies
3 Credits (3)
In this course, we will take a full-stack approach to modern web application design. We will start with the fundamentals including HTML5, CSS3, Javascript, JSON, and the underlying networking concepts and protocols driving the modern web. We will then move on to more advanced topics including javascript backend development with Node.js, NoSQL database design with MongoDB, cloud computing, and responsive web design. Finally, we cover advanced topics including the design and implementation of browser extensions and real-time web technologies like WebRTC and WebSockets. Consent of Instructor required. Taught with: C S 382. Requires more advanced graduate work than C S 382.

Learning Outcomes
1. Understand the fundamental technologies and operation of the web. Design and develop responsive interactive web sites. Deploy web applications on Cloud Computing Platforms. Leverage modern tools and packages to develop full stack web applications. Be fluent in the application of emerging web technologies like browser extensions, WebSockets, and WebRTC. Use existing materials and references on the web to learn new skills.

C S 570. Analysis of Algorithms
3 Credits (3)
Techniques for design and analysis of algorithms; time and space complexity; proving correctness of programs. Particular algorithms such as sorting, searching, dynamic programming. NP complete problems. Students are expected to have knowledge of algorithms and data structures equivalent to C S 372.

Learning Outcomes
1. Prove algorithm correctness by loop-invariant Prove an algorithm to be incorrect by counterexamples Develop efficient divide-and-conquer algorithms Design and analyze binary search tree algorithms Construct dynamic programming solutions Prove the correctness of dynamic programming solutions by contraposition Traverse graphs efficiently Find paths in graphs efficiently Determine if a problem is NP-Complete or NP-Hard 1

Basic concepts of quantum computing
C S 573. Architectural Concepts II
3 Credits (3)
Advanced topics related to computer architecture, guided by the current literature. Students are expected to have knowledge of computer architectures equivalent to C S 473 and of operating systems equivalent to C S 474. Crosslisted with: E E 564.

Learning Outcomes
1. Be able to explain the features in a modern multicore CPU architecture Be able to utilize hardware counter features of a CPU in performance evaluation Be able to explain the architecture of GPUs and their capabilities and drawbacks Be able to evaluate novel cutting-edge architectural features and designs Be able to present a research paper to an advanced audience

C S 574. Operating Systems II
3 Credits (3)
Advanced topics related to operating system principles, guided by the current literature. Students are expected to have knowledge of computer architectures and operating systems equivalent to C S 473 and C S 474.

Learning Outcomes
1. Further an understanding of the principles of operating systems. Develop insight into process management and scheduling issues. Understand memory management operation. Develop an understanding of file system implementation and of multiple levels of hardware support and management. Develop a deep understanding of the concepts of cooperating processes, including communication, synchronization, and deadlock (detection and avoidance). Be able to evaluate operating system features. Develop an understanding of the distributed operating system environment.

C S 575. Artificial Intelligence II
3 Credits (3)
Covers advanced theory and application of artificial intelligence. Concentration on several specific research areas, such as knowledge representation, problem solving, common-sense reasoning, natural language understanding, automated tutoring systems, learning systems. Students are expected to have knowledge of artificial intelligence equivalent to C S 475.

Learning Outcomes
1. Apply selected planning algorithms in solving problems Identify problems where knowledge representation and reasoning techniques are applicable Be able to apply answer set programming in problem solving Be aware of various advanced research topics in Artificial Intelligence

C S 579. Special Topics
1-6 Credits
Topic announced in the Schedule of Classes.

C S 581. Advanced Software Engineering
3 Credits (3)
Advanced tools and methods for developing large software systems. Topics include object-oriented modeling and design, component architectures, templates and generic programming, software configuration and revision control, static and dynamic analysis tools, model, checking, advanced testing, and verification. Students are expected to have knowledge of software engineering equivalent to C S 371.

Learning Outcomes
1. Be able to explain modern software development process ideas Be able to apply agile software development techniques in a project Be able to specify, design, and develop a complex software system in a team Be able to properly utilize both black box and white box testing techniques Be able to explain how unsound and incomplete formal methods can aid in system verification and validation Be able to utilize sound and complete formal methods to prove properties of a system

C S 582. Database Management Systems II
3 Credits (3)
Advanced data models and abstractions, dependencies, implementations, languages, database machines, and other advanced topics. Students are expected to have knowledge of data base management systems equivalent to C S 482.

Learning Outcomes
1. Analyze storage and file structures of an RDBMS Analyze and apply indexing techniques of an RDBMS Analyze query evaluation approaches of an RDBMS Analyze the mechanisms of transaction management in an RDBMS

C S 583. Advanced Cryptography
3 Credits (3)
This is an advanced cryptography course, which will cover cryptographic protocols such as zero-knowledge proofs, secret sharing schemes, secure two-party/multi-party computation, and more. We will also briefly cover real-world applications of these protocols. Students will also be exposed to recent research topics in cryptography (exact topics might vary every offering).

Prerequisite: At least a C- in C S 465.

Learning Outcomes
1. Understand advanced crypto primitives such as zero-knowledge proofs, fair exchange, verifiable encryption, k-of-n secret sharing, etc., and their security properties Understand the theoretical underpinnings of protocols such as attribute-based encryption/ signatures, two-party/multi-party secure computation Given a real-world situation, be able to think of what protocols are best applicable in the scenario, and be able to reason about their security
C S 584. Computer Networks II
3 Credits (3)
Advanced topics in computer networks. Covers advanced topics in networking, with emphasis on wireless, and IP networks. Students are expected to have knowledge of computer networks equivalent to C S 484, and of statistics equivalent to MATH 371 or MATH 470.

Learning Outcomes
1. Understand design of link layer protocols. Understand challenges and implementations for multimedia streaming. Be able to use basic security constructs in the networking context. Understand the concepts of edge and cloud computing Understand the concepts and challenges of Internet of Things Learn concepts of distributed networking Learn and evaluate future internet architectures

C S 586. Algorithms in Systems Biology
3 Credits (3)
The course will introduce important algorithms and computational models used in systems biology to study molecular mechanisms for cellular dynamics, processes, and systems. Cellular processes, such as metabolism and signal transduction, are studied as systems and networks quantitatively from high throughputs molecular measurements. The topics include molecular biological systems, network alignment, model simulation, network inference, model optimization, and hybrid models. Students will be able to construct models and analyze their properties in the context of molecular biological systems. Students are expected to have knowledge of algorithms and data structures equivalent to C S 372.

Learning Outcomes
1. Create mathematical representation of biological systems Inference of biological network topology from observed omics data set Simulate the behavior of a biological system using a mathematical model Characterize behaviors of biological systems Estimate parameters in a biological system model Validate a model's statistical relevance given observed data

C S 589. Special Research Problems
1-6 Credits
Faculty-supervised investigation, to culminate in a written report. May be repeated; maximum of 6 credits may be applied toward M.S. degree. Restricted to majors.
Prerequisite: written agreement with faculty supervisor.

C S 598. Master's Project
1-6 Credits
Project-oriented capstone course to be completed by M.S. students under supervision of their advisor. Maximum of 6 credits may be applied toward M.S. degree. Restricted to C S majors.
Prerequisite: written agreement with instructor.

C S 599. Master's Thesis
1-6 Credits (1-6)
Thesis to be developed by M.S. Students under supervision of their advisor. May be repeated for a maximum of 6 credits. Restricted to majors.
Prerequisite: consent of instructor.

C S 600. Pre-dissertation Research
1-15 Credits
Pre-dissertation research.

C S 700. Doctoral Dissertation
1-15 Credits
Dissertation.
Select 6 credits from the following:

Area III/IV: Laboratory Sciences and Social/Behavioral Sciences 10-11

Area III: Laboratory Sciences Course (4 credits) 2
Area IV: Social & Behavioral Sciences Course (3 credits) 2
Either an Area III/IV: Laboratory Sciences Course or Social/Behavioral Sciences Course (4 or 3 credits) 3

Area V: Humanities 3
Area VI: Creative and Fine Arts 3

General Education Elective 7

Three of the six Statistics/Applied Statistics course can potentially fulfill this requirement (See below)

Viewing a Wider World 4

Departmental/College Requirements

C S 172  Computer Science I 4
C S 271  Object Oriented Programming 4
C S 272  Introduction to Data Structures 4
C S 273  Machine Programming and Organization 4
C S 278  Discrete Mathematics for Computer Science 4
C S 370  Compilers and Automata Theory 4
C S 371  Software Development 4
C S 419  Computing Ethics and Social Implications of Computing 1
C S 448  Senior Project 4
or C S 449  Senior Thesis 4
C S 482  Database Management Systems I 3

Computer Science Electives

List 1:
Select 6-7 credits from the following: 5

C S 343  Algorithm Design & Implementation 6-7
or C S 372  Data Structures and Algorithms
C S 380  Introduction to Cryptography
C S 382  Modern Web Technologies
C S 471  Programming Language Structure I
C S 473  Architectural Concepts I
C S 474  Operating Systems I
C S 475  Artificial Intelligence I
C S 476  Computer Graphics I
C S 477  Digital Game Design
C S 478  Computer Security
C S 479  Special Topics 6
C S 480  Linux System Administration
C S 481  Visual Programming
C S 484  Computer Networks I
C S 485  Human-Centered Computing
C S 486  Bioinformatics
C S 487  Applied Machine Learning I
C S 488  Introduction to Data Mining
C S 489  Bioinformatics Programming
C S 491  Parallel Programming
C S 496  Cloud and Edge Computing

List 2:
Select 6 credits from the following: 5

C S 475  Artificial Intelligence I
C S 476  Computer Graphics I

C S 477  Digital Game Design
C S 478  Computer Security
C S 479  Special Topics 5
C S 480  Linux System Administration
C S 481  Visual Programming
C S 484  Computer Networks I
C S 485  Human-Centered Computing
C S 486  Bioinformatics
C S 487  Applied Machine Learning I
C S 488  Introduction to Data Mining
C S 489  Bioinformatics Programming
C S 491  Parallel Programming
C S 496  Cloud and Edge Computing

Non-departmental Requirements (in addition to Gen.Ed/VWW)
Select two upper-division courses in any one department except Computer Science

Choose one from the following:

MATH 1350G  Introduction to Statistics (can count towards General Education Elective requirement) 3
MATH 2350G  Statistical Methods (can count towards General Education Elective requirement)
STAT 371  Statistics for Engineers and Scientists I
STAT 470  Probability: Theory and Applications
A S 311  Statistical Applications

Second Language Requirement: (not required)
Electives, to bring the total credits to 120 7

Select upper division electives to bring total upper division to 48

Total Credits 120

1  Students with Area I transfer credits may sometimes complete this requirement with 9 credits
2  See the General Education (p. 88) section of the catalog for a full list of courses.
3  Either MATH 1430G Applications of Calculus I or MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter either first.
4  See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.
5  A course can satisfy only one requirement.
6  Must be taken for 3 credits to count as one course.
7  Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Students who plan to seek employment at the bachelor level are advised to take one of the concentrations curricula in addition to the general and departmental requirements. The program of study should be chosen by
the student in consultation with an advisor. The list of possible focuses can be found on the Bachelor of Sciences in Computer Science (https://catalogs.nmsu.edu/nmsu/arts-sciences/computer-science/computer-science-bachelor-science/) link.

Second Language Requirement
For the Bachelor of Arts with a major in Computer Science, there is no second language requirement for the degree.

A Suggested Plan of Study For Students
This roadmap assumes student placement in MATH 1220G and ENGL 1110G. The contents and order of this roadmap may vary depending on initial student placement in mathematics and english. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

This roadmap adds the MATH 1511G prerequisites into the plan, MATH 1220G and MATH 1250G will not appear on the requirements tab. Any students who test into MATH 1511G can supplement MATH 1220G and MATH 1250G will elective credits.

| Total Credits | 120-134 |

1 Required for students who do not pass MATH 1215 Intermediate Algebra or do not pass the CS placement exam and is not counted towards graduation
2 MATH 1511G Calculus and Analytic Geometry I is the starting requirement for this degree but students may need to take MATH 1220G College Algebra and MATH 1511G Calculus and Analytic Geometry I before enrolling in it. If a student tests into MATH 1511G Calculus and Analytic Geometry I then elective credits can replace MATH 1220G College Algebra/MATH 1250G Trigonometry & Pre-Calculus in the roadmap.
3 See the General Education (p. 88) section of the catalog for a full list of courses.
4 Any course offered by the university. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
5 For electives see List 1 or List 2 of Computer Science electives (p. 454) in Degree Requirement Section.
6 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

Computer Science - Bachelor of Science
The Bachelor of Science in Computer Science is the traditional undergraduate degree in Computer Science. It is rigorously focused
on educating the student in the fundamental disciplines of Computer Science. It prepares the student for any technological field in industry, and also provides the preparation for graduate studies in Computer Science. It is the main undergraduate degree in the Computer Science department, and should be the choice of a single-major Computer Science student. This degree is accredited by the ABET Computing Accreditation Commission (CAC) under the General and Computer Science Program Criteria (through 9/30/2022).

General Requirements Exception

A grade of at least C- must be earned in each of the courses taken to satisfy the departmental and non-departmental requirements. No course may be counted as satisfying both a departmental and a non-departmental requirement. No course taken to satisfy either a departmental or a non-departmental requirement may be taken S/U.

Requirements

Students who plan to seek employment at the bachelor level are advised to take one of the concentration area curricula in addition to the general and departmental requirements. An elective course cannot be used for more than two focuses. A course that is required for one concentration cannot be used as an elective course of another one.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

**Second Language Requirements: (not required)**

**Electives, to bring the total credits to 120**:  

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students who plan to seek employment at the bachelor level are advised to use their elective credits to complete concentration coursework</td>
<td></td>
</tr>
</tbody>
</table>

**Total Credits**: 120

1. Students with Area I transfer credits may sometimes complete this requirement with 9 credits
2. See the General Education (p. 88) section of the catalog for a full list of courses
3. MATH 1511G Calculus and Analytic Geometry I and MATH 1521G Calculus and Analytic Geometry II are required for the degree but students may need to take any prerequisites needed to enter MATH 1511G or MATH 1521G first.
4. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

A course can satisfy only one requirement.

Must be taken for 3 credits to count as a course.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

For concentration coursework see,
1. Algorithm Theory (p. 459)
2. Artificial Intelligence (p. 462)
3. Big Data and Data Science (p. 464)
4. Cybersecurity (p. 470)
5. Computer Networking (p. 467)
6. Human Computer Interaction (p. 472)
7. Software Development (p. 475)

**Second Language Requirement**

For the Bachelor of Science with a major in Computer Science (including all Concentration Areas), there is no second language requirement for the degree.

**A Suggested Plan of Study for Students**

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Students planning to undertake graduate work in computer science are encouraged to consult with their advisor regarding the possibility of taking other computer science electives to satisfy their departmental requirements.

Computer Science (Algorithm Theory) - Bachelor of Science

The Bachelor of Science in Computer Science is the traditional undergraduate degree in Computer Science. It is rigorously focused on educating the student in the fundamental disciplines of Computer Science. It prepares the student for any technological field in industry, and also provides the preparation for graduate studies in Computer Science. It is the main undergraduate degree in the Computer Science department, and should be the choice of a single-major Computer Science student. This degree is accredited by the ABET Computing Accreditation Commission (CAC) under the General and Computer Science Program Criteria (through 9/30/2022).

General Requirements Exception

A grade of at least C- must be earned in each of the courses taken to satisfy the departmental and non-departmental requirements. No course may be counted as satisfying both a departmental and a non-departmental requirement. No course taken to satisfy either a departmental or a non-departmental requirement may be taken S/U.

Requirements

Students who plan to seek employment at the bachelor level are advised to take one of the concentration area curricula in addition to the general and departmental requirements. An elective course cannot be used for more than two focuses. A course that is required for one concentration cannot be used as an elective course of another one.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Second Language Requirements: (not required)
Electives, to bring the total credits to 120
7
The specific requirements for the concentration in Algorithm Theory are as follows:
Select 3-4 credits from the following:

- C S 372 Data Structures and Algorithms
- C S 343 Algorithm Design & Implementation
Select 9 credits from the following:
- C S 475 Artificial Intelligence I
- C S 476 Computer Graphics I
- C S 487 Applied Machine Learning I
- C S 488 Introduction to Data Mining

Total Credits 120

1
Students with Area I transfer credits may sometimes complete this requirement with 9 credits

2
See the General Education (p. 88) section of the catalog for a full list of courses

3
MATH 1511G Calculus and Analytic Geometry I and MATH 1521G Calculus and Analytic Geometry II are required for the degree but students may need to take any prerequisites needed to enter MATH 1511G or MATH 1521G first.

4
See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

5
A course can satisfy only one requirement.

6
Must be taken for 3 credits to count as a course.

7
Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

A Suggested Plan of Study for Students
This roadmap assumes student placement in MATH 1511G Intermediate Algebra and ENGL 1110G Rhetoric and Composition. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Total Credits 120-123

1
MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G first.
See the General Education (p. 92) section of the catalog for a full list of courses.

Students who plan to graduate with a concentration need to complete the specific requirements for the chosen concentration. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

See list of Computer Science electives (p. 459) in Degree Requirement Section.

Math Electives:
- MATH 331 Introduction to Modern Algebra
- MATH 332 Introduction to Analysis
- MATH 377 Introduction to Numerical Methods
- MATH 392 Introduction to Ordinary Differential Equations
- MATH 454 Logic and Set Theory
- MATH 455 Elementary Number Theory

See list of Lab Science (p. 459) courses in the Degree Requirement Section.

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

Students planning to undertake graduate work in computer science are encouraged to consult with their advisor regarding the possibility of taking other computer science electives to satisfy their departmental requirements.

### Computer Science (Artificial Intelligence) - Bachelor of Science

The Bachelor of Science in Computer Science is the traditional undergraduate degree in Computer Science. It is rigorously focused on educating the student in the fundamental disciplines of Computer Science. It prepares the student for any technological field in industry, and also provides the preparation for graduate studies in Computer Science. It is the main undergraduate degree in the Computer Science department, and should be the choice of a single-major Computer Science student. This degree is accredited by the ABET Computing Accreditation Commission (CAC) under the General and Computer Science Program Criteria (through 9/30/2022).

### General Requirements Exception

A grade of at least C- must be earned in each of the courses taken to satisfy the departmental and non-departmental requirements. No course may be counted as satisfying both a departmental and a non-departmental requirement. No course taken to satisfy either a departmental or a non-departmental requirement may be taken S/U.

### Requirements

Students who plan to seek employment at the bachelor level are advised to take one of the concentration area curricula in addition to the general and departmental requirements. An elective course cannot be used for more than two focuses. A course that is required for one concentration cannot be used as an elective course of another one.

Students must complete all University degree requirements, which include General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

</tbody>
</table>

### Second Language Requirements: (not required)

Electives, to bring the total credits to 120

The specific requirements for the concentration in Artificial Intelligence are as follows:

Select 3-4 credits from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>C S 343</td>
<td>Algorithm Design &amp; Implementation</td>
<td></td>
</tr>
<tr>
<td>C S 372</td>
<td>Data Structures and Algorithms</td>
<td></td>
</tr>
</tbody>
</table>

Select 9 credits from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>C S 475</td>
<td>Artificial Intelligence</td>
<td></td>
</tr>
<tr>
<td>C S 487</td>
<td>Applied Machine Learning I</td>
<td></td>
</tr>
<tr>
<td>C S 488</td>
<td>Introduction to Data Mining</td>
<td></td>
</tr>
</tbody>
</table>

### Total Credits

120

1 Students with Area I transfer credits may sometimes complete this requirement with 9 credits

2 See the General Education (p. 88) section of the catalog for a full list of courses

3 MATH 1511G Calculus and Analytic Geometry I and MATH 1521G Calculus and Analytic Geometry II are required for the degree but students may need to take any prerequisites needed to enter MATH 1511G or MATH 1521G first.

4 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

5 A course can satisfy only one requirement.

6 Must be taken for 3 credits to count as a course.
Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

**A Suggested Plan of Study for Students**

This roadmap assumes student placement in MATH 1511G and ENGL 1110G. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

### Credits

**Total Credits: 120-123**

1. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G first.

2. See the General Education (p. 88) section of the catalog for a full list of courses.

3. Students who plan to graduate with a concentration need to complete the specific requirements for the chosen concentration. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

4. See list of Computer Science electives (p. 462) in Degree Requirement Section.

5. **Math Electives:**
   - MATH 331 Introduction to Modern Algebra
   - MATH 332 Introduction to Analysis
   - MATH 377 Introduction to Numerical Methods
   - MATH 392 Introduction to Ordinary Differential Equations
   - MATH 454 Logic and Set Theory
   - MATH 455 Elementary Number Theory

6. See list of Lab Science (p. 462) courses in the Degree Requirement Section.

7. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

Students planning to undertake graduate work in computer science are encouraged to consult with their advisor regarding the possibility of taking other computer science electives to satisfy their departmental requirements.

---

**Computer Science (Big Data and Data Science) - Bachelor of Science**

The Bachelor of Science in Computer Science is the traditional undergraduate degree in Computer Science. It is rigorously focused on educating the student in the fundamental disciplines of Computer Science. It prepares the student for any technological field in industry,
and also provides the preparation for graduate studies in Computer Science. It is the main undergraduate degree in the Computer Science department, and should be the choice of a single-major Computer Science student. This degree is accredited by the ABET Computing Accreditation Commission (CAC) under the General and Computer Science Program Criteria (through 9/30/2022).

General Requirements Exception
A grade of at least C- must be earned in each of the courses taken to satisfy the departmental and non-departmental requirements. No course may be counted as satisfying both a departmental and a non-departmental requirement. No course taken to satisfy either a departmental or a non-departmental requirement may be taken S/U.

Requirements
Students who plan to seek employment at the bachelor level are advised to take one of the concentration area curricula in addition to the general and departmental requirements. An elective course cannot be used for more than two focuses. A course that is required for one concentration cannot be used as an elective course of another one.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

A course can satisfy only one requirement.

Must be taken for 3 credits to count as a course.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G and ENGL 1110G. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

### Math Electives

- MATH 331 Introduction to Modern Algebra
- MATH 332 Introduction to Analysis
- MATH 377 Introduction to Numerical Methods
- MATH 392 Introduction to Ordinary Differential Equations
- MATH 454 Logic and Set Theory
- MATH 455 Elementary Number Theory
See list of Lab Science (p. 467) courses in the Degree Requirement Section.

7

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses

Students planning to undertake graduate work in computer science are encouraged to consult with their advisor regarding the possibility of taking other computer science electives to satisfy their departmental requirements.

Computer Science (Cybersecurity) - Bachelor of Science

The Bachelor of Science in Computer Science is the traditional undergraduate degree in Computer Science. It is rigorously focused on educating the student in the fundamental disciplines of Computer Science. It prepares the student for any technological field in industry, and also provides the preparation for graduate studies in Computer Science. It is the main undergraduate degree in the Computer Science department, and should be the choice of a single-major Computer Science student. This degree is accredited by the ABET Computing Accreditation Commission (CAC) under the General and Computer Science Program Criteria (through 9/30/2022).

General Requirements Exception

A grade of at least C- must be earned in each of the courses taken to satisfy the departmental and non-departmental requirements. No course may be counted as satisfying both a departmental and a non-departmental requirement. No course taken to satisfy either a departmental or a non-departmental requirement may be taken S/U.

Requirements

Students who plan to seek employment at the bachelor level are advised to take one of the concentration area curricula in addition to the general and departmental requirements. An elective course cannot be used for more than two focuses. A course that is required for one concentration cannot be used as an elective course of another one.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

& PHYS 1320L and Calculus-Based Physics II Lab

Second Language Requirements: (not required)
Electives, to bring the total credits to 120

Choose 6 credits from the following:
C S 380 Introduction to Cryptography
C S 473 Architectural Concepts I
C S 485 Human-Centered Computing
C S 496 Cloud and Edge Computing

Total Credits 120

1 Students with Area I transfer credits may sometimes complete this requirement with 9 credits

2 See the General Education (p. 88) section of the catalog for a full list of courses

3 MATH 1511G Calculus and Analytic Geometry I and MATH 1521G Calculus and Analytic Geometry II are required for the degree but students may need to take any prerequisites needed to enter MATH 1511G or MATH 1521G first.

4 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

5 A course can satisfy only one requirement.

6 Must be taken for 3 credits to count as a course.

7 Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

### Total Credits

120-123

1 MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G first.

2 See the General Education (p. 88) section of the catalog for a full list of courses.
Students who plan to graduate with a concentration need to complete the specific requirements for the chosen concentration. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

See list of Computer Science electives (p. 472) in Degree Requirement Section.

Math Electives:
- MATH 331 Introduction to Modern Algebra
- MATH 332 Introduction to Analysis
- MATH 377 Introduction to Numerical Methods
- MATH 392 Introduction to Ordinary Differential Equations
- MATH 454 Logic and Set Theory
- MATH 455 Elementary Number Theory

See list of Lab Science (p. 472) courses in the Degree Requirement Section.

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

Students planning to undertake graduate work in computer science are encouraged to consult with their advisor regarding the possibility of taking other computer science electives to satisfy their departmental requirements.

**Computer Science (Software Development) - Bachelor of Science**

The Bachelor of Science in Computer Science is the traditional undergraduate degree in Computer Science. It is rigorously focused on educating the student in the fundamental disciplines of Computer Science. It prepares the student for any technological field in industry, and also provides the preparation for graduate studies in Computer Science. It is the main undergraduate degree in the Computer Science department, and should be the choice of a single-major Computer Science student. This degree is accredited by the ABET Computing Accreditation Commission (CAC) under the General and Computer Science Program Criteria (through 9/30/2022).

**General Requirements Exception**

A grade of at least C- must be earned in each of the courses taken to satisfy the departmental and non-departmental requirements. No course may be counted as satisfying both a departmental and a non-departmental requirement. No course taken to satisfy either a departmental or a non-departmental requirement may be taken S/U.

**Requirements**

Students who plan to seek employment at the bachelor level are advised to take one of the concentration area curricula in addition to the general and departmental requirements. An elective course cannot be used for more than two focuses. A course that is required for one concentration cannot be used as an elective course of another one.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

</tbody>
</table>

**Total Credits**

120

1 Students with Area I transfer credits may sometimes complete this requirement with 9 credits

2 See the General Education (p. 88) section of the catalog for a full list of courses

3 MATH 1511G Calculus and Analytic Geometry I and MATH 1511G Calculus and Analytic Geometry I are required for the degree but students may need to take any prerequisites needed to enter MATH 1511G or MATH 1521G first.

4 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

5 A course can satisfy only one requirement.

6 Must be taken for 3 credits to count as a course.

7 Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Electives as needed to meet minimum credit requirements | 7 |
| Credits | 26 |
| Total Credits | 120-123 |

1 MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1521G first.

2 See the General Education (p. 88) section of the catalog for a full list of courses.

3 Students who plan to graduate with a concentration need to complete the specific requirements for the chosen concentration. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

4 See list of Computer Science electives (p. 475) in Degree Requirement Section.

5 Math Electives:
   - MATH 331 Introduction to Modern Algebra
   - MATH 332 Introduction to Analysis
   - MATH 377 Introduction to Numerical Methods
   - MATH 392 Introduction to Ordinary Differential Equations
   - MATH 454 Logic and Set Theory
   - MATH 455 Elementary Number Theory

6 See list of Lab Science (p. 475) courses in the Degree Requirement Section.

7 See the View a Wider World (p. 92) section of the catalog for a full list of courses.

Students planning to undertake graduate work in computer science are encouraged to consult with their advisor regarding the possibility of taking other computer science electives to satisfy their departmental requirements.

Cybersecurity - Bachelor of Science

Students must complete all University degree requirements, which include: General Education requirements, View a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

---

1. MATH 1511G Calculus and Analytic Geometry I or MATH 1430G Applications of Calculus I is the starting requirement for this degree but students may need to take prerequisites before enrolling.

2. *If a student tests into MATH 1521G Calculus and Analytic Geometry II then elective credits can replace this requirement in the roadmap.*

3. See the General Education (p. 88) section of the catalog for a full list of courses.

4. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

5. Any course offered by the university. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

6. Students need to fill in one credit to meet the requirement of 15 credit hours.

This course does not have a course number yet. It will be offered as a special topic course in CS (C S 479 Special Topics or C S 579 Special Topics) or EE (E E 490 Selected Topics). The topic of the course must be Mobile and Wireless Computing.

## Computer Science - Bachelor of Science/Master of Science

### 5 Year Dual Degree BS+MS Program

The dual degree program combines some of the requirements of the Bachelor of Science (BS) and the Master of Science (MS) in Computer Science. It is very important for the student to apply to the BS+MS program before they take any 400-level C S courses. Full details of the program can be found at [http://www.cs.nmsu.edu](http://www.cs.nmsu.edu).

Admission occurs in two steps.

1. First, students will apply to the Computer Science department to receive approval for the BS+MS program. The student submits the pre-application when he/she is within 48 credits of earning a BS in Computer Science; an application form is provided on the department website. Qualification for the BS+MS program will be based on the cumulative (non-grade replaced) grade point average in Computer Science and Math courses taken up to that point (at least 3.5), including at least two of the following: C S 370 Compilers and Automata Theory, C S 371 Software Development and C S 372 Data Structures and Algorithms, and recommendations by faculty members listed on the departmental application. Additional factors might be taken into account when available (e.g., GRE scores).

Students having a grade point average below 3.5 may be admitted to the combined program on a case-by-case basis, depending on faculty...
recommendations and evaluations of the individual academic and professional history.

2. Once the Computer Science department has notified the applicant of acceptance in the combined BS+MS program, the applicant must then formally apply to the graduate school (https://apply.nmsu.edu/apply/?id=1c3c41ea-b5f9-48ef-83c3-b085794ba277) for formal admission to the graduate program. This application to the graduate school is made during the semester of graduation from the BS in Computer Science.

The curriculum for the first three years of the BS+MS program coincides with the requirements of the BS program. In particular; the general requirements include a grade of at least a C- in each course satisfying the departmental and non-departmental requirements. No course may be counted as satisfying both a departmental and non-departmental requirement. No course taken to satisfy either a departmental or non-departmental requirement may be taken S/U. The following are the departmental requirements for the degree (the non-departmental requirements are identical to those of the BS in Computer Science).

Elective Courses (2 from the following list): 6

- C S 462 | Object Oriented Programming Transition |
- C S 516 | Bioinformatics |
- C S 586 | Algorithms in Systems Biology |
- GENE 452 | Applied Bioinformatics |
| or BIOL 566 | Advanced Bioinformatics and NCBI Database |
- A ST 550 | Special Topics (Statistical bioinformatics course) |
- A ST 550 | Special Topics (Current topics in bioinformatics - open issues) |

Master's Project/Thesis/Internship: 1

- C S 598 | Master's Project |
- or C S 599 | Master's Thesis |

Total Credits: 31

1. A student can write a thesis (C S 599 Master's Thesis), undertake a research project (C S 598 Master's Project), or participate in an internship related to the degree. In each case, six graduate credits are required and a written approval from the student’s advisor must be obtained before the student undertakes this part of the study. For students with thesis or project, the students are required to sustain a final exam, covering the thesis/research project.

2. One course to cover prerequisites to enter GENE 315 Molecular Genetics and BCHE 341 Survey of Biochemistry is required.

- A ST 506 | Statistical Inference II |
- BCHE 546 | Biochemistry II |
- BCHE 649 | Topics in Biochemistry |
- BIOL 474 | Immunology |

Total Credits: 22-23

Bioinformatics - Master of Science

The degree requirements include 30-31 graduate credit hours. The degree has two tracks, one for students with non-computing background and another for students with Computer Science background. The requirements for each track are structured as follows.
A Suggested Plan of Study for Students (with non-computing background)

It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

For students with thesis or project, the students are required to sustain a final exam, covering the thesis/research project.

One course to cover prerequisites to enter GENE 315 Molecular Genetics and BCHE 341 Survey of Biochemistry is required.
Data Analytics - Master of Data Analytics

PMS in Data Analytics (100% Online)

Data analytics is an inherently interdisciplinary discipline, dealing with methods and systems to synthesize knowledge or insights from large quantities of data collected from heterogeneous sources and diverse spatial and time scales. Data analytics employs theories, methodologies, and tools drawn from many fields, within the broad areas of mathematics, statistics, and computer and information sciences, and applies them to a diversity of data-rich domains, such as life sciences, medicine, physical sciences, social sciences, engineering, business, and education.

The PMS in Data Analytics will provide students with a strong foundation in data management and analysis, the computational and statistical thinking, and understanding of computer systems. After completing this program, students will have gained the skills and ability to:

- Analyze real-life data from diverse sources and domains
- Effectively apply analytics tools to large data sets
- Apply mathematical and statistical models to data analysis problems
- Apply computational thinking to develop effective data analytics solutions
- Apply programming and debugging skills to problem solving
- Understand and use computer technology and software in solving real-life data analysis problems
- Understand and address unfamiliar problems related to data analytics
- Develop effective instrument to communicate solutions to diverse audiences

Program

The professional focus of the degree will prepare students for success in the workplace, with an emphasis on enriching the preparation of students who are already in the workplace and are seeking technical skills to advance their careers in the data analytics domain.

Program Features

- Degree granted from New Mexico State University
- Asynchronous courses delivery to accommodate student schedules & needs
- 30 credits [3 semesters and a summer; 9 credits/semester; students may enroll part time]
- In person courses are permissible
- Industry experience encouraged

Affiliated Faculty (Non-Computer Science Faculty)

- Laura Boucheron, PhD, University of California Santa Barbara; Image processing, machine learning and deep learning applied to image analysis, interdisciplinary applications including astronomy and biomedical, Klipsch School of Electrical & Computer Engineering
- Hansuk Sohn, PhD, University of Iowa; Mathematical Programming (Linear, Integer, and Stochastic) and Dynamic Programming, Algorithm development (Optimization, Heuristic, and Hybrid algorithms), Statistical Data Analysis and Data Mining; Industrial Engineering
- Charlotte Gard, PhD, University of Washington; Biostatistics; Department of Economics, Applied Statistics, and International Business
- Clint Loest, PhD, Kansas State University; Ruminant Nutrition, Animal Nutrition; Animal and Range Sciences
- Carlo A. Mora-Monge, PhD, The University of Toledo; Business Analytics, Supply Chain Analytics, E-commerce Use; Management Department
- Marshall A. Taylor, PhD, University of Notre Dame; Computational Social Science, Cultural Sociology, Cognitive Sociology; Department of Sociology

Curriculum

The curriculum for the degree program is composed of 30 graduate credits.

Total Credits: 30

### Capstone Experience

Select one of the following courses:

- C S 598: Master’s Project
- MATH 599: Master’s Thesis
- A ST 598: Special Research Problems
- E E 598: Master’s Technical Report
- I E 599: Master’s Thesis
- Internship

Total Credits: 30

### A Suggested Plan of Study

Additional classes may be needed based on placement test results and course prerequisites. Visit with an advisor for help with creating a customized plan.

The Master of Computer Science degree has two tracks, one with thesis or project track and a course-work only track. For all master’s students, the following apply:

- Each master’s student must complete 12 credits of the basic requirements (p. 486)(see table below).
- Each master’s student is expected to register for C S classes numbered 500 or above, except for C S 469 Data Structure and Algorithms Transition or deficiencies which are 46x courses (Transition Courses) or C S 471 Programming Language Structure I or C S 474 Operating Systems I.
- Courses not in Computer Science can be included in the student’s program of study only if prior written approval has been obtained from the student’s advisor and the departmental Graduate Committee. Further details can be found in the on-line Graduate Handbook (http://www.cs.nmsu.edu/ (https://www.cs.nmsu.edu/)).

- For Thesis/Project track’s students: each student following this track needs to complete the following three requirements:
  - Courses: each student needs to take, in addition to the basic requirement, 15 credits of Computer Science graduate courses (courses numbered > 500) with the following restrictions:
    - One course can only be used to satisfy one requirement (e.g., if C S 510 Automata, Languages, Computability is used to satisfy the requirement for the Theories category, it cannot be counted towards satisfying the requirements on Courses).
  - At most 6 credits of C S 579 Special Topics with different topics (i.e., with different subtitles) can be counted towards the degree program of the student.
  - At most 6 credits of C S 589 Special Research Problems can be counted towards the degree program of the student.
  - No credit of course numbered > 599 can be counted towards the degree program.

- Thesis/Project: each student must write a thesis (C S 599 Master’s Thesis) or undertake a research project (C S 598 Master’s Project) for 6 credits.

- Master Final Exam: each student is required to sustain a final exam, covering the thesis/research project and the graduate coursework. The two parts of the exam bring equal weight.

- For Course-Work Only track’s students: Each student following this track needs to take, in addition to the basic requirement, 24 credits of Computer Science graduate courses (courses numbered > 500) with the following restrictions:
  - One course can only be used to satisfy one requirement (e.g., if C S 510 Automata, Languages, Computability is used to satisfy the requirement for the Theories category, it cannot be counted towards satisfying the requirements on Courses).
  - At most 6 credits of C S 579 Special Topics with different topics (i.e., with different subtitles) can be counted towards the degree program of the student.
  - No credit of course numbered > 588 can be counted towards the degree program.

Computer Science - Doctor of Philosophy

Doctoral students may specialize in any of the areas in which computer science faculty members have active research interests. Through interdisciplinary arrangements with other doctoral departments at New Mexico State University, doctoral students may also specialize in such areas as computational biology, computer networks and architectures and cognitive science.

Doctoral students are expected to join the program with a preparation equivalent to that required for the Master’s degree in computer science at New Mexico State University. The requirements for the degree are as specified in the NMSU graduate catalog, with the following additional considerations:

- The qualifying examination consists of written exams in four subject areas:
  - Operating Systems or Computer Architectures;
  - Principles of Programming Languages;
  - Design and Analysis of Algorithms and Data Structures; and
  - Discrete Mathematics.
- The student is required to take the qualifying examination at the end of the first semester of enrollment as a doctoral student at NMSU; the only exceptions will be granted to students entering the doctoral program with significant undergraduate deficiencies—in such case the deadline for the qualifying examination will be indicated in the admission records. It is the responsibility of the student to ensure that the qualifying examination is taken within the prescribed deadline. Students failing to meet the deadline will be automatically withdrawn from the doctoral program. If a student fails any of the exams, they must retake those exams in the following semester. If a student fails to pass all exams after the second attempt, they will be dismissed from the doctoral program.
- Students who are enrolled in the Computer Science MS program and have identified a future PhD advisor in the Department of Computer Science can use their Master’s exam as their PhD qualifying exam as follows:
  1. The student submits a request to their future PhD advisor to allow using their MS exam as their PhD qualifying exam and obtain the approval of the advisor and the department head.
  2. Before the MS exam, the student needs to form an MS exam committee. The exam committee must include the student’s future PhD advisor, and the exam committee needs to be approved by the student’s future PhD advisor.
  3. During the MS exam, the student is tested on the subjects of PhD qualifying exam for approximately one hour. The student must, with their advisor, plan their exam to include this additional time.

The student can pass, conditional pass, or fail the exam. If the student conditionally passes the exam, then the committee will specify (i) a list of courses that the student needs to take and pass in the first year; or (ii) a list of subjects that the student needs to pass in the written qualification exam. If the student fails the exam then the student needs to take the written exam as described above.

- The comprehensive examination evaluates depth of knowledge in the specific research area selected by the candidate with the consent of their graduate committee. It includes: a written part, in the form of an extensive survey paper; an annotated bibliography; and an oral examination.
- The student is required to submit and defend a prospectus, at the same time or after completing the comprehensive examination. The prospectus describes and motivates the specific research problem to be addressed in the doctoral dissertation.
- A PhD student is required to take at least one course each in the following three areas (theories, systems, and applications)

Only courses from the MS CS program from NMSU can be used to waive this requirement.

Students should contact the department for information on additional graduation requirements, or visit the on-line Graduate Handbook (http://www.cs.nmsu.edu/) (https://www.cs.nmsu.edu/).
Computer Science - Graduate Minor

Students who wish to take a minor in Computer Science will need to accumulate a minimum of 9 graduate credits not including the C S 460 Computer Science I Transition Computer Science course. Students are encouraged to contact the Computer Science Graduate Committee Chair for directions in the selection of courses.

Creative Media

Undergraduate Program Information

New Mexico State University's Creative Media Institute (CMI) prepares students to become digital storytellers using state of the art, industry-standard tools. The Creative Media Institute is dedicated to developing and nurturing the artistic endeavors of student filmmakers through industry-standard education, research and collaboration in the art, craft and production of the moving image through storytelling, resulting in a Bachelor of Creative Media degree. The program provides learning opportunities for newly admitted NMSU students, and provides some credit transfer opportunities for students with an associate degree from a NMSU community college or other two-year degree granting institution. The Bachelor of Creative Media provides a liberal arts background enabling students to pursue further education, professional training or employment in the digital media-based industry. Study in the CMI program fosters collaborative expression based on a clear understanding of media culture, history, design and practice. CMI also offers students the opportunity for internships in digital video, animation, visualization and simulation, industrial and educational video at varied production facilities on and off campus.

Theory and practice are integrated at every step as students manipulate text, sound and images using industry-standard technology. CMI houses a state of the art digital projection system screening room, post-production lab, animation lab, production space, motion capture laboratory and THX sound mixing theatre.

Due to limited capacity, new students wishing to continue in the CMI program after their freshman year are required to complete an application process. Transfer students from other institutions, including NMSU Community Colleges, must complete the application process. Transfer students should contact an Academic Advisor from the College of Arts and Sciences Advising Office for information about joining one of the two degree programs offered in CMI. Space is limited and varies each year. The quality of the student's work as demonstrated in the application and prior course work are additional criteria of the admission decision. Exact details and procedures for applying to the CMI program can be found on the CMI website at: cmi.nmsu.edu (http://cmi.nmsu.edu).

Graduate Program Information

Starting Fall 2022, the MFA Creative Writing Program will be housed in the Creative Media Institute as we work to expand course offerings to include screenwriting, playwriting and writing for new media. In Fall 2023, courses will change from the ENGL to the FDMA prefix.

The Master of Fine Arts Degree in Creative Writing is a 3-year program. Students choose a major genre: poetry or fiction, though classes in nonfiction, writing, screenwriting and others are offered. Students must complete 54 hours of graduate-level coursework, submit a creative writing thesis, give a public reading from the thesis, and pass an oral examination.

Our mission is to emphasize the creation and critical analysis of literature, so that our students can be part of the national conversation about writing, graduating with a publishable manuscript. By providing our students with a set of skills, we prepare them to contribute to their communities as writers, publishing professionals and teachers.

Creative Writing - Master of Fine Arts

Students pursuing the MFA in Creative Writing devote themselves to concentrated study and development of a chosen genre: poetry or fiction. Students

- complete 54 hours of graduate-level coursework,
- present a book-length thesis of original work with an introduction or afterward,
- perform a public reading from the thesis, and
- pass an oral examination in the final semester.

A maximum of 12 credits in Form and Technique count for the degree.

Students wishing to apply to the MFA should consult application information on the Graduate School website (https://apply.nmsu.edu/apply/). Applications are due by February 1 for Fall admission to the MFA.

Support in the form of a Graduate Assistantships is awarded through a competitive selection process; this application is folded into the application for admission and should be submitted by the February 1 deadline. All Graduate Assistantships in Creative Writing begin in the Fall semester.

Degrees for the Department

Bachelors Degree(s)

Animation and Visual Effects - Bachelor of Creative Media (p. 496)
Digital Film Making - Bachelor of Creative Media (p. 500)

Master Degree(s)

Master of Fine Arts in Creative Writing

Minors for the Department

Currently, the Animation and Visual Effects and Digital Filmmaking minors are closed to any students outside of the major.

Animation and Visual Effects - Undergraduate Minor (p. 502)
Digital Film Making - Undergraduate Minor (p. 502)

The minor in Creative Writing is open to all majors.

Creative Writing - Undergraduate Minor

Department Head, Amy Lanasa

Professors Bradburd, Greenfield, Voisine; Associate Professors Fowler, Jonet, Lanasa, Lapid, Lau, Williams; Assistant Professors Chase, Hobson, Mannens, Marks, Rodgers; College Assistant Professors Bakshi, Swander; College Instructor Nirmalakhandan
Film & Digital Media Courses

FDMA 1210. Digital Video Production I
3 Credits (2+4P)
An introduction to digital video production. Students learn camera operation, lights and audio equipment. Hands-on production is completed in the studio and on location.

Learning Outcomes
1. Plan and produce a digital video project
2. Apply post-production workflow
3. Work in team and as individual to complete digital video projects.

FDMA 1220. Introduction to Digital Video Editing
3 Credits (3)
In this course, students learn the basics of the post-production process for non-linear video editing. Students work with multiple video formats and create short movies for multiple distribution platforms. Skills include media management and professional terminology. Sections on the Main Campus will be restricted to CMI students.

Learning Outcomes
1. Define concepts related to digital video editing.
2. Use non-linear video editing software for editing a short film
3. Enhance storytelling through the use of continuity, timing, cutaways, intercutting, compositing, transitioning, jump cutting, montaging and animating.
4. Use text, titles, transitions, video effects, sound effects, dialogue, and visual assets for digital video editing.

FDMA 1415. Principles of Sound
3 Credits (2+2P)
The creation of a professional quality original media soundtrack is possible for relatively low production/post production cost. This class is designed to give the student and overview of creating sound for a variety of digital media. Topics include acoustics principles, sound design, audio hardware, recording techniques; and editing, processing, and multi-track mixing, using software applications. Restricted to: Community Colleges only.

Prerequisite(s)/Corequisite(s): FDMA 1220.

Learning Outcomes
1. Record and edit wild sound effects and synced dialogue
2. Discover, upload, and edit on-linemusic, ambience and sound effect loops
3. Implement audio design theories
4. Create an aesthetic soundtrack which incorporates multiple elements and dimensions
5. Design, edit, process, mix and master a synced multi-track soundtrack
6. Demonstrate capable use of digital audio production and post-production workflow
7. Produce short audio projects which meet media industry technical standards

FDMA 1510. Introduction to 3D Animation
3 Credits (3)
This course provides an overview of 3D animation production processes. Students will be introduced to basic story development and the creation of computer-generated assets and cinematic sequences. The course will survey specialty areas of digital animation and various software and techniques applied in entertainment and information media. Students will review and critique other's animation, as well as plan and produce original animation for review by classmates and as part of a CGI demo reel.

Prerequisite(s): FDMA 2382 or FDMA 2381 or consent of instructor.

Learning Outcomes
1. Demonstrate a fundamental understanding of 3D animation history and principles.
2. Analyze animation work of other artists.
3. Appropriately utilize the various media technologies for digital 3D animation.
4. Demonstrate and apply basic techniques of digital 3D animation.
5. Demonstrate and apply basic processes of creating CGI for a narrative.
6. Apply some basic strategies for developing and creating a story visually, and create original animations.
7. Present original animations to instructor and classmates for critique.
8. Create a CGI demo reel of work completed during the course.

FDMA 1555. Introduction to the Creative Media Industry
3 Credits (3)
This class is an introductory course for students who are beginning their understanding of Media and how it affects them and our society. It offers a broad-stroked view of the entire industry including Marketing, Production, History, Jobs, Design, Architecture, New Media Literacy, and industry standards. Students will listen to experts in the field, get involved in open discussions about the industry and use new information to complete hands-on individual & group assignments.

Learning Outcomes
1. The basic philosophies and methods that guide people working in the Creative Media industry.
2. Knowledge of a wide variety of different jobs, qualifications and paradigms used in the industry.
3. Marketing, Production, Budgets, History, New Media, Inspiration and other aspects of the industry.
4. An accurate view of the Creative Media field.

FDMA 1715. 2-D Compositing & FX
3 Credits (3)
This course will familiarize students with the process of compositing and creating special effects for animation using industry standard software. Students will learn how to assemble an animated scene and use advanced 3D lighting, spacing, and digital effects to achieve a dynamic, professionally rendered look.

Prerequisite: FDMA 2710.

Learning Outcomes
1. The goal of this class is for students to learn how to use advanced compositing and effects tools in order to achieve a more dynamic and professional visual look for their animations or motion graphics. By the end of the class, you should be proficient animation compositors that can assemble and synthesize a basic animation into a rendered, visually sophisticated piece. Students who pass this class will have a basic to intermediate knowledge of Adobe After Effects
FDMA 2310. History of Cinema I  
3 Credits (3)  
This course surveys the history of cinema - investigating the process by which the original "cinema of attractions" evolved into a globally dominant form of visual storytelling. We will explore the development of cinema both as an art form and as an industry, and consider the technological, economic, cultural factors, as well as many key international movements that helped shape it. Restricted to: G-CMI, DFM, ANVE majors.  
Learning Outcomes  
1. Gain a greater appreciation for the history of cinema  
2. Develop knowledge of the key eras in the history of U.S. cinema  
3. Learn the characteristics of major movements in international cinema  
4. Understand the various elements that go into telling a story in cinema: screenplay, narrative devices, director, producer, talent, production design, cinematography, editing, sound design  
5. Learn how major genres in U.S. cinema have evolved in the past 100+ years  
6. Gain a basic understanding of the operations and organization of the Hollywood film industry, from the studio system until today  
7. Gain an awareness of the shifts in the film industry that present new opportunities for independent filmmakers  
8. Understand the importance of learning about the history of cinema to the process of becoming a filmmakers  
9. Strengthen public speaking skills  

FDMA 2311. History of Animation  
3 Credits (3)  
Explores the history of Animation as an art form and industry through readings, screenings, lecture and periodic guest speakers. Restricted to: G-CMI, ANVE, DFM majors. Restricted to Las Cruces campus only.  
Learning Outcomes  
1. To expand your knowledge of the history of animation and its evolution to the modern day.  
2. To expand your ability to view animation critically and to understand its early connections to cartooning as well as its ongoing cultural presence and relevance.  
3. To expand your comfort with accessing information and completing assignments both online and independently. Canvas will be utilized for many of our readings and for some response assignments.  

FDMA 2381. Storyboarding  
3 Credits (3)  
Examines effective writing principles to create storyboards that communicate the overall picture of a project, timing, scene complexity, emotion and resource requirements. Further, the purpose of this course is to introduce students to the principles of visual storytelling—in film—through the use of the storyboard. In other words, to show how storyboards are critical "architectural component" of the filmmaking process, used as a blueprint (or guide) to communicate the complex elements of a film story. Crosslisted with: ENGL 2381. Restricted to: DFM, ANVE, G-CMI majors. Restricted to Las Cruces campus only.  
Learning Outcomes  
1. Learn to conceive and draw original images.  
2. Learn to use images to tell a story.  
3. Design, develop, and order images (shots) into storyboarded scenes.  
4. Understand how storyboarded sequences are a tool in the process of filmmaking.  
5. Understand how the storyboard image is translated from the written page.  
6. Build scenes from the scripted sequences into a storyboard.  

FDMA 2382. Principles of Story Across the Media  
3 Credits (3)  
The purpose of this course is to help students understand the basic elements of narrative structure (e.g. character, dramatic conflict, theme, etc.) and how these elements may be used effectively in media expression. Crosslisted with: ENGL 2382. Restricted to: G-CMI, DFM, ANVE majors. Restricted to Las Cruces campus only.  
Learning Outcomes  
1. Identify the elements of storytelling in scripted text or improvised performance  
2. Understand how these elements work together across different media  
3. Apply these elements of storytelling in original work  
4. Appreciate and master these elements for independent or collaborative work  

FDMA 2510. Introduction to Sound Design for Film  
3 Credits (3)  
This course is an introduction to the principles, techniques and applications of sound design and film scoring. Students learn how sound affects storytelling in a film, examine the role of sound from the script to screen, and the professional process of creating a soundtrack. Students learn how to use sound equipment in a production environment and execute basic techniques used to develop a soundtrack. Crosslisted with: FDMA 1415.  
Prerequisite(s)/Corequisite(s): FDMA 2382. Restricted to: DFM, ANVE majors. Restricted to Las Cruces campus only.  
Learning Outcomes  
1. Compare the properties and propagation of sound and importance of sound to the storytelling aspect of  
2. filmmaking  
3. Learn the process of designing a soundtrack for film and recording live audio dialogue for use in post-production editing.  
4. Learn methods of capturing sound including live audio recording, dialogue recording, foley, orchestration and audio dialogue replacement  
5. Design a soundtrack for motion media project.
FDMA 2520. Introduction to Cinematography
3 Credits (3)
The Director of Photography (or Cinematographer), in close collaboration with the Director and Production Designer, helps determine the look of a film. This course is designed to introduce students to the technical and aesthetic fundamentals of creating, developing, and collaborating on the visual elements of storytelling, using camera framing, lensing, and lighting fundamentals such as shadows, light and color. May be repeated up to 6 credits. only. Prerequisite(s)/Corequisite(s): FDMA 2382 (Las Cruces Campus) or FDMA 1210 (Community College Campus(es)
Learning Outcomes
1. Define and explain the fundamental concepts of cinematography, such as exposure, lighting solutions, and color temperature.
2. Understand how cinematography brings the Director's vision to reality.
3. Demonstrate proficiency in plotting and executing interior and exterior lighting solutions.

FDMA 2530. Introduction to 3D Modeling
3 Credits (3)
This course will introduce 3D modeling methods and current practices. Students will learn preliminary and detailed modeling techniques using industry standard software. Methods will emphasize formal and functional aspects of modeling as they apply to mechanical, organic, and sculpted topology for application in animation, games, and information media. May be repeated for a maximum of 6 credits.
Learning Outcomes
1. Identify the role of a 3D modeler in a production pipeline within various fields of digital animation.
2. Apply techniques in modeling mechanical and organic objects.
3. Utilize tools available in professional 3D modeling software.
4. Create simple animations and renders.
5. Present original animations to instructor and classmates for critique.
6. Create a demo reel of work completed during the course.

FDMA 2535. Digital Illustration Techniques
3 Credits (3)
Introductory course examining traditional artistic expressions and translating visual art experiences into a digital art medium to enhance visual storytelling. Students acquire basic principles of drawing and painting through hands-on experience manipulating tonal value, composition, form development, light and shadow, color theory, rendering realism, and graphic design. Restricted to: DFM,ANVE majors. Restricted to Las Cruces campus only.
Learning Outcomes
1. Be familiar with the CMI computer system, facilities, equipment and policies. Appropriately utilize the various media technologies available at CMI for digital illustration. Understand the different roles and areas of digital illustration. Understand and apply some basic techniques of digital illustration. Understand and apply some basic processes of creating pleasing images based on knowledge of traditional art principles. Begin to apply some basic strategies for developing and creating aesthetically pleasing images.

FDMA 2710. Beginning 2-D Animation
3 Credits (3)
Students will learn the basics of digital 2D animation by working through a variety of exercises, creating an original storyboard, and animating five or more shots utilizing industry standard software. Restricted to: DFM,ANVE majors. Restricted to Las Cruces campus only.
Learning Outcomes
1. The student will demonstrate an overall knowledge of computers as a tool of the animation artist and be able to produce simple animations using the techniques learned in class.
2. Use major software tools with ease
3. Manage time lines through key frames
4. Build storyboards
5. Demonstrate knowledge of 2-D and animation terminology
6. Produce actions, set environments and constraints for 2-D animation
7. Render full animation.

FDMA 2720. 3D Animation
3 Credits (3)
Overview of the essentials and principles of 3D animation; creative methods for using industry standard tools to produce the illusion of movement for storytelling and creating 3D effects. Topics include, keyframe and curve animation, kinematics, cycle animation, camera movement for storytelling and creating 3D effects. Topics include, keyframe and curve animation, kinematics, cycle animation, camera animation, deformers, dynamics and constraints.
Prerequisite: FDMA 1510, FDMA 2710 or consent of instructor.
Learning Outcomes
1. Clearly describe the role of an animator in cinema, gaming and related fields. Recognize leading animators and their methods. Demonstrate knowledge of advances in contemporary animation. Utilize current industry standard animation tools. Apply fundamental animation processes and techniques

FDMA 2725. Rigging for 3D Animation
3 Credits (3)
This course will introduce principles and practices of current 3D animation rigging. Students will develop fundamental methods necessary to create character rigs. Students will learn aesthetic, technical, and optimization concepts as they apply to organic and mechanical designs. Topics will include: hierarchies, constraints, deformation rigging, skeleton creation, skinning, forward and inverse kinematics, controls, body and facial rigging. Restricted to: DFM, ANVE majors.
Prerequisite(s): FDMA 1510.
Learning Outcomes
1. Understand what Rigging is and the role it plays in the world of cinema and video games.
2. Be familiar with industry professionals and their techniques and approaches to rigging.
3. Understand and be able to apply the fundamentals of rigging to industry standard applications.
4. Demonstrate ability to rig basic to intermediate machines, bipeds and quadrupeds
FDMA 2745. Light, Shade, Render
3 Credits (3)
This course will explore the theory and practice of 3D lighting and rendering methodologies. Techniques covered will implement cameras, lighting sources, textures, surface-mapping and algorithmic rendering to produce stylized and photo realistic images. Topics covered will include direct and indirect lighting, shaders that simulate physical substances and effects, rendering multiple passes and simulating physical lens effects. Restricted to: DFM, ANVE majors. Restricted to Las Cruces campus only.
Prerequisite: FDMA 1510 OR FDMA 2530, or Consent of Instructor.
Learning Outcomes
1. Understand the role of lighting and surfacing to tell a story. Be familiar with leading lighting artist and their approaches. Utilize the software implemented in the entertainment industry. Understand and apply fundamental lighting and rendering techniques. Demonstrate ability to create successfully rendered scenes from concept through production.

FDMA 2755. Drawing for Animation
3 Credits (3)
Introductory study of the human and animal form in relation to animation. Students learn fundamentals and exaggeration of the figure, as related to proportion, rhythm, mechanics, and motion. Areas of focus are: basic form, proportion, shape, contour, gesture, anatomy, portraiture, perspective, clothing effects and drawing from observation. Restricted to: CMT, DFM, ANVE majors.
Learning Outcomes
1. Students will have an opportunity to gain hands on experience using industry standard state of the art animation software.
2. Understand what the basics of drawing the human form.
3. Have a general understanding of human anatomy as needed for the artist.
4. Be able to design the human form from imagination.

FDMA 300. History of Cinema II
3 Credits (3)
An advanced, in-depth analysis of cinema's history. Course may focus on one specific area of cinema history depending on instructor.
Prerequisite(s)/Corequisite(s): FDMA 2382, FDMA 2310. Restricted to: DFM, ANVE, G-CMI majors. Restricted to Las Cruces campus only.

FDMA 301. Sound Design II
3 Credits (3)
Mixing and balancing dialogue, sound effects and music in postproduction. Study the role of sound effects, foley, soundtrack choices, and music supervision. Restricted to: DFM, ANVE majors.
Prerequisite(s): FDMA 2510.

FDMA 303. Cinema Review and Critique
3 Credits (3)
This course is for the student who wants to learn to be a more active, intelligent film viewer. It encourages critical thinking about films and educates students on how to write a film review. Students will meet in the movie theater to watch essential films that serious movie watchers should see from classic motion pictures, to current release major motion pictures, independent films and world cinema features. The course will serve as a guide to the illuminating process of evaluating, analyzing, and reviewing movies. Restricted to: DFM, ANVE majors.
Prerequisite(s): FDMA 2382.

FDMA 305. Business of Filmmaking/Animation
3 Credits (3)
Explores the roles of unions, basic contracts, legal arrangements, and the economics of the production process, distribution, and financing. Consent of Instructor required.
Prerequisite(s): FDMA 2382.

FDMA 308. Writing for Animation
3 Credits (3)
This class explores methods for, and approaches to, writing for animation. Students study and produce scripts for a range of animation outlets while engaging in writing exercises based on character and story development.
Prerequisite(s): FDMA 2382 or consent of instructor.

FDMA 309. Screenwriting I
3 Credits (3)
Writing intensive. Students learn the craft of screenwriting, honing skills in writing dialogue and visual narrative, crafting dynamic characters and dramatic action. Original student scripts will be performed and discussed in class. Crosslisted with: ENGL 309 and THEA 306.
Prerequisite(s): ENGL 2382/FDMA 2382 or consent of instructor.

FDMA 310. Cinematography II
3 Credits (3)
Advanced tools of the cinematographer, lighting and composition techniques. Artistic and technological elements of cinematography. Restricted to: DFM, ANVE majors.
Prerequisite(s): FDMA 2520.

FDMA 311. Editing II
3 Credits (3)
Advanced techniques in digital films using professional non-linear editing systems. Restricted to: DFM, ANVE majors.
Prerequisite(s): FDMA 1220.

FDMA 312. Post Production Color Grading
3 Credits (3)
Color grading is an important part of the overall look of a film. It used to be a craft that only a small number of people knew how to do. However, due to advances in technology and business models, more and more people are diving into color grading. This class is an introductory look into the art and techniques of color grading. Restricted to: DFM, ANVE majors.
Prerequisite(s): FDMA 1220.

FDMA 314. Acting for Film
3 Credits (3)
Techniques for film and television acting. In-depth analysis of film performance creation among actor, director, writer, cinematographer, and editor. Restricted to: THTR, DFM majors.
Prerequisite(s): FDMA 2382.

FDMA 315. Adventures in Genre
3 Credits (3)
Students learn storytelling strategies for the screen by studying various structural genres and components of screenplays and films. Utilizing these strategies, students develop a number of their own original screenplay ideas. Additionally, pitch workshops are held and students learn to present their ideas in various, practical situations.
Prerequisite(s): FDMA 2382 and FDMA 309.
FDMA 316. Border Cinema Around the World
3 Credits (3)
What is the relationship between borders, identity, and vulnerability - and how is this relationship explored in cinema? How are borderlands and testing grounds - the sites of serious ethical dilemmas? By examining powerful feature films from such regions as the Middle East, the Balkans, and the US/Mexico border, we will explore ways in which personal, familial, communal, and national identities are defined through the complex process of bordering. We will investigate the role of cinema in reflecting and/or facilitating this process.

FDMA 318. Documentary Production
3 Credits (3)
Survey of theory and history of documentary filming including viewings and discussions of notable films and directors. Class works with actual documentary project. May be repeated up to 6 credits. Restricted to: ANVE, DFM majors.
Prerequisite(s): FDMA 1220, FDMA 2520.

FDMA 320. Race and Gender in Film
3 Credits (3)
In this course students will analyze film as an art form as well as be exposed to Race and Gender Feminist Film Theory. We will consider the role of film in our understandings of sex, gender and sexuality. Through discussions and writing we will work to discern relevant social, political, ideological, and aesthetic concepts in the media we examine. Crosslisted with: ENGL 399, GNDR 450 and GNDR 550.

FDMA 325. Film Festival Production
3 Credits (3)
A course for students interested in learning about the processes of orchestrating an independent film festival. Students will engage in a professional environment with other film students and filmmakers, as well as learn about film event administration and organization. May be repeated up to 6 credits. Restricted to: DFM, ANVE majors.

FDMA 328. Producing
3 Credits (3)
Examines the role of the Producer, essential to every film production. The course will revolve around the best practices in organizational design, the production process, the budgeting process, financial controls, scheduling, insurance and distribution.
Prerequisite(s)/Corequisite(s): FDMA 2510, FDMA 1220, FDMA 2382. Restricted to: ANVE, DFM majors.

FDMA 332. 3D Character Animation
3 Credits (3)
Essentials and principles of 3D character animation. Techniques and craft of breathing life into characters through movement, including dynamic poses, blocking action, run and walk cycles, lip synching and realism. Students will plan and produce original animation for review by classmates and as part of a CGI demo reel. THEA 1221, Acting and FDMA 2510, Sound Design are recommended. Restricted to: DFM, ANVE majors.
Prerequisite: THEA 1210 (or FDMA 314 or FDMA 348), FDMA 1510 and FDMA 2720 or consent of instructor.
Learning Outcomes
1. Understand the character animation pipeline. Understand basic body mechanics and how to represent them with a 3D character
Understand the twelve principles of animation on a deeper level and be able to apply them in individual work Developing a vocabulary and critical eye in order to critique each other’s work.

FDMA 340. Visual Effects I
3 Credits (3)
This course will educate students in the fundamental principles, skills, and artistry needed to successfully integrate live action footage and computer generated imagery into technically correct, narratively engaging and cinematic shots. This course is designed as a dry run for the culminating project in 3D production Studio 1 & 2. Topics include: visual storytelling, cinematography for visual effects, green screen setup/lighting/keying, intermediate compositing techniques, editing, color correction and color grading, professional pipeline protocols. Restricted to: ANVE, DFM majors. May be repeated up to 3 credits.
Prerequisite: FDMA 1510, FDMA 2530, FDMA 2745 (or consent of instructor).
Learning Outcomes
1. Students will learn fundamental skills needed to integrate live action footage and animation. Students will explore advanced storytelling techniques through visual effects work. Students will learn cinematography specific to working in visual effects.

FDMA 348. Acting for Animation
3 Credits (3)
This course explores performance techniques relevant to animators including 2D and 3D animation and motion capture. Students learn to create dynamic, dramatic performances and believable character interactions for animation based reference. Students learn to analyze scripts, sound, acting, action and performance for production. Topics include: acting theory, emotional/mental states, character movement and style, dynamic facial expression, scene construction, posing, layering and rhythm, simplification and exaggeration, and lip sync. Restricted to: ANVE, DFM majors. May be repeated up to 3 credits.
Learning Outcomes
1. Understand the different roles and character mindsets of digital animation in cinema. Understand and apply some basic acting skills into animation reference. Understand and apply some basic processes of creating reference for a narrative. Begin to apply some basic strategies for developing and creating a story visually.

FDMA 350. Intermediate 2D Animation
3 Credits (3)
Students will begin to refine their animation skills by animating more complex characters utilizing the Principles of Animation. They will practice these advanced drawing and motion techniques in a variety of exercises and projects using industry standard software. Areas of focus include: squash and stretch, cloth simulation, the successive breaking of joints, and biped walk cycles. May be repeated up to 3 credits.
Prerequisite: FDMA 2710.
Learning Outcomes
1. Students will refine foundational animation skills. Students will learn and show proficiency in related industry-standard software. Students will apply skills to more advanced projects than in previous 2D courses.

FDMA 360. Previsualization
3 Credits (3)
Implements 3D animation tools in preproduction shot and sequence design for motion picture and broadcast industries; including 3D storyboarding, technical planning and editing basics. LC Campus Only. Restricted to ANVE, DFM majors.
Prerequisite(s): FDMA 1510, FDMA 2530, and FDMA 2720 or consent of instructor.
FDMA 362. Motion Graphics
3 Credits (3)
Students will learn the industry standard motion graphics techniques through a variety of exercises and projects that combine animation, text, visual effects, and sound. Restricted to: ANVE, DFM majors.
Prerequisite: FDMA 1715.
Learning Outcomes
1. Understand the context for and learn to create, combine, and animate text with graphics. Explore various applications of creative techniques, including motion graphic design for commercials, logos, informative videos, UI design, and basic character rigging. Learn to use industry-standard motion graphic softwares.

FDMA 365. Character Design and Development
3 Credits (3)
Digital character design for the entertainment industry. Provides insight into the process of creating iconic characters. Traditional and contemporary character designers are explored. Industry workflow is introduced and necessary skills are developed to design detailed 3D characters from concept through production. Restricted to ANVE, DFM majors. May be repeated up to 3 credits.
Prerequisite: FDMA 1510, FDMA 2530 and FDMA 2535, or consent of instructor.
Learning Outcomes
1. Understand the role of a character in cinema and gaming. Become familiar with leading character designers and their approach. Utilize current industry standard methods. Understand and apply fundamental character design techniques. Demonstrate a strong ability to design and create characters from concept through production.

FDMA 377. Game Design Workshop
3 Credits (3)
In this course we will learn to design, develop, and playtest games. This approach will be exercise driven and involve nontechnical approaches as well as digital production techniques. This playcentric approach will involve player participation from conception through production. We will explore the iterative processes of prototyping, playtesting, and revising based on feedback. Consent of Instructor required. Restricted to: ANVE, DFM majors.

FDMA 395. Directing I
3 Credits (3)
Study and application through short scene work of the basic tools of a director and relationships with actors, designers, playwright, and stage managers. Interpreting as well as organizing. May be repeated up to 3 credits. Restricted to: DFM, ANVE majors.
Prerequisite(s): FDMA 2510, AND FDMA 2520, AND FDMA 1220.

FDMA 396. Directing II
3 Credits (3)
Addresses pre-production concerns including script breakdown, casting ground plans and coverage. The criteria employed when selecting the creative team including a director of photography, art director, light, sound and wardrobe designers. Introduction to budgeting, scheduling, and script breakdowns. Prerequisite: FDMA 395

FDMA 397. Practicum
1-3 Credits (1-3)
Practical application of the student’s field of study in a project environment. May be repeated up to 9 credits. Consent of Instructor required.

FDMA 398. Special Topics
3 Credits (3)
This course addresses specific subjects and issues as identified by the department. Topics and credits to be announced in the Schedule of classes. May be repeated up to 12 credits.

FDMA 400. Directed Studies
1-6 Credits (1-6)
Directed study course in CMI under the supervision of a CMI faculty member. May be repeated up to 9 credits.

FDMA 401. Motion Capture Techniques
3 Credits (3)
Students will implement industry standard motion capture techniques and essential skills to capture and integrate performance for movie making, 3D animation and game production. Students will learn how to use the motion capture system, equipment and workflow, and polish performances using industry standard software. Concepts covered will consist of exploring motion capture setup, shooting, data tracking, and animation correction and enhancement. Restricted to ANVE, DFM majors. May be repeated up to 3 credits.
Prerequisite: FDMA 1510, FDMA 2720 and FDMA 2725 (or consent of instructor).
Learning Outcomes
1. Understand and demonstrate basic approaches to integrating live actors with computer generated imagery. Understand the role of motion capture in cinema, advertising and related fields. Build familiarity with leading motion capture companies and their approaches. Become knowledgeable of the history of motion capture. Become knowledgeable of current advances in motion capture. Learn to utilize industry standard motion capture software. Demonstrate a strong ability to produce believable imagery from concept through final production.

FDMA 410. Cinematography III
3 Credits (3)
This class is geared towards those who want to learn more about cinematography, color grading, and digital technology as it pertains to cinematography. Shooting high-end codecs (ProRes/DNxHD) or RAW are becoming more and more popular in filmmaking as camera manufactures and computer processing get better. This class will be a mix of production and post-production as learning how to shoot these higher end codecs do not end with the camera. Focus will be on techniques of shooting raw, understanding how to operate a camera capable of high end image acquisition, properly building up the camera rig and accessories, managing data and the post-production workflow. Consent of Instructor required. Restricted to: DFM, ANVE majors.
Prerequisite(s): FDMA 310.

FDMA 412. Advanced Equipment Training
3 Credits (3)
This class is designed for students who want to dive deep into building and operating much of our advanced camera and G&E equipment. Though these on-set tasks are performed by below-the-line crew members, having the knowledge of and ability to use this equipment will serve you greatly as a DP. We will go over a wide variety of devices in this class, ranging from car mounts and our GlideCam to our large jib, 3-axis gimbal, 500-amp generator, and 6k HMI lights. We will also do some advanced lighting scenarios. The goal of this class is to get you “certified” on all the above items, resulting in your being able to build this equipment for other CMI sets, such as the Mixed Class Productions, Senior Projects, etc. Restricted to: DFM, ANVE majors.
Prerequisite(s): FDMA 310.
FDMA 425. Film Festival Production
3 Credits (3)
This course is designed to enhance student knowledge about film festivals and, specifically, the Las Cruces International Film Festival. From soup to nuts, students will build upon what they learned in CMI 325 Film Festival Preparation regarding how to manage and execute a major film festival, including film solicitation and submissions, festival event marketing, celebrity appearances, industry workshops, filmmaker coordination and brand management. Students will gain an appreciation of the value of a film festival to the community and for visiting filmmakers. Students will apply this knowledge in their written assignments, film evaluations, and departmental responsibilities. May be repeated up to 6 credits. Restricted to: DFM, ANVE majors.
Prerequisite(s): FDMA 325.

FDMA 433. Sets and Environments
3 Credits (3)
Digital environment design and creation for movies and games from concept to production; including illustration, modeling, matte painting, texturing, lighting, rendering, integration, and camera projection. Restricted to ANVE, DFM majors. May be repeated up to 3 credits.
Prerequisite: FDMA 1510, FDMA 2530, and FDMA 2535 or consent of instructor.

Learning Outcomes
1. Understand the role of digital production design in cinema. Become familiar with the work of leading digital artists involved in production design for the entertainment and gaming industries. Utilize the software implemented in the entertainment industry. Understand and apply fundamental digital set design techniques. Demonstrate a strong ability to design and create digital set and environments from concept through production.

FDMA 450. Advanced 2D Animation
3 Credits (3)
This course will cover the more advanced aspects of 2D Animation. Students will demonstrate their mastery of the principles of animation through a variety of exercises and projects focusing on: automated and manual lip sync, full motion character animation, acting, smears, and quadruped animation. Restricted to ANVE, DFM majors. May be repeated up to 3 credits.
Prerequisite: FDMA 350.

Learning Outcomes
1. Students will gain experience mastering Disney’s Principles of animation. Students will complete exercises to animate both humans and animals. Students will gain proficiency in lip syncing and acting using industry standard software.

FDMA 477. Digital Game Design
3 Credits (3)
This course covers the theory and practice of digital game production using industry standard media and game engine applications. Students apply animation and game development approaches toward game engine constraints and requirements to create gameplay experiences. Design and production methods are implemented to create game levels and populate them with original assets. Team-based game prototyping will require multiple disciplines to devise unique digital game experiences. Consent of Instructor required. Restricted to: ANVE, DFM majors.
Prerequisite(s): FDMA 377.

FDMA 480. Screenwriting II
3 Credits (3)
Students will write 2 short scripts, 10-15 pages each throughout the semester. Focus will be on learning how to take notes and rewrite. Script analysis will be in a workshop format. Scripts will be read and discussed, scenes performed and reactions analyzed to consider effect of dialogue, character development, etc. Restricted to ENGL, DFM, ANVE majors. Crosslisted with: ENGL 480
Prerequisite(s): ENGL 309 or FDMA 309 or THEA 306 or consent of instructor.

FDMA 490. Advanced Screenwriting
3 Credits (3)
Students will prepare a 30-60 page screenplay. Script analysis will be in an advanced workshop format. Scripts will be read and discussed, scenes performed and reactions analyzed to consider effect of dialogue, character development, etc. This course is aimed at preparing writers for the professional market. Consent of instructor required. Restricted to ENGL, DFM, ANVE majors. Crosslisted with: ENGL 491

FDMA 491. 3D Production Studio I
6 Credits (6)
The course is the first semester of a year-long effort to complete a culminating project that is a story-driven short film, which can be either full CGI, or live action with visual effects. In Production Studio I the emphasis will be on the pre-production phase, including analysis and critique, pipeline organization and project management. Pre-production consists of: Pitch, Script, Visual and sound references, Storyboards, 3D Previsualization, Scheduling/Project Management. Restricted to ANVE majors.
Prerequisite: FDMA 308 or FDMA 309, FDMA 341.
Prerequisite/Corequisite: FDMA 332, FDMA 360, FDMA 365, FDMA 433.

Learning Outcomes
1. Demonstrate an ability to create a transformational story. Exhibit proficiency in visual storytelling, structure, and character development. Develop a story appropriate to the chosen production approach. Create storyboards/animatics to direct the cinematic aspects of the story. Design the production visually in terms of characters and environment. Learn to implement critiques of work to improve production quality.

FDMA 492. 2D Production Studio I
6 Credits (6)
Students will work through the pre-production process on short animated films. They will write a script, create a storyboard, and record voice over/dialogue to create an animation. Additional exercises will then be assigned to augment the skill set of the student according to the needs of each student. Restricted to ANVE majors.
Prerequisite: FDMA 1715 and FDMA 450.

Learning Outcomes
1. Students will synthesize animation techniques to produce a completed animation. Students will show proficiency in storytelling towards the development of a short script for production. Students will demonstrate proficiency in industry standard animation softwares and production practices.
FDMA 493. 3D Production Studio II
6 Credits (6)
The course is the final semester of a year-long concentration on a culminating project. Emphasis will be on the production, post-production, and distribution of the work created during 3D Production Studio I. Students will produce a professional quality and industry-standard visual story that will help them gain entry into professional employment. The overall objective is for students to execute their artistic vision with exceptional creative and technical proficiency - resulting in a story-driven and captivating cinematic experience. Restricted to ANVE majors.
Prerequisite: FDMA 491.
Learning Outcomes
1. Students will complete the process of transforming their story from script to screen. Students will demonstrate mastery of craft as a digital artist. Students will learn to direct the cinematic aspects of the story. Students will show proficiency in the production workflow, and complete a deliverable short film by the end of the production schedule.

FDMA 494. 2D Production Studio II
6 Credits (6)
Students will produce the short animated films they developed in 2D Production Studio I. They will animate, composite, and edit their shorts into a final piece for presentation in a showcase. Restricted to ANVE majors.
Prerequisite: FDMA 492.
Learning Outcomes
1. To complete a final project (either short film or demo reel) that demonstrates synthesis of animation techniques taught in earlier classes. To translate animatics from 2D Production Studio I into keyframes and then in-between their keyframes to get clean, smooth animations.

FDMA 495. Internship
1-12 Credits (1-12)
Placement in a production facility and supervised experience required. With CMI advisor approval only. May be repeated up to 18 credits. Consent of Instructor required. Restricted to: DFM,ANVE majors.

FDMA 497. Portfolio Design and Development
3 Credits (3)
Advanced graphic design projects with an emphasis on conceptual development, portfolio preparation, and professional practices. Refine general marketing strategies, personal portfolio, and resumes. Define, target, and penetrate personal target markets. Students develop individual promotional/demo packages. Restricted to: DFM,ANVE majors.

Animation and Visual Effects - Bachelor of Creative Media

The Creative Media Institute’s Bachelor of Creative Media with an emphasis in Animation & Visual Effects currently offers 2 different paths, determined by the kind of senior project students wish to produce.

Pathway: 2D Production Studio

Students must complete all university requirements and the Animation and Visual Effects curriculum outlined below. All Animation and Visual Effects Curriculum requirements must be completed with a grade of C- or higher.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix Title Credits
General Education

Area I: Communications
English Composition - Level 1 1
English Composition - Level 2 1
Oral Communication 1

Area II: Mathematics 1,2

Area III/IV: Laboratory Sciences and Social/Behavioral Sciences
Area III: Laboratory Sciences Course (4 credits) 1
Area IV: Social/Behavioral Sciences Course (3 credits) 1
Either an Area III/IV: Laboratory Sciences Course or Social/Behavioral Science Course (4 credits or 3 credits) 1

Area V: Humanities 1
Area VI: Creative and Fine Arts 1
THEA 1210G Acting for Non-Majors 3
General Education Elective 1

Viewing a Wider World 3

### Total Credits

120

1 See the General Education (p. 88) section of the catalog for a full list of courses.

2 A Mathematics General Education course is required but students may need to take any prerequisites needed to enter the course selected first.

3 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

4 Required Pre-Application class for ANVE

5 Elective credit may vary based on General Education course selection, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

### Second Language Requirement

For the Bachelor of Creative Media with a major in Animation and Visual Effects, there is no second language requirement for the degree.

### Pathway: 3D & VFX Production Studio

Students must complete all university requirements and the Animation and Visual Effects curriculum outlined below. All Animation and Visual Effects Curriculum requirements must be completed with a grade of C- or higher.

Electives: to bring the total to 120 credits

| Total Credits | 120-123 |

1. See the General Education (p. 88) section of the catalog for a full list of courses.
2. A Mathematics course is required for the degree but students may need to take any prerequisites needed to enter the course first.
3. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.
4. Required pre-application course for DFM
5. Course may be taken at an NMSU community college.
6. See course descriptions in the designated community college campuses.
7. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Second Language Requirement

For the Bachelor of Creative Media with a major in Digital Film Making there is no second language requirement for the degree.

A Suggested Plan of Study

This roadmap assumes student placement in MATH 1130G Survey of Mathematics and ENGL 1110G Composition I. The contents and
order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

**Total Credits** 120-123

1. These courses must be taken with a C- of better
2. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
3. See the General Education (p. 88) section of the catalog for a full list of courses.
The department offers an interdisciplinary minor in Forensic Sciences. Students interested in the minor should consult with the department head.

Graduate Program Information

The Department of Criminal Justice offers graduate study leading to the Master of Criminal Justice (MCJ) degree. Admission to the MCJ is competitive and prospective graduate students are expected to have at least a 3.0 undergraduate grade-point-average, coursework in research methods and statistics, and possess a bachelor's degree. Those not meeting these requirements may be admitted conditionally and required to make up deficiencies at the outset of their program of study. Applicants should review our graduate handbook (https://crimjust.nmsu.edu/graduate-programs/HANDBOOK-Revised-May-2019f.pdf) and provide a personal statement that includes a discussion of your interest in the field and reasons for wanting to pursue the degree (1-2 pages). If interested in a graduate assistantship, please complete the application form (https://crimjust.nmsu.edu/_assets/TA-Application-for-MCJ-in-CJ-.pdf) and provide three letters of recommendation. Students meeting the minimum GPA requirement (3.0 or better) do not need to submit letters of recommendation. Students not meeting the minimum GPA requirement may be asked for additional materials, including letters of recommendation. The GRE is NOT required for admission into the MCJ program. The MCJ Graduate Committee may require a student to complete additional English writing coursework. For more information, please visit our website: http://crimjust.nmsu.edu/criminal-justice-graduate/.

Students must declare their intent to pursue one of the two degree options: the thesis option or the focused coursework option. The degree options are provided so that students may better match their education with career goals. The thesis option is often used by students interested in pursuing careers in basic and applied criminal justice research or a doctoral degree. The focused coursework option is often used by students pursuing administrative positions within criminal justice agencies. The thesis option is typically only available for Campus-Based students.

All candidates, regardless of chosen degree option, must complete a final examination. Examination requirements vary by degree option. Please contact the director of the MCJ program or consult the Department of Criminal Justice website http://crimjust.nmsu.edu/criminal-justice-graduat/ for details.

Thesis students must submit a thesis proposal to their faculty committee at a proposal hearing for approval and subsequently complete the approved thesis project. An approved thesis proposal is one wherein the thesis committee determines the student demonstrates a comprehensive understanding of the nexus of theory, method, and policy as it applies to the proposed thesis project. At the discretion of the thesis committee the proposal may be considered inadequate and the student is required to revise and resubmit the thesis proposal until the committee determines the proposal is satisfactory. The final examination includes a defense of the completed thesis, but may also include a general examination based upon the candidate's program of study. The minimum coursework requirements are displayed below.

Focused coursework students must pass two written comprehensive examinations following completion of the required courses, no earlier

FDMA Elective Courses:
Las Cruces Campus Courses
- FDMA 2311 History of Animation, FDMA 2381 Storyboarding.
- ENGL 2381 Storyboarding

Community College Courses
- FDMA 2120 Film Crew I/ Introduction to Film and Media Workflow, FDMA 2125 Film Crew II, FDMA 1210 Digital Video Production I, FDMA 2210 Digital Video Production II, FDMA 2285 Digital Video Editing II, FDMA 2144 Pre-production Management

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

Animation and Visual Effects - Undergraduate Minor

Must be admitted to DFM

Take 18 credits of FDMA/ENGL, FDMA/THEA courses as listed in the Animation and Visual Effects major. A minimum of 9 credits must be upper division.

Digital Film Making - Undergraduate Minor

Must be admitted to ANVE

Take 18 credits from the FDMA/ENGL, FDMA/THTR courses as listed in the Digital Film Making major. A minimum of 9 credits must be upper division.

Criminal Justice

Undergraduate Program Information

The Department of Criminal Justice offers courses in the traditional setting as well as online.

The criminal justice degree plan is broadly interdisciplinary in nature embracing the study of the humanities, law, natural, behavioral and social sciences. The curriculum seeks to balance theoretical inquiry with applied knowledge.

Students become prepared for careers in law enforcement, corrections, probation and parole, work with juveniles, victim services, non- and not-for profit organizations connected with criminal and social justice, and the related field of forensics. Graduates have also been successful in law school and graduate programs in the social sciences. The undergraduate
than their third semester. Students not passing the examinations will be required to wait until the following semester to retake the examination. The minimum course requirements are displayed below.

**Online M.C.J. Coursework**

There is an online option for the MCJ degree. Online criminal justice courses are available only to those admitted to the MCJ program as online students, or with permission of the Director of the MCJ program. Students desiring to be admitted to the MCJ program as online students must declare that intent in writing to the MCJ director. For more information regarding the online MCJ degree option, consult the Department of Criminal Justice web page, http://crimjust.nmsu.edu, or contact the Director of the MCJ program.

**Teaching Assistantships**

Teaching assistantships are typically available for some traditional (on-campus) MCJ students on a competitive basis. The Director of the MCJ Program will contact admitted students to determine their interest, and the Graduate Committee will make recommendations to the Department Head for a final decision.

**Degrees for the Department**

**Bachelor Degree(s)**

- Criminal Justice - Bachelor of Criminal Justice (p. 509)
- Criminal Justice - Bachelor of Criminal Justice (Online) (p. 512)

**Supplemental Major(s)**

- Law and Society - Undergraduate Supplemental Major (p. 516)

**Master Degree(s)**

- Criminal Justice - Master of Criminal Justice (p. 516)

**Minors for the Department**

- Forensic Science - Undergraduate Minor (p. 515)

**Graduate Certificates**

- Borderlands and Ethnic Studies - Graduate Certificate (p. 517)

**Professor, Dennis M. Giever, Department Head**

**Professor** Lara; **Associate Professors** Keys, Natividad, Posadas; **Assistant Professors** Baek, Cho, Trujillo; **College Associate Professor** Dimitrijevic; **Emeritus Professors** Crowley, Gregware, Mays (Regents), Winfree

*H. Baek, Ph.D. (University of Louisville, Kentucky)–police administration, criminology; A. Cho, Ph.D. (Sam Houston State University)–corrections, gender as it relates to crime & justice; D. Giever, Ph.D. (Indiana University of Pennsylvania)–criminology, research methods, evidence-based program evaluation; D. Keys, Ph.D. (Missouri-Columbia)–penology, narcotic policy; D. Lara, Ph.D. (University of California-Berkeley)–cultural studies, race & ethnicity, border justice; N. Natividad, Ph.D. (Arizona State)–borderland studies, race and identity studies, immigration; C. E. Posadas*, Ph.D. (Arizona State) – immigration and justice, juvenile justice, research methods; S. Trujillo, Ph.D. (University of Missouri - St. Louis)–immigration, ethnicity, community-level correlates of crime, as well as juvenile justice and gang behavior.

*MCJ Program Director

---

### Criminal Justice Courses

**CJUS 1110G. Introduction to Criminal Justice**

3 Credits (3)

This course provides an overview of the historical development and structure of the United States criminal justice system, with emphasis on how the various components of the system intertwine to protect and preserve individual rights. The course covers critical analysis of criminal justice processes and the ethical, legal, and political factors affecting the exercise of discretion by criminal justice professionals.

**Learning Outcomes**

1. Describe the history, structure and function of the criminal justice system in the United States.
2. Discuss the role of law enforcement, court systems, corrections, and security in maintaining social order.
3. Identify and describe crime causation theories, various measures of crime and their reliability and victimization theories.
4. Relate fundamental principles, concepts and terminology used in criminal justice to current events.
5. Apply basic analytical and critical thinking skills in evaluating criminal justice issues, policies, trends and disparities.

**CJUS 1120. Criminal Law**

3 Credits (3)

This course covers basic principles of substantive criminal law including elements of crimes against persons, property, public order, public morality, defenses to crimes, and parties to crime. May be repeated up to 3 credits.

**Learning Outcomes**

1. Explain the concepts of substantive criminal liability in the United States, including actus reas, mens rea, causation, concurrence, and parties to crime.
2. Define the differences between criminal law and civil law in the United States.
3. Demonstrate basic knowledge of legal terminology as it relates to criminal law.
4. Identify the elements of crimes against persons, property, public order and the administration of justice, public morality, and the inchoate crimes.
5. Describe the various defenses to crimes.

**CJUS 1996. Special Topics in Criminal Justice**

1-3 Credits

Specific subjects to be announced in the Schedule of Classes. May be repeated under different topics for a maximum of 6 credits.

**Learning Outcomes**

1. Varies
CJUS 2120. Criminal Courts and Procedure
3 Credits (3)
This course covers the structures and functions of American trial and appellate courts, including the roles of attorneys, judges, and other court personnel, the formal and informal process of applying constitutional law, rules of evidence, case law and an understanding of the logic used by the courts.

Learning Outcomes
1. Explain the application of the Constitutional Amendments that apply to criminal justice.
2. Explain and describe the dual court system in the U.S. and how courts enforce the rule of law.
3. Identify and list the duties and requirements of the courtroom workgroup.
4. Describe courtroom procedures, rules of the court, and due process of law.
5. Articulate basic knowledge of the U.S. criminal court system.
6. Define legal terms.
7. Explain the use of discretion in criminal procedure.
8. Differentiate the role of courts of limited jurisdiction, courts of general jurisdiction, and the appellate courts in the processing of criminal cases.

CJUS 2140. Criminal Investigations
3 Credits (3)
This course introduces criminal investigations with in the various local, state, and federal law enforcement agencies. Emphasis is given to the theory, techniques, aids, technology, collection, and preservation procedures which ensure the evidentiary integrity. Courtroom evidentiary procedures and techniques will be introduced. Community Colleges only. (Note: students completing CJUS 2140 may not take CJUS 321.)

Learning Outcomes
1. Identify developments in investigation technology.
2. Identify common types of criminal investigations and their key components.
3. Apply proper crime scene investigative protocols.
4. Explain proper evidentiary gathering and handing procedures, and utilize various interviewing techniques.
5. Identify and compare different law enforcement agencies and the role they play in criminal investigations.
6. Describe proper collection, evidence preservation, documentation, and court presentation.
7. Develop effective search authorization.

CJUS 2150. Corrections System
3 Credits (3)
This course introduces the corrections system in the United States, including the processing of an offender in the system and the responsibilities and duties of correctional professionals. The course covers the historical development, theory, and practice, as well as the institutional and community-based alternatives available in the corrections process.

Learning Outcomes
1. Describe the purposes of the corrections system and the issues facing the corrections system.
2. Explain the components of the corrections system and describe their functions.
3. Compare and contrast the different forms of correction practices.
4. Explain the goals of corrections, the different factors affecting the sentencing process, the legal rights of prisoners, and the issues concerning prison violence.
5. Explain the impact of reentry into society.
6. Identify the issues concerning capital punishment.
7. Describe the effectiveness of various correction programs on offenders.

CJUS 2160. Field Experience in Criminal Justice
3-6 Credits
This course is designed to provide actual experience working for a criminal justice agency and the opportunity to apply criminal justice concepts and theory to a field situation. Students already working in an agency will complete an approved learning project while on the job.

Prerequisites: CJUS 1110G, prior arrangement and consent of instructor and a GPA of 2.0 or better in major.

Learning Outcomes
1. Obtain practical experience by observing, researching, and working in a criminal justice agency.
2. Apply the knowledge of principles, theories, and methods that were learned in the classroom to situations in which field experience will be devoted.
3. Instill an understanding for general and specific problems that criminal justice agencies encounter on a daily basis.
4. Develop a professional work ethic and attitudes, including reliability, professional responsibility, and the ability to work cooperatively with others.
CJUS 2220. The American Law Enforcement System
3 Credits (3)
This course covers the historical and philosophical foundations of law and order, with an in-depth examination of the various local, state, ad federal law enforcement agencies and how they interact within the criminal justice system.

Learning Outcomes
1. Discuss, evaluate, and analyze the role of police in the democratic society today, and the historical development of modern day law enforcement
2. Define and explain the different types of community policing and the valid reasons behind their application within a community
3. List and discuss the ways to overcome the barriers to change within a police organization, good recruitment, screening, and retention of employees
4. Analyze and discuss the history of and the different types of police patrol, as well as the use of force and deadly force, and methods used for controlling police behavior
5. Describe and discuss the different types of police behavior, potential oversight, and remedy and their limitations
6. List and discuss the benefits of higher and continued education, along with the minimum educational requirements for police officers
7. Evaluate and discuss the reasons for police stress and the methods of dealing with stressors
8. Interpret current court cases, both state and federal, that affect police procedures

CJUS 300. Introduction to Criminal Justice Research
3 Credits (3)
Overview and evaluation of criminal justice research. Selection of research topics, methods of data selection and collection, analysis techniques, and presentation of findings.
Prerequisite: restricted to majors or consent of instructor.

CJUS 301. Advanced Research Methods
3 Credits (3)
Study of selected quantitative and qualitative skills and their application to criminal justice research.
Prerequisite: Restricted to majors or consent of instructor.

CJUS 302. Crime, Justice and Society
3 Credits (3)
Through critical analysis students build a rich understanding of the role of crime in our contemporary landscape and explore ideas and practices associated with justice, victimization, criminality, morality and righteousness. The course cultivates knowledge & awareness of the interactions between socially constructed phenomena (race, class, power, ethnicity, economic structures) and popular beliefs, policies, and practices associated with crime, punishment, and formal social control. It is recommended that you complete three of the following English courses before enrolling in this class: ENGL 1110G, ENGL 2210G, ENGL 2221G or ENGL 2130G. Restricted to: Criminal Justice majors.

CJUS 303. Introduction to Criminological Theory
3 Credits (3)
Defining and measuring crime, crime causation, and the criminal behavior system, and their linkage to criminal justice policies, procedures, and practices. Students must be enrolled or have completed third English writing class and completed two of the following: ENGL 1110G, ENGL 2210G, ENGL 2221G or ENGL 2130G. Restricted to: C J majors.
Prerequisite(s): CJUS 300.

CJUS 304. Historical Perspectives of Criminal Justice Systems
3 Credits (3)
Examines the precursors to and development of three distinct systems associated with crime and punishment in the United States: the Courts, the Police, & Corrections. By studying the historical context and socio-political backdrop in which these institutions emerged and expanded students will come to a richer understanding of them and their attendant polices, practices, conventions, and assumptions.It is recommended that you complete three of the following English courses before enrolling in this class: ENGL 1110G, ENGL 2210G, ENGL 2221G or ENGL 2130G. Restricted to: Criminal Justice majors.
Prerequisite(s): CJUS 300.

CJUS 306. Criminal Procedural Law
3 Credits (3)
Legal analyses of the rights of criminal defendants; legal duties and responsibilities of criminal justice personnel in the processing of criminal defendants. May be repeated up to 3 credits. Restricted to: C J majors.
Prerequisite(s): Restricted to majors, Forensic Science minors, or consent of instructor.

CJUS 307. Law of Evidence
3 Credits (3)
Evidentiary rules and concepts and their application in a criminal trial. May be repeated up to 3 credits. Restricted to: C J majors.
Prerequisite(s): Restricted to majors, Forensic Science minors, or consent of instructor.

CJUS 321. Criminal Investigation and Intelligence
3 Credits (3)
Principles of criminal investigation and intelligence production; processing cases from complaint through crime scene search, identification and collection of evidence, interviewing and interrogation, and case preparation for courts. May be repeated up to 3 credits. Restricted to: C J majors.
Prerequisite(s): Restricted to majors, Forensic Science minors, or consent of instructor.

CJUS 331. American Correctional Institutions
3 Credits (3)
Structure, organization, and operations of United States jails and prisons. Overview of correctional standards and classification systems, emphasizing current theory and practice.
Prerequisite: restricted to majors or consent of instructor.

CJUS 332. Correctional Law
3 Credits (3)
Federal and state laws and rules of post-conviction procedures; rights of the convicted related to sentencing, appeals, clemency, and restoration of rights.
Prerequisite: restricted to majors or consent of instructor.

CJUS 333. Juvenile Corrections
3 Credits (3)
Development and implementation of juvenile facilities and community programs. Effectiveness of current corrections practices. Restricted to majors.

CJUS 345. Victimology
3 Credits (3)
Study of risk factors in crime victimization, the impact of crimes upon victims, and the role of the victim in the criminal justice system.
Prerequisite: restricted to majors or consent of instructor.
CJUS 346. Psychology and the Justice System  
3 Credits (3)  
Analysis of psychological underpinnings of criminal behavior and the implications of these psychological principles for criminal justice policy. May be repeated up to 3 credits. Restricted to: C J majors.  
Prerequisite(s): Restricted to majors, Forensic Science minors, or consent of instructor.

CJUS 347. Sex Crimes  
3 Credits (3)  
Dynamics of sex crimes for victims and offenders, plus consideration of the legal and correction systems’ response to sex crimes. Restricted to majors.

CJUS 348. Serial Killers  
3 Credits (3)  
Overview and critical assessment of serial homicide and its relevance for contemporary U.S. society. Focus on factors influencing definitions and cultural understanding of serial homicide.  
Prerequisite(s): 60 credit hours.

CJUS 360. The Juvenile Justice System  
3 Credits (3)  
History, development, and philosophy behind a separate juvenile justice system. Role of the juvenile court, evaluation of juvenile law and procedure, and the processing of juvenile offenders.  
Prerequisite: restricted to majors or consent of instructor.

CJUS 380. Introduction to Terrorism  
3 Credits (3)  
Overview of the phenomenon of terrorism, psychological and sociological theories of terrorism, and various contemporary governmental policies.

CJUS 391. Special Readings in Criminal Justice  
1-3 Credits  
Individually chosen subject areas not readily available in other courses. May be repeated for a maximum of 6 credits under different subtitles. Restricted to majors.  
Prerequisites: at least a 2.5 GPA and consent of instructor.

CJUS 393. Internship in Criminal Justice  
1-12 Credits  
Field experience in a local, state, or federal criminal justice or private security agency. Includes orientation, observation, conferences, and work experience. Credits limited to six if student has taken CJUS 2160. May be repeated for a maximum of 12 credits. Restricted to majors. Graded S/U.  
Prerequisite: consent of instructor and GPA of 2.5 or better.

CJUS 399. New Mexico Law  
3 Credits (3)  
New Mexico legal system, court structure and procedures; legal terms and concepts; constitutional, criminal, mass media, historical and social issues relating to New Mexico. Same as POLS 399, JOUR 399, SOCI 399, and HIST 399.

CJUS 405. Juvenile Courts and Law  
3 Credits (3)  
History, development, and current status of juvenile courts. Legal status of juveniles in court and constitutional protections afforded them. Restricted to majors.

CJUS 410. Criminal Justice Administrative Systems  
3 Credits (3)  
Administrative structures in criminal justice agencies and institutions; relationship of administrative structures to practical police, courts, and corrections problems.  
Prerequisite: restricted to majors or consent of instructor.

CJUS 412. Introduction to Security Technology and Loss Prevention  
3 Credits (3)  
Private and public responses to security problems, including employee theft, perimeter security, and domestic or foreign terrorism; reviews related law and management practices.

CJUS 414. Race, Crime and Justice  
3 Credits (3)  
Historical and contemporary analysis of the relationship between race and crime in the United States with emphasis upon human equality and fairness. Overview of racial and ethnic social categorizations and how they impact law and order.

CJUS 416. Global Perspectives on Youth and Drug Use  
3 Credits (3)  
Overview of global drug use among young people, comparative legal structures, formal and informal responses. Restricted to C J, ANTH, GOVT, SOC, GNDR, S WK majors.

CJUS 417. Drugs In Our World  
3 Credits (3)  
Comparative analysis of patterns and theories of drug use, formal government mitigation strategies.

CJUS 424. Forensic Law  
3 Credits (3)  
Overview of the rules and issues related to the use of scientific information in the legal process. May be repeated up to 3 credits. Restricted to: C J majors.  
Prerequisite(s): C J major, Forensic Science minors, or consent of instructor.

CJUS 425. Issues in Ethics, Law, and Criminal Justice  
3 Credits (3)  
Examination of the key ethical and decision-making dilemmas facing professionals working in the field of law and criminal justice.  
Prerequisite: restricted to majors or consent of instructor.

CJUS 427. Race and Crime in Film  
3 Credits (3)  
Critical analysis of film where messages relating race and crime are present, with emphasis on how this imagery informs problem definition, policies, and practice within the criminal justice system.  
Prerequisite(s): 60 credit hours.

CJUS 428. Mexican-Americans and Issues of Social Justice  
3 Credits (3)  
In this course we will explore and discuss social issues related to the Mexican American community in the U.S., with special emphasis on their collective historical struggles and contributions to society. We will discuss the political, economic and cultural forces that exemplify their experience as a “whole.”  
Prerequisite(s): Students must have completed CJUS 300 or research methods equivalent or consent from the instructor.

CJUS 429. Immigration & Justice  
3 Credits (3)  
This course is designed to introduce undergraduate students to the complexities of immigration in the United States through a social justice lens. Students will explore the intersections of race, ethnicity, gender, and class in immigration through different groups’ historical and contemporary experiences, including immigrants’ experience with the criminal justice system.  
Prerequisite(s): Student must have completed CJUS 300 or Research Methods equivalent or consent of the instructor.
CJUS 430. The U.S. Supreme Court and the Criminal Justice System  
3 Credits (3) 
History and workings of the U.S. Supreme Court in the context of the 
criminal justice system from writs of certiorari to last minute appeals 
death penalty cases, including study of specific U.S. Supreme 
Court cases in the areas of criminal law, criminal procedural law, 8th 
amendment prison sentencing issues, and death penalty cases. Consent 
of Instructor required. Restricted to: Criminal Justice majors.

CJUS 431. Family Violence and the Law  
3 Credits (3) 
This course will examine how practitioners are involved in the criminal 
justice system in areas of family violence including: child physical 
abuse; child sexual abuse; child neglect; child ritualistic abuse; child 
exploitation; sibling abuse; intimate partner abuse; stalking; sexual abuse 
and elder abuse. This course will be helpful for those who wish to go 
into law enforcement or victim’s advocacy work. Restricted to: Criminal 
Justice majors.

CJUS 432. Issues in Criminal Justice  
3 Credits (3) 
Seminar on problems and conflicts encountered in major criminal justice 
issues. Topics announced in the Schedule of Classes. May be repeated 
unlimited credits under different subtitles.

CJUS 434. Probation, Parole, and Community Corrections  
3 Credits (3) 
Structure, organization, and operation of probation, parole, and other 
community-based correctional programs in the U.S. Overview of historical 
and recent trends in the supervision of offenders in the community and 
in the development of alternatives to incarceration. Analysis of issues 
related to community correctional policies and practices. Restricted to 
majors.

CJUS 435. Political Penology  
3 Credits (3) 
Comparative analysis of incarceration and sanctions as punishment for 
crimes of conscience, religious intolerance, and dissonance.

CJUS 436. Courts and Sentencing  
3 Credits (3) 
This course will focus on the structure, organization, and operation of 
the state and federal court systems in the United States. It examines 
courtroom decision making and dynamics of courthouse justice— 
prosecutorial discretion, plea bargaining practices, jury and judicial 
decision making and sentencing. Additional topics will include racial, 
gender and class disparities in sentencing outcomes and the impact 
of recent reforms directed at the criminal court system. Restricted to: 
Criminal Justice majors.

CJUS 437. Wrongful Convictions  
3 Credits (3) 
This course will address causes (e.g. problems in witness identification, 
forensics, police and attorney conduct) as well as results of erroneous 
dispositions (e.g. compensation, media dynamics, possible reforms) in 
a critical analysis. Appropriate for prospective police, legal, and policy 
professionals. Restricted to: Criminal Justice majors.

CJUS 440V. Comparative Criminal Justice Systems  
3 Credits (3) 
Cross-national study of selected Western and non-Western legal systems. 
Comparison of structures and functions of police, court systems, and 
corrections in different systems.

CJUS 449. Senior Seminar  
3 Credits (3) 
Problems and conflicts encountered in major attempts to control crime. 
Restricted to majors. 
Prerequisite(s): CJUS 1110G, CJUS 1120, CJUS 2220, CJUS 2150, 
CJUS 2120, CJUS 300, CJUS 301, 90 credit hours completed.

CJUS 453. Women and Justice  
3 Credits (3) 
Critical analysis of the impact of the criminal justice system, race and 
class upon the lives of women. Restricted to majors.

CJUS 454. Human Trafficking  
3 Credits (3) 
Study of global human trafficking, its causes and costs, and mitigation 
strategies. Restricted to C J, GOVT, SOC, GNDR, S WK majors.

CJUS 455. Feminist Research Methods  
3 Credits (3) 
Feminist research practices and methodologies utilized in various 
disciplines. Definitions of research, what constitutes valid inquiry, how 
research can be feminist, and what it means to do interdisciplinary work.
Same as GNDR 455.

CJUS 484. Hate Crimes & Groups  
3 Credits (3) 
Explores the phenomenon of hate-motivated violence. Examines the hate 
crime laws, organized hate groups, and social theories attempting to 
explain violent hate.

CJUS 501. Research Methods in Criminal Justice  
3 Credits (3) 
Research design, methods of data collection and analysis, and 
preparation of research reports. Restricted to majors. 
Prerequisite: C J major or consent of instructor.

CJUS 511. Nature of Crime  
3 Credits (3) 
Defining and measuring crime, crime causation, and criminal behavior 
systems. Restricted to majors. 
Prerequisite: C J major or consent of instructor.

CJUS 514. Advanced Race, Crime, and Justice  
3 Credits (3) 
Advanced analysis of the historical and contemporary relationship 
between race and crime in the United States with emphasis upon human 
equality and fairness. Overview of racial and ethnic social categorizations 
and how they impact law and order.

CJUS 515. A Course on Punishment  
3 Credits (3) 
Exploration and analysis of the idea and practice of punishment through 
a variety of philosophical perspectives, seeking to understand its moral 
and practical viability as employed in contemporary society, including its 
application within the criminal justice system.

CJUS 520. Advanced Girls, Women & Crime  
3 Credits (3) 
Advanced critical social science analysis of concepts of violence and 
justice as experienced by women impacted by the criminal justice 
system. Restricted to C J, GNDR majors. Crosslisted with: GNDR 520

CJUS 525. Issues in Ethics, Law, and Criminal Justice  
3 Credits (3) 
Examination of the key ethical and decision-making dilemmas facing 
professionals working in the fields of law and criminal justice. Restricted 
to majors.
CJUS 527. Advanced Race & Crime in Film
3 Credits (3)
Advanced critical analysis of film where messages relating race and crime are present, with emphasis on how this imagery informs problem definition, policies, and practice within the criminal justice system.

CJUS 528. Advanced Mexican-Americans and Issues of Social Justice
3 Credits (3)
Advanced analysis of social issues related to the Mexican American community in the U.S., with special emphasis on their collective historical struggles and contributions to society. We will discuss the political, economic and cultural forces that exemplify their experience as a “whole.”

Learning Outcomes
1. Explore and discuss social issues related to the Mexican American community in the U.S. Gain a better understanding of the history of the Mexican American experience in the U.S. Understand current social justice issues impacting the Mexican American community. Explore the Mexican American community experience particularly in the southwest. Critically engage the challenges faced by the Mexican American community on issues such racial discrimination, racial profiling, immigration, and crime.

CJUS 529. Advanced Immigration & Justice
3 Credits (3)
Advanced analysis of the complexities of immigration in the United States through a social justice lens. Students will explore the intersections of race, ethnicity, gender, and class in immigration through different groups' historical and contemporary experiences, including immigrants' experience with the criminal justice system.

CJUS 531. Advanced Family Violence and the Law
3 Credits (3)
This course will examine how practitioners are involved in the criminal justice system in areas of family violence including: child physical abuse; child sexual abuse; child neglect; child ritualistic abuse; child exploitation; sibling abuse; intimate partner abuse; stalking; sexual abuse and elder abuse. This course will be helpful for those who wish to go into law enforcement or victim's advocacy work. Restricted to: Criminal Justice majors.

CJUS 532. Advanced Issues in Criminal Justice (f, s, sum)
3 Credits (3)
Seminar on problems and conflicts encountered in major criminal justice issues. Topics announced in the Schedule of Classes. May be repeated under different subtitles for unlimited credit.

CJUS 535. Advanced Political Penology
3 Credits (3)
Advanced comparative analysis of incarceration and sanctions as punishment for crimes of conscience, religious intolerance, and dissidence.

CJUS 537. Advanced Wrongful Convictions
3 Credits (3)
This course will address causes (e.g. problems in witness identification, forensics, police and attorney conduct) as well as results of erroneous dispositions (e.g. compensation, media dynamics, possible reforms) in a critical analysis. Appropriate for prospective police, legal, and policy professionals. Restricted to: Criminal Justice majors.

CJUS 541. Seminar in Criminal Justice Policy Analysis and Planning
3 Credits (3)
Seminar on policy development, planning and implementation processes in criminal justice. Links formal policy goals as they relate to theory and outcomes. Topics announced in the Schedule of Classes. Restricted to majors.
Prerequisite: C J major or consent of instructor.

CJUS 545. Advanced Victimology
3 Credits (3)
Study of risk factors in crime victimization, the impact of crimes upon victims, and the role of the victim in the criminal justice system. Consideration of the impact of criminal justice policy on victim outcomes.

CJUS 555. Advanced Feminist Research Methods
3 Credits (3)
Advanced feminist research practices and methodologies utilized in various disciplines. Definitions of research, what constitutes valid inquiry, how research can be feminist, and what it means to do interdisciplinary work. Same as GNDR 555.

CJUS 560. Juvenile Justice Systems
3 Credits
Policy development and operations in police, court, and correctional agencies in response to juveniles. Analysis of programs designed to identify, prevent and treat juvenile offenders. CJUS 570. Probation and Parole 3 cr. Advanced analysis of goals, theories and practices of all forms of correction in the community, including probation, parole, plus other intermediate sanctions. Restricted to majors.

CJUS 581. Community Policing
3 Credits (3)
Overview and analysis of community policing issues from various perspectives. Analysis of strategies that facilitate police and community collaboration. Restricted to majors.

CJUS 591. Directed Readings in Criminal Justice
3 Credits (3)
Design and execution of a criminal justice research project. Requires a written paper in standard format, including literature review, hypotheses, methodology, findings, and conclusions.

CJUS 592. Independent Research
1-3 Credits
Design and execution of a criminal justice research project. Requires a written paper in standard format, including literature review, hypotheses, methodology, findings, and conclusions.

CJUS 593. Internship
3-6 Credits
Supervised placement in an applied or research setting in criminal justice. An in-depth written report of the project is required. Restricted to C J majors. May be repeated for a maximum of 6 credits. Graded S/U.
Prerequisites: introductory graduate course in the area of the internship and consent of the internship supervisor.

CJUS 599. Master's Thesis
1-15 Credits
Thesis.

Select 3-4 credits from the following:
- CJUS 300 | Introduction to Criminal Justice Research |
- POLS 300 | Political Research Skills |
- PSYC 310 | Experimental Methods |
- SOCI 3150 | Social Research: Methods |

**CJUS Theory Courses**
- One course from the following: 3
  - CJUS 303 | Introduction to Criminological Theory |
  - CJUS 304 | Historical Perspectives of Criminal Justice Systems |
  - CJUS 414 | Race, Crime and Justice |

**Criminal Justice Electives**
- Select 12 credits from upper division Criminal Justice Electives 7 |
- Electives, to bring the total credits to 120 8 32-46 |

**Non-Departmental Requirements (in addition to Gen.Ed/VWW)**
- Choose one additional English Composition - Level 2 course, must be a different course that previously selected: 3
  - ENGL 2210G | Professional & Technical Communication |
  - ENGL 2221G | Writing in the Humanities and Social Science |

**Second Language Requirement: (required- see below) 3-14**

**Total Credits** | 120 |

1. The department requires 6 credits of English Composition - Level 2 coursework, 3 credits will count towards the General Education requirement, the other 3 credits will count as Non-Departmental requirements. ENGL 112 will only be accepted to fulfill one of the English Composition Level 2 requirements and is only allowed for transfer students.

2. MATH 1220G, MATH 1350G or MATH 2350G are preferred but any Mathematics course that is higher level than MATH 121G, excluding MATH 1130G Survey of Mathematics, or higher than STAT 251G is also accepted.

3. *students may need to take any prerequisites needed to enter of the allowable Mathematics course(s) first.*

4. See the General Education (p. 88) section of the catalog for a full list of courses.

5. Students can take an Upper-Division PHIL course to meet departmental requirements, however, if this option is chosen, the student will have to take another general education humanities course to fulfill the general education humanities requirement.

6. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

7. Prior to enrolling in upper division courses, lower division courses must be completed or final courses must be in progress.

8. Not to include CJUS 393 Internship in Criminal Justice, or any criminal justice required course. Courses that fall under multiple content areas may only be counted once. Please visit our website for specific courses in each of these content areas [http://crimjust.nmsu.edu](http://crimjust.nmsu.edu).

**Website:** [http://crimjust.nmsu.edu](http://crimjust.nmsu.edu)
Eelective credit may vary based on General Education course selection, second language requirements, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

For transfer students only.

* A student must earn a C- or better to receive credit for any departmental and nondepartmental requirement for the BC J degrees.

**Second Language Requirement**

For the Bachelor of Criminal Justice with a major in Criminal Justice there is a two year second language requirement (or the completion of MATH 1511G), the student must do one of the following: there is a two year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

**Option 4:**

Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.

**Option 5:**

Obtain college certification of completion of three years of a second language at the high school level with a grade of C- or higher in the second-year level.

**Option 6:**

By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

**Option 7:**

By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.

**Option 8:**

In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

**A Suggested Plan of Study for Students**

This roadmap assumes student placement in MATH 1220G, or MATH 1350G or MATH 2350G, or ENGL 1110G. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Credits 12

Total Credits 120-122

1 Math Placement: MATH 1220G College Algebra or MATH 1350G
Introduction to Statistics or MATH 2350G Statistical Methods is the
starting Math course for the degree, however, students may need to
complete any prerequisites prior to enrolling into one of these courses.
2 See the General Education (p. 88) section of the catalog for a full list of
courses.
3 One of the following is required for the major: PHIL 1145G Philosophy,
Law, and Ethics, PHIL 2230G Philosophical Thought, PHIL 1120G Logic,
Reasoning, & Critical Thinking, and PHIL 2110G Introduction to Ethics
4 Second Language: options for completing the second language
requirement can be located on the Requirements (p. 509) tab for this
degree.
5 Elective credit may vary based on prerequisites, dual credit, AP credit,
double majors, and/or minor coursework. The amount indicated in the
requirements list is the amount needed to bring the total to 120 credits
and may appear in variable form based on the degree. However students
may end up needing to complete more or less on a case-by-case basis
and students should discuss elective requirements with their advisor.
6 CJUS 300 Introduction to Criminal Justice Research can be taken in
either the Fall or Spring semesters of Year Two.
The following courses may substitute for CJUS 300: POLS 300 Political
Research Skills, PSYC 310 Experimental Methods, SOC 3150 Social
Research: Methods
7 CJUS 300 Introduction to Criminal Justice Research and CJUS 301
Advanced Research Methods should ideally be taken in separate
semesters
8 Recommended: 1 credit of PHED, LSAT Prep or FYEX coursework
9 See the Viewing a Wider World (p. 92) section of the catalog for a full list of
courses.
Criminal Justice - Bachelor of Criminal Justice (Online)

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix Title Credits

PHIL 2230G Philosophical Thought
PHIL 1120G Logic, Reasoning, & Critical Thinking
PHIL 2110G Introduction to Ethics

Area VI: Creative and Fine Arts 3
General Education Elective 3-4
Viewing a Wider World 6

Department/College Requirements
CJUS Core Courses 6
The department requires CJUS 1110G and this course will count towards both the General Education and Department/College Requirements
CJUS 1120 Criminal Law 3
CJUS 301 Advanced Research Methods 3
CJUS 302 Crime, Justice and Society 3
CJUS 425 Issues in Ethics, Law, and Criminal Justice 3
Select 3-4 credits from the following: 3-4

CJUS 300 Introduction to Criminal Justice Research
POLS 300 Political Research Skills
PSYC 310 Experimental Methods
SOCI 3150 Social Research: Methods

CJUS Theory Courses
One course from the following: 3
CJUS 303 Introduction to Criminological Theory
CJUS 304 Historical Perspectives of Criminal Justice Systems
CJUS 414 Race, Crime and Justice

Criminal Justice Electives
Select 12 credits from upper division Criminal Justice Electives 7 12

Non-Departmental Requirements (in addition to Gen.Ed/VWW)
Choose one additional English Composition - Level 2 course, must be a different course that previously selected: 3
ENGL 2210G Professional & Technical Communication
ENGL 2221G Writing in the Humanities and Social Science

Second Language Requirement: (required- see below) 3-14
Electives, to bring the total credits to 120 8 32-46

Total credits must be Upper Division 9

Total Credits 120

1
The department requires 6 credits of English Composition - Level 2 coursework, 3 credits will count towards the General Education requirement, the other 3 credits will count as Non-Departmental requirements. ENGL 112 will only be accepted to fulfill one of the English Composition Level 2 requirements and is only allowed for transfer students.

2
MATH 1220G, MATH 1350G or MATH 2350G are preferred but any Mathematics course that is higher level than MATH 1220G, excluding MATH 1130G Survey of Mathematics, or higher than MATH 1350G is also accepted.

*students may need to take any prerequisites needed to enter of the allowable Mathematics course(s) first.

3
See the General Education (p. 88) section of the catalog for a full list of courses.

4
Students can take an Upper-Division PHIL course to meet departmental requirements, however, if this option is chosen, the student will have to take another general education humanities course to fulfill the general education humanities requirement.

5
See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

6
Prior to enrolling in upper division courses, lower division courses must be completed or final courses must be in progress.

7
Not to include CJUS 393 Internship in Criminal Justice, or any criminal justice required course. Courses that fall under multiple content areas may only be counted once. Please visit our website for specific courses in each of these content areas http://crimjust.nmsu.edu.
Elective credit may vary based on General Education course selection, second language requirements, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

For transfer students only.

*A student must earn a C- or better to receive credit for any departmental and nondepartmental requirement for the BC J degrees.

Second Language Requirement
For the Bachelor of Criminal Justice with a major in Criminal Justice there is a two year second language requirement (or the completion of MATH 1511G), the student must do one of the following: there is a two year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

Option 1: Complete one of the following sequences:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHIN 1110</td>
<td>Mandarin Chinese I</td>
<td>3-14</td>
</tr>
<tr>
<td>&amp; CHIN 1120</td>
<td>and Mandarin Chinese II</td>
<td></td>
</tr>
<tr>
<td>&amp; CHIN 2110</td>

<td>and Spanish II</td>
<td></td>
</tr>
<tr>
<td>&amp; SPAN 2110</td>
<td>and Spanish III</td>
<td></td>
</tr>
<tr>
<td>&amp; SPAN 2120</td>
<td>and Spanish IV</td>
<td></td>
</tr>
<tr>
<td>PORT 1110</td>
<td>Portuguese I</td>
<td>3-6</td>
</tr>
<tr>
<td>&amp; PORT 1120</td>
<td>and Portuguese II</td>
<td></td>
</tr>
</tbody>
</table>

For Heritage Speakers:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPAN 1210</td>
<td>Elementary Spanish for Heritage Learners I</td>
<td>3</td>
</tr>
<tr>
<td>&amp; SPAN 1220</td>
<td>and Spanish for Heritage Learners II</td>
<td></td>
</tr>
<tr>
<td>&amp; SPAN 2210</td>
<td>and Spanish for Heritage Learners III</td>
<td></td>
</tr>
</tbody>
</table>

Option 2: Complete the following sequence for American Sign Language (with a C- or better):

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SIGN 1110</td>
<td>American Sign Language I</td>
<td>3</td>
</tr>
<tr>
<td>SIGN 1120</td>
<td>American Sign Language II</td>
<td>3</td>
</tr>
<tr>
<td>SIGN 2110</td>
<td>American Sign Language III</td>
<td>3</td>
</tr>
</tbody>
</table>

Option 3: Challenge the 2120 level for the following courses:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHIN 2120</td>
<td>Mandarin Chinese IV</td>
<td>3</td>
</tr>
<tr>
<td>or FREN 2120</td>
<td>French IV</td>
<td></td>
</tr>
<tr>
<td>or GRMN 2120</td>
<td>German IV</td>
<td></td>
</tr>
<tr>
<td>or JAPN 2120</td>
<td>Japanese IV</td>
<td></td>
</tr>
<tr>
<td>or SPAN 2120</td>
<td>Spanish IV</td>
<td></td>
</tr>
</tbody>
</table>

Option 4: Challenge the 1120/2210 level for the following courses:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PORT 1120</td>
<td>Portuguese II</td>
<td>3</td>
</tr>
<tr>
<td>or SPAN 2210</td>
<td>Spanish for Heritage Learners III</td>
<td></td>
</tr>
</tbody>
</table>

Option 5: Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.

Option 6: Obtain college certification of completion of three years of a second language at the high school level with a grade of C- or higher in the second-year level.

Option 7: By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

Option 8: In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

A Suggested Plan of Study for Students
This roadmap assumes student placement in MATH 1220G, or MATH 1350G or MATH 2350G and ENGL 1110G. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year

CJUS 303 Introduction to Criminological Theory (C- or better) 3
CJUS 414 Race, Crime and Justice 3
CJUS - Upper Division Elective Course (C- or better) 3
Elective Course - Upper Division 5
Elective Course - Upper Division 5
Elective Course 5
Credits 15

Total Credits 120-122

1 Math Placement: MATH 1220G College Algebra or MATH 1350G Introduction to Statistics or MATH 2350G Statistical Methods is the starting Math course for the degree, however, students may need to complete any prerequisites prior to enrolling into one of these courses.
2 See the General Education (p. 88) section of the catalog for a full list of courses.
3 One of the following is required for the major: PHIL 1145G Philosophy, Law, and Ethics, PHIL 2230G Philosophical Thought, PHIL 1120G Logic, Reasoning, & Critical Thinking, and PHIL 2110G Introduction to Ethics
4 Second Language: options for completing the second language requirement can be located on the Requirements (p. 509) tab for this degree.
5 Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
6 CJUS 300 Introduction to Criminal Justice Research can be taken in either the Fall or Spring semesters of Year Two. The following courses may substitute for CJUS 300: POLS 300 Political Research Skills, PSYC 310 Experimental Methods, SOCI 3150 Social Research: Methods
7 CJUS 300 Introduction to Criminal Justice Research and CJUS 301 Advanced Research Methods should ideally be taken in separate semesters
8 Recommended: 1 credit of PHED, LSAT Prep or FYEX coursework
9 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses
Forensic Science - Undergraduate Minor

Forensic Science is the application of principles and techniques of scientific analysis in a legal context. Forensic scientists study physical evidence to resolve issues involving criminal investigations, environment analyses and similar areas of research.

A student must pass 18 credits with a grade of C- or higher from the following curriculum to earn the Forensic Science minor. No courses may be taken S/U. Students must take at least 6 credits from departments outside their major(s). At least 9 credits in any minor must be upper division. Students must register in the minor before enrolling in any upper division Criminal Justice courses.

The following curriculum represents minimum requirements for a minor. Students interested in a career in Forensic Science are encouraged to take additional courses from those listed below.

The Forensic Minor requires courses from three sections: (1) 6 credits from the list of Core Courses; (2) 3 credits from an additional course not already completed; and (3) 9 credits from one of the four tracks listed below.

### Prefix | Title | Credits
--- | --- | ---
Core Courses | Select 6 credits from the following: | 6
CJUS 306 | Criminal Procedural Law |
CJUS 307 | Law of Evidence |
CJUS 321 | Criminal Investigation and Intelligence |
CJUS 424 | Forensic Law |
PHYS 304 | Forensic Physics |

### Additional Course
Select 3 credits from areas I or II above not already completed. | 3

### Track Courses
9 credits from one of the four tracks (see below) | 9

**Total Credits**: 18

---

**Track A: Laboratory Analysis**

Students should check the catalog to ensure that they have taken prerequisites before enrolling in these courses.

### Prefix | Title | Credits
--- | --- | ---
Select one from the following: | 4-5
BIOL 2310 & 2310L | Microbiology and Microbiology Lab |
BIOL 311 & 311L | General Microbiology and General Microbiology Laboratory |

Select 4-5 credits from the following: | 4-5
BIOL 354 & 354 L | Physiology of Humans and Laboratory of Human Physiology |
BCHE 395 | Biochemistry I |
BCHE 396 | Biochemistry II |
CHEM 371 | Analytical Chemistry |
TOX 361 | Basic Toxicology |
TOX 461 | Toxicology I |
PHYS 1230G & PHYS 1230L | Algebra-Based Physics I and Algebra-Based Physics I Lab |

**Total Credits**: 8-10

---

**Track B: Human Forensic Analysis**

Honors, Special Topics, or Independent Studies courses if approved by Academic Head, Department of Criminal Justice.

### Prefix | Title | Credits
--- | --- | ---
Select 9 credits from the following: | 9
ANTH 1135G & ANTH 1135L | Introduction to Biological Anthropology and Introduction to Biological Anthropology Lab |
ANTH 315 | Introduction to Archaeology |
ANTH 355 | Biological Anthropology |
ANTH 356 | Forensic Anthropology |
ANTH 357V | Medical Anthropology |
ANTH 388 | Intermediate Archaeological Field School |
ANTH 474 | Human Osteology |
ANTH 477 | Zooarchaeology |

**Total Credits**: 9

1. Recommended sequence ANTH 1135G Introduction to Biological Anthropology/ANTH 1135L Introduction to Biological Anthropology Lab, ANTH 355 Biological Anthropology or ANTH 315 Introduction to Archaeology, and then ANTH 474 Human Osteology.

2. Courses have prerequisites, and students should check the catalog to ensure that they have taken prerequisites before enrolling in these courses.

---

**Track C: Forensic Psychology**

Students should check the catalog to ensure that they have taken prerequisites before enrolling in these courses.

### Prefix | Title | Credits
--- | --- | ---
Select three from the following: | 9
Principles of Behavior |
PSYC 317 | Social Psychology |
PSYC 321 | Psychology of Personality |
PSYC 324 | Sexual Behavior |
PSYC 330 | Psychology and the Law |
PSYC 376 | Evolutionary Psychology |
Psychological Treatment |
PSYC 302 | Abnormal Psychology |
PSYC 445 | |
CJUS 346 | Psychology and the Justice System |

**Total Credits**: 9

---

**Track D: General**

Select 9 credits from the following: | 9
ANTH 474 | Human Osteology |
CJUS 306 | Criminal Procedural Law |
CJUS 307 | Law of Evidence |
CJUS 321 | Criminal Investigation and Intelligence |
CJUS 346 | Psychology and the Justice System |
CJUS 424 | Forensic Law |
PSYC 330 | Psychology and the Law |
Courses have prerequisites, and students should check the catalog to ensure that they have taken prerequisites before enrolling in these courses.

Law and Society - Undergraduate Supplemental Major

The Law and Society Program (p. 593) is administered by the Department of Government and offers an interdisciplinary major for students interested in pursuing law school or careers that incorporate a strong legal element, such as government, law enforcement, business and social work. As a supplementary major, it must be taken in conjunction with a major regular major. Some courses may double-count toward a student's regular major or General Education requirements. Students should check with academic advisors in their primary major. To declare this supplemental major please contact the College of Arts & Sciences Student Records Office. For more information please visit: https://deptofgov.nmsu.edu/academic-programs/law-society.html.

Criminal Justice - Master of Criminal Justice

All candidates, regardless of chosen degree option, must complete a final examination. Examination requirements vary by degree option. Please contact the director of the MCJ program or consult the Department of Criminal Justice website (http://crimjust.nmsu.edu/criminal-justice-graduat/) for details.

Thesis Option (33 Credits)

Thesis students must submit a thesis proposal to their faculty committee for approval and subsequently complete the approved thesis project. An approved thesis proposal is one wherein the thesis committee determines the student demonstrates a comprehensive understanding of the nexus of theory, method, and policy as it applies to the proposed thesis project. At the discretion of the thesis committee the proposal may be considered inadequate and the student is required to revise and resubmit the thesis proposal until the committee determines the proposal is satisfactory. The final examination minimally includes a defense of the completed thesis, but may also include a general examination based upon the candidate's program of study. The minimum coursework requirements are displayed below.

General Electives

Select 12 credits from General Electives.  

Total Credits 33

Students may not count CJUS 593 Internship or CJUS 592 Independent Research credit toward their elective requirement. No more than three total credits of CJUS 591 Directed Readings in Criminal Justice coursework may be used as electives; a minimum of 3 of the 12 credit general elective requirement must come from the Department of Criminal Justice.

A minor is optional (contact the director of the MCJ program or consult the Department of Criminal Justice website, https://crimjust.nmsu.edu/, for details) and may result in more than 33 total credits for the degree.

Focused Coursework Option (36 Credits)

Focused coursework students must pass a written comprehensive examination following completion of the required courses. Students not passing the examination will be required to wait until the following semester to retake the examination. The minimum course requirements are displayed below.

<table>

</tr>
</thead>
<tbody>
<tr>
<td>An additional 9 credits of electives, to be selected in consultation with a student's advisor. 2</td>
</tr>
</tbody>
</table>

Total Credits 36

No more than three total credits of CJUS 593 Internship or CJUS 591 Directed Readings in Criminal Justice courses may be used as Criminal Justice electives. CJUS 592 Independent Research may not be used as Criminal Justice Electives for this option.

No more than three credits of C J 593 Internship or C J 591 Directed Readings may be used to fulfill the general elective requirement. C J 592 Independent Research may not be used as Criminal Justice Elective for this option.

A minor is optional (contact the director of the MCJ program or consult the Department of Criminal Justice website, https://crimjust.nmsu.edu/, for details) and may result in more than 36 total credits for the degree.

Minimum Grade Requirement

Students must earn a minimum B- grade in all required core courses, excluding elective credits. This applies to both options: Thesis and Focused Coursework as well as to both programs: On-Campus (traditional) and Online.
Borderlands and Ethnic Studies - Graduate Certificate

Borderlands and Ethnic Studies (BEST) is a multidisciplinary program that critically explores the social, historical, cultural, and legal ways communities experience and navigate social constructs such as race, gender, and sexual orientation. These constructs permeate life, are entrenched in social structures and institutions, and shift and mutate over place and time in ways that reproduce existing power relations. The program outlines and analyzes the history, cultural production, politics and consequences of racialization and identity formation from an Indigenous, Diasporic and Transnational/Transborder, Decolonizing approach that remains rooted in a place-based, Borderlands imperative.

The graduate certificate advances an understanding of human relationships informed by unequal power and resource distribution to prepare students for service in various fields such as: education, government, law enforcement, health, environmental justice, sustainable agriculture, communications, social work, law and policy, public history, business and social entrepreneurship, and others. The certificate addresses a growing need for knowledge and skills in the areas of cultural competency, equity and inclusion, critical thinking an conscientious problem solving, and effectively working with diverse populations.

Within the field of education, currently employed teachers and future teachers will be trained in historical and contemporary knowledge of Borderlands and ethnic Studies through a locally-relevant approach. nationally, Ethnic Studies is part of a burgeoning K-12 and higher education focus because of its potential for creating stronger and healthier communities. This certificate serves a growing cadre of educators as well as others pursuing careers in the public services sector. The certificate is comprised of 15 credits of graduate level work.

The certificate serves:

- Current NMSU degree seeking graduate students who wish to expand their primary area of study to include a specialization in Borderlands and Ethnic Studies.
- Non-degree seeking professionals who have completed an undergraduate degree in any major and who wish to invite, refresh, update and extend their knowledge and skill sets in Borderlands and Ethnic Studies.

Overview

The Graduate Certificate in Borderlands and Ethnic Studies is offered in the traditional classroom format as well as online. The program is designed to be completed in 4 semesters, with a requirement to successfully culminate in completion of BEST 513 Capstone in Borderlands and Ethnic Studies - which will be tailored to the students’ trajectory. Students must earn a minimum 3.0 in all 5 courses, including the Elective.

The certificate may be completed as a stand-alone certification or in conjunction with a graduate degree in another field.

If you wish to complete a graduate certificate, you must apply for admission to this program. Even if you already enrolled in a graduate program at NMSU, you will need to complete a separate application to be admitted to the certificate program. Once you have been admitted to the program and have completed all of the necessary coursework, you will need to file a Completion of Graduate Certificate form to be awarded the certificate.

Please contact the Borderlands and Ethnic Studies Advisor to further assist in completion of the application.

Student and Director selection

Economics, Applied Statistics, and International Business

Undergraduate Program Information

The Department of Economics, Applied Statistics and International Business in the College of Business offers an economics major to Bachelor of Arts candidates in the College of Arts and Sciences. (Additional information may be found under the Economics and International Business (p. 816) section in the College of Business chapter).

Degrees for the Department

Economics - Bachelor of Arts (p. 521)

Minors for the Department

Economics - Undergraduate Minor (p. 523)
Economics Courses

ECON 1110G. Survey of Economics
3 Credits (3)
This course will develop students' economics literacy and teaches students how economics relates to the everyday life of individuals, businesses and society in general. The course will also introduce students to the roles different levels of governments play in influencing the economy. At the conclusion of the course, students will be able to identify economic causes for various political and social problems at national and international levels, and have a better understanding of everyday economic issues that are reported in media and public forums.

Learning Outcomes
1. Gain and demonstrate a contextual understanding of economic terms and concepts.
2. Recognize and analyze common economic issues which relate to individual markets and the aggregate economy.
3. Learn basic economic principles that influence global trading and challenges relating to globalization.
4. Outline the implications of various economic policies on individuals and on economies.
5. Demonstrate ability to use diagrams and graphs to explain economic principles, policies and their applications.
6. Appreciate and understand how individual decisions and actions, as a member of society, affect economies locally, nationally and internationally.
7. Explain the roles of governments in influencing buyer and seller behavior in the market and how government failure occurs when intervention fails to improve or actually worsens economic outcomes.
8. Be able to apply course concepts to interpret, evaluate and think critically about economic events and policies, especially as regularly reported in the media and other public forums.

ECON 2110G. Macroeconomic Principles
3 Credits (3)
Macroeconomics is the study of national and global economies. Topics include output, unemployment and inflation; and how they are affected by financial systems, fiscal and monetary policies.

Learning Outcomes
1. Explain the concepts of opportunity cost, comparative advantage and exchange.
2. Demonstrate knowledge of the laws of supply and demand and equilibrium and use supply and demand curves to analyze responses of markets to external events.
3. Explain the circular flow model and use the concepts of aggregate demand and aggregate supply to analyze the response of the economy to disturbances.
4. Explain the concepts of gross domestic product, inflation and unemployment and how they are measured.
5. Describe the determinants of the demand for money, the supply of money and interest rates and the role of financial institutions in the economy.
6. Define fiscal policy and monetary policies and how these affect the economy.
7. Students will be able to identify the causes of prosperity, growth, and economic change over time and explain the mechanisms through which these causes operate in the economy.

ECON 2110H. Principles of Macroeconomics Honors
3 Credits (3)
Macroeconomic theory and public policy designed: national income concepts, unemployment, inflation, economic growth and international payment problems. Must be a Crimson Scholar.

Prerequisite(s): MATH 1220G.

Learning Outcomes
1. Explain the concepts of opportunity cost, comparative advantage and exchange.
2. Demonstrate knowledge of the laws of supply and demand and equilibrium and use supply and demand curves to analyze responses of markets to external events.
3. Explain the circular flow model and use the concepts of aggregate demand and aggregate supply to analyze the response of the economy to disturbances.
4. Explain the concepts of gross domestic product, inflation and unemployment and how they are measured.
5. Describe the determinants of the demand for money, the supply of money and interest rates and the role of financial institutions in the economy.
6. Define fiscal policy and monetary policies and how these affect the economy.
7. Students will be able to identify the causes of prosperity, growth, and economic change over time and explain the mechanisms through which these causes operate in the economy.

ECON 2120G. Microeconomics Principles
3 Credits (3)
This course will provide a broad overview of microeconomics. Microeconomics is the study of issues specific to households, firms, or industries with an emphasis on the role of markets. Topics discussed will include household and firm behavior, demand and supply/government intervention, market structures, and the efficient allocation of resources.

Learning Outcomes
1. Explain the concept of opportunity cost.
2. Demonstrate knowledge of the laws of supply and demand and equilibrium.
3. Use supply and demand curves to analyze responses of markets to external events.
4. Use supply and demand analysis to examine the impact of government intervention.
5. Explain and calculate price elasticity of demand and other elasticities.
6. Demonstrate an understanding of producer choice, including cost and break-even analysis.
7. Compare and contrast the following market structures: perfect competition, monopoly, monopolistic competition, and oligopoly.

ECON 405. Introductory Econometrics
3 Credits (3)
Multiple regression and correlation applied to economics and business; inference techniques; significance tests; simultaneous equations, estimation, and problems.
Prerequisite: MATH 1350G or A ST 311 (or equivalent).
Learning Outcomes
1. Demonstrate knowledge of probability and statistics and basic expected value theory. Define the relationship between population statistics and sample statistics. Explain the method of ordinary least squares. Understand multiple regression, correlation, inference techniques, and significance tests. Interpret basic econometric results.

ECON 432V. Economics of Health Care
3 Credits (3)
Analysis of the allocation of resources in the field of health and medical care.

ECON 445. Oil and Natural Gas Economics
3 Credits (3)
Examines the economics of oil and gas production. Topics covered include transportation, refining, federal and state regulatory framework, and resulting public policy issues from a regional and national perspective.
Learning Outcomes
1. Oil and Natural Gas Production Oil and Natural Gas Transportation and Storage Advanced oil and gas market analysis Economic analysis of government energy policy and regulation

ECON 449. Open Economy Macroeconomics
3 Credits (3)
This course studies theoretical and empirical macroeconomics in international dimension. It covers from the fundamental concepts of national income and growth, monetary/fiscal and exchange rate policies, foreign exchange markets, international trade and finance, and regionalization/economic integration to the impact analysis of these macroeconomic fundamentals in the open economy. Crosslisted with: I B 449.
Prerequisite(s): BFIN 341 OR ECON 311.

ECON 450. International Economics
3 Credits (3)
Trade and capital flows between countries, international payments, government policy in balance-of-payments and tariff matters, international organizations. Crosslisted with: I B 450
Prerequisite(s): ECON 2110G or ECON 2110H and ECON 2120G or ECON 2120H.

ECON 457. Mathematical Economics
3 Credits (3)
Application of mathematical tools, especially the calculus, to economic theory.
Prerequisite(s): MATH 1430G or equivalent.

ECON 471. Electricity Economics
3 Credits (3)
Regulatory policy and economic analysis related to the Electric Industry. Topics include characteristics of a utility and legal justification for regulation; characteristics and functions of a regulatory commission; history and structure of the industry; technology and network design; revenue requirements; cost allocation; and basic retail rate design. Crosslisted with: ECON 571.
Prerequisite(s): ECON 345.

ECON 489. Senior Economics Seminar
3 Credits (3)
Seminar primarily for economics majors in their final semester. Provides an opportunity to apply economic theory to a broad variety of topics. Prerequisite(s): ECON 311 or ECON 312.

ECON 490. Selected Topics
1-3 Credits
Current topics in economics. Subject matter to be designated for each semester.

ECON 498. Independent Study
1-3 Credits
Individual studies directed by consenting faculty with the prior approval of the department head. May be repeated for a maximum of 3 credits. Prerequisite: junior or above standing and consent of instructor.

ECON 503. Managerial Economics
3 Credits (3)
Theory and application of microeconomics to the management of organizations. Prerequisite(s): MATH 1350G or A ST 311 or equivalent with B or better.

ECON 545. Econometrics II
3 Credits (3)
Application of statistical techniques to estimation of economic relationships: demand functions, production and cost functions, and macroeconomic equations. Prerequisite(s): ECON 457 and AEEC 540.

ECON 550. Special Topics
1-3 Credits
Seminars in selected current topics in the various areas of economics. Prerequisites vary according to the topic being offered.

ECON 571. Regulatory Policy and Industry Analysis: Electricity I
3 Credits (3)
Regulatory policy and economic analysis related to the Electric Industry. Topics include: characteristics of a utility and legal justification for regulation; characteristics and functions of a regulatory commission; history and structure of the industry; technology and network design; revenue requirements; cost allocation; and basic retail rate design.

ECON 572. Regulatory Policy and Industrial Analysis: Water and Natural Gas
3 Credits (3)
Regulatory policy and economic analysis related to the Natural Gas and Water industries. Topics include: history and structure of the industry; technology and network design; revenue requirements; cost allocation; and retail rate design.

ECON 573. Regulatory Policy and Industry Analysis: Electricity II
3 Credits (3)
Regulatory policy and economic analysis related to the Electric industry. Topics include: optimal generation mix; ancillary services; environmental policies; rate case procedures and strategies for effective testimony; advanced retail rate design; wholesale exchanges; unbundled transmission tariffs; market institutions and how different markets function; state and federal deregulation policies; Federal Energy Regulatory Commission orders and policies; demand-side management; and regulatory treatment of non-traditional retail services. Consent of instructor required. Prerequisite(s): ECON 571 or consent of instructor.
ECON 574. Advanced Seminar Regulatory Policy and Industry Analysis
3 Credits (3)
Advanced seminar and writing course specializing in regulatory policy and regulatory casework. Topics include: special policy & regulatory issues in telecommunications, electricity, natural gas, and water; preparation of written testimony; expert witness effectiveness including cross-examination; and contested case management. This course involves extensive reading and writing assignments. Consent of instructor required.
Prerequisite(s): ECON 571 or consent of instructor.

ECON 582. Economics of Health Care
3 Credits (3)
Analysis of the allocation of resources in the field of health and medical care. Taught with ECON 432V with differentiated assignments for graduate students.

ECON 596. Independent Study
3 Credits (3)
Individual study program. Each offering will cover a subtitle. Maximum of 3 credits in a semester and 6 credits in a program. Consent of instructor required.

Phone: (575) 646-2113
Website: http://business.nmsu.edu/academics/economics-ib/

Economics - Bachelor of Arts
The Bachelor of Arts major in Economics is the only bachelor of arts degree offered through the College of Business. It has the advantage of including a large number of general electives. This feature provides great flexibility to the student who, in addition to completing the courses for a major in economics, may wish to take a double major or take courses from a wide variety of other subjects of his or her own choosing. This program is suitable for, among others, students who plan to go to graduate school in economics, law, business, the social sciences or other areas.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

1 Students may be required to take MATH 1215 Intermediate Algebra, depending on their math placement. MATH 1220G College Algebra or MATH 1430G Applications of Calculus I or MATH 1350G Introduction to Statistics fulfills the general education requirement in math.

2 See the General Education (p. 88) section of the catalog for a full list of courses.

3 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses and how to fulfill this requirement.
A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Total Credits 120

Prerequisites are required, students are responsible for checking and fulfilling course prerequisites listed in the catalog.
Economics - Undergraduate Minor

The undergraduate minor in economics is appropriate for those who seek a better understanding of how micro- and macro-economic forces influence individuals, businesses, and government decision-making. Students thinking of a career in banking and finance, government service, or law will find the minor helpful.

A minor in economics consists of 18 or more credit hours of approved course work in economics (ECON), of which at least 12 are numbered 300 or higher, all completed with a grade of C- or higher. At least 12 credits must be completed at NMSU. This minor is not open to majors in both Economics and International Business.

A minor in economics meets the requirement for a minor in International Business.

International Business Double Majors: Students may not receive credit for both ECON 489 Senior Economics Seminar and I B 489 Senior Seminar in International Business. For this reason, students majoring in both Economics and International Business must consult with the Department Head to arrange a suitable substitution.

See the Viewing a Wider World section of the catalog for a full list of courses.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor course work. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

See the General Education (p. 88) section of the catalog for a full list of courses.

ECON 1110G Survey of Economics may be substituted for one of Econ 251G Principals of Macroeconomics or Econ 252G Principals of Microeconomics with the approval of the Head of the Department of Economics, Applied Statistics, and International Business.

English

Undergraduate Program Information

The Department of English offers the Bachelor of Arts (BA) in English as the cornerstone of studies in the humanities. This rich and versatile major provides students with a source of personal enrichment as well as verbal, analytical, and cultural skills that are readily adaptable to a variety of careers. The English curriculum includes courses in literature, language, creative writing, technical and professional communication, rhetoric, cultural studies, digital media, and film. Our majors go on to succeed in a wide range of professions, including secondary and post-secondary education, business, government, publishing, and law. We offer four different major concentrations that students can tailor to their individual needs:

1. English
2. Creative Writing
3. Literature, Language, and Culture

The department provides strong and personalized advising designed to help students reach their full academic potential and future career goals.

The department also offers four minors:

- English
- Literature
- Medieval and Early Modern Studies
- Rhetoric and Professional Communication.

Further information about career opportunities, concentrations, and minors is available from the Department of English. Students who wish to pursue English as a double major may eliminate one elective from the departmental requirements. Students are required to fulfill a second language requirement (one year of college-level instruction, or the equivalent).

Graduate Program Information

Graduate coursework in the Department of English spans a diverse field of studies in culture, rhetoric, literature, digital media, composition pedagogy, professional communication, and writing. The department offers two graduate degrees: the Master of Arts in English and Doctor of Philosophy in Rhetoric and Professional Communication. Students pursuing the MA in English may specialize in any of four areas: Creative Writing, Literature, Rhetoric and Professional Communication, or English Studies for Teachers. These graduate degrees prepare students to succeed in a variety of careers, including writing, editing, publishing, secondary and post-secondary education, business and industry, media, web design, government, nonprofits, and law. Students work closely with faculty advisors to develop programs of study that fit their individual needs and goals.

Students wishing to apply to the MA or PhD should consult application information on the English Department website at http://english.nmsu.edu/apply/ (https://english.nmsu.edu/_assets/apply.html).

Applications are due by February 1st for Fall admission to the MA or the PhD program. MA applications are also accepted for Spring admission; review of MA applications for Spring admission begins on October 1.

Support in the form of a Graduate Assistantships is awarded through a competitive selection process; this application is folded into the
application for admission and should be submitted by the February 1st deadline. Students in the PhD and in the MA emphases in Literature and Rhetoric and Professional Communication are eligible to apply for a Graduate Assistantship. All Graduate Assistantships in English begin in the Fall semester.

NOTE: The MA emphasis in Creative Writing is being phased out and will not be accepting applications after Spring 2023.

**Degrees for the Department**

**Bachelor Degree(s)**

- English (Creative Writing) - Bachelor of Arts (p. 538)
- English (English) - Bachelor of Arts (p. 541)
- English (Literature, Language & Culture) - Bachelor of Arts (p. 543)
- English (Rhetoric, Digital Media and Professional Communication) - Bachelor of Arts (p. 546)

**Master Degree(s)**

- English - Master of Arts (p. 550)
- English (Technical and Professional Communication) - Master of Arts (Online) (p. 552)

**Doctoral Degree(s)**

- Rhetoric and Professional Communication - Doctor of Philosophy (p. 553)

**Minors for the Department**

- English - Undergraduate Minor (p. 548)
- Literature - Undergraduate Minor (p. 549)
- Medieval and Early Modern Studies - Undergraduate Minor (p. 549)
- Rhetoric and Professional Communication - Undergraduate Minor (p. 550)

**Professor Elizabeth Schirmer, Department Head**

*Professor* Thatcher *Associate Professors* Banazek, Cull, Garay, Miller-Tomlinson, Rourke, Schirmer, Sharp-Hoskins, Stolte, Wells; *Assistant Professors* House, Lanier, Nur Cooley, Tremblay; *College Professor* Brown; *College Associate Professors* Conley, Lawrence *College Assistant Professors* Granger, Retzinger.

E. Schirmer, Department Head, Ph.D. (California-Berkeley) – medieval literature, gender theory; B. Rourke, Associate Department Head, Ph.D. (Stanford) – modern British literature, critical theory; K. Banazek, Co-Director, Writing Center, Ph.D. (Pittsburgh) – rhetoric, writing studies, cultural studies, philosophy of media; E. House, Co-Director, Writing Center, Ph.D. (Arizona) – critical composition and writing studies; M. Brown, M.A. (New Mexico State) – multilingual writing; R. Cull, Ph.D. (Illinois) – modern and contemporary American literature; J. Garay, Ph.D. (Arizona State) – Chicano/a and Latino/a literature; M. Granger, M.A. (New Mexico State) – rhetoric and professional communication; C. Lanier, Director of the Creative Research Center, Ph.D. (New Mexico State) – rhetoric and professional communication; T. Miller-Tomlinson, Ph.D. (Yale) – Shakespeare, early modern literature and culture; S. Nur Cooley, Ph.D. (Michigan State) – cultural rhetors and professional writing; D. Retzinger, Ph.D. (New Mexico State) – technical and professional communication; K. Sharp-Hoskins, Ph.D. (Illinois State) – rhetoric, composition, culture, pedagogy; T. Stolte, Director of Undergraduate Studies, Ph.D. (British Columbia) – 19th-century British literature and culture; B. Thatcher, Ph.D. (Purdue) – professional communication, intercultural rhetoric; J.T. Tremblay, Ph.D. (Chicago) – 20th and 21st c. American fiction and film; J. Wells, Ph.D. (South Carolina) – rhetorical theory and history, environmental rhetoric.

**English Courses**

**ENGL 1105M. Intermediate ESL Composition and Grammar Review**

3 Credits (3)

Development of fluent academic writing skills, with an emphasis on grammar review for editing purposes. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

**Prerequisite(s):** Placement based on English language screening test, and either a minimum TOEFL score of 500 or consent of instructor.

**ENGL 1110G. Composition I**

4 Credits (4)

In this course, students will read, write, and think about a variety of issues and texts. They will develop reading and writing skills that will help with the writing required in their fields of study and other personal and professional contexts. Students will learn to analyze rhetorical situations in terms of audience, context, purpose, medium, and technology and apply this knowledge to their reading and writing. They will also gain an understanding of how writing and other modes of communication work together for rhetorical purposes. Students will learn to analyze the rhetorical context of any writing task and compose with purpose, audience, and genre in mind. Students will reflect on their own writing processes, learn to workshop drafts with other writers and practice techniques for writing, revising, and editing.

**Prerequisite:** ACT standard score in English of 16 or higher, or an Accuplacer score 250 or higher, or an SAT score of 400 or higher or CCDE 1110 N.

**Learning Outcomes**

1. Analyze communication through reading and writing skills.
2. Employ writing processes such as planning, organizing, composing, and revising.
3. Express a primary purpose and organize supporting points logically.
4. Use and document research evidence appropriate for college-level writing.
5. Employ academic writing styles appropriate for different genres and audiences.
6. Identify and correct grammatical and mechanical errors in their writing.
ENGL 1110H. Composition I Honors
4 Credits (4)
In this course, students will read, write, and think about a variety of issues and texts. They will develop reading and writing skills that will help with the writing required in their fields of study and other personal and professional contexts. Students will learn to analyze rhetorical situations in terms of audience, contexts, purpose, mediums, and technologies and apply this knowledge to their reading and writing. They will also gain an understanding of how writing and other modes of communication work together for rhetorical purposes. Students will learn to analyze the rhetorical context of any writing task and compose with purpose, audience, and genre in mind. Students will reflect on their own writing processes, learn to workshop drafts with other writers, and practice techniques for writing, revising, and editing. Individualized assignments and independent study.

Prerequisite: ACT standard English score of 25 or higher, or an SAT score of 550 or higher.

Learning Outcomes
1. Analyze communication through reading and writing skills.
2. Employ writing processes such as planning, organizing, composing, and revising.
3. Express a primary purpose and organize supporting points logically.
4. Use and document research evidence appropriate for college-level writing.
5. Employ academic writing styles appropriate for different genres and audiences.
6. Identify and correct grammatical and mechanical errors in their writing.

ENGL 1110M. Composition I Multilingual
4 Credits (4)
In this course, students will read, write, and think about a variety of issues and texts. They will develop reading and writing skills that will help with the writing required in their fields of study and other personal and professional contexts. Students will learn to analyze rhetorical situations in terms of audience, contexts, purpose, mediums, and technologies and apply this knowledge to their reading and writing. They will also gain an understanding of how writing and other modes of communication work together for rhetorical purposes. Students will learn to analyze the rhetorical context of any writing task and compose with purpose, audience, and genre in mind. Students will reflect on their own writing processes, learn to workshop drafts with other writers, and practice techniques for writing, revising, and editing. For international and multilingual students. Your instructor and classmates will serve as your readers and will give you helpful and constructive criticism, which will in turn assist you in becoming a more fluent and engaging communicator in English. Restricted to Las Cruces campus only.

Prerequisite(s): CBT/PB score of 500, or IBT score of 61, or SPCD 110, or consent of instructor.

Learning Outcomes
1. Analyze communication through reading and writing skills.
2. Employ writing processes such as planning, organizing, composing, and revising.
3. Express a primary purpose and organize supporting points logically.
4. Use and document research evidence appropriate for college-level writing.
5. Employ academic writing styles appropriate for different genres and audiences.
6. Identify and correct grammatical and mechanical errors in their writing.

ENGL 1120. Composition II
2 Credits (2)
In this course, students will explore argument in multiple genres. Research and writing practices emphasize summary, analysis, evaluation, and integration of secondary sources. Students will analyze rhetorical situations in terms of audience, contexts, purpose, mediums, and technologies and apply this knowledge to their reading, writing, and research. Students will sharpen their understanding of how writing and other modes of communication work together for rhetorical purposes. The emphasis of this course will be on research methods.

Prerequisite: successful completion of ENGL 1110G or ENGL 1110H or ENGL 1110M.

Learning Outcomes
1. Analyze the rhetorical situation for purpose, main ideas, support, audience, and organizational strategies in a variety of genres.
2. Employ writing processes such as planning, organizing, composing, and revising.
3. Use a variety of research methods to gather appropriate, credible information.
4. Evaluate sources, claims, and evidence for their relevance, credibility, and purpose.
5. Quote, paraphrase, and summarize sources ethically, citing and documenting them appropriately.
6. Integrate information from sources to effectively support claims as well as other purposes (to provide background information, evidence/examples, illustrate an alternative view, etc.).
7. Use an appropriate voice (including syntax and word choice).
ENGL 1110M. Introduction to Literature
3 Credits (3)
In this course, students will examine a variety of literary genres, including fiction, poetry, and drama. Students will identify common literary elements in each genre, understanding how specific elements influence meaning.

Learning Outcomes
1. Identify, define, and understand basic literary conventions and themes in fiction, poetry and drama.
2. Write reasonable, well-supported analyses of literature that ethically integrate evidence from texts.

ENGL 2130G. Advanced Composition
3 Credits (3)
This course is for students who are striving for fluency, maturity, clarity and significance in their writing. It is an intermediate writing course that builds on and refines writing skills acquired in previous courses. It focuses on non-fiction writing for the professions, business, science, technical fields, academe and/or the popular press. Short works of master writers are studied for ideas, style and structure.

Learning Outcomes
1. Students will examine and apply different writing styles and modes used by masters of personal essay and keep a reading response journal of assigned readings as demonstrated by scoring a 70% in faculty designed assignments.
2. Students will develop a sense of audience by discussing their papers with each other in small groups during class or by reading each other’s papers and participating in positive, helpful peer reviews as demonstrated by scoring a 70% in faculty designed assignments.

ENGL 2210G. Professional & Technical Communication
3 Credits (3)
Professional and Technical Communication will introduce students to the different types of documents and correspondence that they will create in their professional careers. This course emphasizes the importance of audience, document design, and the use of technology in designing, developing, and delivering documents. This course will provide students with experience in professional correspondence and communicating technical information to a non-technical audience. This course is designed for international and domestic multilingual students.

Learning Outcomes
1. Choose professional communication appropriate for audiences and situations.
2. Write in different genres of professional communication.
3. Identify the purpose of a work-related communication and assess the audiences’ informational needs and organizational constraints.
4. Employ appropriate design/visuals to support and enhance various texts.
5. Demonstrate effective collaboration and presentation skills.
6. Integrate research and information from credible sources into professional communication.

ENGL 2210H. Professional and Technical Communication Honors
3 Credits (3)
Professional and Technical Communication writing for Crimson Scholars/Honors students will introduce students to the different types of documents and correspondence that they will create in their professional careers. This course emphasizes the importance of audience, document design, and the use of technology in designing, developing, and delivering documents. This course will provide students with experience in professional correspondence and communicating technical information to a non-technical audience. 3.5 GPA is also required. Restricted to Las Cruces campus only.

Prerequisite(s): grade of C- or better in ENGL 1110G or the equivalent; approval of the honors college.

Learning Outcomes
1. Choose professional communication appropriate for audiences and situations.
2. Write in different genres of professional communication.
3. Identify the purpose of a work-related communication and assess the audiences’ informational needs and organizational constraints.
4. Employ appropriate design/visuals to support and enhance various texts.
5. Demonstrate effective collaboration and presentation skills.
6. Integrate research and information from credible sources into professional communication.

ENGL 2210M. Professional and Technical Communication for Multilingual Students
3 Credits (3)
Professional and Technical Communication will introduce students to the different types of documents and correspondence that they will create in their professional careers. This course emphasizes the importance of audience, document design, and the use of technology in designing, developing, and delivering documents. This course will provide students with experience in professional correspondence and communicating technical information to a non-technical audience. NMSU specific description: In this course, students will explore the unique advantages and challenges of being multilingual writers. This course is designed for international and domestic multilingual students.

Prerequisite: Grade of C- or better in ENGL 1110G or ENGL 1110H or ENGL 1110M.

Learning Outcomes
1. Choose professional communication appropriate for audiences and situations.
2. Write in different genres of professional communication.
3. Identify the purpose of a work-related communication and assess the audiences’ informational needs and organizational constraints. Employ appropriate design/visuals to support and enhance various texts.
4. Demonstrate effective collaboration and presentation skills.
5. Integrate research and information from credible sources into professional communication.
ENGL 2215G. Advanced Technical and Professional Communication
3 Credits (3)
Theory and practice of writing in technical and professional fields, individualized to each student’s field. Emphasizes efficient writing processes and effective written products. May be repeated up to 3 credits. Restricted to Las Cruces campus only.
Prerequisite(s): Junior or above standing, or consent of instructor.

Learning Outcomes
1. To complicate the definition of "technical and scientific communication" and its relationship(s) to studying and practicing "rhetoric."
2. To complicate our relationship to concepts like "science", "knowledge, "objectivity," neutrality, "clarity," etc.
3. To use a community-based approach to study and practice technical and scientific documents within various discourse communities.
4. To study and practice different genres (i.e. memos, letters, e-mails, reports, proposals, and instruction sets) attending to issues of audience and purpose within discourse communities.
5. To practice some mindful reading strategies that allow you to attend to the use of language and its material and discursive effects in different situations.
6. To examine the material effects of producing, circulating, and consuming technical and scientific texts on the bodies of people within different contexts.
7. To complicate our understanding of "ethics," "responsibility," and "accountability" toward ourselves and others.
8. To work collaboratively and individually to research, to analyze, and to write about public debates regarding the conduct of science and technology.
9. To understand and use basic principles of document design attending to issues of usability and accessibility.
10. To articulate the relationship between technical and scientific communication and issues of inclusion and social justice in the world.

ENGL 2221G. Writing in the Humanities and Social Science
3 Credits (3)
Theory and practice in interpreting texts from various disciplines in the humanities and social sciences. Strategies for researching, evaluating, constructing, and writing researched arguments. Course subtitled in the Schedule of Classes. May be repeated up to 3 credits.
Prerequisite(s): Grade of C- or better in ENGL 1110G or ENGL 1110H, or ENGL 1110M.

Learning Outcomes
1. Develop the ability to interpret and respond to humanities and social sciences texts
2. Analyze and evaluate cultural artifacts such as texts, images, and practices as a means of academic inquiry
3. Critique arguments offered in the readings to determine the underlying methodology as well as underlying values
4. Construct a rhetorical argument with evidence appropriate for an explicit audience and purpose
5. Use written, visual, or oral strategies to persuade, inform, or engage, considering situation, audience, purpose, aesthetics, and diverse points of view
6. Practice effective research strategies, and integrate research correctly and ethically from credible sources
7. Understand and apply components of the writing process such as planning, collaborating, organizing, composing, revising, and editing

ENGL 2280. History of Argument
3 Credits (3)
Investigates the major figures and movements in rhetoric from the classical period to modern rhetorical theory, examining relations between rhetorical teaching and practice, culture, epistemology, and ideology. Main campus only. Prerequisite(s): ENGL 1110G, or ENGL 1110GH, or ENGL 1110M

Learning Outcomes
1. Understand how rhetoric, argument, and persuasion work. Become familiar with the key terms and various contexts in which rhetoric, argument, and persuasion function and the contingencies that influence their use and effectiveness;
2. be familiar with the broad history and major figures of western rhetoric;
3. apply a number of approaches used to analyze and construct/deconstruct rhetorical arguments, including (but not limited to) Aristotelian appeals and commonplaces, stasis theory, toulmin analysis, pentadic/dramatistic analysis, fallacy analysis, and rogerian analysis;
4. complete an analysis as well as design and present a project regarding a contemporary issue or concern about which you feel deep passion and commitment; and
5. improve general critical thinking and communication skills, both oral and written.
ENGL 2310G. Introduction to Creative Writing
3 Credits (3)
This course will introduce students to the basic elements of creative writing, including short fiction, poetry, and creative nonfiction. Students will read and study published works as models, but the focus of this "workshop" course is on students revising and reflecting on their own writing. Throughout this course, students will be expected to read poetry, fiction, and nonfiction closely, and analyze the craft features employed. They will be expected to write frequently in each of these genres.
Prerequisite(s): ENGL 1110G or ENGL 1110H or ENGL 1110M.
Learning Outcomes
1. Participate in a constructive conversation and community about creative writing.
2. Read and critically engage with a variety of texts.
3. Compose creative works in various genres of creative writing.
4. Provide respectful, honest, and critical feedback to peers about their work.
5. Revise creative work based on peer feedback and critique.
6. Develop thoughtful workshop reflection on students' own writing and writing process.
7. Evaluate and engage with publication process.

ENGL 2381. Script Development and Storyboarding
3 Credits (3)
Examines effective writing principles for creating storyboards that communicate the overall picture of a project, timing, scene complexity, emotion and resource requirements. Crosslisted with: FDMA 2381.
Learning Outcomes
1. develop a story idea into a complete storyboard
2. describe and visualize the creative aspects of a media project from conception to completion
3. write a scene in the professional script format
4. deliver a professional verbal and visual presentation of a story idea to an audience
5. the ability to conceive, illustrate and plan a visual project
6. proficiency in oral, written, and visual communication via storyboarding, script writing and verbal
7. presentations

ENGL 2382. Narrative: Principles of Story Across the Media
3 Credits (3)
Examines the various strategies of written and visual storytelling, narrative structure and its principal components (plot, theme, character, imagery, symbolism, point of view) with an attempt to connect them to elements of contemporary forms of media expression, including screenwriting, playwriting, writing for documentaries and animation, etc. Crosslisted with: FDMA 2382
Learning Outcomes
1. Identify use the building blocks of storytelling: plot, theme, character, imagery,
2. Symbolism and point of view
3. Develop these building blocks into a cohesive narrative within a written document
4. Effectively communicate in different written formats
5. Create design documents for varied genres of media: narrative short, documentary,
6. Animation, commercial/industrial video, computer game
7. Describe how a written narrative can be translated into a visual medium

ENGL 2520G. Film as Literature
3 Credits (3+3P)
The purpose of this course is to teach students how to analyze film as a visual text. Students will learn to analyze films, film techniques, eras, and genres. Students will also identify significant trends and developments in film-making, examining the ways in which film reflects and creates cultural trends and values.
Learning Outcomes
1. Develop an understanding of the cultural, historical, and technical contexts for various films.
2. Identify, define, and analyze basic film techniques used in different genres and time periods.
3. Analyze how film uses literature by studying different sources of adaptation.
4. Demonstrate an understanding of film in its various aspects by writing film analysis, reviews, and/or other projects.
ENGL 2521. The Bible as Literature
3 Credits (3)
Develops informed readings of Hebrew and Christian scriptures. Emphasizes understanding Biblical literary forms, techniques, themes; historical, cultural contexts for interpretation; authorship, composition, audience for individual books; development of Biblical canon.

Learning Outcomes
1. Develop and articulate historically informed and textually supported arguments regarding the form and meaning of biblical texts
2. Express arguments and explication in clear, organized,
3. Understand the Jewish and Christian scriptures as cultural artifacts, using some fundamental techniques of literary analysis and interpretation, especially thematic interpretation, stylistic analysis, narrative analysis, poetics, and the rhetorical analysis of figurative language.
4. Use socio-historically informed interpretive methods focused on these fundamental contextual questions: 1) who probably wrote and edited these texts, 2) why and how they most likely did so, 3) how their earliest audiences probably responded to them, and 4) why and how they were later combined to form the canonical Jewish and Christian bibles read today.
5. Know in detail substantial selections of representative, influential, and historically informative biblical texts
6. Distinguish literary critical and historical analysis of the Bible from those based on faith, tradition, authority, and theology
7. Recognize, understand, and analyze the forms, genres, and techniques used by biblical authors
8. Become familiar with and be able to use essential knowledge of the historical, cultural, and geographical contexts of Biblical writing
9. Learn how to evaluate texts as historical documents, as well as how doing so relates to and differs from literary critical analysis and interpretation
10. Become familiar with common and influential scholarly, critical, and aesthetic ways of reading Biblical texts from a contemporary perspective
11. Understand the cultural influence of the Bible and its relevance for other areas of scholarly and artistic work

ENGL 2610. American Literature I
3 Credits (3)
This course surveys American literature from the colonial period to the contemporary period. This course provides students with the contexts and documents necessary to understand American literature and the aesthetic, cultural, and ideological debates central to American culture.

Learning Outcomes
1. Recognize the traditions of American literature and their connection to issues of culture, race, class, and gender.
2. Demonstrate familiarity with a variety of major works by American authors.
3. Explore the various influences and sources of American literature.
4. Apply effective analytic and interpretive strategies to American literary works using academic conventions of citation and style.

ENGL 2620. American Literature II
3 Credits (3)
This course surveys American literature from the mid-nineteenth-century to the contemporary period. This course provides students with the contexts and documents necessary to understand American literature and the aesthetic, cultural, and ideological debates central to American culture.

Learning Outcomes
1. Recognize the traditions of American literature and their connection to issues of culture, race, class, and gender.
2. Demonstrate familiarity with a variety of major works by American authors.
3. Explore the various influences and sources of American literature.
4. Apply effective analytic and interpretive strategies to American literary works using academic conventions of citation and style.
5. Conventions of citation and style.

ENGL 2630. British Literature I
3 Credits (3)
This course offers a study of British literature from its origins in Old English to the 18th century. This survey covers specific literary works--essays, short stories, novels, poems, and plays--as well as the social, cultural, and intellectual currents that influenced the literature.

Learning Outcomes
1. Read and discuss representative works of British writers from its origins in Old English to the 18th century to understand cultural and historical movements which influenced those writers and their works.
2. Identify the characteristics of various British literary genres, such as the essay, novel, short story, poetry, and dramatic literature.
3. Apply effective analytic and interpretive strategies to British literary works using academic conventions of citation and style.

ENGL 2640. British Literature II
3 Credits (3)
This course offers a study of British literature from the 18th century to the present. This survey covers specific literary works--essays, short stories, novels, poems, and plays--as well as the social, cultural, and intellectual currents that influenced the literature.

Learning Outcomes
1. Read and discuss representative works of British writers from the 18th century to the present to understand cultural and historical movements, which influenced those writers, and their works.
2. Identify the characteristics of various British literary genres, such as the essay, novel, short story, poetry, and dramatic literature.
3. Apply effective analytic and interpretive strategies to British literary works using academic conventions of citation and style.
ENGL 2650G. World Literature I
3 Credits (3)
In this course, students will read representative world masterpieces from ancient, medieval and Renaissance literature. Students will broaden their understanding of literature and their knowledge of other cultures through exploration of how literature represents individuals, ideas and customs of the world cultures. The course focuses strongly on examining the ways literature and culture intersect and define each other.

Learning Outcomes
1. Identify and comprehend key authors and literary works from ancient periods to the Enlightenment.
2. Understand each text's historical and cultural context.
3. Identify and analyze a variety of literary forms, including poetry, plays, and philosophical and religious texts.
4. Compare works from different cultures and historical periods examining genre, style, and content or theme.
5. Analyze how literary works reflect historical, national, cultural, and ethnic differences.

ENGL 2996. Special Topics
1-3 Credits
Emphasis on a literary and/or writing subject chosen for the semester. Repeatable for an unlimited credit under different subtitles.

Learning Outcomes
1. Varies

ENGL 301. Theory and Criticism: Rhetoric and Culture
3 Credits (3)
Introduction to rhetorical criticism with an emphasis on understanding the theoretical and cultural underpinnings for the rhetorical analyses of texts.

ENGL 302. Theory and Criticism: Literature and Culture
3 Credits (3)
Introduction to literary criticism, from its classical beginnings through contemporary critical approaches.

ENGL 303. Theory and Criticism: Film, Media and Culture
3 Credits (3)
Surveys classical and contemporary film theory. Explores the relationship of theory to textual analysis and filmmaking practices. Includes auteurism semiotics, psychoanalysis, and other theories, as well as theories of other media.

ENGL 304. Creative Writing: Prose
3 Credits (3)
Imaginative writing, chiefly prose narrative. Repeatable for a maximum of 9 credits.

ENGL 306. Creative Writing: Poetry
3 Credits (3)
Introduction to the writing of poetry. Repeatable for a total of 9 credits.

ENGL 307. Creative Writing: Creative Nonfiction
3 Credits (3)
Introduction to creative nonfiction. Skills emphasized will include the personal voice, powers of observation and reflection, advocacy, argument, and a creative, powerful use of language. Repeatable for a maximum of 9 credits.

ENGL 308. Creative Writing: Playwriting
3 Credits (3)
Technique of one-act playwriting, and analysis of dramatic structure. Crosslisted with: THEA 308

ENGL 309. Screenwriting I
3 Credits (3)
Writing intensive. Students learn the craft of screenwriting, honing skills in writing dialogue and visual narrative, crafting dynamic characters and dramatic action. Original student scripts will be performed and discussed in class. Consent of instructor required. Crosslisted with: CMI 309 and THTR 306

Prerequisite(s): ENGL 235 or CMI 235.

ENGL 310. Critical Writing
3 Credits (3)
A course in critical reading, writing, and research designed to prepare English majors for upper-division courses.

ENGL 315. Writing for the Web
3 Credits (3)
Introduction to writing for the World Wide Web through practical application and analysis on both theory and research. Allows hands-on learning in a computer classroom.

ENGL 321V. Modern European Drama
3 Credits (3)
Masterworks of European drama from the late 18th century to present. Crosslisted with: THEA 321V

ENGL 322. Dramatic Character
3 Credits (3)
How characters have been created for the stage from the beginning of theatrical performances in ancient Greece to the present day. Exploring characterization related to dramatic structure, style, and genre, and how dramatic characters differ from those in literary fiction. Crosslisted with: THEA 322.

ENGL 323. American Drama
3 Credits (3)
Masterworks of American drama by noted American playwrights. Crosslisted with: THEA 323

ENGL 326. Cultural Identity and Representation Across the Media
3 Credits (3)
Considers complex relationships between representation and culture including how images and language shape racial, ethnic, gender, sexual, and class identities. Examines theories from several disciplines. Includes lecture, discussion and production exercises.

ENGL 327V. Shakespeare around the Globe
3 Credits (3)
Introduction to multicultural issues in Shakespeare's plays and to adaptations of Shakespeare's plays in other cultures.

ENGL 328V. Literature of Science Fiction and Fantasy
3 Credits (3)
Survey and critical examination of the development of science fiction and fantasy as literature genres through selected authors and texts.

ENGL 329. Studies in Drama
3 Credits (3)
Emphasis on a group of related works of European or American drama; topics will vary. Crosslisted with: THEA 329 and FDMA 329

ENGL 339V. Chicana/o Literature
3 Credits (3)
Introduction to Chicano novels, short stories and selected creative nonfiction.
ENGL 354. Form and Technique in Fiction
3 Credits (3)
Literature course designed for fiction writers, especially those English majors in the Creative Writing emphasis. The course combines the study of published fiction with the study of craft. Some of the assignments will require the student to write original fiction based on exercises provided by the instructor. Repeatable for up to 9 credits.

ENGL 356. Form and Technique in Poetry
3 Credits (3)
Literature course designed for poets, especially those English majors in the Creative Writing emphasis. The course combines the study of published poetry with the study of craft. Some of the assignments will require the student to write original poems based on exercises provided by the instructor. Repeatable for up to 9 credits.

ENGL 358. Form and Technique in Playwriting
3 Credits (3)
Literature course designed for playwrights, especially those English majors in the Creative Writing emphasis. The course combines the study of published plays and performances with the study of craft. Some of the assignments will require the student to write original plays based on exercises provided by the instructor. Repeatable for up to 9 credits.

ENGL 363. Literature for Children and Young Adults
3 Credits (3)
A comparative, historical survey of literature for young (K to 12th grade) readers. Emphasis on critical evaluation. 
Prerequisite: junior or above standing.

ENGL 380V. Women Writers
3 Credits (3)
Introduction to multicultural women's traditions through intensive study of works by women writers. Crosslisted with: GNDR 380V.

ENGL 392V. Mythology
3 Credits (3)
Greek and Roman mythology and its impact on European and English literature. Readings in myths, classical plays, and other literature with mythological interest, including nonclassical myths.

ENGL 394V. Southwestern Literature
3 Credits (3)
Introduction to multicultural literature of the Southwest: oral folk literature, literary fiction (classic and contemporary), nonfiction and poetry.

ENGL 399. Special Topics
3 Credits (3)
Emphasis on a theme, genre, figure, or technique chosen for study during the semester. Repeatable under different subtitles.

ENGL 400. Independent Study: Upper Division
1-3 Credits
For students with demonstrated aptitude for independent work. Approval of instructor required before registration. Repeatable under different subtitles.

ENGL 403. Web Design and Development
3 Credits (3)
Combines study and practice of web design and development as rhetoric, technical, processual, and collaborative.

Learning Outcomes
1. Read and write HTML without the use of an editor Design and format web pages via CSS Understand what JavaScript is and how it's used Understand the methods for accessibility Create usable, aesthetically pleasing, and functional websites

ENGL 404. User Experience and Assistance
3 Credits (3)
Includes theories and discussions of users, usability, accessibility, disability, design, embodiment, and ethics to prepare students to understand, write for, and collaborate with users and audiences in technical and professional communication contexts.

Learning Outcomes
1. Understand histories and politics that inform contemporary best practices and ethics conversations associated with the development of user-oriented documentation Develop a robust vocabulary that permits engagement in both academic and industry-based conversations about users, access, and documentation Discuss pros, cons, and nuances of multiple user-centered research methods Produce professional user-assistance documents and discuss the ethics of design decisions.

ENGL 405. Chaucer
3 Credits (3)
Principal works, with emphasis on The Canterbury Tales.

ENGL 407. Milton
3 Credits (3)
Studies in Milton's works, including Paradise Lost.

Learning Outcomes
1. Analyze Milton's poetry using the methods of close reading; Demonstrate ability to read and develop persuasive literary-critical interpretations of Milton's poetry and prose; Demonstrate ability to locate Milton's writings in historical and cultural context; Demonstrate skill in working with relevant secondary resources and research tools including the MLA bibliography to write a Working Bibliography and Research Paper on a topic related to our course material.

ENGL 408. Shakespeare I
3 Credits (3)
Study in Shakespeare's early poems and plays. Repeatable for up to six credits under different subtitles.

Learning Outcomes
1. Analyze Shakespeare's poetry using the methods of close reading; Demonstrate ability to read and develop persuasive literary-critical interpretations of Shakespeare's poems and plays; Demonstrate skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material; Work effectively in small groups to interpret a scene through performance

ENGL 409. Shakespeare II
3 Credits (3)
Study in Shakespeare's later plays. ENGL 408 is not a prerequisite. Repeatable for up to six credits under different subtitles. Crosslisted with THEA 409.

Learning Outcomes
1. Analyze Shakespeare's poetry using the methods of close reading; Demonstrate ability to read and develop persuasive literary-critical interpretations of Shakespeare's poems and plays; Demonstrate skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material; Work effectively in small groups to interpret a scene through performance.
ENGL 412. Writing in the Workplace
3 Credits (3)
Study of workplace writing practices, including a focus on research-based, theoretical, and pedagogical approaches to professional communication.

ENGL 413. Advanced Creative Writing: Prose Workshop
3 Credits (3)
Imaginative writing, chiefly the narrative. May be repeated up to 12 credits.
Prerequisite(s): ENGL 304 or consent of instructor.

ENGL 414. Advanced Creative Writing: Poetry Workshop
3 Credits (3)
For advanced writers of poetry. Repeatable for a total of 12 credits.
Prerequisite(s): ENGL 306 or consent of instructor.

ENGL 416. Approaches to Literature
3 Credits (3)
Understanding, appreciation, techniques of instruction in the high school.
Prerequisite: at least 6 credits in upper-division English courses.

ENGL 417. Advanced Study in Critical Theory
3 Credits (3)
Advanced study of one or more major trends in theoretical inquiry within English studies. Some prior study of theory, such as English 301-303, strongly recommended. Repeatable under different subtitles.

ENGL 419. Modern Rhetorical Theory
3 Credits (3)
Major figures in rhetorical theory, with particular emphasis on developments in rhetorical theory in the twentieth century.

ENGL 422. Advanced Study in a Literary Form or Genre
3 Credits (3)
Close study of a topic in a particular literary form or genre. May be repeated under different subtitles.

ENGL 423. Advanced Study in a Major Author
3 Credits (3)
Close study of selected works by a major author. May be repeated under different subtitles.

ENGL 430. Online Publishing
3 Credits (3)
This three-credit course provides a theoretical background for online publishing and design as well as hands on experience publishing an online arts magazine.

ENGL 431. Technical Editing
3 Credits (3)
Uses workshops, readings, hands-on projects, and discussion to improve skills in gathering, writing, designing, and editing technical information. For students interested in technical communication as well as students interested in developing strengths in communicating in scientific and technical fields.

ENGL 433. Victorian Literature
3 Credits (3)
Intensive study of major writers and critical topics from the Victorian period. Repeatable under different subtitles.

ENGL 442. Modern and Contemporary American Poetry
3 Credits (3)
Studies the development of American poetry from World War I to the present. Repeatable under a different subtitle. May be repeated up to 6 credits.

ENGL 445. Postmodern Fiction
3 Credits (3)
Study of the various forms of formally innovative experimental fiction produced since 1945, with a focus on the relationship between literary history and its sociohistorical contexts. Some texts will be read in translation. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 446. Advanced Creative Writing: Nonfiction Prose
3 Credits (3)
This workshop-format class for advanced writers will examine the many varieties of Creative Nonfiction. Students should be prepared for a rigorous reading load of published nonfiction and student submissions. Because of the workshop format, every student is expected to contribute extensively to every class, both in printed form and oral comments. Taught with ENGL 546. May be repeated up to 12 credits.
Prerequisite(s): ENGL 307 or consent of instructor.

ENGL 449. Advanced Study in Writing
3 Credits (3)
Close study of a topic in composition, rhetoric and/or technical and professional communication. Repeatable for a maximum of 6 credits with permission of department.

ENGL 453. World Literatures
3 Credits (3)
Study of one or more literary traditions exclusive of those originating in Europe and the United States. Readings will include texts in translation. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 458. Latino/a Literature and Culture
3 Credits (3)
Focuses on established and emergent Latino/a literary and cultural production. Incorporates both literary and sociocultural readings of texts. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 460. Proposal Writing
3 Credits (3)
Developing proposals and grants in a workshop setting.

ENGL 469. Advanced Study in American Literature
3 Credits (3)
Covers selected works for a particular period of American literary history. Repeatable under different subtitles.

ENGL 470. Approaches to Composition
3 Credits (3)
Theory and practice of teaching writing. Discussion and application of classroom practices, definition of standards, and evaluation of student writing.

ENGL 471 M. Scholarly Writing for International Graduate Students
3 Credits (3)
Instruction and practice in writing major academic genres, including experimental, descriptive, and problem-solution research reports, proposals, and library referenced papers. May be repeated up to 3 credits. Graded: S/U Grading (S/U, Audit).
Prerequisite(s): Placement based on English language screening test or successful completion of ENGL 1105M; a minimum TOEFL score of 500 or consent of instructor; and successful completion of SPCD 108/490 where indicated by placement.
ENGL 478. *Document Design*  
3 Credits (3)  
Advanced study in writing, with an emphasis on the computer as a tool for designing visually informative text. Includes theory and research in document design and the use of page composition and graphics software.

ENGL 479. *Computers and Writing*  
3 Credits (3)  
This course will trace the history of computers and composition as a field by looking at the work of important scholars including Selfe, Hawisher, Johnson-Eilola, and Wysocki. We will then focus on specific ways new media might be integrated into composition classrooms. The course will include discussions, student facilitations, and experimentation with technologies.

ENGL 481. *Women's Literature*  
3 Credits (3)  
Intensive study of literature by women, in particular historical, aesthetic, cultural, or intellectual contexts. Repeatable under different subtitles.

ENGL 489. *Cultural Studies: Literature and Theory*  
3 Credits (3)  
Examines the theory and practice of cultural studies in relation to the variety of discourse describable as literary, including autobiography, avant-garde writing, nonfiction prose, the essay, online writing, folklore, and popular genre fiction (such as mystery, romance, thriller, or horror). Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 497. *Internship*  
3-6 Credits (3-6)  
Supervised technical and professional communication internship in business, industry, government, or the university. Repeatable for a total of 6 credits. Consent of instructor required.

ENGL 500. *Supervised Study*  
1-3 Credits  
To prepare the student for the master's degree examinations by special studies in fields not covered in routine course work.  
Prerequisite: consent of instructor.

ENGL 501. *Online Publishing*  
3 Credits (3)  
This three-credit course provides a theoretical background for online publishing and design as well as hands-on experience publishing an online arts magazine. Taught with ENGL 430.

ENGL 502. *Critical Conversations in Technical and Professional Communication*  
3 Credits (3)  
Introduces students to critical histories, theories, and key concepts in technical and professional communication across academic and industry boundaries.  
Learning Outcomes  
1. Understand the histories and politics of emergence of technical and professional communication as a field of study and expertise; Identify and track key concepts, terms, and conversations that give shape to technical and professional communication; Draw on a range of theories and methodologies to articulate and critique the function and effects of technical and professional communication; Participate in disciplinary conversations through research and writing.

ENGL 503. *Web Design and Development*  
3 Credits (3)  
Combines study and practice of web design and development as rhetorical, technical, processual, and collaborative.  
Learning Outcomes  
1. Read and write HTML without the use of an editor Design and format web pages via CSS Understand what JavaScript is and how it's used  
Understand the methods for accessibility

ENGL 504. *User Experience and Assistance*  
3 Credits (3)  
Includes theories and discussions of users, usability, accessibility, disability, design, embodiment, and ethics to prepare students to understand, write for, and collaborate with users and audiences in technical and professional communication contexts.  
Learning Outcomes  
1. Understand histories and politics that inform contemporary best practices and ethics conversations associated with the development of user-oriented documentation  
Develop a robust vocabulary that permits engagement in both academic and industry-based discussions about users, access, and documentation  
Discuss pros, cons, and nuances of multiple user-centered research methods  
Produce professional user-assistance documents and discuss the ethics of design decisions

ENGL 505. *Graduate Study in Chaucer*  
3 Credits (3)  
Principal works, with emphasis on the Canterbury Tales. Requirements include independent directed research. May be repeated up to 3 credits.

ENGL 507. *Special Topics in Rhetoric and Technical and Professional Communication*  
3 Credits (3)  
Seminar course centered on contemporary issues in rhetoric and technical and professional communication. Repeatable under different subtitles, for up to 6 credits.  
Learning Outcomes  
1. Use rhetoric inquiry and theory to contextualize and study technical and professional communication. Understand the disciplinary overlaps, tensions, and possibilities among rhetoric and technical and professional communication. Track a contemporary thematic trend, issue, or question through rhetoric and technical and professional communication.

ENGL 508. *Graduate Study in Shakespeare I*  
3 Credits (3)  
Graduate study in Shakespeare's early poems and plays. Requirements include independent directed research. Repeatable for up to six credits under different subtitles.  
Learning Outcomes  
1. Analyze Shakespeare's poetry using the methods of close reading  
Demonstrate graduate-level ability to read and develop persuasive literary-critical interpretations of Shakespeare's poems and plays  
Demonstrate graduate-level skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material; Work effectively in small groups to interpret a scene through performance
ENGL 509. Graduate Study in Shakespeare II  
3 Credits (3)  
Study in Shakespeare's late poems and plays. Requirements include independent directed research. Repeatable for up to six credits under different subtitles.  

Learning Outcomes  
1. Analyze Shakespeare's poetry using the methods of close reading  
   Demonstrate graduate-level ability to read and develop persuasive literary-critical interpretations of Shakespeare's poems and plays;  
   Demonstrate graduate-level skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material; Work effectively in small groups to interpret a scene through performance  

ENGL 510. Proseminar in Rhetoric and Professional Communication  
3 Credits (3)  
Introduction to research in rhetoric and professional communication. Taught with ENGL 610.  

ENGL 512. Graduate Study in Writing in the Workplace  
3 Credits (3)  
Study of workplace writing practices, including a focus on research-based, theoretical, and pedagogical approaches to professional communication.  

ENGL 513. Creative Writing Workshop: Fiction  
3 Credits (3)  
Advanced creative writing prose workshop. Imaginative writing, chiefly the narrative. Graduate level workshop for students who are not in the English Department MFA program. May be repeated for a maximum of 12 credits. Taught with ENGL 413 with additional work required at the graduate level.  

ENGL 514. Creative Writing Workshop: Poetry  
3 Credits (3)  
Creative writing poetry workshop for advanced writers of poetry. Graduate level works for students who are not in the English Department MFA program. Repeatable for a maximum of 12 credits. Taught with ENGL 414 with additional work required at the graduate level.  

ENGL 516. Graduate Study in Approaches to Literature  
3 Credits (3)  
Understanding, appreciation, techniques of instruction in the high school. Requirements include independent directed research.  

Prerequisite: at least 6 credits in upper-division English courses.  

ENGL 517. Graduate Study in Critical Theory  
3 Credits (3)  
Advanced study of one or more major trends in theoretical inquiry within English studies. Some prior study of theory, such as English 301, 302, or 303, strongly recommended. Repeatable under different subtitles.  

ENGL 518. History of Rhetoric  
3 Credits (3)  
An investigation of the crucial writings that have shaped Western attitudes towards and practice of rhetoric. Course will examine key texts from the Greeks through the Enlightenment, especially as they have influenced contemporary rhetorical theory.  

ENGL 519. Graduate Study in Modern Rhetorical Theory  
3 Credits (3)  
Major figures in rhetorical theory, with particular emphasis on developments in rhetorical theory in the 20th century. Students will be responsible for all requirements of ENGL 419 and will in addition undertake independent directed research.  

ENGL 521. Graduate Study in a Literary Period or Movement  
3 Credits (3)  
Close study of a topic in a particular literary period or movement. Requirements include independent directed research. Repeatable under different subtitles.  

ENGL 522. Graduate Study in a Literary Form or Genre  
3 Credits (3)  
Close study of a topic in a particular literary form or genre. Requirements include independent directed research. Repeatable under different subtitles.  

ENGL 523. Graduate Study of a Major Author  
3 Credits (3)  
Close study of selected works of a major author. Requirements include independent directed research. Repeatable under different subtitles.  

ENGL 524. Graduate Study in a Major Text  
3 Credits (3)  
Close study of a major text. Requirements include independent directed research. Repeatable under different subtitles.  

ENGL 525. Graduate Study in Comparative Literature  
3 Credits (3)  
Close study of a selection on non-English literary works read in translation. English-language works from a similar literary period or genre may also be read. Requirements include independent directed research. Repeatable under different subtitles.  

Prerequisite: graduate standing or consent of instructor.  

ENGL 526. Special Topics in Critical Theory  
3 Credits (3)  
Study of a specific historical or theoretical topic, trend, or movement in Critical Theory. Repeatable under different subtitles.  

ENGL 527. Graduate Study in Film and Digital Media  
3 Credits (3)  
Offers close graduate study of a form or genre, a major figure or style, a historical period or movement, or a major theme or text. Topics vary from semester to semester.  

ENGL 531. Technical Editing  
3 Credits (3)  
Uses workshops, readings, hands-on projects, and discussion to improve skills in gathering, writing, designing, and editing technical information. For students interested in technical communication as well as students interested in developing strengths in communicating in scientific and technical fields.  

ENGL 532. Graduate Study in Film and Digital Media  
3 Credits (3)  
Advanced study of issues in form and technique in fiction, including point of view, scene and dialogue, and story structure. Repeatable for a maximum of 6 credits.  

ENGL 535. Graduate Study: Form and Technique in Poetry  
3 Credits (3)  
Advanced study of issues in form and technique in poetry, including voice, tone, syntax, and structure. Repeatable for a maximum of 12 credits.
ENGL 536. The Borderlands Writing Project
3-6 Credits (3-6)
Intensive month-long seminar for practicing teachers and educators designed to improve the teaching of writing and the writing process and literacy and reading in schools and other educational contexts. Reading, discussing, and writing about current professional literature; completing teacher inquiry; and planning action research. Participants complete personal and professional writing, as well as additional professional development activities. By invitation only. Affiliated with the National Writing Project. Consent of instructor required. Crosslisted with: RDG 536

ENGL 542. Modern and Contemporary American Poetry
3 Credits (3)
Studies the development of American poetry from World War I to the present. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 543. Multimedia Theory and Production
3 Credits (3)
Issues, theories, and production practices underlying design of multimedia, including rhetorical choices, aesthetic approaches, usability concerns, and diverse academic and popular discourses contributing to continued development of digital texts. Taught with ENGL 643.

ENGL 544. Modern British Fiction
3 Credits (3)
Study of the fiction produced in the British Isles in the 20th and 21st centuries. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 545. Postmodern Fiction
3 Credits (3)
Study of the various forms of formally innovative experimental fiction produced since 1945, with a focus on the relationship between literary history and its sociohistorical contexts. Some texts will be read in translation. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 546. Advanced Creative Writing: Nonfiction Prose
3 Credits (3)
This graduate-level workshop will examine the many varieties of Creative Nonfiction. Students should be prepared for a rigorous reading load of published nonfiction and student submissions. Because of the workshop format, every student is expected to contribute extensively to every class, both in printed form and oral comments. Taught with ENGL 446 with additional work required at the graduate level. Consent of Instructor required. Crosslisted with: ENGL 446.

ENGL 548. Graduate Study in Empirical Research
3 Credits (3)
Introduction to empirical research methods in composition, professional communication, and rhetoric.

ENGL 549. Graduate Study in Writing
3 Credits (3)
Close study of a topic in composition, rhetoric, and/or technical and professional communication. Topics vary. Repeatable for a maximum of 6 credits.

ENGL 550. Graduate Study in Literacy
3 Credits (3)
Studies in literacy theory and literacy research. Topics may vary. Taught with ENGL 650.

ENGL 552. Graduate Study in History of the English Language
3 Credits (3)
This course examines the history of the English language from its Indo-European origins through its development into an international language. The aim is to describe the English language formally and to trace linguistic change over time. Samples of written English will illustrate various stages in the development of English. Also considered are contemporary social and political issues related to language, including the problem of 'standard English' and the uses of language in advertising, the media, and politics.

ENGL 553. World Literatures
3 Credits (3)
Study of one or more literary traditions exclusive of those originating in Europe and the United States. Readings will include texts in translation. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 555. Graduate Study in Rhetoric of Scientific Literature
3 Credits (3)
Intensive study of the rhetoric of selected works of scientific literature.

ENGL 558. Latino/a Literature and Culture
3 Credits (3)
Focuses on established and emergent Latino/a literary and cultural production. Incorporates both literary and sociocultural readings of texts. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 560. Proposal and Grant Writing
3 Credits (3)
Developing proposals and grants in a workshop setting.

ENGL 561. Topics in Writing Program Administration
3 Credits (3)
Explores issues, theories, and research underlying the design of writing programs and the administration of writing centers. Repeatable for a maximum of 6 credits. Taught with ENGL 661.

ENGL 563. Graduate Study in English Literature
3 Credits (3)
Covers selected works for a particular period of English literary history. Repeatable under different subtitles.

ENGL 564. History and Theory of Composition Studies
3 Credits (3)
Studies in the history and theory of composition as a discipline. Taught with ENGL 664.

ENGL 565. Intercultural Rhetoric and Professional Communication
3 Credits (3)
Examines rhetorical traditions in intercultural professional, technical, academic, and governmental contexts. Taught with ENGL 665.

ENGL 567. Documentary Film Theory and Criticism
3 Credits (3+3P)
Course offers critical survey of documentary film theory and criticism including considerations of the epistemological assumptions, rhetorical choices, aesthetic approaches, political circumstances of historical and contemporary documentary film.

ENGL 568. Rhetoric and Cultural Studies
3 Credits (3)
Explores intersections between rhetoric and cultural studies. Examines theories and practices of texts and discourses in political and cultural contexts. Taught with ENGL 668.
ENGL 569. Graduate in American Literature  
3 Credits (3)  
A group of works from a particular period of American literary history. Repeatable under different subtitles.

ENGL 570. Graduate Study in Approaches to Composition  
3 Credits (3)  
Theory and practice of teaching writing, including classroom practices, definition of standards, and evaluation of student writing. Requirements include independent directed research.

ENGL 571. Composition Pedagogy and Practicum  
3 Credits (3)  
Examines the pedagogical implications of contemporary composition theory and research. Focuses on teaching composition at the college level. Consent of instructor required.

ENGL 572. Technical-Professional Communication Pedagogies  
3 Credits (3)  
Combines theoretical and practical attention to the pedagogies that underwrite the teaching of technical and professional communication; culminates in the development of a TPC course proposal, syllabus, and rationale. For Graduate students only.

Learning Outcomes  
1. Engage with research and scholarship that reflects a range of approaches to conceptualize the purposes and goals of technical and professional communication courses; Articulate a range of possibilities for and responsibilities of technical and professional communication pedagogy; Compose and substantiate a teaching philosophy and course plan for teaching technical and professional communication.

ENGL 574. Workshop: Advanced Writing Prose  
3 Credits (3)  
Intensive practice in prose writing, primarily fiction, in a workshop environment with peer criticism. Repeatable for a total of 15 credits. Consent of instructor required.

ENGL 575. Workshop: Advanced Writing Poetry  
3 Credits (3)  
Intensive practice in poetry writing in a workshop environment with peer criticism. Repeatable for a total of 15 credits. Consent of instructor required.

ENGL 576. Workshop: Advanced Writing Playwriting  
3 Credits (3)  
Intensive practice in dramatic writing in a workshop environment with peer criticism. Repeatable for a total of 9 credits. Consent of instructor required.

ENGL 577. Workshop: Advanced Technical and Professional Writing  
3 Credits (3)  
Intensive practice in technical and professional writing and editing in a workshop environment. May be repeated for a total of 6 credits. Consent of instructor required.

ENGL 578. Topics in Rhetoric and Technology  
3 Credits (3)  
Explores intersections between rhetoric and technology, approaches may highlight theory, media production, and/or research. Repeatable for a maximum of 6 credits. Taught with ENGL 678.

ENGL 579. Computers and Writing  
3 Credits (3)  
This course will trace the history of computers and composition as a field by looking at the work of important scholars including Selfe, Hawisher, Johnson-Eilola, and Wysocki. We will then focus on specific ways new media might be integrated into composition classrooms. The course will include discussions, student facilitations, and experimentation with technologies.

ENGL 580. Graduate Problems in Creative Writing  
3 Credits (3)  
Independent study in creative writing. Consent of instructor required. Repeatable for a total of 9 credits.

ENGL 581. Women's Literature  
3 Credits (3)  
Intensive study of literature by women, in particular historical, aesthetic, cultural, or intellectual contexts. Repeatable under different subtitles.

ENGL 582. Gender and Popular Culture  
3 Credits (3)  
Intensive study of the representations of gender in popular culture. Examines the historical, aesthetic, and cultural contexts of these representation and the various critical and theoretical lenses we use to understand them. Repeatable under different subtitles. Crosslisted with: GNDR 582

ENGL 583. Critical Writing Studies  
3 Credits (3)  
Overview of current and historical approaches to the critical study of gender and language: how gender theoretically manifests in linguistic, social, cultural, academic, and professional contexts.

ENGL 584. Workshop: Advanced Academic Writing for International Students  
3 Credits (3)  
This workshop-based course is for graduate-level multilingual writers from all disciplines who want to improve their English academic writing in an intensive and collaborative environment. Students will propose a major writing project to workshop throughout the semester, such as dissertation, thesis, comprehensive exams, etc. Some of the topics covered will be academic language, cohesion/coherence, organization, and supporting academic arguments. Other topics to be determined by needs of the class. 4.Consent of instructor. 
Prerequisite(s): 1.Be classified as a graduate student by the Graduate School 2.Be classified as an international student whose first language is not English 3.Have a major writing project in progress (comprehensive exams, thesis, dissertation, conference paper, etc.

ENGL 585. Advanced Writing Workshop: RPC Capstone  
3 Credits (3)  
Students work to develop and revise their chosen Master's program Capstone Project (a portfolio, thesis or master essay) in consultation with instructor and classmates. Students provide and receive feedback on their work-in-progress. Consent of Instructor required.

ENGL 589. Cultural Studies: Literature and Theory  
3 Credits (3)  
Examines the theory and practice of cultural studies in relation to the variety of discourse describable as literary, including autobiography, avant-garde writing, nonfiction prose, the essay, online writing, folklore, and popular genre fiction (such as mystery, romance, thriller, or horror). Repeatable under different subtitles. May be repeated up to 6 credits.
ENGL 598. Master's Essay
3 Credits (3)
Students electing the master essay option complete revision of a scholarly essay of 25-30 pages, the approximate length of a journal article, and reformulation of this essay to the 7-8 pages appropriate for presentation at a conference. This option also requires research of appropriate publication venues and a final oral defense of the project. A supervising faculty member will approve the selected essay, guide revision, and help students form an examining committee, which consists of at least two members of the graduate English faculty and one member of the graduate faculty from outside the department. Students are encouraged to undertake the Master Essay process in the first half of their third semester of full time graduate work, or soon after completing 18 hours of course work. This option is the preferred exam option, particularly for those students who intend to pursue Ph.D. study. Consent of instructor required.

ENGL 599. Master's Thesis
1-15 Credits
Thesis.

ENGL 600. Doctoral Research
1-15 Credits
Assigns credit for research performed prior to the doctoral comprehensive examination.

ENGL 601. Qualitative Research
3 Credits (3)
Theory and practice of designing quantitative research studies and of collecting and analyzing data. Emphasis on qualitative methods of research in composition, professional communication, and rhetoric.

ENGL 602. Quantitative Research
3 Credits (3)
Theory and practice of designing quantitative research studies and of collecting and analyzing data. Emphasis on qualitative methods of research in composition, professional communication, and rhetoric.

ENGL 604. Digital Research Methods
3 Credits (3)
This course will serve as one of the core methods courses in the RPC PhD program, focusing on "digital" methods in rhetorical studies. As such, the aim of this class is to help you begin to gain confidence in conducting research in rhetoric, professional communication, and composition using digital methods. In this course we will assume that digital methods in rhetoric take broadly two forms: first, digital methods of acquisition, processing, and presentation of research data. And second, digital methods of production and circulation of rhetorical objects. The former closely resembles the methods of "digital humanities" while the latter will be closer to media archaeology and "critical making" practices. In all cases, we will relate these tools and methods to key questions and theories in our field, asking how and why we might apply digital methods in rhetorical scholarship.

Prerequisite(s): graduate standing.

ENGL 610. Proseminar in Rhetoric and Professional Communication
3 Credits (3)
Introduction to research in rhetoric and professional communication. Required of and limited to students enrolled in the Ph.D. program in Rhetoric and Professional Communication.
ENGL 643. Multimedia Theory and Production  
3 Credits (3)  
Issues, theories, and production practices underlying design of multimedia, including rhetorical choices, aesthetic approaches, usability concerns, and diverse academic and popular discourses contributing to continued development of digital texts. Taught with ENGL 543.

ENGL 649. Graduate Study in Writing  
3 Credits (3)  
Close study of a topic in composition, rhetoric, and/or technical and profession communication. Repeatable for a total of 6 credits.

ENGL 650. Graduate Study in Literacy  
3 Credits (3)  
Studies in literacy theory and literacy research. Topics may vary. Taught with ENGL 550.

ENGL 661. Topics in Writing Program Administration  
3 Credits (3)  
Explores issues, theories, and research underlying writing programs and the administration of writing centers. Repeatable for a maximum of 6 credits. Taught with ENGL 561.

ENGL 664. History and Theory of Composition Studies  
3 Credits (3)  
Studies in the history and theory of composition as a discipline. Taught with ENGL 564.

ENGL 665. Intercultural Rhetoric and Professional Communication  
3 Credits (3)  
Examines rhetorical traditions in intercultural professional, technical, academic, and governmental contexts. Taught with ENGL 565.

ENGL 668. Rhetoric and Cultural Studies  
3 Credits (3)  
Examines intersections between rhetoric and cultural studies. Examines theories and practices of texts and discourses in political and cultural contexts. Taught with ENGL 568.

ENGL 678. Topics in Rhetoric and Technology  
3 Credits (3)  
Explores intersections between rhetoric and technology, approaches may highlight theory, media production, and research. Repeatable for a maximum of 6 credits. Taught with ENGL 578.

ENGL 683. Critical Writing Studies  
3 Credits (3)  
This course investigates the field of Writing Studies as a distinct field of study, related to but not synonymous with Composition Studies. While debates surrounding the relationships among Writing Studies and Composition Studies flourish, this course centers on the former—investigating writing as a practice, process, and object that merits attention in its own right. Such attention will be grounded in contemporary critical and cultural theory that contests writing as a positive or neutral sign (i.e. activity theory, posthumanism, ecocriticism, new materialism, new media studies; feminist, queer, critical race or decolonial theory). Crosslisted with: ENGL 583.  
Prerequisite(s): graduate standing.

ENGL 690. Doctoral Seminar in Rhetoric  
3 Credits (3)  
Studies in theories of and issues in rhetoric. Topics may vary from year to year. Repeatable for a maximum of 9 credits.

ENGL 700. Doctoral Dissertation  
1-15 Credits  
Dissertation.
ENGL 308 Creative Writing: Playwriting
ENGL 309 Screenwriting I

Select two advanced Creative Writing Workshops from the following
(300-level workshops are prerequisites for 400-level workshops in the same genre):
ENGL 413 Advanced Creative Writing: Prose Workshop
ENGL 414 Advanced Creative Writing: Poetry Workshop
ENGL 446 Advanced Creative Writing: Nonfiction Prose

Select two from the following:
ENGL 354 Form and Technique in Fiction
ENGL 356 Form and Technique in Poetry
ENGL 358 Form and Technique in Playwriting

Select 9 additional credits from English courses numbered 400-499.

Second Language Requirement (required- see the section at the bottom of the page)

Electives, to bring the total credits to 120

See the General Education (p. 88) section of the catalog for a full list of courses.

A Mathematics course is required for the degree but students may need to take any prerequisites needed to enter the course first.

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

Students may make 1 or 2 of the following substitutions:
• HNRS 2160G New Testament as Literature for ENGL 2521 The Bible as Literature;
• HNRS 2171G The Worlds of Arthur, or HNRS 2117G The World of the Renaissance: Discovering the Modern for ENGL 2630 British Literature I;

These 18 credits should be completed before the student enrolls in 400 level courses.

Elective credit may vary based on second language requirements, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Second Language Requirement

For the Bachelor of Arts in the English, with a Concentration in Creative Writing, there is a one year second language requirement; the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

Option 1:

Complete one of the following sequences:
CHIN 1110 Mandarin Chinese I
& CHIN 1120 Mandarin Chinese II
4-8
FREN 1110 French I
& FREN 1120 French II
4-8
GRMN 1110 German I
& GRMN 1120 German II
4-8
JAPN 1110 Japanese I
& JAPN 1120 Japanese II
4-8
SPAN 1110 Spanish I
& SPAN 1120 Spanish II
4-8
PORT 1110 Portuguese I
& PORT 1120 Portuguese II
3-6

For Heritage Speakers:
SPAN 1210 Elementary Spanish for Heritage Learners I
& SPAN 1220 Elementary Spanish for Heritage Learners II
3-6
or SPAN 2210 Spanish for Heritage Learners III

Option 2:

Complete the following sequence for American Sign Language (with a C- or better):
SIGN 1110 American Sign Language I
3
SIGN 1120 American Sign Language II
3

Option 3:

Challenge the 1120 level for the following courses:
CHIN 1120 Mandarin Chinese II
4
or FREN 1120 French II
or GRMN 1120 German II
or JAPN 1120 Japanese II
or SPAN 1120 Spanish II

OR

Challenge the 1120/1220/2210 level for the following courses:
PORT 1110 Portuguese I
3
or SPAN 2210 Spanish for Heritage Learners II
or Span 2210 Spanish for Heritage Learners III

Option 4:

Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.

Option 5:

Obtain college certification of completion of three years of a second language at the high school level with a grade of C- or higher in the second-year level.

Option 6:

By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

Option 7:

By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.
Option 8:
In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

A Suggested Plan of Study for Students
This roadmap assumes student placement in MATH 1130G Survey of Mathematics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

1 These courses may have prerequisites and/or co-requisites, and it is the students responsibility for checking and fulfilling all those requirements.
2 See the General Education (p. 88) section of the catalog for a full list of courses.
3 Creative Writing Workshop Courses:
   • ENGL 304 Creative Writing: Prose
   • ENGL 306 Creative Writing: Poetry
   • ENGL 307 Creative Writing: Creative Nonfiction
   • ENGL 308 Creative Writing: Playwriting
   • ENGL 309 Screenwriting
4 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.
Advanced Creative Writing Workshop Courses:
• ENGL 413 Advanced Creative Writing: Prose Workshop
• ENGL 414 Advanced Creative Writing: Poetry Workshop
• ENGL 446 Advanced Creative Writing: Nonfiction Prose

English - Bachelor of Arts

In addition to meeting the English basic skills requirement, the student majoring in English must complete 42 credits in English beyond ENGL 1110G Composition I satisfying the following requirements.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix Title Credits
General Education
Area I: Communications
• English Composition - Level 1 1
• English Composition - Level 2 1
• Oral Communication 1
Area II: Mathematics 1,2
Area III/IV: Laboratory Sciences and Social/Behavioral Sciences 10-11
Area III: Laboratory Sciences Course (4 credits) 1
Area IV: Social/Behavioral Sciences Course (3 credits) 1
Either an Area III/IV: Laboratory Sciences Course or Social/Behavioral Sciences Course (4 or 3 credits) 1
Area V: Humanities 1
Area VI: Creative and Fine Arts 1
General Education Elective 1
3-4
Viewing A Wider World 3

Departmental/College Requirements
ENGL 310 Critical Writing 4 3
Select four from the following: 4,5
ENGL 2310G Introduction to Creative Writing 4
ENGL 2521 The Bible as Literature 5
ENGL 2610 American Literature I 5
ENGL 2620 American Literature II 5
ENGL 2280 History of Argument 5
ENGL 2630 British Literature I 5
ENGL 2640 British Literature II 5
Select one from the following: 4 3
ENGL 301 Theory and Criticism: Rhetoric and Culture 4
ENGL 302 Theory and Criticism: Literature and Culture 4
ENGL 303 Theory and Criticism: Film, Media and Culture 4
Select 6 additional credits from English courses numbered 2996-399.

Students may count 1 or 2 of the following Honors courses towards the requirement of 6 hours of 300-level electives:
• ENGL 392V Mythology 3
• ENGL 393V Comparative Mythology: Myth, Ritual, and the Life Cycle 3

Select 9 additional credits from English courses numbered 400-499.

Second Language Requirement: (required- see the section at the bottom of the page)
Electives, to bring the total credits to 120 7
29-40
Total Credits 120

1
See the General Education (p. 88) section of the catalog for a full list of courses
2
A Mathematics course is required for the degree but students may need to take any prerequisites needed to enter the course first.
3
See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.
4
Students may make 1 or 2 of the following substitutions:
• ENGL 442 Modern and Contemporary American Poetry 3
• ENGL 445 American Literature II 3
• ENGL 446 Advanced Creative Writing: Prose Workshop 3
• ENGL 449 Advanced Study in American Literature 3
• ENGL 458 Latino/a Literature and Culture 3
• ENGL 469 Advanced Study in American Literature 3
Select oe from the following (The following courses may fulfill this requirement at the discretion of the Director of Undergraduate Studies, if their content is primarily American literature: ENGL 422, 423, 445, 481, 489, 500):

ENGL 405 Chaucer 3
ENGL 407 Shakespeare I 3
or ENGL 408 Shakespeare II 3

These 15 credits should be completed before the student enrolls in 400-level courses.

6
Students may not take both ENGL 392V Mythology and ENGL 348V Comparative Mythology: Myth, Ritual, and the Life Cycle.
7
Elective credit may vary based on second language requirements, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Second Language Requirement

For the Bachelor of Arts in the English, with a Concentration in English, there is a one year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

ENGL 445  Postmodern Fiction  
ENGL 453  World Literatures  
ENGL 481  Women’s Literature  
ENGL 489  Cultural Studies: Literature and Theory  

Select 3 additional credits from English courses numbered 400-499.  3

Second Language Requirement: (required- see the section at the bottom of the page)  0-8

Electives, to bring the total credits to 120  7

Total Credits  120

See the General Education (p. 88) section of the catalog for a full list of courses  1

A Mathematics course is required for the degree but students may need to take any prerequisites needed to enter the course first.  2

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.  3

Students may make 1 or 2 of the following substitutions:  
- HNRS 2160G New Testament as Literature for ENGL 2521 The Bible as Literature;  
- HNRS 2171G The Worlds of Arthur, HNRS 2173G Middle Ages, or HNRS 2117G The World of the Renaissance: Discovering the Modern for ENGL 2630 British Literature I;  

These 15 credits should be completed before the student enrolls in 400-level courses.  5

Students may not take both ENGL 392V Mythology and HNRS 348V Comparative Mythology: Myth, Ritual, and the Life Cycle.  6

Elective credit may vary based on second language requirements, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.  7

Second Language Requirement

For the Bachelor of Arts in the English, with a Concentration in Literature, Language and Culture, there is a one year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

Option 1:

Prefix  Title  Credits

Complete one of the following sequences:  
CHIN 1110  Mandarin Chinese I  4
& CHIN 1120  and Mandarin Chinese II  8
FREN 1110  French I  4
& FREN 1120  and French II  8
GRMN 1110  German I  4
& GRMN 1120  and German II  8
JAPN 1110  Japanese I  4
& JAPN 1120  and Japanese II  8
SPAN 1110  Spanish I  4
& SPAN 1120  and Spanish II  8
PORT 1110  Portuguese I  3
& PORT 1120  and Portuguese II  6

For Heritage Speakers:  
SPAN 1210  Elementary Spanish for Heritage Learners I  3
& SPAN 1220  and Spanish for Heritage Learners II  6
or SPAN 2210  Spanish for Heritage Learners III  6

Option 2:

Prefix  Title  Credits

Complete the following sequence for American Sign Language (with a C- or better):  
SIGN 1110  American Sign Language I  3
SIGN 1120  American Sign Language II  3

Option 3:

Prefix  Title  Credits

Challenge the 1120 level for the following courses:  
CHIN 1120  Mandarin Chinese II  4
or FREN 1120  French II  4
or GRMN 1120  German II  4
or JAPN 1120  Japanese II  4
or SPAN 1120  Spanish II  4

OR

Challenge the 1120/1220/2210 level for the following courses:  
PORT 1120  Portuguese II  3
or SPAN 1220  Spanish for Heritage Learners II  3
or SPAN 2210  Spanish for Heritage Learners III  3

Option 4:

Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.

Option 5:

Obtain college certification of completion of three years of a second language at the high school level with a grade of C- or higher in the second-year level.
Option 6:
By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

Option 7:
By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.

Option 8:
In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

A Suggested Plan of Study for Students
This roadmap assumes student placement in MATH 1130G Survey of Mathematics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year

Substitutions Allowed

- HNRS 348V Comparative Mythology: Myth, Ritual, and the Life Cycle

Select two from the following:  
ENGL 405  Chaucer  
ENGL 407  Milton  
ENGL 408  Shakespeare I  
ENGL 409  Shakespeare II  
ENGL 417  Advanced Study in Critical Theory  
ENGL 422  Advanced Study in a Literary Form or Genre  
ENGL 423  Advanced Study in a Major Author  
ENGL 433  Victorian Literature  
ENGL 442  Modern and Contemporary American Poetry  
ENGL 445  Postmodern Fiction  
ENGL 453  World Literatures  
ENGL 458  Latino/a Literature and Culture  
ENGL 469  Advanced Study in American Literature  
ENGL 481  Women's Literature  
ENGL 489  Cultural Studies: Literature and Theory

Medieval and Early Modern Studies - Undergraduate Minor

Students must earn 18 credits from the approved course lists below. At least 9 credits must be upper division. No more than 9 credits may be taken under faculty in any department. Students may request approval for other courses clearly related to Medieval and/or Early Modern Studies from the undergraduate advisor in the Department of English in consultation with faculty in medieval and early modern studies.

Courses are approved for the minor only when their topics are appropriate. Students must seek approval to count these courses for the minor from the undergraduate advisor in the Department of English.

Rhetoric and Professional Communication - Undergraduate Minor

Students not earning a bachelor’s degree in English with a concentration in Rhetoric, Digital Media, and Professional Communication are eligible to pursue a minor in Rhetoric and Professional Communication. Students must earn 18 credits from the approved course lists below. Students may request approval for other courses clearly related to the minor from the undergraduate advisor in the Department of English. Students earning a BA in English must earn at least 6 credits approved by the Department of English undergraduate advisor beyond those earned for the major in order to earn a minor in Rhetoric and Professional Communication.

English - Master of Arts

New Mexico State University offers MA programs in four areas of emphasis; each one requires 33 hours of graduate-level work.

Emphasis: Creative Writing

Students electing this emphasis:

- complete 33 hours of graduate-level course work including creative writing and literature;
- submit a creative writing portfolio (totaling 20-50 pages), depending on genre choices, that includes original creative work in more than one genre and either an essay describing the writer’s personal poetics or a critical piece of writing relevant to the portfolio; and
- pass an oral examination.

Graduate literature courses in the Department of English | 9
Elective courses | 6

In the final term, take one of the following:
- ENGL 574 Workshop: Advanced Writing Prose
- ENGL 575 Workshop: Advanced Writing Poetry
- ENGL 576 Workshop: Advanced Writing Playwriting

Total Credits | 33

Graduate assistants must take 3 hours of ENGL 571 Composition Pedagogy and Practicum, during their first semester of teaching.

**Emphasis: English Studies for Teachers**

Students take 33 hours of graduate coursework, including core courses in creative writing, film, literature and rhetoric and professional communication, as well as additional courses in an area of specialization approved by an advisor. Students in the program develop individualized plans of study in consultation with an advisor. They conclude their program by developing a master's portfolio or other approved capstone project and passing an oral examination. This portfolio may provide material for public schools' Professional Development Dossier. With advisor approval, students may take up to two related courses (six credit hours) in other departments, such as Communication Studies, Education, Journalism, and Theatre, and may also develop an alternative capstone experience and enroll for appropriate credits (such as independent study).

### Prefix | Title | Credits
--- | --- | ---
**Required Coursework**
- Core class in Composition, Rhetoric, and Professional Communication | 3
- Core class in Creative Writing | 3
- Core class in Literature | 3
- Core class in Film | 3
- Courses in core area of specialization | 18-21

Courses typically meeting capstone requirement:
- ENGL 577 Workshop: Advanced Technical and Professional Writing | 3-6

Or Portfolio

**Total Credits** | 33-39

**Emphasis: Literature**

Students electing this emphasis can choose to work in various areas of literature, criticism and film. Students are required to

- complete 33 hours of coursework while satisfying area requirements (in early and modern literatures, in British and American Literatures, and in critical theory) with advisor-approved courses;
- demonstrate competency in a foreign language;
- deliver a public presentation on their research;
- write a master essay or thesis; and
- complete their program by passing an oral examination.

See advisor for list of courses satisfying theory and distribution requirements.

### Prefix | Title | Credits
--- | --- | ---
**Required Coursework**
- Graduate course in critical theory | 3
- Literature courses, including "early" and "late" periods, English and American | 18

**Elective courses in English Department** | 9-12
**Master's Thesis or Master Essay**
- ENGL 599 Master's Thesis | 3-6
- or ENGL 598 Master's Essay

**Total Credits** | 33-39

1 Graduate assistants must take 3 hours of ENGL 571 Composition Pedagogy and Practicum, during their first semester of teaching.

2 Students must take 6 credits of ENGL 599 Master's Thesis to complete this requirement.

**Emphasis: Rhetoric and Professional Communication**

Students electing this emphasis take core courses across a wide range of topics within rhetoric and professional communication and choose from one of four areas of specialization:

- Composition,
- Critical/Cultural Studies,
- Rhetoric and
- Professional and Technical Communication.

Students conclude their program by writing a thesis, composing a portfolio of work completed in the program, or writing a master essay and by passing an oral examination. Students develop individualized plans of study in consultation with an advisor.

### Prefix | Title | Credits
--- | --- | ---
**Required Coursework**
- Methods Course
  - Select one from the following:
    - ENGL 548 Graduate Study in Empirical Research | 3
    - ENGL 601 Qualitative Research
    - ENGL 602 Quantitative Research
    - ENGL 604 Digital Research Methods
- Elective Courses
  - Select one from the following:
    - Advisor-approved electives in English and/or related fields
    - ENGL 597 Internship in Technical and Professional Communication | 3-6

**Capstone Course**
- Select one from the following:
  - ENGL 585 Advanced Writing Workshop: RPC Capstone | 3-6
  - ENGL 598 Master's Essay
  - ENGL 599 Master's Thesis

**Core Courses**
- Select two core courses from area of specialization. | 6
- Select two core courses from any of the other three core areas: | 6

### Core Composition Courses
- ENGL 564 History and Theory of Composition Studies
- ENGL 570 Graduate Study in Approaches to Composition
- ENGL 571 Composition Pedagogy and Practicum | 3
- ENGL 583 Critical Writing Studies

### Core Critical/Cultural Studies Courses
- ENGL 517 Graduate Study in Critical Theory
ENGL 568  Rhetoric and Cultural Studies
ENGL 583  Critical Writing Studies

Core Professional and Technical Communication Courses
ENGL 502  Critical Conversations in Technical and Professional Communication
ENGL 512  Graduate Study in Writing in the Workplace
ENGL 543  Multimedia Theory and Production
ENGL 572  Technical-Professional Communication Pedagogies

Core Rhetoric Courses
ENGL 518  History of Rhetoric
ENGL 519  Graduate Study in Modern Rhetorical Theory
ENGL 568  Rhetoric and Cultural Studies

Specialized Courses
Select four additional courses in area of specialization determined in consultation with an advisor. 12

Composition Courses
ENGL 549  Graduate Study in Writing
ENGL 550  Graduate Study in Literacy
ENGL 561  Topics in Writing Program Administration

Critical/Cultural Studies Courses
ENGL 549  Graduate Study in Writing
ENGL 550  Graduate Study in Literacy
ENGL 555  Graduate Study in Rhetoric of Scientific Literature
ENGL 590  Master’s Seminar in Rhetoric

Professional and Technical Communication Courses
ENGL 478  Document Design
ENGL 503  Web Design and Development
ENGL 504  User Experience and Assistance
ENGL 531  Technical Editing
ENGL 543  Multimedia Theory and Production
ENGL 549  Graduate Study in Writing
ENGL 560  Proposal and Grant Writing
ENGL 565  Intercultural Rhetoric and Professional Communication
ENGL 577  Workshop: Advanced Technical and Professional Writing
ENGL 578  Topics in Rhetoric and Technology

Rhetoric Courses
ENGL 549  Graduate Study in Writing
ENGL 555  Graduate Study in Rhetoric of Scientific Literature
ENGL 590  Master’s Seminar in Rhetoric

Total Credits 33-39

1 Students must take 6 credits of ENGL 599 Master’s Thesis to complete this requirement. ENGL 599 Master’s Thesis: in lieu of portfolio or master essay.

2 Graduate assistants must take 3 hours of ENGL 571 Composition Pedagogy and Practicum, during their first semester of teaching.

3 Students may take either ENGL 570 Graduate Study in Approaches to Composition or ENGL 571 Composition Pedagogy and Practicum as a core course. Taking a second course will count under the area of specialization.

4 Students are encouraged to take ENGL 510 Proseminar in Rhetoric and Professional Communication, early in their time as a graduate student. This course is appropriate for all areas of specialization. Appropriate courses for each specialization are suggested, though the lists are not inclusive of all options (for example, students may take additional core courses as part of their specialization).

English (Technical and Professional Communication) - Master of Arts (Online)

Students electing this concentration take core courses in the theory, praxis, and application of technical and professional communication. All courses are offered online.

Students conclude their program by composing a portfolio of work completed in the program and by passing an oral examination.

Prefix  Title  Credits
ENGL 502  Critical Conversations in Technical and Professional Communication 3
ENGL 597  Internship in Technical and Professional Communication 3
ENGL 585  Advanced Writing Workshop: RPC Capstone 3

Technical and Professional Communication Core
Select six courses from the following 18
ENGL 478  Document Design
ENGL 503  Web Design and Development
ENGL 504  User Experience and Assistance
ENGL 512  Graduate Study in Writing in the Workplace
ENGL 531  Technical Editing
ENGL 543  Multimedia Theory and Production
ENGL 560  Proposal and Grant Writing

Rhetoric Core
Select three courses from the following 9
ENGL 507  Special Topics in Rhetoric and Technical and Professional Communication
ENGL 518  History of Rhetoric
ENGL 519  Graduate Study in Modern Rhetorical Theory
ENGL 568  Rhetoric and Cultural Studies
ENGL 578  Topics in Rhetoric and Technology
ENGL 590  Master’s Seminar in Rhetoric

Total Credits 36

Creative Writing - Master of Fine Arts

Students pursuing the MFA in Creative Writing devote themselves to concentrated study and development of a chosen genre: poetry or fiction. Students

- complete 54 hours of graduate-level coursework,
- present a book-length thesis of original work with an introduction or afterward,
- perform a public reading from the thesis, and
- pass an oral examination in the final semester.
A maximum of 12 credits in Form and Technique count for the degree.

1. Graduate assistants must take 3 hours of ENGL 571 Composition Pedagogy and Practicum, during their first semester of teaching.
2. 3 hours of ENGL 592 Master’s Theory, Practice, and Profession must be taken concurrently with 3 hours of ENGL 594 Master’s Workshop in each of the final two semesters of the program.
3. 3 hours of ENGL 599 Master’s Thesis must be taken in the final semester.

**Rhetoric and Professional Communication - Doctor of Philosophy**

An MA is required for admission to the PhD program. Students in the doctoral program will develop individualized plans of study in consultation with advisors. Students are required to take

- 60 hours of graduate-level coursework including the doctoral proseminar in the first semester;
- courses in research methods;
- core courses in composition, professional and technical communication, and rhetoric;
- additional coursework in an area of specialization determined in consultation with an advisor;
- an internship; and
- a dissertation.

The Ph.D. also requires a qualifying portfolio, a comprehensive examination and an oral examination. The dissertation must be completed and approved within 5 years after the comprehensive exam. Consult the department for additional instructions regarding the internship, qualifying comprehensive examinations, portfolio and dissertation.

</tr>
</tbody>
</table>

1. Graduate assistants must take 3 hours of ENGL 571 Composition Pedagogy and Practicum, during their first semester of teaching.
2. Students define their specialized area, a coherent set of related courses drawn from both inside and outside the Department of English, in consultation with their doctoral committee. Possible specializations include Border Rhetorics and Cultures; Writing Program Administration/ Writing Center Administration; Assessment; Pedagogy; Literacy Studies; Identity and Political and Social Rhetoric; New Media Rhetoric and Design; Intercultural Rhetorics; Writing Across the Curriculum; Workplace Communication; and the Rhetoric of Science. Up to 6 hours may be taken outside of English.

**Transfer Courses (18 credits)**

In consultation with an advisor and the Doctoral Committee, courses taken at the Master’s level can be used to waive specific area requirements in the PhD, but this will not reduce the minimum number of credits required.

**Financial Support**

Students are eligible for teaching assistantships and a variety of positions that involve writing around campus and the community. Because many students work full time, many courses are offered in the late afternoon and evening to accommodate various schedules.

**Application Information**

Please refer to the online application process described on the NMSU Admissions website for specific instructions for each program.
Geography

Undergraduate Program Information

The Geography Program emphasizes the interaction of humans with the environment, and the program prepares students for professional positions in the public and private sectors, as well as for graduate work. The Department offers two concentrations for the major:

- The Geographic Information Science and Technology (GIS&T) Concentration emphasizes the acquisition of knowledge and skills in geographic information systems and remote sensing tools and concepts;
- The Human-Environment Relationships (HER) Concentration focuses on the analysis and interpretation of the coupled and complex interactions between people and the environment.

As detailed above, the Department also offers minors in Geography and GIS&T. The requirements for teaching fields in earth sciences are listed under the Department of Curriculum and Instruction in the College of Education.

Note: A grade of "C-" or better is required for all courses taken for the major. Students may not take any of these courses S/U.

Graduate Program Information

The Department of Geography offers graduate study leading to the Master of Applied Geography degree and to a Doctor of Philosophy in Geography Degree. Our programs focus on the use of geographic perspectives and tools to examine an array of applied research questions related to land-use change, natural resources, biogeography, desertification, landscape conservation, and urban and transportation planning. A minor in Geographic Information Science and Technology (GIS & T) is also available for all graduate students, regardless of major; details are provided above. Admission to the program is in accordance with the general regulations of the Graduate School. Any applicant who does not have an adequate undergraduate background in geography will be required to make up the deficiencies. Doctoral applicants should have a master's degree in Geography or a closely related field. GRE scores are required for doctoral applicants. Applicants must submit three letters of recommendation and a formal statement of intent to the Department as part of the application process. Please contact Dr. Michaela Buenemann, Geography Graduate Director (elabuen@nmsu.edu) if you have any questions about the program.

The Department is also a participant in the Western Regional Graduate Program (WRGP) supported by the Western Interstate Commission for Higher Education (WICHE). The WRGP is a tuition-reciprocity arrangement that enables students that are legal residents in WICHE states (Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming) to attend NMSU and pay the resident tuition rate, instead of the nonresident rate that an out-of-state student would normally pay.

The Department of Geography has a contract research laboratory (Spatial Applications Research Center-SPARC) and a state-of-the-art computer teaching laboratory, both of which support the full suite of ESRI and ENVI geospatial analytical software. In addition, a hand-held spectroradiometer and 2 UAV’s provide precise data collection at varying electromagnetic and spatial resolutions. The SPARC laboratory employs graduate students who work with local and state governments and research agencies, as well as with businesses on applied geography projects. Our teaching laboratory includes 18 workstations to support graduate students engaged in course work and research projects. The Department has good working relationships with the Water Resources Research Institute, the Jornada Experimental Range, the Physical Sciences Laboratory, and other units on campus. The Department has its own field equipment and field vehicle, which graduate students can use to support their thesis research. The potential for financial support exists for graduate students in Geography through teaching assistantships and research assistantships. Inquiries regarding the program and assistantships should be directed to Dr. Michaela Buenemann, Geography Graduate Director (elabuen@nmsu.edu). Financial aid questions should be addressed to the Office of Financial Aid at NMSU.

Degrees for the Department

Bachelor Degree(s)

Geography (Geographic Information Science & Tech)- Bachelor of Science (p. 559)

Doctoral Degree(s)

Geography - Doctor of Philosophy (p. 566)

Minors for the Department

Undergraduate

Geography - Undergraduate Minor (p. 566)

Geographic Information Science and Technology - Undergraduate Minor (p. 565)

Graduate

Geographic Information Science and Technology - Graduate Minor (p. 567)

Associate Professor, Carol Campbell, Department Head

Professors Brown Associate Professors Buenemann, Campbell; Assistant Professors Dugas, Magrane, Professor Emeritus Czerniak, DeMers, Wright

C. P. Brown, Ph.D., (California-Santa Barbara/San Diego State) – geographic information systems, water resources, U.S. Mexico border environmental issues; M. Buenemann, Ph.D. (Oklahoma) – geographic information science and technology, land change science, drylands; C. L. Campbell, Department Head, Ph.D. (UCLA) – biogeography, landscape ecology, remote sensing, sustainability; D. Dugas, Ph.D. (Oregon) – geomorphology, physical geography; E. Magrane, Ph.D. (U of Arizona) – cultural geography and creativity, human-environment geography, geopoetics, art & environment.

Emeritus Faculty – R. J. Czerniak, Ph.D. (Colorado-Boulder) – land use and transportation planning, Europe, urban geography; M. N. DeMers, Ph.D. (Kansas) – geographic information science, landscape ecology, geographic education.; J. B. Wright, Ph.D. (California-Berkeley) – environmental conservation, cultural geography, American West.
**Geography Courses**

**GEOG 1110G. Physical Geography**

4 Credits (3+3P)

This course introduces the physical elements of world geography through the study of climate and weather, vegetation, soils, plate tectonics, and the various types of landforms as well as the environmental cycles and the distributions of these components and their significance to humans.

**Learning Outcomes**

1. Define, describe, illustrate, distinguish among or explain the use of maps, map scale, globes, map projections, and remote sensing.
2. Define, describe, illustrate, distinguish among or explain the various elements of the earth's atmosphere, earth's relation to the sun, incoming solar radiation, the ozone layer, the primary temperature controls, and the unequal heating of land and water.
3. Define, describe, illustrate, distinguish among or explain the weather makers (air temperature, air pressure, humidity, clouds, precipitation, visibility, and wind [including pressure gradient, the Coriolis force, and friction]).
4. Define, describe, illustrate, distinguish among or explain air masses, pressure systems, the various fronts and associated types of storms, weather symbols, monsoons, the various forms of precipitation, along with causes and effects of lightning.
5. Define, describe, illustrate or explain the hydrologic cycle, the characteristics and influences of the oceans and continents on the weather, the Southern Oscillation (i.e., El Nino), the effects of land/water distribution, and climates and their global distribution.
6. Define, describe, illustrate or explain the biosphere, including organisms (flora and fauna), food chains, ecosystems and relationships. Define, describe, illustrate or explain soils in terms of soil-forming processes, components, properties, and classification.
7. Define, describe, illustrate or explain the structure of the earth, the internal processes, weathering and mass wasting, fluvial processes, characteristics and processes of arid regions, processes of coastal and Karst topographical regions, the processes and characteristics of glaciation (mountainous and continental).
8. Define, describe, illustrate, distinguish among or explain specific impacts by humans on weather, climate, and on the ecosystem at large.
9. Perform tests and collect data to analyze and classify weather, climate and landforms characteristics, processes, and impacts both quantitatively and quantitatively. This includes reading and extracting basic information from maps, diagrams, remote sensing devices, graphs, and tables.
10. Apply critical thinking skills such as inductive, deductive, and mathematical reasoning to solve problems using the scientific method. This includes interpreting maps, graphs and photos.
11. Recognize and discuss the effect of human activity on climate, climate change, the greenhouse effect, and on landforms at large.
12. Synthesize information from external, current sources and personal observations and discuss their relationships to class material.

**GEOG 1120G. World Regional Geography**

3 Credits (3)

Overview of the physical geography, natural resources, cultural landscapes, and current problems of the world's major regions. Students will also examine current events at a variety of geographic scales.

**Learning Outcomes**

1. Identify, describe, illustrate, distinguish among or explain the basic concepts of geography, the major world regions, areal differences and similarities, the processes that shape geography natural and human, the use of maps, and the key topics of geographical interpretation (e.g., location, world importance, population, political status, resources, etc.).
2. Identify, describe, illustrate, distinguish among or explain the regional groups of Europe, its historical background, its languages and religions, major features, the diversified economy, political structures, and impact on globalization.
3. Identify, describe, illustrate, distinguish among or explain the regional groups of Russia and its satellite nations, its historical background, their languages and religions, major features, their diversified economies, political structures, current problems, and impact on globalization.
4. Identify, describe, illustrate or explain the regional nations of Middle East, their historical background, their languages and religions, the major features, the diversified economies and political structures, the current problems.
5. Identify, describe, illustrate, distinguish among or explain the regional groups of Asia, their historical background its languages and religions, major features, the diversified economies and political structures, current problems, and impact on globalization.
6. Identify, describe, illustrate, distinguish among or explain the regional groups of the Pacific World, their historical background its languages and religions, major features, the diversified economy and political structures, current problems, and impact on globalization.
7. Identify, describe, illustrate, distinguish among or explain the regional groups of Africa, their historical background its languages and religions, major features, the diversified economy and political structures, current problems, and impact on globalization.
8. Identify, describe, illustrate, distinguish among or explain the regional groups of Latin America, their historical background its languages and religions, major features, the diversified economy and political structures, current problems, and impact on globalization.
9. Identify, describe, illustrate, distinguish among or explain the regional groups of Anglo-America, their historical background its languages and religions, major features, the diversified economy and political structures, current problems, and impact on globalization.
10. Collect data to analyze or classify the region various historical developments and trends relating to globalization
11. Apply critical thinking skills in predicting future developments and impacts in economics, cultural diversity, and political stability globally.
12. Recognize and discuss current political "hot-spots," their causes, and potential results with regards to globalization.
13. Synthesize information the data into a comprehensive world-view.
GEOG 1130G. Human Geography
3 Credits (3)
This course serves as an introduction to the study of human geography. Human geography examines the dynamic and often complex relationships that exist between people as members of particular cultural groups and the geographical "spaces" and "places" in which they exist over time and the world today.

Learning Outcomes
1. Locate on maps, globes, and other technologies various geo-political spaces and places around the world, including in the United States.
2. Describe the primary concepts, theories, methods and terms prevalent in the field of human geography.
3. Apply core geographic concepts to the spatial patterns demonstrated in real-world scenarios.
4. Identify the relationships that influence human-environment interaction in a specific location at a specific time.
5. Define and utilize key concepts to explain human social and cultural change over time and across geographical space.
6. Explain the geographic context of a current event or conflict.
7. Identify a current event that illustrates a core cultural geographic concept.
8. Think critically, discuss, and write about the relationships of the natural world to human geography.

GEOG 2130. Map Use and Analysis
3 Credits (2+3P)
Exploration of the cartographic medium. Development of critical map analysis and interpretation skills, and map literacy. Comprised of traditional lecture, labs, and map use projects.

Learning Outcomes
1. Accurately measure bearings and distances on maps.
2. Read and interpret terrain and landform representation.
3. Utilize a magnetic compass for basic land navigation and basic map making.
4. Utilize a GPS instrument for basic land navigation.
5. Recognize and describe basic physical and cultural spatial patterns portrayed on maps.
6. Analyze and interpret the significance of spatial patterns portrayed on maps.
7. Perform elementary spatial statistical analysis on geographic data.
8. Appreciate and utilize the significance of place names and cultural patterns.
9. Critically examine maps for evidence of information misuse or propagandist motives.
10. Recognize and utilize appropriate map categories, symbols, projections, and coordinate systems to effectively and accurately portray, read, analyze, and interpret geographic data.

GEOG 2996. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Learning Outcomes
1. Varies

GEOG 315V. World Agriculture and Food Problems
3 Credits (3)
Survey of food and agricultural issues in the U.S. and other countries. Covers: role of agriculture in economic development; trade in food and agricultural products; global food production, consumption, and marketing patterns; economics of technical change and food assistance; agriculture and the environment. Same as AEEC 315V.

GEOG 325V. New Mexico and the American West
3 Credits (3)
Examination of the cultural and historical patterns, economic activities, and physical characteristics of New Mexico and the American West. Special focus is given to human, environmental, and cultural landscapes, as well as current issues and challenges in New Mexico, the West, and the border region.

GEOG 326. U.S. National Parks
3 Credits (3)
Exploration of origins, landscapes, ecosystems, management issues, and conflicts in U.S. National Parks. The regional geography of the United States as seen through the creation and protection of biologically and culturally significant lands.

GEOG 328V. Geography of Latin America
3 Credits (3)
Explores Latin America from a geographical perspective, integrating environmental, cultural and socioeconomic factors in an in-depth study of the development of the region and contemporary issues and challenges facing the region. Special focus is given to examining applied problems facing Latin America at a range of scales.

GEOG 331V. Europe
3 Credits (3)
Focus on the cultural continent of Europe. An overview of climate, physical geography, and human geography of Europe, including a brief historical geography of the continent. Current environmental, social, and political issues of Europe will be discussed, with a particular focus on the fates of EU.

GEOG 351. Fundamentals of Biogeography
3 Credits (3)
Survey of food and agricultural issues in the U.S. and other countries. Covers: role of agriculture in economic development; trade in food and agricultural products; global food production, consumption, and marketing patterns; economics of technical change and food assistance; agriculture and the environment. Same as AEEC 315V.

GEOG 353. Geomorphology
3 Credits (2+3P)
Examination of the principle theories and concepts of landform creation; exploration of the roles of structure, processes, climate, and time in the formation of various types of landforms. Taught with GEOG 553. Crosslisted with: GEOL 353.

GEOG 357. Climatology
3 Credits (3)
Elements and controls of climate. Energy and hydrologic cycles, general circulation, climate classification, distribution of climate types, microscale effects, applications.

Learning Outcomes
1. Students will be able to describe the fundamental processes that create climate on Earth. Students will be able to describe the physical laws that comprise the climate system. Students will be able to describe the trends in Earth’s climate system. Students will be able to summarize our current knowledge of climate change.
GEOG 361V. Economic Geography
3 Credits (3)
The geographic relationships of supply and demand resources, population, and transportation. Site analysis and decision-making in different economic systems and cultures and how these decisions affect the environment and the location of economic activities.

GEOG 363V. Cultural Geography
3 Credits (3)
The world’s diverse cultural landscapes. Emphasis on the connections between social, political, religious, and agricultural patterns and the impact of societies on the natural environment.

GEOG 365V. Urban Geography
3 Credits (3)
The global historical development of urban areas, as well as the changing functions of today’s cities. A comparison between the North American city system and cities in Europe, Asia, and South America, including the development of the city form, the internal spatial organization of commercial, residential, and industrial areas, and socioeconomic and political factors.

GEOG 373. Introduction to Remote Sensing
4 Credits (3+3P)
Introduction to the theory, techniques, and applications of remote sensing. Topics include electromagnetic radiation; remote sensing systems; remote sensing of the biosphere, hydrosphere, atmosphere, lithosphere, and cultural landscapes. Course includes lectures and labs focused on the basic analysis and interpretation of remote sensing products. Taught with GEOG 573.

GEOG 381. Cartography and Geographic Information Systems
4 Credits (3+3P)

GEOG 401. Internship/Co-op
1-3 Credits (1-3)
Provides an opportunity whereby students work with a local, regional, or federal agency, or private sector firm on applied geographic work, under the supervision of an agency or firm professional and a geography faculty member. Consent of instructor required.

GEOG 435. Environmental Planning
3 Credits (3)
Exploration of planning tools that advance the management of land and water resources, meeting current societal needs, while also minimizing damage to nature and society. Class activities include applied exercises that explore contemporary planning issues, including land conservation, natural hazards, biophysical analysis, water resource management, Federal land issues, and remediation of Superfund sites. Taught with GEOG 535.

GEOG 441. System Design for Geographic Information Science (GIS)
3 Credits (3)
A critical aspect of GIS is its ability to provide the necessary products within the organization within which it is implemented. This is an in-depth analysis of currently accepted system design methodologies intended to create a successful implementation of GIS inside organizations. Crosslisted with: GEOG 581.

GEOG 452. Landscape Ecology
4 Credits (3+2P)
Analysis of the structure, function and change of natural and anthropogenic landscapes. Patches, corridors, matrix and network, spatial organization, landscape dynamics, and role of disturbance in overall functioning of landscapes. Role of landscape heterogeneity in landscape management. Crosslisted with: GEOG 552.

GEOG 455. Southwest Environments
3 Credits (3)
The U.S. Southwest: physical and human geography, coupled human-environment interactions, causes and consequences of environmental issues, and implications for sustainable development. Taught with GEOG 555.

GEOG 457. Transportation Geography
3 Credits (3)
Nature and distribution of land, air and water transport facilities and their importance in regional development.

Learning Outcomes
1. Develop familiarity with various transportation theories and concepts. Demonstrate accurate use and application of terms and vocabulary used in the transportation field. Understand and demonstrate familiarity with concepts of urban, inter-urban and rural transport systems. Be able to describe and organize bulk and international Multimodal freight patterns and processes. Demonstrate familiarity and application of transportation laws, rules and regulations at the national and international level.

GEOG 473. Advanced Remote Sensing
4 Credits (3+3P)
Introduction to advanced topics in digital image processing, analysis, interpretation, and visualization. Topics include geometric and radiometric correction, image enhancement, image classification, change detection, and accuracy assessment. Lectures focus on the discussion of advanced remote sensing concepts, techniques, and applications; labs are applications-oriented. Taught with GEOG 573.

Prerequisite(s): C- or better in GEOG 373.

GEOG 481. Fundamentals of Geographic Information Science (GIS)
4 Credits (3+3P)
Fundamentals of computer-based systems which organize, analyze, and present spatially referenced data. Crosslisted with: GEOG 578.

GEOG 482. Geodatabase Design
3 Credits (2+3P)
A practical introduction to designing geodatabases. The course takes you through the eleven steps of geodatabase design divided into four stages: thematic characterization; developing the database elements, relationships and properties; capture and collection; and finally, implementation and documentation. Taught with GEOG 572.

Prerequisite(s): C- or better in GEOG 481.

GEOG 483. Field Explorations in Geography
3 Credits (6P)
A field-based class where students complete exercises in physical, human, and environmental geography in the Southwest. May be offered as a two-week intensive class where students are away from Las Cruces and camping; or may be offered with weekend field trips depending on the instructor. A lab fee for transportation and other expenses is required. Taught with GEOG 583.
GEOG 488. GIS and Water Resources
3 Credits (3)
Explores a range of GIS tools, routines, and data structures and then applies them to a range of research questions and management issues in the area of Water Resources. The class has both a lecture and laboratory component, and students will have opportunities to explore a range of GIS tools in formal lab exercises and a project in the student area of interest. Taught with GEOG 588.

GEOG 491. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

GEOG 493. Special Problem Research
1-3 Credits
For advanced and exceptional students. Research, and preparation of a paper in some phase of geography. A maximum of 6 credits may be earned. Consent of instructor required.

GEOG 495. Directed Readings
1-3 Credits
Individual study through selected readings. A maximum of 6 credits may be earned. Consent of instructor required.

GEOG 501. Research Design and History of Geographic Thought
3 Credits (3)
Understanding and application of the research process, including conceptualization and definition of a research problem, study designs, data sources, data collection, and report writing in development of geographic thought.

GEOG 535. Environmental Planning
3 Credits (3)
Exploration of planning tools that advance the management of land and water resources, meeting current societal needs, while also minimizing damage to nature and society. Class activities include applied exercises that explore contemporary planning issues, including land conservation, natural hazards, biophysical analysis, water resource management, Federal land issues, and remediation of Superfund sites. Taught with GEOG 435.

GEOG 552. Landscape Ecology
4 Credits (3+2P)
Analysis of the structure, function and change of natural and anthropogenic landscapes. Patches, corridors, matrix and network, spatial organization, landscape dynamics, and role of disturbance in overall functioning of landscapes. Role of landscape heterogeneity in landscape management. Taught with GEOG 452.

GEOG 553. Geomorphology
3 Credits (2+3P)
Examination of the principle theories and concepts of landform creation; exploration of the roles of structure, processes, climate, and time in the formation of various types of landforms. Taught with GEOG 353.

GEOG 557. Fundamentals of Biogeography
3 Credits (3)
Exploration of life in space and time. Floristic and physiognomic characteristics of the Earth’s major ecosystems and their distributions; ecosystem dynamics, evolution, and physical environment. Includes an individual research project resulting in a poster presentation. Additional work for graduate students. Crosslisted with: GEOG 351.

GEOG 571. Cartography and Geographic Information Systems
4 Credits (3+3P)
Graduate level design and construction of thematic maps. Introduction to cartographic principles in lecture. Emphasis on map-making using GIS software in the labs. Taught with GEOG 381.

GEOG 572. Geodatabase Design
3 Credits (2+3P)
Graduate level introduction to designing geodatabases. The course takes you through the eleven steps of geodatabase design divided into four stages: thematic characterization; developing the database elements, relationships and properties; capture and collection; and finally implementation and documentation. Taught with GEOG 482.

GEOG 573. Introduction to Remote Sensing
4 Credits (3+3P)
Graduate level introduction to the theory, techniques, and applications of remote sensing. Topics include electromagnetic radiation; remote sensing systems; remote sensing of the biosphere, hydrosphere, atmosphere, lithosphere, and cultural landscapes. Course includes lectures and also labs focused on the basic analysis and interpretation of remote sensing product. Taught with GEOG 373.

GEOG 578. Fundamentals of Geographic Information Science (GIS)
4 Credits (3+3P)
Graduate level fundamentals of computer-based systems which organize, analyze, and present spatially referenced data. Additional work for graduate students. Crosslisted with: GEOG 481.

GEOG 581. System Design for Geographic Information Science (GIS)
3 Credits (3)
A critical aspect of GIS is its ability to provide the necessary products within the organization within which it is implemented. This is an in-depth analysis of currently accepted planning methodologies designed to create a successful implementation of GIS inside organizations. Taught with GEOG 441.

GEOG 582. Advanced Remote Sensing
4 Credits (3+3P)
Graduate level introduction to advanced topics in digital image processing, analysis, interpretation, and visualization. Topics include geometric and radiometric correction, image enhancement, image classification, change detection, and accuracy assessment. Lectures focus on the discussion of advanced remote sensing concepts, techniques, and applications; labs are applications-oriented. May be repeated up to 4 credits.

GEOG 583. Field Explorations in Geography
3 Credits (6P)
A graduate level field-based class where students complete exercises in physical, cultural, and environmental geography in the Southwest. May be offered as a two-week intensive class where students are away from Las Cruces and camping; or may be offered with weekend field trips depending on the instructor. A lab fee for transportation and other expenses is required. May be repeated up to 3 credits.
GEOG 585. Advanced Spatial Analysis
3 Credits (3+2P)
Introduction to basic spatial and aspatial descriptive statistics, statistical analysis of point and area patterns, critical review of quantitative research in geography, and exploration of advanced spatial analysis routines including cluster analysis, hot/cold spot analysis, and spatially weighted regression.
Prerequisite(s): Knowledge of basic statistics recommended.

GEOG 588. GIS and Water Resources
3 Credits (3)
This is a graduate level class that explores a range of GIS tools, routines, and data structures and then applies them to a range of research questions and management issues in the area of Water Resources. The class has both a lecture and laboratory component, and students will have opportunities to explore a range of GIS tools in formal lab exercises and a project in the student's area of interest. Taught with GEOG 488.

GEOG 595. Directed Readings
1-3 Credits
Advanced individual study through selected readings. May be repeated for a maximum of 6 credits.

GEOG 596. Residency
1-12 Credits (1-12)
A contractual learning experience in the public or private sector under the supervision of a field supervisor and two faculty members. May be repeated up to 12 credits. Consent of Instructor required. Restricted to: Geography majors.

GEOG 598. Selected Topics
1-3 Credits
Readings, discussions, lectures or laboratory studies of selected geographic themes. May be repeated for unlimited credit.

GEOG 599. Master's Thesis
1-12 Credits (1-12)
Supervised individual study of a student's thesis topic. May be repeated for an unlimited number of credits. Thesis/Dissertation Grading.

GEOG 601. Introduction to Geographic Theory & Application
3 Credits (3)
This course is intended to introduce Ph.D. and Masters level students to the history, theory, methods, and contemporary literature of Geography as a discipline. It also serves to prepare incoming students to engage in an integrative, theoretically informed and applied research project. Crosslisted with: GEOG 501.

Learning Outcomes
1. Students will be able to demonstrate a clear understanding of multiple themes and topics in Geography. Students will be able to demonstrate a clear understanding of multiple methods suitable for geographic research. Students will be able to identify and summarize recent scholarship relevant to the student's own research interests. Students will be able to communicate clearly and effectively in an oral format. Students will be able to communicate clearly and effectively in a written format. Students will be able to identify a committee chairperson who will guide her or his graduate work. Students will be able to design an integrative program of studies for the remainder of her or his graduate work.

GEOG 602. INTEGRATIVE RESEARCH DESIGN
3 Credits (3)
This seminar focuses on the basic elements of research design, guiding students through the development of a formal proposal for original academic research. This course should be taken after GEOG 601 as part of the required course sequence for PhD students in Geography.
Prerequisite(s): GEOG 601.

GEOG 603. Professional Geographic Practice
3 Credits (3)
This core course focuses on a variety of professional development topics that prepare students for teaching and applied community engagement projects. All students in this course will receive training in professional communication, professional ethics, and grant proposal writing. Depending on their individual professional goals, the course will allow students to undertake practical training in a variety of areas that range from academic teaching to applied policy work to scientific communication. All students in the joint doctoral program are expected to engage in applied projects as part of their research design, and this course will lay the foundation for these pursuits. Unlike GEOG 601 and GEOG 602, the final core course will be taught independently on each campus, to maximize the potential for faculty-student interaction on specific location-based project planning. This course will be offered every fall semester.
Prerequisite: GEOG 602.

Learning Outcomes
1. Identify professional geography as it relates to project management. Explore professional communication in various settings in a variety of workplace settings.

GEOG 700. Doctoral Dissertation
1-18 Credits (1-18)
This highly individualized independent study course is for students who have completed their comprehensive exams and are currently working on their doctoral dissertation. May be repeated up to 18 credits. Thesis/Dissertation Grading.

Learning Outcomes
1. Expand their knowledge in a specific area of interest in the discipline of geography.
2. Develop their skills in analyzing, synthesizing, and interpreting geographic data and information.
3. Develop their skills in technical and/or professional writing.
4. Develop their skills in the management and completion of a professional research project.

Geography (Geographic Information Science & Tech) - Bachelor of Science

The Geographic Information Science and Technology (GIS&T) Concentration offers a solid foundation in geographic thought and human and physical geography, and provides students with advanced knowledge and skills in spatial analysis and modeling through the use of geographic
information systems and remote sensing tools and concepts. Preparation for advanced studies is also provided.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

- MATH 1430G Applications of Calculus I or MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1430G or MATH 1511G first.
- A ST 311 Statistical Applications is also an acceptable course to meet the departments Statistics course requirement, however it will not satisfy the General Education (GE) Elective requirement. If a student takes A ST 311 Statistical Applications, they will need to take an additional General Education course to complete the GE Elective requirement.
- Select either one Physical Geography (PG) class and two Human Geography (HG) classes, OR two Physical Geography (PG) classes and one Human Geography (HG) class.
- Courses that have the "V" distinction and are a Human Geography or Human-Environment Geography course will not count towards both the Viewing a Wider World and Human Geography or Human-Environment Geography requirements.
- Elective credit may vary based on General Education course selection, second language requirements, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

**Second Language Requirement**

For the Bachelor of Science in the Geography with a Concentration in GIS&T there is a one year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which
New Mexico State University - Las Cruces

Option 1:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>

<td>3-6</td>
</tr>
<tr>
<td>or SPAN 2210</td>
<td>Spanish for Heritage Learners III</td>
<td></td>
</tr>
</tbody>
</table>

Option 2:

Complete 6 additional upper-division Geography courses (beyond major requirements)

Option 3:

Complete the following sequence for American Sign Language (with a C- or better):

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SIGN 1110</td>
<td>American Sign Language I</td>
<td>3</td>
</tr>
<tr>
<td>SIGN 1120</td>
<td>American Sign Language II</td>
<td>3</td>
</tr>
</tbody>
</table>

Option 4:

Challenge the 1120 level for the following courses:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHIN 1120</td>
<td>Mandarin Chinese II</td>
<td>4</td>
</tr>
<tr>
<td>or FREN 1120</td>
<td>French II</td>
<td></td>
</tr>
<tr>
<td>or GRMN 1120</td>

</table>

OR

Challenge the 1120/1220/2210 level for the following courses:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PORT 1120</td>
<td>Portuguese II</td>
<td>3</td>
</tr>
<tr>
<td>or SPAN 1220</td>
<td>Spanish for Heritage Learners II</td>
<td></td>
</tr>
<tr>
<td>or SPAN 2210</td>
<td>Spanish for Heritage Learners III</td>
<td></td>
</tr>
</tbody>
</table>

Option 5:

Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.

Option 6:

Obtain college certification of completion of three years of a second language at the high school level with a grade of C- or higher in the second-year level.

Option 7:

By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

Option 8:

By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.

Option 9:

In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1430G Applications of Calculus I or MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

**Total Credits**: 120-127

---

1. See the General Education (p. 88) section of the catalog for a full list of courses.

2. Elective credit may vary based on General Education course selection, second language requirements, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

3. Math Placement: MATH 1220G College Algebra or MATH 1350G

4. Introduction to Statistics or MATH 2350G Statistical Methods is the starting Math course for the degree, however, students may need to complete any prerequisites prior to enrolling into one of these courses.

5. Students should take courses to either complete the two semester Second Language Requirements with either Option 1 or Option 2 (see the requirements tab (p. 559) for this degree, the Second Language section)

6. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

7. Students must have 9 credits total between Human Geography and Physical Geography courses. The requirement must be completed with either two Human Geography and one Physical Geography course(s) OR with one Human Geography and two Physical Geography course(s).

*students cannot take all nine credits in one area.

**Human Geography Courses**: GEOG 361V Economic Geography, GEOG 363V Cultural Geography, GEOG 365V Urban Geography, GEOG 467 Transportation Geography

**Physical Geography Courses**: GEOG 351 Fundamentals of Biogeography, GEOG 353 Geomorphology, GEOG 357 Climatology, GEOG 452 Landscape Ecology

**Courses that have the "V" distinction and are a Human Geography or Human-Environment Geography course will not count towards both the Viewing a Wider World and Human Geography or Human-Environment Geography requirements.**

---

**Geography (Human/Environment Relationships) - Bachelor of Science**

The Human Environment Relationships Concentration offers a solid foundation in geographic thought and geospatial analysis and provides students with advanced knowledge and skills for assessing human and environmental systems and the coupled and complex interactions between people and the environment. Preparation for advanced graduate studies is also provided.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective.
credits, but may be needed in order to take the necessary English and Mathematics coursework. Note: A grade of "C-" or better is required for all courses taken for the major. Students may not take any of these courses S/U.

**Second Language Requirement**

For the Bachelor of Science in Geography with a Concentration in Human Environment Relationships there is a one year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

**Option 4:**

**Prefix** | **Title** | **Credits**
---|---|---
Challenge the 1120 level for the following courses: | | 
| CHIN 1120 | Mandarin Chinese II | 4 |
| or FREN 1120 | French II | |
| or GRMN 1120 | German II | |
| or JAPN 1120 | Japanese II | |
| or SPAN 1120 | Spanish II | |
| OR | | |
| Challenge the 1120/1220/2210 level for the following courses: | | 
| PORT 1120 | Portuguese II | 3 |
| or SPAN 1220 | Spanish for Heritage Learners II | |
| or SPAN 2210 | Spanish for Heritage Learners III | |

**Option 5:**

Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.

**Option 6:**

Obtain college certification of completion of three years of a second language at the high school level with a grade of C- or higher in the second-year level.

**Option 7:**

By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

**Option 8:**

By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.

**Option 9:**

In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

---

**A Suggested Plan of Study for Students**

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

**Total Credits**

| Credits | 120-124 |

---

1. See the General Education (p. 88) section of the catalog for a full list of courses.

2. MATH 1220G College Algebra is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G first.

3. A ST 311 Statistical Applications is also an acceptable course to meet the department Statistics course requirement, however it will not satisfy the General Education (GE) Elective requirement. If a student takes A ST 311 Statistical Applications, they will need to take an additional General Education course to complete the GE Elective requirement.

4. Students should take courses to either complete the two semester Second Language Requirements with either Option 1 or Option 2 (see the requirements tab (p. 559) for this degree, the Second Language section)

5. Human Geography: GEOG 361V Economic Geography, GEOG 363V Cultural Geography, GEOG 365V Urban Geography, GEOG 467 Transportation Geography

6. Human Environment Geography: GEOG 325V New Mexico and the American West, GEOG 326 U.S. National Parks, GEOG 328V Geography of Latin America, GEOG 331V Europe, GEOG 483 Field Explorations in Geography

8. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

9. Courses that have the "V" distinction and are a Human-Environment Geography and Human Geography courses will not count towards both the Viewing a Wider World and Human-Environment Geography and Human Geography requirements.

10. For all Human Geography, Human Environment Geography and Physical Geography course requirements, students cannot repeat the courses multiple times to fulfill the requirement.

### Geographic Information Systems - Undergraduate Minor

The Department of Geography at NMSU offers a minor in Geographic Information Science and Technology (GIS&T) to interested undergraduate students (non-geography majors). The minor in GIS&T requires 21-22 credits.

*Note: A grade of C- or better is required for all courses taken for the minor. Students may not take any of these courses S/U.*
The Department of Geography offers a minor in Geography to interested undergraduate students from departments outside of Geography. To earn a minor in Geography, the following courses are required. Note: A grade of C- or better is required for all courses taken for the minor. Students may not take any of these courses S/U.

To earn a minor in GIS&T, the following courses are required.

Select 6-7 credits from the following:
- GEOG 411
- GEOG 473
- GEOG 488
- GEOG 492

Geography - Undergraduate Minor

The Department of Geography offers a minor in Geographic Information Science and Technology (GIS&T) to interested undergraduate students (non-geography majors). To earn a minor in GIS&T, the following courses are required. Note: A grade of C- or better is required for all courses taken for the minor. Students may not take any of these courses S/U.

To earn a minor in GIS&T, the following courses are required.

Select 3-4 credits from the following:
- GEOG 326
- GEOG 331V
- GEOG 483

Geography - Master of Applied Geography

The basic requirement for the Master of Applied Geography is a minimum of 30 graduate credits, including 6 thesis credits and a successful thesis defense. Students choosing the thesis option are required to file a digital copy of the thesis and thesis data that will be archived on the Departmental Website (https://geography.unm.edu/) and the Departmental server. A non-thesis option (residency) requires 36 graduate credits with a minimum of 3 credits of professional residency and an approved final residency report. Students choosing the non-thesis (residency) option are required to file a digital copy of their residency report that will be archived on the Departmental Website and the Departmental server. All candidates must maintain an overall GPA of 3.00 or higher. All candidates must also receive a grade of B or better in the following required courses: GEOG 501 Research Design and History of Geographic Thought; GEOG 585 Advanced Spatial Analysis; and one graduate-level GIS&T course, either prior to entering the program or before graduation. A total of at least 15 credits must be earned in courses numbered 500 and above, and no more than 9 credits of the 30 (thesis option) or 36 (non-thesis option) can be earned outside of geography.

Geography - Doctor of Philosophy

The New Mexico Doctoral Program in Geography builds upon the strengths of the two departments by providing the education, training, and experience necessary for professional careers in higher education, private industry, and government. The program offers advantages for students by merging two departments across the state and allowing students to have access to faculty and institutional resources on both campuses. The program is designed to build both theoretical and applied knowledge in geography, which enables students to pursue a wide range of career pathways.

The New Mexico Doctoral Program in Geography is administered and delivered collaboratively by the Geography faculty at both New Mexico State University and The University of New Mexico. This program brings together two outstanding institutions and offers a unique opportunity for doctoral study in New Mexico’s diverse and distinctive landscapes. The program offers advantages for students by merging two departments across the state and allowing students to have access to faculty and institutional resources on both campuses. The program is designed to build both theoretical and applied knowledge in geography, which enables students to pursue a wide range of career pathways.

The New Mexico Doctoral Program in Geography builds upon the strengths of the two departments by providing the education, training, and experience necessary for professional careers in higher education, private industry, and government. The program offers a rigorous, research-based degree that is focused on environmental change, dryland resource management, complex cultural landscapes, and the methods needed to understand them. During the program, students will learn qualitative and quantitative research methods, and how to use them in combination to create a mixed-methods approach to geographic research. Expertise in multiple methodologies requires intensive study, and applicants should carefully consider their preparation to enter a program that requires both qualitative and quantitative research proficiency.

Both campuses offer state-of-the-art technical facilities, and easy access to distinctive geographic features ranging from wilderness areas to urban centers, and the Rocky Mountains to the Chihuahuan Desert. Students reside in either Las Cruces (for NMSU) or Albuquerque (for UNM) - depending on which institution is selected as the “home” university—
but students will take classes on either campus, whether remotely or in-person.

On both campuses, graduate study in Geography has been characterized by a close, collegial working relationship between students and faculty and this singular program is delivered jointly at the two campuses, with collaborative participation from both faculties.

Students will travel to both campuses and experience field trips to other locations during the first-year sequence of core courses, thus gaining familiarity with two distinct communities and environments. Each student develops an individualized program of study in consultation with their dissertation committee. Individual requirements for each student are based on existing expertise and future career goals. Students will work with faculty advisors to develop a dissertation research project within the program’s three specialty areas, using appropriate research methodologies. Being a joint doctoral program, all students must have faculty from both campuses on their dissertation committee.

The program builds on existing resources and strengths at the two universities, and the curriculum will evolve to adapt to ever-changing human-environment interactions and career needs within professional geography. The program’s main regional foci are New Mexico and the broader Southwest region, the Mexico-U.S. borderlands, and Latin America.

The two geography departments have complementary strengths. Students will be based at the institution where the faculty can best support their research interests. The NMSU faculty specializes in applied geographic research and teaching, particularly in the fields of geographic information science, physical geography, cultural geography, and natural resource management. The UNM department specializes in basic research, and its faculty have particular expertise in geographic information science, political ecology, historical geography, health geography, and data science. To better understand research strengths within the program, please visit the admissions pages for the Ph.D. program and review the faculty pages in the department websites at:

- NMSU https://geography.nmsu.edu/about-us/faculty.html
- UNM https://geography.unm.edu/people/faculty/index.html (https://geography.unm.edu/people/faculty/).

The New Mexico Doctoral Program in Geography (NMDPG) is designed to train students in both basic and applied geographic research, with a topical focus on human-environment interactions.

This program is unique because it is a consortium between two universities. This means that policies of UNM’s Office of Graduate Studies and NMSU’s Graduate School together establish the general requirements for the NMDPG, which also has program-specific requirements for all students.

There are three formal course requirements for all NMDPG students. These core courses are Geog 601, GEOG 602 and GEOG 603.

All students must complete:

- at least 48 credit hours of graduate coursework.
- at least 18 credit hours of graduate coursework after completion of the Master’s degree.
- at least 24 credit hours of graduate coursework at the home university.

- at least 18 credit hours of graduate coursework in UNM or NMSU courses numbered 500 or above.
- at least 18 hours of dissertation credits, which are in addition to other coursework requirements (GEOG/GEPS 699 at UNM, or GEOG/GEPS 700 at NMSU).
- at least three hours of graduate credit in the semester in which the comprehensive examination is taken.
- at least one hour of graduate credit in the semester in which they complete degree requirements.

### Geographic Information Systems-Graduate Minor

The Department of Geography offers a minor in Geographic Information Systems, and this minor is available for all graduate students. To earn a minor in GIS, the following courses are required, combining for a total of 14 credits. Students may not take any of these courses S/U, and students must earn a grade of at least B- in all of these classes.

### Geological Sciences

#### Undergraduate Program Information

A degree in geology leads to a wide variety of career choices. Students can access careers in the geosciences through one of three concentrations in the BS Geology degree. The first concentration is Geological Sciences. This is a traditional geology curriculum, in which students take geology classes, augmented with calculus, physics, and chemistry; this concentration leads to graduate study in the geosciences and careers in industry, academia, government, and policy. The second concentration is Earth and Environmental Systems. Students take geology classes, augmented with a variety of environmental, economic, and political classes; this concentration leads to careers in the environmental industry. The third concentration is Earth Science Education. Students take geology and education classes, and are certified to teach science at New Mexico middle and high schools after completing the BS and one year of graduate work in the College of Education.

Students earning the BS in Geology, any concentration, may also earn the Undergraduate Research Certificate in the Department of Geological Sciences. Completion of the Undergraduate Research Certificate includes completion of an undergraduate research project, participation in the department’s undergraduate research meetings and one of the following:
1. a senior thesis;
2. a manuscript submitted for a publication; or
3. an oral or poster presentation at a national or regional meeting.

Undergraduate Research Certificates are presented at the department’s annual awards ceremony.

The Department of Geological Sciences also cooperates with the Department of Physics in offering a BS degree in physics with a concentration in geophysics. Requirements are listed in the Department of Physics (p. 761) section of this catalog.

Graduate Program Information
The Department of Geological Sciences offers graduate study leading to the Master of Science degree in geology. The department offers excellent laboratory facilities for research in mineralogy, igneous petrology, geochemistry, stratigraphy, geochronology, and sedimentology. Available are a large, fully equipped rock preparation laboratory, mineral separation laboratory, plus computer, geochemical and petrographic labs. Major equipment includes a Gemeni heavy mineral separation table, a class 1000 clean lab, Thermal Ionization Mass Spectrometry (TIMS) and Laser-Ablation Multi-Collector Inductively Coupled Plasma Mass Spectrometry (LA-MC-ICP-MS). The department maintains its own fleet of field vehicles. Also available are computing facilities that include an HP color plotter and GIS system. Financial support is available to graduate students in geology through teaching and research assistantships and scholarships. Inquiries regarding financial aid should be directed to the graduate advisor. Admission to the program is in accord with the general regulations of the Graduate School.

Degrees for the Department
Bachelor Degree(s)
Geology (Geological Sciences) - Bachelor of Science (p. 577)
Geology (Earth and Environmental Systems) - Bachelor of Science (p. 572)
Geology (Earth Science Education) - Bachelor of Science (p. 574)

Master Degree(s)
Geology - Master of Science (p. 580)

Minors for the Department
Geology - Undergraduate Minor (p. 580)

Professor, Nancy J. McMillan, Department Head

Professors Amato, McMillan, Ramos; Associate Professor Burgette, Hampton; Adjunct Professors G. Brown, K. Davis, J. Witcher; Emeritus Faculty Lawton, Mack

Geology Courses
GEOL 1110G. Physical Geology
4 Credits (3+3P)
Physical Geology is an introduction to our dynamic Earth introducing students to the materials that make up Earth (rocks and minerals) and the processes that create and modify the features of our planet. The course will help students learn how mountains are formed, how volcanoes erupt, where earthquakes occur, and how water, wind, and ice can shape landscapes. Students will also develop a basic understanding of the ways humans have altered the planet including our impact on natural resources and global climate change.

Learning Outcomes
1. Recall, describe or explain geologic vocabulary.
2. Identify or explain aspects of the geologic time scale and compare the uses and limitations of relative and absolute dating.
3. Recognize or explain the evidence used to support the theory of plate tectonics. Describe or identify how plate tectonics is related to the structure and features of the Earth.
4. Describe the formation of, and describe, compare, and classify minerals.
5. Identify or describe the three main rock types, how each forms in the context of the rock cycle and what each indicates about its environment of formation.
6. Recognize or explain the fundamentals of surface and groundwater hydrology and discuss the impact of human activities on water quality and quantity.
7. Describe or discuss the processes that are responsible for specific geologic hazards (e.g., earthquakes, volcanic eruptions, mass movement, flooding, etc.).
8. Recognize or describe the geologic processes involved in the formation and concentration of geologic resources.
GEOL 1150. Introduction to Rocks and Minerals  
3 Credits (2+3P)  
This course is an introduction to the characteristics and the formation of the three main types of rocks, the rock-forming minerals, and important ore minerals. An outline of Plate Tectonics will give students the basis to understand how many of these rocks and minerals form. In laboratory exercises, students will gain practice in describing and identifying hand-specimens of the main types of rocks and minerals.  
Prerequisite(s)/Corequisite(s): GEOL 1110G.  
Learning Outcomes  
1. The student Identify the main rock-forming minerals from each mineral group as demonstrated by scoring a total of 70% or more on the relevant laboratory exercise component. Studying minerals, the student will: Identify the main minerals in hand specimens; Describe the environments in which these minerals form; Identify the rock types in which these minerals are found.  
2. The student will understand the structure, composition, and genesis of rocks by identifying the principal igneous, sedimentary, and metamorphic rocks, as demonstrated by scoring a total of 70% or more on the relevant laboratory exercise components.  
3. Studying rocks, the student will: Define the principal igneous processes and features, identify the most common igneous rocks and their constituting minerals in hand specimens, and discuss their origin and interpretation; Describe the principles of sedimentary processes and features, identify the most common sedimentary rocks in hand specimens, and discuss their origin and interpretation; Describe the principles of metamorphic processes and features, identify the most common metamorphic rocks and constituting minerals in hand specimens, and discuss their origin and interpretation.

GEOL 2130. Introduction to Meteorology  
4 Credits (3+3P)  
Introduction to Earth's atmosphere and the dynamic world of weather as it happens. Working with current meteorological data delivered via the Internet and coordinated with learning investigations keyed to the current weather; and via study of select archives.  
Learning Outcomes  
1. Recall, describe, or explain the various elements of the Earth's atmosphere, Earth's relation to the sun, incoming solar radiation, the ozone layer, the primary temperature controls, and the unequal heating of land and water.  
2. Recall, describe, or explain weather variables and parameters.  
3. Recall, describe, or explain air masses, pressure systems, the various fronts and associated types of storms, weather symbols, monsoons, the various forms of precipitation, along with causes and effects of lightning.  
4. Recall, describe, or explain the hydrologic cycle, the characteristics and influences of the oceans and continents on the weather, the Southern Oscillation (i.e., El Nino), and the effects of land/water distribution.  
5. Recall, describe, or explain specific impacts by humans on weather, climate, and on the ecosystem at large.  
6. Evaluate and interpret information from maps, diagrams, remote sensing devices, graphs, and tables.  
7. Apply critical thinking skills such as inductive, deductive, and mathematical reasoning to solve problems using the scientific method.  
8. Recognize and discuss the effect of human activity on climate, climate change and the greenhouse effect.  
9. Synthesize information from external, current sources and personal observations and discuss their relationships to class material.

GEOL 2996. Special Topics  
1-3 Credits  
Specific subjects to be announced in the Schedule of Classes. Community Colleges only. May be repeated for a maximum of 12 credits.  
Learning Outcomes  
1. Varies

GEOL 305V. Fossils and the Evolution of Life  
3 Credits (3)  
Examination of the fossil record within the context of geologic time. Special emphasis on critical evaluation of possible terrestrial and extra-terrestrial causes for the evolution of plants and animals and for periods of mass extinction.  

GEOL 310. Mineralogy  
3 Credits (2+3P)  
Crystallography and the physical and chemical aspects of minerals.  
Prerequisite(s): GEOL 1110G and CHEM 1215G.
GEOL 312. Mineralogy and Optics
3 Credits (2+3P)
Prerequisites: crystallography, optical mineralogy, and mineral chemistry as applied to the identification and characterization of rock-forming minerals. May be repeated up to 3 credits.
Prerequisite(s): GEOL 1110G and GEOL 1150.
Learning Outcomes
1. Students will understand how polarized light interacts with isotropic, uniaxial, and biaxial crystals. Students will be able to recognize optical phenomena resulting from the interaction of polarized light with minerals. Students will become proficient in the recognition of the major rock-forming minerals in thin section. Students will recognize crystal faces according to the Miller Indices. Students will be able to calculate the structural formula of any mineral.

GEOL 320. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

GEOL 335V. Earthquakes, Volcanoes, Hurricanes, and Floods: The Role of Natural Hazards in Civil Past and Present
3 Credits (3)
This class will provide an introduction to geologic hazards and natural disasters, their effects on society and the attempts at preparation and mitigation for these events. Hazards to be covered include earthquakes, volcanic eruptions, floods, landslides, hurricanes, tsunamis and others.

GEOL 353. Geomorphology
3 Credits (2+3P)
Same as GEOG 353. May be repeated up to 3 credits.

GEOL 360. General Geochemistry
3 Credits (3)
The chemistry of the earth and its parts, with emphasis on geochemical systems and cycles, distribution of the elements, and mineral equilibria. Crosslisted with: CHEM 360
Prerequisite(s): CHEM 1215G or CHEM 1120G.

GEOL 399. Igneous and Metamorphic Petrology
3 Credits (2+3P)
Mineralogical composition, classification, and genesis of igneous and metamorphic rocks.
Prerequisite(s): GEOL 312 for geology majors, GEOL 310 for majors other than geology.

GEOL 401. Geology Colloquium
1 Credit (1)
Presentations by visiting speakers and students. May be repeated up to 6 credits.

GEOL 420. Stratigraphy and Sedimentology
3 Credits (2+3P)
Identification and interpretation of sedimentary rocks with emphasis on classification, deposition, and stratigraphic geometry.
Prerequisite: GEOL 310.

GEOL 424. Soil Chemistry
3 Credits (3)
Same as SOIL 424, CHEM 424.

GEOL 441. Tutorial Geology
2 Credits (1+3P)
Participation in teaching lower-division laboratories and conducting tutorial sessions. May be repeated for a total of 4 credits.
Prerequisite: junior or above standing and nomination by faculty.

GEOL 442. Zuhl Collection Internship
1-3 Credits (3-9P)
Applied experience with the NMSU Zuhl Collection, under supervision of the Zuhl Collection Director. Possible activities include developing displays, giving tours, developing outreach materials, etc. May be repeated up to 6 credits. Consent of instructor required.

GEOL 444. GIS for Geology
3 Credits (3)
Prerequisite(s): GEOL 470.

GEOL 449. The Geological Profession
1 Credit (1)
Outcomes assessment exit exams. For graduating seniors only. May be repeated up to 1 credit.
Prerequisite(s): Graduating seniors only.

GEOL 452. Geohydrology
4 Credits (3+2P)
Origin, occurrence, and movement of fluids in porous media assessment of aquifer characteristics. Development and conservation of groundwater resources, design of well fields. May be repeated up to 4 credits. Crosslisted with: ENVS 452 and CEE 452.

GEOL 455. Undergraduate Research
1-3 Credits
Geological research and field projects for the advanced student. May be repeated for a total of 6 credits. Consent of instructor required.
Prerequisite(s): Consent of instructor.

GEOL 456. Isotope Geochemistry
3 Credits (3)
Geochemistry of stable and radiogenic isotopes and its application to a wide range of problems in the earth and planetary sciences.
Prerequisite(s): CHEM 1225G, GEOL 360, GEOL 399.

GEOL 470. Structural Geology
3 Credits (2+3P)
Deformation of rocks of the earth. Prerequisite: GEOL 310

GEOL 471. Volcanology
3 Credits (3)
Identification and interpretation of volcanic deposits (including air fall, ash flow tuffs, surges, lava flows), with focus on how the characteristics of these deposits can reveal eruption styles and eruption dynamics. Other topics covered include: magma migration and storage, volcanic hazards, volcano monitoring and volcanoes and climate. Crosslisted with: GEOL 571.
Prerequisite(s): GEOL 399.

GEOL 477. Special Problems
1-3 Credits
Selected advanced topics of current interest or importance. May be repeated for a total of 6 credits.
Prerequisite: consent of instructor.

GEOL 478. Petroleum Systems and Stratigraphy
3 Credits (2+3P)
Sedimentation, stratigraphy, depositional environments, and tectonics in relation to the occurrences and exploration of hydrocarbons. Course includes two off-campus field trips. May be repeated up to 3 credits.
Prerequisite(s): GEOL 420.
GEOL 480. Seminar  
1-3 Credits  
Supervised study of a subject not covered by regular courses. For organized group meetings treating selected advanced topics. May be repeated for a maximum of 6 credits.  
Prerequisite: consent of instructor.

GEOL 482. Zuhl Collection Internship  
1-3 Credits (1-3)  
Applied experience working with the Zuhl Collection of rocks, minerals, fossils, and petrified wood, supervised by the Director of the Zuhl Collection. Activities include tours, display development, research on aspects of the collection, and other work in the museum. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: GEOL majors.

GEOL 490. Field Geology  
3 Credits (9P)  
Mapping, instrumentation, and interpretation of geology in the field.  
Prerequisites: either GEOL 420 and GEOL 470.

GEOL 491. Tectonic Evolution of North America  
3 Credits (3)  
Current ideas regarding the plate-tectonic evolution of North America from Archean through Holocene time, emphasizing the use of regional stratigraphy and structural geology to interpret mountain building, magmatism, and basin development.  
Prerequisites: GEOL 1110G, GEOL 399, GEOL 420 and GEOL 470.

GEOL 495. Geology Field Camp  
4 Credits (12P)  
Three week intensive summer course. Geologic mapping in a site-based setting, emphasizing spatial relations, cross-section construction, and preparation of geologic reports. Prerequisite: GEOL 490

GEOL 499. Senior Thesis  
1-3 Credits  
Writing a formal paper describing original geologic research conducted under supervision of a faculty advisor. Restricted to majors.  
Prerequisite: consent of instructor.

GEOL 501. Geology Colloquium  
1 Credit (1)  
Presentations by visiting speakers and graduate students.

GEOL 520. Selected Topics  
1-3 Credits  
Selected topics in geology. May be repeated for unlimited credit.  
Prerequisites: graduate standing and consent of instructor.

GEOL 534. Tectonics of Sedimentary Basins  
3 Credits (3)  
Origin of sedimentary basins with emphasis on subsidence mechanisms, geometry of basin fill, depositional systems and tectonic setting. Course includes two off-campus field trips. Restricted to: GEOL majors.  
Prerequisites: GEOL 420 or equivalent or consent of instructor.

GEOL 537. Topics in Volcanology  
3 Credits (3)  
A seminar-style class exploring volcanic processes. Course topics vary by semester and include: magmatism and volcanism at different tectonic settings (subduction zones, intraplate) and plumbing systems and eruptions of volcanoes (calderas, monogenetic volcanoes).

GEOL 544. GIS for Geology  
3 Credits (3)  
Prerequisite(s): GEOL 470 or equivalent.

GEOL 558. Neotectonics  
3 Credits (3)  
Recognition, measurement, and dating of deformation related to earthquakes in the Quaternary geologic record.

GEOL 562. Analytical Geochemistry  
3 Credits (3)  
Techniques used to determine the major element, trace element and isotopic composition of rocks and minerals and the determination of mineral structure.

GEOL 565. Isotope Geochemistry  
3 Credits (3)  
Trace element partitioning and isotope systematics applied to problems in petrology and ore genesis.

GEOL 571. Volcanology  
3 Credits (3)  
Identification and interpretation of volcanic deposits (including air fall, ash flow tuffs, surges, lava flows), with focus on how the characteristics of these deposits can reveal eruption styles and eruptions dynamics. Other topics covered include: magma migration and storage, volcanic hazards, volcano monitoring and volcanoes and climate. Crosslisted with: GEOL 471.

GEOL 578. Petroleum Systems and Stratigraphy  
3 Credits (2+3P)  
Sedimentation, stratigraphy, depositional environments and tectonics in relation to the occurrences and exploration of hydrocarbons. Course includes two off-campus field trips.

GEOL 582. Plate Tectonics  
3 Credits (3)  
Plate tectonics as a fundamental model for geological activity on a dynamic earth. Focuses on plate tectonic theory development and mechanisms, plus modern analogs of ancient processes.

GEOL 585. Geochronology  
3 Credits (3)  
The principles, analytical methods, and interpretation of the most common geochronologic methods.

GEOL 598. Special Research Programs  
1-3 Credits  
Investigations into contemporary geological problems. May be repeated for unlimited credit.  
Prerequisites: graduate standing and consent of instructor.

GEOL 599. Master's Thesis  
15 Credits  
Thesis research.

Geology (Earth and Environmental Sciences) - Bachelor of Science

The concentration in geological sciences provides students with scientific insight as a foundation for careers in environmental earth science, environmental policy and resource management. Qualified students are also prepared for graduate study in these areas. This concentration does not prepare students for graduate study in the geological sciences; these students should follow the curriculum in the Geological Sciences Concentration.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Students must receive a C- or better in courses.

Prefix Title Credits
General Education
Area I: Communications
English Composition - Level 1 1 10
English Composition - Level 2 2 10

GEOG 473 Advanced Remote Sensing
EPWS 380V Science & Society
RGSC 2110 Introduction to Rangeland Management
RGSC 302V Forestry and Society
GEOL courses: 300-400 level GEOL courses other than those used to satisfy the departmental requirements and electives

Electives, to bring the total credits to 120 5 8-11
Total Credits 120

1 See the General Education (p. 88) section of the catalog for a full list of courses
2 For any Mathematics course selection students may need to take any prerequisites needed to enter the class(es) first.
3 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses
4 May not be taken S/U and a grade of C- or better must be earned.
Elective credit may vary based on Math course selection, second language requirements, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Students must work closely with their advisors in order to plan programs that allow them to meet all requirements and earn sufficient upper-division credit.

Second Language Requirement
For the Bachelor of Science in the Geology there is a one year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

---

1. See the General Education (p. 88) section of the catalog for a full list of courses.

2. See the Second Language section of the Requirements Tab (p. 572) for this degree for more information.

3. **Non-Departmental Elective Courses:**
   - SOIL 2110 Introduction to Soil Science/SOIL 2110L Introduction to Soil Science Laboratory
   - SOIL 370 Environmental Soil Science
   - CHEM 1225G General Chemistry II Lecture and Laboratory for STEM Majors
   - CHEM 2115 Survey of Organic Chemistry and Laboratory
   - POLS 320 Making Public Policy
   - GEOG 373 Introduction to Remote Sensing
   - GEOG 473 Advanced Remote Sensing
   - EPWS 380V Science & Society
   - RGSC 2110 Introduction to Rangeland Management
   - RGSC 302V Forestry and Society
   - GEOL courses: 300-400 level courses other than those used to satisfy the Departmental Requirements and Departmental Electives

4. Elective credit may vary depending on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The elective credit in the requirement list is the amount needed to bring the total to 120 credits and may vary based on the degree. Students may need to complete more or less courses on a case-by-case basis and each student should discuss this with their advisor.

5. **Departmental Electives:**
   - GEOL 312 Mineralogy and Optics
   - GEOL 399 Igneous and Metamorphic Petrology
   - GEOL 465 Isotope Geochemistry
   - GEOL 478 Petroleum Systems and Stratigraphy
   - GEOL 480 Seminar
   - GEOL 490 Field Geology
   - GEOL 491 Tectonic Evolution of North America
   - GEOL 495 Geology Field Camp

6. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

---

**Geology (Earth Science Education) - Bachelor of Science**

The concentration in earth science education is a collaboration between the Department of Geological Sciences and the Department of Curriculum and Instruction in the College of Education. In this option, students earn a Secondary Licensure as well as a BS in Geology, and become qualified to
Mathematics coursework.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

**Second Language Requirement: (required - see below)**

Select 8 credits from two semesters of a second language (see section at the bottom of the page)

<table>
<thead>
<tr>
<th>Electives, to bring the total credits to 120</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Total Credits</strong></td>
<td>120</td>
</tr>
</tbody>
</table>

1. See the General Education (p. 88) section of the catalog for a full list of courses
2. For any Mathematics course selection students may need to take any prerequisites needed to enter the class(es) first.
3. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses
4. May not be taken S/U and a grade of C- or better must be earned.
5. CHEM 1215G General Chemistry I Lecture and Laboratory for STEM Majors and CHEM 1225G General Chemistry II Lecture and Laboratory for STEM Majors: Preferred
6. Elective credit may vary based on Math course selection, second language requirements, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Students must work closely with their advisors in order to plan programs that allow them to meet all requirements and earn sufficient upper-division credit.

After completing the BS in Geology, Concentration Earth Science Education, students should apply and be admitted to the Graduate School in the Department of Curriculum and Instruction, and be admitted to the Teacher Education Program (TEP). For additional details, see the School...
Second Language Requirement

For the Bachelor of Science in the Geology there is a one year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

Option 1:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHIN 1110</td>
<td>Mandarin Chinese I &amp; Mandarin Chinese II</td>
<td>8</td>
</tr>
<tr>
<td>FREN 1110</td>
<td>French I &amp; French II</td>
<td>8</td>
</tr>
<tr>
<td>GRMN 1110</td>
<td>German I &amp; German II</td>
<td>8</td>
</tr>
<tr>
<td>JAPN 1110</td>
<td>Japanese I &amp; Japanese II</td>
<td>8</td>
</tr>
<tr>
<td>SPAN 1110</td>
<td>Spanish I &amp; Spanish II</td>
<td>8</td>
</tr>
<tr>
<td>PORT 1110</td>
<td>Portuguese I &amp; Portuguese II</td>
<td>6</td>
</tr>
</tbody>
</table>

For Heritage Speakers:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPAN 1210</td>
<td>Elementary Spanish for Heritage Learners I</td>
<td>6</td>
</tr>
<tr>
<td>SPAN 1220</td>
<td>and Spanish for Heritage Learners II</td>
<td></td>
</tr>
<tr>
<td>or SPAN 2210</td>
<td>Spanish for Heritage Learners III</td>
<td></td>
</tr>
</tbody>
</table>

Option 2:

Complete the following sequence for American Sign Language (with a C- or better):

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SIGN 1110</td>
<td>American Sign Language I</td>
<td>3</td>
</tr>
<tr>
<td>SIGN 1120</td>
<td>American Sign Language II</td>
<td>3</td>
</tr>
</tbody>
</table>

Option 3:

Challenge the 1120 level for the following courses:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHIN 1120</td>
<td>Mandarin Chinese II</td>
<td>4</td>
</tr>
<tr>
<td>or FREN 1120</td>
<td>French II</td>
<td></td>
</tr>
<tr>
<td>or GRMN 1120</td>
<td>German II</td>
<td></td>
</tr>
<tr>
<td>or JAPN 1120</td>
<td>Japanese II</td>
<td></td>
</tr>
<tr>
<td>or SPAN 1120</td>
<td>Spanish II</td>
<td></td>
</tr>
</tbody>
</table>

Challenge the 1120/1220/2210 level for the following courses:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PORT 1110</td>
<td>Portuguese II</td>
<td>3</td>
</tr>
<tr>
<td>or SPAN 1220</td>
<td>Spanish for Heritage Learners II</td>
<td></td>
</tr>
<tr>
<td>or SPAN 2210</td>
<td>Spanish for Heritage Learners III</td>
<td></td>
</tr>
</tbody>
</table>

Option 4:

Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.

Option 5:

Obtain college certification of completion of three years of a second language at the high school level with a grade of C- or higher in the second-year level.

Option 6:

By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

Option 7:

By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.

Option 8:

In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

- GEOL 335V Earthquakes, Volcanoes, Hurricanes, and Floods: The Role of Natural Hazards in Civ Past and Present
- GEOL 360 General Geochemistry
- GEOL 399 Igneous and Metamorphic Petrology
- GEOL 444 GIS for Geology
- GEOL 470 Structural Geology
- GEOL 491 Tectonic Evolution of North America

See the Viewing a Wider World section of the catalog for a full list of courses.

### Geology (Geological Sciences) – Bachelor of Science

The concentration in geological sciences is a broad field of study that prepares students for employment by energy and mineral industries, environmental and water resource companies, federal, state and local governments, as well as service companies that utilize earth resources. Qualified students are also prepared for graduate study in the geological sciences.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Students must receive a C- or better in courses.

**Departmental Elective Requirements**

Select 3-4 credits from the following:

Choose one sequence from the following (4 credits):

- MATH 1521G
- MATH 1511G

**Non-Departmental Requirements (in addition to Gen.Ed/VWW)**

Select 12 credits from the following:

- C E 357 Soil Mechanics
- GEOL 335V Earthquakes, Volcanoes, Hurricanes, and Floods: The Role of Natural Hazards in Civ Past and Present
- GEOL 353 Geomorphology
- GEOL 424 Soil Chemistry
- GEOL 444 GIS for Geology
- GEOL 452 Geohydrology
- GEOL 465 Isotope Geochemistry
- GEOL 478 Petroleum Systems and Stratigraphy
- GEOL 480 Seminar
- SOIL 2110 Introduction to Soil Science

**Electives, to bring to the total credits 120**

Select 8 credits from two semesters of a second language (see the section at the bottom of the page)

**Total Credits** 120

1. See the General Education (p. 88) section of the catalog for a full list of courses
2. *For either Mathematics course selection students may need to take any prerequisites needed to enter the class(es) first.
3. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses
4. May not be taken S/U and a grade of C- or better must be earned.
5. Elective credit may vary based on Math course selection, second language requirements, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Students must work closely with their advisors in order to plan programs that allow them to meet all requirements and earn sufficient upper-division credit.

**Second Language Requirement**

For the Bachelor of Science in the Geology there is a one year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

**Option 1:**

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
</table>

**Complete one of the following sequences:**

CHIN 1110 Mandarin Chinese I 8
& CHIN 1120 and Mandarin Chinese II 8
FREN 1110 French I 8
& FREN 1120 and French II 8
GRMN 1110 German I 8
& GRMN 1120 and German II 8
JAPN 1110 Japanese I 8
& JAPN 1120 and Japanese II 8
SPAN 1110 Spanish I 8
& SPAN 1120 and Spanish II 8
PORT 1110 Portuguese I 6
& PORT 1120 and Portuguese II 6

**For Heritage Speakers:**

SPAN 1210 Elementary Spanish for Heritage Learners I 6
& SPAN 1220 and Spanish for Heritage Learners II
or SPAN 2210 Spanish for Heritage Learners III
Option 2:
Prefix | Title | Credits
--- | --- | ---
SIGN 1110 | American Sign Language I | 3
SIGN 1120 | American Sign Language II | 3

Option 3:
Prefix | Title | Credits
--- | --- | ---
CHIN 1120 | Mandarin Chinese II | 4
or FREN 1120 | French II | 3
or GRMN 1120 | German II | 3
or JAPN 1120 | Japanese II | 3
or SPAN 1120 | Spanish II | 3

Option 4:
Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.

Option 5:
Obtain college certification of completion of three years of a second language at the high school level with a grade of C- or higher in the second-year level.

Option 6:
By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

Option 7:
By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.

Option 8:
In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

A Suggested Plan of Study for Students
This roadmap assumes student placement in MATH 1250G Trigonometry & Pre-Calculus and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year
Semester 1 | Credits
--- | ---
Area I: Communications - Level 1 Course | 4

Total Credits: **120-124**

1 See the General Education (p. 88) section of the catalog for a full list of courses.

These courses may have prerequisites and/or co-requisites, and it is the students' responsibility for checking and fulfilling all those requirements.

3 Students whose Financial Aid requires enrollment in at least 15 credits each semester, may need to take additional elective credit than what is listed. Students should discuss their electives with their advisor.

*Elective credit may vary based on Math course selection, second language requirements, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis.

4 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

5 GEOL 495 Geology Field Camp, is only taught in the summer of odd-numbered years. Students should take GEOL 490 Field Geology, during the spring semester before taking GEOL 495. GEOL 495 Geology Field Camp should be taken the summer after the third or fourth year. In cases where it is impossible to fit this class into a schedule, students may take a field camp at another university and transfer the credits. It is the student's responsibility to have the department head verify that the field camp is acceptable before taking the course.

### Geology - Undergraduate Minor

A student cannot earn a BS in Geology and also earn a minor in Geology.

Select 12 credits from the following:

- GEOL 310 | Mineralogy  
- GEOL 312 | Mineralogy and Optics  
- GEOL 335V | Earthquakes, Volcanoes, Hurricanes, and Floods: The Role of Natural Hazards in Civ Past and Present  
- GEOL 353 | Geomorphology  
- GEOL 360 | General Geochemistry  
- GEOL 399 | Igneous and Metamorphic Petrology  
- GEOL 420 | Stratigraphy and Sedimentology  
- GEOL 444 | GIS for Geology  
- GEOL 465 | Isotope Geochemistry  
- GEOL 470 | Structural Geology  
- GEOL 477 | Special Problems (variable credit)  
- GEOL 478 | Petroleum Systems and Stratigraphy  
- GEOL 480 | Seminar (variable credit)  
- GEOL 490 | Field Geology  
- GEOL 491 | Tectonic Evolution of North America  
- GEOL 495 | Geology Field Camp  

Total Credits: **19**

1 Courses with Geology prerequisites other than GEOL 1110G Physical Geology or HNRS 2116G Earth, Time and Life.

### Geology - Master of Science

A candidate for a master's degree must:

- Complete a minimum of 30 graduate credits, including a minimum of 6 credits for thesis (GEOL 599 Master's Thesis).
- No more than 5 thesis credits may be taken in any one semester. Early selection of a research advisor is encouraged.
- A thesis proposal must be approved by the advisor and the candidate's committee before registering for thesis credits.
- At least 15 credits must be earned in courses numbered 500 or above, and at least 15 credits must be earned in geology.
- Students are expected to participate in the department's colloquium each semester.
The department offers excellent laboratory facilities for research in mineralogy, igneous petrology, geochemistry, stratigraphy, geochronology, and sedimentology. Available are a large, fully equipped rock preparation laboratory, mineral separation laboratory, plus computer, geochemical and petrographic labs. Major equipment includes a Gemisi heavy mineral separation table, X-Ray Fluorescence Spectrometry (XRF), Laser-Induced Breakdown Spectroscopy (LIBS), a class 1000 clean lab, Thermal Ionization Mass Spectrometry (TIMS) and Laser-Ablation Multi-Collector Inductively Coupled Plasma Mass Spectrometry (LA-MC-ICP-MS). The department maintains its own fleet of field vehicles. Also available are computing facilities that include an HP color plotter and GIS system. Financial support is available to graduate students in geology through teaching and research assistantships and scholarships. Inquiries regarding financial aid should be directed to the graduate advisor.

Government

Undergraduate Program Information

The study of government and political science blends the strengths of a liberal arts education while preparing students for a career in their field. Career opportunities can include positions in: federal, state, and local government; public administration and public service; and in public policy analysis.

The government major program calls for a thorough preparation in the study of government as described below with the opportunity for those interested in specific careers to concentrate in one of the subfields:

- American government and politics,
- public law,
- public administration and policy,
- comparative politics,
- political theory and
- international relations.

The department also offers a supplementary major in law and society, which is supportive of law-related careers.

A government minor program involving 18 credits of course work is also offered. A subfield minor or a general minor may be selected. In addition, the department participates in an interdisciplinary minor in Contemporary Social Studies.

Graduate Program Information

The Department of Government offers two degrees:

- the Master of Arts (MA) in government and
- the Master of Public Administration (MPA) and
- a graduate minor in Security Studies.

The programs are designed to prepare students both for diverse careers in the public sector and for further training at the doctoral level. The MPA program is accredited by the Network of Schools of Public Policy, Affairs and Administration (NASPAA), a distinction held by fewer than one-quarter of MPA programs nationwide. The MPA program offers joint degrees

- with the Department of Criminal Justice (MPA/MCJ) and
- with the Department of History (MPA/ MA in Public History).

Students in a joint degree program can earn two master’s degrees with fewer credits than would be required to earn those degrees independently.

Admission

Prospective graduate students in either the MA or MPA should demonstrate a 3.0 grade point average for the second half of their undergraduate course work. For students with a GPA of less than 3.0, GRE scores are required, though this requirement may be waived if the undergraduate degree was awarded more than five years before applying. Applicants to either program are required to submit an application online. See instructions at: http://prospective.nmsu.edu/graduate/apply/index.html (http://prospective.nmsu.edu/graduate/apply/).

Applications include three letters of recommendation, a writing sample, and a personal statement concerning their interest in pursuing a graduate degree. Additional information concerning program requirements and the admission process can be obtained from either the department’s MA chair or MPA director. Under exceptional circumstances the department may exempt students from the minimal requirements. Application for admission to the Graduate School should clearly indicate the program in which the student wishes to enroll. Applications for admission to the MPA program are reviewed twice a year, once in the Fall semester and once in the Spring semester.

Students interested in a joint degree option must apply and be accepted in to the two departments separately, and indicate their interest on their applications in one of the joint degree programs.

General Requirements

Students in both the MA and MPA programs select either a thesis or non-thesis option. Students planning on continuing their studies in a doctoral program or wishing to establish expertise related to a specific career objective are strongly encouraged to select the thesis option. The non-thesis option is suggested for students desiring immediate employment or seeking to enhance their current employment situations. Course work outside the department must have prior advisor approval to ensure a well-integrated program of study. Complete information on the requirements for either program should be obtained directly from the department. Most MA and MPA courses are offered in the evening.

Minors

The Department of Government offers a general undergraduate Government minor and specialized sub field minors. In addition, the department participates in an interdisciplinary minor in Contemporary Social Studies with History and other departments.

A student cannot earn both a B.A. in Government and a general minor in Government. Government majors may pursue a subfield minor in the department, however, they cannot double count any upper division courses in Government toward the minor.

Degrees for the Department

Bachelor Degree(s)

Government - Bachelor of Arts (p. 589)

Supplemental Major(s)

Law and Society - Supplemental Major (p. 593)

Master Degree(s)

Government - Master of Arts (p. 593)
Minors for the Department

Undergraduate

American Government and Politics - Undergraduate Minor (p. 591)
Comparative Politics - Undergraduate Minor (p. 591)
International Relations - Undergraduate Minor (p. 592)
Political Theory - Undergraduate Minor (p. 592)
Public Administration - Undergraduate Minor (p. 592)
Public Law - Undergraduate Minor (p. 592)
Government - Undergraduate Minor (p. 592)

Graduate

Security Studies - Graduate Minor (p. 594)

Professor, Neil Harvey, Department Head

Professors Harvey; Associate Professors Conner, Hirschauer, Medina, Rosendorf; Assistant Professors Kang, Lee, Sukala, Ter-Mkrtchyan; College Professor Seckler; Emeritus Professors Baker, Hynes, Lapid, Slaton, Taggart, Winn.

N. Harvey, Ph.D., Department Head (Univ. Essex) - Mexican politics, comparative politics, Latin America, migration and border politics; N. Baker, (emerita) Ph.D. (Tulane Univ.) - public law; American politics, presidency; T. Conner, Ph.D., (Univ. Oklahoma) - public administration, Native American politics, public budgeting; S. Hirschauer, Ph.D., (Old Dominion University) - international relations, security studies, gender, migration and identity, comparative politics; P. Hynes (emerita) Ph.D., (New Mexico State University) - Commercial Space Research, Personal and Commercial Spaceflight; S. Kang, Ph.D., (Univ. Georgia) - public and non-profit management, organizational theory and behavior, public sector volunteering; Y. Lapid, (emeritus) Ph.D., (Columbia Univ.) – international relations theory, comparative foreign policy, international organizations; C. Lee, Ph.D., (Rutgers University) - public management, non-profit management, civil society and political participation, equity and social justice; C. Medina, Ph.D., (Univ. Colorado, Denver) - public administration, public policy, education policy, qualitative methods; N. Rosendorf, Ph.D., (Harvard Univ.) - international relations, cultural diplomacy, US foreign policy; K. Seckler, J.D. (Univ. of New Mexico) - Law and Society, New Mexico state and local government, US Supreme Court, US and NM Constitutions; C. Slaton (emerita) Ph.D., (Hawaii) - American politics, American political thought, university and community engagement, public administration, conflict resolution; W. Taggart, (emeritus) Ph.D., (Florida State) - public administration, public policy, American politics; A. Ter-Mkrtchyan, Ph.D., (Univ. Oklahoma) - nonprofit governance and accountability, environmental policy and administration, energy policy; R. G. Winn, (emeritus) Ph.D., (Arizona State) - public administration, policy analysis, environmental policy

Political Science Courses

POLS 110G. Introduction to Political Science
3 Credits (3)
This course covers fundamental concepts in political science, such as political theories, ideologies, and government systems.

Learning Outcomes
1. Construct reasoned civic discourse to advocate a stance or examine alternate positions.
2. Identify fundamental concepts and theories in political science.
3. Analyze data and information in order to gain a deeper understanding of the material.
4. Articulate how the public influence and are influenced by politics.
5. Identify and compare government systems from democracy to authoritarian, as well as models of analysis of contemporary international relations.

POLS 1111. Introductory Government Seminar
1 Credit (1)
Introduction to the government major. Designed to assist students in planning college experience and preparing for professional or advanced educational opportunities upon graduation. Graded: S/U. Restricted to: Main campus only.

Learning Outcomes
1. This course is designed for the "beginning" government major.
2. Its goal is to improve your educational experience at the university and within the Department of Government. In this class we hope to develop some basic skills necessary for successful completion of a degree in Government.
3. These include the skills of critical reading, critical writing, oral presentation and research methods.
4. Additionally, we will use this seminar to introduce you to Government faculty, to plan your government degree and to acquaint you with the services and opportunities the department and the university has to offer.
5. Finally, we hope to begin the discussion of where you will go next, when you complete your degree in Government.
POLS 1120G. American National Government
3 Credits (3)
This course explains the role of American national government, its formation and principles of the Constitution; relation of state to the national government; political parties and their relationship to interest groups. This course also explains the structure of the legislative, executive, and judicial branches.

Learning Outcomes
1. Explain the historical and political foundations of the government of the United States;
2. Explain the precursors to, and the development and adoption of the United States Constitution;
3. Explain the United States federal system, the basics of federalism, and the changing relationship of state and federal power;
4. Describe the power, structure and operation of the main institutions of government, namely the legislative, executive, judicial, and the federal bureaucracy;
5. Explain the development and role of political parties and interest groups;
6. Identify the constitutional basis of civil rights and civil liberties and their changing interpretation; and
7. Describe the role of demographics, public opinion and the media in American politics.

POLS 1130G. Issues in American Politics
3 Credits (3)
This course is designed to introduce the students to the contemporary study of American political issues. The course analysis of government policies, examining various approaches to the economy, democracy and the structure and the function of American political institutions.

Learning Outcomes
1. Explain the basic themes and concepts of political science and their application to contemporary issues.
2. Explain the major forces, interests, and institutions of American democratic politics.
3. Describe and define how beliefs, assumptions, and values are influences by factors such as politics, geography, economics, culture, biology, history, and social institutions.

POLS 2120G. International Relations
3 Credits (3)
This course covers the analysis of significant factors in world politics, including nationalism, national interest, political economy, ideology, international conflict and collaboration, balance of power, deterrence, international law, and international organization.

Learning Outcomes
1. Explain the interrelationships between countries and people in the world,
2. Demonstrate an awareness of current events in the world.
3. Describe several theories of International Relations
4. Explain and identify theories of power and decision making among states in the world.
5. Describe and evaluate issues that relate to International Politics, and how individuals are affected by them.
6. Describe the role of Intergovernmental Organizations in International Politics.
7. Identify the role war plays in International Politics.
8. Explain how economics is intertwined with International Politics.
9. Demonstrate an understanding of role of international terrorism and its impacts on global diplomacy.
10. Articulate how beliefs, assumptions, and values are influenced by factors such as politics, geography, economics, culture, history, government, and social institutions.

POLS 2996. Special Topics
3 Credits (3)
Specific topics to be announced in Schedule of Classes. Community Colleges only. May be repeated for a maximum of 12 credits.

Learning Outcomes
1. Varies
POLS 320. Domestic Policy
3 Credits (3)
The course examines how U.S. public policy is made, including the players, politics, issues and power critical to the policy process. An interactive class that bridges theory and political action. Restricted to: Main campus only. May be repeated up to 3 credits.

Learning Outcomes
1. Develop knowledge of how public policy is made in the United States at various levels of government (federal, state and local) and in relation to demands from interest groups and other stakeholders.
2. Develop knowledge of specific public policy areas (such as environmental policy, energy policy, etc.).
3. Develop excellence in research skills as well as written and oral communication of topics in the area of domestic policy.

POLS 321. Topics in Public Policy
3 Credits (3)
Course examines issues in public policy. May be repeated under different subtitles.

POLS 324. Environmental Policy
3 Credits (3)
This introductory course explores environmental policy issues. Students study perspectives of policy-makers, political activists and policy analysts, and apply policy models to solve pressing environmental problems. Focus may be on U.S. or global concerns.

POLS 325. Education Policy and Politics
3 Credits (3)
Overview of current pressing policy issues and political debates on education in the U.S., including school choice, vouchers, accountability, and affirmative action. Multiple topics and perspectives covered, with political economy as the main approach. May be repeated up to 3 credits.

Learning Outcomes
1. Understand the historical development and changing federal role in education policy, including major federal education laws and reforms.
2. Examine critical issues and trends in federal education policy, as well as the various actors and perspectives involved in education debates and decision-making.
3. Explore policy process theories and apply them to the analysis of federal education events. Study in depth a federal education policy issue by examining its progress through the various stages of the policy process.

POLS 330. Introduction to Public Administration
3 Credits (3)
What is public administration? Course examines public service, focusing on federal and state government. Issues include management and leadership, personnel, bureaucratic politics, organizational theory, personnel, budgeting and administrative law. Restricted to: Main campus only.

POLS 331. Special Topics in Public Administration
3 Credits (3)
Special topics in public administration. May be repeated for a maximum of 6 credits under different subtitles.

POLS 335. Management of Nonprofit Organizations
3 Credits (3)
This course provides an overview of a range of nonprofit management concerns and practices. Students will be challenged to assess their own theories of nonprofit accountability and excellence, while confronting critical issues facing the sector. Activities are designed to expand the management skills of students by offering analytical tools and knowledge, and providing opportunities to test the application of these skills.

POLS 343. Congress and the Legislative Process
3 Credits (3)
This class reviews the history, structure, membership, operation, power and culture of the American Congress. Restricted to: Main campus only.

Learning Outcomes
1. Develop knowledge of the functions and goals of the US Congress, specifically how federal legislation is drafted, debated and passed.
2. Develop skills in debating legislative bills through in-class simulations.
3. Develop excellence in research and written and oral communication of significant topics in the study of the US Congress and legislative processes.

POLS 345. The Supreme Court
3 Credits (3)
This class studies the history and operation of the Supreme Court, as well as landmark cases that have shaped American government and the Court.

POLS 348. Political Parties and Interest Groups
3 Credits (3)
Organization, principles, and functions of political parties and interest groups in the U.S.

POLS 350. Special Topics in American Government
3 Credits (3)
Special topics in American government. May be repeated for a maximum of 6 credits under different subtitles.

POLS 353. Women and Politics
3 Credits (3)
An examination of women's participation in U.S. electoral politics as voters, candidates, and officeholders; political activism in issue-based movements and strategies for affecting public policy; leadership as administrators and managers in public service agencies. Also explores the influence of feminism in changing women's roles socially, legally, and politically.

POLS 354. American Indian Politics
3 Credits (3)
Introduction to American Indian tribal governments, politics, policy, and administration; historical and contemporary leadership of Indian Nations; and the history and current status of American Indian-U.S. relations. Students learn about Native peoples' cultural responses, forms of resistance, and adaptations to colonization. Restricted to: Main campus only.
POLS 360. International Relations Theory
3 Credits (3)
Introduction to major theories and concepts for understanding fundamental problems and issues in international relations. May be repeated up to 3 credits.

Learning Outcomes
1. Identify and critically evaluate the major concepts (theory) and practices (reality) of International Relations. Identify, define, and critically think about themes and key issues unique to International Relations and evaluate their pros and cons. Develop knowledge, analytical ability, and critical thinking about global efforts and challenges to International Relations.

POLS 361. Special Topics in International Relations
3 Credits (3)
Course examines contemporary issues in international relations. May be repeated under different subtitles.

POLS 362. International Political Economy
3 Credits (3)
Political factors in international economic relations; theories of political economy.

POLS 364. National Security
3 Credits (3)
Analysis of theories, concepts, historical development and current issues of significance for US national security.

Learning Outcomes
1. Analyze international issues from a National Security policy perspective and examine major theoretical approaches (or “paradigms”) of National Security. Critically examine the historical evolution and the most prominent and contemporary challenges of National Security. Acquire abilities to synthesize and articulate important debates in the National Security literature and connect them to current national, regional, and global crises.

POLS 365. Introduction to Security Studies
3 Credits (3)
Introduction to the field of security studies, with focus on theories and issues in the study of security in international politics, including emerging security challenges perceived by nation-states and regional blocs.

Learning Outcomes
1. Analyze international issues from a security studies perspective and examine major theoretical approaches (or “paradigms”) of security studies. Critically examine the historical evolution and the most prominent and contemporary challenges of security studies. Synthesize and articulate important debates in the security studies literature and connect them to current national, regional, and global challenges and crises.

POLS 366. American Foreign Policy
3 Credits (3)
Formulation, content, and rationale of current foreign policies of the U.S. May be repeated up to 3 credits.

Learning Outcomes
1. Develop knowledge of the historical development and current practice of US foreign policy.
2. Develop the skills necessary to conduct independent research and written and oral communication of significant topics in US foreign policy.

POLS 367. Terrorism
3 Credits (3)
An introductory course using an interdisciplinary framework to explore definitions, historical roots, contemporary manifestations and future trends in political terrorism.

POLS 368. Human Security
3 Credits (3)
Introduction to human security, its focus on security of the individual as opposed to the security of the state since the end of the Cold War and the emergences of global challenges such as environmental crises, public health and transborder economic integration.

Learning Outcomes
1. Identify and critically evaluate the major concepts and practices in human security. Define, identify, and critically think about key issue areas in human security. Develop a coherent body of research in regard to a human security topic of your interest; engage with a specific knowledge about human security and apply your analysis to a specific phenomenon.
2. Investigate current, global efforts and challenges in regard to human security.

POLS 370. Comparative Politics
3 Credits (3)
Introduction to functional approaches to comparing similarities and differences among political systems.

POLS 371. Latin American Politics
3 Credits (3)
Basic structure of politics in major Latin American countries; role of groups, including church, labor, and parties.

POLS 372. Special Topics in Comparative Politics
3 Credits (3)
Course examines contemporary issues in comparative politics. May be repeated under different subtitles. Restricted to: Main campus only.

POLS 373. Resistance Movements in World Politics
3 Credits (3)
Research on violent and non-violent resistance movements around the world. Focus on their origins, demands, ideologies, strategies and impacts in the post-Cold War context of economic globalization, US military power and new geopolitical dynamics. May be repeated up to 3 credits.

Learning Outcomes
1. Develop knowledge of concepts of power and resistance movements and their applicability in many parts of the world. Increase analytical ability to explain variation in the motives, strategies and impacts of resistance movements. Promote critical thinking regarding how we choose to address inequalities, injustices and dissent. Develop oral and written communication skills of key concepts and original research.

POLS 378. U.S.-Mexico Border Politics
3 Credits (3)
Comparative perspectives applied to the problems of the U.S.-Mexican border.

POLS 379. Mexican Politics
3 Credits (3)
Introduction to the politics and government of contemporary Mexico.
POLS 380V. Contemporary World Political Ideologies
3 Credits (3)
Introduction to the prevailing political ideologies in the modern world and the ways in which modern nations operating under one or more of these ideologies attempt to answer fundamental questions about the allocation and distribution of rights, liberties, and other things of value. In addition, the course work and discussions attempt to address recent political, social, and economic events in various areas of the world.

POLS 382. Classical Political Thought
3 Credits (3)
Analysis of main currents in political thought from ancient Greece and Rome to the high Middle Ages.

POLS 383. Modern Political Thought
3 Credits (3)
Historical and theoretical examination of political ideas and ideologies from Machiavelli to Nietzsche. Topics include liberalism, conservatism, romanticism, communism, and Nihilism.

POLS 385. American Political Thought
3 Credits (3)
Introduction to major American thinkers and historical currents from colonial time to the present. May be repeated up to 3 credits.

Learning Outcomes
1. To understand the nature of the specifically American form of constitutionalism, as compared to its alternatives; To understand the idea of progress in American history, including its colonial origins and its contemporary manifestation under the terms of progressivist ideology; To understand the meaning and origin of American conservatism, and its place in contemporary political life; To understand the dynamics of shifting political and institutional power relationships (including issues of centralization and decentralization) in relation to the above; and To understand the general relationship between cultural phenomena and questions of political order.

POLS 386. Political Economy
3 Credits (3)
Analysis of political ideas concerning the role of the state in management of national economies, in both European and American contexts.

POLS 387. Religion and Politics
3 Credits (3)
Survey of major points of interaction between politics and religion in the U.S., using theoretical, historical, and institutional analysis.

POLS 390. Special Topics in Public Law
3 Credits (3)
Course examines various issues in public law. May be repeated under different subtitles.

POLS 391. Constitutional Law
3 Credits (3)
The class explores the reasoning and political context of the Supreme Court cases that define the distribution and limits of governmental powers and duties under the U.S. Constitution, including separation of powers and federalism. Restricted to: Main campus only.

POLS 392. Civil Liberties
3 Credits (3)
The course examines the reasoning and political context of major Supreme Court cases defining constitutional rights of free speech, religious liberty, free press and criminal procedural rights.

POLS 394. Judicial Process
3 Credits (3)
Class examines the structure, function and purpose of the American judicial system. Restricted to: Main campus only.

POLS 395. Law and Society
3 Credits (3)
Class critically explores the development, role and impact of law on our society, covering different theories of law, conceptions of justice and the values they reflect. These models are then applied to current legal issues. Not a class in legal reasoning, but one where students evaluate their beliefs about the legal system. Restricted to: Main campus only.

POLS 396. International Law
3 Credits (3)
Nature, growth, and scope of law of nations, rights and obligations of states in peace and war, current issues.

POLS 399. New Mexico Law
3 Credits (3)
New Mexico legal system, court structure and procedures; legal terms and concepts; constitutional, criminal, mass media, historical and social issues relating to New Mexico. Same as CJUS 399, HIST 399, JOUR 399, and SOCI 399.

POLS 405. Directed Readings
1-3 Credits
Individualized readings. Course subtitled. May be repeated for a maximum of 6 credits. Graded S/U. Consent of instructor required.

POLS 406. Independent Study
1-3 Credits
Individualized research. Course subtitled. May be repeated for a maximum of 6 credits. Consent of instructor required.

POLS 407. Workshop
1-6 Credits (1-6)
Focus on skills related to careers in government and political science. Specific topics announced in the Schedule of Classes; Only three credits apply toward government major or minor requirements. May be repeated up to 6 credits.

Learning Outcomes
1. Develop skills related to careers in government and public service.

POLS 410. Internship
1-12 Credits
Hands-on experience working with public agencies, political campaigns, elected officials & non-profits. May be repeated for a maximum of 12 credits; only 3 credits apply toward government major or minor requirements. Consent of instructor required. Graded: S/U.

Prerequisite(s): Completion of 12 government credits, 2.5 GPA, junior and above standing.

POLS 411. Service Learning Experience
3 Credits (3)
Experiential learning through a community service project. May be subtitled to reflect service activity. May be repeated for a total of 6 credits; only 3 credits apply toward government major or minor requirements.

Prerequisites: completion of 12 government credits, junior or above standing, and consent of instructor.
POLS 412. Practicum in Student Government  
3 Credits (3)  
Research of issues in student government. Consent of instructor required. Graded: S/U.  
Prerequisite(s): Student government participation, completion of 12 POLS credits, junior or senior standing.

POLS 415. Senior Seminar  
2 Credits (2)  
Review and integration of political skills acquired in the Government Department. Students will prepare a professional portfolio for entry into the workforce, advanced study, and civic participation. Graded: S/U Grading (S/U, Audit).

POLS 468. Rebels, Guerrillas, and Terrorists in Modern Latin America  
3 Credits (3)  
Explores history of rebels in Latin America. Examines guerilla struggles attaining national dimension. Focus on modern events, including Peru’s Shining Path, Columbia’s FARC, and Mexico’s Zapatistas. Same as HIST 331.

POLS 469. Globalization  
3 Credits (3)  
Analysis of the globalization process. Covers theories of globalization, the global economy, political globalization, global culture, transnational social movements, transnational migration and world labor market, global cities, and local-global linkages. Same as SOCI 4460. May be repeated up to 3 credits.

POLS 493. Mass Communications Law  
3 Credits (3)  
Examination of legal issues relating to mass media in the United States. Invasion of privacy, libel, sedition, copyright, and advertising regulation. Same as JOUR 493 and COMM 493.

POLS 502. Research Methods in Government  
3 Credits (3)  
Contemporary methods of political analysis, including mathematical and statistical techniques and computer applications. MPA students must complete this class with a B- or better. MA students must complete either POLS 502 or POLS 503 with a B- or better.

POLS 503. Qualitative Research Methods  
3 Credits (3)  
An overview of qualitative research methods such as fieldwork, ethnography, content analysis, case studies, focus groups and grounded theory. Introduces students to epistemology (the study of knowledge) and to basic components of research design. Explores activist scholarship, ethical dilemmas in research, and software tools for computer assisted analysis. Especially useful for students preparing theses, dissertation, or other research projects. MA students must complete either POLS 503 or POLS 502 with a B- or better.

POLS 505. Directed Readings  
1-3 Credits (1-3)  
Selected topics in government. May be repeated for a total of 6 credits. Graded S/U.  
Prerequisite: consent of instructor.

POLS 510. Internship  
1-6 Credits (1-6)  
Assignment with a public agency and research report. Only 3 credits apply toward degree requirements. Graded S/U.  
Prerequisite: approval of graduate advisor.

POLS 517. Selected Topics in Government  
3 Credits (3)  
Selected issues which may cross sub-fields of the discipline. May be repeated for a total of 6 credits.

POLS 519. Proseminar in Public Administration  
3 Credits (3)  
Review of classic and contemporary theory and practice in public administration. Application of written and oral skills to the presentation and defense of essays on various aspects of public administration. To be completed with a B- or better.  
Prerequisite(s): 30 credits of M.P.A.

POLS 522. Public Sector Economics I  
3 Credits (3)  
Introduction to the economic rationale for government intervention in the economy and the effects of that intervention on economic agents and the economy in general. Emphasis on the expenditure side of government policies. Same as AEEC 522.

POLS 527. Issues in Public Management  
3 Credits (3)  
Selected issues in public management. May be repeated under different subtitles for a total of 6 credits.

POLS 530. Seminar in Public Policy  
3 Credits (3)  
Survey of the political, administrative, and technical aspects of policy making in government. MA students taking POLS 530 as part of their core requirements must complete the class with a B- or better.

POLS 536. Public Policy and Indigenous Communities  
3 Credits (3)  
Indigenous communities are found throughout North, Central and South America. This course addresses the history, development and governance of these communities. Different sections of the course may choose to focus on different indigenous communities. All courses will consider the principles of governance internal to indigenous communities as well as the governing relationships between indigenous communities and modern states.

POLS 537. Issues in Public Policy  
3 Credits (3)  
Selected issues in public policy. May be repeated under a different subtitle for a total of 6 credits.

POLS 540. Seminar in Public Administration  
3 Credits (3)  
Survey course on the theory and practice of program, personnel, and financial management in government and the private, nonprofit sector. MA students taking POLS 540 as part of their core requirements must complete the class with a B- or better.

POLS 541. Public Budgeting  
3 Credits (3)  
Budgetary processes; budget classification, analysis, and evaluation. MPA students must complete this class with a B- or better.

POLS 542. Public Sector Human Resources Management  
3 Credits (3)  
Exploration of public personnel systems and practices, including job analysis, compensation, performance evaluation, recruitment, and labor-management relations. MPA students must complete this class with a B- or better.
POLS 543. Skills Workshop  
1-6 Credits (1-6)  
Focus on management of task skills in selected areas of public administration. Specific topics will appear in the Schedule of Classes. May be repeated up to 6 credits.  
Learning Outcomes  
1. Develop specific skills related to the practice of public administration  

POLS 544. Public Policy Analysis  
3 Credits (3)  
Environment of policy analysis; various descriptive and quantitative designs for analyzing and evaluating public policy. Problems of policy analysis. MPA students must complete this class with a B- or better.  
Prerequisite(s): POLS 502 or consent of instructor.  

POLS 547. Government Organizations  
3 Credits (3)  
Historical overview and present applications of organization theory in public management. MPA students must complete this class with a B- or better.  

POLS 548. Public Sector Leadership  
3 Credits (3)  
Theories and styles of leadership.  

POLS 549. Ethics in Government  
3 Credits (3)  
Examination of standards, perspectives, and issues for ethical decision-making in public agencies. MPA students must complete this class with a B- or better.  

POLS 550. Seminar in American Politics  
3 Credits (3)  
Overview of American political institutions. Includes study of American constitutional theory; legislative, executive, and judicial functions and processes; political parties and interest groups; and public policy formulation. MA students taking POLS 550 as part of their core requirements must complete the class with a B- or better.  

POLS 567. Advanced Issues in Terrorism  
3 Credits (3)  
Advanced study of theories of the causes of terrorism, responses to varieties of terrorism, and major issues in the study of terrorism, historically and today  
Learning Outcomes  
1. Examine core ideas in studies of terrorism (theoretically and factually) Introduce and develop an understanding about the causes of terrorism and possible solutions Acquire abilities to gain knowledge, think critically, analytically, and synthetically of countries and 2. violence, and varieties of terrorism over time and throughout the world.  

POLS 568. Advanced Issues in Human Security  
3 Credits (3)  
Advanced study of major theories, concepts and issues in the study of human security  
Learning Outcomes  
1. Identify and critically evaluate the major concepts and practices in human security; Define, identify and critically think about key issue areas in human security. 2. Develop a coherent body of research in regard to a human security topic of your interest; engage with complex knowledge about human security and apply your analysis to a specific phenomenon. 3. Investigate current, global efforts and challenges in regard to human security.  

POLS 569. Advanced Issues in Globalization  
3 Credits (3)  
Analysis of the globalization process. Covers theories of globalization; global economy; political globalization; global culture; transnational social movements; transnational migration and world labor market; global cities; local-global linkages. Same as SOCI 5460. May be repeated up to 3 credits.  

POLS 570. Seminar in Comparative Politics  
3 Credits (3)  
Examination of methods used for comparing various types of political entities. Investigation of criteria needed to examine a concept across cultures or national boundaries. MA students taking POLS 570 as part of their core requirements must complete the class with a B- or better.  

POLS 574. Contemporary Comparative Studies  
3 Credits (3)  
Major topical, theoretical, and regional issues in international politics. May be repeated once.
POLS 578. Seminar in the U.S.-Mexican Border
3 Credits (3)
An analysis of the political environment along the United States-Mexico border and a survey of the literature available for a number of contemporary issues.

POLS 579. Seminar in Mexican Politics
3 Credits (3)
Advanced research on politics and government of Mexico.

POLS 580. Seminar in Political Theory
3 Credits (3)
Examination of major issues in political theory, including democracy, sovereignty, classical and modern traditions of thought. May be repeated with different subject matter. MA students taking POLS 580 as part of their core requirements must complete the class with a B- or better.

POLS 587. Seminar in Religion and Politics
3 Credits (3)
Historical, theoretical and comparative analyses of the interaction between politics and religion.

POLS 593. Issues in Public Law
3 Credits (3)
Selected issues in public law. May be repeated under a different subtitle for a total of 6 credits.

POLS 596. International Law
3 Credits (3)
Nature, growth and scope of law of nations; rights and obligations of states in peace and war; current issues.

POLS 598. Special Research Programs
1-3 Credits
Individual investigations either theoretical, analytical or experimental. Three credits may be taken per semester for a total of 6 credits for thesis students, and 9 credits for non-thesis students. Consent of instructor required.

POLS 599. Master’s Thesis
1-15 Credits
Thesis.

Government - Bachelor of Arts

Requirements
Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Departmental/College Requirements
The department requires (POLS 1120G) and (POLS 1110G or HNRS 2180G) as degree requirements. These courses will count towards the General Education and Departmental requirements.

|        | Introductory Government Seminar | 1 |
|        | Political Research Skills | 3 |

A Mathematics course is required for the degree but students may need to take any prerequisites needed to enter the Mathematics course of their course first.

Majors should complete these lower level requirements before registering for upper-division government credits.

|        | Senior Seminar (take in final year) | 2 |
|        | Select additional credits in government to bring total credits in major to 33, including 20 upper-division. | 9 |

Second Language: (required - see below)

Electives, to bring the total credits to 120

Total Credits
120

1. See the General Education (p. 88) section of the catalog for a full list of courses
2. A Mathematics course is required for the degree but students may need to take any prerequisites needed to enter the Mathematics course of their course first.
3. Majors should complete these lower level requirements before registering for upper-division government credits.
4. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses
5. A list of approved options is available in the department office.
E lective credit may vary based on General Education course selection, second language requirements, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Note: Students may not count S/U grades taken in their major unless the particular course is regularly graded S/U. All courses must be passed with grades of C- or better. In addition, while research methods courses taken outside of the department may count toward the methods requirement, only POLS 300 Political Research Skills counts toward the 33 credits in the major.

Up to twelve hours of internship credit are available. However, only three hours count toward the major. Internship guidelines are available in the department office and on the Government Department web page, http://deptofgov.nmsu.edu/.

## Second Language Requirement

For the Bachelor of Arts in Government there is a two year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

### Option 1:

Complete one of the following sequences:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHIN 1110</td>
<td>Mandarin Chinese I</td>
<td>3-14</td>
</tr>
<tr>
<td>&amp; CHIN 1120</td>
<td>and Mandarin Chinese II</td>
<td></td>
</tr>
<tr>
<td>&amp; CHIN 2110</td>
<td>and Mandarin Chinese III</td>
<td></td>
</tr>
<tr>
<td>&amp; CHIN 2120</td>
<td>and Mandarin Chinese IV</td>
<td></td>
</tr>
<tr>
<td>FREN 1110</td>
<td>French I</td>
<td>3-14</td>
</tr>
<tr>
<td>&amp; FREN 1120</td>
<td>and French II</td>
<td></td>
</tr>
<tr>
<td>&amp; FREN 2110</td>
<td>and French III</td>

<tr>
<td>&amp; SPAN 2110</td>
<td>and Spanish II</td>
<td></td>
</tr>
<tr>
<td>&amp; SPAN 2120</td>
<td>and Spanish III</td>
<td></td>
</tr>
<tr>
<td>PORT 1110</td>
<td>Portuguese I</td>
<td>3-6</td>
</tr>
<tr>
<td>&amp; PORT 1120</td>
<td>and Portuguese II</td>
<td></td>
</tr>
<tr>
<td>For Heritage Speakers:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>SPAN 1210</td>
<td>Elementary Spanish for Heritage Learners I</td>
<td>3-9</td>
</tr>
<tr>
<td>&amp; SPAN 1220</td>
<td>and Spanish for Heritage Learners II</td>
<td></td>
</tr>
<tr>
<td>&amp; SPAN 2210</td>
<td>and Spanish for Heritage Learners III</td>
<td></td>
</tr>
</tbody>
</table>

### Option 2:

Complete the following sequence for American Sign Language (with a C- or better):

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SIGN 1110</td>
<td>American Sign Language I</td>
<td>3</td>
</tr>
</tbody>
</table>

### Option 3:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHIN 2120</td>
<td>Mandarin Chinese IV</td>
<td>3</td>
</tr>
<tr>
<td>or FREN 2120</td>
<td>French IV</td>
<td></td>
</tr>
<tr>
<td>or GRMN 2120</td>
<td>German IV</td>
<td></td>
</tr>
<tr>
<td>or JAPN 2120</td>
<td>Japanese IV</td>
<td></td>
</tr>
<tr>
<td>or SPAN 2120</td>
<td>Spanish IV</td>
<td></td>
</tr>
</tbody>
</table>

### Challenge the 2120 level for the following courses:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PORT 1120</td>
<td>Portuguese II</td>
<td>3</td>
</tr>
<tr>
<td>or SPAN 2210</td>
<td>Spanish for Heritage Learners III</td>
<td></td>
</tr>
</tbody>
</table>

### Option 4:

Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the Department of Languages and Linguistics.

### Option 5:

Obtain college certification of completion of three years of a second language at the high school level with a grade of C- or higher in the second-year level.

### Option 6:

By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

### Option 7:

By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.

### Option 8:

In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

### A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1130G Survey of Mathematics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Law and Society - Supplemental Major

The Department of Government also coordinates a supplementary major in law and society that may be taken in addition to a regular major. The program is designed to allow students to combine law-related classes offered across a range of departments and disciplines. It is of particular interest to undergraduates interested in law school or who contemplate careers in fields closely related to the legal profession, such as government, politics, social work or law enforcement.

Requirements

The supplementary major consists of 24 credits chosen from the courses listed below. At least 18 credits must be earned in upper-division courses and 6 credits must be earned from listed courses outside the student’s primary major. Candidates for the Law and Society degree must declare their supplementary major prior to completing the last 9 credits of the program.

Government - Master of Arts

The MA program provides general course work in each of the major fields of political science. Students may choose either the thesis option, under which they complete 30 credits of course work plus 6 thesis credits (POLS 599 Master’s Thesis), or the nonthesis option, with 30 credits of course work plus 6 hours of special research credit (POLS 598 Special Research Programs) or 6 hours of approved internship credit (POLS 510 Internship). Both the thesis and nonthesis options require a final oral examination; the non thesis option requires a written examination as well. The program provides a broad-based foundation in political science while allowing students to pursue specific areas of interest.

Requirements

Flexibility in planning a program of study is permitted to meet the educational needs of a diverse student population. Structured areas of emphasis are available in several topical areas, including Latin American and international affairs. Students may also take a graduate minor in Security Studies. Information on these areas and the graduate minor may be obtained from the Department of Government. No more than 9 credits taken outside the department will be counted toward the degree.

The remaining credits required for the degree are selected subject to advisor approval to satisfy particular academic interests or career goals.
Public Administration - Master of Public Administration

The MPA program is accredited by NASPAA. The MPA is designed to provide students with the managerial and analytical skills, in addition to ethical and professional values, necessary to meet the increased demand for skilled public administrators. Candidates who follow this professional program must complete a minimum of 42 credits, consisting of core courses, electives and either an internship or a thesis.

Requirements

Because students have divergent career goals, a thesis or internship option is offered. The thesis option requires an additional 18 credits of course work, 6 credits of thesis (POLS 599 Master’s Thesis), and a written examination covering the thesis and course work. The internship option also requires an additional 18 credits of course work, 3 credits of internship (POLS 510 Internship), and a written examination covering the internship and course work. Students who fail their written examination must take an oral exam. As part of the course work, students selecting the internship option must take POLS 519 Proseminar in Public Administration (3 credits that count toward the 42 total) during the latter part of their studies, and are required to earn a B- grade or higher in that course.

With approval, students may include up to 12 credits of relevant course work from other departments to be counted toward the total credits required for the MPA. These credits may be selected to form a graduate minor in another academic discipline.

MPA - MA Public History Program - Dual Degree

The MPA-MA Public History Option Program requires completion of a minimum of 57 credits of approved course work from the Departments of Government and History, including completing internship credits in both programs. Interested applicants should consult with the MPA director or the director of the Public History Program for additional information.

MPA-MCJ Program - Dual Degree

The MPA-MCJ joint degree option requires completion of a minimum of 57 credits of approved course work from the Departments of Government and Criminal Justice. Students interested in this option should meet with the MPA director or criminal justice graduate advisor for additional information.

Additional Courses

Other graduate courses may become available during the year which may be substituted for the above listed courses. Consideration may be made on a case-by-case basis.

History

Undergraduate Program Information

An undergraduate degree in history prepares students for careers in: teaching; law; public service; management; journalism; education; communications; travel counseling; and library, museum and archival staff work. Students master skills including the ability to read critically, to formulate arguments, to conduct historical research, and to synthesize arguments and create novel interpretations.

Graduate Program Information

The Department of History offers graduate work leading to the Master of Arts degree. In addition to fulfilling the basic requirements for admission to the Graduate School, applicants must present undergraduate passage of at least 12 credits in history with grades of B or higher, including 6 upper division history credits. Those lacking this preparation must normally make up deficiencies before beginning graduate course work. Candidates who choose a course of study requiring a foreign language will be responsible for their own language preparation.

Students applying for admission to the graduate program in history are required to submit an application form and a transcript to the Graduate School and a strong writing sample, three letters of recommendation ideally from History faculty members at NMSU or other institutions, and a two-to-three page statement of purpose to the Department of History, approximately four months in advance of the desired enrollment date.
Applicants for graduate assistantships and fellowships must submit a letter of application, a transcript, and three letters of recommendation to the department by February 15 for the fall semester, and by October 15 for the spring semester. Students who are not applying for graduate assistantships and fellowships may apply at any time for acceptance into the graduate program.

Degrees for the Department

Bachelor Degree(s)
History - Bachelor of Arts (p. 607)

Master Degree(s)
History - Master of Arts (p. 609)
History (Public History) - Master of Arts (p. 609)
Public History and Public Administration - Joint M.A. Degree (p. 594)

Minors for the Department

Undergraduate
History - Undergraduate Minor (p. 609)

History Courses

HIST 1105G. Making History
3 Credits (3)
General introduction to history: how historians carry out research and develop interpretations about the past.

Learning Outcomes
1. Understand and articulate the differences and similarities between history and memory;
2. Analyze and critically interpret primary sources and understand how others might interpret and use the same material in different ways;
3. Recognize and appreciate the diversity of historical experiences and the uses of historical memory in various societies;
4. Understand how historical experiences that include political, geographical, social, cultural, religious and intellectual experiences have been expressed across historical periods;
5. Understand how historical experiences and memories have shaped contemporary societies;
6. Identify and understand the degree to which history has been used and misused in the past;
7. Demonstrate improvement in their ability to read critically, think logically, and express themselves clearly in writing.

HIST 1110G. United States History I
3 Credits (3)
The primary objective of this course is to serve as an introduction to the history of the United States from the pre-colonial period to the immediate aftermath of the Civil War. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of the United States within the context of world societies.

Learning Outcomes
1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed across the course of the centuries for the history of the United States from the pre-colonial period to the immediate aftermath of the Civil War. Bloom Taxonomy's Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy’s Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy’s Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy’s Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy’s Cognitive Process: Create, Apply 8
6. Students will APPLY historical knowledge and historical thinking “in order to infer what drives and motivates human behavior in both past and present.” Bloom Taxonomy’s Cognitive Process: Apply, Analyze 9
HIST 1120G. United States History II
3 Credits (3)
The primary objective of this course is to serve as an introduction to the history of the United States from reconstruction to the present. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of the United States within the context of world societies.

Learning Outcomes
1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of the United States from the reconstruction to the present. Bloom Taxonomy's Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy's Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy's Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy's Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy's Cognitive Process: Create, Apply
6. Students will apply historical knowledge and historical thinking "in order to infer what drives and motivates human behavior in both past and present." Bloom Taxonomy's Cognitive Process: Apply, Analyze

HIST 1140G. World History II
3 Credits (3)
The primary objective of this course is to serve as an introduction to global history from ancient times to the 16th century. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of world societies. May be repeated up to 3 credits.

Learning Outcomes
1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for global history from ancient times to the 16th century. Bloom Taxonomy's Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy's Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy's Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy's Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy's Cognitive Process: Create, Apply
6. Students will apply historical knowledge and historical thinking "in order to infer what drives and motivates human behavior in both past and present." Bloom Taxonomy's Cognitive Process: Apply, Analyze
HIST 1150G. Western Civilization I
3 Credits (3)
This course is a chronological treatment of the history of the western world from ancient times to the early modern era. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of western civilization within the context of world societies. Selective attention will be given to "non-western" civilizations which impact and influence the development of "western" civilization.

Learning Outcomes
1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of the western world from ancient times to the early modern era. Bloom Taxonomy's Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy's Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy's Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy's Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy's Cognitive Process: Create, Apply
6. Students will apply historical knowledge and historical thinking "in order to infer what drives and motivates human behavior in both past and present." Bloom Taxonomy's Cognitive Process: Apply, Analyze

HIST 1160G. Western Civilization II
3 Credits (3)
This course is a chronological treatment of the history of the western world from the early modern era to the present. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of western civilization within the context of world societies. Selective attention will be given to "non-western" civilizations which impact and influence the development of "western" civilization.

Learning Outcomes
1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of the western world from the early modern era to the present. Bloom Taxonomy's Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy's Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy's Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy's Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy's Cognitive Process: Create, Apply
6. Students will apply historical knowledge and historical thinking "in order to infer what drives and motivates human behavior in both past and present." Bloom Taxonomy's Cognitive Process: Apply, Analyze
HIST 1170. Survey of Early Latin America
3 Credits (3)
The primary objective of this course is to serve as a survey of the history of Latin America from pre-Columbian times through independence. This course will explore the contributions of Indigenous peoples, Africans, and Europeans to the creation of Latin America's diverse societies. The elements of this course are designed to inform students on the major events and trends that are essential to the understanding of the history of Latin America within the context of world societies.

Learning Outcomes
1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of Latin America from independence to the present.
2. Bloom Taxonomy's Cognitive Process: Remember and Understand
3. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context.
5. Students will summarize and appraise different historical interpretations and evidence in order to construct past events.
7. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance.
8. Bloom Taxonomy's Cognitive Process: remember, understand, evaluate
9. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience.
11. Students will apply historical knowledge and historical thinking “in order to infer what drives and motivates human behavior in both past and present.”

HIST 1180. Survey of Modern Latin America
3 Credits (3)
The primary objective of this course is to serve as a survey of the history of Latin America from independence to the present. This course will explore the contributions of Indigenous peoples, Africans, and Europeans to the creation of Latin America's diverse societies. The elements of this course are designed to inform students on the major events and trends that are essential to the understanding of the history of Latin America within the context of world societies.

Learning Outcomes
1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of Latin America from independence to the present.
2. Bloom Taxonomy's Cognitive Process: Remember and Understand
3. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context.
5. Students will summarize and appraise different historical interpretations and evidence in order to construct past events.
7. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance.
8. Bloom Taxonomy's Cognitive Process: remember, understand, evaluate
9. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience.
11. Students will apply historical knowledge and historical thinking “in order to infer what drives and motivates human behavior in both past and present.”
HIST 2110. Survey of New Mexico History
3 Credits (3)
The primary objective of this course is to serve as an introduction to the history of New Mexico from the pre-Columbian times to the present day. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of New Mexico within the context of the Americas.

Learning Outcomes
1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of New Mexico from pre-Columbian times to the present day. Bloom Taxonomy’s Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy’s Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy’s Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating, credibility, perspective, and relevance. Bloom Taxonomy’s Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy’s Cognitive Process: Create, Apply
6. Students will apply historical knowledge and historical thinking “in order to infer what drives and motivates human behavior in both past and present.” Bloom Taxonomy’s Cognitive Process: Apply, Analyze

HIST 2245G. Islamic Civilizations to 1800
3 Credits (3)
History of Islamic civilizations to 1800.

Learning Outcomes
1. By the conclusion of the course, the student will be able to demonstrate a knowledge of the history of cultural encounters, exchanges, and conflicts between the Islamic world and the West from the seventh to the sixteenth century;
2. Be able to evaluate the major themes of cultural contact, conflict, and interchange between the Islamic world and the West;
3. Critically read and evaluate historical evidence with the goal of forming an argument about historical evidence
4. Communicate a historical argument logically, clearly, and effectively in writing.

HIST 2246G. Islamic Civilizations since 1800
3 Credits (3)
History of Islamic civilizations since 1800.

Learning Outcomes
1. By the conclusion of the course, the student will be able to demonstrate a knowledge of the history of cultural encounters, exchanges, and conflicts between the Islamic world and the West from the sixteenth century;
2. Be able to evaluate the major themes of cultural contact, conflict, and interchange between the Islamic world and the West;
3. Critically read and evaluate historical evidence with the goal of forming an argument about historical evidence
4. Communicate a historical argument logically, clearly, and effectively in writing.

HIST 2250G. East Asia to 1600
3 Credits (3)
History of China, Korea, Vietnam, and Japan from earliest times through the sixteenth century. Emphasis on cultural and political developments and their social and economic contexts, and the interaction between East Asian societies.

Learning Outcomes
1. Students will learn the analytic skills of interpreting historical changes and continuity.
2. They will assess and use historical documents, and learn how to evaluate varying historical interpretations.
3. Students will understand the chronological and geographic context of important historical events, and will understand the social, technological, economic, cultural and political components of the society under study in this course.
4. Students will understand how people shape their culture and its beliefs, and the way in which prevailing cultures and beliefs shape them.
5. They will understand the historical origins of present-day societies, to learn about their own historical roots.
6. They will learn about the development of structures of power, the production of and distribution of goods, and the relationship between science and technology and human values and behavior.
HIST 2251G. East Asia since 1600
3 Credits (3)
History of China, Korea, Vietnam, and Japan from the sixteenth through
the twentieth centuries. Emphasis on internal development of each
country, as well as the social and political impact of Western Imperialism,
and the emergence of each country's unique version of modern society.
Learning Outcomes
1. Students will learn the analytical skills of interpreting historical
changes and continuity.
2. They will assess and use historical documents, and learn how to
evaluate varying historical interpretations.
3. Students will understand the chronological and geographic context
of important historical events, and will understand the social,
technological, economic, cultural and political components of the
society under study in this course.
4. Students will understand how people shape their culture and its
beliefs, and the way in which prevailing cultures and beliefs shape
them.
5. They will understand the historical origins of present-day societies, to
learn about their own historical roots.
6. They will learn about the development of structures of power, the
production of and distribution of goods, and the relationship between
science and technology and human values and behavior.

HIST 2996. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes.
Community Colleges only. May be repeated for a maximum of 12 credits.
Learning Outcomes
1. Varies

HIST 300. Special Topics
1-9 Credits (1-9)
Specific subjects to be announced in the Schedule of Classes. May be
repeated for a maximum of 18 credits.

HIST 302V. Science in Modern Society
3 Credits (3)
The social impact of scientific activity and thought from Newton to the
present. The growth of modern scientific institutions; the political and
social context of modern science. ENGL 1110G recommended.

HIST 308V. The History of Food
3 Credits (3)
From the earliest uses of fire for cooking up through our modern age of
fast food and organic gardening, human culinary traditions have long
shaped and been shaped by the forces of history. This course offers a
general overview of the history of food production and consumption in
the West from prehistoric times through the 21st century, with a special
focus on the various ways in which social and political history have
impacted dining, taste, and cooking. Among a great variety of topics, we
will focus on the origins of cooked food; ancient Hebrew dietary laws;
the “spice revolution” and the great influence of Arabic cuisine on the
kitchens of medieval Europe; emerging ideas about etiquette and table
manners including the use of the fork; the advent of print and the first
printed cookbooks; the Columbian Exchange and the arrival of foods
from the New World; the rise of French cuisine; food and immigration;
the global dominance of fast food; and sustainable food production
and consumption in the modern era. We will pay a special emphasis
throughout the course to the myriad ways in which food production and
consumption in history have always been gendered, as well as influenced
by ideas about social class.
Learning Outcomes
1. Master a general master narrative about the history of food in the
Western World, including a variety of European countries;
2. Analyze the relationship between food and culture in a variety of
countries and traditions;
3. Critically read and learn to evaluate secondary historical literature,
grasping the strengths and weaknesses of historical monographs;
and
4. Communicate a historical argument logically and effectively in a 20-
page original research paper.

HIST 311V. Colonial Latin America
3 Credits (3)
Social, political, and economic development from Columbus to the Wars
of Independence. Research paper required.

HIST 312V. Modern Latin America
3 Credits (3)
Post-revolutionary developments in the nineteenth and twentieth
centuries; the role of Latin America in world affairs and the Inter-
American system. Research paper required.

HIST 313. Making the American West
3 Credits (3)
Development of the American West from 1803 to 1900 with emphasis
on conquest, federal and corporate roles in western development,
environmental change, and the Mythic West. Includes meetings outside
regular class time to view feature-length films.
HIST 321V. History of Korea
3 Credits (3)
Social, political, and cultural history of Korea from earliest times through twentieth century. Emphasis on the interaction between Korean traditions and influences from China and the West. May be repeated up to 3 credits.

Learning Outcomes
1. Students will learn the analytical skills of interpreting historical changes and continuity.
2. They will assess and use historical documents, and learn how to evaluate varying historical interpretations.
3. Students will also understand the chronological and geographic context of important historical events, and will understand the social, technological, economic, cultural and political components of the society under study in this course.
4. Students will examine how people shape their culture and beliefs, and the way in which prevailing cultures and beliefs shape them.
5. They will understand the historical origins of present-day societies, to learn about their own historical roots.
6. They will learn about the development of structures of power, the production of and distribution of goods, and the relationships between science and technology and human values and behavior.

HIST 323. Cultural History of Later Imperial China
3 Credits (3)
Covers art and literature of China from the Tang Dynasty (618-907) through the eighteenth century. Developments in cultural theory and practice are traced in the context of the social and economic changes fostering an understanding of Chinese cultural history and its legacy in East Asia today.

HIST 329. History of Egypt
3 Credits (3)
History of Egypt from ancient times to the present.

HIST 330V. Introduction to Religious Studies
3 Credits (3)
Provides an overview of old and new methods and theories for the study of religion. Exposure to the ways groups of people in diverse cultural systems construct and change their religious traditions to serve practical and meaningful ends. May be repeated up to 3 credits.

HIST 331. Rebels, Guerrillas, and Terrorists in Modern Latin America
3 Credits (3)
Explores history of rebels in Latin America. Examines guerilla struggles attaining national dimension. Focus on modern events, including Peru's Shining Path, Colombia's FARC, and Mexico's Zapatistas. Same as POLS 468.

HIST 333. Renaissance Europe
3 Credits (3)
This course explores the cultural, social, and political developments of early modern Europe between 1350-1650. This period witnessed a dramatic transformation between the medieval and modern worlds: a transition marked by new historical and artistic visions, the invention of the printing press, the discovery of the New World, the permanent fracturing of Christianity during the Protestant Reformation, the scientific revolution, and the rise of capitalism as a world system. We will consider these and other transformations in this time period both as they were understood by elite society as well as the impact of these innovations upon the daily lives of everyday people and women in particular.

Learning Outcomes
1. Identify the key historical facts, values, and ideas that shaped the history of Europe between 1400–1650;
2. Analyze the causes and effects of the Renaissance, the Age of Encounters, the Reformation, and the Scientific Revolution;
3. Identify the major artistic, literary, and technological contributions of individuals during this time period;
4. Describe how cultural exchanges reveal the global context of events in early modern Europe; and
5. Create well-supported historical arguments based on primary and secondary source evidence.

HIST 334. Art and Life in Renaissance Italy
3 Credits (3)
Examines how Italian Renaissance textual and visual culture offered Europe new ways of seeing and portraying itself, 1350-1550. Topics include: Florence, Venice, Rome, Leonardo, Michelangelo, Titian, humanism, the Medici, and republican and courtly culture. Same as ARTH 444.

HIST 338. World War I
3 Credits (3)
Covers history of world war I. Military and diplomatic events of the war. Consequences of the war.

HIST 339. World War II
3 Credits (3)
Social, cultural and political aspects of World War II, in addition to traditional military events. Emphasis on U.S. involvement.

HIST 343. Recent American Military History
3 Credits (3)
Emphasis on American wars since the Civil War, and on factors contributing to the development of modern military systems.

HIST 347. Civil War Era 1840-1877
3 Credits (3)
Mexican-American War, development of secession, American Civil War, Reconstruction.

HIST 356. The Mexican Revolution
3 Credits (3)
Examines the history of modern Mexico through the lens of the Mexican Revolution, 1910-1920. Course covers military, political, social, cultural and economic developments that shaped Mexico during and after the Revolution.

HIST 361. Afro-American History I
3 Credits (3)
African background, slave trade, slavery; Civil War and Reconstruction; free blacks in a white society to about 1900.
HIST 362. Afro-American History II
3 Credits (3)
Black Americans in the United States in the twentieth century; segregation; black leaders, organizations, methods and goals; white reaction; the struggle for equality.

Learning Outcomes
1. Students will evaluate and employ primary and secondary sources in order to understand varying historical interpretations and craft their own interpretations of historical evidence in discussions and essays. Students will analyze and compare political, economic, social, and intellectual institutions, structures and processes over the period of the Civil Rights Movement through readings, interaction with primary source documents, essays, and discussions. Students will strengthen their argumentative skills through online class discussions and written assignments. Students will demonstrate an understanding of academic honesty and the ability to cite, paraphrase, and quote sources. Students will demonstrate an ability to think about the interaction between present and past issues presented in the class.

HIST 366V. British Imperialism
3 Credits (3)
Survey of the activities of the British empire from the 16th century through the 20th century, with emphasis on Ireland, North America and India. Assesses the impact of imperial activities on British domestic politics, culture and social history, and the process and impact of decolonization.

HIST 368. Teaching History
3 Credits (3)
Philosophical and practical issues of teaching history are explored. Designed to help prospective teachers at all levels clarify their views about studying history. A variety of pedagogical strategies for teaching history are explored.

HIST 371. Ancient Greece
3 Credits (3)
Social, cultural, and political history of Greece from the Minoan to Hellenistic periods.

HIST 372. The Roman World
3 Credits (3)
Republic and Empire; Rome as a world power; institutional, cultural, and intellectual contributions; decline and fall.

HIST 373. Islam and the West: Cultural Contacts, Conflicts and Exchanges
3 Credits (3)
Examines interactions, encounters and cross-fertilization between the Islamic world and the West from the seventh to the twenty-first centuries. Course includes origins of Islam, relationships between Islam, Judaism, and Christianity, and concludes with the post 9/11 present.

HIST 374V. The European City: History and Culture
3 Credits (3)
Course presents the rich, complex history and cultures of European cities from ancient to modern times, linking these cities to crucial issues in European history. Crosslisted with HNRS 374V, GEOG 374V, POLS 374V.

HIST 379V. The History of Italy from the Etruscans to the Mafia
3 Credits (3)
Italy is beloved by many, for its food, language, and art; however, we often understand it only superficially, and often fail to grasp the darker elements of its history. This class will consider the history of the Italian peninsula from the time of its earliest inhabitants, the Etruscans, up through the twenty-first century. We will consider topics such as the Roman world and its legacy, the rise of Christianity, the growth of medieval towns and their economies, Renaissance, the Risorgimento or the formation of the modern nation of Italy. Italian fascism, the wars of the twentieth century, Italian film, the history of Italian food including pizza and pasta, Italian communism, and the growth of organized crime and the mafia. Special attention will be paid throughout to the relationship between Northern and Southern Italy, as well as the special city of Venice and its relationship to the rest of the peninsula.

Learning Outcomes
1. Master a general master narrative about the history of Italy from its earliest inhabitants through the twenty-first century
2. Identify a variety of developments in the history of Italian culture, including art, literature, food, and film;
3. Critically read and evaluate primary and secondary historical sources and
4. Communicate a historical argument logically and effectively in a 15-page original research paper.

HIST 382V. Modern Russia
3 Credits (3)
Domestic policies and foreign relations from mid-nineteenth century to the present with emphasis on the Soviet period.

HIST 383. Germany
3 Credits (3)
Political, social, and cultural developments from the eighteenth century to the present, with emphasis on the Nazi era. Same as POLS 473.

HIST 386. New Mexico History
3 Credits (3)
Economic, political and social development of New Mexico from exploration to modern times.

HIST 387. Spain in the New World: Conquest, Conflict, and Cultural Exchange
3 Credits (3)
The history of Spain, with a focus on Spain's interaction with the New World. May be repeated up to 3 credits.

Learning Outcomes
1. The student will be able to demonstrate a knowledge of the history of Spanish contacts, conquests, and influences in the New World from the late fifteenth century until the early twenty first century;
2. Be able to evaluate the major themes of cultural contact, conflict, and interchange between the Spain and the New World; Critically read and evaluate historical evidence in order to construct past events;
3. Communicate a historical argument logically, clearly, and effectively in writing.

HIST 390V. The Holocaust
3 Credits (3)
The attack upon European Jews by Adolf Hitler and the National Socialist Party in Germany and occupied Europe from his accession to chancellor in 1933 until the end of the Third Reich in 1945.
HIST 397. Introduction to Public History
3 Credits (3)
Surveys how historians do history in museums, archives, government agencies, and in communities. Hands-on experience provides students a better understanding of history and how historians work outside of the classroom. Seminar project required.

HIST 398. Historians and History
3 Credits (3)
General historiography and philosophy of history; historical methodology, research, and writing; bibliographical aids and their uses. May be repeated up to 3 credits. Restricted to: HIST majors.

HIST 400. Special Topics
1-9 Credits (1-9)
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 18 credits.

HIST 402. Special Topics in European History
3 Credits (3)
Special topics in European history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 403. Special Topics in Middle Eastern History
3 Credits (3)
Special topics in Middle Eastern history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 404. Special Topics in Asian History
3 Credits (3)
Special topics in Asian history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 406. Special Topics in United States History
3 Credits (3)
Special topics in United States history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 413. Native American History
3 Credits (3)
Seminar explores the history of Native Americans, including tribal conflicts, interactions with Europeans and Euro-Americans, land loss, degradation of natural resources, federal Indian policy, pan-Indian movements, cultural resistance and revitalization, and modern tribal economies.

HIST 414. The Constitution and U.S. History
3 Credits (3)
This seminar examines the history and political context of the ideas that coalesced in the U.S. Constitution, from 1603 to the writing of the Constitution and into the Early Republic.

Learning Outcomes
1. Students will evaluate and employ primary and secondary sources in order to understand varying historical interpretations and craft their own interpretations of historical evidence in discussions and essays.
2. Students will analyze the relationship between historical events in the Atlantic world and the development of key political concepts including divine right monarchy, constitutional monarchy, individual representation, the social contract theory, checks and balances, and the theoretical and practical processes of constitution-writing and ratification.
3. Students will strengthen their critical thinking argumentative skills through class discussions.
4. Students will demonstrate public speaking and class leadership skills by preparing and leading class discussions.
5. Students will demonstrate an understanding of academic honesty and the ability to cite, paraphrase, and quote sources.
6. Students will demonstrate an ability to think about the interaction between present and past issues presented in the class.
7. Students will undertake a major project of historical synthesis at the end of the semester.

HIST 428. History of Terrorism in Modern Europe and the Middle East
3 Credits (3)
Analyzes causes, methods, and consequences of terrorism in Europe and the Middle East from the Reign of Terror in the French Revolution to Al-Qaeda, Hamas and Hezbollah in the contemporary Middle East and beyond.

HIST 431. History of Race and Ethnicity
3 Credits (3)
Seminar explores the historical social construction of race and ethnicity, and their relationship to other systems of social difference such as class and gender. Course will examine popular and academic theories of race and ethnicity as well as historical concrete effects of racial and ethnic differences in society.

HIST 432. United States Labor History to 1877
3 Credits (3)
Seminar discussions explore United States labor and working-class history to 1877, including such topics as pre-industrial and industrial labor, slavery, debt peonage, indentured servitude, and housework. May explore the history of labor organization, working-class culture and leisure activities, and responses to labor issues by the state.

HIST 433. United States Labor History Since 1877
3 Credits (3)
Seminar discussions explore United States labor and working-class history since 1877, including such topics as industrial labor, debt peonage, and housework. May explore the history of labor organization, working-class culture and leisure activities, and responses to labor issues by the state. May be repeated up to 3 credits.
HIST 434. Urban History
3 Credits (3)
Seminar discusses cities as complex catalysts for cultural, political, and scientific development, both within cities themselves and more broadly for their nations and regions. Course deals with such topics as the relationship between social organization and physical space; city development, morphology and dynamics; and the cultural and intellectual history of cities.

HIST 435. History of War and Revolution
3 Credits (3)
Seminar covers historical dynamics of violent social, political, and economic transitions. May focus upon a particular war or upheaval, such as World War II or the French Revolution, or may examine more generic characteristics of conflict and radical change across many historical examples. Extensive readings in scholarly literature. Research projects relating to specific course contents.

HIST 438. Antiquity and Modernity
3 Credits (3)
Seminar explores links between earlier and more recent historical periods. Examples may include the Renaissance rediscovery of ancient Rome or the early modern Chinese reassessment of its classical Confucian heritage. Readings include ancient sources and the modern reception of such works, and the scholarly assessment of these processes. Individual research projects required in areas of student interests.

HIST 443. The Cold War in Latin America
3 Credits (3)
Seminar discusses Latin American political history during the Cold War. Course focuses on how Latin Americans (individuals, parties, militaries, states) acted in an increasingly politicized arena defined by growing United States concerns over Cuban and Soviet influence in the area.

HIST 448. Nuclear Nation
3 Credits (3)
Explores post-World War II history and the impact atomic energy has had on the United States and the world.

HIST 449. Readings
1-3 Credits
Individual study of selected readings and problems. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

HIST 453. Cuba: Colony to Castro
3 Credits (3)
Economic, social, and political development of Cuba and other colonies and nations in the Caribbean with emphasis on recent events.

HIST 471. China through the Ming Dynasty
3 Credits (3)
History of China from origins to Ming dynasty, (1368-1644). Cultural and political development with emphasis on social and economic contexts and long term trends.

HIST 472. China in the Modern World
3 Credits (3)
History of China from seventeenth through twentieth centuries. Rise and fall of the Manchu Qing dynasty, internal dynamics of social and political change in nineteenth and twentieth centuries, impact of Western Imperialism, and development of the Peoples Republic since 1949.

Learning Outcomes
1. Students will learn the basic narrative of modern Chinese history.
2. Students will learn to understand and evaluate historical arguments and interpretations. Students will learn to work with primary sources and to analyze and interpret their contents. Students will complete a research paper combining primary and secondary sources and making a sustained historical argument.

HIST 473. History of Japan
3 Credits (3)
History of Japan through twentieth century. Political and cultural developments and their social and economic contexts. Chinese influence on early Japan, rise of Samurai and Shogunate, impact of Western Imperialism, and emergence of modern Japan.

HIST 474. Gender in East Asian History
3 Credits (3)
Examines the position of women and the social roles of both sexes in traditional China and Japan, and traces the changes taking place in those societies in the course of modernization in the last century and a half. Scholarly literature and works of Chinese and Japanese literature in translation and cinema used. Same as GNDR 474.

HIST 475. History of the Global Political Economy
3 Credits (3)
Traces development of global systems of economic interaction and the rise of European military and political dominance in the 18th and 19th centuries. Emphasis on East and South Asian roles in early modern history, and on challenges to European dominance in the 20th and 21st centuries.

HIST 479. Oral History
3 Credits (3)
Oral history through readings, discussions, and interviews. Semester project required that includes an interview and transcript.

HIST 483. Historic Preservation
3 Credits (3)
Study of community development, the historic preservation movement, and the built environment. Field project.

HIST 486. Interpreting Historic Places for the Public
3 Credits (3)
Explores historic site interpretation, the scholarship and philosophy of historic interpretation, and the nature of heritage interpretation for historic places.

HIST 489. Projects in History
3 Credits (3)
Individual projects in history. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

HIST 500. Special Topics
1-9 Credits (1-9)
Specific subjects to be announced in the Schedule of Classes. Graduate research paper required. May be repeated for a maximum of 12 credits.
HIST 504. Civil War Era, 1840-1877  
3 Credits (3)  
Mexican-American War, development of secession, American Civil War, Reconstruction. Graduate research paper required.

HIST 511. Making the American West  
3 Credits (3)  
Development of the American West from 1803 to 1900, with emphasis on conquest, federal and corporate roles in western development, environmental change, and the mythic West. Includes extra class meetings to view feature-length films. Graduate research paper required.

HIST 514. The Constitution and U.S. History  
3 Credits (3)  
This seminar examines the history and political context of the ideas that coalesced in the U.S. Constitution, from 1603 to the writing of the Constitution and into the Early Republic.

Learning Outcomes  
1. Students will evaluate and employ primary and secondary sources in order to understand varying historical interpretations and craft their own interpretations of historical evidence in discussions and essays. Students will analyze the relationship between historical events in the Atlantic world and the development of key political concepts including divine right monarchy, constitutional monarchy, individual representation, the social contract theory, checks and balances, and the theoretical and practical processes of constitution-writing and ratification. Students will strengthen their critical thinking argumentative skills through class discussions. Students will demonstrate public speaking and class leadership skills by preparing and leading class discussions. Students will demonstrate an understanding of academic honesty and the ability to cite, paraphrase, and quote sources. Students will demonstrate an ability to think about the interaction between present and past issues presented in the class. Students will undertake a 10-12 page research paper in which they will integrate and extend learned material.

HIST 523. The History of Food  
3 Credits (3)  
Considers the history of the production and consumption of food in the West from the Neolithic Age to the present with an emphasis on the historical relationships between food, gender, social class, social identity and nationalism.

HIST 527. Labor History  
3 Credits (3)  
Seminar discussions explore labor and working-class history, including such topics as pre-industrial labor, slavery, debt peonage, indentured servitude, and housework. May explore the history of labor organization, working-class culture and leisure activities, and responses to labor issues by the state.

HIST 528. History of Terrorism in Modern Europe and the Middle East  
3 Credits (3)  
Advanced analyses of causes, methods, and consequences of terrorism in Europe and the Middle East from the Reign of Terror in the French Revolution to Al-Qaeda, Hamas, and Hezbollah in the contemporary Middle East and beyond.

HIST 535. War and Revolution  
3 Credits (3)  
Seminar covers historical dynamics of violent social, political and economic transitions. May focus upon a particular war or upheaval, such as World War II or the French Revolution, or may examine more generic characteristics of conflict and radical change across many historical examples. Extensive readings in scholarly literature. Research projects relating to specific course contents.

HIST 538. Special Topics in European History  
3 Credits (3)  
Advanced special topics in European history to be announced in the schedule of classes. May be repeated for a maximum of 12 credits.

HIST 540. Special Topics in Middle Eastern History  
3 Credits (3)  
Advanced special topics in Middle Eastern history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 543. Special Topics in Asian History  
3 Credits (3)  
Advanced special topics in Asian history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 545. Special Topics in United States History  
3 Credits (3)  
Advanced special topics in United States history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 548. Nuclear Nation  
3 Credits (3)  
Explores post-World War II history and the impact that atomic energy has had on the United States and the world.

HIST 549. Graduate Readings  
1-3 Credits  
Individual study of selected readings and problems. May be repeated for a maximum of 6 credits.  
Prerequisite: consent of instructor.

HIST 553. Cuba: Colony to Castro  
3 Credits (3)  
Economic, social, and political development of Cuba and other colonies and nations in the Caribbean, with emphasis on recent events. Graduate research paper required.

HIST 557. The Mexican Revolution  
3 Credits (3)  
Origins, causes, and scope of the Mexican Revolution, including leading personalities, with emphasis on the U.S.-Mexican border. Graduate research paper required.

HIST 566. British Imperialism  
3 Credits (3)  
Survey of the activities of the British empire from the 16th century through the 20th century, with emphasis on Ireland, North America and India. Assesses the impact of imperial activities on British domestic politics, culture and social history, and the process and impact of decolonization.

HIST 568. Urban History  
3 Credits (3)  
Seminar discusses cities as complex catalysts for cultural, political, and scientific development, both within cities themselves and more broadly for their nations and regions. Course deals with such topics as the relationship between social organization and physical space; city development, morphology and dynamics; and the cultural and intellectual history of cities.
HIST 570. The Cold War in Latin America
3 Credits (3)
Seminar discusses Latin American political history during the Cold War. Course focuses on how Latin Americans (individuals, parties, militaries, states) acted in an increasingly politicized arena defined by growing United States concerns over Cuban and Soviet influence in the area.

HIST 571. China through the Ming Dynasty
3 Credits (3)
History of China from origins to Ming Dynasty, 1368-1644. Cultural and political development with emphasis on social and economic contexts and long term trends. Research paper required.

HIST 572. China in the Modern World
3 Credits (3)
Covers the history of China from 17th through 20th centuries. Rise and fall of the Manchu Qing dynasty, internal dynamics of social and political change in the 19th and 20th centuries, impact of Western imperialism, and development of the Peoples Republic since 1949. Research paper required. May be repeated up to 3 credits.

Learning Outcomes
1. Students will learn the basic narrative of modern Chinese history. Students will learn to understand and evaluate historical arguments and interpretations. Students will learn to work with primary sources and to analyze and interpret their contents. Students will complete a research paper combining primary and secondary sources and making a sustained historical argument.

HIST 573. History of Japan
3 Credits (3)
Covers the history of Japan through the 20th century. Political and cultural developments and their social and economic contexts. Chinese influence on early Japan, rise of Samurai and Shogunate, impact of Western imperialism, and the emergence of modern Japan. Research paper required.

HIST 574. Gender in East Asian History
3 Credits (3+2P)
Examines the position of women and the social roles of both sexes in traditional China and Japan, and traces the changes taking place in those societies in the course of modernization in the last century and a half. Scholarly literature and works of Chinese and Japanese literature (in translation) and cinema used. Same as GNDR 574.

HIST 575. History of the Global Political Economy
3 Credits (3)
Traces development of global systems of economic interaction and the rise of European dominance in the 18th and 19th centuries. Emphasis on East and South Asian roles in early modern history, and on challenges to European dominance in the 20th and 21st centuries.

HIST 578. Modern Russia
3 Credits (3)
Domestic policies and international relations from the mid-nineteenth century to the present with emphasis on the Soviet experience.

HIST 579. Oral History
3 Credits (3)
Oral history through readings, discussion, and interviews. Course project required that includes an interview and transcription.

HIST 580. Graduate Research Projects
1-6 Credits (1-6)
Intensive investigation of a selected area of history, including the completion of a research paper or a public history project. Consent of instructor required.

HIST 583. Advanced Historic Preservation
3 Credits (3)
Covers the community development, the historic preservation movement, and the built environment. Field project and additional graduate work.

HIST 585. Public History Internship
3 Credits (3)
Individual project in an area of public history, including a final written report. Research project required. May be repeated for a maximum of 9 credits.

Prerequisite: consent of instructor.

HIST 586. Interpreting Historic Places for the Public
3 Credits (3)
Advanced study of historic site interpretation, the scholarship and philosophy of historic interpretation, and the nature of heritage interpretation for historic places.

HIST 590. Reading Seminar: Borders, Boundaries and Frontiers
3 Credits (3)
Explores questions and issues concerning different kinds of borders, boundaries and frontiers. Introduces relevant theoretical literature and considers specific places and times through case studies, including U.S.-Mexico border. Restricted to students in HIST program.

HIST 591. Reading Seminar: Modernity and its Discontents
3 Credits (3)
Examines the problem of modernization and the meaning of becoming and being modern, including positive and negative effects on individuals, cultures, environments and societies.

HIST 592. Reading Seminar: Nature and Society
3 Credits (3)
Considers how humans and nature have reshaped each other. People have perceived nature, how different cultures have understood their relationships to nature, and how social groups and nations have struggled over natural resources. Takes a comparative, transnational approach.

HIST 593. Reading Seminar: History, Myth and Memory
3 Credits (3)
Course analyzes the complex and often contested process of writing national histories, creating national heroes, and forging collective memories. Students assess written texts, memorials, parades and celebrations.

HIST 594. Public History Seminar
3 Credits (3)
Introduction to the discipline of public history, including its methodology and literature. Fieldwork is required.

HIST 596. Research Seminar
3 Credits (3)
Research seminar teaches students the process of conducting original historical research with primary source documents. Students will then use these research skills to produce a polished chapter or article-length manuscript. Restricted to HIST majors.

HIST 597. Public History Article
1-9 Credits (1-9)
Researching and writing an article suitable for publication about a student’s public history internship or other topic of interest within the field of public history.
HIST 598. Craft of History: Historical Theories, Methods, and Criticism (f)  
3 Credits (3)  
Introduction to historical theories, methodologies, criticism, and skills essential to graduate study in history. Required for all history graduate students; restricted to history majors.

HIST 599. Master's Thesis  
1-15 Credits (1-15)  
Thesis.

Name: Dana Barksdale, Administrative Assistant  
Office Location: Breland Hall Room 330

History - Bachelor of Arts  
The undergraduate history major consists of at least 36 credits in the major field, 21 credits of which must be numbered 300 or above. All courses must be passed with grades of C- or higher, and none may be taken on an S/U basis. Electives must be carefully selected by the student and approved by a Department of History advisor so that the student's program is well tailored to individual goals. All majors must be advised prior to registration.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Required Course

Students should take HIST 398 in their Junior year, if possible.  

HIST 398  Historians and History

Select at least 18 credits of upper-division courses, excluding HIST 398. At least 6 credits of upper-division courses must be at the 400 or above level.  

Second Language Requirement: (not required)

Electives, to bring the total credits to 120  
Select sufficient electives to bring total credits to 120, including 48 upper-division credits.

Total Credits 120

1  See the General Education (p. 88) section of the catalog for a full list of courses.
2  A Mathematics course is required for the degree but students may need to take any prerequisites needed to enter the course first.
3  See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.
4  Students who complete their Humanities General Education requirements with courses outside of the HIST prefix will need to take an additional 6 credits of lower-division HIST, in order to complete the requirement with a total of 12 credits.
5  Majors must pass a total of 21 upper division History credits (including HIST 398 Historians and History) with at least 6 at the 400 level.  
HIST 311V Colonial Latin America and HIST 312V Modern Latin America cannot be counted towards this requirement.
Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

**Second Language Requirement**
For the Bachelor of Arts in History there is no second language requirement for the degree.

**Secondary Licensure**
History majors who are planning on pursuing certification as public school teachers should take the following six courses in preparation. These six courses will complete approximately half of the course work necessary for students to earn teaching licensure in New Mexico. After completing the undergraduate degree in History with a grade point average of 2.5 or above, the student should apply to the Graduate School for admission to the Department of Curriculum and Instruction and the Teacher Education Program in the College of Education to pursue the remaining courses needed to complete secondary licensure.

**A Suggested Plan of Study for Students**
This roadmap assumes student placement in MATH 1130G Survey of Mathematics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

**Total Credits** 36

**Dual Track M.A. (Public History and Thesis)**

Students choosing to pursue both the thesis track and Public History concentration must complete the course hours required for the public history concentration, perform an internship, and defend the proposed thesis before undertaking it using guidelines provided by the department, present the public history portfolio at a public presentation, complete the thesis, and defend their course work, thesis and public history portfolio at a final oral examination. In order to satisfactorily complete both programs, such students would complete 39 credits, including three hours of internship credit and six hours of thesis work.

</table>
Students in the Public History concentration must collectively pass 18 credits of nonpublic history courses, including the nonpublic history seminars noted above. They must collectively pass 18 credits in public history, which must include the public history seminar, the internship, and the article. The scholarly article is developed through work in the internship and will be of peer reviewed journal quality. The public history credits may include a maximum of 9 graduate level (450-and-above) credits outside the Department of History with permission of the Director of the Public History Program. A student choosing the Public History concentration must pass an article proposal defense about the proposed scholarly article during the first semester after completion of the internship. The department will provide guidelines for the article defense. A student choosing the Public History specialization must give a public presentation of a portfolio that includes his/her work and the scholarly article, and must pass an oral examination over graduate course work, the internship, and the article. Students who receive a Master’s degree in this track will have a specialization in Public History added to their transcripts.

### Public History and Public Administration - Dual M.A. Degree

The Department of History and the Department of Government offer a dual degree in which students who are accepted into both of these programs may simultaneously earn both a Master of Arts in History degree with the Public History specialization, and a Master of Public Administration degree. The dual degree requires 57 total credits, while students who pursued both degrees as separate degrees would need to pass at least 72 credits. Students earning the dual degrees must pass a joint oral examination after passing required courses and completing internship credits in both programs. Students interested in the dual degree program should consult with the Director of the Public History Program and the Director of the Master of Public Administration Program.

### History - Graduate Minor

Students may earn a graduate minor in History by passing the following courses:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST</td>
<td>Craft of History</td>
<td>3</td>
</tr>
<tr>
<td>Select one from the following:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>HIST 590</td>
<td>Reading Seminar: Borders, Boundaries and Frontiers</td>
<td>3</td>
</tr>
</tbody>
</table>

Graduate students in History must maintain a 3.0 grade point average in their History courses. A graduate student earning a C or lower grade in one History course will receive a letter of warning. A graduate student earning two or more C or lower grades in History courses or whose History grade point average falls below 3.0 will be removed from the History graduate program. Students must earn at least one B or higher grade in a seminar during their first year in the graduate program, and must take at least one seminar during each year in which they are enrolled in the program. If a graduate student receives one U (Unsatisfactory) grade on his/her thesis or internship, the student will receive a written warning, and if a student received two or more U grades on his/her thesis or internship, the student will be removed from the program.

### Interdisciplinary Studies

The Interdisciplinary Studies Department houses the Bachelor of Applied Studies and Bachelor of Individualized Studies; Gender and Sexuality Studies Bachelor of Arts degree, Undergraduate Minor, and Graduate Minor; and the International Studies Undergraduate Minor.

### Undergraduate Program Information

The Interdisciplinary Studies Department offers a Bachelor of Arts in Gender & Sexuality Studies, an Undergraduate Minor in Gender & Sexuality Studies, and a Graduate Minor in Gender and Sexuality Studies. Gender and Sexuality Studies specializes in the examination of gender; gender identity; queer and transgender studies; feminisms; and social justice from interdisciplinary perspectives. This field of study equips students with analytical skills and knowledge to engage power structures critically and to transform lives and communities. Courses are offered both online and on campus, and this degree is one of a few at NMSU in which all major and minor requirements can be taken online.

### International Studies

The Interdisciplinary Studies Department offers an Undergraduate Minor in International Studies, an interdisciplinary program enabling students, regardless of their major area of study, to develop a broad understanding of the rapidly changing global environment by proving a curriculum that encompasses the social, political, cultural and economic forces at work in an increasingly interdependent world.

Though not a requirement, students working toward the Undergraduate Minor in International Studies can also take part in the Peace Corps Prep Program at NMSU, a program that fits well with aims of the minor. This program is designed to be a component of an undergraduate curriculum that includes experiential-based community service and selected courses to help prepare students for volunteer service in international development.

Interdisciplinary Courses

INTR 300. Foundations of Interdisciplinary Studies
3 Credits (3)
Introduction to Bachelor of Individualized Studies (BIS) and Bachelor of Applied Studies (BAS) degree programs. Explores roles of interdisciplinary studies in contemporary world and how emerging and perennial problems and issues can be comprehended utilizing multiple theoretical and analytic methods. Students design or update their course of study for earning the BIS or BAS degree. Consent of Instructor required. Restricted to Las Cruces campus only.

INTR 301. Interdisciplinary Research: Theory & Practice
3 Credits (3)
Focuses on knowledge gained through interdisciplinary research. Students develop comprehensive understanding of steps of systematic inquiry into interdisciplinary research questions. Includes active learning through design and implementation of an interdisciplinary research project. For BIS and BAS majors only. Consent of Instructor required.

Gender & Sexuality Studies Courses

GNDR 2110G. Introduction to Women, Gender, and Sexuality Studies
3 Credits (3)
This course introduces students to key concepts, debates, and analytical tools informing Women's, Gender, and Sexuality Studies. As an interdisciplinary field of study, Women's, Gender, and Sexuality Studies employs academic perspectives from a range of disciplines and theoretical approaches. It also incorporates lived experience and social location into its object of analysis. Though content will vary according to the expertise and focus of the instructor, this course will develop tools through readings and assignments that critically analyze how gender and sexuality are shaped by different networks of power and social relations and demonstrate how the intersections of race, class, disability, national status, and other categories of identity and difference are central to their understanding and deployment. In addition to feminist thought, areas of focus might include gender and sexuality in relation to social, cultural, political, creative, economic, or scientific discourses. This class is recommended for those with a general interest in the topic area as well as for those seeking a foundational course for further study.

Learning Outcomes
1. Understand foundational concepts, theories, and approaches to gender and sexuality in conjunction with contemporary social justice movements such as feminism.
2. Describe the range of social and political forces that shape and are shaped by gender, sexuality, race/ethnicity, and other intersecting categories of identity.
3. Demonstrate the ability to conduct intersectional analysis.
4. Develop and improve skills in reading, critical thinking, academic writing, and public speaking.

GNDR 2120G. Representing Women Across Cultures
3 Credits (3)
Historical and critical examination of women’s contributions to the humanities, with emphasis on the issues of representation that have contributed to exclusion and marginalization of women and their achievements.

Learning Outcomes
1. To think critically about contemporary discourses on gender, race, sexuality, and class.
2. To understand how forms of identity intersect with one another
3. To explore the ways power and privilege operate in contemporary society
4. To understand some of the ways social inequalities develop, function, and change
5. To further students’ interest in developing their own ideas and research in issues of women and gender, sexuality, race, class, and nation

GNDR 350. Special Topics
3 Credits (3)
The topic of course will vary and will be indicated by subtitle. May be cross-listed with relevant courses at the 300-level from any specific department. May be repeated under different subtitle(s).

GNDR 352. Women’s & Mass Media
3 Credits (3)
Portrayal and participation of women in mass media from colonial to contemporary times. Same as JOUR 380. May be repeated up to 3 credits.
GNDR 359. Psychology of Gender
3 Credits (3)
Examines theories and research on the psychological functioning of women and men in North American society, including influential theories of gender in psychology and current controversies in the psychological literature. Topics include those unique to women and unique to men in development across the lifespan, work, physical and mental health, sexuality, victimization, gender stereotypes, gender comparisons in abilities and personality, and biological, social, and cultural influences on behavior. Crosslisted with: PSYC 359.
Prerequisite(s): PSYC 1110G.

GNDR 360. Masculinities Studies
3 Credits (3)
Explores how contemporary American culture constructs manhood and masculinity. Interrogates ideas and enactments of masculinity, especially as they intersect with race/ethnicity, class, and sexuality. The class asks how sexuality, gender construction, and sex roles inform our understanding of masculinity, as well as how masculinity relates to social power.

GNDR 380V. Women Writers
3 Credits (3)
Introduction to multicultural women's traditions through intensive study of works by women writers. Same as ENGL 380V.

GNDR 381V. Women's Health Issues
3 Credits (3)
A focus on the unique issues and problems that confront women today and how they affect the health of women. Crosslisted with: PHLS 3120V. May be repeated up to 3 credits.

GNDR 401. Women & Immigration
3 Credits (3)
Explores historical and contemporary immigration processes in/to the U.S. that are shaped by gendered dynamics, societal structures, and the socio-economic conditions that impact immigrant women. Examines how immigrant women use their agency and resistance to overcome exploitative circumstances, and the restraints of immigration laws and policies that impact individual, communal and societal change.

GNDR 402. Transnational Feminisms
3 Credits (3)
Explores dimensions of gender, race, class, and sexuality in conjunction with nationalism, anti-capitalist struggles, religious fundamentalism, militarism, globalization, eco-critique, and the politics of resistance and social movements.

GNDR 403. Gender & Horror
3 Credits (3)
Explores cultural anxieties and crises through the genre of horror as they relate to issues of gender, sexuality, feminism, and race. Traces ways horror films represent and reconfigure notions of sexuality and gender and ways they reinforce and/or challenge social norms.

GNDR 405. Alternative Genders and Sexualities
3 Credits (3)
Examines queer, transgender, non-binary, and intersex gender identities and queer/non-heterosexual sexualities through literature, film, and critical theory

GNDR 407. Gender and Graphic Narrative
3 Credits (3)
Examines graphic novels that disrupt stereotypical ideas about genre, gender, race, class sexuality, as well as common notions about comics. Considers texts that address underrepresented experiences.

GNDR 408. Feminist Food Studies
3 Credits (3)
Examines contemporary food writing as a way to study identity, social structures, and notions of acceptability. Explores how constructions of food shape bodies, desires, and notions of belonging.

Learning Outcomes
1. Apply critical thinking and critical writing competencies about race, ethnicity, gender sexuality, and class, as well as food and culture.
2. Analyze representations of food and culinary practices in literature, film, and other cultural production as a reflection of larger social forces.
3. Develop a scholarly vocabulary for discussing themes of race and ethnicity, gender and sexuality, class, citizenship and belonging, dislocation and exile, labor and consumption.

GNDR 411. Gender and Migration
3 Credits (3)
Explores multiple experiences of forced migration and displacement. Examines violence, structural dislocation, neoliberalism, globalization, economic collapse and civil war. Discusses local, regional and global responses to creating meaningful change in communities most affected by migration.

GNDR 412. Gender and Film Studies
3 Credits (3)
Examines the shifting cultural and theoretical meanings of gender and sexuality across a variety of film genres while also analyzing the role of formal film elements in shaping representation and reception.

GNDR 433V. Sex, Gender and Culture
3 Credits (3)
This seminar course introduces students to the anthropological study of gender. We take an integrated approach to the subject, considering the ways that different kinds of anthropological research, including archaeology, biological anthropology, ethnography, etc., expand our understanding of the various ways gender is defined across space and time, how it is lived, and what it means to us and others. Students will review the historical context and development of this subject within the field, and will explore such topics as sex versus gender, embodiment and gendered performance, gender hierarchies, the politics of reproduction, and globalization. May be repeated up to 3 credits.

Learning Outcomes
1. Identify and evaluate different anthropological approaches to the study of gender Develop and employ analytical and critical thinking skills Demonstrate proficiency in oral and written communication Integrate and synthesize knowledge of gender-related topics in a research paper

GNDR 450. Special Topics
3 Credits (3)
The topic of course will vary and will be indicated by subtitle. May be cross-listed with relevant courses at the 400-level from any specific department. May be repeated under different subtitle(s).

GNDR 451. Women’s Studies Practicum
3 Credits (3)
Supervised field work in community setting relating to women. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.
GNDR 454. Women Crossing Borders
3 Credits (3)
Experiences of women who cross class, race, cultural, national, or sexual borders including theories regarding women’s interactions across borders. Emphasis will vary with professor and discipline.

GNDR 455. Feminist Research Methodologies
3 Credits (3)
Study of feminist methodologies, covering transnational decolonizing Indigenous, Chicana feminist approaches to research, such as storytelling, narrative, testimonio, platica, research-based art, performed ethnography and participatory action research.

GNDR 461. Women’s Studies: Independent Study
3 Credits (3)
Individual study of selected topic and writing of research paper. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

GNDR 465. Sex, Gender and the Body
3 Credits (3)
Examines forces at work in defining and differentiating gender, race, sexuality. How ideas about what is ‘natural’ and ‘normal’ for men and women shifted over time. Considers different discourses shaping embodied experiences and categories of identity.

GNDR 471. Seminar in Feminist Theory
3 Credits (3)
Contemporary feminist inquiry and knowledge production concerning social structures and systems, lived realities, and the ways these impact each other.
Learning Outcomes
1. Demonstrate through discussion, research, and writing knowledge of shifts, differences, and debates in feminist theoretical discourse.
2. Analyze a range of contemporary feminist critical theory in discussions, essay assignments, and exams.
3. Formulate theories and forge connections between feminist discourses through written and other assignments

GNDR 474. Gender in East Asian History
3 Credits (3)
Examines the position of women and the social roles of both sexes in traditional China and Japan, and traces the changes taking place in those societies in the course of modernization in the last century and a half. Scholarly literature and works of Chinese and Japanese literature in translation and cinema used. Same as HIST 474.

GNDR 472. Gender and Popular Culture
3 Credits (3)
Intensive study of the representations of gender in popular culture. Examines the historical, aesthetic, and cultural contexts of these representations and the various critical and theoretical lenses we use to understand them. Repeatable under different subtitles. May be repeated up to 6 credits.

GNDR 481. Advanced Women & Immigration
3 Credits (3)
Advanced exploration of historical and contemporary immigration processes in/to the U.S. that are shaped by gendered dynamics, societal structures, and the socio-economic conditions that impact immigrant women. Examines how immigrant women use their agency and resistance to overcome exploitative circumstances, and the restraints of immigration laws and policies that impact individual, communal and societal change.

GNDR 502. Advanced Transnational Feminisms
3 Credits (3)
Advanced analysis of dimensions of gender, race, class, and sexuality in conjuction with nationalisms, anti-capitalist struggles, religious fundamentalism, militarism, globalization, eco-critique, and the politics of resistance and social movements.

GNDR 505. Advanced Alternative Genders and Sexualities
3 Credits (3)
Intensive exploration of queer, transgender, non-binary, and intersex gender identities and queer/non-heterosexual sexualities through literature, film, and critical theory.

GNDR 507. Advanced Gender and Graphic Narrative
3 Credits (3)
Advanced examination of graphic novels that disrupt stereotypical ideas about genre, gender, race, class sexuality, as well as common notions about comics. Considers texts that address underrepresented experiences.

GNDR 508. Advanced Feminist Food Studies
3 Credits (3)
Advanced examination of contemporary food writing as a way to study identity, social structures, and notions of acceptability. Intensive exploration of how constructions of food shape bodies, desires, and notions of belonging.
Learning Outcomes
1. Apply critical thinking and critical writing competencies about race ethnicity, gender sexuality, and class, as well as food and culture.
2. Analyze representations of food and culinary practices in literature, film, and other cultural production as a reflection of larger social forces.
3. Develop a scholarly vocabulary for discussing themes of race and ethnicity, gender and sexuality, class, citizenship and belonging, dislocation and exile, labor and consumption.

GNDR 511. Advanced Gender and Migration
3 Credits (3)
Advanced exploration of multiple experiences of forced migration and displacement. Intensive examination of violence, structural dislocation, neoliberalism, globalization, economic collapse and civil war. Discusses local, regional and global responses to creating meaningful change in communities most affected by migration.

GNDR 512. Advanced Gender and Film Studies
3 Credits (3)
Advanced study of the shifting cultural and theoretical meanings of gender and sexuality across a variety of film genres while also analyzing the role of formal film elements in shaping representation and reception.

GNDR 550. Special Topics
3 Credits (3)
The topic of course will vary and will be indicated by subtitle. May be cross-listed with relevant courses at the 500-level from any specific department. May be repeated under different subtitle(s).

GNDR 554. Advanced Issues in Women Crossing Borders
3 Credits (3)
Experiences of women who cross class, race, cultural, national, or sexual borders including theories regarding women's interactions across borders. Consent of Instructor required.
Students develop a strong understanding of how interconnected social studies; feminisms; and social justice from interdisciplinary perspectives. The undergraduate major in Gender and Sexuality Studies specializes in the examination of gender; gender identity; queer and transgender studies; feminisms; and social justice from interdisciplinary perspectives. Students develop a strong understanding of how interconnected social formations such as race, class, age, nation, citizenship, ability, and other categories of difference are constructed and intersect with gender and sexuality. Our courses equip students with analytical skills and knowledge to engage power structures critically and transform lives and communities.

Gender and Sexuality Studies readies students for further study in the field at the graduate level as well as advanced study in a variety of disciplines. We offer a plan of study that integrates humanities and social sciences methods and objects of study, including areas of concentration such as human rights and transnational migration; socially engaged literature, film, and other creative media; and transnational and decolonial methodologies.

Gender and Sexuality Studies students prepare for careers in such fields as advocacy and social organizing, community development, creative writing, criminal justice, education, filmmaking and video production, health care, human resources, journalism, law, music production, social services, and visual arts. Many students declare a double major in Gender and Sexuality Studies with another discipline to enhance career opportunities and learning.

Courses are offered both online and on campus. In addition to the B.A., Gender and Sexuality Studies offers an undergraduate minor and graduate minor.

Degree requirements for the major include:

- 9 credit hours of required Gender & Sexuality Studies courses;
- 18 credit hours of Gender & Sexuality Studies electives; and
- 9 credit hours from a number of cross-listed courses offered both by Gender & Sexuality Studies and by other programs/departments.

- The total credit hour requirement for the major is 36 credit hours with 21 hours at the upper division level. All requirements must be completed with a grade of C- or higher.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

### Second Language Requirement

For the Bachelor of Arts with a major in Gender & Sexuality Studies, there is no second language requirement for the degree.

### A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1130G Intermediate Algebra and ENGL 1110G Rhetoric and Composition. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Credits 4

Total Credits 13

1

MATH 1130G Survey of Mathematics is recommended for the degree but students may need to take any prerequisites needed to enter MATH 1130G (or an alternative relevant Area II MATH course) first.

2

See the General Education (p. 88) section of the catalog for a full list of courses.

3

Elective credit may vary based on General Education course selections, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

4

GNDR 2110G Introduction to Women, Gender, and Sexuality Studies and GNDR 2120G Representing Women Across Cultures count towards Area V.

5

Students must take 6 credits of Upper-Division W S Cross-listed Elective coursework

6

Students cannot take the same course multiple times to fulfill this requirement.

7

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

Gender and Sexuality Studies - Bachelor of Arts (Online)

The undergraduate major in Gender and Sexuality Studies specializes in the examination of gender, gender identity, queer and transgender studies; feminisms; and social justice from interdisciplinary perspectives. Students develop a strong understanding of how interconnected social formations such as race, class, age, nation, citizenship, ability, and other categories of difference are constructed and intersect with gender and sexuality. Our courses equip students with analytical skills and knowledge to engage power structures critically and transform lives and communities.

Gender and Sexuality Studies readies students for further study in the field at the graduate level as well as advanced study in a variety of disciplines. We offer a plan of study that integrates humanities and social sciences methods and objects of study, including areas of concentration such as human rights and transnational migration; socially engaged literature, film, and other creative media; and transnational and decolonial methodologies.

Gender and Sexuality Studies students prepare for careers in such fields as advocacy and social organizing, community development, creative writing, criminal justice, education, filmmaking and video production, health care, human resources, journalism, law, music production, social services, and visual arts. Many students declare a double major in Gender and Sexuality Studies with another discipline to enhance career opportunities and learning.

Courses are offered both online and on campus. In addition to the B.A., Gender and Sexuality Studies offers an undergraduate minor and graduate minor.

Degree requirements for the major include

- 9 credit hours of required Gender & Sexuality Studies courses;
- 18 credit hours of Gender & Sexuality Studies electives; and
• 9 credit hours from a number of cross-listed courses offered both by Gender & Sexuality Studies and by other programs/departments.

• The total credit hour requirement for the major is 36 credit hours with 21 hours at the upper division level. All requirements must be completed with a grade of C- or higher.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. 6. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.
including areas of concentration such as human rights and transnational migration; socially engaged literature, film, and other creative media; and transnational and decolonial methodologies. Our courses equip students with analytical skills and knowledge to engage power structures critically and transform lives and communities.

An undergraduate minor in Gender and Sexuality Studies offers students a documented emphasis in their academic training in the field of Gender and Sexuality Studies in addition to their declared major. The minor in Gender and Sexuality Studies complements many undergraduate degree programs at NMSU including Anthropology, Art, Biology, Clinical and Mental Health Counseling, Communication Studies, Creative Writing, Criminal Justice, Curriculum and Instruction, Economics, Education, English, Government, History, Psychology, Public Health Sciences, Social Work, Sociology, Spanish, and more.

Courses are offered both online and on campus. In addition to the undergraduate minor, Gender and Sexuality Studies offers a B.A. and a minor for graduate students.

A minor in Gender & Sexuality Studies consists of 18 credit hours of approved course work in Gender & Sexuality Studies of which at least 12 are upper division (300 level or above).

Gender and Sexuality Studies - Graduate Minor

The graduate minor in Gender and Sexuality Studies specializes in the examination of gender, gender identity, queer and transgender studies; feminisms; and social justice from interdisciplinary perspectives. Students develop a strong understanding of how interconnected social formations such as race, class, age, nation, citizenship, ability, and other categories of difference are constructed and intersect with gender and sexuality. The graduate minor in Gender and Sexuality Studies offers students a documented emphasis in their academic training in the field of Gender and Sexuality Studies. The graduate minor allows students to acquire specialized knowledge through the interdisciplinary curriculum offered by Gender and Sexuality Studies and to integrate theoretical perspectives and methodologies from Gender and Sexuality Studies into diverse academic fields. Our courses equip students with analytical skills and knowledge to engage power structures critically and transform lives and communities.

We offer a plan of study that integrates humanities and social sciences methods and objects of study, including areas of concentration such as human rights and transnational migration; socially engaged literature, film, and other creative media; and transnational and decolonial methodologies. The graduate minor in Gender and Sexuality Studies complements many advanced degree programs at NMSU including Anthropology, Art, Biology, Business Administration, Chemistry, Clinical and Mental Health Counseling, Communication Studies, Creative Writing, Criminal Justice, Curriculum and Instruction, Economics, Education, English, Government, History, Psychology, Public Health Sciences, Social Work, Sociology, Spanish, and others.

Gender and Sexuality Studies students prepare for careers in such fields as advocacy and social organizing, community development, creative writing, criminal justice, education, filmmaking and video production, health care, human resources, journalism, law, music production, social services, and visual arts. Many students declare a graduate minor in Gender and Sexuality Studies to enhance career opportunities and learning.

Courses are offered both online and on campus. In addition to the graduate minor, Gender and Sexuality Studies offers a B.A. and undergraduate minor.

Total Credits: 18

Master’s and Doctoral minor candidates:

** Prefix | Title | Credits |
---|---|---|
- | GNDR 571 | Advanced Seminar in Feminist Theory | 3 |

** For a Master’s Degree minor candidate:**

6 additional credit hours from upper level Gender & Sexuality Studies courses or courses cross-listed with Women’s Studies and other departments/programs are required. (9 credit hours total)

** For a Doctoral Degree minor candidate:**

9 additional credit hours from upper level Gender & Sexuality Studies courses or courses cross-listed with Women’s Studies and other departments/programs are required. (12 credit hours total)

Journalism and Media Studies

Undergraduate Program Information

Studies in Journalism and Media Studies prepare students for careers in mass media, including news/editorial (print and online), broadcasting, advertising, public relations and photojournalism. Students study these disciplines and learn the trends and changes in the industry, such as how they converge on the internet. The curriculum emphasizes the skills of gathering, evaluating, writing and disseminating information and related skills. Students also are instructed in the theory, law, history and professional guidelines of mass media.

Degrees for the Department

Journalism and Media Studies - Bachelor of Arts (p. 625)

Minors for the Department

Journalism and Media Studies - Undergraduate Minor (p. 634)

Social Media Management - Undergraduate Minor (p. 634)

Strategic Communications - Undergraduate Minor (p. 634)

Interim Department Head: Lanasa

**Professor Chung, Lamonica; Associate Professors Berman; Assistant Professors Park; College Associate Professors Miller; College Assistant Professors Perez, Phillips; Professor Emeritus McCleneghan, Mellen, Thayer; News22 Director Miller; Spanish News22 Director Perez**

Journalism and Media Studies Courses

JOUR 105G. Media and Society
3 Credits (3)
Functions and organization of the mass media system in the United States; power of the mass media to affect knowledge, opinions, and social values; and the impact of new technologies.

JOUR 110. Introduction to Media Writing
3 Credits (2+2P)
Preparation of copy for broadcasting, print, advertising, and public relations. Introduction to Web applications. May be repeated up to 3 credits.
**Prerequisite(s):** JOUR 102 or ACT score of 25 and above or SAT score of 570 and above.
JOUR 201. Introduction to Multimedia
3 Credits (3)
Provide students with the basic skills to produce multimedia packages using text, photos, audio and video, as well as social media for professional purposes. Intensive hands-on class using editing software such as Adobe Premiere, Adobe Audition and Photoshop. May be repeated up to 3 credits.

JOUR 210. Newswriting & Reporting
3 Credits (2+2P)
Intensive laboratory practice in writing and field reporting news for print and Internet. May be repeated up to 3 credits. Restricted to Las Cruces campus only.
Prerequisite(s): JOUR 102 or ACT score of 25 and above or SAT score of 570 and above and JOUR 110.

JOUR 300. Introduction to Advertising
3 Credits (3)
Role of IMC (integrated marketing communications) in marketing of goods, services, and organizations. Creative process, strategic planning, message design, consumer behavior, and social issues of IMC.
Prerequisite(s): JOUR 110 or consent.

JOUR 302. Video Production and Digital Editing, News Storytelling
3 Credits (3)
Classroom instruction on basic studio and single camera video productions. The focus is placed on introductory practical aspects of news and sports field videography, reporting and storytelling. Lab experience in camera basics, studio functions and digital video editing. Includes practical experience through crew assignments on the live student-produced newscast, News22, which airs on KRWG-TV, a PBS affiliate station. May be repeated up to 3 credits.
Learning Outcomes
1. The students will be able to have a broader introductory understanding of video production for broadcasting media. The students will be able to edit video and digital production. The students will be able to create media reporting for News and Sports.

JOUR 305. Visual Communication in Media
3 Credits (3)
How one sees, perceives, interprets, creates and applies visual language. Explores the history, techniques, application and practice of the various visual media. May be repeated up to 3 credits.
Learning Outcomes
1. Give students an understanding of the historical, critical, theoretical and practical aspects of visual culture in digital media era. Sharpen students’ visual acuity. Enhance students’ understanding of point of view. Help students to broaden their perspective of visual communication from the storytelling perspective in social and digital media. Enlarge students’ appreciation of visual culture.

JOUR 306. Sports Writing and Reporting
3 Credits (3)
This course will introduce students to all aspects of sports writing and reporting for print and web publication. In addition to viewing and analyzing the work of professional sports journalists, students will learn how to write sports stories of their own, including game stories, sports features and columns. Students will study basic principles of sports story structure and style, including Associated Press style. Students will also learn how to retrieve, compile, compute and report sports statistics. May be repeated up to 6 credits.
Prerequisite: JOUR 210 or consent of instructor.
Learning Outcomes
1. Know how to recognize and accurately define sports journalism and different sports story types. Improve sports journalism literacy by reading, viewing and analyzing a variety of work produced by professional sports writers and reporters. Know the basic parts of a sports story, and know how to structure and package various types of sports stories. Know and put into practice sports writing basics including the five W’s, leads, interviews, quotations and attributions. Know how to write sports stories for different media, including print, web and social media, and put knowledge into practice. Know basic sports terminology, and know how to compile, compute and interpret a wide variety of sports statistics.

JOUR 310. News Reporting & Publishing
3 Credits (3)
Field reporting and news writing for print and Web applications. Instruction in community coverage, reporter responsibility, ethics and news values. May be repeated up to 3 credits.
Prerequisite(s): JOUR 210.

JOUR 312. Advertising/Copywriting
3 Credits (3)
Creative process, strategic thinking, and principles of advertising in execution of copy, storyboards, and layouts for clients.
Prerequisite(s): JOUR 110 or consent.

JOUR 314. Broadcast Reporting
3 Credits (3)
Writing, editing, producing, announcing and reporting of TV and radio news. May be repeated up to 3 credits.
Prerequisite(s): JOUR 210 or Consent of Instructor.

JOUR 315. News 22
1-3 Credits (1-3)
Write, report, produce, anchor, shoot and edit video for live student television newscast airing on KRWG, public television for Southern New Mexico sports, weather, and news.
Prerequisite(s): JOUR 314 or JOUR 330 or instructor consent.

JOUR 317. News Editing
3 Credits (3)
Extensive, directed practice in various aspects of computer editing for printed publication. Headline writing, copy editing, design, and layout.
Prerequisite(s): JOUR 210.

JOUR 319. Intro Photography
3 Credits (3)
Introduction to photography emphasizing composition, basic camera technique, language of photography and storytelling. Photojournalism emphasis. Basic camera and processing techniques and skills. May be repeated up to 3 credits.
JOUR 320. Photojournalism
3 Credits (3)
Communication photography for magazine, news, advertising/public relations and other communication needs. Digital Photography, lighting techniques, photo-editing software, and web site skills. Students provide camera and flash. May be repeated up to 3 credits.
Prerequisite(s): JOUR 319 or Consent of instructor.

JOUR 321. Media Graphic Design
3 Credits (3)
Concepts and design skills useful for all aspects of journalism - print media and newsletters, basics of Photoshop and introduction to Web design. May be repeated up to 3 credits.

JOUR 330. TV News Shooting & Editing
3 Credits (2+4P)
Overview of technical and aesthetic skills and journalism basics needed for shooting and editing on-location news productions. Single camera videography and nonlinear/digital editing. May be repeated up to 3 credits.
Prerequisite(s): JOUR 302 or permission of instructor.

JOUR 350V. Media History
3 Credits (3)
Historical overview of media including newspapers, magazines, radio, television, photography, entertainment media, advertising, public relations, and digital media. The history of American media development is directly intertwined with American history. Newspapers, magazines, television, and radio have not just reported on news and events; by virtue of what facts and sources editors and reporters have chosen to use, journalists have framed how the public should think about events. Editorial also provided further framing guidance on issues to readers and viewers. Students will study media history from social, intellectual, and cultural history perspectives. Students will examine the historical relationship of the media to American social, political, economic, and cultural patterns and developments. And, conversely, students will examine how these same forces impacted and changed all forms of media through a multi-cultural approach. May be repeated up to 3 credits.
Learning Outcomes
1. Survey the development of various forms of media and the changes in the media as they relate to the larger social, economic, and political sphere
   Learn the methods and processes of historical research and engage in historical research. Learn that the development of all fields of communication are interrelated
   Discover how American media have attempted to influence how Americans perceive the world around them (including perceptions of other nations) via their coverage and portrayal of global events.
   Learn that America’s historical events played out through the media. As such, students will gain a deeper understanding of how media personnel helped “frame” the discussion and debate about news and information from the 1600s to present day
   Discover that the ethical and professional foundations of media industries have adjusted and changed over time due to external and internal forces, including the rise of the professionalism movement across the nation in the late nineteenth century, the internal response to public demands for licensing of news media following World War I, and modern pressures caused by digitization of the industry and the parallel fragmentation of audiences
   Learn how to determine how various groups outside the mainstream contributed to overall press development. This includes an examination of how women and ethnic minorities influenced how and why the press became a force for social, cultural, political, and economic change in society.
   Discover and appreciate that history is NOT just the study of names, dates, and places, but of people
   Discover that the history of media is not the province of any one individual, corporation, or entity. Instead, a variety of factors: social, economic, political, legal, ethical, and cultural, helped shape the media’s development
JOUR 360. Media Literacy
3 Credits (3)
This course is designed to help students develop an informed, critical, and practical understanding of media including analysis of online and social media and to help students develop their media literacy and analytical skills.

Learning Outcomes
1. Write clearly, precisely, and in a well-organized manner. Demonstrate critical thinking, reading, and viewing skills. Research, develop, evaluate, and present arguments grounded in research-based knowledge. Apply analytical, precise, and elaborated terms and concepts for talking and writing about media and the ways in which they communicate meaning. Demonstrate how images are constructed via specific formal and technical elements and how those images construct meaning about national and global communities. Interpret media texts (film, television, etc.) to expand experience and understanding of the self and society.

JOUR 374. Introduction to Public Relations
3 Credits (3)
Introduction to public relations as a communication process that builds relationships between organizations and their publics. Explores basic techniques, strategies, and tactics used in businesses, nonprofits, and in government.
Prerequisite(s): JOUR 110.

JOUR 377V. Mass Media Ethics
3 Credits (3)
Philosophical and moral examination of problems relating to mass media. Use of case study method to analyze media situations; development of framework for media professionalism.

JOUR 380. Women and the Media
3 Credits (3)
Portrayal and participation of women in mass media from colonial to contemporary times. Same as GNDR 450. May be repeated up to 3 credits.

JOUR 384. Branding and Storytelling in IMC
1-3 Credits (1-3)
Introduction to the concept of using PR as a tool for creating branding. Through the concept of storytelling on traditional and social media, this class addresses the importance of branding by PR under IMC context. In addition to this, it also includes how to use a variety of effective, strategic media materials produced by public relations practitioners, under the concept of branding.
Prerequisite(s): JOUR 210 and JOUR 374.

Learning Outcomes
1. Students will learn the actual role of PR under the concept of branding in IMC.
2. They will be able to apply this concept to the actual brands and will be able to create PR messages under branding.

JOUR 407. Media Internship
1-3 Credits (1-3)
Supervised work with a media organization. 1-3 credits. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: JOUR majors.
Prerequisite(s): Consent of internship coordinator.
JOUR 460V. Sports & Entertainment P.R.
3 Credits (3)
This course aims to provide a basic understanding of sports and entertainment PR and its industry trends, theories, techniques, case studies, global trends, and future directions. Upon completion of this course, students will be able to use the theories and techniques to plan, implement, and evaluate sports and entertainment PR campaigns and activities. May be repeated up to 3 credits.

Learning Outcomes
1. Describe the nature of public relations practice in sports. Practice the primary research methods employed in sports public relations. Recognize the major steps involved in planning a public relations campaign and the key considerations at each step in the process. Identify the various types of paid/earned/shared/owned media commonly utilized in the profession. Comprehend the different tactics used to generate publicity.
2. Become proficient in writing news releases. Distinguish among the various response strategies sports managers may employ in a crisis. Describe unique aspects of social responsibility in the sports and entertainment industry. Identify legal issues in sports PR, anticipate emerging ethical issues, evaluate ethical dilemmas present in sports PR, and recognize the need for ethical decision-making in sports PR.
3. Describe current global trends and multicultural issues, which have impacted the global sports and entertainment industry.

JOUR 463. Strategic Communications for Social Impact
3 Credits (3)
The primary objective of this course is to expose students to the application of marketing principles to the challenges and rewards of influencing positive public behavior, the discipline known as social marketing. Social marketing offers an approach to solving a range of social problems in the areas of health, safety, environmental protection, financial well-being, and community involvement.

Learning Outcomes
1. Apply social marketing theories for developing, implementing, and evaluating social marketing campaigns. Utilize nudge techniques to improve decisions about health, wealth, and happiness in both personal and societal levels. Prepare a prosocial campaign plan using social media and public relations strategies. Identify examples of successful social marketing campaigns.

JOUR 470. Corporate Social Responsibility Marketing
3 Credits (3)
This course will explore how corporates create values, broadly defined, by investigating the concept of strategic corporate social responsibility (Strategic CSR) in the light of public relations. Strategic CSR draws on what we know about economic exchange and human psychology to explain how markets work (or don’t) and how value is added (or subtracted) across the range of the firm’s stakeholders. Understanding these processes allows managers to build a strategic competitive advantage for the firm. Thus, Strategic CSR is at the center of business success in the 21st century.

Prerequisite: JOUR 374.

Learning Outcomes
1. Understand the basic concepts and elements of Strategic Corporate Social Responsibility (Strategic CSR). Understand company’s value-creating activities through strategic CSR. Understand company’s CSR strategy under the context of economical and social exchanges.
2. Understand the process of creating comprehensive strategic CSR communications plan.

JOUR 476. Public Relations Campaigns
3 Credits (3)
Utilizing the principles and techniques of public relations to research and develop a comprehensive plan for a long-term national, regional, or local campaign. May be repeated up to 3 credits. Restricted to: Restricted to Journalism majors.

Prerequisite(s): JOUR 210, JOUR 374.

JOUR 489. Media Research
3 Credits (3)
Examination of the role of empirical research in solving mass communication problems. Survey techniques, field studies, content analysis, data analysis. May be repeated up to 3 credits.

JOUR 490. IMC Campaign
3 Credits (3)
Capstone course utilizing all previous instruction to create and develop plans for a long-term national or local IMC (Integrated Marketing Communications) campaign. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): JOUR 300 and 312 or consent of instructor.

Learning Outcomes
1. Students will learn how to create IMC campaign for client or for brands, and will be able to apply this for the real world when they apply for job.

JOUR 493. Media Law
3 Credits (3)
Examination of legal issues relating to mass media in the United States. Invasion of privacy, libel, sedition, copyright, and advertising regulation. Same as COMM 493, POLS 493. May be repeated up to 3 credits.

JOUR 494. Special Topics
3 Credits (3)
Specific subjects to be announced in the Schedule of Classes.

JOUR 495. Media Theory
3 Credits (3)
Theoretical approaches to media communications. Examination of media effects, audiences, and media socialization. May be repeated up to 3 credits.

JOUR 499. Independent Study in Media
1-3 Credits
Individual study directed by consenting instructor with prior approval of department head. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): 2.5 GPA and consent of instructor.
JOUR 501. Global Strategic Communications: Cultural Perspective
3 Credits (3)
This course is set up to combine both theory and practice, regarding
global communications, especiall from cultural perspectives. Also, this
course is designed for students to understand persuasive strategic
communications in different nations. Markets are no longer bound with
their physical locations because of the communication technologies.
To successfully address the strategic communications in global market,
marketers and advertisers need to fully understand “local” challenges
coming “deep” from cultural, economic, regulatory and competitive
differences. Based on theoretical and practical understanding of the
dynamic interplay between global and local forces, students will acquire
theoretical as well as practical understandings of how to accomplish
the goals of strategic communications in global markets. Thus, the core
objective of this class is to develop an ability to analyze and map out
persuasive communication strategies that are effective in global markets.

Learning Outcomes
1. Know how to analyze cultural norms and recognize strategic
communications practices that are congruent to such cultural
norms. Identify similarities and differences in different consumer
segments according to dimensions of culture. Develop a deeper
understanding of cultural dimensions. Implement effective market
research applications in different regions of the world. Conceptualize
and operationalize theoretical frameworks.

Journalism and Media Studies -
Bachelor of Arts

Below are the requirements for completing the Bachelor of Arts with
a major in Journalism and Media Studies without a specific area of
focus. For information on how to complete the program with either an
advertising, broadcasting, or Multimedia/Photojournalist focus, please
see the roadmaps tab. (p. 627)

Students are required to complete

• 15 hours of core courses, JOUR 105G Media and Society, JOUR 110
  Introduction to Media Writing, JOUR 201 Introduction to Multimedia,
  JOUR 210 Newswriting & Reporting and JOUR 493 Media Law.
• then complete a minimum 30 hours of courses in the department,
  bringing the allowable minimum of 45 hours.

Also, students must complete at least 69 hours of courses outside the
department.

Students must complete all University degree requirements, which
include: General Education requirements, Viewing a Wider World
requirements, and elective credits to total at least 120 credits with 48
credits in courses numbered 300 or above. Developmental coursework
will not count towards the degree requirements and/or elective

credits, but may be needed in order to take the necessary English and
Mathematics coursework.

Second Language Requirement: (required—see below) 4-8
Electives, to bring the total credits to 120 7 38-54
15 credits must be Upper Division

Total Credits 120

1 See the General Education (p. 88) section of the catalog for a full list of courses
2 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses
3 Students must complete 27 credits of non-core courses, including at least one course from each category listed above, introductory professional course, intermedia professional course, capstone course, and media course. Number of credits listed next to each category is recommended, not required. Entry into courses is subject to successful completion of appropriate prerequisites.
4 All introductory classes, except JOUR 310 News Reporting & Publishing and JOUR 374 Introduction to Public Relations, do not require any prerequisite class to get into these classes. Students must successfully finish JOUR 210 Newswriting & Reporting to get into JOUR 310 News Reporting & Publishing and JOUR 110 Introduction to Media Writing to get into JOUR 374 Introduction to Public Relations.
5 Students should take at least one class from media courses. For Ad/PR students, JOUR 457 Social Media Management and Analytics, JOUR 470 Corporate Social Responsibility Marketing and JOUR 489 Media Research are recommended.

7 Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Second Language Requirement
For the Bachelor of Arts in Journalism and Media Studies there is a one year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

Option 1:
Prefix Title Credits

Complete one of the following sequences:
CHIN 1110 Mandarin Chinese I 4-8
& CHIN 1120 and Mandarin Chinese II
FREN 1110 French I 4-8
& FREN 1120 and French II
GRMN 1110 German I 4-8
& GRMN 1120 and German II
JAPN 1110 Japanese I 4-8
& JAPN 1120 and Japanese II
SPAN 1110 Spanish I 4-8
& SPAN 1120 and Spanish II
PORT 1110 Portuguese I 3-6
& PORT 1120 and Portuguese II

For Heritage Speakers:
SPAN 1210 Elementary Spanish for Heritage Learners I 3-6
& SPAN 1220 and Spanish for Heritage Learners II
or SPAN 2210 Spanish for Heritage Learners III

Option 2:
Prefix Title Credits

Complete the following sequence for American Sign Language (with a C- or better):
SIGN 1110 American Sign Language I 3
SIGN 1120 American Sign Language II 3

Option 3:
Prefix Title Credits

Challenge the 1120 level for the following courses:
CHIN 1120 Mandarin Chinese II 4
or FREN 1120 French II
or GRMN 1120 German II
or JAPN 1120 Japanese II
or SPAN 1120 Spanish II

OR

Challenge the 1120/1220/2210 level for the following courses:
PORT 1120 Portuguese II 3
or SPAN 1220 Spanish for Heritage Learners II
or SPAN 2210 Spanish for Heritage Learners III

Option 4:
Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.

Option 5:
Obtain college certification of completion of three years of a second language at the high school level with a grade of C- or higher in the second-year level.
Option 6:
By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

Option 7:
By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.

Option 8:
In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

A Suggested Plan of Study for Students
This roadmap assumes student placement in MATH 1130G Survey of Mathematics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Below are the roadmaps for the Bachelor of Arts with a Major in Journalism and Media Studies, the department has four focus areas that students can follow to complete their degree in an area of study that benefits them: a general journalism and media studies, advertising, broadcasting and multimedia/photojournalism focuses. These are not considered official concentrations and will not appear on a student’s transcript or within their student record.

General Focus
First Year
Fall
ENGL 1110G Composition I (C- or better) 4
Area II: Mathematics Course 1 3-4
MATH 1130G Survey of Mathematics (C- or better (Recommended))
JOUR 105G Media and Society (C- or better, and will count for Gen. Ed) 3
Area V: Humanities Course 1 3
JOUR 110 Introduction to Media Writing 3
Credits 16-17
Spring
Choose one from the following: 3
- ENGL 2210G Professional & Technical Communication
- ENGL 2221G Writing in the Humanities and Social Science
Area III: Laboratory Science Course 1 4
Area IV: Social/Behavioral Sciences Course 1 3
JOUR 210 Newswriting & Reporting 3
JOUR 201 Introduction to Multimedia 3
Credits 16
Second Year
Fall
JOUR Introductory Professional Course (C- or better) 5 3
JOUR Introductory Professional Course (C- or better) 5 3
Choose from one of the following: 3
- ACOM 1130G Effective Leadership and Communication in Agriculture
- COMM 1115G Introduction to Communication
- COMM 2150G Introduction to Public Speaking
- HNRS 2175G Introduction to Communication Honors
- General Education Elective Course 1 3
Second Language Requirement: 1110- level 3 4
Credits 16
Spring
JOUR Introductory Professional Course (C- or better) 5 3

Journalism and Media Studies - Bachelor of Arts (Online)

This program is specifically developed to accommodate the schedules of professionals or students who cannot take classes at campus but want to finish degree in Journalism and Media Studies. The fully online format is flexible and can be accessed from anywhere/anytime to make it possible for students to continue working and earning their degree.

Below are the requirements for completing the Bachelor of Arts with a major in Journalism and Media Studies under NMSU Online, with a focus on either strategic communications or multimedia journalism. For information on how to complete the program, please see the roadmaps tab. (p. 627)

Students are required to complete

- 15 hours of core courses, JOUR 105G Media and Society, JOUR 110 Introduction to Media Writing, JOUR 201 Introduction to Multimedia, JOUR 210 Newswriting & Reporting and JOUR 493 Media Law
- then complete a minimum 30 hours of courses in the department, bringing the allowable minimum of 42 hours.

Students must complete at least 69 hours of courses outside the department.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.
### Second Language Requirement

For the Bachelor of Arts in Journalism and Media Studies there is a one year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

**Second Language Requirement:** (required - see below) 4-8

**Electives, to bring the total credits to 120** 41-54

27 credits must be Upper Division

| Total Credits | 120 |

1

See the General Education (p. 88) section of the catalog for a full list of courses

2

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses

3

Students must complete 30 credits of non-core courses, including at least one course from each category listed above, introductory professional course, intermedia professional course, capstone course, and media course. Number of credits listed next to each category is recommended, not required. Entry into courses is subject to successful completion of appropriate prerequisites.

4

All introductory classes, except JOUR 310 News Reporting & Publishing and JOUR 374 Introduction to Public Relations, do not require any prerequisite class to get into these classes. Students must successfully finish JOUR 210 Newswriting & Reporting to get into JOUR 310 News Reporting & Publishing and JOUR 110 Introduction to Media Writing to get into JOUR 374 Introduction to Public Relations

5

Students should take at least one class from media courses.

6

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

### A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1130G Survey of Mathematics MATH 1130G Survey of Mathematics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a
contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Below are the roadmaps for the Bachelor of Arts with a Major in Journalism and Media Studies, the department has four focus areas that students can follow to complete their degree in an area of study that benefits them: a general journalism and media studies, advertising, broadcasting and multimedia/photojournalism focuses. These are not considered official concentrations and will not appear on a student’s transcript or within their student record.

General Focus

First Year
Fall
ENGL 1110G Composition I (C- or better) 4
Area II: Mathematics Course 1 3-4
    MATH 1130G Survey of Mathematics (C- or better (Recommended))
    JOUR 105G Media and Society (C- or better, and will count for Gen. Ed)
Area V: Humanities Course 1 3
JOUR 110 Introduction to Media Writing 3
Credits 16-17

Spring
JOUR 201 Introduction to Multimedia 3
JOUR 210 Newswriting & Reporting 3
Choose one from the following: 3
    ENGL 2210G Professional & Technical Communication
    ENGL 2221G Writing in the Humanities and Social Science
Area III: Laboratory Science Course 1 4
Area IV: Social/Behavioral Sciences Course 1 3
Credits 16

Second Year
Fall
Introductory Professional Course (C- or better) 3
Introductory Professional Course (C- or better) 3
Choose from one from the following: 3
    ACOM 1130G Effective Leadership and Communication in Agriculture
    COMM 1115G Introduction to Communication
    COMM 1130G Public Speaking
    HNRS 2175G Introduction to Communication Honors
General Education Elective Course 1 3
Second Language Requirement: 1110- level 3 4
Credits 16

Spring
JOUR Introductory Professional Course (C- or better) 5 3
Intermediate Professional Course (C- or better) 3
Elective Course 4 3
Second Language Requirement: 1120- level 3 4
Elective Course 4 3
Credits 16

Third Year
Fall
JOUR Introductory Professional Course (C- or better) 5 3
JOUR Intermediate Professional Course (C- or better) 6 3
JOUR - Media Course (C- or better) 7 3
Elective - Upper Division Course 4 3

Fourth Year
Fall
JOUR 493 Media Law (C- or better) 3
JOUR - Upper Division Elective Course (C- or better) 3
JOUR - Upper Division Elective Course (C- or better) 3
Elective - Upper Division Course 4 3
Elective - Upper Division Course 4 3
Credits 15

Spring
JOUR Advanced Professional Course 9 3
JOUR - Upper Division Elective Course (C- or better) 3
Elective - Upper Division Course 4 3
Elective Course 4 3
Credits 15

Second Language: options for completing the second language requirement can be located on the Requirements (p. 625) tab for this degree.

Elective credit may vary based on second language requirements, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Introductory Professional Courses: JOUR 300 Introduction to Advertising, JOUR 310 News Reporting & Publishing, JOUR 321 Media Graphic Design, JOUR 374 Introduction to Public Relations, JOUR 407 Media Internship, JOUR 408 Media Practicum

Intermediate Professional Courses: JOUR 384 Branding and Storytelling in IMC, JOUR 312 Advertising/Copywriting, JOUR 425 Media Planning and Buying

Media Course options for the Upper Division JOUR requirement: JOUR 350 Media History, JOUR 377V Mass Media Ethics, JOUR 380 Women and the Media, JOUR 457 Social Media Management and Analytics, JOUR 460 Sports & Entertainment PR, JOUR 470 Corporate Social Responsibility Marketing, JOUR 489 Media Research, JOUR 494 Special Topics, JOUR 495 Media Theory, JOUR 499 Independent Study in Media
See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

Advanced/Capstone Professional Courses: JOUR 427 Multimedia Publishing, JOUR 476 Public Relations Campaigns, JOUR 490 IMC Campaign

### Journalism and Media Studies - Undergraduate Minor

Students may not earn both a Bachelor of Arts in Journalism and Media Studies and minor in Journalism and Media Studies.

1 Total of 18 credits with the grade of C- or better, are required to get a minor of Social Media Management

### Languages and Linguistics

#### Undergraduate Program Information

Programs of study in the Department of Languages and Linguistics prepare students for a diverse number of professions and provide them with critical skills that compliment many careers in an increasingly interdependent and global marketplace. Students also increase their awareness of the important role language plays in human interaction on individual and global levels.

Major curriculum plans in each language include balanced groups of courses in language, linguistics, literature and culture. Students may choose to major, double major or minor in French, German or Spanish.

#### Graduate Program Information

The Department of Languages and Linguistics offers a Master of Arts in Spanish, which may be completed through our program on the main campus or completely online. Students are asked to indicate an area of interest in either linguistics or literature. The degree requires a total of 36 credit hours. It is recommended that students focus at least 27 credit hours of that total in their selected area of interest. Main campus students may select either a thesis or a non-thesis option. Students selecting to follow the thesis option, may count up to 6 credit hours towards their degree total. Online students are limited to the non-thesis option only at this time.

#### Admission Requirements

Admission requirements include a BA in Spanish. An undergraduate Grade Point Average (GPA) of 3.0 or above, which includes at least 12 semester hours of upper-division undergraduate courses in Spanish with a GPA of at least 3.0. Students must also satisfy general requirements of the Graduate School and submit the proper electronic online application and transcripts at the Graduate School website. Students must also complete a secondary admission packet (also submitted online through the Graduate School electronic application portal), which should include:

- A current resume (C.V.) in Spanish
- Three (3) letters of recommendation from qualified professionals (written within the last six months), preferably from past professors, that address the applicant’s academic record.
- A writing sample in Spanish (critical or creative writing texts). If you do not have a six-page paper, you may submit multiple shorter works totaling six pages.
- A Language Evaluation Form (available for download at the departmental website) completed and signed by a qualified language
evaluator. If you have an official ACTFL OPI rating certificate, this may be submitted in lieu of the Language Evaluation Form.

• An introductory letter in Spanish to include:
  • A brief biography of one or two paragraphs along with your goals and objectives for obtaining a Master’s degree in Spanish
  • A statement of interest in either the residential (on-campus) program or the online program
  • A statement of your prospective area of interest (Linguistics or Literature), and
  • Your declaration of interest in being considered for a Graduate Teaching Assistantship (this option is only available for the residential [on-campus] program).

Only completed applications will be reviewed. Again, all materials should be submitted via the Graduate School electronic application portal. No materials should be sent directly to the department. Applying to the program does not guarantee admission to the program. It is the applicant’s responsibility to ensure that all materials have been submitted correctly.

Application deadlines: September 15 for admission for the following Spring semester (which begins in January), and January 15 for admission for the following Fall semester (which begins in August). Students will be advised upon their formal acceptance into the program.

Degrees for the Department

Chinese Courses

CHIN 1110. Mandarin Chinese I
4 Credits (4)
This is the first semester of a two-semester sequence in first year modern standard Chinese (“Mandarin”). This course is recommended for students who have had little or no experience in the Chinese language. A beginning Mandarin Chinese course is designed to introduce the Mandarin sound system (“pinyin”), basic vocabulary, Chinese characters (either in Simplified or Traditional characters), and basic grammatical concepts and structures. In order to help beginners develop their communicative competence in the four basic skills, the 5Cs (Communication, Cultures, Comparisons, Connections, and Communities) will be integrated consistently into the content and exercises in the course.

Learning Outcomes

1. Approach a novice-mid proficiency (ACTFL) in speaking, listening, reading, writing, as well as to develop their cultural awareness
2. Demonstrate knowledge of the phonetic system in Mandarin Chinese
3. Pronounce Chinese pinyin in correct tones
4. Demonstrate the mastery of the most commonly used characters (approximately 400-500)
5. Understand basic Chinese grammatical concepts
6. Use basic Mandarin vocabulary, introductory phrases and sentences in both oral and written forms
7. Understand greetings in China, countries and nationalities, Chinese family values, hobbies, and being someone’s guest in China
8. Apply the language to greet each other, identify countries and nationalities, talk about his/her family, discuss important dates, talk about hobbies, and visit a friend in China
9. Develop basic reading and writing skills in Chinese
10. Develop initial understanding of Chinese culture, compare aspects of different cultures, make connections to their daily life, and build links among communities
CHIN 1120. Mandarin Chinese II
4 Credits (4)
This is the second semester of a two-semester sequence in first year modern standard Chinese ("Mandarin"). This course is designed for students who have taken 1st Semester Mandarin Chinese, and focuses on enhancing pronunciation and expanding the vocabulary and grammar dealing with daily activities. In order to help beginners develop their communicative competence in the four basic skills, the 5Cs (Communication, Cultures, Comparisons, Connections, and Communities) will be integrated consistently into the content and exercises in the course.

Prerequisite(s): C or better in CHIN 1110.

Learning Outcomes
1. Maintain a novice-mid and approach a novice-high proficiency (ACTFL) in speaking, listening, reading and writing, as well as to enhance their cultural awareness
2. Demonstrate continued mastery of the four tones used in Mandarin Chinese
3. Demonstrate continued mastery of the most commonly used characters (approximately 500-600)
4. Apply basic grammatical concepts and structures, and begin exploring intermediate grammatical concepts
5. Demonstrate continued growth in vocabulary and expressions necessary for conversation in and about real life situations
6. Understand basic phone calls, discussion of studies, school life, shopping and transportation
7. Apply the language to make simple phone calls, discuss studies, talk about school life, go shopping and use transportation
8. Continue developing basic reading and writing skills in Chinese
9. Develop further understanding of Chinese culture, compare aspects of different cultures, make connections to their daily life, and build links among communities

CHIN 2110. Mandarin Chinese III
3 Credits (3)
This is the first semester of a two-semester sequence in second year modern standard Chinese ("Mandarin"). This course is designed for students who have taken 1st and 2nd Semester Mandarin Chinese (or equivalence), and have a basic foundation on Chinese phonetics, characters, and grammars. In order to help students develop their communicative competence in the four basic skills, the 5Cs (Communication, Cultures, Comparisons, Connections, and Communities) will be integrated consistently into the content and exercises in the course. Restricted to Las Cruces campus only.

Prerequisite(s): C or better in CHIN 1120.

Learning Outcomes
1. Maintain a novice-high and approach an intermediate-low proficiency (ACTFL) in speaking, listening, reading and writing, as well as to enhance their cultural understanding
2. Pronounce the four tones used in Mandarin Chinese comfortably
3. Demonstrate continued mastery of the most commonly used characters (approximately 600-800)
4. Apply intermediate grammatical concepts and structures
5. Demonstrate continued growth in vocabulary and expressions in a variety for conversation in and about real life situations
6. Understand topics including but not limited to simple weather reports, dining, directions, birthday party stories, and seeing a doctor
7. Apply the language to talk about weather, order food, ask and give directions, describe birthday parties, and see a doctor (these are suggested topics, no intention to limit the topic range)
8. Continue developing paragraph-length reading and writing skills in Chinese
9. Deepen understanding of Chinese culture, compare aspects of different cultures, make further connections to their daily life, and build stronger links among communities
CHIN 2120. Mandarin Chinese IV
3 Credits (3)
This is the second semester of a two-semester sequence in second year modern standard Chinese (“Mandarin”). This course is designed for students who have taken 1st, 2nd, and 3rd Semester Mandarin Chinese (or equivalence), and have a good foundation on Chinese phonetics, characters, and grammars. In order to help students develop their communicative competence in the four basic skills, the 5Cs (Communication, Cultures, Comparisons, Connections, and Communities) will be integrated consistently into the content and exercises in the course. Restricted to Las Cruces campus only.
Prerequisite(s): C or better in CHIN 2110.
Learning Outcomes
1. Maintain an intermediate-low and approach an intermediate-mid proficiency (ACTFL) in speaking, listening, reading and writing, as well as to strengthen their cultural understanding
2. Pronounce the four tones used in Mandarin Chinese fluently
3. Demonstrate continued mastery of the most commonly used characters (approximately 800-1000)
4. Apply more intermediate grammatical concepts and structures
5. Demonstrate continued growth in vocabulary and expressions in a variety for conversation in and about real life situations as well as simple academic settings
6. Demonstrate language skills that would help them travel or live in China
7. Understand topics including but not limited to dating, renting an apartment, sports, traveling, conversations at an airport
8. Apply the language to extend/decline invitations, rent an apartment, talk about sports, travel, check in and arrive at an airport (these are suggested topics, no intention to limit the topic range)
9. Continue developing multiple-paragraph-length reading and writing skills in Chinese
10. Deepen understanding of Chinese culture, compare aspects of different cultures, make further connections to their daily life, and build stronger links among communities

CHIN 311. Advanced Chinese Language I
3 Credits (3)
This course emphasizes the development of advanced oral, aural, reading and writing skills in Mandarin Chinese. Expanding of vocabulary and development of reading comprehension will be through different genres of authentic texts. Students will be trained to write short essays on a variety of topics.
Prerequisite(s): Grade of C or better in CHIN 2110 and CHIN 2120.

CHIN 312. Advanced Chinese Language II
3 Credits (3)
This course emphasizes the development of advanced oral, aural, reading and writing skills in Mandarin Chinese. Expanding of vocabulary and development of reading comprehension will be through different genres of authentic texts. Students will be trained to write short essays on a variety of topics.
Prerequisite(s): Grade of C or better in CHIN 311.

French courses
FREN 1110. French I
4 Credits (4)
Intended for students with no previous exposure to French, this course develops basic listening, speaking, reading, and writing skills aiming toward the ACTFL novice-high level. This is an introductory course designed to teach the student to communicate in French in everyday situations and to develop an understanding of French and Francophone cultures through the identification of cultural products and practices, of cultural perspectives, and the ability to function at a survival level in an authentic cultural content. This course will also develop the student’s sense of personal and social responsibility through the identification of social issues.
Learning Outcomes
1. Students can communicate and exchange information about familiar topics using phrases and simple sentences, sometimes supported by memorized language.
2. Students can usually handle short social interactions in everyday situations by asking and answering simple questions
3. Students can write short messages and notes on familiar topics related to everyday life.
4. Students can often understand words, phrases, and simple sentences related to everyday life.
5. Students can recognize pieces of information and sometimes understand the main topic of what is being said.
6. Students can understand familiar words, phrases, and sentences within short and simple texts related to everyday life.
7. Students can sometimes understand the main idea of what they have read.
8. Students can identify beliefs, behaviors and cultural artifacts of the French-speaking world.
9. In English, students will engage with social issues confronting the French-speaking world to develop their sense of personal and social responsibility.
FREN 1120. French II
4 Credits (4)
A continuation of French 1, students will develop a broader foundation in skills gained during the first semester, including understanding, speaking, reading and writing French aiming toward the ACTFL intermediate-low level. This course is designed to increase student fluency in French as applied to everyday situations. Students will also learn to recognize and understand various French and Francophone products, practices, and perspectives, identifying common cultural patterns, describing basic cultural viewpoints, and further developing their sense of personal and social responsibility through the investigation of cultural issues.
Prerequisite(s): C or better in FREN 1110.

Learning Outcomes
1. Students can participate in conversations on a number of familiar topics using simple sentences.
2. Students can handle short social interactions in everyday situations by asking and answering simple questions.
3. Students can write briefly about most familiar topics and present information using a series of simple sentences.
4. Students can understand the main idea in short, simple messages and presentations on familiar topics.
5. Students can understand the main idea of simple conversations that they overhear.
6. Students can understand the main idea of short and simple texts when the topic is familiar.
7. Students can describe and make comparisons between decisions about beliefs, behaviors and cultural artifacts of the French-speaking world.
8. Students will engage with social issues confronting the French-speaking world to continue to develop their sense of personal and social responsibility.

FREN 2110. French III
3 Credits (3)
In this third semester course, students will continue to develop a broader foundation in skills gained during the first year, including understanding, speaking, reading and writing French aiming toward the ACTFL intermediate-mid level. This course is designed to teach the student to communicate in a more sustained way in areas of personal interest and in everyday situations. Students will engage in and analyze various French and Francophone products, practices, and perspectives, as well as continue to develop their sense of personal and social responsibility through comparison and contrast of cultural perspectives.
Prerequisite(s): C or better in FREN 1120.

Learning Outcomes
1. Students can participate in conversations on familiar topics using sentences and series of sentences.
2. Students can engage in short social interactions in everyday situations by asking and answering a variety of questions. Students can usually say what they want to say about themselves and their everyday life.
3. Students can write on a wide variety of familiar topics using connected sentences.
4. Students can understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies.
5. Students can understand the main idea of conversations that they overhear.
6. Students can understand the main idea of texts related to everyday life and personal interests or studies.
7. Students can analyze beliefs, behaviors and cultural artifacts of the French-speaking world, and discuss the nature and value of French and Francophone products, practices, and perspectives.
8. Students will engage with social issues confronting the French-speaking world to continue to develop their sense of personal and social responsibility.
FREN 2120G. French IV
3 Credits (3)
In this fourth semester course, students will continue to broaden and refine skills gained during previous semesters, including understanding, speaking, reading and writing French aiming at the ACTFL intermediate-high level. This course is designed to teach the student to communicate in a more sustained way in situations that go beyond the everyday. Students will evaluate various French and Francophone products, practices, and create ways to demonstrate their sense of personal and social responsibility through participation in cultural interaction. May be repeated up to 3 credits.
Prerequisite: C- or better in FREN 2110.

Learning Outcomes
1. Students can participate with ease and confidence in conversations on familiar topics. They can usually describe people, places, and things. They can usually talk about events and experiences in various time frames. Students can handle social interactions in everyday situations, sometimes even when there is an unexpected complication. Students can write about topics related to school, work, and community in a generally organized way. They can write some simple paragraphs about events and experiences in various time frames. Students can easily understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies. Students can usually understand a few details of what they hear in conversations, even when something unexpected is expressed. The student can sometimes follow what they hear about events and experiences in various time frames. Students can understand the main idea of texts with topics related to everyday life, personal interests, and studies, as well as sometimes follow stories and descriptions about events and experiences in various time frames. Students can analyze beliefs, behaviors and cultural artifacts of the French-speaking world, and recognize and discuss the representations and controversies of French and Francophone products, practices, and perspectives. Students demonstrate the essential skills of Critical Thinking, Personal and Social Responsibility, and Information and Digital Literacy, as per the New Mexico General Education Curriculum.

FREN 306. Topics in French Culture and Civilization
3 Credits (3)
Selected topics focusing on French culture and civilization. This course is linked to FLIP (Faculty-Led International Programs) when applicable. May be repeated up to 6 credits. Corequisite(s): FREN 2120

FREN 315. French Grammar
3 Credits (3)
A thorough review of French grammar through the study of grammatical elements and the use of grammatical exercises. May be repeated up to 3 credits. Corequisite(s): FREN 2120

FREN 325. Intermediate Conversation
3 Credits (3)
French conversation through intensive oral practice with emphasis on vocabulary acquisition and pronunciation. May be repeated up to 3 credits. Corequisite(s): FREN 2120

FREN 330. Business French
3 Credits (3)
An introduction to standard language within the corporate world in French-speaking countries. Students practice reading, writing, listening, speaking and expanding their vocabulary in professional fields related to business.
Corequisite: FREN 2120.

FREN 352. French Phonetics
3 Credits (3)
Systematic description of modern French pronunciation. Corrective exercises for foreign learners. Formal study of spelling/pronunciation relationships. May be repeated up to 3 credits. Corequisite(s): FREN 2120

FREN 360. French Cinema
3 Credits (3)
The evolution of contemporary French cinema. A critical understanding of film as an art form and as cultural expression.
Prerequisite: FREN 2120 or consent of instructor.

FREN 362. Contemporary French Culture
3 Credits (3)
Institutions, lifestyles and popular attitudes in modern France.
Prerequisite: FREN 2120 or consent of instructor.

FREN 365V. Perspectives in French Culture
3 Credits (3)
Examines components of French culture through literature, films and other sources. Taught in English. Does not satisfy Arts and Sciences second language requirement. Does not satisfy French major or minor requirements.

FREN 378. Studies in Francophone Cultures
3 Credits (3)
Studies of representative Francophone cultures through their history, literature, music and films.
Prerequisite: FREN 2120 or consent of instructor.

FREN 381. Survey of French Literature I
3 Credits (3)
Literary movements, authors and selected texts of the Middle Ages through the eighteenth century.
Prerequisite: FREN 2120 or consent of instructor.

FREN 382. Survey of French Literature II
3 Credits (3)
Literary movements, authors and selected texts of the nineteenth and twentieth centuries.
Prerequisite: FREN 2120 or consent of instructor.

FREN 385. French Civilization
3 Credits (3)
A detailed study of important events in French civilization from its origins to the twentieth century through the study and discussion of history, literature, fine arts and politics.
Prerequisite: FREN 2120 or consent of instructor.

FREN 386. Contemporary Women Writers in French
3 Credits (3)
Exploration of literary texts by contemporary women writers in France and the Francophone world; emphasizes the cultural contexts that have defined women’s relationship to writing. Selections will vary from year to year.
Prerequisite: FREN 2120 or consent of instructor.

FREN 410. Paris: History and Cultures
3 Credits (3)
An in-depth look at history and culture of Paris from its origins to the present.
Prerequisite(s): FREN 212 or consent of instructor.
FREN 425. Advanced French Conversation  
3 Credits (3)  
Mastery of spoken French language through discussion of personal readings and group work to develop vocabulary, syntactical and conversational skills. The class is conducted entirely in French.  
**Prerequisite(s):** FREN 325 or consent of instructor.

FREN 449. French for Specific Purposes  
3 Credits (3)  
Directed reading for students to satisfy language requirement for master’s or doctoral programs. May be repeated up to 6 credits.

FREN 451. Special Topics in French  
1-3 Credits  
Selected topics relating to the cultures or literatures of the countries where French is spoken will be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.  
**Prerequisite:** consent of instructor.

FREN 453. Independent Studies in French  
1-3 Credits  
Individualized, self-paced projects for advanced students. May be repeated for a maximum of 6 credits.  
**Prerequisite:** consent of instructor.

FREN 478. Studies in Francophone Cultures Around the World  
3 Credits (3)  
Advanced studies of representative Francophone cultures through their history, literature, music and films.  
**Prerequisite:** FREN 2120 or consent of instructor.

FREN 486. Advanced Contemporary Women Writers in French  
3 Credits (3)  
Advanced study of literary texts by contemporary women writers in France and the Francophone world; emphasizes the cultural contexts that have defined women’s relationship to writing. Selections will vary from year to year.  
**Prerequisite:** FREN 2120 or consent of instructor.

**German Courses**

GRMN 1110. German I  
4 Credits (4)  
Intended for students with no previous exposure to German, this course develops basic listening, speaking, reading, and writing skills aiming toward the ACTFL novice-mid level. This is an introductory course designed to teach the student to communicate in German in everyday situations and to develop an understanding of German cultures through the identification of cultural products and practices, of cultural perspectives, and the ability to function at a survival level in an authentic cultural content. This course will also develop the student’s sense of personal and social responsibility through the identification of social issues.

**Learning Outcomes**

1. Students can communicate on very familiar topics using a variety of words and phrases that they have practiced and memorized.
2. Students can write lists and memorized phrases on familiar topics.
3. Students can recognize some familiar words and phrases when they hear them spoken.
4. Students can recognize some letters or characters.
5. Students can understand some learned or memorized words and phrases when they read.
6. Students can identify beliefs, behaviors and cultural artifacts of the German-speaking world.
7. In English, students will engage with social issues confronting the German-speaking world to develop their sense of personal and social responsibility.
GRMN 1120. German II
4 Credits (4)
A continuation of German 1, students will develop a broader foundation in skills gained during the first semester, including understanding, speaking, reading and writing German aiming toward the ACTFL novice-high level. This course is designed to increase student fluency in German as applied to everyday situations. Students will also learn to recognize and understand various German products, practices, and perspectives, identifying common cultural patterns, describing basic cultural viewpoints, and further developing their sense of personal and social responsibility through the investigation of cultural issues.
Prerequisite(s): C or better in GRMN 1110.
Learning Outcomes
1. Students can communicate and exchange information about familiar topics using phrases and simple sentences, sometimes supported by memorized language.
2. Students can usually handle short social interactions in everyday situations by asking and answering simple questions.
3. Students can write short messages and notes on familiar topics related to everyday life.
4. Students can often understand words, phrases, and simple sentences related to everyday life.
5. Students can recognize pieces of information and sometimes understand the main topic of what is being said.
6. Students can understand familiar words, phrases, and sentences within short and simple texts related to everyday life.
7. Students can sometimes understand the main idea of what they have read.
8. Students can describe and make comparisons between decisions about beliefs, behaviors and cultural artifacts of the German-speaking world.
9. Students will engage with social issues confronting the German-speaking world to continue to develop their sense of personal and social responsibility.

GRMN 2110. German III
3 Credits (3)
In this third semester course, students will continue to develop a broader foundation in skills gained during the first two semesters, including understanding, speaking, reading and writing German aiming toward the ACTFL intermediate-low level. This course is designed to teach the student to communicate in a more sustained way in areas of personal interest and in everyday situations. Students will engage in and analyze various German products, practices, and perspectives, as well as continue to develop their sense of personal and social responsibility through comparison and contrast of cultural perspectives.
Prerequisite(s): C or better in GRMN 1120.
Learning Outcomes
1. Students can participate in conversations on a number of familiar topics using simple sentences.
2. Students can handle short social interactions in everyday situations by asking and answering simple questions.
3. Students can write briefly about most familiar topics and present information using a series of simple sentences.
4. Students can understand the main idea in short, simple messages and presentations on familiar topics.
5. Students can understand the main idea of simple conversations that they overhear.
6. Students can understand the main idea of short and simple texts when the topic is familiar.
7. Students can analyze beliefs, behaviors and cultural artifacts of the German-speaking world, and discuss the nature and value of German products, practices, and perspectives.
8. Students will engage with social issues confronting the German-speaking world to continue to develop their sense of personal and social responsibility.
GRMN 2120. German IV  
3 Credits (3)
In this fourth semester course, students will continue to broaden and refine skills gained during previous semesters, including understanding, speaking, reading and writing German aiming at the ACTFL intermediate-mid level. This course is designed to teach the student to communicate in a more sustained way in situations that go beyond the everyday. Students will evaluate various German products, practices, and create ways to demonstrate their sense of personal and social responsibility through participation in cultural interaction.

Prerequisite(s): C or better in GRMN 2110.

Learning Outcomes
1. Students can participate in conversations on familiar topics using sentences and series of sentences.
2. Students can engage in short social interactions in everyday situations by asking and answering a variety of questions. Students can usually say what they want to say about themselves and their everyday life.
3. Students can write on a wide variety of familiar topics using connected sentences.
4. Students can understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies.
5. Students can understand the main idea of conversations that they overhear.
6. Students can understand the main idea of texts related to everyday life and personal interests or studies.
7. Students can analyze beliefs, behaviors and cultural artifacts of the German-speaking world, and recognize and discuss the representations and controversies of German products, practices, and perspectives.
8. Students will engage with social issues confronting the German-speaking world to create ways to demonstrate their sense of personal and social responsibility.

GRMN 305. Topics in German Culture  
3 Credits (3)
Group study of selected topics focusing on German culture and civilization. This course is linked to FLiP courses (Faculty-Led international Programs) when applicable. Topics identified by subtitle in the Schedule of Classes. GRMN 2120 or equivalent is recommended. May be repeated for up to 6 credits with different topics.

Learning Outcomes
1. (Language) Students will show more confidence in their German speaking, listening and writing abilities.
2. (Culture): Students will demonstrate knowledge of the culture of German institutions, of Berlin (through reflection and discussion sessions) after visits to historical, architectural and cultural sites as well as direct interaction with the locals.
3. (Culture): Students will demonstrate competence at navigating a culture different from their own.
4. (Culture): Students will demonstrate (through reflection and discussion sessions) a greater appreciation for the diversity of German identity.

GRMN 313. Intermediate Composition and Grammar  
3 Credits (3)
A review of the rules of German grammar. Development of written German skills. GRMN 2120 or equivalent is recommended. May be repeated up to 3 credits.

Learning Outcomes
1. Students will show their improvement in writing skills in German through the application of accurate grammar rules practiced in the course.
2. Students will show their improvement in vocabulary usage in German by using more varied and appropriate vocabulary in their writing.
3. Students will show their improvement in writing organization.

GRMN 325. German Conversation I  
3 Credits (3)
Intensive oral communication practice. Not open to heritage/native speakers of German. GRMN 2120 or equivalent is recommended. May be repeated up to 3 credits.

Learning Outcomes
1. Students will be able to demonstrate a quantifiable increase in your conversational skills by comparing your their final score (post-test) to their score in the oral pre-test, taken on the first/second day of classes.
2. This means being able to communicate their thoughts, opinions, emotions, etc. as they intend them to be understood by others. AND to be able to understand what others are saying to them so they can respond accordingly better than they did at the beginning of the course, according to the ACTFL Oral Proficiency (OPI) standards.

GRMN 330. Business German  
3 Credits (3)
An introduction to standard language within the corporate world in German-speaking countries. During the semester, students will practice reading, writing, listening, speaking and expanding their vocabulary in the fields related to business, technology (ex. Engineering) and health (ex. Nursing, Psychology, etc.).

GRMN 340. Introduction to Translation  
3 Credits (3)
General aspects of Translation from German to English and English to German. GRMN 2120 or equivalent is recommended. May be repeated up to 3 credits.

Learning Outcomes
1. Demonstrate understanding of the concept of translation by reading translation theory.
2. Demonstrate an enhanced knowledge of German as related to translation practices.
3. Demonstrate the ability to use specialized vocabulary and concepts in various professional areas.
4. Demonstrate knowledge of the translator's place as a professional.
5. Develop and enhance their linguistic competence and cultural awareness.
GRMN 341. German Folklore and Culture  
3 Credits (3)  
Customs, traditions, mythology, folk literature and art. Special focus on Grimms' fairy tales. GRMN 2120 or equivalent is recommended. May be repeated up to 3 credits.  
Learning Outcomes  
1. Demonstrate improvement in reading skills in German by one ACTFL level by augmenting vocabulary, grammatical accuracy, and reading comprehension skills.  
2. Describe the 5 basic motifs in folktales (FT) and where they supposedly come from.  
3. List and define the 9 types of FT (TEverson) according to their functions.  
4. Discuss the impact of the enlightenment in the structure of FT. Evaluate the influence of the industrial revolution and the development of a bourgeois society in FT.  
5. Critique the position of the present-day, pop-cult media in its recently created versions of FT.  

GRMN 350. Introduction to German Literature  
3 Credits (3)  
Basic literary genres and major figures in German language literature from its beginnings to the 19th century. GRMN 2120 or equivalent is recommended. To be followed by GRMN 471 - Studies in German Literature. May be repeated up to 3 credits. Consent of Instructor required.  

Learning Outcomes  
1. Demonstrate an improvement on reading skills in German by one ACTFL level by augmenting active vocabulary, grammatical accuracy and reading comprehension skills.  
2. Describe the authors, styles and basic discourses of 3 periods of German-language literature (old and middle high German from early the medieval literature; the protestant reformation; High German and literature academies; the fifteenth to seventeenth Centuries; and the Eighteenth Century.  

GRMN 399. Intermediate Independent Study in German  
1-3 Credits (1-3)  
Tutorial in reading, writing and oral expression for intermediate-level students of German. Topics identified in the Schedule of Classes. GRMN 2120 or equivalent is recommended. May be repeated for up to 6 credits with different topics. May be repeated up to 6 credits. Consent of Instructor required.  

Learning Outcomes  
1. Objectives for independent study courses will depend on the study/research interests of the student; they will always vary.  

GRMN 410. Practicum in Conversational German  
1-3 Credits  
Intensive oral communication practice for students with a strong German language foundation. May be repeated up to 6 credits.  
Prerequisite(s): GRMN 325 or consent of instructor.  

Learning Outcomes  
1. Objectives for independent study courses will depend on the study/research interests of the student; they will always vary.  

GRMN 413. Advanced Composition and Grammar  
3 Credits (3)  
Exercises in written German with emphasis on stylistic features.  
Prerequisite: GRMN 313 or consent of instructor.  

GRMN 425. Advanced German Conservation  
3 Credits (3)  
Advanced conversation through intensive oral practice.  
Prerequisite(s): GRMN 325 or consent of instructor.  

GRMN 451. Special Topics in German  
1-3 Credits  
Selected topics to be identified by subtitle in the Schedule of Classes. May be repeated for up to 6 credits with different topic. May be repeated up to 12 credits.  

Learning Outcomes  
1. Objectives for independent study courses will depend on the study/research interests of the student; they will always vary.  

GRMN 453. Independent Studies in German  
1-3 Credits (1-3)  
Individualized, self-paced research projects for advanced-level students of German. Topics identified by subtitle in the Schedule of Classes. GRMN 2120 or equivalent is recommended. May be repeated up to 12 credits.  

Learning Outcomes  
1. Objectives for independent study courses will depend on the study/research interests of the student; they will always vary.  

GRMN 455. German for Specific Purposes  
1-3 Credits (1-3)  
Directed reading for students to satisfy language requirements for master's and doctoral programs. Topics identified by subtitle in the Schedule of Classes. May be repeated up to 6 credits.  

Learning Outcomes  
1. Objectives for independent study courses will depend on the study/research interests of the student; they will always vary.  

Language Courses  
LANG 111. Beginning Language I  
4 Credits (4)  
Developing language skills through study abroad for languages not offered at NMSU main campus. Specific languages to be identified with course subtitles. Main campus only.  
Prerequisite: Language placement exam or consent of the instructor.  

LANG 451. Special Topics  
1-3 Credits  
Selected topics relating to cultures or literatures of a specific country. Credit can be applied only towards fulfilling second language requirement. Credit is not accepted towards any graduate level major or minor. May be repeated for a maximum of 12 credits. Consent of instructor required.  

LANG 453. Independent Studies  
1-3 Credits  
Individualized, self-paced projects for advanced students. May be repeated under different subtitles for a maximum of 6 credits.  
Prerequisite: consent of instructor.  

LANG 490. Introduction to Yucatec Maya Language and Culture I  
3 Credits (3)  
This course provides the student with an introduction to Yucatec Maya language and culture of Yucatan.  

Learning Outcomes  
1. students will be able to identify who and where Yucatec Maya is spoken, describe the sound system and basic syntax of the language, participate in basic introductory conversations and make connections between the language and culture of Yucatan.
Linguistics Courses

LING 2110G. Introduction to the Study of Language and Linguistics
3 Credits (3)
This course presents an introduction to the study of language through
the basic aspects of linguistic analysis: the sound system (phonetics
and phonology), the structure of words and sentences (morphology and
syntax), and the ways in which language is used to convey meaning
(semantics and pragmatics). In addition, the course will investigate
how language is acquired and stored in the brain, and how differences
in speech styles and dialects reflect different social and cultural
backgrounds of individual speakers.

Learning Outcomes
1. Understand the basic concepts and terminology associated
   with phonetics, phonology, morphology, syntax, semantics, and
   pragmatics.
2. Comprehend how language evolves over history and over an
   individual's lifespan.
3. Describe some common, but mistaken, beliefs about language and
to distinguish between descriptive and prescriptive approaches to
language.
4. Describe the social, psychological, geographic and historical
   influences that lead to language dominance or language
   endangerment.
5. Be aware of the relations among various languages in the world,
between dialects and slang, and between human and non-human
languages.
6. Apply methods of linguistic analysis as introduced in the course.
7. Critically engage with the works of linguistic researchers.
8. Stimulate curiosity about language and what it reveals about the
human mind.

LING 301. Introduction to Psycholinguistics
3 Credits (3)
Psychological aspects of language, including linguistic theories of
grammar, psychological factors influencing language performance,
primary language acquisition and the relationship of language to thought
processes. Same as PSYC 301.

LING 302V. Language and Society
3 Credits (3)
Study of how social identity including such factors as ethnicity, age,
sex, education, power and socio-economic class is expressed in language
systems and how misunderstandings arise between groups. Research
skills are emphasized.

LING 303. Exploring Language Systems
3 Credits (3)
Forms of linguistic semantic, syntactic and phonological organization.
Prerequisite(s): LING 2110G.

LING 405. Topics in Linguistics
3 Credits (3)
Selected linguistics topics subtitled in the Schedule of Classes. May be
repeated for a maximum of 6 credits under different subtitles.
Prerequisite: consent of instructor.

LING 425. Language and the Mind: Introduction to Psycholinguistics
3 Credits (3)
This course is an introduction to psycholinguistics; the study of how
humans learn, represent, comprehend and produce language. Throughout
this course, we address a variety of questions on the psychology of
language most of which are still being answered. These include: What
does it mean to know a language? What are the cognitive processes
involved in language use? How do we produce and recognize speech?
How can we improve texts and make them easier to read? How can we
control speech in special situations to avoid errors?
Prerequisite(s): LING 2110G or consent of instructor.

LING 451. Independent Studies in Linguistics
1-3 Credits
Individual or group study of selected topics to be identified by subtitle.
May be repeated for a maximum of 6 credits.
Prerequisites: LING 2110G and prior arrangement with faculty supervisor.

LING 455. Research in Linguistics
3 Credits (3)
This course will provide a capstone experience for students who have
progressed through the program in linguistics and provide the foundation
for further study at the post-graduate level in a linguistics-related field.
Students will apply their foundation of knowledge and skills in linguistics
through the realization of an individualized, inquiry-based project.
Consent of instructor may enroll student only in case of elective credit
shortfall with concurrent enrollment.
Prerequisite(s): LING 2110G, LING 301, LING 302V, LING 303, plus 9 credit
hours of related electives.

LING 500. Introduction to Linguistics
3 Credits (3)
Survey of the main branches of linguistics: phonology, morphology,
syntax, semantics, language acquisition, sociolinguistics, historical
linguistics and some of the theoretical issues in the field.

LING 502. Graduate Study in Sociolinguistics
3 Credits (3)
Study of how social identity including factors such as ethnicity, age,
gender education and socio-economic class is expressed in language
systems.
Prerequisites: LING 2110G or LING 500 recommended.

LING 503. Exploring Language Systems- Grad
3 Credits (3)
Students will be responsible for all requirements of LING 303 and will
undertake independent, directed research.
Prerequisite(s): LING 2110G or LING 500.

LING 505. Selected Topics
3 Credits (3)
Studies, varying from year to year, in linguistics.
Portuguese Courses

PORT 1110. Portuguese I
3 Credits (3)
Designed for students with no previous exposure to Portuguese, this course develops basic listening, speaking, reading, and writing skills. This is an introductory course aimed at teaching the student to communicate in Portuguese in everyday situations.

Learning Outcomes
1. Students can communicate and exchange information about familiar topics using phrases and simple sentences, sometimes supported by memorized language.
2. Students can handle most short social interactions in everyday situations by asking and answering simple questions.
3. Students can write short messages and notes on familiar topics related to everyday life.
4. Students can often understand words, phrases, and simple sentences related to everyday life.
5. Students can recognize pieces of information and sometimes understand the main topic of what is being said.
6. Students can understand familiar words, phrases, and sentences within short and simple texts related to everyday life.
7. Students can sometimes understand the main idea of what they have read.
8. Students can make connections between beliefs, behaviors and cultural artifacts of the Portuguese-speaking world, and make informed cross-cultural comparisons.

PORT 1120. Portuguese II
3 Credits (3)
A continuation of Portuguese I, students will develop a broader foundation in skills gained during the first semester, including understanding, speaking, reading and writing Portuguese. Students will also gain more in-depth knowledge of Portuguese-speaking cultures.

Prerequisite: C or better in PORT 1110 or consent of instructor.

Learning Outcomes
1. Students can participate in conversations on a number of familiar topics using simple sentences.
2. Students can handle short social interactions in everyday situations by asking and answering simple questions.
3. Students can write about familiar topics and present information using a series of simple sentences.
4. Students can understand the main idea in short, simple messages and presentations on familiar topics.
5. Students can understand the main idea of simple conversations that they overhear.
6. Students can understand the main idea of short and simple texts when the topic is familiar.
7. Students can begin to narrate and describe simple events in the past.
8. Students can make broader connections between beliefs, behaviors and cultural artifacts of the Portuguese-speaking world, and make informed cross-cultural comparisons.

PORT 453. Independent Luso-Brazilian Studies
1-3 Credits (1-3)
Individualized, self-paced projects for advanced students in Luso-Brazilian studies. May be repeated up to 12 credits. Consent of Instructor required.

Spanish Courses

SPAN 1110. Spanish I
4 Credits (4)
Designed for students with little exposure to Spanish, this course develops basic listening, speaking, reading, and writing skills and basic intercultural competence in interpretive, interpersonal and presentational modes of communication at the Novice Level of proficiency based on ACTFL guidelines. During this course, students perform better and stronger in the Novice Mid level while some abilities emerge in the Novice High range. This is an introductory course aimed at helping the student to communicate in Spanish in everyday familiar situations via recognition and production of practiced or memorized words, phrases, and simple sentences.

Prerequisite(s): language placement and/or assessment by departmental examination.

Learning Outcomes
1. Students can communicate on very familiar topics using a variety of words and phrases that they have practiced and memorized.
2. Students can present information about myself and some other very familiar topics using a variety of words, phrases, and memorized expressions.
3. Students can write short messages and notes on familiar topics related to everyday life.
4. Students can often understand words, phrases, and simple sentences related to everyday life.
5. Students can recognize pieces of information and sometimes understand the main topic of what is being said.
6. Students can understand familiar words, phrases, and sentences within short and simple texts related to everyday life.
7. Students can sometimes understand the main idea of what they have read.

PORT 513. Graduate Portuguese for Romance Language Students I
3 Credits (3)
Portuguese for beginners at the graduate level. May be completed on campus or via Study Abroad. Credit can be applied towards fulfilling the second language requirement. Credit is not accepted towards any graduate level major or minor.

PORT 514. Graduate Portuguese for Romance Language Students II
3 Credits (3)
Portuguese for beginners at the graduate level. May be completed on campus or via Study Abroad. Credit can be applied towards fulfilling the second language requirement. Credit is not accepted towards any graduate level major or minor.

Prerequisite(s): Language placement exam or C or better in PORT 513, or consent of instructor.
SPAN 1120. Spanish II
4 Credits (4)
Designed for students with some degree of exposure to Spanish in high school and/or at home, this course continues to develop basic listening, speaking, reading, and writing skills and basic intercultural competence in interpretive, interpersonal and presentational modes of communication based at the Novice High Level of proficiency based on ACTFL guidelines, although a few abilities may emerge in the Intermediate Low Level. Students in this course communicate in Spanish in familiar topics using a variety of words, phrases, simple sentences and questions that have been highly practiced and memorized.
Prerequisite: language placement and/or assessment by departmental examination or a C- or better in SPAN 1110.

Learning Outcomes
1. Students can participate in conversations on a number of familiar topics using simple sentences.
2. Students can handle short social interactions in everyday situations by asking and answering simple questions.
3. Students can present basic information on familiar topics using language they have practiced using phrases and simple sentences.
4. Students can write briefly about most familiar topics and present information using a series of simple sentences.
5. Students can understand the main idea in short, simple messages and presentations on familiar topics.
6. Students can understand the main idea of simple conversations that they overhear.
7. Students can understand the main idea of short and simple texts when the topic is familiar.

SPAN 1210. Elementary Spanish for Heritage Learners I
3 Credits (3)
This is a beginning-level Spanish course designed for students who have a cultural connection to the Spanish language. Some students have had very little exposure to the language and enter the class to develop beginning-level skills. Other students may have grown up hearing the heritage language in the community and may understand some Spanish and speak at a basic level as a result. The objective is to draw upon the connection to the heritage language as a source of motivation and engagement for our learning communities. At the same time, we build upon the language base that students may already have as a result of their heritage learner experience in order to develop new proficiencies in Spanish and reactivate the Spanish that students have learned previously. By the end of this course, students will be able to describe their home, campus surroundings and common activities including cultural traditions. At the same time, students gain cultural competency and develop a critical understanding of their linguistic and cultural background. Students who have previously earned a C or better in SPAN 1110 or SPAN 1120 may not receive credit for this course.

Learning Outcomes
1. Interpersonal Communication: Students can engage in exchanges in culturally appropriate ways using understandable pronunciation on familiar topics using contextualized words, phrases, common idiomatic expressions, and simple sentences.
2. Written expression: Students can write an essay/poem/story/creative sketch/lyric in the target language that describes a past/present/future (fictional) event to the reader.
3. Interpretive listening: Students can understand familiar questions and statements from simple sentences in conversations.
4. Interpretive reading: Students can identify the topic and some isolated facts from simplesentences in informational and fictional texts.
5. Critical cultural awareness: Students can recognize and explain some of the issues facing bilingual communities in accordance to the instructor expertise and articulation with subsequent courses.
SPAN 1220. Spanish for Heritage Learners II
3 Credits (3)
Spanish as a Heritage Language II is a second semester class designed for students who have developed some basic Spanish proficiency from previous classes and/or from community experiences. This course provides students with the opportunity to develop their proficiency in the four language skills (speaking, listening, reading, and writing). Class activities are designed to strengthen oral communication skills (speaking and listening) through a variety of group activities. By the end of the course students will be able to understand and produce narrations of past events in oral and written Spanish. In order to foster a desire to revitalize and maintain the Spanish language in the US context we attempt to raise students’ critical awareness of what it means to be part of a specific speech community.

Learning Outcomes
1. Interpersonal Communication: Students can engage in basic but authentic conversations through
2. providing and obtaining information, expressing likes and dislikes, describing their daily lives, and narrating simple events in the past.
3. Written expression: Students can write an essay/poem/story/creative sketch/lyric in the target language, and that describes a past (fictional) event to the reader.
4. Interpretive listening: can identify the main idea in short conversations.
5. Interpretive reading: Students can identify the topic and related information from simple sentences in short informational and fictional texts.
6. Critical cultural awareness: Students can recognize and explain some of the issues facing bilingual communities in accordance to the instructor expertise and articulation with previous and subsequent courses.

SPAN 2110. Spanish III
3 Credits (3)
This course is based on the integration of learning outcomes across Interpersonal, Interpretive, and Presentational Modes of Communication at the Intermediate Low Level of proficiency based on ACTFL guidelines. Students accomplish real-world communicative tasks in culturally appropriate ways as they gain familiarity with the target culture(s). This is an intermediate course aimed at helping the student to communicate in Spanish on familiar topics about self, others and everyday life at the same time that they recognize and handle short social interactions in interactions in everyday situations by asking and answering a variety of questions.

Prerequisite: language placement and assessment by departmental examination or C or better in SPAN 1120.

Learning Outcomes
1. Students can participate in conversations on familiar topics using sentences and series of sentences.
2. Students can handle short social interactions in everyday situations by asking and answering a variety of questions.
3. Students can usually say what they want to say about themselves and their everyday life.
4. Students can make presentations on a wide variety of familiar topics using connected sentences
5. Students can write on a wide variety of familiar topics using connected sentences.
6. Students can understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies.
7. Students can understand the main idea in conversations that they overhear.
8. Students can understand the main idea of texts related to everyday life and personal interests or studies.
SPAN 2120. Spanish IV
3 Credits (3)
This course is based on the integration of learning outcomes across Interpersonal, Interpretive, and Presentational Modes of Communication at the Intermediate Low Level of proficiency based on ACTFL guidelines. Students accomplish real-world communicative tasks in culturally appropriate ways as they gain familiarity with the target culture(s). This is an intermediate course aimed at helping the student to communicate in Spanish on familiar topics about self, others and everyday life at the same time that they recognize and handle short social interactions in interactions in everyday situations by asking and answering a variety of questions.

Prerequisite: language placement and assessment by departmental examination or C or better in SPAN 2110.

Learning Outcomes
1. Students can participate with ease and confidence in conversations on familiar topics.
2. Students can usually talk about events and experiences in various time frames.
3. Students can usually describe people, places, and things.
4. Students can handle social interactions in everyday situations, sometimes even when there is an unexpected complication.
5. Students can make presentations in a generally organized way on school, work, and community topics, and on topics they have researched.
6. Students can make presentations on some events and experiences in various time frames.
7. Students can write on topics related to school, work, and community in a generally organized way.
8. Students can write some simple paragraphs about events and experiences in various time frames.
9. Students can easily understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies.
10. Students can usually understand a few details of what they overhear in conversations, even when something unexpected is expressed.
11. Students can sometimes follow what they hear about events and experiences in various time frames.
12. Students can easily understand the main idea of texts related to everyday life, personal interests, and studies.
13. Students can sometimes follow stories and descriptions about events and experiences in various time frames.

SPAN 2210. Spanish for Heritage Learners III
3 Credits (3)
Intermediate Spanish for Heritage Speakers is a third semester course designed for students who have been raised in a Spanish-speaking environment and speak, or understand, some Spanish as a result of hearing it in the home, and in the community by family, friends, and neighbors. Students in this course will continue to develop their ability to narrate events in the past and will be able to describe hypothetical situations. Students will also develop their ability to express wishes, desires, and necessities. This course will help the student build confidence in their Spanish abilities and expand the language use in the areas of writing, reading, oral production and listening comprehension. In order to foster a desire to revitalize and maintain the Spanish language we attempt to raise students' critical awareness of wider issues facing Spanish speakers in the US context.

Learning Outcomes
1. Interpersonal Communication: Students can exchange information on a wide variety of familiar topics in which the students use appropriate vocabulary to describe their daily lives and narrate events in the past with some degree of ease and confidence.
2. Written expression: Students can write an essay/poem/story/creative sketch/lyric in the target language, and that effectively conveys a series of past (fictional) events to the reader that may include recent and distant past.
3. Interpersonal listening: Students can identify the main idea and key information in short straightforward conversations.
4. Interpretive reading: Students can understand the main idea and key information in short straightforward informational and fictional texts.
5. Critical cultural awareness: Students can recognize and explain some of the issues facing bilingual communities in accordance to the instructor expertise and articulation with previous and subsequent courses.

SPAN 305. Topics in Hispanic Civilization
3 Credits (3)
Group study of selected topics focusing on Hispanic culture and civilization. Topics announced in the Schedule of Classes. May be repeated for a maximum of 6 credits.

Prerequisite: SPAN 2120 or SPAN 2210 or consent of instructor.

SPAN 306. Special Topics
3 Credits (3)
Group study of Spanish for specialized purposes (e.g. court interpreting, professional language for bilingual teachers, technical writing for the business community). Course subtitled in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite: SPAN 2120 or SPAN 2210 or consent of instructor.
SPAN 316. Grammar for Non-Native Speakers of Spanish  
3 Credits (3)  
For students who did not grow up speaking Spanish. A review of the rules of Spanish grammar. Students cannot receive credit for both SPAN 316 and SPAN 318.  
Prerequisite(s): SPAN 2120 or SPAN 2210 or consent of instructor.  
Learning Outcomes  
1. Students will be better equipped academically to continue into upper-division Spanish courses. Students will be better equipped to communicate in Spanish by becoming more adept at using a variety of grammatical structures. Students will gain an appreciation for diverse languages and cultures that exist in the borderlands and will be able to contribute to the diversity. Students will gain critical thinking skills as they develop their bilingual abilities. Students will be encouraged after becoming bilingual and will desire to make language learning life-long goal.

SPAN 317. Composition for Non-Native Speakers of Spanish  
3 Credits (3)  
For students who did not grow up speaking Spanish. Development of professional and academic writing skills in Spanish. Students cannot receive credit for both SPAN 317 and SPAN 319.  
Prerequisite(s): SPAN 2120 or SPAN 2210 or consent of instructor.  
Learning Outcomes  
1. Students will be better equipped academically to continue into upper-division Spanish courses. Students will be better equipped to communicate in written Spanish by employing a more clear and structured writing style. Students will gain an appreciation for diverse languages and cultures that exist in the borderlands and will be able to contribute to the diversity. Students will gain critical thinking skills as they develop their bilingual abilities. Students will be encouraged after becoming bilingual and will desire to make language learning life-long goal.

SPAN 318. Grammar for Heritage/Native Speakers of Spanish  
3 Credits (3)  
For students who speak or have been exposed to Spanish at home or in the community. A review of grammatical concepts and analysis of both spoken and written Spanish. Students cannot receive credit for both SPAN 316 and SPAN 318.  
Prerequisite(s): SPAN 2120 or SPAN 2210 or consent of instructor.  
Learning Outcomes  
1. Students will be better equipped academically to continue into upper division Spanish courses. Students will be better equipped to communicate in written and spoken Spanish by using a variety of grammatical structures. Students will sharpen their Spanish communication skills, which will assist them in securing employment as bilingual speakers. Students will develop a stronger appreciation for the Spanish communication skills and cultural awareness which will assist them in contributing to their communities in meaningful ways. Students will gain critical thinking skills as they sharpen their bilingual abilities.

SPAN 319. Composition for Heritage/Native Speakers of Spanish  
3 Credits (3)  
For students who speak or have been exposed to Spanish at home or in the community. Development of writing strategies, styles and techniques in the Spanish language. Students cannot receive credit for both SPAN 317 and SPAN 319.  
Prerequisite(s): SPAN 2120 or SPAN 2210 or consent of instructor.  
Learning Outcomes  
1. Students will be better equipped academically to continue into upper-division Spanish courses. Students will be better equipped to communicate in written Spanish by employing a more clear and structured writing style. Students will gain an appreciation for diverse languages and cultures that exist in the borderlands and will be able to contribute to the diversity. Students will gain critical thinking skills as they develop their bilingual abilities. Students will be encouraged after becoming bilingual and will desire to make language learning life-long goal.

SPAN 325. Advanced Conversation  
3 Credits (3)  
Intensive oral practice. Not open to heritage/native speakers of Spanish.  
Prerequisite(s): SPAN 2120 or consent of instructor.

SPAN 327. Spanish in the Community  
3 Credits (3)  
Emphasis on use of Spanish outside the classroom in the local communities. Activities include but are not limited to oral histories, language mentoring in schools, assisting with cultural activities and language research.  
Prerequisite: SPAN 2120 or SPAN 2210 or consent of instructor.  
Learning Outcomes  
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will learn how to apply bilingual and bicultural skills to serve the community.

SPAN 330. Variations in Spanish  
3 Credits (3)  
The study of social variation within the Spanish language, examining both social and linguistic factors that affect language change.  
Prerequisite: SPAN 316 or SPAN 318 or consent of instructor.  
Learning Outcomes  
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the terms and concepts related to linguistic variations. Students will learn about variations in the Spanish language and how to apply these ideas to a greater linguistics body of knowledge.
SPAN 340. Introduction to Spanish Linguistics
3 Credits (3)
General aspects of Spanish linguistics: traditional, descriptive, historical and dialectal.
Prerequisite: SPAN 316 or SPAN 318 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the terms and concepts related to Spanish linguistics. Students will learn about a wide range of linguistics topics and how to apply these ideas to a greater linguistics body of knowledge.

SPAN 350. Introduction to Chicano Studies
3 Credits (3)
Covers Mexican-American life including language, history, education, politics and literature.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of Chicano Studies. Students will learn about various Chicano cultural and historical themes and how they affect the Chicano community today.

SPAN 361. US-Mexico Border Culture & Literature
3 Credits (3)
Study of major authors and/or cultural trends in the U.S.-Mexico border. Selected subject to be identified by subtitle in the Schedule of Classes. May be repeated up to 6 credits.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of Chicano literature. Students will read foundational Chicano texts of various genres and learn how they create and sustain a national Chicano consciousness.

SPAN 364V. Culture and Civilization of Mexico
3 Credits (3)
Familiarization with culture, civilization and regions of Mexico. History, geography, art, literature, folklore, customs, economics and politics of each region. Impact of Mexican culture and civilization on the Southwest United States. Taught in English. Does not satisfy Arts and Sciences second language requirement.

SPAN 365V. Culture and Civilization of Spanish America
3 Credits (3)
Familiarization with culture, civilization and regions of Spanish America. Study of history, geography, art, literature, folklore, customs, economics and politics of each region. Impact of Spanish American culture and civilization on the Southwest United States. Taught in English. Does not satisfy College of Arts and Sciences second language requirement.

SPAN 380. Introduction to Hispanic Literature
3 Credits (3)
Works in Spanish, all genres and periods. How to read literature in all forms.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of Hispanic literature. Students will read foundational Hispanic texts of various genres and periods and learn how they create and inform Hispanic histories, identities, and nations.

SPAN 385. Introduction to Chicano/US-Mexican Literature
3 Credits (3)
Introduction to the study of major works by Chicano/US-Mexican authors.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of Chicano literature. Students will read foundational Chicano texts of various genres and learn how they create and sustain a national Chicano consciousness.

SPAN 388. Contemporary Hispanic Literature
3 Credits (3)
Study of Peninsular and Spanish-American literature from the 20th century to the present.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of Hispanic literature. Students will read foundational Hispanic texts of various genres from the 20th and 21st centuries and learn how they create and inform Hispanic histories, identities, and nations.
SPAN 393. Introduction to Translation and Interpretation
3 Credits (3)
General aspects of translation and interpretation from English to Spanish and Spanish to English. Selected subject to be identified by subtitle in the Schedule of Classes.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms, concepts, and strategies related to translation and interpretation. Students will learn how to translate written texts and/or interpret live communication between the Spanish and English languages. However, other languages may be included at instructor's discretion.

SPAN 399. Independent Studies in Literature, Language, or Culture
1-3 Credits
Individualized, self-paced projects for advanced students. Students must present formal proposal of study.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms, concepts, and strategies related to translation and interpretation. Students will learn how to translate written texts and/or interpret live communication between the Spanish and English languages. However, other languages may be included at instructor's discretion.

SPAN 411. Creative Writing
3 Credits (3)
Creative writing in Spanish.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of creative writing and the publication process. Students will read and learn about the process and types of creative writing and publication, how to create original texts, and how to edit and publish creating works.

SPAN 412. Spanish-American Poetry
3 Credits (3)
Study of major works by Spanish-American poets.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of the poetry genre. Students will read foundational Hispanic poetry from different periods and learn how poets and poetry create and inform Hispanic histories, identities, and nations.

SPAN 418. Spanish-American Short Story
3 Credits (3)
Study of major short stories by Spanish-American authors.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of the short story genre. Students will read foundational Hispanic short stories from various periods and learn how this genre creates and informs Hispanic histories, identities, and nations.

SPAN 419. Spanish American Drama
3 Credits (3)
Study of major works by Spanish-American dramatists.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of the drama genre. Students will read foundational Hispanic short stories from various periods and learn how this genre creates and informs Hispanic histories, identities, and nations.
SPAN 420. The Art of Storytelling
3 Credits (3)
The study of the genesis of storytelling and its structure, learning how and why to apply oral storytelling in our personal and professional lives, and practicing the art of storytelling in front of an audience.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of oral storytelling and the significance of this skill in creating personal and national narratives. Students will learn how to write and present original oral stories, myths, and other forms of oral storytelling for a public audience.

SPAN 421. New Mexico Culture and Literature
3 Credits (3)
The study of the development and flourishing of New Mexican culture and literature.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will learn about key cultural, literary, and historical elements of New Mexico. Students will learn how to apply knowledge about New Mexico to serve their communities.

SPAN 422. Cultural Production of Hispanic Revolutions and Wars
3 Credits (3)
The study of Hispanic literature, art, and film dealing with revolutionary movements and wars.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of revolutions and wars as they relate to literary production and other modes of cultural expression. Students will learn about various revolutions and wars throughout Spain and Latin America and how they have helped form our regional and national identities, especially through a cultural production lens.

SPAN 424. Post-Modern Hispanic Literature
3 Credits (3)
The study of Post-Modern experimental literary genres, from Post-boom to the present.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of post-modernism, especially in relation to Hispanic literary production. Students will read a variety of post-modern Hispanic texts from various genres and learn how they help develop regional and national identities.

SPAN 426. Spanish-American Novel
3 Credits (3)
Study of major works by Spanish-American novelists.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of the novel genre. Students will read foundational Hispanic novels from various periods and learn how this genre creates and informs Hispanic histories, identities, and nations.

SPAN 427. Chicano Literature
3 Credits (3)
Study of Chicano/US-Mexican authors.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop advanced comprehension of the terms and concepts of Chicano literature. Students will read foundational Chicano texts of various genres, but with a focus on narratives, and learn how they create and sustain a national Chicano consciousness.

SPAN 439. Topics in Applied Spanish Linguistics
3 Credits (3)
Group study of selected topics to be identified by subtitle in the Schedule of Classes. May be repeated once under different subtitle for a maximum of 6 credits.
Prerequisite: SPAN 340.
SPAN 442. Formation of Hispanic National Identities
3 Credits (3)
Study of seminal texts on the formation of Hispanic national identities and counternarratives against homogenous notions of nationhood.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Improve critical thinking skills through deep-level readings and class discussions. Strengthen academic research and writing skills through high-level research and writing projects. Understand how Hispanic identities were formed through various narrative practices and how that informs media representations of Hispanic people and culture. Analyze how Hispanic identities were formed and with what motivations. Assess national narratives and counter-narratives to understand their political-social worlds better.

SPAN 444. Body Studies
3 Credits (3)
Interdisciplinary study of the body in Hispanic societies and others and its associated political meaning.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Improve critical thinking skills through deep-level readings and class discussions. Strengthen academic research and writing skills through high-level research and writing projects. Understand how the Hispanic body became a cultural and political object and how it is changing by the means of new media. Analyze how the understanding of the Hispanic body has changed throughout history and how local politics affect it. Learn how the body has served as the locus of culture and the principle of social interaction and politics.

SPAN 446. Speculative Fiction
3 Credits (3)
Study of Hispanic speculative fiction and its related utopian/dystopian societies.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Improve critical thinking skills through deep-level readings and class discussions. Strengthen academic research and writing skills through high-level research and writing projects. Understand how social anxieties produced a Hispanic literary corpus to deal with the past, the present, and the future. Analyze and compare how genre fiction challenges or supports hegemonic national discourses. Learn how speculative fiction serves as an expression of social desires.

SPAN 447. Hispanic Film
3 Credits (3)
Study of major films from Spain and Spanish-America. Restricted to: Main campus only.

SPAN 448. U.S.-Hispanic Film
3 Credits (3)
Study of major films about and/or by Hispanics of the U.S. Restricted to: Main campus only.

SPAN 449. Special Problems
1-3 Credits
Directed reading for graduate students in their specific fields to satisfy language requirement for master’s or doctoral programs. May be repeated for a maximum of 6 credits.

SPAN 451. Hispanic Cultures
3 Credits (3)
Issues in Hispanic cultures of the U.S., Spanish-America and Spain. Also focuses on U.S.-Mexico border culture. Selected topics to be identified by subtitle in the Schedule of Classes.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will learn about various modes of Hispanic cultural production and how they create regional and national Hispanic identities.

SPAN 457. Strategies for Teaching Spanish for Heritage/Native Speakers
3 Credits (3)
Overview of the main theories, reasearch, pedagogical approaches, assessment and practice concerning the teaching of Spanish to heritage learners and native speakers. Taught with SPAN 597.
Prerequisite: SPAN 317 or SPAN 319 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop advanced comprehension of the terms and concepts related to the study and application of Spanish for Heritage/Native Speakers of Spanish. Students will learn how to become more effective teachers of Spanish for Heritage/Native Speakers of Spanish.

SPAN 461. Introduction to Spanish Phonetics
3 Credits (3)
An introduction to Spanish phonetics including basic dialectal variation and comparison with English.
Prerequisite: SPAN 340.

SPAN 474. Pragmatics
3 Credits (3)
The study of theory and pragmatic notions such as implicatures, presuppositions, deixis, speech acts, and politeness.
Prerequisite(s): SPAN 340.

SPAN 476. Semantics
3 Credits (3)
The investigation of language from a semantic-pragmatic perspective and the use of formal logic to communicate meaning.
Prerequisite(s): SPAN 340.
SPAN 483. Literature and Law
3 Credits (3)
The advanced study of Latin American and Latino literature and its historical and cultural connections to the development of laws and the influence of both on modern society.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of legal themes as found in literature. Students will read foundational Hispanic texts of various genres and learn how they create a narrative that embodies or implies legal issues that affect the Hispanic community.

SPAN 485. Literature and Mental Health
3 Credits (3)
The advanced study of Latin American and Latino literature and how storytelling, through various literary genres, can inform our understanding of mental health issues and propose possible solutions to improve our quality of mental health.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of mental health themes as found in literature. Students will read foundational Hispanic texts of various genres and learn how they create a narrative that embodies or implies mental health issues that affect the Hispanic community.

SPAN 490. Special Topics
3 Credits (3)
Selected topic to be identified by subtitle in the Schedule of Classes.
Prerequisite: SPAN 316 or SPAN 318 or SPAN 340.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will learn about various topics of Hispanic literature or linguistics that can be applied to advanced research projects.

SPAN 491. History of the Spanish Language
3 Credits (3)
The development of Spanish from its origins.
Prerequisite(s): SPAN 340.

SPAN 492. Structure of Spanish
3 Credits (3)
Topics in Spanish linguistics including phonology, morphology, syntax and semantics.
Prerequisite: SPAN 316 or SPAN 318 or SPAN 340.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the terms and concepts related to the structure of Spanish. Students will learn about the formation of the structure of Spanish and how to apply these ideas to a greater linguistics body of knowledge.

SPAN 493. Espanol de los Estados Unidos
3 Credits (3)
Linguistic issues and studies of U.S. Spanish-speaking communities. Taught with SPAN 593. May be repeated up to 3 credits.
Prerequisite(s): SPAN 340.

SPAN 500. Methods of Research and Literary Criticism
3 Credits (3)
Advanced methods of research and literary criticism.

SPAN 507. Technology Enhanced Language Learning
3 Credits (3)
Strategies for enhancing language learning with emerging technologies. Course is taught in Spanish.

SPAN 508. Teaching Literature with Technology
3 Credits (3)
Strategies and techniques for enhancing the teaching of all literature genres using emerging technologies. Course is taught in Spanish. Co/
Prerequisite(s): SPAN 507, and/or consent of instructor.

SPAN 509. Teaching Culture with Technology
3 Credits (3)
Strategies and techniques for enhancing the teaching of culture using emerging technologies. Course is taught in Spanish. Co/
Prerequisite(s): SPAN 507, and/or consent of instructor.

SPAN 510. Assessing the National Standards
3 Credits (3)
Analysis of the National Standards for Foreign Language Learning (the 5 Cs) in the 21st Century. Course will also cover the Integrated Performance Assessment as applied to the national standards. Other assessments will be reviewed to evaluate effectiveness in all levels of Spanish language classrooms.

SPAN 512. Contemporary Spanish-American Poetry
3 Credits (3)
Readings and interpretation of Spanish-American poetry from the 20th century to the present.
SPAN 520. Adv. The Art of Storytelling  
3 Credits (3)  
The study of the genesis of storytelling and its structure, learning how and why to apply oral storytelling in our personal and professional lives, and practicing the art of storytelling in front of an audience.  
Learning Outcomes  
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the terms and concepts of storytelling and the significance of this skill in creating personal and national narratives. Students will learn how to write and present original oral stories, myths, and other forms of oral storytelling for a public audience.

SPAN 521. Advanced Culture and Literature of New Mexico  
3 Credits (3)  
The advanced study of the development and flourishing of New Mexican culture and literature.

SPAN 522. Adv. Cultural Production of Hispanic Revolutions and Wars  
3 Credits (3)  
The study of Hispanic literature, art, and film dealing with revolutionary movements and wars.  
Learning Outcomes  
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of revolutions and wars as they relate to literary production and other modes of cultural expression. Students will learn about various revolutions and wars throughout Spain and Latin America and how they have helped form regional and national identities, especially through a cultural production lens.

SPAN 528. Advanced U.S. Latino Culture and Literature  
3 Credits (3)  
The advanced study of major works by Latino writers in the U.S.

SPAN 540. Introduccion a la Linguistica  
3 Credits (3)  
Introduces students to the foundational topics of linguistic study with particular reference given to the Spanish language: properties of language and communication, morphology, syntax, phonetics, phonology, language variation and change.  
Prerequisite(s): Eligibility to take graduate level courses.

3 Credits (3)  
Study of seminal texts on the formation of Hispanic national identities and counternarratives against homogenous notions of nationhood.  
Learning Outcomes  
1. Improve critical thinking skills through deep-level readings and class discussions. Strengthen academic research and writing skills through high-level research and writing projects. Understand how Hispanic identities were formed through various narrative practices and how that informs media representations of Hispanic people and culture. Analyze how Hispanic identities were formed and with what motivations. Assess national narratives and counternarratives to understand their political-social worlds better.

SPAN 544. Adv. Body Studies  
3 Credits (3)  
Interdisciplinary study of the body in Hispanic societies and others and its associated political meaning.  
Learning Outcomes  
1. Improve critical thinking skills through deep-level readings and class discussions. Strengthen academic research and writing skills through high-level research and writing projects. Understand how the Hispanic body became a cultural and political object and how it is changing by the means of new media. Analyze how the understanding of the Hispanic body has changed throughout history and how local politics affect it. Learn how the body has served as the locus of culture and the principle of social interaction and politics.

SPAN 545. Advanced Dialectos del Espanol  
3 Credits (3)  
Advanced research of Spanish dialects including their formal characteristics, historical formation and regional variation.

SPAN 546. Adv. Speculative Fiction  
3 Credits (3)  
Study of Hispanic speculative fiction and its related utopian/dystopian societies.  
Learning Outcomes  
1. Improve critical thinking skills through deep-level readings and class discussions. Strengthen academic research and writing skills through high-level research and writing projects. Understand how social anxieties produced a Hispanic literary corpus to deal with the past, the present, and the future. Analyze and compare how genre fiction challenges or supports hegemonic national discourses. Learn how speculative fiction serves as an expression of social desires.

SPAN 547. Advanced Hispanic Film  
3 Credits (3)  
Advanced study of major films from Spain and Spanish-America. Restricted to: Main campus only.

SPAN 548. Advanced U.S.-Hispanic Film  
3 Credits (3)  
Advanced study of major films about and/or by Hispanics of the U.S. Restricted to: Main campus only.
SPAN 550. Advanced Chicana and Chicano Studies
3 Credits (3)
Multidisciplinary examination of issues that have historically affected/influenced the Chicana/o community regionally, in the borderlands, and beyond borders.

Learning Outcomes
1. Students will become better equipped to teach this material at the high school or community college levels.
2. Students will become better equipped to attend a PhD program in a related field.
3. Students will gain access to a more diverse curriculum which broaden their educational and cultural perspectives.
4. Students will be able to develop their scholarship on a more creative level.
5. Students will strengthen their academic writing, which will help in their graduate studies and/or post-graduate careers.

SPAN 551. Advanced Hispanic Cultures
3 Credits (3)
Advanced study on Hispanic cultures of the U.S., Spanish-America and/or Spain. Selected topic to be identified by subtitle. Taught with SPAN 451. May be repeated up to 6 credits.

SPAN 552. Advanced Literature of the Mexican Revolution
3 Credits (3)
Study of Mexican authors dealing with the Mexican Revolution. Restricted to: Main campus only.

SPAN 558. Bilinguismo
3 Credits (3)
Examines the topics of bilingualism from a psycholinguistic perspective including the development of the bilingual brain, lexical acquisition, retrieval and storage, and experimental techniques in measuring language competence.

Prerequisite(s): SPAN 540 or consent of instructor.

SPAN 561. Advanced Spanish Phonetics
3 Credits (3)
Advanced study of Spanish phonetics, including basic dialectal variation and comparisons with English.

SPAN 562. Advanced Spanish Phonology
3 Credits (3)
An advanced formal examination of the sound system of Spanish including formal characterizations, dialectal variation and laboratory data. May be repeated up to 3 credits.

Prerequisite(s): SPAN 561 or consent of instructor.

SPAN 563. Advanced Study in Mexican Literature
3 Credits (3)
Mexican literature from the Pre-Columbian period to the present.

SPAN 564. Advanced Post-Modern Hispanic Literature
3 Credits (3)
The advanced study of Post-Modern experimental literary genres, from Post-boom to the present.

SPAN 566. Contemporary Spanish-American Novel
3 Credits (3)
The Spanish-American novel from the 20th century to the present.

SPAN 567. Advanced Study in Chicano Literature
3 Credits (3)
Study of all genres of Chicano literature.

SPAN 570. Advanced Study in Technical Translation
3 Credits (3)
Translation of a variety of non-literary texts from English to Spanish and from Spanish to English. Course is taught in Spanish.

SPAN 573. Advanced Study in Creative Writing
3 Credits (3)
Advanced creative writing in Spanish.

SPAN 574. Advanced Pragmatics
3 Credits (3)
The study of theory and pragmatic notions such as implicatures, presuppositions, deixis, speech acts, and politeness.

Prerequisite(s): SPAN 540 or consent of instructor.

SPAN 576. Advanced Semantics
3 Credits (3)
The investigation of language from a semantic-pragmatic perspective and the use of formal logic to communicate meaning.

Prerequisite(s): SPAN 540 or consent of instructor.

SPAN 580. Research Methodology in Spanish Linguistics
3 Credits (3)
Study and practical application of techniques in linguistic research.

SPAN 583. Advanced Study in Spanish-American Women Writers
3 Credits (3)
All genres of Spanish-American literature written by women. Research paper required.

SPAN 584. Spanish Morphosyntax
3 Credits (3)
Examination of the morphological and syntactic structure of the Spanish language as well as their interaction. Practical applications are also explored.

SPAN 586. Contemporary Spanish-American Essay
3 Credits (3)
Main currents in the Spanish-American thought from the 20th century to the present.

SPAN 587. Contemporary Spanish-American Short Story
3 Credits (3)
The Spanish-American short story from the 20th century to the present.

SPAN 588. Contemporary Spanish-American Drama
3 Credits (3)
The Spanish-American drama from the 20th century to the present.

SPAN 589. Spanish Sociolinguistics
3 Credits (3)
Relationship between language and society in the Spanish-speaking world.

SPAN 590. Advanced Special Topics
3 Credits (3)
Specific subject to be announced in the Schedule of Classes. May be repeated up to 6 credits.

SPAN 591. Advanced Study in History of the Spanish Language
3 Credits (3)
The development of Spanish from its origins.

SPAN 592. Advanced Structure of Spanish
3 Credits (3)
Advanced study of Spanish linguistics topics such as phonology, morphology, syntax and semantics.
SPAN 594. Theory and Methodology of Spanish Pedagogy  
3 Credits (3)  
Advanced studies in current theories and methodologies of Spanish language pedagogy. Taught as a practicum.

SPAN 595. Advanced Topics in Applied Spanish Linguistics  
3 Credits (3)  
Selected topics to be identified by subtitle in the Schedule of Classes. May be repeated for a total of 9 credits under a different subtitle.

SPAN 597. Advanced Strategies for Teaching Spanish for Heritage/Native Speakers  
3 Credits (3)  
Advanced overview of the main theories, research, pedagogical approaches, assessment and practice concerning the teaching of Spanish to heritage learners and native speakers.

SPAN 598. Independent Reading, Research, and/or Creative Writing  
1-3 Credits  
Individual study of selected readings and problems; or individual research, either analytical or experimental, or creative writing. May be repeated for unlimited credits.

SPAN 599. Master's Thesis  
15 Credits  
Thesis.

Foreign Languages (French) - Bachelor of Arts

Departmental Requirements

Single Major in Foreign Languages with a Concentration in French

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Students who are pursuing only a major in Foreign Languages with a Concentration in French are considered single major students. Single major students are required to complete:

Viewing a Wider World  
Area I: Communications: 3 credits
Area II: Mathematics: 3 credits
Area III/IV: Laboratory Sciences and Social/Behavioral Sciences: 10-11 credits
Area V: Humanities: 3 credits
Area VI: Creative and Fine Arts: 3 credits
General Education Elective: 3-4 credits
Electives, to bring the total credits to 120: 58 credits
Total Credits: 120-136 credits

MATH 1130G Survey of Mathematics is required for the degree but students may need to take any prerequisites needed to enter MATH 1130G Survey of Mathematics first.

See the General Education (p. 88) Section of the catalog to view the full list of courses that can be selected to complete this requirement.

See the Viewing a Wider World (p. 92) Section of the catalog to view the full list of courses that can be selected to complete this requirement.

Entrance into the French sequence is determined by placement. Additional FREN courses may be needed to meet prerequisites of 300+ level GRMN courses.

Elective credit may vary based on second language requirements, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

The number of credits needed to complete the Second Language Requirement may vary depending on language placement. As well, this requirement may be waived via conditions further described below.
Second Language Requirement

For the Bachelor of Arts in Foreign Languages with a concentration in French there is a two year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

Option 1:

<table>

Option 5:

Obtain college certification of completion of three years of a second language at the high school level with a grade of C- or higher in the second-year level.

Option 6:

By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

Option 7:

By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.

Option 8:

In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

Double Major in Foreign Languages with a Concentration in French

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Students who are completing a different major in a different department can double major in Foreign Languages with a concentration in French. Double major students are required to complete:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>General Education (from other major):</td>
<td></td>
<td>32-35</td>
</tr>
<tr>
<td>Viewing a Wider World (from other major):</td>
<td></td>
<td>6</td>
</tr>
</tbody>
</table>

These courses do not satisfy this requirement: (FREN 365V, SPAN 364V, SPAN 365V)

Departamental/College Requirements

Select 24 credits from FREN courses (300-level or higher) selected with the help of an advisor from the department

Electives, to bring the total credits to 120

Total Credits

120-123

1 General Education and Viewing a Wider World requirements are solidified by completing the requirements for the other major in a different department, as part of the double major program.

2 Entrance into the French sequence is determined by placement and some courses may not be needed if a student is placed into a higher level.

3 Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1130G Intermediate Algebra and ENGL 1110G Rhetoric and Composition. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Credits 12

Total Credits 120-123

1

MATH 1130G Survey of Mathematics is required for the degree but students may need to take any prerequisites needed to enter MATH 1130G first.

2

Elective credit may vary based on second language requirements, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

3

See the General Education (p. 88) section of the catalog for a full list of courses

4

Students who double major in Foreign Languages with a concentration in French are not required to take LING 2110G or fulfill a second language requirement.

5

See the Viewing a Wider World (p. 92) section of the catalog to see a full list of courses, please note that FREN 365V, SPAN 364V and SPAN 365V do not fulfill this requirement.

6

Upper-Division FREN Credits: 24 credits (300-level or higher) are to be selected with the aid of an academic advisor, please note that FREN 365V does not count towards a FREN Upper-Division Elective course.
FREN 306 may be taken for a maximum of 6 credits towards the degree, but only 3 credits will be accepted from study abroad.

**Foreign Languages (German) - Bachelor of Arts**

**Departmental Requirements**

**Single Major in Foreign Languages with a Concentration in German**

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Students who are only pursuing a major in Foreign Languages with a Concentration in German are considered single major students. Single major students who are only pursuing a major in Foreign Languages with a Mathematics coursework. The number of credits that may be needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

The number of credits needed to complete the Second Language Requirement may vary depending on language placement. As well, this requirement may be waived via conditions further described below.

### Second Language Requirement

For the Bachelor of Arts in Foreign Languages with a concentration in German there is a two year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

Total Credits  
120-123  

MATH 1130G Survey of Mathematics is required for the degree but students may need to take any prerequisites needed to enter MATH 1130G first.  

Elective credit may vary based on second language requirements, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.  

See the General Education (p. 88) section of the catalog for a full list of courses  

Students who double major in Foreign Languages with a concentration in German are not required to take LING 2110G or fulfill a second language requirement.  

See the Viewing a Wider World (p. 92) section of the catalog to see a full list of courses, please note that FREN 365V, SPAN 364V and SPAN 365V do not fulfill this requirement.  

Upper- Division GER Credits: 24 credits (300-level or higher) are to be selected with the aid of an academic advisor.  

Foreign Languages (Spanish) - Bachelor of Arts  

Departmental Requirements  

Single Major in Foreign Languages with a Concentration in Spanish  

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.  

Students who are only pursuing a major in Foreign Languages with a concentration in Spanish are considered single major students. Single major students are required to complete:

1 MATH 1130G Survey of Mathematics is required for the degree but students may need to take any prerequisites needed to enter MATH 1130G first.

2 See the General Education (p. 88) Section of the catalog to view the full list of courses that can be selected to complete this requirement.

3 See the Viewing a Wider World (p. 92) Section of the catalog to view the full list of courses that can be selected to complete this requirement.

4 Entrance into the Spanish sequence is determined by placement. Additional SPAN courses may be needed to meet prerequisites of 300+ level SPAN courses.

5 SPAN 364V and SPAN 365V will not count toward the major.

6 Both SPAN 340 Introduction to Spanish Linguistics and SPAN 380 Introduction to Hispanic Literature must be taken.

7 Elective credit may vary based on second language requirements, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

8 The number of credits needed to complete the Second Language Requirement may vary depending on language placement. As well, this requirement may be waived via conditions further described below.

**Second Language Requirement**

For the Bachelor of Arts in Foreign Languages with a concentration in Spanish there is a two year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

8 A total of 24 credits of Upper-Division Spanish is required
9 Both SPAN 340 and SPAN 380 must be taken

Linguistics - Bachelor of Arts

Departmental Requirements

Single Major in Linguistics

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

The strong interdisciplinary nature of the major in Linguistics lends itself to combining with other programs. Students fulfilling the requirements for the major in Linguistics are encouraged to complete either a minor or an additional major to enhance their academic pursuits.

**Option 4:**

Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.

**Option 5:**

Obtain college certification of completion of three years of a second language at the high school level with a grade of C- or higher in the second-year level.

**Option 6:**

By obtaining certification of a working knowledge of a Native-American language from the American Indian program director.

**Option 7:**

By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of second language if such language is not taught at NMSU.

**Option 8:**

In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

**Double Major in Linguistics**

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Students who are completing a different major in a separate field of study can double major in Linguistics and this program may be serve students by completing this program as a double major. Double major students are required to complete the same course sequence as single majors in Linguistics except that there is no requirement to take LING 455 or similar Linguistics course with a research component, rather this is an option for double majors in Linguistics. At least 3 elective credits must be at the
400 level. No more than 6 credits may be from the department where the student is obtaining his/her major.

**A Suggested Plan of Study for Students**

This roadmap assumes student placement in ENGL 1110G Composition I and MATH 1130G Survey of Mathematics. The contents and order of this roadmap may vary depending on initial student placement in English and Mathematics. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

**Total Credits** 120-123

1 MATH 1130G Survey of Mathematics is required for the degree but students may need to take any prerequisites needed to enter MATH 1130G first.

2 Elective credit may vary based on second language requirements, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

3 See the General Education section of the catalog for a full list of courses.

4 See the Viewing a Wider World section of the catalog to see a full list of courses. Please note that FREN 365V, SPAN 364V and SPAN 365V do not fulfill this requirement.

JPNS 320  Oral Practicum in Japanese
JPNS 453  Independent Studies in Japanese

Cultural, Professional Courses  12
The remaining 12 credits can be completed in at least two of the following departments.
At least 9 credits of those credits from the following and no more than 3 credits from the Non-Asian Studies courses.

ANTH 307V  Japanese Culture and Society: Anthropological Perspectives
ARTH 311  Art of China I: Neolithic to Song Dynasty
ARTH 312  Art of China II: Song Dynasty to Today
GNDR 474  Gender in East Asian History
HIST 2250G  East Asia to 1600
HIST 2251G  East Asia since 1600
HIST 321V  History of Korea
HIST 323  Cultural History of Later Imperial China
HIST 404  Special Topics in Asian History
HIST 471  China through the Ming Dynasty
HIST 472  China in the Modern World
HIST 473  History of Japan
HIST 474  Gender in East Asian History
HNRS 2141G  Bamboo and Silk: The Fabric of Chinese Literature
HNRS 390V  Worlds of Buddhism

Non-Asian Studies courses
COMM 376  Communication and Culture
COMM 475  International Communication
IB 398  International Business and Economic Environments
POLS 360  International Relations Theory

Total Credits  18

Linguistics - Undergraduate Minor
The department offers a minor in linguistics.

Prefix  Title  Credits
Prefix  Title  Credits
LING 2110G  Introduction to the Study of Language and Linguistics  3
Select two from the following:
LING 301  Introduction to Psycholinguistics
or PSYC 301  Introduction to Psycholinguistics  6
LING 302V  Language and Society  3
LING 303  Exploring Language Systems  3
LING 405  Topics in Linguistics  3
LING 425  Language and the Mind: Introduction to Psycholinguistics  3
LING 451  Independent Studies in Linguistics  3
LING 455  Research in Linguistics  3
Select 9 credits with the help of an advisor from related fields  9

Total Credits  18

French - Undergraduate Minor
Students must pass at least 18 credits of FREN courses of which at least 12 credits are upper division. Students may not count FREN 1110 French I or FREN 1120 French II, but may count FREN 2110 French III and/or FREN 2120 French IV. A student whose primary language for a Bachelor of Arts in Foreign Languages is French may not also earn a minor in French.

Prefix  Title  Credits
Required Courses  Select at least 18 credits of FREN courses of which at least 12 credits are upper division  18

Total Credits  18

German - Undergraduate Minor
Students must pass at least 18 credits of GER courses of which at least 12 credits are upper division. Students may not count GRMN 1110 German I or GRMN 1120 German II, but may count GRMN 2110 German III and/or GRMN 2120 German IV. A student whose primary language for a Bachelor of Arts in Foreign Languages is German may not also earn a minor in German.

Prefix  Title  Credits
Required Courses  Select at least 18 credits of GER courses of which at least 12 credits are upper division  18

Total Credits  18

Spanish - Undergraduate Minor
Students must pass at least 18 credits of SPAN courses of which at least 12 credits are at either the 300 or 400 level. Students may not count SPAN 1110 Spanish I, SPAN 1120 Spanish II and SPAN 1210 Elementary Spanish for Heritage Learners I, but may count SPAN 2110 Spanish III and/or SPAN 2120 Spanish IV or SPAN 1220 Spanish for Heritage Learners II and/or SPAN 2210 Spanish for Heritage Learners III. A student whose primary language for a Bachelor of Arts in Foreign Languages is Spanish may not also earn a minor in Spanish.

Prefix  Title  Credits
Required Courses  SPAN 316  Grammar for Non-Native Speakers of Spanish  3
or SPAN 318  Grammar for Heritage/Native Speakers of Spanish  3
SPAN 317  Composition for Non-Native Speakers of Spanish  3
or SPAN 319  Composition for Heritage/Native Speakers of Spanish  3

Electives  Additional 12 SPAN credits of which at least 6 credits are upper division  12

Total Credits  18

SPAN 364V Culture and Civilization of Mexico and SPAN 365V Culture and Civilization of Spanish America do not count for a minor in Spanish as they are taught in English.
Latin American Studies - Supplemental Major

This program consists of 24 credits drawn from the lists below of which 18 credits must be numbered 300 or above. In addition, students must satisfy the College of Arts and Sciences Second Language Requirement.

Options

There are two options based on the section chosen by the student:

**Option 1**
Concentration in Latin American Language, Culture and Literature (Spanish or Portuguese):

- 12 credits from Section 1
- 12 credits from Section 2, (Note: No more than 6 credits may be taken in a single department)

**Option 2**
Concentration in one major (e.g., history, government, economics, health science, anthropology, sociology) included in Latin American Social Sciences and Art:

- 12 credits in the chosen area of Section 2
- 6 credits from another area (or areas) of Section 2
- 6 credits from Section 1

Both options require that the student take at least two Spanish or Portuguese courses above 300-level.

Section 1: Latin American Language, Culture and Literature

Only 3 credits will count.

Total Credits 36

Courses that may apply to either area include SPAN 590 Advanced Special Topics (see subtitles in schedule of courses to confirm subject of the course) SPAN 598 Independent Reading, Research, and/or Creative Writing, SPAN 599 Master's Thesis (both courses require a course proposal and prior approval).

Additional Language Requirement

For both the on-campus and online degrees, the department requires that students fulfill a second language requirement (in addition to English and Spanish) by following an approved course of study. Typically, this is completed by taking a four-semester course of study, but may vary according to the languages available.

Options for completing this requirement include taking classes at a local Community College or University, or online. Some students have met this requirement by studying abroad through NMSU. Students should consult the Graduate Director to establish a plan and discuss how this requirement will be met. Note: evidence of fulfilling the second language requirement must be provided to the Graduate Director BEFORE taking final examinations.

English Language Requirement

International students are required to demonstrate proficiency in English and meet all international admissions requirements prior to beginning their program of study. Please see the section of the Graduate Catalog on international admissions requirements and scores required for either the TOEFL or IELTS exam. Note: evidence of fulfilling the English Language Requirement must be provided to the Graduate Director AND the Graduate School BEFORE taking final examinations.

Final Examinations

Students must successfully complete a final department examination (generally during the final semester of coursework) that is partially written and partially oral. Please consult the Graduate Director for
specific information on dates and format for these exams. Final examinations are only available during the Fall and Spring semesters.

**Areas of Interest/Reading List**

As stated previously, each student needs to select an area of interest: Linguistics or Literature. At the end of the student's degree, the final examinations (written and oral) will be based on the readings from the readings list in the student's selected area of study. For example, a student that has opted to specialize in literature is responsible for reading all the materials on the Literature Reading List. Likewise, a student that has opted to specialize in linguistics is responsible for reading all the materials on the Linguistics Reading List. The student is responsible for the reading list that was in place the year he or she started the program.

Each student is responsible for covering the reading materials listed. Please contact the Graduate Director for a detailed reading. Note that the list is dated, so make sure to refer to the correct list that covers the year/semester the student started the program. The student is responsible for covering ALL the readings even if the student did not cover them as part of work done in class.

**Graduate Assistants**

For the on-campus program only, the department awards graduate assistantships to qualified students. For this financial assistance, the student works up to 20 hours a week in departmental programs, chiefly in the teaching of elementary and intermediate Spanish courses in either the Heritage Language sequence or Spanish as a second Language sequence. Students interested in being considered for an assistantship should clearly state this interest in their introduction letter during the application process. The department offers a limited number of assistantships, and students should remember that not everyone that applies for this award receives one. Maintaining the award depends on the student’s successful performance both academically and in the classes he/she teaches and is evaluated on a semester-by-semester basis. Students who receive an assistantship are required to take SPAN 594 Theory and Methodology of Spanish Pedagogy (see course description) as part of their degree plan in order to help them prepare for teaching classes at NMSU.

**Spanish - Master of Arts (Online)**

The degree plan requires a minimum of 36 credits in Spanish, of which at least 30 must be earned at the 500 level, and the remainder above the 450 level. The courses should be concentrated in the student’s chosen area of study (linguistics or literature) as each student will be tested on a reading list that corresponds to each area study. A thesis is optional. Students authorized to complete a thesis may count a maximum of 6 credits of thesis work toward the degree. At the present time, the thesis option is not available for online-only students. There are no required core courses at this time and a student should work closely with his/her advisor and the Graduate Director to establish an appropriate individual degree plan.

All students in either the on-campus or online program may complete a minor at the master’s level by taking 9 credits (3 courses) at the 500 level or above, in another area (department) of study, or within the department itself. For instance, a student studying linguistics may wish to obtain a minor in literature or a student studying literature may wish to obtain a minor in linguistics. In either case, the minor credits count as part of the 36 total credits required for the degree. In all cases, the student should work closely with the Graduate Director to ensure his/her particular plan of study is acceptable to the program.

**Total Credits** 36

Courses that may apply to either area include SPAN 590 Advanced Special Topics (see subtitles in schedule of courses to confirm subject of the course) SPAN 598 Independent Reading, Research, and/or Creative Writing, SPAN 599 Master’s Thesis (both courses require a course proposal and prior approval).

**Additional Language Requirement**

For both the on-campus and online degrees, the department requires that students fulfill a second language requirement (in addition to English
and Spanish) by following an approved course of study. Typically, this is completed by taking a four-semester course of study, but may vary according to the languages available.

Options for completing this requirement include taking classes at a local Community College or University, or online. Some students have met this requirement by studying abroad through NMSU. Students should consult the Graduate Director to establish a plan and discuss how this requirement will be met. Note: evidence of fulfilling the second language requirement must be provided to the Graduate Director BEFORE taking final examinations.

**English Language Requirement**

International students are required to demonstrate proficiency in English and meet all international admissions requirements prior to beginning their program of study. Please see the section of the Graduate Catalog on international admissions requirements and scores required for either the TOEFL or IELTS exam. Note: evidence of fulfilling the English Language Requirement must be provided to the Graduate Director AND the Graduate School BEFORE taking final examinations.

**Final Examinations**

Students must successfully complete a final department examination (generally during the final semester of coursework) that is partially written and partially oral. Please consult the Graduate Director for specific information on dates and format for these exams. Final examinations are only available during the Fall and Spring semesters.

**Areas of Interest/Reading List**

As stated previously, each student needs to select an area of interest: Linguistics or Literature. At the end of the student’s degree, the final examinations (written and oral) will be based on the readings from the readings list in the student’s selected area of study. For example, a student that has opted to specialize in literature is responsible for reading all the materials on the Literature Reading List. Likewise, a student that has opted to specialize in linguistics is responsible for reading all the materials on the Linguistics Reading List. The student is responsible for the reading list that was in place the year he or she started the program.

Each student is responsible for covering the reading materials listed. Please contact the Graduate Director for a detailed reading. Note that the list is dated, so make sure to refer to the correct list that covers the year/semester the student started the program. The student is responsible for covering ALL the readings even if the student did not cover them as part of work done in class.

**Graduate Assistantships**

For the on-campus program only, the department awards graduate assistantships to qualified students. For this financial assistance, the student works up to 20 hours a week in departmental programs, chiefly in the teaching of elementary and intermediate Spanish courses in either the Heritage Language sequence or Spanish as a second Language sequence. Students interested in being considered for an assistantship should clearly state this interest in their introduction letter during the application process. The department offers a limited number of assistantships, and students should remember that not everyone that applies for this award receives one. Maintaining the award depends on the student’s successful performance both academically and in the classes he/she teaches and is evaluated on a semester-by-semester basis. Students who receive an assistantship are required to take SPAN 594 Theory and Methodology of Spanish Pedagogy (see course description) as part of their degree plan in order to help them prepare for teaching classes at NMSU.

**Mathematical Sciences**

**Undergraduate Program Information**

In addition to meeting University and College requirements, students earning a Bachelor of Science in Mathematics must fulfill the core departmental requirements and choose from one of five emphases:

- General,
- Applied Mathematics,
- Actuarial Science and Insurance,
- Foundations or
- Secondary Mathematics Education.

Students must earn a grade of C- or better in all departmental and nondepartmental courses for any degree in the Department of Mathematical Sciences.

**Math Sequence Information and Recommendations**

Some students may be able to bypass one or more courses in the calculus sequence MATH 1511G Calculus and Analytic Geometry I - MATH 1521G Calculus and Analytic Geometry II - MATH 2530G Calculus III. The calculus sequence, MATH 1531 Introduction to Higher Mathematics, and MATH 2415 Introduction to Linear Algebra provide knowledge that is basic to further work, and students are advised to complete them or their equivalent as early as possible.

Students planning to enter a graduate program in Mathematics should select the General Emphasis. In any case, such students are strongly advised to take both MATH 331 Introduction to Modern Algebra and MATH 332 Introduction to Analysis, since these courses are required by most programs, and should take as many as possible of the following courses:

**Graduate Program Information**

The Department of Mathematical Sciences offers graduate instruction leading to the Master of Science degree, and Doctor of Philosophy degree. Possible areas of study are various topics in pure mathematics and applied mathematics, statistics and mathematics education. Students may also pursue an interdisciplinary program of study. Most graduate students in Mathematical Sciences are supported either through teaching assistantships, research assistantships, fellowships, or job opportunities at nearby teaching or research units.

For more information on our programs and facilities, and to learn more about the research interests of the faculty, please see our web site at https://math.nmsu.edu/, phone us at (575) 646-3901, or write to:

Graduate Secretary  
Department of Mathematical Sciences  
NMSU  
Las Cruces, NM 88003-8001
Email: gradcomm@nmsu.edu

Students applying for regular admission to graduate study in mathematics are expected to have 24 credits of upper-division courses in mathematics and statistics, including three-credit proof based courses in modern analysis and in modern algebra. Students who do not meet these requirements may be admitted with deficiencies and allowed to complete the requirements at New Mexico State University.

Applications must be submitted online, see http://prospective.nmsu.edu/graduate/apply/ (http://admissions.nmsu.edu/apply/). The minimum application to be admitted as a regular graduate student in mathematics includes:

1. a completed Graduate School admission application
2. complete transcripts of all undergraduate and graduate work
3. application fee
4. three letters of recommendation from professors, employers, or others who are qualified to judge potential for graduate work in mathematics
5. a one-page statement of educational objectives

Although GRE subject test scores are not required for admission, applicants are encouraged to submit them, if available. The test scores may be used to help allocate available teaching assistantships among entering students.

To ensure full consideration for admission, candidates should submit their applications by the following deadlines.

**Degrees for the Department**

**Bachelor Degree(s)**

Mathematics (Actuarial Science and Insurance) - Bachelor of Science (p. 686)

Mathematics (Applied Mathematics) - Bachelor of Science (p. 688)

Mathematics (Foundations) - Bachelor of Science (p. 691)

Mathematics (General Mathematics) - Bachelor of Science (p. 693)

Mathematics (Probability and Statistics) - Bachelor of Science (http://catalogs.nmsu.edu/nmsu/arts-sciences/mathematical-sciences/nmsu/arts-sciences/mathematical-sciences/mathematics-probability-statistics-bachelor-science/)

Mathematics (Secondary Mathematics Education) - Bachelor of Science (p. 697)

**Supplemental Major(s)**

Applied Mathematics - Supplemental Major (p. 699)

**Master Degree(s)**

Mathematics - Master of Science (p. 700)

**Doctoral Degree(s)**

Mathematics - Doctor of Philosophy (p. 701)

**Minors for the Department**

Mathematics - Undergraduate Minor (p. 700)

**Professor, John Harding, Department Head**

*Professors* Baggett, Barany, Bezhanishvili, DeBlasiie, Giorgi, Harding, Lakey, Olberding, Smits, Wang; *Associate Professors* Ballyk, Contreras, Foul, Stanford, Tian; *Assistant Professors* Montaño, Oprisan, Shapirovski; *College Associate Professors* Villaverde; *College Assistant Professors* Meek, O'Rourke; *College Instructors* Reece.

Mathematics Courses

MATH 1130G. Survey of Mathematics
3 Credits (3)
This course will develop students’ ability to work with and interpret numerical data, to apply logical and symbolic analysis to a variety of problems, and/or to model phenomena with mathematical or logical reasoning. Topics include financial mathematics used in everyday life situations, statistics, and optional topics from a wide array of authentic contexts. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in CCDM 113 N or CCDM 114 N or A S 103 or higher

Learning Outcomes
1. Construct and analyze graphs and/or data sets: Gather and organize information; Understand the purpose and use of various graphical representations such as tables, line graphs, tilings, networks, bar graphs, etc.; Interpret results through graphs, lists, tables, sequences, etc.; Draw conclusions from data or various graphical representations.
2. Use and solve various kinds of equations: Understand the purpose of and use appropriate formulas within a mathematical application; Solve equations within a mathematical application; Check answers to problems and determine the reasonableness of results.
3. Understand and write mathematical explanations using appropriate definitions and symbols: Translate mathematical information into symbolic form; Define mathematical concepts in the student’s own words; Use basic mathematical skills to solve problems.
4. Demonstrate problem solving skills within the context of mathematical applications; Show an understanding of a mathematical application both orally and in writing; Choose an effective strategy to solve a problem; Gather and organize relevant information for a given application.

MATH 1134. Fundamentals of Elementary Mathematics I
3 Credits (3)
Numbers and the four operations of arithmetic. Understanding and comparing multiple representations of numbers and operations, in particular how these representations build from whole numbers to integers to fractions and decimals. Applying properties of numbers and operations in contextual situations. Reasoning, communicating, and problem solving with numbers and operations. Applications to ratio, and connections with algebra. Taught primarily through student activities and investigations. Restricted to: EDUC, EPAR, ED, ECED majors. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1215 or higher

Learning Outcomes
1. As future elementary teachers you will be teaching mathematics to children.
2. In order to teach a subject well you need not only to know the material that you will teach, but you need to know more than what you will teach, and know it well in order to be able to answer questions, understand student reasoning, give alternate explanations when your students do not understand something, and be able to adjust to changes in the mathematical curriculum.
3. Furthermore, even if you hope to teach a given grade, you should be prepared to teach a variety of grades since what a person ends up teaching is often not what they planned to do.
4. We will explore ideas of arithmetic in a way to help you improve your mathematical ability, gain confidence in your ability, introduce to you different ideas and models, and to see a variety of mathematical activities that are appropriate for people of all ages.
5. Everything we study will be done with the aim of developing your ability to relate to the mathematics of elementary school and to help children develop mathematical understanding.

MATH 1215. Intermediate Algebra
3 Credits (3)
A study of linear and quadratic functions, and an introduction to polynomial, absolute value, rational, radical, exponential, and logarithmic functions. A development of strategies for solving single-variable equations and contextual problems. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in CCDM 113 N or CCDM 114 N or A S 103 or higher

Learning Outcomes
1. Students will build on their knowledge of linear and quadratic functions and will begin to build an understanding of absolute value, polynomial, rational, power, radical, exponential and logarithmic functions in the following contexts: Demonstrate appropriate use of basic function language and notation; Convert between equivalent forms of algebraic expressions; Solve single-variable equations of the types listed above; Interpret and communicate algebraic solutions graphically and numerically; Demonstrate contextual problem-solving skills that include setting up and solving problems, and interpreting solutions in context; Apply appropriate problem solving methods from among algebraic, graphical, and numerical.
MATH 1217. General Supplemental Instruction I
1 Credit (2P)
Learning Outcomes
1. Intermediate Algebra Workshop provides time for students to work on problems from Intermediate Algebra under the guidance of their Intermediate Algebra instructor

MATH 1220G. College Algebra
3 Credits (3)
The study of equations, functions and graphs, reviewing linear and quadratic functions, and concentrating on polynomial, rational, exponential and logarithmic functions. Emphasizes algebraic problem solving skills and graphical representation of functions. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1220G or higher
Learning Outcomes
1. Use function notation; perform function arithmetic, including composition; find inverse functions.
2. Identify functions and their transformations given in algebraic, graphical, numerical, and verbal representations, and explain the connections between these representations.
3. Graph and interpret key feature of functions, e.g., intercepts, leading term, end behavior, asymptotes.
4. Solve equations algebraically to answer questions about graphs, and use graphs to estimate solutions to equations.
5. Solve contextual problems by identifying the appropriate type of function given the context and creating a formula based on the information given.
6. Communicate mathematical information using proper notation and verbal explanations.

MATH 1221. General Supplemental Instruction II
1 Credit (1+2P)
Corequisite(s): MATH 1220G.
Learning Outcomes
1. College Algebra Workshop provides time for students to work on problems from College Algebra under the guidance of their College Algebra instructor

MATH 1250G. Trigonometry & Pre-Calculus
4 Credits (3+2P)
Trigonometry & Pre-Calculus includes the study of functions in general with emphasis on the elementary functions: algebraic, exponential, logarithmic, trigonometric and inverse trigonometric functions. Topics include rates of change, limits, systems of equations, conic sections, sequences and series, trigonometric equations and identities, complex number, vectors, and applications. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1220G or higher
Learning Outcomes
1. (Trigonometry) Students will be able to define and evaluate the trigonometric functions as functions of angle in both degree and radian measure using the definitions in terms of x, y, and r; as the ratio of sides of a right triangle; using the unit circle; using reference angles, commonly used (0°, 30°, 45°, 60°, 90°) angles and using a calculator.
2. (Trigonometry) Students will be able to solve right triangles. They will be able to draw a sketch in an applied problem when necessary.
3. (Trigonometry) Students will be able to solve non-right triangles using the law of sines and the law of cosines.
4. (Trigonometry) Students will be able to prove trigonometric identities and apply addition and subtraction, double-angle, half-angle and power reduction formulas.
5. (Trigonometry) Students will be able to graph the six trigonometric functions, their transformations and their inverses.
6. (Trigonometry) Students will be able to use algebraic methods, including the use of identities and inverses, to solve trigonometric equations and demonstrate connections to graphical and numerical representations of the solutions.
7. (Trigonometry) Students will be able to add and subtract vectors in two dimensions. They will be able to use the dot product to project one vector onto another and to determine the angle between two vectors. They will be able to solve a variety of word problems using vectors.
8. (Trigonometry) Students will be able to work with polar coordinates; this includes graphing in polar coordinates and transforming an equation with polar coordinates into one with rectangular coordinates, and vice versa.
9. (Trigonometry) Students will be to work with the trigonometric form of complex numbers, including using De Moivre's formula.
10. (Pre-Calculus) Functions: Reinforce recognizing a function from its graph and from its algebraic expression; Reinforce identification of a one-to-one function graphically and from its algebraic expression; Reinforce identification of inverse functions graphically and algebraically; Reinforce combining functions arithmetically and compositionally; Be able to calculate the average rate of change of a function using the difference quotient and depict it graphically; Be able to find a limiting value of a function and be able to identify and use the notation that describes this.
11. (Pre-Calculus) Graphing: Reinforce using key characteristics of functions to graph them; Be able to graph conic sections from their key characteristics such as foci, eccentricity and asymptotes; Be able to identify all functions mentioned from their graphs, describing their key aspects.
12. (Pre-Calculus) Solving: Exponential/Logarithmic equations using the rules of exponents and logarithms; Systems of linear equations by elimination; Non-linear systems algebraically and graphically.
13. (Pre-Calculus) Applications: Modeling with functions with an emphasis on exponential and logarithmic functions, growth and decay.
14. (Pre-Calculus) Sequences and series: Understand the concept and notation of a sequence; Understand the concept and notation of a
MATH 1350G. Introduction to Statistics
3 Credits (3)
This course discusses the fundamentals of descriptive and inferential statistics. Students will gain introductions to topics such as descriptive statistics, probability and basic probability models used in statistics, sampling and statistical inference, and techniques for the visual presentation of numerical data. These concepts will be illustrated by examples from a variety of fields. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1215 or higher

Learning Outcomes
1. Explain the general concepts of statistics: Explain and evaluate statistics used in the real world (from a news article, research project, etc.); Use statistical vocabulary appropriately; Distinguish between descriptive and inferential statistics; Distinguish between qualitative and quantitative data; Distinguish between populations and samples, and parameters and statistics; Give examples of independent and dependent variables.
2. Presentation and description of data: Present data graphically using histograms, frequency curves and other statistical graphs; Interpret graphs of data, including histograms and shapes of distributions.
3. Summarize data using measures of central tendency and variation: Calculate and interpret the mean, median, and mode to describe data; Calculate and interpret range, variance, and standard deviation to describe data.
4. Present the concepts of probability: Interpret basic probabilities; Calculate probabilities using compound probability rules and the binomial distribution; Calculate probabilities using the standard normal distribution and relate them to areas under the curve; Determine if the binomial distribution can be approximated with the normal distribution; Describe the relationship between the sampling distribution and the population distribution; Use the central limit theorem to approximate the probability distribution and calculate probabilities.
5. Compute point and interval estimates: Determine the confidence interval for a parameter; Interpret the confidence level and margin of error; Determine whether a statistical technique is appropriate under stated conditions.
6. Perform hypothesis tests: Determine whether a statistical test is appropriate under stated conditions; Identify null and alternative hypothesis; Perform and interpret statistical tests (e.g. z-test, t-test, one-tailed and two-tailed, one-sample, two-sample) and determine whether data is statistically significant; State the conclusion of a hypothesis test; Interpret a p-value as compared to a significance level; Explain why a test can lead us to reject a null hypothesis, not accept one; Distinguish between Type I and Type II errors.
7. Analyze data using regression and correlation: Explain the difference between correlation and causation; Construct and interpret scatter plots; Calculate and interpret the linear correlation coefficient; Determine and use the equation of a least-squares regression line between two variables to make predictions; Interpret the meaning of the coefficient of determination.
8. Optional topics: Inter-quartile range, box-plots, stem-and-leaf plots; Combinations and permutations; The Poisson distribution; Statistical power; Chi-square; Analysis of variance

MATH 1430G. Applications of Calculus I
3 Credits (2+2P)
An algebraic and graphical study of derivatives and integrals, with an emphasis on applications to business, social science, economics and the sciences. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1220G or higher

Learning Outcomes
1. Find limits algebraically and graphically, and use limits to analyze continuity.
2. Find the derivative of a function by applying appropriate techniques (limit of the difference quotient, general derivative rules, product rule, quotient rule, chain rule, and higher order derivatives).
3. Perform implicit differentiation. Use implicit differentiation to solve related rate application problems.
4. Use the derivative to describe the rate of change and slope of a curve in general and at particular points. Compare and contrast average rates of change to instantaneous rates of change.
5. Find the maxima, minima, points of inflections, and determine concavity of a function by applying the first and second derivatives. Use these results to sketch graphs of functions and to solve optimization problems in context.
6. Find the antiderivative and indefinite integral functions to include integration by substitution. Apply the Fundamental Theorem of Calculus in computing definite integrals of functions.
7. Approximate the area under the curve using Riemann sums.
8. Use the integral to determine the area under a curve and to find the accumulated value of a function in context.
9. Solve contextual problems by identifying the appropriate type of function given the context, creating a formula based on the information given, applying knowledge of algebra and calculus, and interpreting the results in context.
10. Communicate mathematical information using proper notation and verbal explanations.
MATH 1435. Applications of Calculus I
3 Credits (3)
Intuitive differential calculus with applications to engineering.
Prerequisite(s): C- or better in MATH 1250G.
Learning Outcomes
1. Find limits algebraically and graphically, and use limits to analyze continuity.
2. Find the derivative of a function by applying appropriate techniques (limit of the difference quotient, general derivative rules, product rule, quotient rule, chain rule, and higher order derivatives).
3. Learn derivative rules for polynomial, exponential, logarithmic, trigonometric and inverse trigonometric functions.
4. Perform implicit differentiation. Use implicit differentiation to solve related rate application problems.
5. Find the maxima, minima, points of inflections, and determine concavity of a function by applying the first and second derivatives. Use these results to sketch graphs of functions and to solve optimization problems in context.
6. Find partial derivatives and find maxima, minima in three dimensions.
7. Find the linear approximation of a function.
8. Find Maclaurin and Taylor series.
10. Communicate mathematical information using proper notation and verbal explanations.

MATH 1511G. Calculus and Analytic Geometry I
4 Credits (4)
Limits and continuity, theory and computation of derivatives, applications of derivatives, extreme values, critical points, derivative tests, L'Hopital's Rule. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1250G or higher.
Learning Outcomes
1. The goals are to present the concepts of calculus, stressing techniques, applications, and problem solving, and emphasizing numerical aspects such as approximations and order of magnitude.
2. Overall, the goals are to illustrate the power of calculus as a tool for modeling situations arising in physics, science, engineering and other fields.
3. In fulfillment of these goals, this and later courses will stress topics such as polynomial approximation, setting up integrals, as well as the use of appropriate technology.

MATH 1521G. Calculus and Analytic Geometry II
4 Credits (4)
Riemann sums, the definite integral, antiderivatives, fundamental theorems, techniques of integration, applications of integrals, improper integrals, Taylor polynomials, sequences and series, power series and Taylor series. May be repeated up to 4 credits.
Prerequisite: C- or better in MATH 1511G.
Learning Outcomes
1. Recognize the interplay between Riemann sums and definite integrals. Use the Fundamental Theorem of Calculus to compute definite and indefinite integrals. Demonstrate an understand of the relationship between the derivative and the definite integral. Evaluate integrals numerically using standard rules (midpoint, trapezoid, Simpson's) Evaluate integrals analytically using standard methods (substitution, integration by parts, trigonometric substitution and identities, inverse functions and partial fractions. Use integration to solve problems in geometry, physics, science, engineering and other fields. Use appropriate methods such as L'Hopital's Rule to evaluate improper integrals. Approximate functions using Taylor polynomials. Apply standard tests to determine convergence or divergence of sequences and series. Identify a power series representation for a function and determine where it converges. Identify and evaluate first order differential equations.
MATH 1521H. Calculus and Analytic Geometry II Honors
4 Credits (3+1P)
A more advanced treatment of the material of MATH 1521G with additional topics. Consent of instructor required. Restricted to Las Cruces campus only. Consent of Department.

Learning Outcomes
1. Recognize the interplay between Riemann sums and definite integrals
2. Use the Fundamental Theorem of Calculus to compute definite and indefinite integrals
3. Demonstrate an understanding of the relationship between the derivative and the definite integral
4. Evaluate integrals numerically using standard rules (midpoint, trapezoid, Simpson’s)
5. Evaluate integrals analytically using standard methods (substitution, integration by parts, trigonometric substitution and identities, inverse functions and partial fractions
6. Use integration to solve problems in geometry, physics, science, engineering and other fields
7. Use appropriate methods such as L’Hopital’s Rule to evaluate improper integrals
8. Approximate functions using Taylor polynomials
9. Apply standard tests to determine convergence or divergence of sequences and series
10. Identify a power series representation for a function and determine where it converges
11. Identify and evaluate first order differential equations

MATH 1531. Introduction to Higher Mathematics
3 Credits (3)
Logic; sets, relations, and functions; introduction to mathematical proofs.
Prerequisite(s): C- or better in MATH 1521G or MATH 1521H.

Learning Outcomes
1. The primary objective of this course is to serve as a bridge between the calculus courses you have taken, where the focus is on computations and solving problems, to more abstract mathematics courses.
2. In particular, we will discuss logical reasoning, definitions, proofs, and certain basic building blocks such as sets, functions, and relations.
3. By the end of the course, you should be able to understand and construct well-written proofs of basic mathematical arguments involving simple properties of the real numbers, integers, sets, functions, and relations using universal and existential quantifiers, absolute values and inequalities, modular arithmetic, and proof by induction.

MATH 2134G. Fundamentals of Elementary Math II
3 Credits (3)
Geometry and measurement. Multiple approaches to solving problems and understanding concepts in geometry. Analyzing and constructing two- and three-dimensional shapes. Measurable attributes, including angle, length, area, and volume. Understanding and applying units and unit conversions. Transformations, congruence, and symmetry. Scale factor and similarity. Coordinate geometry and connections with algebra. Reasoning and communicating about geometric concepts. Taught primarily through student activities and investigations. May be repeated up to 3 credits.

Prerequisite: C- or better in MATH 1134.

Learning Outcomes
1. The primary objectives are mathematical: to understand some of the basic concepts of geometry, and measurement with an appropriate level of rigor; to appreciate the historical, cultural and educational contributions and potential applications in real life situations; and to gain problem solving skills using these concepts. The secondary goal is to appreciate the importance of this material in the elementary school curriculum.

MATH 2234. Fundamentals of Elementary Mathematics III
3 Credits (3)
Probability, statistics, ratios, and proportional relationships. Experimental and theoretical probability. Collecting, analyzing, and displaying data, including measurement data. Multiple approaches to solving problems involving proportional relationships, with connections to number and operation, geometry and measurement, and algebra. Understanding data in professional contexts of teaching. Taught primarily through student activities and investigations. May be repeated up to 3 credits.

Prerequisite: C- or better in MATH 2134G.

Learning Outcomes
1. In order to teach a subject well you need not only to know the material that you will teach, but you need to know more than what you will teach, and know it well, in order to be able to answer questions, give alternate explanations when your students do not understand something, and be able to adjust to changes in the mathematical curriculum. Furthermore, even if you hope to teach a certain grade, you should be prepared to teach anything between kindergarten and 8th grade. You also need to be aware of where a student is coming from in order to make adjustments in their curriculum. A strong elementary school teacher must understand where his/her students are headed in order to most effectively direct them there. This is especially true in mathematics, where students continue to build on the concepts they learn each year.

MATH 1996. Topics in Mathematics
1-3 Credits
Topics to be announced in the Schedule of Classes. Maximum of 3 credits per semester. Total credit not to exceed 6 credits. Community Colleges only.

Prerequisite: consent of instructor.

Learning Outcomes
1. Varies
MATH 2350G. Statistical Methods
3 Credits (3)
Exploratory data analysis. Introduction to probability, random variables and probability distributions. Concepts of Central Limit Theorem and Sampling Distributions such as sample mean and sample proportion. Estimation and hypothesis testing single population parameter for means and proportions and difference of two population parameters for means and proportions. Analysis categorical data for goodness of fit. Fitting simple linear regression model and inference for regression parameters. Analysis of variance for several population means. Techniques in data analysis using statistical packages. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1215 or higher

Learning Outcomes
1. Summarize Data through graphs and Descriptive statistics: Define qualitative and quantitative data; Provide examples of a population, a sample, independent and dependent variables, parameters and statistics; Construct and interpret histograms, stem plots, bar charts, and boxplot; Summarize distributions with numerical measures such as mean, median, standard deviation, percentiles, interquartile range.
2. Present the concepts of probability: Explain related to probability axioms (e.g. mutually exclusive events and independent events); Apply applications of probability rules; Apply Conditional probability and Bayes Rule.
3. Distinguish between discrete and continuous random variables: Calculate probabilities using Binomial and Poisson distributions; Calculate probabilities using the standard normal distribution by finding the area underneath the curve.
4. Explain the Central Limit Theorem: Introduce the concept of a sampling distribution; Discuss the distribution of the sample mean and sample proportion under repeated sampling; Generate and interpret a sampling distribution using repeated sampling; Determine if the Binomial and Poisson distribution can be approximated with the normal distribution.
5. Estimate a population parameter: Determine confidence interval for population mean, proportion, difference of means, and difference of proportions; Interpret the confidence interval and margin of error; Explain the dependence of margin of error on sample size and confidence level.
6. Perform hypothesis tests for population parameters (population mean, proportion, difference of means, and difference of proportions); Describe the logic and framework of the inference of hypothesis testing; Make a decision using a p-value and draw an appropriate conclusion; Distinguish between Type I and Type II errors; Explain power of the test.
7. Perform Hypothesis Tests for Categorical data: Determine and analyze Chi-square test for Independence; Determine and analyze Chi-square test for Goodness of fit.
8. Analyze data using regression and correlation: Construct scatterplots and analyze the scatter plots; Calculate the linear correlation coefficient and determine whether a linear relationship exists between two variables; Fit the least-squares regression line between two variables; Predict the response variable from the regression line; Apply statistical inference to regression parameters.
9. Perform analysis of variance: State hypotheses for the test of several population means; Construct the AVOVA Table; Explain the significance of multiple comparisions.
10. Demonstrate the appropriate use of technology (e.g., Excel, an appropriate graphing calculator or other software (Minitab, SAS)}
MATH 313. Fundamentals of Algebra and Geometry I
3 Credits (3+1P)
Covers algebra combined with geometry based on measurements of distance (metric geometry). Secondary mathematics education majors may take course as a math elective. MATH 313 does not substitute for other required math courses. Does not fulfill requirements for major in mathematics.
Prerequisite: MATH 1134 and MATH 2134G.

MATH 331. Introduction to Modern Algebra
3 Credits (3)
Elements of abstract algebra, including groups, rings and fields.
Prerequisite: C or better in MATH 1531 and MATH 2415.

MATH 332. Introduction to Analysis
3 Credits (3)
Development of the real numbers, a rigorous treatment of sequences, limits, continuity, differentiation, and integration.
Prerequisite: C or better in MATH 1521G or MATH 1521H and MATH 1531.

MATH 333. Introduction to Geometry
3 Credits (3)
Building on ideas from high school geometry, an introduction to the axiomatic method, transformation groups, and non-Euclidean geometry.
Prerequisite: C- or better in MATH 1531 and MATH 2415.

Learning Outcomes
1. Demonstrate the ability to make conjectures in geometry, refine conjectures, and prove or refute conjectures. Understand how transformations of the plane can be used to define and apply the concepts of congruence and similarity in Euclidean geometry. Solve problems in geometry using different approaches (axioms, coordinates, transformations), and explain how the different approaches are related. Compare the definitions and theorems of Euclidean geometry with the corresponding definitions and theorems in non-Euclidean geometry.

MATH 377. Introduction to Numerical Methods
3 Credits (3)
Basic numerical methods for interpolation, approximation, locating zeros of functions and integration; numerical linear algebra. Computer-oriented methods will be emphasized. Student must also have some programming experience in order to enroll.
Prerequisite: C- or better in one of MATH 2415, M E 228, or E E 200.

Learning Outcomes
1. Understand the limitations, advantages, and disadvantages of common numerical methods and how they are used to obtain approximate solutions. Apply numerical methods to obtain approximate solutions to mathematical problems. Analyze and evaluate the accuracy of common numerical methods. Write efficient, well-documented code to implement numerical methods.

MATH 391. Vector Analysis
3 Credits (3)
Calculus of vector valued functions, Green's and Stokes' theorems and applications.
Prerequisite: grade of C or better in MATH 2530G.

MATH 392. Introduction to Ordinary Differential Equations
3 Credits (3)
Introduction to differential equations and dynamical systems with emphasis on modeling and applications. Basic analytic, qualitative and numerical methods. Equilibria and bifurcations. Linear systems with matrix methods, real and complex solutions.
Prerequisite: C or better in MATH 1521G or MATH 1521H or B or better in MATH 1440.

MATH 400. Undergraduate Research
1-3 Credits
May be repeated for a maximum of 6 credits. Graded S/U.
Prerequisite: consent of faculty member.

MATH 401. Special Topics
1-3 Credits (1-3)
Specific subjects to be announced in the Schedule of Classes. May be used to fulfill a course requirement for the mathematics major. Consent of Instructor required.

MATH 411V. Great Theorems in Mathematics
3 Credits (3)
This course examines some significant mathematical achievements from antiquity to the modern era. Evolution of notions and methods in geometry, number theory, algebra, and calculus will be supplemented by cultural and biographical history, placing mathematics in a broad human context.
Prerequisite: Grade of C- or higher in MATH 1531, or grade of B or higher in any upper-division math course, or consent of instructor.

Learning Outcomes
1. At the end of this course, students will be able to: Describe the history of the development of some key mathematical concepts. Describe the connections between mathematical ideas in different historical periods and places. Recognize the role of abstraction and logic in the progress of mathematics. Describe the contribution of mathematics to culture and science in different historical eras. Determine if a mathematical conjecture is correct and provide rigorous written mathematical justification. Provide sound, complete and clear mathematical arguments involving simple calculations, geometric constructions, and/or written mathematical proofs. Communicate mathematical ideas, both written and orally.

MATH 450. Introduction to Topology
3 Credits (3)
Topological spaces: general spaces and specific examples such as metric spaces, Hausdorff spaces and/or normed vector spaces; separation axioms; continuity, compactness, connectedness; related theorems. Crosslisted with: MATH 520.
Prerequisite(s): MATH 332.

MATH 451. Introduction to Differential Geometry
3 Credits (3)
Applies calculus to curves and surfaces in three dimensional Euclidean space.
Prerequisite(s): C- or better in each of MATH 2415 and MATH 391, or consent of instructor.

MATH 452. Foundations of Geometry
3 Credits (3)
Topics in projective, axiomatic Euclidean or non-Euclidean geometries. Restricted to: Main campus only.
Prerequisite(s): C or better in MATH 331 or MATH 332.
Learning Outcomes

1. Understand higher-level linear algebra concepts for which matrix linear algebra is the basic tool. Understand how to apply higher-level linear algebra concepts to problems that arise in real-world applications.
MATH 520. Introduction to Topology  
3 Credits (3)  
Same as MATH 450 with additional work for graduate students. Crosslisted with: MATH 450.  
MATH 524. Logic and Set Theory  
3 Credits (3)  
Same as MATH 454 with additional assignments for graduate students. Crosslisted with: MATH 454.  
Prerequisite(s): consent of instructor.  
MATH 525. Advanced Linear Algebra  
3 Credits (3)  
Same as MATH 481 with additional work for graduate students. May be repeated up to 3 credits.  
MATH 526. Abstract Algebra I: Groups and Rings  
3 Credits (3)  
Same as MATH 456 with additional work for graduate students. Crosslisted with: MATH 456.  
Prerequisite(s): MATH 525 or consent of instructor.  
MATH 527. Introduction to Real Analysis I  
3 Credits (3)  
Same as MATH 491 with additional work for graduate students.  
MATH 528. Introduction to Real Analysis II  
3 Credits (3)  
Same as MATH 492 with additional work for graduate students.  
MATH 529. Complex Analysis  
3 Credits (3)  
Rigorous treatment of complex differentiation and integration, properties of analytic functions, series and Cauchy’s integral representations.  
Prerequisite: MATH 332.  
MATH 530. Special Topics  
1-3 Credits  
Specific subjects to be announced in the Schedule of Classes. May be for unlimited credit with approval of the department.  
MATH 540. Directed Reading  
1-6 Credits  
May be repeated for a maximum of 6 credits. Consent of instructor required. Graded: S/U.  
MATH 541. Topology I  
3 Credits (3)  
Connectedness and compactness of topological spaces, introduction to the quotient topology, elementary homotopy theory, the fundamental group, the Seifert-van Kampen theorem  
Prerequisite(s): MATH 525 and MATH 528, or consent of instructor.  
MATH 542. Topology II  
3 Credits (3)  
Covering spaces and their classification, singular homology, degree theory, Brouwer’s fixed point theorem, CW-complexes and cellular homology, and other applications.  
Prerequisite(s): MATH 541 or consent of instructor.  
MATH 551. Mathematical Structures in Logic  
3 Credits (3)  
Prerequisite(s): MATH 524.  
MATH 552. Universal Algebra and Model Theory  
3 Credits (3)  
Prerequisite(s): MATH 524.  
MATH 562. History and Theories of Mathematics Education  
3 Credits (3)  
A study of the history of the mathematics taught in American schools, including an examination of authentic original textbooks and the changes in their content and the approach to the subject over time, together with writings of people who have influenced the development and changes of mathematics education. Theories of learning mathematics, and current issues in mathematics education.  
Prerequisite(s): Restricted to graduate students.  
MATH 563. Algebra with Connections  
3 Credits (3)  
Connections between Algebra and other K-12 curriculum strands, especially Geometry and Probability / Data Analysis. Apply algebraic modeling and reasoning to a variety of mathematical problem solving situations. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.  
Prerequisite(s): Admittance into the MC2-LIFT program.  
MATH 564. From Number to Algebra  
3 Credits (3)  
The progression from Number to Algebra in the K-12 curriculum as a concrete-to-abstract progression. Key concepts considered across the grade levels include the different uses of variables, equivalence in different contexts, patterns, and ratios. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.  
Prerequisite(s): Admittance into the MC2-LIFT program.  
MATH 566. Data Analysis with Applications  
3 Credits (3)  
Statistical concepts and terminology in professional uses of data by teachers, such as standardized test score reports and educational research; visual displays of data; measures of variation and central tendency; consideration of how K-12 topics in Data Analysis are developed from one grade level to the next. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.  
Prerequisite(s): Admittance into the MC2-LIFT program.  
MATH 567. From Measurement to Geometry  
3 Credits (3)  
The progression from Measurement to Geometry in the K-12 curriculum as a concrete-to-abstract progression. Important concepts such as angle, length, and area progress from concrete, measurable situations to more abstract problems which require reasoning and proof. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.  
Prerequisite(s): Admittance into the MC2-LIFT program.  
MATH 568. Using Number Throughout the Curriculum  
3 Credits (3)  
Understand number concepts more deeply by seeing many examples of those concepts applied in other content strands. Develop mathematical knowledge and understanding to build a repertoire of ways for students to practice and review basic number skills and concepts as part of later, more advanced courses. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.  
Prerequisite(s): Admittance into the MC2-LIFT program.
MATH 569. Geometry with Connections
3 Credits (3)
Connections between Geometry and other K-12 curriculum strands, especially Algebra and Probability / Data Analysis. Address key attributes of geometric concepts by considering their connections within and across grade levels. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.
Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 571. Partial Differential Equations I
3 Credits (3)
The basic equations of mathematical physics. Laplace, Heat and Wave Equations. The method of characteristics, introduction to conservation laws, special solutions.
Prerequisite(s): MATH 518 and MATH 528 or consent of instructor.

MATH 572. Partial Differential Equations II
3 Credits (3)
Sobolev spaces theory: basic definitions and properties, embedding theorems, weak solutions of boundary value problems and variational methods for partial differential equations.
Prerequisite(s): MATH 593 or consent of instructor.

MATH 581. Abstract Algebra II: Fields, Rings and Modules
3 Credits (3)
Topics covered include field extensions; algebraic closure; polynomials rings; irreducibility criteria; Noetherian rings; algebraic sets; Nullstellensatz; modules; applications to linear algebra.
Prerequisite(s): MATH 526 or consent of instructor.

MATH 582. Module Theory and Homological Algebra
3 Credits (3)
Introductory concepts of homological algebra, including projective, injective and flat modules; projective and injective resolutions; exactness of functors; homology of chain complexes; derived functors.
Prerequisite(s): MATH 581 or consent of instructor.

MATH 583. Introduction to Commutative Algebra and Algebraic Geometry
3 Credits (3)
Introduction to the basic notions and techniques of modern algebraic geometry, including the necessary commutative algebra foundation. Topics likely to include algebraic and projective varieties, Nullstellensatz, morphisms, rational and regular functions, local properties. Other topics may include Noether normalization, dimension theory, singularities, sheaves, schemes, Grobner bases.
Prerequisite(s): MATH 581 or consent of instructor.

MATH 593. Measure and Integration
3 Credits (3)
Measure spaces, measurable functions, extension and decomposition theorems for measures, integration on measure spaces, absolute continuity, iterated integrals.
Prerequisite: MATH 528 or consent of instructor.

MATH 594. Real Analysis
3 Credits (3)
Differentiation, Lp spaces, Banach spaces, measure and topology, other selected topics.
Prerequisite: MATH 593.

MATH 595. Introduction to Functional Analysis
3 Credits (3)
Banach spaces. The three basic principles: uniform boundedness principle, closed graph/open mapping theorems, Hahn-Banach theorem.
Prerequisite(s): MATH 594, or consent of instructor.

MATH 599. Master's Thesis
1-15 Credits
Thesis.

MATH 600. Doctoral Research
1-15 Credits
Research.

MATH 698. Selected Topics
1-15 Credits
Selected topics.

MATH 700. Doctoral Dissertation
1-15 Credits
Dissertation.

Statistics Courses

STAT 371. Statistics for Engineers and Scientists I
3 Credits (3)
Modern probability and statistics with applications to the engineering sciences.
Prerequisite(s): C - or better in MATH 1521G or MATH 1521H.

STAT 400. Undergraduate Research
1-3 Credits
Arrangements must be made with supervising professor before registration. May be repeated for a maximum of 6 credits.

STAT 470. Probability: Theory and Applications
3 Credits (3)
Basic probability distributions including binomial, normal; random variables, expectation; laws of large numbers; central limit theorem.
Prerequisite(s): C- or better in MATH 2530G and C- or better in at least one-300 level Math course.

STAT 480. Statistics: Theory and Applications
3 Credits (3)
Point and interval estimation; sufficiency; hypothesis testing; regression; analysis of variance; chi-square tests.
Prerequisite(s): C- or better in STAT 470.

STAT 515. Probability: Theory and Applications
3 Credits (3)
Same as STAT 470 with additional work for graduate students.

STAT 525. Statistics: Theory and Applications
3 Credits (3)
Same as STAT 480 with additional work for graduate students.

STAT 535. Elementary Stochastic Processes
3 Credits (3)
Markov chains, Poisson processes, Brownian motion, branching processes, and queuing processes, with applications to the physical, biological, and social sciences.
Prerequisite: STAT 515 or consent of instructor.

STAT 540. Directed Reading
1-6 Credits
May be repeated for a maximum of 6 credits. Graded S/U.
Prerequisite: consent of instructor and graduate committee.

STAT 551. Probability: Theory and Applications
3 Credits (3)
Same as STAT 470 with additional work for graduate students.

STAT 555. Elementary Stochastic Processes
3 Credits (3)
Markov chains, Poisson processes, Brownian motion, branching processes, and queuing processes, with applications to the physical, biological, and social sciences.
Prerequisite: STAT 515 or consent of instructor.

STAT 562. Foundations of Probability
3 Credits (3)
Probability spaces, expectation and conditional expectation, limit theorems and laws of large numbers.
Prerequisite: MATH 593.
STAT 571. Continuous Multivariate Analysis  
3 Credits (3)  
Theory and applications of the multivariate normal distribution. May be 
repeated up to 3 credits. Consent of Instructor required.  
Prerequisite(s): STAT 525, or consent of instructor.

STAT 572. Linear Models  
3 Credits (3)  
Core topics include distribution of quadratic forms, theory of regression, 
analysis of variance and covariance in linear models. Advanced topics 
chosen from random and mixed linear models, generalized linear, growth 
curve, and nonlinear models, quartile and copula regression. May be 
repeated up to 6 credits.  
Prerequisite(s): STAT 571.

STAT 581. Advanced Theory of Statistics I  
3 Credits (3)  
Testing hypotheses, probability and sufficiency, uniformly most powerful 
tests, unbiasedness, invariance, and minimax principle.  
Prerequisite: STAT 525 or consent of instructor.

STAT 582. Advanced Theory of Statistics II  
3 Credits (3)  
Estimation of parameters; unbiased estimators; equivariance; Bayes 
properties; large sample theory and optimality.  
Prerequisite: STAT 581 or consent of instructor.

STAT 598. Special Research Problems  
1-3 Credits  
Individual investigations or consulting programs. Maximum of 3 credits.

Mathematics (Actuarial Science and Insurance) - Bachelor of Science

The concentration in Actuarial Science and Insurance draws on courses 
from mathematics and business to prepare students for a mathematical 
career in insurance. The coursework in this emphasis focuses on the 
analysis of risk and its applications to insurance finance. Students 
fulfilling the requirements for the Actuarial Science and Insurance 
Concentration earn a minor in Risk Management and Insurance.

Students must complete all University degree requirements, which 
include: General Education requirements, Viewing a Wider World 
requirements, and elective credits to total at least 120 credits with 48 
credits in courses numbered 300 or above. Developmental coursework 
will not count towards the degree requirements and/or elective 
credits, but may be needed in order to take the necessary English and 
Mathematics coursework.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Some students may be able to bypass one or more courses in the calculus sequence MATH 1511G - MATH 1521G - MATH 2530G. The calculus sequence, Introduction to Higher Mathematics, and Linear Algebra provide knowledge that is basic to further work, and students are advised to complete them or their equivalent as early as possible.

Mathematics coursework.

1 Math Placement: MATH 1511G Calculus and Analytic Geometry I is the starting Math course for the degree, however, students may need to complete any prerequisites prior to enrolling into this course.

2 See the General Education (p. 88) section of the catalog for a full list of courses.

3 See the Viewing a Wider World (p. 92) section for a full list of courses. Please note that the second VWW requirement will be satisfied by the 9 hour rule using the FIN courses that are required for the degree.

4 MATH 331 Introduction to Modern Algebra is only offered in the Fall semesters, however MATH 332 Introduction to Analysis is taught in the Spring and may be used as a substitute.

5 Do not mix options; pick one throughout.

OPTION 1: BFIN 323 Life/Health/Employee Benefits; two courses from (BFIN 303V Personal Financial Planning and Investing in a Global Economy OR BFIN 421 Personal Financial Planning for Professionals); BFIN 324 Property and Liability Insurance; BFIN 391 Finance Internship and Cooperative Education I.

OPTION 2: BFIN 324 Property and Liability Insurance; two courses from (BFIN 303V Personal Financial Planning and Investing in a Global Economy OR BFIN 421 Personal Financial Planning for Professionals); BFIN 323 Life/Health/Employee Benefits; BFIN 391 Finance Internship and Cooperative Education I.

6 Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

7 MATH/STAT 300-level courses that cannot be taken to fulfill this requirement: MATH 300 Readings and MATH 313 Fundamentals of Algebra and Geometry I.

8 MATH/STAT 400-level courses that cannot be taken to fulfill this requirement: MATH 400 Undergraduate Research, MATH 459 Survey of Geometry, STAT 400 Undergraduate Research.

Mathematics (Applied Mathematics) - Bachelor of Science

The Applied Mathematics concentration is intended to prepare students planning a mathematically oriented career upon graduation. The coursework in this concentration provides a foundation in mathematics important in many scientific and engineering applications.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

**Oral Communication**
Choose one from the following:
- ACOM 1130G  Effective Leadership and Communication in Agriculture
- COMM 1115G  Introduction to Communication
- COMM 1130G  Public Speaking
- HNRS 2175G  Introduction to Communication Honors

**Area II: Mathematics**
MATH 1511G  Calculus and Analytic Geometry I

**Area III/IV: Laboratory Sciences and Social/Behavioral Sciences**

**Area III: Laboratory Sciences Course (4 credits)**
- MATH 2530G
- MATH 2415
- MATH 1531

**Area IV: Social/Behavioral Sciences Course (3 credits)**
- MATH 392
- MATH 377
- MATH 471
- MATH 472
- STAT 470

**Select at least 6 credits of approved additional upper-division courses prefixed MATH or STAT (one must be 400-level), excluding the following:**
- MATH 300  Readings
- MATH 313  Fundamentals of Algebra and Geometry I
- MATH 400  Undergraduate Research
- MATH 459  Survey of Geometry
- STAT 401  Special Topics

**Non-Departmental Requirements (in addition to Gen.Ed/VWW)**
- C S 172  Computer Science I (C- or better)

**Select a minimum of 9 credit hours of electives to form a coherent cluster in an applied area from the following:**

**Signals**
- E E 320  Signals and Systems I
- E E 395  Introduction to Digital Signal Processing
- E E 496  Introduction to Communication Systems

**Structures**
- PHYS 1310G  Calculus-Based Physics I
- C E 233  Mechanics-Statics
- C E 315  Structural Analysis

**Operations Research**
- I E 311  Engineering Data Analysis
- I E 365  Quality Control

**Algorithm Theory**
- C S 272  Introduction to Data Structures
- C S 370  Compilers and Automata Theory
- C S 372  Data Structures and Algorithms

**Bioinformatics**
- BIOL 2110G  Principles of Biology: Cellular and Molecular Biology
- BIOL 2110L  Principles of Biology: Cellular and Molecular Biology Laboratory
- C S 486  Bioinformatics

**Choose one from the following:**
- C S 272  Introduction to Data Structures
- C S 370  Compilers and Automata Theory
- C S 371  Software Development
- C S 372  Data Structures and Algorithms

**Computer Systems**
- C S 271  Object Oriented Programming
- C S 272  Introduction to Data Structures
- C S 371  Software Development
- C S 370  Compilers and Automata Theory
- C S 474  Operating Systems I
- C S 475  Artificial Intelligence I
- C S 476  Computer Graphics I
- C S 482  Database Management Systems I
- C S 484  Computer Networks I
- C S 485  Human-Centered Computing

**Second Language Requirement:** (not required)

**Electives, to bring the total credits to 120**

**Total Credits:** 120-121

1. MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G first.
2. See the General Education (p. 88) section of the catalog for a full list of courses.
3. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.
4. MATH 401 Special Topics must be approved by the department for credit towards the major.
5. A grade of C- or better must be earned. Students may propose clusters subject to departmental approval. A cluster must contain C S 172 Computer Science I. A major or minor in any of the following fields (along with C S 172 Computer Science I) will also fulfill the Cluster Electives requirement: Computer Science, Physics, Biology, Chemistry and Biochemistry, Chemical Engineering, Engineering Physics, Electrical and Computer Engineering, Industrial Engineering, Mechanical Engineering, Civil Engineering, Economics and Finance.
If these courses are selected, they could count towards the General Education Area III requirement.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

**Second Language Requirement**

For the Bachelor of Science with a major in Mathematics with a Concentration in Applied Mathematics, there is no second language requirement for the degree.

**A Suggested Plan of Study for Students**

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Some students may be able to bypass one or more courses in the calculus sequence MATH 1511G - MATH 1521G - MATH 2530G. The calculus sequence, Introduction to Higher Mathematics, and Linear Algebra provide knowledge that is basic to further work, and students are advised to complete them or their equivalent as early as possible.

Math Placement: MATH 1511G Calculus and Analytic Geometry I is the starting Math course for the degree, however, students may need to complete any prerequisites prior to enrolling into this course.

See the General Education (p. 88) section of the catalog for a full list of courses.
Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

See the Viewing a Wider World (p. 92) section for a full list of courses.

Students who plan to get a Masters in MATH should take MATH 332 Introduction to Analysis as an elective.

MATH/STAT 300-level courses that cannot be taken to fulfill this requirement: MATH 300 Readings and MATH 313 Fundamentals of Algebra and Geometry I.

MATH/STAT 400-level courses that cannot be taken to fulfill this requirement: MATH 400 Undergraduate Research, MATH 459 Survey of Geometry, STAT 400 Undergraduate Research.

### Mathematics (Foundations) - Bachelor of Science

The concentration in Foundations draws on courses from mathematics and philosophy to provide a close look at the underlying logical and philosophical issues in mathematics.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Total Credits

120-121

1
MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G first.

2
See the General Education (p. 88) section of the catalog for a full list of courses.

3
See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

4
MATH 401 Special Topics must be approved by the department for credit towards the major.

5
A grade of C- or better must be earned.
E elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Note: It is strongly recommended that mathematics majors in the General Mathematics Concentration consider a minor or second major in an area that uses mathematics, such as physics or computer science. All programs should be planned with the guidance of a departmental advisor. More information is available at [https://math.nmsu.edu/](https://math.nmsu.edu/)

## Second Language Requirement

For the Bachelor of Science in Mathematics with a Concentration in General Mathematics there is no second language requirement.

## A Suggested Plan of Study

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Some students may be able to bypass one or more courses in the calculus sequence MATH 1511G Calculus and Analytic Geometry I - MATH 1521G Calculus and Analytic Geometry II, MATH 2530G Calculus III. The calculus sequence, Introduction to Higher Mathematics, and Linear Algebra provide knowledge that is basic to further work, and students are advised to complete them or their equivalent as early as possible.

1 Math Placement: MATH 1511G Calculus and Analytic Geometry I is the starting Math course for the degree, however, students may need to complete any prerequisites prior to enrolling into this course.

2 See the General Education (p. 88) section of the catalog for a full list of courses.
Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

MATH/STAT 300-level courses that cannot be taken to fulfill this requirement: MATH 300 Readings and MATH 313 Fundamentals of Algebra and Geometry I

See the Viewing a Wider World (p. 92) section for a full list of courses.

MATH/STAT 400-level courses that cannot be taken to fulfill this requirement: MATH 400 Undergraduate Research, MATH 459 Survey of Geometry, STAT 400 Undergraduate Research.

### Mathematics (Probability and Statistics) - Bachelor of Science

The concentration in Probability and Statistics provides students with a strong background in mathematical, probabilistic, and statistical analysis. Students also develop skills in the analysis of problems that arise in science, engineering, and other areas. The program provides a path to graduate studies or a career in industry.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Mathematics (Secondary Mathematics Education) - Bachelor of Science

The concentration in Secondary Mathematics Education allows a flexible program providing a student with a path to graduate studies in mathematics or a career in industry, as well as all the mathematics and education courses required for certification as a secondary education teacher in mathematics.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Second Language Requirement: (not required)

Electives, to bring the total credits to 120 6 |

Total Credits 120-121

1

MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G first.

2

See the General Education (p. 88) section of the catalog for a full list of courses.

3

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses. Note that one of the VWW requirements will be satisfied using the 9 hour rule with the EDUC courses that are required for the degree.
A grade of C- or better must be earned.

E elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Notes for Minor in Education

Students must apply to the Teacher Education Program (TEP) before they can progress in the 400 level education courses. EDUC 3120 Multicultural Education, EDUC 3997 Secondary Field Experience, and SPED 3105 Introduction to Special Education in a Diverse Society are prerequisites for TEP entrance. Students can apply for TEP during the semester in which they are completing the last of these prerequisites. Students will also need to have declared the Minor in Secondary Education before applying to TEP.

Second Language Requirement

For the Bachelor of Science in Mathematics with a Concentration in General Mathematics there is no second language requirement.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Some students may be able to bypass one or more courses in the calculus sequence MATH 1511G - MATH 1521G - MATH 2530G. The calculus sequence, Introduction to Higher Mathematics, and Linear Algebra provide knowledge that is basic to further work, and students are advised to complete them or their equivalent as early as possible.

Math Placement: MATH 1511G Calculus and Analytic Geometry I is the starting Math course for the degree, however, students may need to complete any prerequisites prior to enrolling into this course.

See the General Education (p. 88) section of the catalog for a full list of courses.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

MATH/STAT 300-level courses that cannot be taken to fulfill this requirement: MATH 300 Readings and MATH 313 Fundamentals of Algebra and Geometry I.

See the Viewing a Wider World (p. 92) section for a full list of courses.

MATH/STAT 400-level courses that cannot be taken to fulfill this requirement: MATH 400 Undergraduate Research, MATH 459 Survey of Geometry, STAT 400 Undergraduate Research.

MATH 331 Introduction to Modern Algebra is only offered in the Fall semesters. However, MATH 332 Introduction to Analysis is taught in the Spring and may be used as a substitute.

**Applied Mathematics - Supplemental Major**

The program consists of 24 credits in the designated list of courses. To earn a supplementary major in applied mathematics a student must earn 15 credits from Categories I.A and I.B of which at least 9 credits must be from Category I.B. A student must also earn 9 credits from the Category II list of related disciplines. The courses in Category II may be taken from any combination of areas. A student may not earn a bachelor’s degree in mathematics and also a supplementary major in applied mathematics.

The Master's Written Examination

Candidates for the Master’s in Mathematics must pass a written exam, offered at the end of the Fall and Spring semesters, based on the content of MATH 525 and MATH 527. Full-time students need to pass the written Master’s exam no later than the Summer following their completion of MATH 525 and MATH 527, or the start of their fourth semester in the program, whichever comes first. Graduate assistants must adhere to this
The following four options.

In addition to the core requirements, each student must complete one of the following four options.

### Mathematics - Doctor of Philosophy

Candidates for the Ph.D. degree in the Department of Mathematical Sciences must pass

- a qualifying examination,
- a basic comprehensive written examination,
- an advanced comprehensive examination with written and oral components, and
- a final oral doctoral thesis examination.

These are briefly described below. For more information, see the Graduate School requirements in this catalog, and the Mathematics Graduate Student handbook at www.math.nmsu.edu (https://math.nmsu.edu/).

### Course Requirements

</table>

Choose two from the following:

- MATH 582 Module Theory and Homological Algebra
- MATH 583 Introduction to Commutative Algebra and Algebraic Geometry
- MATH 551 Mathematical Structures in Logic
- MATH 552 Universal Algebra and Model Theory

### Additional Course Requirements

A full time graduate student is required to register each semester for at least two Math/Stat graduate courses above MATH 530 Special Topics/STAT 525 Statistics: Theory and Applications. With the exception of the final semester of these two, only one may be MATH 600 Doctoral Research or MATH 700 Doctoral Dissertation. Moreover, these two courses must not include:

<table>

</tbody>
</table>

### Qualifying Examination

Every student admitted to the Ph.D. program must pass a written qualifying examination. Students who complete their mathematics Master’s degree at NMSU may request that the Master’s written examination also fulfill the Ph.D. qualifying examination requirement. In all other cases, the student takes a written Ph.D. qualifying exam. This exam is identical to the Master’s written exam (based on the courses 525/527) and is administered and graded at the same time, but a higher passing score is required than for a Master’s student. Ph.D. candidates need to pass the exam within their first year.

### Basic Comprehensive Examinations

Every Ph.D. student must pass a Basic Comprehensive Exam, either in Algebra or in Analysis. The Algebra exam is based on the courses MATH 526 Abstract Algebra I: Groups and Rings and MATH 581 Abstract
Algebra II: Fields, Rings and Modules and the Analysis exam is based on the courses MATH 528 Introduction to Real Analysis II and MATH 593 Measure and Integration.

These exams are offered every August and January. A student choosing to take the exam in Algebra must pass the exam within fourteen months of completing Math 581; similarly, a student taking the exam in Analysis must pass the exam within fourteen months of completing MATH 593. Students failing to pass the exams within this period of time may be removed from the program. Students will normally not be given more than two attempts at any one exam.

**Advanced Comprehensive Examinations**

Candidates for the Ph.D. must pass an advanced comprehensive examination in their chosen research area. The examination has a written and an oral component. The written exam, which is written and administered by the student's committee, is based on two of the student's courses, normally among those listed in Options 1-4, chosen by the student in consultation with his/her committee and approved by the Graduate Studies Committee. Full-time students should complete the written component of the Advanced Comprehensive Exam after passing the Basic Comprehensive Exam and in the first two years. Those who have not made substantial progress towards completion of their written exams at the start of the fifth semester may be removed from the program. Students who have not completed the written exams by the start of the sixth semester will normally have any departmental funding revoked. The student must take the oral part of the exam at the end of the semester after completing the advanced written comprehensive exam. For the oral exam, the student should present a proposed direction for thesis work.

**Final Oral Exam**

This is an exam over the student's thesis. It is administered by the student's thesis committee.

**Military Science**

**Undergraduate Program Information**

The Military Science program leads to a commission as an officer in the Army Reserve, National Guard or Active Duty Army. The program consists of four parts:

1. the student's academic major,
2. nondepartmental courses of value to the military service,
3. courses in military science and
4. a six-week Leader Development and Assessment course.

The department offers a four-year program divided into two parts: the basic course (two years) and the advanced course (two years). Selected students may qualify for the two-year program with prior military service or successful completion of a six-week summer Leaders' Training Course. Financial assistance and scholarships are available for qualified individuals. Students should contact the Department of Military Science to obtain additional information.

**Requirements**

Courses should be taken in sequence, normally one per semester. The student's Military Science advisor will recommend course sequence. Military Science students must sign up for and attend courses plus laboratories. Departmental requirements may not be taken S/U.

Military Science - Undergraduate Minor (p. 704)

**LTC Mark R. McClellan, Department Head**

**Assistant Professors and Staff** MSG Brandon Knobloch, CPT Sharlene Tilley, MSG Willie Harmon, CPT Victoria Hilton, Mr. Jeff Cox, Mr. Henry Jackson, Mr. Julian Ramos, Ms. Patti Alarcon

**Military Science Courses**

M SC 110. Introduction to Military Science 2 Credits (2+1P)

Introduction to the Army, the Profession of Arms, and critical thinking. Students will examine the Army Profession and what it means to be a professional in the U.S. Army. The overall focus is on developing basic knowledge and comprehension of the Army Leadership Requirements Model while gaining a complete understanding of the Reserve Officers’ Training Corps (ROTC) program, its purpose in the Army, and its advantages for the student. Cadets also learn how resiliency and fitness supports their development as an Army leader. Includes a weekly lab facilitated by MSL III Cadets and supervised by Cadre. May be repeated up to 2 credits. Restricted to Las Cruces campus only.
M SC 111. Introduction to Leadership
2 Credits (2+1P)
Introduction to the personal challenges and competencies that are critical for effective leadership. Students learn how the personal development of life skills such as critical thinking, time management, goal setting, and communication contribute to effective leadership. Students learn the basics of the communications process and the importance for leaders to develop the essential skills to effectively communicate in the Army. Students will begin learning the basics of squad level tactics that will be reinforced during a weekly lab facilitated by MSL III Cadets and supervised by Cadre. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

M SC 210. Self/Team Development
3 Credits (3+1P)
A focus on leadership and decision making. The course adds depth to the student’s understanding of the Adaptability Army Learning Area. Outcomes are demonstrated through Critical and Creative Thinking and the ability to apply Troop Leading Procedures (TLP) to apply Innovative Solutions to Problems. The Army Profession is also stressed through leadership forums and a leadership self-assessment. Students are then required to apply their knowledge outside the classroom in a hands-on performance-oriented environment during a weekly lab facilitated by MSL III Cadets and supervised by Cadre and three physical fitness sessions per week. Restricted to Las Cruces campus only.

M SC 211. Leadership in Action and Team Building
3 Credits (3+1P)
A focus on Army doctrine and team development. The course begins the journey to understand and demonstrate competencies as they relate to Army doctrine. Army Values, Teamwork, and Warrior Ethos and their relationship to the Law of Land Warfare and philosophy of military service are also stressed. The ability to lead and follow is also covered through Team Building exercises at squad level. Students are then required to apply their knowledge outside the classroom in a hands-on performance-oriented environment during a weekly lab facilitated by MSL III Cadets and supervised by Cadre and three physical fitness sessions per week. Restricted to Las Cruces campus only.

M SC 225. Directed Studies
1-3 Credits
Individual directed studies under supervision of the Professor of Military Science. May be repeated up to 12 credits. Restricted to Las Cruces campus only.
Prerequisite(s): GPA 2.5 or better.

M SC 310. Leading Small Organizations I
3 Credits (3)
Part of the Senior ROTC Advanced Course, this course provides a focus on training management and the warfighting functions. It is an academically challenging course that Cadets study, practice, and apply the fundamentals of Training Management and how the Army operates through the Warfighting functions. At the conclusion of this course, Cadets will be capable of planning, preparing, and executing training for a squad conducting small unit tactics. Includes one lab meeting per week using peer facilitation overseen by MSL IVs, supervised by ROTC Cadre and three physical fitness sessions per week. Students must meet Basic Course of Military Science requirements to enroll in this course.
Corequisite(s): M SC 310 L.

M SC 310 L. Leading Small Organizations I Lab
1 Credit (1P)
Planning, coordination, execution and evaluation of training and activities with basic course students and ROTC program. Students develop and refine leadership skills in positions of responsibility. Open only to students taking M SC 310.
Corequisite(s): M SC 310.

M SC 320. Leading Small Organizations II
3 Credits (3)
Part of the Senior ROTC Advanced Course, this course provides a focus on applied leadership in small unit operations. It is an academically challenging course where Cadets study, practice, and apply the fundamentals of direct level leadership and small unit tactics at the platoon level. At the conclusion of this course, Cadets will be capable of planning, coordinating, navigating, motivating and leading a platoon in the execution of a mission. Includes one lab meeting per week using peer facilitation overseen by MSL IVs, supervised by ROTC Cadre and three physical fitness sessions per week. Successful completion of this course is a requirement for Cadet Summer Training Advance Camp during the summer, at Fort Knox, KY. Prerequisite(s): M SC 310
Corequisite(s): M SC 320 L.

M SC 320 L. Leading Small Organizations II Lab
1 Credit (1P)
Practice and refinement of leadership skills. Different roles assigned for students at different levels in the program. Planning, coordination, execution and evaluation of training and activities with basic course students and ROTC program. Open to students taking M SC 320.
Corequisite(s): M SC 320.

M SC 325. Advanced Directed Studies
1-3 Credits
Directed individual study of advanced subjects under the guidance of the Professor of Military Science. May be repeated up to 12 credits.
Prerequisite(s): GPA 2.5 or better.

M SC 350. Cadet Summer Training Advanced Course
3 Credits (3)
Advanced Camp. Advanced Camp is a 31-day training event which takes place at Fort Knox, KY. It is designed to assess a Cadet’s ability to demonstrate proficiency in basic officer leadership tasks. Cadets are evaluated on their ability to lead at the Squad and Platoon levels, both in garrison and tactical environments. Cadets are mentally and physically tested during a 12-day consequence driven field training exercise that replicates a combat training center rotation. Successful completion of the Advanced Camp is a requirement for commissioning. Consent of Instructor required.
Prerequisite(s): M SC 310, M SC 310 L, M SC 320, and M SC 320 L.

M SC 401. Leadership Challenges and Goal Setting
3 Credits (3)
Part of the Senior ROTC Advanced Course, this course provides a focus on development of the Army Officer. It is an academically challenging course that Cadets develop knowledge, skills, and abilities to plan, resource, and assess training at the small unit level. Cadets also learn about Army programs that support counseling subordinates and evaluating performance, values and ethics, career planning, and legal responsibilities. At the conclusion of this course, Cadets will be familiar with how to plan, prepare, execute, and continuously assess the conduct of training at the company or field grade officer level. Includes a lab per week overseeing MSL III lesson facilitation and supervised by ROTC Cadre and three physical fitness sessions per week. May be repeated up to 3 credits. Prerequisite(s): M SC 320
Corequisite(s): M SC 401 L.
M SC 401 L. Leadership Challenges and Goal Setting Lab
1 Credit (1P)
Different roles assigned for students at different levels in the program. Practice and refinement of leadership skills. Planning coordination, execution and evaluation of training and activities with basic course students and ROTC program. Open only to students taking M SC 401. May be repeated up to 1 credits.

Corequisite(s): M SC 401.

M SC 402. Transition to Lieutenant
3 Credits (3)
The final course within the Senior ROTC Advanced Course, this course is an academically challenging course were Cadets further develop knowledge, skills, and abilities required of junior officers pertaining to the Army in Unified Land Operations and Company Grade Officer roles and responsibilities. This course includes reading assignments, homework assignments, small group assignments, briefings, case studies, practical exercises, a mid-term exam, and an Oral Practicum as the final exam. The Oral Practicum explores the Cadet’s knowledge of how they will be prepared for the 20 Army Warfighting Challenges (AWFC) covered throughout the ROTC Advanced Course. Successful completion of this course will assist in preparing Cadets for their BOLC B course following graduation and commissioning. It is a mandatory requirement for commissioning. Includes a lab per week overseeing MSL III lesson facilitation and supervised by ROTC Cadre and three physical fitness sessions per week. May be repeated up to 3 credits. Prerequisite(s): M SC 401

Corequisite(s): M SC 402 L.

M SC 402 L. Transition to Lieutenant Lab
1 Credit (1)
Different roles assigned for students at different levels in the program. Practice and refinement of leadership skills. Planning, coordination, execution, and evaluation of training and activities with basic course students and ROTC program. Open only to students taking M SC 402. May be repeated up to 1 credits.

Corequisite(s): M SC 402.

M SC 425. Practicum
1-4 Credits
Independent projects conducted under the direction of the Professor of Military Science, and concerned with analysis of selected leadership or management problems. Course not eligible for S/U grade. May be repeated up to 16 credits.

M SC 465 L. Military Decision Making - Graduate Level Lab
1 Credit (1)
Students will work as part of a planning team in the application of the Military Decision Making Process to planning, coordination, and publish a comprehensive training plan and guidance which outlines all training and activities of the NMSU Army ROTC program for the semester following the semester of the course (i.e. the fall course develops the spring plan). Students develop and refine leadership skills in positions of responsibility. Open only to students taking M SC 465. May be repeated up to 1 credits. Consent of Instructor required. Consent of Professor of Military Science (PMS) is required and the PMS will interview all prospective students prior to enrolling into this course.

Corequisite(s): M SC 465.

Phone: (575) 646-4030

Website: http://www.nmsu.edu/~armyrotc/

Military Science - Undergraduate Minor

The minor in Military Science is administered by the Department of Military Science (Army ROTC) in the College of Arts and Sciences. To obtain a minor in Military Science a student must complete a total of 19 credits, all of which must be upper division. A grade of C- or better must be obtained for each course. The only credits in which a grade of S will be accepted is M SC 350 Cadet Summer Training Advanced Course. Students should contact the Department of Military Science to obtain additional information.

Molecular Biology & Interdisciplinary Life Sciences

Graduate Program Information

Students of the molecular life sciences seek to reduce complex biological processes to a set of understandable molecular or chemical structure and function relationships. Integration of this knowledge into the context of complex living tissues interacting with the environment is the ultimate goal. This requires that the expertise from many diverse traditional disciplines be directed along converging experimental lines. The Ph.D. program in Molecular Biology & Interdisciplinary Life Sciences (MOBL-ILS) is designed to facilitate an interdisciplinary approach to graduate research, utilizing both traditional techniques and the latest advances in biotechnology, including the extraordinary power of recombinant DNA methodology. Participants in this program will take core courses in biochemistry, molecular biology and cell biology. Subsequent course work will be tailored for the individual student, depending upon his or her research emphasis. Participation in regular seminar programs will be expected to provide students with the widest possible scientific background. Financial aid, in the form of a limited number of MB teaching and research assistantships, is available on a competitive basis. Research Assistantships may also be available from individual faculty within the Molecular Biology & Interdisciplinary Life Sciences Graduate Program.

Only the most competitive students are admitted with assistantship support.

The MOBL-ILS program offers curricula leading to the M.S. and Ph.D. degrees in the areas of biochemistry, molecular genetics, molecular biology, cell biology, bioinformatics, and microbiology. Admission to the MOBL-ILS Program without deficiency is based on an undergraduate program essentially equivalent to that pursued by an undergraduate major in chemistry, biology, agronomy, horticulture, biochemistry, or microbiology at this university. An entering student is required to complete the Graduate Record Examination (General Aptitude). Undergraduate deficiency courses must be passed with a minimum grade of B.

Applicants are strongly encouraged to contact at least three individual program faculty before applying to identify a prospective advisor and laboratory in which to pursue graduate research. Previous course records and GPA standings (typically minimum of 3.3/4.0), GRE scores (typically minimum of 300 combined verbal and quantitative), TOEFL scores of foreign applicants (typically minimum of 550 on the paper-based or 213 on the computer-based), a letter of interest from the applicant that identified faculty laboratories of interest, and three letters of reference regarding research performance or potential are weighted heavily during the selection process.
Students with a B.S. degree in one of the disciplines listed above can expect to earn the MS degree in about 30 credits, including at least 6 credits of thesis research. The Ph.D. degree can be earned in about 30 to 40 credits of formal course work, plus additional thesis research credits, for a minimum total of 75 credits beyond the B.S. because research is central in both the M.S. and Ph.D. curricula, early selection of a research advisor is required. Ph.D. degree candidates will successfully complete a written and oral qualifying examination based on their proposed research and the subject matter in the core courses (below) at the end of the first year of study. Also at this time, the master's or doctoral committee is organized to assist in planning a program appropriate to the background and goals of the student. Ph.D. candidates will subsequently complete a comprehensive written examination and oral examination approximately at the end of the second year of study. A final, formal presentation and oral defense of the original research documented in the M.S. or Ph.D. thesis completes the degree requirements.

**Master Degree(s)**

Molecular Biology - Master of Science (p. 707)

**Doctoral Degree(s)**

Molecular Biology - Doctor of Philosophy (p. 707)

**Master's Accelerated Program (MAP)**

Undergraduate students majoring in Genetics, Biochemistry, and Biology would be the most qualified to enter the Masters Accelerated Program. The courses that can be taken during the student's last two years of their BS degree program prior to graduation, and as a full graduate student are listed below. Students may only take a maximum of 12 credit hours towards their MAP.

Qualifications for students entering the MAP program include all NMSU guidelines including a GPA of 3.2. Students who complete MAP in Molecular Biology will be expected to meet all of the requirements of the program for entry into the Molecular Biology and Interdisciplinary Program Graduate Program to complete their graduate degree. (GRE score will be waived for MAP) These requirements can be found at [https://molf.nmsu.edu/how-to-apply/](https://molf.nmsu.edu/how-to-apply/). The MOLB-ILS program does not have a non-thesis option so all MS students in the program perform research that culminates to a published thesis.
Molecular Biology Courses

MOLB 448. Special Research Problems
1-3 Credits
Individual investigation, theoretical or experimental, under the supervision of a molecular biology faculty member. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

MOLB 520. Molecular Cell Biology
3 Credits (3)
Same as BIOL 520.

MOLB 542. Biochemistry I
3 Credits (3)
Same as BCHE 542. B or better required.

MOLB 545. Molecular and Biochemical Genetics
3 Credits (3)
Same as BCHE 545 and BIOL 545.

MOLB 546. Biochemistry II
3 Credits (3)
Same as BCHE 546.

MOLB 550. Topics in Molecular Biology
1-3 Credits
Selected topics of current interest in field of molecular biology for master's level students.

MOLB 590. Discussions in Molecular Biology
1 Credit (1)
Oral presentations of ongoing research and/or research proposal for the masters thesis. Must be repeated twice for masters and three times for doctoral students. Graded by 2 options: S/U or Letter Grade

MOLB 597. Laboratory Rotations/Research Discussions
1-3 Credits
All entering students are required to take at least one credit, during their first semester, in which they will circulate through at least three different labs working on assigned problems and discussing research programs. May be repeated for a maximum of 4 credits. Graded S/U.

MOLB 598. Special Research Programs
1-3 Credits
Individual investigation, experimental or theoretical, under the supervision of a molecular biology faculty member. Course may be repeated up to a total of 6 credits with committee approval.

MOLB 599. Master's Thesis
1-15 Credits (1-15)
Experimental and scholarly research leading to the preparation of a master's thesis.

MOLB 600. Molecular Biology Research
1-15 Credits
Laboratory research efforts prior to successful completion of doctoral comprehensive exam.

MOLB 650. Advanced Topics in Molecular Biology
1-3 Credits
Discussions and lectures on topics of current interest in molecular biology for doctoral students.

MOLB 698. Advanced Research Projects
1-9 Credits
Individualized special research assignments for doctoral-level students. Up to 9 credits, with approval of committee. Graded S/U.

MOLB 700. Doctoral Dissertation Research
1-15 Credits
Research for doctoral students after completing comprehensive exams.

Molecular Biology- Undergraduate Minor
The Molecular Biology Program offers opportunities for students to gain theoretical training and hands-on experience in the methods of molecular biology, cellular biology, and/or bioinformatics. A formal undergraduate minor in Molecular Biology is offered and is described below; a grade of C or better is required to certify the courses. A minor in Bioinformatics is currently under development; for planning purposes, please refer to the program office for the most recent drafts of the Bioinformatics minor requirements.
This program consists of a minimum of 18 hours, distributed through five or six areas.

| Other Course Requirements |
| A ST 505 | Statistical Inference I (or equivalent course)         | 4       |
| BIOL 540 | Science and Ethics                                     | 1-3     |
| BIOL 490 | Neurobiology                                           | 3       |
| MOLB 590 | Discussions in Molecular Biology                       | 1       |
| MOLB 597 | Laboratory Rotations/Research Discussions              | 1-3     |
| MOLB 700 | Doctoral Dissertation Research                         | 18      |

| Total Credits | 46-50 |

1. PhD candidates must enroll for 18 credits MOLB 700 Doctoral Dissertation Research. May register for additional credits to maintain full-time status.

The Molecular Biology program also offers formal minors in molecular biology or bioinformatics.

Molecular Biology - Master of Science

The MB program offers curricula leading to the MS and Ph.D. degrees in the areas of biochemistry, molecular genetics, molecular biology, cell biology, bioinformatics, and microbiology. Admission to the MB Program without deficiency is based on an undergraduate program essentially equivalent to that pursued by an undergraduate major in chemistry, biology, agronomy, horticulture, biochemistry, or microbiology at this university. An entering student is required to complete the Graduate Record Examination (General Aptitude). Undergraduate deficiency courses must be passed with a minimum grade of B.

Applicants are strongly encouraged to contact at least three individual program faculty before applying to identify a prospective advisor and laboratory in which to pursue graduate research. Previous course records and GPA standings (typically minimum of 3.3/4.0), GRE scores (typically minimum of 300 combined verbal and quantitative), TOEFL scores of foreign applicants (typically minimum of 550 on the paper-based or 213 on the computer-based), a letter of interest from the applicant that identified faculty laboratories of interest, and three letters of reference regarding research performance or potential are weighted heavily during the selection process.

Students with a BS degree in one of the disciplines listed above can expect to earn the MS degree in about 30 credits, including at least 6 credits of thesis research. Because research is central in both the MS and Ph.D. curricula, early selection of a research advisor is required. The master’s committee is organized to assist in planning a program appropriate to the background and goals of the student. A final, formal presentation and oral defense of the original research documented in the MS thesis completes the degree requirements.

MS candidates must enroll in MOLB 599 Master’s Thesis for 6 credits. May register for additional credits to maintain full-time status.
Bioinformatics (with Computer Science) - Graduate Minor

The Bioinformatics minor is jointly offered with the Department of Computer Science and consists of 9 credit hours for Master's students and 12 credit hours for Ph.D. students, including BIOL 550 Special Topics/GENE 452 Applied Bioinformatics, and additional courses selected from those listed at http://research.nmsu.edu/molbio/ (https://molb.nmsu.edu/curriculum/under-graduate-minor-in-bioinformatics.html). The courses selected will depend on whether the student is majoring in a biological or non-biological science and include courses from the graduate Computer Science and Molecular Biology curricula. Please inquire with the Molecular Biology Program office for the most recent requirements for the bioinformatics minor.

Molecular Biology - Graduate Minor

The Molecular Biology Minor consists of 10 credit hours including MOLB 545; either MOLB 520 or MOLB 542; any of the tier II courses; and one MOLB 590 seminar.

Music

Undergraduate Program Information

Mission Statement

The mission of the Music Department at NMSU is:

1. to prepare students for careers in music education, business and/or performance;
2. to give the student body opportunities to perform, study, create and experience music;
3. to enhance the cultural lives of our constituency by performance of superior music; and
4. to create an artistic environment which fosters the development of personal realizations we believe to be essential to the fabric of a healthy society.

All students are required to meet the State Common Core as listed in earlier sections of this catalog. Please see a Music Department advisor for a specific list of courses.

Admission into the Program

For a student to be officially accepted as a Music major or minor, he/she must do the following:

- perform an audition for a panel of no less than three Music faculty members
  - one of whom must be the director of his/her program area
  - one of whom must be the applied teacher of the student’s principal instrument

Any student declaring Music as his/her major may be accepted for a one-semester probationary period. During that first semester, the Music faculty will determine if the student has the necessary skills and work ethic to continue as a major. The student’s course work, ensemble participation and applied jury will be the basis for the decision to allow the student to continue or not.

Departmental Requirements for all Bachelor’s Degrees

Music Core

A student must earn a grade of C- or better in all departmental requirements for any degree in the Department of Music. All students wishing to pursue a music degree must audition and take the theory placement exam. Contact the department for current audition requirements.

If students change major(s) or minor(s) or do not complete the requirements for the minor at the time of graduation, they may only count a maximum of 9 credits of the applied/occupational credits toward graduation.

Recital Requirements for all Music Degrees

Bachelor of Music

All performance majors are required to give a half recital (30 minutes of music) in the junior year and a full recital (60 minutes of music) in the senior year.

Bachelor of Music Education

All music education majors will give a half recital (30 minutes of music) in their major performance area.
Applied Music Requirements for All Music Degrees

All Music degrees require at least two semesters of applied music study at the 430 level.

All students enrolling in applied music will audition and obtain permission from an applied teacher before enrolling for applied music credit.

Students may obtain further information by contacting the music department.

Other Music Requirements, Fees and Regulations

1. A Piano Proficiency Examination is required of all music majors. Each student must enroll in Functional Piano or Applied Piano every semester, until the Proficiency is passed. Detailed requirements may be obtained from the Department of Music office. Students must pass the piano Proficiency Exam before presenting a Senior Recital.
2. Qualitative grade-point average for graduation in music is 2.0 or higher. All grades in required music courses must be C- or better.
3. An instrument rental fee is charged each semester for students using university instruments. Consult the music department concerning these fees.
4. All applied students pay an additional fee. Consult the music department concerning these fees.
5. Outside groups and individuals must have special permission to use music department facilities. Contact the music office for additional information.

Music Ensembles

All students majoring or minoring in Music, must enroll and participate in the ensemble appropriate for their particular degree plan. The appropriate ensemble will be determined by degree requirements in consultation with the student’s advisor and ensemble directors. The student must enroll each and every semester he/she is considered full-time until the degree requirements are met, for a minimum of 8 semesters (7 semester for Music Education majors). Any student receiving any kind of financial assistance through the Music Department must enroll each and every semester while he/she is attending NMSU. Music Education Students will not receive Music Scholarship funds during their semester of Student Teaching. For more information, contact the Music Office.

Music Scholarships and Awards

Scholarships and grants for music majors are administered through the performance areas. To be eligible for a music major scholarship or grant, students must first be admitted into the program. Program admission requirements include an audition for a panel of no less than three Music faculty members. One must be the major ensemble director of his/her program area (band, choir, opera, orchestra, keyboard). One must be the applied teacher of the student’s principal instrument and the other must be a full-time Music faculty member from any area. Specific audition information and requirements for each performance area can be found on the Auditions page. (https://theatre.nmsu.edu/auditions/audition-faqs.html)

In order to have all paperwork processed before the beginning of the Fall semester, students are encouraged to have all scholarship and financial aid application materials in to the Office of Financial Aid by March 1.

The most up to date information on scholarships and grants can be obtained from the Coordinator of Scholar Dollar$ in the office of the Dean of Arts and Sciences in Breland Hall.

For more information on any of the following scholarships please call (575) 646-2421 or email music@nmsu.edu.

Service awards for non-majors are available based upon ensemble need and funding availability. For more information regarding these awards or to set up an audition, please contact one of the following:

- Winds and Percussion: (575) 646-2304
- Vocal: (575) 646-2304
- Strings: (575) 646-1647
- Keyboard: (575) 646-2228

Graduate Program Information

The Master of Music degree is offered in the following areas of study: Conducting, Music Education and Performance. Applicants are expected to have an undergraduate degree in music or music education equivalent to that represented by the BM or BME degree from New Mexico State University. The music department does not require the Graduate Record Exam, but does expect each applicant to possess graduate-level language and writing skills. For admission into the Master of Music degree program, all applicants must have an undergraduate GPA of at least 3.0 and submit at least two letters of recommendation from music professionals. An audition, either in person or by recording, is required for entrance into the Performance or Conducting programs. Auditions will be based upon, but not limited to, prescribed repertory.

For acceptance into the Music Education program, the applicant must have completed a Bachelor of Music Education degree comparable to the one offered by NMSU or take the requisite undergraduate courses at NMSU leading to state licensure before enrolling in graduate courses. (Contact the Music Department for details.)

Note: The degree offered is a Master of Music. The student’s official transcript and diploma will only indicate that degree. The area of study (Conducting, Music Education, Performance) will not be included as part of the official degree title.

Recital Requirements for Performance and Conducting

A graduate recital plus an analytical paper are required of all candidates in Performance and Conducting. Students must be enrolled in their applied area during the semester the recital is given. A minimum of 60 minutes of music is required for all Performance recitals. A minimum of three major works for the appropriate ensemble is required for all Conducting recitals. The recital may only be given after at least 6 hours of graduate applied or conducting courses have been successfully completed.

Program of Study and Committee Selection

After admission, each student must successfully complete MUSC 471 Graduate Theory Review before subsequent enrollment in other music theory courses. He or she must also successfully complete MUSC 477 Graduate Music History Review before subsequent enrollment in other music history courses.

During the first semester of study, a tentative Program of Study is planned, documented and filed by the student in consultation with the advisor in his or her major field. The Program of Study is subject to approval by the Music Department Head and the Graduate Music Committee. The student will also select, in consultation with his or her advisor, an advisory committee consisting of the advisor, and two additional faculty members.
Candidacy
In order to qualify for candidacy the student (except those in the online Music Education program) must meet the Graduate School requirement of 12 credits of graduate work in residence and must show evidence of a satisfactory quality of work in the required courses, demonstrate the desired progress in his or her performance area and, where required, submit a recital program, thesis topic, or project proposal for approval.

Thesis
A thesis is optional in Music Education and is encouraged for students considering completion of a terminal degree. Music Education candidates not writing a thesis must develop and complete an approved project before the oral examination.

Final Examination
All Master of Music candidates must take a final comprehensive oral examination. The final oral examination may not be scheduled until the graduate recital (with analytical paper) is completed or a final draft of the Music Education project or thesis has been approved by the candidate's advisor.

Fees
Fees, in addition to tuition, will be assessed for all applied hours and recitals. (Consult the Music Department for details).

Degrees for the Department

Bachelor Degree(s)

Music - Bachelor of Arts (p. 720)
Music (Theatre) - Bachelor of Arts (p. 726)
Music (Pre-Music Therapy) - Bachelor of Arts (p. 722)
Music (Pre-Speech Language Pathology) - Bachelor of Arts (p. 724)
Music (Instrumental Performance) - Bachelor of Music (p. 727)
Music (Piano Performance) - Bachelor of Music (p. 729)
Music (Vocal Performance) - Bachelor of Music (p. 731)
Music Education (K-12 Instrumental) - Bachelor of Music Education (p. 733)
Music Education (K-12 Vocal) - Bachelor of Music Education (p. 736)

Master Degree(s)

Music (Conducting) - Master of Music (p. 738)
Music (Music Education) - Master of Music (p. 738)
Music (Music Education) - Master of Music (Online) (p. 738)
Music (Performance) - Master of Music (p. 738)

Minors for the Department

Music - Undergraduate Minor (p. 738)

Associate Professor, Fred Bugbee, Department Head

Assistant Professors Mapp, Moore, Smyth; College Associate Professors Taylor

F. Bugbee, Department Head, D.M.A. (Eastman School of Music)—percussion, history; L. Chaffin, Ph.D. (Texas Tech)—theory, composition; S. Daughtrey, D.M. (Indiana University)—vocal coordinator, diction, pedagogy; S. Gollo (Conservatoire de Musique, Switzerland)—Orchestra Director, violin; A. Kaplan, Ph.D. (NYU Manhattan School of Music)—low brass; M. Mapp (Kansas University)—Director of Bands, conducting; J. Martinez-Rios, M.M (Western Michigan)—viola; M. Moore, D.M.A. (Kansas University)—clarinet, woodwind techniques; J. Shearer, D.M.A. (Eastman School of Music)—graduate coordinator, history; S. Smyth, D.M.A. (Kansas University)—Athletic Bands, music education; L. Spitzer, D.M.A. (USC)—piano, history; R. Taylor, D.M.A (Arizona)—saxophone, theory; L. Van Winkle, D.M.A. (Arizona) flute, ear-training; D. Vega-Albela M.M. (Western Michigan)—violin

Music Courses

MUSC 1110G. Music Appreciation: Jazz
3 Credits (3)
This course explores the ideas of music in society and its cultural relevance and is designed to increase the students’ appreciation of music as well as to enhance their listening skills. Students are introduced to various periods, styles, and composers of music and become acquainted with knowledge and appreciation of Jazz from various cultures and times.

Learning Outcomes

1. Develop a vocabulary of musical terms, and be able to describe music using those terms
2. Demonstrate knowledge of composers, their music and their relationship to historical periods
3. Recognize how music played and plays a political, social, and cultural function
4. Identify well-known pieces and the historical and social context in which they were composed
5. Demonstrate basic understanding of music notation and musical communication

MUSC 1130G. Music Appreciation: Western Music
3 Credits (3)
This course explores the ideas of music in society and its cultural relevance and is designed to increase the students' appreciation of music as well as to enhance their listening skills. Students are introduced to various periods, styles, and composers of music and become acquainted with knowledge and appreciation of Western music from various cultures and times.

Learning Outcomes

1. Develop a vocabulary of musical terms, and be able to describe music using those terms
2. Demonstrate knowledge of composers, their music and their relationship to historical periods
3. Recognize how music played and plays a political, social, and cultural function
4. Identify well-known pieces and the historical and social context in which they were composed
5. Demonstrate basic understanding of music notation and musical communication
MUSC 1210. Fundamentals of Music for Non-majors
3 Credits (3)
A beginning course in the fundamentals of music, this course includes notation, scales, key signatures and intervals. Aural comprehension is introduced through singing intervals, scales and triads and dictating simple rhythmic and melodic patterns and students explore the basic components of music. Traditional Grading with RR.

Learning Outcomes
1. Demonstrate and apply standard notation of pitch, rhythm, scales, intervals, key signatures, triads, and simple melodic and harmonic composition
2. Develop and improve basic aural skills
3. Read musical notation
4. Improve and expand understanding of fundamental musical techniques and concepts

MUSC 1310. Recital Attendance
0.5 Credits (.5+1P)
This course is for music students to attend and participate in a good number of convocation, concert, and recital performances, creating a wider appreciation for the performing Arts. May be repeated up to 4 credits. Restricted to: Music and Music Education majors. S/U Grading with RR. Restricted to Las Cruces campus only.

Learning Outcomes
1. Encourage student observation of serious music
2. Provide opportunities for public performances
3. To create a greater sense of community within the student body

MUSC 1410. Introduction to Music Education
2 Credits (2)
This course is an overview of teaching in the music classroom through readings and observations. Students will be introduced to the skills needed to become a reflective educator, develop observation techniques, and demonstrate knowledge of the current state of the profession. Restricted to Las Cruces campus only.

Learning Outcomes
1. Make observations and analyze the current state of musical education in public schools
2. Describe characteristics of good teaching in music
3. Articulate a personal philosophy of music education
4. Reflect on personal strengths and weaknesses as a teacher of music

MUSC 1440. Class Voice I
1 Credit (1)
Group instruction in voice and vocal pedagogy for instrumental Music Education majors, offering basic principles of healthy vocal production with particular attention to diction, development of vocal range, and the ability to impart that knowledge to elementary, junior and/or high school age students. Restricted to: Music Education majors. Traditional Grading with RR. Restricted to Las Cruces campus only.

Learning Outcomes
1. Provide the basic understanding of healthy vocal production. Including, but is not limited to, the
2. following topics: Expanding vocal range; Learning how to practice and learn songs effectively and efficiently; Provide basic understanding of vocal pedagogy; Introduction to diction
3. Aims to equip students with the ability to impart that knowledge to elementary, junior and/or high school age students.

MUSC 1450. Ear Training I
1 Credit (1)
To develop the ability to accurately hear, identify, sing and notate musical elements including rhythm, melody, intervals and harmony Traditional Grading with RR. Restricted to Las Cruces campus only.

Prerequisite(s): Passing the Theory Placement exam or making a C or better in MUSC 1210.

Learning Outcomes
1. Counting rhythms at sight using the Eastman Counting System
2. Singing melodies at sight using solfege syllables
3. Writing out rhythmic patterns
4. Writing out melodic patterns
5. Identifying and singing intervals
6. Identifying and singing chord / triad qualities

MUSC 1451. Ear Training II
1 Credit (1)
To develop the ability to accurately hear, identify, sing and notate musical elements including rhythm, melody, intervals and harmony Restricted to Las Cruces campus only.

Prerequisite(s): Grade of C- or better in MUSC 1450.

Learning Outcomes
1. Counting rhythms at sight using the Eastman Counting System
2. Singing melodies at sight using solfege syllables
3. Writing out rhythmic patterns
4. Writing out melodic patterns
5. Identifying and singing intervals
6. Identifying and singing chord / triad qualities

MUSC 1460. Music Theory I
3 Credits (3)
Introduction to vocabulary and syntax of 4-voice 18th c. chorale music through study and harmonic analysis.

Prerequisite(s): Passing the Theory Placement exam or making a C or better in MUSC 1210.

Learning Outcomes
1. To learn the vocabulary and syntax of 4-voice 18th c. chorale music through study and harmonic analysis

MUSC 1461. Music Theory II
3 Credits (3)
Expansion of vocabulary and syntax of 4-voice 18th c. chorale music through study, harmonic analysis, and part writing.

Prerequisite(s): Grade of C or better in MUSC 1460.

Learning Outcomes
1. To expand and apply the vocabulary and syntax of 4-voice, 18th c. chorale music through study, harmonic analysis, and part writing.
MUSC 1470. Functional Piano I
2 Credits (2)
Scales, chords, memorization. Harmonization of simple melodies with the ability to play simple melodies and rhythms. May be taken for unlimited credit. Restricted to music majors. No S/U option.

Learning Outcomes
1. 5 finger hand position in all keys
2. I-IV-I-V7-I cadences in all keys
3. One octave scales with hands together in C, G, D and F (major and minor)
4. Root position cross-over triads, solid and broken (major and minor)
5. Simple sight reading, harmonization and transposition
6. Prepared pieces from the textbook
7. Simple improvisation
8. Play 2 simple vocal exercises
9. Identify intervals, key signatures and chords
10. Correct posture and hand position
11. Musical issues such as phrasing, slurs and dynamics
12. Good practice habits and techniques

MUSC 1471. Functional Piano II
2 Credits (2)
Scales, chords, memorization. Harmonization of simple melodies with the ability to play simple melodies and rhythms. May be taken for unlimited credit. Restricted to music majors. No S/U option.

Prerequisite: MUSC 1470 or consent of instructor.

Learning Outcomes
1. Two octave scales with hands separate in C, G, D, A, E, B and F (major and minor)
2. I-IV-V7-I cadences in above mentioned keys in root position and 1st inversion
3. Simple sight reading, harmonization and transposition
4. Prepared pieces from the book
5. Simple improvisation
6. Identify intervals, key signatures and chords
7. Correct posture and hand position
8. Musical issues such as phrasing, slurs and dynamics
9. Good practice habits and techniques

MUSC 1472. Functional Piano III
2 Credits (2)
For music majors preparing for the Piano Proficiency Examination. May be taken for unlimited credit. Restricted to music majors. No S/U option.

Prerequisite: MUSC 1471 or consent of instructor.

Learning Outcomes
1. Keys learned in previous semesters, adding F# and C# (D flat)
2. Secondary dominant chords added to cadence patterns
3. Two-octave, root position arpeggios, major and minor
4. Intro to chord charts, harmonization
5. More difficult sight-reading and transpositions
6. More difficult prepared pieces
7. Accompany a piece for any instrument on the Mid-Term Recital (required)

1-2 Credits
Private or group instruction for non-music majors, secondary instruments, and music majors preparing for 200-level applied music. May be taken for unlimited credit.

Learning Outcomes
1. Varies

MUSC 2110. Chamber Ensemble
1 Credit (1)
This course is an exploration of chamber ensembles, allowing students to develop their abilities with their instruments in a group setting. Students will gain a broader understanding of chamber ensemble through study of musical history, as well as various practice exercises and performances. May be repeated up to 16 credits. Restricted to Las Cruces campus only.

Prerequisite(s): by audition only.

Learning Outcomes
1. Improve performance skills
2. Develop and improve performance skills in a group setting
3. Develop understanding and interpretation within the context of music history
4. Refine and improve technical ability
5. Demonstrate proper technique and usage

MUSC 2120. Major Ensemble
1 Credit (1)
This course is an exploration of major ensembles, allowing students to develop their abilities with their instruments in a group setting. Students will gain a broader understanding of major ensemble through study of musical history, as well as various practice exercises and performances. May be repeated up to 10 credits. Restricted to Las Cruces campus only.

Prerequisite(s): by audition only.

Learning Outcomes
1. Improve performance skills
2. Develop and improve performance skills in a group setting
3. Develop understanding and interpretation within the context of music history
4. Refine and improve technical ability
5. Demonstrate proper technique and usage

MUSC 2130. Jazz Ensemble
1 Credit (1)
This course is an exploration of jazz ensembles, allowing students to develop their abilities with their instruments in a group setting. Students will gain a broader understanding of jazz ensemble through study of musical history, as well as various practice exercises and performances. May be repeated up to 10 credits. Restricted to Las Cruces campus only.

Prerequisite(s): By audition only.

Learning Outcomes
1. Improve performance skills
2. Develop and improve performance skills in a group setting
3. Develop understanding and interpretation within the context of music history
4. Refine and improve technical ability
5. Demonstrate proper technique and usage
6. Develop and improve improvisation skills
MUSC 2132. Percussion Ensemble
1 Credit (1)
Study and performance of contemporary percussion ensemble literature. May be repeated up to 5 credits. Restricted to Las Cruces campus only.
Prerequisite(s): by audition only.
Learning Outcomes
1. Improve performance skills
2. Develop and improve performance skills in a group setting
3. Develop understanding and interpretation within the context of music history
4. Refine and improve technical ability
5. Demonstrate proper technique and usage

MUSC 2151. An Introduction to World Music, Jazz and Music Research
3 Credits (3)
Introduces world music and jazz within a historical and cultural context, considering significant musical figures, forms, genres, styles, and representative works. A major component will be the development of effective research and scholarly writing skills for the music major or minor. May be repeated up to 3 credits. Restricted to: Music majors and minors. Restricted to Las Cruces campus only.
Learning Outcomes
1. This course will cover fundamental concepts and styles associated with world music (ethnomusicology), jazz and popular music, an overview of the Western European tradition, and an intense focus on research and writing about music.
2. Emphasis will be placed on writing skills as they apply to the college experience in general and the world of music education and performance in particular.
3. Students will become acquainted with the diverse ways cultures create and are affected by their respective musical arts.
4. Focus will be on style evolution, forms, genres, composers, literature, and, where appropriate, performers

MUSC 2210. Diction I
2 Credits (2)
This course is designed to prepare students for singing in multiple languages using concepts of the International Phonetic Alphabet. Students will work to master the basics of phonetic singing to improve their overall musical abilities. Restricted to Las Cruces campus only.
Learning Outcomes
1. Correctly and consistently form vowel and consonant sounds when speaking and singing in multiple languages
2. Correctly and consistently transcribe texts in multiple languages using the International Phonetic Alphabet
3. Understand and explain the International Phonetic Alphabet’s usage and symbols
4. Develop and apply the concept of lyric diction to singing
5. Gain fluency, accuracy, and confidence in pronunciation of sung text

MUSC 2210. Diction II
2 Credits (2)
This course serves as a continuing study in the concepts of the International Phonetic Alphabet. Students will continue to improve and practice their diction to develop their singing and musical abilities in order to begin the mastery of lyric diction. Restricted to music majors. Restricted to Las Cruces campus only.
Prerequisite: MUSC 2210 or consent of instructor.
Learning Outcomes
1. Correctly and consistently form vowel and consonant sounds when speaking and singing in multiple languages
2. Correctly and consistently transcribe texts in multiple languages using the International Phonetic Alphabet
3. Understand and explain the International Phonetic Alphabet’s usage and symbols
4. Develop and apply the concept of lyric diction to singing.
5. Gain fluency, accuracy, and confidence in pronunciation of sung text.
6. Demonstrate ability to notate song texts according to IPA standards

MUSC 2240. Music History and Literature: Antiquity through Baroque
3 Credits (3)
Surveys Western art music within a historical and cultural context, considering significant musical figures, forms, genres, styles, and representative works from antiquity through the end of the Baroque era. An additional emphasis will be given to effective research and scholarly writing skills. Restricted to: M ED majors. Traditional Grading with RR. Restricted to Las Cruces campus only.
Prerequisite(s): A grade of C- or better in MUSC 1450, 1460, and 2151.
Learning Outcomes
1. The purpose of the course is to survey the beginning history of music from the earliest ancient times through the Baroque period, ca. 175

MUSC 2310. Sound and Music Technology
1 Credit (1)
This course serves as an overview of current technologies and principles for the recording and production of sound, and the use of computer-based technologies for the production of music. Restricted to: M ED majors. Traditional Grading with RR. Restricted to Las Cruces campus only.
Prerequisite(s): MUSC 1460.
Learning Outcomes
1. Demonstrate fundamental knowledge of techniques and practices of music recording and production
2. Demonstrate ability to properly use computer-based technologies to produce and record music
3. Demonstrate ability to create music recordings
4. Work with a variety of recording, production, and sound reinforcement tools
5. Apply basic and mixed editing techniques
6. Use audio editing and file management techniques
7. Demonstrate knowledge of music technology vocabulary
8. Explain and understand the development of various music technologies
MUSC 2451. Ear Training III
1 Credit (1)
Continuation of MUSC 1451, advanced sight singing, dictation. Restricted to Las Cruces campus only.
Prerequisite(s): Grade of C- or better in MUSC 1451.
Learning Outcomes
1. Count rhythms at sight using the Eastman Counting System
2. Sing melodies at sight and prepared using Solfege syllables
3. Write out rhythmic patterns
4. Write out melodic patterns
5. Identify and singing intervals
6. Identify and sing chord / triad qualities
7. Write out harmonic dictation

MUSC 2452. Ear Training IV
1 Credit (1)
Continuation of MUSC 2451, advanced sight singing, dictation. Restricted to Las Cruces campus only.
Prerequisite(s): Grade of C or better in MUSC 2451 and MUSC 2460.
Learning Outcomes
1. Count rhythms at sight using the Eastman Counting System
2. Sing scales and sequences as assigned for the level
3. Sing melodies at sight using solfege syllables
4. Write out rhythmic patterns in both simple and compound meters
5. Write out melodic patterns in both major and minor tonalities
6. Identify, label and sing intervals
7. Identify, label and sing chords and extended harmonic qualities, i.e. V7 and inversions
8. Write out harmonic progressions in both two and four part forms including secondary dominants and modulations.
9. Accurately detect melodic and rhythmic errors in dictation examples.

MUSC 2460. Music Theory III
3 Credits (3)
Analysis of Baroque and Classical Music. Vocabulary and syntax of 18th and 19th c. Western art music through study, chordal/formal analysis, and composition. Restricted to Las Cruces campus only.
Prerequisite(s): Grade of C or better in MUSC 1461.
Learning Outcomes
1. To learn and apply the vocabulary and syntax of 18th and 19th c. Western art music through study, chordal/formal analysis, and composition.
2. Topics covered include: Two-Voice Eighteenth Century Counterpoint; Fugue; Borrowed Chords; Neapolitan 6th Chords; Augmented 6th Chords; Sonata Form; Rondo Form.

MUSC 2461. Music Theory IV
3 Credits (3)
Analysis of Romantic, Post-Romantic, Impressionist, and Twelve-Tone Music. Vocabulary and syntax of late 19th and early 20th c. Western art music through study, micro/macro analysis, and composition. Restricted to Las Cruces campus only.
Prerequisite(s): Grade of C or better in MUSC 2460.
Learning Outcomes
1. To learn and apply the vocabulary and syntax of late 19th and early 20th c. music through study, micro/macro analysis, and composition.

MUSC 2470. Functional Piano IV
2 Credits (2)
For music majors preparing for Piano Proficiency Examination. May be taken for unlimited credit. Restricted to music majors. No S/U option.
Prerequisite: MUSC 1472 or consent of instructor.
Learning Outcomes
1. Keys learned in previous semesters, adding A flat, E flat, and B flat
2. Secondary dominant chords added to cadence patterns, all inversions
3. Arpeggios, all inversions
4. More difficult sight–reading and transpositions
5. More difficult prepared pieces
6. Four part pieces (hymns)
7. Accompany a piece for any instrument on the Mid-Term Recital (required) Score reading and transposition

MUSC 2510. Applied Music I
1-4 Credits
Individual instruction to develop technique, musicianship, performance and improvisational skills, as well as knowledge of significant repertoire. May be repeated up to 16 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR. Restricted to Las Cruces campus only.
Prerequisite(s): Audition.
Learning Outcomes
1. Varies

MUSC 2993. Opera Workshop
1 Credit (1)
Study, translation, analysis, rehearsal and performance of opera. May be repeated up to 10 credits. Restricted to Las Cruces campus only.
Prerequisite(s): by audition only.
Learning Outcomes
1. Varies

MUSC 2996. Special Topics I
1-3 Credits
Emphasis on special areas of music; designed for highly motivated students. May be taken for unlimited credit.
Learning Outcomes
1. Varies

MUSC 301. Marching Band Techniques
2 Credits (2)
This course will help students develop the techniques needed to administer and teach all aspects of a contemporary high school marching band. This includes drill conception and design, instruction, organization, and administration. Stylistic varieties of marching fundamentals, show conception, fundamentals of charting and teaching drill, computer-aided drill design, traditional show design, contemporary show design, rehearsal techniques, and organizational concepts. Restricted to: Music, Music Education majors. Traditional Grading with RR.

MUSC 302. Music History and Literature: Classic through Romantic
3 Credits (3)
Surveys Western art music within a historical and cultural context, considering significant musical figures, forms, genres, styles, and representative works from the beginnings of the Classic era through the end of the Romantic era. An additional emphasis will be given to effective research and scholarly writing skills. Restricted to: Music Majors and Minors majors.
Prerequisite(s): A grade of C- or better in MUSC 2240.
**MUSC 303. Music History and Literature: 20th Century Through the Present**

3 Credits (3)

Surveys Western art music within a historical and cultural context, considering significant musical figures, forms, genres, styles, and representative works from the beginning of the 20th Century through the Present. An additional emphasis will be given to effective research and scholarly writing skills. Restricted to: MUS minors and majors.

**Prerequisite(s):** A grade of C- or better in MUSC 302.

**MUSC 315. Brass Techniques I**

1 Credit (1)

Methods and techniques of teaching high brass instruments, for music education majors. Main campus only.

**MUSC 316. Brass Techniques II**

1 Credit (1)

Methods and techniques of teaching low brass instruments, for music education majors. Main campus only.

**MUSC 317. Woodwind Techniques I**

1 Credit (1)

Methods and techniques of teaching high woodwind instruments, for music education majors. Main campus only.

**MUSC 318. Woodwind Techniques II**

1 Credit (1)

Methods and techniques of teaching saxophone and double reed instruments, for music education majors. Main campus only.

**MUSC 319. String Techniques I**

1 Credit (1)

Methods and techniques of teaching low string instruments, for music education majors. Main campus only.

**MUSC 321. Instrumental Techniques for Vocal Music Education Majors**

2 Credits (2)

Methods of teaching brass, woodwind, percussion, stringed and fretted instruments for vocal music education majors. Restricted to: Music and Music Education majors. Traditional Grading with RR.

**MUSC 322. Guitar Methods**

1 Credit (1)

Methods and techniques of teaching guitar, for Music Education majors. Restricted to: Music and Music Education majors. Traditional Grading with RR.

**MUSC 323. Percussion Technique I**

1 Credit (1)

Methods and techniques of teaching fundamental percussion instruments (snare drum, timpani, keyboards and essential accessories). May be repeated up to 1 credits. Restricted to: MUS,M ED majors.

**MUSC 324. Percussion Technique II**

1 Credit (1)

Methods and techniques of teaching marching percussion, drum set, and a continuation of techniques discussed in MUS 323. May be repeated up to 1 credits. Restricted to: MUS,M ED majors. Traditional Grading with RR.

**Prerequisite(s):** A grade of C- or better in MUSC 323.

**MUSC 325. Beginning Conducting**

1 Credit (1)

A study of the fundamentals of conducting and rehearsal strategies with an emphasis on beginning technique applicable to all ensembles. Reading of musical scores with application via laboratory ensemble experience is included. Restricted to: Music and Music Education majors. Traditional Grading with RR.

**Prerequisite(s):** A grade of C or better in MUSC 2452 and MUSC 2461.

**MUSC 326. Instrumental Conducting**

3 Credits (3)

Will continue from MUSC 325 in the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques as it relates to the instrumental ensemble. The class will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. May be repeated up to 3 credits. Restricted to: MUS,M ED majors. Traditional Grading with RR.

**Prerequisite(s):** A grade of C- or better in MUSC 325.

**MUSC 327. Choral Conducting**

3 Credits (3)

Continuation of conducting study with emphasis on choral rehearsal techniques, ensemble management, and literature. Restricted to: Music and Music Education majors. Traditional Grading with RR.

**Prerequisite(s):** A grade of C or better in MUSC 325.

**MUSC 330. Applied Music II**

1-4 Credits

Continuation from MUS 230. Individual instruction to develop technique, musicianship, performance and improvisational skills, as well as knowledge of significant repertoire. May be repeated up to 16 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

**Prerequisite(s):** A grade of C or better in MUSC 2992 plus a juried audition.

**MUSC 340. Junior Recital**

1 Credit (1)

Public solo performance under the supervision of the appropriate applied instructor. 30 minutes of musical performance is required. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

**Corequisite(s):** MUSC 330.

**MUSC 341. BA Capstone**

1-2 Credits (1-2)

The objective of the Capstone course for the BA degree in Music is to demonstrate the accumulation, understanding and knowledge of the student's course of study. This will take the form of an analytical paper, recital, research paper, composition or other equally encompassing project approved by the Instructor of Record. This may involve coursework from the student's minor area of study and be a multi-disciplinary collaborative effort. Restricted to: Music majors.

**Prerequisite(s):** A B- or better in MUSC 2460 and MUSC 302.

**MUSC 346. Elementary Music Methods**

2 Credits (2)

Lesson planning, curriculum, teaching methodology, materials, and procedures for teaching music in an elementary school. Emphasis on methodology of Kodály and Orff, teaching in a multicultural setting, and developing reflective practitioners. This course requires field experience in the public schools. Restricted to: Music Education majors.

**Prerequisite(s):** A grade of C or better in MUSC 1410 and passing the TEP exam.

**MUSC 349. Secondary Music Methods**

2 Credits (2)

Lesson planning, curriculum, teaching methodology, materials, and procedures for teaching music in the middle school and high school. Emphasis on teaching in a multicultural setting and developing reflective practitioners. Restricted to: Music Education majors.

**Prerequisite(s):** A grade of C or better in MUSC 346.
MUSC 350. Chamber Music
1 Credit (1)
Small performing ensembles that may include strings, woodwinds, brass, pianos, percussion, and voices. May be repeated up to 16 credits.
Prerequisite(s): by audition only.

MUSC 351. Opera Workshop
1 Credit (1)
Study, translation analysis, rehearsal and performance of opera. May be repeated up to 10 credits.
Prerequisite(s): by audition only.

MUSC 360. Special Topics II
1-3 Credits
Emphasis on special areas of music; designed for highly motivated students. May be taken for unlimited credit.

MUSC 361. Concert Choir II
1 Credit (1)
Composed of both music and nonmusic majors. Emphasis on vocal techniques, sight-singing, and basics of choral musicianship. Students must assume leadership role. May be repeated up to 88 credits.
Prerequisite(s): by audition only.

MUSC 362. Philharmonic Orchestra II
1 Credit (1)
The University Philharmonic Orchestra is open to all students and performs a wide variety of standard orchestral literature. The orchestra performs each semester and the objectives include refining technique, stylistic characteristics, intonation, balance, bowings, color, rhythmic integrity and dynamics. May be repeated up to 10 credits.
Prerequisite(s): by audition only.

MUSC 363. Jazz Ensembles II
1 Credit (1)
Performance ensemble that explore repertoire written for big band, including (but not limited to) dance band, swing, and contemporary compositions. May be repeated up to 10 credits.
Prerequisite(s): by audition only.

MUSC 365. Composition I
2 Credits (2)
Significant forms for various media. Emphasis on structural aspects of original composition. May be repeated up to 2 credits.
Prerequisite: A grade of B or better in MUSC 1460.

Learning Outcomes
1. Demonstrate the ability to analyze a variety of musical compositions
2. Demonstrate the ability to develop musical compositions from basic melodic, harmonic, rhythmic, and formal structures
3. Create new musical compositions from variety of perspectives for smaller chamber ensembles

MUSC 368. University Singers II
1 Credit (1)
Select concert and touring choir of undergraduate and graduate students performing a cappella and accompanied choral literature. May be repeated up to 10 credits. Consent of Instructor required.
Prerequisite(s): by audition only.

MUSC 370. Wind Symphony II
1 Credit (1)
This elite ensemble of 50 highly qualified graduate and undergraduate students performs a varied repertoire of the highest quality literature for winds. Members will also perform concerts of chamber winds literature each semester. This ensemble is dedicated to professional level performance while fostering the musical growth of its members. Conducted by the Director of Bands, this group serves as the flagship for the entire university bands program. May be repeated up to 10 credits.
Prerequisite(s): by audition only.

MUSC 372. Marching Band II
1 Credit (1)
Composed of both majors and nonmajors. Opportunity to perform all varieties of music in a contemporary style marching unit. May be repeated up to 5 credits. Consent of Instructor required. Traditional Grading with RR.

MUSC 374. Percussion Ensembles II
1 Credit (1)
Study and performance of contemporary percussion ensemble literature. Students must assume a leadership role. May be repeated up to 5 credits.
Prerequisite(s): by audition only.

MUSC 380. Symphonic Band II
1 Credit (1)
This is a select large ensemble, chosen by audition. It provides a challenging musical environment for skilled performers by programming repertoire that ranges from works for chamber winds, to standards of the wind band literature, to cutting edge literature. Conducted by the Associate Director of Bands, this ensemble is comprised of music majors and non-music majors alike and provides the less experienced student an opportunity to hone and refine performance skills. May be repeated up to 10 credits.
Prerequisite(s): by audition only.

MUSC 386. Applied Music Pedagogy and Literature I
2 Credits (2)
Methods, materials, problems, literature, and techniques in teaching individual lessons. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUSC 390. Survey of Wind Literature
2 Credits (2)
An examination of beginning to advanced literature for wind bands with an emphasis on the needs of middle and high school ensembles. It will include a means to determine the quality of a piece as well as the standardized level of difficulty (grading). Restricted to: Music and Music Education majors.
Prerequisite(s): A grade of C- or better in MUSC 2452 and MUSC 2461.
MUSC 391. Survey of Orchestral Literature
2 Credits (2)
An examination of beginning to advanced literature for both string orchestra and symphony orchestra with an emphasis on the needs of middle and high school ensembles. A means to determine the quality of a piece as well as the standardized level of difficulty (grading) will be included. May be repeated up to 2 credits. 
Prerequisite: A grade of C- or better in MUSC 2452 and MUSC 2461.
Learning Outcomes
1. Identify significant composers and compositions that are appropriate for all grade levels and applicable to teaching music through a performance-based environment in an orchestral setting. Determine the quality of a work based on aesthetic ideals. Determine appropriate programming strategies and repertoire selection dependent upon level of difficulty and/or varying ability levels.

MUSC 392. Survey of Choral Literature
2 Credits (2)
An examination of beginning to advanced literature for choir with an emphasis on the needs of middle and high school ensembles. A means to determine the quality of a piece as well as the standardized level of difficulty (grading) will be included. Restricted to: Music and Music Education majors.
Prerequisite(s): A grade of C- or better in MUSC 2452 and MUSC 2461.

MUSC 393. Instructional Strategies I for Instrumentalists
2 Credits (2)
An examination of beginning to advanced literature for instrumentalists with an emphasis on the needs of middle and high school ensembles. The course includes a means to determine the quality of a piece as well as the standardized level of difficulty (grading). It also allows for full ensemble instrumentation to experience both playing the repertoire and peer teaching to better rehearsal skills.
Learning Outcomes
1. The ability to assess the graded needs of middle and high school ensembles. The development of rehearsal skills.

MUSC 394. Instructional Strategies II for Instrumentalists
2 Credits (2)
The course focuses on rehearsal techniques for middle and high school ensembles. It includes a means to determine the quality of a piece of music as well as the standardized level of difficulty (grading). Students must also passing the TEP exam in order to enroll in this course. 
Prerequisite: A grade of C- or better in MUSC 1410.
Learning Outcomes
1. The development of rehearsal techniques for middle and high school ensembles.

MUSC 395. Instructional Strategies I for Vocalists
2 Credits (2)
An examination of beginning to advanced literature for vocalists with an emphasis on the needs of middle and high school ensembles. The course includes a means to determine the quality of a piece as well as the standardized level of difficulty (grading). It also allows for full ensemble instrumentation to experience both playing the repertoire and peer teaching to better rehearsal skills. Students must also pass the TEP exam to enroll in this course.
Prerequisite: A grade of C- or better in MUSC 1410.
Learning Outcomes
1. The ability to assess the graded needs of middle and high school ensembles.
2. The development of rehearsal skills.

MUSC 396. Instructional Strategies II for Vocalists
2 Credits (2)
The course focuses on rehearsal techniques for middle and high school ensembles. It includes a means to determine the quality of a piece of music as well as the standardized level of difficulty (grading). Students will also need to pass the TEP exam in order to enroll in the course.
Prerequisite: A grade of C- or better in MUSC 1410.
Learning Outcomes
1. The development of rehearsal techniques for middle and high school ensembles.

MUSC 397. Administrative Music Methods
1 Credit (1)
Lesson planning, curriculum, teaching methodology, materials, and procedures for teaching music in the middle school and high school. Emphasis on administration. Students must also pass the TEP exam to enroll in this course.
Prerequisite: A grade of C- or better in MUSC 1410.
Learning Outcomes
1. Gain insight and experience with administrative strategies and procedures in secondary classroom. Work on interview skills as well as resume and cover letter composition. Collect a set of usable tools that a student can carry with them into their first job. Gain familiarity with laws and regulations regarding programs and money spent.

MUSC 413. Form and Analysis
3 Credits (3)
Forms in tonal music and basic analytic techniques including music from diverse cultures and media.
Prerequisite(s): A grade of C- or better in MUSC 2452 and MUSC 2461.

MUSC 415. Orchestration
3 Credits (3)
Scoring for full orchestra and various instrumental combinations with consideration of instrument timbres, strengths, weaknesses and ranges. Restricted to: Music and Music Education majors.
Prerequisite(s): A grade of C or better in MUSC 2452 and MUSC 2461.

MUSC 417. Studio Accompanying
2 Credits (2)
Practical application of collaborative piano skills in a studio setting for Piano Performance majors. May be repeated up to 8 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUSC 421. Music of the Baroque Era
3 Credits (3)
An overview of the music of the Baroque era with an emphasis on history and literature. May be repeated up to 3 credits.
Prerequisite: MUSC 303.
Learning Outcomes
1. Discuss the historical and social context from which Baroque music developed. Summarize the career of several well-known Baroque composers. Outline the musical traits common and unique to different regions in the Baroque period and name the most important Baroque genres. Describe the musical style of several well-known and lesser-known Baroque composers, citing examples from specific works. Examine thirty-three Baroque musical works. Write a term paper based on an analysis of a Baroque musical work. Interpret and perform Baroque works with an understanding of historically-informed performance. Describe Baroque string, wind, brass, keyboard, and percussion instruments: their appearance, construction, and manner of playing.
Prerequisites:

**MUSC 422. Music of the Classic Era**  
3 Credits (3)  
An overview of the music of the Classic era with an emphasis on history and literature.  
Prerequisite(s): MUSC 303.

**MUSC 424. Music of the Twentieth Century**  
3 Credits (3)  
An overview of the music of the Twentieth Century with an emphasis on history and literature. Consent of Instructor required.  
Prerequisite(s): MUSC 303.

**MUSC 429. Opera: History and Literature**  
3 Credits (3)  
An overview of the operatic art form from the Florentine Camerata and Baroque opera through current 21st-century works, with an emphasis on historical context, composers, and significant works. Restricted to: Music, Music Education majors.  
Prerequisite(s): MUSC 303 or consent of instructor.  
Learning Outcomes  
1. The student will be able to effectively identify and discuss operatic developments and traditions in historical context as well as demonstrate a knowledge of operatic composers and significant operatic works.

**MUSC 430. Applied Music III**  
1-4 Credits  
Continuation from MUSC 330. Individual instruction to develop technique, musicianship, performance and improvisational skills, as well as knowledge of significant repertoire. May be repeated up to 16 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.  
Prerequisite(s): A grade of C or better in MUSC 330 plus a juried audition.

**MUSC 440. Senior Recital**  
1-2 Credits (1-2)  
Public solo performance under the supervision of the appropriate applied instructor. 60 minutes of musical performance is required for enrollment of 2 hours credit. 30 minutes of musical performance is required for enrollment of 1 hour credit. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.  
Corequisite(s): MUSC 430.

**MUSC 441. Supervised Studio Teaching**  
2 Credits (2)  
Teaching of private lessons under supervision. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

**MUSC 450. Research Methods**  
3 Credits (3)  
Introduction to methodology of music research. Emphasis on important scholarly resources and academic writing. Restricted to majors. Main campus only. No S/U option.  
Prerequisite: consent of instructor.

**MUSC 455. Music Business Internship**  
3 Credits (3)  
Capstone course for the Music Business degree. Working with the music business coordinator, students must have been accepted as an intern in a music business setting before enrolling. Credit given for the internship based on criteria developed for each placement. Restricted to majors. S/U only.  
Prerequisites: MUSC 330 and piano proficiency.

**MUSC 470. Special Topics III**  
1-3 Credits  
Designed for highly motivated students. Independent study and individual guidance. May be taken for unlimited credit.

**MUSC 471. Graduate Theory Review**  
3 Credits (3)  
Comprehensive and accelerated study of modes, diatonic harmony, and classical form of the common practice period. Restricted to: Music majors. Traditional Grading with RR.

**MUSC 475. Intermediate Conducting**  
3 Credits (3)  
Serves as a bridge from undergraduate conducting study to the graduate level. Advanced undergraduate students may enroll to learn how the graduate program in conducting functions. The course also serves as the introductory experience for newly admitted graduate conducting majors. After successful completion of this course, students will be able to: Study musical scores from a conducting perspective; Demonstrate effective predetermined gestures and movements; Lead an ensemble; Research and give presentations related to composers and their music; Demonstrate advanced knowledge of conducting practices.  
Prerequisite(s): A grade of C- or better in MUSC 326 or MUSC 327.

**MUSC 477. Graduate Music History Review**  
3 Credits (3)  
Comprehensive and accelerated study of music history from antiquity to the present Restricted to: Music majors. Traditional Grading with RR.

**MUSC 486. Applied Music Pedagogy and Literature II**  
2 Credits (2)  
Methods, materials, problems, literature, and techniques in teaching individual lessons. Consent of Instructor required. Restricted to: Music majors. Traditional Grading with RR.

**MUSC 498. Independent Study**  
1-3 Credits  
For students with a strong musical background wishing to explore content beyond the traditional curriculum. Restricted to majors. May be repeated for a maximum of 6 credits.  
Prerequisite: consent of instructor.

**MUSC 511. Survey of Traditional Harmony**  
3 Credits (3)  
Tonal harmony in common practice and theory of the late 17th, 18th, and early 19th centuries. Restricted to: Music majors. Traditional Grading with RR.  
Prerequisite(s): A grade of B or better in MUSC 471.

**MUSC 513. Twentieth Century Art Music**  
3 Credits (3)  
Analytical techniques, structural design and compositional materials from Debussy to the Minimalist school in historical context. Restricted to: Music majors.  
Prerequisite(s): A grade of B or better in MUSC 471.

**MUSC 518. Seminar in Music Theory**  
3 Credits (3)  
Varying topics in Music Theory, providing a more specific and in-depth study of the particular topic. May be repeated up to 6 credits. Restricted to: Music majors. Traditional Grading with RR.  
Prerequisite(s): A grade of B or better in MUSC 471.
MUSC 519. Seminar in Music History
3 Credits (3)
Varying topics in Music History, providing a more specific and in-depth study of the particular topic. May be repeated up to 6 credits. Restricted to: MUS majors.
Prerequisite(s): A grade of B or better in MUSC 477.

MUSC 521. Music of the Baroque Era: History and Literature
3 Credits (3)
An overview of the music of the Baroque Era with an emphasis on history and literature. May be repeated up to 3 credits.
Prerequisite: A grade of B or better in MUSC 477.

Learning Outcomes
1. Discuss the historical and social context from which Baroque music developed. Summarize the career of several well-known Baroque composers. Outline the musical traits common and unique to different regions in the Baroque period and name the most important Baroque genres. Describe the musical style of several well-known and lesser-known Baroque composers, citing examples from specific works. Examine thirty-three Baroque musical works. Write a term paper based on an analysis of a Baroque musical work. Interpret and perform Baroque works with an understanding of historically-informed performance. Describe Baroque string, wind, brass, keyboard, and percussion instruments: their appearance, construction, and manner of playing.

MUSC 522. Music of the Classical Era: History and Literature
3 Credits (3)
An overview of the music of the Classical era with an emphasis on history and literature. Restricted to: MUS majors.
Prerequisite: A grade of B or better in MUSC 477.

MUSC 523. Music of the Romantic Era: History and Literature
3 Credits (3)
An overview of Romantic era music, with an emphasis on history and literature. Restricted to MUS Majors. May be repeated up to 3 credits.
Prerequisite: A grade of B or better in MUSC 477.

Learning Outcomes
1. Develop an in-depth knowledge of composers of the Romantic era. Develop the ability to recognize major compositions of the Romantic Era. Develop the ability to analyze works from the Romantic Era.

MUSC 529. Opera History and Literature
3 Credits (3)
An overview of the operatic art form from the Florentine Camerata and Baroque opera through current 21st-century works, with an emphasis on historical context, composers, and significant works. Restricted to: MUS (Music Ed track only) majors.
Prerequisite(s): A grade of B or better in MUSC 477.

Learning Outcomes
1. The student will be able to effectively identify and discuss operatic developments and traditions in historical context as well as demonstrate a knowledge of operatic composers and significant operatic works.

MUSC 530. Seminar in Music Education
3 Credits (3)
Varying topics in Music Education, providing a more specific and in-depth study of the particular topic. Restricted to: MUS majors.

MUSC 531. Music Education in the Diverse Classroom
3 Credits (3)
This course is designed to provide an introduction to diverse and at-risk student groups in educational settings in the music classroom. It will help the course participants explore strategies and gain skills to enhance the musical growth of marginalized groups of students. There is an emphasis on identification, behavioral patterns, building interpersonal relationships, and will include a critical review of selected current research studies in music education. Armed with this knowledge, course participants will be better prepared to understand at-risk students and how best to implement strategies in the classroom. May be repeated up to 3 credits. Restricted to: MUS majors.

Learning Outcomes
1. Students will access and utilize the basic research journals and other sources of research reports and summaries, including those identified using computer technology in the field of music education. Students will describe the structure of most qualitative research studies and their aims in identifying student traits. Students will understand and use most of the language, terms and vocabulary found in qualitative research reports in discussing and identifying behavioral patterns of at-risk students. Students will appraise qualitative research in a systematic way; analyze and review what the research produced in order to isolate the strategies available to incorporate in classroom teaching scenarios. Students will independently retrieve, critique and summarize research related to at-risk students in music education.

MUSC 535. Current Issues in Music Education
3 Credits (3)
This course examines the rich and challenging complexities of music teaching and learning from a variety of perspectives. Educational theory to pedagogical inquiry of current educational practice will be examined, calling students to critically reflect on such professional activities as lesson planning, curriculum design, repertoire choice, program assessment, advocacy in the arts, and student evaluation. Restricted to: MUS (Music Ed track only) majors.

MUSC 540. Graduate Recital/Analytical Paper
4 Credits (4)
This course is for students completing a Master of Music with a Performance emphasis. A public recital will be given and an accompanying research paper will be submitted. Restricted to: MUS majors.

MUSC 574. Advanced Choral Conducting I
3 Credits (3)
This course will continue the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors.
Prerequisite(s): A grade of B or better in MUSC 475.

MUSC 575. Advanced Choral Conducting II
3 Credits (3)
This is the final course in preparation for the student's graduate conducting concert. It will continue the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors.
Prerequisite(s): A grade of B or better in MUSC 574.
MUSC 576. Advanced Instrumental Conducting I
3 Credits (3)
The role of the conductor is to lead, react to, alter, and reinforce the performance of the ensemble. This course will continue in the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors.
Prerequisite(s): A grade of B or better in MUSC 475.

MUSC 577. Advanced Instrumental Conducting II
3 Credits (3)
The role of the conductor is to lead, react to, alter, and reinforce the performance of the ensemble. This course will continue in the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors.
Prerequisite(s): A grade of B or better in MUSC 475.

MUSC 578. Advanced Choral Literature
2-3 Credits (2-3)
An examination of significant choral works from 1200 to the present, including composers, genres, and historical context. May be repeated up to 3 credits. Restricted to: MUS majors.
Prerequisite(s): A grade of B or better in MUSC 475.

MUSC 579. Advanced Instrumental Literature
2-3 Credits (2-3)
An examination of significant instrumental works from the Baroque period to the present, including composers, genres, and historical context. May be repeated up to 3 credits. Restricted to: MUS majors.
Prerequisite(s): A grade of B or better in MUSC 475.

MUSC 580. Ensemble Performance
1 Credit (1)
Performance in university ensembles. May be repeated up to 99 credits.
Prerequisite(s): by audition only.

MUSC 582. Applied Music
2-4 Credits
For music majors, individual instruction, including improvisation skills and techniques. Students may enroll for 2 or 4 credits. May be repeated for a maximum of 16 credits.
Prerequisite(s): audition and consent of instructor.

MUSC 586. Applied Music Pedagogy and Literature III
2 Credits (2)
Methods, materials, problems, literature, and techniques in teaching individual lessons. Restricted to: MUS majors.
Prerequisite(s): A grade of B or better in MUSC 486.

MUSC 598. Special Research Programs
1-4 Credits
May be taken for unlimited credit.

MUSC 599. Master’s Thesis
15 Credits
Thesis.

Music - Bachelor of Arts

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Students that wish to pursue this degree would be best served in completing this program as an accompanying degree or double major to an already existing program, completing this program with one of the concentrations, or students judiciously select a minor to accompany the BA in Music

Students must complete this requirement for 1 credit for a total of 2 semesters.  
6  
Because of the number of credits required for a music degree, including required ensembles and applied lessons, music students are not required to meet the Second Language Requirements.  
7  
Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.  

Second Language Requirement  
For the Bachelor of Arts- Music there is no second language requirement for the degree.  

A Suggested Plan of Study  
Additional classes may be needed based on placement test results and course prerequisites. Visit with an advisor for help with creating a customized plan. This roadmap assumes student placement in MATH 1130G Survey of Mathematics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.  

First Year  
Fall  
ENGL 1110G  Composition I  4  
MUSC 1310  Recital Attendance  0.5  

Second Year  
Fall  
COMM 1115G  Introduction to Communication  0-3  
MUSC 1310  Recital Attendance  0.5  
MUSC 2451  Ear Training III  1  
MUSC 2460  Music Theory III  3  
MUSC 2510  Applied Music I  1  
MUSC 2310  Sound and Music Technology  1  
MUSC 2151  An Introduction to World Music, Jazz and Music Research  3  
MUSC 2120  Major Ensemble  1  
Minor Field Course  3  

Credits  13.5-16.5  

Spring  
PHYS 1125G  Physics of Music  4  
MUSC 1310  Recital Attendance  0.5  
MUSC 2240  Music History and Literature: Antiquity through Baroque  3  
Minor Field Course  3  
Area IV: Social/Behavioral Sciences Course  3  
Elective Course  4  

Credits  17-18  

Third Year  
Fall  
MUSC 302  Music History and Literature: Classic through Romantic  3  
MUSC 325  Beginning Conducting  1  
MUSC 330  Applied Music II  1  
MUSC 300 Level Major Ensemble Course  1  
MUSC 300 Level Music Elective  3  
General Education Elective Course  3-4  
Area VI: Creative and Fine Arts Course  3  

Credits  15-16
Music (Pre-Music Therapy) - Bachelor of Arts

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Music (Theatre) - Bachelor of Arts

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix | Title | Credits
--- | --- | ---
**General Education**

**Area I: Communications** 10
- English Composition - Level 1 (4 credits)
- English Composition - Level 2 (3 credits)
- Oral Communication (3 credits)

**Area II: Mathematics** 3-4

**Area III/IV: Laboratory Sciences and Social/Behavioral Sciences** 10-11
- PHYS 1125G Physics of Music
- Either an Area III or IV Laboratory Sciences or Social/Behavioral Sciences Course (3-4 credits)

**Area V: Humanities**
- Area IV: Social/Behavioral Sciences (3 credits)

**Area VI: Creative and Fine Arts** 3
- General Education Elective
  - This requirement is satisfied by the 9-credit rule with the THEA 1000 level courses required for the Concentration

**Viewing a Wider World** 6
- Departmental Requirements
  - Theory and Ear Training Courses
    - MUSC 1450 Ear Training I 1
    - MUSC 1451 Ear Training II 1
    - MUSC 1460 Music Theory I 3
    - MUSC 1461 Music Theory II 3
    - MUSC 2451 Ear Training III 1
    - MUSC 2460 Music Theory III 3
  - History and Literature Courses
    - MUSC 2151 An Introduction to World Music, Jazz and Music Research 3
    - MUSC 2240 Music History and Literature: Antiquity through Baroque 3
    - MUSC 302 Music History and Literature: Classic through Romantic 3
  - Techniques Courses
    - MUSC 2310 Sound and Music Technology 1
    - MUSC 325 Beginning Conducting 1
  - Performance Courses
    - MUSC 1310 Recital Attendance 2
    - MUSC 2510 Applied Music I 4
    - MUSC 330 Applied Music II 2
    - Any 200 Level MUSC Ensemble 3
    - Any 300 level MUSC Ensemble 3
    - MUSC 1470 Functional Piano I (or applied piano) 2
    - MUSC 341 BA Capstone 1-2
  - Departmental Electives
    - Six credits of 300-level MUSC Elective courses 6
    - Six credits of 400 level MUSC courses 6
- Electives, to bring the total credits to 120 6-9

**Total Credits** 120

1. See the General Education Section (p. 88) of the catalog for a full list of courses
2. See the Viewing a World Section (p. 92) of the catalog for a full list of courses
3. Students will complete the requirements with .5 credit for 4 semesters
4. Students will complete the requirements with 1 credit for 4 semesters
5. Students will complete the requirements with 1 credit for 2 semesters
6. Students will complete the requirements with 1 credit for 3 semesters
7. Students will complete the requirements with 1 credit for 2 semesters
8. Because of the number of credits required for a music degree, including required ensembles and applied lessons, music students are not required to meet the Second Language Requirements.
9. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

**Second Language Requirement**

For the Bachelor of Arts - Music with a concentration in Theatre there is no second language requirement for the degree.

**A Suggested Plan of Study**

Additional classes may be needed based on placement test results and course prerequisites. Visit with an advisor for help with creating a customized plan. This roadmap assumes student placement in MATH 1130G Survey of Mathematics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course
Music (Instrumental Performance) - Bachelor of Music

The Bachelor of Music (BM) curriculum is designed to prepare students for performance careers and private studio teaching and serves as a foundation for advanced study toward master’s and doctoral degrees: M.M., D.M.A., or Ph.D in Music. In addition, the BM degree may lead to positions as professional entertainers or teachers at the college and university levels, or lead to music related work in the business world.

Second Language Requirement: (not required)

Electives, to bring the total credits to 129

Total Credits: 129-132

See the General Education (p. 88) section of the catalog for a full list of courses.

A Mathematics course is required for the degree but students may need to take any prerequisites needed to enter the course selected first.

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

All Music Majors must take MUSC 430 Applied Music III for a minimum of 2 semesters.

Music Performance students must take MUSC 440 Senior Recital for 2 credits.

Second Language Requirement

For the Bachelor of Music in Music with a Concentration in Instrumental Performance, there is no second language requirement for the degree.

Piano Proficiency

- Students must pass Piano Proficiency before presenting a Senior Recital.
- Students must enroll for Functional Piano until the Proficiency is passed.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1130G Survey of Mathematics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

1. Students are responsible for understanding and enrolling in any corequisite courses and completing any prerequisites prior to enrolling in this course.
2. See the General Education (p. 88) section of the catalog for a full list of courses.
3. See the Viewing a Wider World (p. 92) section for a full list of courses.

**Music (Vocal Performance) - Bachelor of Music**

The Bachelor of Music (BM) curriculum is designed to prepare students for performance careers and private studio teaching and serves as a foundation for advanced study toward master’s and doctoral degrees: M.M., D.M.A., or Ph.D in Music. In addition, the BM degree may lead to positions as professional entertainers or teachers at the college and university levels, or lead to music related work in the business world.

**Requirements - Basic Music and Performance**

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 134 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

#### Second Language Requirement: (not required)

| Electives, to bring the total credits to 133.5 | 0 |

1.  
See the General Education (p. 88) section of the catalog for a full list of courses.

2.  
A Mathematics course is required for the degree but students may need to take any prerequisites needed to enter the course selected first.

3.  
See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

4.  
String students may substitute MUSC 2110, MUSC 350 or MUSC 362 for MUSC 372 Marching Band II.

5.  
All Music Majors must take MUSC 430 Applied Music III for a minimum of 2 semesters.

### Second Language Requirement

For the Bachelor of Music Education in Music Education with a Concentration in K-12: Instrumental, there is no second language requirement for the degree.

#### Piano Proficiency

- Students must pass Piano Proficiency before presenting a Senior Recital.
- Students must enroll for Functional Piano until Proficiency is passed.

#### Music Education Requirement

- Students must pass the TEP Exam before taking MUSC 346 Elementary Music Methods or MUSC 393 Instructional Strategies I for Instrumentalists.
- Students must present Senior Recital before student teaching.
A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1130G Survey of Mathematics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Functional Piano is not a required course. Though not listed under recommended coursework each term, it is recommended that students take it at the appropriate level each semester until ready to pass the required Piano Proficiency.

Music Education (K12 Vocal) - Bachelor of Music Education

The Bachelor of Music Education (BME) is a diversified four- to five-year degree program of teaching, performance, and specialized studies in music. The goal of this degree is to prepare the student for certification to teach music in the public schools, and serves as a foundation for advanced study toward master’s and doctoral degrees: M.M., M.M.E., D.M.A. or Ph.D in music education.

Requirements: Basic Music and Performance

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 135.5 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

1 These courses may have prerequisites and/or co-requisites, and it is the students responsibility for checking and fulfilling all those requirements.

2 See the General Education (p. 88) section of the catalog for a full list of courses.

3 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

4 All Music Majors must take MUSC 430 Applied Music III for a minimum of 2 semesters.
Second Language Requirement
For the Bachelor of Music Education in Music Education with a Concentration in K-12: Vocal, there is no second language requirement for the degree.

Piano Proficiency
- Students must pass Piano Proficiency before presenting a Senior Recital.
- Students must enroll for Functional Piano until Proficiency is passed.

Music Education Requirement
- Students must pass the TEP Exam before taking MUSC 346
- Functional Piano is not a required course. Though not listed under the requirements, it is recommended that students take Piano Proficiency before presenting a Senior Recital.
- Students must pass Piano Proficiency before presenting a Senior Recital.
- Students must present Senior Recital before student teaching.

A Suggested Plan of Study for Students
This roadmap assumes student placement in MATH 1130G Survey of Mathematics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Functional Piano is not a required course. Though not listed under the recommended coursework each term, it is recommended that students continue to take it at the appropriate level until ready to pass the required Piano Proficiency.

Students must make a B or better before taking additional music theory/music history courses.

Philosophy

Undergraduate Program Information

A major in philosophy serves not only as preparation for further graduate study in philosophy but also as an area of concentration in a liberal arts program. A philosophy major is appropriate for students planning to attend medical school as well as for those students interested in a career that requires critical reading and argument analysis. Such careers include business, theology and above all, law. For students who are especially interested in careers in law, politics, or public policy, the Department also offers a major in Justice, Political Philosophy, and Law.

While the course requirements for these majors should meet the ends of the liberal arts student, those students interested in graduate study in philosophy or in a career in law are encouraged to seek advice from a faculty advisor as early in their career as possible.

A minor program in philosophy requiring 18 hours of course work is also offered as well as a minor in Ethics and a minor in Justice, Political Philosophy, and Law. For more information visit the Department of Philosophy’s web page at philos.nmsu.edu (http://philos.nmsu.edu).

Degrees for the Department

Philosophy - Bachelor of Arts (p. 744)
Justice, Political (p. 742) Philosophy, and (p. 742) Law - Bachelor of Arts (p. 742)

Minors for the Department

Ethics - Undergraduate Minor (p. 746)
Justice, Political Philosophy and Law - Undergraduate Minor (p. 746)
Philosophy - Undergraduate Minor (p. 746)

Timothy Cleveland, Department Head

Professors Cleveland, Walker, Keleher  Associate Professors Vessel, Klockseim  College Professor Noonan

Philosophy Courses

PHIL 1115G. Introduction to Philosophy 3 Credits (3)
In this course, students will be introduced to some of the key questions of philosophy through the study of classical and contemporary thinkers. Some of the questions students might consider are: Do we have free will? What is knowledge? What is the mind? What are our moral obligations to others? Students will engage with and learn to critically assess various philosophical approaches to such questions.

Learning Outcomes
1. Comprehend and differentiate between various philosophical approaches to questions within fields such as metaphysics, epistemology, ethics, and aesthetics.
2. Critically evaluate various philosophical arguments and positions.

PHIL 1120G. Logic, Reasoning, & Critical Thinking 3 Credits (3)
The purpose of this course is to teach students how to analyze, critique, and construct arguments. The course includes an introductory survey of important logical concepts and tools needed for argument analysis. These concepts and tools will be used to examine select philosophical and scholarly texts.

Learning Outcomes
1. Comprehend components of arguments.
2. Acquire a general understanding of the essential logical concepts needed for argument analysis, such as validity, soundness, deduction, and induction.
3. Critically assess arguments with an aim toward identifying what constitutes effective and reasonable argument strategies.
4. Learn to identify common logical fallacies.
5. Apply knowledge of argumentation principles to philosophical and scholarly texts.

PHIL 1140G. Quest for God 3 Credits (3)
An effort to understand the religious life; a consideration of some of the traditional approaches to God and what it means to be religious.

Learning Outcomes
1. Identify and describe theories regarding religion
2. Develop and enhance your critical thinking skills, particularly in the evaluation of arguments about the truth or applicability of particular religious or secular viewpoints.
3. Analyze the teachings of world religions by describing their similarities and differences.
4. Explain the beliefs, practices, and ethical standards of the major world religions as well as emerging religious movements.
5. While traditional expressions of each faith are emphasized, students will learn how each religion evolved historically and spiritually as well as the contemporary ideas and practices of each religion.
PHIL 1145G. Philosophy, Law, and Ethics
3 Credits (3)
An introduction to practical problems in moral, social, political, and legal philosophy. Topics to be discussed may include ecology, animal rights, pornography, hate speech on campus, same-sex marriage, justice, abortion, terrorism, treatment of illegal immigrants, and New Mexican Aboriginal Peoples’ land claims.  

Learning Outcomes
1. The aim of this course is to familiarize students with some of the ethical and philosophical issues that arise in connection with laws/legality in general and criminal and constitutional law in the U.S. in particular.
2. It examines issues in moral philosophy, political philosophy, and philosophy of law.
3. A question to which we repeatedly return is whether the law does and/or ought to have some necessary relation to the demands of justice and morality. Among the topics we’ll cover are: What is a law? Natural law vs. positive law and legal positivism vs. natural law theory; Utilitarian, divine command, Kantian, and natural law theories of moral rightness/wrongness; The distinction between the normative and the non-normative; Is there a moral duty to obey the law? Plato’s Crito and R.P. Wolff’s “philosophical anarchism.”; J.S. Mill and classical liberalism; Mill’s “harm principle” (“the state should restrict the liberty of competent adults via the criminal law only to prevent them from wrongfully harming other persons”); Legal paternalism. Should the state make it harder for citizens to smoke tobacco and/or marijuana, for their own good?; Should voluntary euthanasia be legal? Is there a constitutional “right to die”?; How should judges determine the meaning of vaguely worded constitutional requirements (e.g. “free exercise of religion,” no “unreasonable search and seizure,” no “cruel and unusual punishment,” etc.)? Originalist vs. nonoriginalist approaches; The First Amendment, free speech, and freedom of religion; The death penalty and “cruel and unusual punishment”; The insanity defense in criminal law; Does the 14th Amendment’s requirement of “equal protection” under the law compel states to recognize same sex marriage?; The Fourth Amendment and its prohibition of “unreasonable search and seizure.”

PHIL 2110G. Introduction to Ethics
3 Credits (3)
This course introduces students to the philosophical study of morality and will explore questions concerning our human obligations to others and related issues. Students may be asked to relate various approaches to ethics to present-day ethical debates and their own lives. 

Learning Outcomes
1. Differential between various ethical theories, which may include virtue ethics, deontology, and consequentialism.
2. Critically evaluate various ethical theories and positions.

PHIL 2230G. Philosophical Thought
3 Credits (3)
In this course, students will grapple with some of the key questions of philosophy through the study of classical and contemporary thinkers. Students will become familiar with the perennial problems in subfields of philosophy such as metaphysics, epistemology, ethics, and aesthetics. They will learn to approach these problems both critically and sympathetically. 

Learning Outcomes
1. Comprehend and differentiate between various philosophical approaches to questions within fields such as metaphysics, epistemology, ethics, and aesthetics.
2. Critically evaluate various philosophical arguments and positions.
3. Identify the differences that characterize the major subfields of philosophy.

PHIL 305. Philosophy and Literature
3 Credits (3)
Examination of philosophical ideas as presented in selected literary works and literary criticism.

PHIL 306. Philosophy Through Film
3 Credits (3)
An exploration of a range of philosophical issues through the use of film. Topics include personal identity and memory, faith and the problem of evil, free will and moral responsibility, and the meaning of life. Films may include The Prestige, Memento, The Third Man, A Clockwork Orange, Fight Club, and Synecdoche, New York.

PHIL 312. Formal Logic
3 Credits (3)
Introduction to symbolic logic and its application in the analysis of arguments in scientific and ordinary discourse.

PHIL 315. Philosophy of Language
3 Credits (3)
A critical examination of philosophical inquiries into the syntactic, semantic, and pragmatic dimensions of language.

PHIL 316. Philosophy of Mathematics
3 Credits (3)
Survey of traditional philosophical problems and views concerning the nature of mathematics including such questions as: What is the nature of mathematical knowledge? What is mathematical truth? What is a number? What is proof? What is the relationship between logic and mathematics?

PHIL 320. Social and Political Philosophy
3 Credits (3)
This course critically examines such fundamental concepts as liberty, equality and human rights.

PHIL 322. Environmental Ethics
3 Credits (3)
Explores the ethical and topical issues raised by mining and grazing, air and water pollution, factory farming, global warming, and treatment of animals. It also studies some recent ecological movements such as ecofeminism, social ecology, and deep ecology.

PHIL 323V. Engineering Ethics
3 Credits (3)
The moral legal responsibilities of engineers to clients, employers, the public, and the environment. Topics include criteria for judging when risk is acceptable, the duty to safeguard public health and welfare, conflicts of interest, and whistle-blowing. 

Prerequisite: Junior standing or higher.
PHIL 328. Applied Ethics
3 Credits (3)
Examines the implications of utilitarianism, Kantian ethics, natural law theory, and other moral theories for controversial moral issues such as the death penalty, euthanasia, abortion, genetic engineering, gay marriage, affirmative action, and pornography.

PHIL 331. Philosophy of Religion
3 Credits (3)
The nature, fundamental concepts, and problems of religion. Emphasis on the significance of religion for creative and practical value.

PHIL 332. Ethics and Global Poverty
3 Credits (3)
Philosophical scrutiny of and moral reflection on various aspects of global poverty and foreign aid. For example: Is poverty fundamentally a lack of income, or can it be understood as a failure to meet basic needs, or as a lack of valuable freedom? Do human rights exist? What, if any, are the moral obligations of rich countries to poor countries? Can foreign aid be immoral? How should the answers to these questions influence public policy? Restricted to: Main campus only.

PHIL 341. Ancient Philosophy
3 Credits (3)
Introduction to the philosophies of the pre-Socratics, Socrates, Plato, Aristotle, with brief discussion of the Epicureans and Stoics.

PHIL 344. Modern Philosophy
3 Credits (3)
Foundations of contemporary thought: introduction to the philosophies of Descartes, Bacon, Spinoza, Leibniz, Locke, Berkeley, Hume, Kant, and Hegel.

PHIL 346. Philosophy of Mind
3 Credits (3)
Examination of some of the most influential accounts of the mind, focusing on such issues as the relation between the mind and the body, mental causation and consciousness.

PHIL 350. Epistemology
3 Credits (3)
Introduction to epistemology. The philosophical critique of alleged ways of knowing. An examination of the nature of truth.

PHIL 351. Philosophy of Science
3 Credits (3)
Philosophical examination of the methodology of science. The logical, metaphysical, epistemological, and ethical critique of science and its impact on human affairs.

PHIL 361. Special Topics
3 Credits (3)
Specific subjects announced in the Schedule of Classes. May be repeated for a maximum of 9 credits.

PHIL 363. Independent Studies
1-3 Credits
For students with some background in philosophy. Independent work in a specific area. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

PHIL 373. Ethical Theory
3 Credits (3)
The critical examination of the justification of ethical theories with particular attention to the language of moral discourse.

PHIL 376. Philosophy of Law
3 Credits (3)
Ethical, logical, and epistemological implications of law, together with an analysis of the rhetoric of legal practice.

PHIL 380. Metaphysics
3 Credits (3)
Introduction to metaphysics: a treatment of such issues as the meaning of existence, the mind-body problem, the problem of universals, and free will versus determinism.

PHIL 385. Human Nature and the Good Life
3 Credits (3)
An examination of some of the most historically and philosophically influential conceptions of human nature and corresponding accounts of the good life.

PHIL 397. Existentialism
3 Credits (3)
The origins of existentialist thought in philosophy and literature, including the thought of Nietzsche, Kierkegaard, Dostoyevsky, Camus, and Sartre. The course covers topics in ethics and political philosophy, metaphysics, philosophical psychology, philosophy of religion, and other sub-disciplines of philosophy.

PHIL 435. Internship in Philosophy and Law
3 Credits (3)
Supervised hands-on experience for Justice, Political Philosophy, and Law majors to gain professional expertise of the law working with lawyers or judges in law offices, court rooms, and other professional legal settings. Student must be in junior and above standing to enroll. May be repeated up to 6 credits.
Prerequisite: Completion of 12 Philosophy credits; 2.5 GPA;
Learning Outcomes
1. Demonstrate practical knowledge, analytical ability and critical thinking of professional legal work by becoming familiar with such legal tasks as: preparing pleadings; preparing discovery, responding to discovery; controlling and organizing documents, information; preparing trial notebooks; preparing motions; contacting and responding to clients, witnesses, courts.

PHIL 448. Writing Philosophy
3 Credits (3)
A workshop on writing philosophy papers. Includes how to read and understand philosophical writing, organize a paper effectively, present a clear and forceful argument, and avoid common mistakes.
Prerequisite(s): completed 18 hours of philosophy credit.

PHIL 463. Independent Studies
1-3 Credits
For students with a strong background in philosophy. Independent work in a specific area. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

PHIL 505. Advanced Studies in Philosophy and Literature
3 Credits (3)
Examination of philosophical issues (e.g. personal identity, free will, moral dilemmas, the meaning of life) as presented in selected literary works and literary criticism. Consent of Instructor required.
PHIL 532. Advance Studies in Ethics and Global Poverty  
3 Credits (3)  
Advanced philosophical scrutiny of and moral reflection on various aspects of global poverty and foreign aid. For example: Is poverty fundamentally a lack of income, or can it be understood as a failure to meet basic needs, or as a lack of valuable freedom? Do human rights exist? What, if any, are the moral obligations of rich countries to poor countries? Can foreign aid be immoral? How should the answers to these questions influence public policy? Restricted to: Main campus only.

Name: Dana Barksdale, Administrative Assistant

Justice, Political Philosophy, and Law - Bachelor of Arts  
The aim of a Justice, Political Philosophy, and Law (JPPL) arts major is to cultivate a reasoned understanding of law and legal institutions, as well as the moral theories that support the value and justice of these institutions. JPPL offers a sequence of courses totaling 36 credit hours in critical thinking, law, policy, global justice, ethical theory, political philosophy, moral theory, feminist philosophy, and human rights. The interdisciplinary component of the major ensures that students have a well-rounded understanding of issues of justice and law. JPPL students will be well-prepared for further studies or careers in law, philosophy, politics, public service, education, human rights, or public policy.

Admission to JPPL is open to any student in good standing in the College of Arts and Sciences.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Second Language Requirement: (not required)
Electives, to bring the total credits to 120

Select sufficient electives to bring total to 120, including 48 upper-division.

Total Credits 120

1
See the General Education section of the catalog for a full list of courses.

2
A Mathematics course is required for the degree but students may need to take any prerequisites needed to enter the course first.

3
Students must take PHIL 1145G Philosophy, Law, and Ethics, PHIL 2110G Introduction to Ethics and either PHIL 1120G Logic, Reasoning, & Critical Thinking or PHIL 312 Formal Logic to fulfill the Introductory courses requirement.

4
See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

5
PHIL 323V Engineering Ethics will not count towards the Viewing A Wider World requirement, students will need to select two other courses for that requirement.

6
Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Second Language Requirement
For the Bachelor of Arts in Justice, Political Philosophy, and Law there is no second language requirement.

A Suggested Plan of Study for Students
This roadmap assumes student placement in MATH 1130G Survey of Mathematics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year
Semester 1  Credits
ENGL 1110G  Composition I  3
MATH 1130G  Survey of Mathematics  3

PHIL 1145G  Philosophy, Law, and Ethics  3
Area IV: Social and Behavioral Science Course  3
Elective Course  4

Semester 2
PHIL 2110G  Introduction to Ethics  3

1 These courses may have prerequisites and/or co-requisites, and it is the students responsibility for checking and fulfilling all those requirements.

2 See the General Education (p. 88) section of the catalog for a full list of courses.

3 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.
For the Logic course requirement, students can take either PHIL 1120G Logic, Reasoning, & Critical Thinking or PHIL 312 Formal Logic. If students select PHIL 312, it will not count towards the General Education Elective requirement.

PHIL 323V will not count towards the Viewing A Wider World requirement, students will need to select two other courses for that requirement.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

**Second Language Requirement**

For the Bachelor of Arts in Philosophy there is no second language requirement.

- JOUR 377V Mass Media Ethics
- PHIL 322 Environmental Ethics
- PHIL 323V Engineering Ethics
- PHIL 328 Applied Ethics
- PHIL 332 Ethics and Global Poverty
- SUR 401 Ethics and Professionalism in Surveying and Mapping

Total Credits 18

1

Students may earn up to 3 credits in this category from special topics or Honors courses approved by the head of the Department of Philosophy.

Justice, Political Philosophy, and Law - Undergraduate Minor

The aim of Justice, Political Philosophy, and Law is to cultivate a reasoned understanding of law and legal institutions, as well as the moral theories that support the value and justice of these institutions. The JPPL minor offers a sequence of courses in critical thinking, law, policy, global justice, ethical theory, political philosophy, moral theory, and human rights. JPPL students will be well-prepared for further studies or careers in law, philosophy, politics, public service, education, human rights, or public policy.

Philosophy - Undergraduate Minor

A student who earns a Bachelor of Arts in Philosophy may not also earn a minor in Philosophy.

Total Credits 18

Physics

Undergraduate Program Information

A bachelor’s degree in physics or engineering physics provides the basis for careers in industry, teaching, the military, government or for study toward advanced degrees in physics or engineering. It should also provide the skills that recipients of physics degrees have listed as among
the most important in obtaining their current positions, including problem solving ability, computer skills, mathematical skills, and laboratory skills, as well as knowledge of physics.

Further information about the department may be found on the web at phys.nmsu.edu (https://phys.nmsu.edu). All incoming (new or transfer) students must schedule an orientation meeting with the department head and/or the undergraduate program head before their first semester at NMSU. All students will be assigned a faculty advisor in the physics department to discuss course selection, career resources, internships and coops, and other topics.

**Graduate Program Information**

The Department of Physics offers programs in many areas of emphasis leading to the MS and Ph.D. degrees. Admission to these programs is competitive and selection of applicants is based on undergraduate and/or previous graduate grade-point averages, performance on the general and subject Graduate Record Examination, other evidence of prior academic and research accomplishments submitted by the applicant, and reference letters, as well as, in the case of applicants for the doctoral program, matching of the applicant’s research interests, as described by the student’s statement of purpose, to the Department’s research activities.

All degree-seeking graduate students must satisfy the relevant Graduate School requirements, successfully complete a 3-credit, 500-level laboratory, and demonstrate or develop knowledge of computer programming. All Ph.D. students and non-thesis Master’s students must pass a qualifying examination based on undergraduate physics courses at the 400 level. Additional course requirements are described below; courses taken S/U may not be used to satisfy any of the degree requirements, including the lab requirement for Master’s and Ph.D. students.

The qualifying and comprehensive examination outcomes are decided by vote of the entire faculty, based on the recommendations of the corresponding examination committees. For the qualifying examination, the faculty may decide that

- a student pass at the doctoral level;
- pass at the master’s level;
- be requested to retake the exam at the next available opportunity; or
- terminate graduate study.

For the written part of the comprehensive examination, the faculty may decide that

- a student be given an unconditional pass;
- be given a conditional pass, with the requirement that the student produce additional evidence of research accomplishments during the oral part of the exam before being granted admission to candidacy;
- repeat the written part the next time it is offered; or
- terminate graduate study.

In addition, the faculty may decide to discontinue financial support to a student based on the student’s performance on the qualifying or comprehensive examination. Students will receive written notification of the exam’s outcome from the Graduate Physics Program Head within 30 days of the exam. Appeals must be addressed to the Physics Department Head within 30 days of receiving written notification of the exam’s outcome and will be decided by the physics faculty.

A student granted an unconditional or conditional pass on the written part of the comprehensive examination must take the oral part in the same semester that the written part was taken; the student’s Ph.D. committee makes the final decision, following the oral part of the comprehensive examination, on admission of the student to the candidacy to the doctoral degree.

Students may choose areas of emphasis from a variety of experimental, theoretical and computational research programs in the department. The current major research areas of the department include condensed matter physics and materials science, geophysics, optics, particle and nuclear physics, and others. These research projects are supported by multimillion-dollar funding by various federal agencies and two national laboratories within the state of New Mexico: Los Alamos National Laboratory and Sandia National Laboratories. In addition to the in-house research, the department conducts collaborative research programs with

- The Brookhaven National Laboratory,
- The Center for Integrated NanoTechnologies,
- Los Alamos National Laboratory,
- Sandia National Laboratories,
- The Thomas Jefferson Laboratory,
- Fermilab,
- Air Force Research Laboratory and
- other national and international laboratories.

The MS in Physics with a concentration in Space Physics program provides students with a strong foundation in physics with an intensive focus on space physics. Graduate study in space physics at the master’s level prepares graduates for continued and specialized study toward the doctorate program in space-related fields as well as for challenges they will confront in space industrial and government settings.

The department is housed in a newly-renovated building which contains research laboratories, classrooms, offices and a computational laboratory.

**Degrees for the Department**

**Bachelor Degree(s)**

Physics - Bachelor of Arts (p. 759)

Physics - Bachelor of Science (p. 761)

Engineering Physics - Bachelor of Science (https://catalogs.nmsu.edu/nmsu/engineering/engineering-physics/)

Professor, Vassili Papavassiliou, Graduate Program Head

Professor, Heinz Nakotte, Engineering Physics Program Head

Professors Ma. Burkardt, Engelhardt, Kiefer, Papavassiliou, Pate, Vasiliev, Zollner; Associate Professors Hearn, Urquidi; Assistant Professors Paolone, Sievert; College Professors Mi. Burkardt; College Research Professors Bruce; Emeritus Faculty Burleson, DeAntonio, Gibbs, Goedecke, Kanim, Kyle, Nakotte, Ni.

Geophysics Courses

GPHY 450. Selected Topics
1-3 Credits
Readings, discussions, lectures or laboratory studies of selected areas of geophysics. May be repeated for a maximum of 12 credits.
Prerequisite: consent of instructor.

GPHY 520. Selected Topics
1-3 Credits
Formal treatment of graduate topics not covered in regular courses. May be repeated for unlimited credit.
Prerequisites: graduate standing, consent of instructor, and selection of a specific topic prior to registration.

GPHY 560. Applied Inverse Theory
3 Credits (3)
Inversion of data with an emphasis on geophysical problems. Curve fitting, tomography, earthquake location, over determined and under determined problems, linear and nonlinear problems. Computing experience desirable. Consent of Instructor required.

GPHY 598. Special Research Problems
1-3 Credits
Individual investigations, either analytical or experimental. May be repeated for unlimited credit.

GPHY 599. Master's Thesis
1-15 Credits (1-15)
Thesis.

GPHY 620. Advanced Topics in Geophysics
3 Credits (3)
Advanced formal treatment of a topic or topics not covered in regular courses. May be repeated for unlimited credit.
Prerequisite: consent of instructor.

GPHY 700. Doctoral Dissertation
1-15 Credits (1-15)
Dissertation.

Physics Courses

PHYS 1111. Introductory Computational Physics
3 Credits (2+2P)
Introduction to computational techniques for the solution of physics-related problems.
Prerequisite(s): a C- or better in MATH 1220G or MATH 1250G or MATH 1511G.

PHYS 1112. Introductory Physics for the Health Sciences
3 Credits (3)
Algebra-level introduction to topics required for the Health Sciences including basic mechanics (including sound, mechanical waves and fluids), heat and thermodynamics, electricity and magnetism, optics and electromagnetic waves, atomic and nuclear physics and applications to medical imaging. Restricted to Community Colleges campuses only.
Prerequisite(s): MATH 1215 or Equivalent.

Learning Outcomes
1. The objective of the course is to familiarize the student with the concepts and methods used in the underlying physics associated with various Health Science disciplines.
2. The course will demonstrate how the basic principles of mechanics, thermodynamics, electricity, magnetism, optics and electromagnetic waves can be applied to solve particular problems in Health Sciences applications. Introduces the student to selected topics in modern physics including quantum physics, atomic and nuclear physics.
PHYS 1115G. Survey of Physics with Lab
4 Credits (3+3P)
Overview of the concepts and basic phenomena of physics. This course provides a largely descriptive and qualitative treatment with a minimum use of elementary mathematics to solve problems. No previous knowledge of physics is assumed. Includes laboratory.

Learning Outcomes
1. Apply concepts of classical mechanics (such as velocity, acceleration, force, inertia, momentum, torque, work, energy) to simple static and dynamic systems.
2. Apply concepts of thermodynamics (such as heat, temperature, internal energy, entropy) to simple processes.
3. Apply concepts of electricity and magnetism (such as fields, potential, charge conservation, static and dynamic induction) to simple circuits, motors, and other simple contrivances.
4. Apply simple geometric and wave optics in simple situations.
5. Test ideas using modern laboratory equipment.
6. Demonstrate knowledge of basic operating principles of wind, string, and percussion instruments.
7. Demonstrate knowledge of how objectively measurable properties of sound waves correspond to the perceptions of pitch, loudness, and timbre.
8. Demonstrate understanding of the description of vibrations and waves in terms of Fourier’s Theorem and normal modes.
9. Demonstrate understanding of how the ear works.

PHYS 1125G. Physics of Music
4 Credits (3+2P)
Introduction for non-science majors to basic concepts, laws, and skills in physics, in the context of a study of sound, acoustics, and music.

Learning Outcomes
1. Demonstrate converting units and other aspects of dimensional analysis in the working of numerical problems.
2. Apply basic classical mechanics to static and dynamic fluids, including Archimedes’ principle and Bernoulli’s principle.
3. Apply the general properties of waves to simple models of musical instruments.
4. Demonstrate knowledge of basic operating principles of wind, string, and percussion instruments.
5. Demonstrate knowledge of how objectively measurable properties of sound waves correspond to the perceptions of pitch, loudness, and timbre.
6. Demonstrate understanding of the description of vibrations and waves in terms of Fourier’s Theorem and normal modes.
7. Demonstrate understanding of vocalization in terms of physical principles such as resonance and fluid dynamics.

PHYS 1125G. Physics of Music
4 Credits (3+2P)
Introduction for non-science majors to basic concepts, laws, and skills in physics, in the context of a study of sound, acoustics, and music.

Learning Outcomes
1. Demonstrate converting units and other aspects of dimensional analysis in the working of numerical problems.
2. Apply basic classical mechanics to static and dynamic fluids, including Archimedes’ principle and Bernoulli’s principle.
3. Apply the general properties of waves to simple models of musical instruments.
4. Demonstrate knowledge of basic operating principles of wind, string, and percussion instruments.
5. Demonstrate knowledge of how objectively measurable properties of sound waves correspond to the perceptions of pitch, loudness, and timbre.
6. Demonstrate understanding of the description of vibrations and waves in terms of Fourier’s Theorem and normal modes.
7. Demonstrate understanding of how the ear works.

PHYS 1230G. Algebra-Based Physics I
3 Credits (3)
An algebra-based treatment of Newtonian mechanics. Topics include kinematics and dynamics in one and two dimensions, conservation of energy and momentum, rotational motion, equilibrium, and fluids.

Learning Outcomes
1. Demonstrate converting units and other aspects of dimensional analysis in the working of numerical problems.
2. Apply principles of Newtonian mechanics to predict and account for simple phenomena modeled by the motion of particles in one and two dimensions.
3. Apply principles of Newtonian mechanics to predict and account for simple phenomena modeled by the motion of a rigid body in two dimensions.
4. Apply Newton’s theory of gravitation to circular orbits and demonstrate understanding of how Kepler’s laws of planetary motion provide the empirical foundation for Newton’s theory.
5. Apply the mathematics of vectors to the principles of Newtonian mechanics.
6. Apply principles of Newtonian mechanics to the case of static and dynamic incompressible fluids, including Archimedes’ and Bernoulli’s principles.

PHYS 1230L. Algebra-Based Physics I Lab
1 Credit (1)
A series of laboratory experiments associated with the material presented in PHYS 1230G.

Prerequisite(s)/Corequisite(s): PHYS 1230G.

Learning Outcomes
1. Explain the scientific method.
2. Test ideas using modern laboratory equipment.
4. Use computers to analyze and report laboratory results.
5. Draw appropriate conclusions from quantitative scientific observations.
6. Accurately and clearly communicate the results of scientific experiments.

PHYS 1240G. Algebra-Based Physics II
3 Credits (3)
The second half of a two semester algebra-based introduction to Physics. This course covers electricity, magnetism and optics.

Prerequisite(s): a C- or better in PHYS 1230G or PHYS 2230G.

Learning Outcomes
1. Be able to state Coulomb’s Law and Gauss’s laws and apply them.
2. Apply the concepts of electric charge, electric field and electric potential to solve problems.
3. Analyze simple DC and AC circuits.
4. Apply the Lorentz force to solve problems.
5. Apply Faraday’s law of induction (and Lenz’s law) to solve problems.
6. Apply ray optics to practical lens systems such as microscopes and corrective lenses.
7. Apply the wave nature of light to the phenomena of reflection, refraction, and diffraction.
PHYS 1240L. Algebra-Based Physics II Lab
1 Credit (1)
A series of laboratory experiments associated with the material presented in PHYS 1240
Prerequisite(s)/Corequisite(s): PHYS 1240G.
Learning Outcomes
1. Explain the scientific method.
2. Test ideas using modern laboratory equipment.
4. Use computers to analyze and report laboratory results.
5. Draw appropriate conclusions from quantitative scientific observations.
6. Accurately and clearly communicate the results of scientific experiments.

PHYS 1310G. Calculus -Based Physics I
3 Credits (3)
A calculus level treatment of classical mechanics and waves, which is concerned with the physical motion concepts, forces, energy concepts, momentum, rotational motion, angular momentum, gravity, and static equilibrium.
Prerequisite: a C- or better in MATH 1511G or higher.
Learning Outcomes
1. Describe the relationships among position, velocity, and acceleration as functions of time. Use the equations of kinematics to describe motion under constant acceleration. Analyze linear motion using Newton's laws, force, and linear momentum. Analyze rotational motion using torque and angular momentum. Analyze motion using work and energy.

PHYS 1310L. Calculus -Based Physics I Lab
1 Credit (3P)
A series of laboratory experiments associated with the material presented in Calculus-based Physics I. Students will apply the principles and concepts highlighting the main objectives covered in coursework for Calculus-based Physics I.
Prerequisite(s)/Corequisite(s): PHYS 1310G.
Learning Outcomes
1. Develop a reasonable hypothesis.
2. Work effectively as part of a team.
3. Take measurements and record measured quantities to the appropriate precision.
4. Estimate error sources in experimental techniques.
5. Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools.
6. Determine whether results and conclusions are reasonable.
7. Present experimental results in written form in appropriate style and depth.
8. Experience the relationship between theory and experiment.

PHYS 1320G. Calculus -Based Physics II
3 Credits (3)
A calculus level treatment of classical electricity and magnetism. It is strongly recommended that this course is taken at the same time as Calculus-based Physics II laboratory.
Prerequisite: a C- or better in PHYS 2110 or PHYS 1310G and MATH 1521G or higher.
Learning Outcomes
1. Apply the concepts of electric charge, electric field and electric potential to solve problems. Sketch the electric field in the vicinity of point, line, sheet, and spherical distributions of static electric charge. Sketch the magnetic field in the vicinity of line, ring, sheet, and solenoid distributions of steady current. Describe the relationship between electric field and electric potential. Calculate the Lorentz force on a moving charge for simple geometries of the fields and use it to analyze the motion of charged particles. Apply the integral forms of Maxwell's equations. Calculate the energy of electromagnetic fields. Analyze DC circuits.

PHYS 1320L. Calculus -Based Physics II Lab
1 Credit (3P)
A series of laboratory experiments associated with the material presented in Calculus-Based Physics II. Students will apply the principles and concepts highlighting the main objectives covered in coursework for Calculus-Based Physics II.
Prerequisite(s)/Corequisite(s): PHYS 1320G. Prerequisite(s): A C- or better in PHYS 2110L or PHYS 1310L.
Learning Outcomes
1. Develop a reasonable hypothesis.
2. Work effectively as part of a team.
3. Take measurements and record measured quantities to the appropriate precision.
4. Estimate error sources in experimental techniques.
5. Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools.
6. Determine whether results and conclusions are reasonable.
7. Present experimental results in written form in appropriate style and depth.
8. Experience the relationship between theory and experiment.

PHYS 1321. Problems in Calculus-Based Physics II
0.5-1 Credits (.5-1)
This is a supplemental course for Calculus-based Physics II.
Corequisite(s): PHYS 1320G.

PHYS 2110. Mechanics
3 Credits (3)
Newtonian mechanics.
Prerequisite(s)/Corequisite(s): MATH 1511G or higher.

PHYS 2110L. Experimental Mechanics
1 Credit (3P)
Laboratory experiments associated with the material presented in PHYS 2110. Science majors.
Prerequisite(s)/Corequisite(s): PHYS 2110.
PHYS 2111. Supplemental Instruction to PHYS 2110
1 Credit (1)
This Optional workshop as a supplement to PHYS 2110. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credit.
Corequisite: PHYS 2110.
Learning Outcomes
1. Analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. Use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. In the contexts of concepts and physical laws discussed in PHYS 2110, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra.
4. Self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. Develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2120. Heat, Light, and Sound
3 Credits (3)
Calculus-level treatment of thermodynamics, geometrical and physical optics, and sound. May be repeated up to 3 credits.
Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G, and MATH 1511G or higher.

PHYS 2120L. Heat, Light, and Sound Laboratory
1 Credit (3P)
Laboratory experiments associated with the material presented in PHYS 2120. Science majors.
Prerequisite: a C- or better in PHYS 2110L or PHYS 1310L.
Prerequisite/Corequisite: PHYS 2120.
Learning Outcomes
1. Develop a reasonable hypothesis. Work effectively as part of a team. Take measurements and record measured quantities to the appropriate precision. Estimate error sources in experimental techniques. Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools. Determine whether results and conclusions are reasonable. Present experimental results in written form in appropriate style and depth. Understand the relationship between theory and experiment.

PHYS 2121. Supplemental Instruction to PHYS 2120
1 Credit (1)
This optional workshop supplements PHYS 2120 "Heat, Light, and Sound". Students actively apply concepts and methods introduced in PHYS 2120 to problem solving and quantitative analysis. May be repeated up to 1 credit.
Corequisite: PHYS 2120.
Learning Outcomes
1. Analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. Use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. In the contexts of concepts and physical laws discussed in PHYS 2121, apply quantitative analysis to solve problems involving wave propagation and interference, geometric optics, heat transfer and thermodynamics.
4. Self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. Develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2140. Electricity and Magnetism
3 Credits (3)
Charges and matter, the electric field, Gauss law, the electric potential, the magnetic field, Ampere’s law, Faraday’s law, electric circuits, alternating currents, Maxwell’s equations, and electromagnetic waves. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): MATH 1521G. Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G, and MATH 1511G or higher.

PHYS 2140L. Electricity & Magnetism Laboratory
1 Credit (3P)
Laboratory experiments associated with the material presented in PHYS 2140.
Prerequisite: a C- or better in PHYS 2110 or PHYS 1310G.
Prerequisite/Corequisite: PHYS 2140.
Learning Outcomes
1. Develop a reasonable hypothesis. Work effectively as part of a team. Take measurements and record measured quantities to the appropriate precision. Estimate error sources in experimental techniques. Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools. Determine whether results and conclusions are reasonable. Present experimental results in written form in appropriate style and depth. Understand the relationship between theory and experiment.
**PHYS 2141. Supplemental Instruction to PHYS 2140**

1 Credit (1)

Optional workshop as a supplement to PHYS 2140. The tutorial sessions focus on reasoning and hands-on problem solving.

**Corequisite:** PHYS 2140.

**Learning Outcomes**

1. Analyze real-world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomenon or function. Use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text. In the contexts of concepts and physical laws discussed in PHYS 2140, apply quantitative analysis to solve problems, including the use of symmetry to study electric and magnetic fields. Practice concepts of calculus applied to charge and current distributions. Self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments. Develop learning strategies and use metacognition to promote thinking in the discipline.

**PHYS 2230G. General Physics for Life Science I**

3 Credits (3)

This algebra-based introduction to general physics covers mechanics, waves, sound, and heat. Special emphasis is given to applications in the life sciences. This course is recommended for students in the life sciences and those preparing for the physics part of the MCAT.

**Prerequisite:** A C or better in MATH 1215 or higher.

**Learning Outcomes**

1. Modeling: analyze real-world phenomena by deciding what information is relevant and constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain phenomena or function; use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text; critique assumptions and determine how to test the validity of a model and use the comparison of experimental data and prediction to refine the model.

2. Conceptual understanding: describe the motion of any object in terms of displacement, velocity, and acceleration; analyze external forces acting on an object and determine if a system is in equilibrium or relate the net force to changes in motion; predict or analyze motion using conservation laws for energy and momentum; analyze forces and torques for a rigid object in static equilibrium; for a static fluid determine pressure and the buoyant force; apply idealized models of fluid flow to the circulatory system; describe the properties of pressure waves known as sound, apply the model of standing waves to musical instruments and discuss how sound is used to sense the environment; predict qualitative changes in the internal energy of a thermodynamic system when energy has been transferred due to work or heat and justify those predictions using conservation of energy (First law of thermodynamics). Identify which heat transfer processes occur in a described situation.

3. Quantitative reasoning: use a physics problem-solving strategy (Identify relevant concepts; Introduce and study simplified models; Use symmetry arguments; Establish the relation between known and unknown quantities; Calculate a quantitative result using appropriate mathematical methods; Self-check reasonableness of assumptions and solutions); use scientific notation accurately and convert units if necessary.

4. Communicating scientific information: interpret or generate graphs or other visual representations and be able to switch between various representations including text, mathematical description, or diagrams.

**PHYS 2230L. Laboratory to General Physics for Life Science I**

1 Credit (1)

Laboratory experiments in topics associated with material presented in PHYS 2230G.

**Prerequisite(s)/Corequisite(s):** PHYS 2230G. Restricted to Las Cruces campus only.
PHYS 2231. Supplemental Instruction to General Physics for Life Sciences I
1 Credit (1)
This optional workshop supplements Physics for Life Sciences I. The tutorial sessions focus on reasoning and hands-on problem solving.
Corequisite: PHYS 2230G.

Learning Outcomes
1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. in the contexts of concepts and physical laws discussed in PHYS 2230, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra.
4. self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2240G. General Physics for Life Science II
3 Credits (3)
This algebra-based course covers electricity, magnetism, light, atomic physics, and radioactivity. Special emphasis is given to applications in the life sciences. This course is recommended for students in the life sciences and those preparing for the physics part of the MCAT.
Prerequisite: a C- or better in PHYS 1230G or PHYS 2230G, and MATH 1220G or higher.

Learning Outcomes
1. Modeling: analyze real world phenomena by constructing simplified idealized models (an abstract description) that allow making predictions or explaining a phenomena or function; use multiple representations to build and communicate the model, including sketches, mathematical expressions, diagrams or graphs; decide what information is relevant and critique assumptions and models of others; determine how to test the validity of a model and use comparison of experimental data and prediction to refine the model. Conceptual understanding: electric or magnetic fields can be used to describe interactions of objects that contain charges with their surroundings; changes that occur as a result of interactions are constrained by conservation laws (such as conservation of energy, conservation of charge or conservation of nucleon number); many macroscopic properties of materials can be described using microscopic models or related to their geometry; electromagnetic radiation can be modeled as a wave or as fundamental particles (photons); the direction of propagation of a wave may change when it encounters a boundary surface between two media of different properties (reflection or refraction); the spontaneous radioactive decay of nuclei is described by probability. Quantitative reasoning: apply quantitative analysis and appropriate mathematical reasoning to describe or explain phenomena; use scientific notation accurately and convert units if necessary. Communicating scientific information: interpreter generate graphs or other visual representations (e.g. field lines, equipotential lines) and be able to switch between various representations including text, mathematical description, or diagrams.

PHYS 2240L. Laboratory to General Physics for Life Science II
1 Credit (1)
Laboratory experiments in topics associated with material presented in PHYS 2240.
Prerequisite(s)/Corequisite(s): PHYS 2240G. Restricted to Las Cruces campus only.

PHYS 2241. Supplemental Instruction to General Physics for Life Sciences II
1 Credit (1)
This optional workshop is a supplement to Physics for Life Science II. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.
Corequisite(s): PHYS 2240G.

Learning Outcomes
1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text. in the contexts of concepts and physical laws discussed in PHYS 2240, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra. self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments. develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2996. Special Topics
1-3 Credits
 Topics to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Learning Outcomes
1. Varies

PHYS 2997. Independent Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

Learning Outcomes
1. Varies

PHYS 303V. Energy and Society in the New Millennium
3 Credits (3)
Traditional and alternative sources of energy. Contemporary areas of concern such as the state of depletion of fossil fuels; nuclear energy, solar energy, and other energy sources; environmental effects; nuclear weapons; and health effects of radiation. Discussion of physical principles and impact on society. Focus on scientific questions involved in making decisions in these areas. No physics background required.

PHYS 304. Forensic Physics
4 Credits (3+3P)
Theories, laboratory, and field techniques in the area of forensic physics.

PHYS 305V. The Search for Water in the Solar System
3 Credits (3)
Examines the formation, abundance and ubiquity of water in our Solar System stemming from comets, Martian and Lunar poles, Earth's interior and into the outer reaches of the Solar System. Topics will include nuclear synthesis, Solar System formation, remote sensing, as well as past, present and future NASA missions for water.
PHYS 315. Modern Physics  
3 Credits (3)  
An introduction to relativity and quantum mechanics, with applications to atoms, molecules, solids, nuclei, and elementary particles.  
**Prerequisite:** a C- or better in MATH 2530G and PHYS 2140 or PHYS 1320G.  

**Learning Outcomes**  
1. Communication: an ability to communicate effectively with a range of audiences. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 315 L. Experimental Modern Physics  
3 Credits (1+6P)  
Elementary laboratory in modern physics which supports the subject matter in PHYS 315. Required for physics majors. May be repeated up to 3 credits.  
**Prerequisite(s)/Corequisite(s):** PHYS 315. Prerequisite(s): a C- or better in PHYS 2140L or 1320L.  

PHYS 316. Supplemental Instructions to PHYS 315  
1 Credit (1)  
This optional workshop supplements PHYS 315 "Modern Physics". Students actively apply concepts and methods introduced in PHYS 315 to problem solving and quantitative analysis.  
**Corequisite(s):** PHYS 315.

PHYS 325. Intermediate Experimental Physics  
3 Credits (1+6P)  
An exploration of a variety of experimental techniques in physics with an emphasis on the proper determination of statistical and systematic uncertainties. Students will work in teams and prepare professional written and oral reports of their work. This course cannot be used to replace M E 345 for students majoring in engineering.  
**Prerequisite(s)/Corequisite(s):** PHYS 315. Prerequisite(s): a C- or better in PHYS 2140L or 1320L.

PHYS 350. Special Topics  
1-3 Credits  
Lectures, demonstrations, and discussions on such topics as lasers and holography, energy sources, clouds, and biophysics. May be repeated for a maximum of 12 credits under different subtitles.

PHYS 380. Individual Study  
1-3 Credits  
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.  
**Prerequisite:** consent of instructor.

PHYS 395. Intermediate Mathematical Methods of Physics  
3 Credits (3)  
Introduction to the mathematics used in intermediate-level physics courses. Topics include vector calculus, curvilinear coordinates, matrices, linear algebra, function spaces, partial differential equations, and special functions. This course cannot be used to replace M E 228 or M E 328 for students majoring in engineering. May be repeated up to 3 credits.  
**Prerequisite(s)/Corequisite(s):** MATH 392. Prerequisite(s): a C- or better in MATH 2530G.

**Learning Outcomes**  
1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 400. Undergraduate Research  
1-3 Credits  
May be repeated for a maximum of 6 credits.  
**Prerequisite:** consent of instructor.

PHYS 420. Capstone Project I  
3 Credits (3P)  
Application of engineering physics principles to a significant design project. Includes teamwork, written and oral communication and realistic technical, economic and public safety requirements.

PHYS 421. Capstone Project II  
3 Credits (3P)  
Continuation of PHYS 420.

PHYS 450. Selected Topics  
1-3 Credits  
Readings, lectures or laboratory studies in selected areas of physics. May be repeated for a maximum of 12 credits.
PHYS 451. Intermediate Mechanics I
3 Credits (3)
Newtonian mechanics, including an introduction to the Lagrangian formulation. Topics include central force motion, rigid body motion, noninertial reference frames, oscillating systems, and classical scattering.
Prerequisite(s)/Corequisite(s): MATH 392. Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G, and MATH 2530G.
Learning Outcomes
1. Set up equations of motion for classical mechanical systems and solve them. Identify conserved quantities and understand the circumstances under which they arise (symmetries); in particular, know how to use conservation of energy, momentum, angular momentum to solve problems. Fluently use three-dimensional calculus as a language to do the above; be able to use spherical and cylindrical coordinates. Understand the paradigmatic examples of the harmonic oscillator, central force (in particular, gravitational) motion and rigid body motion, which serve as starting points for investigating more complicated realistic problems.

PHYS 454. Intermediate Modern Physics I
3 Credits (3)
Introduction to quantum mechanics, focusing on the role of angular momentum and symmetries, with application to many atomic and subatomic systems. Specific topics include intrinsic spin, matrix representation of wave functions and observables, time evolution, and motion in one dimension.
Prerequisite: a C- or better in PHYS 315.
Prerequisite/Corequisite: MATH 392 and PHYS 395.
Learning Outcomes
1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 455. Intermediate Modern Physics II
3 Credits (3)
Continuation of subject matter of PHYS 454. Covered topics include rotation and translation in three dimensions, solution of central potential problems, perturbation theory, physics of identical particles, scattering theory, and the interaction between photons and atoms.
Prerequisite: a C- or better in PHYS 454, MATH 392, and PHYS 395.
Learning Outcomes
1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 458. Intermediate X-ray Diffraction
3 Credits (3)
Introduction to x-ray diffraction and reflectivity spectra. Topics include X-ray sources and detectors, atomic spectra, characteristic x-rays, thermionic emission, synchrotron radiation, instrument components, and beam conditioners. Prerequisite(s): a C- or better in PHYS 315 and PHYS 325.
Learning Outcomes
1. Knowledge of structural properties of materials Experimental x-ray characterization techniques Presentation and writing skills in the discipline Ethics, teamwork, and career opportunities
PHYS 471. Modern Experimental Optics
3 Credits (1+6P)
Cumulative experience course in optics related to the material presented in PHYS 473 and PHYS 489.
Prerequisite: a C- or better in PHYS 315 and ( PHYS 315 L or PHYS 325 ).
Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communication: an ability to communicate effectively with a range of audiences. Ethical and professional responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 475. Advanced Physics Laboratory
3 Credits (1+6P)
Cumulative experience course involving experiments in atomic, molecular, nuclear, and condensed-matter physics.
Prerequisite: a C- or better in PHYS 315 and ( PHYS 315 L or PHYS 325 ).
Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communication: an ability to communicate effectively with a range of audiences. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, Analyze, and Interpret Data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 476. Computational Physics
3 Credits (3)
Scientific visualization, numerical differentiation and interpolation, numerical integration, root finding, linear algebra, eigensystems, ODE's, Boundary value problems, PDE's, Monte-Carlo calculations, data description and analysis, Fast Fourier Transforms, and applications to advanced physics problems. Recommended is the knowledge of a programming language.
Prerequisite(s): a C- or better in PHYS 1111 or equivalent and MATH 392.
Learning Outcomes
1. learn how to use computers for solving problems in the physical sciences,
2. obtain skills to implement numerical simulation and modeling strategies,
3. learn how to monitor and analyze data graphically, during and after computation,
4. obtain workflow organization skills needed for the solution of complicated systems.

PHYS 480. Thermodynamics
3 Credits (3)
Thermodynamics and statistical mechanics. Basic concepts of temperature, heat, entropy, equilibrium, reversible and irreversible processes. Applications to solids, liquids, and gases.
Prerequisite: a C- or better in PHYS 2120, PHYS 315, and MATH 2530G.
Learning Outcomes
1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 485. Independent Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

PHYS 488. Introduction to Condensed Matter Physics
3 Credits (3)
Crystal structure, X-ray diffraction, energy band theory, phonons, cohesive energy, conductivities, specific heats, p-n junctions, defects, surfaces, and magnetic, optical, and low-temperature properties.
Prerequisite: a C- or better in PHYS 315.
Learning Outcomes
1. Learn the fundamental concepts of solid-state physics: classification of solids, crystal structure, band structure of solids, lattice vibrations, optical and magnetic properties of solids. Develop an ability to formulate and solve complex problems in solid state physics by applying the fundamental principles of physics and mathematics. Develop and ability to acquire and apply new knowledge using appropriate learning strategies.
PHYS 489. Introduction to Modern Materials
3 Credits (3)
Structure and mechanical, thermal, electric, and magnetic properties of materials. Modern experimental techniques for the study of material properties.
Prerequisite: a C- or better in PHYS 315.
Learning Outcomes
1. Learn the fundamental concepts of the physics of modern materials, such as crystal structure, properties of materials, and experimental techniques. Develop an ability to formulate and solve complex problems in the area of physics of modern materials by applying the principles of physics and mathematics. Develop an ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 493. Experimental Nuclear Physics
3 Credits (1+6P)
Cumulative experience course in nuclear physics such as measurement of radioactivity, absorption of radiation, nuclear spectrometry.
Prerequisite: a C- or better in PHYS 315 and ( PHYS 315L or PHYS 325 ).
Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communications: an ability to communicate effectively with a range of audiences. Ethical and professional responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 495. Mathematical Methods of Physics I
3 Credits (3)
Applications of mathematics to experimental and theoretical physics. Topics include vector analysis, Fourier series and transforms, Green's functions, special functions, complex variables, tensor algebra and analysis.
Prerequisite(s): a C- or better in MATH 392 and PHYS 395.
Learning Outcomes
1. Deploy the tools of vector analysis and expansion into complete sets of functions to treat problems arising, e.g., in electrodynamics. Understand the elements of functional analysis underpinning, e.g., quantum mechanics, such as representations, operators and their inverses and spectra. Evaluate integrals of analytic functions using the calculus of residues. Take advantage of the transformation behavior, under symmetry operations, of representations of physical quantities, by casting physical relations in tensor language.

PHYS 500. Special Topics Seminar
1-2 Credits
Treatment of topics not covered by regular courses. Graded S/U. May be repeated.

PHYS 511. Mathematical Methods of Physics I
3 Credits (3)
Applications of mathematics to experimental and theoretical physics. Topics include vector analysis, Fourier series and transforms, Green's functions, special functions, complex variables, tensor algebra and analysis.
Learning Outcomes
1. Deploy the tools of vector analysis and expansion into complete sets of functions to treat problems arising, e.g., in electrodynamics. Understand the elements of functional analysis underpinning, e.g., quantum mechanics, such as representations, operators and their inverses and spectra. Evaluate integrals of analytic functions using the calculus of residues. Take advantage of the transformation behavior, under symmetry operations, of representations of physical quantities, by casting physical relations in tensor language.

PHYS 520. Nanoscience and Nanotechnology
3 Credits (3)
This is a lecture/laboratory course designed to present the basic concepts, the techniques and the tools to synthesize and characterize nanometer scale materials, and the latest achievements in current and future nanotechnology applications in engineering, materials, physics, chemistry, biology, electronics and energy. It is intended for a multidisciplinary audience with a variety of backgrounds. This course should be suitable for graduate students as well as advanced undergraduates. Topics covered will include: nanoscience and nanotechnology, nanofabrication, self-assembly, colloidal chemistry, sol-gel, carbon nanotubes, graphene, thin film, lithography, physical vapor deposition, chemical vapor deposition, quantum dots, lithium batteries, X-ray diffraction, scanning electron microscopy, transmission electron microscopy, nanoelectronics, nanophotonics and nanomagnetics, etc. Students must also have completed (EH&S Safety training to include the courses: (1) Employee & Hazard Communication Safety (HazCom); (2) Hazardous Waste Management; and (3) Laboratory Standard) trainings to enroll. Crosslisted with: PHYS 520. May be repeated up to 3 credits.
Prerequisite: (CHEM 1226 or CHEM 1215G), (PHYS 1230G or PHYS 1310G).

PHYS 521. Individual Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.
Prerequisites: graduate standing, consent of instructor, and selection of a specific topic prior to registration.

PHYS 551. Classical Mechanics
3 Credits (3)
Lagrangian and Hamiltonian formulation of dynamics. Advanced treatments of most topics listed under PHYS 451, plus canonical transformations and Hamilton-Jacobi theory. PHYS 451 strongly recommended.

PHYS 554. Quantum Mechanics I
3 Credits (3)

PHYS 555. Quantum Mechanics II
3 Credits (3)
Continuation of topics in PHYS 554.
Prerequisites: PHYS 554 or consent of instructor.
PHYS 561. Electromagnetic Theory I
3 Credits (3)
Detailed advanced treatments of most topics listed under PHYS 461, PHYS 462, plus multipole radiation, collisions of charged particles and bremsstrahlung, scattering, and radiation reaction. PHYS 461 and PHYS 462 strongly recommended.

PHYS 562. Electromagnetic Theory II
3 Credits (3)
Continuation of topics in PHYS 561.
Prerequisites: PHYS 561 or consent of instructor.

PHYS 568. Elements of X-ray Diffraction
3 Credits (3)
Same as PHYS 468, but additional work required. Crosslisted with: CHME 588.

PHYS 571. Advanced Experimental Optics
3 Credits (1+6P)
Taught with PHYS 471 with additional work required at the graduate level.
Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communication: an ability to communicate effectively with a range of audiences. Ethical and professional responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 575. Advanced Physics Laboratory
3 Credits (1+6P)
Selected experiments in atomic, molecular, nuclear and condensed-matter physics.
Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communication: an ability to communicate effectively with a range of audiences. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 576. Advanced Computational Physics I
3 Credits (3)
Advanced treatment of topics listed under PHYS 476 plus additional work. Applications of numerical methods to advanced physics problems. Recommended is the knowledge of a programming language.
Learning Outcomes
1. learn to numerically solve problems that require higher mathematical and theoretical analysis,
2. experience how graduate research will be advanced and accelerated by the use of scientific computing skills.

PHYS 584. Statistical Mechanics
3 Credits (3)

PHYS 589. Modern Materials
3 Credits (3)
Same as PHYS 489 with differentiated assignments for graduate students. PHYS 554 recommended.
Learning Outcomes
1. Learn the fundamental concepts of the physics of modern materials, such as crystal structure, properties of materials, and experimental techniques. Develop an ability to formulate and solve complex problems in the area of physics of modern materials by applying the principles of physics and mathematics. Develop an ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 591. Advanced High-Energy Physics I
3 Credits (3)
Taught with PHYS 491 with additional work required at the graduate level.
Prerequisite(s): PHYS 555 or consent of instructor.

PHYS 593. Advanced Experimental Nuclear Physics
3 Credits (1+6P)
Advanced experimental investigation of topics such as measurement of radioactivity, absorption of radiation, and nuclear spectrometry.
Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communication: an ability to communicate effectively with a range of audiences. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 597. Space Plasma Physics
3 Credits (3)
Same as PHYS 497 but with added requirements.

PHYS 599. Master's Thesis
1-15 Credits (1-15)
Thesis.
PHYS 600. Research
1-15 Credits
Doctoral research. May be repeated.

PHYS 620. Advanced Topics in Physics
1-3 Credits
Advanced formal treatment of topics not covered in regular courses. May be repeated for a maximum of 9 credits.
Prerequisite: consent of instructor.

PHYS 650. General Relativity I
3 Credits (3)
Basic foundations and principles of general relativity, derivation of the Einstein field equations and their consequences, the linearized theory, the Bel-Petrov classification of the curvature tensor, derivation of the Schwarzschild solution and the four basic tests of general relativity.
Prerequisite(s): PHYS 511 or PHYS 561 or consent of instructor.

PHYS 680. Independent Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.
Prerequisite: graduate standing or consent of instructor.

PHYS 688. Advanced Condensed Matter Physics
3 Credits (3)
Continuation of the advanced condensed matter physics presented in PHYS 588. Topics include electronic structure methods, optical, magnetic, and transport properties of solids, semiconductors, crystalline defects, nanostructures, and noncrystalline solids. PHYS 588 strongly recommended.

Learning Outcomes
1. Learn the fundamental concepts of advanced condensed state physics: band theory of solids, electronic structure methods, optical and magnetic properties of solids, bulk semiconductors, and properties of nano-structured materials. Develop an ability to formulate and solve complex problems in advanced condensed matter physics. Develop an ability to study independently and acquire new knowledge using appropriate learning strategies.

PHYS 689. Advanced Modern Materials
3 Credits (3)
Advanced topics in the physics of modern materials, such as crystalline, amorphous, polymeric, nanocrystalline, layered, and composite materials and their surfaces and interfaces. PHYS 555, PHYS 588, and PHYS 589 recommended.

Learning Outcomes
1. Learn the fundamental concepts of the physics of modern materials, such as crystalline, amorphous, polymeric, nanocrystalline, layered, and composite materials. Develop an ability to formulate and solve complex problems in the area of advanced physics of modern materials. Develop an ability to study independently and acquire new knowledge using appropriate learning strategies.

PHYS 691. Quantum Field Theory I
3 Credits (3)
Path integrals, gauge invariance, relativistic quantum mechanics, canonical quantization, relativistic quantum field theory, introduction to QED.
Prerequisites: PHYS 555 and PHYS 562, or consent of instructor.

PHYS 692. Quantum Field Theory II
3 Credits (3)
QED, running coupling constant, QCD, electroweak theory, asymptotic freedom, deep inelastic scattering, basic QCD phenomenology, path integrals in quantum field theory, lattice QCD.
Prerequisite: PHYS 691 or consent of instructor.

PHYS 700. Doctoral Dissertation
1-15 Credits (1-15)
Dissertation.

Physics - Bachelor of Arts

The curriculum for the Bachelor of Arts degree is designed for students who would like to have a firm foundation in physics combined with study in another area and greater flexibility in choosing elective courses. The program requires a minor in a second field of study chosen by the student in consultation with an advisor. A second major may be used to satisfy the program requirement for a minor.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix Title Credits
General Education
Area I: Communications
English Composition - Level 1 1
English Composition - Level 2 1
Oral Communication 1
Area II: Mathematics
MATH 1511G Calculus and Analytic Geometry I 2 4
Area III/IV: Laboratory Sciences and Social/Behavioral Sciences
Area III: Laboratory Sciences Course (4 credits) 1,3
Area IV: Social/Behavioral Sciences Course (3 credits) 1
Either an Area III/IV Laboratory Sciences Course or Social/Behavioral Sciences Course (4 or 3 credits) 1,3
Area V: Humanities 7
Area VI: Creative and Fine Arts 3 3
General Education Elective
MATH 1521G Calculus and Analytic Geometry II 4
or MATH 1521H Calculus and Analytic Geometry II Honors
Viewing A Wider World 4 6
Departmental Requirements 5
PHYS 1111 Introductory Computational Physics 3
PHYS 2110 Mechanics 4
& 2110L and Experimental Mechanics
PHYS 2140 Electricity and Magnetism 4
& 2140L and Electricity & Magnetism Laboratory
PHYS 2120 Heat, Light, and Sound 4
& 2120L and Heat, Light, and Sound Laboratory
PHYS 315 Modern Physics 3
PHYS 325 Intermediate Experimental Physics 3
PHYS 395 Intermediate Mathematical Methods of Physics 3
PHYS 451 Intermediate Mechanics I 3
PHYS 454 Intermediate Modern Physics I 3
PHYS 455 Intermediate Modern Physics II 3
PHYS 461 Intermediate Electricity and Magnetism I 3
PHYS 462 Intermediate Electricity and Magnetism II 3
PHYS 480 Thermodynamics 3

Non-Departmental Requirements (in addition to Gen.Ed/VWW) 5
MATH 2530G Calculus III 3
Select 18 credits from a Minor in a second field from another department 18

Second Language Requirement: (required - see below) 0-8
Electives, to bring the total credits to 120 5,6 5-14

Total Credits 120

1 See the General Education (p. 88) section of the catalog for a full list of courses.
2 MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1511G first.
3 See alternatives for meeting General Education requirements.
4 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses
5 May not be taken S/U and must earn a grade of C- or better.
6 Elective credit may vary based on General Education course selection, second language requirements, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their Physics Advisor.

Second Language Requirement
For the Bachelor of Arts in Physics there is a one year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

Option 1:
Prefix Title Credits
Complete one of the following sequences:
CHIN 1110 Mandarin Chinese I 8
& CHIN 1120 and Mandarin Chinese II 8
FREN 1110 French I 8
& FREN 1120 and French II 8
GRMN 1110 German I 8
& GRMN 1120 and German II 8

Option 2:
Prefix Title Credits
Complete the following sequence for American Sign Language (with a C- or better):
SIGN 1110 American Sign Language I 3
SIGN 1120 American Sign Language II 3

Option 3:
Prefix Title Credits
Challenge the 1120 level for the following courses:
CHIN 1120 Mandarin Chinese II 4
or FREN 1120 French II 4
or GRMN 1120 German II 4
or JAPN 1120 Japanese II 4
or SPAN 1120 Spanish II 4

OR

Challenge the 1110/1120/1220/2210 level for the following courses:
PORT 1110 Portuguese I 3
or PORT 1120 Portuguese II 3
or SPAN 1220 Spanish for Heritage Learners II 3
or SPAN 2210 Spanish for Heritage Learners III 3

Option 4:
Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.

Option 5:
Obtain college certification of completion of two years of a second language at the high school level with a grade of C- or higher in the second-year level.

Option 6:
By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

Option 7:
By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.

Option 8:
In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.
Suggested Minors for the Bachelor of Arts
Physics Major

Astronomy Minor—A Bachelor of Arts in Physics with a minor in Astronomy provides an excellent preparation for students who wish to pursue graduate studies in Astrophysics or Astronomy.

Pre-Medicine Studies Minor—Students wishing to attend a medical or dental post-graduate school are strongly encouraged to obtain a minor in a life science field such as biochemistry, biology, human biology or microbiology.

Prelaw Minor—Students wishing to attend a post-graduate law school should obtain a minor in a law-related field, such as government, accounting, finance, or international business.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change. Full-time students are usually required to take at least 15 credits per semester.

First Year
Semester 1
ENGL 1110G Composition I 1 4
MATH 1511G Calculus and Analytic Geometry I 1 4
PHYS 1111 Introductory Computational Physics 1 3
PHYS 2110 Mechanics 4
& 2110L
PHYS 2111 Supplemental Instruction to PHYS 2110 1

Credits 16

Semester 2
ENGL 2210G Professional & Technical Communication 1 3
MATH 1521G or MATH 1521H Calculus and Analytic Geometry II or Calculus and Analytic Geometry II Honors 4
PHYS 2140 Electricity and Magnetism 4
& 2140L
PHYS 2141 Supplemental Instruction to PHYS 2140 1
Area V: Humanities Course 2 3

Credits 15

Second Year
Semester 1
MATH 2530G Calculus III 1 3
PHYS 2120 Heat, Light, and Sound 4
& 2120L
PHYS 2121 Supplemental Instruction to PHYS 2120 1
Area VI: Creative and Fine Arts Course 2 3
Minor (or Elective) Course 3

Credits 14

Semester 2
MATH 392 Introduction to Ordinary Differential Equations 1 3
PHYS 315 Modern Physics 1 3
PHYS 316 Supplemental Instructions to PHYS 315 1
PHYS 325 Intermediate Experimental Physics 1 3

Credits 16

Third Year
Semester 1
PHYS 395 Intermediate Mathematical Methods of Physics 1 3
PHYS 451 Intermediate Mechanics I 1 3
PHYS 461 Intermediate Electricity and Magnetism I 1 3
VWW: Viewing a Wider World Course 3
First Course in Second Language Series 3-4

Credits 15-16

Semester 2
PHYS 462 Intermediate Electricity and Magnetism II 1 3
PHYS 480 Thermodynamics 1 3
VWW: Viewing a Wider World Course 3
Area IV: Social and Behavioral Science Course 2 3
Next Course in Second Language Series 1 3-4

Credits 15-16

Fourth Year
Semester 1
PHYS 454 Intermediate Modern Physics I 1 3
Minor (or Elective) Course 3
Minor (or Elective) Course 3
Minor (or Elective) Course 3
Elective Course 3

Credits 15

Semester 2
PHYS 455 Intermediate Modern Physics II 1 3
Minor (or Elective) Course 3
Minor (or Elective) Course 3
Elective Course 3
Elective Course 3

Credits 14-12

Total Credits 120

1 These courses may have prerequisites and/or co-requisites, and it is the students responsibility for checking and fulfilling all those requirements.
2 See the General Education (p. 88) section of the catalog for a full list of courses.
3 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

Physics - Bachelor of Science

A Bachelor of Science degree in physics at NMSU prepares a student well for graduate study in physics, geophysics, or engineering or for a variety of careers in research and teaching. Students who plan to seek employment at the B.S. level are advised to take the concentration area curricula as part of their electives in addition to the general and departmental requirements. The program of study should be chosen by the student in consultation with an advisor.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World...
requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework. The Bachelor of Science degree in physics is accredited by the Applied and Natural Science Accreditation Commission (ANSAC) of ABET, Inc.

4 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.
5 May not be taken S/U and must earn a grade of C- or better.
6 Approved physics and technical electives are decided by Physics Advisors.

Students who plan to pursue graduate study in physics or geophysics are strongly advised to take one or more senior-level courses in optics, nuclear physics, space physics, condensed matter physics, geophysics, or computational physics. Students who plan to seek employment at the B.S. level are advised to select one of the following emphasis areas: Applied Physics, Computational Physics, Geophysics, Materials Science, or Optics. The program of study should be chosen by the student in consultation with a Physics Advisor. Some recommended courses are listed below.

**Applied Physics:** 12 credits of upper division E E, M E, or C S courses;

**Computational Physics:** C S 111, C S 171G, MATH 1531, and PHYS 476;

**Geophysics:** GEOL 1110G, GPHY 450, and two upper-division GPHY/GEOL courses;

**Materials Science:** 12 credits of upper-division courses selected from CHME 361, PHYS 450, PHYS 471, PHYS 475, PHYS 488, and PHYS 489;

**Optics:** PHYS 478.

**Second Language Requirement**

For the Bachelor of Science in the Physics with a concentration in Computational Physics there is a one year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.
**A Suggested Plan of Study for Students**

This roadmap assumes student placement in MATH 1511G Calculus and Analytic Geometry I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

**First Year**

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

*For Heritage Speakers:*

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPAN 1220</td>
<td>Spanish for Heritage Learners II</td>
<td>3</td>
</tr>
<tr>
<td>or SPAN 2210</td>
<td>Spanish for Heritage Learners III</td>
<td>3</td>
</tr>
<tr>
<td>PORT 1110</td>
<td>Portuguese I</td>
<td>3</td>
</tr>
<tr>
<td>or PORT 1120</td>
<td>Portuguese II</td>
<td>3</td>
</tr>
</tbody>
</table>

**Option 2:**

Complete the following sequence for American Sign Language (with a C- or better):

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SIGN 1110</td>
<td>American Sign Language I</td>
<td>3</td>
</tr>
<tr>
<td>SIGN 1120</td>
<td>American Sign Language II</td>
<td>3</td>
</tr>
</tbody>
</table>

**Option 3:**

**Challenge the 1120 level for the following courses:**

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHIN 1120</td>
<td>Mandarin Chinese II</td>
<td>4</td>
</tr>
<tr>
<td>or FREN 1120</td>
<td>French II</td>
<td>4</td>
</tr>
<tr>
<td>or GRMN 1120</td>
<td>German II</td>
<td>4</td>
</tr>
<tr>
<td>or JAPN 1120</td>
<td>Japanese II</td>
<td>4</td>
</tr>
<tr>
<td>or SPAN 1120</td>
<td>Spanish II</td>
<td>4</td>
</tr>
</tbody>
</table>

**OR**

**Challenge the 1110/1120/1220/2210 level for the following courses:**

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PORT 1110</td>
<td>Portuguese I</td>
<td>3</td>
</tr>
<tr>
<td>or PORT 1120</td>
<td>Portuguese II</td>
<td>3</td>
</tr>
<tr>
<td>or SPAN 1220</td>
<td>Spanish for Heritage Learners II</td>
<td>3</td>
</tr>
<tr>
<td>or SPAN 2210</td>
<td>Spanish for Heritage Learners III</td>
<td>3</td>
</tr>
</tbody>
</table>

**Option 4:**

Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.

**Option 5:**

Obtain college certification of completion of three years of a second language at the high school level with a grade of C- or higher in the second-year level.

**Option 6:**

By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

**Option 7:**

By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.

**Option 8:**

In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

**Dual Degree (BS/MS) Program**

This program option is designed to provide a means for PHYS undergraduates to obtain both a BS and an MS degree with 138 credits (normally: BS=120 credits, MS=30 credits). Students electing this option will follow the regular undergraduate BS in physics curriculum, except that they take the advanced laboratory course at the 5XX level to meet their BS requirements. They also apply nine other credits of their undergraduate courses number 450 and higher towards their MS degree, requiring only an additional 18 credits for the MS. These 18 credits can be obtained in two semesters (and perhaps one summer term to write and defend an MS thesis). Students interested in this dual degree must be admitted to the MS in Physics graduate program and must fulfill all degree requirements for the MS in Physics.
Physics - Undergraduate Minor

A student cannot earn a BA or a BS in Physics and a minor in Physics. The minor in Physics requires a minimum of 18 credits distributed as follows:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 2110</td>
<td>Mechanics</td>
<td>3</td>
</tr>
<tr>
<td>or PHYS 1310G</td>
<td>Calculus-Based Physics I</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 2140</td>
<td>Electricity and Magnetism</td>
<td>3</td>
</tr>
<tr>
<td>or PHYS 1320G</td>
<td>Calculus-Based Physics II</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 315</td>
<td>Modern Physics</td>
<td>3</td>
</tr>
</tbody>
</table>

Select 3-9 credits from the following:

- PHYS 2100 | Heat, Light, and Sound | 3-9 |
- Other Physics or Geophysics courses numbered 300 or above |

Select 0-6 credits from the following: 1

- A E 362 | Orbital Mechanics |
- C E 301 | Mechanics of Materials |
- CHME 361 | Engineering Materials |
- CHME 470 | Introduction to Nuclear Energy |
- CHME 471 | Health Physics |
- CHEM 431 | Physical Chemistry |
- or CHEM 431H | Physical Chemistry Honors |
- CHEM 433 | Physical Chemistry I |
- or CHEM 433H | Physical Chemistry I Honors |
- CHEM 434 | Physical Chemistry II |
- E E 373 | Introduction to Optics |
- E E 478 | Fundamentals of Photonics |
- E E 479 | Lasers and Applications |
- M E 333 | Intermediate Dynamics |
- M E 338 | Fluid Mechanics |
- M E 340 | Applied Thermodynamics |

Total Credits: 120

---

1 These courses may have prerequisites and/or co-requisites, and it is the students responsibility for checking and fulfilling all those requirements.

2 See the General Education (p. 88) section of the catalog for a full list of courses.

3 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.
A Master's thesis is optional for students who have passed the qualifying examination. PHYS 599 Master’s Thesis credits will not count toward the 21 credits in physics/geophysics and can only be counted toward the 30 credits for a Master’s degree if a student selects the thesis option and successfully defends a Master’s thesis. PHYS 700 Doctoral Dissertation credits can be used as a substitute for PHYS 599 Master’s Thesis credits.

**Physics (Space Physics) - Master of Science**

**Requirements**

For the master’s degree with a concentration in Space Physics, students must successfully complete the following physics core and specialized courses:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 551</td>
<td>Classical Mechanics</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 593</td>
<td>Advanced Experimental Nuclear Physics</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 511</td>
<td>Mathematical Methods of Physics I</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 597</td>
<td>Space Physics</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 554</td>
<td>Quantum Mechanics I</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 545</td>
<td>Intermediate Modern Physics I</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 561</td>
<td>Electromagnetic Theory I</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 546</td>
<td>Intermediate Electricity and Magnetism I</td>
<td></td>
</tr>
<tr>
<td>PHYS 584</td>
<td>Statistical Mechanics</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 480</td>
<td>Thermodynamics</td>
<td></td>
</tr>
</tbody>
</table>

**Specialization Electives**

Select a minimum of three from the following:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASTR 535</td>
<td>Observational Techniques (f)</td>
<td>3</td>

</tr>
<tr>
<td>PHYS 476</td>
<td>Computational Physics</td>
<td></td>
</tr>
<tr>
<td>PHYS 591</td>
<td>Advanced High-Energy Physics I</td>
<td></td>
</tr>
</tbody>
</table>

**Total Credits** 27

**Physics - Graduate Minor**

**Eligibility**

This minor is available to graduate students not majoring in Physics or Geophysics.

**Requirements**

A student must satisfy the following requirements to earn a graduate minor in Physics:

- Successfully complete 12 credit hours of courses in Physics or Geophysics numbered above 500. Of these, not more than 3 credit hours can be for research, independent study, or other informal courses.
- Pass one of the four sections of the Physics Department’s Qualifying Exam at the Ph.D. level.
- A member of the Physics faculty must be a member of the student’s graduate committee.

**Psychology**

**Undergraduate Program Information**

Students may take a major in psychology either as an area of emphasis in a liberal arts program or in preparation for further graduate education leading to professional careers in psychology. A major in psychology may be appropriate for the liberal arts student who wishes to pursue a career involving extensive social interaction and requiring solutions to people-related problems. Such careers include law, business, parenting, government, education, and management. Professional careers in psychology generally require some post-baccalaureate education. These careers include provision of clinical and counseling services, conducting research, applying research findings in industrial or government settings, and doing teaching and research in colleges and universities. All students, but especially those planning to apply to graduate school, are encouraged to take PSYC 310 Experimental Methods, no later than the Spring semester of their junior year.

Requirements for the Bachelor of Arts in Psychology are listed here (p. 770). Satisfying these requirements should provide an adequate exposure to psychology for the liberal arts student and a basic foundation for students seeking a career in psychology. Students...
wishing to prepare for a professional career in psychology are especially encouraged to work closely with an advisor, as early as possible.

**Graduate Program Information**

**Admission**

The Department of Psychology offers graduate work leading to the Master of Arts and Doctor of Philosophy degrees. To maximize consideration for admittance, candidates should submit applications by January 15. Note that the Psychology Department does not offer training in counseling or clinical psychology.

Students will be admitted to graduate study on the basis of their potential for achievement in research, scholarship and teaching. The most promising applicants will be accepted. The number of students that the department can successfully accommodate is limited, therefore it will not always be possible to admit all qualified applicants. The admissions committee will consider any material that a candidate for admission wishes to present.

Students with bachelor degrees should apply for admittance to the master's program even if their eventual goal is a Ph.D. Students with a master’s degree in psychology-related disciplines or from other institutions may apply directly to the Ph.D. program.

A completed Graduate School admission application (https://apply.nmsu.edu/apply/) (online only) should include all of the following:

1. Complete transcripts of all college work (minimum 3.0 GPA).
2. Three letters of recommendation from professors, employers or others qualified to evaluate your potential for graduate work.
3. A letter explaining your research interests and experience, career goals, and an indication of the faculty member(s) whose work is of particular interest to you.
4. A curriculum vitae or résumé.
5. A writing sample (e.g., a paper you wrote for a course, a senior thesis, or a master's thesis) uploaded through online application system. Ideally, the sample should demonstrate your ability to write clearly about psychological research.

As per NMSU Graduate School policy, admission to the doctoral program is conditional upon passing a qualifying exam. In Psychology this generally involves giving a presentation about a completed, empirical Masters thesis project to an examining committee. Also, if there are perceived gaps in preparedness, once at NMSU, candidates may be asked to complete certain coursework/research projects to address deficiencies.

A number of potential minors are available to interested students, including a minor in statistics (p. 842). Additional information about a minor may be found in the listing of the home department in this catalog.

**Degrees for the Department**

**Bachelor Degree(s)**

- Psychology - Bachelor of Arts
- Psychology - Bachelor of Arts (Online) (p. 773)

**Master Degree(s)**

- Experimental Psychology - Master of Arts (p. 776)

- Experimental Psychology - Doctor of Philosophy (p. 777)

**Minors for the Department**

**Undergraduate**

- Psychology - Undergraduate Minor (p. 776)

**Graduate**

- Psychology - (p. 777) Graduate Minor (p. 777)

**Nancy J. McMillan, Interim Department Head**

**Professors** Trafimow; Madson, Marks  
**Associate Professors** Guynn, Hout, Ketelaar, Kroger, MacDonald, Simon;  
**Assistant Professors** Fraune, Papesh;  
**Emeritus Faculty** Cowie, Johnston, McDonald, Paap, Schvaneveldt, Stephan, Thompson.

- M. Fraune (Indiana)- Human/Robot Interaction;  
- M. J. Guynn, Ph.D. (New Mexico)– human memory;  
- M.C. Hout, Ph.D. (Arizona State University) - visual cognition;  
- T. Ketelaar, Ph.D. (Michigan) – social psychology, emotion;  
- J. K. Kroger, Ph.D. (California-Los Angeles)– biopsychology, cognitive neuropsychology;  
- J. MacDonald (Purdue) – engineering psychology, auditory perception;  
- L.J. Madson, Ph.D. (Iowa State) – scholarship of teaching & learning, gender, sexuality;  
- M.J. Marks, Ph.D. (Illinois, Urbana-Champaign) – social psychology, sexual behaviors, relationships;  
- M. Papesh, Ph. D. (Arizona State) - cognition, neuroscience, and pupillometry;  
- D.A. Simon, Ph.D. (California- Los Angeles)– cognition, learning and performance;  
- D. Trafimow, Ph.D. (Illinois, Urbana-Champaign)– social cognition.

**Psychology Courses**

**PSYC 1106. Introduction to Psychology**

3 Credits (3)

This course will introduce students to the concepts, theories, significant findings, methodologies, and terminology that apply to the field of psychology.

**Learning Outcomes**

1. Explain how the scientific method and psychological research methodologies are used to study the mind and behavior.
2. Recall key terms, concepts, and theories in the areas of neuroscience, learning, memory, cognition, intelligence, motivation and emotion, development, personality, health, disorders and therapies, and social psychology.
3. Explain how information provided in this course can be applied to life in the real world.
4. Identify the major theoretical schools of thought that exist in psychology as they relate to the self, the culture, and the society.
PSYC 2221. Applied Psychology
3 Credits (3)
Explanation of the psychological principles of everyday living. Emphasizes motivation, learning of intelligent behavior, and applications of psychology to social issues. Community Colleges only.

Learning Outcomes
1. The objective of this course is to orient students to the personality characteristics, interpersonal competencies, ethical decision-making skills, and other professional traits associated with pursuing a career in a helping profession.
2. Identify the requirements for becoming a helping professional, characteristics of a skilled helper, and cultural factors that impact helping professionals.
3. Explain your personal strengths and weaknesses as a potential helper.
4. Demonstrate appropriate helping strategies based upon the special characteristics of clients.
5. Compare the capabilities that individual, family, group, community, and online interventions offer you as a future helper.
6. Identify the ethical and legal issues that impact helping professionals.
7. Analyze the potential impact of your future ethical and professional standards as a helping professional.
8. Explain how your role as a helping professional is impacted by your professional affiliation and ethical principles.
9. Analyze how worsening personal problems and increasing stress can impact the kinds and quality of our responses to life and the people around us.

PSYC 2230. Psychology of Adjustment
3 Credits (3)
This course focuses on the individual's adjustment to society, and the application of psychological principles to the understanding of adjustment.

Learning Outcomes
1. Explain the internal and external factors associated with the psychology of adjustment.
2. Evaluate contributions from psychology to adjustment concepts and processes.
3. Describe the different explanations of how individuals adjust to their environments.
4. Describe how self-identities develop and how they affect relations with others.
5. Identify resources available for assistance with adjustment-related concerns.

PSYC 2311. A Study of Substance Abuse through Learning
3 Credits (3)
Physiological and psychological impact of drug use on human behavior. Emphasizes practical applications of intervention and prevention in the community. Community Colleges only.

Learning Outcomes
1. Through readings and discussions, students will be able to describe the role that gender, ethnicity, and age have in alcohol and drug use.
2. Through readings and discussions, students will be able to learn past and current perspectives of addiction.
3. Through readings, discussions, and student presentations, students will be able to distinguish between different types of abuse-able drugs and be able to classify them.
4. Through readings, discussions, lectures and guest speaker's students will be able to discuss the role of addiction and criminal behavior.
5. Through readings and discussions, students will be able to discuss the Models and Theories of Drug Dependence and Addiction.
6. Through readings, discussions and evaluation of case studies students will be able to discuss the definitions of Substance Abuse, Dependence Addiction.
7. Through readings and discussions, students will be able to acquaint themselves with the effects of Addictive Behavior on Family Systems.
8. Through readings discussions, students will be able to discuss Disorders Co-Occurring with Substance Abuse.
9. Through readings and community service learning outing, students will be able to discuss how important the concepts of Prevention, Intervention and Treatment in drug addiction.
10. Through readings and community service learning outing students will be able to discuss Alcohol/Drug Recovery Treatment Relapse Prevention.
11. 1 Through completion of Service Learning and field assignment students will be able to discuss the role of AA/NA in Recovery Treatment.
12. 1 Through attendance of a Drug Court Hearing students will be knowledgeable of the role of Drug Courts in prevention and treatment of drug addiction.

PSYC 301. Introduction to Psycholinguistics
3 Credits (3)
Psychological aspects of language, including linguistic theories of grammar, psychological factors influencing language performance, primary language acquisition and the relationship of language to thought processes. Same as LING 301.

Prerequisites: PSYC 1110G and one of: MATH 1350G, MATH 2350G, or A ST 311; and PSYC 310 or consent of instructor.

PSYC 302. Abnormal Psychology
3 Credits (3)
Introduces the types, causes, and treatment of mental disorders. Descriptions and explanations of the neuroses, affective disorders and the psychoses. Case histories are also analyzed.

Prerequisites: PSYC 1110G, MATH 1215 and ENGL 1110G.

PSYC 310. Experimental Methods
4 Credits (2+4P)
The basic skills of literature search, experimental design, research methodology, and research reporting are emphasized; includes laboratory.

Prerequisite(s): PSYC 1110G, and either MATH 1350G, MATH 2350G, or A ST 311.
PSYC 311. Advanced Research Seminar
4 Credits (2+4P)
Psychological research in conjunction with designing, conducting, writing, and presenting an independent research project. May also include various computer applications. Will discuss issues regarding application to graduate programs. Course should be taken no later than the first semester of senior year.
Prerequisite: PSYC 310.

PSYC 315. Emotion
3 Credits (3)
An overview of the past century of research on human emotion from William James to Antonio Damasio. Explores a cognitive science perspective on emotion that includes questions about developmental, physiological, and evolutionary aspects of emotion and an exploration of the proximate and ultimate functions of emotion. Topics range from understanding the feeling component of emotion to understanding the role of facial displays of emotion.
Prerequisite(s): PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311G, and PSYC 310 or consent of instructor.

PSYC 317. Social Psychology
3 Credits (3)
Ways in which people are influenced by the behavior of others are analyzed. Includes aggression, altruism, conformity, attraction, sexual behavior, prejudice, and nonverbal behavior.
Prerequisites: PSYC 1110G, MATH 1215, and ENGL 1110G.

PSYC 321. Psychology of Personality
3 Credits (3)
Introduces personality theories and supporting research. Psychoanalytic, physiological, and behavioral theories as they apply to personality are examined. Focuses on normal personality functioning.
Prerequisites: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310.

PSYC 324. Sexual Behavior
3 Credits (3)
Examines viewpoints of the evolution, control and function of human sexual behavior. Includes human sexuality, reproduction, male-female conflicts and the social implications of sex. Prerequisites: PSYC 1110G, MATH 1215, and ENGL 1110G.

PSYC 325. Health Psychology
3 Credits (3)
Life stress, surgical stress, coronary-prone behavior, biofeedback, pain control, psychosocial approaches to geriatrics and cancer, behavioral treatments for addictions, obesity, and interpersonal issues in health care.
Prerequisite: PSYC 1110G.

PSYC 330. Psychology and the Law
3 Credits (3)
Discretionary practices in the judicial system including pretrial procedures, jury selection, jury decision making, eyewitness testimony, insanity, expert witnesses, and probation judgments.
Prerequisite: PSYC 1110G.

PSYC 340. Cognitive Psychology
3 Credits (3)
Review of research and theory in the study of human cognitive processes. Topics include information processing, pattern recognition, memory, attention, language, problem solving, decision making, and reasoning. May be repeated up to 3 credits.
Prerequisite(s): PSYC 1110G, MATH 1215, and ENGL 1110G.

PSYC 350. Developmental Psychology: Conception through Childhood
3 Credits (3)
Covers a wide range of topics concerning human psychological development from conception through childhood with special emphasis on current research and theory. May be repeated up to 3 credits.
Prerequisite(s): PSYC 1110G, MATH 1215, and ENGL 1110G.

PSYC 359. Psychology of Gender
3 Credits (3)
Examines theories and research on the psychological functioning of women and men in North American society, including influential theories of gender in psychology and current controversies in the psychological literature. Topics include those unique to women and unique to men in development across the lifespan, work, physical and mental health, sexuality, victimization, gender stereotypes, gender comparisons in abilities and personality, and biological, social, and cultural influences on behavior. May be repeated up to 3 credits. Crosslisted with: GNDR 359.
Prerequisite(s): PSYC 1110G.

PSYC 370. Special Topics
1-3 Credits
May be taken under different subtitles announced in the Schedule of Classes for unlimited credit. May be repeated for a maximum of 12 credits.
Prerequisite: PSYC 1110G.

PSYC 375. Psychology and the Brain
3 Credits (3)
An exploration of how the brain produces thinking, emotion, and behavior. May be repeated up to 3 credits.
Prerequisite(s): PSYC 1110G, MATH 1215 and ENGL 1110G.

PSYC 376. Evolutionary Psychology
3 Credits (3)
This course introduces the student to the science of Evolutionary Psychology. In this class we will explore how evolutionary psychologists think about a variety of topics ranging from our capacity for (and appreciation of) art, emotions, and beauty to an exploration of the “design” of our minds in regards to mating, status striving, social behavior and cultural production.
Prerequisite(s): PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311G, and PSYC 310 or consent of instructor.

PSYC 380. Perception
4 Credits (4+4P)
Primary emphasis on vision. Topics include measurement of sensations, development of visual-motor coordination, reading, speech perception, picture perception, illusions, 3-dimensional space, and causes and consequences of visual abnormalities.
Prerequisites: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310.

PSYC 383. Memory
3 Credits (3)
Examines facets of human memory from the information processing viewpoint, including encoding, storage, and retrieval and memory-aiding techniques.
Prerequisites: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310 or consent of instructor.

PSYC 400. Research
1-3 Credits
Individual research projects supervised by a department faculty member. May be repeated for a maximum of 6 credits.
Prerequisites: PSYC 310 and consent of instructor.
PSYC 401. Directed Readings  
1-3 Credits  
May be repeated for a maximum of 6 credits.  
Prerequisites: PSYC 1110G and consent of instructor.

PSYC 402. Field Experience  
1-3 Credits  
Working with preschool, juvenile delinquent, handicapped, aged, convict, or mentally ill. Approximately five hours scheduled work per week per credit. May be repeated to 6 credits.  
Prerequisites: 6 psychology credits and consent of instructor.

PSYC 430. Human-Computer Psychology  
3 Credits (3)  
Theories, methodologies, and data from psychology applicable to interface design, with an emphasis on construction and application of conceptual psychological models.  
Prerequisites: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310 or consent of instructor.

PSYC 441. History & Systems of Psychology  
3 Credits (3)  
History of the scientific study of the mind and behavior. Covers the historical origins of philosophical and scientific approaches to Psychology and the development of influential schools of thought in psychology from the Classical Period through the Modern Era.  
Prerequisite: PSYC 1110G and PSYC 310.  
Learning Outcomes  
1. Apply knowledge of important historical events/figures in scientific psychology by demonstrating an ability to explain how past ideas/thinkers/events have shaped current theory and methodology in scientific psychology. Explain key ideas and concepts in contemporary scientific psychology by demonstrating an ability to draw connections between our current understanding and earlier approaches to the study of the mind. Generate sophisticated arguments/opinions regarding contemporary questions in scientific psychology by demonstrating an ability to frame questions that draw upon a sophisticated understanding of the history of scientific psychology, while also being able to distinguish between well-informed and naïve answers to those questions.

PSYC 442. Thinking  
3 Credits (3)  
Research and theory pertaining to human thinking and problem solving. Effective problem-solving methods and common obstacles to problem solving are analyzed.  
Prerequisites: PSYC 1110G and PSYC 310.

PSYC 450. Senior Thesis  
3 Credits (3)  
A laboratory or field research project conducted under faculty supervision. Requires written research proposal, conduct of research, data analysis, and final written report. May be repeated for a maximum of 6 credits.  
Prerequisites: PSYC 310, 6 additional psychology credits, consent of supervising faculty member, and junior or above standing.

PSYC 470. Special Topics  
1-3 Credits  
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

PSYC 507. Quantitative Methods in Psychology I  
3 Credits (3)  
Statistical concepts emphasizing distributions and methods most appropriate to the data, models, and theories in psychology. Emphasis on distributions, probability and basic inferential statistics in Psychological research. Includes basics of Analysis of Variance (ANOVA) and Multiple Regression in Psychological research. May be repeated up to 3 credits.  
Learning Outcomes  
1. Students will be able to recognize appropriate usage of, and be able to implement, basic statistical techniques: Central tendency, variability, z-scores, t-tests, ANOVA, correlation, two predictor regression.

PSYC 508. Quantitative Methods in Psychology II  
3 Credits (3)  
Statistical concepts emphasizing distributions and methods most appropriate to the data, models, and theories in psychology. Emphasis on advanced ANOVA and Multiple Regression in Psychological research. May be repeated up to 3 credits.  
Prerequisite(s): PSYC 507 or equivalent.  
Learning Outcomes  
1. Students will become familiar with situations and applications of advanced ANOVA techniques and Multiple Regression and Correlation.

PSYC 509. Quantitative Methods in Psychology III  
3 Credits (3)  
Advanced quantitative methods as applied to research in Psychology. Topics may include: Multivariate techniques, advanced Bayesian analyses, Random walk modelling etc. May be repeated up to 3 credits.  
Prerequisite(s): PSYC 507 or equivalent.

PSYC 510. Computer Methodology  
3 Credits (3)  
Use of computers in psychological research with emphasis on developing experimental control programs.

PSYC 520. Learning  
3 Credits (3)  
Classical areas of learning, including instrumental and classical conditioning paradigms, habituation, reinforcement variables, stimulus generalization and transfer, and memory.

PSYC 522. Sensation and Perception  
3 Credits (3)  
Stimulus and decision variables in judging auditory and visual events. Topics include: detection of signals; signal intensity versus perceived strength; size, shape, and movement perception; reading and listening.

PSYC 523. Methods in Cognitive Psychology  
3 Credits (3)  
Experimental and correlational methodologies appropriate for investigating cognitive psychological theories and problems.  
Prerequisite(s): PSYC 524 or consent of instructor.

PSYC 524. Cognitive Psychology  
3 Credits (3)  
Examines theoretical and empirical work on human cognition. Topics include: information processing theories, pattern recognition, memory, attention, language, problem solving, decision making, and reasoning.

PSYC 527. Social Psychology  
3 Credits (3)  
Current and traditional theories, research findings, and research methodologies of social psychology.
PSYC 529. Methods in Social Psychology  
3 Credits (3)  
Experimental, quasi-experimental, and correlational methodologies appropriate for investigating social psychological theories and problems.  
Prerequisite(s): Graduate student in psychology or consent of instructor.

PSYC 540. History and Systems of Psychology  
3 Credits (3)  
History of scientific method emphasizing outstanding methodological problems of contemporary science, especially psychology. Covers recent history of psychology and development of schools of psychology.

PSYC 547. Engineering Psychology  
3 Credits (3)  
Covers concepts, methods, and findings of human performance. Treats the human as a subsystem that receives, stores and processes information, makes decisions, and acts within a human-machine environment system.

PSYC 550. Teaching of Psychology  
3 Credits (3)  
This class serves both new and experienced teachers. It will help new teachers design and conduct a successful course and help experienced teachers improve their teaching.

PSYC 570. Special Topics  
1-3 Credits  
Specific subjects to be announced in the Schedule of Classes.

PSYC 590. Research Seminar in Psychology  
1 Credit (1)  
Presentations on research by students, faculty, and guest speakers. May be repeated for credit.

PSYC 598. Special Research Programs  
1-3 Credits  
Individual investigations either analytical or experimental. May be repeated for credit.

PSYC 599. Master's Thesis  
1-15 Credits  
Thesis.

PSYC 600. Doctoral Research  
1-15 Credits  
This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination.

PSYC 698. Special Research Programs  
1-3 Credits  
Individual investigations either analytical or experimental. May be repeated for credit.

PSYC 700. Doctoral Dissertation  
1-15 Credits  
Dissertation.

Psychology - Bachelor of Arts  
General Requirements

Students must complete all University degree requirements, which include: General Education requirements (p. 88), Viewing a Wider World requirements (p. 92), and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Students must receive a C- or better in courses.

Second Language Requirement

For the Bachelor of Arts in Psychology there is a two year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

Option 1:

Prefix | Title | Credits
--- | --- | ---
CHIN 1110 | Mandarin Chinese I | 3-14
& CHIN 1120 & CHIN 2110 & CHIN 2120 | and Mandarin Chinese II and Mandarin Chinese III and Mandarin Chinese IV | 3-14
FREN 1110 & FREN 1120 & FREN 2110 & FREN 2120 | and French I and French II and French III and French IV | 3-14
GRMN 1110 & GRMN 1120 & GRMN 2110 & GRMN 2120
German I and German II and German III and German IV 3-14

JAPN 1110 & JAPN 1120 & JAPN 2110 & JAPN 2120
Japanese I and Japanese II and Japanese III and Japanese IV 3-14

SPAN 1110 & SPAN 1120 & SPAN 2110 & SPAN 2120
Spanish I and Spanish II and Spanish III and Spanish IV 3-14

PORT 1110 & PORT 1120
Portuguese I and Portuguese II 3-6

For Heritage Speakers:
SPAN 1210 & SPAN 1220 & SPAN 2210
Elementary Spanish for Heritage Learners I and Spanish for Heritage Learners II and Spanish for Heritage Learners III 3-9

Option 2:
Prefix Title Credits
Complete the following sequence for American Sign Language (with a C- or better):
SIGN 1110 American Sign Language I 3
SIGN 1120 American Sign Language II 3
SIGN 2110 American Sign Language III 3

Option 3:
Prefix Title Credits
Challenge the 2120 level for the following courses:
CHIN 2120 Mandarin Chinese IV 3
or FREN 2120 French IV 3
or GRMN 2120 German IV 3
or JAPN 2120 Japanese IV 3
or SPAN 2120 Spanish IV 3

OR

Challenge the 1120/2210 level for the following courses:
PORT 1120 Portuguese II 3
or SPAN 2210 Spanish for Heritage Learners III 3

Option 4: Computer Science Track
Prefix Title Credits
C S 153 Python Programming I 3
C S 154 Python Programming II 3
C S 158 R Programming I 3

Under special circumstances, alternative combinations of CS courses may be approved by the Department Head

Total Credits 9

Option 5: Math Track
Prefix Title Credits
MATH 1220G College Algebra 3
MATH 1250G Trigonometry & Pre-Calculus 4
MATH 1511G Calculus and Analytic Geometry I 4
MATH 1521G Calculus and Analytic Geometry II 4

Total Credits 15

Option 6:
Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.

Option 7:
Obtain college certification of completion of three years of a second language at the high school level with a grade of C- or higher in the second-year level.

Option 8:
By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

Option 9:
By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.

Option 10:
In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

A Suggested Plan of Study for Students
This roadmap assumes student placement in MATH 1350G Introduction to Statistics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year
Semester 1 Credits
ENGL 1110G Composition I 1 4
Choose from one of the following: 3
MATH 1350G Introduction to Statistics 1
MATH 2350G Statistical Methods 1
A ST 311 Statistical Applications 1

PSYC 1110G Introduction to Psychology 3
Area V: Humanities Course (recommend one of the following) 2 3
PHIL 1115G Introduction to Philosophy
PHIL 2230G Philosophical Thought
FYEX 1112 The Freshman Year Experience (OR Area I: Communications Course) 2 3

Credits 16

Semester 2
COMM 1115G Introduction to Communication 3
Choose from one of the following: 4
BiOL 1120G Human Biology
& BiOL 1120L and Human Biology Laboratory
BiOL 2110G Principles of Biology: Cellular and Molecular Biology
& BiOL 2110L and Principles of Biology: Cellular and Molecular Biology Laboratory
BiOL 2610G Principles of Biology: Biodiversity, Ecology, and Evolution
& BiOL 2610L and Principles of Biology: Biodiversity, Ecology, and Evolution Laboratory

First Course in Second Language Series 3-4
Psychology - Bachelor of Arts (Online)

General Requirements

Students must complete all University degree requirements, which include: General Education requirements (p. 88), Viewing a Wider World requirements (p. 92), and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Students must receive a C- or better in courses.

Statistics Course requirement, can be completed with one of the following (all but A ST 311 will count towards Gen.Ed requirements) 1,7
- A ST 311 Statistical Applications
- MATH 1350G Introduction to Statistics
- MATH 2350G Statistical Methods

Introductory Biology requirement, can be completed with one of the following (all will count towards Gen.Ed requirements) 8
- BIOL 1120G & BIOL 1120L Human Biology and Human Biology Laboratory
- BIOL 2110G Principles of Biology: Cellular and Molecular Biology and Principles of Biology: Cellular and Molecular Biology Laboratory

**Second Language: (required- see below)** 13-15
- Electives, to bring the total credits to 120 9
- 31-35

**Total Credits** 120

1. Either MATH 1350G Introduction to Statistics, MATH 2350G Statistical Methods is required for the degree but students may need to take any prerequisites needed to enter MATH 1350G or MATH 2350G first.
2. See the General Education (p. 88) of the catalog for a full list of courses
3. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses
4. PSYC 310 Experimental Methods: prerequisite of PSYC 1110G Introduction to Psychology and and either MATH 1350G,MATH 2350G, or A ST 311.
5. Additional electives to bring total credits in psychology to at least 34, with at least 24 of those 34 credits being upper division.
6. PHIL 346 Philosophy of Mind or PHIL 351 Philosophy of Science recommended
7. Students who are considering graduate study are strongly encouraged to take math classes beyond the minimum statistics course requirement.
8. A course that includes a laboratory is highly recommended, and is required if intended to satisfy Gen Ed Area III
9. Elective credit may vary based on General Education course selection, second language requirements, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
Second Language Requirement

For the Bachelor of Arts in Psychology there is a two year second language requirement, the options to complete this requirement are listed below. The number of credits that a student needs to take may vary depending on what level they come in with. Please speak with an advisor for more information as to which courses you will need to take to fulfill the second language requirement for this degree.

**Option 6:**

Pass a three-credit, upper-division course (numbered 300 or above) taught in a second language by the department of Languages and Linguistics.

**Option 7:**

Obtain college certification of completion of three years of a second language at the high school level with a grade of C- or higher in the second-year level.

**Option 8:**

By obtaining certification of a working knowledge of a Native American language from the American Indian program director.

**Option 9:**

By obtaining, from the head of the Department of Languages and Linguistics, certification of a working knowledge of a second language if such language is not taught at NMSU.

**Option 10:**

In the case of a foreign student who is required to take the TOEFL exam admission, the dean will automatically waive the second language requirement.

**A Suggested Plan of Study for Students**

This roadmap assumes student placement in MATH 1350G Introduction to Statistics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

**Credits:** 15
Psychology - Undergraduate Minor

A student must pass at least 18 credits in Psychology courses with grades of C- or higher, and at least 9 of those credits must be upper division. A student may not earn both a BA in Psychology and a minor in Psychology.

Experimental Psychology - Master of Arts

The department offers an MA degree in general experimental psychology. The program provides students with sufficient electives to emphasize a particular sub-area of experimental psychology. The program is designed to provide graduates with the tools and knowledge necessary for further training at the doctoral level or for employment in industry or government.

MA students are required to complete:
The Ph.D. in psychology is offered in the major areas of cognitive, experimental psychology, and social psychology. Ph.D. candidates are required to complete the following coursework and tasks:

### Core Course (corresponding to the student’s area of study):

- **PSYC 524**: Cognitive Psychology
- **PSYC 527**: Social Psychology
- **PSYC 547**: Engineering Psychology

### Two other Content Courses:

- **PSYC 520**: Learning
- **PSYC 522**: Sensation and Perception
- **PSYC 540**: History and Systems of Psychology

### The Quantitative/Computer Methods Sequence:

- **PSYC 507**: Quantitative Methods in Psychology I
- **PSYC 508**: Quantitative Methods in Psychology II
- **PSYC 510**: Computer Methodology

### Research Thesis:

- **PSYC 599**: Master’s Thesis

1. Students are also encouraged to register for one credit of PSYC 590 Research Seminar in Psychology each semester.

When offered, PSYC 570 Special Topics may be considered content, quantitative methods, or experimental methods, depending on the specific course content.

## Experimental Psychology - Doctor of Philosophy

The Ph.D. in psychology is offered in the major areas of cognitive, engineering and social psychology. Ph.D. candidates are required to complete the following coursework and tasks:

### Core Course: (corresponding to the student’s area of study)

- **PSYC 524**: Cognitive Psychology
- **PSYC 527**: Social Psychology
- **PSYC 547**: Engineering Psychology

### Quantitative/Computer Methods Sequence:

- **PSYC 507**: Quantitative Methods in Psychology I
- **PSYC 508**: Quantitative Methods in Psychology II
- **PSYC 510**: Computer Methodology

### Content Courses:

- **PSYC 520**: Learning
- **PSYC 522**: Sensation and Perception
- **PSYC 540**: History and Systems of Psychology

### Experimental Methods:

- **PSYC 523**: Methods in Cognitive Psychology
- **PSYC 529**: Methods in Social Psychology
- **PSYC 550**: Teaching of Psychology

### Comprehensive Examination:

1. Pass written and oral components of the comprehensive exam independently:

2. Complete a work-related training requirement (i.e. complete an internship of at least 10 weeks duration, or teach at least one 3-credit undergraduate course independently. Pre-teaching requirements listed here)

3. Pass a final oral examination that consists primarily of an evaluation of the dissertation and the candidate’s defense of it, but may extend over the entire field of the candidate’s study.

Students are encouraged to register for one credit of PSYC 590 Research Seminar in Psychology each semester.

Students should also enroll in at least one credit of the appropriate supervised research course each semester (i.e., PSYC 600 Doctoral Research, PSYC 698 Special Research Programs, or PSYC 700 Doctoral Dissertation).

When offered, PSYC 570 Special Topics may be considered content, quantitative methods, or experimental methods, depending on the specific course content.

## Psychology - Graduate Minor

Any master’s or doctoral student can declare a minor in Psychology in addition to their major area of study.

Students may earn a minor in psychology at the M.A. or Ph.D. level by completing nine credits of any 500-level and above coursework in psychology EXCEPT the following courses (PSYC 507, PSYC 508, PSYC 509, PSYC 590, PSYC 598, PSYC 599, PSYC 600, or PSYC 700).

All minors must be approved by the minor department head and dean of the Graduate School. Students must declare the Psychology minor on a Program of Study and Committee Form for the Master’s and doctoral level. Demonstration of competency in the minor area will be required at both comprehensive and final examinations. Students must also include a representative from the Psychology department on their thesis, comprehensive, and/or dissertation committees. The representative from the minor department can also serve as the Dean’s Representative on the committee.

## Theatre Arts

### Undergraduate Program Information

With strong emphases in acting, musical theater, new works and design/technical theatre, the program prepares students for graduate study, life in the profession, or a myriad of related job fields. Students gain practical experience through a wide array of courses designed to expose them to the varied aspects and job positions involved in theatrical production. Additional experience is gained via work on our public productions. The faculty is augmented by nationally-renowned guest theatre artists.

A minimum of 62 credits with a grade of C- or higher in theatre arts is required for the major. Theatre Arts does not require a second language.

Students enrolled in this department’s major or minor may count credits in required applied courses toward their degrees beyond the normal maximum of 9 credits allowed in the College of Arts and Sciences. However, if a student changes the major or does not complete the requirements for the minor at the time of graduation, they may only count a maximum of 9 credits of the applied credits toward graduation.
Students preparing to teach in public schools may qualify for certification by completing the Bachelor of Science in Education degree with theatre arts as a teaching field. (See curricula in the College of Health, Education & Social Transformation (https://hest.nmsu.edu/) section).

At any time the Theatre Arts program may be undergoing curriculum changes. For the most up-to-date information about degree requirements please visit https://theatre.nmsu.edu/ or visit the Theatre Arts Department at room 318 in the ASNMSU Center for the Arts Building on University Ave at Espina.

**Degrees for the Department**

Theatre Arts - Bachelor of Arts (p. 783)

Theatre Arts (Musical Theatre) - Bachelor of Arts (p. 785)

**Minors for the Department**

Theatre Arts - Undergraduate Minor (p. 787)

**Professor, Wil Kilroy, Department Head/Managing Director**

**Associate Professor:** Lury  
**Assistant Professor:** Hamilton, Hermanson  
**College Professor:** C. Billings  
**College Associate Professor:** J. Billings  
**Emeritus:** Brunson, Storm  
**Professional Staff:** Carruthers, Jaworski, Wilkinson, Wise  
**Office Staff:** White

**Theatre Arts Courses**

**THEA 1110G. Introduction to Theatre**  
3 Credits (3)

This course provides an introduction to the study of theatre. Students will examine various components that comprise theatre, such as acting, directing, playwriting, dramaturgy, scenic and costume design, stagecraft, spectatorship, history, theory, and criticism.

**Learning Outcomes**

1. Define and discuss basic theater terms and concepts.
2. Discuss the fundamental elements of theatre, and the ways in which theatre differs from other art forms.
3. Analyze and critique the elements of a live theatrical production.
4. Identify and describe the roles of various theatre artists including actors, directors, playwrights, dramaturges, and designers.

**THEA 1210G. Acting for Non-Majors**  
3 Credits (3)

This class gives non-majors experience in the depth and craft of the actor's art. Students will learn various terms, techniques, and practices of acting and will demonstrate their understanding in class. Through exercises and improvisations, partnered scenes, and group work, students will be better able to appreciate the work of others as they learn techniques of performing. May be repeated up to 3 credits.

**Learning Outcomes**

1. Develop fundamental physical, vocal, analytical, and imaginative skills for acting for the stage.
2. Apply fundamental techniques of voice and movement for the stage.
3. Apply principles of play text analysis to understand story, character, and meaning.
4. Gain a better understanding of an actor's approach to goals, tactics, and obstacles.
5. Engage in character creation and development while preparing and performing monologues and scenes.
6. Learn a common vocabulary to help discuss the process of acting.
7. Employ collaborative methods of work with a partner and in groups.
8. Observe and evaluate acting skills of other actors.
9. Increase verbal and physical communication skills which are applicable in any field.
10. Develop personal and social responsibility via group work, research and self-reflection.
11. Increase confidence and self-esteem via continuous presentations with supportive feedback.

**THEA 1221. Beginning Acting**  
3 Credits (3)

Basic understanding of self-expression through a variety of physical exercises, improvisation, and character study, culminating in scene or monologue work. Restricted to: THTR majors.

**Learning Outcomes**

1. Apply a common vocabulary that serves as a foundation in acting for the theatre major and minor
2. Communicate effectively in front of an audience, applying learned concepts while exercising freedom and control of voice, body, and imagination
3. Analyze the written character and live performance
4. Provide objective feedback to your classmate's work as well as your own, that supports a greater understanding of our craft while building trust within the collaborative ensemble

**THEA 1222. Stage Movement**  
3 Credits (3)

Physical techniques for the actor to develop kinesthetic awareness and skills in characterization, archetypes, and stage combat. Restricted to: THTR majors.

**Learning Outcomes**

1. To provide fundamental training in a variety of movement techniques which can be applied to both theatrical performance and physical communication in everyday life.
2. Observation and critical skills will be advanced through class participation and outside assignments
3. Class exercises are aimed at guiding participants to uncover their own creative expression, while working with efficient, healthy body alignment
THEA 1223. The Art of Theatre
3 Credits (3)
This course introduces the variety and scope of theatre professions, the value and goals of the theatre major and an analysis of the art form from script to stage. Restricted to: Required for THTR majors majors.
Learning Outcomes
1. An overview of the history of theatre in the Western world
2. A general understanding of the artistic roles and functions within the theatre industry (including within NMSU Theatre as a model)
3. A strong preparation for independent in-depth script analysis and theatre critique

THEA 1310. Introduction to Costuming
3 Credits (3)
This course introduces students to basic skills generally used in creating costumes for theatre. During the semester students will be introduced to the costume shop, equipment, supplies, and processes. They will learn the process of sewing a garment and running a stage production.
Prerequisite(s)/Corequisite(s): THEA 1310L. Restricted to: THTR majors.
Learning Outcomes
1. Demonstrate basic hand and machine sewing skills.
2. Use basic costume craft tools and techniques.
3. Analyze fabric selection for the stage.
4. Draft and use patterns.
5. Take body measurements for patterning and construct a costume from those measurements.
6. Combine interpersonal communication skills with costume construction skills.
7. Analyze a script for costume design purposes.
8. Build a garment.

THEA 1310L. Costume Craft Lab
1 Credit (1)
Class members will assist in construction for productions in a studio environment.
Prerequisite(s)/Corequisite(s): THEA 1310.
Learning Outcomes
1. This laboratory class compliments THEA 1310: Costume Crafts.
2. It gives the student an opportunity to put into practice the skills learned in THEA 1310 as well as be introduced to and participate in the day-to-day operations of the Costume Shop.

THEA 1415. Running Crew I
2 Credits (1+2P)
Students learn about backstage and front of house production positions and work on a technical aspect of a product in a rehearsal and performance environment.
Learning Outcomes
1. Students will learn one, or more, of the basic technical elements of theatrical crew work.

THEA 2221. Intermediate Acting: Scene Study and Monologues
3 Credits (3)
Monologues and scene work, using character and script analysis.
Prerequisite(s): THEA 1221 or THEA 1210 with C- or above.
Learning Outcomes
1. Students will gain further insight into the craft of acting and the techniques and skills required to present a successful stage performance.
2. Via the presentation of varied scenes and monologues, students will be exposed to a variety of theatrical literature.
3. Via research, students will gain knowledge of successful actors, acting techniques, and career advice.

THEA 2222. Intermediate Acting for Non-Majors
3 Credits (3)
A continuation of THEA 1210 with an emphasis on monologues, scenes and characterization. Prerequisite(s): THEA 1210
Learning Outcomes
1. Apply fundamental techniques of voice and movement for the stage.
2. Analyze a dramatic text and interpret a character and develop the skills necessary to score a script for character development.
3. Perform specific choices to create and perform goal-driven characters.
4. Demonstrate various physical and mental relaxation techniques.
5. Identify internal and external techniques to increase actor’s emotional range.
6. Demonstrate sensory exercises and apply this technique to scene work.
7. Articulate and implement key terminology of modern acting techniques.
8. Develop and articulate a basic personal artistic process.
9. Demonstrate the ability to work cooperatively on a creative/ interpretative project.
10. Begin to develop professionalism and development of a critical eye through practice giving and receiving peer feedback, adherence to deadlines, memorization, flexibility and coachability.

THEA 2310. Stagecraft
3 Credits (3)
Student will explore basic skills for scenic designers and techniques of set construction for the stage, including building scenery, rigging, painting and properties.
Prerequisite(s)/Corequisite(s): THEA 2310L.
Learning Outcomes
1. Demonstrate a range of technical skills, which will qualify them to assist in the basic technical
2. Production of a play.
3. Demonstrate and apply how to safely and competently use hand tools, power tools, electrical, and electronic stage equipment.
4. Analyze the technical aspects of a play in performance.
5. Read and construct scenery from ground plans, elevations, and drawings.
6. Analyze a script from the perspective of a designer, artistic, and/or technical director.
THEA 2310L. Stagecraft Laboratory
1 Credit (1)
Class members will assist with construction for productions in a studio environment.
Prerequisite(s)/Corequisite(s): THEA 2310.
Learning Outcomes
1. History of scenic design and the development of present day stage design.
2. How to create and interpret basic scenic ground plans, elevations, and detail drawings.
3. To construct basic scenic structures to include flats and platforms.
4. Various techniques of scenic painting and decorating.
5. The installations of theatre lighting instruments and sound equipment.

THEA 2340. Introduction to Design
3 Credits (3)
Introduction into our visual world via the language of designers, focusing on collaboration, creative thinking and presentation skills. The varied design professions in theatre and the performing arts will be explored. Restricted to: Required of all THTR Majors.
Learning Outcomes
1. Apply design vocabulary and descriptions when speaking about design.
2. Identify design tools and make choices about where to use them.
3. Apply the foundation information in understanding how design tools work.
4. Apply correct terminology in assessing design and script analysis.
5. Read and understand some of the design documents commonly used in the industry.

THEA 2415. Running Crew II
1 Credit (1)
Students learn about backstage and front of house production positions and work on a technical aspect of a product in a rehearsal and performance environment.
Learning Outcomes
1. To provide students with "hands on" experience participating in being a member of a running crew on a theatrical production.
2. Students will learn one, or more, of the basic technical elements of theatrical crew work.

THEA 2421. Vocal Production for the Actor
3 Credits (3)
Exploration and development of the actor’s vocal instrument, including relaxation, projection, diction and articulation. May be repeated up to 3 credits. Restricted to: THTR majors.

THEA 2422. Vocal Production for the Actor
3 Credits (3)
Exploration and development of the actor’s vocal instrument, including relaxation, projection, diction and articulation. May be repeated up to 3 credits. Restricted to: THTR majors.

THEA 2992. Theatre Workshop I
0.5 Credits (.5)
Required for all freshman and sophomore theatre majors, this course coordinates all processes within Theatre Arts, providing a forum for discussion and feedback. May be repeated up to 4 credits. Restricted to Las Cruces campus only.
Learning Outcomes
1. This lab course is designed to create community via group meetings with your peers while providing a platform for our guest artists to present information regarding our profession.
2. As time allows, group discussions and sharing will further the sense of community and collaboration with your peers.
3. This forum also provides an opportunity to discuss and provide feedback for each production in the ASTC season.

THEA 2993. Theatre Workshop I
0.5 Credits (.5)
Required for all freshman and sophomore theatre majors, this course coordinates all processes within Theatre Arts, providing a forum for discussion and feedback. May be repeated up to 4 credits. Restricted to Las Cruces campus only.
Learning Outcomes
1. This lab course is designed to create community via group meetings with your peers while providing a platform for our guest artists to present information regarding our profession.
2. As time allows, group discussions and sharing will further the sense of community and collaboration with your peers.
3. This forum also provides an opportunity to discuss and provide feedback for each production in the ASTC season.

THEA 2996. Theatre Topics
1-3 Credits (1-3)
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 9 credits.
Learning Outcomes
1. Varies

THEA 300. Theatre Workshop II
0.5 Credits (.5)
Required for all junior and senior theatre majors, this course coordinates all processes within Theatre Arts, providing a forum for discussion and feedback. May be repeated up to 4 credits. Restricted to Las Cruces campus only.

THEA 304. Theatre History II
3 Credits (3)
History of theatre and drama from the Restoration to the 20th century. May be repeated up to 3 credits.

THEA 306. Script Analysis
3 Credits (3)
This class is designed to give you tools and specific processes to help you read and break down a text, so that you can make it come alive for audiences in the varied genres of theatre, film and animation.
Learning Outcomes
1. Determine the dramatic structure of a script Write an analysis of a script for production Verbally communicate an analysis of a script for production Analyze a script from a specific perspective such as actor, director, designer, animator, etc.

THEA 307V. Society in Style: Fashion, History and Culture
3 Credits (3)
History of clothing for theatrical purposes, origins and evolution of period clothing in relation to social, political, and aesthetic factors of different periods.
THEA 308. Creative Writing: Playwriting  
3 Credits (3)  
Technique of one-act playwriting, and analysis of dramatic structure.  
Crosslisted with: ENGL 308  
Prerequisite(s): ENGL 1110G.

THEA 310. Styles in Acting  
3 Credits (3)  
Analysis of differing styles of acting through scene work representing  
varying time periods and genres. Consent of Instructor required. May be  
repeated up to 3 credits.  
Prerequisite: THEA 1221 or THEA 1210 with a C- or better.

THEA 311. Acting for Film and Television  
3 Credits (3)  
Specific techniques of acting for the camera are explored via hands-on  
experiential learning and an introduction to the business of the TV/Film  
industry  
Prerequisite(s): THEA 1210 or THEA 1221.

THEA 313. Improvisation  
3 Credits (3)  
Long and/or short form improvisation techniques in addition to a variety  
of exercises exploring terminology, character work and the elements of  
comedy.  
Prerequisite(s): THEA 1210 or THEA 1221.

THEA 317. Musical Theatre  
3 Credits (3)  
Acting class focused on developing and refining skills necessary for  
performing in musicals. May be repeated up to 9 credits.  
Prerequisite(s): THEA 1221 or THEA 1210 with a C- or better.

THEA 321V. Modern European Drama  
3 Credits (3)  
Masterworks of European drama from the 19th century to the present.  
Crosslisted with: ENGL 321V.

THEA 322. Dramatic Character  
3 Credits (3)  
How characters have been created for the stage from the beginning of  
theatrical performances in ancient Greece to the present day. Exploring  
characterization related to dramatic structure, style, and genre, and how  
dramatic characters differ from those in literary fiction. May be repeated  
up to 3 credits. Crosslisted with: ENGL 322.

THEA 323. American Drama  
3 Credits (3)  
Masterworks of American drama from the 20th century to the present.  
Crosslisted with: ENGL 323.

THEA 324. Singing for Musical Theatre  
3 Credits (3)  
Students will gain an understanding of stronger vocal health, aural skills,  
and rehearsal practice strategies as they work on musical theatre singing  
techniques and performances including solos, duets and small groups, and  
a final public showcase.  
Learning Outcomes  
1. The ability to practice strong vocal habits in order to independently  
maintain vocal health. Identify and utilize proper vocal warm-up  
techniques. Display an improved level of music reading and aural  
awareness. Analyze and break down a piece of theatrical music into  
components for focused learning. Perform pieces of music theatre  
both individually and in a group with increased ease

THEA 329. Studies in Drama  
3 Credits (3)  
Subtitles vary. Study of a group of related works of drama, theory, or  
theatre practice. Crosslisted with: ENGL 329 and FDMA 329.

THEA 330. Special Topics: Variable  
3 Credits (3)  
Specific subjects to be announced in the Schedule of Classes.  
Learning Outcomes  
1. To gain knowledge and/or skill in a specialty area of theatre

THEA 334. Introduction to Stage Makeup  
3 Credits (3)  
Basic principles of stage makeup: straight, character, and specialty.  
Includes study of various products, methods of application, and the  
effects of lighting on makeup.

THEA 337. Independent Study  
1-3 Credits (1-3)  
Students propose and design their own course not covered through  
regular course offerings under the guidance of faculty. Consent of  
Instructor required. May be repeated up to 6 credits.

THEA 341. Scene Painting  
3 Credits (3)  
Use of historical painting techniques in a project-driven classroom.  
Projects include 2-D and 3-D work, color mixing and theory, painting  
scenery, and the use of paint for effects.  
Prerequisite(s): THEA 2310.

THEA 343. Costume Patterning  
3 Credits (3)  
Basic techniques in the production of flat patterns for modern and period  
silhouettes including some draping techniques. Consent of Instructor  
required. May be repeated up to 3 credits.  
Learning Outcomes  
1. Advanced training in costume design; the ability to create an original  
pattern in order to be able to make a costume item that is original

THEA 345. Costume Practicum  
1 Credit (1)  
A practical course intended to provide students additional experience and  
greater responsibility within the workings of the Costume Shop. May be  
repeated up to 1 credits.  
Prerequisite(s): THEA 1310.

THEA 346. Scenic Practicum  
1 Credit (1)  
A practical course intended to provide students additional experience and  
greater responsibility within the workings of the Scene Shop. May be  
Prerequisite(s): THEA 2310.

THEA 347. Lighting Practicum  
1 Credit (1)  
A practical course intended to provide students hands-on experience  
executing theatrical lighting.

THEA 348. Running Crew III  
1 Credit (1)  
Students will work on a technical aspect of a production in a rehearsal  
and performance environment.  
Prerequisite(s): THEA 1415.
THEA 349. Running Crew IV
1 Credit
Students will work on a technical aspect of a production in a rehearsal and performance environment.
Prerequisite(s): THEA 1415.

THEA 352. Costume Design
3 Credits (3)
Basic principles of costume design, including script analysis, principles of design, drawing and painting.

THEA 353. Scene Design
3 Credits (3)
Design for the performing arts. Basic design skills and projects to exercise those skills, history of design in the theatre and the designer’s role in the production process. Final project includes a finished scene design.
Prerequisite: THEA 2310 or consent of instructor.

THEA 354. Sound Design
3 Credits (3)
Hands-on training in theatrical sound design and implementation.

THEA 355. Lighting Design
3 Credits (3)
Basic aspects of theatre lighting, including electricity, color theory, history, and types of lighting instruments.

THEA 356. Theatre Production
1-3 Credits
Participation in the production of theatrical performances by stage managing, acting, designing, dramaturgy, or directing. May be repeated for a maximum of 6 credits. Graded S/U.

THEA 357. Computer Scenographics
3 Credits (3)
Project-oriented course teaching basic computer modeling skills. Projects focus on the creation of communication tools designers use in the theatrical process. Students will develop portfolios of completed projects. Consent of instructor required.
Prerequisite(s): THEA 352, THEA 353, or THEA 355.

THEA 360. Creative Drama
3 Credits (2+2P)
Methods of developing original dramatizations. Emphasis on curriculum problems and teaching techniques in elementary and secondary schools.

THEA 366. Summer Theatre
1-3 Credits
Experience in professional or academic summer theatre. May be repeated for a maximum of 3 credits. Graded: S/U. Restricted to THTR majors.
Prerequisite(s): Consent of department head.

THEA 384. Stage Management
3 Credits (3)
Study of stage management techniques and their application to play production. A working knowledge of union rules, and the procedure to facilitate these through proper communication skills.

THEA 395. Directing I
3 Credits (3)
Study and application of basic stage directing techniques.
Prerequisite(s): THEA 1210 or THEA 1221.

THEA 408. Shakespeare I
3 Credits (3)
Study in Shakespeare’s early poems and plays. Repeatable for up to six credits under different subtitiles.
Learning Outcomes
1. Analyze Shakespeare's poetry using the methods of close reading; Demonstrate ability to read and develop persuasive literary-critical interpretations of Shakespeare's poems and plays; Demonstrate skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material; Work effectively in small groups to interpret a scene through performance.

THEA 409. Shakespeare II
3 Credits (3)
Study in Shakespeare’s later plays. ENGL 408 is not a prerequisite. Repeatable for up to six credits under different subtitiles. Crosslisted with ENGL 409.
Learning Outcomes
1. Analyze Shakespeare's poetry using the methods of close reading; Demonstrate ability to read and develop persuasive literary-critical interpretations of Shakespeare's poems and plays; Demonstrate skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material; Work effectively in small groups to interpret a scene through performance.

THEA 410. Advanced Acting: Contemporary Methods
3 Credits (3)
Acting techniques will be explored focusing on current trends in the profession, from Stanislavski, to Hagen to Meisner. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: THTR majors.
Prerequisite(s): THEA 1210 or THEA 1221.

THEA 417. Musical Theatre II
3 Credits (3)
A continuation of THEA 317, allowing for more advanced musical theatre techniques.
Prerequisite(s): THEA 317.

THEA 430. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 9 credits.

THEA 435. Directed Reading
1-3 Credits
Directed individualized studies. May be repeated for a maximum of 3 credits.

THEA 439. Senior Seminar
3 Credits (3)
Course preparing students for professions in and related to the theatre. Restricted to: THTR majors.
THEA 440. Senior Seminar Practicum
1 Credit (1)
Capstone course preparing students to apply knowledge of theatre arts toward advanced training or career objectives in the discipline. Consent of instructor required.
Prerequisite(s)/Corequisite(s): THEA 439. Restricted to THTR majors.
THEA 450. The Michael Chekhov Acting Intensive
3 Credits (3)
An intensive overview of the performance techniques attributed to Michael Chekhov, applied to theatrical scenes and presentations. May be repeated up to 6 credits. Consent of instructor required.
THEA 535. Directed Study
1-3 Credits (1-3)
For the highly motivated student. Independent projects and individual guidance. Graduate standing and consent of instructor required. May be repeated up to 6 credits.

THEA elective courses
Select one from the following: 3
- THEA 306 Script Analysis
- THEA 307V Society in Style: Fashion, History and Culture
- THEA 308 Creative Writing: Playwriting
- THEA 321V Modern European Drama
- THEA 322 Dramatic Character
- THEA 323 American Drama
- THEA 329 Studies in Drama

Select one from the following: 3
- THEA 352 Costume Design
- THEA 353 Scene Design
- THEA 354 Sound Design
- THEA 355 Lighting Design

Select 9 credits from THEA 300/400 level courses 9

Second Language Requirement: (not required)

Electives, to bring the total credits to 120 6

Total Credits 120

1 See the General Education (p. 88) section of the catalog for a full list of courses.
2 A Mathematics General Education course is required but students may need to take any prerequisites needed to enter the course selected first.
3 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.
4 Theatre majors must enroll in Theatre Workshop each semester.
THEA 2993 Theatre Workshop I for freshmen and sophomores and THEA 300 Theatre Workshop II for juniors and seniors; 2 credits total for each course equaling a total of 4 credits.
5 Courses from this category must not duplicate selections above.
6 Elective credit may vary based on General Education course selection, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
Second Language Requirement

For the Bachelor of Arts in Theatre Arts there is no second language requirement for the degree.

A Suggested Plan of Study

This roadmap assumes student placement in MATH 1130G Survey of Mathematics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

**Credits** 9.5

**Total Credits 120-122**

1 MATH 1130G Survey of Mathematics is suggested for the degree but students may need to take any prerequisites needed to enter MATH 210G first or any other General Education Mathematics course.
See the General Education (p. 88) section of the catalog for a full list of courses.

THEA 1221 Beginning Acting. THEA 2310 Stagecraft/ THEA 2310L Stagecraft Laboratory, THEA 1310 Introduction to Costuming/ THEA 1310L Costume Craft Lab can be taken in any order, but all five courses must be completed by the end of Year Two.

THEA 321V Modern European Drama will not count towards the Viewing a Wider World requirement.

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

## Theatre Arts (Musical Theatre) - Bachelor of Arts

The Musical Theatre concentration is designed to provide students with training in musical theatre performance, including singing, dancing and acting.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

- **MUSC 2993** | Opera Workshop | 6
- **MUSC 351** | Opera Workshop | 6
- **MUSC 361** | Concert Choir II | 6
- **MUSC 363** | Jazz Ensembles II | 6

### THEA 324 | Singing for Musical Theatre | 3

### Second Language Requirement: (not required)

### Electives, to bring the total credits to 120

1 See the General Education (p. 88) section of the catalog for a full list of courses.
A Mathematics General Education course is required but students may need to take any prerequisites needed to enter the course selected first.

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

Two of the required vocal credits may be in choral ensemble or opera workshop.

Elective credit may vary based on General Education course selection, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Second Language Requirement

For the Bachelor of Arts in Theatre Arts with a Concentration in Musical Theatre there is no second language requirement for the degree.

A Suggested Plan of Study

This roadmap assumes student placement in MATH 1130G Survey of Mathematics and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. <tr>
<th>Total Credits</th>
<th>120-124</th>
</tr>
</thead>
</table>

1. MATH 1130G Survey of Mathematics is suggested for the degree but students may need to take any prerequisites needed to enter MATH 1130G first or any other General Education Mathematics course.

2. See the General Education (p. 88) section of the catalog for a full list of courses.

3. THEA 1221 Beginning Acting, THEA 2310 Stagecraft/ THEA 2310L Stagecraft Laboratory, THEA 1310 Introduction to Costuming/ THEA 1310L Costume Craft Lab can be taken in any order, but all five courses must be completed by the end of Year Two.

4. Students must complete a total of 6 credits of THEA 324 Singing for Musical Theatre, MUSC 1992 Applied Music (2 credits can be fulfilled with MUSC 2120, MUSC 2993, MUSC 351, MUSC 361 Concert Choir II, or MUSC 369).

5. THEA 321V Modern European Drama will not count towards the Viewing a Wider World requirement.

6. See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

7. DANC Courses: (be mindful of course prerequisites when registering)
   - DANC 1130 Ballet I
   - DANC 1150 Modern Dance I
   - DANC 2130 Ballet II
   - DANC 2150 Modern Dance II
   - DANC 3130 Ballet III
   - DANC 3150 Modern Dance III

8. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may need to continue more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

**Theatre Arts - Undergraduate Minor**

The Department of Theatre Arts has one minor in Theatre Arts. Students must pass a minimum of 18 credits in consultation with a theatre department faculty member. NOTE: 9 credits must be 300 level and above. THEA credits must earn grades of C- or higher to earn the minor. A student cannot earn both a BA in Theatre Arts and a minor in Theatre Arts.

**College of Business**

Dean (Interim) - *Eileen Hogan*

Interim Associate Dean (Academics) - *Daniel James*

Interim Associate Dean (Research) - *Mary Jo Billiot*

**Mission of the College of Business**

The College of Business transforms lives by providing highly respected programs, instruction and scholarly activities that drive economic, social, educational and community development for New Mexico’s diverse population.

**Requirements for the Bachelor Degrees**

- Successful completion of the New Mexico General Education Requirements and NMSU Viewing a Wider World Courses.
- Successful completion of College of Business Requirements below and major requirements. For the Bachelor of Arts in Economics, see the Economics and International Business (p. 816) section for specific requirements.
- A minimum cumulative grade point average (GPA) of 2.0 in all courses taken at NMSU to meet lower and upper division business core and major requirements.
- All majors except Economics and International Business require a minimum cumulative GPA of 2.0 in all courses taken to meet the requirements of the major. For Economics and International Business majors, a minimum cumulative GPA of 2.5 is required for courses taken to meet the requirements for the major.
- A minimum of 50% of business credits required for a Bachelor of Accountancy or Bachelor of Business Administration degree or 18 business credits required for a Bachelor of Arts in Economics degree must be completed in the College of Business and a minimum of 12 credits required in the major must be completed in the College. See sections below for major-specific transfer criteria. A total of no more than six credits of courses designated as 300E may be used to satisfy the required upper division business elective, the ECON/A ST elective, and electives in the major.

The only courses that may be taken on an S/U option by students in the College of Business are those designated S/U only, general electives outside the college, and up to 9 credits of HNRS courses used to fulfill General Education requirements.

Before taking upper-division courses (numbered 300 or above) offered by the College of Business, students must complete all lower-division course requirements with the required minimum grades or better.

Upper division business course credits completed more than ten years prior to the degree application will be reviewed by the course department head and dean (or a designee) to determine their continued suitability.
to satisfy current degree, major and minor requirements and learning objectives.

1 Students may be required to take MATH 1215 Intermediate Algebra, depending on their math placement. MATH 1220G College Algebra or MATH 1430G Applications of Calculus I or MATH 1350G Introduction to Statistics fulfills the general education requirement in math.

2 See the General Education (p. 88) section of the catalog for a full list of courses.

3 A description of the requirement and a listing of approved VWW courses can be found in this catalog under Required Courses (p. 88).

4 All Foundation Requirement Courses must be taken, or satisfied with transfer credits, regardless of which Mathematics or Statistics course satisfies the Area II General Education course: MATH 1220G, MATH 1430G and MATH 1350G or A ST 311 must be completed.

5 Management - Project Supply Change majors may not use MGMT 470 Project Management in Organizations to satisfy this requirement since it is a requirement in the major; Accounting majors must take BCIS 485 Enterprise Resource Planning.

6 Major course credits and Elective credits vary based on the major chosen. Please see the departmental/major pages for specifics on the number of major and elective credits required: Economics (Bachelor of Arts) (p. 825); Accounting (p. 794); Economics (p. 827); Finance (p. 845); General Business (p. 858); Information Systems (p. 796); International Business (p. 832); Management (p. 855); Marketing (https://business.nmsu.edu/academic-programs/undergraduate-programs/marketing-undergraduate.html).

**Associate in Prebusiness Degree**

To complete the associate degree, 60 credits are required, including the General Education Requirements, College of Business Foundation and Business Core (lower division) requirements.

A minimum cumulative grade point average of 2.0 is also required. The last 15 credits towards the degree must be earned through the NMSU system.
Minors in Business

Minors are available in:

- accounting
- advertising
- banking and financial planning
- business administration
- business law
- economics
- enterprise systems
- entrepreneurship and innovation
- finance
- information systems
- international business
- management
- marketing
- professional selling
- risk management and insurance

Students pursuing the Bachelor of Individualized Studies or the Bachelor of Applied Studies are not eligible for minors from the College of Business other than the minor in business administration. At least 12 credits of the minor must be completed at the NMSU College of Business.

Preprofessional Programs

NMSU offers a number of programs designed for transfer to professional schools through its undergraduate colleges. The programs that are administered by the College of Business is Prelaw, it is also administered through the College of Arts and Sciences.

Prelaw Students

Law schools will accept undergraduates who have earned bachelor's degrees in any major. Many prelaw students take some law courses in their undergraduate program. The College of Arts and Sciences supervises a Supplementary Major in Law and Society, which includes courses from a number of departments and several colleges. It is described under “Government” in the Arts and Sciences chapter. The College of Business offers a number of Business Law courses which can be found under the prefix BLAW in the course description chapter later in this catalog. The Department of Philosophy in the College of Arts and Sciences offers both a major and a minor in Justice, Political Philosophy, and Law that cultivates a reasoned understanding of law and legal institutions, as well as the moral theories that support the value and justice of these institutions. The description of this major is found under the description "Philosophy."

Because the practice of law often involves business-related problems, the majors in the college provide an excellent preparation for the prelaw student. The college has attorneys on the faculty who are available as advisors. Please contact the Finance Department for more information.

Transferring Business Courses

The Transfer Course Equivalency Search tool found at https://miniapps.nmsu.edu/transfer/ serves as a general guide in evaluation of transfer courses. However, transferability and applicability to an NMSU business or accounting degree or minor is not guaranteed until review and approval by the College of Business. Generally, for upper division business courses taken elsewhere to fulfill the requirements of an upper division business or accounting "equivalent" course at NMSU, the transferring school must have been accredited by AACSB at the time the course was taken, or, if not, was regionally accredited and the course's content and rigor were comparable to the "equivalent" course offered at NMSU. Transfer students are encouraged to contact the Associate Academic Dean in the College of Business for content and rigor review of potential upper division transfer courses prior to or shortly after enrollment at NMSU.

Bachelors Degrees

Bachelor of Accountancy (p. 794)

Bachelor of Arts in Economics (p. 825)

Bachelor of Business Administration

- Small Business Management & Entrepreneurship (p. 868)
- Marketing (Online) (p. 876)
- Advertising (p. 878)
- PGA Golf Management (p. 880)
- Professional Selling (p. 881)
- Strategic Marketing (p. 882)

Master's Accelerated Program Information

The Master's Accelerated Program allows qualifying NMSU business students to complete four MBA courses while still an undergraduate and may count those courses toward both their undergraduate degree and the Master of Business Administration (MBA).

Up to 12 hours of course work can be applied toward the completion of the master's degree. To receive graduate credit for the 12 credit hours, students must receive a grade of B or higher. MAP courses completed with a grade of B- or lower are not eligible for graduate credit.

Student Qualifications

- The student must be classified as a Junior or Senior and may not have previously earned a Bachelor's Degree.
- The cumulative grade point average (GPA) must be a minimum of 3.75 to participate in the Junior Year.
- The cumulative grade point average (GPA) must be a minimum of 3.50 to participate in the Senior Year.
- Students may participate in this program if they have completed the following courses with grades of B or higher.

**Accreditation**

New Mexico State University has been accredited since 1926 by the Higher Learning Commission of the North Central Association of Colleges and Secondary Schools as a degree-granting institution. The university was accredited in 1954 by the American Association of University Women.

The baccalaureate and graduate degree programs in business and accounting offered in the College of Business are accredited by AACSB International—The Association to Advance Collegiate Schools of Business.
Business Administration - Undergraduate Minor

This minor is available to all bachelor’s degree seeking students, except those seeking the Bachelor of Accountancy and the Bachelor of Business Administration degrees. It is the only minor in Business open to students in the Bachelor of Applied Studies and the Bachelor of Individualized Studies. At least 12 of the credits for the minor must be completed in the NMSU College of Business.

Minor Requirements

Choose 18 credits of coursework from these business core courses: Nine of the credits must be at the upper division level.

1 Courses satisfy background knowledge requirements for the MBA program when completed with a B– grade or better.

2 Only one course may be applied to this minor.

Notes: A minimum GPA of 2.0 is required in the coursework for the minor.
Several courses listed above have prerequisites. It is the responsibility of the student to determine course prerequisites and other registration requirements.

Accounting and Information Systems

Undergraduate Program Information

The Bachelor of Accountancy degree is available to students choosing accounting as a major. The curriculum is designed to prepare you for the excellent opportunities that exist in public accounting practice and in business, government and nonprofit organizations. It is also appropriate for those who may choose to seek either the Master of Accountancy or the Master of Business Administration degree after graduation.

The Information Systems program has a focus on cyber security that prepares you for a variety of administrative and technical positions associated with the security of information systems. Potential employers include information system service organizations, public accounting/consulting firms, manufacturing and merchandising business, banks and other financial institutions, government and others that rely on information systems to support their business.

Graduate Program Information

The last two decades have witnessed a tremendous expansion in the knowledge base required for accounting professionals. The business environment has become increasingly complex, as evidenced by the growth in the body of national and international accounting and auditing standards, taxation, SEC and other regulatory requirements. The accountant must also be well versed in communications and analytical skills, computer-based information systems, professional ethics and global issues.

Neither the traditional four-year accounting program nor the MBA provides the educational breadth and depth necessary to fully prepare students for the demands now imposed by many accounting careers. The major objective of the Master of Accountancy (MAcc) program is to provide for these increased educational needs and to prepare students more adequately for careers as professional accountants in financial institutions, government, not-for-profit organizations and public practice. The program is designed to provide a technical and theoretical foundation in accountancy at the advanced level and yet allow the student to take courses to accommodate individual needs.

ACCT 101. Supplemental Instruction to ACCT 221
1 Credit (1)
Collaborative workshop for students in ACCT 221 – Financial Accounting. Course does not count toward departmental degree requirements. May be repeated up to 2 credits. Restricted to Las Cruces campus only.
Corequisite(s): ACCT 221.

ACCT 200. A Survey of Accounting
3 Credits (3)
Emphasis on financial statement interpretation and development of accounting information for management. For engineering, computer science, and other non business majors. Community Colleges only.
Prerequisite: one C S course or consent of instructor.

ACCT 2110. Principles of Accounting I
3 Credits (3)
An introduction to financial accounting concepts emphasizing the analysis of business transactions in accordance with generally accepted accounting principles (GAAP), the effect of these transactions on the financial statements, financial analysis, and the interrelationships of the financial statements.
Learning Outcomes
1. Analyze business transactions, their effects on the financial statements and the interrelationships of the financial statements involving the following: Cash transactions; Receivables and Net Realizable Value; Operational Assets and Depreciation; Inventory; Current Liabilities; Long-term Liabilities
2. Define, identify and demonstrate the impact of adjusting entries on financial statements.
3. Explain and demonstrate the differences between cash and accrual basis accounting.
4. Define and identify generally accepted accounting principles.

ACCT 2120. Principles of Accounting II
3 Credits (3)
An introduction to the use of accounting information in the management decision making processes of planning, implementing, and controlling business activities. In addition, the course will discuss the accumulation and classification of costs as well as demonstrate the difference between costing systems.
Prerequisite(s): ACCT 2110.
Learning Outcomes
1. Identify the differences between financial and managerial accounting.
2. Illustrate the accumulation of costs in cost accounting systems.
3. Describe the basic elements of the budgeting process, its objectives and budget preparation.
4. Define and classify cost behavior.
5. Perform cost-volume-profit analysis for decision-making.
6. Perform differential (incremental) analysis for business decision making.
7. Explain the cause of the variance and its effect on the income statement.
8. Explain and demonstrate the difference between traditional costing and activity-based costing.

ACCT 301. Financial Accounting I
3 Credits (3)
Concepts, principles, and practices of financial accounting, stressing the determination of income and financial position. A student who does not pass the class within three attempts will not be allowed to take class for a fourth.
Prerequisite(s): C or better in ACCT 2110 or (OATS 120 and OATS 121) and ACCT 2120.

ACCT 302. Financial Accounting II
3 Credits (3)
A continuation of ACCT 301.
Prerequisite(s): C or better in ACCT 301.

ACCT 351. Accounting Systems
3 Credits (3)
Covers accounting information systems as processors of data for financial reporting and control of economic organizations.
Prerequisite(s): C or better in ACCT 2110 or (OATS 120 and OATS 121) and ACCT 2120.

ACCT 353. Cost Accounting
3 Credits (3)
The development and use of cost accounting information for inventory valuation, income determination, and cost control. A student who does not pass the class within three attempts will not be allowed to take class for a fourth.
Prerequisite(s): C or better in ACCT 2110 or (OATS 120 and OATS 121) and ACCT 2120.

ACCT 403. Federal Taxation I
3 Credits (3)
Basic federal income tax laws; emphasis on determination of taxable income of individuals. A student who does not pass the class within three attempts will not be allowed to take class for a fourth.
Prerequisite(s): C or better in ACCT 2110 or (OATS 120 and OATS 121) and ACCT 2120.
ACCT 451. Auditing Theory and Practices
3 Credits (3)
Auditing standards, audit evidence, auditors reports and opinions, and professional responsibilities.
Prerequisite(s): ACCT 351 and C- or better in ACCT 302.

ACCT 455. Federal Taxation II
3 Credits (3)
Federal income tax laws applicable to partnerships, corporations, fiduciaries, tax research, tax planning.
Prerequisite(s): C- or better in ACCT 403 or consent of instructor.

ACCT 456. Accounting for Nonprofit Organizations
3 Credits (3)
Control and reporting problems unique to governmental units and other nonprofit organizations. Fund accounting principles, procedures, and reports.
Prerequisite(s): C- or better in ACCT 302.

ACCT 458. Accounting Data Analytics
3 Credits (3)
Data Analytics in financial and managerial accounting and auditing. Restricted to: Accounting majors.
Prerequisite(s): C- or Better in ACCT 301, ACCT 302, and ACCT 351.

ACCT 460. Fraud Examination and Prevention
3 Credits (3)
Covers business fraud as it is occurring in American society. Emphasis is on occupational fraud and financial statement fraud. Examines various types of fraud, its symptoms and effective investigation techniques. Effective fraud prevention measures are discussed throughout the course. Emphasizes case studies and the application of principles to actual fraud cases.
Prerequisites: A C- or better in ACCT 451 or concurrent enrollment.

ACCT 490. Selected Topics
1-3 Credits
Current topics in accounting. Prerequisites vary according to the seminar offered. May be repeated for a maximum of 12 credits under different subtitles.

ACCT 498. Independent Study
1-3 Credits
Individual studies directed by consenting faculty with the prior approval of the department head. May be repeated up to 3 credits. Consent of Instructor required.
Prerequisite(s): Consent of instructor.

ACCT 500. Concepts in Accounting
1 Credit (1)
Development, interpretation, and use of accounting information for financing, investing, operating, and managerial decision making.
Prerequisite(s): Admitted to MBA program.

ACCT 503. Accounting for Managers
3 Credits (3)
Concepts and principles of financial and managerial accounting. Presents techniques used to measure business transactions, prepare financial statements, techniques for management decision-making, planning, and control. Not open to MAcc students.
Prerequisite(s): B or better in both ACCT 2110 or (OATS 120 and OATS 121) and ACCT 2120.

ACCT 510. Technical and Professional Communication for Accountants
3 Credits (3)
Effective writing strategies for professional communications. Students will learn to write with a professional style and proper English usage and to work with a variety of technical and lay audiences. Emphasis on initiation, planning, composition, and evaluation of business and accounting workplace scenarios to develop communication skills used in a business environment. Restricted to: Master of Accountancy majors.

ACCT 530. Advanced Accounting
3 Credits (3)
This course is designed to provide in-depth study of current financial accounting concepts related to business combinations, financial statement consolidations, and foreign currency transactions and translations. Restricted to: Master of Accountancy majors.
Prerequisite(s): ACCT 302 with a grade of C or better.

ACCT 544. Financial Statement Analysis and Valuation
3 Credits (3)
Valuation of firms using financial information, financial statement analysis, and the valuation of individual assets and liabilities. Restricted to: Master of Accountancy majors.
Prerequisite(s): Acct 302; Graduate students only.

ACCT 550. Special Topics
3 Credits (3)
Seminars in current topics in various areas of accounting including financial, managerial, auditing, taxation, systems, and fund accounting. Prerequisites vary according to topic being offered.

ACCT 551. Advanced Auditing Theory and Practice
3 Credits (3)
Understanding and evaluating internal control in an EDP environment. Statistical sampling applications and current issues in auditing. Restricted to: Master of Accountancy majors.
Prerequisite(s): ACCT 451.

ACCT 555. Federal Tax Research
3 Credits (3)
Tax research methodology including case materials, critical judicial decisions, journal articles, and research services. Emphasis on tax planning. Restricted to: Master of Accountancy majors.
Prerequisite(s): ACCT 403.

ACCT 559. Ethics and Professionalism in Accounting
3 Credits (3)
Introduction to ethical reasoning, integrity, objectivity, independence, and professional accounting issues Students will apply the concepts and theories to accounting-specific cases. Restricted to: Master of Accountancy majors.
Prerequisite(s): C or better in ACCT 451.

ACCT 560. Taxation of Corporations and Shareholders Advanced
3 Credits (3)
Effects of taxation on the organization, operation, and reorganization of corporations and on their shareholders. Restricted to: Master of Accountancy majors.
Prerequisite(s): ACCT 403.

ACCT 564. Financial Accounting Research
3 Credits (3)
Interpretation and application of accounting principles to financial reporting issues of business and nonbusiness organizations. Consent of Instructor required. Restricted to: Master of Accountancy majors.
Prerequisite(s): ACCT 302.
ACCT 570. Taxation of Partnerships
3 Credits (3)
Taxation of partnership contributions and distributions, transfer of partnership interests, and allocations of partnership income. Also includes taxation of S corporations. Restricted to: Master of Accountancy majors.
Prerequisite(s): ACCT 403.

ACCT 580. Professional Accountancy
3 Credits (3)
Prepares students for the accounting profession and professional certification through study of a wide range of topics similar to those a student might encounter in their first year of employment. Restricted to: Master of Accountancy majors.

ACCT 598. Independent Study
1-3 Credits
Individual studies directed by consenting faculty with prior approval of the department head. A maximum of 3 credits may be earned.
Prerequisite: consent of instructor.

ACCT 599. Master's Thesis
15 Credits
Thesis.

Accounting - Bachelor of Accountancy
Every candidate for the Bachelor of Accountancy degree must fulfill the following requirements in addition to the General Education, Viewing a Wider World requirements, College of Business Foundation and the Business Core Courses, and Electives.

In order to count toward the Bachelor of Accountancy, upper-division transfer courses in accounting
1. must have been taken at an institution with AACSB Accounting accreditation or
2. be part of the New Mexico Business Articulation Matrix.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

ACCT 302 | Financial Accounting II | 3 |
A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

<td>120</td>
</tr>
</tbody>
</table>

Total Credits

MATH 1220G College Algebra is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G.

All Foundation Requirement Courses must be taken, or satisfied with transfer credits, regardless of which Mathematics or Statistics course satisfies the Area II: General Education course or the General Education Elective requirements: MATH 1220G, MATH 1430G and MATH 1350G or A ST 311 must be completed.

See the General Education (p. 88) section of the catalog for a full list of courses.

See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses and how to fulfill this requirement.

A student who does not pass ACCT 301 Financial Accounting I, ACCT 353 Cost Accounting, or ACCT 403 Federal Taxation I within three attempts will not be allowed to take the class for a fourth.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

1 These courses have prerequisites and it is the student’s responsibility for checking and fulfilling all course prerequisites listed for these courses.

2 See the General Education (p. 88) section of the catalog for a full list of courses.

3 Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

4 See the Viewing a Wider World (p. 92) section of the catalog for a full list of courses.

5 Information Systems Elective Courses:
   - BCIS 466 Business Analytics II, BCIS 480 E-Commerce Security, BCIS 490 Selected Topics
   - ICT 339 Introduction to Digital Forensics and Incident Response, ICT 377 Computer Networking I, ICT 477 Computer Networking II

**Information Systems - Bachelor of Business Administration (Online)**

Every candidate for this major must fulfill the following requirements in addition to the general education common core, College of Business foundation and business core (p. 787), Viewing a Wider World requirements and general electives.

Please note that some of the courses listed may have a prerequisite which would require a student to take an additional course. Substitutions for some of these courses may be considered if a student makes this request to the department.

**Course Requirements**

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

- BCIS 490 | Selected Topics |

Total Credits 18

Accounting - Master of Accountancy

The Master of Accountancy program (MAcc) is recommended for students wishing to fulfill the Certified Public Accountant (CPA) 150-hour education requirement which most states, including New Mexico, have adopted.

Admission Requirements

Admission requirements of the NMSU Graduate School must be met before the applicant may be admitted to the MAcc program.

Consideration for admission to the MAcc program is dependent on an applicant’s undergraduate record. The Graduate Management Admissions Test (GMAT) is also required, unless the student meets one of the GMAT waiver conditions listed below:

1. The student graduated with an undergraduate degree in accounting from a US AACSB accredited business school with at least a 3.25 GPA overall and a 3.25 GPA in their upper division accounting courses; or
2. The student is a graduate of NMSU’s undergraduate accounting program with at least a 3.25 GPA overall and a 3.0 GPA in core upper division accounting classes; or
3. The student holds a recognized professional accounting credential (such as a CPA, CMA, CIA, CFE); or
4. The student holds a post baccalaureate degree (such as an MBA, MS, MA, JD) from an approved, US AACSB-accredited university with a minimum 3.0 GPA in graduate course work.

In addition to the aforementioned entrance requirements, an applicant’s GPA in accounting prerequisites must be at least 3.0. For those students not receiving their undergraduate accounting degree at NMSU, it is expected that substantially all of the accounting prerequisite classes be from a US AACSB accredited business school or the application will need to be approved by the MAcc Admissions Committee. In this case the Admissions Committee may require that some of these prerequisite courses be retaken at an US AACSB institution such as NMSU.

Accounting Prerequisites (18 Credits)

Each applicant must complete, at a minimum, the following 18 credits of accounting courses from a US AACSB accredited business school prior to being considered as a candidate for the Master of Accountancy degree:

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Title</th>
<th>Credits</th>

<td>Auditing Theory and Practices</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 18

No coursework applied toward the MAcc degree, including the prerequisite requirements, may be taken on an S/U basis.

Master of Accountancy Requirements

Candidates with an undergraduate degree in accounting must successfully complete a minimum of 30 graduate credits. Candidates with an undergraduate degree in a field other than accounting must complete additional prerequisites upon previous courses taken.

Business Administration
Graduate Program Information

The business and accounting programs at NMSU, including the MBA program, are accredited by AACSB International - The Association to Advance Collegiate Schools of Business.

The Master of Business Administration (MBA) program is a professional program designed to provide students with a solid background in business practices and the problem-solving and people skills needed to become successful leaders in the global business environment. Program graduates are prepared for administrative or managerial positions in a wide variety of organizations, both private and governmental. The MBA program is offered in a traditional classroom with some online delivery and in a cohort-based distance program with a synchronous online component. Details are available at http:\business.nmsu.edu/mba (http://business.nmsu.edu/mba/).

The Ph.D. program in Business Administration offers the opportunity to specialize in either Marketing or Management.

Degrees for the Department

Business Administration - Master of Business Administration (p. 804)
Business Administration - Master of Business Administration (Online) (p. 806)
### Business Administration Courses

**B A 105. Special Topics**

1-3 Credits

Current topics in business and economics.

**B A 291. Business Administration and Economics Internship and Cooperative Education I**

1-3 Credits

Introduction and applications of the principles of business administration and economics. Registration in one course allowed per co-op work phase; a minimum of 12 work weeks is required. Open only to students in the College of Business. Option of S/U or a grade. The amount of academic credit (1-3 cr.) will be determined by the academic experience, and not by the work experience.

**B A 305. Leadership Training for COB Ambassadors**

1 Credit (1)

Leadership development for volunteers serving as COB student ambassadors, focusing on COB undergraduate business degree programs, NMSU student services, public speaking and public relations.

**B A 391. Business Administration and Economics Internship and Cooperative Education II**

1-3 Credits

Applications of the principles of business administration and economics. Registration in one course allowed per co-op work phase; a minimum of 12 work weeks is required. Open only to students in the College of Business. Option of S/U or a grade. The amount of academic credit (1-3 cr.) will be determined by the academic experience and not by the work experience.

**B A 490. Selected Topics**

3 Credits (3)

Prerequisites vary according to the seminar being offered.

**B A 498. Independent Study**

1-3 Credits

Individual studies directed by consenting faculty with the prior approval of the department head. A maximum of 3 credits may be earned.

**Prerequisite:** junior or above standing and consent of instructor.

**B A 500. Macroeconomic Essentials**

1 Credit (1)

Macroeconomic theory and public policy, national income concepts, unemployment, inflation, economic growth and international payment problems. Restricted to: MBA Major majors majors.

**B A 501. Quantitative Tools for the MBA**

1 Credit (1)

An overview of critical topics in math and statistics that will provide a quantitative foundation for students entering the Master of Business Administration program. Admission to the MBA program.
B A 545. Business Ethics
3 Credits (3)
Understanding of business ethics, social responsibilities of business organizations, and personal codes of conduct. Complexities of moral reasoning and principles of ethical behavior.

B A 550. Special Topics
3 Credits (3)
Interdisciplinary seminar in selected current business topics.
Prerequisite(s): Prerequisites vary according to the seminar being offered.

B A 590. Professional Paper/Presentation
3 Credits (3)
Paper written in close coordination with sponsoring professor and presented near the end of the student’s final semester in the M.B.A. program. The paper will consist of a professional business report, a case study of a business or organization or a research report. Restricted to: MBA majors.
Prerequisite(s): Minimum of 3.0 average in: ACCT 503, BLAW 502, BFIN 503, and MKTG 503 or AEEC 551.

B A 598. Special Research Programs
1-3 Credits
Individual investigations either analytical or experimental. A maximum of 3 credits may be earned.
Prerequisite: consent of instructor.

B A 599. Master's Thesis
15 Credits
Thesis.

Business Administration - Master of Business Administration

The Master of Business Administration (MBA) program is a professional program designed to provide students with a solid background in business practices and the problem-solving and people skills needed to become successful leaders in the global business environment. Program graduates are prepared for administrative or managerial positions in a wide variety of organizations, both private and governmental. The business and accounting programs at NMSU, including the MBA program, are accredited by AACSB International - The Association to Advance Collegiate Schools of Business.

The MBA program is offered in a traditional classroom with some online delivery and in a cohort-based distance program with a synchronous online component.

Details are available at http://business.nmsu.edu/mba/.

Admissions

Applicants must meet the basic admission requirements of the Graduate School before they are considered for admission to the MBA program. To be considered for admission to the MBA program, applicants must meet one of the following criteria:

1. Have an undergraduate degree with a GPA of at least 3.0 from a regionally accredited U.S. College or University; or
2. Have achieved a minimum Graduate Management Admission Test (GMAT) score of 400 and a combined GMAT score and undergraduate GPA such that (GPA x 200) + GMAT is greater than or equal to 1050; or
3. Have a graduate degree from a regionally accredited U.S. college or university; or
4. Have a Professional Certification in one of the following: Certified Public Accountant (CPA); Certified Management Account (CMA); Chartered Financial Analyst (CFA); Certified Financial Planner (CFP); or Project Management Professional (PMP) with an official copy of the certificate; or
5. Have completed at least five years of relevant, full-time, post-degree, professional work experience with an undergraduate GPA of at least 2.50 from a regionally accredited U.S. college or university.

As an alternative to the GMAT, students may submit a GRE score which can be converted to the equivalent GMAT score. (Information about the GRE can be found at www.mba.com.) If a GMAT score is required, the official score must be submitted to the MBA Program Office at least one month prior to initial enrollment in the program. GRE scores are sent directly to the NMSU Graduate School.

A maximum of 9 credit hours of the required MBA courses may be completed prior to the student’s acceptance into the MBA degree program.

Note: Regardless of the pathway to admission, all students must have an undergraduate degree and complete the Background Knowledge courses with a grade of "B" or better in each course.

Background Knowledge

Although the MBA program is designed to encourage participation by students with a variety of educational backgrounds, the curriculum is fast paced. As a consequence, a minimum level of background knowledge is expected of all entering students, and those who lack the necessary background in any of the knowledge areas will be required to make up their deficiencies early in the program. Students may complete no more than 9 credits of required MBA courses prior to completion of the background knowledge courses.

Background knowledge may be demonstrated by successful completion (with a grade of A or B) of undergraduate courses in managerial accounting, financial accounting, macroeconomics, finance, statistics and calculus. At NMSU, the relevant courses are
The following course sequencing requirements must be satisfied:

1. B A 590 Professional Paper/Presentation must be completed during the final term of the student's program and is only open to students who have been accepted into the MBA degree program. ACCT 503 Accounting for Managers, BLAW 502 Legal Environment of Business, BFIN 503 Financial Management and MKTG 503 Marketing Management must be completed prior to enrollment in B A 590 Professional Paper/Presentation.
2. MGMT 590 Strategic Management must be completed at the end of the student's program of study and is only open to students who have been accepted into the MBA degree program. All MBA coursework other than B A 590 Professional Paper/Presentation must be completed prior to or during the same term as MGMT 590 Strategic Management.

Students requesting transfer credit for any graduate courses taken before admission to the MBA program must submit appropriate written justification, including course descriptions, syllabi, transcripts, etc. Up to nine credits of transfer work can be applied to meet MBA requirements if the credits were earned in a program accredited by AACSB International. Transfer credits for courses taken after admission to the program are generally not permitted, but advance approval should be requested and may be granted in exceptional situations.

**Final Examination for the Degree:**

A student may satisfy the Graduate School's requirement for a final exam by completing the General MBA Degree's necessary coursework and supplemented or modified requirements for the concentration selected. The following two criteria must be met by the end of their final semester or at the end of a subsequent semester during which graduate-level courses are taken or retaken to meet the specified cumulative GPA.

1. The student must have a minimum cumulative GPA of 3.0 based on all courses taken as a graduate student at NMSU, including those taken as part of the MBA program (required courses, elective course(s), and courses to fulfill the requirements of an MBA concentration or approved course substitution).

2. The student must complete all required courses (36 credit hours) with a minimum cumulative GPA of 3.0 for the General MBA (11 required courses and 1 elective course, approved course substitutions, and any approved transfer courses).

A student who fails to meet one or both previous criteria may, during one or more subsequent semesters, take or retake additional graduate-level or MBA-specific courses to increase the cumulative GPA, thereby satisfying the Graduate School's requirement for a final exam.

**Note 1:** The General MBA program (excluding concentrations) consists of eleven required courses and one elective course (totaling 36 credits). The MBA elective course consists of 1 graduate business elective (numbered 500 or above) as listed on the MBA web page.

**Note 2:** The College of Business reserves the right to change the published requirements. Any such changes will be announced and will not be retroactive. Currently, MBA courses are offered once each year except for the elective and some concentration courses. Always consult an academic advisor or department head before registering for classes.

A thesis is not required. With special approval, however, a degree candidate may elect to write a thesis with at least 6 credit hours earned under B A 599 (https://catalogs.nmsu.edu/search/?P=B%A%20599) Master's Thesis in lieu of B A 590 (https://catalogs.nmsu.edu/search/?P=B%A%20590) Professional Paper/Presentation.

**Concentrations:** Students in the on-campus MBA program may elect to pursue one of several MBA concentrations:

- Agribusiness (p. 807)
- Finance (p. 808)
- Heath Services Management
- Information Systems (p. 811)
- Public Utility Regulation (p. 813)
Business Administration - Master of Business Administration (Online)

The Master of Business Administration (MBA) program is a professional program designed to provide students with a solid background in business practices and the problem-solving and people skills needed to become successful leaders in the global business environment. Program graduates are prepared for administrative or managerial positions in a wide variety of organizations, both private and governmental. The business and accounting programs at NMSU, including the MBA program, are accredited by AACSB International - The Association to Advance Collegiate Schools of Business.

The MBA program is offered in a traditional classroom with some online delivery and in a cohort-based distance program with a synchronous online component.

Details are available at http://business.nmsu.edu/mba (http://business.nmsu.edu/mba/).

Admissions

Applicants must meet the basic admission requirements of the Graduate School before they are considered for admission to the MBA program. To be considered for admission to the MBA program, applicants must meet one of the following criteria:

1. Have an undergraduate degree with a GPA of at least 3.0 from a regionally accredited U.S. College or University; or
2. Have achieved a minimum Graduate Management Admission Test (GMAT) score of 400 and a combined GMAT score and undergraduate GPA such that (GPA x 200)+ GMAT is greater than or equal to 1050; or
3. Have a graduate degree from a regionally accredited U.S. college or university; or
4. Have a Professional Certification in one of the following: Certified Public Accountant (CPA); Certified Management Account (CMA), Chartered Financial Analyst (CFA), Certified Financial Planner (CFP), or Project Management Professional (PMP) with an official copy of the certificate; or
5. Have completed at least five years of relevant, full-time, post-degree, professional work experience with an undergraduate GPA of at least 2.50 from a regionally accredited U.S. college or university.

As an alternative to the GMAT, students may submit a GRE score which can be converted to the equivalent GMAT score. (Information about the GMAT can be found at www.mba.com.) If a GMAT score is required, the official score must be submitted to the MBA Program Office at least one month prior to initial enrollment in the program. GRE scores are sent directly to the NMSU Graduate School.

A maximum of 9 credit hours of the required MBA courses may be completed prior to the student’s acceptance into the MBA degree program.

Note: Regardless of the pathway to admission, all students must have an undergraduate degree and complete the Background Knowledge courses with a grade of "B" or better in each course.

Background Knowledge

Although the MBA program is designed to encourage participation by students with a variety of educational backgrounds, the curriculum is fast paced. As a consequence, a minimum level of background knowledge is expected of all entering students, and those who lack the necessary background in any of the knowledge areas will be required to make up their deficiencies early in the program. Students may complete no more than 9 credits of required MBA courses prior to completion of the background knowledge courses.

Background knowledge may be demonstrated by successful completion (with a grade of A or B) of undergraduate courses in managerial accounting, financial accounting, macroeconomics, finance, statistics and calculus. At NMSU, the relevant courses are

1 This elective must be selected from the approved course list on the MBA web page.

The Graduate School requires that students maintain a minimum cumulative GPA of 3.0 in all courses taken as a graduate student at NMSU. The MBA program requires, in addition, that every candidate for the MBA degree must graduate with at least a minimum cumulative GPA of 3.0 in all courses required for the General MBA degree.

The following course sequencing requirements must be satisfied:

1. B A 590 Professional Paper/Presentation must be completed during the final term of the student's program and is only open to students who have been accepted into the MBA degree program. ACCT 503 Accounting for Managers, BLAW 502 Legal Environment of Business, BFIN 503 Financial Management and MKTG 503 Marketing Management must be completed prior to enrollment in B A 590 Professional Paper/Presentation.

2. MGMT 590 Strategic Management must be completed at the end of the student's program of study and is only open to students who have been accepted into the MBA degree program. All MBA
coursework other than B A 590 Professional Paper/Presentation must be completed prior to or during the same term as MGMT 590 Strategic Management.

Students requesting transfer credit for any graduate courses taken before admission to the MBA program must submit appropriate written justification, including course descriptions, syllabi, transcripts, etc. Up to nine credits of transfer work can be applied to meet MBA requirements if the credits were earned in a program accredited by AACSB International. Transfer credits for courses taken after admission to the program are generally not permitted, but advance approval should be requested and may be granted in exceptional situations.

Final Examination for the Degree:

A student may satisfy the Graduate School’s requirement for a final exam by completing the General MBA Degree’s necessary coursework and supplemented or modified requirements for the concentration selected. The following two criteria must be met by the end of their final semester or at the end of a subsequent semester during which graduate-level courses are taken or retaken to meet the specified cumulative GPA.

(1) The student must have a minimum cumulative GPA of 3.0 based on all courses taken as a graduate student at NMSU, including those taken as part of the MBA program (required courses, elective course(s), and courses to fulfill the requirements of an MBA concentration or approved course substitution).

(2) The student must complete all required courses (36 credit hours) with a minimum cumulative GPA of 3.0 for the General MBA (11 required courses and 1 elective course, approved course substitutions, and any approved transfer courses).

A student who fails to meet one or both previous criteria may, during one or more subsequent semesters, take or retake additional graduate-level or MBA-specific courses to increase the cumulative GPA, thereby satisfying the Graduate School’s requirement for a final exam.

Note 1: The General MBA program (excluding concentrations) consists of eleven required courses and one elective course (totaling 36 credits). The MBA elective course consists of 1 graduate business elective (numbered 500 or above) as listed on the MBA web page.

Note 2: The College of Business reserves the right to change the published requirements. Any such changes will be announced and will not be retroactive. Currently, MBA courses are offered once each year except for the elective and some concentration courses. Always consult an academic advisor or department head before registering for classes.

A thesis is not required. With special approval, however, a degree candidate may elect to write a thesis with at least 6 credit hours earned under B A 599 (https://catalogs.nmsu.edu/search/?P=B%20A%20599) Master’s Thesis in lieu of B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) Professional Paper/Presentation.

Students in the on-campus MBA program may elect to pursue a concentration in Agribusiness and must take the following set of five AEEC courses in substitution of four courses included in the above list of required MBA courses.

Students in the concentration in Agribusiness who have not previously taken a course in Agricultural Policy will be required to take AEEC 545 Advanced Agricultural Policy prior to taking the five concentration courses.

Business Administration (Finance) - Master of Business Administration

Program Requirements (36 credits)
The MBA program consists of twelve courses beyond the background knowledge requirements (p. 804). Eleven are required courses:

Total Credits 15

Students in the concentration in Agribusiness who have not previously taken a course in Agricultural Policy will be required to take AEEC 545 Advanced Agricultural Policy prior to taking the five concentration courses.

1. B A 590 Professional Paper/Presentation must be completed during the final term of the student’s program and is only open to...
students who have been accepted into the MBA degree program. ACCT 503 Accounting for Managers, BLAW 502 Legal Environment of Business, BFIN 503 Financial Management and MKTG 503 Marketing Management must be completed prior to enrollment in B A 590 Professional Paper/Presentation.

2. MGMT 590 Strategic Management must be completed at the end of the student's program of study and is only open to students who have been accepted into the MBA degree program. All MBA coursework other than B A 590 Professional Paper/Presentation must be completed prior to or during the same term as MGMT 590 Strategic Management.

Students requesting transfer credit for any graduate courses taken before admission to the MBA program must submit appropriate written justification, including course descriptions, syllabi, transcripts, etc. Up to nine credits of transfer work can be applied to meet MBA requirements if the credits were earned in a program accredited by AACSB International. Transfer credits for courses taken after admission to the program are generally not permitted, but advance approval should be requested and may be granted in exceptional situations.

Final Examination for the Degree: A student may satisfy the Graduate School's requirement for a final exam by completing the General MBA Degree's necessary coursework and supplemented or modified requirements for the concentration selected. The following two criteria must be met by the end of their final semester or at the end of a subsequent semester during which graduate-level courses are taken or retaken to meet the specified cumulative GPA.

(1) The student must have a minimum cumulative GPA of 3.0 based on all courses taken as a graduate student at NMSU, including those taken as part of the MBA program (required courses, elective course(s), and courses to fulfill the requirements of an MBA concentration or approved course substitution).

(2) The student must complete all required courses (36 credit hours) with a minimum cumulative GPA of 3.0 for the General MBA (11 required courses and 1 elective course, approved course substitutions, and any approved transfer courses).

A student who fails to meet one or both previous criteria may, during one or more subsequent semesters, take or retake additional graduate-level or MBA-specific courses to increase the cumulative GPA, thereby satisfying the Graduate School's requirement for a final exam.

Note 1: The General MBA program (excluding concentrations) consists of eleven required courses and one elective course (totaling 36 credits). The MBA elective course consists of 1 graduate business elective (numbered 500 or above) as listed on the MBA web page.

Note 2: The College of Business reserves the right to change the published requirements. Any such changes will be announced and will not be retroactive. Currently, MBA courses are offered once each year except for the elective and some concentration courses. Always consult an academic advisor or department head before registering for classes.

A thesis is not required. With special approval, however, a degree candidate may elect to write a thesis with at least 6 credit hours earned under B A 599 (https://catalogs.nmsu.edu/search/?P=B%20A%20599) Master's Thesis in lieu of B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) Professional Paper/Presentation.

Students in the on-campus MBA program may elect to pursue a concentration in Finance. To fulfill this concentration, a student must take BFIN 535 and three additional 500-level BFIN courses (excluding BFIN 503 which is a required course for the General MBA) for a total of 12 credits. These courses can be used as substitutes for MGMT 512 (https://catalogs.nmsu.edu/search/?P=MGMT%20512) Quantitative Analysis for Business Decisions and B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) Professional Paper/Presentation.

1 This elective must be selected from the approved course list on the MBA web page.

The Graduate School requires that students maintain a minimum cumulative GPA of 3.0 in all courses taken as a graduate student at NMSU. The MBA program requires, in addition, that every candidate for the MBA degree must graduate with at least a minimum cumulative GPA of 3.0 in all courses required for the General MBA degree.

The following course sequencing requirements must be satisfied:

1. B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) Professional Paper/Presentation must be completed during the final term of the student’s program and is only open to students who have been accepted into the MBA degree program. ACCT 503 (https://catalogs.nmsu.edu/search/?P=ACCT%20503) Accounting for Managers, BLAW 502 (https://catalogs.nmsu.edu/search/?P=BLAW%20502) Legal Environment of Business, BFIN 503 (https://catalogs.nmsu.edu/search/?P=BFIN%20503) Financial Management and MKTG 503 (https://catalogs.nmsu.edu/search/?P=MGMT%20503) Marketing Management must be completed prior to enrollment in B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) Professional Paper/Presentation.

2. MGMT 590 (https://catalogs.nmsu.edu/search/?P=MGMT%20590) Strategic Management must be completed at the end of the student’s program of study and is only open to students who have been
accepted into the MBA degree program. All MBA coursework other than B A 590 ([https://catalogs.nmsu.edu/search/?P=B%20A%20590](https://catalogs.nmsu.edu/search/?P=B%20A%20590)) Professional Paper/Presentation must be completed prior to or during the same term as MGMT 590 ([https://catalogs.nmsu.edu/search/?P=MGMT%20590](https://catalogs.nmsu.edu/search/?P=MGMT%20590)) Strategic Management.

Students requesting transfer credit for any graduate courses taken before admission to the MBA program must submit appropriate written justification, including course descriptions, syllabi, transcripts, etc. Up to nine credits of transfer work can be applied to meet MBA requirements if the credits were earned in a program accredited by AACSB International. Transfer credits for courses taken after admission to the program are generally not permitted, but advance approval should be requested and may be granted in exceptional situations.

**Final Examination for the Degree:** A student may satisfy the Graduate School’s requirement for a final exam by completing the General MBA Degree’s necessary coursework and supplemented or modified requirements for the concentration selected. The following two criteria must be met by the end of their final semester or at the end of a subsequent semester during which graduate-level courses are taken or retaken to meet the specified cumulative GPA.

1. The student must have a minimum cumulative GPA of 3.0 based on all courses taken as a graduate student at NMSU, including those taken as part of the MBA program (required courses, elective course(s), and courses to fulfill the requirements of an MBA concentration or approved course substitution).

2. The student must complete all required courses (36 credit hours) with a minimum cumulative GPA of 3.0 for the General MBA (11 required courses and 1 elective course, approved course substitutions, and any approved transfer courses).

A student who fails to meet one or both previous criteria may, during one or more subsequent semesters, take or retake additional graduate-level or MBA-specific courses to increase the cumulative GPA, thereby satisfying the Graduate School’s requirement for a final exam.

**Note 1:** The General MBA program (excluding concentrations) consists of eleven required courses and one elective course (totaling 36 credits). The MBA elective course consists of 1 graduate business elective (numbered 500 or above) as listed on the MBA web page.

**Note 2:** The College of Business reserves the right to change the published requirements. Any such changes will be announced and will not be retroactive. Currently, MBA courses are offered once each year except for the elective and some concentration courses. Always consult an academic advisor or department head before registering for classes.

A thesis is not required. With special approval, however, a degree candidate may elect to write a thesis with at least 6 credit hours earned under B A 590 ([https://catalogs.nmsu.edu/search/?P=B%20A%20599](https://catalogs.nmsu.edu/search/?P=B%20A%20599)) Master’s Thesis in lieu of B A 590 ([https://catalogs.nmsu.edu/search/?P=B%20A%20590](https://catalogs.nmsu.edu/search/?P=B%20A%20590)) Professional Paper/Presentation.

MBA students who want to have a concentration in Health Services Management must complete the following three Public Health courses (one of which fulfills the MBA elective requirement). For the Health Services Management Concentration, B A 590 Professional Paper/Presentation (required of all MBA students) will include a health services management project.

### Business Administration (Health Services Management) - Master of Business Administration (Online)

#### Program Requirements (42 credits)

The MBA program consists of twelve courses beyond the background knowledge requirements (p. 804). Eleven are required courses:

This elective must be selected from the approved course list on the MBA web page.

The Graduate School requires that students maintain a minimum cumulative GPA of 3.0 in all courses taken as a graduate student at NMSU. The MBA program requires, in addition, that every candidate for the MBA degree must graduate with at least a minimum cumulative GPA of 3.0 in all courses taken as a graduate student at NMSU. The MBA program requires, in addition, that every candidate for the MBA degree must graduate with at least a minimum cumulative GPA of 3.0 in all courses taken as a graduate student at NMSU.

The following course sequencing requirements must be satisfied:

1. B A 590 ([https://catalogs.nmsu.edu/search/?P=B%20A%20590](https://catalogs.nmsu.edu/search/?P=B%20A%20590)) Professional Paper/Presentation must be completed during the final term of the student’s program and is only open to students who have been accepted into the MBA degree program. ACCT 503 ([https://catalogs.nmsu.edu/search/?P=ACCT%20503](https://catalogs.nmsu.edu/search/?P=ACCT%20503)) Accounting for Managers, BLAW 502 ([https://catalogs.nmsu.edu/search/?P=BLAW%20502](https://catalogs.nmsu.edu/search/?P=BLAW%20502)) Legal Environment of Business, BFIN 503 ([https://catalogs.nmsu.edu/search/?P=BFIN%20503](https://catalogs.nmsu.edu/search/?P=BFIN%20503)) Financial Management and MKTG 503 ([https://catalogs.nmsu.edu/search/?P=BFIN%20503](https://catalogs.nmsu.edu/search/?P=BFIN%20503)) Marketing Management must be completed prior to enrollment in B A 590 ([https://catalogs.nmsu.edu/search/?P=B%20A%20590](https://catalogs.nmsu.edu/search/?P=B%20A%20590)) Professional Paper/Presentation.
2. MGMT 590 (https://catalogs.nmsu.edu/search/?P=MGMT%20590) Strategic Management must be completed at the end of the student's program of study and is only open to students who have been accepted into the MBA degree program. All MBA coursework other than B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20599) Professional Paper/Presentation must be completed prior to or during the same term as MGMT 590 (https://catalogs.nmsu.edu/search/?P=MGMT%20590) Strategic Management.

Students requesting transfer credit for any graduate courses taken before admission to the MBA program must submit appropriate written justification, including course descriptions, syllabi, transcripts, etc. Up to nine credits of transfer work can be applied to meet MBA requirements if the credits were earned in a program accredited by AACSB International. Transfer credits for courses taken after admission to the program are generally not permitted, but advance approval should be requested and may be granted in exceptional situations.

**Final Examination for the Degree:** A student may satisfy the Graduate School’s requirement for a final exam by completing the General MBA Degree’s necessary coursework and supplemented or modified requirements for the concentration selected. The following two criteria must be met by the end of their final semester or at the end of a subsequent semester during which graduate-level courses are taken or retaken to meet the specified cumulative GPA.

1. The student must have a minimum cumulative GPA of 3.0 based on all courses taken as a graduate student at NMSU, including those taken as part of the MBA program (required courses, elective course(s), and courses to fulfill the requirements of an MBA concentration or approved course substitution).

2. The student must complete all required courses (36 credit hours) with a minimum cumulative GPA of 3.0 for the General MBA (11 required courses and 1 elective course, approved course substitutions, and any approved transfer courses).

A student who fails to meet one or both previous criteria may, during one or more subsequent semesters, take or retake additional graduate-level or MBA-specific courses to increase the cumulative GPA, thereby satisfying the Graduate School’s requirement for a final exam.

**Note 1:** The General MBA program (excluding concentrations) consists of eleven required courses and one elective course (totaling 36 credits). The MBA elective course consists of 1 graduate business elective (numbered 500 or above) as listed on the MBA web page.

**Note 2:** The College of Business reserves the right to change the published requirements. Any such changes will be announced and will not be retroactive. Currently, MBA courses are offered once each year except for the elective and some concentration courses. Always consult an academic advisor or department head before registering for classes.

A thesis is not required. With special approval, however, a degree candidate may elect to write a thesis with at least 6 credit hours earned under B A 599 (https://catalogs.nmsu.edu/search/?P=B%20A%20599) Master’s Thesis in lieu of B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) Professional Paper/Presentation.

MBA students who want to have a concentration in Health Services Management must complete the following three Public Health courses (one of which fulfills the MBA elective requirement). For the Health Services Management Concentration, B A 590 Professional Paper/Presentation (required of all MBA students) will include a health services management project.

**Total Credits:** 36

This elective must be selected from the approved course list on the MBA web page.

The Graduate School requires that students maintain a minimum cumulative GPA of 3.0 in all courses taken as a graduate student at NMSU. The MBA program requires, in addition, that every candidate for the MBA degree must graduate with at least a minimum cumulative GPA of 3.0 in all courses required for the General MBA degree.

The following course sequencing requirements must be satisfied:

1. B A 590 Professional Paper/Presentation must be completed during the final term of the student’s program and is only open to students who have been accepted into the MBA degree program. ACCT 503 Accounting for Managers, BLAW 502 Legal Environment of Business, BFIN 503 Financial Management and MKTG 503 Marketing Management must be completed prior to enrollment in B A 590 Professional Paper/Presentation.

2. MGMT 590 Strategic Management must be completed at the end of the student’s program of study and is only open to students
who have been accepted into the MBA degree program. All MBA coursework other than B A 590 Professional Paper/Presentation must be completed prior to or during the same term as MGMT 590 Strategic Management.

Students requesting transfer credit for any graduate courses taken before admission to the MBA program must submit appropriate written justification, including course descriptions, syllabi, transcripts, etc. Up to nine credits of transfer work can be met to meet MBA requirements if the credits were earned in a program accredited by AACSB International. Transfer credits for courses taken after admission to the program are generally not permitted, but advance approval should be requested and may be granted in exceptional situations.

Final Examination for the Degree:

A student may satisfy the Graduate School’s requirement for a final exam by completing the General MBA Degree’s necessary coursework and supplemented or modified requirements for the concentration selected. The following two criteria must be met by the end of their final semester or at the end of a subsequent semester during which graduate-level courses are taken or retaken to meet the specified cumulative GPA.

(1) The student must have a minimum cumulative GPA of 3.0 based on all courses taken as a graduate student at NMSU, including those taken as part of the MBA program (required courses, elective course(s), and courses to fulfill the requirements of an MBA concentration or approved course substitution).

(2) The student must complete all required courses (36 credit hours) with a minimum cumulative GPA of 3.0 for the General MBA (11 required courses and 1 elective course, approved course substitutions, and any approved transfer courses).

A student who fails to meet one or both previous criteria may, during one or more subsequent semesters, take or retake additional graduate-level or MBA-specific courses to increase the cumulative GPA, thereby satisfying the Graduate School’s requirement for a final exam.

Note 1: The General MBA program (excluding concentrations) consists of eleven required courses and one elective course (totaling 36 credits). The MBA elective course consists of 1 graduate business elective (numbered 500 or above) as listed on the MBA web page.

Note 2: The College of Business reserves the right to change the published requirements. Any such changes will be announced and will not be retroactive. Currently, MBA courses are offered once each year except for the elective and some concentration courses. Always consult an academic advisor or department head before registering for classes.

A thesis is not required. With special approval, however, a degree candidate may elect to write a thesis with at least 6 credit hours earned under B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20599) Master’s Thesis in lieu of B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20599) Professional Paper/Presentation.

Students in the on-campus MBA program may elect to pursue a concentration in Information Systems and must take additional coursework beyond that required to complete the MBA degree program. BCIS 502 (https://catalogs.nmsu.edu/search/?P=BCIS%20502) Business Information Systems is a required MBA course and a prerequisite for each of the courses in the concentration.

Any of these courses may also be used to fulfill the MBA elective requirement.
