TABLE OF CONTENTS

Las Cruces Academic Catalog 13
University Leadership 13
The History of the University 14
Programs A-Z 14
Catalog Glossary 22
The NMSU System Academic Regulations 31
Areas of Interest 56
Applied and Clinical Health Sciences 56
Applied Social and Behavioral Sciences 56
Business 56
Communication, Media Study, and Creative Arts 56
Humanities and Social Sciences 57
Life Sciences 57
Physical Sciences and Engineering 57
Teacher Education 58
Undergraduate Admissions and Orientation 58
Transfer Students 61
Military and Veterans Programs (MVP) 63
International Students 68
Tuition, Fees & Other Expenses 73
Financial Aid & Scholarship Services 75
The Graduate School 77
Accounting - Master of Accountancy 93
Aerospace Engineering - Master of Engineering in Aerospace Engineering 95
Aerospace Engineering - Master of Science 96
Agriculture (Agribusiness) - Master of Agriculture 97
Agriculture (Domestic Animal Biology) - Master of Agriculture 98
Agricultural and Extension Education - Master of Arts 99
Agricultural Biology - Master of Science 101
Agricultural Economics - Master of Science 102
Athletic Training - Master of Science 103
Animal Science - Master of Science 104
Anthropology - Master of Arts 106
Applied Statistics - Master of Science 107
Art - Master of Arts 108
Astronomy - Master of Science 109
Bioinformatics - Master of Science 112
Biology - Master of Science 114
Business Administration - Master of Business Administration 115
Business Administration (Agribusiness) - Master of Business Administration 117
Business Administration (Finance) - Master of Business Administration 119
Business Administration (Health Services Management) - Master of Business Administration 120
Business Administration (Information Systems) - Master of Business Administration 121
Business Administration (Public Utility Regulations) - Master of Business Administration 123
Chemical Engineering - Master of Engineering in Chemical Engineering 124
Chemical Engineering - Master of Science in Chemical Engineering 126
Chemistry (Biochemistry) - Master of Science 127
Chemistry - Master of Science 127
Civil Engineering - Master of Engineering in Civil Engineering 128
Civil Engineering - Master of Science in Civil Engineering 130
Clinical Mental Health Counseling - Master of Arts 132
Communication Disorders - Master of Arts 133
Communication Studies - Master of Arts 134
Computer Science - Master of Science 137
Counseling and Guidance (Educational Diagnostics) - Master of Arts 139
Creative Writing - Master of Fine Arts 139
Criminal Justice - Master of Criminal Justice 141
Data Analytics - Master of Data Analytics 143
Economics - Master of Arts 144
Economics (Econometrics) - Master of Arts 145
Economics (Public Policy) - Master of Arts 145
Economics (Public Utility Policy and Regulation) - Master of Arts 146
Education (Elementary Licensure Prep) - Master of Arts 146
Education (Elementary Mathematics and Science) - Master of Arts 148
Education (Language, Literacy & Culture) - Master of Arts 148
Education (Secondary Licensure Prep) - Master of Arts 149
Educational Leadership & Administration (Higher Education Administration) - Master of Arts 151
Electrical Engineering - Master of Engineering in Electrical Engineering 151
Electrical Engineering - Master of Science in Electrical Engineering 153

English - Master of Arts 156
Environmental Engineering - Master of Science in Environmental Engineering 158
Experimental Psychology - Master of Arts 159
Family and Consumer Sciences (Food Science and Technology) - Master of Science 159
Family and Consumer Sciences (Couples, Marriage and Family Therapy) - Master of Science 159
Family and Consumer Sciences (Hotel, Restaurant and Tourism Management) - Master of Science 160
Fine Arts - Master of Fine Arts 162
Fish, Wildlife and Conservation Ecology - Master of Science 162
Geography - Master of Applied Geography 163
Geology - Master of Science 166
History - Master of Arts 166
History (Public History) - Master of Arts 167
Horticulture - Master of Science 168
Industrial Engineering - Master of Engineering in Industrial Engineering 169
Industrial Engineering - Master of Science in Industrial Engineering 170
Mathematics - Master of Science 172
Mechanical Engineering - Master of Engineering in Mechanical Engineering 173
Mechanical Engineering - Master of Science in Mechanical Engineering 174
Molecular Biology - Master of Science 175
MPA-MCJ Program - Dual Degree 176
Music (Collaborative Piano) - Master of Music 176
Music (Conducting) - Master of Music 177
Music (Music Education) - Master of Music 177
Music (Performance) - Master of Music 178
Physics - Master of Science 179
Plant and Environmental Science - Master of Science 180
Political Science - Master of Arts 180
Public Administration - Master of Public Administration 181
Public Health (Health Behavior and Health Promotion) - Master of Public Health 182
Public Health (Health Management, Administration & Policy) - Master of Public Health 184
Public History and Public Administration - Dual M.A. Degree 185
Range Science - Master of Science 185
Social Work - Master of Social Work (Full-Time) 187
Social Work - Master of Social Work (Full-Time Advanced) 188
Social Work - Master of Social Work (Part-Time) 189
Sociology - Master of Arts 190
Spanish - Master of Arts 191
Special Education - Master of Arts 193
Water Science and Management - Master of Science 195
Water Science and Management (Agricultural Water Resources) - Master of Science 196
Water Science and Management (International Water Resilience) - Master of Science 196
Water Science and Management (Water Economics and Policy) - Master of Science 197
Water Science and Management (Water Informatics) - Master of Science 197
Water Science and Management (Water Quality and Treatment) - Master of Science 198
Water Science and Management (Watersheds and Aquatic/Riparian Wetlands) - Master of Science 199
Aerospace Engineering - Doctor of Philosophy 200
Animal Science - Doctor of Philosophy 200
Applied and Agricultural Biology - Doctor of Philosophy 201
Applied Statistics - Doctor of Philosophy 203
Astronomy - Doctor of Philosophy 204
Biology - Doctor of Philosophy 208
Business Administration (Management) - Doctor of Philosophy 208
Business Administration (Marketing) - Doctor of Philosophy 209
Chemistry - Doctor of Philosophy 210
Chemistry (Biochemistry) - Doctor of Philosophy 210
Computer Science - Doctor of Philosophy 210
Counseling Psychology - Doctor of Philosophy 211
Curriculum and Instruction - Doctor of Philosophy 213
Economic Development - Doctor of Economic Development 214
Educational Leadership & Administration (Higher Education Administration) - Doctor of Education 215
Educational Leadership & Administration (Higher Education) - Doctor of Philosophy 216
Educational Leadership & Administration (Pk-12 Administration) - Doctor of Education 217
Educational Leadership & Administration (Pk-12 Education) - Doctor of Philosophy 218
Engineering (Chemical Engineering) - Doctor of Philosophy 219
Engineering (Civil Engineering) - Doctor of Philosophy 220
Engineering (Electrical Engineering) - Doctor of Philosophy 221

Engineering (Industrial Engineering) - Doctor of Philosophy 223
Engineering (Mechanical Engineering) - Doctor of Philosophy 224
Experimental Psychology - Doctor of Philosophy 225
Food Science - Doctor of Philosophy 225
Geography - Doctor of Philosophy 226
Health Equity Sciences - Doctor of Philosophy 228
Kinesiology - Doctor of Philosophy 229
Mathematics - Doctor of Philosophy 230
Molecular Biology - Doctor of Philosophy 231
Nursing Practice (Nurse Anesthesiology) - Doctor of Nursing Practice 232
Physics - Doctor of Philosophy 233
Plant and Environmental Science - Doctor of Philosophy 233
Range Science - Doctor of Philosophy 234
Rhetoric and Professional Communication - Doctor of Philosophy 234
School Psychology - Doctor of Philosophy 235
Transborder and Global Human Dynamics - Doctor of Philosophy 236
Water Science and Management - Doctor of Philosophy 239
Water Science and Management (Agricultural Water Resources) - Doctor of Philosophy 239
Water Science and Management (International Water Resilience) - Doctor of Philosophy 240
Water Science and Management (Water Economics and Policy) - Doctor of Philosophy 240
Water Science and Management (Water Informatics) - Doctor of Philosophy 241
Water Science and Management (Water Quality Treatments) - Doctor of Philosophy 241
Water Science and Management (Watershed and Aquatic/Riparian Wetlands) - Doctor of Philosophy 242
Wildlife and Fisheries Ecology - Doctor of Philosophy 242
Reading - Specialist in Education 244
School Psychology - Specialist in Education 244
Autism and Spectrum Disorders - Graduate Certificate 245
Bilingual Education - Graduate Certificate 245
Borderlands and Ethnic Studies - Graduate Certificate 245
Collaborative Piano - Graduate Certificate 246
Cultural Resource Management - Graduate Certificate 246
Elementary Education Alternative Licensure - Graduate Certificate 247
Finance - Graduate Certificate 248
Museum Studies - Graduate Certificate 248
Music Pedagogy and Performance - Graduate Certificate 249
Music Performance - Graduate Certificate 249
Online Teaching and Learning - Graduate Certificate .....
Principal Licensure - Graduate Certificate 249
Public Health - Graduate Certificate 249
Public Utility Regulation and Economics - Graduate Certificate 250
School Social Work: Special Education Related Services - Graduate Certificate 250
Secondary Education Alternative Licensure - Graduate Certificate 251
Sustainability - Graduate Certificate 251
Systems Engineering - Graduate Certificate 252
Teaching English to Speakers of Other Languages - Graduate Certificate 252
Teaching Spanish for Heritage Language Learners - Graduate Certificate 253
Advanced Manufacturing - Graduate Minor 253
Agribusiness - Graduate Minor 254
Agricultural and Extension Education - Graduate Minor 254
Animal Science - Graduate Minor 254
Anthropology - Graduate Minor 254
Applied Statistics - Graduate Minor 254
Archaeology - Graduate Minor 254
Bioinformatics (with Computer Science) - Graduate Minor 254
Communication Studies - Graduate Minor 255
Computer Science - Graduate Minor 255
Economics - Graduate Minor 255
Educational Administration (Doctoral) - Graduate Minor 255
Educational Administration (Higher Ed.) - Graduate Minor 255
Educational Administration (Pk-12) - Graduate Minor 255
Fish, Wildlife and Conservation Ecology - Graduate Minor 255
Food Studies - Graduate Minor 256
Gender and Sexuality Studies - Graduate Minor 256
Geographic Information Science and Technology - Graduate Minor 257
Gerontology - Graduate Minor 257
History - Graduate Minor 257
Information Systems - Graduate Minor 257
Integrated Behavioral Health Care - Graduate Minor 258
Materials Engineering - Graduate Minor 259
Mathematics - Graduate Minor 259
Molecular Biology - Graduate Minor 259

Native American Studies - Graduate Minor 260
Physics - Graduate Minor 260
Psychology - Graduate Minor 260
Range Science - Graduate Minor 260
Security Studies - Graduate Minor 261
Sociology - Graduate Minor 261
Spanish Counseling - Graduate Minor 261
Special Education - Graduate Minor 262
U.S.-Mexico Border Health Issues - Graduate Minor 262
General Education & Viewing a Wider World Courses 262
Common Course Numbering Crosswalk 269
College of Agricultural, Consumer, and Environmental Sciences 325
Agricultural and Extension Education 329
Agricultural and Extension Education (Agricultural Communications) - Bachelor of Science in Agriculture 338
Agricultural and Extension Education (Agricultural Education Teaching) - Bachelor of Science in Agriculture 339
Agricultural and Extension Education (Agricultural Extension/Development) - Bachelor of Science in Agriculture 341
Agricultural Communications - Undergraduate Minor 343
Leadership in Agricultural Communications - Undergraduate Minor 343
Agricultural Economics and Agricultural Business 343
Agricultural Economics and Agricultural Business - Bachelor of Science in Agriculture 352
Natural Resource Economics and Policy - Bachelor of Science in Agriculture 354
Agricultural Business Management- Undergraduate Minor 357
Natural Resource Economics - Undergraduate Minor 357
Animal and Range Sciences 357
Animal Science (Animal Industry) - Bachelor of Science in Agriculture 372
Animal Science (Science) - Bachelor of Science in Agriculture 374
Range Science - Bachelor of Science in Agriculture 377
Dairy Science - Undergraduate Minor 379
Horse Management - Undergraduate Minor 379
Human Animal Interaction - Undergraduate Minor 379
Livestock Production - Undergraduate Minor 379
Ranch Management - Undergraduate Minor 380
Range Science - Undergraduate Minor 380
Entomology, Plant Pathology and Weed Science 380
Agricultural Biology (Applied Biology) - Bachelor of Science in Agriculture 387
Agricultural Biology (Applied Microbiology) - Bachelor of Science in Agriculture 389
Agricultural Biology (Entomology) - Bachelor of Science in Agriculture 390
Agricultural Biology (Environmental Biology) - Bachelor of Science in Agriculture 391
Agricultural Biology (Invasive Pest Biology and Management) - Bachelor of Science in Agriculture 393
General Agriculture - Bachelor of Science in Agriculture 395
Entomology - Undergraduate Minor 397
Pest Management - Undergraduate Minor 397
Plant Pathology - Undergraduate Minor 397
Weed Science - Undergraduate Minor 397
Family and Consumer Sciences 397
Family and Consumer Sciences Education - Bachelor of Science in Family and Consumer Sciences 414
Fashion Merchandising and Design - Bachelor of Science in Family and Consumer Sciences 415
Food Science and Technology (Science, Technology and Engineering) - Bachelor of Science in Food Science and Technology 418
Human Nutrition and Dietetic Science (Nutrition Education) - Bachelor of Science in Family and Consumer Sciences 419
Human Nutrition and Dietetic Science (Pre-Dietetics/ Dietetics) - Bachelor of Science in Family and Consumer Sciences 422
Culinary Science - Undergraduate Minor 424
Fashion Merchandising & Design - Undergraduate Minor 425
Food Science - Undergraduate Minor 425
Interior Spaces - Undergraduate Minor 425
Meat Science - Undergraduate Minor 425
Nutrition - Undergraduate Minor 426
Fish, Wildlife and Conservation Ecology 426
Conservation Ecology - Bachelor of Science in Conservation Ecology 436
Fisheries and Wildlife Science (Aquatic Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology 437
Fisheries and Wildlife Science (Wildlife Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology 440
Conservation Ecology - Undergraduate Minor 443
Wildlife Science - Undergraduate Minor 443

Plant and Environmental Sciences 443
Agronomy - Bachelor of Science in Agriculture 458
Environmental Science - Bachelor of Science in Environmental Science 460
Genetics and Biotechnology - Bachelor of Science in Genetics 462
Horticulture - Bachelor of Science in Agriculture 464
Horticulture (Turfgrass Science and Management) - Bachelor of Science in Agriculture 467
Soil Science (Environment and Resource Management) - Bachelor of Science in Agriculture 470
Soil Science (Soil and Water Science) - Bachelor of Science in Agriculture 472
Soil Science (Soils) - Bachelor of Science in Agriculture 474
Agronomy - Undergraduate Minor 476
Environmental Science - Undergraduate Minor 476
Genetics and Biotechnology - Undergraduate Minor 476
Horticulture - Undergraduate Minor 477
Soil Science - Undergraduate Minor 477
School of Hotel, Restaurant and Tourism Management 477
Hotel, Restaurant and Tourism Management - Bachelor of Science 489
Hotel, Restaurant and Tourism Management - Undergraduate Minor 491
Water Science and Management 491
College of Arts and Sciences 495
Aerospace Studies 500
Aerospace Studies - Undergraduate Minor 501
Anthropology 502
Anthropology - Bachelor of Arts 519
Anthropology (Culture & Language) - Bachelor of Arts 522
Anthropology - Undergraduate Minor 525
Archaeology - Undergraduate Minor 525
Medical Anthropology - Undergraduate Minor 525
Sustainablility- Undergraduate Minor 526
Religious Studies - Undergraduate Minor 526
Applied Studies - Bachelor of Applied Studies 527
Art 527
Art (Art History) - Bachelor of Arts 542
Art (Studio Art) - Bachelor of Arts 544
Art (Museum Conservation) - Bachelor of Fine Arts 545
Art (Studio Art) - Bachelor of Fine Arts 548
Art - Undergraduate Minor 549
Art History - Undergraduate Minor 549
Museum Conservation - Undergraduate Minor 549
Astronomy 550
Astronomy - Undergraduate Minor 555
Biology 556
Biology (Secondary Education) - Bachelor of Arts 569
Biology - Bachelor of Arts 571
Biology - Bachelor of Science 573
Conservation Ecology - Bachelor in Conservation Ecology 575
Genetics and Biotechnology - Bachelor of Science in Genetics 577
Microbiology - Bachelor of Science 579
Biology - Undergraduate Minor 581
Conservation Ecology - Undergraduate Minor 582
Genetics and Biotechnology - Undergraduate Minor 582
Human Biology - Undergraduate Minor 582
Microbiology - Undergraduate Minor 583
Chemistry and Biochemistry 583
Biochemistry - Bachelor of Science 595
Chemistry - Bachelor of Arts 598
Chemistry (Pre-Med) - Bachelor of Arts 600
Chemistry (Secondary Education) - Bachelor of Arts 603
Chemistry - Bachelor of Science 605
Chemistry (Secondary Education) - Bachelor of Science 607
Biochemistry - Undergraduate Minor 609
Chemistry - Undergraduate Minor 609
Communication Studies 610
Communication Studies - Bachelor of Arts 618
Communication Studies - Undergraduate Minor 620
Sports Communication - Undergraduate Minor 620
Computer Science 620
Artificial Intelligence - Bachelor of Science 640
Computer Science - Bachelor of Arts 642
Computer Science - Bachelor of Science 644
Computer Science (Algorithm Theory) - Bachelor of Science 647
Computer Science (Artificial Intelligence) - Bachelor of Science 650
Computer Science (Big Data and Data Science) - Bachelor of Science 652
Computer Science (Computer Networking) - Bachelor of Science 655

Computer Science (Cybersecurity) - Bachelor of Science 657
Computer Science (Human Computer Interaction) - Bachelor of Science 660
Computer Science (Secondary Education) - Bachelor of Arts 662
Computer Science (Software Development) - Bachelor of Science 665
Cybersecurity - Bachelor of Science 667
Algorithm Theory - Undergraduate Minor 669
Bioinformatics - Undergraduate Minor 669
Computer Systems - Undergraduate Minor 669
Software Development - Undergraduate Minor 670
Creative Media 670
Animation and Visual Effects (2D Production Studio) - Bachelor of Creative Media 687
Animation and Visual Effects (3D & VFX Production Studio) - Bachelor of Creative Media 688
Digital Film Making - Bachelor of Creative Media 690
Animation and Visual Effects - Undergraduate Minor 691
Creative Writing - Undergraduate Minor 692
Digital Film Making - Undergraduate Minor 692
Criminal Justice 692
Criminal Justice - Bachelor of Criminal Justice 701
Forensic Science - Undergraduate Minor 704
Human Rights - Undergraduate Minor 705
Law and Society - Undergraduate Supplemental Major 705
Economics, Applied Statistics, and International Business 706
Economics - Bachelor of Arts 709
Economics - Undergraduate Minor 711
English 711
English (Creative Writing) - Bachelor of Arts 730
English - Bachelor of Arts 732
English (Literature, Language and Culture) - Bachelor of Arts 734
English (Rhetoric, Digital Media and Professional Communication) - Bachelor of Arts 736
Gender and Sexuality Studies - Bachelor of Arts 738
English - Undergraduate Minor 740
Gender & Sexuality Studies - Undergraduate Minor 740
Literature - Undergraduate Minor 741
Medieval and Early Modern Studies - Undergraduate Minor 741
Rhetoric and Professional Communication - Undergraduate Minor 742
Geography 742
Geography (Environmental Studies) - Bachelor of Science 757
Geography (Geographic Information Science & Tech) - Bachelor of Science 760
Geographic Information Systems - Undergraduate Minor 763
Geography - Undergraduate Minor 763
Geological Sciences 764
Geology (Earth and Environmental Sciences) - Bachelor of Science 768
Geology (Earth Science Education) - Bachelor of Science 771
Geology (Geological Sciences) - Bachelor of Science 773
Geology - Undergraduate Minor 776
History 777
History - Bachelor of Arts 790
History - Undergraduate Minor 792
Individualized Studies - Bachelor of Individualized Studies 792
Individualized Studies (Pre-Pharmacy) - Bachelor of Individualized Studies 793
Journalism and Media Studies 795
Journalism and Media Studies - Bachelor of Arts 801
Journalism and Media Studies - Undergraduate Minor 805
Social Media Management - Undergraduate Minor 805
Strategic Communications - Undergraduate Minor 805
Languages and Linguistics 806
Languages (French) - Bachelor of Arts 826
Languages (German) - Bachelor of Arts 828
Languages (Spanish) - Bachelor of Arts 831
Linguistics - Bachelor of Arts 833
East Asian Studies - Undergraduate Minor 836
French - Undergraduate Minor 836
German - Undergraduate Minor 837
International Studies - Undergraduate Minor 837
Linguistics - Undergraduate Minor 837
Spanish - Undergraduate Minor 838
Latin American Studies - Supplemental Major 838
Chicano Studies - Supplemental Major 839
Linguistics - Supplemental Major 839
Mathematical Sciences 840
Mathematics (Actuarial Science and Insurance) - Bachelor of Science 857

Mathematics (Applied Mathematics) - Bachelor of Science 859
Mathematics (Computational Mathematics) - Bachelor of Science 861
Mathematics (Foundations) - Bachelor of Science 863
Mathematics (General Mathematics) - Bachelor of Science 864
Mathematics (Physics) - Bachelor of Science 866
Mathematics (Probability and Statistics) - Bachelor of Science 867
Mathematics (Secondary Mathematics Education) - Bachelor of Science 869
Applied Mathematics - Supplemental Major 871
Mathematics - Undergraduate Minor 871
Military Science 872
Military Science - Undergraduate Minor 878
Molecular Biology & Interdisciplinary Life Sciences 878
Molecular Biology- Undergraduate Minor 880
Music 880
Music - Bachelor of Arts 896
Music (Pre-Speech Language Pathology) - Bachelor of Arts 898
Music (Theatre) - Bachelor of Arts 899
Music (Instrumental Performance) - Bachelor of Music 901
Music (Piano Performance) - Bachelor of Music 903
Music (Vocal Performance) - Bachelor of Music 905
Music Education (K12 Instrumental) - Bachelor of Music Education 907
Music Education (K12 Vocal) - Bachelor of Music Education 909
Music - Undergraduate Minor 911
Philosophy 911
Justice, Political Philosophy, and Law - Bachelor of Arts 914
Philosophy - Bachelor of Arts 915
Ethics - Undergraduate Minor 917
Justice, Poltical Philosophy, and Law - Undergraduate Minor 917
Philosophy - Undergraduate Minor 918
Physics 918
Physics - Bachelor of Arts 931
Physics - Bachelor of Science 933
Physics - Undergraduate Minor 935
Political Science, Public Law and Administration 936
Political Science - Bachelor of Arts 945
American Government and Politics - Undergraduate Minor 947
Comparative Politics - Undergraduate Minor 947
International Relations - Undergraduate Minor 947
Political Science - Undergraduate Minor 948
Political Theory - Undergraduate Minor 948
Public Administration - Undergraduate Minor 948
Public Law - Undergraduate Minor 948
Law and Society - Supplemental Major 948
Psychology 949
Psychology - Bachelor of Arts 955
Psychology - Undergraduate Minor 958
Theatre Arts 958
Theatre Arts - Bachelor of Arts 963
Theatre Arts (Design/Technical/Management) - Bachelor of Arts 965
Theatre Arts (Musical Theatre) - Bachelor of Arts 966
Theatre Arts - Undergraduate Minor 968
College of Business 968
Prebusiness - Associate in Prebusiness 972
Accounting and Information Systems 972
Accounting - Bachelor of Accountancy 981
Information Systems - Bachelor of Business Administration 983
Accounting - Undergraduate Minor 985
Enterprise Systems - Undergraduate Minor 986
Information Systems - Undergraduate Minor 986
Business Administration 986
Business Administration - Undergraduate Minor 987
Economics, Applied Statistics, and International Business 988
Economics - Bachelor of Arts in Economics 997
Economics - Bachelor of Business Administration 998
Economics (Energy Economics) - Bachelor of Business Administration 1000
International Business - Bachelor of Business Administration 1002
Economics - Undergraduate Minor 1005
International Business - Undergraduate Minor 1005
Finance 1005
Finance - Bachelor of Business Administration 1011
Finance (Financial Analyst) - Bachelor of Business Administration 1013

Finance (Risk Management and Insurance) - Bachelor of Business Administration 1014
Business Law - Undergraduate Minor 1016
Entrepreneurship - Undergraduate Minor 1017
Finance - Undergraduate Minor 1017
Risk Management and Insurance - Undergraduate Minor 1017
Management 1017
General Business - Bachelor of Business Administration 1023
General Business (Entrepreneurship) - Bachelor of Business Administration 1025
Management (Human Resource Management) - Bachelor of Business Administration 1027
Management (Project & Supply Chain Management) - Bachelor of Business Administration 1029
Management (Small Business Management & Entrepreneurship) - Bachelor of Business Administration 1031
Human Resource Management - Undergraduate Minor . 1032
Management - Undergraduate Minor 1033
Marketing 1033
Marketing (Advertising) - Bachelor of Business Administration 1042
Marketing (PGA Golf Management) - Bachelor of Business Administration 1043
Marketing (Professional Selling) - Bachelor of Business Administration 1045
Marketing (Strategic Marketing) - Bachelor of Business Administration 1047
Advertising - Undergraduate Minor 1049
Marketing - Undergraduate Minor 1049
Professional Selling - Undergraduate Minor 1049
College of Engineering 1049
Chemical & Materials Engineering 1055
Chemical Engineering - Bachelor of Science in Chemical Engineering 1070
Biomedical Engineering - Undergraduate Minor 1072
Brewery Engineering- Undergraduate Minor 1072
Computational Engineering- Undergraduate Minor 1072
Materials Engineering - Undergraduate Minor 1072
Nuclear Chemical Engineering - Undergraduate Minor ... 1073
Pre-Law in Intellectual Property - Undergraduate Minor 1073
Pre-Medicine Studies- Undergraduate Minor 1073
Civil and Environmental Engineering 1073
Civil Engineering - Bachelor of Science in Civil Engineering 1084
Agricultural Engineering - Undergraduate Minor 1086
Environmental Engineering - Undergraduate Minor 1086
Geotechnical Engineering - Undergraduate Minor 1086
Structural Engineering - Undergraduate Minor 1087
Water Resource Engineering - Undergraduate Minor 1087
Electrical and Computer Engineering 1087
Computer Engineering - Bachelor of Science in Computer Engineering 1106
Electrical Engineering - Bachelor of Science in Electrical Engineering 1109
Electrical Engineering (Artificial Intelligence, Machine Learning, & Data Science) - Bachelor of Science in Electrical Engineering 1111
Electrical Engineering (Communications and Signal Processing) - Bachelor of Science in Electrical Engineering 1114
Electrical Engineering (Computers and Microelectronics) - Bachelor of Science in Electrical Engineering 1116
Electrical Engineering (Controls & Robotics) - Bachelor of Science in Electrical Engineering 1119
Electrical Engineering (Electromagnetics and Photonics) - Bachelor of Science in Electrical Engineering 1121
Electrical Engineering (Power) - Bachelor of Science in Electrical Engineering 1124
Electrical Engineering (Space Systems) - Bachelor of Science in Electrical Engineering 1127
Computer Engineering - Undergraduate Minor 1129
Electrical Engineering - Undergraduate Minor 1130
Engineering Physics 1130
Engineering Physics (Aerospace) - Bachelor of Science in Engineering Physics 1141
Engineering Physics (Chemical) - Bachelor of Science in Engineering Physics 1143
Engineering Physics (Electrical) - Bachelor of Science in Engineering Physics 1145
Engineering Physics (Mechanical) - Bachelor of Science in Engineering Physics 1147
Engineering Technology and Surveying Engineering 1149
Civil Engineering Technology - Bachelor of Science in Engineering Technology 1173
Civil Engineering Technology (Renewable Energy Technologies) - Bachelor of Science in Engineering Technology 1175
Civil Engineering Technology (Transportation Technology) - Bachelor of Science in Engineering Technology 1177

Electrical Engineering Technology - Bachelor of Science in Engineering Technology 1178
Geomatics - Bachelor of Science in Geomatics 1180
Information and Communication Technology - Bachelor of Information and Communication Technology 1182
Information and Communication Technology (Cyber Defense) - Bachelor of Information and Communication Technology 1185
Information and Communication Technology (Network Technologies) - Bachelor of Information Communication Technology 1189
Information and Communication Technology (Software Development) - Bachelor of Information and Communication Technology 1192
Mechanical Engineering Technology - Bachelor of Science in Engineering Technology 1195
Computer Engineering Technology - Undergraduate Minor 1197
Digital Forensics - Undergraduate Minor 1197
Geomatics - Undergraduate Minor 1198
Information Security Technology - Undergraduate Minor 1198
Manufacturing - Undergraduate Minor 1198
Renewable Energy Technologies - Undergraduate Minor 1199
Industrial Engineering 1199
Industrial Engineering - Bachelor of Science in Industrial Engineering 1209
Entrepreneurship - Undergraduate Minor 1211
Lean Manufacturing and Analytics - Undergraduate Minor 1211
Supply Chain and Operations Research Analytics - Undergraduate Minor 1212
Systems Engineering - Undergraduate Minor 1212
Mechanical Engineering and Aerospace Engineering 1213
Aerospace Engineering - Bachelor of Science in Aerospace Engineering 1224
Mechanical Engineering - Bachelor of Science in Mechanical Engineering 1226
Aerospace Engineering - Undergraduate Minor 1228
Mechanical Engineering - Undergraduate Minor 1228
College of Health, Education and Social Transformation 1229
Pre-Health - Undergraduate Minor 1233
Borderlands and Ethnic Studies 1234
Borderland and Ethnic Studies - Undergraduate Minor .. 1244
Chicana/o Studies - Undergraduate Minor 1245
Native American Studies - Undergraduate Minor 1245
Decolonial Research - Graduate Minor 1246
Counseling and Education Psychology 1246
Counseling and Community Psychology - Bachelor of Science 1267
Counseling and Education Psychology - Undergraduate Minor 1270
Communication Disorders 1270
Communication Disorders - Bachelor of Science in Communication Disorders 1281
American Sign Language - Undergraduate Minor 1283
Kinesiology 1283
Dance - Bachelor of Arts in Dance 1307
Kinesiology (Exercise Science) - Bachelor of Science in Kinesiology 1308
Kinesiology (Performance Psychology) - Bachelor of Science in Kinestiology 1311
Kinesiology (Physical Education) - Bachelor of Science in Kinestiology 1314
Dance - Undergraduate Minor 1316
Exercise Science - Undergraduate Minor 1316
Nursing 1316
Nursing - Bachelor of Science in Nursing 1346
Public Health Sciences 1349
Public Health - Bachelor of Public Health 1361
Gerontology - Undergraduate Minor 1363
Public Health - Undergraduate Minor 1363
U.S.-Mexico Border Health Issues - Undergraduate Minor 1363
School of Teacher Preparation, Administration and Leadership (TPAL) 1363
Applied Studies (Zero-to-Four (Early Childhood)) - Bachelor of Applied Studies 1418
Early Childhood Education - Bachelor of Science in Education 1421
Elementary Education (Language Arts K-8) - Bachelor of Science in Education 1423
Elementary Education (Math K-8) - Bachelor of Science in Education 1425
Elementary Education (Science K-8) - Bachelor of Science in Education 1427
Elementary Education (Social Studies K-8) - Bachelor of Science in Education 1428

LAS CRUCES ACADEMIC CATALOG

This catalog is the student's guidebook to earning a degree or other academic credential. The catalog contains three important parts: (1) the official listing of NMSU's academic programs and their requirements, (2) a listing of the courses offered at NMSU with descriptions and prerequisites, and (3) other information essential for student success including many of the rules and regulations that govern the student's academic journey at NMSU.

As with any other journey, advance planning is essential. To avoid wrong turns and lost time, each student must chart their own path, with the help of their academic advisors and this guidebook. Each student is responsible for planning an academic program of study in compliance with university, community college, college and departmental requirements as set forth in the Catalog. In addition, each student is obligated to abide by the Academic Rules and Regulations as set forth in the Catalog, as well as the Student Social Code of Conduct, as set forth in the Student Handbook (available through the Dean of Students website).

Upon proper application and payment of fees, students will be awarded academic degrees and designations when the completion of the academic program requirements is verified by the relevant NMSU academic unit. Degrees and designations may be awarded under any catalog in effect on the date of degree or designation completion, provided that the catalog year is the same or subsequent to the year in which the student was first enrolled.

The academic program requirements of each catalog are effective for a period of eight academic years. This 2026-2027 Catalog is effective summer 2026 through spring semester 2034. All other catalog content, including rules, regulations, course descriptions and prerequisites are effective only for the catalog's denoted academic year. While content changes are typically implemented between Catalog years, the catalog does not represent a contract and NMSU reserves the right to make modifications to the catalog at any time.

Academic programs at the New Mexico State University System are available to all students without regard to age, ancestry, color, disability, gender, national origin, race, religion, sexual orientation or veteran status.

Associate Registrar: Gabrielle Martinez
Graduation & Curriculum Data Specialist: Daniela Lucero

University Leadership

NEW MEXICO STATE UNIVERSITY SYSTEM

President

Valerio Ferme, President of the NMSU System

Board of Regents

Michelle Lujan Grisham, Governor of New Mexico, Ex Officio Regent from Santa Fe.

Ammu Devasthali, Chair of Regent from Las Cruces, NM for term expiring December 31, 2028.

Deborah Romero, Vice Chair of Regent from Santa Fe, NM for term expiring December 31, 2026.

Christopher Saucedo, Secretary/Treasurer from Albuquerque, NM for term expiring December 31, 2026.

Marisol Olivas, Member from Belen, NM for term expiring December 31, 2026.

Ricardo Gonzales, Member from Las Cruces NM for term expiring December 31, 2030.

Provost/Academic

TBA, Chief Academic Officer & Provost

James McAteer, Deputy Provost

Tara Gray, Associate Provost for Faculty Development

Cecilia Hernandez, Associate Provost for Institutional Effectiveness

Chancellors

Shannon Bradley, Acting Vice President of Academic Affairs

Amadeo "Ike" Ledesma, Vice President Student Services

Grants

Marlene Chavez-Toivanen, Vice President Academic Affairs

Priscilla Arungwa, Vice President Student Services

The History of the University

New Mexico State University (NMSU) was founded in 1888 as the state's land-grant university. Through serving the educational needs of New Mexico's diverse population, NMSU has provided comprehensive programs of education, research, extension education and public service. Upon its founding, NMSU was known as Las Cruces College and later renamed New Mexico College of Agriculture and Mechanic Arts. In 1960, the constitution of New Mexico formally recognized the institution as NMSU. Today, NMSU is a major institution of higher education. Throughout its history, the university has preserved many traditions of its land-grant origin while also increasing emphasis on the fine arts, humanities, social and natural sciences.

For more history, points of pride, and the ranking of New Mexico State University please visit the About NMSU (https://nmsu.edu/about/) page of the university website.

Mission

The mission of the New Mexico State University system is to serve the diverse needs of the state through comprehensive programs of education, research, extension and outreach, and public service. As the state's land-grant and space-grant university, and as a Hispanic Serving Institution, NMSU fosters learning, inquiry, diversity and inclusion, social mobility, and service to the broader community.

Vision

By 2025, the NMSU system will excel in promoting social mobility for our diverse student populations, achieve the highest Carnegie research status (R1), and maintain our Carnegie Community Engagement classification.

Values

- **Leadership:** Promoting and creating the ability for Aggies to shape the future
- **Excellence:** Providing the highest level of education, research, outreach, and service
- **Access:** Welcoming diverse populations to higher education and to the NMSU community
- **Diversity & Inclusion:** Embracing our differences as an asset and actively seeking to include wide-ranging perspectives
- **Student-Centered:** Supporting the education of our students through every aspect of our university, every day

These values are encapsulated as: BE BOLD. Shape the future.

Accreditation

New Mexico State University has been accredited by The Higher Learning Commission (HLC) since 1926. The HLC may be contacted at:

The Higher Learning Commission
230 North LaSalle St.
Suite 7-500
Chicago, IL 60604-1411
Phone: (800) 621-7440

In addition, the university maintains various specialized and professional accreditations, as listed at the beginning of each college section in the catalog, and as found at https://accreditation.nmsu.edu/Accreditation%20at%20NMSU/Specialized%20Accreditation/index1.html.

NMSU Graduation and Retention Rates

These rates may be found on the NMSU Institutional Research website at: https://oia.nmsu.edu/.

Programs A-Z

Academic Programs

Associate Degree Programs

NMSU awards both designated and undesignated associate degrees following completion of at least 60 semester credits (excluding "N" suffix courses). Please see the NMSU System Academic Regulations & Policies (p. 31) section of the catalog for specific information about Associate Degree Program graduation requirements. (Service personnel enrolled under the two-year Servicemembers Opportunity College Program may be exempt from this requirement.)

The designation Meritorious Graduate is awarded to the top 15 percent of the students receiving associate degrees within each college in any one academic year; the students must have completed 45 or more credits with computable grades at NMSU.

Las Cruces Campus

Detailed information on admission requirements, curricula, and associate degree or certificate requirements will be found in the section of this catalog devoted to the administering department/college.

- **Associate of Arts**
  Administered by the Community Colleges
- **Associate of Fine Arts**
  Administered by the Community Colleges
- **Associate of Science**
  Administered by the Community Colleges
- **Associate of Science in Engineering Technology**
  Administered by the College of Engineering

Designated Associate Degrees

The following designated associate degrees are granted to students completing the specified requirements of the degree.

- **Associate in Art and Graphic Design**
  Administered by the Community Colleges
- **Associate in Criminal Justice**
  Administered by the Community Colleges
- **Associate in Education**
  Administered by the Community Colleges
- **Associate in Pre-business**
  Administered by the College of Business
- **Associate of Arts in Heritage Interpretation**
  Administered by the Community Colleges

Community Colleges

The Associate of Pre-Business degree offered on the Las Cruces campus is also available at the Dona Ana Community College. For more information on community college campus offerings, refer to the "Community Colleges (p. 1487)" chapter in this catalog and to their respective catalogs or admissions offices.

Please see the Community College Catalogs for more information about the Associate Degree Programs.

- Alamogordo Catalog (https://catalogs.nmsu.edu/alamogordo/)
- Dona Ana Catalog (https://catalogs.nmsu.edu/dona-ana/)
- Grants Catalog (https://catalogs.nmsu.edu/grants/)

Undergraduate Programs

For a full listing of all Undergraduate Programs offered at New Mexico State University, please see the Undergraduate Admissions webpage http://admissions.nmsu.edu/academics/.

Graduate Degree Programs

For a full listing of the Graduate Programs offered at New Mexico State University, please see the Graduate Admissions webpage (https://nmsu.edu/degree-programs/)

Academic Minors

Students seeking a degree may elect to complete one or more minors from those available, and the minor(s) will be designated on their transcripts. Minors cannot be earned after a degree has been conferred. A minor may be in a single department or may be interdepartmental. Specific requirements for minors are available in the Academic Catalog, please see the College sections for each college's complete list of the minors offered.

Programs offered at New Mexico State University

Program are titled in the following styles:

- **Agricultural Biology (Applied Biology) - Bachelor of Science in Agriculture**
  - Major Title (Agricultural Biology), will appear on diplomas and transcripts.
  - Concentration Title (Applied Biology), will appear on transcripts.
  - Degree Title (Bachelor of Science in Agriculture), will appear on diplomas and transcripts.
- **Animation and Visual Effects - Bachelor of Creative Media***
  - Major Title (Animation and Visual Effects), will appear on diplomas and transcripts.
  - Degree Title (Bachelor of Creative Media), will appear on diplomas and transcripts.
- **Mathematics (Statistics for Data Science) - Bachelor of Science (Online)**
  - Major Title (Mathematics), will appear on diplomas and transcripts.
  - Degree Title (Bachelor of Science), will appear on diplomas and transcripts.
  - Concentration Title (Statistics for Data Science), will appear on transcripts.
  - Online denotes that these programs are a part of NMSU Global Campus.

**Note: that some degrees will have emphasis, options, pathways, etc. appear on the degree page, but these items will not appear on transcripts.*

- **Brewery Engineering - Undergraduate Minor**
  - Minor Title (Brewery Engineering), will appear on transcripts
  - Minor Level (Undergraduate Minor), corresponds with the level for the coursework required and what level a student must be in to declare the minor

- Decolonial Research - Graduate Minor (p. 1246)
- Digital Communications - Graduate Certificate (https://catalogs.nmsu.edu/nmsu/graduate-school/digital-communications-graduate-certificate/)
- Digital Film Making - Bachelor of Creative Media (p. 690)
- Digital Film Making - Undergraduate Minor (p. 692)
- Digital Forensics - Undergraduate Minor (p. 1197)
- Digital Signal Processing - Graduate Certificate (https://catalogs.nmsu.edu/nmsu/graduate-school/digital-signal-processing-graduate-certificate/)

E

- Early Childhood Education - Bachelor of Science in Education (p. 1421)
- Early Childhood Education - Undergraduate Minor (p. 1450)
- East Asian Studies - Undergraduate Minor (p. 836)
- Economic Development - Doctor of Economic Development (p. 214)
- Economics (Econometrics) - Master of Arts (p. 145)
- Economics (Energy Economics) - Bachelor of Business Administration (p. 1000)
- Economics (Public Policy) - Master of Arts (p. 145)
- Economics (Public Utility Policy and Regulation) - Master of Arts (p. 146)
- Economics - Bachelor of Arts (p. 709)
- Economics - Bachelor of Arts in Economics (p. 997)
- Economics - Bachelor of Business Administration (p. 998)
- Economics - Graduate Minor (p. 255)
- Economics - Master of Arts (p. 144)
- Economics - Undergraduate Minor (p. 711)
- Economics - Undergraduate Minor (p. 1005)
- Education (Elementary Licensure Prep) - Master of Arts (p. 146)
- Education (Elementary Mathematics and Science) - Master of Arts (p. 148)

- Education (Language, Literacy & Culture) - Master of Arts (p. 148)
- Education (Secondary Licensure Prep) - Master of Arts (p. 149)
- Education (Spanish) - Master of Arts in Teaching (https://catalogs.nmsu.edu/nmsu/graduate-school/education-spanish-master-arts-teaching/)
- Educational Administration (Doctoral) - Graduate Minor (p. 255)
- Educational Administration (Higher Ed.) - Graduate Minor (p. 255)
- Educational Administration (Pk-12) - Graduate Minor (p. 255)
- Educational Leadership & Administration (Higher Education Administration) - Doctor of Education (p. 215)
- Educational Leadership & Administration (Higher Education Administration) - Master of Arts (p. 151)
- Educational Leadership & Administration (Higher Education) - Doctor of Philosophy (p. 216)
- Educational Leadership & Administration (Pk-12 Administration) - Doctor of Education (p. 217)
- Educational Leadership & Administration (Pk-12 Education) - Doctor of Philosophy (p. 218)
- Educational Leadership and Administration - Undergraduate Minor (p. 1450)
- Electric Energy Systems - Graduate Certificate (https://catalogs.nmsu.edu/nmsu/graduate-school/electric-energy-systems-graduate-certificate/)
- Electrical Engineering (Artificial Intelligence, Machine Learning, & Data Science) - Bachelor of Science in Electrical Engineering (p. 1111)
- Electrical Engineering (Communications and Signal Processing) - Bachelor of Science in Electrical Engineering (p. 1114)
- Electrical Engineering (Computers and Microelectronics) - Bachelor of Science in Electrical Engineering (p. 1116)
- Electrical Engineering (Controls & Robotics) - Bachelor of Science in Electrical Engineering (p. 1119)
- Electrical Engineering (Electromagnetics and Photonics) - Bachelor of Science in Electrical Engineering (p. 1121)
- Electrical Engineering (Power) - Bachelor of Science in Electrical Engineering (p. 1124)
- Electrical Engineering (Space Systems Engineering) - Bachelor of Science in Electrical Engineering (p. 1127)
- Electrical Engineering - Bachelor of Science in Electrical Engineering (p. 1109)
- Electrical Engineering - Master of Engineering in Electrical Engineering (p. 151)
- Electrical Engineering - Master of Science in Electrical Engineering (p. 153)
- Electrical Engineering - Undergraduate Minor (p. 1130)
- Electrical Engineering Technology - Bachelor of Science in Engineering Technology (p. 1178)
- Elementary Education (Language Arts K-8) - Bachelor of Science in Education (p. 1423)
- Elementary Education (Math K-8) - Bachelor of Science in Education (p. 1425)
- Elementary Education (Science K-8) - Bachelor of Science in Education (p. 1427)
- Elementary Education (Social Studies K-8) - Bachelor of Science in Education (p. 1428)
- Elementary Education Alternative Licensure - Graduate Certificate (p. 247)
- Engineering (Chemical Engineering) - Doctor of Philosophy (p. 219)
- Engineering (Civil Engineering) - Doctor of Philosophy (p. 220)
- Engineering (Electrical Engineering) - Doctor of Philosophy (p. 221)
- Engineering (Industrial Engineering) - Doctor of Philosophy (p. 223)
- Engineering (Mechanical Engineering) - Doctor of Philosophy (p. 224)
- Engineering Physics (Aerospace Engineering) - Bachelor of Science in Engineering Physics (p. 1141)
- Engineering Physics (Chemical Engineering) - Bachelor of Science in Engineering Physics (p. 1143)
- Engineering Physics (Electrical Engineering) - Bachelor of Science in Engineering Physics (p. 1145)
- Engineering Physics (Mechanical Engineering) - Bachelor of Science in Engineering Physics (p. 1147)
- English (Creative Writing) - Bachelor of Arts (p. 730)
- English (Literature, Language and Culture) - Bachelor of Arts (p. 734)
- English (Rhetoric, Digital Media and Professional Communication) - Bachelor of Arts (p. 736)
- English - Bachelor of Arts (p. 732)
- English - Master of Arts (p. 156)
- English - Undergraduate Minor (p. 740)
- Enterprise Systems - Undergraduate Minor (p. 986)
- Entomology - Undergraduate Minor (p. 397)
- Entrepreneurship - Undergraduate Minor (p. 1017)
- Entrepreneurship - Undergraduate Minor (p. 1211)
- Environmental Engineering - Master of Science in Environmental Engineering (p. 158)
- Environmental Engineering - Undergraduate Minor (p. 1086)
- Environmental Science - Bachelor of Science in Environmental Science (p. 460)
- Environmental Science - Undergraduate Minor (p. 476)
- Ethics - Undergraduate Minor (p. 917)
- Exercise Science - Undergraduate Minor (p. 1316)
- Experimental Psychology - Doctor of Philosophy (p. 225)
- Experimental Psychology - Master of Arts (p. 159)

F

- Family and Consumer Sciences (Couples, Marriage and Family Therapy) - Master of Science (p. 159)
- Family and Consumer Sciences (Food Science and Technology) - Master of Science (p. 159)
- Family and Consumer Sciences (Hotel, Restaurant and Tourism Management) - Master of Science (p. 160)
- Family and Consumer Sciences Education - Bachelor of Science in Family and Consumer Sciences (p. 414)
- Fashion Merchandising & Design - Undergraduate Minor (p. 425)
- Fashion Merchandising and Design - Bachelor of Science in Family and Consumer Sciences (p. 415)
- Finance (Financial Analysis) - Bachelor of Business Administration (p. 1013)
- Finance (Risk Management and Insurance) - Bachelor of Business Administration (p. 1014)

- Finance - Bachelor of Business Administration (p. 1011)
- Finance - Graduate Certificate (p. 248)
- Finance - Undergraduate Minor (p. 1017)
- Fine Arts - Master of Fine Arts (p. 162)
- Fish, Wildlife and Conservation Ecology - Graduate Minor (p. 255)
- Fish, Wildlife and Conservation Ecology - Master of Science (p. 162)
- Fisheries and Wildlife Science (Aquatic Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology (p. 437)
- Fisheries and Wildlife Science (Wildlife Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology (p. 440)
- Food Science - Doctor of Philosophy (p. 225)
- Food Science - Undergraduate Minor (p. 425)
- Food Science and Technology (Science, Technology and Engineering) - Bachelor of Science in Food Science and Technology (p. 418)
- Food Studies - Graduate Minor (p. 256)
- Forensic Science - Undergraduate Minor (p. 704)
- French - Undergraduate Minor (p. 836)

G

- Gender & Sexuality Studies - Undergraduate Minor (p. 740)
- Gender and Sexuality Studies - Bachelor of Arts (p. 738)
- Gender and Sexuality Studies - Graduate Minor (p. 256)
- General Agriculture - Bachelor of Science in Agriculture (p. 395)
- General Business (Entrepreneurship) - Bachelor of Business Administration (p. 1025)
- General Business - Bachelor of Business Administration (p. 1023)
- Genetics and Biotechnology - Bachelor of Science in Genetics (p. 462)
- Genetics and Biotechnology - Bachelor of Science in Genetics (p. 577)
- Genetics and Biotechnology - Undergraduate Minor (p. 476)
- Genetics and Biotechnology - Undergraduate Minor (p. 582)
- Geographic Information Science and Technology - Graduate Minor (p. 257)
- Geographic Information Science and Technology - Undergraduate Minor (p. 763)
- Geography (Environmental Studies) - Bachelor of Science (p. 757)
- Geography (Geographic Information Science and Technology) - Bachelor of Science (p. 760)
- Geography - Doctor of Philosophy (p. 226)
- Geography - Master of Applied Geography (p. 163)
- Geography - Undergraduate Minor (p. 763)
- Geology (Earth and Environmental Sciences) - Bachelor of Science (p. 768)
- Geology (Earth Science Education) - Bachelor of Science (p. 771)
- Geology (Geological Sciences) - Bachelor of Science (p. 773)
- Geology - Master of Science (p. 166)
- Geology - Undergraduate Minor (p. 776)
- Geomatics - Bachelor of Science in Geomatics (p. 1180)
- Geomatics - Undergraduate Minor (p. 1198)
- Geotechnical Engineering - Undergraduate Minor (p. 1086)
- German - Undergraduate Minor (p. 837)
- Gerontology - Graduate Minor (p. 257)
- Gerontology - Undergraduate Minor (p. 1363)

H

- Health Equity Sciences - Doctor of Philosophy (p. 228)
- History (Public History) - Master of Arts (p. 167)
- History - Bachelor of Arts (p. 790)
- History - Graduate Minor (p. 257)
- History - Master of Arts (p. 166)
- History - Undergraduate Minor (p. 792)
- Horse Management - Undergraduate Minor (p. 379)
- Horticulture (Turfgrass Science and Management) - Bachelor of Science in Agriculture (p. 467)
- Horticulture - Bachelor of Science in Agriculture (p. 464)
- Horticulture - Master of Science (p. 168)
- Horticulture - Undergraduate Minor (p. 477)
- Hotel, Restaurant and Tourism Management - Bachelor of Science (p. 489)
- Hotel, Restaurant and Tourism Management - Undergraduate Minor (p. 491)
- Human Animal Interaction - Undergraduate Minor (p. 379)
- Human Biology - Undergraduate Minor (p. 582)
- Human Nutrition and Dietetic Science (Nutrition Education) - Bachelor of Science in Family and Consumer Sciences (p. 419)
- Human Nutrition and Dietetic Science (Pre-Dietetics/Dietetics) - Bachelor of Science in Family and Consumer Sciences (p. 422)
- Human Resource Management - Undergraduate Minor (p. 1032)
- Human Rights - Undergraduate Minor (p. 705)

I

- Individualized Studies (Pre-Pharmacy) - Bachelor of Individualized Studies (p. 793)
- Individualized Studies - Bachelor of Individualized Studies (p. 792)
- Industrial Engineering - Bachelor of Science in Industrial Engineering (p. 1209)
- Industrial Engineering - Master of Engineering in Industrial Engineering (p. 169)
- Industrial Engineering - Master of Science in Industrial Engineering (p. 170)
- Information and Communication Technology (Cyber Defense) - Bachelor of Information and Communication Technology (p. 1185)
- Information and Communication Technology (Network Technologies) - Bachelor of Information and Communication Technology (p. 1189)
- Information and Communication Technology (Software Development) - Bachelor of Information and Communication Technology (p. 1192)
- Information and Communication Technology - Bachelor of Information and Communication Technology (p. 1182)
- Information Security Technology - Undergraduate Minor (p. 1198)
- Information Systems - Bachelor of Business Administration (p. 983)
- Information Systems - Graduate Minor (p. 257)
- Information Systems - Undergraduate Minor (p. 986)
- Integrated Behavioral Health Care - Graduate Minor (p. 258)
- Interior Spaces - Undergraduate Minor (p. 425)

- International Business - Bachelor of Business Administration (p. 1002)
- International Business - Undergraduate Minor (p. 1005)
- International Relations - Undergraduate Minor (p. 947)
- International Studies - Undergraduate Minor (p. 837)

J

- Journalism and Media Studies - Bachelor of Arts (p. 801)
- Journalism and Media Studies - Undergraduate Minor (p. 805)
- Justice, Political Philosophy, and Law - Bachelor of Arts (p. 914)
- Justice, Poltical Philosophy, and Law - Undergraduate Minor (p. 917)

K

- Kinesiology (Exercise Science) - Bachelor of Science in Kinesiology (p. 1308)
- Kinesiology (Performance Psychology) - Bachelor of Science in Kinesiology (p. 1311)
- Kinesiology (Physical Education) - Bachelor of Science in Kinesiology (p. 1314)
- Kinesiology - Doctor of Philosophy (p. 229)

L

- Languages (French) - Bachelor of Arts (p. 826)
- Languages (German) - Bachelor of Arts (p. 828)
- Languages (Spanish) - Bachelor of Arts (p. 831)
- Latin American Studies - Supplemental Major (p. 838)
- Law and Society - Supplemental Major (p. 948)
- Law and Society - Undergraduate Supplemental Major (p. 705)
- Leadership in Agricultural Communications - Undergraduate Minor (p. 343)
- Lean Manufacturing and Analytics - Undergraduate Minor (p. 1211)
- Linguistics - Bachelor of Arts (p. 833)
- Linguistics - Supplemental Major (p. 839)
- Linguistics - Undergraduate Minor (p. 837)
- Literature - Undergraduate Minor (p. 741)
- Livestock Production - Undergraduate Minor (p. 379)

M

- Management (Human Resource Management) - Bachelor of Business Administration (p. 1027)
- Management (Project & Supply Chain Management) - Bachelor of Business Administration (p. 1029)
- Management (Small Business Management & Entrepreneurship) - Bachelor of Business Administration (p. 1031)
- Management - Undergraduate Minor (p. 1033)
- Manufacturing - Undergraduate Minor (p. 1198)
- Marketing (Advertising) - Bachelor of Business Administration (p. 1042)
- Marketing (PGA Golf Management) - Bachelor of Business Administration (p. 1043)
- Marketing (Professional Selling) - Bachelor of Business Administration (p. 1045)
- Marketing (Strategic Marketing) - Bachelor of Business Administration (p. 1047)
- Marketing - Undergraduate Minor (p. 1049)
- Master of Public Health/Master of Social Work - Dual Degree (https://catalogs.nmsu.edu/nmsu/graduate-school/master-public-health-master-social-work-dual-degree/)
- Materials Engineering - Graduate Minor (p. 259)
- Materials Engineering - Undergraduate Minor (p. 1072)
- Mathematics (Actuarial Science and Insurance) - Bachelor of Science (p. 857)
- Mathematics (Applied Mathematics) - Bachelor of Science (p. 859)
- Mathematics (Computational Mathematics) - Bachelor of Science (p. 861)
- Mathematics (Foundations) - Bachelor of Science (p. 863)
- Mathematics (General Mathematics) - Bachelor of Science (p. 864)
- Mathematics (Probability and Statistics) - Bachelor of Science (p. 867)
- Mathematics (Secondary Mathematics Education) - Bachelor of Science (p. 869)
- Mathematics - Doctor of Philosophy (p. 230)
- Mathematics - Graduate Minor (p. 259)
- Mathematics - Master of Science (p. 172)
- Mathematics - Undergraduate Minor (p. 871)
- Meat Science - Undergraduate Minor (p. 425)
- Mechanical Engineering - Bachelor of Science in Mechanical Engineering (p. 1226)
- Mechanical Engineering - Master of Engineering in Mechanical Engineering (p. 173)
- Mechanical Engineering - Master of Science in Mechanical Engineering (p. 174)
- Mechanical Engineering - Undergraduate Minor (p. 1228)
- Mechanical Engineering Technology - Bachelor of Science in Engineering Technology (p. 1195)
- Medical Anthropology - Undergraduate Minor (p. 525)
- Medieval and Early Modern Studies - Undergraduate Minor (p. 741)
- Microbiology - Bachelor of Science (p. 579)
- Microbiology - Undergraduate Minor (p. 583)
- Military Science - Undergraduate Minor (p. 878)
- Molecular Biology - Doctor of Philosophy (p. 231)
- Molecular Biology - Graduate Minor (p. 259)
- Molecular Biology - Master of Science (p. 175)
- Molecular Biology- Undergraduate Minor (p. 880)
- MPA-MCJ Program - Dual Degree (p. 176)
- Museum Conservation - Undergraduate Minor (p. 549)
- Museum Studies - Graduate Certificate (p. 248)
- Music (Collaborative Piano) - Master of Music (p. 176)
- Music (Conducting) - Master of Music (p. 177)
- Music (Instrumental Performance) - Bachelor of Music (p. 901)
- Music (Music Education) - Master of Music (p. 177)
- Music (Performance) - Master of Music (p. 178)
- Music (Piano Performance) - Bachelor of Music (p. 903)
- Music (Pre-Speech Language Pathology) - Bachelor of Arts (p. 898)
- Music (Theatre) - Bachelor of Arts (p. 899)
- Music (Vocal Performance) - Bachelor of Music (p. 905)

- Music - Bachelor of Arts (p. 896)
- Music - Undergraduate Minor (p. 911)
- Music Education (K12 Instrumental) - Bachelor of Music Education (p. 907)
- Music Education (K12 Vocal) - Bachelor of Music Education (p. 909)

N

- Native American Studies - Graduate Minor (p. 260)
- Native American Studies - Undergraduate Minor (p. 1245)
- Natural Resource Economics - Undergraduate Minor (p. 357)
- Natural Resource Economics and Policy - Bachelor of Science in Agriculture (p. 354)
- Nuclear Chemical Engineering - Undergraduate Minor (p. 1073)
- Nursing - Bachelor of Science in Nursing (p. 1346)
- Nursing Practice (Nurse Anesthesiology) - Doctor of Nursing Practice (p. 232)
- Nutrition - Undergraduate Minor (p. 426)

O

- Online Teaching and Learning - Graduate Certificate (p.)

P

- Pest Management - Undergraduate Minor (p. 397)
- Philosophy - Bachelor of Arts (p. 915)
- Philosophy - Undergraduate Minor (p. 918)
- Physics - Bachelor of Arts (p. 931)
- Physics - Bachelor of Science (p. 933)
- Physics - Doctor of Philosophy (p. 233)
- Physics - Graduate Minor (p. 260)
- Physics - Master of Science (p. 179)
- Physics - Undergraduate Minor (p. 935)
- Plant and Environmental Science - Doctor of Philosophy (p. 233)
- Plant and Environmental Science - Master of Science (p. 180)
- Plant Pathology - Undergraduate Minor (p. 397)
- Political Science - Bachelor of Arts (p. 945)
- Political Science - Master of Arts (p. 180)
- Political Science - Undergraduate Minor (p. 948)
- Political Theory - Undergraduate Minor (p. 948)
- Pre-Health - Undergraduate Minor (p. 1233)
- Pre-Law in Intellectual Property - Undergraduate Minor (p. 1073)
- Pre-Medicine Studies- Undergraduate Minor (p. 1073)
- Prebusiness - Associate in Prebusiness (p. 972)
- Principal Licensure - Graduate Certificate (p. 249)
- Professional Selling - Undergraduate Minor (p. 1049)
- Psychology - Bachelor of Arts (p. 955)
- Psychology - Graduate Minor (p. 260)
- Psychology - Undergraduate Minor (p. 958)
- Public Administration - Master of Public Administration (p. 181)
- Public Administration - Undergraduate Minor (p. 948)
- Public Health (Health Behavior and Health Promotion) - Master of Public Health (p. 182)
- Public Health (Health Management, Administration & Policy) - Master of Public Health (p. 184)
- Public Health - Bachelor of Public Health (p. 1361)
- Public Health - Graduate Certificate (p. 249)
- Public Health Sciences - Undergraduate Minor (p. 1363)
- Public History and Public Administration - Dual M.A. Degree (p. 185)
- Public Law - Undergraduate Minor (p. 948)
- Public Utility Regulation and Economics - Graduate Certificate (p. 250)

R

- Ranch Management - Undergraduate Minor (p. 380)
- Range Science - Bachelor of Science in Agriculture (p. 377)
- Range Science - Doctor of Philosophy (p. 234)
- Range Science - Graduate Minor (p. 260)
- Range Science - Master of Science (p. 185)
- Range Science - Undergraduate Minor (p. 380)
- Reading - Specialist in Education (p. 244)
- Religious Studies - Undergraduate Minor (p. 526)
- Renewable Energy Technologies - Undergraduate Minor (p. 1199)
- Rhetoric and Professional Communication - Doctor of Philosophy (p. 234)
- Rhetoric and Professional Communication - Undergraduate Minor (p. 742)
- Risk Management and Insurance - Undergraduate Minor (p. 1017)

S

- School Psychology - Doctor of Philosophy (p. 235)
- School Psychology - Specialist in Education (p. 244)
- Secondary Education (Secondary Education General Science) - Bachelor of Science in Education (p. 1429)
- Secondary Education (Secondary Education Language Arts) - Bachelor of Science in Education (p. 1432)
- Secondary Education (Secondary Education Math) - Bachelor of Science in Education (p. 1434)
- Secondary Education (Secondary Education Social Studies) - Bachelor of Science in Education (p. 1437)
- Secondary Education - Undergraduate Minor (p. 1450)
- Secondary Education Alternative Licensure - Graduate Certificate (p. 251)
- Security Studies - Graduate Minor (p. 261)
- Social Media Management - Undergraduate Minor (p. 805)
- Social Work - Bachelor of Social Work (p. 1461)
- Social Work - Master of Social Work (Full-Time Advanced) (p. 188)
- Social Work - Master of Social Work (Full-Time) (p. 187)
- Social Work - Master of Social Work (Part-Time) (p. 189)
- Sociology - Bachelor of Arts (p. 1474)
- Sociology - Graduate Minor (p. 261)
- Sociology - Master of Arts (p. 190)
- Sociology - Undergraduate Minor (p. 1476)
- Software Development - Undergraduate Minor (p. 670)
- Soil Science (Environment and Resource Management) - Bachelor of Science in Agriculture (p. 470)
- Soil Science (Soil and Water Science) - Bachelor of Science in Agriculture (p. 472)
- Soil Science (Soils) - Bachelor of Science in Agriculture (p. 474)

- Soil Science - Undergraduate Minor (p. 477)
- Spanish - Master of Arts (p. 191)
- Spanish - Undergraduate Minor (p. 838)
- Spanish Counseling - Graduate Minor (p. 261)
- Special Education (Elementary Education) - Bachelor of Science in Education (p. 1439)
- Special Education (Secondary Education) - Bachelor of Science in Education (p. 1441)
- Special Education - Graduate Minor (p. 262)
- Special Education - Master of Arts (p. 193)
- Special Education Alternative Licensure - Graduate Certificate (https://catalogs.nmsu.edu/nmsu/graduate-school/special-education-alternative-licensure-graduate-certificiate/)
- Sports Communication - Undergraduate Minor (p. 620)
- Strategic Communications - Undergraduate Minor (p. 805)
- Structural Engineering - Undergraduate Minor (p. 1087)
- Supply Chain and Operations Research Analytics - Undergraduate Minor (p. 1212)
- Sustainability - Graduate Certificate (p. 251)
- Sustainability- Undergraduate Minor (p. 526)
- Systems Engineering - Graduate Certificate (p. 252)
- Systems Engineering - Undergraduate Minor (p. 1212)

T

- Teaching English to Speakers of Other Languages - Graduate Certificate (p. 252)
- Teaching Spanish for Heritage Language Learners - Graduate Certificate (p. 253)
- Telemetry - Graduate Certificate (https://catalogs.nmsu.edu/nmsu/graduate-school/telemetry-graduate-certificate/)
- Theatre Arts (Design/Technical/Management) - Bachelor of Arts (p. 965)
- Theatre Arts (Musical Theatre) - Bachelor of Arts (p. 966)
- Theatre Arts - Bachelor of Arts (p. 963)
- Theatre Arts - Undergraduate Minor (p. 968)
- Transborder and Global Human Dynamics - Doctor of Philosophy (p. 236)

U

- U.S.-Mexico Border Health Issues - Graduate Minor (p. 262)
- U.S.-Mexico Border Health Issues - Undergraduate Minor (p. 1363)

W

- Water Resource Engineering - Undergraduate Minor (p. 1087)
- Water Science and Management (Agricultural Water Resources) - Doctor of Philosophy (p. 239)
- Water Science and Management (Agricultural Water Resources) - Master of Science (p. 196)
- Water Science and Management (International Water Resilience) - Doctor of Philosophy (p. 240)
- Water Science and Management (International Water Resilience) - Master of Science (p. 196)
- Water Science and Management (Water Economics and Policy) - Doctor of Philosophy (p. 240)
- Water Science and Management (Water Economics and Policy) - Master of Science (p. 197)
- Water Science and Management (Water Informatics) - Doctor of Philosophy (p. 241)
- Water Science and Management (Water Informatics) - Master of Science (p. 197)
- Water Science and Management (Water Quality and Treatment) - Master of Science (p. 198)
- Water Science and Management (Water Quality Treatments) - Doctor of Philosophy (p. 241)
- Water Science and Management (Watershed and Aquatic/Riparian Wetlands) - Doctor of Philosophy (p. 242)
- Water Science and Management (Watersheds and Aquatic/Riparian Wetlands) - Master of Science (p. 199)
- Water Science and Management - Doctor of Philosophy (p. 239)
- Water Science and Management - Master of Science (p. 195)
- Weed Science - Undergraduate Minor (p. 397)
- Wildlife Science - Undergraduate Minor (p. 443)

Catalog Glossary

A

Academic Calendar

A calendar designating important dates from the start of the fall semester and continuing through the completion of the following summer session.

Academic College:

A degree granting academic unit, generally organized around subject matter, which house related academic Departments and degree programs.

Academic Course:

Courses that count as credit toward a degree, or other academic credential such as a certificate, concentration or minor.

Academic Department:

An academic unit, generally organized around subject matter, which house related degree programs and report to an Academic College.

Academic Integrity:

Behavior that supports and affirms he fundamental values of honor, integrity and ethics.

Academic Probation I:

Registration restrictions of no more than 13 credit hours applied when:

- An Undergraduate student on Academic Warning with a semester GPA less than 2.0, and the cumulative GPA remains below 2.0 at the conclusion of the semester or if the student maintains a semester GPA greater than 2.0 while on Academic Probation I but the cumulative GPA is still less than 2.0. Academic Probation I will also occur if a student falls below a 2.0 cumulative GPA from Good Academic Standing if Academic Warning already occurred in a previous term.
- A graduate student's semester GPA is above a 3.0 and the cumulative GPA drops below 3.0; or when the semester and cumulative GPA's

drop below 3.0 and the previous academic standing is Graduate Academic Good Standing.

Academic Probation II:

Registration restrictions of no more than 7 credit hours applied when:

- An undergraduate student falls below a semester 2.0 GPA and the cumulative GPA remains below a 2.0 while on Academic Probation I, or maintains a semester GPA greater than 2.0 while on Academic Probation II but the cumulative GPA is still less than 2.0.
- A graduate student's semester GPA and the cumulative GPA drops below as 3.0 and the previous academic standing is one of Graduate Academic Probation I or Graduate Re-admit on Probation I.

Academic Standing:

Academic standing is defined by a student's grade point average (GPA). Academic standings at NMSU are:

- Good standing
- Warning
- Probation I
- Probation II
- Suspension

Academic Suspension:

Registration restriction barring students from enrolling in courses at NMSU for, at least, one semester when:

- An undergraduate student does not achieve a semester 2.0 GPA or higher, and the cumulative remains below a 2.0 while under Academic Probation II. Undergraduate students on Academic Suspension must sit out a minimum of 1 semester and apply for re-admission.
- A graduate student is unable to maintain a semester GPA of 3.0 or higher and the cumulative remains below 3.0 GPA while under Graduate Academic Probation II.

Academic Warning (Undergraduate Only):

Notification to an undergraduate student, after final grades are processed, that their cumulative grade point average is below the 2.0 minimum requirement to continue enrollment at NMSU. Issued only once, the first time an undergraduate student's cumulative GPA falls below 2.0 while in good academic standing.

Academic Year

A period of time from the start of the fall semester and continuing through the completion of the following summer session.

Accreditation / Accredited:

Formal recognition of an educational entity that maintains standards qualifying its graduates for further study or professional practice. A university, college or program can be certified as fulfilling certain standards of national and/or regional professional associations.

Admission:

The process of applying and meeting a set of requirements, established by the University, College, and/or degree program, that enable the student to be accepted.

Adjusted Credit Option (ACO):

A policy that allows students who had previously experienced academic difficulty to make a fresh start. The adjusted credit option provides eligible undergraduate students who earned a low grade-point average (less than 2.0 cumulative) during their first few semesters to reset their GPA calculation. This option may be used only once and is not reversible. This option must be approved by the Director of the Center for Academic Advising and Student Support or the Associate Dean/VP for Academics at the student's academic college.

Administrative Withdrawal:

In the event that a student has stopped either attending class or stopped using the online Learning Management System, without formally withdrawing, the University reserves the right to remove the student from the class by means of an administrative withdrawal.

Advanced Placement (AP):

A group of standardized tests assessing college-level knowledge. At NMSU, AP scores may be evaluated for academic transfer credit in accordance with State of NM Higher Education Department guidance.

Advising Document:

An unofficial document of a student's academic record, including courses taken and grades earned from time of admission to end of the last semester attended.

Advisor:

A University employee who helps students make informed and responsible decisions in the pursuit of their academic goals.

Articulation:

The process of evaluating courses to determine whether coursework completed at one college will meet the requirements for admission, transfer credit, general education, or major preparation at another college.

Articulation Agreement:

Agreements between community and four-year colleges which indicate the acceptability of courses in transfer toward meeting specific degree requirements. See https://miniapps.nmsu.edu/transfer/.

Associate Degree (AA/AS/AAS):

A degree, usually, granted by a community college to students who complete a specified program of study totaling a minimum of 60 credit hours of coursework. Academic associate degrees are awarded in arts or science and are designed to prepare a student to transfer to a baccalaureate program and generally cover the first two years of a four-year degree. Applied associate degrees are professional programs designed to prepare students to enter the workforce in a specific field. Associate degrees are sometimes called *two-year degrees,* in contrast to a *four-year or bachelor's degree* awarded by a university.

Asynchronous Class (WB):

A class that is taught fully online, with no requirement for attendance at a specific day/time.

Audit:

A grade mode and enrollment status that carries no course credit. Auditing a class indicates a student is attending for the purpose of reviewing the information. No grades or credits are earned and audited courses cannot be used to meet pre- or co-requisite requirements or count in enrollment verification. Full tuition is charged.

B

Bachelor's (Baccalaureate) Degree (BA/BS):

A level of education marked by the completion of the equivalent of four or more years of full-time education (at least 120 credit hours of coursework) designed to provide the student with a broad educational base as well as knowledge in a specific field. The baccalaureate degree requires coursework to satisfy the New Mexico General Education requirements, New Mexico State University's Viewing a Wider World requirements, and the requirements of the major field of study. Bachelor of Arts (BA), Bachelor of Science (BS), and other named bachelor's degrees are offered by NMSU and many other four-year universities.

Basic Skills:

All undergraduate students must demonstrate Basic Academic Skills in both English and mathematics before enrolling in any upper-division course (numbered 300 or higher). These requirements ensure that each student in the upper-division courses has the ability to succeed without compromising the learning experience of other students.

C

Career Technical Courses (CTE):

Courses that provide students with relevant technical knowledge and skills through applied learning toward the completion of a certificate or applied associates degree.

Catalog:

A student's official guide to programs, courses and policies.

Catalog Year:

The degree requirements for each program are updated and published annually, by academic year. Students must meet the degree requirements in the Catalog that was published the year they were first admitted, or any year thereafter until they graduate. Catalogs expire eight (8) academic years after the year of initial publication.

Canvas (Learning Management System):

A web-based learning management system (LMS) used by NMSU faculty and students to access and manage online course learning materials and communicate about skill development and learning achievement.

CCN (State of NM Common Course Number):

Common numbering system used to identify courses which are often required as lower division preparation for majors. The courses are taught at many colleges and universities in the State of NM. The CCN system allows counselors and students to determine equivalent courses offered at different colleges by referring to the common number.

Certificate:

An award granted upon completion of a prescribed series of courses preparing students for employment in selected occupation/vocational fields which require training beyond high school. A certificate indicates skill competency in a technical career area and may be earned while progressing toward degree.

- **Certificate of Achievement (1 – 15 credit hours):**
  - A program of study less than 16 credits and is not eligible for Federal financial aid. It must provide employment related and/or career enhancing skills necessary to succeed in a job or a chosen field of study. These courses can be a subset of those required for a corresponding Certificate of Completion or Applied Associate's Degree. These certificates are recorded on the student's transcript.
- **Certificate of Completion (16+ credit hours):**
  - A program of study of 16 or more credits that may be eligible for Federal financial aid and has been approved through the University academic review process. These courses can be a subset of those required for a corresponding Applied Associate's Degree. These certificates are recorded on the student's transcript.

Challenge Exam:

Any enrolled student with a cumulative GPA of at least 2.0 currently attending classes may, with permission of the appropriate department, challenge by examination any undergraduate course in which credit has not been previously earned except an independent study, research or reading course, or any foreign language course that precedes the final course in the lower-division sequence. The fee for challenging a course is the same as the approved tuition rate. Courses may not be challenged under the S/U option.

Class:

A scheduled section of a course offered for student enrollment during a particular semester.

Class Delivery Modes:

Classes at NMSU are delivered in a variety of modalities.

- **CL (Classroom/Lecture):** traditional in-person class meetings that occur on specified days and times in a specified location.
- **LB (Lab):** traditional in-person lab meetings that occur on specified days and times in a specified location.
- **HY (Online with In Person Meetings):** hybrid delivery that is offered both online and with required in-person class meetings that occur on specified days and times in a specified location.
- **ONL (Online with Synchronous Meetings):** online class meetings that require all students to meet virtually on specified days and times
- **WB (Online with no Synchronous Meeting):** online class meetings that do not require students to meet virtually
- **IND (Independent Meeting):** students and instructors schedule meetings on an as needed basis to discuss course content and student progress
- **TD (Thesis/Dissertation):** thesis/dissertation with implied meetings on an as needed basis to discuss course content and student progress
- **PC (Practicum):** practicum/clinical with implied meetings on an as needed basis to discuss course content and student progress

Classification:

Student levels are determined by the number of undergraduate credit hours completed, or by the graduate level degree program to which a student is admitted:

- Freshman (1 – 28 credit hours)
- Sophomore (29 – 59 credit hours)
- Junior (60 – 89 credit hours)
- Senior (90+ credit hours)

- Masters (Master level degree program)
- Doctoral (Doctoral level degree program
- Non-degree seeking
- Dual credit (concurrent high school enrollment)

Clinical:
A temporary, hands-on work experience course specifically in clinical settings that allow students to practice skills learned in healthcare related areas of student in a real world environment under direct supervision of a qualified clinical professional.

Cohort:
A group of students that start and complete a degree or certificate program together.

College:
See "Academic College"

College Level Examination Program (CLEP):
A group of standardized tests assessing college-level knowledge. At NMSU, CLEP scores may be evaluated for academic transfer credit.

Commencement:
The ceremonial celebration for students who have completed their program of study at the end of the semester. Commencement and graduation are not the same thing (see "Graduation").

Community College:
Postsecondary educational institution that typically offer college preparatory, workforce development, and adult education coursework.

Completion Rate:
Ratio of courses completed versus attempted.

Concentration:
An area of emphasis or specialization within a program or study (major). A minimum of 12 credits within the concentration are required, although some majors may require more. At the baccalaureate level, at least 9 of these 12 credits must be numbered 300 or above; at the graduate level at least 9 of these 12 credits must be numbered 500 or above. A concentration will be indicated on the student's transcript.

Consent of Instructor:
Student must receive consent of the class instructor prior to being allowed to register for the class / course section.

Corequisite:
Courses that students must register for at the same time.

Course:
See "Academic Course"

Course Exception:
An exemption from a required course because competencies and/or learning objectives of the course have been, demonstrably, attained. An exception removes the course, and its associated credits, from a student's degree program requirements. All substitutions must be approved the Academic Associate Dean of the College awarding the degree.

Course Substitution:
The replacement of a required course in a student's program with another course that meets the expected outcomes, has common general content, and is similarly aligned to the required course. All substitutions must be approved the Academic Associate Dean of the College awarding the degree.

Credit Hour:
A measure of credit earned for course completion. A unit is based on the number of hours of instruction per week required in the classroom and/or lab or in independent study. A course earning three semester units will usually meet for three lecture hours a week. One credit hour is equal to 750 hours of instruction time per semester.

Credit for Prior Learning (CPL):
Competency-based education that grants academic credit to students for pre-defined documented life experiences that indicate mastered competencies in an area of study, such as state licensures.

CRN (Course Reference Number):
A five digit number identifying a particular class being offered for student registration.

D

Dean / Associate Dean (Academic):
The title of an administrative position in charge of an Academic College.

Dean of Students:
An administrative position, and office, that oversees the majority of student related experiences outside the college classroom, and can assist with classroom/academic related issues, as well.

Dean's List:
A published list of students, who were enrolled in 12 or more credit hours and earned a GPA in the top 15% of their Academic College each semester.

Degree:
Recognition of completion of program of study. A diploma is issued and notation posted on the transcript.

Degree Audit (DARS / STAR):
A system that produces individualized reports reflecting a student's academic progress toward a specific degree or credential. The degree audit is a tool for use throughout the academic career of student; from advising to graduation.

Department:
See "Academic Department"

Department Head / Department Chair:
The title of an administrative position in charge of an Academic Department.

Developmental Courses:

Courses that prepare students to complete required college level coursework in Math (CCDM), English (CCDE) and Writing (CCDW).

Diploma:

An official document issued by an educational institution signifying the recipient has successfully completed a particular program of study.

Dropping/Withdrawing from Courses:

Officially withdrawing from a class through the online registration system, or in person with an academic advisor or at the Student Records Office. Classes may be dropped/cancelled according to the registration deadlines posted at https://records.nmsu.edu/students/important-dates.html.

Doctoral Degree:

A degree requiring significant scholarly study beyond the master's. The individualized program of study is designed to meet the campus residency requirement and includes a minimum of 30 graduate course credits beyond the master's. If the Doctoral degree requires a dissertation, at least 18-credits of dissertation work must be included. The professional doctoral degree includes a practicum or special project that culminates in a written report which demonstrates a command of the relevant scholarly literature and links it to the specific clinical or practical experience.

Dual Credit:

Students who are simultaneously enrolled in both high school and NMSU. Dual credit courses and grades appear on both the high school and college transcripts.

E

Elective:

Courses that are not used to meet a specific major, general education, or graduation requirements, but can be used to complete the total number of credit hours required for a degree.

Enrollment:

Process by which students formally select classes each term.

Exception:

College determination to allow a student to graduate without completing a degree requirement.

Experiential Learning:

A method of learning from experience that encourages reflection on the development of new skills and knowledge. Examples include internships, co-ops, study abroad, student exchange, practicums, clinicals, and field experience.

F

Faculty (Instructor):

Any employee who teaches classes at an educational institution.

Fees:

Costs, not included in tuition, to cover the cost of materials, equipment and services. Fees may be charged at the institutional level, College level, Department level, Degree/program level, and/or course level.

FERPA (Family Educational Rights and Privacy Act):

A Federal law that protects the privacy of student education records. The law applies to all schools that receive funds under an applicable program of the U.S. Department of Education.

Financial Aid:

Federal and State funding to assist students with the cost of their college education.

A Department at each NMSU campus that coordinates and administers this funding.

FAFSA (Free Application for Federal Student Aid):

Universal application for federal financial aid, typically required before consideration for any need based assistance is awarded.

Fractional Grading:

Plus and minus designations added to traditional letter grades (A-, B+/B-, C+) used in calculating the grade point average.

Freshman:

A student classification for undergraduate students who have completed less than 28 college credits, including transfer credits.

Full-time:

A schedule of 12 or more credit hours per semester for undergraduate students, and 9 or more credit hours per semester for graduate students.

G

General Education (GE):

A program of courses that provides students with a broad educational experience. Courses are typically introductory in nature and provide students with fundamental skills and knowledge in mathematics, English, arts, humanities, and physical, biological, and social sciences. Transfer students often take these classes while attending a community college. Completion of a general education program is required for the baccalaureate degree.

General Education (GE) Certification:

An official transcript notation verifying that a student has completed courses satisfying all or a portion of the lower division General Education (GE) requirements.

Grade Appeals:

It is the student's responsibility to communicate concerns they may have about any grade in a class to the instructor of the class. If the issue is not resolved, the student may formally appeal a final grade for the following reasons:

- Inconsistency between what is written in the syllabus and what is practiced.
- Grade miscalculation or other grading errors that cause a change to the final course grade.

Students may not appeal disagreements with teaching methodologies, instructor specific policies, specific course assignments, grade weighting methods, or attendance policies.

Grade Mode:
A method of scoring academic achievement. Grade modes include, but are not limited to, traditional letter grades, S/U grades (satisfactory/unsatisfactory), and audit.

Grade Point Average (GPA):
The average of all grades received. Also called GPA. Term GPA is the average of the grades received in a single semester/term. Cumulative GPA is the average of all the grades earned over the course of a student's academic career at NMSU. Transfer grades are not included in the NMSU term and cumulative GPA calculations.

Grading System:
Final grades are submitted at the end of each semester, by instructors, and processed by the University Student Records Office. Final grades are recorded on the students' transcripts and are available to students through the online student portal. Academic standing and GPA calculations are updated at the end of each term and, thereafter, as corrections are submitted by College Academic Associate Deans/Campus VPs for Academic Affairs.

Graduate Certificate:
Graduate certificate programs require 12-18 credit hours of course work that is interrelated and designed to develop a focused skill or area of expertise but do not culminate in awarding of a degree. Courses that comprise the graduate certificate must be regular approved courses offered by the University and must be numbered 450 or above. A graduate certificate is indicated on the student's transcript.

Graduate level:
Courses offered beyond the bachelor's degree level (course numbers range between 450/4500 and 699/6999). Also, students who have received a bachelor's degree and who are enrolled in post-baccalaureate instruction.

Graduation:
Official confirmation that the requirements for degree were successfully completed, in accordance with the published catalog. Final degree certification is completed within the Academic College under which the degree program is offered. Then the University Student Records Office orders a diploma sent to the student and adds the degree information to the student's transcript.

Graduation with Honors:
Formal recognition accorded students with a cumulative GPA in the top 15% of the graduating class in their Academic College.

Graduation with High Honors:
Formal recognition accorded students with a cumulative GPA in the top 1.5% of the graduating class in their Academic College.

Graduation with Highest Honors:
Formal recognition accorded one student in each Academic College, with the highest cumulative GPA and greatest number of credits earned at NMSU of the graduating class.

H

Hybrid class:
Class delivery method that incorporates more than one modality, e.g., face-to-face **and** remote synchronous or asynchronous delivery. Face-to-face attendance is limited and may include alternating in-person and online synchronous or asynchronous attendance; may also provide recordings of lectures or experiential components for later reference to supplement concurrent transmission of lectures or experiential components. All students participate in all delivery modalities.

I

Incomplete (I) Grade:
A grade that can be issued, as agreed upon by the instructor and the student, when circumstances prevent a student from completing the coursework by the end of the enrolled term. Coursework must be completed within one year of the assignment of the I grade. If an "I" grade is not removed by the established deadline, it will either become permanent or changed to a D/F, depending on the terms stated on the "I" Grade Information Form.

Independent Study:
Individualized learning, which allows student to work independently under the supervision of an assigned instructor on specific topics directly related to a course or program of study. The meeting time is arranged between the student and instructor.

Instructor (Faculty):
Any employee who teaches classes at an educational institution.

Internship / Co-op:
A for-credit temporary student learning hands-on work experience course with an industry partner that is directly related to the student's program of study. The experience must meet pre-determined learning objectives and focus on providing practical work experience, while developing professional skills. Internships are typically unpaid, while co-op experiences tend to be paid experiences and vary in required work hours. Both types of experiences are generally completed within one semester.

J

Junior:
A student classification for undergraduate students who have completed 60 to 89 college credits, including transfer credits.

L

Lab:
A course, or portion of a course, focused on the application of an instructional strategy that allows students to interact directly with the material, models, and tools and collect data.

Late Registration Fee:
A fee charged to students who register for classes after the second day of the term.

Lecture (Class):
A course in which content is primarily delivered through presentation of facts, principles, context, and/or interpretation. Instruction takes place in a traditional classroom setting and/or online format.

Lower Division:
Courses, usually, offered for freshmen/sophomore level credit (designated by course numbers between 100-299 and 1000-2999). Usually completed the first two years of college.

M

Master's Accelerated Program (MAP):
An opportunity for select undergraduate students to take graduate level courses that will apply to their future graduate degree at NMSU.

Master's Degree:
A degree beyond the bachelor's, also called a graduate degree. A minimum of 30 semester graduate course credits is required for the master's degree. Master's programs involving a thesis include no more than six and no fewer than four credits of thesis. At least 15 credits for the master's degree must be for work in courses in the department in which the student was admitted. Master of Arts and Master of Science degrees are most common, but there are also professional master's degrees, such as the MFA (Master of Fine Arts) or the MBA (Master of Business Administration). Usually takes two years of full-time enrollment to complete.

Major:
A program of study comprising a specific group of courses compiled to provide the expected education or training in a specialized field. The subject area in which a student pursuing a college degree develops the greatest depth of knowledge.

Maximum Time Frame:
Calculation of maximum allowable hours related to limited financial aid eligibility. In general, the maximum is 150% of the required credit hours for the declared major/degree. This calculation includes all attempted hours, including repeated courses, ineligible courses, and transfer credits. Only developmental/remedial hours are excluded from the calculation.

Military Duty:
Active or reserve duty students in the military who receive orders that will prohibit continued enrollment.

Minor:
No less than eighteen (18) undergraduate credits or nine (9) graduate credits in an area outside a student's major department.

my.NMSU:
NMSU's online student information portal that houses all online services, including registration, grades, financial aid, Canvas, MS Office 365, email, etc.

N

New Mexico State University Global Campus (UO)
Fully online degree programs and support services for online learners seeking bachelor, master, doctorate degrees, as well as certificates and microlearning courses, 100% online.

New Mexico State University System:
The University campus and three community college campuses (Alamogordo, Doña Ana, and Grants) governed by the NMSU Board of Regents.

Non-Degree Status:
Students who do not intend to earn a degree or certificate at NMSU, or who have not yet been accepted to a graduate program.

No Release of Information:
Students can request that their public directory information not be released to any public entity or being by completing the "No Release of Information" form found at https://records.nmsu.edu/forms/inventory.html.

O

Official Transcript:
An official document of a student's academic record, including courses taken and grades earned from time of admission to end of the last semester attended. Official transcripts are printed on special paper and include a signature of the Registrar verifying the authenticity and accuracy of the document.

P

Part-time:
A schedule of less than 12 credit hours per semester for undergraduate students, and less than 9 credit hours per semester for graduate students.

Placement Exams:
Subject exams, administered to determine eligibility for waiver of prerequisites for specific courses. Placement exams do not award credit. Subject areas include, but are not limited to, Math, English, and Computer Science.

Practicum:
A temporary, hands-on work experience course integrated with academic instruction that prepares a student for specific pre-professional training in occupational fields such as education, healthcare, and the arts.

Prerequisite:
Course, test score, and/or grade level that must be completed before taking a specific course.

Prior Learning Assessment (PLA):
See "Credit for Prior Learning (CPL)".

Priority Registration Dates:
One

Probation:
See "Academic Probation I" "Academic Probation II" and "Student Code of Conduct".

Program of Study:
See "Major".

Public Directory Information:
Student information that can be released to the public without students' approval. Students can request to withhold their directory information by completing and submitting a "No Release of Information" form found at https://records.nmsu.edu/forms/inventory.html. NMSU has defined public directory information as:

- Name
- Aggie ID number
- Class (i.e. Freshman, Sophomore, Junior, Senior)
- College and major
- Dates of attendance
- Degree(s) earned
- Honors and awards received, including selection to the dean's or chancellor's list, honorary organization, or the GPA range for the selection
- Address
- Telephone number
- NMSU e-mail address
- Most recent previous educational institution attended
- Participation in officially recognized activities and sports
- The weight and height and age of members of athletic teams

Q

R

Readmission

When a student does not enroll for three consecutive terms, they must submit another application for admission and get accepted again.

Registration:

Process by which students formally select classes and creates a financial obligation to pay tuition and fees.

Repeating a Course for Credit:

When an undergraduate student has enrolled in a course more than once, each enrollment and all grades will appear on the student's transcript. Once a student receives a grade of C- or higher (or CR for transfer credits), they will not be allowed to repeat the course for credit again. A student may obtain special permission, from the advisor, to repeat a course they have already received a grade of C- or better, but the grade earned will not be included in the GPA calculation. This policy does not apply to courses that can be repeated for credit, up to a maximum number of credits, such as special topics, internships, cooperative education and thesis/dissertation.

When a graduate student has enrolled in a course more than once, each enrollment and all grades will appear on the student's transcript. Every grade earned will be included in the GPA calculation.

Restriction (Registration):

Conditions that apply to courses, at the class/section level, to limit registration. Common restrictions include: department approval, instructor approval, major, program, student level, student classification, campus.

Residency for Tuition Purposes:

Status used in calculating tuition. Students are either a resident or non-resident of the State of NM. Students are also coded as in-district or out-of-district based on County. Community Colleges, within the NMSU system, assess tuition differently depending on whether students who contribute to the local property and/or income tax base. Learn more at https://records.nmsu.edu/students/residency.html.

Residency Requirement:

The minimum number of program credit hours a student is required to earn for coursework taken at NMSU to earn a degree from NMSU.

S

Satisfactory Academic Progress (SAP):

Federal regulations require all students receiving financial aid to meet Satisfactory Academic Progress in order to maintain eligibility for financial aid. Undergraduate students must maintain a 2.0 cumulative GPA or greater on all hours attempted at NMSU. Graduate students must maintain a 3.0 cumulative GPA or greater. Undergraduate and Graduate students are required to pass and complete 70% of all hours attempted. Students receiving financial aid must complete their program of study within a reasonable timeframe. The maximum timeframe is 150% of the published length of the academic program or certificate

Schedule of Classes:

An online list of classes/sections offered in a term. The schedule includes class information such as course number, section number, meeting day(s)/time, the CRN (course reference number), instructor, course delivery mode, and notes.

Second Degree:

Enrollment classification for students who have earned one or more bachelor's degrees.

Section:

An individual course offering, distinguished from other sections by various attributes, such as meeting day, time, location, instructor, etc.

Semester:

A term, within an academic year, marking the beginning and end of classes. At NMSU, each semester is fifteen (15) weeks in length and there are two semesters (fall and spring) in an academic year.

Senior:

A student classification for undergraduate students who have completed 90 or more college credits, including transfer credits.

Social Security Number (SSN):

A 9-digit federal identification number required for specified college purposes and taxation reporting, but subject to privacy and nondisclosure protections.

Sophomore:

A student classification for undergraduate students who have completed 29 to 59 college credits, including transfer credits.

Student Code of Conduct (Student Handbook):

The rights and responsibilities of NMSU students outlining the standards for social and academic conduct and providing the types of interim measures and sanctions which may be imposed for violation.

Student Concerns Process:
Visit https://report.nmsu.edu/.

Summer Session:
An academic term that is held between the end of spring and fall semesters.

S/U Grade Mode (Satisfactory/Unsatisfactory):
A grade mode that allows the student to attempt to earn course credit without having a course grade included in their grade point average calculations. Under S/U grading, the instructor assigns an S grade for satisfactory achievement of the course learning objectives (normally equivalent to the letter grade of C- or higher) and a U grade for unsatisfactory performance in the class.

Undergraduate limitations: Other than honors courses and courses officially designed as S/U, the following limitations apply to courses in which the S/U option is elected.

- No more than 7 credits per semester or 4 credits per summer session.
- Not to exceed a total of 21 credits towards a degree.
- Not a required course for the student's major.

Graduate limitations: With an approval from their advisor and department head, graduate students in good academic standing may elect the S/U option, at the time of registration, for courses taken outside the major department, subject to the regulations stated below:

- No more than a total of 6 credits of elected S/U courses are permitted in the master's degree.
- Doctoral candidates may take an additional 6 credits under the S/U option after application to candidacy.

Substitution:
An approved exchange of course and credit where the faculty determine competencies and/or learning objectives of one course are comparable, but not equivalent, to those of the required course.

Suspension:
Status whereby a student is ineligible for enrollment at NMSU due to poor academic performance or disciplinary reasons.

Syllabus:
A course summary or outline distributed by an instructor, normally including topics to be covered, meeting and instructor information, assignment and deadlines, grading standards, attendance and other policies, and resources available to students.

Synchronous Class (ONL):
A class that is taught fully online, with a requirement for attendance at a specific day/time.

T

TBD:
Abbreviation for To Be Determined. When found in the Schedule of Classes, relates to class information that has not yet been determined, such as room or instructor.

Term:
A portion of an academic year. NMSU has three standard terms in an academic year: fall, spring and summer, and many abbreviated parts of term: MS1, MS2, SU1, SU2, etc.

Teaching Credential:
A basic multiple or single-subject teaching credential obtained upon completion of a bachelor's degree and prescribed professional education requirements in four or more years of college.

TOEFL (Test of English as a Foreign Language):
An English exam for foreign students used for admission purposes and for placement in college English classes.

Traditional Grading:
Letter grade (A, B, C, D or F) used in calculating the grade point average and recommended for courses required to meet degree requirements.

Transcript:
A student's academic record, including courses taken and grades earned from time of admission to end of the last semester attended. May be official or unofficial, depending on the purpose for which the student is using the document.

Transfer Courses (Transfer Credits):
Earned credits at one institution of higher education counting toward the academic record of a student at another institution of higher education. Grades are not transferred. Transfer coursework is articulated as CR (credit) for passing grades, NC (no credit) for non-passing grades, and CD (credit but repeatable) for passing with a grade of D.

Tuition:
The cost a student is expected to pay for receiving instructional services at a school, college, or university. The charge is based on course type, credit hour and student's residence classification.

U

Upper Division Courses:
Courses, usually, offered for junior/senior level credit (designated by course numbers between 300-499 and 3000-4999). Usually completed the second two years of a four-year degree. These courses are not offered by community colleges and they often require completion of prerequisite courses. Also refers to junior and senior students.

Undergraduate:
Courses offered at the bachelor's degree level (course numbers range between 100/1000 and 499/4999). Also, an enrolled student who has not completed a baccalaureate degree.

Unofficial Transcript (Advising Document):
An unofficial document of a student's academic record, including courses taken and grades earned from time of admission to end of the last semester attended. Unofficial transcripts are NOT printed on special paper and DO NOT include a signature of the Registrar verifying the authenticity and accuracy of the document.

W

Wait List:

An automated function that enables students to indicate their interest in registering for a particular class/section that is already at full capacity. Students are notified, by email to their NMSU email address, when a spot opens and only have 24-hours from the receipt of the email to add themselves to the class. If the student does not add themselves to the class/section during that 24-hour window, the system automatically notifies the next student on the waitlist.

Warning:

Notification to a student, after final grades are processed, that their cumulative grade point average is below the requirement to continue enrollment at NMSU (2.0 for undergraduate students, 3.0 for graduate students).

Withdraw from a Course (Drop):

Officially withdrawing from a class/section through the online registration system, or in person with an academic advisor or at the Student Records Office. Classes may be dropped/cancelled according to the registration deadlines posted at https://records.nmsu.edu/students/important-dates.html.

Withdraw from the University:

Officially dropping all courses and ceasing to be a student at any campus in the NMSU system.

Work Study:

State and federally funded programs that make part-time jobs available to students with financial need.

The NMSU System Academic Regulations

The following regulations are effective with the publication of all the NMSU system catalogs, this includes the Las Cruces-Academic Catalog, NMSU Global, Alamogordo Community College, Dona Ana Community College, and the Grants Community College catalogs. All regulations in this section of the catalog pertain to all the campuses housed within the NMSU System. This means that information for students pursuing Associate Degrees/Certificates, Bachelor's Degrees, and Graduate Degrees/Certificates is in this catalog section.

The regulations section is broken down into different areas:

- Academic Programs of Study
- Registration
- Academic Performance and Progress
- Grading
- Withdrawals
- Degree Applications, Graduation and Commencement
- Academic Standing and Probation
- Academic Misconduct and Grievances
- The University Student Records

Academic Programs of Study

NMSU offers Associate, Baccalaureate, Master's, Specialist, and Doctoral degrees. NMSU also offers Certificates at the associate and graduate levels. Requirements for specific degrees and other designations are set forth by this catalog for the NMSU-Las Cruces (main) campus, NMSU Global campus, and the corresponding catalogs for the NMSU Community Colleges (Alamogordo, Dona Ana, and Grants).

Additional Degree Designations

As part of a degree program, students may also earn additional degree designations indicating fields of study such as majors, minors, or concentrations. A major is defined as a recognized area of study in which there is an extensive and well-developed curriculum offered at the university, in addition, adequate library resources and support services. A minor is based on courses that encompass a recognized supplementary field of study outside the student's major. Concentration is based on a collection of coursework in an area that is part of a major program of study. Degrees and additional designations awarded, limited to majors, minors, and concentrations, will be noted on the student's transcript.

Catalog Effective Period

The annual catalog edition is effective Summer Session I through Spring Semester and is considered active for eight years for all campuses. Curricular requirements (course requirements and the number of credits required) for a specific degree or other designation may be met by completing all of the course requirements as set forth by the catalog in effect at first matriculation, or any subsequent catalog, provided the selected catalog is considered active when the requirements for graduation are met. For all other matters, the current catalog is the authority. NMSU reserves the right to withdraw courses at any time, change fees, rules, calendar, curriculum, degree programs, degree requirements, graduation procedures and any other requirements affecting students. Except as otherwise stated here, changes will become effective whenever the proper authorities so determine and will apply to both prospective students and those already enrolled.

Application for Degree/Graduation or Certificate

Upon completion of all requirements for degrees and certificates, students will not receive their degrees automatically. To receive the degree or certificate, students must submit an application and pay the required fee in the semester in which the student expects to graduate or complete the degree or certificate requirements. Specified in the academic calendar for each semester is the deadline for all applications. The application must indicate/ note all designations earned. After awarding the degree, you cannot add any additional designations.

Students who will be completing two degrees/certificates in the same semester must apply for graduation and pay the fee for each degree separately. Students applying for graduate degrees or certificates must satisfy requirements as described in the Master's, Certificates, Specialist, and Doctoral Degree sections below.

Students who do not meet requirements or elect not to graduate after filing an application need to re-apply in a subsequent semester and pay another fee.

Multiple Degrees and Designations

A student may earn more than one degree or multiple degree designations by completing all of the requirements in an appropriate catalog for each degree or designation. Students meeting requirements for more than one degree must apply for and pay the application fee for each degree to be awarded. Upon completion of all requirements, multiple

majors for a single degree (e.g., B.A., Major in Art; Major in Anthropology) and multiple bachelor's degrees (e.g., B.A. and B.S.) will be noted on the student's academic record/transcript and may also be granted at one commencement.

Degree Revocation

The Board of Regents reserves the right to revoke a degree should it be determined upon investigation that the degree requirements were not adequately met. A degree revocation must be in accordance with NMSU policy and related rules.

Honorary Degrees

Ceremonial Honorary Degrees may be awarded in accordance with NMSU policy and rules as outlined in the NMSU Regents Policy Manual and the related Administrative Rules and Procedures.

Community College Certificate

A Community College may offer two types of certificates, the Certificate of Achievement and/or the Certificate of Completion. Certificates may be awarded independently from any degree program.

Certificate of Achievement

The Certificate of Achievement is a program of study less than 16 credits and is not eligible for Federal financial aid. This Certificate provides employment-related and/or career-enhancing skills necessary to succeed in a job or a chosen field of study. These courses can be a subset of those required for a corresponding Certificate of Completion or Applied Associates Degree. These certificates are recorded on the student's transcript. The following requirements apply to all certificates of achievements:

1. **Minimum Credit Hours**: The number of credit hours varies from certificate to certificate but must be fewer than 16 credits. Students must successfully complete the total number of credit hours as outlined in the respective catalogs and sections describing these certificates.
2. **GPA requirement:** Students must successfully complete all courses for the certificate as outlined in the catalog and have a cumulative GPA of 2.0 or greater in all courses required for the certificate, but may have a cumulative GPA of less than 2.0 for courses taken outside of the certificate.
3. **Residency:** A minimum of 6 credits earned toward the certificate must be completed within the NMSU system including Las Cruces Main Campus, Global Campus, and community colleges. If the certificate requires fewer than 6 credits, all credits must be completed at NMSU or one of its community colleges. Individual academic programs may have additional requirements.

Certificate of Completion

The Certificate of Completion requires a minimum of 16 credits (other Title IV requirements must be met to be eligible for financial aid) and has been approved through the academic review process. These courses can be a subset of those required for a corresponding Applied Associates Degree. These certificates are recorded on the student's transcript.

Requirements for certificates are found in the respective catalogs and sections concerning these programs. The following requirements apply to all certificates.

1. **Minimum Credit Hours**: The number of credit hours varies from certificate to certificate. Students must complete the total number of credit hours outlined in the respective catalogs and sections describing these certificates.
2. **GPA requirement:** Students must successfully complete all courses for the certificate as outlined in the catalog. In addition, students must have a cumulative GPA of 2.0 or better in all courses taken at NMSU or one of its community colleges**.**
3. **Residency:** A minimum of 6 credits earned toward the certificate must be completed at NMSU or one of its community colleges.

Associate's Degree

Associate's degrees are of two types. The academic associate's degree prepares students to transfer to a baccalaureate program and generally includes credits toward the first two years of a four-year degree. Academic associate's degrees include the Associate of Arts, the Associate of Science, and other named degrees that link to a specific major (the Associate of Education, for example). Other associate degrees, typically called Associate of Applied Science, prepare students for entry into the workforce. Credits for these programs may or may not apply toward a four-year degree. Associate degree-seeking students who are interested in a dual degree should consult with their academic advisor. The Associate of Arts and the Associate of Science degrees cannot be earned together.

Students interested in transferring to NMSU or another four-year institution should check the appropriate sections of the university catalog for more information.

Requirements for the two-year associate degrees are found in the respective catalogs and sections concerning these degrees. The following requirements apply to all associate degrees:

1. **Minimum Credit Hours:** a minimum of 60 credits (excluding "N" suffix courses). Some programs of study require coursework in excess of the 60 credit-hour minimum.
2. **New Mexico General Education-** state mandated general education courses (as specified in General Education section); such courses are designed with a "G"
   a. For Associates Degrees: 32-35 credits
   b. For Applied Associates Degrees: 15-18 credits
3. **GPA requirement:** Students must have a cumulative GPA of 2.0 or better in all courses taken at NMSU or one of its community colleges.
   a. For Associates Degrees: students must earn a C- or better in classes they take to meet the Basic Skills requirement (ENGL 1110G and one of several math course options).
   b. For Applied Associate Degrees: Basic Skills requirements do not apply, but if the student plans to pursue a Bachelor's degree at any point in the future it would be highly recommended.
4. **Residency** - A minimum of 15 of the 60 credits for the associate's degree must be completed at NMSU or one of its community colleges. Individual academic programs may have additional requirements.
5. **Major**: All requirements for at least one major field of study as specified in the college and departmental sections of the respective catalog.

Associate Major

An associate major, consisting of at least 18 credits, may include courses from more than one department. Requirements for the Associate Majors are specified in the respective Community College Catalogs.

Baccalaureate Degree (Bachelor's Degree)

A baccalaureate or bachelor's degree provides students with a broad educational base and knowledge in a specific major field. Each college has unique degree requirements that are listed in the college's designated section of this catalog. In addition to the College and Department requirements, students must complete each of the following degree requirements for every Bachelor's Degree awarded by NMSU:

1. **Minimum Credit Hours:** a minimum of 120 credits (excluding "N" suffix courses)
2. **GPA requirement-** a minimum cumulative GPA of 2.0 in all courses taken at NMSU
3. **New Mexico General Education-** 32-35 credits of state-mandated general education courses (as specified in the General Education section); such courses are designed with a "G"
4. **New Mexico State University's Viewing a Wider World-** 6 credits of Viewing a Wider World courses; such courses are designated with a "V", or alternatives as specified in the Viewing a Wider World section
5. **Upper Division Courses-** a minimum of 48 credits in courses numbered 300-499/3000-4999.
6. **Residency –** Of the last 36 credits earned toward award of the degree:
   a. 30 credits must be completed at NMSU
   b. 21 credits must be upper-division (300/3000 or above) and
   c. 12 of the 21 upper-division credits must be within the student's major.
   NOTE: colleges or departments may require that more than 12 upper-division credits be within the major and they may direct that a certain number of these credits be course specific.
7. **Major** – all requirements for at least one undergraduate major field of study, other than a supplemental major, as specified in the college and departmental sections of the catalog. As an undergraduate student seeking a baccalaureate degree you are expected to declare a major before earning 45 credit hours toward your degree. You should complete your general education requirements within your first 90 credit hours earned.

Second Baccalaureate Degree (Bachelor's Degree)

Students seeking a second bachelor's degree must complete all college, department, and major requirements for the second bachelor's degree including residency. General Education requirements, including Viewer a Wider World, are waived for a second bachelor's degree because those requirements are considered completed within the first bachelor's degree earned. Credits earned toward a previous degree may be used to complete those requirements subject to any college and department-specific limitations as described in the catalog.

Bachelor's Degree Designations

Undergraduate Major

An undergraduate major consists of 24 or more credits within the major field, of which 18 credits must be upper-division courses, and may include courses from more than one department. Additional major requirements are specified in the college and department's designated sections of this catalog.

Supplemental Major

A supplemental major consists of 24 or more credits of interdisciplinary coursework, of which at least 18 credits must be upper-division (300/3000-499/4999), and no more than 9 credits may be from the student's major course of study. Additional requirements for supplemental majors are specified in the catalog listing of the departmental/college sections.

Undergraduate Minor

An undergraduate minor consists of 18 credits of course work, of which 9 credits must be upper-division (300/3000-499/4999). A minor encompasses courses that may be in a single department or interdisciplinary and are in a recognized field of study outside the student's declared major. At least 9 upper-division credits of a minor must be completed at NMSU. Additional requirements for minors are specified in the college and department's designated sections of this catalog. Minors cannot be earned after the degree has been conferred.

Undergraduate Concentration

A concentration consists of 12 or more credits of coursework in a specialty area that is related to a specific major field of study. At least 9 of the 12 credits must be upper-division (300/3000-499/4999), and at least 9 credits must be completed at NMSU. Additional requirements for concentrations are specified in the college and department's designated sections of this catalog.

Distance Education Bachelor's Degree Completion Program

A Bachelor Degree Completion Program allows students who have met the lower division requirements (100/1000 and 200/2000 level) of an undergraduate degree program to complete the remaining upper-division credits (300/3000 and 400/4000 level) through distance delivery courses offered by NMSU Las Cruces. Only selected degrees are available as degree completion programs. Students must complete all required lower-division (100/1000 and 200/2000 level) credits before they can be admitted to the Bachelor's Degree Completion Programs. The program(s) normally require two years of upper-division (300/3000 and 400/4000 level) coursework.

Graduating with Honors

For information about graduating with Honors, please refer to the Recognition of Academic Achievement section of this catalog.

Graduate Degrees

All graduate degrees are subject to the rules and regulations of the Graduate School. Degrees will be certified by the Graduate School only upon the complete review and clearance of the candidate's program of study.

Graduate Degree Designations

Graduate Major

A graduate major may include courses from more than one department, but at minimum, it must consist of at least 30 graduate credits beyond the previous degree, i.e., 30 credits beyond the bachelor's for a master's degree, and 30 credits beyond the master's for a doctoral degree. Additional requirements may be imposed by the State of New Mexico and New Mexico State University as specified in this Catalog.

Graduate Minor

A graduate minor is based on at least 9 graduate credits in courses encompassing a recognized field of study outside the student's major. Departments may require certain courses to be a part of a minor and may exclude other courses. Minors cannot be earned after the degree has been conferred. Students will work with their department and the

Graduate School to ensure that the graduate minor is added to their academic record.

Graduate Concentrations

A concentration is a collection of coursework in a specific area that is part of a degree program of study at NMSU. At the graduate level at least 9 of these 12 credits must be numbered 500/5000 or above. Only approved concentrations within a student's department or program may be noted on a transcript.

Concentrations will not be added to a transcript after a degree is awarded. In order for the approved concentration to be noted on the student's transcript, the following conditions must be met:

1. Apply for the correct program and concentration from the outset or connect with the department and Graduate School upon admission to correct the concentration if initial admission is incorrect.
2. Identify the concentration on their official Application for Degree.

Graduate Certificates

A Graduate Certificate program requires 12-18 credits of course work that is interrelated and designed to develop a focused skill or area of expertise but does not culminate in the awarding of a degree. Courses that comprise a graduate certificate must be regular approved courses offered by the University and must be numbered 450/4500 or above. A graduate certificate is indicated on the student's transcript.

Master's Degree

New Mexico State University offers both academic and professional master's degrees. A link to the list of all master's degrees is provided in the Graduate School section of this catalog. (https://catalogs.nmsu.edu/nmsu/graduate-school/)

Underprepared students may be required to take additional general or discipline-specific undergraduate or graduate courses to prepare them for the advanced academic work necessary for success in graduate-level courses in their chosen field. This may result in an extended graduation date.

Admissions to the Master's Degree

The admission of a student into the Graduate School does not imply admission to candidacy for an advanced degree. The major department in which the student intends to become a candidate for a master's degree must determine the student's ability to pursue studies at the graduate level. Please see the Department(s) for specific requirements.

Program of Study

Students will follow the coursework requirements outlined in their catalog and degree audit. A Program of Study is not required by the Graduate School but may be prepared by the student's advisor in consultation with new graduate students for effective advising.

Application to Candidacy

The degree audit will formally list the curriculum requirements for degree completion and is required to meet in order for the degree or graduate certificate to be conferred. Some programs may use The Program of Study Form as part of its Application to Candidacy process. In these cases, the program of study must be approved by the advisor, department, and academic dean and submitted to the Graduate School. The Program of study may specify the Catalog at the time of graduation, as long as the catalog is considered active. Otherwise, the current catalog will be listed.

Application for Graduation

Students must file an application to receive their degree during their final semester of the program. The program's catalog entry will formally list the curriculum requirements for degree completion and a completed degree audit is required. The degree audit may specify the catalog at the time of graduation, as long as the catalog is considered active. Otherwise, the current catalog will be used.

The student must have a minimum cumulative GPA of 3.0 at the time the application is submitted. The application may specify the catalog at the time of graduation, as long as the catalog is considered active. Otherwise, the current catalog will be listed. If a student's degree audit does not meet, the student must submit a Degree Audit Exception (DAE) form to document course substitutions and credit hour alignment such that the exceptions will allow the degree audit to meet.

Credit Hour Requirement

A minimum of 30 credits beyond the bachelor's is required for the master's degree. Most master's degrees require at least 15 credits in courses numbered 500/5000 or above. This includes thesis credits for any master's programs that include a thesis option. Master's programs involving a thesis, must include, either a minimum of 4 credits or a maximum of 6 credits of thesis. Please see the "Thesis" section for more information.

At least 15 credits for the master's degree must be for work in courses within the student's department. Additional credits may be selected from other fields to fit into a logical and justifiable program. However, courses that are used to remove deficiencies or satisfy prerequisites cannot be counted as requirements for a master's degree. As per NMSU's campus residency requirement, a minimum of 50% of degree coursework must be taken at NMSU.

Coursework Requirement

Students must take coursework from a variety of faculty. Students may not take more than half of the minimum credits required for a master's degree with the same professor, excluding thesis credits.

All graduate students must register for a minimum of 1 credit of graduate coursework in their final semester. Please see the Tuition, Fees and Other Expenses section for more information.

A student taking an oral examination must enroll for at least one credit for that term (fall, spring, or summer terms).

Thesis Option

A thesis in the major field is recommended and may be required at the discretion of the department. A minimum of 4 credits and a maximum of 6 credits may be counted toward the requirements for a master's degree. The final examination shall consist of an oral defense of the student's thesis as well as a general examination of the candidate's field of study.

- *Continuous Enrollment* - once registered, a student must continue to register for a minimum of 1 credit in thesis or graduate coursework each regular semester until the thesis is approved by the Graduate School and submitting electronically into ProQuest.

Graduate Committee for Thesis Option

The graduate committee for the master's degree consists of a minimum of three faculty members who hold, at least, a master's degree and meet the following criteria:

1. **Committee chair:**
   a. Must be from the student's home department
   b. Must be a graduate faculty member
2. **Committee member(s):**
   a. One other committee member, in addition to the chair, must be from student's home department
   b. Other committee members may be from outside the student's home department
   c. Students with a declared minor- must have a representative from the minor department.
   d. Must be a graduate faculty member
3. **Dean's Representative:**
   a. Must be a representative from a related area or appointed by the Dean of the Graduate School
   b. Must be a graduate faculty member

Finalizing the Master's Thesis

After successful completion of the final examination, electronic submission of the approved thesis must be submitted to ProQuest ETD, no later than the deadline posted to the Graduate School website. The form and style of the thesis must comply with the guidelines provided in preparing your manuscript for submission, located here. The guidelines also contain detailed information on the thesis submission and approval process. The thesis is not complete until the Graduate School has accepted it electronically.

Non-Thesis Final Examination

Each candidate may be given a final examination conducted by their graduate committee in accordance with the schedule provided by the Graduate School.

The final examination format for the professional degrees and non-thesis option will be determined by the department. The department is responsible for ensuring that the Report of Results for the Master's Professional or Non-Thesis Final Examination form, where applicable is submitted to the Graduate School no later than ten working days after the exam.

At the time of the final examination, a graduate student must have a cumulative GPA of at least a 3.0 and must be enrolled for a minimum of one credit hour in the final semester.

NOTE: the cumulative GPA, will be calculated from NMSU graduate coursework only.

Any candidate who fails the final examination may either:

1. Be granted a second examination, written or oral, after a lapse of at least one semester, only with a recommendation from the student's advisor and approval from the Dean of the Graduate School.
2. Be excluded from further candidacy for the degree.
3. Failure in the second examination disqualifies a candidate from obtaining the degree.

Students in professional or non-thesis options may be required to pay a special exam fee in lieu of registering for 1 credit of graduate coursework. Please see the Tuition, Fees and Other Expenses section for more information.

Time Limit

Students must complete the master's degree program within seven years (or eight successive summers) of the start of the degree, including completion of the master's thesis or final project. Inclusion of any coursework over seven years old at the time of the final examination will be at the department's discretion.

Master's Accelerated Program (MAP)

The Master's Accelerated Program (MAP) allows academically qualified undergraduate students to begin working on a master's degree during their junior and senior years while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires two more years. The master's accelerated programs allow students to complete a graduate program in an accelerated manner.

Undergraduate students may apply for acceptance to MAP listed in the New Mexico State University Catalog by submitting the Master's Accelerated Application Form after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at New Mexico State University and apply towards the undergraduate major. The grade point average must be a minimum of 2.75; departments participating in MAP may have requirements that exceed these minimum requirements. **It is the student's responsibility to meet with their financial aid advisor. Awards may be adjusted to reflect enrollment in undergraduate/graduate courses.**

Graduate departments within the colleges may allow academically qualified undergraduate students to substitute up to 50% of their graduate course credits (i.e., 15 of 30, etc.) but no more than 18 credit hours for elective or required courses in an undergraduate degree program. Graduate programs can use up to 50% of NMSU coursework (450/4500 level or higher) that can logically be applied toward completing a master's program of study (at least 50% of the credits allocated for the master's degree – usually 15 of 30 – must be for courses designed for graduate work.). Students must consult with participating MAP departments to determine program-specific guidelines on the allowable credits toward the undergraduate and graduate degree. A grade of 3.0/4.0 or higher in each course will be required.

Program Participation Requirements:

1. Students participating in MAP are required to obtain prior approval by the graduate program and submit a completed Master's Accelerated Program Application from to the Graduate School by the first Friday of classes with all required signatures. Student's course work must be general or discipline electives in the student's undergraduate course of study.
2. Students will enroll in approved graduate-level courses. If the course(s) requires instructor approval, it is the student's responsibility to obtain the necessary approval.
3. Students participate in the Developing New Scholars Program (DNSP) through the Graduate School. The DNSP program provides formal mentoring supporting the application process to Graduate School. Upon awarding of the Bachelor's degree and formal admissions into a master's program at NMSU, the approved credits (up to 12) will be recorded on both the undergraduate and the graduate transcript.

Interdisciplinary Master's Degree

Interdisciplinary studies, at New Mexico State University, are intended for individuals specializing in programs that require integrating more than one discipline to fully engage in the field of study. The programs provide a mechanism to address emerging scholarship, innovation, research, and allow graduate students to engage in emerging technologies that

optimize their education outside the traditional disciplinary boundaries. An Interdisciplinary study takes advantage of traditional academic training within specific departments and also allows students to customize their own career preparation. In these programs, a coherent common core is expected to combine existing courses across disciplines to meet unique objectives.

The interdisciplinary studies option should not be used in cases where the applicants' objectives can be realized by admission to a specific department with a degree program, and inclusion of up to two minor areas in the program of study.

Students should be admitted to an existing graduate program which closely relates the desired interdisciplinary trajectory. Students interested in pursuing an Interdisciplinary Master's (IMAS) degree should take the following steps.

1. **Establish an IMAS graduate committee.**
   The student will form a committee composed of members of the graduate faculty and select an advisor who will chair the committee. The chair must be from the primary department where the student will take at least 15 credit hours listed in the proposal. The other committee member must be from the department in which the student has selected a minor area of study from the approved list.

2. **Develop a proposal for interdisciplinary studies.**
   The student must work with their committee to create a proposal of the program concept consisting of the following:

   a. The designated degree being sought and the name of the interdisciplinary area.

   b. The program of study to be followed, which must include a minimum of 30 graduate-level credits and a maximum of 36 graduate-level credits. Students may take six credits in departments that do not grant a graduate degree, but the courses must be numbered 450/4500 or above and be pertinent to the program of study. The committee can require additional materials such as a statement of interest, letters of recommendation, GRE or GMAT scores and conduct a personal interview.

   c. The majority of the departments involved in the student's program will be master's degree granting departments. The student is expected to take at least 15 credits in the primary area of study within one department. The primary department selected by the student will receive the student's application for admissions to the Graduate School for approval. In addition, the student is required to select a minor area of study in another department that consists of at least 9 graduate credit hours. The program will meet all requirements of a master's degree, with the interpretation, that "major field" includes courses from two or more departments and in the designated interdisciplinary study area.

   d. The program of study will include the completion of a research thesis or project. The work may be submitted in the form of a publishable manuscript, technical report, thesis or creative option. The objective of the program of study should include proposed areas of skill development and proposed courses in more than one graduate degree granting department at NMSU.

   e. Justification for not using an existing degree program.

   i. Once the student has formed their committee and compiled a rough draft of the proposal, they must contact the Graduate School to make an appointment with the Dean of the Graduate School to review the proposal. The student and advisors from the main program and minor program should attend the meeting as well.

   ii. If the proposal is accepted by the Graduate School, the student will then be advised to submit an application as a Master's Interdisciplinary student through the application system.

   f. Procure final signatures from all committee members and academic department heads from primary and minor departments on the IMAS proposal. The student should submit a copy of the completed and signed proposal to the Graduate School.

Degree(s) Awarded

Students receive a Master of Arts (MA) or a Master of Science (MS) and a concentration in the designated interdisciplinary study area.

Other conditions for being awarded a degree within the interdisciplinary studies program are:

1. The student may enroll on a part-time basis keeping in mind that coursework cannot be more than seven years old at the time of the final examination.
2. The student will be administered a final comprehensive exam that is consistent with the department selected for the primary area of study. For example, if a department requires a written exam, the student in the interdisciplinary masters will also be required to take a written exam.
3. The final oral comprehensive exam will consist of questions pertinent to the area of study and the defense of the research thesis or project. In both cases, an integrated approach to the areas of study chosen should be followed.
4. All other rules for graduate study at NMSU must be followed.

Thesis/Non-thesis Option

As with any graduate student, the student in interdisciplinary studies can select to follow a thesis or non-thesis option. Students enrolled in the thesis option register for up to six thesis credits. Students not wishing to follow the thesis option will be required to complete a project report. The project must reflect the interdisciplinary nature of the program which the student is pursuing.

Comprehensive Exam

Students in interdisciplinary studies take a comprehensive exam composed of questions designed by the student's committee. The committee consists of two individuals in the area of study, the dean's representative who must be outside of the department/program/interdisciplinary study option, and a committee chair.

Second Master's Degree

NMSU discourages duplication of a master's degree. In instances where a program would like to admit students to earn a duplicate degree, a letter of support by the department involved must be submitted at the time of admission to the Graduate Dean. The applicant will need to follow standard admission requirements and graduate school policies including transfer of credits. Students wishing to earn the duplicate masters must satisfy all requirements for the degree, including completing a master's

thesis if this is a formal requirement for the degree in question. Financial Aid may not be applicable for the duplicate degree.

Teacher Licensure

Students wishing to take graduate courses for licensure, renewal of licensure, or for personal enrichment must be fully admitted to a department to do so. Undeclared students may not register for teacher licensure classes.

Endorsement is available at both the elementary and secondary levels in bilingual education, Teaching of English as a Second Language (TESOL), reading, and special education. Endorsement is also available in early childhood education at the elementary level. Contact schooloftpal@nmsu.edu for more information.

Specialist in Education

The specialist in education degree is available for experienced members of the education profession who have maintained a 3.3 grade-point average while pursuing this degree or its equivalent. Programs are available in Reading within the School of Teacher Preparation, Administration, and Leadership and in school psychology within the Department of Counseling and Educational Psychology. Emphasis is placed on the development of the competencies needed for professional specialization in a given field. Students must complete the general application for the Graduate School and they should also check with the admitting department for specific departmental requirements.

Residency and Credit Requirements

The specialist in education degree requires a minimum of 30 credits including research, intern experiences and graduate courses. Twenty-four of these credits must be completed at NMSU to meet the campus residency requirements.

Students must maintain a 3.0 GPA, no more than 6 credits of C level work are allowed for this program.

Program of Study

Students will follow the coursework requirements outlined in their degree audit. A Program of Study is not required by the Graduate School but may be prepared by the student's advisor in consultation with new graduate students for effective advising. Some programs may also use the Program of Study as part of its Application to Candidacy process.

Major Field

All course work taken for the degree should apply directly, through a logical program of study, to the specialty which candidate has selected. Each department is responsible for defining the required sequence of courses.

Internship

Each candidate will earn from three to six semester credits in an internship. This experience will consist of supervised performance of duties related to the candidate's specialty. The student's department will determine the structure of the internship and a research project will be conducted in conjunction with the internship.

Oral Examination

The oral examination committee will consist of the student's committee and a dean's representative appointed from the graduate faculty by the dean of the Graduate School. This committee will conduct an oral examination at the conclusion of the research project and no earlier than the candidate's last semester of enrollment.

The examination will consist of a defense of the project along with general questions on subject matter related to the candidate's field of study. Any candidate who fails the oral examination may upon the advisor's recommendation and with the graduate dean's approval, be granted a second examination after a lapse of at least one semester. Failure in the second examination disqualifies the candidate from obtaining the degree.

Time Limit

The specialist in education degree must be completed within seven years following admission to the program. Inclusion of any coursework over seven years old at the time of the final examination will be at the department's discretion.

Doctoral Degrees

The doctoral degree requires significant scholarly study beyond the master's program, including a minimum of 30 credit hours beyond the master's and a minimum of 18 credit hours of dissertation. As per NMSU's campus residency requirement, a minimum of 50% of degree coursework must be taken at NMSU.

Prospective candidates are expected to hold bachelor's or master's degrees from accredited institutions, based on curricula that include the prerequisites for graduate study in the department of their subject. To be considered for admission to a doctoral program, the applicant must have a grade-point average of at least 3.0. Prospective candidates are urged to consult the department in which they wish to study for information concerning specific requirements.

Professional Doctoral Degrees

Doctor of Economic Development (DED)

Students enrolled in the Doctor of Economic Development are required to complete and pass a comprehensive examination. Since a dissertation is not required, students are expected to complete an internship experience and a project paper as defined by their program. They can embark on the project paper once they have completed and passed their comprehensive examination. Students are not required to take 700/7000 level dissertation hours. However, they are expected to complete at least 12 credits at the 600/6000 level including ECDV 694 Internship and ECDV 699 Doctoral Project.

Doctor of Education (Ed.D)

The degree of Doctor of Education demonstrates proficiency in a program of graduate study in which the emphasis is on preparation for performance in educational leadership. This program is intended primarily for students pursuing careers in educational leadership, school district or higher education administration, or educational services are predominant rather than those in research. The Ed.D. Degree in educational leadership and administration is offered in the School of Teacher Preparation, Administration, and Leadership

Two concentrations are available within the Ed.D. degree: Higher Education Administration and PK-12 Administration is offered in the Department of Curriculum and Instruction; the degree in educational administration is offered in the Department of Educational Leadership and Administration. Any transfer credit or predoctoral course work to be included in the related field must have the approval of both the major and minor (if applicable) department at the outset. Specified course work in both research and statistics is required for this degree. Other requirements are described in the departmental sections of this catalog.

Doctor of Nursing Practice (DNP)

Students holding a Bachelor's degree in Nursing are required to complete and pass all required course work for the DNP program, in

addition, complete and pass their comprehensive examination. Since a dissertation is not required, they are expected to complete an internship experience and a project paper as defined by their program. They can embark on the project paper once they have completed and passed their comprehensive examination. They are not required to take 700/7000 level dissertation hours. However, they are expected to complete at least 12 credits at the 600/6000 level including NURS 6990 Advanced Practice Nursing Immersion credits sufficient to complete the DNP Final Project.

Students who hold a Master's of Science in Nursing are required to complete the following:

1. All course work requirements
2. Their comprehensive exam (with passing marks)
3. The DNP Project.

Post- MSN DNP students must complete at least 6 credits at the 600/6000 level, including NURS 6990 Advanced Practice Nursing Immersion credits sufficient to finish the DNP Project. Finalized projects must be uploaded to a national DNP Project repository approved by the Graduate Faculty of the School of Nursing in order to achieve the DNP degree.

Doctor of Philosophy (Ph.D.)
The Doctor of Philosophy degree requires distinguished attainment in both scholarship and original research. The doctoral degree requires significant scholarly study beyond the master's that is tailored to the needs and interests of the student. The degree is granted in recognition of the candidate's high attainments and ability in the special field, shown by work on the required examinations covering both the general and the special fields. The individualized program of study is designed to meet the campus residency requirement, includes a minimum of 30 graduate credits beyond the master's, and includes the preparation of a dissertation. A candidate for the Ph.D. degree is expected to maintain a higher level of work than the grade-point average of 3.0, plus at least 18 credits of dissertation work (700/7000-level courses).

Interdisciplinary Doctorate (IDOC)

Students interested in pursuing an Interdisciplinary Doctorate (IDOC) degree program must meet with the Graduate School for advisement. The advisement session will include information on completing the IDOC admission application.

The following requirements for admission to the interdisciplinary doctorate degree program are:

1. Students wishing to study in the interdisciplinary doctoral degree program must apply and be accepted into a doctorate-granting department.
2. A master's degree or equivalent program of study that includes at least 30 credits of graduate course work with a minimum cumulative GPA of 3.0.
3. Twelve credits of graduate course work must be completed at NMSU in order to apply for admission into the interdisciplinary doctorate degree program. Additional course work is required for degree completion.
4. Evidence of outstanding academic achievement in graduate school.
5. A written description of the program concept prepared by the student consisting of:
   a. Areas in which competency is required
   b. Purposed readings and course work and how these relate to required competencies
   c. Objectives and an outline for thesis research
   d. Justification for not using an existing departmental degree program
6. Student must select an advisor from his/her department to help structure and chair a committee consisting of at least five faculty members from the graduate faculty list who are willing to work on the interdisciplinary degree program. The committee must include at least two members from each of the two doctorate-granting departments. The committee chair will convene a meeting to review and approve the proposed program.
7. The Graduate School will send an Admission Referral document, signed by all the committee members, to the heads of all the departments from which the student proposes to use more than 8 credits of course work, or from the department which the faculty are requested to serve on the proposed committee.
8. Once the Admission Referral document has been approved by all departments, the committee chair will convene a meeting of the committee to review the student's program and make changes as necessary. In addition, the committee will set the format and date for the qualifying exam. An effort should be made to incorporate the interdisciplinary nature of the program into the qualifying exam.
9. Students have satisfied the requirements for admission to the program once the qualifying exam has been passed and the respective department heads approve the Admission Referral memorandum. Formal acceptance into a doctoral program may be required in order to receive financial assistance.
10. The number of courses required for degree completion will vary depending on the student's program of study, please see the department for more specific requirements. However, Interdisciplinary doctorate degree students must meet the requirements for residency, registration, the comprehensive examination, the Final Examination, the dissertation and the declaration of approved minor.
11. The dissertation work shall include at least 18 credits of a 700/7000-level course.

Completing your Doctoral Degree Program

Any student who fails to abide by the regulations in this section will be considered withdrawn from the university. In order to resume their studies, the student must formally apply for readmission to the Graduate School and satisfy any requirements that are in effect at the time of reapplication. Readmission information can be located here (https://apply.nmsu.edu/apply/?id=1c3c41ea-b5f9-48ef-83c3-b085794ba277).

Declaration of Approved Minor

Any doctoral applicant for candidacy may declare up to two approved minors in addition to the major area of study. Demonstration of competency in the minor area will be required at both comprehensive and final examinations.

Qualifying Examination

Doctoral students must pass a qualifying examination that is scheduled by the student's advisor and is administered by the major department. Its purpose is to determine the areas in which the student shows strength or weakness, and the ability to assimilate subject matter presented at the graduate level. A student may not register for dissertation credits prior to the successful completion of the qualifying examination.

The following conditions apply to students who wish to take the qualifying examination:

1. For students who enter the Graduate School with little or no previous graduate experience but wish to proceed directly to the doctorate, the

qualifying examination should be taken after 12 credits of graduate work.
2. For students who enter with a master's degree or equivalent from another university, or another department, the qualifying examination should be taken before completing one semester of graduate work.
3. For students who earn their master's degree at New Mexico State University and will continue in the same department, the department may allow the master's final examination to serve as the doctoral qualifying examination or a separate examination may be required.

Based on the result of the qualifying examination, the department will take one or more of the following actions:

1. Admit the student to further work toward the doctorate
2. Recommend that the program be limited to the master's degree
3. Recommend a re-evaluation of the student's progress after the lapse of one semester
4. Recommend discontinuation of graduate work

In all cases, the Graduate School shall be notified by the department of the results of the qualifying examination.

Students will be admitted to the doctoral program once the qualifying examination is passed. The student's advisor and department head will then appoint the doctoral committee to prepare the student's preliminary doctorate program of study.

Doctoral Graduate Committee

The doctoral committee will comprise at least four graduate faculty members who hold doctoral degrees. The following rules apply to the composition of the committee:

- The committee chair must be from a discipline within the student's major department
- At least one additional member of the committee must also be from a discipline within the student's major department.
- If an approved minor is declared, at least one (but no more than two) members of the committee must be from the minor department.
- All committee members must be members of the graduate faculty and be from a doctorate-granting department.
- Only one member may be outside of the student's department.
- One member of the committee must serve as the dean's representative. In programs where more than one department participates, the dean's representative may not be from any of those departments. The dean's representative may be one of the following
  - the member from the related area
  - a member from the minor area
  - An independent member, not from the student's department, that is appointed by the Dean of the Graduate School.

Departments may structure committees that include more than the minimum number of members, as long as the following conditions are satisfied. No changes can be made to the doctoral committee membership without prior approval from the Dean of the Graduate School.

Additional voting and nonvoting members may be any person approved or appointed by the Dean of the Graduate School

All members of the committee will attend the comprehensive oral and final defense for the student's dissertation.

Doctoral Program of Study

Students should follow the course requirements outlined in the program's catalog and pursue the roadmap featured in the program's degree audit. A minimum of 50% of the degree coursework must be taken at NMSU. If the doctoral program does not have an active degree audit, students should work with their advisor to file a Program of Study Form once they have:

- Completed 1 year of enrollment while at NMSU that are beyond the master's degree
- Successfully completed a qualifying examination if required by the program

The individualized program of study is designed to meet the campus residency requirement and includes a minimum of 30 graduate credits beyond the masters.

If the Doctoral degree requires a dissertation, at least 18 credits of dissertation work must be included. The professional doctoral degree includes a practicum or special project that culminates in a written report which demonstrates a command of the relevant scholarly literature and links it to the specific clinical or practical experience.

Comprehensive Examination

The Graduate School should receive the Program of Study and the Committee for Doctoral Students Form and the Doctoral Qualifying Examination Form.

Students will be admitted to the comprehensive examination only after the following conditions are met:

1. Completion of adequate course work, to the satisfaction of the major department and the Graduate School,
2. The graduate committee determines the student is adequately prepared for the examination, and
3. Successful completion of all language requirements (where applicable).

Students must be registered for 3 credits of graduate course work during the semester in which they take the comprehensive examination. A student taking an oral examination must enroll for at least one credit for that term (fall, spring, or summer terms).

The Doctorate of Philosophy Examination or Professional Doctorate Examination Form must be on file at the Graduate School at least ten working days prior to the proposed date for the examination. The examination must be part written and part oral. The oral examination results will be reported to the Graduate School by the Dean's Representative of the committee. These and all graduate forms are available on the Graduate School Form webpage.

Any student who fails the comprehensive examination may either be terminated from the doctoral program or upon recommendation of the committee and approval of the Dean of the Graduate School or be granted a second examination after a lapse of at least one semester.

NOTE: Generally, there should be a time-lapse of at least one year between the comprehensive and final oral examination. However, due to the type of research required and the method of administering the written comprehensive in some departments, such a time lapse is not always practical. In all cases there must be one semester between the comprehensive and the final oral examinations.

Time Limit for the Comprehensive Examination

If more than five years have passed since the date of the comprehensive examination, the candidate will be required to take another comprehensive examination before admission to the final examination.

Advancement to Candidacy

Advancement to Candidacy recognizes that the student has demonstrated the ability to sustain a level of scholarly competency commensurate with the successful completion of degree requirements. Upon advancement to candidacy, the student is cleared for the final stages of the graduate program which may include a dissertation, project or written examination.

For advancement to candidacy the following criteria must be met

1. Successful completion of the comprehensive examination
2. Recommendation of the graduate committee
3. Approval of the Dean of the Graduate School

Upon receiving advancement to candidacy, students must follow the Dissertation Registration Requirements.

Dissertation Registration during Fall/Spring Sessions

After becoming a candidate, students must continue to register for at least 3 credits of dissertation or graduate course work, each spring/ fall semester until the dissertation is approved by the Graduate School and the dissertation format review has been completed. The total number of dissertation hours must be 18 credits. The doctoral committee can impose additional requirements for courses numbered 700/7000.

A student who fails to abide by these regulations will be considered withdrawn from the university and in order to resume studies, must formally apply for readmission and satisfy the requirements in effect at the time of reapplication.

Dissertation Registration during Summer Sessions

If the final examination is to be held during the summer or the dissertation is to be completed during the summer, students must register for one credit during the summer session in which the final examination will be held or the dissertation will be completed.

Dissertation Leave of Absence

Students may seek a leave of absence from their dissertation. A leave of absence requires that a student must get prior approval from the Dean of the Graduate School, which means the student must receive permission for the leave of absence before discontinuing their formal studies.

Final Examination

NOTE: If more than five years have elapsed since the student passed the comprehensive examination, the candidate will be required to take another comprehensive examination before admission to the final examination.

Every student working toward the doctoral degree will submit a dissertation embodying the results of original research. The dissertation is expected to demonstrate the student's ability in independent investigation and to be a contribution to human knowledge. The dissertation shall display a mastery of the literature of the subject field, present an organized and coherent development of ideas with a clear exposition of results, and provide a critique of the limits and validity of the student's conclusions.

When a complete draft of the dissertation has been prepared, the student's doctoral committee (appointed after the qualifying examination) will conduct the final examination. The final examination is concerned primarily with the research work of the student as embodied in the dissertation, but it may be much broader and extend over the candidate's entire field of study. The intention of the final examination is to verify that the candidate has a satisfactory grasp of the major subject as a whole and has a general acquaintance with the fields of knowledge represented by the course of study. The final examination is oral and is open to the public.

Every student meeting the final examination qualifications must be enrolled in a minimum of 1 credit hour in order to defend. The final examination must be completed in accordance with the schedule provided in the academic calendar. Ten working days before the examination is taken the department must submit the form requesting this examination to the Graduate School. This form may be found by visiting the Graduate School website and departmental offices.

Students must ensure that each member of the examining committee receives a copy of the dissertation, no later than seven working days before the date of the final examination.

Any candidate who fails the final oral examination may either be terminated from the doctoral program or upon recommendation of the committee and approval of the Dean of the Graduate School, be granted a second examination after a lapse of at least one semester. Failure in the second examination disqualifies the candidate from obtaining the degree.

Finalizing the Doctoral Dissertation

After successful completion of the final examination, electronic submission of the approved dissertation must be submitted to ProQuest ETD, no later than the deadline posted to the Graduate School website. The format review of dissertation will be performed electronically by the Graduate School. The form and style of the dissertation must comply with the regulations given in Preparing your manuscript for submission located on the Graduate School's website (https://gradschool.nmsu.edu/current-students/graduating-thesis-and-dissertation-students.html). The dissertation is not complete until the required forms are received at the Graduate School. Required forms may be found here.

Registration

Registration at NMSU is a process that includes: (1) academic advising, (2) registering for classes, online or with your academic advisor, and (3) payment of tuition and fees. For first time freshman and transfer undergraduate students (at the Las Cruces campus), the registration process occurs during Aggie Welcome/Transfer Student Orientations. For currently enrolled Undergraduate students and all Graduate students registration occurs in collaboration with your advisor or online through the myNMSU portal. For detailed instructions and questions about registration which are not addressed on the website, please contact the University Student Records (USR) (https://records.nmsu.edu).

Admission Requirement

No person will be allowed to register for courses until formally admitted to NMSU through the Community College, International Programs, Undergraduate or Graduate Admissions processes.

Class Schedule

Each semester and summer session, the University Student Records provides an online schedule of classes which can be accessed through myNMSU or the NMSU website. Note that not all courses listed in this catalog are offered every semester.

Registration Schedule by Classification

Several groups of students (e.g. Crimson Scholars, Students with Disabilities, Veterans) receive priority dates for course registration. For other students, registration dates are determined by the student's current classification at the time of registration. A student's classification is determined by the number of credits completed, and does not include courses in progress. A student's classification depends upon the number of credits completed toward graduation. Sophomore classification is achieved with successful completion of 28 credits; Junior classification, 60 credits; Senior classification, 90 credits.

University Credits

The unit of university credit is the semester hour, which is based upon one hour of lecture class or a minimum of two hours of practice/lab per week during one semester, and assumes a minimum of two hours additional, by the student, outside of class. The number of credits associated with each course is indicated in the course schedule.

Course Load for Undergraduate Students

The full-time course load in a regular semester (fall or spring) for a main campus undergraduate students is 12-18 credits. A full-time course load for a summer term is 9-12 credits, with a maximum of 6 credits per session. Some scholarships have a 15 credit course load eligibility requirement. Each student is responsible for meeting their own scholarship eligibility requirements.

An overload is classified as more than 18 credits for a regular semester and more than 12 credits for the summer term. A one-credit course in physical education or supplemental instruction will not create an overload. Registration for a course overload requires written permission from an Associate Director of the Center for Academic Advising and Student Support (CAASS) or the Associate Dean for Academics in the student's academic college. A "Change of Schedule (https://records.nmsu.edu/_files/sro-forms/Change%20of%20Schedule%20Form.pdf)" form is required and available on the University Student Records website (https://records.nmsu.edu). Freshmen and students with a grade of D or F, or a cumulative grade-point average of less than 2.5, in either of the last two semesters, are not eligible for overloads. Concurrent enrollment in non-NMSU courses at other post-secondary institutions requires prior approval from the Associate Dean for Academics in the student's college, and these courses are counted as part of a student's class load.

Course Load for Graduate Students

A full-time course load in a regular semester (fall or spring) is 9 credits, with a maximum of 15 graded credits. A full-time course load for a summer term is 6 credits with a maximum of 9 credits.

Course Numbering

The course numbering system at NMSU indicated the levels as follows:

- 100-299/1000-2999 – Lower Division (Las Cruces and Community College Campuses)
- 300-499/3000-4999 – Upper Division (Las Cruces Campus)
- 450-499/4500-4999 – Senior and graduate courses (Las Cruces Campus)
- 500-799/5000-7999 – Graduate courses (Las Cruces Campus)

All undergraduate students must demonstrate Basic Academic Skills in both English and mathematics before enrolling in any upper-division course (numbered 300/3000 or higher). These requirements ensure that each student in the upper-division courses has the ability to succeed without compromising the learning experience of other students.

Class Delivery

Classes at NMSU are delivered in a variety of modalities. Students may see any of the following schedule types when viewing the class schedule through myNMSU or the NMSU website.

- **CL (Classroom/Lecture):** traditional in-person class meetings that occur on specified days and times in a specified location.
- **LB (Lab):** traditional in-person lab meetings that occur on specified days and times in a specified location.
- **HY (Online with In Person Meetings):** hybrid delivery that is offered both online and with required in-person class meetings that occur on specified days and times in a specified location.
- **ONL (Online with Synchronous Meetings):** online class meetings that require all students to meet virtually on specified days and times
- **WB (Online with no Synchronous Meeting):** online class meetings that do not require students to meet virtually
- **IND (Independent Meeting):** students and instructors schedule meetings on an as needed basis to discuss course content and student progress
- **TD (Thesis/Dissertation):** thesis/dissertation with implied meetings on an as needed basis to discuss course content and student progress
- **PC (Practicum):** practicum/clinical with implied meetings on an as needed basis to discuss course content and student progress

Prerequisites and Corequisites

Some courses require advance or concurrently acquired specific knowledge and skills. Prerequisite(s) and corequisite(s) for each courses are indicated in the course description section of this catalog. Students must have completed (or be presently enrolled in the prerequisite(s)) courses in order to register for a course with prerequisites. Where a student was allowed to register for a course while completing the prerequisite(s), and then subsequently fails to successfully complete a prerequisite course, the student shall be dis-enrolled from the course requiring the prerequisite. In the case of a corequisite, a student must enroll in the courses during the same semester. In some instances, where a course has an enforced "pre/corequisite" the student can elect to either take the requirement before registering for the course, or take the courses at the same time.

Registration Changes

Subject to any registration "holds" and any applicable deadlines, students may change their course registration online. Caution should be exercised as registration changes may negatively impact eligibility for scholarships, financial aid or athletic participation, the student's ability to progress through their degree program in a timely manner, and the student's obligations with respect to tuition and fees.

The University Student Records publishes an online schedule of "Important Dates for Students (https://records.nmsu.edu/students/important-dates.html)" for each semester. The student is responsible for reviewing and adhering to the Important Dates, including the deadlines to add, drop or withdraw from course(s) for the relevant semester.

Adding Courses: There are two different types of deadlines for adding courses:

1. **Last day to add a class without instructor's signature** - during this period courses may be added online through myNMSU, or through your academic advisor (if necessary).
2. **Last day to add a class with instructor's signature -** during this period courses may only be added with either the "Change of Schedule (https://records.nmsu.edu/_files/sro-forms/Change%20of%20Schedule%20Form.pdf)" form signed by the instructor (available online on the University Student Records website (https://records.nmsu.edu)).
   Or students taking classes online and who do not live in the Las Cruces Area must email the instructor, using the NMSU email, in order to get permission to be added to the course. If the instructor approves the addition, the approved response must be sent to either the student's academic advisor or to record_grade@nmsu.edu with the student's name, ID number and course CRN number they are wanting to add.

Withdrawing from Courses: There are two different types of deadlines for withdrawing from courses:

1. **Last day to drop without a "W" grade –** during this period, the student can drop the course and not have it appear on their official transcript in any form, and the student will have no financial obligation related to the course (students will receive a 100% refund if tuition has been paid for the course).
2. **Last day to drop with a "W" grade –** during this period, the student can withdraw from the course, but the course will appear on their official transcript with the withdrawal (W) designation as the grade, and the student will be responsible for the full tuition and fees related to that course.

Students are responsible for initiating official withdrawal from any course(s) they do not intend to complete. Students who experience extraordinary circumstances that prevent timely registration changes should consult with their Academic Associate Dean or the Registrar. For more information about the process for adding or withdrawing from a course(s), please speak with your academic advisor or contact the University Student Records.

Any student attending under Veteran Educational Assistance must notify the Military and Veteran's Programs office before processing registration changes to determine if changes will affect their enrollment status or benefits.

A student found insufficiently prepared for a course they are enrolled in may be transferred to a more elementary course in the same subject any day before the last day to withdraw from an individual course.

Waitlisting

Waitlisting is available for all courses across the NMSU system, except for labs that are linked to a specific lecture class. Waitlisting is an electronic list of students who are waiting to register for a filled course. Once students are put onto the waitlist, the process to get into that course is as follows:

1. A currently enrolled student must drop the course for a seat to become available.
2. The first student on the waitlist is notified through their NMSU email.
3. The notified student has 24 hours to log in to their myNMSU and register themselves for the class.
4. If the first student fails to register within their allotted 24 hours, then the first student is dropped from the waitlist and the next student on the waitlist is notified. This continues until the empty seat is filled.

A student who fails to register for the class during their allotted 24 hours is automatically dropped from the waitlist and can add themselves back onto the bottom of the waitlist for that course.

Students cannot be added to the waitlist after the first day of classes. Instructor overrides can only be made after the second day of class, at which point the instructor's signature is required on either the "Change of Schedule (https://records.nmsu.edu/_files/sro-forms/Change%20of%20Schedule%20Form.pdf)" form to add a course.

Graduate Registration Requirements for Summer

Students who have scheduled their final examination, or who are completing their thesis during a summer session, must be registered for one credit hour during the same summer session. In order to graduate during a summer session, the student must have filed the Application for Degree by the deadline posted on the Academic Calendar.

Repeating Courses for A Change in Grade

See the Grading portion of the Academic Regulations section of this catalog.

Substitutions and Waivers

Students registering for their final semester must have all course substitutions and/or waivers of degree requirements approved before two weeks after the last date of registration for full or summer terms.

Auditing a Course (No Credit)

An audited course is one in which the student registers for the learning experience but does not seek to earn academic credit for the course. A student seeking to audit a course must register and pay tuition and fees for the course and have the consent of the instructor to take the class in audit form. A student who has registered to audit a course may be dis-enrolled from the course at any time before the registration deadline expires if necessary to accommodate a student taking the course for credit. After the last day to register, the student cannot change the course option from audit course to a for credit bearing course.

Audited courses are not used in determining a maximum class load (overload) for undergraduate students in good academic standing, however, the audited course will be counted as part of the maximum allowable course load for graduate students and undergraduate students who are on academic probation.

Academic Performance and Progress Attendance and Student Performance

Academic success is closely correlated to student participation and attendance. Accordingly, students are expected to attend all their classes regularly. Each course instructor will establish the specific attendance and course requirements via the course syllabus. Only students who are currently enrolled in a course for either credit or audit are permitted to attend the classes officially. However, individual instructors may allow an

occasional visitor and may allow a student who formally withdrew from the course to continue to participate for the remainder of the semester.

Absences from Class and Failure to Complete Assignments

Students who must miss class due to accident, illness, or other circumstances beyond their control should consult the course syllabus and the instructor for guidance. Students may be administratively withdrawn from a course due to excessive absences (consecutive absences in excess of the number of class meetings held within a week or any number of absences, including failing to use the online Learning Management System, which are impairing the student's performance), or for persistent failure to complete assignments. In such cases, the Instructor may recommend administrative withdrawal by providing the Academic Associate Dean a completed "Student Absence/Lack of Progress Report" form. If the Academic Associate Dean agrees with the recommendation of the course instructor, the student will be administratively withdrawn from the course. To appeal the decision, see the Administrative Withdrawal (p. 48) section.

Any absences due to the student's participation in a university-sponsored event (e.g. ASNMSU president representing NMSU at legislative session, student-athletes competing in NMSU scheduled athletic events, or students attending educational field trips and conferences) will be excused and deemed an "Authorized Absence". Authorized absences do not relieve the student of the course assignments or responsibilities and instructors may require students to complete course work before the absence. Before the student's absence, the student will provide the instructor(s) with written notice of the dates of expected absence.

Classroom Conduct

Each instructor has the authority to establish and enforce reasonable rules of conduct in their courses. A student who engages in behavior that interferes with the educational environment of the class may be administratively dis-enrolled with the approval of the academic Department Head and Academic Associate Dean for the course, and with notification to the Provost. Any student who has been administratively dis-enrolled from a class may appeal that decision to the Dean of the College where the course was offered within ten days after notification of the dis-enrollment.

Student Performance Assessment

Individual student performance and learning outcomes in a course are measured and evaluated by the course instructor and reported to the student in the form of grades. Each instructor has the authority to establish assignments and other assessments (such as exams and quizzes) and assign grades based on the student's performance. The instructor determines the final grades for the course and reports to the University Registrar as described in the grading section of this catalog. Any student who believes that their academic performance has been evaluated unfairly may appeal the grade through the University's Academic Appeals process (https://report.nmsu.edu/decision-tree/) as provided in this Catalog.

Academic Program Assessment

New Mexico State University is committed to providing its students with a quality education and a supportive learning environment. Academic Program Assessment is a continuous improvement process achieved by identifying a program's desired learning outcomes, evaluating the extent to which students in the program collectively achieve those outcomes, and then implementing changes to enhance and improve the collective program outcomes. For assessment to be effective, students must be actively aware of and engaged in assessment activities.

Academic Program Assessment requires participation of students who are expected to provide feedback on personal, professional and academic development and to participate in a variety of assessment exercises. Assessment activities may be a part of regular graded course assignments, or may require students to engage in other activities as outlined in the course syllabus. Assessments may include course projects, exams, exit interviews, standardized tests, surveys, focus groups, etc. Data gathered through these assessments is published only in aggregate form. Learn more about NMSU's Academic Program Assessment at https://assessment.nmsu.edu/

Exam Week and Final Examinations

NMSU designates the last week of each semester as "Exam Week" during which each course has only a single 2 hour meeting time for a mandatory culminating activity which may be a final examination or some other course-related activity. The University Student Records (USR) establishes the Final Examination Schedule (https://records.nmsu.edu/students/final-examination-schedule.html) for each semester. Examinations are typically held in the course's standard lecture/lab room. Some departments hold Departmental Exams where all students for all sections of a particular course must take the final examination simultaneously. The Final Examination Schedule indicates the Department Exam dates, times, and location. For courses not scheduled to meet at the specific times listed under "Regular Class Time" on the USRO's Final Examination Schedule, the instructor and course department coordinate examination dates, times and locations with NMSU's Academic Scheduling office (575) 646-4790. Final exams for weekend courses are held during the regular class period on the last day of class.

The final exam or culminating activity must not be rescheduled for a different date, time or location, except with the department head's permission and the enrolled students' unanimous consents. During the week before Exam Week, instructors cannot hold examinations lasting more than one class period.

Any student having more than three examinations scheduled in any one day may, no later than the week before exam week, notify the instructor of the examination scheduled latest in the day to obtain an alternative date for that examination. (If the fourth exam is a departmental exam, the instructor of the third exam will make alternate arrangements for that exam upon request.)

Students who believe that their instructor(s) have not honored Exam Week requirements may appeal to the instructor's department head.

Developmental Evaluation

The academic skill level of all entering first-time students at the time of registration is evaluated based on ACT scores, SAT scores, and/or alternative placement assessments. The student's eligibility to enroll in university-level English and Mathematics courses depends on this evaluation. Students without adequate preparation for university-level courses must take developmental courses. Developmental courses are included on the transcript and will be included in the calculation of the GPA, but the developmental course credits do not count towards a degree.

Basic Academic Skills

All undergraduate students must demonstrate Basic Academic Skills in both English and mathematics before enrolling in any upper-division course (numbered 300/3000 or higher). These requirements ensure that each student in the upper-division courses has the ability to succeed without compromising the learning experience of other students. The completion of the Basic Academic Skills requirements **does not necessarily result in the award of academic credit nor satisfaction of university general education requirements** in English and mathematics. (Students should consult the General Education Courses and Requirements section in this chapter for these requirements.)

Transfer students with 45 or more credits are allowed to enroll in upper-division courses for only one semester before satisfying the Basic Academic Skills requirements. The Basic Academic Skills requirements may be satisfied in a variety of different ways as listed below:

English Basic Skill Demonstration Options (achieve one of the following):

- ACT English Score of 30
- Coursework - **ENGL 1110G**, or equivalent, completed with a grade of C- or higher.

Equivalents: the following are deemed equivalents to ENGL 1110G for the purpose of satisfying Basic Academic Skills in English:

- **ENGL 1110H –** completed with a grade of C- or higher
- ENGL 1110M - required for International students who took the TOEFL examination
- CLEP Exam score of 57 or higher in freshman college composition
- English Advanced Placement (AP) Exam score of 3, 4, or 5
- English Composition Transfer Credits - 3 or more credits with a grade of C- or above, transferred from accredited post-secondary institutions (International students may be required to take ENGL 1110M Composition I Multilingual as noted above.)

Credits from Non-accredited Institutions - As a general rule, NMSU does not accept credits from non-accredited institutions. Students with 3 or more credits of college-level English composition with a grade of C- or higher from a non-accredited institution may, however, challenge the Basic Academic Skills requirement in English and ENGL 1110G Composition I course requirement by submitting a theme paper written under the supervision of, and demonstrating achievement of ENGL 1110G Composition I learning outcomes as determined by, the Department of English.

Mathematics Basic Skill Demonstration Options (achieve one of the following):

- ACT Mathematics Score of 23
- Coursework – any one of the following courses or course combinations completed with a grade of C- or higher in each course:
  - MATH 1130G Survey of Mathematics
  - MATH 1215 Intermediate Algebra
  - MATH 1220G College Algebra
  - Any mathematics course numbered 1250G or above (prefix MATH) excluding MATH 1996 Topics in Mathematics and MATH 2992 Directed Study
- Basic Skills Exam Passing Score - offered twice a semester by the Department of Mathematical Sciences
- Calculus AB, Calculus BC or Statistics Advanced Placement (AP) Exam score of 3, 4, or 5

IMPORTANT NOTE: Basic Academic Skills Demonstration fulfillment options may not appear on the transcript, result in the award of academic credit, or satisfy general education requirements. The Basic Academic Skills requirements are used solely to determine eligibility for enrollment in upper-division courses. All students should seek to complete the Basic Academic Skills requirements as early in their academic program as possible. Students who postpone completing Basic Academic Skills may be unable to progress toward degree completion in a timely manner.

Independent Study and Directed Reading Courses

Independent study courses and directed reading (other than those designated in the catalog with a subtitle), are for students capable of and sufficiently motivated to undertake self-directed study with limited oversight of a faculty member. Only students who have completed at least 28 credits at NMSU under traditional grading, with a cumulative GPA of 2.5 or better, can enroll in independent study courses. No student is entitled to enroll in independent study and enrollment requires the consent of an instructor who agrees to supervise and evaluate the student's learning activities in the course. Students seeking registration in an independent study course should prepare an independent study proposal to present to the individual faculty member(s) in the relevant discipline for consideration. At a minimum, the proposal should include the topic of study, a brief survey of the literature or other resources on the subject, and a description of the proposed written product or another tangible outcome of the independent study. The relevant academic department for the discipline may have additional requirements. Each college determines the maximum number of credits that may be earned in independent study courses.

Adjusted Credit Option

The adjusted credit option provides eligible undergraduate students who earned a low grade-point average (less than 2.0 cumulative) during their first few semesters to reset their GPA calculation. This option may be used only once and is not reversible. These are the consequences of exercising the Adjusted Credit Option:

1. All of the student's academic history pre-dating the request, including all NMSU course credits previously attempted or completed, transfer coursework, CLEP, ACT, advanced placement, special examination, and/or military service are included in the adjustment and designated as "ADJUSTED CREDITS" on the transcript. These credits are no longer included in the cumulative grade point average calculation.
2. Courses carrying an academic grade of S, CR, C- or better, earned prior to the grading period in which the student requested this option, are treated as earned academic credit and need not be repeated, except where a higher grade is required in the student's academic program.
3. Courses carrying an academic grade of U, CD, D or F, earned prior to the grading period in which the student requested this option, remain on the student's transcript, but no academic credit is provided for these courses. The student must repeat these courses to obtain academic credit.
4. The student's academic transcripts will continue to reflect all coursework, including courses falling under the adjusted credit

option. In no circumstances will a transcript be issued that does not include all courses attempted at this university.

5. The student's current academic status, eligibility for employment, and financial aid may be impacted. Probationary status and eligibility for on-campus employment are not affected by the exercise of the adjusted credit option.
6. The repeat rule for courses starts anew.
7. The student will not be eligible for the award of an associate degree until earning thirty (30) or more additional credits after exercise of the Option.
8. The student is eligible for University honors at graduation upon completing a minimum of 60 academic credits at NMSU, after the adjusted credit option is exercised, with a resulting grade point average that satisfies University regulations for honors.

After carefully considering the consequences indicated above, eligible students may exercise the Adjusted Credit Option by paying a fee of $10 and submitting an adjusted credit option application to the University Student Records. Application forms are available on the University Student Records website and can be approved by the Director of the Center for Academic Advising and Student Support or the Associate Dean for Academics in the student's college or the Academic Vice President at the Community Colleges. Only students meeting the following criteria are eligible to exercise the Option:

1. No awarded baccalaureate degree
2. Enrolled as a degree-seeking or non-degree undergraduate student
3. A cumulative grade-point average of less than 2.0 at NMSU
4. Fewer than 60 credits accumulated (including both transfer and NMSU credits)

Credit by College Level Examination Program (CLEP)

Before or during a student's enrollment at NMSU, credits may be earned through the College Level Examination Program (CLEP) of the College Entrance Examination Board. CLEP is a national program of credit by examination that offers the opportunity to earn credits for college-level achievement wherever or however the student learned. Earned CLEP credit will be treated as transfer credit without a grade, will count toward graduation, and may be used in fulfilling specific curriculum requirements. A current NMSU CLEP policy and test schedule information is available through Testing Services DACC East Mesa, RM 210. Testing Services may be reached at: (575) 528-7294.

Credit by Examination

Any enrolled student with a cumulative GPA of at least 2.0 currently attending classes may, with permission of the appropriate department, challenge by examination any undergraduate course in which credit has not been previously earned except an independent study, research or reading course, or any foreign language course that precedes the final course in the lower-division sequence. The department in which the course is being challenged shall determine the manner of administering the examination and granting permission. Students may not enroll in a single course, challenge it by examination, and drop it during the drop/add period, unless they enroll in an additional course. In exceptional cases in which a student demonstrates outstanding ability in a course in which they are already registered, they may be permitted to challenge the course. A student desiring to apply for special examination may obtain the necessary forms from the University Student Records. The fee for challenging a course is the same as the approved tuition rate. Courses may not be challenged under the S/U option. The special examination privilege is based on the principle that the student, exclusively, has the responsibility for preparing for a special examination.

Credit for Military Service

New Mexico State University will award academic credit to United States military personnel for courses and Military Occupational Specialties (MOS), based on the American Council of Education Guide (ACE) as well as through national standardized tests, such as CLEP, AP, PEP and DANTES. Credit for military training is in accordance with NMSU Faculty Senate Legislation Proposition 24-07/08, which was passed in May 2008. Military Training and Military Occupational Specialties (MOS) must have a recommendation evaluation by ACE (in the ACE Guide) for credit to be awarded. Courses accepted for transfer credit become part of the student's official NMSU transcript and academic record. If a student wishes to appeal a decision regarding the acceptance of military training/education and/or MOS for academic credit, the student must submit a written statement of appeal to the Dean of the College to which the student has applied. The Dean will review the merits of the appeal and render a decision. The decision of the Dean is final.

Only Primary MOS (s) are eligible for academic credit in the initial review and evaluation. Credit for Duty and/or Secondary MOS may qualify for academic credit if the student petitions the college's Academic Dean. Primary MOS is the primary specialty of a soldier and reflects the broadest and most in-depth scope of military experience. Veterans, active-duty personnel, National Guard and Reservists who are current students or students applying for admission to New Mexico State University may be granted academic credit on a case-by-case basis upon evaluation of military transcripts - the Joint Service Transcript (jst.doded.mil) and the Community College of the Air Force transcripts. Course equivalencies and credit hours awarded for a particular NMSU degree are determined by colleges and/or academic departments. Credit hours may be awarded for specific courses toward degree requirement, or as elective credit. The number of credit hours awarded will be determined by the college and/or academic department.

NOTE: Students submitting military transcripts for credit evaluation must keep in mind the Maximum Time Frame policy. See Financial Aid (p. 75) *Section.*

Graduate Course Deficiencies

Students admitted with departmental deficiencies may be required to take diagnostics tests and additional qualifying examinations. They must complete satisfactorily, in a manner specified by the major department, all undergraduate course deficiencies as prescribed by the department responsible for the graduate program. Courses taken to satisfy deficiencies will be listed on the undergraduate transcript; however, these course grades will not be calculated in the student's graduate GPA or graduate hours. With the permission of the student's advisor and the head of the department, courses to meet undergraduate deficiencies may be taken under a S/U option (with S being a grade satisfactory to the professor), and such courses will not affect the maximum number of S/U graduate credits permitted.

Short Courses for Graduate Students

Short course(s) that are numbered 450/4500 and above have been approved to carry graduate credit. Graduate students must be registered for the short course(s) to receive graduate credit. Concurrent enrollment of graduate students in regular and short courses for the fall/spring

semesters is allowed, provided the combined total credits does not exceed 15. All short courses carrying one-semester credit will be graded on a S/U basis, and these credits will be counted toward the student's limit of S/U credits.

Challenging Graduate Courses

A graduate student may challenge a graduate course by examination, please see the Graduate School for more information.

Grading

University Grading System

Each course department or instructor establishes the system for assessing student performance in achieving course learning objectives. Students should consult the course syllabus for a description of the grading system used in each course. At the conclusion of each course, instructors are required to report a final grade reflecting the instructor's assessment of each student's performance. Shortly after the end of the term, students can access their grades through the MyNMSU portal. No other grade notification will be issued. The final grade is reported on the student transcript. Instructors may elect whether to use fractional grading (the use of the plus and minus) in assigning final letter grades.

The NMSU system for final grades is expressed in letters, which carry grade points that are used in calculating the cumulative grade-point average, as shown in this table:

Letter Grade	Grade Points per Unit of Credit
A+	4.0
A	4.0
A-	3.7
B+	3.3
B	3.0
B-	2.7
C+	2.3
C	2.0
C-	2.0
D+, D, D-	1.0
F	0
W- Withdrawal	0
N- Grade not submitted	0
CR- Credit authorized, but not letter grade	0
IP- In progress	0
RR- Progress in undergraduate course	0
PR- Progress in graduate thesis	0
S- Satisfactory work[1]	0
U- Unsatisfactory work	0
I- Incomplete work	0
AU- Audit	0

[1] S grades are grades that are satisfactory to the professor and are normally equivalent to the letter grade of C- or higher.

Any courses for which only CR, S or PR is awarded, but no traditional letter grade is given, will be included in the total number of earned hours but is not computed in the grade-point average. Traditional letter grades are those which are used in the grade point average determination: A+, A, A-, B+, B, B-, C+, C, C-, D+, D, D- and F. In computing the overall grade-point-average, the total credits in which grades of A+ through F have been assigned is divided into the total number of grade points earned.

Midterm and Six-Week Early Performance Grades

A Six-Week Early Performance Grade (sometimes referred to as Midterm Grade) for courses numbered 100/1000-299/2999 will be posted and available to students through the MyNMSU portal. The purpose of the early grade posting is to ensure that students have an opportunity to address any performance issues. Students should be mindful that the Six-Week Early Performance Grade reflects a students' performance on only that portion of the total coursework that has been graded at that time. Any student who is doing poorly, or not as well as they would like, should meet with the instructor to discuss how they can improve. Students who have concerns about their progress in multiple courses or who are considering withdrawal from course(s) must meet with their academic advisor.

In courses numbered 300/3000 or higher, the posting of Early Performance Grades is optional and may occur through the online course management system rather than the MyNMSU portal. However, prior to the last day to withdraw from a course, upon request, instructors will provide information to students about their progress in the course.

Retention of Grading Records

Individual assignments and exams that are not returned to students should be retained by the instructor or department through the end of the subsequent regular semester. The records used to compute individual final grades should be retained for two years after the completion of a course. If a final grade is appealed, these records are kept for at least two years after the completion of the appeal. Departments, colleges, or the library may require that records be kept for longer periods.

Minimum Grade Requirement for Undergraduate Students

Undergraduate degrees require a cumulative GPA of 2.0 or higher for degree completion. Although D+, D, or D- can be considered passing, some departments have higher grade requirements for the courses within their program and/or their program as a whole. Students should check with their departments regarding specific course grading requirements for their particular degree program.

Minimum Grade Requirement for Graduate Students

Graduate degrees require a cumulative graduate G.P.A. of 3.0 or higher. Although B- and C grades (including C+ and C-) earned at NMSU may be counted toward the requirements for a graduate degree in some programs, this grade does not reflect acceptable graduate-level performance and may cause the cumulative G.P.A. to fall below the 3.0 required for graduate students. Some departments have higher grading requirements for courses in their programs. Students should check with their departments regarding specific course grading requirements for their particular degree program.

Courses in which a student earns a D or F grade do not ever satisfy graduate degree requirements; however, these grades will be calculated

in determining the students' cumulative grade-point average. To obtain academic credit, students must retake courses in which a grade of D or F was earned.

S/U Grading

S/U grading allows the student to attempt to earn course credit without having a course grade included in their grade point average calculations. Under S/U grading, the instructor assigns an S grade for satisfactory achievement of the course learning objectives (normally equivalent to the letter grade of C- or higher) and a U grade for unsatisfactory performance in the class.

Designated S/U Courses

Each academic college may designate courses in which the grading will be on the basis of S or U for all students enrolled in the courses. Credits in designated S/U courses are not included in the limitations on the number of S/U credits a student may take and are not subject to the student eligibility requirements described below.

Election of the S/U Grading Option - Undergraduate Students

In courses other than those designated as S/U for all students, eligible individual students may elect the S/U Grading Option, subject to the regulations stated below. To be eligible for the S/U (satisfactory/unsatisfactory) Grading Option, undergraduate students must meet the eligibility requirements and obtain the approval of an academic advisor. Eligibility requires the completion of 28 credits at NMSU under traditional grading, with an overall average of 2.5 or better. (Upon approval of the adjusted credit option, students must re-establish eligibility.) Non-degree seeking students may take courses under the S/U option without regard to eligibility requirements. However, these courses may not be subsequently applied toward an undergraduate degree at NMSU.

The S/U option must be elected as part of the course registration and may not be added once the course registration period closes. Other than honors courses and courses officially designed as S/U, the following limitations apply to courses in which the S/U option is elected:

1. No more than 7 credits per semester or 4 credits per summer session.
2. Not to exceed a total of 21 credits towards a degree.
3. Not a required course for the student's major.

Students electing the S/U option should be mindful that upon a change of majors, the new major department may require a traditional grade for a course within that major that was previously completed with an S grade. In such cases, the student may request that the original instructor process a change of grade form to apply a traditional grade, however, if more than 2 years have elapsed or if the instructor is no longer at NMSU, such a change will not be possible and the student may be required to retake the course or obtain a traditional grade through a course challenge.

Election of the S/U Grading Option Election - Graduate Students

With approval from their advisor and department head, graduate students in good academic standing may elect the S/U option, at the time of registration, for courses taken outside the major department, subject to the regulations stated below:

1. No more than a total of 6 credits of elected S/U courses are permitted in the master's degree.
2. Doctoral candidates may take an additional 6 credits under the S/U option after application to candidacy.

I Grade Designation

The letter grade of I (incomplete) is given for passable work that could not be completed due to circumstances beyond the student's control that develop after the last day to withdraw from the course. In no case is an I grade to be used to avoid assigning D, F, U or RR grades for marginal or failing work. Examples of appropriate circumstances include documented illness, documented death or crisis in the student's immediate family, unexpected military deployment and similar circumstances. Other job-related circumstances are generally not appropriate grounds for assigning an I grade. Students requesting an I grade are responsible for providing satisfactory evidence of such circumstances. (In the case of medical records, instructors should review the information provided, note that adequate medical documentation was provided for review, and return the documentation to the student. Under no circumstances should the instructor retain any medical records or indicate the specifics of any medical condition in the academic records.) The refusal to grant an I grade may be appealed in the same manner as any other final grade.

To assign an I grade, the instructor must complete the "I grade Information Form (https://records.nmsu.edu/_files/sro-forms/I%20Grade%20Information%20Form.pdf)" by the deadline for final grade submission in the semester the student was enrolled in the course, and have the form delivered to the associate dean of the course college. The instructor must indicate on the form whether the student will be given the option to complete the remaining coursework and have the I grade changed to the earned letter grade. If so, the instructor should indicate the steps necessary to complete the remaining coursework. The I grade form should either be signed by the student in person or digitally, or the associate dean must send a copy of the document to the student's official permanent address or university email address, as recorded in the University Student Records, with a notation on the form that the student was not available for signature.

The I grade will be permanent in instances where (1) the instructor did not provide an option to complete the coursework, (2) the instructor left NMSU before completion of the coursework and grade change, or (3) the student failed to complete the coursework by the relevant deadline, and the instructor did not indicate that the I grade would be changed to the earned grade upon failure to complete. In such instances, the student will be required to re-enroll in the course to receive credit (in which case the permanent I grade and the subsequently earned letter grade will both appear on the transcript).

The student is entitled to have the I grade removed from the transcript only if, within 12 months or any earlier deadline established by the instructor on the "I Grade Information Form" and before graduation, the student completes the remaining coursework, as specified on the I Grade Form, in a manner satisfactory to the instructor. If the student fails to complete the coursework, the instructor may change the I grade to any appropriate grade (including D, F, or U) only if the instructor stated that this would occur on the "I Grade Information Form." The instructor should assign whatever grade was earned for the entire course.

To change the I grade, the instructor must complete a "Change of Grade Form," obtain the signature of the associate dean for the course, and submit the form to the University Student Records.

RR Grade

The RR grade may be assigned only in undergraduate developmental courses (CCDE, CCDL, CCDM & CCDR) and indicates that the student has made substantial progress toward completing the requirements of the

course. It carries neither penalty nor credit, so a student must re-enroll and successfully complete the course in order to earn credit. The grade of RR may be received only once in any given course, and is a permanent notation on the student's transcript.

W Grade Designation

The W grade is assigned only in courses when the student withdraws or is administratively dis-enrolled from the course after the last day to drop the course. The W grade is permanent.

Effect of Change of Grade

The effect of a change of grade on a student's academic standing (academic warning, probation or suspension) depends on the date the transaction is officially recorded on the student's academic record. If the transaction is recorded before the student begins another semester, the grade change (such as replacing the I grade with an earned grade) is included in the grade-point average calculation to establish the student's academic standing. If the transaction is recorded after the student begins another semester, for the purpose of calculating academic standing, the new grade is included with any other grades earned for the semester in which the grade change is processed.

Repeating Courses for a Change in Grade

Undergraduate: Undergraduate students may repeat courses, for a change in grade, when the original grade earned was a D or F. Once a grade of C- or better is earned, the course will then be substituted in the calculation of the grade-point- average and students will no longer be able to repeat that course for change of grade purposes. Student transcripts will continue to show the grade awarded for each course attempt, but only the higher grade will be included in the GPA calculations.
a. If the student's original grade was a D and the student repeats the course, but receives an F, the second grade will not be substituted for the original. Repeat options apply only to courses that were completed prior to the time a student was awarded a degree.

Graduate: Graduate students may repeat courses for a change in grade, to be updated on the official student transcript, when the original grade earned was a B- or lower. Students with active graduate status (admitted to a graduate program) are eligible to use this policy.
a. A course may only be repeated once (a total of two instances within the active program of study), and the course numbers and subtitles must be identical (e.g. GEOG 598 – Intro to Geography AI).
b. To replace the original grade on the transcript, the repeated course must result in an improvement of the previous grade. The higher grade will replace the lower grade in the calculation of the cumulative GPA and earned credit hours.
c. The original grade will remain on the student's transcript. An "E" will appear next to the course to indicate that the lower grade is removed from GPA calculation.
d. No grade may be replaced after a graduate degree has been awarded.
e. Symbol grades such as CR, PR, S, U, and W are not replaceable since these grades do not affect the overall grade point average.

Grade Point Average

Grade point average (GPA) calculations are based solely on courses taken at NMSU or under an approved National Student Exchange.

Grading in Graduate Research

In grading both master's and doctoral research, thesis and dissertation work in progress, the instructor reports for each enrollment period the grade S (satisfactory) or U (unsatisfactory) rather than a traditional letter grade. These assigned grades are permanent notations on the student's transcript. Only those credits graded S (satisfactory) accumulate toward the minimum number of research credits required.

U indicates that the student has stopped work or is doing work of unacceptable quality. After the final examination, and/or when the thesis/dissertation is submitted to the electronic dissertation submission system, the instructor will report the final S or U grade for the research.

The report of an S (satisfactory) grade means that the degree will be certified. A U (unsatisfactory) grade means that the student is doing work of unacceptable quality.

If a student accumulates a total of two U (unsatisfactory) grades in courses numbered either 598, 599, 600, 699 or 700, the student will be placed on Academic Probation I. If three U (unsatisfactory) grades are reported for these courses, the student will be dismissed from the Graduate School.

Withdrawals

For more information regarding how withdrawals impact tuition refunds, please see the Tuition, Fees & Other Expenses (p. 74) section of the catalog.

Withdrawal from a Single Course

Any student wishing to formally withdraw from a single course, after the last day to drop has passed, can do so through their Academic Advisor or the University Student Records. All such withdrawals will be registered on the student's transcript with the "W" grade indication.

For students wishing to withdraw from all courses, please see the section on Withdrawal from NMSU.

Leave of Absence from the Graduate School

Students working on advanced degrees and planning to have an interruption in studies for a calendar year should request a leave of absence through their department head. The student must submit a formal letter through their department head to the Dean of the Graduate School, an email will not be accepted. The request should include the beginning date and the anticipated ending date for the period of absence.

A graduate student on leave of absence will be expected not to use university facilities and place no demands upon the university faculty and staff, and, therefore will pay no fees. Time spent in the "leave-of-absence" status will not be counted toward the advanced degree time limits.

A graduate student who fails to register for one calendar year without obtaining a leave of absence from the Graduate School will be considered withdrawn from the university, by the Graduate School. In order to resume their studies after such absences, the student must go through the formal readmission process.

Administrative Withdrawals

If a student has stopped attending class without formally withdrawing, stopped using the online Learning Management System, or has a history

of persistent unexcused absences or failures to complete assignments, the University reserves the right to remove the student from the class by means of an administrative withdrawal. An administrative withdrawal may be requested under the following circumstances, excluding absences through University policy:

1. At the beginning of the semester, if a student misses the first two (2) class meetings or online activities.
2. At any point in the semester, if a student misses four (4) consecutive class meetings or online activities.
3. If over the course of the semester, the student persistently fails to attend class or fails to complete assignments.

Except in documented cases of persistent unexcused absence/ nonparticipation, administrative withdrawals will not be used to avoid the assigning of D, F, U or RR grades for marginal or failing work. Administrative withdrawals are subject to the same refund rules as student-initiated withdrawals (100% refund prior to census and no refund after census).

To request consideration for an administrative withdrawal, the instructor must complete the Student Absence/Lack of Progress Report (https://records.nmsu.edu/_files/sro-forms/Student%20Absence%20or%20Lack%20of%20Progress%20Report%20-%20Administrative%20Withdrawal.pdf), found on the forms page of the University Student Records webpage, and route for approvals as soon as a pattern of non-attendance/non-participation is established. The University Student Records is ultimately responsible for processing the administrative withdrawal. The form is to be submitted as soon as the pattern of persistent absence/nonparticipation is established. Normally it will be submitted no later than one week after the deadline for a student to withdraw themselves from the course.

Upon receipt of a fully approved Student Absence/Lack of Progress Report, from the Dean's Office, the Student Records staff will notify the student that they will be withdrawn from the class within 48 hours unless they appeal the action. This notification will be sent to the student's official NMSU email address. Students wishing to appeal the administrative withdrawal, should reply to the Student Records' notification email, with a valid reason for non-attendance / non-completion of coursework, within 48 hours of the email delivery time stamp.

If the appeal circumstances are determined reasonable and accepted, the student will not be withdrawn from the class and will be expected to actively participate in all future meetings and coursework. The Student Records will notify the instructor, Department Head and Associate Dean of the determination, via official NMSU email.

When an administrative withdrawal is initiated for a student who is representing the university at an official out-of-town event any administrative withdrawals will become effective upon the student's return from the event or five days after the drop slip fully approved form is submitted to the Student Records.

Military Withdrawal

New Mexico State University understands that our military students may be called to active duty, specialized training, or disaster relief efforts with little notice. U.S. active-duty military students wishing to withdraw from all their classes must present their orders and their request for full withdrawal, as indicated below. However, the below policy does not pertain to a student's basic and/or annual training. A student who has an order for training is encouraged to formally request, through the proper military chain of command, a postponement of their orders until the summer or the end of the semester they are currently enrolled in. If a student's request for postponement is denied, the student may then follow the steps below but must provide documentation that their postponement request was formally denied.

All NMSU students called for active duty must take the following steps to withdraw from all their classes:

1. **Military and Veterans Programs (MVP):** TA/VA students ordered to Active Duty must provide a copy of orders to the MVP office, in Corbett Center Student Union, Room 244, or by email mvp@nmsu.edu. To assist in reporting accurate information to their military service or the VA Regional Office, the student should also provide, in writing, the last day of class attendance.

1. **NMSU University Student Records:** All students presenting their orders to the University Student Records, (575) 646-3411, or records@nmsu.edu, will receive a military withdrawal from classes and full tuition and fees refund for that semester.

1. **Bookstore:** Students who still have their receipts for textbooks purchased the semester in which they are called to active duty will be given a full refund for these textbook purchases when they present their orders. Please contact the bookstore for assistance at (575) 646-4431 or nmsu@bkstr.com.

Military Readmission Policy

New Mexico State University (NMSU) acknowledges that students may be temporarily unable to attend classes or be required to suspend their studies to perform military service. NMSU encourages such students to resume their education once a military service obligation has ended and adopts this policy to ensure the timely readmission of such students.

In accordance with federal regulations, 34 C.F.R. § 668.18 and the Department of Defense (DoD) Voluntary Education Partnership Memorandum of Understanding (MOU), the university will promptly readmit service members who seek readmission to a program that was interrupted due to a uniformed service obligation.

Eligibility

This policy shall apply to (1) service members who are unable to attend classes for more than 30 consecutive days, and (2) service members who are unable to attend classes for less than 30 days (about 4 and a half weeks) when such an absence would result in a withdrawal from NMSU.

A student is eligible for readmission under this policy if, during an absence, the student performs uniformed service, voluntary or involuntary, in the Armed Forces, including the National Guard or Reserve, active duty, active duty for training, or full-time National Guard (under federal authority). The cumulative length of all absences for uniformed service (service time only) must not exceed five years.

Notification of Military Service

The student (or an appropriate officer of the armed forces or official of the Department of Defense) must give written notice of such service to the school as far in advance as is reasonable under the circumstances.

Such notice does not need to indicate when the student will return to NMSU.

Notification of Intent to Return
The student must also give written notice of Intent to Return and supporting official military obligation documentation to University Student Records within three years after the completion of the period of service.

Tuition and Fees
If the student is readmitted to the same program, NMSU will assess the tuition and fee charges that would have been assessed for the academic year during which the student left (first academic year only). However, if veterans' education benefits or other service member education benefits will pay the higher tuition and fee charges that other students in the program are paying for the year, NMSU will assess those charges to the student.

Readmission Requirements

A returning student will be permitted to reenroll in the next class(es) scheduled in the same academic program unless the student requests a later date of re-enrollment or agrees to a different program. A returning student will be readmitted into the same academic program they were enrolled in before the military service obligation. If the exact program no longer exists, the student must be admitted to the program that is most similar, unless the student requests or agrees to admission to a different program. Returning students will be reenrolled with the same enrollment status, number of completed credit hours, and academic standing as the last academic year of attendance.

If NMSU determines that a returning student is not prepared to resume the program with the same academic status or is unable to complete the degree, NMSU will make reasonable efforts to enable the student to resume or complete the program at no additional cost to the student.

NMSU is not required to readmit the student if it determines:

- that there are no reasonable efforts it can take to prepare the student to resume the program at the point where they left off or to enable them to complete the program, or

- that after it makes reasonable efforts (those that do not place an undue hardship on the institution), the student is not prepared to resume or complete the program.

"Undue hardship" means an action requiring significant difficulty or expense considering the overall financial resources of NMSU and the impact of such action on its operation. NMSU has the burden to prove by a preponderance of the evidence that the student is not prepared to resume the program with the same academic status at the point where they left off or that they will not be able to complete the program.

In accordance with federal regulations, returning students who receive a dishonorable or bad conduct discharge, general court-martial, or federal or state prison sentence from the Armed Forces (including the National Guard and Reserves) are not eligible for readmission#under this policy.

Students are encouraged to speak with Military and Veterans Programs regarding any absence due to military service. For more information, please contact mvp@nmsu.edu.

Military Experience Waiver

Before graduating, during the student's junior and/or senior year, NMSU students are required to take two 3-credit Viewing a Wider World (VWW) upper-division (300-400 level) courses. These courses emphasize the international character and multicultural influences in study and strengthen information retrieval skills. There are two options that NMSU allows for replacing one of the two courses (3 credits) of VWW requirement with another form of educational experience, these are: (Study Abroad Experience or Military Experience for students who have served at least four weeks of U.S. Military Foreign/Sea Service in a foreign country.

Steps needed to request a Military Experience Waiver (replacing 3 credits of VWW):

1. Obtain a copy of your DD-214 or Memo from your Commanding Officer proving your 4-week deployment

1. Provide the above copy to your college academic advisor to request a waiver

1. Wait for your college to approve and confirm

Note: Credits are not being waived, only one of the two courses is being waived within the requirement. You may still need to complete three credits in consultation with your academic advisor. Please contact the MVP or your academic advisor for questions and concerns.

Student Medical Withdrawal

A student medical withdrawal applies to a student who becomes seriously ill, injured or hospitalized and is therefore unable to complete an academic term for which they are enrolled. This action applies to all courses a student is registered for in the affected semester(s). The student cannot select which courses they want to withdraw from and which they want to remain registered for when exercising this option. The students' attending physician must provide a letter, on official letterhead with an original signature, stating the date(s) within the semester that the student was under medical care and must withdraw because of that medical condition. This letter must be submitted within the semester or no later than one academic year after the end of the term for which the withdrawal is being requested.

Once the information is reviewed a final determination will be made if the student is eligible for the consideration of tuition or other refunds (students receiving funds awarded by the University Financial Aid and Scholarship Services should be aware of policies regarding withdrawal from the University). At the Las Cruces campus, medical withdrawal begins and ends at the University Student Records. At all other campuses, medical withdrawal begins at the Student Services Office but is ultimately finalized with the University Student Records on the Las Cruces campus.

Medical Conditions of a Family Member Withdrawal

A student who is withdrawing because of a medical condition of an immediate family member must submit a letter from the family member's attending physician. This action applies to all courses a student is registered for in the affected semester(s). The student cannot select

which courses they want to withdraw from and which they want to remain registered for when exercising this option. It must be on official letterhead with an original signature, stating the date(s) within the semester that the student's immediate family member was under medical care and that the student must withdraw to attend to the immediate family member's medical condition. This letter must be submitted within the semester or no later than one academic year at the end of the term for which the withdrawal is being requested.

Immediate family member, in this instance, includes a spouse; a domestic partner, as defined in the NMSU Policy Manual 7.04; a child, parent or legal guardian; a sister or brother and a grandparent or a grandchild. Familial relationships that are created by law are also included (i.e. mother/father in law; half or step siblings); any other relationships can be considered on a case-by-case basis.

Once the information is reviewed a final determination will be made if the student is eligible for consideration of tuition or other refunds (Students receiving funds awarded by the University Financial Aid and Scholarship Services should be aware of policies regarding withdrawal from the University.) At the Las Cruces campus, medical withdrawal begins at the University Student Records. At all other campuses, medical withdrawal begins at the Student Services Office.

Withdrawal from NMSU

Withdrawal from any NMSU campus is an official procedure that must be:

1. Initiated by the student (using the Withdrawal form)
2. Have all necessary signatures (as indicated on the form)
3. Be approved and processed through the University Student Records

Students who withdraw from all courses for the semester should do through the University Student Records. However, students who are unable to come in person may submit an e-mail using their NMSU e-mail account to records@nmsu.edu. Students who leave without following the official procedure are graded appropriately by the instructor.

Applicable dates for the last day to withdrawal are published on the approved university academic calendar or under important dates at: http://registration.nmsu.edu (https://records.nmsu.edu/faculty-and-staff/academic-calendar.html).

A student who withdraws from all classes for the semester will retain access to their NMSU account per current policy but will lose access to other services and privileges available to enrolled students.

Financial information concerning drops and withdrawals can be found at https://uar.nmsu.edu/refunds/withdrawals.html. Financial Aid Recipients should contact University Financial Aid and Scholarship Services before withdrawing. Students receiving funds awarded by the University Financial Aid and Scholarship Services should be aware of policies regarding withdrawal from the University.

The Federal Higher Education Act requires the University to calculate a Return of Federal Student Aid Funds for students who withdraw (officially or unofficially) from all classes on or before the 60 percent attendance point in the semester. Using a pro-rata schedule, the percentage of the semester attended is used to calculate the amount of the student's earned versus unearned Federal student aid funds. The unearned portion of Federal student aid funds will be returned to the appropriate aid program(s). Students withdrawing from classes are responsible for payment of any balance due after the required return of Federal student aid funds.

Graduation and Commencement Graduation Requirements

For specific graduation requirements for any degree offered at NMSU please see the Degrees, Majors, Minors and Other Academic Programs of Study (p. 31) section, as well as the departmental sections for those requirements. These requirements will include the minimum GPA, total credits and specific course requirements for graduation.

Applying for a Degree

Any students that are in their final semester of classes are considered degree candidates and are required to submit an "Application for Degree" as well as pay graduation fees for each degree being sought. The application for Degree form is available online through the myNMSU website. It must be completed and submitted by the designated deadline for that semester. The fees for the Las Cruces campus are all listed in the Tuition, Fees and other Expenses (p. 73) section of the catalog. Once a student submits the application, the fee will be included in the total cost for the semester or session in which the candidate anticipates completing their degree requirements.

If degree requirements are not completed during the semester/ session the student originally applied for, the student must then reapply and pay the appropriate fees. A $50 late fee applies to applications received after the application deadline, and no applications will be accepted after the posted deadline date.

A student must specify which catalog they are using for their degree requirements in order for the university to determine if the requirements are met and if a degree can be certified. The latest date for substitution or waiver of required courses for degree candidates is two weeks after the last date of registration for full or summer terms.

Attendance at the Commencement Ceremony

Commencement is a symbolic ceremony, that students can elect to participate in after they have applied for their degree (https://commencement.nmsu.edu/apply-to-graduate/). Participation in commencement does not, in itself, mean that a student is considered an NMSU graduate. In order to be awarded a degree, a student must fulfill university requirements as determined by academic colleges. The degree will reflect the graduation date from the application for degree in which all degree requirements were determined by the academic colleges.

The academic colleges will confirm students' eligibility to participate in the commencement ceremony that is held at the end of the fall and spring semesters. Eligible candidates who are in the process of completing their final degree requirements and degree recipients from the previous summer session will participate in the fall ceremony. Students who are in the process of completing their final degree requirements in the spring can participate in the spring ceremony. However, degree candidates who wish to participate in a spring commencement, prior to completing degree requirements in summer school may do so if they meet the following conditions:

1. Receive permission from the Academic Dean of their college
2. Show a minimum cumulative grade-point average of 2.0

3. Only need 12 or fewer credit hours to complete their degree requirements
4. These remaining credit hours are being offered in the upcoming summer schedule of classes
5. Submit a degree application and approved petition form (available in the Dean's office of the student's primary major) by the late application deadline to apply for a degree in the spring semester.

Academic Regalia

Each college may approve distinctive symbols to be worn by the top 10 percent of its graduates at commencement. Only one symbol may be worn by each graduate. In addition, the student with the highest honors in each college may wear a crimson- colored gown. No other symbolic additions to academic regalia are allowed without the approval of the Academic Deans Council.

Diploma

All fees and bills owed the university must be paid in full before a student may receive a diploma or official transcripts. The degree title and major(s) will be printed on the diplomas, in accordance to the degree application award, determined by the academic colleges. Academic honors will also be printed on the diplomas below the degree and major(s). The name on the diploma will reflect the student's current official NMSU records. Name changes are only processed for currently admitted students.

Diplomas will be mailed to graduates approximately eight weeks after the individual colleges certify the degree requirements and the final grades have been processed by University Student Records. The diploma will be mailed to the address specified on the degree application, unless an address change was requested before the last day of the semester.

Academic Standing, Probation and Suspension

Undergraduate Academic Standing

When a student does not maintain adequate academic standing, he/she is placed in Academic Warning. If the student's academic standing does not improve, the placement progresses to Academic Probation I. Continued unimproved academic standing moves a student into Academic Probation II, then finally, Academic Suspension. Each stage imposes more structure and limitations on the student in order to help them return to normal academic standing. The intent is not to punish, but to help the student return to normal academic standing and success. Since some of these limitations involve limitations on the number of credit hours, students on Probation or Suspension may be subject to loss of financial aid. It is the student's responsibility to determine the impact of their changed academic standing on their financial aid. Notification to students of academic warning, probation, or suspension appears on the student's grade report at the end of each grading period.

Undergraduate Academic Warning

Issued only once, the first time a student's cumulative GPA falls below a 2.0 while in good academic standing. The University Student Records will notify the student of the consequences should the cumulative grade point remain below a 2.0 at the conclusion of the semester. A student on Academic Warning remains eligible for all extracurricular activities as governed by the rules of the specific activity.

While under Academic Warning the following restrictions may apply:

1. The student cannot enroll in more than 15 hours of coursework during the semester.
2. The student may be required to enroll in a 3-credit hour special study skills/time management course specifically designed for students on Academic Warning, or an equivalent course approved by the appropriate associate dean or CAO of their campus.
3. Students may be required to enter into a contract with their advisor, approved by their department head that places further stipulations on Academic Warning. The contract may include, but is not limited to the following:
4. The student may be required to take at least one repeat course to try to improve their GPA.
5. Except for the special study skills/time management course, the student's coursework may be restricted to their major.
6. The student may be required to get tutoring help.
7. The student may be required to see an academic counselor on a specified time schedule.
8. The number of credit hours a student may register for may be restricted (due to extenuating circumstances such as the student's workload commitments).

The associate dean or CAO may place the student on Academic Probation I should the student not adhere to the stipulations of the contract.

If the student's semester GPA is less than 2.0, and the cumulative GPA remains below 2.0 at the end of the semester on Academic Warning, the student is placed on Academic Probation I. If the semester GPA is greater than 2.0 but the cumulative GPA is still less than 2.0, the student will remain on Academic Warning. If the cumulative GPA is greater than a 2.0 at the end of the semester then the student is returned to good academic standing.

Undergraduate Academic Probation I

This occurs when a student under Academic Warning has a semester GPA less than 2.0, and the cumulative GPA remains below 2.0 at the conclusion of the semester or if the student maintains a semester GPA greater than 2.0 while on Academic Probation I but the cumulative GPA is still less than 2.0. Academic Probation I will also occur if a student falls below a 2.0 cumulative GPA from Good Academic Standing if Academic Warning already occurred in a previous term.

Under Academic Probation I the following conditions apply:

1. The student cannot enroll in more than 13 hours of coursework during the semester. *Note: Students falling below 12 credits in any one semester will jeopardize their financial aid.* Should this occur, students should see the associate dean in their college as soon as possible to try to implement corrective measures.
2. The student may enter into a contract or individualized education plan with their advisor and be approved by the associate dean or CAO that place further stipulations on Academic Probation I. The associate dean or CAO may place the student on Academic Probation II or Academic Suspension should the student not adhere to the contract stipulations.
3. Students on Academic Probation receiving educational benefits from the Veterans' Administration must obtain counseling from the Military & Veterans Programs Office.
4. Students admitted under special provisions whose transcripts indicate less than a 2.0 GPA are admitted on Academic Probation I.

The student must maintain a semester GPA equal to or greater than 2.0 until such time that the cumulative GPA is greater than 2.0 at which time the student goes back to good academic standing. Until the transition happens the student remains on Academic Probation I. The student will be placed on Academic Probation II if they cannot maintain a 2.0 semester GPA, and the cumulative remains below a 2.0 GPA, while under Academic Probation I. A student on Academic Probation I remains eligible for all extracurricular activities as governed by the rules of the specific activity.

Undergraduate Academic Probation II

Academic Probation II is issued in two ways.

- The first is when a student falls below a semester 2.0 GPA and the cumulative GPA remains below a 2.0 while on Academic Probation I.
- The second is when a student maintains a semester GPA greater than 2.0 while on Academic Probation II, but the cumulative GPA is still less than 2.0.

The following restrictions are in place for student's in Academic Probation II:

1. The student cannot enroll in more than 7 credit hours of coursework during the semester.
2. As with rule 2 under Academic Warning and Academic Probation I and at the discretion of the associate dean or CAO, the student will be required to enter into a contract with their advisor, approved by the associate dean or CAO, to place further stipulations on Academic Probation II.

The associate dean or CAO may place the student on Academic Suspension should the student not adhere to the stipulations of the contract.

The student must maintain a semester 2.0 GPA or higher until the cumulative GPA reaches a 2.0 or higher, at which time they are placed on good academic standing. A student unable to maintain a semester GPA of 2.0 or higher, and the cumulative remains below 2.0 GPA, while under Probation II will be placed on Academic Suspension. A student on Academic Probation II remains eligible for all extracurricular activities as governed by the rules of the specific activity.

Continuing in Probationary Status

Students may continue to enroll while on Academic Probation I or II provided they maintain a semester GPA of 2.0 or higher. If they withdraw from the university while on Academic Probation, they continue on that same level of Academic Probation.

Removal of Academic Probation

Such academic standing is removed when the cumulative GPA is raised to 2.0 or higher, with the following exceptions:

1. a transfer student may not remove probation by summer work alone;
2. If an I grade is removed after the student has enrolled, the new grade's effect on academic standing is based on its inclusion with grades for the term for which the student is enrolled;
3. exercise of the Adjusted Credit Option does not change academic status until subsequent grades are earned.

Academic Suspension

When a student does not achieve a semester 2.0 GPA or higher, and the cumulative remains below a 2.0 while under Academic Probation II, the student is placed on Academic Suspension. Students under Academic Suspension are not allowed to take NMSU courses while under suspension. Students on Academic Suspension must sit out a minimum of 1 semester and apply for re-admission.

Under certain conditions, a student may be re-admitted at NMSU under regular status while under Academic Suspension when satisfactory progress has been demonstrated at another college or university (see Readmission- Degree Seeking). Credits earned at another university or college while under Academic Suspension from NMSU or another university or college will be accepted at NMSU only after the student demonstrates satisfactory progress over a period of two semesters after being re-admitted or admitted to NMSU. Acceptance of transfer credits that count toward degree requirements is still governed by the rules established by the student's respective college or campus.

Summer Attendance Impact on Academic Standing

A student may use summer classes to get a warning or probationary status removed. Students suspended at the close of the spring semester may have their Academic Suspension rescinded if they attend a summer session at NMSU or one of its Community College campuses. Such attendance must raise the combined spring semester and summer GPA to 2.0 or better. Under no circumstances may a student on Academic Warning or Academic Probation be allowed to register for an overload. The current academic status is continued if the student withdraws from the university and the probation or suspension status applies to all subsequent enrollments until the cumulative GPA is 2.0 or higher.

Graduate Academic Probation and Suspension

Graduate Academic Standing is based on the student's semester GPA and cumulative GPA. The student must maintain a cumulative GPA of 3.0 or higher to remain on Graduate Academic Good Standing. A student may not remain eligible for all extracurricular activities or Graduate Assistantship as governed by the rules of the specific activity.

Graduate Academic Probation I: A graduate student is placed on Graduate Academic Probation I when the student's cumulative GPA drops below 3.0 and the previous academic standing is Graduate Academic Good Standing. If a student on Probation I earns a semester GPA above 3.0 but the cumulative GPA remains below 3.0, the student continues on Graduate Academic Probation I

Graduate Academic Probation II: If the semester GPA of a continuing or re-admitted graduate student on Graduate Academic Probation I drops below 3.0 then the student is placed on Graduate Academic Probation II

Graduate Academic Suspension: If the graduate student cannot maintain a semester GPA of 3.0 or higher and the cumulative remains below 3.0 GPA while under Graduate Academic Probation II, the student will then be placed on Graduate Academic Suspension.

Students on Graduate Academic Suspension are barred from enrolling in graduate-level courses at NMSU while on suspension. Graduate students on Graduate Academic Suspension must sit out a minimum of one semester. Graduate students on suspension who wish to continue Graduate School after suspension must re-apply to the department and Graduate School. The student must also petition College Academic Dean

or the Graduate School Dean, based on the major and degree the student is pursuing to be removed from Graduate Academic Suspension. At this time the graduate academic suspension status will be evaluated for possible readmission to the department. Should the suspension be lifted, the graduate student is placed on Graduate Academic Probation II or Graduate Re-admit on Probation II until such time that the graduate cumulative GPA equals or exceeds 3.0.

If you have questions about your academic standing, please contact your department academic advisor or Graduate Dean's office.

Academic Misconduct and Grievances Student Academic Code of Conduct

The Student Academic Code of Conduct (SACC), applicable to both undergraduate and graduate students, provides procedures for reviewing and resolving of alleged or suspected academic misconduct within a reasonably prompt time frame. The full SACC is found in the university's published Administrative Rules and Procedures (ARP), specifically ARP 5.10 and ARP 5.11.

While it is essential to refer to the detailed governing rules in the ARP, the process is summarized as follows: An institution-wide Academic Conduct Officer is responsible for processing each case of alleged academic misconduct. The accused student is provided notice of the allegation and has the right to participate during the fact-finding process. The student may contest the investigative findings or sanction in a formal review before a university Hearing Panel. Either party to the matter has the right to a final appeal of the results or a Level II sanction to the Office of the Provost.

The SACC distinguishes between Level I Sanctions and Level II sanctions, depending upon the severity of the offense and other factors. The Level I sanction includes a formal warning. Graduate students' offenses and repeat undergraduate offenses are subject to a Level II sanction, even if less severe. Level II sanctions consist of a notation of academic misconduct on the student's academic transcript.

The full policy, examples of academic misconduct, report form and a flowchart of the procedures for resolving alleged student academic misconduct is available at:

Policies

University Student Records Privacy Rights

The following information has been designated as directory information and is subject to release to the public under the Buckley Amendment (PL 98-380), "The Family Educational Rights and Privacy Act of 1974." student's name, class level, college and major, dates of attendance, degree(s) earned, honors and awards, address, telephone number, NMSU email address, Aggie ID number, most recent previous educational institution attended, place of birth, and some information about students involved in recognized activities and sports.

Other information regarding disclosure of student data is posted on the University Student Records website (https://records.nmsu.edu) and with University Student Records (USR), in compliance with the Act.

Requests for withholding directory information must be filed in writing with University Student Records . A student may choose to hide his/her address and phone number from the campus phonebook through the myNMSU portal. This will only hide the information from the public but the records will still be officially kept within University Student Records.

Social Security Numbers in Student Records

As required by law, social security numbers are collected from prospective and current students who are either applying for admission to the university or plan to seek employment on campus. The social security number is a confidential record and is maintained as such by the university in accordance with the Family Educational Rights and Privacy Act.

In addition, the university is mandated by federal tax regulations to provide tuition and fee payment information to the student and the Internal Revenue Service so that applicable educational tax credits may be computed. The social security number is required for tax reporting purposes.

Change in Demographic Information

Students wishing to make a legal name change, citizenship change, social security number update or a gender update can do so through the University Student Records (USR). All students will need to fill out the "Demographic Change Form" located at https://records.nmsu.edu/forms/inventory.html and provide one of the following documents to University Student Records. Legal name changes will only be processed for students currently enrolled at New Mexico State University.

1. **Legal name change**: students will need one legal documentation with the new name on it. This can be a Government Issued ID (drivers license, state card or valid passport), a Birth Certificate, a Court Order, a Marriage Certificate/Divorce Decree or a Certificate of Naturalization/I551 Card. *Note: Documentation is not required to add/delete hyphen, space, apostrophe, or to abbreviate a middle name to initial.*
2. **Citizenship change:** Certificate of Naturalization or I551 card.
3. **Social Security Number Update**: students will need to provide an original signed Social Security Card. Unsigned cards will not be accepted.
4. **Gender Update**: students will need to bring a Government Issued ID (drivers license, state ID card or valid passport) and a Revised Birth Certificate

Students may update their "preferred name", which is the name used in lieu of a student's legal name, on certain documents, such as, the email display name, learning management system, the phonebook, class rosters and advisee lists. This can be done by the student through the myNMSU portal and does not need to be done at the USR.

For more information about the specific documents that are needed please contact the University Student Records at (575) 646-3411.

Changes in Residency Status for Tuition Purposes

University Student Records (USR) does not determine the laws and rulings for determining Residency, these are state laws that USR simply administers. An individual must establish legal residency in New Mexico before he or she is entitled to pay in-state tuition rates.

The student's initial residency status is determined at the time of admission, any changes to this status must be initiated by the student through USR. A continuing student, classified as a non-resident, who has satisfied the requirements to establish residency may submit a Petition for In-State Residency Tuition Classification along with the required supporting documentation to USR. Petitions must be filed on or before the third Friday of the semester for which the student is requesting resident tuition.

For specific information about the process of petitioning for In-State Residency or for information about who is eligible for residency for tuition purposes please visit the https://records.nmsu.edu/students/residency.html website.

Official Transcripts

An official transcript is the University's certified statement of your complete NMSU academic record in chronological order by semester and year. It includes the student's coursework, grades and any degrees that were awarded. Any credit hours earned through transfer work are listed as the equivalent course at NMSU. Grades are not transferred, nor are they used to calculate the NMSU grade point averages. Official transcripts will not be released if the student is in debt to the university.

Transcripts can be ordered online at https://records.nmsu.edu/forms/transcripts.html. A fee will apply, which may vary depending on the total number of transcripts ordered and the selected delivery method. Students can request two types of transcripts: an electronic version sent as a secure PDF or a printed hard copy delivered in a sealed envelope.

The name that will appear on the student's transcript will match the name on the student's official NMSU record. Name changes will only be processed for students currently enrolled at NMSU or any of its Community Colleges.

Purging of Student Files

All academic files for students who attend NMSU are kept for five (5) years following the student's final term enrolled. Only archival documentation will be retained. The files of students who do not enroll within one year after being admitted are destroyed.

Student Complaint Resolution

Students enrolled at New Mexico State University (NMSU)—whether taking a single course or enrolled full-time—have the right to submit a complaint or grievance on any issue or subject they deem important, without fear of retaliation or any other adverse action.

Students are encouraged to address their complaint or grievance first with the individual most directly connected to the issue, unless there are compelling reasons not to do so. For more information about student complaint and grievance policies, students can review Administrative Rules and Procedures 5.05 (https://arp.nmsu.edu/chapter-5/5-05.html). To file a student complaint, visit the NMSU Report (https://report.nmsu.edu/) website.

NC-SARA (State Authorization Reciprocity Agreement) - Distance Education

NMSU participates in the State Authorization Reciprocity Agreement (SARA) (https://nam10.safelinks.protection.outlook.com/?url=https%3A%2F%2Fnc-sara.org%2F&data=05%7C02%7Cgdmart%40nmsu.edu%7C0591e30ed11041ab447e08de162ffaa8%7Ca3ec87a89fb84158ba8ff11bace1eba%7C1%7C0%7C638972592539740100%7CUnknown%7CTWFpbGZsb3d8eyJFbXB0eU1hcGkiOnRydWUsIlYiOiIwLjAuMDAwMCIsIlAiOiJXa%3D%3D%7C0%7C%7C%7C&sdata=dKgEhzpUZa9INZyCnDINRWmpW%2BaYWhbRGNpIrm76Anc%3D&reserved=0). SARA is an agreement among member states, districts, and territories that establishes national standards for interstate delivery of postsecondary distance education courses and programs.

If a distance education student located in a SARA member state has a complaint about NMSU, the student must first follow the university's standard grievance procedures described above. If the complaint remains unresolved after exhausting NMSU's internal processes, the student may then submit the complaint to the New Mexico SARA Portal Agency (https://nam10.safelinks.protection.outlook.com/?url=https%3A%2F%2Fhed.nm.gov%2Fstudents-parents%2Fnc-sara&data=05%7C02%7Cgdmart%40nmsu.edu%7C0591e30ed11041ab447e08de162ffaa8%7Ca3ec87a89fb84158ba8ff11bace1eba%7C1%7C0%7C638972592539789040%7CUnknown%7CTWFpbGZsb3d8eyJFbXB0eU1hcGkiOnRydWUsIlYiOiIwLjAuMDAwMCIsIlAiOiJXa%3D%3D%7C0%7C%7C%7C&sdata=DEEVhqxF6pXui2%2F8Nio7XZEtvNS79IlNWvGDorRvL2M%3D&reserved=0), the New Mexico Higher Education Department (NMHED). The SARA portal agency in the student's home state will be notified of the complaint and may assist as needed.

SARA complaints may include issues related to tuition, accreditation, licensure, or transfer of courses. Grade disputes and student conduct issues, however, are not covered under SARA. Examples of the types of complaints that may be brought to the SARA portal entity include:

- Misrepresentation in recruitment or marketing materials (e.g., admission requirements, tuition, fees, financial aid)
- Inaccuracy of job placement data
- Inaccuracy of information regarding the institution's accreditation or programmatic/specialized accreditation
- Misrepresentation about whether coursework meets relevant professional licensing requirements
- Inaccurate information regarding the transferability of credit to or from other institutions
- Operation of distance education programs inconsistent with expectations of Accreditors and/or the C-RAC Interregional Guidelines for the Evaluation of Distance Education

Higher Learning Commission (HLC)

If all other avenues have been exhausted, unresolved complaints may be filed with the Higher Learning Commission (HLC) (https://nam10.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.hlcommission.org%2Ffor-students%2Ffile-a-complaint-against-an-institution%2F&data=05%7C02%7Cgdmart%40nmsu.edu%7C0591e30ed11041ab447e08de162ffaa8%7Ca3ec87a89fb84158ba8ff11bace1eba%7C1%7C0%7C638972592539806707%7CUnknown%7CTWFpbGZsb3d8eyJFbXB0eU1hcGkiOnRydWUsIlYiOiIwLjAuMDAwMCIsIlAiOiJXa

Areas of Interest

What Are Meta-Majors?

Meta-majors at NMSU are two-semester academic maps designed as planning tools for students who have not yet decided on a program of study. Each meta-major represents a broad cluster of degree programs. The meta-major academic maps include courses (such as English and Math) that lay the academic foundation for all of the degree programs represented by the specific meta-major as well as course options that facilitate exploration of the various disciplines represented.

Meta-majors share a common early pathway toward a degree, diverging as a student becomes more focused on an individual major. By identifying a limited number of meta-majors that encompass all the majors at NMSU, and helping students who are unsure about a major choose a meta-major consistent with their interests, we can help ensure that courses taken early in a collegiate career will count toward a degree, thereby lessening the academic wandering that can impede student success.

Students will be directed to a meta major only if they are uncertain what they want to study. Students who are certain of their major will be advised into courses that are in that major's degree plan.

Undergraduate Admissions and Orientation

Contact Information

Undergraduate Admissions
MSC 3A
New Mexico State University
P.O. Box 30001
Las Cruces, NM 88003-8001
(575) 646-3121
https://admissions.nmsu.edu/

Under the policies and conditions set forth below, a student may be accepted for undergraduate admission to NMSU as either:

- A degree-seeking student
- A non-degree student

Degree-Seeking Students

How to Apply as a First-Time in College Student

Requirements for admission as a degree-seeking student:

- Application for admission, accompanied by a one-time $25 nonrefundable application fee
- Students are required to self-report their high school cumulative grade point average (GPA) on the application. Students can also provide an unofficial high school transcript.
- SAT and/or ACT scores are optional for admission. However, the scores provided will be used for scholarship consideration and for Math and English placement.

All applicants with tentative admission must submit a final, official high school transcript showing a graduation date before a final admission decision is granted. If the student also attended a non-NMSU system post-secondary institution during high school (dual credit/concurrent enrollment), official transcripts from each institution are required. If the institution attended was outside of the United States, a professional foreign credential evaluation from a NACES company is required.

Admission Requirements

Students who meet the minimum high school course requirements of the state from which they receive their high school diploma must meet one of the following criteria to be admitted:

- Cumulative high school GPA of 2.50
- SAT score of 1060 or ACT composite score of 21
- Ranked in the top 20 percent of their high school graduating class
- A GED cumulative score of 480 or HiSET cumulative score of 45

We encourage all students to apply for admission to NMSU. Applicants who meet at least one of the above criteria will be admitted to NMSU. An applicant who does not meet admission requirements will be given automatic admission to one of our system community colleges through Aggie Pathway.

Note for students about scholarships: Home school students who are New Mexico residents must submit proof to the Undergraduate Admissions Office of registration with the New Mexico Public Education Department to qualify for the Lottery Success Scholarship and other institutional scholarships. Similarly, the SAT or ACT scores are required for out-of-state students for competitive scholarships.

More information about scholarships is available at https://fa.nmsu.edu/scholarships

Aggie Pathway

In the Aggie Pathway program, the NMSU system works together to assist students who do not meet the admission requirements to the university or choose to start at one of the system's community colleges.

Aggie Pathway students begin at one of NMSU's community college campuses. They may transition to the university campus upon meeting the following requirements:

- Successful completion of 24 credits
- 2.0 cumulative college GPA

Students enrolling through Doña Ana Community College campus also have access to NMSU Las Cruces campus housing and dining.

More information about Aggie Pathway is available at https://aggiepathway.nmsu.edu/.

How to Apply as a Transfer Student

Requirements for admission as a degree-seeking student:

- Application for admission, accompanied by a one-time $25 nonrefundable application fee
- Students are required to disclose all post-secondary institutions they have previously attended.
- Transfer students must provide official transcripts from each institution attended. For college transcripts to be considered official, they must be sent directly from the institution’s student records office to NMSU Undergraduate Admissions or delivered in person only if in a sealed envelope from the granting institution and with the current issue date. Official transcripts must be received before the date of registration. Applications for admission that include the transfer of credits earned at a non-U.S. university must include a professional foreign credit evaluation report from a member institution of the National Association of Credential Evaluation Services (NACES) for every transcript.
- Students who have not earned credit for the first semester of college English or Math may submit official ACT or SAT scores directly to NMSU Undergraduate Admissions. If ACT or SAT scores are not available, students must take the English Placement Questionnaire and/or Math Placement Exam provided by NMSU.

Admission Requirements

- Cumulative grade point average (GPA) of at least 2.0 with 24* or more completed college credit hours.
- Students with fewer than 24 completed college credit hours must fulfill the transfer and first-time in college admission requirements.
- Must be eligible to return to their last college or university.
- Students who conceal they attended another college or university without submitting a transcript for each

institution, whether or not credit was earned, will be subject to immediate suspension.

- NMSU will uphold academic and judicial suspensions from other colleges and universities.

* The types of credits listed below are not counted toward the 24 completed credit hour requirement:

- Courses taken for college credit while in high school
- Credits by examination (i.e. CLEP, IB, AP, etc.)
- Credits from a non-regionally accredited institution
- Credits from institutions that do not provide grades
- Credits from experience such as a Joint Services Transcript

How to Apply for Readmission

Former students of the NMSU system, who have been out of school for more than two consecutive semesters, are required to apply for readmission. Applications should be submitted to Undergraduate Admissions before the start date of the semester for which the student plans to enroll.

A student who has attended other post-secondary institutions during an absence must have official transcripts from those other post-secondary institutions sent directly to Undergraduate Admissions. They must be eligible to return to the institution they last attended. Transcripts must be received before the date of registration. Academic standing at the time of readmission will be determined by previous NMSU academic standing. However, academic performance at other institutions attended during the applicant's absence from NMSU may be considered when determining the student's admission status.

New Student Orientation

Orientation is mandatory for all new students seeking their first bachelor's degree. During NMSU's New Student Orientation (NSO), students attend information sessions, learn about campus resources and college life, meet with an Academic Advisor, and register for courses.

If students have taken the SAT or ACT, they must submit official scores before attending an NSO program, as these scores are used to place students into courses during academic advising. If test scores are unavailable, students will be asked to take the Math Placement Exam and English Placement Questionnaire before orientation.

More information about New Student Orientation is available at https://awo.nmsu.edu/.

Non-degree Seeking Students

How to Apply as a Non-degree Seeking Student

Non-degree admission is designed to meet the needs of students who do not wish to pursue a degree at NMSU. Courses taken in this status may not be used to meet university admission requirements. Students interested in using non-degree credit for initial teacher certification or certification in a new field must contact the College of Health, Education, and Social Transformation.

Non-degree students are ineligible to:

- Receive financial aid or student employment
- Participate in student government or intercollegiate athletics
- Receive benefits from military, veteran, and dependent financial assistance programs.

Transcripts may be required for non-degree seeking students who have not completed a bachelor's degree to ensure readiness for university-level courses. A $25 one-time, nonrefundable application fee is required.

Non-degree students are subject to the same university regulations as degree-seeking students.

Changing from Non-degree Status

A non-degree student in good academic standing at NMSU must submit an application for admission as a degree-seeking student. Requirements for regular admission must be met. Non-degree students may not transfer more than 30 credits from this status to any undergraduate degree program except for students participating in a high school concurrent enrollment program. If a student has graduated from NMSU, they will automatically be switched to a non-degree status. If that student intends to pursue another degree from NMSU, they will need to submit an application for admission as a degree-seeking student.

Opportunities for High Schools Students

Dual Credit for High School Students

The Dual Credit program is designed to give high school students an opportunity to enroll at NMSU before high school graduation. A student must be either a junior or senior in high school and enrolled at least half-time in high school courses. Under a Statewide Dual Credit Master Agreement between NMSU and the school district, students enrolled in approved dual credit courses are eligible to have the total cost of tuition and general fees waived.

Eligibility Requirements

- High school junior or senior enrolled at least half-time at their high school
- High School cumulative GPA of at least a 3.0, or 3.2 if student has not taken the PSAT, ACT or SAT.
- ACT composite score of 21 or SAT total score of 1060
- If you have not taken the ACT or SAT, the first semester requirements may be met with a qualifying PSAT score of 860 or above. Continued enrollment in the program will be based on successful progress or completion of your first dual credit course and high school GPA.
- Obtain approval from high school guidance counselor

- Obtain approval from parent or guardian

Enrollment Process

- Completion of required documentation
- Meet with an NMSU Dual Credit Advisor
- Attend Dual Credit Orientation before the first day of classes (first semester only)
- First time students are limited to one course. After successful completion, students may take a maximum of two courses per semester thereafter.

See Dual Credit for details and required paperwork to get started. https://dualcredit.nmsu.edu/get-started/index.html (https://dualcredit.nmsu.edu/get-started/)

Out-of-State Students and Legal Jurisdiction

By applying for admission/enrollment, both the student and parents agree that New Mexico law prevails, and all litigation will be in federal or state court in New Mexico.

Applying for Admission

Application Materials

All documents submitted as part of the official admissions process become the property of NMSU and will not be returned to the student. Application materials are retained for one calendar year for students who apply but do not attend.

Application Deadlines

NMSU's priority deadline for completing the entire admission process is the Friday before the first day of class each semester. Completing the admission process includes, but is not limited to:

- Completing an application for admission
- Submitting all official documents
- Receiving an admission decision
- Completing orientation (if required)
- Taking placement exams
- Enrolling in courses

Completing all the above steps requires multiple business days; NMSU encourages all interested students to plan accordingly. In addition, international applicants have additional steps to complete and have earlier deadlines related to visa timelines. Moreover, some academic programs have specific application deadlines that students must meet.

The deadline to apply for NMSU's Nursing program is February 1st for the fall semester and September 1st for the spring semester.

Transfer Students

Overview

NMSU evaluates eligible courses for NMSU transfer equivalency from postsecondary institutions that are regionally accredited or are candidates for regional accreditation. Credits from non-accredited institutions may be evaluated by the student's academic college, after the student has shown acceptable performance at NMSU for two semesters of full-time enrollment. Academic colleges, within NMSU, may have additional requirements for course transfer. Please contact the College Dean's Office for more information.

Transfer students are subject to the same graduation requirements as all NMSU baccalaureate-degree (bachelor's) seeking students. Thirty (30) of the last 36 credit hours for every degree to be awarded from NMSU must be earned at NMSU.

Community/Junior College Transfers

Community/Junior college transfer students may be admitted and classified on the basis of acceptable credits earned at a two-year institution. However, transfer students are subject to the same graduation requirements as all NMSU-Las Cruces campus baccalaureate-seeking students. This includes the required minimum number of 48 upper division credit hours from courses numbered 300 or above and the requirement that 30 of the last 36 credit hours must be earned through this university.

NOTE: Students currently enrolled at an NMSU Community College (Alamogordo, Dona Ana or Grants) are not considered transfer students. If a student wants to change campuses, they must submit a Change of Campus form.

Transfer Students- Admission Requirements

- Transfer students must provide official transcripts from each institution attended. For college transcripts to be considered official, they must be sent directly from the institution's student records office to NMSU Undergraduate Admissions or delivered in person only if in a sealed envelope from the granting institution and with the current issue date. Official transcripts must be received before the date of registration. Applications for admission that include the transfer of credits earned at a non-U.S. university must include a professional foreign credit evaluation report from a member institution of the National Association of Credential Evaluation Services (NACES) for every transcript.
    - Students who have not earned credit for the first semester of college English or Math may submit official ACT or SAT scores directly to NMSU Undergraduate Admissions. If ACT or SAT scores are not available, students must take the English Placement Questionnaire and/or Math Placement Exam provided by NMSU.
    - Students with 24* or more completed college credit hours must have a cumulative grade point average (GPA) of at least 2.0.

- Students with fewer than 24 completed college credit hours must fulfill the transfer and first-year admission requirements.
- Students must be eligible to return to their last college or university.
- Any student who conceals the fact that they attended another college or university and has not submitted a transcript for each institution, whether or not credit was earned, will be subject to immediate suspension.
- NMSU will uphold academic and judicial suspensions from other colleges and universities.

* The types of credits listed below are not counted toward the 24 completed credit hour requirement:

- Courses taken for college credit while in high school.
- Credits by examination (i.e. CLEP, IB, AP, etc.).
- Credits from a non-regionally accredited institution.
- Credits from institutions that do not provide grades.
- Credits from experience such as a Joint Services Transcript.

Transfer of International Credit

Applications for admission that include the transfer of credits earned at a non-U.S. university must include a professional foreign credit evaluation report from a member institution of the National Association of Credential Evaluation Services (NACES) for every transcript from a foreign secondary school and/or university attended.

General Requirements for Transfer Credits

Credit will be awarded for transfer courses as follows:

- Grades earned in courses taken at other institutions are not included in the calculation of the NMSU GPA, except for grades earned by approved National Student Exchange students.
- A grade of D or better is required to grant NMSU credit for courses identified as having an NMSU equivalent.
- Colleges or departments may require a grade of C- or higher for courses required in their programs.
- Each college determines which transferred courses are applicable toward a degree or a minor.
- Transcripts may need to be reevaluated when students transfer from one NMSU campus or College to another.
- Currently enrolled students must obtain prior approval from their academic department head and dean before courses taken at another institution will be applied toward meeting NMSU graduation requirements.

Student Responsibility

Planning for effective transfer with maximum efficiency is ultimately the student's responsibility. Responsible transfer planning includes early and regular consultation with the intended degree-granting institution to assure that all pre-transfer coursework will meet the requirements of the desired degree.

NMSU maintains a database (https://miniapps.nmsu.edu/transfer/) of commonly transferred courses from numerous institutions. Courses included in the database at the time the student is admitted to NMSU will automatically transfer to NMSU, provided the student follows all guidelines (see Currently Enrolled NMSU Students below). If a transferred course does not exist in the database, it is the student's responsibility to provide the departmental faculty with sufficient materials (e.g. catalog description, syllabi, etc.) to determine if any of the department's courses may be equivalent to the credits being transferred.

Currently Enrolled NMSU Students

Currently enrolled students must obtain prior approval from their academic department head and dean before courses taken at another institution will be applied toward meeting NMSU graduation requirements.

Religious Center Courses in Religion

Courses in religion, offered by the various religious centers through higher educational institutions with which they are affiliated, are open to all students and these or similar courses from other colleges/universities may be transferred for elective credit ("E") to NMSU. Registration for these courses is separate from the NMSU System's registration and is conducted by the religious center offering the course.

No more than 6 credits in such courses may be transferred to NMSU. To transfer earned credits to NMSU, the student must do the following:

- Obtain written approval from the student's department head and academic dean prior to registration for the course.
- Count the credit in the course as part of the total semester load.
- Upon completion of the course, request that the institution granting the credit send a transcript of the credit to the Undergraduate Admissions Office at NMSU-Las Cruces.

Graduate Transfer Credits

For more information about transferring graduate credits please visit the Graduate School section of this catalog.

Evaluation of Transfer Credits

NMSU has three levels of course credit transfer. Once a student has been admitted to NMSU, they are awarded credit for equivalent courses accordingly. Following award of credit as described in Levels 1 and 2 (below), application of any additional credit transfer via specific program articulation agreements will be approved by the student's academic department and dean, including additional courses in the major that

may count toward a degree or a minor but, are not included in a program articulation.

Level 1

Automatic course-to-course equivalency credit transfer from colleges/universities in the state of New Mexico, per the New Mexico Higher Education Department (NM HED) articulation modules. Eligible credits for Level 1 transfers will be automatically applied to the student's transcript, provided minimal grade requirements are met.

Level 1 equivalency includes:

- New Mexico State Common Core general education courses.
- New Mexico State articulated academic programs (e.g. Business, Early Childhood Education, and NM Nursing Education Curriculum).

Level 2

Faculty established NMSU course-to-course equivalency transfer:

- Equivalency is determined by the designated departmental faculty in the department/program in which the equivalent course is offered, and may include a review of course description, syllabus and/or interaction with the other institution. If a course equivalency does not exist in the database, it is the student's responsibility to provide departmental faculty with sufficient materials to determine if any of the department's courses may be equivalent to the credits being transferred.
- Credit for courses transcripted with NMSU equivalency may/will count toward the degree/major.
- Credit for courses with no NMSU equivalenceequivalent will be transcripted as 100E (lower level) or 300E (upper level) and may or may not count as credit toward a specific degree. Departmental faculty may accept the "E" course as elective credit toward the degree, or as a substitute for a course not applied universally.
- Transfer Credit and Credit Conversion Policy

  For students transferring courses from institutions that operate on a quarter system, credit hours will be converted to the semester system. Unless otherwise specified, the standard conversion formula is:

  Semester Credit Hours = Quarter Credit Hours × 0.67.

Level 3

Specific program articulation between an NMSU program/department and a program/department at another institution.

- Program articulation with other institutions is monitored at the department/program level in accordance with articulation agreements and may include credit transfers that are applicable only to the specific degree articulated (i.e. credit for courses may change depending on degree student declares).
- Level 3 transfer credit is degree specific; therefore, transcripts must be re-evaluated when a student changes their major or college- Level 3 transfer credits are not applied universally.

National Student Exchange (NSE)

Courses transferred back to the NMSU System by students participating in the National Student Exchange (NSE) Program will be evaluated as NMSU (system) courses and recorded on the student's academic record. All computable grades earned will be included in calculating the student's cumulative grade point average.

Transfer Credit Appeal Process

All New Mexico public post-secondary institutions are required to establish policies and practices for receiving and resolving complaints from students or from other complainants regarding the transfer of coursework from other public institutions in the state. A copy of NMSU's transfer credit policy may be obtained from the University Student Records Office or from the Deputy Secretary for Academic Affairs, Higher Education Department, 2048 Galisteo St., Santa Fe, New Mexico 87505-2100.

Military and Veterans Programs (MVP)

About MVP

New Mexico State University (NMSU) is a military and veteran-friendly university that strives to provide the best possible service for to for our military, veterans, and their dependents as they pursue their educational goals. NMSU Military and Veterans Programs promotes lifelong learning and professional development by offering:

- In-state tuition rates for active-duty military and their dependents stationed at regional military installations (including Ft. Bliss); or those eligible for U.S. Department of Defense (DoD) Tuition Assistance (TA) or U.S. Department of Veterans Affairs (VA) education benefits
- Transferable military credits that count toward degrees at NMSU
- Facilitation of MyCAA Scholarship for military spouses benefits and DoD TA education benefits
- Advocacy from admission to graduation
- Student Veteran Housing for student veterans and their families
- Priority registration for military and veteran students
- Aggies Green Zone Training, educating faculty and staff about our military and veteran students and the unique value they bring to campus
- SALUTE National Honor Society for student veterans
- Connection with the Student Veterans Organization (SVO) of NMSU
- Scholarships and Internship opportunities
- Veteran Mentorship Program, helping first-year student veterans transition to an academic setting successfully
- Processing of TA and VA education benefits
- Student Computer Lab and Lounge

NMSU degree programs are approved by the State Approving Agency (SAA) at the New Mexico Higher Education Department. Eligible students may receive education benefits from the U.S. Department of Defense or the U.S. Department of Veterans Affairs.

For further information contact:

Military and Veterans Programs
MSC 4740, PO Box 30001
Las Cruces, NM 88003-8001
(575) 646-4524
http://mvp.nmsu.edu

MVP Student Computer Lab and Lounge

The MVP Student Computer Lab is available to military, veteran, and dependent students. The lab has six computers with several common access card (CAC) readers. A CAC reader enables students to access military websites to complete their TA requests. The Computer Lab is open from 8 a.m. - 5 p.m. Monday through Friday. We offer free copying and printing services to accommodate our students. The MVP Student Lounge has comfortable furniture, a coffee station, a kitchen (microwave/refrigerator) area, and a place to study and relax between classes. Students enjoy free coffee while doing their homework and networking with like-minded students.

Costs

Active-Duty

Active-duty military personnel (U.S. Armed Forces) stationed in New Mexico or at Fort Bliss, Texas, must complete a "Resident Tuition Application for Active Military, Veterans and Dependents of the U.S. Armed Forces" waiver to qualify for in-state tuition. Spouses and children of active-duty personnel stationed in New Mexico and Fort Bliss, Texas, who are not otherwise entitled to claim in-state residency, may apply for in-state tuition by submitting a "Resident Tuition Application for Active Military, Veterans and Dependents of the U.S. Armed Forces" waiver to the Military and Veterans Programs. Waivers are available at http://mvp.nmsu.edu (under the Forms tab) or through the University Student Records Office. Please contact MVP for the required documents needed to complete the waiver application.

NMSU Global Campus

NMSU Global Campus (https://global.nmsu.edu) includes 100% online bachelor's, master's, graduate certificate, and doctoral programs within the NMSU system. NMSU Global Campus programs are designed to serve students who may not be able to pursue an education through traditional means. Active-Duty students admitted to NMSU Global Campus must provide Military and Veterans Programs with supporting documentation to be assessed the Active Military $250 per credit hour fixed rate. Please visit the Active Military Rate page from MVP or contact NMSU Global Campus at globaladmissions@nmsu.edu or 575-232-3718 for more information.

Dependents Receiving VA Educational Benefits

Per NM 2015 HB 427:

A spouse or child of a veteran of the United States Armed Forces is entitled to pay tuition and fees at the rate provided for New Mexico residents; provided that the spouse or child is eligible for benefits pursuant to the federal Post-9/11 Veterans Educational Assistance Act of 2008 or any other federal law authorizing educational benefits for a veteran and the dependents of a veteran. Students may complete a "Resident Tuition Application for Active Military, Veterans and Dependents of the U.S. Armed Forces" waiver to qualify for in-state tuition. Waivers are available at http://mvp.nmsu.edu (under the Forms tab), or through the University Student Records Office. Please contact MVP for the required documents needed to complete the waiver application.

Veterans

Veterans who are eligible for the U.S. Department of Veterans Affairs education benefits qualify for in-state tuition through the Veterans In-State Tuition Act by submitting a "Resident Tuition Application for Active Military, Veterans and Dependents of the U.S. Armed Forces" waiver to the Military and Veterans Programs. Waivers are available at http://mvp.nmsu.edu (under the Forms tab) or through the University Student Records Office. For further information concerning approved programs and the application process, eligible persons should contact Military and Veterans Programs.

Veteran students enrolled under the following programs are responsible for their tuition and fees in the same manner as a nonveteran student:

- Montgomery GI Bill®-Active Duty (Chapter 30)
- Survivors' and Dependents' Educational Assistance (Chapter 35)
- Montgomery GI Bill®-Selected Reserve (Chapter 1606)

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by the VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill.

Allowing Veterans to Attend or Participate in Courses Pending VA Payment

Background

Section 103 of Public Law (PL) 115-407, 'Veterans Benefits and Transition Act of 2018,' amends Title 38 US Code 3679 by adding a new subsection (e) that requires disapproval of courses of education, beginning August 1, 2019, at any educational institution that does not have a policy in place that will allow an individual to attend or participate in a course of education, pending VA payment, providing the individual submits a certificate of eligibility for entitlement to educational assistance under Chapter 31 or 33.

Pending Payment Compliance

In accordance with Title 38 US Code 3679(e), New Mexico State University adopts the following additional provisions for any students using U.S. Department of Veterans Affairs (VA) Post-9/11 G.I. Bill® (Chapter 33) or Veteran Readiness and Employment (Chapter 31) benefits, while payment to the institution is pending from VA. New Mexico State University will not:

- Prevent the student's enrollment;
- Assess a late penalty fee to the student;
- Require the student to secure alternative or additional funding;
- Deny the student's access to any resources (access to classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the institution.

However, to qualify for this provision, such students may be required to:

- Provide a written request to be certified;
- Provide additional information needed to properly certify the enrollment as described in other institutional policies

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by the VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill.

Responsibility of Students Receiving VA Education Benefits

Students must pursue a degree in an approved program to be eligible for VA education benefits. Admission procedures for veterans and other eligible persons are the same for all students. Students must submit their degree plans or Student Academic Requirements (STAR) Degree Audit Report and Student Schedule to Military and Veterans Programs to be certified. Students must submit their degree plans or STAR Degree Audit Report and Student Schedule to MVP every semester they plan to use VA education benefits for continued certification.

Students using VA Education Benefits must notify MVP when any of the following occur:

- Dropping or adding course(s)
- Withdrawing from course(s)
- Withdrawing from the University
- Discontinuing regular class attendance
- Changing programs (academic majors/minors)

VA education benefits are payable for regular attendance in courses required by the student's program (major/minor) curriculum. VA education benefits are not payable for:

- Classes not attended regularly
- Repeating a course for which a passing grade meets degree requirements
- Classes for which credit is received through successful completion of a proficiency test or grade by examination
- Classes taken on an audit basis
- Classes that are dropped or withdrawn from
- Classes taken that are not required by the student's program (major/minor) curriculum

Tuition Assistance

Federal Tuition Assistance

Federal Tuition Assistance (TA) is a benefit paid to eligible members of the Army, Navy, Marine Corps, Air Force, Space Force, and Coast Guard. The Department of Defense (DoD) has authorized each service to pay up to $250 per semester credit hour in tuition costs (excluding fees) per fiscal year (1 October to 30 September). TA must be requested and approved before the start date of the course. Refer to your military portal for specific TA deadlines and procedures. TA is paid directly to the school by the individual services.

Service members must first be admitted to NMSU before enrolling in any classes at NMSU. Before applying, speak with your military service or Educational Services Officer (ESO) to know your education options and make an informed decision. Please be aware of the following NMSU admission and registration process:

1. Service members must Apply Online (https://apply.nmsu.edu/apply/?sr=f0ef65ec-60a5-445e-abbd-4b9ef76dab10) to be admitted.,
2. Login to my.NMSU.edu to register for classes, and
3. Create an Account and Apply for TA with your military portal. Each service has its own criteria for eligibility, obligated service, the application process, and restrictions. Refer to our website for service login information: https://mvp.nmsu.edu/military-members/federal-tuition-assistance.html

It is important to request TA for the same class and section number as enrolled in NMSU for tuition and grading purposes. Only enrollments requested and approved through their service portal will be eligible for TA. Refer to our website for further information or contact the Military and Veterans Programs for assistance.

MyCAA Spouse Scholarship

The My Career Advancement Account (MyCAA) Scholarship Program is a career development and employment assistance program. MyCAA is a program that provides financial assistance formilitary spouses who would like to pursue a license, certification, or up to an associate degree (excluding Associate Degrees in General Studies, Liberal Studies, and Interdisciplinary Studies that do not have a concentration). MyCAA provides a maximum education benefit of up to $4,000 with an annual fiscal year (1 October to 30 September) cap of $2,000 to assist eligible military spouses. Refer to our website for MyCAA eligibility and procedures at https://mvp.nmsu.edu/military-members/mycaa-spouse-scholarship.html or contact Military and Veterans Programs for assistance.

Regulations

Note: These regulations apply to all campuses of NMSU and are effective with the publication of this catalog. Tuition amounts, fees, and related items subject to annual review and change are all effective with the current catalog.

Credit for Military Service

New Mexico State University will award academic credit to United States military personnel for courses and Military Occupational Specialties (MOS), based on the American Council of Education Guide (ACE) as well as through national standardized tests, such as CLEP, AP, PEP, and DANTES. Credit for military training is in accordance with NMSU Faculty Senate Legislation Proposition 24-07/08, passed in May 2008. Military Training and Military Occupational Specialties (MOS) must have a recommendation evaluation by ACE (in the ACE Guide) for credit to be awarded. Courses accepted for transfer credit become part of the student's official NMSU transcript and academic record. If a student wishes to appeal a decision about accepting military training/education and/or MOS for academic credit, they must submit a written statement of appeal to the Dean of the College to which they applied. The Dean will review the merits of the appeal and render a decision. The decision of the Dean is final.

Only Primary MOS (s) are eligible for academic credit in the initial review and evaluation. Credit for Duty and/or Secondary MOS is eligible for academic credit if the student petitions the College's Associate Dean. Primary MOS is the primary specialty of a soldier and reflects the broadest and most in-depth scope of military experience. Veterans, active-duty personnel, National Guard, and Reservists who are current students or students applying for admission to New Mexico State University may be granted academic credit on a case-by-case basis upon evaluation of military transcripts - the Joint Services Transcript (https://jst.doded.mil/jst) and the Community College of the Air Force or Air University transcripts. Course equivalencies and credit hours

awarded for a particular NMSU degree are determined by colleges and/or academic departments. The credit hours for specific courses toward degree requirements, or as elective credit, may be awarded. The college and/or academic department determine the number of credit hours awarded.

Students submitting military transcripts for credit evaluation must meet the Maximum Time Frame policy, see the Financial Aid Section for more information.

According to Title 38, Code of Federal Regulations, Sections 21.4253(d)(3) and 21.4254(C)(4), the Department of Veterans Affairs requires all veterans receiving Veterans Affairs education benefits to submit their military transcripts - Joint Services Transcript and the Community College of the Air Force or Air University - to the New Mexico State University (NMSU) Admissions Office or NMSU Graduate School.

Graduate Student Status (Training Time)

VA education benefits are determined by the number of graduate credit hours of enrollment for a given semester. Listed below are the credit hours to determine the student status (training time) for graduate students.

Fall and Spring semesters, for 16-week terms, full-time enrollment is 9 or more credit hours: three-fourths time enrolled is 7 to 8 credit hours: half-time enrollment is 5 to 6 credit hours. Students enrolled less than 5 credit hours are reimbursed for tuition and allowable fees only.

For an 8-week term, full-time enrollment is 5 or more credit hours; three-fourths time enrollment is 4 credit hours: half-time enrollment is 3 credit hours. Students enrolled in less than 1-2 credit hours are reimbursed for tuition and allowable fees only.

Summer consists of 5 terms: 10-week term, 2 – 8 week terms, 2 – 5 week terms. The 10-week summer session, full-time enrollment is 6 or more credit hours; three-fourths time enrollment is 4 to 5 credit hours; half-time enrollment is 3 credit hours. Students enrolled in less than 1-2 credit hours are reimbursed for tuition and allowable fees only.

For the 8-week summer session, full-time enrollment is 5 or more credit hours; three-fourths time enrollment is 4 credit hours; half-time enrollment is 3 credit hours. Students enrolled in less than 1-2 credit hours are reimbursed for tuition and allowable fees only.

For the 5-week summer session, full-time enrollment is 4 or more credit hours; three-fourths time enrollment is 3 credit hours; half-time enrollment is 2 credit hours. Students enrolled in 1 credit hour are reimbursed for tuition and allowable fees only.

Veterans' Attendance and Satisfactory Progress

The U.S. Department of Veterans Affairs requires all veterans receiving VA education benefits to make satisfactory progress and systematic advancement toward an educational objective or be liable for overpayments. Satisfactory progress and regular class attendance are expected of students.

If a veteran receiving benefits gets suspended for academic reasons, benefits are terminated and will be restored only after readmission to NMSU.

If the university has liability claims filed against it because of a veteran failing to meet compliance requirements of the U.S. Department of Veterans Affairs, the university will not release any academic records (transcripts) on the veteran until the veteran has reimbursed the federal government for funds drawn in violation of those requirements.

A student receiving VA education benefits pursuing a degree program offered by New Mexico State University should adhere to the program curriculum. Failure to do so will result in the student being certified for less than full-time status or becoming liable for an overpayment.

Military Withdrawal

New Mexico State University understands that our military students may be called to active duty, specialized training, or disaster relief efforts with little notice. U.S. active-duty military students wishing to withdraw from all their classes must present their orders and their request for full withdrawal, as indicated below. However, the below policy does not pertain to a student's basic and/or annual training. A student who has an order for training is encouraged to formally request, through the proper military chain of command, a postponement of their orders until the summer or the end of the semester they are currently enrolled in. If a student's request for postponement is denied, the student may then follow the steps below but must provide documentation that their postponement request was formally denied.

All NMSU students called for active duty must take the following steps to withdraw from all their classes:

1. **Military and Veterans Programs (MVP):** TA/VA students ordered to Active Duty must provide a copy of orders to the MVP office, in Corbett Center Student Union, Room 244, or by email mvp@nmsu.edu. To assist in reporting accurate information to their military service or the VA Regional Office, the student should also provide, in writing, the last day of class attendance.

1. **NMSU University Student Records:** All students presenting their orders to the University Student Records, (575) 646-3411, or records@nmsu.edu, will receive a military withdrawal from classes and full tuition and fees refund for that semester.

1. **Bookstore:** Students who still have their receipts for textbooks purchased the semester in which they are called to active duty will be given a full refund for these textbook purchases when they present their orders. Please contact the bookstore for assistance at (575) 646-4431 or nmsu@bkstr.com.

Military Readmission Policy

New Mexico State University (NMSU) acknowledges that students may be temporarily unable to attend classes or be required to suspend their studies to perform military service. NMSU encourages such students to resume their education once a military service obligation has ended and adopts this policy to ensure the timely readmission of such students.

In accordance with federal regulations, 34 C.F.R. § 668.18 and the Department of Defense (DoD) Voluntary Education Partnership Memorandum of Understanding (MOU), the university will promptly readmit service members who seek readmission to a program that was interrupted due to a uniformed service obligation.

Eligibility

This policy shall apply to (1) service members who are unable to attend classes for more than 30 consecutive days, and (2) service members who are unable to attend classes for less than 30 days (about 4 and a half weeks) when such an absence would result in a withdrawal from NMSU.

A student is eligible for readmission under this policy if, during an absence, the student performs uniformed service, voluntary or involuntary, in the Armed Forces, including the National Guard or Reserve, active duty, active duty for training, or full-time National Guard (under federal authority). The cumulative length of all absences for uniformed service (service time only) must not exceed five years.

Notification of Military Service
The student (or an appropriate officer of the armed forces or official of the Department of Defense) must give written notice of such service to the school as far in advance as is reasonable under the circumstances. Such notice does not need to indicate when the student will return to NMSU.

Notification of Intent to Return
The student must also give written notice of Intent to Return and supporting official military obligation documentation to University Student Records within three years after the completion of the period of service.

Tuition and Fees
If the student is readmitted to the same program, NMSU will assess the tuition and fee charges that would have been assessed for the academic year during which the student left (first academic year only). However, if veterans' education benefits or other service member education benefits will pay the higher tuition and fee charges that other students in the program are paying for the year, NMSU will assess those charges to the student.

Readmission Requirements

A returning student will be permitted to reenroll in the next class(es) scheduled in the same academic program unless the student requests a later date of re-enrollment or agrees to a different program. A returning student will be readmitted into the same academic program they were enrolled in before the military service obligation. If the exact program no longer exists, the student must be admitted to the program that is most similar, unless the student requests or agrees to admission to a different program. Returning students will be reenrolled with the same enrollment status, number of completed credit hours, and academic standing as the last academic year of attendance.

If NMSU determines that a returning student is not prepared to resume the program with the same academic status or is unable to complete the degree, NMSU will make reasonable efforts to enable the student to resume or complete the program at no additional cost to the student.

NMSU is not required to readmit the student if it determines:

- that there are no reasonable efforts it can take to prepare the student to resume the program at the point where they left off or to enable them to complete the program, or

- that after it makes reasonable efforts (those that do not place an undue hardship on the institution), the student is not prepared to resume or complete the program.

"Undue hardship" means an action requiring significant difficulty or expense considering the overall financial resources of NMSU and the impact of such action on its operation. NMSU has the burden to prove by a preponderance of the evidence that the student is not prepared to resume the program with the same academic status at the point where they left off or that they will not be able to complete the program.

In accordance with federal regulations, returning students who receive a dishonorable or bad conduct discharge, general court-martial, or federal or state prison sentence from the Armed Forces (including the National Guard and Reserves) are not eligible for readmission#under this policy.

Students are encouraged to speak with Military and Veterans Programs regarding any absence due to military service. For more information, please contact mvp@nmsu.edu.

Military Experience Waiver

Before graduating, during the student's junior and/or senior year, NMSU students are required to take two 3-credit Viewing a Wider World (VWW) upper-division (300-400 level) courses. These courses emphasize the international character and multicultural influences in study and strengthen information retrieval skills. There are two options that NMSU allows for replacing one of the two courses (3 credits) of VWW requirement with another form of educational experience, these are: (Study Abroad Experience or Military Experience for students who have served at least four weeks of U.S. Military Foreign/Sea Service in a foreign country.

Steps needed to request a Military Experience Waiver (replacing 3 credits of VWW):

1. Obtain a copy of your DD-214 or Memo from your Commanding Officer proving your 4-week deployment

1. Provide the above copy to your college academic advisor to request a waiver

1. Wait for your college to approve and confirm

Note: Credits are not being waived, only one of the two courses is being waived within the requirement. You may still need to complete three credits in consultation with your academic advisor. Please contact the MVP or your academic advisor for questions and concerns.

Resources

Veteran Mentorship Program

Many students who make the transition from the Military to Higher Education suddenly experience a shift in lifestyles and cultures. This culture shift during their first year is a crucial time in their lives, and the NMSU Veteran Mentorship Program will help foster a smooth transition.

Vision: The NMSU Veteran Mentorship Program will help our first-year student veterans make a smooth transition and succeed academically.

Goals:

- Help first-year student veterans successfully transition to an academic setting.

- Help first-year student veterans be aware of various financing options.
- Help first-year student veterans understand the process needed to receive VA education benefits.
- Help first-year student veterans be aware of various resources at NMSU and in the community.

For more information on the Veteran Mentorship Program, or to speak with our Mentor, please visit: https://mvp.nmsu.edu/veteran-mentorship-program.html

Military and Veteran Housing

New Mexico State University is one of the first in the nation to offer on-campus housing specifically designated for student veterans and their families transitioning out of the military and into student life. The Department of Housing & Residential Life has worked in conjunction with the Student Veterans Organization of NMSU to offer affordable housing on campus to student veterans attending the university.

For more information, please contact Housing and Residential Life: (575) 646-3202, housing@nmsu.edu, http://housing.nmsu.edu.

Service Members Opportunity Consortium (SOC)

The NMSU system has been designated a Servicemembers Opportunity Colleges (SOC) Consortium university. As a member of SOC, NMSU has committed itself to fully supporting and complying with SOC principles and criteria, ensuring that service members and their families share in the postsecondary educational opportunities available to other citizens. Those eligible are provided with appropriately accredited educational programs, courses, and services. The flexibility of programs and procedures particularly in admissions, counseling, credit transfer, course articulation, recognition of other applicable learning experiences, including those gained in the military, scheduling, course format, and residency requirements are provided to enhance access of service members and their families to undergraduate education programs. All SOC rules and regulations apply, including:

- Credit for military training and experience – NMSU recognizes and uses ACE Guide in evaluating military training experiences
- Reduced academic residency requirements – 25% maximum for most programs; 30% for 100% online programs
- No final year or semester requirement
- Credit for nationally recognized testing programs such as CLEP (General and Subject exams), DSST (DANTES Standardized Subject Tests)

For further assistance contact:

Military and Veterans Programs
MSC 4740, PO Box 30001
Las Cruces, NM 88003-8001
(575) 646-4524
http://mvp.nmsu.edu

Reserve Officer Training Corps (ROTC)

The Reserve Officer Training Corps is a commissioning program designed to attract, motivate, and train qualified students for military service as officers. The ROTC program is represented on the NMSU campus by the Department of Military Science (U.S. Army) and the Department of Aerospace Studies (U.S. Air Force).

Curricula in the Departments of Military Science and Aerospace Studies are divided into basic and advanced courses of two years each. Enrollment in the basic course is voluntary and involves no obligation. Participation in the advanced courses is on a contractual basis and leads to military service as a commissioned officer. Elective academic credit is granted by the University for ROTC classes.

Students with prior military service or Junior ROTC experience may receive credit, although not academic credit, for all or portions of the basic courses.

All qualified cadets enrolled in ROTC receive a stipend that varies depending upon the year the cadet is in the program. Scholarships, which pay full college tuition and various laboratory, textbook, and incidental fees, are available competitively.

For more detailed information about the ROTC programs, see the College of Arts and Sciences departments of Aerospace Studies and Military Science in this catalog. Additional information may be obtained by contacting the departments directly at:

(575) 646-4030 (Army)
(575) 646-2136 (Air Force)

Aggies Green Zone

The Green Zone is defined as a military zone that has been secured as a "safe" place for military personnel. Military and Veterans Programs created the Aggies Green Zone to help foster a safe and supportive environment where students feel welcomed and trusted during their transition from the military and throughout their educational journey. The Aggies Green Zone training program aims to help faculty and staff understand the needs, experiences, and cultural issues affecting military and veteran students.

Aggies Green Zone Allies

Aggies Green Zone Allies are sympathetic faculty and staff members who military, veteran, and dependent students can reach for support. Allies are not expected to be experts in military and veteran matters, but they can make a positive impact by lending a sympathetic ear and connecting students with appropriate resources.

Faculty and Staff receive an Allies designation after participating in the Aggies Green Zone online and workshop training programs, to have their contact information listed on the MVP website. For more information, please visit: https://mvp.nmsu.edu/aggies-green-zone/green-zone-allies.html

International Students

International students are a vital component of the New Mexico State University (NMSU) community. After a student is admitted to a degree seeking program ISSS office may issue an I-20 after the

student submits the required documents. Based on the I-20 students may apply for an F-1 visa in their home country. The US consulate officer determines the eligibility of F-1 visa of a student.

International students are admitted to the United States primarily in F-1 (student) and J-1 (exchange visitor/student) nonimmigrant classifications and are subject to federal immigration laws and regulations administered by the U.S. Department of Homeland Security (DHS) through the Student and Exchange Visitor Program (SEVP), as well as by the U.S. Department of State for J-1 exchange visitors/students. The Office of International Student and Scholar Services (ISSS) under the umbrella of the International Programs and Compliance (IPC) serves as the University's designated office for SEVP compliance and is responsible for advising international students on their immigration-related responsibilities.

Federal Regulations

The Department of Homeland Security through the Student and Exchange Visitor Program (SEVP) has established rules for students in non-immigrant status, such as those with F-1 or J-1 visa types. Some of these rules include the following:

1. Enrollment requirements

   For immigration purposes, each student must maintain full-time student status

   - Undergraduate - Full-time status for fall and spring semesters is defined as 12 or more credits for undergraduates (only three online credits can apply to the full-time requirement).
   - Graduate - Full-time status for fall and spring semesters is defined as 9 or more credits for graduate students (only three online credits can apply to the full-time requirement).
   - Summer- Generally students are not required to enroll in classes during summer semester, as it is considered as a break time. The exception being when:
     - When students are admitted in summer semester. They are required to be full time student. Full-time status for summer is defined according to NMSU requirements.
     - Students graduating in the summer semester are required to enroll in at least one in-person class. Exceptions possible for final semester. Consult ISSS officials for more details.

   2. Employment:

   - On-campus employment: Students can work 20 hours per week on campus during Fall and Spring semester. Students can work upto 40 hours per week during break. Example Summer break, spring break etc.Students on valid I-20's with F-1 visas are eligible to work on campus while studying in the U.S. Students may only work on campus while they maintain status. A valid I-20, F-1 visa and I-94 document serve as proof of work eligibility for on-campus employment.
   - Off -campus employment: International students are generally not eligible to work off-campus but maybe eligible to not work off campus with withoutprior authorization from ISSS office.
     - CPT – Students are generally eligible to apply for CPT after they complete one academic year as an F-1 student. But CPT must be authorized by ISSS office prior to working. Working without prior authorization is a violation of immigration status and the students I-20 maybe terminated for "unauthorized employment".
     - OPT – Students are eligible to apply for OPT if they are in valid F-1 status for an academic year. Student can generally apply for OPT 90 days prior to their graduation date or within 60 days of graduation.
     - STEM OPT – Students must be in active OPT Status with employment with an e-verified employer and must have received a degree in a STEM field. Students are eligible to apply for STEM OPT 90 days before their OPT expires.

   For additional eligibility requirements about CPT,OPT or STEM OPT please contact ISSS office.

   3. Maintaining Status:

   - All international students must maintain their most current USA address and phone number in their NMSU account and notify within 10 days of change their new address.
   - Maintain valid passport and visa
   - Have a valid I-20 reflecting the students current major and educational level at all times.

University Procedures for International Students

Undergraduate Admission

International students are subject to the same admissions standards as all other NMSU students, but some additional requirements apply. This section addresses those additional requirements. Visit https://isss.nmsu.edu/new-students/undergraduate-admissions/step-1.html for more information.

Applications for admission that include the transfer of credits earned at a non-U.S. university must include a professional Foreign Credential Evaluation (FCE) report from a member institution of the National Association of Credential Evaluation Services (NACES) for every transcript from a foreign secondary school and/or post-secondary institution attended. The ISSS office highly recommends that applicants consider using The Evaluation Company (TEC) for their FCE. NMSU has worked with TEC to provide applicants with a clear understanding of which evaluation is needed. TEC provides an applicant portal to track and access evaluations. TEC is a long-standing member of NACES. For more information, please visit https://spanside.my.salesforce-sites.com/SpantranApplication?Id=945ec224-f79e-4171-8888-8c452728aafb

Undergraduate – New

- GPA requirement of 2.75 or higher
- Minimum TOEFL of 68 iBT, or 6.0 IELTS, or Duolingo 95 or higher
- Secondary school equivalency with a minimum 2.75 GPA or ACT composite score of 21 or SAT score of 1060 or Ranked in the top 20 percent of their high school graduating class or a GED cumulative score of 480 or HiSET cumulative score of 45.

Undergraduate – Transfer

- 2.00 or better GPA on transfer college or university credits.

- Students transferring from a two-year college, community college, or university in the United States who have earned a minimum of 30 acceptable semester credits (45 acceptable quarter credits) with a GPA of 2.0 or better (acceptable credit means classes that require a high proficiency in both written and oral English).

English Language Proficiency Requirements

For undergraduate admission to the university, NMSU requires a score of 68 (internet-based) or better on the Test of English as a Foreign Language (TOEFL) or a score of 6.0 on the International English Language Testing System (IELTS), or a score of 95 on the Duolingo English Test (DET) for international students for both non-degree and degree seeking. International students attending another US institution and having a valid I-20 may enroll as a non-degree seeking student and take course(s) at the undergraduate level.

Students who are citizens from one of the following countries will be exempt from providing a TOEFL, IELTS, or DET score for admission purposes. NMSU requires all admitted international students to take the English Language Placement Test (ELPT) for placement purposes.

> Anguilla, Antigua, Australia, Bahamas, Barbados, Barbuda, Belize, Bermuda, Botswana, Caicos Islands, Cameroon (Anglophone), Canada (except Quebec), Cayman Islands, Christmas Islands, Cook Island, Dominica, England, Eritrea, Fiji, Gambia, Ghana, Grand Cayman Islands, Grenada, Grenada and the Grenadines, Guernsey, Guyana, Ireland, Israel, Jamaica, Jersey, Kenya, Kiribati Islands, Lesotho, Liberia, Malawi, Malta, Mauritius, Micronesia (Federated States of), Montserrat, Namibia, Nauru, New Zealand, Nigeria, Norfolk Island, Papua New Guinea, Philippines, Scotland, Sierra Leone, Singapore, Solomon Islands, South Africa, St. Christopher, St. Helena, St. Kitts and Nevis, St. Lucia, St. Vincent & Grenadines, Swaziland, Tanzania, Trinidad & Tobago, Tristan da Cunha Island, Turks & Caicos Islands, Uganda, Virgin Islands, Wales, Zambia, Zimbabwe

For students not from the countries listed above, a waiver of the TOEFL/ IELTS/DET requirement may be considered for:

1. Students completing high school in the United States who have attended the high school for at least two full years.
2. Students transferring from an institutional accredited two-year college, community college, or university in the United States who have earned a minimum of 24 semester credits or 36 quarter credits (all classes having English as the language of instruction) with a GPA of 2.0.
3. The university reserves the right to require any prospective international student to meet the TOEFL, IELTS or DET requirement.

All application material, transcripts, national examination scores, transcripts from colleges or universities (with an English translation), and test scores (including the TOEFL or IELTS) should be sent directly to the NMSU Undergraduate Admissions at admissions@nmsu.edu. Please note that transcripts, test scores, and foreign credential evaluations sent directly from an applicant/student to NMSU will be considered unofficial. To be considered official, transcripts, test scores and foreign credential evaluations must come directly from the school, testing agency, or evaluation agency. All documents should be emailed to admissions@nmsu.edu.

Admission Restrictions

Admissions to summer terms in not available to new undergraduate international students due to the limited number of face-to-face course offerings.

Admission Deadlines

For full consideration for undergraduate admission, applicants are subject to the following deadlines:

July 1 (application initiated)	Fall Semester
July 15th (all documents submitted)	Fall Semester
October 1st* (Study Abroad)	Spring Semester
November 15th (application initiated)	Spring Semester
December 1st (all documents submitted)	Spring Semester

Post Admission

Immigration Document Requirement (I-20) to be submitted to ISSS office

1. Valid passport for six months or more (from the date of entry into USA).
2. International student must submit a current financial support document to the ISSS office. This document must show that:
    - The financial support document/ bank statement - Availability offinancial document/bank statement must be within the last 3 months on the letter head of the bank and reflect the account holders name, account number, type of bank account and the available balance. The bank statement must be from an account where the funds are readily available to use to support the student's education and other related expenses such as tuition expenses, living expenses, insurance, other expenses for at least one academic year.
3. Complete the Affidavit of Support Form provided by ISSS office.
4. All official communication and I-20 will be sent to the students NMSU email address

Post Arrival

1. New Student Orientation

Orientation for all new Undergraduate first-time and transfer students is mandatory. At NMSU's New Student Orientation programs, students will attend information sessions, learn about campus resources and college life, meet with an academic advisor, and register for courses.

More information about New Student Orientation is available at https://awo.nmsu.edu/.

2. English Language Placement Test

Placement in writing classes for international students is determined by the results of the English Language Placement Test (ELPT).

Based on the results of the ELPT, the student is either assigned to ENGL 1105M (a bridge course designed to ensure success in ENGL 1110M) or is allowed to enroll directly in ENGL 1110M (for multilingual students). Please note that these classes are only available on NMSU's Las Cruces Campus. International students excused from ENGL 1105M will be required to take ENGL 1110M. The student may then be required to complete one or more regular English classes as required for a particular degree. Completing basic English courses at other U.S. institutions does not automatically satisfy the ENGL 1110M requirement. Equivalencies for ENGL 1105M and equivalencies for ENGL 1110M or ENGL 1110G are determined by the University Student Records Office, who may refer exceptional cases to the English Department in the College of Arts and Sciences.

In cases of dramatic discrepancies between TOEFL/ IELTS scores and the ELPT, the ELPT results shall determine placement.

3. Mandatory SEVIS check-in

SEVIS check-in is another orientation for all new and transfer international students admitted for the semester and it is federally mandatory to attend. This is a federal requirement for students to comply. Mandatory SEVIS check-in MUST be completed by all new and transfer students ideally one day before classes begin depending on the semester they are admitted to. The location of the Sevis check-in will be communicated by the ISSS office.

4. Canvas Course & Document Upload Portal

The Canvas Course & Document Upload Portal is where a student uploads their documents such as passport, F-1 visa, I-94, along with US address, phone number and emergency contact information. Students will receive an email invitation to the Canvas course 2 weeks before the semester begins. Students can access this Canvas course using their NMSU email address. All official communication will be sent to the students NMSU email address.

*** All the 4 items listed above must be completed by New and Transfer International students.

Graduate International Students

For information about admission process, eligibility and deadlines please visit the Graduate School section of this catalog.

https://gradschool.nmsu.edu/future-students/international-graduate-students-processing-steps.html

Post Admission of graduate student:

Immigration Document Requirement (I-20) to be submitted to ISSS office

1. Passport valid for six months or more.
2. International student must submit a current financial support document/ Assistantship offer to ISSS office. This document must show that:
    - If submitting financial support document - The Bank statement with transactions must be on the letter head within the last 3 months of the bank and reflect the account holder's name, account number, date and the available balance. The bank statement must be from an account where the funds are readily available to use to support the student's education and other related expenses such as tuition expenses, living expenses, insurance, other expenses for at least one academic year.
    - Assistantship offer- The offer must be on the department letterhead reflecting the students name, Aggie #, the semester/s student will be offered assistantship, amount in funding the student will receive and other benefits, if any.
3. Complete the Affidavit of Support Form provided by ISSS office.
4. All official communication and I-20 will be sent to the students NMSU email address.

Post Arrival

1. Mandatory SEVIS check-in

SEVIS check-in is orientation for all new and transfer international students admitted for the semester and attendance is federally mandated. This is a federal requirement for students to comply. Mandatory SEVIS check-in MUST be completed by all new and transfer students at least one day before classes begin depending on the semester they are admitted to. The location of the SEVIS check-in will be communicated by the ISSS office.

2. Canvas Course & Document Upload Portal

The Canvas Course & Document Upload Portal is where student upload their documents such as passport, F-1 visa, I-94, US address, phone number and emergency contact information. Students will receive an email invitation to the course 2 weeks before the semester begins. Students can access this Canvas course using their respective NMSU email address.

*** All the 2 items listed above must be completed by New and Transfer International students.

3. Enrolling in Classes:

- Fall and Spring semester: Full-time status for fall and spring semesters is defined as 9 or more credits for graduate students (only three online credits can apply to the full-time requirement).
- Summer semester: Students admitted to summer semester must enroll in full course load. Full-time status for summer is defined according to NMSU requirements.
- Students graduating in summer semester must register for at least one in-person class.

Employment:

- On-campus employment: Students on valid I-20's and F-1 visas are eligible to work on campus while studying in the U.S. Students may only work on campus while they maintain status. A valid I-20, F-1 visa and I-94 document serves as proof of work eligibility for on-campus employment.
- Off-campus employment: International students may not work off campus without prior authorization from ISSS office.

Miscellaneous Regulations

Health Insurance

New Mexico State University (NMSU) requires all F-1 international students studying at NMSU to have university mandated health insurance coverage. It is the student's responsibility to enroll in health insurance coverage offered by NMSU. The health insurance coveragemust cover the student while they are physically present in the U.S. including summer and winter breaks. NMSU will provide an educative canvas course whereby NMSU will inform international students with their option/s for obtaining health insurance plan along with the advantages and disadvantages of each option and allow the students to make an informed decision on their own.

Canvas Health Insurance Course - All new international students at NMSU are required to complete the Canvas Health Insurance Course. Students will be sent a link to the course after they have enrolled in classes. Participation in the course is mandatory. Completion of the course acknowledges that you have been provided with the information necessary to make an informed decision regarding the purchase of your health insurance coverage. It acknowledges that you understand the pros and cons of the plan you selected, including **taxes and potential complications during subsequent change of status procedures.**

1. UG students: New and transfer international students are permitted to enroll in classes after they complete Aggie Welcome and Orientation and taking the English Language Placement Test (when applicable, see English Language Proficiency Requirements section). All international students, are required to the campus to which they were admitted. The following are the offices that a student may need to report to:

Las Cruces campus: International Student & Scholar Services, Suite 101 of the Educational Services Building (575) 646-2834, isss@nmsu.edu.

- a. Doña Ana Community College: International Student & Scholar Services, Suite 101 of the Educational Services Building (575) 646-2834, isss@nmsu.edu.
- b. Alamogordo Community College: Office of Student Services, Student Services Building, second floor
- c. Grants Community College: Office of Student Services, Walter Martinez Building, Main Office Complex

2. All international students are required to registerto undergo a TB test or submit results of a current TB test done in the home country within a week of arriving. Guidelines will be provided by the Aggie Health and Wellness Center.

TB test done in the home country within a week of arriving. Guidelines will be provided by the Aggie Health and Wellness Center.

International Exchange Students

An Exchange Student is defined as a visiting student who is coming to NMSU for one semester to one Academic Year but is not seeking a degree. An Exchange Student typically comes to NMSU from one of NMSU's partner universities or one of NMSU's partner consortiums.

All international exchange students are required to be enrolled in NMSU-approved health insurance. Education Abroad & National Student Exchange will enroll the students and bill the insurance amount to the student's account.

Exchange Students are required to attend a mandatory Orientation before courses begin. Orientation will be scheduled and facilitated by the Education Abroad & National Student Exchange, abiding by guidelines set forth by the US government per J-1 visa requirements.

Exchange students are subject to the same English Language Proficiency policies outlined in the section on University Procedures for International Students.

Application Process for International Exchange Students

Prior to admission to NMSU, a prospective international exchange student must be nominated from their home university, complete an application with Education Abroad & National Student Exchange and submit their required documents. The process is as follows:

1. Nomination for exchange must be submitted by the Home University to the Incoming Exchange Coordinator by March 15 for Fall semester and September 15 for Spring semester. Please see your home university exchange coordinator for more information and to complete the nomination process.
2. Once a nomination is received, students will be directed to make an account at: https://educationabroad.nmsu.edu/incoming-exchange-students.html.
3. The student is then required to complete the Exchange Student Nomination Form Questionnaire and upload the following documents:
   a. Passport
   b. Transcripts (in English)
   c. Financial document showing proof of $8,000 per semester attended.
4. Current TOEFL scores (2 years or less). See below for acceptable scores. Information on current test scores can be found at Education Abroad & National Student Exchange's website: https://educationabroad.nmsu.edu/exchange-students-application-deadlines-and-processes.html. All international students, regardless of status, must apply for Admissions to NMSU. Education Abroad & National Student Exchange staff will send the students specific instructions on how to apply non-degree, guest matriculant to NMSU.

Academic Restrictions

The majority of the NMSU catalog applies to Exchange Students, with the following exceptions:

- Courses must be taken at the Main Campus only. Community college courses, including DACC, are not available to Exchange Students.
- The Nursing Department and the Creative Media Institute (CMI) areis the only departments strictly off limits to exchange students, with case-by-case exception by the departments, and this would have to be approved well in advance of the student being nominated. The English Department also has restrictions on the courses available to exchange students. Please contact the Education Abroad office for more information.
- Exchange students are required to abide by all pre-requisite requirements and class size restrictions (i.e., if a course is closed when the student goes to register, an exception cannot be made).
- Online courses are restricted due to visa requirements (no more than three credits can be taken online. Additional fees will apply.

Tuition, Fees & Other Expenses

All costs are given for one term/semester. The university reserves the right to change any of the charges without notice.

Campus Tuition Rates

For a full listing of all tuition rates from the NMSU System please see the University Accounts Receivable website.

Additional Fees

Additional Fees

Undergraduate admission application fee	$25.00
New student orientation fee - virtual session	$99.00
New student orientation fee - in-person session	$165.00
International student admission application fee	$50.00
International student orientation fee	$50.00
Academic Services Fee (per credit)	$20.00
Course Delivery Fee (per credit)—(Grants Only)	$25.00
ASNMSU Fee (Fall/Spring 1-11 credit enrollment)	$33.50
ASNMSU Fee (Summer 1-8 credit enrollment)	$12.40
Graduate Wellness/Fitness fee—(Fall/Spring 9+ credits)	$159.30
Graduate Wellness/Fitness fee—(Summer 6+ credits)	$141.60
Certificate degree fee	$10.00
Bachelor or Associate degree fee	$35.00
Master or Doctorate degree fee	$45.00
Degree application late filing fee	$50.00
Late Registration Fee Base Cost	$25.00
Engineering Technology Fee	$36.00-145.00

Course Fees (Fees Assessed Per Course)

- See the Course Fee (https://uar.nmsu.edu/tuition-fees/)page for a list of courses with additional fees.
- Applied Music courses - see Music section of catalog
- Graduate MBA Course Fee: $250.00
- For more information, please visit the MBA Online Program website: https://business.nmsu.edu/masters-programs/mba/mba-program/mba-online

Mandatory International Student Fees

International Student Health Insurance

New Mexico State University (NMSU) requires all F-1 international students studying at NMSU to have health insurance coverage. It is the student's responsibility to purchase and maintain health insurance coverage while enrolled at NMSU. The health insurance coverage must cover the student while they are physically present in the U.S. including summer and winter breaks. NMSU will provide an educative role whereby NMSU will inform international graduate students with their options for obtaining health insurance along with the advantages and disadvantages of each option and allow the students to make an informed decision on their own.

- Canvas Health Insurance Course - All new international students at NMSU are required to complete the Canvas Health Insurance Course. Students will be sent a link to the course after they have enrolled in classes and activated their NMSU email address. Participation in the course is mandatory. Completion of the course acknowledges that you have been provided with the information necessary to make an informed decision regarding the purchase of your health insurance coverage. It acknowledges that you understand the pros and cons of the plan you selected, including **taxes and potential complications during subsequent change of status procedures.**

Other Fees

Wellness/Fitness Fee

The Wellness/Fitness fee is included in tuition for full-time students at the Las Cruces Campus. Options for part-time students enrolled at Las Cruces Campus include:

Tuition, Fees, and Other Expenses

	Wellness	Fitness
Term pass for student enrolled in 6-11 credits	$81.00	$40.00
Term pass for student enrolled in 1-5 credits	$105.00	$53.00
Single visit for student enrolled in 1-11 credits	$35.00	N/A
Tuition, Fees, and Other Expenses		

The Wellness fee grants access to the Student Health Center with charges accruing for medications, lab work, testing or procedures. The Fitness fee grants access to the Student Activity Center.

Health Insurance

Students who have access to the Campus Health Center may choose to purchase a commercial insurance policy offered through the Health Insurance Marketplaces established by the Affordable Care Act (ACA). These exchanges are intended to provide consumers with a new way to shop for, compare costs and coverage benefits, and enroll in insurance coverage. For more information visit: www.healthcare.gov or www.bewellnm.com

- **Housing Services**

See the Students Resources section for room descriptions, accommodations, application process, deposit requirement, regulations and eligibility.

For current rate information, please visit our website at: http://housing.nmsu.edu/.

- **Dining Services**

See the Dining Services section for meal plan descriptions & pricing, application process, deposit requirement, regulations and eligibility. Freshmen living on campus must choose between Aggie Unlimited and Aggie Choice Plans.

Late Registration Fee

A late registration fee of $25 is imposed if registration has not been completed before the late-registration period begins. Failure to make scheduled payments with the University Accounts Receivable on due dates will result in additional liability.

Payment of Charges

By enrolling in classes at NMSU, a student makes a financial commitment to pay the tuition and fee charges associated with his/her enrollment. The enrollment action constitutes a financial obligation between the student and NMSU and that all proceeds of this agreement will be used for education purposes and constitute an education loan pursuant to 11 U.S.C 523(a) (8). Terms and Conditions of Course Registration are posted on the University Accounts Receivable (UAR) website and available at time of Registration. Payments can be made by mail, web, telephone, or in person at University Accounts Receivable. Cash, checks, money orders, 529 Savings Plan, International payments, and limited types of credit cards are accepted. All financial aid received must be paid towards balances owed. Additional penalty charges will be assessed for failure to make payments when due. The University reserves the right to cancel registration of any student who fails to pay, when due, any indebtedness to the institution if not completed by the deadlines as outlined on the UAR website under important dates related to your Student Account. Students are prohibited from registering for a term/semester until all previous debts due to the University are paid in full.

Payment Plan

For current information, please visit the Payment Plan website at https://uar.nmsu.edu/payment-plan/.

Tuition Adjustments, Refunds and Forfeitures

Students officially withdrawing from all courses or dropping a course(s) during a semester or term are eligible for a 100-percent refund of tuition and fees through the deadlines listed online as outlined on the University Student Records website under Important Dates for Students for each term. Students withdrawing from a course(s) after that deadline will not be eligible for a refund and will remain liable for payment of full tuition and fee charges. Non-attendance does not constitute an official course drop or withdrawal. It is the student's responsibility to withdraw from the university and/or drop a course if he/she decides to not attend once enrollment has taken place. All charges due to NMSU must be paid before refunds or adjustments will be permitted.

In cases of academic or disciplinary suspension, eligibility for tuition refunds and adjustments will depend on the conditions of the suspension and will be entirely at the option of the institution. Should unforeseen circumstances beyond the reasonable control of New Mexico State University result in curtailing classes, closing residence facilities, or otherwise withdrawing services that are a normal function of the institution, refunds of any nature will be at the discretion of the college/university administration.

Residence hall rentals and dining hall charges may be refunded in accordance with schedules adopted by these departments.

Delinquent and Prior-Term Balances

NMSU reserves the right to cancel the registration of any student who fails to pay, when due, any indebtedness to the institution. Diplomas will be withheld until all financial obligations are paid in full.

Dishonored Financial Transactions - Checks, Credit Cards, ACH Transactions

The University charges a penalty on all dishonored cash instruments. Personal checks will not be accepted from students who have had previously dishonored checks.

Estimating Other Expenses

In addition to the direct costs stated above, other expenses per semester may include such items as textbooks, supplies, and personal expenses.

Cooperative Education

Students participating in the Cooperative Education Program who receive academic credit pay the same tuition and fees as regularly enrolled students. Work phase students who are assigned to campus or a nearby off-campus workstation may pay for the student wellness/fitness as if they were a part-time student enrolled in 1-5 credits.

Ways to Qualify for Lower Tuition Rates

Resident or nonresident status is determined in accordance with a uniform definition established for all New Mexico institutions by the Higher Education Department, State of New Mexico, NM Administrative Code (NMAC) 5.7.18. The University Student Records Office administers residency. Information on the following programs and offices that administer the reduced rate program may be obtained from the University Admissions, the University Financial Aid and Scholarship Services.

- American Indian Agreement
- Athletic Grant
- Colorado-Arizona Reciprocal Agreement
- Dual Credit
- Fire Fighter and Peace Officer Survivor Scholarship

- Foreign Military Dependent
- Foreign Military Spouse
- Foreign Military Stationed in New Mexico
- Foster Care
- Graduate Assistantship
- Immigrant Student (NM HS GRAD)
- Military Dependent
- Military Spouse
- Military Stationed in New Mexico
- NM Competitive Scholarship
- Part-time Students
- Senior Citizen Waiver
- Summer Session
- Texas 135
- Veteran Waiver
- WRGP
- Western Undergraduate Exchange

WUE states include Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, North Dakota, Oregon, South Dakota, Utah, Washington, Wyoming and the Commonwealth of the Northern Mariana Islands. For more information about any of the above ways to qualify for lower tuition rates please contact the University Accounts Receivable Office or the University Student Records Office.

Contact Information

uar.nmsu.edu

Financial Aid & Scholarship Services

University Financial Aid and Scholarship Services administers a broad spectrum of grants, scholarships, work-study funds, and loans in an attempt to meet the financial need of NMSU students.

Students applying for financial aid must complete the Free Application for Federal Student Aid (FAFSA). Students must submit the FAFSA every year. The information reported on the FAFSA calculates the Student Aid Index (SAI). The SAI is an eligibility index number used to determine your eligibility for federal financial aid. The formula that establishes the SAI is instituted by law and is a result of the information provided on the FASFA.

NMSU uses the SAI to determine your financial aid award. Some college scholarships also require an SAI. All information provided to the University Financial Aid and Scholarship Services is confidential.

Students can begin applying for financial aid by submitting a FAFSA through **studentaid.gov (https://studentaid.gov/)**. Please refer to the NMSU-Las Cruces, Financial Aid and Scholarship Services web site for more information on awards and policies at **fa.nmsu.edu**.

General Eligibility Requirements

To receive financial aid you must be admitted to NMSU as a degree-seeking student in an eligible degree or certificate program and demonstrate that you are qualified to obtain an education by:

- Having a high school diploma or recognized equivalent such as a General Education Development (GED) certificate or
- Completing a high school education in a home-school setting approved under state law or
- Achieving a passing score on an independently administered ATB test approved by the Education Department as a student who first enrolled in an eligible program of study *prior* to July 1, 2012 without a high school diploma, recognized equivalent, or did not complete home schooling, and could continue to qualify based on completing 6 credit hours from that eligible program.
- Being a U.S. citizen or eligible noncitizen (state funded scholarships are available to undocumented students).
- Having a valid Social Security number. If you do not have a Social Security number, you can find out more about applying for one at ssa.gov (http://www.ssa.gov/).
- Meeting satisfactory academic progress (SAP).
- Signing a statement on the FAFSA certifying that you will use Federal student aid only for educational purposes.
- Certifying that you are not in default on a loan under any title IV or HEA loan program, and have not exceeded annual or aggregate loan limits, and you are not liable for grant overpayment.

Financial Aid Awards

All financial aid awards are based on information provided by the student and/or parents, availability of funds, and eligibility requirements. Any award may be revised based on changes in enrollment, cost of attendance, application for graduation, family contribution or satisfactory academic progress. Withdrawals or reductions in enrollment may affect an award or any future awards. Financial Aid will not pay for audited courses or some repeats.

Grants

The Federal Pell Grant is a federal grant available to undergraduate students with documented financial need. If the Pell Grant is insufficient to pay educational expenses, the student may be eligible to receive other types of aid, including a Federal Supplemental Educational Opportunity Grant (SEOG) or Leveraging Education Assistance Partnership Program Grant (LEAP), and/or other miscellaneous grants. These grants are offered to undergraduate students who demonstrate exceptional financial need. Funds are limited and are awarded based on need and the priority date. For more information, contact University Financial Aid and Scholarship Services or visit the university's financial aid website at: fa.nmsu.edu/. (http://fa.nmsu.edu/) Generally, grants do not have to be repaid.

Work-Study Programs

Work-study is a federal or state-funded financial aid program that provides funds for part-time employment to students. Students earn their semester work-study award through hourly pay within on-campus or academic-related jobs. These awards are based on early FAFSA submission, financial need as determined by FAFSA, and funding availability, so students are encouraged to apply before the March 1st priority deadline. Work-study jobs are a great opportunity for students to earn income and work within a professional career-oriented position. Students can apply for work-study positions using the NMSU Handshake application at **nmsu.joinhandshake.com/**. For more information on the U.S. Department of Education student aid programs, go to **studentaid.gov** or visit the NMSU Financial Aid web site at **fa.nmsu.edu**.

Scholarships and Other Aid

Many students finance part of their education with scholarships, which may be awarded for academic achievement, special skills, talent and/or based on the applicant's calculated financial need.

The NMSU System offers a variety of scholarships to incoming freshman, transfer, continuing and graduate students. State, institutional and private scholarships may also be available but amounts, deadlines and eligibility requirements vary. For more information, contact University Financial Aid and Scholarship Services or visit the university's scholarship web site at fa.nmsu.edu/scholarships (http://fa.nmsu.edu/scholarships/)

To be considered for most scholarships through the NMSU System you are required to apply online through Scholar Dollar$, at scholarships.nmsu.edu (https://scholarships.nmsu.edu/) each academic year. One scholarship application serves all students in the NMSU system, regardless of campus.

Federal Direct Subsidized Loans

This is a loan program for eligible undergraduate students who demonstrate financial need. The U.S. Department of Education pays the interest on a Direct Subsidized Loan while the student is enrolled in school at least half-time (six-credit hours).

All undergraduate students who borrow for the first time after July 1, 2013 are subject to a maximum-time period to receive Federal Direct Subsidized Loans. Students may not receive Federal Direct Subsidized Loans for more than 150% of the published length of their academic program (measured in academic years). A complete explanation of Subsidized Loan usage limits is available at: fa.nmsu.edu/loans/federal-direct-loans. (https://fa.nmsu.edu/loans/)

Federal Direct Unsubsidized Loans

Loans that are not need-based and offered to eligible undergraduate and graduate students. Unlike other federal loans, interest accrues while the student is attending school.

Federal Direct Loan Requirements

Students receiving a subsidized or unsubsidized Federal Direct Loan, must complete an online Entrance Counseling session and a Master Promissory Note (MPN) before NMSU will issue the funds. In addition, students are required to complete the Student Loan Acknowledgment every academic year. Once Federal Loan Borrowers graduate, or withdraw from the institution, they must complete the Exit Counseling to avoid delays in receiving their transcripts or diplomas. Students may complete all these requirements at studentaid.gov (https://studentaid.gov).

Repayment of a Federal Direct loan begins six months after graduation or six months after enrollment drops below half time (less than six credits for undergraduate students and less than 5 credits for graduate students).

Withdrawals

Recipients of financial aid grants and loans who stop attending class, drop credit hours, or withdraw may be required to return all or a portion of awarded Title IV funds. Further information regarding the Return of Title IV funds is available on the NMSU-Las Cruces web site at fa.nmsu.edu/return-of-title-iv-funds (https://fa.nmsu.edu/title-iv/).

Financial Aid Satisfactory Academic Progress

Federal regulations require that financial aid recipients meet certain academic standards to be eligible for federal aid. The NMSU Office of Financial Aid will review the Satisfactory Academic Progress of financial aid recipients at the end of each payment term/semester to ensure continued eligibility. When evaluating SAP, all enrollment periods are considered regardless of whether the student received financial aid during those terms. For transfer students, credits accepted for their NMSU-degree program are counted toward Maximum Timeframe, but the transfer GPA is not calculated in the cumulative GPA for the Completion Rate. The Financial Aid SAP standards are not the same as the NMSU System's Academic Standards of Progress criteria. Students may learn more by visiting **fa.nmsu.edu/sap.**

Elements of Financial Aid Satisfactory Academic Progress

- Federal regulations require all students receiving financial aid to meet minimum qualitative and quantitative standards in order to maintain their eligibility for aid. Below are the minimum standards for SAP. The qualitative component of SAP measures a student's academic achievement by their cumulative GPA. The quantitative component is comprised of two parts: Completion Rate and Maximum Timeframe. Below are the descriptions of each SAP standard:

  Grade Point Average (GPA)

- Undergraduate students must maintain a 2.0 cumulative GPA or greater on all hours attempted at NMSU. This is equivalent to an average letter grade of "C" or better.
- Graduate students must maintain a 3.0 cumulative GPA or greater. This is equivalent to an average letter grade of "B" or better.
- **Completion Rate: Pace of Progression**

- All students, both undergraduate and graduate are required to pass and complete 70% of all classes attempted.
- Grades of F, W, U, I or RR will be considered hours attempted but not completed.
- **Maximum Time Frame: Pace of Progression**
- Students must attain their degree within 150% of the published credits required for a degree program.
- Transfer-credit hours counted towards the student's degree program will be included in the maximum timeframe.
- Limited developmental coursework will not count in the maximum timeframe.

Financial Aid Warning

"Warning" is a status assigned to a student who fails to meet satisfactory academic progress at the end of the payment term/semester. A student on Financial Aid warning may continue to receive financial aid for one payment term while in this status. If the student has not returned to satisfactory standing after this additional semester, they will be suspended from further financial assistance until the satisfactory progress standards are met.

Financial Aid Suspension

Students who do not meet the SAP standards will be placed on Financial Aid Suspension. Students who have their financial aid revoked due to the failure to meet the SAP standards are ineligible to receive financial aid and are responsible for payment of their own tuition and fees. Students will remain on financial aid suspension until they are able to meet both the quantitative and qualitative SAP standards, or have an appeal approved by the campus' Financial Aid Office.

The Appeal Process

Students suspended from financial aid may appeal the suspension if there are extenuating circumstances affecting their progress. Students who would like to appeal the suspension must submit an appeal form, available at: fa.nmsu.edu (http://fa.nmsu.edu). They must also submit all supporting documentation to University Financial Aid and Scholarship Services.

A committee will review the appeal and may grant reinstatement of financial aid based on the extenuating circumstances that directly contributed to the deficient academic performance. To receive timely decisions from the committee, students are encouraged to submit appeals and supporting documentation by the priority date found at fa.nmsu.edu/sap (https://fa.nmsu.edu/sap/).

The Graduate School

New Mexico State University (NMSU) has a long history of providing formal graduate study. The first master's degree from NMSU was awarded in 1896. In 1921, the NMSU president appointed a committee to oversee graduate study. The Graduate School was formally established in 1956 with a full-time dean, and in the same year, 57 master's degrees were awarded.

The Graduate School mission is to provide affordable access to high-quality educational experiences, new modes of graduate education, and works with dedicated faculty to help students from diverse cultural and economic backgrounds reach graduate school success. Our vision is to empower students to succeed and excel while pursuing a meaningful education. In doing so, we cultivate the collaboration of academic, professional, and personal skills while helping students graduate in a timely manner.

Statement of an inclusive environment

NMSU is a proud land-grant institution that is one of the few high-research universities supporting the state's population. NMSU's graduate students come from an array of lived realities across the world that reflect rich national and international cultural identities. The Graduate School is committed to supporting students by ensuring equitable and inclusive practices that create opportunities for their success and their ability to thrive.

Policies

Since graduate degrees are awarded for attainment in scholarship, the requirements stated in this catalog are to be considered as minimal. The major department or the dean of the graduate school may make additional requirements as deemed necessary for each candidate. Responsibility for securing approval of the proposed degree plan rests with the student and is subject to the approval of the respective department head or program director. Frequent consultation with the advisor is essential to satisfactory progress toward degree completion.

Graduate Degree Programs

For a full listing of the Graduate Programs offered at New Mexico State University, please visit the future students page of our website: https://nmsu.edu/degree-programs/

Admission for Graduate Students

Formal application is required of all prospective students, including graduates of NMSU who seek admission to a graduate program. Current NMSU graduate students who are seeking to add a concurrent or secondary degree program such as a graduate certificate or master's degree on route to a doctoral degree must submit a new application. A student seeking admission to graduate school at NMSU must hold a minimum of a bachelor's degree or an advanced degree from an institutional accrediting entity. The academic program of the completed degree should be equivalent to a comparable NMSU degree's requirements.

Application materials:

- Students must submit a complete Application for Admission (https://apply.nmsu.edu/apply/).
- Other supplemental documents required by the academic department, may include but are not limited to, unofficial college transcripts, test scores (i.e., TOEFL, IELTS, Duolingo, GRE,

GMAT), statement of purpose, writing samples, and letters of recommendation.

Students must send official transcripts and official test scores from all prior colleges or universities previously attended directly to the Graduate School, if offered tentative admission.

No student is officially admitted into a graduate program until an official letter of admission has been issued by the Graduate School. The Graduate School considers the official letter of admission valid for a one-year period. Some academic departments may require re-application if the applicant does not enroll in the semester noted in the admission letter. A formal application is required for all admissions, including current graduate students who are seeking to add a concurrent or secondary degree program such as a graduate certificate or master's degree on route to a doctoral degree.

Categories of Graduate Students

A student seeking admission to a graduate program is assigned one of the following categories based upon previous academic performance. All graduate students must matriculate within coursework and programs of study which satisfy the c**ampus residency requirement**. **Click here** for complete regulatory information within the different programs of study:

Doctoral Regular

To be considered for admission to a doctoral program, an applicant must have a minimum grade-point average of 3.0 on a 4.0 scale. Some doctoral degree programs also require a master's degree or its equivalent. NMSU does not admit doctoral students on a provisional basis.

Master's Regular

An applicant whose scholastic record is satisfactory will be admitted as a regular student. The classification for a Master's Regular student includes:

1. An applicant whose grade-point average is at least 3.0 on a 4.0 scale.
2. An international applicant whose grade-point average (or its equivalent) is greater than or equal to 3.0 on a 4.0 scale, from a four-year bachelor's degree or its equivalent.
3. A continuing graduate student whose grade-point average is greater than or equal to 3.0 on a 4.0 scale.
4. A student with prior graduate work at another institution whose minimum grade-point average is 3.0 on a 4.0 scale.

Master's Provisional

An applicant whose scholastic record does not meet the Master's Regular standards can be admitted provisionally. Students admitted as a Master's Provisional include:

1. A transferring graduate student whose cumulative grade-point average is less than a 3.0 on a 4.0 scale.
2. Students whose grade-point average the last half of undergraduate work is less than a 3.0 but has a minimum grade-point average of 2.5 on a 4.0 scale.

A student admitted provisionally must complete their first three courses, a total of 9 credits of graduate work, with a minimum grade-point average of a 3.0. A provisional student who does not meet the 3.0 grade-point average after 9 graduate credits hours is subject to dismissal.

A student admitted on a provisional basis is prohibited from working as a Graduate Teaching Assistant or Graduate Assistant-Other. However, they may work as a Graduate Research Assistant or as a grader for one semester.

Master's Undeclared

An applicant that has not decided on a specific graduate degree program and has an undergraduate minimum grade-point average of 2.5 on a 4.0 scale may be considered for admission as an undeclared master student. International students with an F-1 visa are not eligible for undeclared master status.

Undeclared Student Enrollment Restrictions

- Undeclared students are restricted to enrolling in a maximum of 9 graduate credit hours. To continue enrollment the student must apply and be admitted into a degree-seeking program.
- Course restrictions placed by the graduate department may constrain enrollment by an undeclared student.
- An undeclared master's student is restricted to transferring 9 graduate credit hours to a degree program.
- Undeclared students are not eligible to receive any graduate assistantship position.

Only undeclared regular status students who meet all Title IV eligibility requirements are eligible to receive federal financial aid for one consecutive 12-month period beginning the first term of enrollment. For questions about financial aid, undeclared master's students should contact Financial Aid and Scholarship Services.

Transfers from Master's Undeclared to a Degree Program

Students transferring from an undeclared master's to a degree program must submit a new Application for Admission.

- If the student has 9 completed graduate credit hours, the cumulative minimum grade-point average must be at least 3.0 on a 4.0 scale for the application to be considered.
- If the student transferring to a degree program has fewer than 9 completed graduate credit hours their admission is based on their undergraduate GPA (between 2.50 to 2.99 is Master's provisional and 3.00 or greater is Master's regular).

Graduate Certificate Program Students

Graduate certificate programs are designed to develop specific skill training and enhance a student's expertise to meet employment needs locally, regionally, nationally, and globally. A graduate certificate is a focused collection of courses, consisting of 12-18 credits, in a given discipline or a set of related disciplines.

A graduate certificate is not an official graduate degree of NMSU. A student that successfully completes a certificate program at the graduate level will receive a certificate of completion statement on their official transcript and a formal certificate from the Graduate School. A student has three years to complete a graduate certificate program and must file their application to receive the graduate certificate during their final semester in order for the graduate certificate to be conferred.

The graduate certificate program is offered to both currently enrolled, degree-seeking students and students who enroll solely to obtain a certificate. Students currently enrolled in degree programs must apply separately to the graduate certificate program. Students wishing to enroll only in a graduate certificate program must meet all admissions criteria. Successful completion of a certificate program does not guarantee

admission into a graduate degree program. A student enrolled in a certificate program must apply and be accepted into a graduate degree program in order to continue matriculating as a graduate student. International students cannot be admitted *only* to a graduate certificate program.

A student enrolled in a graduate certificate program cannot transfer credits from another institution towards the completion of the certificate. However, transfer credits taken in a graduate certificate program may be applied towards an NMSU graduate degree program in the same focus area. The number of transfer credits will be determined by the program's degree audit. The time limit on transfer credits is 5 years after the completion of the certificate.

Students enrolled in a graduate certificate program *only* are not eligible for any type of graduate assistantship.

Master's Accelerated Program (MAP)

Master's Accelerated Program (MAP) provide the opportunity for academically qualified undergraduate students to begin working on a master's degree during their junior and senior years of undergraduate study. A graduate program has the discretion to use up to 12 credits of NMSU coursework (450/4500 level or higher) towards the completion of a master's degree. To be eligible for MAP, NMSU students must have a minimum GPA of 2.75 (Departments can require a higher GPA). MAP students must complete 60 credit hours of undergraduate work of which 25 credit hours must be completed at NMSU. To receive graduate credit for the 12 credit hours, students must receive a grade of B or higher. You can find more details about the MAP Policy and application process **here**.

Application Dates and Deadlines

Contact the graduate degree program for published application deadlines. If the graduate program does not publish a deadline, the Graduate School encourages the applicant to apply by March 15th for fall enrollment and by October 15th for spring enrollment to be considered for financial support. The Graduate School will continue to accept applications 30 days before the first day of classes. No application materials will be returned to the applicant.

Transcripts

An applicant is required to have one official transcript from each institution attended sent directly to the Graduate School.

If the applicant's undergraduate coursework is not complete at the time of application, they must submit an official transcript showing the completion of the course work directly after the degree has been granted.

Standardized Tests

Certain graduate programs may require standardized test scores for admission. An applicant may be required to take one or more of the following examinations as determined by the academic department: Graduate Record Examination, the Miller Analogies Test, or the Graduate Management Admission Test.

See academic department program description for required testing.

Readmission

An NMSU student who has been out of school for more than two consecutive academic terms is required to submit a formal application for readmission to NMSU. The application will be reviewed by the Graduate School and academic department. The application should be submitted at least 30 days before the start of the semester.

A student who has attended other institutions during their absence is required to submit official transcripts to the Graduate School before the date of registration and be eligible to return to the college or university last attended. Students' readmission status and academic standing will be determined by previous NMSU academic standing, taking into consideration their academic performance at other institutions during the applicant's absence from NMSU.

Renewal of Application for Admission

The admission credentials for an applicant who does not register for the semester admitted are retained at the Graduate School for a period of one calendar year from the date of application. At the end of this period, credentials are discarded. A student wishing to renew their application after the one-year lapse must submit a new application.

Denied Admission

The Graduate School or the department may deny admission if the scholastic record or prior degree program is judged inadequate. If denied admission by a specific academic department, the applicant may be eligible to seek undeclared status as described in Categories of Graduate Students. If denied by the department, the student may wish to contact the department for additional information.

Admission may be denied to an otherwise qualified applicant when the desired program lacks resources to accommodate additional enrollment.

A student who is denied admission to one program and wishes to be considered for another program must complete a new application for the second program and pay applicable fees.

Application documents are retained by the Graduate School for one calendar year.

Non-Degree Admission

Non-degree admission is designed to meet the needs of an applicant who does not wish to pursue a degree or who has not yet completed the application process to a specific department. No more than 9 graduate credits earned in non-degree status may be transferred to a graduate degree program. Academic advising for non-degree students is obtained from the academic department. NMSU only recognizes graduate credit transfers for non-degree work from the University of New Mexico (UNM). Transfer credit is restricted to 6 credits with the approval of the appropriate department, the college dean, and the graduate dean.

A student classified as non-degree is not eligible to receive financial aid, student employment, or institutional tuition waivers; to participate in student government or intercollegiate athletics; and to receive benefits from veterans' programs.

Visiting Student

A visiting student is a student taking graduate credit to transfer to his or her home institution. An Application for Admission to the Graduate School must be submitted 30 days before registration. The student is required to submit unofficial transcripts. The academic department admits a visiting student. Visiting students are not eligible for undeclared status or for graduate assistantships.

Out-of-State Students and Legal Jurisdiction

By applying for admission/enrollment, both the student and parents agree that New Mexico law prevails, and all litigation will be held in New Mexico federal court or state court in Dona Ana County, New Mexico.

Contact Information

Graduate School, MSC 3-GS
New Mexico State University
PO Box 30001
Las Cruces, NM 88003-8001
Phone: (575) 646-5746

gradinfo@nmsu.edu
http://gradschool.nmsu.edu/

International Graduate Students

A graduate international student must hold at minimum a four-year bachelor's degree or its equivalent and is able to demonstrate English proficiency, both written and oral by submitting an official Duolingo, IELTS, or TOEFL score report.

English Proficiency for Admission

Doctoral students must provide official proof of an English Proficiency minimum score as follows:

- TOEFL Internet-Based Test (iBT) 79 (For exams taken before Jan. 21, 2026) or 4 (For exams taken on or after Jan. 21, 2026)
- IELTS 6.5
- Duolingo 105

International students can be admitted into a master's degree program with lower English Proficiency scores, as follows:

- TOEFL 68 to 78 Internet-Based Test (iBT) (For exams taken before Jan. 21, 2026) or 3.5 (For exams taken on or after Jan. 21, 2026)
- IELTS 6.0
- Duolingo 95 to 104

Students with scores in this range are required to sit for the English Placement Exam prior to beginning academic coursework. If the results of the English Placement Exam do not meet the requirements for academic coursework, the student may be required to take additional academic English classes as part of the degree requirements (**ENGL 1105M** Introduction to Academic Writing For Multilingual Students and/or **ENGL 471 M** Scholarly Writing for International Graduate Students).

The university reserves the right to require any prospective international student to meet the TOEFL, IELTS, or Duolingo test requirement.

Enrollment

All international graduate students on F-1 or J-1 visas are required to comply with Department of Homeland Security regulations governing maintenance of status related to full-time enrollment and making normal progress toward completing a degree. Therefore, all international graduate students are required to enroll in 9 or more credits (exclusive of audited work) during fall and spring semesters. Only one online or distance learning class can count towards a full course of study for international students during each semester or term.

Transfer of Graduate Credits into a Degree Program

Graduate credits taken at NMSU as undergraduate electives may be transferred to the student's graduate program at NMSU. Graduate credits from another university may be transferred to NMSU, provided the credits were earned on the campus of an accredited institution. Transferred coursework (credit and hours) is maintained separately from NMSU coursework. Transfer credits must meet the same time-limit requirements (seven years) as graduate classes, including master's and doctoral coursework, at NMSU.

Immediately after initial enrollment in a graduate program, students must submit a Transfer of Credit request form from the Application Portal (https://apply.nmsu.edu/apply/status/) to obtain formal permission from their advisor, department head, and the Graduate School dean to transfer graduate-level course work. The department has the responsibility to accept or reject transferred credits depending on various conditions, such as the course credit fits logically into an NMSU degree program, accreditation requirements, level of course work, grades, and other conditions deemed relevant by the department. The department may also require work to be validated by examination or until the work done at another institution is proven by satisfactory work in residence. All graduate coursework, including master's level and doctoral, must be taken within the last seven years.

Special conditions:

- Graduate Certificates - Students enrolled in certificate programs may not transfer credits from another institution towards the completion of the certificate program offered by NMSU. However, they can transfer credits taken in a graduate certificate program at NMSU into a graduate degree program at NMSU, provided that the courses will lead towards a graduate degree in the focused area of the certificate program. The number of transfer credits will be determined by the degree audit. The time limit on course transfer is five years after the completion of the graduate certificate.
- Master's degree - A minimum of 30 semester graduate course credits is required for the master's degree. Master's programs involving a thesis include no more than six and no fewer than four credits of thesis. At least 15 credits for the master's degree must be for work in courses in the department in which the student was admitted. To meet residency requirements, master's students must take at least 50 percent of their required coursework at NMSU.
- Master of Fine Arts - Before consideration for candidacy, the department head and the graduate advisor will determine the number of transferable credits from a previous graduate program.
- Specialist in Education Degree - A maximum of 6 graduate credits earned at another approved institution may apply to the Specialist in Education degree. Transfer credits must have been earned during the five-year period prior to completion of the specialist in education degree.
- Doctoral degree - The doctoral degree requires significant scholarly study beyond the master's. The doctoral degree requires a minimum of 30 graduate course credits beyond the master's. If the Doctoral degree requires a dissertation, at least 18-credits of dissertation work must be included. The professional doctoral degree includes a practicum or special project that culminates in a written report which demonstrates a command of the relevant scholarly literature and links it to the specific clinical or practical experience. To meet residency requirements, doctoral students must take at least 50

percent of their required coursework at NMSU. Students may transfer course work that the departments deem as logically fits into the degree plan. Doctoral students must work closely with their program directors to understand the programmatic limitations on transfers of credit.

Funding Opportunities for Graduate Students

The Graduate School offers assistantships and scholarships to qualified graduate students. All awards require nominations from either faculty, Graduate Program Directors, Department Heads, or Deans. Continuing and newly admitted students can request the appropriate nominator as indicated above to nominate them for the Graduate School awards. The student must be admitted to the Graduate School before a request for an assistantship or scholarship will be considered by the department or the Graduate School.

In selecting individuals for any assistantship or scholarship and in the administration of appointments, New Mexico State University does not discriminate on grounds of age, ancestry, color, disability, gender identity, genetic information, national origin, race, religion, retaliation, serious medical condition, sex (including pregnancy), sexual orientation, spousal affiliation, or veteran status. The University limits the number of years a student may be supported on Instruction and General (I&G) funds from the state of New Mexico. Departments may place additional limitations on the years of support. For detailed information, application process, and deadlines please see the link, **here**.

Assistantships

Graduate assistantships, including teaching and research, offered by New Mexico State University, are awarded primarily by the students' academic department. Employment guidelines may be found at: **Guidelines on Employment for Graduate Assistants. Additional resources may be found at: Graduate Assistant Resources. Graduate assistantships are governed by the NMSU and United Electrical, Radio and Machine Workers of America - Collective Bargaining Agreement.**

Students with assistantships must maintain full-time status by enrolling in and successfully completing 9 credit hours each semester. Students must also maintain a 3.0 grade-point-average. Courses taken for audit do not count in the minimum graduate assistant course load requirement. Graduate assistants should take no more than 15 course credits per semester. During their first semester at NMSU, if course deficiencies are identified, the student can register for 3 undergraduate credits and a minimum of 6 graded graduate credits to be eligible for a graduate assistantship. The graduate assistantship duties typically require students to work 20 hours per week (full-time, fall, and spring).

Graduate Teaching Assistantships

A student seeking appointment as a Graduate Teaching Assistant will be required to demonstrate proficiency in communication skills necessary for satisfactory service in the classroom. All graduate students awarded a Teaching Assistantship must complete the online mandatory orientation offered by the Graduate School. Departments may require students to complete additional workshops or orientations to qualify for teaching assistantships.

Eligibility for teaching assistantships includes:

- Acceptance by and subsequent registration in the Graduate School and academic department,
- Classification as a "Regular" graduate student,
- Enroll in at least nine graded credit hours per semester, and
- Maintain a 3.0 grade-point average.

Teaching Assistantships for International Students

All international students seeking a teaching assistantship must demonstrate proficiency in English and competency in pedagogy. Prior to their first semester as a teaching assistantship, international students must undergo the NMSU International Teaching Assistant Screening (ITAS) administered by the NMSU English Department on behalf of the Graduate School. International graduate students wishing to hold a teaching assistantship should check with their department to determine when they should arrive on campus to meet the screening requirement. The ITAS can be waived for international students who hold a degree from an accredited university in the United States, or a country where English is the official language of instruction. Departments also have the discretion to allow waivers for special circumstances.

The ITAS requires that a teaching assistant candidate deliver a short, ten-minute teaching demonstration of an introductory undergraduate level course in a topic relevant to their area of studies. The demonstration is observed by English Department faculty and an undergraduate student. Based on the results of the screening, the English Department observers present a report of findings to the department head where the graduate student will be a teaching assistant. Students who pass the screening exam are immediately eligible for assignment to a teaching assistantship.

Those that do not pass the ITAS are required to enroll in and successfully complete course **ENGL 485 M (https://catalogs.nmsu.edu/search/?search=ENGL+485+M&fscaturl=%2Fnmsu%2F&gscaturl=%2Fnmsu%2F)** International Teaching Assistant Development. International Teaching Assistants are recommended to complete this requirement prior to their first teaching appointment. Students may be hired as a Research Assistant (RA) or GA-Other the semester, they are enrolled in **ENGL 485 M (https://catalogs.nmsu.edu/search/?search=ENGL+485+M&fscaturl=%2Fnmsu%2F&gscaturl=%2Fnmsu%2F)**.

Assistantships for Provisional Graduate Students

Graduate students accepted on a provisional basis cannot serve as Graduate Teaching Assistants or Graduate Assistant-Other. However, they can serve as Graduate Research Assistants. Eligibility includes:

- Acceptance by and subsequent registration in the Graduate School and academic department,
- Classification as a "Provisional" graduate student,
- Enroll in 9 graded credits with a minimum of 3.0 GPA, and
- Funded on research projects of the faculty of NMSU.

Provisional students can also be hired as graders for one semester. The department must hire the student as a Graduate Assistant-Other at the time of completing the hiring path, so that the student is allowed to work as a grader.

Assistantships and Scholarships

The Graduate School maintains a **Awards and Funding Information webpage** providing a database of assistantships and scholarships provided by the Graduate School. Most graduate assistantships offered by New Mexico State University are awarded by the student's academic department. Please contact your department of study to receive information on graduate assistantships and scholarships. The student must be admitted to the Graduate School before a request for an assistantship or scholarship will be considered by the department or the Graduate School.

The university limits the number of years a student may be supported on funds from the state of New Mexico. A student should check the **Guidelines on Employment for Graduate Assistants**. Departments may place additional limitations on the years of support.

Graduate Assistants Salaries and Tax Withholding Guidelines

Internal Revenue Service tax withholding guidelines require graduate students employed through NMSU to maintain at least 6 credits of course work during the fall and spring semesters and 3 credits of course work for summer sessions to be eligible for the student FICA tax exemption. Student employees who do not meet this requirement during any given pay period will be subject to Social Security taxes and Medicare taxes. Salaries for the three salary levels of graduate can be found **here**.

Level I (G1) - Applies to regularly enrolled students pursuing a master's degree. This level is also for a first-year student seeking a doctoral degree who does not currently hold a master's degree. Once the doctoral student becomes a second-year student and passes their qualifying exam, they can obtain support as a Level II (G2) student.

Level II (G2) - Applies to students pursuing the Education Specialist or Doctoral degree who have passed the qualifying exam or who have a master's degree. This also applies for a student who currently holds a master's degree and is entering another master's degree program.

Level III (G3) - Applies to a doctoral student who has passed the comprehensive examination and has advanced to candidacy.

Graduate assistants employed at least ten hours per week will be given in-state tuition during the first 12 months of tenure if the Graduate School approves of the hiring process prior to census date (stated by the University Student Records Office as the third Friday of the semester each spring and fall semester).

If New Mexico resident status has not been established by the time of any reappointment, the graduate assistant may be subject to non-resident tuition rates.

Information regarding applications for state residency may be obtained from the University Student Records website **here**.

Social Security Numbers in Student Records

As required by law, social security numbers are collected from prospective and current students who

1. Plan to seek employment on campus or
2. Wish to receive financial aid.
3. In addition, the university is mandated by federal tax regulations to provide tuition and fee payment information to the student and the Internal Revenue Service, so that applicable educational tax credits may be computed. The social security number will be necessary to submit this tax reporting. The social security number is a confidential record and is maintained as such by the university in accordance with the Family Educational Rights and Privacy Act.

In order to be employed by New Mexico State University all students must have obtained a social security number within eight weeks of being hired or risk losing their assistantship.

When an official social security number is issued to an international student, it is the student's responsibility to inform Human Resources or the University Student Records Office as soon as possible.

Hourly Work

Eligibility for student payroll requires that a graduate student

1. Be admitted to the Graduate School as well as to a department,
2. Maintain a minimum cumulative GPA of 3.0, and
3. Be enrolled for at least 9 graded credits.
4. A student may not work more than 20 hours per week during the academic year. Students looking for current job postings should check with Office of Experiential Learning here (https://oel.nmsu.edu/handshake/handshakeinfo.html).

Students not classified as residents of New Mexico but working at an hourly rate are not eligible to receive in-state tuition.

Contact Information

For more information, contact:

Graduate School, MSC 3-GS
New Mexico State University
PO Box 30001

gradinfo@nmsu.edu
http://gradschool.nmsu.edu/

Postdoctoral Fellowships

Those individuals who are exemplary scholars, who have recently been awarded a doctoral degree, but who wish to continue their education and research experience under the direction of a professor at New Mexico State University are classified as postdoctoral fellows. The postdoctoral fellowship is a regular professional appointment normally granted for one or two years. Under no circumstances will an individual remain in this classification for more than three years.

Postdoctoral fellowships are advertised by, and applications are submitted to the hiring department in compliance with the guidelines for hiring professional staff, but without the requirement for a position description questionnaire. An "E-Hire" staffing authorization request must be submitted to the office of Human Resources by the hiring department. No offer of employment may be made until approval has been given by Human Resources. Persons classified as postdoctoral fellows pay Social Security and make contributions to New Mexico State Educational Retirement.

A postdoctoral fellow has the following privileges:

- May take 6 credits in spring and fall semesters and 4 credits per summer session without tuition,
- Is eligible to purchase an employee parking permit,
- Is eligible for other employee benefits available to regular employees, including annual and sick leave, as well as health, dental, and life insurances
- May purchase athletic tickets, activity tickets, and gymnasium privileges
- Is eligible for library privileges

Research Facilities

The University recognizes and supports the concept of off-campus study and research as a valuable experience for graduate students. These experiences may take the form of internships, intensive study

of specialized techniques with personnel at other institutions, and the conducting of research at specialized research facilities. Arrangements for such off-campus activities should be made with the student's committee and the graduate dean and should represent opportunities not normally available at this university. When the bulk of a student's research is to be conducted off-campus, both on- and off-campus advisors should be appointed and periodic meetings with the student's committee held to ensure timely progress. Such opportunities offer students considerable flexibility in their training and promote valuable contacts between the student, the university, industry, and research institutions. Students are encouraged to pursue these opportunities with their advisors and the graduate dean.

Agricultural Experiment Station

The Agricultural Experiment Station is the research division of the College of Agricultural, Consumer and Environmental Sciences. Faculty, professional personnel, and graduate students conduct basic and applied research concerned with biological, physical, and economic phases of food and fiber production, processing, and distribution; consumer health and nutrition; and the social and economic aspects of rural living. Energy, environmental, and natural resource conservation aspects of these broad disciplines offer many opportunities for the graduate student to undertake meaningful research investigations in both the laboratory and the field.

There are eight academic departments on the main campus with excellent laboratory facilities for research. In addition, the station maintains 13 field research centers and laboratories including eight agricultural science centers, a forestry research center, a livestock research center, an animal insect lab, and two research ranches.

The station provides financial support to graduate research assistants and cooperates with research institutes at the university and with various state and federal agencies in providing opportunities for graduate research programs covering a wide scope of student interests. For further information, contact **aesdean@nmsu.edu** or visit **https://aes.nmsu.edu/**.

Analytical Geochemistry Research Laboratory

The Department of Geological Sciences houses a number of analytical instruments, all of which are available for use by graduate students, undergraduate researchers, and faculty. The department houses a Laser-Ablation Multi-Collector Inductively Coupled Plasma Mass Spectrometer (LA-MC-ICPMS) for analysis of isotopic ratios of microsamples, an X-ray fluorescence spectrometer for geochemical analysis of rocks and other solid materials, a thermal ionization mass spectrometer for analysis of isotopic ratios of solids and liquids, and a laser-induced breakdown spectrometer for the analysis of solid materials. Sample preparation equipment is available to support research on these instruments. In addition, mineral separation equipment including a jaw crusher, Gemini shaker table, Franz magnetic separator, and heavy liquids, is available for geochronologic or other mineralogic research projects.

Contact: Dr. Nancy McMillan (**nmcmilla@nmsu.edu**)

Apache Point Observatory-Astrophysical Research Consortium (APO-ARC)

Apache Point Observatory (APO) is located in the mountains of south-central New Mexico and is operated by New Mexico State University. The observatory is a major astronomical research facility that is home to four telescopes. The largest is a fully equipped 3.5-meter telescope that can be used for optical and infrared imaging, photometry, and spectroscopy. Apache Point Observatory is also the site of the Sloan Digital Sky Survey 2.5-meter telescope, which is running several different wide-field surveys touching on many facets of astronomy. NMSU owns and operates a 1-meter telescope at APO for wide field imaging. There is also a 0.5-meter telescope at the site.

Apache Point Observatory is owned by the Astrophysical Research Consortium (ARC). The consortium members include New Mexico State University, the University of Colorado - Boulder, the University of Oklahoma, University of Wyoming, University of Virginia, the University of Washington, Georgia State University, Brigham Young University, and Johns Hopkins University. NMSU manages and operates the observatory for the ARC consortium. Astronomy faculty and graduate students use the facility for various research projects. For further information, e-mail **astro@nmsu.edu**.

Arts and Sciences Research Center

The research center is the coordinating office for all scholarly activities within the College of Arts and Sciences. The primary functions are service to departments and faculty members, and the administration of grants and contracts. The center encourages and stimulates individual research and creative efforts in all areas of the college, and it facilitates the development of potential research programs within the college, and with other colleges, institutes, the Physical Science Laboratory, and external organizations. The center assists individual faculty members by providing small grants of "seed" money. Typically, support services fall within, but are not limited to, the following areas:

- Location of funding sources
- Administration of grants and contracts
- Financial management of grants and contracts
- Liaison with the Office of the Vice President for Research

Contact: Dr. Michele Shuster, Associate Dean, Research (**mshuster@nmsu.edu**)

For further information, see: **https://artsci.nmsu.edu/faculty-and-staff/research-center.html**

Bioinformatics Research Lab

The bioinformatics research lab develops efficient computational and statistical methods to model mechanisms of complex biological systems. The lab's work rigorously evaluates both the theoretical and practical effectiveness of computational methods for characterizing molecular interactions from high-throughput measurements such as next generation sequencing data. The lab's long-term goal is to invent advanced computational technology to expedite quantitative understanding of the complexity of life processes.

Contact: Dr. Joe Song (**joemsong@nmsu.edu**)
For further information, see: **https://www.cs.nmsu.edu/~joemsong/group.shtml**

Biology Research Facilities

The Department of Biology houses multiple core facilities and individually faculty-maintained research laboratories that have been successful in the acquisition of millions of dollars in research grants from the NIH, NSF, and other agencies. The facilities and equipment include cell culture facilities, insect and invertebrate rearing and microbiology culturing facilities, next generation DNA sequencing instruments, wide-field and confocal microscopes as well as a well-maintained herbarium and vertebrate museum holding more than 100,000 specimens from our region and beyond. Individual research laboratories are equipped

to employ a diverse array of molecular, physiologic, behavioral, and computational tools to address research questions related to organismal and microbial evolutionary mechanisms and physiology; vaccine development; host-symbiont interactions; cell and developmental biology; neuronal and muscular tissues; animal vocalization and behavior; computational modeling of biological phenomena; and molecular systematics.

Contact: Dr. Charles Shuster (**cshuster@nmsu.edu**)

Bureau of Business Research and Services

Founded in 1969, the bureau has two basic objectives. The first is to provide business and economic research services to both public and private sectors of the state, the region, and the nation. Research capabilities in the behavioral and managerial sciences, business systems, economic and social sciences, marketing, statistical design and analysis and regional planning can be applied to problems relating to economic growth, business development, and community needs in New Mexico.

The second objective of the bureau is to provide management training services to business organizations and associations, to government agencies, and to the public as well. Management development seminars, training programs, and analytical services are designed to meet specific organizational needs.

The Bureau of Business Research and Services is a member of the Association for University Business and Economic Research. For more information, see: **https://business.nmsu.edu/research-centers-and-programs/centers/bbrs/bureau-of-business-research-and-service.html**.

Center for Excellence in Sustainable Food and Agricultural Systems (CESFAS)

The Center for Excellence in Sustainable Food and Agricultural Systems (CESFAS) is a state-funded research institute in the College of Agricultural, Consumer, and Environmental Sciences. CESFAS goal is to advance sustainable agriculture through interdisciplinary research with contributions from researchers from animal, food, plant, and social sciences in partnership with industry to develop new knowledge and technologies for New Mexico.

Contact: Dr. F. Omar Holguín (**frholgui@nmsu.edu**)

For more information, see: **https://aces-cesfas.nmsu.edu/**.

Center for Latin American and Border Studies

The Center for Latin American and Border Studies (CLABS) was established in 1979 by the College of Arts and Sciences through generous grants from the Nason Family and other sources and is located at the Nason House. CLABS supports the collection at the NMSU library, travel for faculty to conferences, language training in Spanish and Portuguese, lectures by visiting speakers, curriculum development for teachers, the student Latin American organization, and other outreach activities. It has a faculty governance organization and helps administer the Nason foundation fund. In recent years, the center has pursued an active program of research on U.S.-Mexico border policy issues, in cooperation with several universities in the United States and Mexico.

Contact: Dr. David Ortiz (**dgortiz@nmsu.edu**)

For more information, see: **https://clabs.nmsu.edu**

Chemistry and Biochemistry Research Facilities

The Department of Chemistry and Biochemistry has a comprehensive equipment base that supports research in nearly all phases of chemistry. It also has instrumentation dedicated to the department's teaching mission. Major instruments supporting both missions include five nuclear magnetic resonance (NMR) spectrometers ranging from low field (200 MHz) to high field (500 MHz), two atomic absorption spectrometers, several UV-Vis spectrometers, two mass spectrometers (LC/MS) and four gas chromatograph instruments. Details about all instruments located in the department's facilities can be accessed at **https://chemistry.nmsu.edu/research/research-facilities.html**.

Contact Instrumentation Facilities: **chembche@nmsu.edu**

Cooperative Extension Service

As a land-grant institution, New Mexico State University has a tripartite mission—instruction, research, and extension. The three parts of this mission are closely interrelated and mutually reinforcing. New Mexico State University's Cooperative Extension Service serves a unique role in New Mexico. As the state's land-grant university, and as mandated by its charter, it is the "leading object" for agriculture, home economics, engineering, business, health sciences, as well as educational programs in the liberal arts and natural sciences. NMSU's uniqueness arises from its vision of teaching/learning, research, and extension/outreach functions—interdependent, mutually supportive, and central to its land-grant mission.

The extension aspect of the university's mission is the process of extending the intellectual expertise and resources of the university through teaching and applied research to address the social, civic, economic, and environmental challenges and opportunities facing our state, region, nation, and global community. Extension entails an organized and planned program of activities; these activities bring the resources of the university to bear in a coherent and strategic fashion for the benefit of the citizens of New Mexico and the nation. Many faculty have split appointments with the Agricultural Experiment Station and serve as graduate advisors for students interested in extension as a career. For more information, see: **http://extension.nmsu.edu/**.

Crimson Research

Crimson Research is designed to assist researchers, agency directors, business leaders, and policy makers in all aspects of survey research and program evaluation. Housed in the College of Health, Education, and Social Transformation, the Center has state-of-the-art hardware and software for conducting phone and internet surveys of any type and length as well as facilities for conducting face-to-face interviews and focus groups. Crimson Research provides a wide array of services: questionnaire design, sampling, data collection, and statistical analysis for telephone, mail, and internet surveys. Center staff are also able to assist and conduct all forms of program evaluation from formative to summative approaches, including process, outcome, and impact evaluations. Bilingual (Spanish/English) questionnaire translation and interviewing are also available.

Contact: Dr. Joe Tomaka (**tomaka@nmsu.edu**)

For more details, see: **https://publichealth.nmsu.edu/research_and_outreach/crimson_reasearch.html**.

Engineering Research Centers

The mission of the College of Engineering's Engineering Research Centers (ERC) is to support the faculty and staff of the college in

building research programs of nationally and internationally recognized excellence. The ERC assist faculty and staff in their pursuit of research funding, management of their research, and in ensuring research activities are in compliance with all relevant laws and regulations.

The ERC disseminates information to the college regarding state, national and international research trends, programs, and policies. The ERC identifies potential funding opportunities and calls for proposals that may be a fit for college faculty and staff. The ERC works with the Office of the Vice President for Research and the other NMSU colleges to bring together multi-disciplinary teams.

Engineering Research Center consists of: Center for Bio-Mediated and Bio-Inspired Geotechnics (CBBG), Carlsbad Environmental Monitoring & Research Center (CEMRC), Interdisciplinary Center of Research Excellence in Design of Intelligent Technologies for Smart Grids (iCREDITS), National Alliance for Water Innovation (NAWI), New Mexico Produced Water Resource Network (NMPWRC) , Re-inventing the Nation's Urban Water Infrastructure (ReNUWIt), Southwest Technology Development Institute (SWTDI), and Transportation Consortium of South-Central States (Tran-SET).

For proposal preparation, the Office of Engineering Research (OER) pre-award team assists the faculty with interpretation of sponsor guidelines, development of the proposal budget, completion of standardized forms, review of the proposal for adherence to sponsor requirements, and submission to the NMSU Office of Research Administration Services (RAS) for their review and final submission. The post-award staff assist the faculty and staff with award management, including working with the NMSU Sponsored Projects Accounting office. The ERC is responsible for financial management of college grants and contracts.

Contact: Dr. Satyajayant "Jay" Misra (misra@nmsu.edu)

For more information, visit: **https://engr.nmsu.edu/Research/page-five.html**

Food Safety Laboratory

The laboratory was founded in 2007 and is comprised of three primary functional research units:

1. Chemical Analysis and Instrumentation Laboratory maintains high-end analytical instrumentation, which is available to support collaborative research within NMSU, the State of New Mexico and other educational or industrial partners.
2. Food Safety Microbiology Laboratory specializes in research and development of foodborne pathogen detection and control; food product testing, including microbiological analyses, pH, aw; process evaluation of acidified foods, inoculation studies, shelf-life testing, and contracting to establish food safety plans (e.g., HACCP plans, *Listeria* control programs).
3. Veterinary Entomology Research Laboratory provides a state-of-the-art large animal research facility located on 45 acres, with a 5000 sq. ft. large animal laboratory, capable of housing 24 animals individually in environmentally controlled rooms. The laboratory maintains multiple insect rearing facilities for major ectoparasites including house flies, stable flies, horn flies, face flies, mosquitoes, lice, mites, and ticks. The facility has outdoor housing for 60 large animals in covered, individual outdoor stanchions, in addition to housing for wildlife species including: deer, elk, bighorn sheep and rabbits.

For further information, see: https://fsl.nmsu.edu/.

Director: Dr. Luis Sabillón (lsabillo@nmsu.edu)

Knowledge Discovery and Data Mining (KDD) Research Laboratory

The Knowledge Discovery and Data Mining (KDD) research laboratory aims at advancing techniques for the effective management and analysis of complex data (e.g., sequence data, graph data, semi-structured data). The laboratory conducts research in modeling, storing, querying, and mining large amounts of complex data at both theory and application levels. The laboratory keeps active collaborations with scientists from other Computer Science areas and scientific disciplines to broaden the usage of data management and data mining techniques. The laboratory is located in Science Hall, Room 153.

Contact: Dr. Huiping Cao (**hcao@nmsu.edu**)

For more information, see: **https://kddlab.nmsu.edu/**

Networks and Systems Optimization Lab (NSOL)

The Networks and Systems Optimization Laboratory (NSOL) supports research in networking and communication including, but not limited to wireless networks, the Internet, supercomputing networks, and online social networks. This research includes optimization problems, protocol design and development, hardware design and development, and mechanisms for improving security and privacy of communications (including cybersecurity). The lab has a 24-core blade server (RAID-10) that is used for extended simulations and back-up, five desktops, five laptops, and four smartphones, which form a networking testbed.

For more information, visit: **https://computerscience.nmsu.edu/research/groups-labs.html**

New Mexico Department of Agriculture

The New Mexico Department of Agriculture (NMDA), under the control of the NMSU Board of Regents, is responsible for administering laws and regulations that daily affect the lives of every citizen of the state. These laws and regulations (concerning the production, preparation, processing, sale, and use of agricultural products; weights and measures; and petroleum products) are designed to assist producers, processors, and consumers. NMDA's marketing program provides guidance to commodity groups in the promotion of agricultural products. A broad consumer service in many areas other than agriculture is provided by the department. NMDA's director is New Mexico's secretary of agriculture and serves on the governor's cabinet as a liaison between state government and the agricultural industry. For further information, e-mail: nmagsec@nmda.nmsu.edu. NMDA's web site is at **http://www.nmda.nmsu.edu**

New Mexico State University Library

The New Mexico State University Library is a Destination for Discovery that offers access to rich content and research-level collections in two library facilities located in the heart of the campus. Zuhl and Branson libraries house over 1.8 million items and provide electronic access to scholarly journals and databases for both general academic and discipline-specific research. View the large geological collection and artworks on display at Zuhl Library and explore historical collections within the Archives and Special Collections Department at Branson Library. Reference assistance and research support are provided by a team of faculty and staff dedicated to student learning and success. There are a variety of study areas available including quiet and group spaces, some of which can be reserved. Over 100 PCs, scanners, laptops,

and other resources are available for students to use. More detailed information may be found at **http://lib.nmsu.edu**.

New Mexico Water Resources Research Institute

The New Mexico Water Resources Research Institute (WRRI) at NMSU, established in 1963, was one of the first of 54 water institutes in the United States. The WRRI program encompasses all state universities in New Mexico and public agencies sponsoring water research. The institute serves as a coordinator, assisting researchers in obtaining funds, working with granting agencies, and serving as the administrator for projects. The annual budget of approximately $1.5 million is made available from federal, state, and/or private sources through a variety of grants and contracts. All research projects administered by the institute encourage graduate student participation. As a result, about 30 students a year receive scientific training through institute-sponsored projects. WRRI also sponsors the Annual New Mexico Water Conference, which has provided a public forum for state water issues since 1956. Public participation helps the institute focus its research program on areas of greatest need. The WRRI publishes research results of every project it administers and other miscellaneous reports. The WRRI also maintains a water resources reference room with 2,000 books and documents and the ability to link to 10,000 water-related documents on water issues facing the state and the nation. E-mail may be sent to **nmwrri@nmsu.edu**. The WRRI's homepage address is **http://nmwrri.nmsu.edu/**.

Oak Ridge Associated Universities Program (ORAU)

Since 1991, students and faculty of New Mexico State University benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of more than 150 sponsoring institutions and 26 associate members and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship, and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOE facility that ORAU operates, undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the ORISE Catalog of Education and Training Programs, which is available at **http://www.orau.org**.

ORAU's Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU's members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research, and support programs as well as services to chief research officers.

For more information about ORAU and its programs, contact:

Dr. Patricia Sullivan, Interim Vice President for Research, Creativity and Economic Development, vpr@nmsu.edu, (575) 646-3771.

ORAU Research & University Partnerships (865) 576-6513; or visit the ORAU Home Page at: **http://www.orau.org**.

Physics Research Facilities

The Department of Physics operates a PANalytical Empyrean x-ray diffractometer for low-resolution powder diffraction, high-resolution diffraction, reciprocal space mapping with a triple-axis crystal, and x-ray reflectance. It also operates a J. A. Woollam variable angle of incidence ellipsometer (VASE) with a computer-controlled Berek waveplate compensator for measurements from 190 to 2500 nm, at room temperature and from 80 to 800 K. Both instruments are available to the campus community and off-campus users for a fee. See **https://phys.nmsu.edu/research/research-programs.html** for more information.

Contact: Dr. Stefan Zollner (**zollner@nmsu.edu**).

Programming Languages Environments and Software Engineering (PLEASE) Laboratory

The PLEASE lab pursues research in the practical aspects of software development, including programming languages, programming environments, and software engineering. The laboratory is housed in Science Hall 167 and includes workstations and workspace for graduate students pursuing research in relevant areas.

Contact: Dr. Jonathan Cook (joncook@nmsu.edu)

For more information, see **http://www.cs.nmsu.edu/please**.

Psychology Research Facilities

The Department of Psychology emphasizes research in social psychology, engineering psychology, and cognitive psychology. Faculty investigate such issues as mother-infant interactions and the impact of cortisol responses to stress upon development; visual search; human factors research; auditory perception; prospective memory; emotion and social decision-making; evolutionary psychology; skill acquisition; social cognition; perception and action; embodied cognition; cognitive neuroscience (control of attention, neural dynamics; and brain-computer interfaces); and research and statistical analysis methods.

All faculty have designated labs with a large central area and 3-4 smaller adjacent rooms. This facilitates data collection from small groups or individuals. Research using the department's subject pool is managed with an online system.

The department has specialist facilities that include an EyeLink 1000 eye tracking system with experiment builder software; two 128 channel Biosemi ActiView-2 EEG systems and two shielded rooms; eight analysis workstations; and a Neuroconn DC Stimulator Plus tDCS stimulator. The lab collaborates with the Mind Research Network that has access to a Siemens 3T Trio research MR scanner, a Magvis 132 channel MEG system, and Biosemi and Geodysics EEG systems. The Auditory Perception Lab has a remote-controlled robot with binocular vision and stereo audition that is used to assess auditory performances in applied settings; another remote-controlled robot to test perceptual interfaces for remotely-operated vehicles; a 30-element speaker array to simulate real-world auditory environments; and two portable eye trackers housed in the PACMANE (Perception, Action and Cognition in Mediated, Artificial and Naturalistic Environments) lab.

For more information: **https://psychology.nmsu.edu/**.

Research Cores Program

The Research Cores Program is a campus-wide, core facility providing all levels of technical support and consultation for investigators needing analytical and routine transmission, scanning electron microscopy, and light microscopy services. The integrated imaging facility is administered through the Office of the Vice President for Research and is considered a core research facility. The facility was established to furnish state-of-the-art microscopy instrumentation and techniques and other infrastructure facilities to investigators and their students for research and training.

Research Initiatives in the College of Health, Education, and Social Transformation

The College of Health, Education, and Social Transformation (HEST) has research initiatives and laboratories in the following areas:

- The Kinesiology Department offers laboratory space for the study of biomechanics, sport psychology & motor learning, applied and basic physiology, healthy aging, physical education curriculum, and kinesthetic learning.
- The Speech and Hearing Center's Benfer for voice and speech science research.
- The Special Education unit and Communication Disorders Department's Autism Research Initiative.
- Alliance for the Advancement of Teaching and Learning in collaboration with the Southwest Regional Educational Lab REL (Institute for Educational Services, IES) provides research for partner school district practitioners on accountability, special education/ response to intervention, literacy, leadership development, math and science achievement, and program evaluation.
- The Institute for Mathematics and Science Education oversees multiple mathematics and science grants as well as serving as the STEM Outreach Center for K-12 education.
- The Counseling and School Psychology Training and Research Center provides counseling services for students, training for graduate students in counseling, school psychology, and counseling psychology, and conducts research on counseling outcomes and processes.
- A Reading Research Center is housed in the NMSU Children's Village and provides reading diagnostic services including analysis of reading using eye-tracking software.

Southwest Institute for Health Disparities Research

To address the substantial health disparities that exist in Southern New Mexico and the U.S./Mexican Border Region, New Mexico State University has recently established the Southwest Institute for Health Disparities Research within the College of Health Education, and Social Transformation. The purpose of the Institute is to assist faculty to secure external funding and conduct research which has the potential to reduce health disparities and improve minority health, provide health related community outreach programming, provide training for researchers, lay groundwork for additional funded research, and attract highly qualified minority faculty and graduate students to NMSU.

Contact: Dr. Jill A. McDonald (**jillmcd@nmsu.edu**)

For more details, see: **https://swihdr.nmsu.edu**.

Spatial Applications and Research Center (SpARC)

The SpARC laboratory was established in 1982 as an applied contract research laboratory for the NMSU Geography Department. SpARC provides a variety of services including planning and research, GIS, image processing, modeling, and training. The original purpose of the laboratory was to undertake externally funded projects under the direction of geography faculty and employ students within the department. Thirty-four years later, the laboratory continues to do project related work. It has employed more than 150 students and provided assistance to more than 35 faculty members inside and outside the Geography Department. The primary clients of the lab have been federal state and local government agencies, with an emphasis on applied transportation, water resource, and environmental research projects. The laboratory houses 11 high performance workstations, a range of mapping grade GPS units, and a large scanner/plotter. Software available for use includes database software, ENVI image processing software, TransCAD, and the entire suite of Esri GIS software. For more details, visit: **http://smiley.nmsu.edu/SparcWebsite/BGIS2Index_2012.html**

Contact: Dr. Christopher Brown (**brownchr@nmsu.edu**)

University Museum

Established in 1959, the New Mexico State University Museum has provided over 65 years of service to the university and community. The University Museum assists NMSU in providing quality education, advancing knowledge through research, and celebrating the culture and history of the southwest and the University. The Museum serves the community as a repository and exhibitor of local and regional history and culture. Through its care and maintenance of donated ethnographic, historic, and prehistoric objects, it preserves an important part of Southwestern and Border region culture and history. The Museum encourages faculty and student research using our diverse cultural materials.

The Museum's collections are primarily anthropological (archaeological and ethnographic) with secondary collections in history and the natural sciences. Anthropological collections document the cultural diversity of the border in the Greater Southwest and northern Mexico. The Museum preserves and catalogs collections to promote research and access to cultural materials. Exhibits are developed by students and staff as well as brought in from other institutions.

Director: Dr. Kelly Jenks (**kljenks@nmsu.edu**)

Curator: Dr. Heather Para (**hpara@nmsu.edu**)

Advanced Manufacturing - Concentration

The graduate concentration in advanced manufacturing educates students and creates a skilled workforce for the growing needs of new technologies and advanced products in the 21st century. The program provides hands-on experience on designing, adapting, and building parts using advanced materials by including new processes, changing the supply chain, and adapting business models. It also includes the design optimization, materials selection and characterization, process parameter mapping, data analytics, software development, and final part inspection among other concepts. This concentration is maintained by the College of Engineering but is open to any Master's level major/degree.

Prefix	Title	Credits
Required Courses		
I E 575	Advanced Manufacturing Processes	3
I E 571	Advanced Quality Control	3
C E 510	Introduction to Nondestructive Testing	3
CHME 564	Polymer Science & Engineering	3
CHME 491/AGRO 450	Undergraduate Special Topics (AGRO 450 CHME 491 Development of Agricultural Technologies)	3
Electives		
5 Electives (Select 500 Level Courses from EE, CHME, IE, CE, or MAE) [1]		15
Total Credits		**30**

[1] With Approval of the advisor and instructor

Selection of Advisor

Newly admitted graduate students will be assigned a temporary advisor for the first semester, but they must select a degree option and permanent advisor before registering for the second semester.

In considering a decision about option and advisor, the student should arrange to meet with several members of the graduate faculty during the first six weeks of study to discuss specific educational objectives. The student can use these meetings to become familiar with faculty interests and research projects currently in progress. The faculty member must agree (in writing) to serve as the student's advisor.

Although there is no oral exam, students will be required to complete an exit-interview with one of Advanced Manufacturing concentration and one graduate faculty member from the master of engineering they select to study.

Doctoral Degrees

A

- Aerospace Engineering - Doctor of Philosophy (p. 200)
- Animal Science - Doctor of Philosophy (p. 200)
- Applied and Agricultural Biology - Doctor of Philosophy (p. 201)
- Applied Statistics - Doctor of Philosophy (p. 203)
- Astronomy - Doctor of Philosophy (p. 204)

B

- Biology - Doctor of Philosophy (p. 208)
- Business Administration (Management) - Doctor of Philosophy (p. 208)
- Business Administration (Marketing) - Doctor of Philosophy (p. 209)

C

- Chemistry (Biochemistry) - Doctor of Philosophy (p. 210)
- Chemistry - Doctor of Philosophy (p. 210)
- Computer Science - Doctor of Philosophy (p. 210)
- Counseling Psychology - Doctor of Philosophy (p. 211)
- Curriculum and Instruction - Doctor of Philosophy (p. 213)
- Curriculum and Instruction - Doctor of Philosophy (Online) (https://catalogs.nmsu.edu/global/nmsu-global/curriculum-instruction-phd-online/)

E

- Economic Development - Doctor of Economic Development (p. 214)
- Education (Language, Literacy & Culture) - Master of Arts (p. 148)
- Educational Leadership & Administration (Higher Education Administration) - Doctor of Education (p. 215)
- Educational Leadership & Administration (Higher Education) - Doctor of Philosophy (p. 216)
- Educational Leadership & Administration (Pk-12 Administration) - Doctor of Education (p. 217)
- Educational Leadership & Administration (Pk-12 Education) - Doctor of Philosophy (p. 218)
- Engineering (Chemical Engineering) - Doctor of Philosophy (p. 219)
- Engineering (Civil Engineering) - Doctor of Philosophy (p. 220)
- Engineering (Electrical Engineering) - Doctor of Philosophy (p. 221)
- Engineering (Industrial Engineering) - Doctor of Philosophy (p. 223)
- Engineering (Mechanical Engineering) - Doctor of Philosophy (p. 224)
- Experimental Psychology - Doctor of Philosophy (p. 225)

F

- Food Science - Doctor of Philosophy (p. 225)

G

- Geographic Information Science and Technology - Graduate Minor (p. 257)
- Geography - Doctor of Philosophy (p. 226)

H

- Health Equity Sciences - Doctor of Philosophy (p. 228)

K

- Kinesiology - Doctor of Philosophy (p. 229)

Accounting - Master of Accountancy

The Master of Accountancy program (MAcc) is recommended for students wishing to fulfill the Certified Public Accountant (CPA) 150-hour education requirement which most states, including New Mexico, have adopted.

Admission Requirements

Admission requirements of the NMSU Graduate School must be met before the applicant may be admitted to the Master of Accountancy program.

Consideration for admission to the Master of Accountancy program is dependent on an applicant's undergraduate record. The Graduate Management Admissions Test (GMAT) is also required, unless the student meets one of the GMAT waiver conditions listed below:

1. The student graduated with an undergraduate degree in accounting from a US AACSB accredited business school with at least a 3.25 GPA overall and a 3.25 GPA in their upper division accounting courses; or
2. The student is a graduate of NMSU's undergraduate accounting program with at least a 3.25 GPA overall and a 3.0 GPA in core upper division accounting classes; or
3. The student holds a recognized professional accounting credential (such as a CPA, CMA, CIA, CFE); or
4. The student holds a post baccalaureate degree (such as an MBA, MS, MA, JD) from an approved, US AACSB-accredited university with a minimum 3.0 GPA in graduate course work.

In addition to the aforementioned entrance requirements, an applicant's GPA in accounting prerequisites must be at least 3.0. For those students not receiving their undergraduate accounting degree at NMSU, it is expected that substantially all of the accounting prerequisite classes be from a **US AACSB accredited business school** or the application will need to be approved by the Master of Accountancy Admissions Committee. In this case the Admissions Committee may require that some of these prerequisite courses be retaken at an US AACSB institution such as NMSU.

Accounting Prerequisites (18 Credits)

Each applicant must complete, at a minimum, the following 18 credits of accounting courses from a US AACSB accredited business school prior to being considered as a candidate for the Master of Accountancy degree:

Prefix	Title	Credits
ACCT 2110	Principles of Accounting I	3
ACCT 2120	Principles of Accounting II	3
ACCT 301	Financial Accounting I	3
ACCT 302	Financial Accounting II	3
ACCT 403	Federal Taxation I	3
ACCT 451	Auditing Theory and Practices	3
Total Credits		**18**

No coursework applied toward the MAcc degree, including the prerequisite requirements, may be taken on an S/U basis.

Master of Accountancy Requirements

Candidates with an undergraduate degree in accounting must successfully complete a minimum of 30 graduate credits. Candidates with an undergraduate degree in a field other than accounting must complete additional prerequisites upon previous courses taken.

Prefix	Title	Credits
Required Courses (9 credits)		
ACCT 555	Federal Tax Research [1]	3
or ACCT 564	Financial Accounting Research	
ACCT 559	Ethics and Professionalism in Accounting	3
ACCT 510	Technical and Professional Communication for Accountants	3
Electives in ACCT from the following for a total of 5 courses (1 course may be from upper division Accounting courses numbered 450-498) (15 credits)		
ACCT 530	Advanced Accounting	3
ACCT 544	Financial Statement Analysis and Valuation	3
ACCT 551	Advanced Auditing Theory and Practice	3
ACCT 560	Taxation of Corporations and Shareholders Advanced	3
ACCT 580	Professional Accountancy	3
Other Courses for a total of 2 courses (6 credits approved by MAcc Program Director)		
Elective 1		3
Elective 2		3
Total Credits		**30**

[1] If an accounting research course is not used to fulfill the research requirement, a student may take the course to fulfill an elective requirement.

MAcc Courses

Each student must complete 21 credits in accounting courses numbered above 520. These courses must include a research class (either ACCT 555 Federal Tax Research or ACCT 564 Financial Accounting Research) and Ethics in Accounting (ACCT 559 Ethics and Professionalism in Accounting). In addition, three of the credits may be in upper division undergraduate elective accounting courses numbered 450 or higher. Other specific courses to be completed by each candidate will be determined in the advisement process.

Other Courses

All students must also complete a total of 9 credits in other courses. Three of the credits must be ACCT 510 Technical and Professional Communication for Accountants, and the rest must be approved electives. Neither ACCT 503 Accounting for Managers nor any course fulfilling the foundation requirement may be included. Any student wishing to be waived from any of the above requirements may submit a petition in writing to the MAcc Director. Each request will be considered individually by the Master of Accountancy Committee.

Comprehensive Examination

There is no comprehensive examination requirement. However, satisfactory performance on a graduate portfolio assignment is a requirement for completing the Master of Accountancy degree.

Thesis: *No thesis is required; however, under special approval, a candidate may elect to write a thesis under ACCT 599 Master's Thesis. Up to 6 credits may be earned for the thesis.*

General

Graduate degrees require a cumulative graduate GPA of 3.0 or higher. The Department of Accounting and Information Systems requires, in addition, that every candidate for the Master of Accountancy degree maintain at least a 3.0 grade-point average in all accounting courses used to satisfy the core and elective course requirement. Master of Accountancy students may not retake 500-level accounting courses for which they have previously received a grade without the approval of the Master of Accountancy Admissions Committee.

First Year		
Fall		**Credits**
ACCT 544	Financial Statement Analysis and Valuation	3
ACCT 551	Advanced Auditing Theory and Practice	3
ACCT 555	Federal Tax Research [1]	3
ACCT 559	Ethics and Professionalism in Accounting	3
	Credits	**12**
Spring		
ACCT 510	Technical and Professional Communication for Accountants	3
ACCT 530	Advanced Accounting	3
ACCT 580	Professional Accountancy	3
Elective Course		3
	Credits	**12**
Summer		
ACCT 560	Taxation of Corporations and Shareholders Advanced	3
ACCT 564	Financial Accounting Research [1]	3
	Credits	**6**
	Total Credits	**30**

[1] If an accounting research course is not used to fulfill the research requirement, a student may take the course to fulfill an elective requirement.

New Mexico State University master's accelerated program (MAP) provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

Please talk to a faculty advisor about your MAP plan and develop a course plan in consultation with the advisor. The faculty advisor should preferably be from the area of your interest.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The overall grade point average must be at a minimum of 3.0. At least four upper level accounting courses (ACCT 300+) including ACCT 301 Financial Accounting I and ACCT 302 Financial Accounting II I need to have the combined grade point average of at least 3.5. A student must have at least a B in both ACCT 301 Financial Accounting I and ACCT 302 Financial Accounting II.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

Upon approved enrollment to the Master of Accountancy MAP Program, the following courses may be taken in the undergraduate program of study.

Prefix	Title	Credits
ACCT 451	Auditing Theory and Practices	3
ACCT 455	Federal Taxation II	3
ACCT 456	Accounting for Nonprofit Organizations	3
ACCT 458	Accounting Data Analytics	3
ACCT 498	Independent Study	1-3
BCIS 485	Enterprise Resource Planning	3

Aerospace Engineering - Master of Engineering in Aerospace Engineering

Admission Requirements: See https://mae.nmsu.edu/academic-programs/grad/admission.html.

Coursework Option

Prefix	Title	Credits
Requirements		
M E 570	Engineering Analysis I	3
Core Courses		
Select one course from each of the following 4 topic areas: [1]		12
Aerodynamics		
Select one from the following:		
M E 530	Intermediate Fluid Mechanics	
M E 533	Numerical Methods for Fluid Mechanics and Heat Transfer	
Structural Dynamics and Control		
Select one from the following:

M E 503	Thermodynamics	
M E 540	Intermediate Heat Transfer	
Additional Requirements		
Select three courses (500 level or above) from any departments and two courses (500 level or above) from any college: [2, 3]		12
A E 598	Special Research Programs [4]	3
Total Credits		**30**

1. Graduate M E courses may be substituted for A E courses with the approval of the Graduate Program Coordinator.
2. If course is not in A E or M E program, approval of the Graduate Program Coordinator is required.
3. If M E 510 Special Topics or A E 510 Special Topics is taken, it must be a regular course with a proper course title taught in class. Any 510 course as an independent study would never be counted.
4. Professional degree students must complete an Integrative Learning Experience that allows them to demonstrate a synthesis of foundational and concentration competencies. A E 598 Special Research Programs serves that purpose as the final exam for Graduate School Requirements.

Academic Advisor and Final Exit Survey

Newly admitted Aerospace Engineering Masters of Engineering students will be assigned the Graduate Program Coordinator as an academic advisor.

All students must take Professional Master's Degree Exit Survey to graduate, which will be conducted by the Graduate Program Coordinator and will be taken after completing all coursework.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

Please talk to an MAE faculty advisor about your MAP plan and develop a course plan in consultation with the advisor. The faculty advisor should preferably be from the MAE area of your interest.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
A E 451	Aircraft Design	3
A E 464	Advanced Flight Dynamics and Controls	3
A E 469	Hypersonic Aerothermodynamics	3
M E 452	Control System Design	3

A E 599	Master's Thesis	
A E 509	Individualized Study	
Total Credits		**30**

[1] All course must be 500 level or above. Up to 6 credits of M E graduate courses may be substituted with the approval of the Graduate Coordinator.

[2] If A E 510 Special Topics or M E 510 Special Topics Special Topics is taken, it must be a regular course with a proper course title taught in class. Any 510 course as an independent study would never be counted.

Publication Requirement

A refereed conference paper accepted or a refereed journal article in review or accepted by graduation. The M.S. thesis can be a reformatted version of this paper. Exceptions may be made on a case by case basis by the department head.

Selection of Permanent Advisor

Newly admitted graduate students will be assigned a temporary advisor for the first semester, but they must select a degree option and permanent advisor before registering for the second semester.

In considering a decision about option and advisor, the student should arrange to meet with several members of the graduate faculty during the first six weeks of study to discuss specific educational objectives. The student can use these meetings to become familiar with faculty interests and research projects currently in progress. The faculty member must agree (in writing) to serve as the student's advisor.

All students must pass a final examination. The final examination is to be conducted by the student's advisory committee and is taken after completing all coursework and thesis work.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. Agriculture (Agribusiness) - Master of Agriculture

The Master's of Agriculture with Concentration in Agribusiness degree provides students with the skills and knowledge necessary to successfully manage modern businesses operating in the food and fiber supply chain. The program curriculum has been developed with an emphasis on providing economic and business analytical knowledge and skills for students and industry professionals with a broad range of disciplinary backgrounds.

Candidates for the Master of Agriculture (MAG) with a concentration in Agribusiness must successfully complete a minimum of 33 graduate credits.

All students in the MAG program must successfully complete the following:

Prefix	Title	Credits
Required Courses		
AEEC 5110	Introduction to Quantitative Methods	3
AEEC 5150	Economic and Financial Analysis of Agribusiness	3
AEEC 5220	Financial Derivative Markets	3
or BFIN 511	Financial Derivative Markets	
AEEC 5140	Agricultural Policy	3
AEEC 5320	Microcomputer Applications in Agriculture	3
AEEC 5330	Agribusiness Marketing	3
AEEC 5340	Agribusiness Management	3
AEEC 5996	Special Topics (Global Food Supply Chain Management)	3
Technical Courses (6) [1]		**6**
Technical Course 1		
Technical Course 2		
Creative Component or Thesis (3-6 hrs) [2]		**3-6**
AEEC 5994	Creative Component Project	
AEEC 5999	Master's Thesis	
Total Credits		**33-36**

[1] Students in consultation with their Graduate Committee Chair and with the approval of the Department Graduate Committee Chair, select two technical agriculture courses. These courses may come from another discipline or college or maybe taught within the Department of Agricultural Economics and Agricultural Business.

[2] In lieu of AEEC 5994 Creative Component Project or AEEC 5999 Master's Thesis, students can take 2 additional courses approved by their committee chair and the Department's Graduate Committee chairperson.

A thesis (AEEC 5999 Master's Thesis, 4-6 credits) is not required but can replace the creative component. The course AEEC 5997 Individual Study can be included as one of the 3-4 elective choices for 3 credits with any additional credits in AEEC 5997 Individual Study having approval of the student's graduate chair. An oral defense must be scheduled and completed as prescribed by the Graduate School. The defense must be preceded by a seminar to present major findings of the creative component or thesis research to faculty, fellow students, and the interested public.

MAP Requirements

Master's Accelerated Program Information- Master of Agriculture-Agribusiness

The Master's Accelerated Program allows qualifying NMSU students to complete four graduate courses while still an undergraduate. Those courses may count toward both their undergraduate degree and the Master of Agriculture with a Concentration in Agribusiness.

Up to 12 hours of coursework can be applied toward the completion of the master's degree. To receive graduate credit for the 12 credit hours, students must receive a B- or higher grade.

Students' qualifications

- The student must be classified as a Junior or Senior (a minimum of 25 semester credit hours must be completed at NMSU).
- The cumulative grade point average must be a minimum of 3.0.

Accepted AEAB MAP courses

Upon approved enrollment to the AEAB MAP Program, the following courses may be taken in the undergraduate program of study. Any other courses may be considered after a consultation with an advisor and the department head.

Prefix	Title	Credits
AEEC 4550	Real Estate Appraisal	3
AEEC 5110	Introduction to Quantitative Methods	3
AEEC 5140	Agricultural Policy	3
AEEC 5220	Financial Derivative Markets	3
AEEC 5340	Agribusiness Management	3

Agriculture (Domestic Animal Biology) - Master of Agriculture

The Department of Animal and Range Sciences at New Mexico State University offers a non thesis coursework Master of Agriculture degree with a Concentration in Domestic Animal Biology (MAG-DAB) which provides students with graduate training in animal nutrition and physiology. The degree is earned after satisfactory completion of 32 credit hours of upper division and graduate-level courses. The curriculum is completed in two or three academic semesters and includes a creative component which can be met in several ways.

Students having an undergraduate degree in an area of agriculture or a related field may consider the MAG-DAB as an alternative to a Master of Science which traditionally involves preparation of a thesis. Students who may benefit from this program include those in need of additional advanced science-based coursework in preparation for applying to a professional program in veterinary medicine. Other individuals may be interested in careers in the cooperative extension service, education, or the feed and pharmaceutical industries where an advanced degree may be of benefit to advancement. The curriculum outlined below will assist students in preparing for a number of career opportunities.

Admission to the Program

The MAG-DAB program is administered through the Department of Animal and Range Sciences and is coordinated by the Animal Science Graduate Committee. Admission to the program requires acceptance by the NMSU Graduate School as well as the Department of Animal and Range Sciences. Basic requirements include an undergraduate degree in an agricultural or a related major from an accredited college or university and an undergraduate GPA of 3.0.

Depending on undergraduate training, some individuals may need to complete deficiency classes. In addition, the graduate school may require international students to complete one or more English language courses. Applications to the Department should include three letters of reference, a resume, and a statement of interest in advanced graduate training.

Once admitted to the program, each student will work with an advisor to develop a course work plan of study. The advisor and the student will also select an advisory committee consisting of two departmental faculty members and a third member from outside the department who will normally serve as the Dean's representative to the committee.

Inquiries about the MAG-DAB Program should be directed to the Chair of the Animal Science Graduate Committee.

For the Master of Agriculture with a concentration in Domestic Animal Biology, students must complete 32 credit hours of graduate courses which include 2 credits of ANSC 598 Special Research Programs for the creative component.

Prefix	Title	Credits
All students in the MAG-DAB Program will complete the following classes:		
ANSC 484	Ruminant Nutrition	3
ANSC 501	Advanced Animal Nutrition	3
ANSC 509	Endocrinology of Domestic Animals	3
ANSC 512	Research Methods in Animal Science	4
ANSC 515	Graduate Seminar [1]	1
ANSC 580	Environmental Physiology of Domestic Animals	3
Elective Courses		
In consultation wiht their graduate advisor, students choose at least 12 credits from the following list of core courses (other classes may be considered on an individual basis):		12
ANSC 462	Parasitology	
ANSC 507	Laboratory Techniques in Nutrition	
ANSC 520	Advanced Nutritional Management I: Feedlot	
ANSC 521	Advanced Nutritional Management II: Cow Calf/Stocker	
ANSC 560	Rumen Microbiology	
ANSC 602	Advanced Reproductive Physiology	
ANSC 604	Hypothalamo-Hypophyseal-Pineal Endocrinology	
ANSC 605	Gonadal and Uterine Endocrinology	
ANSC 606	Endocrinology of Pregnancy, Parturition, and Lactation	
ANSC 621	Metabolic Functions and Dysfunctions	

[1] must take two semesters of seminar

Creative Component

The creative component of the program involves completing at least two credits of ANSC 598 Special Research Programs. This requirement can be met in one of two ways. In consultation with the advisor, the student can select a topic of importance in domestic animal biology and prepare a comprehensive literature review covering that topic. An alternative way to meet this requirement is for the student, in consultation with the advisor, to conduct a research project and prepare a written manuscript for evaluation by the advisory committee. In either case, the student will present results of the project in the graduate Seminar (ANSC 515) and then be examined by the advisory committee.

In certain cases, the student may request approval from the Advisory Committee to complete two additional graduate courses (at least six credits) in lieu of one of the reports described above. If this approach is approved, the oral examination at the end of the program will cover all the courses completed during the MAG-DAB Program. Students pursuing this option must also prepare and present a topical seminar in ANSC 515 at some time during the program.

First Year		
Fall		**Credits**
ANSC 484	Ruminant Nutrition	3
ANSC 580	Environmental Physiology of Domestic Animals	3
Choose 3 credits from elective list:		3

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. Students can take up to 12 credits of AXED graduate courses and get dual course credit that can be applied to both an undergraduate and master's degree.

You can also check the NMSU catalog for additional information about our programs.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

AXED Courses Eligible for MAPS:

Upon approved enrollment to the AXED MAP Program, the following courses may be taken in the undergraduate program of study.

Prefix	Title	Credits
AXED 4520	Methods in Career and Technical Laboratory Instruction	2
AXED 4620	Methods of Teaching Biological, Earth and Physical Sciences in Agriculture	3
AXED 5105	Introduction to Special Education in Career and Technical Education	3
AXED 5110	Management of Change, Diffusion, and Adoption of Innovations	3
AXED 5150	Strategic Communications Campaigns and Evaluation	3
AXED 5155	Youth Program Development and Management	3
AXED 5165	History and Philosophy of Agricultural and Extension Education	3
AXED 5215	Developing Excellent Programs in Career and Technical Education	3
AXED 5220	Methods for Teaching Agricultural and Technology Education	3
AXED 5320	Risk and Crisis Communications in Agricultural, Consumer, and Environmental Sciences	3
AXED 5510	Research Methods	3
AXED 5330	Content Area Literacies	3

Applied and Agricultural Biology - Master of Science

The Master of Science degree program in Agricultural Biology is designed to produce graduates with the academic and research background needed to facilitate effective, innovative, and environmentally sound protection of plants and animals from a wide and varied spectrum of pests.

Students are prepared for careers in research, extension, teaching, private consulting, industry, and government or to continue in a broad range of Doctoral programs. Specific career opportunities include positions as agricultural consultants, technical and sales representatives for industry, state departments of agriculture and USDA specialists, agricultural extension agents, industry research and environmental technicians.

Prefix	Title	Credits
Program Requirements		
EPWS 590	Graduate Seminar [2]	2
Electives [2]		*12*
Experimental Statistics [3]		*3*

Courses within EPPWS		*13*
EPWS 462	Parasitology	
EPWS 471	Plant Mineral Nutrition	
EPWS 486	Plant Virology	
EPWS 492	Diagnosing Plant Disorders	
EPWS 502	General Entomology	
EPWS 505	Advanced Integrated Pest Management	
EPWS 511	Introduction to Weed Science (f)	
EPWS 514	Plant Physiology	
EPWS 520	Environmental Behavior of Pesticides (so)	
EPWS 525	Advanced Scientific Writing	
EPWS 549	Special Problems	
EPWS 551	Special Topics [4]	
EPWS 560	Ecology and Management of Invasive Plant Species	
EPWS 573	Fungal Biology	
EPWS 599	Master's Thesis [5]	
Total Credits		**30**

1 All graduate students are required to enroll in two (2) credits of Entomology, Plant Pathology and Weed Science seminars. Typically, a student will take one seminar credit during the first semester of graduate school and present their thesis proposal plan. Each student will take the second seminar credit in their last semester and present a public exit seminar just prior to the defense of their thesis work

2 *Outlines for M.S. degree plans are generated by the student in consultation with the major professor and with input from the student's assigned graduate committee.*

3 Exact course is selected with professor and/ or committee based off previous statistics experience.

4 Maximum of 4 credits per semester. No more than 9 credits toward a degree.

5 Maximum of 9 credits per semester. No more than 6 credits toward a degree.

Additional Requirements- Outlines for Master of Science degree plans are generated by the student in consultation with the major professor and with input from the student's assigned graduate committee.

- A minimum of 30 credit hours of graduate work is required of which:
  a. At least 15 credits must be in courses numbered 500 or above.
  b. At least 15 credits must be in EPWS courses.
  c. At least half of the credits (exclusive of thesis) must be taken with other than a single professor.
- Designated hours to be completed:

1. Students must take at least four but not more than six credits in EPWS 599 Master's Thesis. Students enrolled in EPWS 599 may be asked to present progress updates.
2. At least three credit hours in graduate-level Experimental Statistics (A ST 505 Statistical Inference I, A ST 506 Statistical Inference II, A ST 509 Statistical Models for Complex Data Structures, A ST 511 Statistical Methods for Data Analytics, A ST 515 Statistical Analysis with R, A ST 540 Predictive Analytics).

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

Please talk to a faculty advisor about your MAP plan and develop a course plan in consultation with the advisor.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
EPWS 511	Introduction to Weed Science (f)	4
EPWS 514	Plant Physiology	3
EPWS 520	Environmental Behavior of Pesticides (so)	3
EPWS 505	Advanced Integrated Pest Management	3
EPWS 573	Fungal Biology	3

Agricultural Economics - Master of Science

Students entering the MS program are required to have completed

- intermediate microeconomics and intermediate macroeconomics (completed with a B grade or better),
- a college-level calculus class, and
- a course in statistics that included linear regression analysis.

Students that have not completed these courses may be admitted with the requirement that they take them as deficiencies at the beginning of their graduate program. Prospective graduate students must have at least a 3.0 undergraduate GPA. Students with a GPA less than 3.25 must complete the GRE or the GMAT exam.

Completion of the Master of Science degree in agricultural economics requires completion of a minimum of 33 graduate credit hours. Twenty-one of the credits must have one of the following three prefixes: AEEC, ECON, or ECDV. Twenty- four of the credits must be associated with course numbers greater than 500/5000. All students in the MS program must successfully complete the following core courses:

Prefix	Title	Credits
M.S. CORE (16-18 credits)		
AEEC 5120	Microeconomic Theory	3
AEEC 5130	Macroeconomic Theory	3
AEEC 5240	Econometrics	3
AEEC 5360	Production Economics	3
AEEC 5999	Master's Thesis [1]	6
Choose 3 Classes from AEAB Block (9 hrs) [2]		**9**
AEEC 5220	Financial Derivative Markets	
or BFIN 511	Financial Derivative Markets	
AEEC 5210	International Agricultural Trade Theory and Policy	
AEEC 5320	Microcomputer Applications in Agriculture	
AEEC 5330	Agribusiness Marketing	
AEEC 5340	Agribusiness Management	
AEEC 5140	Agricultural Policy [2]	
AEEC 5350	Economics of Water Resource Management and Policy	
AEEC 5996	Special Topics	
AEEC 5997	Individual Study	
Additional Graduate Courses (~6 hs) [3]		**6**
Total Credits		**33**

1. AEEC 5999 minimum hours required by the Graduate School are 4 with a maximum of 6 toward the degree. If a students elects to complete the minimum of 4 hours, they will need to take an additional course to meet the 33 hours required for the degree.
2. AEEC 5140 must be taken as part of this AEAB Block if not previously completed as an undergraduate under AEEC 3140V.
3. One of these two choices may include three (3) additional hours of AEEC 5997. In lieu of these 2 additional graduate courses, a student may select a justifiable minor (9+ hours) per Graduate School policy and only 2 courses (6 hours) from the AEAB Block.

MS students are generally required to write a thesis (AEEC 5999 Master's Thesis (4-6 credits). Non-thesis options that include a non-thesis research project (AEEC 5991 Non-Thesis Research Project, 3 credits) or an internship (AEEC 5998 Internship, 3 credits) must have approval from the student's committee and the graduate chairman. Students pursuing the MS degree may not complete the graduate program with more than one C grade in the core courses. If a student receives C grades in two of these core classes one of the classes must be repeated with a grade of at least B. In addition to core courses, nine additional credits must be completed from an agricultural economics and agricultural business (AEAB) course block. AEEC 5140 Agricultural Policy must be taken in the graduate program if an agricultural policy course was not taken as an undergraduate. Individual study (AEEC 5997 Individual Study) is limited to 6 credits hours toward a the degree. An oral defense is required of all master's candidates and will be scheduled and completed according to the guidelines of the Graduate School. The oral defense must be preceded by an open seminar to present major research findings to faculty, fellow students and the interested public.

New Mexico State University master's accelerated program provides the **opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

Please talk to a faculty advisor about your MAP plan and develop a course plan in consultation with the advisor.

Up to 12 hours of coursework can be applied toward the completion of the master's degree. To receive graduate credit for the 12 credit hours, students must receive a grade of B- or higher.

Students' Qualifications
The student must be classified as a Junior or Senior (a minimum of 25 semester credit hours must be completed at NMSU).
The cumulative grade point average must be a minimum of 3.0.

Accepted MAP Courses
Upon approved enrollment to the AEAB MAP Program, the following courses may be taken in the undergraduate program of study. Any other courses may be considered after a consultation with an advisor and the department head.

Prefix	Title	Credits
AEEC 4550	Real Estate Appraisal	3
AEEC 5110	Introduction to Quantitative Methods	3
AEEC 5140	Agricultural Policy	3
AEEC 5220	Financial Derivative Markets	3
AEEC 5340	Agribusiness Management	3
ECON 457	Mathematical Economics	3

Athletic Training - Master of Science

The Master of Science in Athletic Training (MSAT) program at NMSU comprises 60 credit hours of coursework through traditional and hybrid courses. The MSAT is a 2-year (24-month) professional degree program that starts in June and prepares students to sit for the Board of Certification (BOC) exam leading to the ATC credential. The MSAT program is accredited by the Commission on Accreditation of Athletic Training Education (CAATE). Admissions are competitive, and applications are managed via the ATCAS (https://atcas.cas.myliaison.com/applicant-ux/) central application system. Review of applications begins on October 1st with rolling admissions until all seats are filled. Interested students can contact the Athletic Training Program Director, Kim O'Connell (kbrock@nmsu.edu) (575-646-5744), for further information.

The MSAT program at NMSU will consist of a minimum of 60 credit hours of coursework to be completed in the home department of Kinesiology at NMSU through both traditional and hybrid courses. The program provides a two-year (24-month) comprehensive exposure to Athletic Training designed to prepare individuals to become competent, independent clinicians who will enhance the quality of patient health care and advance the profession of athletic training through the application of evidence-based practice and translational research.

Theoretical coursework in the areas of injury prevention and care, injury evaluation and treatment, and therapeutic interventions of athletic injuries are included, as are clinical components that provide a progressive approach with observation, integrative and immersive experiences in clinical settings both on and off-campus.

Upon completion of the MSAT, students will be eligible to sit for the national Board of Certification (BOC) exam required to practice as an athletic trainer, leading to the ATC credential.

Enrollment in graduate courses in Athletic Training is limited to students who have been accepted into the MSAT program. To complete this course of study, each student is expected to meet the program's academic and clinical competency criteria, which are aligned with CAATE accreditation standards.

Instructions on application procedures for the MSAT can be found on the Kinesiology Department webpage. Questions may be directed to Kim O'Connell (kbrock@nmsu.edu) the Program Director for Athletic Training.

Total Credits		**60-63**

A Suggested Plan of Study:

The program follows a cohort model, with students progressing through the required
coursework in a specific sequence. Below is a proposed plan of study for the MSAT:

First Year		
Semester 1		**Credits**
SUMMER		
SPMD 4805	Emergency Response	2
SPMD 5005	Foundations of Athletic Training	3
SPMD 5010	Clinical & Functional Anatomy in Athletic Training	2
	Credits	**7**
Semester 2		
FALL		
SPMD 5050	Clinical Education I	3
SPMD 5120	Lower Extremity Injury Evaluation + Lab	4
SPMD 5180	Therapeutic Interventions I	4
	Credits	**11**
Semester 3		
SPRING		
SPMD 5150	Clinical Education II	3
SPMD 5220	Upper Extremity Injury Evaluation + Lab	4
SPMD 5280	Therapeutic Interventions II	4
SPMD 5510	Psychology of Sport	3
	Credits	**14**
Second Year		
Semester 1		
SUMMER		
SPMD 6010	Organization and Administration in Athletic Training	2
SPMD 5205	Evidence Based Practice	2
SPMD 5250	Immersive Clinical Experience	3
**SPMD 5250 Immersive Clinical Experience may be taken in any semester of the 2nd year following approval from the coordinator of clinical education		
	Credits	**7**
Semester 2		
FALL		
SPMD 6050	Clinical Education III	3
SPMD 6280	General Medical Conditions & Therapeutic Medications	4
SPMD 6020	Evaluation of the Head, Neck, Spine and Torso	3
SPMD 6005	Athletic Training Research I	2
	Credits	**12**
Semester 3		
SPMD 6150	Clinical Education IV	3
SPMD 6110	Professional Preparation	3
SPMD 6999	Capstone Project I	3
	Credits	**9**
	Total Credits	**60**

Animal Science - Master of Science

General Requirements

Graduate students must maintain at least a 3.0 grade point average. A minimum of 30 credit hours of graduate work if required, the following parameters must be met within those credits but can overlap.

1. At least 15 credits must be in courses numbered 500 or above
2. At least 15 credits must be in Animal Science courses
3. At least 15 credits (exclusive of ANSC 598) must be taken with other than a single professor

Prefix	Title	Credits
Required Courses		
ANSC 512	Research Methods in Animal Science	3-4
or A ST 512	Quantitative Analysis for Business Decisions	
Graduate Seminar		2
ANSC 515	Graduate Seminar	

ANSC 599	Master's Thesis	6
Choose 18-19 credits from the following, ensuring the above parameters are met:		18-19
ANSC 480	Environmental Physiology of Domestic Animals	
ANSC 484	Ruminant Nutrition	
ANSC 501	Advanced Animal Nutrition	
ANSC 507	Laboratory Techniques in Nutrition	
ANSC 509	Endocrinology of Domestic Animals	
ANSC 510	Range Nutrition Techniques	
ANSC 512	Research Methods in Animal Science	
ANSC 515	Graduate Seminar	
ANSC 520	Advanced Nutritional Management I: Feedlot	
ANSC 521	Advanced Nutritional Management II: Cow Calf/Stocker	
ANSC 522	Animal Nutrition	
ANSC 560	Rumen Microbiology	
ANSC 580	Environmental Physiology of Domestic Animals	
ANSC 602	Advanced Reproductive Physiology	
ANSC 604	Hypothalamo-Hypophyseal-Pineal Endocrinology	
ANSC 605	Gonadal and Uterine Endocrinology	
ANSC 606	Endocrinology of Pregnancy, Parturition, and Lactation	
ANSC 621	Metabolic Functions and Dysfunctions	
ANSC 625	Nutrient Metabolism I: Mineral, Vitamin, and Nitrogen Metabolism	
ANSC 626	Nutrient Metabolism II: Carbohydrates, Lipids, and Energetics	
Total Credits		**30**

Graduate Assistants

1. All graduate assistants must enroll as full-time students taking at least 9 graded graduate credits (courses numbered 450 and above). No audits can be taken as part of the 9 minimum credits. Only 3 of the 9 credits may be taken as an S/U option.
2. A graduate assistant may not enroll for more than 15 credits each semester.
3. If a student needs to take deficiency courses as part of the 9 credits, then a memo from the advisor or department head should be submitted to the Graduate School. If approved, the student can register for 3 undergraduate credits and a minimum of 6 graded graduate credits during their first semester at New Mexico State University.
4. Enrollment during summer sessions is not required.

Additional Requirements

1. A maximum of six credits in S/U courses may be taken during a Master's program
2. A maximum of six credits (four in a single semester) in ANSC 598 (Special Research Programs) may be taken during a Master's program.
3. If a minor is declared, a minimum of eight credits in this discipline must be completed and approved by that department.
4. In certain instances, deficiency courses may be required.
5. Attendance at graduate seminars is urged.
6. Graduate students are encouraged to adapt their thesis data for submission as a scientific journal article, an Experiment Station Bulletin, or research report.

The Masters Committee

The Masters Committee is appointed by the student's advisor with the approval of the Department Head and consists of four members including three from the animal science area and one representative from the Graduate School.

The Masters Final Examination

The Masters Final Oral Examination is primarily concerned with the thesis research conducted by the student but it may also extend over the entire discipline. Candidates for a Masters Degree are expected to demonstrate a thorough understanding of their research topic including how it was conducted, the results that were found, and what the results mean. They should also demonstrate knowledge of the general discipline of Animal Science.

First Year		
Fall		**Credits**
ANSC 484	Ruminant Nutrition	3
ANSC 580	Environmental Physiology of Domestic Animals	3
ANSC Elective: Student chooses 3 credits of elective courses		3
ANSC 602	Advanced Reproductive Physiology	
ANSC 604	Hypothalamo-Hypophyseal-Pineal Endocrinology	
ANSC 605	Gonadal and Uterine Endocrinology	
ANSC 606	Endocrinology of Pregnancy, Parturition, and Lactation	
ANSC 621	Metabolic Functions and Dysfunctions	
	Credits	**9**
Spring		
ANSC 501	Advanced Animal Nutrition	3
ANSC 509	Endocrinology of Domestic Animals	3

ANSC 501	Advanced Animal Nutrition	3
ANSC 509	Endocrinology of Domestic Animals	3
ANSC 522	Animal Nutrition	3

Anthropology - Master of Arts

The Anthropology M.A. program is designed for students who are interested in the traditional sub-disciplines of anthropology, as well as such related fields as cultural resource management, food studies, medical anthropology, and museum studies. The program is directed to both students planning to complete a professional M.A. degree and students planning to enter a Ph.D. program. In addition to the M.A. in Anthropology, our program offers graduate minors in anthropology, archaeology, and food studies, as well as Graduate Certificates in cultural resource management and museum studies. The faculty encourage all graduate students to develop graduate minors and certificates, enhancing their specialized training in anthropology.

Program Outcomes:

1. Develop and execute a problem-oriented anthropological study using appropriate theoretical and methodological perspectives in at least one sub-field of anthropology. The study may focus on applied/practicing work or standard academic research, and will report the results in the form of a master's thesis, professional internship report, or professional research project report. The final thesis or report must show substantive data analysis by the student, directed toward an explicit anthropological research question.
2. Demonstrate effective written and verbal communication skills in professional settings.
3. Demonstrate professional engagement with peers, faculty, staff, researchers, and other professionals in anthropology.

An undergraduate anthropology degree is not required for entry into the M.A. program. Applicants who lack the equivalent of ANTH 301, ANTH 315, and ANTH 355 may be required to take these courses or corresponding sections of ANTH 502. ANTH 350 or the equivalent is recommended. Applicants without an undergraduate degree in anthropology are encouraged to contact the Graduate Advisor before applying to the M.A. program in anthropology.

The M.A. Program in Anthropology at NMSU is enrolled as an eligible graduate program under the Western Regional Graduate Program (https://www.wiche.edu/tuition-savings/wrgp/) (WRGP). WRGP allows master's, graduate certificate, and doctoral students who are residents of Western Interstate Commission for Higher Education (WICHE) member states to enroll in graduate programs outside of their home state and pay in-state resident tuition. Residents of the following states and territories are eligible to attend the M.A. Program in Anthropology at NMSU for in-state tuition rates: Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, North Dakota, Oregon, South Dakota, U.S. Pacific Territories and Freely Associate States, Utah, Washington, and Wyoming. Interested graduate applicants should apply directly to the NMSU Graduate School and *identify themselves as WICHE WRGP applicants*. WRGP applicants must meet NMSU's WRGP admission requirements and deadlines. If you have further questions about the WRGP program and your eligibility, please contact Kathryn Olszowy at kolszowy@nmsu.edu.

Admission Requirements

To apply to the Anthropology Masters Degree program the following materials are required:

- Graduate School application form and fees
- Official undergraduate and graduate transcripts from all colleges and universities attended, with a 3.0 GPA minimum.
- A letter from the candidate addressing his or her interests and graduate school objectives
- Letters of recommendation from three persons familiar with the candidate's academic record

All the above items should be submitted through the Graduate School's central admission system at: https://gradschool.nmsu.edu/

NOTE: The GRE is not required.

NOTE: In addition to the above, **international applicants** also need to view the requirements of admission to the university and provide additional documentation online, at this page: https://isss.nmsu.edu/index-2/ (https://isss.nmsu.edu/)

NOTE: students may matriculate in either August or January. If a student wishes to be considered for a Graduate Assistantship, the application must be completed by **February 15** for admission in the fall semester. Assistantships are not usually offered for students matriculating in January, but they may be considered in subsequent semesters for an award.

For more information about the Anthropology Graduate Program contact:

Dr. Kathryn Olszowy, Anthropology Graduate Advisor
at: kolszowy@nmsu.edu

Dr. Lois Stanford, Anthropology Department Head at: lstanfor@nmsu.edu

The Anthropology M.A. program is designed for students who are interested in archaeology, cultural anthropology, and biological anthropology, as well as such related fields as cultural resource management (CRM), food studies, medical anthropology, and museum studies. The program is directed to both students planning to complete a professional M.A. degree and students planning to enter a Ph.D. program.

An undergraduate anthropology degree is not required for entry into the M.A. program. Applicants who lack the equivalent of ANTH 301, ANTH 315, and ANTH 355 may be required to take these courses or corresponding sections of ANTH 502. ANTH 350 or the equivalent is recommended. Prospective applicants without undergraduate degrees in anthropology are encouraged to contact the Graduate Advisor before applying.

Program Requirements

Students selecting the thesis option must complete 30 hours of basic course work, plus 6 hours of thesis credit. Students selecting the non-thesis option must complete 36 hours of course work including an internship or special research project for 6 credits. The credits required for students selecting either the thesis or non-thesis options are distributed as follows:

Prefix	Title	Credits
Core Graduate Courses [1]		**6**
ANTH 503	Anthropological Theory	
ANTH 505	Issues in Anthropological Practice	
Additional Courses		**24**
Select additional topical, methodological, and area courses in anthropology in consultation with graduate faculty committee [1]		
Students may count six graduate credits from disciplines outside of anthropology toward the total 24 credits of additional courses		
Thesis or Non-Thesis Options		
Select either a Thesis or Non-Thesis Track:		6
Thesis		
ANTH 599	Master's Thesis	
Non-Thesis		
ANTH 597	Internship	
or ANTH 598	Special Research Problems	
Total Credits		**36**

[1] earning a grade of B or better

A Suggested Plan of Study

The following road map is a guide for full-time students (9 or more credits/semester) to earn the Master of Anthropology degree within two years. We expect that each student will create a unique, customized degree plan in consultation with their graduate faculty committee.

First Year		
Fall		**Credits**
ANTH 505	Issues in Anthropological Practice	3
Elective Classes (2)		6
Non-Curricular Recommendations		
Join the Anthropology Graduate Student Organization (GSO)		
Identify a committee chair		
Begin to develop your MA project		
	Credits	**9**
Spring		
ANTH 503	Anthropological Theory	3
Elective Classes (2)		6
Non-Curricular Recommendations		
Work with your committee chair to develop your degree plan		
Finalize your graduate committee		
Complete your MA project proposal		
Hold your MA proposal hearing		
	Credits	**9**
Summer		
OPTIONAL: 3-6 credits of field training, field research, directed readings, or internship		
ANTH 522	Archaeological Field School	
ANTH 587	Field Work in Latin America	
ANTH 596	Readings	
ANTH 597	Internship	
Non-Curricular Recommendations		
Run STAR degree audit to check degree progress		
Begin research or data collection for MA project		
	Credits	**0**
Second Year		
Fall		
MA Thesis		3
ANTH 599 or ANTH 598	Master's Thesis or Special Research Problems	
Elective Classes (2)		6
Non-Curricular Recommendations		
Complete research/data collection for MA project		
Develop MA thesis/report outline with committee chair		
Begin writing MA thesis/report		
	Credits	**9**
Spring		
MA Thesis		3
ANTH 599 or ANTH 598	Master's Thesis or Special Research Problems	
Remaining elective classes (3–6 cr, or more if needed them to complete graduate minor/graduate certificate requirements)		3-6
Non-Curricular Recommendations		
Apply to graduate from degree (and certificate programs, if applicable) before the deadline listed on the Graduate School calendar		
Submit a complete draft of your MA thesis/report to your chair for review, and make revisions as needed		
With the approval of your chair, submit a final draft of your MA thesis/report to your full committee		
Schedule your and hold your final exam		
Submit your MA thesis to Proquest (and to your committee chair) before the deadline. If you completed a MA report, submit that final report to your committee members and the Department Head.		
	Credits	**6-9**
	Total Credits	**33-36**

Applied Statistics - Master of Science

The Department of Economics, Applied Statistics and International Business offers the Master of Science (MS) degree in applied statistics. The applied statistics program produces graduates proficient in the

practice of statistics and prepared to enter directly into positions in government or industry. Students in the program receive instruction in both the theory and the application of statistics, with an emphasis on experimental design and modeling. Statistical software packages, which are necessary for modern data analysis, are used throughout the curriculum. The program culminates in a capstone course in which students gain experience in analyzing real-world data.

Students from a variety of disciplines, including mathematics, psychology, engineering, and the natural sciences, have successfully completed the MS in applied statistics.

Admission

Requirements for regular admission to the MS in applied statistics include the following:

- A minimum 3.0-grade point average overall or in the last two years of study. Complete graduate and undergraduate transcripts must be supplied.
- Two semesters of calculus, equivalent to NMSU courses MATH 1511G Calculus and Analytic Geometry I MATH 1521G Calculus and Analytic Geometry II, and one semester of Linear Algebra equivalent to NMSU course MATH 2415 Introduction to Linear Algebra, completed with grades of B or better.
- Three letters of reference from former professors or others able to evaluate the student's academic potential.
- A one- to two-page typewritten letter of application, discussing academic objectives, professional plans, and specific reasons for selecting statistics as a field for advanced study.

In addition to the formal requirements above, some experience in computer programming is strongly recommended.

Applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL). Fluency in written and spoken English is essential to successful completion of the program. Further information regarding the TOEFL can be obtained from https://isss.nmsu.edu/ (https://gradschool.nmsu.edu/future-students/requirements/english-proficiency-transcript-evaluation.html).

Students must choose one of two options to complete the course requirements: the research option or the coursework-only option.

Research Option

Under the research option, the combined research (A ST 598 or A ST 599) and elective credits must equal six. The number of research credits may vary from four to six, with the remaining credits fulfilled with electives.

Prefix	Title	Credits
Theory		
A ST 565	Statistical Analysis I	3
A ST 566	Statistical Analysis II	3
Methods		
A ST 503	SAS Basics	3
A ST 505	Statistical Inference I	4
A ST 506	Statistical Inference II	3

Art - Master of Arts

Emphasis: Art History

An emphasis in art history requires a minimum of 33 credits of art history courses, 6 of which must be thesis credits. Additionally, 3 credits of related courses outside the Art Department must be taken with the approval of the department head and the student's major advisor.

Reading proficiency in a foreign language is also required and should be acquired prior to the beginning of thesis research for which it will be employed. A reading proficiency exam will be arranged in conjunction with the major advisor. Admission to the MA program with an emphasis in art history is based on an accredited BA or BS degree (or equivalent), including at least 18 credits in art history, museum studies, visual studies, or related disciplines. Undergraduate deficiencies must be completed before advancement to candidacy.

Prefix	Title	Credits
ARTH 579	Methodologies and Historiography of Art History and Art Theory	3
ARTH 599	Art History Thesis	6
Six 500-level ARTH Courses [1]		24
One 450 and above level course outside of the Department of Art		3
Total Credits		**36**

[1] ARTS 576 Museum/Gallery Research Internship may also be used once to fulfill this requirement

Candidacy and Thesis Committee Selection

Upon satisfactory completion of all required course work (except thesis credits) and foreign language requirement, the student will prepare a thesis proposal under the direction of the major professor. The student will then select the second member of his or her thesis committee

and submit the proposal to this committee member for approval. With the backing of these two advisors, the student must then present the proposal to the department faculty. After a successful presentation, the student will advance to candidacy and select the third committee member, who may be from outside the art department.

Astronomy - Master of Science

The Astronomy Department at NMSU offers programs leading to the Master of Science and the Doctor of Philosophy degrees. Graduate courses (http://astronomy.nmsu.edu/?page_id=2503) cover topics in astrophysics, stellar atmospheres, observational techniques, the interstellar medium, galactic structure, star formation and evolution, extragalactic objects, cosmology, and solar system studies. Students also take courses in other relevant fields to broaden their knowledge and capabilities.

Upon successful completion of the written and oral portions of the PhD comprehensive exam, it is the intention of the department that a student be awarded an Master of Science degree in Astronomy. Other students may elect to pursue a Terminal Master's degree rather than a Doctor of Philosophy upon the advice of their committee.

Terminal Masters: Thesis track

The rules for a Terminal Master of Science: Thesis track are outlined below.

For the Terminal Master of Science degree in Astronomy, the student must satisfy the requirements of the Department as well as those established by the Graduate School. The Department requires a minimum of 33 credits of which six are generally for Master's Thesis research.

The MINIMUM course requirements for a Thesis MS will include

Prefix	Title	Credits
ASTR 500	Seminar (3 credits (1 per semester)) [5]	3
Choose five courses from the following ASTR courses [6]		15
ASTR 503	Fundamentals of Astrophysics	
ASTR 506	Dynamics and Hydrodynamics	
ASTR 530	Gas and Radiative Processes	
ASTR 535	Observational Techniques	
ASTR 545	Stellar Spectroscopy	
ASTR 555	Galaxies I	
ASTR 565	Stellar Interiors	
ASTR 605	Interstellar Medium	
ASTR 616	Galaxies II	
ASTR 620	Planetary Processes	
ASTR 621	Planetary System Formation	
ASTR 630	Advanced Methods in Astrophysics	
ASTR 670	Heliophysics, Space Plasmas, and Space Weather	
ASTR 698	Special Topics.	
Select additional two courses from ASTR courses above, OR from the courses below [7]		6
PHYS 462	Intermediate Electricity and Magnetism II	
PHYS 511	Mathematical Methods of Physics I	
PHYS 554	Quantum Mechanics I	
PHYS 562	Electromagnetic Theory II	
PHYS 571	Advanced Experimental Optics	
PHYS 576	Advanced Computational Physics I	
E E 528	Fundamentals of Photonics	
E E 577	Fourier Methods in Electro-Optics	
CSCI 5996	Special Topics	
Special Research Programs [4]		
ASTR 598	Special Research Programs	3
Masters Research		
ASTR 599	Master's Thesis	6
Total Credits		**33**

[4] ASTR 598 Special Research Programs is generally taken in the student's 2nd year (fall or spring) and is intended to provide a semi-formal introduction to doing a research project. It may involve research that subsequently develops into a thesis project.

[5] ASTR 500 Seminar is 1-credit course. It should be taken each semester, for 3 total credits over this track

[6] Any 15 credits (5 courses) selected from these. Each course may only be taken for 3 credits.

[7] In addition to 5 courses from above, students should select another 2 courses (3 credits each, 6 credits total). This can be either another two astronomy graduate classes from above (which will make 7 total different astronomy courses) OR student may opt to take up to 2 out-of-department classes to fulfill the overall credit requirements if these classes are deemed by the student's committee to be appropriate to the student's program-of-study.
A maximum of one 3-credit course numbered between 450 and 499 can be applied to the out-of-department course/credit-hour requirement, and only with the approval of the student's Committee. Otherwise, out of department classes must be at the 500 or greater level.
If more than 6 credits of out-of-department classes are taken, they may potentially count toward the required total courses/credit hours, but only with the approval of the student's Committee. Traditionally, these have been in the area of PHYS, E E and CSCI, as listed. Other Physics courses, or courses offered by other departments such as Engineering, Geology, or Math, are also viable as out-of-department courses. Additionally, for those students intending to specialize in planetary science, courses taught in the Geology department and Geophysics courses taught in the Physics department should be considered.

Terminal Masters: Coursework-only track

The rules for a Terminal Master of Science: Coursework-only track are outlined below.

A thesis is nearly always required for a Terminal Master of Science degree. However, under some exceptional circumstances, the thesis requirement may be waived, in which case the credit requirements must be satisfied in formal course work. Such a waiver requires agreement by both the student's committee and the Department Head. In all cases, the student seeking a Terminal Master of Science degree must pass a final oral examination covering course and any relevant research work. Any regular Terminal Master of Science degree program will require a thesis.

For a student who has decided and been approved to pursue a Course-work only Master of Science Astronomy degree, the MINIMUM course requirements are:

Prefix	Title	Credits
ASTR 500	Seminar (3 credits (1 per semester)) [5]	3
Choose seven courses from the following ASTR courses [8]		21

ASTR 503	Fundamentals of Astrophysics	
ASTR 506	Dynamics and Hydrodynamics	
ASTR 530	Gas and Radiative Processes	
ASTR 535	Observational Techniques	
ASTR 545	Stellar Spectroscopy	
ASTR 555	Galaxies I	
ASTR 565	Stellar Interiors	
ASTR 605	Interstellar Medium	
ASTR 616	Galaxies II	
ASTR 620	Planetary Processes	
ASTR 621	Planetary System Formation	
ASTR 630	Advanced Methods in Astrophysics	
ASTR 670	Heliophysics, Space Plasmas, and Space Weather	
ASTR 698	Special Topics.	
Select additional two courses from ASTR courses above, OR from the courses below [9]		6
PHYS 462	Intermediate Electricity and Magnetism II	
PHYS 511	Mathematical Methods of Physics I	
PHYS 554	Quantum Mechanics I	
PHYS 562	Electromagnetic Theory II	
PHYS 571	Advanced Experimental Optics	
PHYS 576	Advanced Computational Physics I	
E E 528	Fundamentals of Photonics	
E E 577	Fourier Methods in Electro-Optics	
CSCI 5996	Special Topics	
Special Research Programs [4]		
ASTR 598	Special Research Programs	3
Total Credits		**33**

[5] ASTR 500 Seminar is 1-credit course. It should be taken each semester, for 3 total credits over this track

[8] Any 21 credits (7 courses) selected from these. Each course may only be taken for 3 credits.

[9] In addition to 7 courses from above, students should select another 2 courses (3 credits each, 6 credits total). This can be either another two astronomy graduate classes from above (which will make 9 total different astronomy courses) OR student may opt to take up to 2 out-of-department classes to fulfill the overall credit requirements if these classes are deemed by the student's committee to be appropriate to the student's program-of-study.
A maximum of one 3-credit course numbered between 450 and 499 can be applied to the out-of-department course/credit-hour requirement, and only with the approval of the student's Committee. Otherwise, out of department classes must be at the 500 or greater level.
If more than 6 credits of out-of-department classes are taken, they may potentially count toward the required total courses/credit hours, but only with the approval of the student's Committee.
Traditionally, these have been in the area of PHYS, E E and CSCI, as listed. Other Physics courses, or courses offered by other departments such as Engineering, Geology, or Math, are also viable as out-of-department courses. Additionally, for those students intending to specialize in planetary science, courses taught in the Geology department and Geophysics courses taught in the Physics department should be considered.

[4] ASTR 598 Special Research Programs is generally taken in the student's 2nd year (fall or spring) and is intended to provide a semi-formal introduction to doing a research project. It may involve research that subsequently develops into a thesis project.

Masters degree: Upon completion of PhD comprehensive exam track

The requirements for the Masters track are for the student to have completed their PhD comprehensive exam, and the following credits:

Prefix	Title	Credits
ASTR 500	Seminar (4 credits (1 per semester)) [1]	4
Choose nine courses from the following ASTR courses [2]		27
ASTR 503	Fundamentals of Astrophysics	
ASTR 506	Dynamics and Hydrodynamics	
ASTR 530	Gas and Radiative Processes	
ASTR 535	Observational Techniques	
ASTR 545	Stellar Spectroscopy	
ASTR 555	Galaxies I	
ASTR 565	Stellar Interiors	
ASTR 605	Interstellar Medium	
ASTR 616	Galaxies II	
ASTR 620	Planetary Processes	
ASTR 621	Planetary System Formation	
ASTR 630	Advanced Methods in Astrophysics	
ASTR 670	Heliophysics, Space Plasmas, and Space Weather	
ASTR 698	Special Topics.	
Select additional two courses from ASTR courses above, OR from the courses below [3]		6
PHYS 462	Intermediate Electricity and Magnetism II	
PHYS 511	Mathematical Methods of Physics I	
PHYS 554	Quantum Mechanics I	
PHYS 562	Electromagnetic Theory II	
PHYS 571	Advanced Experimental Optics	
PHYS 576	Advanced Computational Physics I	
E E 528	Fundamentals of Photonics	
E E 577	Fourier Methods in Electro-Optics	
CSCI 5996	Special Topics	
Special Research Programs [4]		
ASTR 598	Special Research Programs	3
Pre-dissertation Research [5]		
ASTR 600	Pre-dissertation Research	6
Total Credits		**46**

[1] ASTR 500 Seminar is 1-credit course. It should be taken each semesters, for 4 total credits over the program

[2] Any 27 credits (9 courses) selected from these. Each course may only be taken for 3 credits.

[3] In addition to 9 courses from above, students should select another 2 courses (3 credits each, 6 credits total). This can be either another two astronomy graduate classes from above (which will make 7 total different astronomy courses) OR student may opt to take up to 2 out-of-department classes to fulfill the overall credit requirements if these classes are deemed by the student's committee to be appropriate to the student's program-of-study.
A maximum of one 3-credit course numbered between 450 and 499 can be applied to the out-of-department course/credit-hour requirement, and only with the approval of the student's Committee. Otherwise, out of department classes must be at the 500 or greater level.

If more than 6 credits of out-of-department classes are taken, they may potentially count toward the required total courses/credit hours, but only with the approval of the student's Committee. Traditionally, these have been in the area of PHYS, E E and CSCI, as listed. Other Physics courses, or courses offered by other departments such as Engineering, Geology, or Math, are also viable as out-of-department courses. Additionally, for those students intending to specialize in planetary science, courses taught in the Geology department and Geophysics courses taught in the Physics department should be considered.

[4] ASTR 598 Special Research Programs is generally taken in the student's 2nd year (fall or spring) and is intended to provide a semi-formal introduction to doing a research project. It may involve research that subsequently develops into a thesis project.

Year A

A Suggested Plan of Study For Students

A typical roadmap for the Masters Thesis track program, including course and credit-hour minimum requirements, is summarized in the following table. Note there is some flexibility for each of these components, so students should confirm all their selections directly with their advisor. Most regular graduate courses (501-597, 601-699) are offered on a 2 year rotation. So specific courses will depend on whether a student is on a year A or Year B cycle. ASTR 503 Fundamentals of Astrophysics is offered each fall and should be taken by all students in their first year only. Students may opt for up to 2 courses (6 credits) from outside the department (See Course Requirements). ASTR 598 Special Research Programs and ASTR 599 Master's Thesis are offered every semester, as one-on-one research credits with an advisor.

For a student on wishing to pursue a Master Coursework-only track, they may substitute the 6 credits of 599 credits for any of the regular Yr A or Yr B courses

First Year		
Fall		**Credits**
ASTR 500	Seminar [1]	1
ASTR 503	Fundamentals of Astrophysics	3
Choose two courses from the following:		6
ASTR 535	Observational Techniques	
ASTR 565	Stellar Interiors	
ASTR 605	Interstellar Medium	
	Credits	**10**
Spring		
ASTR 500	Seminar [1]	1
Choose three courses from the following		9
ASTR 621	Planetary System Formation	
ASTR 630	Advanced Methods in Astrophysics	
ASTR 670	Heliophysics, Space Plasmas, and Space Weather	
	Credits	**10**
Second Year		
Fall		
ASTR 500	Seminar [1]	1
Choose one from the following: [2]		3
ASTR 555	Galaxies I	
ASTR 620	Planetary Processes	
ASTR 698	Special Topics.	
Research Programs Course [2]		0-3
ASTR 598	Special Research Programs [2]	
ASTR 599	Master's Thesis [3,4]	3
	Credits	**7-10**
Spring		
ASTR 599	Master's Thesis [3, 4]	3-9
Choose one from the following:		3
ASTR 506	Dynamics and Hydrodynamics	
ASTR 545	Stellar Spectroscopy	
ASTR 616	Galaxies II	
Research Programs Course [2]		0-3
ASTR 598	Special Research Programs [2]	
	Credits	**6-15**
	Total Credits	**33-45**

[1] Students must take ASTR 500 Seminar as 1-credit in each of their first 3 semesters, for a total of 3 credits over 2 years

[2] Students must take ASTR 598 Special Research Programs for 3 credits during fall of Yr2 or spring of Yr2.

[3] Students on a Thesis track must take 6 total credits of ASTR 599 Master's Thesis in Yr 2. Students on a coursework-only track may substitute any 6 credits of regular Yr2 course in place of 599 credits

[4] Students on a Thesis track who have completed 10 credits in each of their first 3 semesters, including 3 ASTR 598 Special Research Programs and 3 ASTR 599 Master's Thesis in fall of Yr2 only require 3 credits of ASTR 599 in spring of Yr2 in order to meet minimum requirements as detailed in Course Requirements above. Students on a Coursework-only track who have completed 10 credits in each of their first 3 semester, including 3 ASTR 598, only require 3 more regular course credits in spring of Yr2. However graduate students must enroll in 9 credits each semester in order to remain full time and retain eligibility for an GA. For students in their final semester of dissertation writing, it is possible to petition the Graduate School for permission to enroll in fewer credits, for that one semester only, to reduce tuition expenses. For students who do not complete their Masters in 2 years, they should continue to enroll in ASTR 599 in future semesters.

Year B

A Suggested Plan of Study For Students

A typical roadmap for the Masters Thesis track program, including course and credit-hour minimum requirements, is summarized in the following table. Note there is some flexibility for each of these components, so students should confirm all their selections directly with their advisor. Most regular graduate courses (501-597, 601-699) are offered on a 2 year rotation. So specific courses will depend on whether a student is on a year A or Year B cycle. ASTR 503 Fundamentals of Astrophysics is offered each fall and should be taken by all students in their first year only. Students may opt for up to 2 courses (6 credits) from outside the department (See Course Requirements). ASTR 598 Special Research Programs and ASTR 599 Master's Thesis are offered every semester, as one-on-one research credits with an advisor.

For a student on wishing to pursue a Master Coursework-only track, they may substitute the 6 credits of 599 credits for any of the regular Yr A or Yr B courses

First Year		
Fall		**Credits**
ASTR 500	Seminar [1]	1
ASTR 503	Fundamentals of Astrophysics	3
Choose two courses from the following:		6
ASTR 555	Galaxies I	
ASTR 620	Planetary Processes	
ASTR 698	Special Topics.	
	Credits	**10**
Spring		
ASTR 500	Seminar [1]	1
Choose three from the following:		9
ASTR 506	Dynamics and Hydrodynamics	
ASTR 545	Stellar Spectroscopy	
ASTR 616	Galaxies II	
	Credits	**10**
Second Year		
Fall		
ASTR 500	Seminar [1]	1
Choose one from the following: [2]		3
ASTR 535	Observational Techniques	
ASTR 565	Stellar Interiors	
ASTR 605	Interstellar Medium	
Research Programs Course [2]		0-3
ASTR 598	Special Research Programs	
ASTR 599	Master's Thesis [3,4]	3
	Credits	**7-10**
Spring		
ASTR 599	Master's Thesis [3, 4]	3
Choose one from the following:		3
ASTR 621	Planetary System Formation	
ASTR 630	Advanced Methods in Astrophysics	
Research Programs Course [2]		0-3
ASTR 598	Special Research Programs	
	Credits	**6-9**
	Total Credits	**33-39**

1 Students must take ASTR 500 Seminar as 1-credit in each of their first 3 semesters, for a total of 3 credits over 2 years

2 Students must take ASTR 598 Special Research Programs for 3 credits during fall of Yr2 or spring of Yr2.

3 Students on a Thesis track must take 6 total credits of ASTR 599 Master's Thesis in Yr 2. Students on a coursework-only track may substitute any 6 credits of regular Yr2 course in place of 599 credits

4 Students on a Thesis track who have completed 10 credits in each of their first 3 semesters, including 3 ASTR 598 Special Research Programs and 3 ASTR 599 Master's Thesis in fall of Yr2 only require 3 credits of ASTR 599 in spring of Yr2 in order to meet minimum requirements as detailed in Course Requirements above. Students on a Coursework-only track who have completed 10 credits in each of their first 3 semester, including 3 ASTR 598, only require 3 more regular course credits in spring of Yr2. However graduate students must enroll in 9 credits each semester in order to remain full time and retain eligibility for an GA. For students in their final semester of dissertation writing, it is possible to petition the Graduate School for permission to enroll in fewer credits, for that one semester only, to reduce tuition expenses. For students who do not complete their Masters in 2 years, they should continue to enroll in ASTR 599 in future semesters.

Master's Accelerate Program (MAP)

MAP Requirements

In addition to the requirements of the NMSU Graduate School, admission into the Astronomy MAP program requires:

A minimum GPA of 3.5
Student be classified as a rising junior
Completion of the MAP Referral Form and submission with all necessary signatures and anticipated course registrations prior to the first Friday of classes in the junior year.
Students may enroll in up to 12 credits of coursework at the 450+ level and count these credits toward their MS. At least 6 of these credits must come from graduate-level (500+) Astronomy courses, while the other 6 credits may be from outside the Astronomy Department (see below). A final grade of B or higher is required for a course to count toward the Astronomy MS. Students who complete all 12 credits with a final grade of B or higher may apply to the Astronomy MS program, but are not guaranteed admission. MAP-MS students must pass a final oral comprehensive exam toward the end of their MS year.

Students admitted to the Astronomy MAP-MS program will be considered for funding at 20 hours/week through Teaching Assistantships.

Prefix	Title	Credits
PHYS 471	Modern Experimental Optics	3
PHYS 476	Computational Physics	3
PHYS 480	Thermodynamics	3
PHYS 495	Mathematical Methods of Physics I	3

Bioinformatics - Master of Science

The Master of Bioinformatics degree has two tracks, a track for students without a BS/BA in computer science or equivalent degree (Track: *Non-Computing Background*) and a track for students with a BS/BA in computer science or equivalent degree (Track: *Computer Science Background*). In each of the track, two options are available, one with **thesis or project** option and a **course-work only** option.

- For **Thesis/Project option's students**: the requirements are listed in the tables below.
- For **Course-Work Only option's students:** Each student following this option is not required to complete a Thesis/Project but needs to take, in addition to the basic requirement (Core + Elective courses), **9 credits** of graduate courses that are listed for each track with the following restrictions:
  - One course can only be used to satisfy one requirement (e.g., if a course used to satisfy the core requirement category, it cannot be counted towards satisfying the requirements on **9 credits**).
  - At most 6 credits of CSCI 5996 Special Topics with different topics (i.e., with different subtitles) can be counted towards the degree program of the student.
  - No independent research or thesis/project (e.g., Computer Science course numbered > 5888) can be counted towards the degree program.

Track: Non-Computing Background

Prefix	Title	Credits
Required Courses		
Core Courses		
BIOL 550	Special Topics (Command Line Genomics)	3
A ST 505	Statistical Inference I	4
CSCI 4520	Python Programming I	3
BIOL 550	Special Topics (R for ecological sciences)	3
or CSCI 4530	R Programming I	
CSCI 5310	Bioinformatics Programming	3
Select one of the following		**3**
CSCI 5415	Introduction to Data Mining	
CSCI 5420	Applied Machine Learning I	
CSCI 5860	Algorithms in Systems Biology	
Elective Courses (2 from the following list)		*6*
CSCI 4545	Object Oriented Programming Transition	
CSCI 5305	Bioinformatics	
CSCI 5860	Algorithms in Systems Biology

or BIOL 566	Advanced Bioinformatics and NCBI Database	
A ST 550	Special Topics (Statistical bioinformatics course)	
A ST 550	Special Topics (Current topics in bioinformatics - open issues)	
Master's Project/Thesis/Internship [1]		*6*
CSCI 5994	Master's Project	
or CSCI 5999	Master's Thesis	
Total Credits		**31**

[1] A student can write a thesis (CSCI 5999 Master's Thesis), undertake a research project (CSCI 5994 Master's Project, or participate in an internship related to the degree. In each case, six graduate credits are required and a written approval from the student's advisor must be obtained before the student undertakes this part of the study. For students with thesis or project, the students are required to sustain a final exam, covering the thesis/research project.

MOLB 542	Biochemistry I	
MOLB 546	Biochemistry II	
MOLB 590	Discussions in Molecular Biology	
Master Thesis/Project/Internship [1]		*6*
CSCI 5999	Master's Thesis	
or CSCI 5994	Master's Project	
Total Credits		
Total Credits		**30**

[1] A student can write a thesis (CSCI 5999 Master's Thesis), undertake a research project (CSCI 5994 Master's Project), or participate in an internship related to the degree. In each case, six graduate credits are required and a written approval from the student's advisor must be obtained before the student undertakes this part of the study. For students with thesis or project, the students are required to sustain a final exam, covering the thesis/research project.

Degree Road Map

- **For students with non-computing background**
  - Semester 1: BIOL 550 Special Topics (Command Line Genomics), CSCI 4530 R Programming I, A ST 505 Statistical Inference I
  - Semester 2: CSCI 4520 Python Programming I one elective course, CSCI 5310 Bioinformatics Programming
  - Semester 3: CSCI 5860 Algorithms in Systems Biology, Master's project/thesis/internship (3 credits), one elective
  - Semester 4: Master's project/thesis/internship (3 credits)
  - For students following the **Course Work Only** option, the Master's project/thesis/internship course in Semester 3 and 4 should be changed to a course on the list and an extra course in Semester 4.
- **For students with Computer Science background**
  - Semester 1: CSCI 5505 Analysis of Algorithms, CSCI 5305 Bioinformatics, A ST 505 Statistical Inference I
  - Semester 2: CSCI 5310 Bioinformatics Programming, CSCI 5415 Introduction to Data Mining ,CSCI 5810 Advanced Software Engineering
  - Semester 3: Master's project/thesis/internship (3 credits), CSCI 5860 Algorithms in Systems Biology, and an elective
  - Semester 4: Master's project/thesis/internship (3 credits)
  - For students following the **Course Work Only** option, the Master's project/thesis/internship course in Semester 3 and 4 should be

changed to a course on the list and an extra course in Semester 4.

A Suggested Plan of Study for Students (with non-computing background)

It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Semester 1		Credits
CSCI 4530	R Programming I	3
A ST 505	Statistical Inference I	4
BIOL 550	Special Topics (Command Line Genomics)	1-3
	Credits	**8-10**
Semester 2		
CSCI 4520	Python Programming I	3
CSCI 5310	Bioinformatics Programming	3
Elective Course		3
	Credits	**9**
Semester 3		
CSCI 5415	Introduction to Data Mining	3
CSCI 5860	Algorithms in Systems Biology	3
Master's Project/Thesis or Internship		3
	Credits	**9**
Semester 4		
Master's project/thesis or internship		3
	Credits	**3**
	Total Credits	**29-31**

A Suggested Plan of Study for Students (with a Computer Science background)

It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Semester 1		Credits
CSCI 5415	Introduction to Data Mining	3
CSCI 5310	Bioinformatics Programming	3
BIOL 566	Advanced Bioinformatics and NCBI Database	3
	Credits	**9**
Semester 2		
CSCI 5305	Bioinformatics	3
CSCI 5505	Analysis of Algorithms	3
GENE 452	Applied Bioinformatics	3
	Credits	**9**
Semester 3		
CSCI 5810	Advanced Software Engineering	3
CSCI 5860	Algorithms in Systems Biology	3
Elective Course [1]		3
	Credits	**9**
Semester 4		
Master's project/thesis or internship		3
Elective Course [1]		3
	Credits	**6**
	Total Credits	**33**

Biology - Master of Science

The Master of Science degree can be obtained through either a thesis option or a non-thesis option. Both options require 30 credits of course work. The non-thesis option can be completed as an accelerated (one-year) program concentrating in biotechnology or through an individual degree plan in consultation with the student's Master of Science committee.

Master of Science Non-Thesis Option.
There are two formal course requirements for the MS non-thesis option as listed below.

Prefix	Title	Credits
Course Requirements		
BIOL 510	Current Topics in Biology	3
BIOL 540	Science and Ethics	1-3
Elective courses - courses with level from 450 - 598		24-26
At least 15 of the 30 credits should come from BIOL courses numbered 450 and above.		
Total Credits		**30**

Biotechnology Program

This is an accelerated (one year) non-thesis Master of Science degree in Biology that focuses on biotechnology. The program requires 30 hours of course work. The courses in this program are designed to prepare students for biotechnology-related careers in basic and applied research; in product development and testing; and in policy-making, regulation and law enforcement. The program of study includes practical training in molecular biology, genomics and bioinformatics, statistical analysis, business, bioethics and professional development skills. Additional graduate course work will provide students with further expertise in their individual areas of interest, including cell, molecular, and microbial biology; environmental, ecological and evolutionary biology; and general and integrative biology. Students who complete this training will be prepared for successful employment in academic, corporate, and government settings.

Prefix	Title	Credits
BIOL 510	Current Topics in Biology	3
BIOL 540	Science and Ethics	1-3
BIOL 541	Professional Development Seminar	1-3
MGMT 503	Organizational Behavior and Management Processes	3
A ST 505	Statistical Inference I	3-4
or BIOL 455	Biometry	
BIOL 509	Guided Biological Research Lab	3
or BIOL 550 Special Topics - Molecular Biology Techniques Lab		
BIOL 566	Advanced Bioinformatics and NCBI Database	3
or GENE 452	Applied Bioinformatics	
or BIOL 562	Advanced Genomics Technology	
Biological Knowledge Electives		8-13
At least 15 of the 30 credits should come from BIOL courses numbered 450 and above.		
Optional Internship [1]		
Total Credits		**30**

Master of Science - Thesis Option. There are three formal course requirements for the MS thesis option as listed below

Prefix	Title	Credits
BIOL 510	Current Topics in Biology	3
BIOL 540	Science and Ethics	1-3
Master's Thesis (4-6 Hours)		4-6
BIOL 599	Master's Thesis	
Elective courses - courses with level 450-598		18-22
At least 15 of the 30 credits should come from BIOL courses numbered 450 and above.		
Total Credits		**30**

For research toward the Master of Science degree, students can choose among the Department's three areas of emphasis:

1. Behavioral, Ecological and Evolutionary Biology
The Behavioral, Ecological and Evolutionary Biology program is appropriate for graduate students who wish to specialize in areas of biology that study the various processes that encompass the behavior, ecology, and evolution of living and extinct taxa.

2. Cell and Organismal Biology
The Cell and Organismal Biology program is appropriate for all Graduate students who wish to emphasize those areas of biology that integrate function and structure in cells, tissues, and organisms. This emphasis focuses in faculty areas of expertise in cell and molecular biology, neurobiology, developmental biology, and physiology.

3. Microbiology
The Microbiology curriculum is appropriate for graduate students who wish to specialize in areas of biology that study the various processes that occur in microbes (bacteria, viruses, fungi, and protists) such as their physiology, ecology, development or evolution.

All graduate students should develop their curriculum plan in consultation with the faculty advisor and graduate committee. Details of sample course sequences within the different emphases are described in the Biology Graduate Handbook available for download from the Graduate Student section of the Biology website https://bio.nmsu.edu/students/grads.html.

Graduate students may also earn a minor in other graduate departments and programs.

[1] This may include a research internship in a biotechnology company or in a biological research laboratory at NMSU or other research institutions. From 1 to 6 credits earned as BIOL 598 during an internship may count towards the required elective credits.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

Please talk to a faculty advisor about your MAP plan and develop a course plan in consultation with the advisor. The faculty advisor should preferably be from the area of your interest.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
BIOL 450	Special Topics	1-3
BIOL 455	Biometry	3
BIOL 459	Darwinism Versus Creationism	3
BIOL 467	Evolution	3
BIOL 474	Immunology	3
BIOL 475	Virology	3
BIOL 479	Medical Microbiology	3
BIOL 490	Neurobiology	3

Business Administration - Master of Business Administration

The Master of Business Administration (MBA) program is a professional program designed to provide students with a solid background in business practices and the problem-solving and people skills needed to become successful leaders in the global business environment. Program graduates are prepared for administrative or managerial positions in a wide variety of organizations, both private and governmental. The business and accounting programs at NMSU, including the MBA program, are accredited by AACSB International - The Association to Advance Collegiate Schools of Business.

The MBA program is offered in a traditional classroom with some online delivery and in a cohort-based distance program with a synchronous online component.

Details are available at http:\\business.nmsu.edu/mba (https://business.nmsu.edu/masters-programs/mba/).

Admissions

Applicants must meet the basic admission requirements of the Graduate School before they are considered for admission to the MBA program. To be considered for admission to the MBA program, applicants must meet one of the following criteria:

1. Have an undergraduate degree with a GPA of at least 3.0 from a regionally accredited U.S. College or University; or
2. Have achieved a minimum Graduate Management Admission Test (GMAT) score of 400 and a combined GMAT score and undergraduate GPA such that (GPA x 200)+ GMAT is greater than or equal to 1050; or
3. Have a graduate degree from a regionally accredited U.S. college or university; or
4. Have a Professional Certification in one of the following: Certified Public Accountant (CPA): Certified Management Account (CMA), Chartered Financial Analyst (CFA), Certified Financial Planner (CFP), or Project Management Professional (PMP) with an official copy of the certificate; or
5. Have completed at least five years of relevant, full-time, post-degree, professional work experience with an undergraduate GPA of at least 2.50 from a regionally accredited U.S. college or university.

As an alternative to the GMAT, students may submit a GRE score which can be converted to the equivalent GMAT score. (Information about the GMAT can be found at www.mba.com.) If a GMAT score is required, the official score must be submitted to the MBA Program Office at least one month prior to initial enrollment in the program. GRE scores are sent directly to the NMSU Graduate School.

A maximum of 9 credit hours of the required MBA courses may be completed prior to the student's acceptance into the MBA degree program.

Note: Regardless of the pathway to admission, all students must have an undergraduate degree.

Background Knowledge

The MBA program is designed to encourage participation by students with a variety of educational backgrounds, therefore changes to the background knowledge requisite have been implemented. Students entering the MBA program are no longer required to have the background knowledge requirements completed prior to starting the program. The courses in the MBA program will be taught in a manner where you would not need the prerequisites, however the student has the choice to take the courses. The courses are undergraduate courses and offered in fall, spring and summer semesters. See MBA Advisor.

Program Requirements (36 credits)

The MBA program consists of twelve courses. Eleven are required courses, and one approved elective.

Prefix	Title	Credits
Required Courses		
ACCT 503	Accounting for Managers	3
BCIS 502	Business Information Systems	3
BLAW 502	Legal Environment of Business	3
ECON 503	Managerial Economics	3
BFIN 503	Financial Management	3
MGMT 502	Operations Management	3
MGMT 503	Organizational Behavior and Management Processes	3
MGMT 590	Strategic Management	3
A ST 512	Quantitative Analysis for Business Decisions	3
MKTG 503	Marketing Management	3
B A 590	Professional Paper/Presentation	3
Elective course [1]		3
Total Credits		**36**

[1] MBA students may fulfill their elective requirement by selecting any 500-level or higher course within the College of Business or any approved concentration course

The Graduate School requires that students maintain a minimum cumulative GPA of 3.0 in all courses taken as a graduate student at NMSU. The MBA program requires, in addition, that every candidate for the MBA degree must graduate with at least a minimum cumulative GPA of 3.0 in all courses required for the General MBA degree.

The following course sequencing requirements must be satisfied:

1. B A 590 Professional Paper/Presentation must be completed during the final term of the student's program and is only open to students who have been accepted into the MBA degree program. ACCT 503 Accounting for Managers, BLAW 502 Legal Environment of Business, BFIN 503 Financial Management and MKTG 503 Marketing Management must be completed prior to enrollment in B A 590 Professional Paper/Presentation.
2. MGMT 590 Strategic Management must be completed at the end of the student's program of study and is only open to students who have been accepted into the MBA degree program. All MBA coursework other than B A 590 Professional Paper/Presentation must be completed prior to or during the same term as MGMT 590 Strategic Management.

Students requesting transfer credit for any graduate courses taken before admission to the MBA program must submit appropriate written justification, including course descriptions, syllabi, transcripts, etc. Up to nine credits of transfer work can be applied to meet MBA requirements if the credits were earned in a program accredited by AACSB International. Transfer credits for courses taken after admission to the program are generally not permitted, but advance approval should be requested and may be granted in exceptional situations.

Final Examination for the Degree:

A student may satisfy the Graduate School's requirement for a final exam by completing the General MBA Degree's necessary coursework that includes B A 590. Professional Paper/Presentation and supplemented or modified requirements for the concentration selected. The following two criteria must be met by the end of their final semester or at the end of a subsequent semester during which graduate-level courses are taken or retaken to meet the specified cumulative GPA.

(1) The student must have a minimum cumulative GPA of 3.0 based on all courses taken as a graduate student at NMSU, including those taken as part of the MBA program (required courses, elective course(s), and courses to fulfill the requirements of an MBA concentration or approved course substitution).

(2) The student must complete all required courses (36 credit hours) with a minimum cumulative GPA of 3.0 for the General MBA (11 required courses and 1 elective course, approved course substitutions, and any approved transfer courses).

A student who fails to meet one or both previous criteria may, during one or more subsequent semesters, take or retake additional graduate-level or

MBA-specific courses to increase the cumulative GPA, thereby satisfying the Graduate School's requirement for a final exam.

Note 1: The General MBA program (excluding concentrations) consists of eleven required courses and one elective course (totaling 36 credits). The MBA elective course consists of 1 graduate business elective (numbered 500 or above) as listed on the MBA web page.

Note 2: The College of Business reserves the right to change the published requirements. Any such changes will be announced and will not be retroactive. Currently, MBA courses are offered once each year except for the elective and some concentration courses. Always consult an academic advisor or department head before registering for classes.

A thesis is not required. With special approval, however, a degree candidate may elect to write a thesis with at least 6 credit hours earned under B A 599 (https://catalogs.nmsu.edu/search/?P=B%20A%20599) Master's Thesis in lieu of B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) Professional Paper/Presentation.

Concentrations: Students in the on-campus MBA program may elect to pursue one of several MBA concentrations:

- Agribusiness (p. 117)
- Finance (p. 119)
- Heath Services Management (p. 120)
- Information Systems (p. 121)
- Public Utility Regulation (p. 123)

Master's Accelerated Program Information

The Master's Accelerated Program allows qualifying NMSU business students to complete four MBA courses while still an undergraduate and may count those courses toward both their undergraduate degree and the Master of Business Administration (MBA).

Up to 12 hours of graduate course work can be applied toward the completion of the master's degree. To receive graduate credit for the 12 credit hours, students must receive a grade of B or higher. MAP courses completed with a grade of B- or lower are not eligible for graduate credit.

Student Qualifications

- The student must be classified as a Junior or Senior and may not have previously earned a Bachelor's Degree.
- The cumulative grade point average (GPA) must be a minimum of **3.75** to participate in the **Junior Year**.
- The cumulative grade point average (GPA) must be a minimum of **3.50** to participate in the **Senior Year**.

Accepted MAP Courses

Students may take any four of the following courses to count for both the MBA degree and as the required courses to meet their upper division business course and MBA course. Any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
ACCT 503	Accounting for Managers	3

Currently, MBA courses are offered once each year except for the elective and some concentration courses. Always consult an academic advisor or department head before registering for classes.

A thesis is not required. With special approval, however, a degree candidate may elect to write a thesis with at least 6 credit hours earned under B A 599 Master's Thesis in lieu of B A 590 Professional Paper/Presentation.

Students in the on-campus MBA program may elect to pursue a concentration in Finance. To fulfill this concentration, a student must take BFIN 535 and three additional 500-level BFIN courses (excluding BFIN 503 Financial Management which is a required course for the General MBA) for a total of 12 credits. These courses can be used as

substitutes for B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) Professional Paper/Presentation.

Master's Accelerated Program Information

The Master's Accelerated Program allows qualifying NMSU business students to complete four MBA courses while still an undergraduate and may count those courses toward both their undergraduate degree and the Master of Business Administration (MBA).

Up to 12 hours of graduate course work can be applied toward the completion of the master's degree. To receive graduate credit for the 12 credit hours, students must receive a grade of B or higher. MAP courses completed with a grade of B- or lower are not eligible for graduate credit.

Student Qualifications

- The student must be classified as a Junior or Senior and may not have previously earned a Bachelor's Degree.
- The cumulative grade point average (GPA) must be a minimum of **3.75** to participate in the **Junior Year**.
- The cumulative grade point average (GPA) must be a minimum of **3.50** to participate in the **Senior Year**.

Accepted MAP Courses

Students may take any four of the following courses to count for both the MBA degree and as the required courses to meet their upper division business course and MBA course. Any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits

B A 590	Professional Paper/Presentation	3
Elective Course [1]		3
Total Credits		**36**

[1] MBA students may fulfill their elective requirement by selecting any 500-level or higher course within the College of Business or any approved concentration course

The Graduate School requires that students maintain a minimum cumulative GPA of 3.0 in all courses taken as a graduate student at NMSU. The MBA program requires, in addition, that every candidate for the MBA degree must graduate with at least a minimum cumulative GPA of 3.0 in all courses required for the General MBA degree.

The following course sequencing requirements must be satisfied:

1. B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) Professional Paper/Presentation must be completed during the final term of the student's program and is only open to students who have been accepted into the MBA degree program. ACCT 503 (https://catalogs.nmsu.edu/search/?P=ACCT%20503) Accounting for Managers, BLAW 502 (https://catalogs.nmsu.edu/search/?P=BLAW%20502) Legal Environment of Business, BFIN 503 (https://catalogs.nmsu.edu/search/?P=BFIN%20503) Financial Management and MKTG 503 (https://catalogs.nmsu.edu/search/?P=MKTG%20503) Marketing Management must be completed prior to enrollment in B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) Professional Paper/Presentation.
2. MGMT 590 (https://catalogs.nmsu.edu/search/?P=MGMT%20590) Strategic Management must be completed at the end of the student's program of study and is only open to students who have been accepted into the MBA degree program. All MBA coursework other than B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) Professional Paper/Presentation must be completed prior to or during the same term as MGMT 590 (https://catalogs.nmsu.edu/search/?P=MGMT%20590) Strategic Management.

Students requesting transfer credit for any graduate courses taken before admission to the MBA program must submit appropriate written justification, including course descriptions, syllabi, transcripts, etc. Up to nine credits of transfer work can be applied to meet MBA requirements if the credits were earned in a program accredited by AACSB International. Transfer credits for courses taken after admission to the program are

generally not permitted, but advance approval should be requested and may be granted in exceptional situations.

Final Examination for the Degree: A student may satisfy the Graduate School's requirement for a final exam by completing the General MBA Degree's necessary coursework that includes B A 590. Professional Paper/Presentation and supplemented or modified requirements for the concentration selected. The following two criteria must be met by the end of their final semester or at the end of a subsequent semester during which graduate-level courses are taken or retaken to meet the specified cumulative GPA.

(1) The student must have a minimum cumulative GPA of 3.0 based on all courses taken as a graduate student at NMSU, including those taken as part of the MBA program (required courses, elective course(s), and courses to fulfill the requirements of an MBA concentration or approved course substitution).

(2) The student must complete all required courses (36 credit hours) with a minimum cumulative GPA of 3.0 for the General MBA (11 required courses and 1 elective course, approved course substitutions, and any approved transfer courses).

A student who fails to meet one or both previous criteria may, during one or more subsequent semesters, take or retake additional graduate-level or MBA-specific courses to increase the cumulative GPA, thereby satisfying the Graduate School's requirement for a final exam.

Note 1: The General MBA program (excluding concentrations) consists of eleven required courses and one elective course (totaling 36 credits). The MBA elective course consists of 1 graduate business elective (numbered 500 or above) as listed on the MBA web page.

Note 2: The College of Business reserves the right to change the published requirements. Any such changes will be announced and will not be retroactive. Currently, MBA courses are offered once each year except for the elective and some concentration courses. Always consult an academic advisor or department head before registering for classes.

A thesis is not required. With special approval, however, a degree candidate may elect to write a thesis with at least 6 credit hours earned under B A 599 (https://catalogs.nmsu.edu/search/?P=B%20A%20599) Master's Thesis in lieu of B A 590 (https://catalogs.nmsu.edu/search/?P=B%20A%20590) Professional Paper/Presentation.

MBA Students who want to have a concentration in Health Services Management must complete 3 Public Health Courses (one of which fulfills the MBA required elective) .

Prefix	Title	Credits
Required Courses		
PHLS 5340	Public Health Law and Ethics	3
PHLS 5140	Health Services System: Administration and Organization	3
PHLS 5820	Health Informatics	3
PHLS 5160	Public Health Policy Analysis	3

Chemical Engineering - Master of Engineering in Chemical Engineering

The Master of Engineering in Chemical Engineering is a 30 credit hour coursework and/or project-based degree with flexibility of program design for professionals seeking advanced coursework in chemical engineering. Individual degree plans are based on consultation between the student and their advisor. Master of Engineering in Chemical Engineering requirements are as follows:

Prefix	Title	Credits
CHME Coursework		
A minimum of 15 credits of CHME 500+ courses (select from CHME 501 to CHME 594) (courses 450+ may also count up to 12 credits):		15

CHME 501	Graduate Thermodynamics for Chemical Engineers
CHME 506	Graduate Transport Phenomena(s)
CHME 516	Graduate Numerical Methods in Chemical Engineering
CHME 542	Graduate Reactor Analysis and Design (s)
CHME 548	Industrial Safety
CHME 564	Polymer Science & Engineering
CHME 565	Rheology and Viscoelasticity
CHME 567	Nanoscience and Nanotechnology
CHME 570	Introduction to Nuclear Energy
CHME 571	Health Physics
CHME 574	Power Plant Design
CHME 576	Nuclear Fuel Cycles
CHME 578	Electrochemistry: Basics & Applications
CHME 590	Graduate Seminar
CHME 591	Graduate Special Topics
CHME 593	Graduate Special Projects
CHME 594	Professional Communication in Chemical Engineering
Open Electives	
Students are expected to take an additional minimum of 15 credits of electives from any areas such as chemical engineering, other engineering, business, economics, fundamental sciences, environmental sciences, etc., to be consistent with their personal ME theme or emphasis. Thesis, research, or dissertation credits do not count.	15
Optional Engineering Project Sequence or CHME Coursework [1]	
CHME 595	Chemical Process Design and Business Analysis
CHME 596	Chemical Process Industries Research
CHME 597	Advanced Chemical Process Industry Analysis
Total Credits	**30**

[1] Students will define and execute an engineering project through their employer while taking the following 3-semester course sequence. This may replace 6 credit hours of CHME coursework.

First Year	
Fall	**Credits**

[1] Students are expected to take a minimum of 15 credits of open electives from any areas such as chemical engineering, other engineering, business, economics, fundamental sciences, environmental sciences, etc., to be be consistent with their personal ME theme or emphasis.

[2] Students interested in a Chemical Process Industries emphasis may replace 6 credits of courses with the following sequence: CHME 595 Chemical Process Design and Business Analysis, CHME 596 Chemical Process Industries Research, CHME 597 Advanced Chemical Process Industry Analysis.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.

Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program. Other courses may be considered after a consultation with the program advisor.

Prefix	Title	Credits
CHME 451	Intellectual Property for Engineers and Scientists	3
CHME 452	Chemical Process Design & Economic Evaluation	3

Chemical Engineering - Master of Science in Chemical Engineering

The program of study leading to the Master of Science in Chemical Engineering consists of 32 credits which includes:

- Required CHME core graduate courses (14 credits)
- CHME elective courses numbered 455-589 (3 credits)
- Other graduate elective courses (9 credits)
- Thesis as CHME 599 Master's Thesis (6 credits)

Prefix	Title	Credits
Required Core Courses		
CHME 501	Graduate Thermodynamics for Chemical Engineers	3
CHME 506	Graduate Transport Phenomena(s) (Spring semester course)	3
CHME 516	Graduate Numerical Methods in Chemical Engineering	3
CHME 542	Graduate Reactor Analysis and Design (s) (Spring semester course)	3
CHME 594	Professional Communication in Chemical Engineering	2
Electives		
CHME electives (select from CHME 455-CHME 594 except CHME 498)		3
Electives [1]		9
Master's Thesis		
CHME 599	Master's Thesis (minimum 6 credit hours before the thesis defense)	6
Total Credits		**32**

[1] Elective courses are intended to supplement the research work of each graduate student. These courses must be numbered 450 or above and must be approved by the thesis advisor.

First Year

Fall		**Credits**
CHME 501	Graduate Thermodynamics for Chemical Engineers	3
CHME 516	Graduate Numerical Methods in Chemical Engineering	3
CHME Elective		3
	Credits	**9**
Spring		
CHME 506	Graduate Transport Phenomena(s)	3
CHME 542	Graduate Reactor Analysis and Design (s)	3
CHME 594	Professional Communication in Chemical Engineering	2
CHME 599	Master's Thesis	1
	Credits	**9**
Second Year		
Fall		
CHME 599	Master's Thesis	3

	Total Credits	**32**

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.

Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program. Other courses may be considered after a consultation with the program advisor.

Prefix	Title	Credits
CHME 452	Chemical Process Design & Economic Evaluation	3
CHME 455	Chemical Plant Design	3
CHME 455 L	Chemical Plant Simulation	1
CHME 461	Calculation of Material and Molecular Properties	3
CHME 464	Polymer Science & Engineering	3
CHME 467	Nanoscience and Nanotechnology	3
CHME 470	Introduction to Nuclear Energy	3
CHME 471	Health Physics	3
CHME 474	Power Plant Design	3

CHME 476	Nuclear Fuel Cycles	3
CHME 478	Electrochemistry: Basics & Applications	3
CHME 479	Corrosion and Degradation of Materials	3
CHME 481	Biomedical Engineering and Engineering Healthcare	3
CHME 486	Biofuels	3
CHME 495	Brewing Science & Engineering	3
CHME 495 L	Brewing Science & Technology Lab	1
CHME 501	Graduate Thermodynamics for Chemical Engineers	3
CHME 506	Graduate Transport Phenomena(s)	3
CHME 516	Graduate Numerical Methods in Chemical Engineering	3
CHME 542	Graduate Reactor Analysis and Design (s)	3
CHME 548	Industrial Safety	3
CHME 564	Polymer Science & Engineering	3
CHME 565	Rheology and Viscoelasticity	3
CHME 567	Nanoscience and Nanotechnology	3
CHME 570	Introduction to Nuclear Energy	3
CHME 571	Health Physics	3
CHME 574	Power Plant Design	3
CHME 576	Nuclear Fuel Cycles	3
CHME 578	Electrochemistry: Basics & Applications	3
CHME 591	Graduate Special Topics	1-3
CHME 593	Graduate Special Projects	1-3
CHME 594	Professional Communication in Chemical Engineering	2
CHME 595	Chemical Process Design and Business Analysis	3
CHME 596	Chemical Process Industries Research	1
CHME 597	Advanced Chemical Process Industry Analysis	2

Chemistry (Biochemistry) - Master of Science

The Master of Science in Chemistry with a concentration in Biochemistry can be obtained through either a thesis option or a non-thesis option. Both options require at least 30 credits of course work. The thesis option program is designed to teach students modern approaches to chemistry and biochemistry (courses), experimental methods to problem–solving (research), and communication skills in the discipline (seminars and colloquia). All M.S. candidates are required to complete the courses below. Thesis-option students must also pass a qualifying exam at the end of the first year and a final comprehensive examination which includes a written thesis. Non-thesis option students must pass a final exam, the format and content of which will be decided by a departmental committee.

Prefix	Title	Credits
Required Courses		
CHEM 475	Central Concepts in Chemistry - Safety	1
CHEM 476	Central Concepts in Chemistry - Research Ethics	1
CHEM 477	Central Concepts in Chemistry - ProfessionalDevelopment (Required Courses)	1
CHEM 510	Graduate Student Seminar [1]	3
BCHE 542	Biochemistry I	3
BCHE 545	Molecular and Biochemical Genetics	3
BCHE 546	Biochemistry II: Central and Intermediary Metabolism	3
BCHE 600	Research [2]	9-12
Additional Graduate-level courses [3]		*6-12*
Total Credits		**30-39**

1. Only 3 credits of CHEM 510 Graduate Student Seminar will count toward the M.S. degree. For the thesis option, at least one credit of CHEM 510 Graduate Student Seminar must be taken for a letter grade of B- or better. The remaining CHEM 510 Graduate Student Seminar credits for the thesis option and all credits for the non-thesis option may be taken as S/U.
2. Required only for thesis-option.
3. Additional courses are chosen based on major emphasis area, through consultation with the thesis committee or an advisor and can include research credits. These courses may include any course numbered 450 or above in the following subject areas: CHEM, BCHE, PHYS, MATH, CSCI, BIOL, A ST, CHME, GENE, MOLB, SOCI, EDUC, EPWS, ENVS, ANSC.

Chemistry - Master of Science

The Master of Science in Chemistry is offered in the major emphasis areas of analytical, inorganic, organic, and physical chemistry, and biochemistry. The M.S. degree can be obtained through either a thesis option or a non-thesis option. Both options require at least 30 credits of course work. 15 of these credits must be taken at NMSU. The thesis option program is designed to teach students modern approaches to chemistry and biochemistry (courses), experimental methods to problem–solving (research), and communication skills in the discipline (seminars and colloquia). All M.S. candidates are required to complete the courses below. Thesis-option students must also pass a qualifying exam at the end of the first year and a final comprehensive examination which includes a written thesis. Non-thesis option students must pass a final exam, the format and content of which will be decided by a departmental committee.

Prefix	Title	Credits
Required Courses		
CHEM 475	Central Concepts in Chemistry - Safety	1
CHEM 476	Central Concepts in Chemistry - Research Ethics	1
CHEM 477	Central Concepts in Chemistry - ProfessionalDevelopment (Required Courses)	1
CHEM 501	Central Concepts in Chemistry - Energy	3
CHEM 502	Central Concepts in Chemistry - Structure	3
CHEM 503	Central Concepts in Chemistry - Dynamics	3
CHEM 504	Central Concepts in Chemistry - Measurements	3
CHEM 510	Graduate Student Seminar [1]	3
CHEM 600	Research [2]	9
Additional required course [3]		*3*
Total Credits		**30**

1. Only 3 credits of CHEM 510 will count toward the M.S. degree. For the thesis option, at least one credit of CHEM 510 must be taken for a letter grade of B- or better. The remaining CHEM 510 credits for the thesis option and all credits for the non-thesis option may be taken as S/U.
2. Required only for thesis-option.
3. Additional courses are chosen based on major emphasis area, through consultation with the thesis committee or an advisor and can include research credits. These courses may include any course numbered 450

or above in the following subject areas: CHEM, BCHE, PHYS, MATH, C S, BIOL, A ST, CHME, GENE, MOLB, SOCI, EDUC, EPWS, ENVS, ANSC.

Civil Engineering - Master of Engineering in Civil Engineering

The Master of Engineering degree in Civil Engineering (M.E. in CE) is a coursework only degree and several courses are offered online. The M.E. in CE degree requires a total of 30-31 credit hours consisting of one general elective course (3 credit hours); seven technical electives in Civil, Environmental, and/or Agricultural Engineering (21-22 credit hours); and two electives from engineering disciplines outside the department and/or other areas of interest outside the college (6 credit hours).

Prefix	Title	Credits
General elective course		**3**
C E 490	Introduction to Artificial Intelligence for Civil Engineers [1]	
C E 510	Introduction to Nondestructive Testing [1]	
C E 514	Numerical Methods in Civil Engineering [1]	
C E 535	Technical Communication for Engineers [1]	
CE, ENVE, and A EN elective courses [2]		**21-22**
Seven courses to be selected from the following list of courses (numbered 450-599) [3]		
Environmental Engineering		
ENVE 456	Environmental Engineering Design	
ENVE 459	Environmental Microbiology [1]	
ENVE 487	Air Pollution Control Systems Design [1]	
ENVE 550	Aquatic Chemistry [1]	
ENVE 551	Unit Processes/Operation of Water Treatment [1]	
ENVE 552	Unit Processes/Operation of Wastewater Treatment [1]	
ENVE 557	Surface Water Quality Modeling [1]	
Geotechnical Engineering		
C E 457	Foundation Design	
C E 460	Site Investigation	
C E 470	Design of Municipal and Hazardous Waste Landfills	
C E 479	Pavement Analysis and Design [1]	
C E 485	Design of Earth Dams	
C E 507	Design of Earth Retaining Structures [1]	
C E 508	Advanced Soil Behavior	
C E 509	Deep Foundations [1]	
C E 579	Ground Improvement [1]	
C E 585	Slope Stability Analysis and Design	
Structural Engineering		
C E 469	Structural Systems	
C E 501	Advanced Mechanics of Materials [1]	
C E 502	Advanced Mechanics of Steel Structures [1]	
C E 515	Finite Element Methods [1]	
C E 544	Advanced Design of Steel Structures [1]	
C E 545	Advanced Concrete Design [1]	
C E 554	Wood Design [1]	
C E 555	Masonry Design	
C E 547	Bridge Engineering	
C E 571	Structural Dynamics [1]	
Water Resources and Agricultural Engineering		
C E 452	Geohydrology [1]	
C E 482	Hydraulic Structures	
C E 483	Surface Water Hydrology	
C E 531	Open Channel Hydraulics	
C E 557	Water Resources Development [1]	
C E 581	Ground Water Hydrology [1]	
C E 582	Statistical Hydrology	
A EN 459	Groundwater, Wells & Pumps	
A EN 478	Irrigation and Drainage Engineering	
Transportation and Construction		
C E 471	Transportation Engineering [1]	
C E 477	Engineering Economics and Construction Management [1]	
MECE elective courses [4]		**6**
Two courses to be selected from the following list of courses (numbered 450-599) [3]		
Chemical and Materials Engineering		
CHME 479	Corrosion and Degradation of Materials	
CHME 567	Nanoscience and Nanotechnology [1]	
Engineering Technology		
E T 455	Cost Estimating and Scheduling	
E T 459	Construction Technology and Management	
E T 472	Intelligent Transportation Systems (ITS) [1]	
E T 480	Innovation and Product Development	
SUR 451	Spatial Data Adjustment II	
SUR 452	Surveying Practicum	
SUR 461 & 461L	GNSS Positioning and GNSS Positioning Lab	
SUR 464	Legal Principles and Boundary Law II	
SUR 485	Emerging Techniques in Geospatial Technologies	
Industrial Engineering		
I E 459	Systems Thinking and Decision Making [1]	
I E 515	Stochastic Processes Modeling [1]	
I E 523	Advanced Engineering Economy [1]	
I E 533	Linear Programming [1]	
I E 534	Nonlinear Programming [1]	
I E 535	Discrete Optimization [1]	
I E 537	Large Scale Systems Engineering [1]	
I E 561	Advanced Safety Engineering [1]	
I E 563	Topics in Engineering Administration [1]	
Mechanical Engineering		
M E 456	Experimental Modal Analysis	
M E 502	Elasticity I [1]	
M E 504	Continuum Mechanics [1]	
M E 530	Intermediate Fluid Mechanics	
M E 533	Numerical Methods for Fluid Mechanics and Heat Transfer	
M E 557	Engineering Failure Analysis [1]	
M E 570	Engineering Analysis I [1]	
Total Credits		**30-31**

1 Course offered online in the Fall, Spring, or Summer semester

2 Electives should be chosen from at least 2 different areas (e.g., geotechnical and structural, environmental and water resources/agricultural)

[3] Up to 12 credit hours of undergraduate courses numbered 450-499 may be applied towards the M.E. in CE degree (excess of this limit requires approval of department head)

[4] Courses listed represent only a partial list of engineering electives that may be taken outside the department; courses in other areas of interest outside the college may be taken including, but not limited to, environmental science, mathematics, statistics, geography, soil science, geology, business, economics, and management (all M.E. in CE electives must be approved by graduate advisor and department head)

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

Please talk to an CE faculty advisor about your MAP plan and develop a course plan in consultation with the advisor. The faculty advisor should preferably be from the CE area of your interest.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

For students completing their BSCE degree under the **Geotechnical** option:

Prefix	Title	Credits
C E 457	Foundation Design	3
C E 460	Site Investigation	3
C E 470	Design of Municipal and Hazardous Waste Landfills	3
C E 471	Transportation Engineering	3
C E 477	Engineering Economics and Construction Management	3
C E 479	Pavement Analysis and Design	3
C E 485	Design of Earth Dams	3
C E 507	Design of Earth Retaining Structures	3
C E 508	Advanced Soil Behavior	3

For students completing their BSCE degree under the **Structural** option:

Prefix	Title	Credits
C E 457	Foundation Design	3
C E 460	Site Investigation	3
C E 469	Structural Systems	3
C E 471	Transportation Engineering	3
C E 477	Engineering Economics and Construction Management	3
C E 501	Advanced Mechanics of Materials	3
C E 510	Introduction to Nondestructive Testing	3
C E 514	Numerical Methods in Civil Engineering	3
C E 515	Finite Element Methods	3
C E 554	Wood Design	3
C E 555	Masonry Design	3
C E 547	Bridge Engineering	3

For students completing their BSCE degree under the **Environmental** option:

Prefix	Title	Credits
C E 457	Foundation Design	3
C E 470	Design of Municipal and Hazardous Waste Landfills	3
C E 477	Engineering Economics and Construction Management	3
ENVE 550	Aquatic Chemistry	3
ENVE 551	Unit Processes/Operation of Water Treatment	3
ENVE 552	Unit Processes/Operation of Wastewater Treatment	3

For students completing their BSCE degree under the **Water Resources** option:

Prefix	Title	Credits
A EN 459	Groundwater, Wells & Pumps	3
A EN 478	Irrigation and Drainage Engineering	3
C E 452	Geohydrology	3-4
C E 457	Foundation Design	3
C E 477	Engineering Economics and Construction Management	3
C E 482	Hydraulic Structures	3
C E 483	Surface Water Hydrology	3
C E 531	Open Channel Hydraulics	3
C E 557	Water Resources Development	3

For students completing a BS degree in **Engineering Technology** or **Geomatics**:

Prefix	Title	Credits
E T 455	Cost Estimating and Scheduling	3
E T 459	Construction Technology and Management	3
E T 471	Transportation Engineering and Technology	3
E T 472	Intelligent Transportation Systems (ITS)	3
E T 480	Innovation and Product Development	3
SUR 451	Spatial Data Adjustment II	3
SUR 461 & 461L	GNSS Positioning and GNSS Positioning Lab	3
SUR 464	Legal Principles and Boundary Law II	3

SUR 485	Emerging Techniques in Geospatial Technologies	3

NOTE: No more than 4 courses from any of the lists above can be applied in the MAP for the Master of Engineering in Civil Engineering (MECE) degree.

Civil Engineering - Master of Science in Civil Engineering

In support of the mission and vision statements for the graduate program, the department adopts the following goals for the Master of Science (M.S.) in Civil Engineering degree:

1. Prepare students to fulfill the academic prerequisites specified by the Americans Society of Civil Engineers (ASCE) for Licensure and Professional Practice in Civil Engineering.
2. Prepare students to attain the Body of Knowledge specified by ASCE necessary for entry into the practice of civil engineering at the professional level.
3. Prepare students in conducting applied research in areas relevant to the practice of civil engineering.
4. Prepare students for advanced graduate studies towards a terminal degree.

Students may choose from the geotechnical, structural, or water resources engineering options following the Thesis or Non-Thesis track, requirements of which are specified below. Exceptions to these requirements must be approved by the head of the department. Further information related to the M.S. degree may be found under the Academic Programs of Study (p. 31) section of the catalog.

Option: Geotechnical Engineering

Thesis Track

Prefix	Title	Credits
Background Courses [4]		
C E 357	Soil Mechanics	
C E 457	Foundation Design	
GEOL 1110G	Physical Geology (or higher-level courses)	
C E 445	Reinforced Concrete Design (or higher-level courses based on ACI)	
Core Courses [1]		**9**
Select three from the following:		
C E 508	Advanced Soil Behavior	
C E 509	Deep Foundations	
C E 579	Ground Improvement	
Optional Courses		**12-13**
Select four from the following:		
C E 452	Geohydrology	
C E 460	Site Investigation	
C E 470	Design of Municipal and Hazardous Waste Landfills	
C E 479	Pavement Analysis and Design	
C E 485	Design of Earth Dams	
C E 507	Design of Earth Retaining Structures	
C E 585	Slope Stability Analysis and Design	
Select 3 credits from courses outside the area or department (450 or higher) [2]		**3**
Research Credits		**6**
C E 599	Master's Thesis [3]	
Total Credits		**30-31**

1. A course listed as core may be taken as one of the four optional courses if it is not counted already as one of the three core courses.
2. The selected course outside the area or department must be previously approved by the academic advisor or student's Graduate Committee.
3. A maximum of 6 credits are counted toward the Master's Degree program.
4. A course listed as background provides fundamental knowledge to pursue graduate studies in geotechnical engineering but does not satisfy the course requirements for the MS degree (exception: CE 457).

Total credits needed for the Thesis Track are 24 credits of coursework and 6 credits of C E 599 Master's Thesis research.

Non-Thesis Track

The background and core courses for the Non-Thesis Track in Geotechnical Engineering are the same as those listed under the Thesis Track. Under optional courses, Non-Thesis students must select one additional course (i.e., total of five optional courses) from the list provided for the Thesis Track. In addition, Non-Thesis students must complete 3 credits of CE 598 - Special Research Programs in place of 6 credits of CE 599 and pass a final exit exam covering coursework and their research project.

Total credits needed for the Non-Thesis Track are 27 credits of coursework and 3 credits of C E 598 Special Research Programs.

Option: Structural Engineering

Thesis Track

Prefix	Title	Credits
Background Courses [2]		
C E 315	Structural Analysis	
C E 444	Elements of Steel Design (based on AISC)	
C E 445	Reinforced Concrete Design (based on ACI)	
Core Courses		**15**
C E 501	Advanced Mechanics of Materials	
C E 515	Finite Element Methods	
C E 544	Advanced Design of Steel Structures	
C E 545	Advanced Concrete Design	
C E 571	Structural Dynamics	
Optional Courses [3]		**9**
Select three from the following:		
C E 490	Introduction to Artificial Intelligence for Civil Engineers	
C E 502	Advanced Mechanics of Steel Structures	
C E 504	Advanced Engineering Design	
C E 507	Design of Earth Retaining Structures	
C E 509	Deep Foundations	
C E 510	Introduction to Nondestructive Testing	
C E 514	Numerical Methods in Civil Engineering	
C E 547	Bridge Engineering	
C E 554	Wood Design	
C E 555	Masonry Design	
C E 590	Advanced Artificial Intelligence for Civil Engineers	
Research Credits		**6**

C E 599	Master's Thesis [1]	
Total Credits		**30**

[1] A maximum of 6 credits are counted toward the Master's Degree program.

[2] A course listed as background provides fundamental knowledge to pursue graduate studies in structural engineering but does not satisfy the course requirements for the MS degree.

[3] A course listed as optional may replace one of the five core courses if it is not counted already as one of the three optional courses (requires department head approval)

Total credits needed for the Thesis Track are 24 credits of coursework and 6 credits of C E 599 Master's Thesis research.

Non-Thesis Track

The background and core courses for the Non-Thesis Track in Structural Engineering are the same as those listed under the Thesis Track. Under optional courses, Non-Thesis students must select one additional course (i.e., total of four optional courses) from the list provided for the Thesis Track. In addition, Non-Thesis students must complete 3 credits of CE 598 - Special Research Programs in place of 6 credits of CE 599 and pass a final exit exam covering coursework and their research project.

Total credits needed for the Non-Thesis Track are 27 credits of coursework and 3 credits of C E 598 Special Research Programs.

Option: Water Resources Engineering

Thesis Track

Prefix	Title	Credits
Requirements		
Core courses		12
Statistics		3
Area of Interest Courses		9
C E 599	Master's Thesis	6
Total Credits		**30**

Non-Thesis Track

Prefix	Title	Credits
Requirements		
Core courses		12
Statistics		3
Area of Interest Courses		15
Total Credits		**30**

Foundation Requirements

1. ABET- Accredited BS in Civil, Agricultural, Geological Engineering, or closely related field or equivalent (as per existing Civil Engineering Department regulations)
2. One course in surface water hydrology
3. One course in hydrogeology or geohydrology
4. At least three semesters of hydraulics and hydraulic design

Core Courses

Prefix	Title	Credits
Core Courses		**12**
C E 531	Open Channel Hydraulics	
C E 557	Water Resources Development	
C E 581	Ground Water Hydrology	
C E 582	Statistical Hydrology	
Statistics		**3**
A ST 505	Statistical Inference I (or advanced statistics class if student is qualified)	
Total Credits		**15**

Area of Interest Courses (Flexible)

Agricultural/ Civil/ Environmental Engineering

Prefix	Title	Credits
A EN 459	Groundwater, Wells & Pumps	
A EN 478	Irrigation and Drainage Engineering	
C E 452	Geohydrology	
C E 482	Hydraulic Structures	
C E 483	Surface Water Hydrology	
C E 485	Design of Earth Dams	
C E 503	Special Design and Analysis Program	
C E 504	Advanced Engineering Design	
C E 682	Topics in Hydrodynamics II	
ENVE 557	Surface Water Quality Modeling	
ENVE 630	Fate and Transport of Environmental Contaminants	
SOIL 652	Advanced Soil Physics	

Modeling/ Fluid Mechanics

Prefix	Title	Credits
M E 530	Intermediate Fluid Mechanics	
M E 533	Numerical Methods for Fluid Mechanics and Heat Transfer	

Management/Optimization

Prefix	Title	Credits
I E 533	Linear Programming	
I E 534	Nonlinear Programming	
I E 535	Discrete Optimization	

Electives outside College of Engineering: A ST, AEEC, GEOG, GEOL, MATH, STAT, and SOIL (must be approved by the Advisor and Committee Members).

_____

Notes:

1. International students may be required to take English language courses to show proficiency in English.
2. At least half of the credits of the Master's Degree program must be 500 level or higher.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

Please talk to an CE faculty advisor about your MAP plan and develop a course plan in consultation with the advisor. The faculty advisor should preferably be from the CE area of your interest.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

For students completing their BSCE degree under the **Geotechnical** option:

Prefix	Title	Credits
C E 457	Foundation Design	3
C E 460	Site Investigation	3
C E 470	Design of Municipal and Hazardous Waste Landfills	3
C E 471	Transportation Engineering	3
C E 477	Engineering Economics and Construction Management	3
C E 479	Pavement Analysis and Design	3
C E 485	Design of Earth Dams	3
C E 507	Design of Earth Retaining Structures	3
C E 508	Advanced Soil Behavior	3

For students completing their BSCE degree under the **Structural** option:

Prefix	Title	Credits
C E 457	Foundation Design	3
C E 460	Site Investigation	3
C E 469	Structural Systems	3
C E 471	Transportation Engineering	3
C E 477	Engineering Economics and Construction Management	3
C E 501	Advanced Mechanics of Materials	3
C E 510	Introduction to Nondestructive Testing	3
C E 514	Numerical Methods in Civil Engineering	3
C E 515	Finite Element Methods	3
C E 547	Bridge Engineering	3
C E 554	Wood Design	3
C E 555	Masonry Design	3

For students completing their BSCE degree under the **Environmental** option:

Prefix	Title	Credits
C E 457	Foundation Design	3
C E 470	Design of Municipal and Hazardous Waste Landfills	3
C E 477	Engineering Economics and Construction Management	3
ENVE 456	Environmental Engineering Design	3
ENVE 459	Environmental Microbiology	3
ENVE 487	Air Pollution Control Systems Design	3
ENVE 550	Aquatic Chemistry	3
ENVE 551	Unit Processes/Operation of Water Treatment	3
ENVE 552	Unit Processes/Operation of Wastewater Treatment	3

For students completing their BSCE degree under the **Water Resources** option:

Prefix	Title	Credits
A EN 459	Groundwater, Wells & Pumps	3
A EN 478	Irrigation and Drainage Engineering	3
C E 452	Geohydrology	3-4

C E 557	Water Resources Development	3

NOTE: No more than 2 courses from any of the lists above can be applied in the MAP for the Master of Science in Civil Engineering (MSCE) degree.

Clinical Mental Health Counseling - Master of Arts

The CEP department offers a Clinical Mental Health Counseling program which leads to a Masters of Arts degree (M.A.). The program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). It prepares professional counselors to perform mental health counseling in agencies, hospitals, and private practice. Successful completion of the Clinical Mental Health Counseling program qualifies students to pursue licensure as clinical mental health counselors with the New Mexico Counseling and Therapy Practice Board.

For more information on program application requirements and process, see Clinical Mental Health Counseling, M.A., program website (https://cep.nmsu.edu/academic-programs/counseling-guidance-m-a.html).

Requirements

The 60-credit counseling curriculum requires two years full-time study or three years part time study on campus, and covers the following areas: human development, appraisal; diagnosis and treatment planning; individual, family and group counseling; consultation; career/life planning; research; and professional issues. Specialized training and

supervised experience is offered in mental health agencies, hospitals, and in schools.

Please reach out to the Program Director for other advising plans, to include, if available, part-time enrollment.

Communication Disorders - Master of Arts

Students entering the graduate program with an undergraduate major in Communication Disorders/Speech and Hearing Sciences can expect to complete the program in two years if they enroll full-time or in three years if they enroll part-time and be awarded a Masters of Arts in Communication Disorders with a specialization in Speech-Language Pathology. The graduate program for students without a Communication Disorders background is generally one year longer because one year of leveling coursework is required. Enrollment in graduate courses in Communication Disorders is limited to students who have been accepted into the graduate program in Communication Disorders. To complete this course of study, each student is expected to meet the program's academic and clinical competency criteria which are aligned with the requirements of state and national certifying bodies for licensure and clinical certification. Details regarding certification are available from the American Speech-Language-Hearing Association (http://www.asha.org/certification/) (ASHA), and the New Mexico Regulations & Licensing Department (http://www.rld.state.nm.us/boards/speech_language_pathology_audiology_and_hearing_aid_dispensing_practices.aspx

The residential Master of Arts education program in speech-language pathology at New Mexico State University is accredited by the Council on

Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association (ASHA), 2200 Research Boulevard, #310, Rockville, MD 20850, 800-498-2071 or 301-296-5700.

Program Requirements

The traditional Master's degree plan requires a minimum of 63 graduate credit hours and the completion of at least 400 clinical hours.

Total Credits		**63**

Leveling Program

The Leveling Program is designed for students with an undergraduate degree in an area other than Communication Disorders. The courses to be taken during the leveling year are listed below. In addition to these courses, students who did not complete at least one 3-credit hour course in all of the following subjects: Biology, Physics or Chemistry, and Statistics before starting the leveling program should also plan on completing these courses.

Communication Studies - Master of Arts

Master of Arts - Communication Studies

The department offers a thesis, comprehensive exam, and applied project options in its Master of Arts program. All options require a minimum of 36 credits. The thesis option requires 30 credits of coursework, 6 credits of thesis hours (COMM 5999 Master's Thesis), and an oral defense of the thesis and coursework. The non-thesis applied project option requires 30 credits of coursework, 6 credits of project hours **(COMM 5994 MA Project).** The non-thesis project option does not require an oral

defense of the project and coursework**.** The non-thesis comprehensive exam option requires 36 credits of coursework and 4 hours of written examination, followed by an oral defense of the student's written examination and coursework. All options require a minimum of 30 credit hours of Communication Studies courses. The oral exam committee necessary for the thesis and non-thesis comprehensive exams will consist of at least two graduate faculty members from the Department of Communication Studies and one graduate faculty member from any other NMSU department serving as the Graduate School's Dean's Representative.

Program Requirements

All tracks (thesis, project, and comprehensive exams) require 36 credits, 30 of which must be in COMM. A grade of B- or higher must be earned in all COMM courses, and a minimum GPA of 3.0 or higher is required to graduate. Two courses (6 credits) with numbers 4500+ can be counted toward the degree, and 2 courses (6 credits) may be taken in a related field of study, but courses outside of COMM are not required. Up to 6 graduate course credits can be accepted for transfer at the discretion of the Department Head.

Students must earn a B- or better in all COMM coursework and earn a GPA of 3.0 or higher in all graduate coursework at NMSU to graduate. Additional information can be found on the department website (https://comm.nmsu.edu).

Graduate Course Rotation:

Fall

COMM 5110 Theories of Communication

COMM 5140 Qualitative Research Methods in Communication

COMM 5510 Organizational Communication

Spring

COMM 5130 Quantitative Research Methods

COMM 5710 Communication and Culture

COMM 5610 Interpersonal Communication

Admissions

Applicants must meet the following admission requirements of the Graduate School.

1. Have an undergraduate degree with a GPA of at least 3.0 on a 4.0 scale from an accredited College or University; or
2. Have a graduate degree with a GPA of at least 3.0 on a 4.0 scale from an accredited College or University; or
3. A minimum of five years of relevant, full-time professional work experience with an undergraduate GPA of at least 2.5 on a 4.0 scale from an accredited College or University. Students with a GPA below 3.0 can be admitted on probationary status, but can not work as a Graduate Assistant until their earned GPA at NMSU is 3.0 or higher.

International students must also apply through the International Student Services (https://isss.nmsu.edu/) program. GPA requirements of 3.0 on a 4.0 scale are not negotiable for international students. Standardized test scores and results from language proficiency exams are not required, but submitting such scores may enhance your ability to secure a Graduate Teaching Assistantship. International students must meet graduate school application deadlines set by the International Students Services program. These deadlines are typically the last day of February and the last day of September.

The Graduate Record Exam (GRE) General Test is not required for admission; however, existing GRE scores that are high will strengthen a candidate's application and are highly regarded in the awarding of Graduate Assistantships.

Application Materials

Applicants are required to submit the following materials:

1. A letter of application including a statement of purpose discussing why and what you want to study in the program.
2. Current Resume or Vita
3. A scholarly writing sample of 20 to no more than 30 pages
4. Three letters of recommendation submitted separately. Candidates need only to supply contact information for referees.
5. Official Transcripts from all previous educational institutions, undergraduate and graduate.
6. Applicants interested in a Graduate Assistantship must respond to the application prompt and upload a letter addressing the following question: What about being a Graduate Teaching Assistant interests you?

A small number of Graduate Teaching Assistantships are available. These assistantships are the only source of funding for the graduate program. All Graduate Teaching Assistants are responsible for teaching COMM 1115G Introduction to Communication. As such, applicants with an undergraduate degree in Communication or a closely related field will receive primary consideration for assistantships.

The Department of Communication Studies is not able to waive any application fees. The first application to the NMSU Graduate School is free. Fees are only charged for additional applications. It is highly advised to only apply to one graduate program.

Thesis Option:

Prefix	Title	Credits
Degree Requirements [1]		**18**
COMM 5110	Theories of Communication	
COMM 5130	Quantitative Research Methods	
COMM 5140	Qualitative Research Methods in Communication	
COMM 5510	Organizational Communication	
COMM 5610	Interpersonal Communication	
COMM 5710	Communication and Culture	
Electives [2]		
Select 6-12 credits of COMM Electives		6-12
Select 0-6 credits from courses in a Related Fields (outside of COMM)		0-6
Thesis [3]		
COMM 5999	Master's Thesis	6
Total Credits		**36**

1. Students must receive a minimum grade of B- or better in all COMM courses and an overall GPA of 3.0 or higher. Any students earning a grade of C+ or below in a COMM course will have to retake the class.
2. In order to graduate, students will need a total of 36 credits, of which 30 credits must be from COMM coursework. Students may take up to 6 credits in a related field of study, but students are not required to take any courses outside of the department. Please consult with your

advisor about your specific requirements and how to complete them in order to graduate.

[3] Upon completion of the thesis and with the advisor's approval, students will send their thesis to the committee consisting of the student's advisor, at least one additional graduate faculty member from the Department of Communication Studies, and one additional Graduate Faculty member from any other department at NMSU who serves as the Dean's Representative. Students must follow the guidelines from the Graduate School and the Department of Communication Studies, all found in the Graduate Student Handbook.

Comprehensive Exam Option:

Prefix	Title	Credits
Degree Requirements [1]		**18**
COMM 5110	Theories of Communication	
COMM 5130	Quantitative Research Methods	
COMM 5140	Qualitative Research Methods in Communication	
COMM 5510	Organizational Communication	
COMM 5610	Interpersonal Communication	
COMM 5710	Communication and Culture	
Electives [2]		
Select 12-18 credits of COMM Electives		12-18
Select 0-6 credits from courses in a Related Fields (outside of COMM)		0-6
Total Credits		**36**

[1] Students must receive a minimum grade of B- or better in all COMM courses and an overall GPA of 3.0 or higher. Any students earning a grade of C+ or below in a COMM course will have to retake the class.

[2] Students will need a total of 36 credits, of which 30 credits must be from COMM coursework. Students may take up to 6 credits in a related field of study, but are not required to take any courses outside of the department. Please consult with your advisor about your specific requirements and how to complete them in order to graduate.

Applied Project Option:

Prefix	Title	Credits
Degree Requirements [1]		**18**
COMM 5110	Theories of Communication	
COMM 5130	Quantitative Research Methods	
COMM 5140	Qualitative Research Methods in Communication	
COMM 5510	Organizational Communication	
COMM 5710	Communication and Culture	
COMM 5610	Interpersonal Communication	
Electives [2]		
Select 6-12 credits of COMM Electives		6-12
Select 0-6 credits from courses in a Related Fields (outside of COMM)		0-6
Project Option		
COMM 5994	MA Project	6
Total Credits		**36**

[1] Students must receive a minimum grade of B- or better in all COMM courses and an overall GPA of 3.0 or higher. Any students earning a grade of C+ or below in a COMM course will have to retake the class.

[2] Students will need a total of 36 credits, of which 30 credits must be from COMM coursework. Students may take up to 6 credits in a related field of study, but are not required to take any courses outside of the department. Please consult with your advisor about your specific requirements and how to complete them in order to graduate.

The Graduate School requires students to maintain a minimum cumulative GPA of 3.0 in all courses taken as a graduate student at NMSU. The Department of Communication Studies requires that a grade of B- or higher must be earned in all COMM courses and that a minimum GPA of 3.0 or higher is required to graduate.

Students requesting transfer credit for any graduate courses taken from another institution must submit a written justification, including course syllabi and transcripts to the department head during their first semester of studies. Up to six credits can be accepted for transfer at the discretion of the Department Head. All students must take COMM 5110 Theories of Communication, COMM 5130 Quantitative Research Methods, and COMM 5140 Qualitative Research Methods in Communication from the Department of Communication Studies at NMSU. Transfers for these courses will not be accepted or approved.

Final Examination for the Degree:

A student will satisfy the Graduate School's requirement for a final exam by completing the Organizational Communication concentration's necessary coursework for the Thesis, Project, or Comprehensive Exam option.

1. The student must have a minimum cumulative GPA of 3.0 on all courses taken as a graduate student at NMSU, including those taken in COMM and approved electives taken in other departments at NMSU, and courses to fulfill the requirements of the concentration or MA or approved course substitutions including any MAP courses used to satisfy the graduate degree or concentration.
2. The student must complete all required and elective courses or approved course substitutions including any MAP courses used to satisfy the graduate degree or concentration with a B- or better and have a minimum GPA of 3.0 or higher.
   a. The thesis student must successfully complete all coursework, pass six credits of COMM 5999 Master's Thesis, and successfully pass a committee oral defense*.
   b. The comprehensive exam student must successfully complete all coursework, pass four hours of comprehensive exams, and successfully pass a committee oral defense*.
   c. The project student must successfully complete all coursework and pass six credits of COMM 5994 MA Project. Projects are directed by the students advisor and satisfactory completion of 6 or more credits of COMM 5994 MA Project. By completeing a professional project and oral presentation of the students project, the project serves as culmination of the program required for graduateion and thus along with earning a B- in all coursework and a GPA of 3.0 or higher has met and satisfied the Graduate School's requirement for a final exam. Non-thesis project students do not need to defend thier project to a committee, successful completion of 6 project hours and an oral presentation of at least 15 minutes that is approved by their advisor meets the Graduate School's requirement for a final exam. Project students do not have to complete or submit the Master's Final Examination Form in order to graduate.

A student who fails to meet any of the criteria may, during one or more subsequent semesters, take or retake additional graduate-level courses

to increase their cumulative GPA, thereby satisfying the Graduate School's requirement for a final exam.

* Thesis and non-thesis comprehensive exam students must defend their thesis or written questions during a committee including their advisor from the Department of Communication Studies, one additional Graduate Faculty member from the Department of Communication Studies, and a Graduate Faculty member from any department outside of the Department of Communication Studies. Students must submit the Master's Final Examination Form (https://gradschool.nmsu.edu/current-students/graduate-forms.html) with all necessary signatures to the Graduate School at least ten working days before their oral defense. oral defense. Project students do not need to defend to a committee or submit the Master's Final Examination Form in order to meet the Graduate School's requirement for a final exam.

Note: The Department of Communication Studies and the College of Arts and Sciences reserve the right to change the published requirements. Any such changes will be announced and will not be retroactive without the consent of the Department Head of Communication Studies. Currently, all required courses are offered once each year except for some electives. Always consult with the Graduate Coordinator for NMSU Global, the Graduate Student Advisor, or the Department Head of Communication Studies.

New Mexico State University's Master's Accelerated Program (MAP) provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. A bachelor's degree typically four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs. The MAP program allows undergraduate students to take graduate courses and count up to twelve credits toward both undergraduate and graduate degrees in COMM.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and subsequently count those same courses toward graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework, of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 3.25.
- Students must receive a grade of B- or higher in this coursework to receive graduate credit. If a grade of C+ or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program; any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
COMM 5210	Political Communication	3
COMM 5220	Communication Technologies	3
COMM 5230	Strategic Communication	3
COMM 5310	Sports Communication	3
COMM 5530	Leadership Communication	3
COMM 5550	Case Studies in Leadership Communication	3
COMM 5560	Ethics & Diversity in Leadership Communication	3
COMM 5630	Family Communication	3
COMM 5640	Nonverbal Communication	3
COMM 5996	Special Topics	1-9
COMM 5997	Independent Study	1-6
COMM 5998	Communication Internship for Graduate Students	3

Enrollment in graduate courses requires the Department Head's approval and a completed MAP form before the first week of the semester when taking MAP courses for dual credit. Please meet with the Department Head or the Graduate Advisor for more information.

Computer Science - Master of Science

The Master of Computer Science degree has two tracks, one with thesis or project track and a course-work only track. For all master's students, the following apply:

- Each master's student must complete 12 credits of **the basic requirements (p. 138)**(see table below).
- Each master's student is expected to register for CSCI classes numbered 5000 or above, except for CSCI 5110 Data Structure and Algorithms Transition or deficiencies which are 46x courses (Transition Courses) or CSCI 4105 Programming Language Structure I or CSCI 4120 Operating Systems I.
- Courses not in Computer Science can be included in the student's program of study only if prior written approval has been obtained from the student's advisor and the departmental Graduate Committee. Further details can be found in the on-line Graduate Handbook (https://computerscience.nmsu.edu/).
- **For Thesis/Project track's students**: each student following this track needs to complete the following three requirements:
  - ***Courses***: each student *needs to take*, in addition to the basic requirement, **15 credits** of Computer Science graduate courses (courses numbered > 5000) with the following restrictions:
    - One course can only be used to satisfy one requirement (e.g., if CSCI 5510 Automata, Languages, Computability is used to satisfy the requirement for the **Theories** category, it cannot be counted towards satisfying the requirements on ***Courses***).
    - At most 6 credits of CSCI 5996 Special Topics with different topics (i.e., with different subtitles) can be counted towards the degree program of the student.
    - At most 6 credits of CSCI 5991 Special Research Problems can be counted towards the degree program of the student.
    - No credit of course numbered > 5999 can be counted towards the degree program.
  - ***Thesis/Project***: each student *must write a thesis* (CSCI 5999 Master's Thesis) or *undertake a research project* (CSCI 5994 Master's Project) for **6 credits**.

- ***Master Final Exam***: each student *is required to sustain a final exam,* covering the thesis/research project and the graduate course-work. The two parts of the exam bring equal weight.

- **For Course-Work Only track's students:** Each student following this track needs to take, in addition to the basic requirement, **24 credits** of Computer Science graduate courses (courses numbered > 5000) with the following restrictions:
  - One course can only be used to satisfy one requirement (e.g., if CSCI 5510 Automata, Languages, Computability is used to satisfy the requirement for the **Theories** category, it cannot be counted towards satisfying the requirements on **Courses**).
  - At most 6 credits of CSCI 5996 Special Topics with different topics (i.e., with different subtitles) can be counted towards the degree program of the student.
  - No credit of course numbered > 5888 can be counted towards the degree program.

[1] Students who earned a B (or better) in CSCI 3720 Data Structures and Algorithms are not required to take this course.

A roadmap for a student without deficiencies study can be as follows:

- **First semester**: CSCI 5110 Data Structure and Algorithms Transition and two elective courses (courses > 5000 but not in the **theories** or **systems** group) .
- **Second semester**: take one course in the basic requirements (**theories** or **systems** or **application** group) and two elective courses.
- **Third semester**: take one course in the basic requirements (**theories** or **systems** or **application** group) and one elective course and a thesis/project course.
- **Fourth semester**: take one course in the basic requirements (**theories** or **systems** or **application** group) and a thesis/project course.

For **course work only option,** the student should replace the thesis/project course with an elective course and add an additional elective course to the last semester.

Master Accelerated Program

New Mexico State University master's accelerated program provides the **opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. Students can take up to 12 credits of Computer Science graduate courses and get dual course credit that can be applied to both an undergraduate and master's degree. Additional information can be found in the NMSU catalog.

MAP Admission

1. First, students will apply to the Computer Science department to receive approval for the MAP program. The student submits the pre-application when he/she is within 48 credits of earning a BS in Computer Science; an application form is provided on the department website. Qualification for the MAP program will be based on the cumulative (non-grade replaced) grade point average in Computer Science and Math courses taken up to that point (at least 3.3), including at least two of the following: CSCI 3730 Compilers and Automata Theory, CSCI 3710 Software Development and CSCI 3720 Data Structures and Algorithms , and recommendations by faculty members listed on the departmental application. Additional factors might be taken into account when available (e.g., GRE scores). Students having a grade point average below 3.3 but at least 2.75 may be admitted to MAP on a case-by-case basis, depending on faculty recommendations and evaluations of the individual academic and professional history.
2. Once the Computer Science department has notified the applicant of acceptance in MAP, the applicant must then formally apply to the graduate school (https://apply.nmsu.edu/apply/?id=1c3c41ea-b5f9-48ef-83c3-b085794ba277) for formal admission to the graduate program. This application to the graduate school is made during the semester of graduation from the BS in Computer Science.

Computer Science Courses Eligible for MAP

All courses in the Computer Science program that are cross-listed for undergraduate and graduate studies in the catalog are eligible for MAP. Students must receive a grade of B or higher in this coursework to be counted for graduate credits. If a grade of B- or lower is earned, it will not count toward the graduate degree. The courses are listed below.

Student should take four MAP eligible courses and CSCI 3720 Data Structures and Algorithms in their BS study program and earned a B (or better) grade. A roadmap for the last year of their study can be as follows:

- **First semester**: take two courses in the basic requirements and a master thesis/project course.
- **Second semester**: take the remaining courses in the basic requirements and a master thesis/project course. Add an elective course if necessary.

Prefix	Title	Credits
CSCI 5110	Data Structure and Algorithms Transition	3
CSCI 5140	Database Management Systems I	3
CSCI 5205	Computer Security	3
CSCI 5206	Hardware Security	3

Counseling and Guidance (Educational Diagnostics) - Master of Arts

The CEP Department offers a degree in Counseling and Guidance (M.A.) specializing in Educational Diagnostics; however, this is **not a stand-alone program**. The only candidates admitted to this degree are those graduate students who are admitted to the Specialist in Education (Ed.S.) or Ph.D. School Psychology Programs. Graduate students admitted to a school psychology program will have an opportunity to complete this MA degree before the completion of the Ed.S. or Ph.D. degree. *If you are interested in this degree, **please review program information for the school psychology programs** (*https://cep.nmsu.edu/academic-programs/grad-programs.html*) and admission's requirements as only students admitted to these programs are considered for this degree, no exceptions.*

Candidates admitted to the Specialist in Education (Ed.S.) or Ph.D. School Psychology Programs can complete this MA degree prior to the completion of the Ed.S. or Ph.D. degree. **This program is only open to students in the Specialist in Education (Ed.S.) or Ph.D. School Psychology Programs.**

Total Credits		**30**

Creative Writing - Master of Fine Arts

Graduate Program Information

The MFA Creative Writing Program is housed in the Creative Media Institute.

The Master of Fine Arts Degree in Creative Writing is a 3-year program. Students choose a major genre: poetry or fiction, though classes in nonfiction, writing, screenwriting and others are offered. Students must complete 54 hours of graduate-level course work, submit a creative writing thesis, give a public reading from the thesis, and pass an oral examination.

Our mission is to emphasize the creation and critical analysis of literature, so that our students can be part of the national conversation about writing, graduating with a publishable manuscript. By providing our students with a set of skills, we prepare them to contribute to their communities as writers, publishing professionals and teachers.

Creative Writing - Master of Fine Arts

Students pursuing the MFA in Creative Writing devote themselves to concentrated study and development of a chosen genre: poetry or fiction. Students

- complete 54 hours of graduate-level coursework,
- participate and pass (as of Fall 27) in a third-semester review,
- present a book-length thesis of original work with an introduction or afterward,
- perform a public reading from the thesis, and
- pass an oral examination in the final semester.

All MFA courses are restricted to students accepted into the MFA program.

Prefix	Title	Credits
Required Coursework		
FDMA 570	MFA Workshop (4 FDMA 570 workshops in the genre of poetry or fiction for which the student was admitted to study AND 1 FDMA 570 workshop in a second genre.) [1]	15
FDMA 550	MFA Form & Technique	9
FDMA 592	MFA Theory, Practice and Professionalism [2]	3
FDMA 594	MFA Thesis Workshop [3]	6
Thesis Credits		
FDMA 599	MFA Thesis [4]	6
Required Electives		15
Graduate-level courses in any of the following:		
FDMA Courses Offered by the Creative Media Institute: [5]		
FDMA 422	Environmental Filmmaking	
FDMA 480	Screenwriting II	
FDMA 490	Advanced Screenwriting	
FDMA 500	Graduate Problems in Creative Media	
FDMA 501	Special Topics	
FDMA 550	MFA Form & Technique (Additional credits may be counted toward electives only after the completion of 9 credits of FDMA 550.)	
FDMA 570	MFA Workshop (Additional credits may be counted toward electives only after the completion of 15 credits of FDMA 570.)	
FDMA 592	MFA Theory, Practice and Professionalism (Additional credits may be counted toward electives only after the completion of 3 credits of FDMA 592.)	
FDMA 595	Master of Fine Arts Graduate Internship	
Courses offered by Journalism and Media Studies:		
JOUR 463	Public Relations for Social Impact	
JOUR 470	Environmental, Social, & Governance Public Relations	
JOUR 494	Special Topics	
JOUR 495	Media Theory	
Additional Approved Elective Courses [6]		
Courses from the Art Department:		
ARTS 494	Special Topics in Studio	
ARTS 495	Studio Core IV: Thesis Production & Display	
ARTS 496	Fundamentals of Studio Management	
ARTS 499	Problems in Studio Art	
ARTS 501	Museum Conservation Techniques I	
ARTS 550	Drawing and Painting Workshop	
ARTS 555	Graphic Design	
ARTS 565	Sculpture Media	
ARTS 570	Photography Seminar	
ARTS 575	Ceramic Arts	
ARTH 500	Special Topics in Art History	
ARTH 511	Art of China I: Neolithic to Song Dynasty	
ARTH 536	Race and Art	
ARTH 542	Global Modernisms	
ARTH 543	Contemporary Global Art Practices	
ARTH 544	Gender, Sexuality, and Art in the Americas	
ARTH 545	Latin American Film	
ARTH 546	Museum and Curatorial Studies	
ARTH 578	Seminar in Art History	
ARTH 579	Methodologies and Historiography of Art History and Art Theory	
Courses from the Borderlands and Ethnic Studies Program:		
BEST 5105	Foundations in Borderlands & Ethnic Studies	
BEST 5110	Decolonial Research I: Overview	
BEST 5120	Theories in Borderlands and Ethnic Studies	
BEST 5125	Decolonial Research II: Methodologies	
BEST 5135	Decolonial Research III: Data Analysis and Publication	
Courses from the department of Communication Studies:		
COMM 5110	Theories of Communication	
COMM 5220	Communication Technologies	
COMM 5230	Strategic Communication	
Courses from the Department of English:		
ENGL 501	Online Publishing	
ENGL 505	Graduate Study in Chaucer	
ENGL 508	Graduate Study in Shakespeare I	
ENGL 509	Graduate Study in Shakespeare II	
ENGL 517	Graduate Study in Critical Theory	
ENGL 521	Graduate Study in a Literary Period or Movement	
ENGL 522	Graduate Study in a Literary Form or Genre	
ENGL 523	Graduate Study of a Major Author	
ENGL 524	Graduate Study in a Major Text	
ENGL 525	Graduate Study in Comparative Literature	
ENGL 526	Special Topics in Critical Theory	
ENGL 527	Graduate Study in Film and Digital Media	
ENGL 533	Victorian Literature	
ENGL 542	Modern and Contemporary American Poetry	
ENGL 543	Multimedia Theory and Production	
ENGL 544	Modern British Fiction	
ENGL 545	Postmodern Fiction	

ENGL 552	Graduate Study in History of the English Language
ENGL 553	World Literatures
ENGL 555	Graduate Study in Rhetoric of Scientific Literature
ENGL 558	Latino/a Literature and Culture
ENGL 560	Proposal and Grant Writing
ENGL 563	Graduate Study in English Literature
ENGL 567	Documentary Film Theory and Criticism
ENGL 569	Graduate in American Literature
ENGL 571	Composition Pedagogy and Practicum
ENGL 581	Women's Literature
ENGL 582	Gender and Popular Culture
ENGL 583	Critical Writing Studies
ENGL 589	Cultural Studies: Literature and Theory
Courses from the Gender and Sexuality Studies Program - check GNDR site for 2-year course rotations if planning to complete a graduate minor in GNDR.	
GNDR 501	Advanced Women & Immigration
GNDR 502	Advanced Transnational Feminisms
GNDR 505	Advanced Alternative Genders and Sexualities
GNDR 506	Advanced Women and Human Rights
GNDR 507	Advanced Gender and Graphic Narrative
GNDR 508	Advanced Feminist Food Studies
GNDR 511	Advanced Gender and Migration
GNDR 512	Advanced Gender and Film Studies
GNDR 533	Advanced Issues in Sex, Gender, and Culture
GNDR 550	Race and Gender in Film
GNDR 554	Advanced Issues in Women Crossing Borders
GNDR 565	Advanced Sex, Gender & the Body
GNDR 571	Advanced Seminar in Feminist and Queer Theories
GNDR 582	Gender and Popular Culture
GNDR 584	Women's Literature
Courses from the Department of History:	
HIST 511	Making the American West
HIST 514	The Constitution and U.S. History
HIST 527	Labor History
HIST 535	War and Revolution
HIST 538	Special Topics in European History
HIST 543	Special Topics in Asian History
HIST 545	Special Topics in United States History
HIST 568	Urban History
HIST 570	The Cold War in Latin America
HIST 571	China through the Ming Dynasty
HIST 572	China in the Modern World
HIST 573	History of Japan
HIST 575	History of the Global Political Economy
HIST 579	Oral History
Total Credits	**54**

1 Subtitles will vary for both FDMA 550 MFA Form & Technique and FDMA 570 MFA Workshop. Select the section that matches your genre requirements or elective choice.

2 After completion of 36 hours, requires concurrent enrollment in FDMA 594 MFA Thesis Workshop. MFA candidates may be advised to repeat FDMA 592 MFA Theory, Practice and Professionalism (for additional elective credits) to better prepare for completion of the thesis.

3 After completion of 36 hours, requires concurrent enrollment in FDMA 592 MFA Theory, Practice and Professionalism. After completion of 45 credits, concurrent enrollment in FDMA 592 MFA Theory, Practice and Professionalism is no longer required.

4 In the semester of thesis defense, it is university policy that degree candidates must enroll in thesis hours. Should an MFA candidate still need to reschedule a thesis defense after the completion of 6 credits, it is university policy that the candidate must enroll in an additional 1 credit hour of thesis during the calendar session of the defense. Thesis hours earned beyond the 6 required for the MFA degree cannot be used for elective credits.

5 Graduate students may enroll in FDMA or JOUR courses numbered below 450 for graduate credit by enrolling in a cross listed FDMA 500 Graduate Problems in Creative Media or FDMA 501 Special Topics. Requests to offer an FDMA 500 Graduate Problems in Creative Media or FDMA 501 Special Topics must be approved by the CMI Director of Graduate Studies and filed with the department no later than 14 business days before registration opens for graduate students. The course instructor must approve setting up a graduate section that will require additional work appropriate for graduate-level study.

6 These courses should be carefully selected in consultation with your advisor to ensure career, disciplinary, or artistic relevance to your study in Creative Writing. Most of these courses will require permission of instructor. For students with financial aid, be aware that courses taken for a graduate minor must also count toward the MFA in Creative Writing and that requested degree exceptions must be processed by the census date of that semester (for more information visit https://fa.nmsu.edu/cpos/index.html (https://fa.nmsu.edu/cpos/)). To enroll in coursework below FDMA 450 Advanced 2D Animation, graduate students may enroll (with permission from instructor and advisor) for graduate credit in a “special topic” shell within that department or enroll in a cross listed FDMA 500 Graduate Problems in Creative Media or FDMA 501 Special Topics. See note “v” for deadlines and approval process.

Criminal Justice - Master of Criminal Justice

All candidates, regardless of chosen degree option, must complete a final examination. Examination requirements vary by degree option. Please contact the director of the MCJ program or consult the Department of Criminal Justice website (http://crimjust.nmsu.edu/criminal-justice-graduat/) for details.

Thesis Option (33 Credits)

Thesis students must submit a thesis proposal to their faculty committee for approval and subsequently complete the approved thesis project. An approved thesis proposal is one wherein the thesis committee determines the student demonstrates a comprehensive understanding of the nexus of theory, method, and policy as it applies to the proposed thesis project. At the discretion of the thesis committee the proposal may be considered inadequate and the student is required to revise and resubmit the thesis proposal until the committee determines the proposal is satisfactory. The final examination minimally includes a defense of the completed thesis, but may also include a general examination based upon the candidate’s program of study. The minimum coursework requirements are displayed below.

Prefix	Title	Credits
Required Courses		**15**
CJUS 501	Research Methods in Criminal Justice	
CJUS 502	Statistics in Criminal Justice	
CJUS 511	Nature of Crime	
CJUS 514	Advanced Race, Crime, and Justice	
CJUS 525	Issues in Ethics, Law, and Criminal Justice	
Master's Thesis Credits		
CJUS 599	Master's Thesis	6
General Electives		
Select 12 credits from General Electives. [1]		12
Total Credits		**33**

[1] Students may not count CJUS 593 Internship or CJUS 592 Independent Research credit toward their elective requirement. No more than three total credits of CJUS 591 Directed Readings in Criminal Justice coursework may be used as electives; a minimum of 3 of the 12 credit general elective requirement must come from the Department of Criminal Justice.

A minor is optional (contact the director of the MCJ program or consult the Department of Criminal Justice web site, https://crimjust.nmsu.edu/, for details) and may result in more than 33 total credits for the degree.

Focused Coursework Option (36 Credits)

Focused coursework students must pass a written comprehensive examination following completion of the required courses. Students not passing the examination will be required to wait until the following semester to retake the examination. The minimum course requirements are displayed below.

Prefix	Title	Credits
Required Courses		**15**
CJUS 501	Research Methods in Criminal Justice	
CJUS 502	Statistics in Criminal Justice	
CJUS 511	Nature of Crime	
CJUS 514	Advanced Race, Crime, and Justice	
CJUS 525	Issues in Ethics, Law, and Criminal Justice	
CJus Electives		
Select 12 credits from electives from courses offered by the Department of Criminal Justice, to be selected in consultation with a student's advisor. [1]		12
General Electives/Minor		
An additional 9 credits of electives, to be selected in consultation with a student's advisor. [2]		9
Total Credits		**36**

[1] No more than three total credits of CJUS 593 Internship or CJUS 591 Directed Readings in Criminal Justice courses may be used as Criminal Justice electives. CJUS 592 Independent Research may not be used as Criminal Justice Electives for this option.

[2] No more than three credits of C J 593 Internship or C J 591 Directed Readings may be used to fulfill the general elective requirement. C J 592 Independent Research may not be used as Criminal Justice Elective for this option.

A minor is optional (contact the director of the MCJ program or consult the Department of Criminal Justice web site, https://crimjust.nmsu.edu/, for details) and may result in more than 36 total credits for the degree.

Minimum Grade Requirement

Students must earn a minimum B- grade in all required core courses, excluding elective credits. This applies to both options: Thesis and Focused Coursework as well as to both programs: On-Campus (traditional) and Online.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. Students can take up to 12 credits of CJUS graduate courses and get dual course credit that can be applied to both an undergraduate and master's degree. You can also check the NMSU catalog for additional information.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 3.00.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

MAP Roadmap

Prefix	Title	Credits

CJUS 591	Directed Readings in Criminal Justice	3

Consult with the CJUS Department Academic Advisor to choose classes that work for you and the MAP program.

Data Analytics - Master of Data Analytics

Data analytics is an inherently interdisciplinary discipline, dealing with methods and systems to synthesize knowledge or insights from large quantities of data collected from heterogeneous sources and diverse spatial and time scales. Data analytics employs theories, methodologies, and tools drawn from many fields, within the broad areas of mathematics, statistics, and computer and information sciences, and applies them to a diversity of data-rich domains, such as life sciences, medicine, physical sciences, social sciences, engineering, business, and education.

The PMS in Data Analytics will provide students with a strong foundation in data management and analysis, the computational and statistical thinking, and understanding of computer systems. After completing this program, students will have gained the skills and ability to:

- Analyze real-life data from diverse sources and domains
- Effectively apply analytics tools to large data sets
- Apply mathematical and statistical models to data analysis problems
- Apply computational thinking to develop effective data analytics solutions
- Apply programming and debugging skills to problem solving
- Understand and use computer technology and software in solving real-life data analysis problems
- Understand and address unfamiliar problems related to data analytics
- Develop effective instrument to communicate solutions to diverse audiences

Program

The professional focus of the degree will prepare students for success in the workplace, with an emphasis on enriching the preparation of students who are already in the workplace and are seeking technical skills to advance their careers in the data analytics domain.

Program Features

- Degree granted from New Mexico State University
- Asynchronous courses delivery to accommodate student schedules & needs
- 30 credits [3 semesters and a summer, 9 credits/semester; students may enroll part time]
- In person courses are permissible
- Industry experience encouraged

Curriculum

The curriculum for the degree program is composed of 30 graduate credits. It is divided into different categories. One course can be used to satisfy only one category.

Prefix	Title	Credits

Economics - Master of Arts

Economics - Master of Arts (no Concentration)

Candidates for the Master of Arts in economics must successfully complete a minimum of 30 graduate credits (concentrations may require more than 30 graduate credits). At least 12 credits beyond the core courses (AEEC 5120 Microeconomic Theory, AEEC 5130 Macroeconomic Theory, AEEC 5240 Econometrics) must be earned by taking courses taught by economics faculty members in the Department of Economics, Applied Statistics and International Business. At least two of the three core courses must be completed at NMSU. Twenty-one of the credits must have one of the four following prefixes: AEEC, ECON, ECDV, or AG E. At least twenty-four of the credits must be associated with courses numbered 500/5000 or above. All students must meet the requirements specified in the general regulations and requirements for admission to the Graduate School and to candidacy. Students preparing to enter the program are encouraged to complete the following:

1. one course in intermediate microeconomic theory and one course in macroeconomic theory with minimum grades of B;
2. one course in college-level calculus; and
3. one course in statistics, including simple regression.

Those students not having completed these courses may be admitted with the requirement that the deficiencies be completed at the beginning of the graduate program.

The Master of Arts in Economics (regulatory economics) may be completed either face-to-face or online

All students in the program must successfully complete a minimum of 30 credits including the following:

Prefix	Title	Credits
Required Courses		
AEEC 5120	Microeconomic Theory	3
AEEC 5130	Macroeconomic Theory	3
AEEC 5240	Econometrics	3
Electives, subject to the restrictions above.		21
Total Credits		**30**

Notes:

1. *No more than one course with a grade less than B can be used to fulfill the requirements for the MA Econ degree.*
2. *ECON 503 Managerial Economics cannot be counted toward the major in Economics.*
3. *A maximum of nine hours of approved transfer credit (with minimum grades of A) may be applied toward the degree.*

Teaching and research assistantships are available to qualified applicants; however, admission to the program does not imply or guarantee an assistantship. It is not necessary to have an undergraduate degree in economics to enter the graduate program or to receive financial assistance.

The Masters of Arts in Economics (no concentration) may be completed either face-to-face or online.

The Master's Accelerated Program allows qualifying NMSU undergraduate economics students to take up to **6** graduate credits—two upper-level economics courses (450 and above)—while completing their undergraduate degree. These courses can be applied toward both their undergraduate and master's degrees.

Qualifications: Juniors with a minimum cumulative **GPA of 3.5** and seniors with a minimum cumulative **GPA of 3.25** are eligible to participate in this program, provided they have completed the following courses with a grade of B or higher.

1. ECON 2110G Macroeconomic Principles
2. ECON 2120G Principles of Microeconomics Honors
3. ECON 304 Money and Banking
4. ECON 311 Intermediate Macroeconomic Theory
5. ECON 312 Intermediate Microeconomic Theory
6. ECON 405 Introductory Econometrics

Eligible courses: Students may select any two of the following courses to count toward both the master's degree and the required upper-division courses for their undergraduate degree:

Prefix	Title	Credits
ECON 450	International Economics	3
ECON 457	Mathematical Economics	3
ECON 471	Electricity Economics	3
ECON 498	Independent Study (ECON 498 is to be substituted for ECON 489 Senior Economics Seminar.)	1-3

Or any ECON courses 450 and above

Note: ECON 503 Managerial Economics is a core course for the NMSU College of Business MBA Program. It is NOT approved as a course in the MA-ECON Program.

General Information: For tuition purposes, students will be considered undergraduates for tuition purposes until they complete their undergraduate degree requirements. During this time, they will continue to be charged tuition and fees at the undergraduate rate and remain eligible for undergraduate scholarships. Students are encouraged to contact their financial aid advisor to discuss federal aid eligibility and how participation in the program may affect their financial aid package. Additionally, students must meet all application deadlines and program requirements for both their undergraduate and graduate programs to remain eligible for the Master's Accelerated Program.

Economics (Econometrics) - Master of Arts

Candidates for the Master of Arts in economics must successfully complete a minimum of 30 graduate credits (concentrations may require more than 30 graduate credits). At least 12 credits beyond the core courses (AEEC 5120 Microeconomic Theory, AEEC 5130 Macroeconomic Theory, AEEC 5240 Econometrics) must be earned by taking courses taught by economics faculty members in the Department of Economics, Applied Statistics and International Business. At least two of the three core courses must be completed at NMSU. Twenty-one of the credits must have one of the four following prefixes: AEEC, ECON, ECDV, or AG E. At least twenty-four of the credits must be associated with courses numbered 500/5000 or above. All students must meet the requirements specified in the general regulations and requirements for admission to the Graduate School and to candidacy. Students preparing to enter the program are encouraged to complete the following:

1. one course in intermediate microeconomic theory and one course in macroeconomic theory with minimum grades of B;
2. one course in college-level calculus; and
3. one course in statistics, including simple regression.

Those students not having completed these courses may be admitted with the requirement that the deficiencies be completed at the beginning of the graduate program. Those students interested in the concentration in regulatory economics are advised to complete two courses in college-level statistics.

Teaching and research assistantships are available to qualified applicants; however, admission to the program does not imply or guarantee an assistantship. It is not necessary to have an undergraduate degree in economics to enter the graduate program nor to receive financial assistance.

All students in the program must successfully complete a minimum of 30 credits including the following:

Prefix	Title	Credits
Required Courses		
AEEC 5120	Microeconomic Theory	3
AEEC 5130	Macroeconomic Theory	3
AEEC 5240	Econometrics	3
Electives, subject to the restrictions above.		21
Total Credits		**30**

Notes:

1. *No more than one course with a grade less than B can be used to fulfill the requirements for the MA Econ degree.*
2. *ECON 503 cannot be counted toward the major in Economics.*
3. *A maximum of nine hours of approved transfer credit (with minimum grades of A) may be applied toward the degree.*

Prefix	Title	Credits
Additional Required Courses for a Concentration in Econometrics		
AEEC 5240	Econometrics	3
ECON 545	Econometrics II	3
Select 6 graduate credits of A ST (Applied Statistics) at the 500 level [1]		6
Total Credits		**12**

[1] Excluding A ST 505 Statistical Inference I, independent study, thesis, project and dissertation credits.

Economics (Public Policy) - Master of Arts

Candidates for the Master of Arts in economics must successfully complete a minimum of 30 graduate credits (concentrations may require more than 30 graduate credits). At least 12 credits beyond the core courses (AEEC 5120 Microeconomic Theory, AEEC 5130 Macroeconomic Theory, AEEC 5240 Econometrics) must be earned by taking courses taught by economics faculty members in the Department of Economics, Applied Statistics and International Business. At least two of the three core courses must be completed at NMSU. Twenty-one of the credits must have one of the four following prefixes: AEEC, ECON, ECDV, or AG E. At least twenty-four of the credits must be associated with courses numbered 5000 or above. All students must meet the requirements specified in the general regulations and requirements for admission to the Graduate School and to candidacy. Students preparing to enter the program are encouraged to complete the following:

1. one course in intermediate microeconomic theory and one course in macroeconomic theory with minimum grades of B;
2. one course in college-level calculus; and
3. one course in statistics, including simple regression.

Those students not having completed these courses may be admitted with the requirement that the deficiencies be completed at the beginning of the graduate program. Those students interested in the concentration

in regulatory economics are advised to complete two courses in college-level statistics.

Teaching and research assistantships are available to qualified applicants: however, admission to the program does not guarantee an assistantship. It is not necessary to have an undergraduate degree in economics for admission to the graduate program nor to receive financial assistance.

Education (Elementary Licensure Prep) - Master of Arts

Elementary Licensure Prep

The School of Teacher Preparation, Administration, and Leadership (TPAL) at New Mexico State University offers an Elementary Teacher Education Program for individuals who have completed a bachelor's degree. The program is designed to meet the professional education course requirements for teacher licensure as a part of a Master of Arts in Education degree program.

All students wishing to complete a degree in Elementary Education must apply to the Teacher Education Program. Additional information on the application process can be obtained from the College of Education Educational Support and Resource Center or on the departmental website (https://tpal.nmsu.edu/degree-programs/undergraduate-programs/ug-ece.html). A 3.0 minimum GPA is required for admission to the Teacher Education Program, and a 3.0 minimum GPA must be maintained

for graduation. *Students must earn a "C-" or better in all education, TEP prerequisite, endorsement, and teaching field courses.*

Program Completion Requirements:

1. Apply through NMSU Graduate School main webpage (https://gradschool.nmsu.edu/). Select Intended major "Education (Elementary Licensure Prep)" as this is the concentration you will pursue
2. After you receive official notification of acceptance from the Graduate School, contact your faculty advisor within the first semester of enrollment
3. Complete the MATH 5110 Fundamentals of Elementary Mathematics I course
4. Complete the Core Courses listed below, before admission into the Teaching Education Program

Admission to the Teacher Education Program (TEP):

1. Obtain application information at https://tpal.nmsu.edu/admissions/tep-admission/ (https://tpal.nmsu.edu/admissions/tep-admission.html)
2. Make an appointment with the program director for a program of study before TEP portfolio
3. Submit TEP application no later than 12:00 pm (MST) on the 3rd Friday in February for Spring or the 3rd Friday in September for Fall. TEP portfolio must be successfully reviewed before enrolling in Teaching Methods Courses.

Completing Teaching Methods Block Courses:

1. Fall Block (see below)
2. Spring Block (see below)
3. Earn a grade of B or better in all courses

Student Teaching Entry Portfolio (STEP)

1. Obtain application information at https://tpal.nmsu.edu/degree-programs/undergraduate-programs/stia.html
2. Make an appointment with the Program Director for a program of study
3. Submit Student Teaching Packet (STEP) on the 1st Friday in March for Spring and the 1st Friday in October in Fall.

Student Teaching Internship- must be completed during the final semester

1. Take EDUC 5811 and EDUC 5810 concurrently during student teaching (16-week Student Teaching Internship and Seminar)
2. Defend Evidence of Student Learning project during student teaching semester in EDUC 5811
3. Additional Praxis exams are required for NM State Licensure: Principles of Learning and Teaching: Grades K-6 (https://praxis.ets.org/on/demandware.store/Sites-ETS-Praxis-Site/en_US/Product-Show/?pid=5622)5622, Elementary Education: Curriculum, Instruction, and Assessment (https://praxis.ets.org/on/demandware.store/Sites-ETS-Praxis-Site/en_US/Product-Show/?pid=5017) 5017, **and Teaching Reading: Elementary (https://praxis.ets.org/on/demandware.store/Sites-ETS-Praxis-Site/en_US/Product-Show/?pid=5205) 5205**

Education (Elementary Mathematics and Science) - Master of Arts

The College of Health, Education, and Social Transformation's School of Teacher Preparation, Administration and Leadership at New Mexico State University offers a 34 credit Master of Arts in Education in Elementary Mathematics and Science for individuals who have completed a Bachelor's degree and already licensed teachers. The program is designed to prepare teachers to be specialists in mathematics and science teaching and learning, and to prepare them to be leaders.

A part-time student enrolling in 6 credit hours per semester, including the summer, will complete this program in 2 years. The program follows a cohort model.

Eligible Participants must:

- Have completed a bachelor's degree in a closely related field with a cumulative GPA of 2.80 or higher
- Be admitted to the NMSU Graduate School
- Be admitted to Curriculum & Instruction

Program Delivery: Main Campus; Face-to-face

Education (Language, Literacy & Culture) - Master of Arts

The program with a concentration in Language, Literacy and Culture (Reading, without licensure) prepares educational leaders and scholars who understand reading, language and literacy education in complex and diverse ways; particularly as these relate to issues of social justice and equity. This program emphasizes the development of critical and expansive perspectives on language and multiculturalism with a focus on the relevance of these for PreK-12 public school students from diverse ethno-linguistic backgrounds. Participants are encouraged to engage in leadership and research activities in a variety of settings at local, state and federal levels.

- To add a Reading Endorsement to a New Mexico Teaching license, students need 24 credits in reading or related area. Please see specific requirements set forth by New Mexico Public Education Department (https://webnew.ped.state.nm.us/)
- Courses with RDG prefix are not offered every semester. Please check with your faculty advisor to plan accordingly
- For additional information about the LLC program visit the program website (https://tpal.nmsu.edu/degree-programs/concentrations/llc.html)

Prefix	Title	Credits
Course Requirements		
TPAL Core Courses

READ 5360	Digital Literacies	3
READ 5210	Language and Literacy Acquisition	3

READ 5410	Theory and Pedagogy of Literature for Children and Adolescents	3
READ 5220	Sociopsycholinguistics of Reading	3
READ 5420	Theory and Pedagogy of Writing	3
Total Credits		**33**

[1] Students seeking a Reading Endorsement can use an upper level reading course from their undergraduate degree as part of the required 24 reading credits. Please check with your faculty advisor to plan accordingly.

[2] This course is the final core course that students are required to take. EDUC 5120 Multicultural Education, EDUC 5160 Curriculum and Pedagogy, and EDUC 5140 Research in Curriculum and Pedagogy are prerequisites to taking EDUC 5170 Action Research Projects.

Education (Secondary Licensure Prep) - Master of Arts

Secondary Licensure Prep

The School of Teacher Preparation, Administration and Leadership (TPAL) at New Mexico State University (NMSU) offers a Secondary Teaching Education Program for individuals who have completed a bachelor's degree and wish to seek Secondary Education licensure. This program meets the State of New Mexico Public Education Department's education requirements for initial teacher licensure as part of the Master of Arts in Education degree program.

Program Admission Requirements:

1. Apply through NMSU Graduate School's main webpage (https://gradschool.nmsu.edu (https://gradschool.nmsu.edu/)). Select the intended major "Education (Secondary Licensure Prep)" as the concentration you will pursue.
2. After you receive official notification of acceptance from the Graduate School, contact your faculty advisor within the first semester of enrollment.
3. Complete the TEP pre-requisites first before specialized admission to the Teacher Education Program.

Teaching Field & Other Course Completion Requirements:

1. Secondary teaching fields can be selected from English Language Arts, Social Studies, Mathematics, or General Science.
2. Applicants need a bachelor's degree aligned to one of the Secondary teaching fields, or closely related field.
3. In addition to a bachelor's degree, students' transcripts will be evaluated for a minimum of 24 credits in the teaching field (12 credits must be upper division).
4. Teaching field deficiencies will require extra coursework beyond the Secondary Licensure Prep degree program.
5. All teaching field deficiencies and all degree coursework (see below) must be completed before the Student Teaching internship semester.

Admission to the Teacher Education Program (TEP):

1. Obtain application information at https://tpal.nmsu.edu/admissions/tep-admission/ (https://tpal.nmsu.edu/admissions/tep-admission.html)
2. Submit the TEP portfolio no later than 12:00 pm (MST) on the 3rd Friday in February for Spring and the 3rd Friday in September for Fall. TEP portfolio must be successfully reviewed before enrolling in Teaching Methods Courses.

Student Teaching Entry Portfolio (STEP)- one semester before student teaching

1. Obtain application information at https://tpal.nmsu.edu/degree-programs/undergraduate-programs/stia.html
2. Submit Student Teaching Packet (STEP) on the 1st Friday in March for Spring and the 1st Friday in October for Fall.

Student Teaching Internship- must be completed during the final semester

1. Take EDUC 5811 and EDUC 5810 concurrently during student teaching (16-week Student Teaching Internship and Seminar).
2. Complete all coursework (see below) and teaching field deficiencies before the Student Teaching courses. No additional courses may be taken during student teaching.
3. Before completion of the program and recommendation for initial licensure, the candidate must pass the Evidence of Student Learning Portfolio during student teaching as a State of NM licensure requirement.

[8] Requires admission to STEP

The Master's in Education plus Secondary Education Licensure program allows for highly qualified undergraduate students to begin their master's level education coursework while still completing their bachelor's degree through the Masters Accelerated Program (MAP). Students interested in earning their teaching license in English, Social Studies, General Science, Math, or Computer Science at the graduate level might benefit from the 12 credit MAP in order to get a head-start on their licensure degree.
The MA plus Secondary Licensure is a hybrid graduate program that is available through both the Main Campus and NMSU-Global campus, and includes face-to-face/hybrid and online coursework. This program also requires field experience for several courses, where students obtain real-world teaching experience in a public-school classroom. This program is

an internship-based program, where the final semester of the MA includes a full-time student teaching internship.

Specialized admission into the Teacher Education Program (TEP) is required during the 2nd semester of the MA plus Secondary Licensure program. Three classes in the MAP (EDUC 5120 Multicultural Education, EDUC 5110 Exploration in Education, and SPED 5105 Introduction to Special Education in a Diverse Society) are used for the TEP pre-requisites allowing for students to apply for the TEP at the conclusion of the MAP in order to make academic progress into the rest of the MA plus Secondary Licensure.

Prefix	Title	Credits

Graduate Level Elective (3 credits)		

1 TEP pre-requisite course.
2 Requires field experience.

Educational Leadership & Administration (Higher Education Administration) - Master of Arts

Prerequisite

Students interested in higher education administration must have a bachelor's degree.

Application Deadline

This program begins in the spring semester only. All materials for this program must be received by the deadline specified on the School of TPAL website. Admission requirements are available from the School of TPAL, or on the website here (https://tpal.nmsu.edu/admissions/all-programs.html). Students will be informed upon their formal acceptance into the program.

Program Delivery

There is a mandatory face-to-face orientation in Las Cruces prior to the start of the spring semester, January. All other classes are 100% online, distance delivery.

Electrical Engineering - Master of Engineering in Electrical Engineering

Requirements and Options for the MEEE Degree

The Program Educational Objectives for the Master of Engineering Program in Electrical Engineering are:

1. That graduates successfully apply advanced skills and techniques in one or more areas of emphasis.

2. That graduates obtain relevant, productive employment with the private sector or in government and/or pursue additional advanced degrees.

The MEEE is a coursework-only option for obtaining a master's degree. The requirement is a total of 30 credits of graduate course work, including passing with a grade of B or better six Graduate Expanded Core Courses from at least three different areas of emphasis. No oral exam is required for the MEEE. All students in the MEEE program who receive support as GAs are expected to take 9 credits of coursework toward the MEEE degree each semester.

Prefix	Title	Credits
Graduate Expanded Core Courses: choose 6 from at least 3 different areas [1]		**18-21**
Electromagnetics		
E E 521	Microwave Engineering	
E E 541	Antennas and Radiation	
E E 548	Introduction to Radar	
E E 549	Smart Antennas	
Microelectronics/VLSI		
E E 510	Introduction to Analog and Digital VLSI	
E E 512	ASIC Design	
E E 523	Analog VLSI Design [2]	
E E 567	ARM SOC Design	
Photonics		
E E 528	Fundamentals of Photonics [2]	
E E 577	Fourier Methods in Electro-Optics	
E E 578	Optical System Design	
Electric Energy Systems		
E E 502	Electricity Markets	
E E 503	Numerical Computational Methods for Smart Grid	
E E 504	Smart Grid Technologies	
E E 505	Application of Optimization Techniques in Power Systems	
E E 507	Data Analytics and AI for the Smart Grid	
E E 533	Power System Operation	
E E 534	Power System Relaying	
E E 537	Power Electronics	
E E 540	Photovoltaic Devices and Systems	
E E 542	Power System Analysis	
E E 543	Power System Faults and Stability [2]	
E E 544	Distribution Systems	
Digital Signal Processing		
E E 545	Digital Signal Processing II [2]	
E E 565	Machine Learning I [3]	
E E 576	Geometric Algebra [3]	
E E 587	Deep Learning for Image Processing	
E E 588	Advanced Image Processing	
E E 596	Digital Image Processing [2,3]	
E E 597	Neural Signal Processing	
Computer Engineering		
E E 506	Quantum Computing	
E E 556	Hardware & Software Codesign	
E E 558	Hardware Security and Trust	
E E 562	Computer Systems Architecture [2]	
E E 563	Computer Performance Analysis I	
E E 590	Selected Topics (Applications of Parallel Computing XSEDE Collaborative Course)	
Communications		
E E 571	Random Signal Analysis [2]	
E E 572	Modern Coding Theory	
E E 573	Signal Compression	
E E 581	Digital Communication Systems I	
E E 583	Wireless Communications	
E E 586	Information Theory	
Controls & Robotics		
E E 551	Control Systems Synthesis [2]	
E E 553	Noncooperative Game Theory	
E E 565	Machine Learning I [3]	
E E 576	Geometric Algebra [3]	
E E 596	Digital Image Processing [3]	
Graduate Electives: choose 3 to 4 courses [4]		**12-9**
Total Credits		**30**

1 The graduate expanded core courses must be passed with a grade of B or better. Note--a grade of B- (or lower) in a graduate expanded core course will not satisfy completion of that course for the MEEE.

2 This course is one of the MSEE Graduate Core Courses. Students pursuing the MEEE who wish to pursue the Ph.D. in the future are encouraged to select three courses from this subset of courses to satisfy one of the requirements for the Ph.D. Qualifying exam (see https://ece.nmsu.edu/grad-study/phd-qualifying.html) for more information.

3 This course is included in multiple areas of emphasis. Students may use this course to satisfy **one** area of emphasis.

4 E E courses must be at the 500 level or higher. Non-E E courses must be at the 450 level or higher. Credits of E E 590 Selected Topics which are not subtitled are limited to a total of 6.

Other limitations and requirements that apply to all master's degrees are described elsewhere in this catalog.

Included Prefixes

Graduate course work credits from the following prefixes are permitted for the MEEE degree. If a graduate course outside this list of prefixes logically fits into the MEEE program, see your graduate advisor about requesting an exception; note that exceptions must be approved before taking the class.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. Students can take up to 12 credits of E E graduate courses and get dual course credit that can be applied to both an undergraduate and master's degree.

You can also check NMSU's catalog for additional information about our programs.

MAP Requirements

Please see further information about the MAP program on the graduate school website at https://gradschool.nmsu.edu/current-students/masters-accelerated-program.html.

Accepted MAP Courses

The following courses are accepted for use in the MAP program. Any other E E 500 level may be considered after a consultation with an advisor. E E 450 level courses are not eligible for MAP credit. The following course list specifies which undergraduate BSEE concentration electives may count toward the MAP. Courses are listed according to the most relevant BSEE concentration, but some courses may count toward multiple concentrations; please refer to the corresponding BSEE concentrations in the NMSU catalog for more details on concentration courses.

Electrical Engineering - Master of Science in Electrical Engineering

Requirements and Options for the MSEE degree

The Program Learning Objectives for the Master of Science in Electrical Engineering are:

1. That graduates successfully apply advanced skills and techniques in one or more areas of emphasis.
2. That graduates obtain relevant, productive employment with the private sector or in government and/or pursue additional advanced degrees.

Note–the following degree requirement tables outline the **minimum** requirements for an MSEE. As many students must register for a minimum of 9 credits each semester to remain full time, a student will often take more than the minimum of 6 credits of E E 599 Master's Thesis or 3 credits of E E 598 Master's Technical Report to complete their degree. All students in the MSEE program who receive support as GAs

are expected to take 9 credits of coursework toward the MSEE degree each semester.

Thesis Option:

Prefix	Title	Credits
Graduate Core Courses (choose 2-3 from 2-3 different areas) [1]		**6-10**
Microelectronics/VLSI		
E E 523	Analog VLSI Design	
Photonics/Optics		
E E 528	Fundamentals of Photonics	
Electric Energy Systems		
E E 543	Power System Faults and Stability	
Digital Signal Processing		
E E 545	Digital Signal Processing II	
or E E 596	Digital Image Processing	
Computer Engineering		
E E 562	Computer Systems Architecture	
Communications		
E E 571	Random Signal Analysis	
Controls & Robotics		
E E 551	Control Systems Synthesis	
Graduate Breadth Elective (choose 1-0 courses) from a third area [1]		**4-0**
Electromagnetics		
E E 541	Antennas and Radiation	
Microelectronics/VLSI		
E E 512	ASIC Design	
Electric Energy Systems		
E E 537	Power Electronics	
Digital Signal Processing

English - Master of Arts

New Mexico State University offers MA programs in two areas of emphasis; each one requires 33 hours of graduate-level work.

Emphasis: Literature

Students electing this emphasis can choose to work in various areas of literature, criticism and film. Students are required to

- complete 33 hours of coursework while satisfying area requirements (in early and modern literatures, in British and American Literatures, and in critical theory) with advisor-approved courses;
- demonstrate competency in a foreign language;
- deliver a public presentation on their research;
- write a master essay or thesis; and
- complete their program by passing an oral examination.

See advisor for list of courses satisfying theory and distribution requirements.

Prefix	Title	Credits
Required Coursework [1]		
Critical Theory		**3**
Advisors may approve another Literature course to fulfill this requirement as appropriate, based on subtitle		
ENGL 517	Graduate Study in Critical Theory	
ENGL 526	Special Topics in Critical Theory	
ENGL 589	Cultural Studies: Literature and Theory	
Literature		**18**
Must include both early and late periods, and both British and American Literature. Courses listed below under each category automatically fulfill that requirement. Advisors may approve other Literature courses to fit each requirement based on subtitle.		
Early		
ENGL 405	Chaucer	
ENGL 408	Shakespeare I	
ENGL 409	Shakespeare II	
ENGL 533	Victorian Literature	
Late		
ENGL 542	Modern and Contemporary American Poetry	
ENGL 544	Modern British Fiction	
ENGL 545	Postmodern Fiction	
ENGL 558	Latino/a Literature and Culture	
British		
ENGL 505	Graduate Study in Chaucer	
ENGL 508	Graduate Study in Shakespeare I	
ENGL 509	Graduate Study in Shakespeare II	
ENGL 533	Victorian Literature	
ENGL 544	Modern British Fiction	
ENGL 563	Graduate Study in English Literature	
American		
ENGL 542	Modern and Contemporary American Poetry	
ENGL 558	Latino/a Literature and Culture	
ENGL 569	Graduate in American Literature	
Literature courses to complete the 18 credits		
ENGL 505	Graduate Study in Chaucer	
ENGL 508	Graduate Study in Shakespeare I	
ENGL 509	Graduate Study in Shakespeare II	
ENGL 517	Graduate Study in Critical Theory	
ENGL 521	Graduate Study in a Literary Period or Movement	
ENGL 522	Graduate Study in a Literary Form or Genre	
ENGL 523	Graduate Study of a Major Author	
ENGL 524	Graduate Study in a Major Text	
ENGL 525	Graduate Study in Comparative Literature	
ENGL 526	Special Topics in Critical Theory	
ENGL 527	Graduate Study in Film and Digital Media	
ENGL 533	Victorian Literature	
ENGL 542	Modern and Contemporary American Poetry	
ENGL 544	Modern British Fiction	
ENGL 545	Postmodern Fiction	
ENGL 553	World Literatures	
ENGL 558	Latino/a Literature and Culture	
ENGL 563	Graduate Study in English Literature	
ENGL 567	Documentary Film Theory and Criticism	
ENGL 569	Graduate in American Literature	
ENGL 581	Women's Literature	
ENGL 589	Cultural Studies: Literature and Theory	
Elective courses in English Department		**9-12**
Master's Thesis or Master Essay		
ENGL 599	Master's Thesis [2]	3-6
or ENGL 598	Master's Essay	
Total Credits		**33-39**

[1] Graduate assistants must take 3 hours of ENGL 571 Composition Pedagogy and Practicum, during their first semester of teaching.

[2] Students must take 6 credits of ENGL 599 Master's Thesis to complete this requirement.

Emphasis: Rhetoric and Professional Communication

Students electing this emphasis take core courses across a wide range of topics within rhetoric and professional communication and choose from one of four areas of specialization:

- Composition,
- Critical/Cultural Studies,
- Rhetoric and
- Professional and Technical Communication.

Students conclude their program by writing a thesis, composing a portfolio of work completed in the program, or writing a master essay and by passing an oral examination. Students develop individualized plans of study in consultation with an advisor.

Prefix	Title	Credits
Required Coursework		
Proseminar		**3**
ENGL 510	Proseminar in Rhetoric and Professional Communication	
Methods Course		**3**
Select one from the following:		3
ENGL 548	Graduate Study in Empirical Research	
ENGL 601	Qualitative Research	
ENGL 604	Digital Research Methods	
Elective Course		**3**
Advisor-approved elective in English and/or related field		
Internship		**3**
Note: with advisor approval, student may substitute an elective for the Internship course		
ENGL 597	Internship in Technical and Professional Communication	
Capstone Course		**3-6**
Select one from the following: [2]		
ENGL 585	Advanced Writing Workshop: RPC Capstone	
ENGL 598	Master's Essay	
ENGL 599	Master's Thesis [1]	
Core Courses		**12**
Select two core courses from area of specialization.		
Select two core courses from any of the other three core areas		
Core Composition Courses		
ENGL 550	Graduate Study in Literacy	
ENGL 564	History and Theory of Composition Studies	
ENGL 571	Composition Pedagogy and Practicum [3]	
ENGL 583	Critical Writing Studies	
Core Critical/Cultural Studies Courses		
ENGL 517	Graduate Study in Critical Theory	
ENGL 568	Rhetoric and Cultural Studies	
ENGL 583	Critical Writing Studies	
Core Professional and Technical Communication Courses		
ENGL 502	Critical Conversations in Technical and Professional Communication	
ENGL 543	Multimedia Theory and Production	
ENGL 572	Technical-Professional Communication Pedagogies	
Core Rhetoric Courses		
ENGL 518	History of Rhetoric	
ENGL 519	Graduate Study in Modern Rhetorical Theory	
ENGL 568	Rhetoric and Cultural Studies	
ENGL 590	Master's Seminar in Rhetoric	
Specialized Courses		**9**
Select three additional courses in area of specialization determined in consultation with an advisor. [4]		
Total Credits		**39-42**

[1] Students must take 6 credits of ENGL 599 Master's Thesis to complete this requirement. ENGL 599 Master's Thesis: in lieu of portfolio or master essay.

[2] Graduate assistants must take 3 hours of ENGL 571 Composition Pedagogy and Practicum, during their first semester of teaching.

[3] Students may take either ENGL 570 Graduate Study in Approaches to Composition or ENGL 571 Composition Pedagogy and Practicum as a core course. Taking a second course will count under the area of specialization.

[4] Specialization may occur in any of the four core areas; students choose appropriate coursework for their area of specialization in consultation with an advisor.

Master's Accelerated Program in English with an Emphasis in Literature

The Master's Accelerated Program is an opportunity for qualified, advanced undergraduate students to begin graduate study while still enrolled as an undergraduate student. Students accepted into the program will be able to take up to 12 credits that can be applied to a Master's degree in English at New Mexico State University (just over one third of the required credits to obtain a graduate degree in English at NMSU).

Student Qualifications

Potential MAP students must meet the minimum qualifications for the program as outlined in the Graduate School policy concerning MAP programs.

In addition to these qualifications, students must meet the following requirements in order to be eligible for application to the MAP program.

- Must have a GPA of 3.0 or higher
- Must apply to the program with sufficient time to take the 12 credit hours that will be applied toward the overall program of study. Students will not be able to retroactively apply credits to MAP program.
- Must participate in the Developing New Scholars Program (DSNP), offered by the Graduate School and Honor's College.
- Consult with the Director of Undergraduate Studies on courses eligible and complete the Graduate School MAP form.
- Meet with their financial aid advisor, if they receive financial aid, as financial aid awards may have to be adjusted based on course registration.
- Completed 60 credits, including at least one (1) 400-level literature class and one (1) of the following courses ENGL 301 Theory and Criticism: Rhetoric and Culture, ENGL 302 Theory and Criticism: Literature and Culture, ENGL 303 Theory and Criticism: Film, Media and Culture, or ENGL 310 Critical Writing.

Applying for the MAP

To apply for the MAP fill out the the English Application to the Master's Accelerated Program and a scholarly writing sample (a course paper that showcases your skills in literary analysis). Send these materials to the Director of Undergraduate Studies, Dr. Tyson Stolte, at tmstolte@nmsu.edu. Applicants will also need to fill out the Graduate School's MAP form.

Approved MAP Courses:

The courses below can count toward the 12 credits toward an MA degree available to MAP students.

Prefix	Title	Credits
ENGL 453	World Literatures	3
ENGL 469	Advanced Study in American Literature	3
ENGL 505	Graduate Study in Chaucer	3
ENGL 508	Graduate Study in Shakespeare I	3
ENGL 509	Graduate Study in Shakespeare II	3
ENGL 533	Victorian Literature	3

Environmental Engineering - Master of Science in Environmental Engineering

Environmental engineering at New Mexico State University provides unique educational and research opportunities at the graduate level in the fields of water quality, aquatic chemistry, environmental microbiology, water treatment, water pollution control, wastewater treatment reclamation and reuse, desalination, membrane processes, industrial, hazardous, and solid waste management, groundwater remediation, contaminant fate and transport, resource recovery from waste streams, air pollution control, and nanotechnologies in environmental applications. Therefore, course offerings emphasize basic engineering and scientific principles, as well as the design and application of environmental engineering unit operations and processes. Special topics and thesis research are closely matched with faculty expertise and the professional goals of graduate students. The programs of study are specifically designed for individual students, taking advantage of not only the program capabilities, but also of the complementary activities of the university as a whole as well as the student's professional experience and work environment.

Graduate students satisfy degree requirements in environmental engineering by completing specific core course work. Course work in the graduate program includes the following:

- water and wastewater treatment
- solid and hazardous waste systems design
- environmental chemistry
- environmental microbiology
- environmental contaminant analysis
- industrial pollution control
- fate and transport of pollutants in engineered and natural systems
- water quality in surface water and groundwater systems
- advanced water treatment

Additional topics of interest to the students are offered through special topics classes and by courses taught outside of the College of Engineering.

The Master of Science (M.S.) program in Environmental Engineering requires either a thesis or non-thesis practice-oriented experience. The thesis track consists of a minimum of 30 semester credit hours, including 6 credit hours of thesis. The non-thesis track is designed primarily for students who are working full-time in engineering practice, but is also available to students working part-time. This track consists of 30 semester credit hours, including 6 credit hours of an engineering practicum (ENVE 598 Special Research Programs) of which up to 3 credit hours can be earned for a professional engineering design experience. Transfer credit for courses taken elsewhere is evaluated on an individual basis. Up to 6 semester hours of graduate level courses may be used to satisfy M.S. degree requirements provided that the credits were not used towards another degree.

Required Curriculum

The graduate environmental engineering program of the Civil Engineering Department expects all M.S. students to meet certain requirements in pursuit of an advanced degree. Some of these requirements are related to the quantity, level, and quality of coursework. This Graduate Catalog details what is expected as a minimum for graduation, but it is up to the student and his/her advisor and graduate committee to determine the program of study for the student. The student and his/her advisor will create this program of study in the first semester of graduate work.

Students desiring to work toward an advanced degree in environmental engineering must have completed undergraduate preparation similar to that required for a Bachelor of Science degree in an ABET accredited engineering program or must have adequate background, as determined by the graduate faculty of the program. The background courses listed below may be required if the student did not take a similar course at the undergraduate level, as determined by the graduate faculty of the program.

Environmental engineering faculty will form a committee for every entering student. The faculty will evaluate the student's record and determine which deficiencies or core courses, if any, are needed by the student. The required curriculum consists of 12 credit hours of core courses, 6 credit hours of Master's Thesis (thesis track) or Special Research Programs (non-thesis track), and 12 credit hours of elective courses. For all professional non-thesis programs, the department head will review the committee's decision.

Prefix	Title	Credits
Background Courses		
C E 356	Fundamentals of Environmental Engineering	
C E 382	Hydraulic and Hydrologic Engineering	
ENVE 456	Environmental Engineering Design	
Core Courses		**12**
ENVE 550	Aquatic Chemistry	
ENVE 551	Unit Processes/Operation of Water Treatment	
ENVE 552	Unit Processes/Operation of Wastewater Treatment	
ENVE 557	Surface Water Quality Modeling	
Thesis or Professional Experience [1]		**6**
ENVE 598	Special Research Programs	
or ENVE 599	Master's Thesis	
Elective Courses [2]		**12**
Total Credits		**30**

1. ENVE 598 Special Research Programs: practicum for students pursuing the non-thesis track. ENVE 599 Master's Thesis: required for students pursuing the thesis track.
2. Elective courses may be taken from any department and must be approved by the student's advisor and graduate committee.

Professional Development Electives for the Non-Thesis Track (outside the College of Engineering)

For students pursuing the non-thesis track, a minimum of 6 credit hours in graduate-level communications, management, economics, or other

relevant disciplines are required as part of the 12 elective credit hour requirement. These courses will be selected by the student and must be approved by the student's advisor and graduate committee.

Experimental Psychology - Master of Arts

The department offers an MA degree in general experimental psychology. The program provides students with sufficient electives to emphasize a particular sub-area of experimental psychology. The program is designed to provide graduates with the tools and knowledge necessary for further training at the doctoral level or for employment in industry or government.

MA students are required to complete:

Prefix	Title	Credits
First Year Research Project		**4-6**
PSYC 5991	Special Research Programs	
Core Course (corresponding to the student's area of study):		**3**
PSYC 5320	Cognition	
PSYC 5330	Social Psychology	
PSYC 5310	Engineering Psychology	
Two other Content Courses:		**6**
PSYC 5340	Learning and Memory	
PSYC 5350	Sensation and Perception	
PSYC 540	History and Systems of Psychology	
The Quantitative/Computer Methods Sequence:		**9**
PSYC 5110	Quantitative Methods in Psychology I	3
PSYC 5120	Quantitative Methods in Psychology II	3
PSYC 5210	Computer Methodology	3
Research Thesis:		
PSYC 5999	Master's Thesis	6

[1] Students are also encouraged to register for one credit of PSYC 5910 Research Seminar in Psychology each semester.

When offered, PSYC 5996 Special Topics may be considered content, quantitative methods, or experimental methods, depending on the specific course content.

Family and Consumer Sciences (Food Science and Technology) - Master of Science

The Department of Family and Consumer Sciences offers a Master of Science degree with a concentration in Food Science and Technology. The degree is earned satisfactorily after completing 30 credit hours of upper-division and graduate-level courses. The curriculum is completed in four academic semesters and includes a creative component. Once admitted to the program, each student will work with an advisor to develop an academic plan of study. The major advisor and the student will also select an advisory committee consisting of an additional departmental faculty member and a third member from outside the department.

Prefix	Title	Credits
Require Core Courses		
Statistics [1]		3-4
AXED 5515	Data Collection and Analysis	
A ST 503	SAS Basics	
A ST 505	Statistical Inference I	
Research Methods [2]		3-4
AXED 5510	Research Methods	
ANSC 512	Research Methods in Animal Science (s)	
FCSC 5999	Master's Thesis (Creative Component) [3]	6
Choose 18 credits from the following (in consultation with advisor):		18
FSTE 4150	Food Safety	
FSTE 4997	Special Problems	
FSTE 5110	Food Microbiology	
FSTE 5120	Food Chemistry	
FSTE 5230	Food Processing Technologies	
FSTE 5250	Sensory Evaluation of Foods	
FSTE 5140	Food Analysis	
FSTE 5130	Food Preservation	
FSTE 5210	Cereal Technology	
FSTE 5241	Processed Meats	
FSTE 5997	Special Research Programs	
FCSC 5996	Special Topics	
Total Credits		**30-32**

[1] Any statistics course that is approved by major advisor

[2] Any research methods course that is approved by major advisor

[3] The creative component of the program involves completing at least 6 credits of FCSC 5999 Master's Thesis. This requires the student, in consultation with the advisory committee, to conduct a research project and prepare a written manuscript. The student will present results of the project in the graduate seminar and then be examined by the advisory committee.

Family and Consumer Sciences (Couples, Marriage and Family Therapy) - Master of Science

Prefix	Title	Credits

Family and Consumer Sciences (Hotel, Restaurant and Tourism Management) - Master of Science

The concentration in Hotel, Restaurant and Tourism Management combines both coursework and research to expand the student's knowledge, abilities, and problem-solving skills. Students begin the program by learning about the current trends in a wide range of hotel, restaurant and tourism academic research areas. Students also take graduate classes that apply to their chosen area of specialization. Some students focus on general hospitality management. However, most choose an area of interest such as tourism, foodservice, hotel operations, culinary arts, destination management, revenue management, sales and marketing, hospitality or culinary education, beverage management, vacation ownership, hospitality information systems, or human resource management/training.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

Please talk to your HRTM Faculty Mentor about your MAP plan and develop a course plan in consultation with the advisor.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 3.00.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
HRTM Required and Elective Classes Taken At Graduate Level [1]		
HRTM 5145	Resort Management	3
HRTM 5140	Hotel Revenue and Sales Management	3
HRTM 5240	Sustainability in the Hospitality Industry	3

HRTM 5310	Beverage Management	3
HRTM 5410	Hospitality Cost Control	3
HRTM 5996	Special Topics	1-4

[1] Other courses may be used for the MAP requirements with the consent of instructor, including HRTM 5210 The Hospitality Industry and Sustainable Competitive Strategy, HRTM 5220 Contemporary Global Issues in Hospitality, and HRTM 5991 Special Research Programs but will require a degree audit exception through the department/graduate school.

For additional information, please see MAP requirements at:

https://gradschool.nmsu.edu/current-students/masters-accelerated-program.html.

Fine Arts - Master of Fine Arts

Emphasis: Studio Art

Art requirements for an MFA degree with an emphasis in studio art include a minimum of 60 credits of academic work, usually completed in three years. Of those 60 credits,

- 15 in 500-level ARTS classes
- 9 must be taken in art history,
- 6 in non-art courses numbered 450 or above,
- 3 in ARTH 579 Methodologies and Historiography of Art History and Art Theory
- 15 in ARTS 596 Graduate Studio Seminar
- 3 in ARTS 493 Studio Core III
- 3 in ARTS 495 Studio Core IV
- 6 in ARTS 598 Studio Thesis
-

In order to remain in good standing in the MFA program, a student must maintain an average GPA of 3.0. Any grade lower than B- in an Art Department graduate course is considered failing. In the event that a student fails a required course, they must repeat the class in order to get credit for it. If a student is awarded a graduate assistantship, he or she must maintain an average GPA of 3.0.

Prefix	Title	Credits
Program Requirements		
ARTH 579	Methodologies and Historiography of Art History and Art Theory	3
ARTS 596	Graduate Studio Seminar	15
Non-ARTS/Non-ARTH 450 level or higher courses		6
Studio Art Electives (ARTS 500-level)		15
Art History Electives (ARTH 500-level)		9
ARTS 493	Studio Core III: Professional Practices	3
ARTS 495	Studio Core IV: Thesis Production & Display	3
ARTS 598	Studio Thesis	6
Total Credits		**60**

Semester Reviews

At the end of the first two semesters, each graduate student's creative production will be reviewed by the assembled faculty. Participation in semester reviews are required for successful completion of graduate level studio courses.

Candidacy

Candidacy occurs during the third semester of study in residency. Candidacy consists of a formal review of the student's work by the assembled graduate faculty. The graduate faculty advances the student to his or her final 3 semesters of study by a majority vote. If the faculty does not advance the student, candidacy may be repeated one additional time at the end of the next consecutive semester. The final three semesters of thesis work will commence from that point. Students who are not successful in their second candidacy attempt will be dis-enrolled from the MFA program.

MFA Capstone Committee

At the end of the third semester and after a successful candidacy the student will propose his or her MFA capstone committee, consisting of two department of art graduate faculty members, and one graduate faculty member from outside the department.

MFA Capstone Exhibition

The studio thesis will culminate in an exhibition of the candidate's creative works and a written artist statement. A successful oral examination and defense of the statement and exhibition is required for graduation. Two copies of the artist statement and a photographic record of the final exhibition are required; other requirements may be determined by the graduate faculty. Students who do not satisfactorily complete their oral examination may not participate in the MFA capstone exhibition.

Capstone exhibitions for the MFA degree will be held in the spring semester in the University Art Museum. Students who wish to graduate at mid-year are obligated to find an exhibition space other than the NMSU Art Museum that meets with the approval of the graduate committee. In this case the student is responsible for making all arrangements for the MFA capstone exhibition.

Fish, Wildlife and Conservation Ecology - Master of Science

The Department of Fish, Wildlife and Conservation Ecology (FWCE) offers graduate work leading to the Master of Science degree with a major in Fish, Wildlife and Conservation Ecology. Faculty members in the department also may advise Ph.D. candidates through the graduate program in the Department of Biology, Department of Animal and Range Sciences, Department of Plant and Environmental Sciences, as well as other Ph.D. granting departments. For additional information, please see the graduate catalog entries for the respective departments.

For the Master of Science degree, a minimum of 30 semester credits of graduate work in the major and related subjects is required, together with a thesis for most students. Of these credits, at least 15 must be in courses numbered 500 or above, and at least 15 must be for courses with the FWCE prefix. Students electing a minor in FWCE are required to take at least 9 credits in the minor field. A nonthesis option is available to some students, depending on prior training and experience, and subject to approval by the advisor and department head.

All students in the program must complete the following requirements:

- A minimum of 6 credits of Quantitative Foundations (eligible courses listed below),

- A minimum of 3 courses (9-12 credits) from Ecological Concepts, Organismal Biology, Ecological Techniques (eligible courses listed below),
  - In addition, courses taught as special topics (FWCE 535 Special Topics) may apply to the Quantitative Foundations or Ecological Concepts, Organismal Biology, Ecological Techniques with approval from the supervisory committee and Department Head.
- 4 to 12 credits from the Independent Study category (eligible courses listed below).
  - Programs involving a thesis should include 4 to 6 credits of (FWCE 599 Master's Thesis). A maximum of 6 credits of (FWCE 599 Master's Thesis) will count towards the 30 credit hour requirement.

The lists below show typical courses that meet minimum Departmental and Graduate School course requirements for the Master's degree, as determined by the faculty and Department Head. Graduate-level courses other than those listed below may be used to fulfill course requirements with permission from the supervisory committee and Department Head.

Prefix	Title	Credits
Quantitative Foundations: Eligible Courses [1]		
Select minimum of 6 credits from the following:		6
A ST 503	SAS Basics	
A ST 505	Statistical Inference I (or equivalent)	
A ST 506	Statistical Inference II	
A ST 507	Advanced Regression	
A ST 509	Statistical Models for Complex Data Structures	
A ST 540	Predictive Analytics	
A ST 555	Applied Multivariate Analysis	
A ST 568	Applied Linear Models II	
A ST 550	Special Topics	
BIOL 455	Biometry	
FWCE 457	Ecological Biometry	
FWCE 509	Population Ecology	
GEOG 585	Spatial Analysis and Modeling	
**Other courses may be eligible to fulfill course requirements with consent of the advisory committee and department head		
Ecological Concepts, Organismal Biology, Ecological Techniques: Eligible courses		
Select a minimum of 3 courses (9-12 credits) from the following:		9
BIOL 467	Evolution	
BIOL 484	Animal Communication	
BIOL 488	Principles of Conservation Genetics	
BIOL 568	Communities and Ecosystems	
BIOL 587	Behavioral and Evolutionary Ecology	
FWCE 464	Fish and Wildlife Management, Law, and Policy	
FWCE 530	Large Mammal Ecology, Conservation and Management (Fall Odd years)	
FWCE 531	Mammalogy	
FWCE 535	Special Topics	
FWCE 537	Wildlife Damage Management	
FWCE 540	Wildlife Habitat Relationships (Fall even years)	
FWCE 559	Aquatic Ecology	
FWCE 567	Herpetology	
FWCE 571	GIS for Natural Resource Scientists	
FWCE 582	Ichthyology	
GEOG 557	Biogeography	
RGSC 452	Vegetation Measurements for Rangeland Assessment	
RGSC 585	Land Cover Analysis for Natural Resources	
RGSC 518	Watershed Methods and Management	
**Other courses may be eligible to fulfill course requirements with consent of the advisory committee and department head.		
Independent Study: Eligible courses		
Select 4-12 credits from the following:		4
FWCE 548	Graduate Problems	
FWCE 598	Special Research Programs	
FWCE 599	Master's Thesis	
**Other courses may be eligible to fulfill course requirements with consent of the advisory committee and department head		
To meet the 30 credit hour requirements of the MS program, completion of further course work in addition to the requirements described above will be necessary. The additional course(s) must be approved by the graduate student's supervisory committee.		11
Total Credits		**30**

[1] Other courses, particularly in Applied Statistics, may be eligible with consent of the advisory committee.

Graduate work in the department is intended to prepare students for careers in research, teaching, extension and management. Facilities available to graduate students include two ranches of approximately 90,000 acres, a large suite of shared laboratories, and a large fish-culture facility. We actively cooperate with state and federal natural resource management agencies, and graduate students have access to national forests and extensive public lands, as well as the Jornada Basin Long-Term Ecological Research site and associated databases. Additional research opportunities for graduate students are available in the New Mexico Cooperative Fish and Wildlife Research Unit, located in the department since 1988.

Additional information on the graduate program and faculty is available at https://aces-academics.nmsu.edu/.

Geography - Master of Applied Geography

Overview

The Master of Applied Geography (MAG) program at New Mexico State University's Department of Geography & Environmental Studies provides students with a flexible, interdisciplinary graduate education that prepares them for careers in both academic and professional settings. The program offers two pathways to completion:

Thesis Option (30 credits)

This option is designed for students interested in original research, this track requires coursework, the development of a master's thesis, and a thesis defense. Students work closely with faculty advisors and a thesis committee to produce a significant scholarly contribution to the field.

Non-Thesis (Residency) Option (30 credits)

This option is ideal for students pursuing applied, practice-based careers, this track replaces the thesis with a residency experience in an external organization, an applied residency report, and a final examination.

A Flexible and Interdisciplinary Approach

The MAG program is highly customizable, allowing students to tailor their studies to align with their academic interests and professional goals. Core coursework ensures a strong foundation in geographic theory, integrative research design, and advanced methodologies, while elective courses—drawn from geography and affiliated disciplines—enable students to develop specialized expertise in areas such as geographic information science and technology, environmental policy and planning, conservation and natural resource management, urban and regional planning, and emergency and disaster management.

Funding and Assistantships

Most MAG students receive financial support through teaching or research assistantships, which provide stipends and tuition coverage while offering valuable teaching and research experience. Additional funding opportunities are available through departmental scholarships, external grants, and professional partnerships.

Who Can Apply?

A background in geography is not required to enter the program. However, students without prior coursework in geography may be required to take preparatory courses to ensure success in graduate-level geography coursework. Prospective students are encouraged to consult with the Graduate Program Director to determine optimal pathways for meeting prerequisite requirements.

Career Pathways

Graduates of the MAG program secure careers in diverse professional and academic fields, including data and information management, cultural and natural resource management, environmental consulting, urban and regional planning, education and outreach, emergency management, and public health.

Program Learning Outcomes

Upon completion of the Master of Applied Geography, students will be able to:

1. Apply advanced geographic concepts and methods to assess human and/or environmental problems.
2. Propose ethical solutions to complex and dynamic human and/or environmental problems using critical thinking.
3. Conduct all stages of an independent research project, including conceptualization, planning, implementation, management, and communication through a research report.

More Information

See the Requirements tab for details on course and credit expectations for earning the Master of Applied Geography, and the Roadmap tab for a suggested course sequence.

Course and Credit Requirements

General Information

The Department of Geography and Environmental Studies (GES) at NMSU offers students two options for earning a Master of Applied Geography (MAG): a thesis option and a non-thesis option. The thesis option (30 credits) represents the traditional path for earning a MAG degree and entails the completion of coursework and the writing and defense of a master's thesis. The master's thesis is a piece of original scholarship developed under the direction of an advisor and typically two thesis committee members. The non-thesis option (30 credits) is an alternative path for earning a MAG degree and requires the completion of coursework, the writing of a residency report, and the passing of a final exam. The residency report is a document developed during an internship or residency under the direction of a field supervisor at an agency or firm.

Undergraduate Preparation

An undergraduate geography degree is not required for entry into the MAG program. However, applicants who lack the equivalent of GEOG 1110G Physical Geography, GEOG 1130G Human Geography, and/or GEOG 2130 Map Analysis & Interpretation may be required to take these or similar courses to prepare for the graduate-level work in geography. Applicants without an undergraduate geography degree are strongly encouraged to contact the GES Graduate Program Director and their Graduate Advisor to identify optimal strategies for satisfying basic course requirements.

Prefix	Title	Credits
GEOG 1110G	Physical Geography	4
GEOG 1130G	Human Geography	3
GEOG 2130	Map Analysis & Interpretation	3

Credit, Course, and Grade Requirements

The MAG program aims at offering students flexibility in designing their desired course of graduate study while at the same time ensuring that all students have graduate-level core competencies in geographic concepts and methods. To that end, all students pursuing the MAG degree are required to complete a minimum of 30 graduate credits, including 9 core course credits, 6 thesis credits (thesis option) or 6 residency credits (non-thesis option), and 15 elective credits. Of the 30 graduate credits, at least 15 credits must be in geography and at least 15 credits must be at the 500-level or above. All MAG students must earn a grade of B- or better in the 3 core courses (GEOG 501 Geographic Theory and Application, GEOG 502 Integrative Research Design, and GEOG 584 Qualitative, Critical, and Creative Methodologies or GEOG 585 Spatial Analysis and Modeling). All candidates are moreover required to maintain an overall GPA or 3.00 or higher.

Prefix	Title	Credits
Core Geography Courses [1]		**9**
GEOG 501	Geographic Theory and Application	3
GEOG 502	Integrative Research Design	3
GEOG 584	Qualitative, Critical, and Creative Methodologies	3
or GEOG 585	Spatial Analysis and Modeling	
Elective Courses [2]		**15**
Select additional courses in geography and/or other disciplines.		
At least 6 of the elective credits must be in geography.		
At least 6 of the elective credits must be at the 500-level or above.		
Thesis / Residency Credits [3]		**6**
GEOG 599	Master's Thesis	6
or GEOG 596	Residency	

1. Students must earn a grade of B- or better in all 3 core courses.
2. Students may be required to take additional courses that their committee deems necessary for the successful completion of the thesis research.
3. For more information regarding the master's thesis requirement, please visit **this GES website**.

A Suggested Plan of Study for Students

The following road map is a guide for full-time students (9 credits/semester for graduate assistants and/or graduate students receiving financial aid) to earn the Master of Applied Geography (MAG) degree and achieve the following MAG program learning outcomes:

1. Apply advanced geographic concepts and methods to assess human and/or environmental problems.
2. Propose ethical solutions to complex and dynamic human and/or environmental problems using critical thinking.
3. Conduct all stages of an independent research project, including conceptualization, planning, implementation, management, and communication through a research report.

The road map assumes that each student will create a customized plan for degree completion in consultation with their graduate faculty committee. We realize that students may deviate from the road map for various reasons but expect that they diligently attempt to meet the milestones outlined below.

First Year, Fall Semester

First Year		
Fall		**Credits**
GEOG 501	Geographic Theory and Application	3
GEOG 584	Qualitative, Critical, and Creative Methodologies	3
or GEOG TBD Elective Course		
Elective Course		3
	Credits	**9**
	Total Credits	**9**

Non- Curricular Recommendations

- Select your Graduate Faculty Advisor.
- Clarify your academic and professional goals and align your curricular path with the MAG program learning outcomes noted above.
- Establish a preliminary thesis / residency topic.
- Identify extracurricular service and outreach opportunities such as leadership in student organizations, community engagement, or peer mentoring.
- Identify professional development opportunities such as conference attendance, workshop participation, or internships.

First Year, Spring Semester

First Year		
Spring		**Credits**
GEOG 502	Integrative Research Design	3
GEOG 585	Spatial Analysis and Modeling	3
or GEOG TBD Elective Course		
Elective Course		3
	Credits	**9**
	Total Credits	**9**

Non- Curricular Recommendations

- Finalize your Graduate Faculty Committee and file the Graduate Research Committee form.
- Propose your thesis / residency project to the Graduate Faculty Committee.
- File the “Thesis / Residency Proposal Form.”
- File the “Program of Study for Masters Students Form.”
- Discuss opportunities for disseminating your scholarly and creative activities via presentations, publications, and other strategies.
- Engage in extracurricular service and outreach activities.
- Take advantage of professional development opportunities.
- Plan for fieldwork, internships, or other activities during the summer.

First Year, Summer Semester

Non- Curricular Recommendations

- Conduct field, archive, and other data collection work for your thesis or residency.
- Conduct data analyses for your thesis or residency.
- Begin writing your thesis or residency report.

Second Year, Fall Semester

Second Year		
Fall		**Credits**
Elective Course		3
Elective Course		3
GEOG 599 or GEOG 596	Master's Thesis or Residency	3
	Credits	**9**
	Total Credits	**9**

Non- Curricular Recommendations

- Finish your data collection and analysis.
- Continue writing your thesis or residency report.
- Disseminate your scholarly and creative activities via presentations, publications, and other strategies.
- Engage in extracurricular service and outreach activities.
- Take advantage of professional development opportunities.

Second Year, Spring Semester

Second Year		
Spring		**Credits**
Elective Course		3
Elective Course		3
GEOG 599 or GEOG 596	Master's Thesis or Residency	3
	Credits	**9**
	Total Credits	**9**

Non- Curricular Recommendations

- Finish writing your thesis or residency report.
- Study the NMSU Graduate School webpages and make sure you meet all deadlines for degree application, form submissions, etc..
- Schedule and hold your thesis defense or oral exam.
- Share your final thesis or residency report as well as all thesis / residency data and metadata with your Graduate Faculty Advisor.

- Disseminate your scholarly and creative activities via presentations, publications, and other strategies.
- Engage in extracurricular service and outreach activities.
- Take advantage of professional development opportunities.

Geology - Master of Science

A candidate for a master's degree must:

- Complete a minimum of 30 graduate credits, including a minimum of 6 credits for thesis (GEOL 599 Master's Thesis).
  - No more than 5 thesis credits may be taken in any one semester. Early selection of a research advisor is encouraged.
- A thesis proposal must be approved by the advisor and the candidate's committee before registering for thesis credits.
- At least 15 credits must be earned in courses numbered 500 or above, and at least 15 credits must be earned in geology.
- Students are expected to participate in the department's colloquium each semester.

The department offers excellent laboratory facilities for research in mineralogy, igneous petrology, geochemistry, stratigraphy, geochronology, and sedimentology. Available are a large, fully equipped rock preparation laboratory, mineral separation laboratory, plus computer, geochemical and petrographic labs. Major equipment includes a Gemeni heavy mineral separation table, X-Ray Fluorescence Spectrometry (XRF), Laser-Induced Breakdown Spectroscopy (LIBS), a class 1000 clean lab, Thermal Ionization Mass Spectrometry (TIMS) and Laser-Ablation Multi-Collector Inductively Coupled Plasma Mass Spectrometry (LA-MC-ICP-MS). The department maintains its own fleet of field vehicles. Also available are computing facilities that include an HP color plotter and GIS system. Financial support is available to graduate students in geology through teaching and research assistantships and scholarships. Inquiries regarding financial aid should be directed to the graduate advisor.

History - Master of Arts

Thesis Program

Thirty-six credits (27 of which must be at the 500 level) are required for the thesis program:

Prefix	Title	Credits
Select at least 3 credits from Public History courses above the 500 level		3
HIST 579	Oral History	
HIST 583	Advanced Historic Preservation	
HIST 586	Interpreting Historic Places for the Public	
HIST 594	Public History Seminar	
Select two from the following:		6
HIST 590	Reading Seminar: Borders, Boundaries and Frontiers	
HIST 591	Reading Seminar: Modernity and its Discontents	
HIST 592	Reading Seminar: Nature and Society	
HIST 596	Research Seminar	3
HIST 598	Craft of History: Historical Theories, Methods, and Criticism (f)	3
Select a maximum of 6 credits in related fields outside the Department of History [1]		6
Select 9 credits at the 500-level or above in the Department of History		9
HIST 599	Master's Thesis	6
Total Credits		**36**

[1] With permission of the graduate advisor, a maximum of 6 credits may be taken in related fields from courses numbered 450 and above outside the Department of History.

A student choosing the thesis program must receive permission for his/her thesis by passing a thesis proposal defense after earning 12 graduate credits in History. The department will provide guidelines for the thesis defense. Students who choose the thesis program must pass a final oral examination over their graduate course work and their thesis. All graduate students will be required to present a research paper in a public forum approved by the department's Graduate Director.

Dual Track M.A. (Public History and Thesis)

Students choosing to pursue both the thesis track and Public History concentration must complete the course hours required for the public history concentration, perform an internship, and defend the proposed thesis before undertaking it using guidelines provided by the department, present the public history portfolio at a public presentation, complete the thesis, and defend their course work, thesis and public history portfolio at a final oral examination. In order to satisfactorily complete both programs, such students would complete 39 credits, including three hours of internship credit and six hours of thesis work.

Prefix	Title	Credits
Select four History Graduate Seminars including the following:		
HIST 594 Public History		3
HIST 598 Craft of History		3
HIST 596 Research Seminar		3
Select one from the following:		3
HIST 590	Reading Seminar: Borders, Boundaries and Frontiers	
HIST 591	Reading Seminar: Modernity and its Discontents	
HIST 592	Reading Seminar: Nature and Society	
HIST 585	Public History Internship	3
Select a maximum of 9 credits (450-and above) outside the Department of History [2]		9
Preparation of an article of scholarly quality		3
Select 3 credits at the 500 level from courses in the Department of History		3
HIST 599	Master's Thesis	6
Total Credits		**36**

Master's Accelerated Program (MAP)

Master's Accelerated Program (MAP)

The Master's Accelerated Program allows academically qualified Undergraduate students to complete up to 12 credit hours towards a Master's degree during their junior and/or senior years while still completing the Bachelor's degree. The courses only apply to classes they would take within the Master of Arts program in History.

NMSU General Eligibility:

Must have completed 60 hours of undergraduate coursework (minimum 25 hours at NMSU). GPA larger or equal to 3.00.

NMSU MAP Regulations/Stipulations:

Courses will count toward both degrees; they will show on Undergraduate and Graduate transcripts and count toward both GPAs. Graduate level courses included in the Master's Accelerated Program are those courses numbered 450 and above or those chosen by the graduate academic departments. Students must receive a grade of B or higher in all MAP coursework to be counted as Graduate credit. Students apply for the Graduate program in their final semester or second to last semester of their Undergraduate degree, depending upon the deadlines set forth by the Department of History. Acceptance of MAP credits does not imply acceptance into the Department of History Master's program. Final admissions and acceptance into the Graduate program are based on academic performance at the Undergraduate level and completion of the eligible Undergraduate degree. Tuition is based on the level of the student, not the course. Students may become ineligible for MAP if their undergraduate or graduate GPA drops below 3.0. Students who are accepted into the Master's Accelerated Program must participate in the Developing New Scholars Program (DNSP), offered by the Graduate School. Students must be advised each semester for the MAP program by their potential graduate program and cleared for registration in Graduate courses by the Graduate School.

How to Apply to the MAP Program:

A student may apply, or the department may invite students to participate in MAP. Departments accept students based on the Master's Accelerated Program requirements as set by the department. A History faculty member, Graduate Coordinator, or Department Head will forward the Master's Accelerated Program Letter of Intent Slate Form to the Graduate School. Graduate School will hold the application until the student has completed their undergraduate degree. This application will be used as part of the graduate school's final admissions into the master's program. The following courses are eligible for the History MAP Program. Other courses may be considered after consultation with the Graduate Coordinator. An exception will need to be made to the degree audit for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
HIST 474	Gender in East Asian History	3
HIST 478	History of Transportation: Planes, Trains and Automobiles	3
HIST 500	Special Topics	1-9
HIST 511	Making the American West	3
HIST 514	The Constitution and U.S. History	3
HIST 527	Labor History	3
HIST 535	War and Revolution	3
HIST 538	Special Topics in European History	3
HIST 543	Special Topics in Asian History	3
HIST 545	Special Topics in United States History	3
HIST 549	Graduate Readings	1-3
HIST 568	Urban History	3
HIST 570	The Cold War in Latin America	3
HIST 571	China through the Ming Dynasty	3
HIST 572	China in the Modern World	3
HIST 573	History of Japan	3
HIST 575	History of the Global Political Economy	3
HIST 579	Oral History	3
HIST 583	Advanced Historic Preservation	3
HIST 585	Public History Internship	3
HIST 586	Interpreting Historic Places for the Public	3
HIST 590	Reading Seminar: Borders, Boundaries and Frontiers	3
HIST 591	Reading Seminar: Modernity and its Discontents	3
HIST 592	Reading Seminar: Nature and Society	3
HIST 594	Public History Seminar	3
HIST 596	Research Seminar	3
HIST 597	Public History Article	1-9
HIST 598	Craft of History: Historical Theories, Methods, and Criticism (f)	3
HIST 599	Master's Thesis	1-15

History (Public History) - Master of Arts

Thirty-six credits (27 of which must be at the 500 level) are required for the Public History concentration:

Prefix	Title	Credits
Select four History Graduate Seminars including the following:		
HIST 594 Public History		3
HIST 598 Craft of History		3
HIST 596 Research Seminar		3
Select one from the following:		3
HIST 590	Reading Seminar: Borders, Boundaries and Frontiers	
HIST 591	Reading Seminar: Modernity and its Discontents	
HIST 592	Reading Seminar: Nature and Society	
HIST 585	Public History Internship	3
Select a maximum of 9 credits (numbered 450 and above) outside the Department of History [1]		9
Preparation of an article of scholarly quality		3
Select 9 credits from courses numbered 500 and above in the Department of History		9
Total Credits		**36**

[1] Requires the permission of the Director of the Public History Program

Students in the Public History concentration must collectively pass 18 credits of nonpublic history courses, including the nonpublic history seminars noted above. They must collectively pass 18 credits in public history, which must include the public history seminar, the internship, and the article. The scholarly article is developed through work in the internship and will be of peer reviewed journal quality. The public history credits may include a maximum of 9 graduate level (450 -and-above) credits outside the Department of History with permission of the Director of the Public History Program. A student choosing the Public History concentration must pass an article proposal defense about the proposed scholarly article during the first semester after completion of the internship. The department will provide guidelines for the article defense. A student choosing the Public History specialization must give a public presentation of a portfolio that includes his/her work and the scholarly article, and must pass an oral examination over graduate course work, the internship, and the article. Students who receive a Master's degree

in this track will have a specialization in Public History added to their transcripts.

Master's Accelerated Program (MAP)

The Master's Accelerated Program allows academically qualified Undergraduate students to complete up to 12 credit hours towards a Master's degree during their junior and/or senior years while still completing the Bachelor's degree. The courses only apply to classes they would take within the Master of Arts program in History.

NMSU General Eligibility:

Must have completed 60 hours of undergraduate coursework (minimum 25 hours at NMSU). GPA larger or equal to 3.00.

NMSU MAP Regulations/Stipulations:

Courses will count toward both degrees; they will show on Undergraduate and Graduate transcripts and count toward both GPAs. HIST 598	Craft of History: Historical Theories, Methods, and Criticism (f)	3
HIST 599	Master's Thesis	1-15

Horticulture - Master of Science

This degree emphasizes the creative use of plants by humans, and studies on the technical advancements in the husbandry of economic commodity groups of fruits, vegetables, or ornamentals, and turfgrass management. Emphasis may be in breeding and genetics of chile or onions, plant growth and development, nutrition, plant stress response, fruit and vegetable physiology, forestry, and turfgrass. Students will be prepared for successful employment in diverse horticulture private industries, educational institutions, and government agencies. Candidates for this degree must successfully conduct original research in one of the above areas and complete a minimum of 30 graduate credits based on a program of study approved by the student's graduate committee.

The Master of Science degree can be obtained through either a thesis option (recommended) or a non-thesis option. Prerequisite to major graduate work is completion of a curriculum essentially equivalent to that required by the department for the BS degree at New Mexico State University. Qualifications for admission will be reviewed by the departmental graduate faculty.

Minimum Grade Point Average and Credit Hour Requirements: Your Master's degree requires a minimum of 30 completed degree hours and a minimum cumulative GPA of 3.00 in all course work.

Degree residency requirement: 15 credits must be completed at NMSU.

Thesis Option

Prefix	Title	Credits
Departmental Requirements		
Selection of courses should be based on consultation with the student's graduate committee		

AGRO/HORT/SOIL 590	Graduate Seminar (taken final semester)	1
Complete sufficient credits numbered 450 or above, including at least 15 credits at the 500-level or above, to bring total graduate credits to 30		23-25
AGRO/HORT/ENVS 599	Master's Thesis (taken during final year)	4-6
Complete a final oral defense of the written thesis and a general examination of the student's field of study		
Total Credits		**30**

See the PES Graduate Handbook (https://pes.nmsu.edu/documents/NMSU_PES_GraduateStudiesHandbook_final83020221.pdf) for additional details.

Non-Thesis Option

Prefix	Title	Credits
Departmental Requirements		
Selection of courses should be based on consultation with the student's graduate committee		
AGRO/HORT/SOIL 590	Graduate Seminar (taken final semester)	1
Complete sufficient credits numbered 450 or above, including at least 15 credits at the 500-level or above, to bring total graduate credits to 30		29
Complete a written research report on an area of investigation conducted by the student.		
Complete a final oral defense of the written report and a general examination of the student's field of study		
Total Credits		**30**

Industrial Engineering - Master of Engineering in Industrial Engineering

The Department of Industrial Engineering offers the Master of Engineering in Industrial Engineering (M.E. in IE) as a coursework-only degree. It is a Professional Master's degree targeting a working professional who wants to pursue a Master's degree in Industrial Engineering at New Mexico State University.

The program of study leading to the Master of Engineering in Industrial Engineering (M.E. in IE) degree consists of 30 credits. At least 50% of the coursework must be taken from the Approved IE Department Course List. This means that students can take up to five electives from engineering disciplines outside the department and/or other areas of interest outside the college.

The M.E in IE degree is also offered by distance education for qualified applicants. The courses with section numbers M70 - M79 are designated as online.

Although there is no oral exam, students will be required to complete an exit interview with an Industrial Engineering faculty member.

Note that NMSU reserves the right to change the program requirements without prior notice. Information in the NMSU Graduate Catalog takes precedence over any other information.

Selection of Advisor

During the first 12 credit hours in the Industrial Engineering Graduate Program, all master's degree students must select a permanent advisor. This must be done prior to registration for the fifth course the student takes. In selecting an advisor, the student should communicate with several members of our graduate faculty to discuss specific program objectives. The student should also use these contacts to become familiar with faculty research projects that are currently in progress. The faculty member must consent to serve as the student's advisor in writing. A list of the graduate faculty of the department with their areas of interest is found on the IE web page at https://ie.nmsu.edu/.

Prefix	Title	Credits

MATH 5000-level (With approval of advisor and instructor)		
STAT 5000-level (With approval of advisor and instructor)		
A ST 500-level (With approval of advisor and instructor)		

[1] The optional courses outside the department and/or the college should be previously approved by the academic advisor. See your advisor for more detailed information about selecting elective courses.

New Mexico State University's master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin

working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. Students can take up to 12 credits of approved IE courses and get dual course credits that can be applied to both an undergraduate and master's degree. You can also check NMSU's catalog for additional information about our programs.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute their graduate courses for required or elective courses in an undergraduate degree program, and then subsequently count those same courses as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other I E 500+ courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Industrial Engineering - Master of Science in Industrial Engineering

The Department of Industrial Engineering offers a Master of Science (M.S.) in Industrial Engineering with focus areas of manufacturing, operations research, and engineering management. Students may choose one of two options for completing their M.S. degree and the requirements for each option are listed below:

- **Thesis option:** 24 credits of coursework plus 6 credits of I E 599 Master's Thesis.
- **Project Option:** 27 credits of coursework plus 3 credits of I E 598 Special Research Programs.

Whether students write a thesis or complete a project, the program of study leading to the M.S. degree consists of 30 credits. At least 50% of the coursework must be taken from the Approved IE Department Course List. This means that students can take up to five electives from engineering disciplines outside the department and/or other areas of interest outside the college.

Note that NMSU reserves the right to change the program requirements without prior notice. Information in the NMSU Graduate Catalog takes precedence over any other information.

Selection of Advisor

During the first 12 credit hours in the Industrial Engineering Graduate Program, all master's degree students must select a permanent advisor. This must be done prior to registration for the fifth course that the student takes. In selecting an advisor, the student should communicate with several members of the IE graduate faculty to discuss specific program objectives. The student should also use these contacts to become familiar with faculty research projects that are currently in progress. The faculty member must consent to serve as the student's advisor in writing. A list of the department graduate faculty along with their areas of interest is found on the IE web page (https://ie.nmsu.edu/).

I E 524	Advanced Production and Inventory Control
I E 571	Advanced Quality Control
I E 575	Advanced Manufacturing Processes
Engineering Management	
I E 523	Advanced Engineering Economy
I E 530	Environmental Management Seminar
I E 537	Large Scale Systems Engineering
I E 561	Advanced Safety Engineering
I E 563	Topics in Engineering Administration
Depending on contents, the following two courses are applicable to any of the above four areas:	
I E 505	Directed Readings
I E 590	Selected Topics
Optional Electives [1]	
E E 500-level (With approval of advisor and instructor)	
M E 500-level (With approval of advisor and instructor)	
C E 500-level (With approval of advisor and instructor)	
ACCT 500-level (With approval of advisor and instructor)	
BCIS 500-level (With approval of advisor and instructor)	
BFIN 500-level (With approval of advisor and instructor)	
MGMT 500-level (With approval of advisor and instructor)	
ECON 500-level (With approval of advisor and instructor)	
C S 500-level (With approval of advisor and instructor)	
MATH 500-level (With approval of advisor and instructor)	
STAT 500-level (With approval of advisor and instructor)	
A ST 500-level (With approval of advisor and instructor)	

[1] The optional courses outside the department and/or the college should be previously approved by the academic advisor. See your advisor for more detailed information about selecting elective courses.

Requirements for Graduation

It is the responsibility of the student to complete all forms before submitting them to the IE department. Blank forms will not be accepted.

1. **Application for Diploma (Degree)** At the start of the semester in which you are to graduate you must file an Application for Diploma (Degree) and fee with the NMSU Registrar Office. To find the application as well as deadlines, log onto MyNMSU (https://my.nmsu.edu/) and click on the Student and Financial Aid tab, then under QuickLinks select Student Records. Filing dates are on the Graduate School Calendar that is maintained on the Graduate School website.
2. **Program of Study** – After completing 12 NMSU credits of graduate coursework, every student is required to complete a form entitled "Program of Study for Masters Students", and submit it to their advisor. This form is found on the NMSU Graduate School (https://gradschool.nmsu.edu/) web page: Under the "Current Students" pull-down menu at the top, choose "Graduate Forms". A final version of this form must be submitted to the Graduate School during the student's final semester.
3. **Schedule Your Master's Exam** – Whether you write a thesis, complete a project, or take all coursework, you must schedule a final examination during the last semester of your coursework/research. Examination committee rules are in the Graduate Catalog: You should plan to have your adviser, a second IE graduate faculty member, and an external (outside the IE department) faculty member. The external member will also serve as the Dean of the Graduate School's Representative. To ensure that a Faculty Member is currently a member of the Graduate Faculty and their appointment expiration date please visit the Graduate Faculty & Staff Directory on the Graduate School (https://gradschool.nmsu.edu/) web page: Under the "Faculty and Staff" pull-down menu at the top, choose "Graduate Faculty & Staff Directory". The schedule dates are found on the Graduate School (https://gradschool.nmsu.edu/) web page: Under the "Current Students" pull-down menu at the top, choose "Graduate School Calendar".
4. **Other Forms** – Additional forms can be found on the Graduate School website (http://gradschool.nmsu.edu/).

To schedule and take your exam:

- Schedule a 2-hour time block that is convenient for you and your selected faculty committee. **Students are responsible for contacting and scheduling their committee members.**
- Schedule use of the IE Conference Room, Room 279 EC III, with the Industrial Engineering Secretary. At that time, if you are presenting a project or thesis, schedule the use of any equipment you may require such as the In Focus projector, laptop, etc.
- Complete the Masters Final Examination Form. The exam form is also available on the Graduate School (https://gradschool.nmsu.edu/) website. You must schedule your exam a minimum of 10 working days in advance. This means your form must be at the Graduate School at that time.
- Consult with your adviser to discuss your examination. This can be by phone or e-mail.
- Be on time for your examination. If you're using equipment for presenting research, you should arrive early to set up.

Please plan to attend, with your family and friends, the College of Engineering's Sociedad de Ingenieros ceremony that is held to recognize our engineering graduates. This ceremony is held the Friday evening before Graduation.

New Mexico State University's master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. Students can take up to 12 credits of approved I E courses and get dual course credits that can be applied to both an undergraduate and master's degree. You can also check NMSU's catalog for additional information about our programs.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same courses as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.

- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other I E 500+ courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
I E 451	Engineering Economy	3
I E 456	Large Scale Systems Engineering	3
I E 459	Systems Thinking and Decision Making	3
I E 460	Evaluation of Engineering Data	3
I E 466	Reliability	3

Mathematics - Master of Science

The Master's degree is designed to increase one's knowledge and understanding of mathematics beyond the Bachelor's degree level. It also prepares a student for future graduate work.

A candidate for a master's degree may select up to two minors in addition to the major. A minimum of 8 credits of graduate work is necessary for a minor.

In addition to standard Graduate School requirements, the program requires:

1. Letters of Recommendation (3).
2. A personal statement or letter of interest covering academic background and career goals.

Minimum Requirements for the Master's Degree

1. In fulfillment of the Graduate School requirement of a minimum of 30 semester credits of course work, the student must take at least 24 credits of mathematics or statistics from the courses listed below.
2. The student's program of study must be approved by the departmental Graduate Studies Committee.
3. The student must successfully complete a master's written examination and final master's oral examination.

Prefix	Title	Credits
Minimum Requirements		
Complete each of the following (12 credits):		
MATH 5350	Advanced Linear Algebra	3
MATH 5340	Abstract Algebra I: Groups and Rings	3
MATH 5360	Introduction to Real Analysis I	3
MATH 5365	Introduction to Real Analysis II	3
Complete two of the following:		*6*
MATH 5310	Introduction to Topology	
MATH 5320	Logic and Set Theory	
MATH 5410	Complex Analysis	
STAT 5210	Probability: Theory and Applications	
STAT 5220	Statistics: Theory and Applications	
STAT 5230	Elementary Stochastic Processes	
Complete two of the following		*6*
MATH 5420	Topology I	
MATH 5425	Topology II	
MATH 5430	Mathematical Structures in Logic	
MATH 5435	Universal Algebra and Model Theory	
MATH 5440	Partial Differential Equations I	
MATH 5445	Partial Differential Equations II	
MATH 5450	Abstract Algebra II: Fields, Rings and Modules	
MATH 5453	Module Theory and Homological Algebra	
MATH 5450	Abstract Algebra II: Fields, Rings and Modules	
MATH 5455	Introduction to Commutative Algebra and Algebraic Geometry	
MATH 5460	Measure and Integration	
MATH 5463	Real Analysis	
MATH 5465	Introduction to Functional Analysis	
STAT 5310	Foundations of Probability	
STAT 5330	Continuous Multivariate Analysis	
STAT 5335	Linear Models	
STAT 5340	Advanced Theory of Statistics I	
STAT 5345	Advanced Theory of Statistics II	
Total Credits		**24**

The Master's Written Examination

Candidates for the Master's in Mathematics must pass a written exam, offered at the end of the Fall and Spring semesters, based on the content of MATH 5350 and MATH 5360. Full-time students need to pass the written Master's exam no later than the Summer following their completion of MATH 5350 and MATH 5360, or the start of their fourth semester in the program, whichever comes first. Graduate assistants must adhere to this timetable. Any second try must be passed within one semester of the first.

The Master's Final Examination

The Master's final examination is an oral examination administered by the student's committee. The exam consists of a short presentation made by the student on a topic covered in the student's coursework, followed by an examination by the committee based on the presentation and related coursework in the student's program of study. When a Master's thesis has been written, the presentation and examination is based on the student's thesis. The student's committee consists of at least three departmental members and a Graduate faculty member from another department who serves as the Dean's representative. The oral exam must be completed at least 10 days prior to the end of the semester in which the candidate wishes to receive the degree.

Master's Accelerated Program (MAP)

Master's Accelerated Program (MAP)

The Master's Accelerated Program allows academically qualified Undergraduate students to complete up to 12 credit hours towards a Master's degree during their junior and/or senior years while still completing the Bachelor's degree.

How to Apply to the MAP Program:

A student may apply, or the department may invite students to participate in MAP. Departments accept students based on the Master's Accelerated Program requirements as set by the department.

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
MATH 5310	Introduction to Topology	3

Mechanical Engineering - Master of Engineering in Mechanical Engineering

The Mechanical Engineering Masters of Engineering degree is a coursework-based graduate degree that requires neither a thesis nor a project.

(30 credits)

Prefix	Title	Credits
Requirements		
M E 570	Engineering Analysis I	3
Core Courses		
Select one course from each of the following 4 topic areas: [1]		12
Solid Mechanics		
Select one from the following:		
M E 502	Elasticity I	
M E 504	Continuum Mechanics	
Thermal Science		
Select one from the following:		
M E 503	Thermodynamics	
M E 540	Intermediate Heat Transfer	
Fluids		
Select one from the following:		
M E 530	Intermediate Fluid Mechanics	
M E 533	Numerical Methods for Fluid Mechanics and Heat Transfer	
Dynamics and Vibrations		
Select one from the following:		
M E 511	Dynamics	
M E 512	Vibrations	
Engineering Analysis and Control		
Select one from the following:		
M E 518	Applied Finite Elements	
M E 527	Linear Systems Theory	
Additional Requirements		
Select three courses (500 level or above) from any departments and two courses (500 level or above) from any college: [2, 3]		12
M E 598	Special Research Programs [4]	3
Total Credits		**30**

1. Graduate A E courses may be substituted for M E courses with the approval of the Graduate Program Coordinator.
2. If course is not in A E or M E program, approval of the Graduate Program Coordinator is required.
3. If M E 510 Special Topics or A E 510 Special Topics is taken, it must be a regular course with a proper course title taught in class. Any 510 course as an independent study would never be counted.
4. Professional degree students must complete an Integrative Learning Experience that allows them to demonstrate a synthesis of foundational and concentration competencies. M E 598 Special Research Programs serves that purpose as the final exam for Graduate School Requirements.

Academic Advisor and Final Exit Survey

Newly admitted Mechanical Engineering Masters of Engineering students will be assigned the Graduate Program Coordinator as an academic advisor.

All students must take Professional Master's Degree Exit Survey to graduate, which will be conducted by the Graduate Program Coordinator and will be taken after completing all coursework.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

Please talk to an MAE faculty advisor about your MAP plan and develop a course plan in consultation with the advisor. The faculty advisor should preferably be from the MAE area of your interest.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
M E 452	Control System Design	3
M E 456	Experimental Modal Analysis	3
M E 457	Engineering Failure Analysis	3
M E 458	Properties and Mechanical Behavior of Materials	3
M E 460	Applied Finite Elements	3
M E 481	Alternative and Renewable Energy	3
M E 483	Introduction to Combustion	3
M E 486	Introduction to Robotics	3
M E 487	Mechatronics	3
A E 451	Aircraft Design	3
A E 464	Advanced Flight Dynamics and Controls	3
A E 469	Hypersonic Aerothermodynamics	3
M E 502	Elasticity I	3
M E 503	Thermodynamics	3
M E 510	Special Topics [1]	1-6
M E 511	Dynamics	3
M E 512	Vibrations	3
M E 530	Intermediate Fluid Mechanics	3
M E 533	Numerical Methods for Fluid Mechanics and Heat Transfer	3
M E 540	Intermediate Heat Transfer	3
A E 510	Special Topics [1]	1-6
A E 575	Propulsion	3

[1] A E 510 Special Topics must be a regular course with a proper course title taught in class, usually cross-listed with A E 405 Special Topics. Any 510 course as an independent study would never be counted.

Mechanical Engineering - Master of Science in Mechanical Engineering

Admission Requirements: See https://mae.nmsu.edu/academic-programs/grad/admission.html.

Thesis Option (30 credits)

Prefix	Title	Credits
Requirements		
M E 570	**Engineering Analysis I**	**3**
Select one course from each of the following 3 topic areas		**9**
Solid Mechanics		
Select one from the following:		
M E 502	Elasticity I	
M E 504	Continuum Mechanics	
Thermal Science		
Select one from the following:		
M E 503	Thermodynamics	
M E 540	Intermediate Heat Transfer	
Fluid Mechanics		
Select one from the following:		
M E 530	Intermediate Fluid Mechanics	
M E 533	Numerical Methods for Fluid Mechanics and Heat Transfer	
Dynamics and Vibrations		
Select one from the following:		
M E 511	Dynamics	
M E 512	Vibrations	
Engineering Analysis and Control		
Select one from the following:		
M E 518	Applied Finite Elements	
M E 527	Linear Systems Theory	
Select 9 credits of other M E graduate courses [1, 2]		**9**
Master's Thesis Research		**9**
M E 599	Master's Thesis	
M E 509	Individualized Study	
Total Credits		**30**

[1] All course must be 500 level or above. Up to 6 credits of A E graduate courses may be substituted with the approval of the Graduate Coordinator.

[2] If M E 510 Special Topics or A E 510 Special Topics Special Topics is taken, it must be a regular course with a proper course title taught in class. Any 510 course as an independent study would never be counted.

Publication Requirement

A refereed conference paper accepted or a refereed journal article in review or accepted by graduation. The M.S. thesis can be a reformatted version of this paper. Exceptions may be made on a case by case basis by the department head.

Selection of Permanent Advisor

Newly admitted graduate students will be assigned a temporary advisor for the first semester, but they must select a degree option and a permanent advisor before registering for the second semester.

When considering a decision about a degree option and an advisor, the student should arrange to meet with several members of the graduate faculty during the first six weeks of study to discuss specific educational objectives. The student can use these meetings to become familiar with faculty interests and research projects currently in progress. The faculty member must agree (in writing) to serve as the student's advisor.

All students must pass a final examination. The final examination is to be conducted by the student's advisory committee and is taken after completing all thesis work.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

Please talk to an MAE faculty advisor about your MAP plan and develop a course plan in consultation with the advisor. The faculty advisor should preferably be from the MAE area of your interest.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
M E 452	Control System Design	3
M E 456	Experimental Modal Analysis	3
M E 457	Engineering Failure Analysis	3
M E 458	Properties and Mechanical Behavior of Materials	3
M E 460	Applied Finite Elements	3
M E 481	Alternative and Renewable Energy	3

M E 533	Numerical Methods for Fluid Mechanics and Heat Transfer	3
M E 540	Intermediate Heat Transfer	3
A E 510	Special Topics [1]	1-6
A E 575	Propulsion	3

[1] 510 Special Topics must be a regular course with a proper course title taught in class, usually cross-listed with 405 Special Topics. Any 510 course as an independent study would never be counted.

Molecular Biology - Master of Science

The Microbiology program offers curricula leading to the MS and Ph.D. degrees in the areas of biochemistry, molecular genetics, molecular biology, cell biology, bioinformatics, and microbiology. Admission to the MB Program without deficiency is based on an undergraduate program essentially equivalent to that pursued by an undergraduate major in chemistry, biology, agronomy, horticulture, biochemistry, or microbiology at this university. An entering student is required to complete the Graduate Record Examination (General Aptitude). Undergraduate deficiency courses must be passed with a minimum grade of B.

Applicants are strongly encouraged to contact at least three individual program faculty before applying to identify a prospective advisor and laboratory in which to pursue graduate research. Previous course records and GPA standings (typically minimum of 3.3/4.0), GRE scores (typically minimum of 300 combined verbal and quantitative), TOEFL scores of foreign applicants (typically minimum of 550 on the paper-based or 213 on the computer-based), a letter of interest from the applicant that identified faculty laboratories of interest, and three letters of reference regarding research performance or potential are weighted heavily during the selection process.

Students with a BS degree in one of the disciplines listed above can expect to earn the MS degree in about 30 credits, including at least 6 credits of thesis research. Because research is central in both the MS and Ph.D. curricula, early selection of a research advisor is required. The master's committee is organized to assist in planning a program appropriate to the background and goals of the student. A final, formal presentation and oral defense of the original research documented in the MS thesis completes the degree requirements.

MS candidates must enroll in MOLB 599 Master's Thesis for 6 credits. May register for additional credits to maintain full-time status.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs. The MAP program allows undergraduate students to take graduate courses and count up to twelve credits toward both undergraduate and graduate degrees in COMM.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in

an undergraduate degree program and then subsequently count those same courses as fulfilling graduate requirements in a related graduate program.

- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 3.25.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

Undergraduate students majoring in Genetics, Biochemistry, and Biology would be the most qualified to enter the Masters Accelerated Program. The courses that can be taken during the student's last two years of their BS degree program prior to graduation, and as a full graduate student are listed below. Students may only take a maximum of 12 credit hours towards their MAP.

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
Students may count a maximum of two of the following 450-499 level courses towards their MAP		
BIOL 470	Developmental Biology	
BIOL 474	Immunology	
BIOL 475	Virology	
BIOL 478	Molecular Biology of Microorganisms	
EPWS 486	Plant Virology	
GENE 486	Genes and Genomes	
Courses 500-599 level that may be taken for MAP		
BIOL 540	Science and Ethics	
MOLB 542	Biochemistry I	
MOLB 520	Molecular Cell Biology	
MOLB 550	Topics in Molecular Biology	

Qualifications for students entering the MAP program include all NMSU guidelines including a GPA of 3.2. Students who complete MAP in Molecular Biology will be expected to meet all of the requirements of the program for entry into the Molecular Biology and Interdisciplinary Program Graduate Program to complete their graduate degree. (GRE score will be waived for MAP.) These requirements can be found at https://molb.nmsu.edu/how-to-apply/. The MOLB-ILS program does not have a non-thesis option so all MS students in the program perform research that culminates to a published thesis.

MPA-MCJ Program - Dual Degree

The MPA-MCJ joint degree option requires completion of a minimum of 57 credits of approved course work from the Departments of Government and Criminal Justice. Students interested in this option should meet with the MPA director or criminal justice graduate advisor for additional information.

Music (Collaborative Piano) - Master of Music

Prefix	Title	Credits
Requirements		
MUSC 471	Graduate Theory Review [1]	3
MUSC 477	Graduate Music History Review [1]	3
Applied		8
MUSC 450	Research Methods	3
MUSC 580	Ensemble Performance	1
or MUSC 581	The Collaborative Pianist	
MUSC 540	Graduate Recital/Analytical Paper	4
MUSC 581	The Collaborative Pianist must be taken a minimum of 3 semesters	3
MUSC 533	Vocal Literature for Piano	2
MUSC 532	21st Century Piano Skills	1
MUSC 534	Instrumental Sonatas and Duo Repertoire for Piano	2
MUSC 511	Survey of Traditional Harmony	3
or MUSC 513	Twentieth Century Art Music	
or MUSC 518	Seminar in Music Theory	
MUSC 513	Twentieth Century Art Music	3
or MUSC 521	Music of the Baroque Era: History and Literature	
or MUSC 522	Music of the Classical Era: History and Literature	
or MUSC 523	Music of the Romantic Era: History and Literature	
or MUSC 529	Opera History and Literature	
or MUSC 513	Twentieth Century Art Music	
Total Credits		**36**

[1] Students must make a B or better before taking additional music theory/music history courses.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 3.00.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Enrollment in graduate courses requires the approval of the Department Head and a completed MAP form before the first semester to take MAP courses for dual credit. Please meet with Department Head or Graduate Advisor for more information.

Prefix	Title	Credits
MUSC 471	Graduate Theory Review	3
MUSC 477	Graduate Music History Review	3
MUSC 486	Applied Music Pedagogy and Literature II	2

Undergraduate Students will be able to count MUSC 477 Graduate Music History Review as an upper-level music history course and fulfill the Master's requirement.
• Undergraduate Students will be able to count MUSC 471 Graduate Theory Review as a 400-level elective and fulfill the Master's requirement.
• Undergraduate Students will be able to count MUSC 486 Applied Music Pedagogy and Literature II as an upper level elective (or fulfill the 486 degree requirement for the piano performance BM), and fulfill the Master's requirement.

Music (Conducting) - Master of Music

Prefix	Title	Credits
Required Courses		
MUSC 471	Graduate Theory Review [1]	3
MUSC 477	Graduate Music History Review [1]	3

[1] Students must make a B or better before taking additional music theory/music history courses.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 3.00.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Enrollment in graduate courses requires the approval of the Department Head and a completed MAP form before the first semester to take MAP courses for dual credit. Please meet with Department Head or Graduate Advisor for more information.

Physics - Master of Science

The Master's degree requires that students either pass the qualifying examination at the Master's level or identify a research advisor during the first semester of study, form a Graduate Committee, and write a thesis. For the master's degree, students must also successfully complete or transfer at least 30 course credits and pass a final oral examination or the doctoral comprehensive examination. Of these 30 credits, at least 21 must be in physics, at most 3 may be for individual study or other informal courses, at most 6 may be for a thesis, and at most 9 may be numbered between 450 and 499. Students must successfully complete

Prefix	Title	Credits
PHYS 576	Advanced Computational Physics I	3
or PHYS 476	Computational Physics	
Select 3 credits from the following:		3
PHYS 571	Advanced Experimental Optics	
PHYS 575	Advanced Physics Laboratory	
PHYS 593	Advanced Experimental Nuclear Physics	

A Master's thesis is optional for students who have passed the qualifying examination. PHYS 599 Master's Thesis credits will not count toward the 21 credits in physics and can only be counted toward the 30 credits for a Master's degree if a student selects the thesis option and successfully defends a Master's thesis. PHYS 700 Doctoral Dissertation credits can be used as a substitute for PHYS 599 Master's Thesis credits.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner.

Students enrolled in the master's accelerated program are allowed to apply up to nine credits of their undergraduate courses numbered 450 and above and up to twelve credits total towards the completion of a master's degree. This program provides students with an opportunity to complete a master's degree in one year (and perhaps one summer term to write and defend a master's thesis). Students wishing to enroll in the master's accelerated program should talk to their Physics or Engineering Physics faculty advisor and develop a course plan in consultation with the advisor.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with a Physics or Engineering Physics faculty advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Plant and Environmental Science - Master of Science

This degree is designed to train students in sustainable crop production, plant breeding and genetics, soil science, and sustainability of diverse environmental systems. Students will be prepared for successful employment in commercial companies, educational institutions, governmental agencies, and private production enterprises that are engaged in agronomy, environmental science, soil science, water management, and natural resources management. Candidates for this degree must successfully conduct original research in one of the above areas and complete a minimum of 30 graduate credits based on a program of study approved by the student's graduate committee.

The Master of Science degree can be obtained through either a thesis option (recommended) or a non-thesis option. Prerequisite to major graduate work is completion of a curriculum essentially equivalent to that required by the department for the BS degree at New Mexico State University. Qualifications for admission will be reviewed by the departmental graduate faculty.

Minimum Grade Point Average and Credit Hour Requirements: Your Master's degree requires a minimum of 30 completed degree hours and a minimum cumulative GPA of 3.00 in all course work.

Degree residency requirement: 15 credits must be completed at NMSU.

Thesis Option

Political Science - Master of Arts

The Master of Arts program provides general course work in each of the major fields of political science. Students may choose either the thesis option, under which they complete 30 credits of course work plus 6 thesis credits (POLS 599 Master's Thesis), or the nonthesis option, with 30 credits of course work plus 6 hours of special research credit (POLS 598 Special Research Programs) or 6 hours of approved internship credit (POLS 510 Internship). Both the thesis and nonthesis options require a final oral examination; the non thesis option requires a written examination as well. The program provides a broad-based foundation in political science while allowing students to pursue specific areas of interest.

Requirements

Flexibility in planning a program of study is permitted to meet the educational needs of a diverse student population. Structured areas of emphasis are available in several topical areas, including Latin American and international affairs. Students may also take a graduate minor in Security Studies. Information on these areas and the graduate minor may be obtained from the Department of Government. No more than 9 credits taken outside the department will be counted toward the degree.

Prefix	Title	Credits
Requirements		
POLS 502	Research Methods in Government	3
or POLS 503	Qualitative Research Methods	
Select three from the following:		9
POLS 530	Seminar in Public Policy	
POLS 550	Seminar in American Politics	
POLS 560	Seminar in International Relations Theory	
POLS 570	Seminar in Comparative Politics	
POLS 580	Seminar in Political Theory	
Additional credits subject to advisor approval [1]		18
Thesis/Non-Thesis

or POLS 510	Internship	
Total Credits		**36**

[1] The remaining credits required for the degree are selected subject to advisor approval to satisfy particular academic interests or career goals.

Master's Accelerated Program (MAP)

The MAP program encourages qualified undergraduate students to consider taking graduate level courses in their junior or senior years. Eligible students can count up to 12 graduate-level credits by

applying them to their BA degree as well as to the graduate degree if they are later admitted to either the Master of Arts in Political Science or the Masters in Public Administration (MPA). Students are advised to not attempt more than 3 credits of graduate coursework in one semester.

Students must earn a grade of B or higher to have graduate credits count under the MAP program. Graduate courses completed with a B- or lower are not eligible for MAP credit. By taking some graduate-level courses in the Department of Government, students can get a good idea of whether they wish to pursue a Masters degree. They can also complete a Masters degree in a shorter time period if they are admitted to their chosen degree program. Coursework tends to include a broader set of readings and more extensive research papers. Students seeking to go further in their understanding of a particular issue or debate can gain experience in developing an original research question, exploring relevant literature and in analyzing new data.

Students admitted to the MAP program continue to pay undergraduate tuition rates and remain eligible for undergraduate scholarships. Students should talk with their financial aid adviser prior to registering for graduate classes under MAP. Students are not guaranteed admission to a graduate program by participating in the MAP program. They will still need to submit an application for admission if they wish to complete an MA or MPA degree in the Department of Government. Students may be able to transfer graduate credits to programs at other universities but the program directors and Graduate Schools of those universities will have their own rules and policies regarding transfer credit and may not accept graduate credits earned at NMSU.

Student Qualifications:

Undergraduate students may participate in the Master's Accelerated Program (MAP) in the Department of Government after:

- Completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at New Mexico State University and apply towards the undergraduate major
- The grade point average must be at a minimum of 3.5
- May not have previously earned a Bachelor's Degree
- Students have removed any Incomplete grades or holds at the time that they request admission to a graduate-level class.
- Honors Credit: Undergraduate students who obtain a grade of B or higher in graduate level classes can count their credits as Honors credits. Undergraduate students who earn a grade of B or higher in two 3-credit graduate classes will automatically graduate with an Honors Certificate.

Accepted MAP Courses:

Students can count any four (4) graduate-level elective - up to 12 graduate-level credits (courses numbered POLS 450 or above). Sometimes these classes are cross-listed with undergraduate sections. Students who register for the MAP program will take the graduate section and complete the same requirements that are expected of graduate students in these classes. Any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees. Eligible undergraduates may take any of the following graduate courses under the MAP rules as established by the NMSU Graduate School and with the written approval of the course instructor, the MA Program Chair or MPA Director, as appropriate, and the Head of the Department of Government.

Public Administration - Master of Public Administration

The Master of Public Administration (MPA) program is accredited by NASPAA. The MPA is designed to provide students with the managerial and analytical skills, in addition to ethical and professional values, necessary to meet the increased demand for skilled public administrators. Candidates who follow this professional program must complete a minimum of 42 credits, consisting of core courses, electives and either an internship or a thesis.

Requirements

Because students have divergent career goals, a thesis or internship option is offered. The thesis option requires an additional 18 credits of course work, 6 credits of thesis (POLS 599 Master's Thesis), and a written examination covering the thesis and course work. The internship option also requires an additional 18 credits of course work, 3 credits of internship (POLS 510 Internship), and a written examination covering the internship and course work. Students who fail their written examination must take an oral exam. As part of the course work, students selecting the internship option must take POLS 519 Proseminar in Public Administration (3 credits that count toward the 42 total) during the latter part of their studies, and are required to earn a B- grade or higher in that course.

With approval, students may include up to 12 credits of relevant course work from other departments to be counted toward the total credits required for the MPA. These credits may be selected to form a graduate minor in another academic discipline.

Prefix	Title	Credits
Core Courses		
POLS 502	Research Methods in Government	3
POLS 541	Public Budgeting	3
POLS 542	Public Sector Human Resources Management	3

POLS 549	Ethics in Government	3
Thesis Option		
Select one from the following:		24
Thesis		
POLS 599	Master's Thesis	
Select 18 credits of additional course work		
Internship and Capstone Option 2		
POLS 510	Internship	
Select 18 credits of additional course work		
POLS 519	Proseminar in Public Administration	
Total Credits		**42**

Candidates with inadequate preparation for graduate study in public administration may be required to take appropriate undergraduate and graduate courses as part of, or in addition to, a regular program of study. Applicants to the MPA program will be advised of any such requirements at the time of admission.

Master's Accelerated Program Information

The Master's Accelerated Program (MAP) provides the opportunity for qualified undergraduate students to begin taking graduate-level courses in their junior or senior years. Eligible students can count **up to 12 graduate-level credits** by applying them to their undergraduate degree and the Master of Public Administration (MPA) degree. This allows students to complete their graduate degree in a much shorter period of time. Students also benefit by making progress towards a graduate degree while paying undergraduate tuition rates.

Students interested in MAP should contact Dr. Neil Harvey, Department Head, at nharvey@nmsu.edu. Students must earn a grade of **B or higher** to have graduate credits count under the MAP program. Graduate courses completed with a B- or lower are not eligible for MAP credit.

Student Qualifications

- The student may apply for MAP after completing 60 credit hours towards their Bachelor's Degree.
- The student applying for MAP must have a minimum cumulative grade point average (GPA) of **3.25.**
- As a prerequisite, students may participate in MAP if they receive a **B or higher** in POLS 330 Introduction to Public Administration.

Accepted MAP Courses

Students can take any four of the following courses to count towards both the MPA degree and their bachelor's degree. Any other courses may be considered after consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits

A Suggested Plan of Study

Visit with an advisor for help with creating a customized plan.

New Mexico State University's master's accelerated program allows **academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

Please talk to the PHS Graduate Coordinator about your MAP plan and develop a course plan in consultation with that person.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same courses as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework, of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 3.00.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a B- or lower grade is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the PHS MAP program; other courses may be considered after consultation with the Graduate Coordinator. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees. Other Cultural Foundation courses (PHLS 5600-5699) may be substituted when offered.

Prefix	Title	Credits
PHLS 5110	Community and Psychosocial Aspects of Public Health	3

Total Credits		**45**

Some PHLS 5000-level courses are cross-listed with PHLS 4000-level courses (e.g.). Students who have previously taken one of these 4000-level courses at NMSU may not take the corresponding 5000-level PHLS course for degree completion credit.

Non-Thesis students must complete an Integrative Learning Experience that allows them to demonstrate a synthesis of foundational and concentration competencies. This also serves as the final exam for Graduate School Requirements.

Final examination for the thesis option consists of an oral defense of the thesis and related coursework.

Visit with an advisor for help with creating a customized plan.

New Mexico State University's master's accelerated program allows **academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

Please talk to the PHS Graduate Coordinator about your MAP plan and develop a course plan in consultation with that person.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same courses as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework, of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 3.00.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a B- or lower grade is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the PHS MAP program; other courses may be considered after consultation with the Graduate Coordinator. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees. Other Cultural Foundation courses (PHLS 5600-5699) may be substituted when offered.

PHLS 5620	Cross-Cultural Aspects of Health	3

Public History and Public Administration - Dual M.A. Degree

The Department of History and the Department of Government offer a dual degree in which students who are accepted into both of these programs may simultaneously earn both a Master of Arts in History degree with the Public History specialization, and a Master of Public Administration degree. The dual degree requires 57 total credits, while students who pursued both degrees as separate degrees would need to pass at least 72 credits. Students earning the dual degrees must pass a joint oral examination after passing required courses and completing internship credits in both programs. Students interested in the dual degree program should consult with the Director of the Public History Program and the Director of the Master of Public Administration Program.

Range Science - Master of Science

A GPA of 3.0 or higher is required for admission. GRE exam is not required. Prerequisite for admission as a regular graduate student in the department is the completion of a curriculum substantially equivalent to that required of undergraduate students. Therefore, deficiency courses may be required after admission to the program, as determined by the admissions committee and the student's graduate committee and advisor.

Graduate Program with the Thesis (Research) Option

- Coursework
  - A minimum of 30 credits of graduate work is required to graduate.
  - At least 15 credits must be in courses numbered 500 or above.
  - At least 15 credits must be from the Range Science program.
  - Not more than 6 nor fewer than 4 thesis credits (RGSC 599 Master's Thesis) may be counted toward the requirements for a master's degree.
  - Two semesters of RGSC 515 Graduate Seminar (Seminar) are required. One may be taken from another department with the permission of the student's graduate committee.
  - At least one advanced statistics course or equivalent is required, as determined by the student's graduate committee.
- Thesis
  - The thesis research project must be approved by the student's graduate committee.
  - Every effort should be made to publish the thesis as a scientific journal article or Experiment Station publication.

Prefix	Title	Credits
Two Semesters of Seminar		2
RGSC 515	Graduate Seminar	
Choose from the following		28
RGSC 452	Vegetation Measurements for Rangeland Assessment	
RGSC 460	Rangeland and Natural Resource Planning and Management	
RGSC 509	Approaches to Rangeland Research	
RGSC 516	Arid Land Management	
RGSC 518	Watershed Methods and Management	
RGSC 520	Arid Land Plant Herbivore Interactions	
RGSC 525	Advanced Rangeland Restoration Ecology	

RGSC 550	Special Topics	
RGSC 551	Earth Data Retrieval	
RGSC 557	Advanced Grass Taxonomy and Identification	
RGSC 575	Climate Studies, Water and Society	
RGSC 585	Land Cover Analysis for Natural Resources	
RGSC 589	Landscape Hydrology Modeling	
RGSC 599	Master's Thesis	
Two Credits of Research (non-thesis Option)		0-2
RGSC 598	Special Research Program	
Total Credits		**30-32**

Graduate Program with the Non-Thesis Option

- Coursework
  - A minimum of 32 credits of graduate work is required to graduate.
  - At least 15 credits must be in courses numbered 500 or above.
  - At least 15 credits must be from the Range Science program.
  - RGSC 599 Master's Thesis (Thesis) may not be taken.
  - Two credits of RGSC 598 Special Research Program (subtitled Non-Thesis Report) are required for the written report.
  - Two semesters of RGSC 515 Graduate Seminar (Seminar) are required. One may be taken from another department with the permission of the student's graduate committee.
- Written Report
  - The report will be on a topic approved by the student's graduate committee.
  - Research for the report may involve field work and data gathering but should also be strongly library- and literature-based.
  - The report should be of graduate quality and content and should follow graduate school thesis format or the format of an acceptable scholarly journal. Final approval and acceptance of the report will be provided by the student's graduate committee.
  - Every effort should be made to publish the report in an appropriate outlet (journal article, Experiment Station bulletin or report, Extension bulletin, etc.)
  - Copies of the report will be bound and placed in the university and departmental libraries.

Social Work - Master of Social Work (Full-Time)

The requirements for the Master of Social Work degree include 60 credits of designated graduate courses; a cumulative grade-point average of at least 3.0 on a 4.0 scale in all courses and practicums.

Note that all social work courses must be taken in sequence. Successful completion of course work for each semester is a prerequisite for the course work of the following semester.

An integral part of a graduate social work program is completing practicums. For those enrolled in the two-year and three-year programs, two practicum placements totaling 950 hours will be required. For those students entering the program with advanced standing, one practicum placement is required, totaling 500 hours in the field. Students are offered a wide range of practicum sites from which to choose. Students should be prepared to travel some distance and be responsible for their own transportation costs.

Application Deadlines

The priority deadline for completed applications is January 15 for fall admission. Applications received after January 15 will only be reviewed on a space-available basis. Please apply by January 15 for full consideration.

Sociology - Master of Arts

Thesis Program Requirements

In addition to the successful completion of an acceptable master's thesis, students who choose this option will take a minimum of 30 credit hours of graduate work distributed as follows:

Prefix	Title	Credits
Required Courses:		**6**
SOCI 5110	Perspectives on Sociology [1]	
SOCI 5163	Issues in Advanced Quantitative Analysis [1]	
Choose one methods course from the following:		**3**
SOCI 5150	Seminar in Social Networks [1]	
SOCI 5153	Seminar in Sociological Research [1]	
SOCI 5155	Seminar in Text Analysis for the Social Sciences [1]	
SOCI 5157	Seminar in Qualitative Research Methods [1]	
SOCI 5158	Seminar in Visual Ethnographic Methodology [1]	
Choose one social theory course from the following:		**3**
SOCI 5165	Foundations of Social Theory [1]	
SOCI 5166	Seminar in Contemporary Theory [1]	
Masters Thesis Credits:		**6**
SOCI 5999	Master's Thesis	
Select an additional 12 credits from 5000 level Sociology course work to be taken in consultation with the sociology graduate student's advisor.		**12**
Final master's oral examination covering all general coursework and the thesis.		
Total Credits		**30**

[1] To be taken within the first 27 hours of graduate credit. A grade of B- or better is required to receive credit for each of these core courses.

Non-Thesis Program Requirements: Coursework Only

Students who choose this option will take a minimum of 30 credit hours of graduate work distributed as follows:

Prefix	Title	Credits
Required courses		**6**
SOCI 5110	Perspectives on Sociology [1]	
SOCI 5163	Issues in Advanced Quantitative Analysis [1]	
Choose one methods course from the following:		**3**
SOCI 5150	Seminar in Social Networks [1]	
SOCI 5153	Seminar in Sociological Research [1]	
SOCI 5155	Seminar in Text Analysis for the Social Sciences [1]	
SOCI 5157	Seminar in Qualitative Research Methods [1]	
SOCI 5158	Seminar in Visual Ethnographic Methodology [1]	
Choose one social theory course from the following:		**3**
SOCI 5165	Foundations of Social Theory [1]	
SOCI 5166	Seminar in Contemporary Theory [1]	
Select an additional 18 credits from 5000 level Sociology course work to be taken in consultation with the sociology graduate student's advisor.		**18**
Final master's written examination covering all general coursework.		
Total Credits		**30**

[1] To be taken within the first 27 hours of graduate credit. A grade of B- or better is required to receive credit for each of these core courses.

Admission Requirements

To apply for admission to the Sociology MA Program and the Graduate School, applicants must meet the following criteria and submit the following through https://apply.nmsu.edu/apply/

- Application form and fees
- An undergraduate cumulative GPA of at least 2.75 on a 4.0 scale.
- A record of professional, ethical, and collegial behavior.
- Official undergraduate and graduate transcripts from all colleges and universities attended.
- A well written statement of purpose from the candidate addressing graduate school objectives and interests.

Failure to meet any of the above criteria may result in the student not being accepted into our program. However, in cases when an otherwise outstanding student does not meet the GPA requirements, the student may be accepted provisionally into the program.

The GRE is not required for admission. Students may be required to take prerequisites prior to gaining admission.

The department admits students on a rolling basis. For graduate assistantship consideration, the priority deadline for application is *April 1st*.

Master's Accelerated Program (MAP) Guidelines

The Masters Accelerated Program allows academically qualified undergraduate students to complete up to 12 credit hours towards a master's degree during their junior and/or senior years while still completing the bachelor's degree. The courses only apply to classes they would take within the Master of Arts program in Sociology.

NMSU GENERAL ELIGIBILITY

- Must have completed 60 hours of undergraduate coursework (minimum 25 hours at NMSU)
- GPA larger or equal to 3.00
- Complete MAP Referral Form

NMSU MAP REGULATIONS/STIPULATIONS

- Courses will count toward both degrees; they will show on undergraduate and graduate transcripts and count towards both GPAs.
- Graduate level courses included in the master's accelerated program are those courses numbered 5000 and above *or those chosen by the graduate academic departments.*
- Students must receive a grade of B- or higher in all MAP coursework to be counted as graduate credit.

- Students apply for the graduate program in their final semester or second to last semester of their undergraduate degree. Depending upon the deadlines set forth by the Department of Sociology.
- Acceptance of MAP credits does not imply acceptance into the Department of Sociology master's program.

Final admissions and acceptance into the graduate program are based on academic performance at the undergraduate level and completion of the eligible undergraduate degree.

- Tuition is based on the level of the student, not the course
- Students may become ineligible for MAP if their undergraduate or graduate GPA drops below 3.0
- Students accepted into the master's accelerated program must participate in the Developing New Scholars Program (DNSP), offered by the Graduate School.
- Students must be advised each semester for the MAP program by their potential graduate program and cleared for registration in graduate courses by the Graduate School.

How to Apply to the MAP Program:

1. A student may apply, or the department may invite students to participate in MAP.
2. *Departments accept students based on the Master's Accelerated Program requirements as set by the department.*
3. A Sociology graduate faculty member, Graduate Coordinator, or Department Head will forward the Master's Accelerated Program Referral Form to the graduate school.
4. Graduate School will hold the referral form until the student has completed their undergraduate degree.
5. The referral form will be used as part of the graduate school's final admissions into the master's program.
6. The following courses are eligible for the Sociology MAP Program:

MAP Courses

In accordance with the Higher Learning Commission (HLC), CRRT.B.10.020.B1c, an institution may allow well-prepared advanced students to substitute its graduate courses for required or elective courses in an undergraduate degree program *and then subsequently count those same courses as fulfilling graduate requirements in a related graduate program that the institution offers*. A graduate program has the discretion to use up to 12 credits of NMSU Sociology coursework (5000 level or higher) that can be applied towards the completion of the master's program of study. Students must receive a grade of B- or higher in this coursework to be counted for graduate credit.

Accepted MAP Courses

The following courses are accepted for use in the Sociology MAP program; other courses may be considered after consultation with the Graduate Coordinator. An exception will need to be made to the degree audit for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
SOCI 5110	Perspectives on Sociology	3
SOCI 5150	Seminar in Social Networks	3
SOCI 5153	Seminar in Sociological Research	3
SOCI 5155	Seminar in Text Analysis for the Social Sciences	3
SOCI 5157	Seminar in Qualitative Research Methods	3
SOCI 5158	Seminar in Visual Ethnographic Methodology	3
SOCI 5163	Issues in Advanced Quantitative Analysis	3
SOCI 5165	Foundations of Social Theory	3
SOCI 5166	Seminar in Contemporary Theory	3

Spanish - Master of Arts

The degree plan requires a minimum of 36 credits in Spanish. The expectation is that all 36 credits will be earned at the 500 level or above; however, a student may complete no more than 6 credits at the 450-499 level. These, and any other exceptions, should be discussed with the graduate advisor. The credits for the Additional Language Requirement (see below) do not count as part of the 36 credits in the degree plan. The courses should be concentrated in the student's chosen area of study (linguistics or literature) as each student will be tested on a reading list that corresponds to each area study. A thesis is optional. Students authorized to complete a thesis may count a maximum of 6 credits of thesis work toward the degree. At the present time, the thesis option is not available for online-only students. There are no required core courses at this time and a student should work closely with his/her advisor and the Graduate Director to establish an appropriate individual degree plan.

All students in either the on-campus or online program may complete a minor at the master's level by taking 9 credits (3 courses) at the 500 level or above, in another area (department) of study, or within the department itself. For instance, a student studying linguistics may wish to obtain a minor in literature or a student studying literature may wish to obtain a minor in linguistics. In either case, the minor credits count as part of the 36 total credits required for the degree. In all cases, the student should work closely with the Graduate Director to ensure his/her particular plan of study is acceptable to the program.

Area of Study: Linguistics

Prefix	Title	Credits
Choose 12 from the following:		36
SPAN 502	Sentipensar Pedagogy: Anzaldúa and Other Theorists	
SPAN 503	Critical Language Awareness in Teaching SHL	
SPAN 504	Culturally Sensitive Teaching in SHL: Teaching Spanish as a Heritage Language in the United States	
SPAN 507	Technology Enhanced Language Learning	
SPAN 509	Teaching Culture with Technology	
SPAN 510	Assessing the National Standards	
SPAN 540	Introduccion a la Linguistica	
SPAN 545	Advanced Dialectos del Espanol	
SPAN 558	Bilinguismo	
SPAN 561	Advanced Spanish Phonetics	
SPAN 562	Advanced Spanish Phonology	
SPAN 570	Advanced Study in Technical Translation	
SPAN 574	Advanced Pragmatics	
SPAN 576	Advanced Semantics	
SPAN 580	Research Methodology in Spanish Linguistics	
SPAN 584	Spanish Morphosyntax	
SPAN 589	Spanish Sociolinguistics	
SPAN 591	Advanced Study in History of the Spanish Language	
SPAN 592	Advanced Structure of Spanish	
SPAN 594	Theory and Methodology of Spanish Pedagogy	

SPAN 595	Advanced Topics in Applied Spanish Linguistics
SPAN 597	Advanced Strategies for Teaching Spanish for Heritage/Native Speakers
Total Credits	**36**

Area of Study: Literature

Prefix	Title	Credits
Choose 12 from the following:		36
SPAN 500	Methods of Research and Literary Criticism	
SPAN 512	Contemporary Spanish-American Poetry	
SPAN 514	Coyolxauhqui: La literatura chicana femenil	
SPAN 520	Adv. The Art of Storytelling	
SPAN 521	Advanced Culture and Literature of New Mexico	
SPAN 522	Adv. Cultural Production of Hispanic Revolutions and Wars	
SPAN 523	Colonial Legacy: Representations in Chican@ Literature & Culture	
SPAN 528	Advanced U.S. Latino Culture and Literature	
SPAN 542	Adv. Formation of Hispanic National Identities	
SPAN 544	Adv. Body Studies	
SPAN 546	Adv. Speculative Fiction	
SPAN 547	Advanced Hispanic Film	
SPAN 548	Advanced U.S.-Hispanic Film	
SPAN 550	Advanced Chicana and Chicano Studies	
SPAN 551	Advanced Hispanic Cultures	
SPAN 563	Advanced Study in Mexican Literature	
SPAN 564	Advanced Post-Modern Hispanic Literature	
SPAN 566	Contemporary Spanish-American Novel	
SPAN 567	Advanced Study in Chicano Literature	
SPAN 573	Advanced Study in Creative Writing	
SPAN 583	Advanced Study in Spanish-American Women Writers	
SPAN 586	Contemporary Spanish-American Essay	
SPAN 587	Contemporary Spanish-American Short Story	
SPAN 588	Contemporary Spanish-American Drama	

Courses that may apply to either area include SPAN 590 Advanced Special Topics (see subtitles in schedule of courses to confirm subject of the course) SPAN 598 Independent Reading, Research, and/or Creative Writing, SPAN 599 Master's Thesis (both courses require a course proposal and prior approval).

Additional Language Requirement

For both the on-campus and online degrees, the department requires that students fulfill a second language requirement (in addition to English and Spanish) by following an approved course of study. Typically, this is completed by taking a four-semester course of study, but may vary according to the languages available.

Options for completing this requirement include taking classes at a local Community College or University, or online. Some students have met this requirement by studying abroad through NMSU. Students should consult the Graduate Director to establish a plan and discuss how this requirement will be met. *Note: evidence of fulfilling the second language requirement must be provided to the Graduate Director BEFORE taking final examinations.*

Additional Notes

In addition to standard Graduate School requirements, the program requires *CV or resume; * Writing Sample; *Letters of Recommendation (3); * Statement of Interest or Purpose.

Final Examinations

Students must successfully complete a final department examination (generally during the final semester of coursework) that is partially written and partially oral. Please consult the Graduate Director for specific information on dates and format for these exams. Final examinations are only available during the Fall and Spring semesters.

Areas of Interest/Reading List

As stated previously, each student needs to select an area of interest: Linguistics or Literature. At the end of the student's degree, the final examinations (written and oral) will be based on the readings from the readings list in the student's selected area of study. For example, a student that has opted to specialize in literature is responsible for reading all the materials on the Literature Reading List. Likewise, a student that has opted to specialize in linguistics is responsible for reading all the materials on the Linguistics Reading List. The student is responsible for the reading list that was in place the year he or she started the program.

Each student is responsible for covering the reading materials listed. Please contact the Graduate Director for a detailed reading. Note that the list is dated, so make sure to refer to the correct list that covers the year/semester the student started the program. The student is responsible for covering ALL the readings even if the student did not cover them as part of work done in class.

Graduate Assistantships

For the on-campus program only, the department awards graduate assistantships to qualified students. For this financial assistance, the student works up to 20 hours a week in departmental programs, chiefly in the teaching of elementary and intermediate Spanish courses in either the Heritage Language sequence or Spanish as a second Language sequence. Students interested in being considered for an assistantship should clearly state this interest in their introduction letter during the application process. The department offers a limited number of assistantships, and students should remember that not everyone that applies for this award receives one. Maintaining the award depends on the student's successful performance both academically and in the classes he/she teaches and is evaluated on a semester-by-semester basis. Students who receive an assistantship are required to take SPAN 594 Theory and Methodology of Spanish Pedagogy (see course description) as part of their degree plan in order to help them prepare for teaching classes at NMSU.

The Master of Arts in Spanish program participates in the **Master's Accelerated Program (MAP)** at NMSU.

The MAP program is the chance to take up to 12 graduate credits **(courses numbered SPAN 450 level and higher)** as part of your undergrad program that can, then, also apply towards a Master's degree.

In order to take advantage of this opportunity, you **must apply for the MAP program BEFORE taking ANY classes at this level.**

Please visit the Graduate School web page for more information about the steps and to APPLY (open this link: https://gradschool.nmsu.edu/current-students/masters-accelerated-program.html)

You will see a link at the bottom of the page that says "Apply to the MAP program." That's the best place to start.

Spanish Courses Eligible for the MAP

All the courses listed below are eligible for MAP. Students must receive a grade of B- or higher in this coursework to be counted for graduate credits. If a grade lower than a B- is earned, it will not count toward the graduate degree. Students should consult with the graduate program coordinator regularly to ensure they are on the correct pathway.

Special Education - Master of Arts

Enrollment in graduate licensure program courses with field experiences in Special Education is limited to persons who have been accepted into the graduate program in Special Education. For other special education graduate courses, enrollment of students outside of the special education program is contingent upon meeting prerequisites and availability after enrollment of Special Education graduate students. To complete a course of study, each student must meet the program's academic and field-based competency criteria, including a grade of B or higher in each course in the program of study, satisfactory evaluation in field experiences for those seeking licensure, and a passing score on the MA Comprehensive Exam or Capstone. The Master of Arts in Special Education has pathways to meet the varied needs of students pursuing graduate education and can be completed in two years for full-time students.

Master of Arts in Special Education (Plus Licensure)

This route is 42 credits including student teaching and provides preparation for the New Mexico pre-K-12 Special Education license. Candidates must be admitted to the Teacher Education Program before completing practicum and student teaching experiences.

Prefix	Title	Credits
Course Requirements		
SPED 5105	Introduction to Special Education in a Diverse Society	3
SPED 5230	Advanced Curriculum for Diverse Exceptional Learners	3
SPED 5210	Introduction to Assessment of Diverse Exceptional Learners	3

Special Education Student Teaching Seminar Courses (based on concentration) [3]		*3*
SPED 5830	Special Education/Elementary Student Teaching Seminar	
SPED 5840	Special Education/Secondary Student Teaching Seminar	
Total Credits		**42**

1 Admittance to TEP is required before registering for SPED 5811 Field Experience in Education, Equity & Cultural Diversity, which must be taken the semester before student teaching.
2 Admittance to STEP is required before registering for SPED 5810 Student Teaching SPED and SPED 5830/SPED 5840, which are the culminating courses.
3 A capstone project is completed during this course in lieu of a Master's exam to meet NM licensure requirements.

Master of Arts in Special Education (Scholarly Route)

This route requires 30 credits of special education coursework and is for students who are not seeking licensure or who already have a license and are seeking additional depth of knowledge. A Master's exam during the culminating semester is required for program completion.

There are two course prerequisites that may be required, SPED 5105 Introduction to Special Education in a Diverse Society and SPED 5230 Advanced Curriculum for Diverse Exceptional Learners. If these are required they must be taken in the first semester they are offered.

Prefix	Title	Credits
Course Required		
SPED 5850	Current Research in Special Education	3
SPED 5860	Current Issues in Special Education for Teaching in Culturally Responsive Society	3
SPED Elective Courses [1]		24
Total Credits		**30**

1 Electives are selected in consultation with an advisor, who will make recommendations based on prior coursework and individual student interests.

Master of Arts in Special Education (emphasis in Visual Impairment)

This route requires 30-36 credit hours in visual impairment and special education coursework and prepares for licensure in teaching school-aged children/infants/toddlers and/or orientation and mobility. Students who meet qualifications and are interested in visual impairment may elect to pursue licensure only, rather than a master's degree, with 15-27 credits leading to a Blind and Visually Impaired Teaching License or National Certification in Orientation and Mobility. We provide two different areas of focus. One focus is for Teachers of Students with Visual Impairments/ Visual Impairment Focus (TSVIs/VI Focus) and the other focus is for Certified Orientation and Mobility Specialists (COMSs). A Master's exam during the culminating semester is required for program completion.

Water Science and Management - Master of Science

This degree is designed primarily for students who wish to complement their primary discipline by obtaining scientific, technical, and managerial expertise in water. The Master's degree can be earned with 26 credits of formal course work, plus 6 additional thesis research credits, as detailed below. The degree also has five available concentrations.

Prefix	Title	Credits
Core Courses		
AEEC 5350	Economics of Water Resource Management and Policy	3
RGSC 518	Watershed Methods and Management	3
or SOIL 456	Irrigation and Drainage	
Select one from the following: [1]		3-4
A ST 505	Statistical Inference I	
C E 582	Statistical Hydrology	
GEOG 585	Spatial Analysis and Modeling	
Seminar Credit OR Select one from the following: [2]		1
WSAM 605	Arid Land Water Resources	
WSAM 610	Water and Sustainable Economic Development	
GEOG 501	Introduction to Geographic Theory and Application	
Electives chosen in consultation with the student's committee (enough to meet the required minimum of 32 credits)		**16**
Thesis		
WSAM 599	Masters Thesis	6
Total Credits		**32-33**

1. With the consent of the instructor and the approval of the student's advisor, C E 582 Statistical Hydrology or GEOG 585 Spatial Analysis and Modeling may be used as a substitute.
2. Seminar may be substituted by WSAM 605 Arid Land Water Resources, or WSAM 610 Water and Sustainable Economic Development, or GEOG 501 Introduction to Geographic Theory and Application.

Water Science and Management (Agricultural Water Resources) - Master of Science

This degree is designed primarily for students who wish to complement their primary discipline by obtaining scientific, technical, and managerial expertise in water. The Master's degree can be earned with 26 credits of formal course work, plus 6 additional thesis research credits, as detailed below. The degree also have five available concentrations.

Students must work with their committee to select 12 credits of elective courses that would meet the Agricultural Water Resources concentration		12
Electives chosen in consultation with the student's committee (enough to meet the required minimum of 32 credits)		**4**
Thesis		
WSAM 599	Masters Thesis	6
Total Credits		**32-33**

[1] With the consent of the instructor and the approval of the student's advisor, C E 582 Statistical Hydrology or GEOG 585 Spatial Analysis and Modeling may be used as a substitute.

[2] Seminar may be substituted by WSAM 605 Arid Land Water Resources, or WSAM 610 Water and Sustainable Economic Development, or GEOG 501 Introduction to Geographic Theory and Application.

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

MAP Requirements

- The Graduate School allows qualified junior or senior students to substitute its graduate courses for required or elective courses in an undergraduate degree program and then subsequently count those same course as fulfilling graduate requirements in a related graduate program.
- Undergraduate students may apply for acceptance to the accelerated master's program after completing 60 semester hours of undergraduate coursework of which a minimum of 25 semester credit hours must be completed at NMSU.
- The grade point average must be at a minimum of 2.75.
- Students must receive a grade of B or higher in this coursework to be counted for graduate credit. If a grade of B- or lower is earned, it will not count toward the graduate degree.

Accepted MAP Courses

The following courses are accepted for use in the MAP program, any other courses may be considered after a consultation with an advisor. An exception will need to be made to the degree audit in order for the additional course(s) to be included on both the Undergraduate and Graduate degrees.

Prefix	Title	Credits
ENVS 462	Sampling and Analysis of Environmental Contaminants	3
ENVS 470	Environmental Impacts of Land Use and Contaminant Remediation	3
SOIL 456	Irrigation and Drainage	3
C E 452	Geohydrology	3-4
C E 483	Surface Water Hydrology	3
A ST 505	Statistical Inference I	4
AEEC 5350	Economics of Water Resource Management and Policy	3
GEOG 481	Fundamentals of GIS	4

Water Science and Management (International Water Resilience) - Master of Science

Prefix	Title	Credits
Course Requirements		
AEEC 5350	Economics of Water Resource Management and Policy	3
A ST 505	Statistical Inference I	4
RGSC 518	Watershed Methods and Management (Lab Required - RGSC 318 M1A or M1B)	3
or SOIL 456	Irrigation and Drainage	
POLS 537	Issues in Public Policy	3
Seminar (4 Credits)		4
WSAM 595	Hands-On Transboundary Aquifer and Community System Convergence Seminar	
WSAM 590	System Dynamics	3
WSAM 598	Internship	3
Choose one course from the following:		3
GEOG 481	Fundamentals of GIS	
ANTH 579	Qualitative Data Analysis and Interpretation	
POLS 502	Research Methods in Government	
POLS 503	Qualitative Research Methods	
SOCI 5157	Seminar in Qualitative Research Methods	
SOCI 5163	Issues in Advanced Quantitative Analysis	
SOCI 5153	Seminar in Sociological Research	
WSAM 599	Masters Thesis	6
Total Credits		**32**

Water Science and Management (Water Economics and Policy) - Master of Science

This degree is designed primarily for students who wish to complement their primary discipline by obtaining scientific, technical, and managerial expertise in water. The Master's degree can be earned with 26 credits of formal course work, plus 6 additional thesis research credits, as detailed below. The degree also has five available concentrations.

Prefix	Title	Credits
Core Courses		
AEEC 5350	Economics of Water Resource Management and Policy	3
RGSC 518	Watershed Methods and Management	3
or SOIL 456	Irrigation and Drainage	
Select one from the following: [1]		3-4
A ST 505	Statistical Inference I	
C E 582	Statistical Hydrology	
GEOG 585	Spatial Analysis and Modeling	
Seminar Credit OR Select one from the following: [2]		1

New Mexico State University master's accelerated program provides **the opportunity for academically qualified undergraduate students** to begin working on a master's degree **during their junior and senior years** while completing a bachelor's degree. Typically, a bachelor's degree requires four years to complete, and a master's degree requires an additional two years. The master's accelerated programs allow students the opportunity to complete a graduate program in an accelerated manner. You can also check NMSU's catalog for additional information about our programs.

Aerospace Engineering - Doctor of Philosophy

Requirements for Ph.D. Degree

The student's academic program is not judged satisfactory unless it prepares the student to contribute to the advancement of knowledge in the field of Aerospace Engineering. The degree of Doctor of Philosophy is indicative of distinguished achievement in the areas of scholarship and original research. Therefore, a dissertation of high quality is required of all doctoral students in Aerospace Engineering. Students must follow the degree requirements listed below to complete the Ph.D. course of study.

The Ph.D. program is open to students with a master's degree. Exceptionally well qualified students may petition for direct entry to the Ph.D. program without first obtaining a master's degree.

A student is required to have one refereed journal paper accepted and a second one accepted or in review by graduation. The Ph.D. dissertation can be a compilation and reformatted version of these published or accepted journal papers. Exceptions may be made on case-by-case basis by the Department Head.

Prefix	Title	Credits
Pass Qualifying Exam [1]		
Graduate Coursework (Credits beyond the Bachelor's Degree) [2]		36
Pass Comprehensive Exam [3]		
Doctoral Dissertation (24 credits) [4]		24
A E 700	Doctoral Dissertation	
Complete and Defend Doctoral Dissertation		
Total Credits		**60**

1. It is expected that students will take the qualifying exam within one year of entering the Ph.D. program.
2. Both M E and A E courses are accepted to fulfill this requirement. At least 18 of graduate coursework must support the student's research. The program of study may include up to 6 credits of M E 510 or A E 510 (special topics courses offered formally on a one-time basis) with the approval of the Graduate Coordinator.
3. The candidate must pass a comprehensive examination after the completion of adequate coursework and demonstration of satisfactory progress toward the doctoral dissertation. The specific format of the exam is at the discretion of the examination committee. The candidate may submit the proposal for the dissertation research that includes the candidate's current research, planned research directions, and a reasonable timeline for completing the candidate's proposed research if the committee requires.
4. This may include a maximum of 6 credit hours of A E 600 (https://catalogs.nmsu.edu/search/?P=M%20E%20600) Doctoral Research. A E 600 (https://catalogs.nmsu.edu/search/?P=M%20E%20600) Doctoral Research is intended for those students who have not completed the qualification examination, a prerequisite for A E 700 (https://catalogs.nmsu.edu/search/?P=M%20E%20700) Doctoral Dissertation.

Admission Requirements

For PhD Program, the Mechanical and Aerospace Engineering department asks for the following documents: Transcript, Three Recommendation Letters, Statement of Purpose, Resume, Writing Sample, and GRE. Also NMSU requires English Proficiency Tests such as TOEFL, IELTS, or Duolingo English Test for international students.

Ph.D. Program Transfer Credits

A student who has completed a Master of Science degree in M E, A E, or a closely related field may transfer up to 24 credits of graduate coursework, approved by the student's advisor, into a Ph.D. program of study.

Selection of Permanent Ph.D. Advisor

Newly admitted graduate students will be assigned a temporary advisor for the first semester. The student must select a permanent advisor before registering for the second semester. In selecting a permanent advisor, the student should arrange to meet with several members of the graduate faculty during the first six weeks of enrollment to discuss specific objectives. The student should use these meetings to become familiar with faculty research interests and research projects currently in progress. The faculty member must consent (in writing) to serve as the student's advisor.

Policies governing the Ph.D. written qualifying examination, the Ph.D. written and oral comprehensive examination, the student's Ph.D. committee, and the Ph.D. dissertation are contained in the department's Graduate Program website.

Additional Requirements

Ph.D. candidates in the College of Engineering, who have successfully completed their Ph.D. Qualifier Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

> Paper #1: An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student's doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.
>
> Paper #2: An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for the Web of Science. Alternatively, one conference paper accepted or published in a national or international conference proceedings.

Animal Science - Doctor of Philosophy

Requirements for Ph.D. Degree in Animal Science

Admission

1. GPA of 3.0 or greater.
2. Three letters of recommendation.
3. Completion of the form, "Application for Graduate Admission in Animal Science" including a brief letter (personal statement) outlining the student's background, career goals, and research interest.

4. Resume
5. Favorable evaluation for admission will be by consensus of the Animal Science Graduate Committee and will be contingent on availability of an advisor and research funding.
6. A requirement for admission as a doctoral graduate student in the department is completion of a curriculum substantially equivalent to that required of undergraduate students. Therefore, deficiency courses may be required after admission to the program, as determined initially by the Animal Science Graduate Committee.
7. Non- thesis MS degrees are not acceptable although some of the courses may be transferred if deemed appropriate by the student's Doctoral Committee.

General Requirements

1. Graduate students must maintain at least a 3.0 grade point average.
2. A minimum of 90 credit hours of graduate work is required of which:
   a. At least 30 credits must be in courses numbered 600 or above.
   b. At least 18 credits must be in ANSC 700 (Doctoral Dissertation).
3. All graduate assistants must enroll as full-time students taking at least 9 graded graduate credits (courses numbered 450 and above). No audits can be taken as part of the 9 minimum credits. Only 3 of the 9 credits may be taken as an S/U option.
   a. A graduate assistant may not enroll for more than 15 credits each semester.
   b. If a student needs to take deficiency courses as part of the 9 credits, then a memo from the advisor or department head should be submitted to the Graduate School. If approved, the student can register for 3 undergraduate credits and a minimum of 6 graded graduate credits during their first semester at New Mexico State University.
   c. Enrollment during summer sessions is not required.
4. Students admitted to the Doctoral program (passed qualifying exam) must continue to enroll in three credits of graduate work each semester (exclusive of summer sessions) until the dissertation is approved by the Graduate School.
5. In certain instances, deficiency courses may be required.
6. Two semesters of ANSC 515(Graduate Seminar) are required and students are urged to attend seminar every semester that they are in residence.
7. No more than 6 credits of ANSC 698 may apply toward graduation.
8. The “Program of Study and Committee for Doctoral Students” form listing the graduate committee and courses to be taken, should be filed with the Graduate School after completion of 12 credits and after the qualifying exam, and before registering for additional courses.

Qualifying Examination

1. The Animal and Range Sciences Department may allow the M.S. Final examination to serve as a Ph.D. qualifying exam for students receiving an M.S. in Animal Science at NMSU. See “Guidelines for Graduate Studies” for further details.
2. Doctoral students must take a qualifying exam before completion of one semester of graduate work. The exam is scheduled by the student’s advisor and administered by a provisional committee of at least 3 regular Animal Science faculty members in the student's area of concentration (reproductive physiology or ruminant nutrition). Its purpose is to evaluate the student’s strengths and weaknesses, determine deficiency courses, and discuss a possible program of study (coursework).
3. After successful completion of this exam, a Doctoral Committee is appointed.

Doctoral Committee

1. The student’s Doctoral Committee is selected by the student and the student’s advisor, with approval of the Department Head and the Graduate Dean. The committee will consist of five or more members, as follows:
   a. The committee chair (advisor) and at least two other members must be from the regular Animal Science faculty in the student's concentration area (reproductive physiology or ruminant nutrition).
   b. One member must be from the Related Area.
   c. One member from the Research Tool Area.
   d. The member from the Related or Research Tool Area may serve as the Representative of the Graduate Dean.
2. Duties of the Doctoral Committee
   a. Prepare and file a preliminary program of study with the Graduate Dean
   b. Provide counsel for the student during the program
   c. Attend the comprehensive oral examination and the final dissertation defense.

NOTE: Changes in committee membership must be approved by the Graduate Dean.

Applied and Agricultural Biology - Doctor of Philosophy

Program Requirements

Prefix	Title	Credits
EPWS 525	Advanced Scientific Writing	3
or EPWS 613	Introduction to Scientific Writing	
EPWS 613	Introduction to Scientific Writing	3
or EPWS 525	Advanced Scientific Writing	
EPWS 690	Doctoral Seminar	1
EPWS 6991	Doctoral Research (maximum of 6 count toward degree)	3
EPWS 7000	Doctoral Dissertation	1,15
BIOL 540	Science and Ethics	3
Students will take at least 12 credits from the following		12
EPWS 525	Advanced Scientific Writing	
or EPWS 613	Introduction to Scientific Writing	
EPWS 640	Tropical Insect Ecology	
EPWS 660	Ecology and Management of Invasive Plant Species	
EPWS 662	Parasitology	
EPWS 675	Urban Entomology	
EPWS 6996	Advanced Topics	
Students are required to take at least 6 credits from the following:		6
A ST 503	SAS Basics	
A ST 504	Statistical Software Applications	
A ST 505	Statistical Inference I	
A ST 506	Statistical Inference II	
A ST 509	Statistical Models for Complex Data Structures	
A ST 511	Statistical Methods for Data Analytics	
A ST 515	Statistical Analysis with R	

A ST 540	Predictive Analytics	
BIOL 562	Advanced Genomics Technology	
BIOL 566	Advanced Bioinformatics and NCBI Database	
CSCI 4140	Database Management Systems I	
PLEN 6425	Biometrical Genetics and Plant Breeding	
PLEN 6610	Introduction to Environmental and Ecological Modeling	
Courses, including special topics, can be substituted with advisor's approval. Additionally, new approved graduate level courses may be submitted with advisor's approval. Students can take a combination of the following to complete their degree:		
AGRO 516	Molecular Analysis of Complex Traits	
PLEN 6110	Arid Land Water Resources	
PLEN 6120	Instrumentation in Agronomy	
PLEN 6320	Advanced Soil Physics	
PLEN 6415	Breeding for Plant Disease Resistance	
PLEN 6420	Advanced Crop Breeding	
ANSC 602	Advanced Reproductive Physiology (fo)	
ANSC 621	Metabolic Functions and Dysfunctions (fe)	
BCHE 546	Biochemistry II	
BCHE 647	Physical Biochemistry	
BIOL 527	Symbiosis	
BIOL 536	Advanced Disease Vector Biology	
BIOL 568	Communities and Ecosystems	
BIOL 582	Advanced Plant Signalling and Development	
BIOL 587	Behavioral and Evolutionary Ecology	
GEOG 542	Programming for GIS	
GEOG 552	Landscape Ecology	
GEOG 573	Introduction to Remote Sensing	
GEOG 578	Fundamentals of GIS	
GEOG 585	Spatial Analysis and Modeling	
MOLB 520	Molecular Cell Biology	
MOLB 545	Molecular and Biochemical Genetics	
MOLB 542	Biochemistry I	
RGSC 509	Approaches to Rangeland Research	
RGSC 513	Advanced Rangeland Ecology	
RGSC 516	Arid Land Management	
RGSC 518	Watershed Methods and Management	
RGSC 520	Arid Land Plant Herbivore Interactions	
RGSC 575	Climate Studies, Water and Society	
Additional Coursework for students with only a B.S. degree:		
EPWS 511	Introduction to Weed Science (f)	4
EPWS 502	General Entomology	4
EPWS 551	Special Topics	1-4
EPWS 505	Advanced Integrated Pest Management	3
EPWS 551	Special Topics	1-4
Additional 3 credits from experimental design/statistical analyses.		3

Candidates are accepted into the department to work with a specific faculty member that serves as their major advisor and committee chair. They will develop a dissertation committee in collaboration with their advisor that includes at least two other members of the graduate faculty, at least one of which must be from the same department, and a Dean's representative who must come from outside the department. The committee should be established during the second semester of study.

Students will select classes with the help of their major advisor based on background and interests. Students with a M.S. degree are expected to complete their degree in 3-4 years, but may be allowed up to 7 years to complete the requirements if they begin with a B.S.

For students with a M.S. degree, a minimum of 30 credits of graduate course work plus 18 credits of dissertation (7000) is required to graduate. This is 48 credits to graduate. Students with a B.S. degree must have at least an additional 12 credits, for a total of 60 credits beyond the B.S. degree.

Ph.D. students must do the following:

· Complete a minimum of 6 semesters, with at least two occurring after the comprehensive exam.

· Complete a minimum of 30 credits of graduate work plus 18 credits of dissertation (EPWS 7000 Doctoral Dissertation).

· At least 15 credits must be in courses numbered 500 or above.

· At least 15 credits must be from the EPWS program.

· No more than 6 credits of EPWS 6991 Doctoral Research may apply toward graduation.

· At least 3 credits of EPWS 690 Doctoral Seminar.

· Complete a minimum of 9 hours of course work numbered above 600, exclusive of research and dissertation credit.

· Maintain a minimum grade point average of 3.0.

· Complete the degree within 7 years of admission.

· Enroll in at least 1 credit/semester or 9 credits if full time.

- Full time students may petition to enroll for only 1 credit during their final semester if all other credit requirements have been fulfilled.

· Enroll in seminar classes and present at least 3 seminars.

· Complete annual Student Progress Report.

· Successfully complete a qualifying exam, comprehensive exam, and dissertation defense. (see below)

Ph.D. candidates are recommended to do the following:

· Gain experience as a teaching assistant for at least two semesters.

· Present research at least once in a poster or oral format at a regional, national, or international conference.

· Submit at least one manuscript as first author for publication in a peer-reviewed journal.

Exams

Qualifying exam – Students with a M.S. degree will take the qualifying exam at the end of the first year and after completion of at least 12 course credits. Students with a B.S. degree will take the qualifying exam at the end of the second year and after completion of at least 18 course credits. The qualifying exam will consist of a short proposal or a list of curated questions, and an oral exam in coordination with the students committee. There will be no additional qualifying exam requirements for students with B.S. degrees. If a student does not pass the qualifying exam, they will have the opportunity to continue their research and

pursue a M.S. degree. For M.S. degree holding students, note options below.

Comprehensive exam –This exam covers all phases of the major and minor fields of study and is given after completion of the agreed-upon course work, and when sufficient progress has been made toward fulfilling agreed upon research goals. The examination must contain both written and oral portions. The written portion may be in the form of a proposal or it may consist of questions presented by individual committee members. The student must satisfy the graduate committee's expectation on the written portion before moving on to the oral portion. If a student does not meet the committee's expectation on the written or oral portion, they may be required to re-take a portion or the entire exam. Students must pass the examination within 36 months of passing the qualifying exam and may not register for 7000 level courses until both parts of the comprehensive have been passed. If a student does not pass the comprehensive exam, they will have the opportunity to continue their research and pursue a M.S. degree. For M.S. degree holding students note options below.

Final dissertation defense – this is taken after completing all other degree requirements. The student will complete 18 credits of doctoral dissertation prior to the defense. There is a minimum of one year between the comprehensive exam and the defense. If a student does not pass the final defense, they may be given the opportunity to convert their dissertation into a thesis and pursue a M.S. degree. For M.S. degree holding students note options below.

Note that for each of the exam stages (i.e., qualifying exam, comprehensive exam, and dissertation defense), when an M.S degree holding student does not pass they may not be allowed to continue in the program. Such a case will be dealt with on an individual basis with active participation from the graduate dean.

Students should consult the Graduate School website for specific information regarding the completion of the degree and submission of the dissertation.

Applied Statistics - Doctor of Philosophy

The Applied Statistics doctoral program provides graduates with the knowledge of a range of applied statistical methods, both basic and advanced, sufficient to independently solve complex data problems in a collaborative research environment, to teach these methods at the undergraduate level, and to contribute substantively to the development of grant proposals and applied research publications.

Additional information regarding the Applied Statistics doctoral program is available at https://business.nmsu.edu/academic-departments/easib/.

Students entering the program with a bachelor's degree, or a master's degree in a field other than statistics, will need to complete a total of 70 credit hours – 52 credit hours of coursework and 18 credit hours of dissertation research.

As part of the required 52 credit hours of coursework, students must complete 12 credit hours of A ST electives at the 500 level or higher. Students may concentrate on a substantive area in economics, marketing, finance, or information systems by choosing quantitative electives from that area. The student's committee will determine whether these courses are acceptable substitutes for A ST electives. In addition, as part of the required 52 credit hours of coursework, students must complete 12 credit hours of A ST courses at the 600 level or higher.

Students must complete at least 18 credit hours of dissertation research. The dissertation is expected to consist of three chapters that are standalone manuscripts that may be submitted to applied journals. Additional chapters in the dissertation may provide background of the problem, literature review, and simulations to support the main topic of research. Deviation from this format will be allowed at the discretion of the student's advisor.

Students entering the program with a master's degree in statistics or biostatistics will need to complete a minimum of 36 credit hours. Eighteen of these credit hours are coursework - 12 credit hours of A ST courses at the 600 level or higher and 6 credit hours of A ST electives at the 500 level or higher, as described above. The remaining 18 credit hours consist of dissertation research, as described above. Additional coursework may be necessary to make up for deficiencies in the student's prior master's degree.

Students will be required to pass a written qualifying exam after completing at least 12 credit hours of A ST courses at the 500 level or above, typically at the end of their first year in the doctoral program. Students who enter with a master's degree in statistics or biostatistics may elect to take the qualifying exam earlier. The exam will cover the first year of required theory and methods coursework. The exam will be assigned one of three grades: PhD pass, which enables the student to continue in the second year of the doctoral program; Master's pass, indicating that the student has the requisite knowledge for the master's degree in Applied Statistics but has deficiencies that prevent them from continuing in the doctoral program; and fail. Doctoral students who fail the exam or receive a Master's pass on their first attempt will be allowed one opportunity to re-take the exam. Upon completion of their coursework (typically at the end of their third year), students in the doctoral program will be required to pass a comprehensive exam that has both oral and written components. Students who do not pass the comprehensive exam on their first attempt will be allowed a second opportunity to take the exam after a lapse of at least one semester.

Student's entering the program with a bachelor's degree or a master's degree in a field other than statistics

Astronomy - Doctor of Philosophy

The Astronomy Department at NMSU offers programs leading to the Master of Science and the Doctor of Philosophy degrees. Graduate courses (http://astronomy.nmsu.edu/?page_id=2503) cover topics across all of astrophysics, including stellar atmospheres, observational techniques, the interstellar medium, galactic structure, extragalactic objects, cosmology, the Sun, and planets. Students may also take courses in other relevant fields to broaden their knowledge and capabilities. NOTE: This table is only a minimum. As students must register for minimum 9 credits per semester to remain full time, a student will usually obtain more than the minimum 6 credits of ASTR 600 Pre-dissertation Research and 18 credits of ASTR 700 Doctoral Dissertation in order to complete their thesis.

Requirements

In order to complete the comprehensive exam by preparing a Doctor of Philosophy proposal.

The student will normally submit their proposed thesis title, and then complete their written and oral thesis proposal, as the final part of their comprehensive exam in Year 3. The following table can be used to run a Degree Audit at this stage. Student must have already completed the written coursework comprehensive and oral coursework comprehensive components. After the completion of their comprehensive through passing the PhD proposal, the student will normally apply for and obtain a masters and continue with their progress on the PhD track.

Prefix	Title	Credits
ASTR 500	Seminar ((Take the 1 credit course four times))	4
Choose nine courses from among the following ASTR graduate courses [2]		27
ASTR 503	Fundamentals of Astrophysics	
ASTR 506	Dynamics and Hydrodynamics	
ASTR 530	Gas and Radiative Processes	
ASTR 535	Observational Techniques	
ASTR 545	Stellar Spectroscopy	
ASTR 555	Galaxies I	
ASTR 565	Stellar Interiors	
ASTR 605	Interstellar Medium	
ASTR 616	Galaxies II	
ASTR 620	Planetary Processes	
ASTR 621	Planetary System Formation	
ASTR 630	Advanced Methods in Astrophysics	
ASTR 670	Heliophysics, Space Plasmas, and Space Weather	
ASTR 698	Special Topics.	
Select additional six credits from the ASTR courses above OR from the courses below [3]		6
PHYS 462	Intermediate Electricity and Magnetism II	
PHYS 511	Mathematical Methods of Physics I	
PHYS 554	Quantum Mechanics I	
PHYS 562	Electromagnetic Theory II	
PHYS 571	Advanced Experimental Optics	

PHYS 576	Advanced Computational Physics I	
E E 528	Fundamentals of Photonics	
E E 577	Fourier Methods in Electro-Optics	
CSCI 5994	Master's Project	
Special Research Programs [4]		
Pre-dissertation Research [5]		
ASTR 600	Pre-dissertation Research	6
ASTR 598	Special Research Programs	3
Total Credits		**46**

1. ASTR 500 Seminar is 1-credit course. It should be taken each of the first 4 semesters, for 4 total credits over the program
2. Any 27 credits (9 courses) selected from these. Each course may only be taken for 3 credits.
3. In addition to 9 courses from above, students should select another 2 courses (3 credits each, 6 credits total). This can be either another two astronomy graduate classes from above (which will make 11 total different astronomy courses) OR student may opt to take up to 2 out-of-department classes to fulfill the overall credit requirements if these classes are deemed by the student's committee to be appropriate to the student's program-of-study.
   A maximum of one 3-credit course numbered between 450 and 499 can be applied to the out-of-department course/credit-hour requirement, and only with the approval of the student's Committee. Otherwise, out of department classes must be at the 500 or greater level.
   If more than 6 credits of out-of-department classes are taken, they may potentially count toward the required total courses/credit hours, but only with the approval of the student's Committee. Traditionally, these have been in the area of PHYS, E E and CSCI, as listed. Other Physics courses, or courses offered by other departments such as Engineering, Geology, or Math, are also viable as out-of-department courses. Additionally, for those students intending to specialize in planetary science, courses taught in the Geology department and Geophysics courses taught in the Physics department should be considered.
4. ASTR 598 Special Research Programs is generally taken in the student's 2nd year (fall or spring) and is intended to provide a semi-formal introduction to doing a research project. It may involve research that subsequently develops into a thesis project.
5. Generally, ASTR 600 Pre-dissertation Research credits are prior to completion of the thesis proposal. A student may take anywhere from 1-9 credits of these in a semester. Students typically take 9 credits of this course each semester until they have completed their thesis proposal. However, only a minimum of 6 are actually required over the program. ASTR 600 Pre-dissertation Research credits may be in progress.

In order to complete a PhD thesis defense

The MINIMUM course and credit-hour requirements of the NMSU Department of Astronomy toward completion of the Ph.D. program are

Additionally, for those students intending to specialize in planetary science, courses taught in the Geology department and Geophysics courses taught in the Physics department should be considered.

[4] ASTR 598 Special Research Programs is generally taken in the student's 2nd year (fall or spring) and is intended to provide a semi-formal introduction to doing a research project. It may involve research that subsequently develops into a thesis project.

[5] Generally, ASTR 600 Pre-dissertation Research credits are prior to completion of the thesis proposal. A student may take anywhere from 1-9 credits of these in a semester. Students typically take 9 credits of this course each semester until they have completed their thesis proposal. However, only a minimum of 6 are actually required over the program.

[6] Generally, ASTR 700 Doctoral Dissertation credits are taken after the thesis proposal is done. A student may take anywhere from 1-9 credits of these in a semester. Typically a student will do 9 credits of this per semester while completing their thesis research, in order to remain full time. However a student may register for fewer in their final semester of completing their thesis, after confirming with their advisor as to how that affects their eligibility at the graduate school. A minimum of 18 credits are required over the program

Year A
A Suggested Plan of Study For Students

A typical roadmap for the PhD program, including course and credit-hour minimum requirements, towards completion of the Ph.D. program are summarized in the following table. Note there is some flexibility for each of these components, so students should confirm all their selections directly with their advisor. Most regular graduate courses (501-597, 601-699) are offered on a 2 year rotation. So specific courses will depend on whether a student is on a year A or Year B cycle. ASTR 503 Fundamentals of Astrophysics is offered each fall and should be taken by all students in their first year only. Students may opt for up to 2 courses (6 credits) from outside the department (See Course Requirements). ASTR 598 Special Research Programs, ASTR 600 Pre-dissertation Research and ASTR 700 Doctoral Dissertation are offered every semester, as one-on-one research credits with an advisor

First Year		
Fall		**Credits**
ASTR 500	Seminar [1]	1

Biology - Doctor of Philosophy

The Department of Biology offers graduate study leading to the Doctor of Philosophy degree. Our goal is to prepare students for careers in the various fields in biology through formal coursework and research experiences as well as through seminars and discussion groups.

There are three formal course requirements for Biology PhD students. These core courses are:

Prefix	Title	Credits
Course Requirements		
BIOL 510	Current Topics in Biology	3
BIOL 540	Science and Ethics	1-3
Dissertation		18
BIOL 700	Doctoral Dissertation	
Elective courses - courses with level from 450-600		24-26
At least 15 of the 48 credits should come from BIOL courses numbered 450 and above.		
Total Credits		**48**

Doctor of Philosophy students can choose among the Department's three areas of emphasis:

1. Behavioral, Ecological and Evolutionary Biology
The Behavioral, Ecological and Evolutionary Biology program is appropriate for graduate students who wish to specialize in areas of biology that study the various processes that encompass the behavior, ecology, and evolution of living and extinct taxa.

2. Cell and Organismal Biology
The Cell and Organismal Biology program is appropriate for all Graduate students who wish to emphasize those areas of biology that integrate function and structure in cells, tissues, and organisms. This emphasis focuses in faculty areas of expertise in cell and molecular biology, neurobiology, developmental biology, and physiology.

3. Microbiology
The Microbiology curriculum is appropriate for graduate students who wish to specialize in areas of biology that study the various processes that occur in microbes (bacteria, viruses, fungi, and protists) such as their physiology, ecology, development or evolution.

All graduate students should develop their curriculum plan in consultation with their faculty advisor and graduate committee. Details of sample course sequences within the different emphases are described in the Biology Graduate Handbook available for download from the Graduate Student section of the Biology website (https://bio.nmsu.edu/students/grads.html): https://bio.nmsu.edu/students/grads.html.

Graduate students may also earn a minor in other graduate departments and programs.

Business Administration (Management) - Doctor of Philosophy

Phone: (575) 646-1201

http://business.nmsu.edu/academics/graduate-programs/mgt-phd/ (https://business.nmsu.edu/phd-management/)

The College of Business offers a program leading to a Doctor of Philosophy in Business Administration with a concentration in Management. Our program meets the requirements of the Association to Advance Collegiate Schools of Business (AACSB) International by providing students with advanced management-related theoretical, research, and applied knowledge and skills. We are committed to educating researchers, teachers, and scholars who will lead and shape business and organizational life in the decades to come. We prepare you to understand the complexities of business and its social and international contexts while you develop a specialized area of expertise. Our program is flexible in order to align programs of study with job opportunities and students' interest areas. Research skills are developed through coursework and mentoring relationships, as you will work with faculty to pursue joint research according to your interests and faculty members' expertise. Our faculty prepare students for academic research and teaching careers in managerial and organizational sciences; consulting careers with industrial, governmental, health, or educational institutions; or leadership careers in organizational management and administration.

Program Requirements

- Complete coursework in a major field of concentration chosen from the department of management in the College of Business;
- Demonstrate competency in statistics and research methods;
- Complete coursework in a minor field of concentration or interest area that supports the student's research, teaching, and career goals;
- Pass the first-year qualifying exam, annual progress reviews, and the comprehensive exam; and
- Complete and successfully defend a doctoral dissertation.

Business Administration (Marketing) - Doctor of Philosophy

https://business.nmsu.edu/phd-marketing (https://business.nmsu.edu/phd-marketing/)

The College offers a program leading to a Doctor of Philosophy (PhD) degree. The faculty of the PhD Program in Business Administration are committed to training researchers and educators who will shape business scholarship, practice and pedagogy. The program emphasizes preparing candidates to understand the complexities of modern business while they develop a specialized area of expertise in marketing or management. The PhD in Business Administration provides graduates with the opportunity to pursue a variety of career paths within academia and within industry. Currently concentrations are offered in management and marketing, and each admits students independently.

Program Requirements

- demonstrate competency in statistics and research methods;
- complete studies in a major field of concentration chosen from the departments of management or marketing in the College of Business;
- complete studies in a minor field of concentration or interest area that supports the student's research, teaching and/or career goals;
- pass qualifying exams consisting of a First-Year Paper and a Second-Year Paper, and pass the comprehensive exam; and
- complete and successfully defend a doctoral dissertation.

PSYC 5230	Methods in Social Psychology (May be replaced by a 500+ level course in research methods with Marketing Department approval.)	3

Dissertation Work		**18**
MKTG 700	Doctoral Dissertation	
Total Credits		**54-55**

Chemistry - Doctor of Philosophy

The Ph.D. in chemistry is offered in the major emphasis areas of analytical, inorganic, organic, and physical chemistry and biochemistry. The graduate program is designed to teach students modern approaches to chemistry and biochemistry (courses), experimental methods to problem–solving (research), and communication skills in the discipline (seminars and colloquia). Ph.D. candidates are required to complete the courses below, pass a qualifying exam after the first year, pass both a written and oral comprehensive exam before the fourth year, and prepare a written thesis and pass a final oral examination. A minimum of 24 of the required credits must be taken at NMSU.

Prefix	Title	Credits
CHEM 475	Central Concepts in Chemistry - Safety	1
CHEM 476	Central Concepts in Chemistry - Research Ethics	1
CHEM 477	Central Concepts in Chemistry - ProfessionalDevelopment	1
CHEM 501	Central Concepts in Chemistry - Energy	3
CHEM 502	Central Concepts in Chemistry - Structure	3
CHEM 503	Central Concepts in Chemistry - Dynamics	3
CHEM 504	Central Concepts in Chemistry - Measurements	3
CHEM 510	Graduate Student Seminar [1]	5-11
CHEM 520	Comprehensive Literature Review Seminar for Graduate Students [2]	1
Additional Required Courses [3]		*6*
Research Credits [4]		*24-54*
Total Credits		**51-87**

1. Beginning in the second semester, all Ph.D. students must enroll in 1 credit of CHEM 510 Graduate Student Seminar, attending each semester. At least two credits of CHEM 510 must be taken for a letter grade of B- or better. The remaining CHEM 510 credits may be taken as S/U.
2. CHEM 520 Comprehensive Literature Review Seminar for Graduate Students is given on a topic of the student's choice as part of the Comprehensive Exam and will be assigned a letter grade. A grade of C + or lower will require the student to repeat the course a maximum of once.
3. Additional courses in subsequent years are chosen based on major emphasis area, through consultation with the thesis committee. These courses may include any course numbered 450 or above in the following subject areas: CHEM, BCHE, PHYS, MATH, CSCI, BIOL, A ST, CHME, GENE, MOLB, SOCI, EDUC, EPWS, ENVS, ANSC.
4. At least 18 credits must be either CHEM 700 Doctoral Dissertation or BCHE 700 Doctoral Dissertation. 700-level research credits are taken after the completion of the comprehensive exam. Remaining credits can be CHEM 600 Research or BCHE 600 Research.

Chemistry (Biochemistry) - Doctor of Philosophy

The Doctor of Philosophy in Chemistry with a concentration in Biochemistry is designed to teach students modern approaches to chemistry and biochemistry (courses), experimental methods to problem–solving (research), and communication skills in the discipline (seminars and colloquia). Ph.D. candidates are required to complete the courses below, pass a qualifying exam after the first year, pass both a written and oral comprehensive exam before the fourth year, and prepare a written thesis and pass a final oral examination.

Prefix	Title	Credits

BCHE 542	Biochemistry I	3
BCHE 545	Molecular and Biochemical Genetics	3
BCHE 546	Biochemistry II: Central and Intermediary Metabolism	3
BCHE 647	Physical Biochemistry	3
Additional Graduate-level courses [3]		*3-9*
Research Credits [4]		24-54
Total Credits		**48-90**

1. Beginning in the second semester, all Ph.D. students must enroll in 1 credit of CHEM 510 Graduate Student Seminar attending each semester. At least two credits of CHEM 510 Graduate Student Seminar must be taken for a letter grade of B- or better. The remaining CHEM 510 Graduate Student Seminar credits may be taken as S/U.
2. CHEM 520 Comprehensive Literature Review Seminar for Graduate Students is given on a topic of the student's choice as part of the Comprehensive Exam and will be assigned a letter grade. A grade of C+ or lower will require the student to repeat the course a maximum of once.
3. Additional courses in subsequent years are chosen based on major emphasis area, through consultation with the thesis committee. These courses may include any course numbered 450 or above in the following subject areas: CHEM, BCHE, PHYS,MATH, CSCI, BIOL, A ST, CHME, GENE, MOLB, SOCI, EDUC, EPWS, ENVS, ANSC.
4. At least 18 credits must be either CHEM 700 Doctoral Dissertation or BCHE 700 Doctoral Dissertation. 700-level research credits are taken after the completion of the comprehensive exam. Remaining credits can be CHEM 600 Research or BCHE 600 Research.

Computer Science - Doctor of Philosophy

Doctoral students may specialize in any of the areas in which computer science faculty members have active research interests. Through interdisciplinary arrangements with other doctoral departments at New Mexico State University, doctoral students may also specialize in such areas as computational biology, computer networks and architectures and cognitive science.

Doctoral students are expected to join the program with a preparation equivalent to that required for the Master's degree in computer science at New Mexico State University. The requirements for the degree are as

specified in the NMSU graduate catalog, with the following additional considerations:

- Take and pass the Ph.D. Qualifying Exam. It is expected that students will take the qualifying exam within one year of entering the Ph.D. program or one year after finishing their deficiencies. In the qualifying exam, a student is expected to present a written and oral synthesis of a topical literature review. For more details on the qualifying exam, see the departmental document.
- Students who are enrolled in the Computer Science MS program and complete a Master's thesis can use a successful thesis defense as the qualification exam if the Master's thesis advisor is willing to take the student as a PhD student.
- The comprehensive examination evaluates depth of knowledge in the specific research area selected by the candidate with the consent of their graduate committee. It includes: a written part, in the form of an extensive survey paper; an annotated bibliography; and an oral examination.
- The student is required to submit and defend a prospectus, at the same time or after completing the comprehensive examination. The prospectus describes and motivates the specific research problem to be addressed in the doctoral dissertation.
- A PhD student is required to take at least one course each in the following three areas (theories, systems, and applications)

Graduation Requirements

Only courses from the Master of Science-Computer Science program from NMSU can be used to waive this requirement.

*Graduate credits from other departments could be approved if they are required for the program study of the student. The student needs to get approval prior to taking the courses.

Students should contact the department for information on additional graduation requirements, or visit the on-line Graduate Handbook (https://computerscience.nmsu.edu/).

Counseling Psychology - Doctor of Philosophy

The CEP Department offers a doctoral program that leads to a Ph.D. in Counseling Psychology. The program is accredited by the American Psychological Association. For more information on this accreditation contact

The Office of Program Consultation and Accreditation
American Psychological Association
750 1st Street, NE
Washington, DC 20002
Phone: (202) 336-5979.

The program is based on the scientist-practitioner model through which both research and service delivery skills are acquired. Graduates of the program are prepared to conduct research, provide service, teach, and supervise. The program prepares students for licensure as psychologists (http://psybook.asppb.org/). The two aims of the program are:

1. To prepare entry-level counseling psychologists who are self-reflective and competent in both the practice and science of the profession.
2. To prepare counseling psychologists who think critically about the socio-cultural context of their work and promote social justice

For more information on program application requirements and process, see Counseling Psychology, Ph.D., program website (https://cep.nmsu.edu/academic-programs/counseling-psych-phd/counseling-psychology-phd.html).

Program Requirements

CEP faculty conduct periodic reviews of students' progress in the programs, including their academic performance, counseling and psycho-educational skills, professionalism and ethics. Deficits identified through faculty reviews may result in recommendations that students engage in remedial work or that they pursue alternative career goals.

Curriculum and Instruction - Doctor of Philosophy

The Doctorate of Philosophy (PhD) are rigorous degrees requiring an intellectual and personal commitment. The academic course of study for both degrees is the same. The PhD doctoral program requires students to demonstrate competency in the computer tools or second language sequence. (See below in program descriptions). For the PhD program 66 credit hours is only the minimum and students may be asked to complete additional hours as per their advisor and committee recommendations.

The degree require a dissertation based on original research, inextricably grounded with an array of primary and secondary sources. The degree has required courses of study, but are additionally individualized based on those scholarly and academic expectations set by the doctoral student in collaboration with their Dissertation Committee.

Options and Concentration

Currently there are four Options and one concentration for the Doctoral Program of the Department of Curriculum & Instruction. These are:

Options:

1. Bilingual/TESOL
2. Critical Pedagogies
3. Early Childhood Education
4. Language, Literacy & Culture

Concentration:

1. Educational Learning Technologies

To Apply

- Apply to the NMSU Graduate School (https://tpal.nmsu.edu/degree-programs/doctoral-programs/ci-doctoral-program.html) (Select Intended major "Curriculum and Instruction" and then concentration you will pursue);
- Apply to C&I by submitting your Application Portfolio by December 15th (via the Graduate School Application portal)
  - See the sections, “Applying to the Doctoral Program,” “Doctoral Intake Application Instructions” and the “C&I Doctoral Student Checklist” in the Doctoral Handbook (https://tpal.nmsu.edu/_files/documents/CI_Doc_Handbook_Campus_22.pdf).
  - NMSU Doc Portfolio Example – C&I (https://tpal.nmsu.edu/student-forms-handbooks%20/students_forms_and_handbook.html) (If the Sample portfolio does not open automatically, try a different browser or try saving the portfolio to your desktop before opening it.)

NOTE: Potential students who have written successful portfolios will be invited to interview with the Doctoral Qualifying Committee (a committee of C&I faculty)

Once Applicants Are Accepted

- Attend the applicable Doctoral Orientation Meeting your first semester of classes
- Meet with your Interim Advisor during your first semester of classes
- Get to know our faculty (https://tpal.nmsu.edu/faculty-directory/)
- Read the Doctoral Handbook (https://tpal.nmsu.edu/_files/documents/CI_Doc_Handbook_Campus_22.pdf) and the sections of the NMSU Graduate Catalog that apply to you (this is your responsibility)
- Follow the Doctoral Program Checklist from the C&I Doctoral Handbook (https://tpal.nmsu.edu/_files/documents/CI_Doc_Handbook_Campus_22.pdf)

Economic Development - Doctor of Economic Development

The Doctor of Economic Development (DED) is a professional doctorate designed to provide advanced training for economic development professionals.

The Doctor of Economic Development (DED) is designed to prepare students to be professionals in the area of economic development. To receive a DED, students must successfully complete 39 ECDV credits. Successfully passing 2 comprehensive exams (offered twice each summer) is required to register for ECDV courses. The five courses covered by the two exams represent 15 credit hours of course work, which the student may complete at another program or at NMSU.

DED minimum admission requirements:

All students must meet the requirements specified in the general regulations and requirements for admission to the Graduate School and to candidacy, and in addition the following:

- Bachelor's degree or equivalent
- Minimum undergraduate GPA: 3.0/4.0
- GRE or GMAT score is recommended (not required)
- Completion of one undergraduate courses in intermediate microeconomic (ECON 311 Intermediate Macroeconomic Theory or equivalent) and intermediate macroeconomic (ECON 312 Intermediate Microeconomic Theory or equivalent) both with grades of B or better
- Completion of one course in college-level calculus (MATH 1430G Applications of Calculus I or equivalent) and one course in statistics including regression analysis (ECON 405 Introductory Econometrics or equivalent), with grades of B or better in both courses
- Additional coursework in matrix algebra is recommended
- One course in mathematical economics ECON 457 Mathematical Economics or equivalent), with a grade of B or better
- International students must meet graduate school admission requirements for English proficiency

In addition, all applicants must successfully pass Comprehensive Exams covering the "Microeconomic Core" and the "Macroeconomic and Econometric Core" before taking upper level ECDV courses. The Microeconomic Core exam covers advanced microeconomic theory (AEEC 5120 Microeconomic Theory and ECON 511 The Economics of Imperfect Markets). The Macroeconomic and Econometric Core covers advanced macroeconomic theory (AEEC 5130 Macroeconomic Theory), and econometrics (AEEC 5240 Econometrics and ECON 545 Econometrics II).
Students who have not passed all of these "core" courses with a grade of B or better, or feel the need to study the material further, may take the courses, along with ECON 457 Mathematical Economics during the fall and spring semesters of their first year in the program.

- Comprehensive Exam I covers the "Microeconomics Core": AEEC 5120 Microeconomic Theory, ECON 511 The Economics of Imperfect Markets
- Comprehensive Exam II covers the "Macroeconomics and Econometrics Core":AEEC 5130 Macroeconomic Theory, AEEC 5240 Econometrics and ECON 545 Econometrics II)
- Students who fail a comprehensive exam may apply to take the exam a second time. Only under special circumstances are students allowed to take a comprehensive exam a third time

Prefix	Title	Credits
All students in the DED program must successfully complete the following:		
ECDV 550	Introduction to Local and Regional Development	3
ECDV 661	Regional Economic Modeling	3
ECDV 664	Population Economics	3
ECDV 668	Economic Development Finance	3
ECDV 671	Sustainable Economic Development	3
ECDV 681	Urban Economic Development	3
ECDV 682	Rural Development	3
ECDV 683	Seminar in National Economic Development	3
ECDV 692	Seminar in Economic Development	3
ECDV 694	Internship	3
ECDV 699	Doctoral Project	9
Total Credits		**39**

Teaching and research assistantships are available to qualified applicants, however, admission to the program does not imply or guarantee funding.

Detailed and updated information is available at https://business.nmsu.edu/ded (https://business.nmsu.edu/ded/).

Suggested Plan of Study

This plan of study includes the "core" courses a student has not already completed these with a B or better.

Educational Leadership & Administration (Higher Education Administration) - Doctor of Education

Educational Leadership Doctoral Program (ELDP)

The Doctor of Education is geared toward those students wishing to pursue a degree which will help them in their profession. Coursework, internships, and research are constructed to develop individuals for administrative position in Pk-12 schools in post secondary institutions.

For More Information

Please do not hesitate to contact the School of TPAL if you have any questions related to ELDP. Feel free to send an e-mail to eldpquestions@nmsu.edu

Educational Leadership & Administration (Higher Education) - Doctor of Philosophy

Educational Leadership Doctoral Program (ELDP)

The Doctor of Philosophy is a research-oriented degree. Coursework and internships are directed toward developing research proficiencies in educational leadership. The Ph.D. also requires additional hours of coursework in an approved cognate area.

For More Information

Please do not hesitate to contact the School of TPAL if you have any questions related to ELDP. Feel free to send an e-mail to eldpquestions@nmsu.edu

GNDR 571	Advanced Seminar in Feminist and Queer Theories	
SOCI 570	Seminar in Sociology of Latinos/as in the United States	
SOCI 571	Advanced Race and Ethnic Relations	
SOCI 579	Seminar in Sociological Perspectives on the U.S.-Mexico Border	
SPED 5850	Current Research in Special Education	
Doctoral Dissertation		18
ELAD 7000	Doctoral Dissertation	
Total Credits		**78**

[1] All students can complete the 15 credits of cognate courses at their own pace but cannot start cognates until after their first semester in the program and must be complete the requirement before enrolling in ELAD 7000 Doctoral Dissertation. Students will need to coordinate with their advisor appropriately and may need to be prepared for extended time to degree if they hold off on cognates too long.

Example of possible Cognate courses but not limited to the following:

- Child and Family Development
- Communication
- Feminist/Gender Studies
- Latino/a Studies
- Native American Studies
- Program Evaluation/Data Analysis
- Research Methods
- Social Justice/Critical Theory
- Sociocultural Theory
- Critical Race Theory/LatCrit
- Sociology

A Suggested Plan of Study

There are also 15 credits of Cognate coursework that must be completed in order to fulfill the requirements of the Doctor of Philosophy in Educational Administration.

Engineering (Chemical Engineering) - Doctor of Philosophy

The program of study leading to the Ph.D. is available to students who have either a BS or MS in chemical engineering. Students with a BS must complete 30 course credits and 24 dissertation credits, for a total of 54 credits, including:

- required core CHME courses (14 credits);
- graduate elective courses (12 credits);
- CHME elective courses (3 credits);
- independent research as CHME 698 Ph.D. Research prior to completion of the comprehensive exam (6 credits);
- dissertation as CHME 700 after completion of the comprehensive exam (18 credits); and
- graduate seminar as CHME 690 Graduate Seminar (1 credit).

Ph.D. students must pass:

1. a qualifying examination within 24 months of starting their Ph.D. studies;
2. a comprehensive examination completed a minimum of nine months prior to the dissertation defense; and
3. an oral defense of the written dissertation before the dissertation committee.
4. PhD candidates in the College of Engineering, who have successfully completed their PhD Qualifier Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

   Paper #1: An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student's doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.

   Paper #2: An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for the Web of Science. Alternatively, one conference paper accepted or published in a national or international conference proceedings.

Prefix	Title	Credits
Required Core Courses		
CHME 501	Graduate Thermodynamics for Chemical Engineers	3
CHME 506	Graduate Transport Phenomena(s)	3
CHME 516	Graduate Numerical Methods in Chemical Engineering	3

Engineering (Civil Engineering) - Doctor of Philosophy

In support of the mission and vision statements for the graduate program, the Civil Engineering Department adopts the following goals for the Doctor of Philosophy (Ph.D.) degree:

1. Prepare students to develop and conduct fundamental and applied research to generate innovative and original solutions for civil engineering problems.
2. Prepare students for research-based professional careers or academic careers in the civil engineering discipline.
3. Develop a culture of research/teaching scholarship among students.

Students may specialize in environmental, geotechnical, structural, transportation, or water resources engineering. Further information related to the Ph.D. degree may be found under the Academic Programs of Study (p. 31) section of the catalog.

Requirements

The Ph.D. program in Civil Engineering is open to students with a master's degree. Exceptionally well qualified students may petition for direct entry to the Ph.D. program without first obtaining a master's degree. The program of study requires a minimum of 36 graduate credits beyond the master's, including at least 18 credits of dissertation work.

Option 1 - Ph.D. with Completed Master's Degree

If the student has both bachelor's and master's degrees in fields that are not closely related to Civil Engineering, they must complete any undergraduate and graduate coursework deficiencies identified by the faculty in their area of specialization. Deficiencies may be identified upon admission, based on the student's performance on the qualifying exam, or both. Beyond completion of any deficiency coursework, the following requirements must be met:

Prefix	Title	Credits
Pass Qualifying Exam		
Graduate Electives (beyond master's degree, or equivalent thereof) these electives may include research (C E 600) or dissertation (C E 700) credits [1]		18
Pass Comprehensive Exam		
Doctoral Dissertation		18
C E 700	Doctoral Dissertation	
Complete and Defend Doctoral Dissertation		

[1] Graduate course work credits from the following prefixes are permitted for the Ph.D. degree. If a graduate course outside this list of prefixes logically fits into the Ph.D. program, see your graduate advisor about requesting an exception.
Prefixes: A EN, ENVE, ENVS, GENE, SOIL, BIOL, CS, CHEM, GEOG, GEOL, GPHY, MATH, MOLB, PHYS, STAT, A ST, A E, CE, CHME, EE, IE, ME

Option 2 - Direct Ph.D. with BSCE or Equivalent, but no Master's Degree

If the student has the equivalent of a BSCE degree, but no master's degree, they must fulfil the following requirements:

Prefix	Title	Credits
Area of Specialization (beyond the bachelor's degree, 450 or higher) [1]		18
Pass Qualifying Exam		

Graduate Electives (beyond master's degree, or equivalent thereof) these electives may include research (C E 600) or dissertation (C E 700) credits [2]		18
Pass Comprehensive Exam		
Doctoral Dissertation		18
C E 700	Doctoral Dissertation	
Complete and Defend Doctoral Dissertation		

[1] **Specialization Courses:**
Environmental: ENVE 456 Environmental Engineering Design, ENVE 550 Aquatic Chemistry, ENVE 551 Unit Processes/Operation of Water Treatment, ENVE 552 Unit Processes/Operation of Wastewater Treatment, ENVE 557 Surface Water Quality Modeling, ENVE 598 Special Research Programs
Geotechnical: C E 452 Geohydrology, C E 470 Design of Municipal and Hazardous Waste Landfills, C E 479 Pavement Analysis and Design, C E 485 Design of Earth Dams, C E 507 Design of Earth Retaining Structures, C E 508 Advanced Soil Behavior, C E 509 Deep Foundations, C E 579 Ground Improvement, C E 585 Slope Stability Analysis and Design
Structural: C E 454 Wood Design, C E 455 Masonry Design, C E 501 Advanced Mechanics of Materials, C E 510 Introduction to Nondestructive Testing, C E 515 Finite Element Methods, C E 544 Advanced Design of Steel Structures, C E 545 Advanced Concrete Design, C E 554 Wood Design, C E 555 Masonry Design, C E 571 Structural Dynamics
Transportation: C E 479 Pavement Analysis and Design C E 482 Hydraulic Structures, C E 501 Advanced Mechanics of Materials, C E 507 Design of Earth Retaining Structures, C E 509 Deep Foundations, C E 510 Introduction to Nondestructive Testing, C E 515 Finite Element Methods, C E 544 Advanced Design of Steel Structures, C E 545 Advanced Concrete Design, C E 547 Bridge Engineering
Water Resources: A EN 459 Groundwater, Wells & Pumps, A EN 478 Irrigation and Drainage Engineering, C E 452 Geohydrology, C E 482 Hydraulic Structures, C E 483 Surface Water Hydrology, C E 485 Design of Earth Dams, C E 682 Topics in Hydrodynamics II, ENVE 557 Surface Water Quality Modeling, ENVE 630 Fate and Transport of Environmental Contaminants, SOIL 652 Advanced Soil Physics

[2] **Included Prefixes:** Graduate course work credits from the following prefixes are permitted for the Ph.D. degree. If a graduate course outside this list of prefixes logically fits into the Ph.D. program, see your graduate advisor about requesting an exception. **Prefixes:** A EN, ENVE, ENVS, GENE, SOIL, BIOL, CSCI, CHEM, GEOG, GEOL, GPHY, MATH, MOLB, PHYS, STAT, A ST, A E, CE, CHME, EE, IE, ME

Additional Requirements

Ph.D. candidates in the College of Engineering, who have successfully completed their Ph.D. Qualifier Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

Paper #1: An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student's doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.

Paper #2: An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for the Web of Science. Alternatively, one conference paper accepted or published in a national or international conference proceedings.

Engineering (Electrical Engineering) - Doctor of Philosophy

Requirements for Ph.D. Degree

The Program Educational Objectives for the Doctorate in Electrical Engineering are:

1. That graduates obtain relevant, productive employment performing research in academia, government or industry, and/or are teaching at institutions of higher education.
2. That graduates obtain relevant, productive employment with the private sector or in government and/or pursue additional advanced degrees.

The Ph.D. program is open to students with a master's degree. Exceptionally well qualified students may petition for direct entry to the Ph.D. program without first obtaining a master's degree.

At the discretion of the advisor, students may complete some or all degree requirements remotely, e.g., by registering in the online sections for courses. All Graduate Assistants must enroll as full-time students for 9 credits, excepting in their final two academic semesters where they may file a request for waiver permitting them to enroll in at least 6 credits in their second to last academic semester and at least 1 credit hour in their final academic semester.

Note–the following degree requirement tables outline the **minimum** requirements for a Ph.D. in Electrical Engineering. As many students must register for a minimum of 9 credits each semester to remain full time, a student will often take more than the minimum of 18 credits of E E 700 Doctoral Dissertation to complete their degree. Furthermore, as students are not eligible for enrollment in E E 700 until they have passed the Ph.D. Qualifying Exam, a student will often take more than the maximum of 6 or 9 hours of E E 600 Doctoral Research.

Option 1 - Ph.D. with Completed Master's Degree

If the student has both master's and bachelor's degrees in fields other than electrical engineering, they must complete undergraduate deficiency coursework, consisting of completion of the BSEE core courses. If the student has a master's degree in a field other than electrical engineering, they must complete graduate deficiency coursework, which consists of three graduate core courses from three different areas of emphasis (see MSEE program of study for more details).

Prefix	Title	Credits
Pass Qualifying Exam [1,2]		
Graduate Electives (credits beyond the master's degree) [3]		**18**
Pass Comprehensive Exam [4]		
Doctoral Dissertation		
E E 700	Doctoral Dissertation [2]	
Complete and defend doctoral dissertation [5]		
Total Credits		**36**

[1] It is expected that students will take the qualifying exam within one year of their master's or entering the Ph.D. program. The qualifying exam consists of two components: completing the graduate core (see MSEE program of study for details) with a grade of B or better and presenting a written and oral summary of a topical literature review.
For more details on the qualifying exam, see https://ece.nmsu.edu/grad-study/phd-qualifying.html.

[2] A student may not enroll in E E 700 Doctoral Dissertation until they have passed the qualifying exam.

[3] E E courses must be at the 500 level or higher. Non-E E courses must be at the 450 level or higher. At least 9 credits must be taken in E E. At most 6 credits may be E E 600 Doctoral Research. At most 6 credits may be E E 590 Selected Topics courses that are not subtitled. Exclude credits of E E 700 Doctoral Dissertation. Exclude credits for graduate deficiency coursework if master's degree is not E E. Exclude coursework used to satisfy the master's degree requirements. Courses excluded from the MSEE and MEEE degrees are also excluded from the Ph.D. degree.

[4] The candidate must pass a comprehensive examination after the completion of adequate coursework and demonstration of satisfactory progress toward the doctoral dissertation. The examination must be part written and part oral. The specific format of the exam is at the discretion of the examination committee. The written part must include a proposal for the dissertation research, and if the committee requires, it may also include a separate written exam. The written report on the proposal for the dissertation research must include the candidate's current research, planned research directions, and a reasonable timeline for completing the candidate's proposed research. The oral part may also include questions on completed coursework.

[5] The dissertation must be completed and orally defended. Additionally, evidence must be submitted for a minimum of two publications related to the dissertation research, including one of which is submitted to an internationally recognized journal, such as IEEE Transactions, and the second of which may be with a professional conference, such as an IEEE conference. Submissions must be completed prior to the final oral exam. For more details on the publication requirement, see https://ece.nmsu.edu/grad-study/phd-requirements.html.

Other limitations and requirements that apply to all Ph.D. degrees are described elsewhere in this catalog.

Option 2 - Direct Ph.D. with BSEE or Equivalent, but no Master's Degree

Prefix	Title	Credits
Graduate core courses (choose 3 from 3 different areas)		**9-10**
Microelectronics/VLSI		
E E 523	Analog VLSI Design	
Photonics/Optics		
E E 528	Fundamentals of Photonics	
Electric Energy Systems		
E E 543	Power System Faults and Stability	
Digital Signal Processing		
E E 545	Digital Signal Processing II	
or E E 596	Digital Image Processing	
Computer Engineering		
E E 562	Computer Systems Architecture	
Communications		
E E 571	Random Signal Analysis	
Controls & Robotics		
E E 551	Control Systems Synthesis	
Pass Qualifying Exam [1,2]		
Graduate Electives [3]		**33-32**
Pass Comprehensive Exam [4]		
Doctoral Dissertation		
E E 700	Doctoral Dissertation [2]	
Complete and defend doctoral dissertation [5]		
Total Credits		**60**

[1] It is expected that students will take the qualifying exam within one year of their MSEE or entering the Ph.D. program. The qualifying exam consists of two components: completing the graduate core (see MSEE program of study for details) with a grade of B or better and presenting a written and oral summary of a topical literature review. For more details on the qualifying exam, see https://ece.nmsu.edu/grad-study/phd-qualifying.html.

[2] A student may not enroll in E E 700 Doctoral Dissertation until they have passed the qualifying exam.

[3] E E courses must be at the 500 level or higher. Non-E E courses must be at the 450 level or higher. The total number of E E credits, including the graduate core and excluding credits of E E 700 Doctoral Dissertation must be at least 21. At most 9 credits may be E E 600 Doctoral Research. At most 9 credits may be E E 590 Selected Topics courses that are not subtitled. Courses excluded from the MSEE and MEEE degrees are also excluded from the Ph.D. degree.

[4] The candidate must pass a comprehensive examination after the completion of adequate coursework and demonstration of satisfactory progress toward the doctoral dissertation. The examination must be part written and part oral. The specific format of the exam is at the discretion of the examination committee. The written part must include a proposal for the dissertation research, and if the committee requires, it may also include a separate written exam. The written report on the proposal for the dissertation research must include the candidate's current research, planned research directions, and a reasonable timeline for completing the candidate's proposed research. The oral part may also include questions on completed coursework.

[5] The dissertation must be completed and orally defended. Additionally, evidence must be submitted for a minimum of two publications related to the dissertation research, including one of which is submitted to an internationally recognized journal, such as IEEE Transactions, and the second of which may be with a professional conference, such as an IEEE conference. Submissions must be completed prior to the final oral exam. For more details on the publication requirement, see https://gradschool.nmsu.edu/Current%20Students/College-of-Engineering-Ph.D.-Publication-Requirement-Form1.pdf.

Other limitations and requirements that apply to all Ph.D. degrees are described elsewhere in this catalog.

Included Prefixes

Graduate course work credits from the following prefixes are permitted for the Ph.D. degree. If a graduate course outside this list of prefixes logically fits into the Ph.D. program, see your graduate advisor about requesting an exception; note that exceptions must be approved before taking the class.

Engineering (Industrial Engineering) - Doctor of Philosophy

The Department of Industrial Engineering offers a Doctor of Philosophy (Ph.D.) in Engineering with a specialization in Industrial Engineering.

The program of study leading to the Ph.D. degree must include a minimum of 36 graduate course credits, plus 24 dissertation research credits (9 credits at the IE 600 level and 15 credits of IE 700). Among the 36 graduate course credits, 18 credits must be from IE 500-level courses relevant to your research. Typical areas include statistics, electrical engineering, mathematics, or mechanical engineering. You may not transfer credits from your master's degree to meet this requirement. Refer to http://ie.nmsu.edu for a program description and current research areas.

Time Line for a Ph.D. Program

Individual programs vary, however, you can expect to spend three to five years (mostly full-time) earning your degree. Below are the key milestones of every program:

Admittance to the program and begin coursework: In coordination with your academic advisor, select 500-level courses to help you prepare for the Qualifying Exam. This would include IE topics on the general part of the exam, as well as topics related to your intended research.

Pass the qualifying examination: It is expected that students will take the qualifying examination within one year of their entering the Ph.D. program. Details regarding the examination may be obtained from the department office. If you do not pass the examination on your first attempt, you may be allowed, based on the recommendation of the faculty, to take the exam again the next time it is offered. If you do not pass the examination on your second attempt, you will be dropped from the Ph.D. program.

Form your committee and prepare a research proposal: During this time, you are expected to be a full-time student. The Graduate School requires at least one academic year of residency as defined in the Graduate Catalog. You should take at least nine credits of IE 600-level courses. At this time, you should expect to file your *Program of Study* with the Graduate School.

Pass the comprehensive examination: The comprehensive examination consists of two parts: a written and oral presentation of your research proposal. You must pass the comprehensive examination within 24 months of passing the qualifying examination. You may not take 700-level courses until you have passed both parts of your comprehensive examination.

Conduct research, write the dissertation, and pass the final examination: Throughout your doctoral program, your advisor and committee will oversee your progress. During this time, you will be enrolled in IE 700 courses. Your program must include a minimum of 15 credits of IE 700 Doctoral Dissertation. There is a minimum time span of one year between the comprehensive and final oral examinations (e.g., the dissertation defense). If more than five years have passed since you passed the comprehensive examination, you may be required to pass another comprehensive examination.

Prefix	Title	Credits
Pass Qualifying Exam		
Graduate Electives (credits beyond the Bachelor's degree)		**36**
Pass Comprehensive Exam		
Doctoral Dissertation		**24**
I E 700	Doctoral Dissertation	
Defend doctoral dissertation		
Total Credits		**60**

Ph.D. Qualifying Exam

1. Format

- Exam offered in two parts:
  - Foundations of IE, all day Thursday
  - IE Specific area exam: all day Friday.

2. Content

- **IE Foundation Portion of the Exam** (all students will take an identical exam for the foundation portion). The Foundation portion consists of four areas:
  - Operations Research Deterministic and Stochastic
  - Probability and Statistics
  - Industrial Engineering Theory
  - Combination of questions from one or all of these four areas. Selection of Manufacturing, Engineering Economy, Process Improvement, Methods.
- **IE Research Topics Portion of the Exam** (Each student taking the qualifier must select two of the topics listed below for testing at least 6 weeks before the exam is offered. The student will work with his or her advisor on selecting the topics. The advisor must submit the two selected areas to the Chair of the Examining Committee at least one month before the exam is offered.)
  - Manufacturing
  - Computer/Simulation Modeling
  - Stochastic Operations Research
  - Queuing Theory
  - Design Optimization (product, facility, process, etc.)
  - Algorithmic Optimization (Dynamic cases)
  - Quality Control
  - Systems Integration and Control

- Facility Design and Layout
- Reliability

Additional Requirements

Ph.D. candidates in the College of Engineering, who have successfully completed their Ph.D. Qualifying Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

> Paper #1: An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student's doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.
>
> Paper #2: An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for the Web of Science. Alternatively, one conference paper accepted or published in national or international conference proceedings.

Engineering (Mechanical Engineering) - Doctor of Philosophy

Requirements for Ph.D. Degree

The student's academic program is not judged satisfactory unless it prepares the student to contribute to the advancement of knowledge in the field of Mechanical Engineering. The Degree of Doctor of Philosophy is indicative of distinguished achievement in the areas of scholarship and original research. Therefore, a dissertation of high quality is required of all doctoral students in Mechanical Engineering.

The Ph.D. program is open to students with a master's degree. Exceptionally well qualified students may petition for direct entry to the Ph.D. program without first obtaining a master's degree.

A student is required to have one refereed journal paper accepted and a second one accepted or in review by graduation. The Ph.D. dissertation can be a compilation and reformatted version of these published or accepted journal papers. Exceptions may be made on case by case basis by the Department Head.

Prefix	Title	Credits
Pass Qualifying Exam [1]		
Graduate Coursework (Credits beyond the Bachelor's Degree) [2]		36
Pass Comprehensive Exam [3]		
Doctoral Dissertation [4]		24
M E 700	Doctoral Dissertation	
Complete and Defend Doctoral Dissertation		
Total Credits		**60**

1. It is expected that students will take the qualifying exam within one year of entering the Ph.D. program.
2. At least 18 of graduate coursework must support the student's research. The program of study may include up to 6 credits of M E 510 (special topics courses offered formally on a one-time basis) with the approval of the Graduate Coordinator.
3. The candidate must pass a comprehensive examination after the completion of adequate coursework and demonstration of satisfactory progress toward the doctoral dissertation. The specific format of the exam is at the discretion of the examination committee. The candidate may submit the proposal for the dissertation research that includes the candidate's current research, planned research directions, and a reasonable timeline for completing the candidate's proposed research if the committee requires.
4. This may include a maximum of 6 credit hours of M E 600 (https://catalogs.nmsu.edu/search/?P=M%20E%20600) Doctoral Research. M E 600 (https://catalogs.nmsu.edu/search/?P=M%20E%20600) Doctoral Research is intended for those students who have not completed the qualification examination, a prerequisite for M E 700 (https://catalogs.nmsu.edu/search/?P=M%20E%20700) Doctoral Dissertation.

Admission Requirements

For PhD Program, the Mechanical and Aerospace Engineering department asks for the following documents: Transcript, Three Recommendation Letters, Statement of Purpose, Resume, Writing Sample, and GRE. Also NMSU requires English Proficiency Tests such as TOEFL, IELTS, or Duolingo English Test for international students.

Ph.D. Program Transfer Credits

A student who has completed a Master of Science degree in M E, A E, or a closely related field may transfer up to 24 credits of graduate coursework, approved by the student's advisor, into a Ph.D. program of study.

Selection of Permanent Ph.D. Advisor

Newly admitted graduate students will be assigned a temporary advisor for the first semester. The student must select a permanent advisor before registering for the second semester. In selecting a permanent advisor, the student should arrange to meet with several members of the graduate faculty during the first six weeks of enrollment to discuss specific objectives. The student should use these meetings to become familiar with faculty research interests and research projects currently in progress. The faculty member must consent (in writing) to serve as the student's advisor.

Policies governing the Ph.D. written Qualifying Examination, the Ph.D. written and oral comprehensive examination, the student's Ph.D. committee, and the Ph.D. dissertation are contained in the department's Graduate Program website.

Additional Requirements

Ph.D. candidates in the College of Engineering, who have successfully completed their Ph.D. Qualifying Examination after January 1, 2018, must satisfy a publication requirement which requires two papers:

> Paper #1: An archival paper accepted or published in any journal listed in the source publication list for the Web of Science, or a refereed Journal or Conference Proceeding approved by the student's doctoral committee and the cognizant Department Head(s), before the Doctorate of Philosophy final examination. The candidate should be listed as the lead author in Paper #1.
>
> Paper #2: An additional archival paper submitted, accepted, or published in any journal listed in the source publication list for the Web of Science. Alternatively, one conference paper accepted or published in a national or international conference proceedings.

Experimental Psychology - Doctor of Philosophy

The Ph.D. in psychology is offered in the major areas of cognitive, engineering and social psychology. Ph.D. candidates are required to complete the following coursework and tasks:

Prefix	Title	Credits
Core Course: (corresponding to the student's area of study)		**3**
PSYC 5310	Engineering Psychology	
PSYC 5320	Cognition	
PSYC 5330	Social Psychology	
Quantitative/Computer Methods Sequence:		**9**
PSYC 5110	Quantitative Methods in Psychology I	
PSYC 5120	Quantitative Methods in Psychology II	
PSYC 5210	Computer Methodology	
Content Courses:		**9**
PSYC 5340	Learning and Memory	
PSYC 5350	Sensation and Perception	
PSYC 540	History and Systems of Psychology	
Experimental Methods:		**6**
PSYC 5220	Methods in Cognitive Psychology	
PSYC 5230	Methods in Social Psychology	
PSYC 5410	Foundations of College Teaching	
Comprehensive Examination: [1]		
Work related training requirement: [2]		
Final Oral Examination: [3]		
Dissertation:		**18+**
PSYC 7000	Doctoral Dissertation	

1 Pass written and oral components of the comprehensive exam

2 Complete a work-related training requirement (i.e. complete an internship of at least 10 weeks duration, or teach at least one 3-credit undergraduate course independently: pre-teaching requirements listed here (https://psychology.nmsu.edu/pages/subpages/ph-d-degree-requirements.html))

3 Pass a final oral examination that consists primarily of an evaluation of the dissertation and the candidate's defense of it, but may extend over the entire field of the candidate's study

Students are encouraged to register for one credit of PSYC 590 Research Seminar in Psychology each semester.

Students should also enroll in at least one credit of the appropriate supervised research course each semester (i.e., PSYC 6991 Doctoral Research, PSYC 698 Special Research Programs, or PSYC 7000 Doctoral Dissertation.

When offered, PSYC 5996 Special Topics may be considered content, quantitative methods, or experimental methods, depending on the specific course content.

Food Science - Doctor of Philosophy

Coursework for students with a Master of Science degree should complete 42 credits:

Prefix	Title	Credits
Requirements		
Area of Research Emphasis		
Students will take at least 15 credits from the following: [4]		*15*
FSTE 6997	Special Research Program	
FSTE 6991	Doctoral Research	
FSTE 5110	Food Microbiology	
FSTE 5120	Food Chemistry	
FSTE 5230	Food Processing Technologies	
FSTE 5250	Sensory Evaluation of Foods	
FSTE 5140	Food Analysis	
FSTE 5130	Food Preservation	
FSTE 5997	Special Research Programs	
Students are required to take at least 6 statistic credits from the following: [1]		*6*
AXED 5510	Research Methods	
AXED 5515	Data Collection and Analysis	
AEEC 5110	Introduction to Quantitative Methods	
Required Courses		*21*
FSTE 6910	Doctoral Seminar	
FSTE 7000	Doctoral Dissertation	
Total Credits		**42**

Coursework for students with a Bachelor of Science degree should complete 72 credits:

Prefix	Title	Credits
Requirements		
Statistics, Research Methodology, and Master Thesis Courses		*12*
Statistics Course [1]		3
Research Methodology Course [2]		3
FCSC 5999	Master's Thesis (at least 6 credits must be taken)	
Take at least 18 credits from the following: [3]		18
FSTE 5110	Food Microbiology	
FSTE 5120	Food Chemistry	
FSTE 4997	Special Problems	
FSTE 4996	Special Topics	
FSTE 5250	Sensory Evaluation of Foods	
FSTE 5140	Food Analysis	
Area of Research Emphasis		
Students will take at least 15 credits from the following: [4]		15
FSTE 6997	Special Research Program	
FSTE 6991	Doctoral Research	
FSTE 5110	Food Microbiology	
FSTE 5120	Food Chemistry	
FSTE 5230	Food Processing Technologies	
FSTE 5250	Sensory Evaluation of Foods	
FSTE 5140	Food Analysis	

FSTE 5130	Food Preservation	
FSTE 5997	Special Research Programs	
Students are required to take at least 6 statistic credits from the following: [1]		*6*
AXED 5510	Research Methods	
AXED 5515	Data Collection and Analysis	
AEEC 5110	Introduction to Quantitative Methods	
Required Courses		*21*
FSTE 6910	Doctoral Seminar	
FSTE 7000	Doctoral Dissertation	
Total Credits		**78**

1 Students select a statistics course with the help of their committee chair (major advisor). Alternative statistic courses can be taken besides AXED 5510 Research Methods, AXED 5515 Data Collection and Analysis, and AEEC 5110 Introduction to Quantitative Methods.

2 Students select a research methodology course with the help of their committee chair (major advisor).

3 Students must take a total of 30 credits to continue to the Area of Research Emphasis coursework requirement for the Ph.D.

4 Other courses may be used to satisfy the required credits as approved by the student's committee chair (major advisor).

Students will select classes with the help of their committee chair (major advisor) based on background and interests. Students are expected to complete their degree in three to four years but may be allowed up to seven years to complete the requirements. Candidates are paired with a committee chair from their department and then they select two other committee members, at least one must be from another department.

Ph.D. candidates must meet the following requirements:

- Completion of a minimum of 6 semesters with at least two occurring after the comprehensive exam.
- Maintain a minimum grade point average of 3.0
- Completion of the degree within seven years of admission.
- Enrollment in at least 1 credit per semester, or 9 credits if on a GA.
- Enrollment in FSTE 6910 Doctoral Seminar, Doctoral Seminar, each year for three semesters.
- Gain experience as a teaching assistant for at least two semesters.
- Present a public seminar during FSTE 6910 Doctoral Seminar to be submitted as an oral or poster presentation at a regional/national or international conference.
- Have at least one refereed journal as the first author accepted for publication
- Yearly completion of Student Progress Review
- Successful completion of three exams:

1. Qualifying exam – completed by the end of the first year. Content to be determined by the Committee.

2. Comprehensive exam – The comprehensive examination consists of two parts: written and oral presentation of the research proposal. Students must pass the examination within 24 months of passing the qualifying examination and may not take 7000-level courses until both parts of the comprehensive examination have been passed.

3. Final oral exam – taken after completing all degree requirements, but not earlier than one month before completing six registration units. During this time, students are enrolled in 7000-level courses. The program of study must include a minimum of 18 credits of doctoral dissertation. There is a minimum period of one year between the comprehensive examination and the final oral examination ("dissertation defense").

Satisfactory completion of a dissertation under the supervision of the Committee.

Students should consult the Graduate School website for specific information regarding the completion of the degree and submission of the dissertation

Geography - Doctor of Philosophy

Overview

The New Mexico Doctoral Program in Geography (NMDPG) is a collaborative Ph.D. program jointly administered by the Department of Geography & Environmental Studies at New Mexico State University (NMSU) and the Department of Geography & Environmental Studies at the University of New Mexico (UNM). This unique partnership provides students with access to faculty expertise, research resources, and coursework across both institutions, offering a truly interdisciplinary and flexible approach to advanced geographic study and enabling students to pursue a wide range of career paths in higher education, government, private industry, and nonprofit organizations.

A Research-Driven, Interdisciplinary Approach

The Ph.D. in Geography is a rigorous, research-intensive program that cultivates expertise across a wide range of geographic subfields, including geographic information science and technology, landscape ecology, biogeography, political ecology, environmental policy and planning, geohumanities, historical geography, and health geography. The program builds on the existing strengths and resources of both universities, with a curriculum designed to evolve in response to emerging human-environment challenges and shifting career demands within professional geography.

The program's primary regional foci include New Mexico and the broader Southwest, the Mexico-U.S. borderlands, and Latin America, providing students with opportunities to engage in place-based research that informs both academic and applied geographic inquiry.

Students develop proficiency in quantitative, qualitative, critical, and creative research methods, learning to integrate these approaches into a mixed-methods framework that deepens their ability to analyze complex geographic issues. The program provides a strong theoretical foundation, methodological expertise, and hands-on experience, preparing students to tackle urgent global and regional challenges through innovative geographic research.

Each student works with faculty advisors to develop a personalized course of study, combining core geographic theory, research design, and specialized coursework aligned with their research interests and professional aspirations.

Ph.D. students collaborate closely with faculty advisors and dissertation committees from both NMSU and UNM, benefiting from interdisciplinary mentorship and cross-campus resources. The curriculum balances theoretical training, applied research, and technical proficiency, equipping students to conduct original, high-impact geographic research that

advances knowledge in the discipline while informing policy, practice, and community-based solutions beyond academia.

Collaborative Learning & Distinctive Opportunities

Students reside at either NMSU (Las Cruces) or UNM (Albuquerque), selecting a home institution based on faculty alignment with their research interests. However, students engage with faculty, resources, and coursework on both campuses, either in person or remotely.

The program also offers:

- State-of-the-art research facilities, including GIS and remote sensing labs with UAS technology, field spectroscopy, and survey-grade GPS units.
- Access to distinctive landscapes for field-based research, spanning the Chihuahuan Desert, Rocky Mountains, U.S.-Mexico borderlands, and urban centers.
- A collaborative, interdisciplinary environment, drawing from strengths in geography, anthropology, environmental science, public health, and more.
- Opportunities for teaching and research assistantships, providing funding and professional experience.

Program Structure & Coursework

The Ph.D. program requires a minimum of 66 credits beyond the bachelor's degree, including:

- Core courses in geographic theory, application, and research design
- Elective courses tailored to students' research interests
- Comprehensive exams to assess competency across geographic subfields and expertise within students' areas of specialization
- An original and significant dissertation

Students develop an individualized program of study in consultation with their faculty advisor and dissertation committee, ensuring alignment with career goals and disciplinary expertise.

Who Should Apply?

Applicants from diverse academic backgrounds are encouraged to apply. While a master's degree in geography or a related field is preferred, students without prior geography coursework may be required to take preparatory courses. Prospective students should consult with the Graduate Program Director at their chosen home institution to discuss application requirements and pathways into the program.

Career Pathways

Graduates of the Ph.D. in Geography program pursue careers in:

- Higher education (teaching and research in universities and colleges)
- Government agencies and NGOs (e.g., environmental management, conservation, and climate policy)
- Private industry (e.g., data science, geospatial analysis, and environmental consulting)
- Public health and emergency management (e.g., epidemiology, disaster response, and risk assessment)

The program equips students with theoretical expertise, technical skills, and research experience needed to lead innovative geographic inquiry and apply their knowledge to real-world challenges.

Program Learning Outcomes

Upon completion of the Ph.D. in Geography, students will be able to:

1. Apply advanced geographic knowledge and skills, demonstrating a critical understanding of how their expertise connects to broader geographic and interdisciplinary fields.
2. Conduct all stages of an independent, original, and significant research project, including conceptualization, planning, implementation, management, and communication.
3. Integrate communication, teaching, and professional knowledge to excel in academic, governmental, and industry careers.

More Information

For details on course and credit requirements, major program milestones, and additional academic guidelines, please refer to the NMDPG Handbook available under the Requirements tab.

Course and Credit Requirements

For details on course and credit requirements, major program milestones, and additional academic guidelines, please refer to this NMDPG Handbook (https://geography.nmsu.edu/phd-program/nmdpg_handbook_ay2425_2024-08-09.pdf).

Overall Requirements

All students in the NMDPG must successfully complete required credits and milestones, as shown below. Each of the milestone requirements is addressed in separate sections of the NMDPG handbook.

Specific Coursework Requirements

The New Mexico Doctoral Program in Geography (NMDPG) is designed to train students in both basic and applied geographic research, with a topical focus on human-environment interactions.

This program is unique because it is a consortium between two universities. This means that policies of UNM'S Office of Graduate Studies and NMSU's Graduate School together establish the general requirements for the NMDPG, which also has program-specific requirements for all students.

There are three formal course requirements for all NMDPG students. These core courses are Geog 601, GEOG 602 and GEOG 603.

All students must complete:

- at least 48 credit hours of graduate coursework.
- at least 18 credit hours of graduate coursework after completion of the Master's degree.
- at least 24 credit hours of graduate coursework at the home university.
- at least 18 credit hours of graduate coursework in UNM or NMSU courses numbered 500 or above.
- at least 18 hours of dissertation credits, which are in addition to other coursework requirements (GEOG/GESP 699 at UNM, or GEOG/GESP 700 at NMSU).
- at least three hours of graduate credit in the semester in which the comprehensive examination is taken.

- at least one hour of graduate credit in the semester in which they complete degree requirements.

Health Equity Sciences - Doctor of Philosophy

Program Description

The doctoral program in Health Equity Sciences (HES) focuses on health disparities and equity from public health, population health, and community health perspectives. Underserved and marginalized groups experience health disparities attributable to economic, social, cultural, and environmental disadvantages at higher rates than other groups. The HES program provides advanced training to prepare graduates to become health equity researchers and to assume leadership positions in governmental (local, state, federal) and non-governmental agencies, public health and social justice organizations, health care organizations, and institutions of higher learning. Graduates will have the ability to conduct original research that addresses complex health problems, develop culturally competent community-based programs, and design and conduct program evaluations. They will be able to apply their expertise in research methodology, statistical analysis, and health communication in many settings, including rural, tribal, border, and other underserved communities. The focus of the program will be on research to address existing and emerging health disparities and health equity. Through a cooperative agreement with the University of New Mexico, students are provided with advanced comprehensive training to prepare them for positions of leadership in state, federal, and global governmental and non-governmental agencies, public health and social justice organizations, health care provider organizations, and institutions of higher learning.

Program Curriculum

NOTE: Students will participate in a mix of program-specific courses using the HES (i.e., Health Equity Sciences) prefix and graduate-level courses from across the NMSU campus and from UNM by cooperative arrangement/MOU. All HES courses will be at the doctoral level (6000 or 7000), including content offerings and research/dissertation hours; courses from across the NMSU campus will be graduate-level (5000 or higher).

Prefix	Title	Credits
Core Courses (24 Credits)		
HESC 6110	Doctoral Seminar in Health Equity	3
HESC 6120	Quantitative Research Methods in Health Equity Sciences	3
HESC 6130	Seminar in Behavioral and Social Change for the Promotion of Health Equity	3
HESC 6250	Design and Evaluation of Programs to Promote Health Equity	3
HESC 6210	Advanced Multiple Regression for Health Equity Sciences	3
HESC 6220	Regression-Based Structural Equation Modeling for Health Equity Sciences	3
Qualitative Research Elective (3 credits) Choose one from the following:		**3**
CEPY 6410	Introduction to Qualitative Research	
ANTH 579	Qualitative Data Analysis and Interpretation	
SOCI 5157	Seminar in Qualitative Research Methods	
COMM 5140	Qualitative Research Methods in Communication	
POLS 503	Qualitative Research Methods	
Statistics or Research Methods Elective (3 credits) Choose one from the following:		**3**
SOCI 5160	Seminar in Data Visualization	
A ST 505	Statistical Inference I	
A ST 506	Statistical Inference II	
A ST 511	Statistical Methods for Data Analytics	
A ST 515	Statistical Analysis with R	
GEOG 578	Fundamentals of GIS	
GEOG 601	Geographic Theory and Application	
PSYC 5110	Quantitative Methods in Psychology I	
Track (12 credits) Select any four courses within one chosen track: [1]		**12**
Socio-Cultural & Behavioral Sciences		
SOCI 5415	Seminar in Social Stratification	
PHLS 5610	Health Disparities: Determinants and Interventions	
PHLS 5630	International Health Problems	
PHLS 5640	Rural Health Issues	
PHLS 5660	U.S.-Mexico Border Health Issues	
PHLS 5680	Hispanic Health Issues	
PHLS 5650	Coping with Loss and Grief: A Cross-Cultural Perspective	
PHLS 5670	American Indian Health	
ANTH 531	Issues in Nutritional Anthropology	
POLS 587	Seminar in Religion and Politics	
ENGL 560	Proposal and Grant Writing	
Health Across the Lifespan		
PHLS 5710	Introduction to Gerontology	
PHLS 5720	Health Promotion for the Older Adult	
PHLS 5730	Adulthood and Aging	
ENGL 560	Proposal and Grant Writing

Kinesiology - Doctor of Philosophy

Coursework

The Ph.D. in Kinesiology requires a minimum of 36 credit hours of formal coursework (beyond a masters degree) and an expected 24 credit hours of research and dissertation work. Thus, the minimum expected credit hour accumulation is 60 credit hours.

At least 12 credit hours must come from graduate courses in the department of Kinesiology. NMSU's department of Kinesiology offers courses across a range of foundational knowledge areas including:

1. Relationships among physical activity, health, and quality of life
2. Scientific foundations for the study of physical activity and human movement
3. The social, cultural, and historical context of the study of physical activity
4. The practice of physical activity

A minimum of 12 credit hours must be taken in research methodologies, at least 3 credits of which must be in experimental statistics and at least 3 credits from a qualitative methods course(s). There are many options for these courses on the NMSU campus that will permit the student to meet this requirement.

The remaining 12 credit hours are taken at the direction of the student's advisor and committee and agreed upon at the time of the student's qualifying exam (see below).

Examinations

Students seeking the Doctor of Philosophy degree in Kinesiology must pass a (1) Qualifying Examination that must be completed before accumulating more than 24 credit hours towards their degree, a (2) Comprehensive Exam including written and oral elements that must be completed before beginning a final dissertation project, and a (3) Final Exam that includes the defense of their final dissertation study.

Dissertation

The candidate for the degree of Doctor in Philosophy in Kinesiology must complete a dissertation in a focused area of study. The student and their committee must agree upon the dissertation topic, and approval of the dissertation requires the consent of the plurality of the student's committee members. The student must complete a minimum of 18 dissertation credit hours.

Graduate courses currently offered in the department of Kinesiology

Prefix	Title	Credits
Kinesiology Course Requirements		**12**
SPMD 4540	Psychology of Coaching in Sport	
SPMD 4620	Nutrition and Metabolism of Sport	
SPMD 5350	Principles of Strength and Conditioning	
SPMD 5410	Biomechanics	
SPMD 5450	Exercise for Special Populations	
SPMD 5510	Psychology of Sport	
SPMD 5550	Skill Acquisition and Performance	
SPMD 5575	Advanced Motor Development	
SPMD 6310	The Social Construction of the Body

Mathematics - Doctor of Philosophy

Candidates for the Ph.D. degree in the Department of Mathematical Sciences must pass

- a qualifying examination,
- a basic comprehensive written examination,
- an advanced comprehensive examination with written and oral components, and
- a final oral doctoral thesis examination.

These are briefly described below. For more information, see the Graduate School requirements in this catalog.

Course Requirements

Prefix	Title	Credits
Core Requirements		
MATH 5450	Abstract Algebra II: Fields, Rings and Modules	3
MATH 5460	Measure and Integration	3
MATH 5463	Real Analysis	3
MATH 5465	Introduction to Functional Analysis	3

In addition to the core requirements, each student must complete one of the following two options.

Prefix	Title	Credits
Option 1		
Choose three course sequences from Group A, as described below.		
Option 2		
Choose two course sequences from Group B and one from Group A, as described below.		

Course Sequences

Group A

Prefix	Title	Credits
Algebra: Choose two of the following.		
MATH 5453	Module Theory and Homological Algebra	
MATH 5455	Introduction to Commutative Algebra and Algebraic Geometry	
MATH 5458	Topics in Algebra	
Foundations: Choose two of the following.		
MATH 5430	Mathematical Structures in Logic	
MATH 5435	Universal Algebra and Model Theory	
MATH 5438	Topics in Foundations	
Topology: Choose two of the following.		
MATH 5420	Topology I	
MATH 5425	Topology II	
MATH 5428	Topics in Topology	

Group B

Prefix	Title	Credits
Differential Equations: Choose two of the following.		
MATH 5440	Partial Differential Equations I	
MATH 5440	Partial Differential Equations I	
MATH 5468	Topics in Analysis	
Probability: Choose two from the following.		
STAT 5310	Foundations of Probability	
STAT 5320	Advanced Topics in Stochastic Processes	
STAT 5348	Topics in Probability and Statistics	
Statistics: Choose two of the following.		

STAT 5330	Continuous Multivariate Analysis
STAT 5335	Linear Models
STAT 5340	Advanced Theory of Statistics I
STAT 5345	Advanced Theory of Statistics II
STAT 5348	Topics in Probability and Statistics

Additional Course Requirements

A full time graduate student is required to register each semester for at least two Math/Stat graduate courses. With the exception of the final semester, of these two, only one may be MATH 6991 Doctoral Research or MATH 7000 Doctoral Dissertation. Moreover, these two courses **must not** include:

Prefix	Title	Credits
MATH 5210	Complex Variables	3
MATH 5220	Fourier Series and Boundary Value Problems	3
MATH 5997	Directed Reading	1-6
MATH 5120	History and Theories of Mathematics Education	3
MATH 5130	Algebra with Connections	3
MATH 5140	From Number to Algebra	3
MATH 5150	Data Analysis with Applications	3
MATH 5160	From Measurement to Geometry	3
MATH 5170	Using Number Throughout the Curriculum	3
MATH 5180	Geometry with Connections	3
MATH 5999	Master's Thesis	1-15

Qualifying Examination

Every student admitted to the Ph.D. program must pass a written qualifying examination. Students who complete their mathematics Master's degree at NMSU may request that the Master's written examination also fulfill the Ph.D. qualifying examination requirement. In all other cases, the student takes a written Ph.D. qualifying exam. This exam is identical to the Master's written exam (based on the courses 5350/5360) and is administered and graded at the same time, but a higher passing score is required than for a Master's student. Ph.D. candidates need to pass the exam within their first year.

Basic Comprehensive Examinations

Every Ph.D. student must pass a Basic Comprehensive Exam, either in Algebra or in Analysis. The Algebra exam is based on the courses MATH 5340 Abstract Algebra I: Groups and Rings and MATH 5450 Abstract Algebra II: Fields, Rings and Modules and the Analysis exam is based on the courses MATH 5365 Introduction to Real Analysis II and MATH 5460 Measure and Integration.

These exams are offered every August and January. A student choosing to take the exam in Algebra must pass the exam within fourteen months of completing Math 581; similarly, a student taking the exam in Analysis must pass the exam within fourteen months of completing MATH 5460. Students failing to pass the exams within this period of time may be removed from the program. Students will normally not be given more than two attempts at any one exam.

Advanced Comprehensive Examinations

Candidates for the Ph.D. must pass an advanced comprehensive examination in their chosen research area. The examination has a written and an oral component. The written exam, which is written and administered by the student's committee, is based on two of the student's courses, normally among those listed in Options 1-2, chosen by the student in consultation with his/her committee and approved by the Graduate Studies Committee. Full-time students should complete the written component of the Advanced Comprehensive Exam after passing the Basic Comprehensive Exam and in the first two years. Those who have not made substantial progress towards completion of their written exams at the start of the fifth semester may be removed from the program. Students who have not completed the written exams by the start of the sixth semester will normally have any departmental funding revoked. The student must take the oral part of the exam at the end of the semester after completing the advanced written comprehensive exam. For the oral exam, the student should present a proposed direction for thesis work.

Final Oral Exam

This is an exam over the student's thesis. It is administered by the student's thesis committee.

Molecular Biology - Doctor of Philosophy

Prefix	Title	Credits
Phase I Core Courses		
MOLB 520	Molecular Cell Biology	3
MOLB 542	Biochemistry I	3
MOLB 545	Molecular and Biochemical Genetics	3
Molecular Biology Tier II Courses		
Select at least 9 credits from the following:		9
AGRO 516	Molecular Analysis of Complex Traits	
ANSC 602	Advanced Reproductive Physiology (fo)	
ANSC 621	Metabolic Functions and Dysfunctions (fe)	
GENE 486	Genes and Genomes	
BCHE 546	Biochemistry II	
BCHE 647	Physical Biochemistry	
BIOL 451	Physiology of Microorganisms	
BIOL 470	Developmental Biology	
BIOL 474	Immunology	
BIOL 475	Virology	
BIOL 477	Applied and Environmental Microbiology	
BIOL 478	Molecular Biology of Microorganisms	
BIOL 490	Neurobiology	
BIOL 541	Professional Development Seminar	
BIOL 550	Special Topics	
BIOL 577	Advanced Topics in Environmental Microbiology	
BIOL 590	Neuroscience	
BIOL 698	Selected Topics	
EPWS 486	Plant Virology	
MOLB 546	Biochemistry II	
MOLB 650	Advanced Topics in Molecular Biology	
TOX 461	Toxicology I	
Other Course Requirements		
A ST 505	Statistical Inference I (or equivalent course)	4
BIOL 540	Science and Ethics	1-3
BIOL 490	Neurobiology	3
MOLB 590	Discussions in Molecular Biology	1

MOLB 597	Laboratory Rotations/Research Discussions	1-3
Dissertation		18
MOLB 700	Doctoral Dissertation Research	
Total Credits		**46-50**

[1] PhD candidates must enroll for 18 credits MOLB 700 Doctoral Dissertation Research. May register for additional credits to maintain full-time status.

The Molecular Biology program also offers formal minors in molecular biology or bioinformatics.

Nursing Practice (Nurse Anesthesiology) - Doctor of Nursing Practice

The Doctor of Nursing Practice (DNP) degree concentration in Nurse Anesthesiology focuses on rural health and health disparities. Graduates will be qualified to take the national certification exam administered by the National Boards of Certification and Recertification of Nurse Anesthetists to become a certified registered nurse anesthetist (CRNA). In addition to the DNP core courses and nurse anesthesiology didactic course, Residents complete a minimum of 2400 supervised clinical contact hours completed in their clinical specialty and related areas. Courses for this degree are delivered through a combination of in-person didactic and laboratory experiences at the Las Cruces campus, and asynchronous and synchronous online learning. The majority of clinical training is completed at hospitals and surgical centers in the Las Cruces/El Paso and Albuquerque/Santa Fe regions. Residents complete a required rural New Mexico clinical rotation.

For application information, visit the **Nurse Anesthesiology webpage (https://schoolofnursing.nmsu.edu/graduate-program/doctor-of-nursing-practice-dnp.html)** or contact the Nursing Graduate Advisor for more information about application and admission requirements at (575) 646-3688.

Physics - Doctor of Philosophy

For the Ph.D. degree, students must also pass the doctoral comprehensive examination, carry out original research, complete a dissertation, and pass a final oral examination. They must also pass or transfer at least 36 credits in formal courses numbered above 500 in physics, including 24 credits of core graduate courses, and complete at least 6 credits of formal courses numbered above 600. The total number of credits, including formal and informal course credits and a minimum of 18 dissertation credits, must be at least 72. Financial support is available to graduate students in physics through teaching and research assistantships and fellowships. Inquiries about these opportunities should be directed to the graduate program director.

Plant and Environmental Science - Doctor of Philosophy

This degree is designed to provide students with a comprehensive knowledge of agronomy, horticulture, environmental science, or soil science, and training in methods of research affiliated with these disciplines. Emphases in agronomy and horticulture include sustainable crop production, plant breeding and genetics (alfalfa, chile, cotton, onion, peanut), forestry, turf grass management, plant-pest/disease/weed interactions, soil-water-plant relations, plant growth/development/physiology. Emphasis in environmental and soil science include environmental quality and ecosystem services, bioremediation, recycling of organic wastes and wastewater, water-use efficiency, soil-plant relations, soil-geomorphology and desert ecology, and fertility, chemistry, physics, and microbiology of soils. Students will be well-prepared to succeed as lead scientists in commercial companies, educational institutions, governmental agencies, and private production enterprises. Candidates for this degree must successfully conduct original publishable research in one of the above areas. They must also complete a minimum of 30 graduate credits beyond the Master's Degree, or 60 credits beyond the Bachelor of Science degree, based on a program of study approved by the student's graduate committee.

Candidates for a Ph.D. degree in Plant and Environmental Sciences are expected to demonstrate (via course work and independent study) a thorough understanding and proficiency in their chosen major, and if applicable, a minor area. Courses numbered 450-499 are designed for senior undergraduates and graduate students; 500-599 are for graduate

students working on a master's or doctoral degree; 6000-7000 are principally for students working on a doctoral degree. Qualifications for admission will be reviewed by the departmental graduate faculty.

Minimum Grade Point Average and Credit Hour Requirements: Your Doctorate degree requires a minimum of 30 completed degree hours beyond the Master's degree, or 60 degree hours beyond the Bachelor's degree, and a minimum GPA of 3.00 in all course work.

Degree residency requirement: 24 credits must be completed at NMSU.

Departmental Requirements: Selection of courses should be based on consultation with the student's graduate committee.

- Complete 2 credits of PLEN Seminar coursework: one credit each of AGRO 590 Graduate Seminar/HORT 590 Graduate Seminar/SOIL 590 Graduate Seminar and PLEN 6910 Doctoral Seminar.
- Complete 9 credits of course work numbered above 600: **exclusive** of PLEN 6991 Doctoral Research and PLEN 7000 Doctoral Dissertation credit.
- Complete at least 18 credits in PLEN 7000 Doctoral Dissertation after passing the comprehensive exam. A student may initially enroll in PLEN 7000 Doctoral Dissertation credits during the same semester that they take their comprehensive exam. However, this option is not recommended because if the student does not pass the exam, the 700-level credits will not count. Consequently, enrollment status, assistantship eligibility, and resident tuition rate eligibility could be jeopardized.
- Complete sufficient credits numbered 450 or above to bring total graduate credits to a minimum of 30 beyond the Master's degree, or a minimum of 60 credits beyond the Bachelor's degree.
- Complete a Qualifying Examination during the first (recommended) or second semester of study.
- Complete a written and oral Comprehensive Examination of the student's field of study.
- Complete a written Doctoral Dissertation.
- Complete a final oral defense of the Doctoral Dissertation.
- Complete one of the following requirements, as approved by the doctoral committee:
  - A thorough knowledge of a language other than English
  - A reading ability in two foreign languages
  - Reading ability in one foreign language and proficiency with a research tool
  - Reading ability in one foreign language and one semester of supervised teaching experience
  - Proficiency with a research tool and one semester of supervised teaching
  - Two semesters of supervised teaching

Range Science - Doctor of Philosophy

Admission Requirements

A GPA of 3.0 or higher is required for admission. Prerequisite for admission as a regular graduate student in the department is the completion of a curriculum substantially equivalent to that required of undergraduate students. Therefore, deficiency courses may be required after admission to the program, as determined by the admissions committee and the student's graduate committee and advisor.

Course Requirements

A minimum of 30 credits of graduate work plus 18 credits of dissertation (RGSC 700) are required to graduate. The Qualifying Exam will take place during the first semester of graduate work. Its purpose is to evaluate the student's strengths and weaknesses, determine deficiency courses, and discuss a possible program of study (coursework). The "Program of Study and Committee for Doctoral Students" form, listing the graduate committee and courses to be taken, should be filed with the Graduate School after completion of 12 credits and after the qualifying exam, and before registering for additional courses. The Comprehensive Exam is intended to test the knowledge of the major and minor fields of study. The student will be admitted to the exam after fulfilling the language/research tool requirement, after completion of adequate coursework (as determined by the department and the Graduate School), and when considered by the student's graduate committee to be adequately prepared. The exam is part written and part oral. The student is formally considered a candidate for the Ph.D. only after the successful completion of the comprehensive exam, the recommendation of the committee, and the approval of the graduate dean.

The research project must be approved by the student's graduate committee. The dissertation is expected to demonstrate the student's ability in independent investigation and to be a contribution to human knowledge. It shall display a mastery of the literature, present an organized, coherent development of ideas with a clear exposition of results, and provide a critical discussion of the student's conclusions. Every effort should be made to publish the dissertation as scientific journal articles. Final Exam is concerned primarily with the research work of the student as embodied in the dissertation, but it may also extend over the entire field of study. It is entirely oral. The final exam will be advertised to the public one week prior to the exam.

Rhetoric and Professional Communication - Doctor of Philosophy

An MA is required for admission to the PhD program. Students in the doctoral program will develop individualized plans of study in consultation with advisors. Students are required to take

- 60 hours of graduate-level coursework including the doctoral proseminar in the first semester;
- courses in research methods;
- core courses in composition, professional and technical communication, and rhetoric;
- additional coursework in an area of specialization determined in consultation with an advisor;
- an internship; and
- a dissertation.

The Ph.D. also requires a qualifying portfolio, a comprehensive examination and an oral examination. The dissertation must be completed and approved within 5 years after the comprehensive exam. Consult the department for additional instructions regarding the internship, qualifying comprehensive examinations, portfolio and dissertation.

ENGL 518	History of Rhetoric	
ENGL 519	Graduate Study in Modern Rhetorical Theory	
ENGL 668	Rhetoric and Cultural Studies	
ENGL 690	Doctoral Seminar in Rhetoric	
Specialized Courses		**21**
Select 21 credits in specialized area determined in consultation with an advisor. [2]		
Transfer Credits (18 credits)		**0-18**
Total Credits		**84-126**

[1] Graduate assistants must take 3 hours of ENGL 571 Composition Pedagogy and Practicum, during their first semester of teaching.

[2] Students define their specialized area, a coherent set of related courses drawn from both inside and outside the Department of English, in consultation with their doctoral committee. Possible specializations include Border Rhetorics and Cultures; Writing Program Administration/Writing Center Administration; Assessment; Pedagogy; Literacy Studies; Identity and Political and Social Rhetoric; New Media Rhetoric and Design; Intercultural Rhetorics; Writing Across the Curriculum; Workplace Communication; and the Rhetoric of Science. Up to 6 hours may be taken outside of English.

Transfer Courses (18 credits)

In consultation with an advisor and the Doctoral Committee, courses taken at the Master's level can be used to waive specific area requirements in the PhD, but this will not reduce the minimum number of credits required.

Financial Support

Students are eligible for teaching assistantships and a variety of positions that involve writing around campus and the community. Because many students work full time, many courses are offered in the late afternoon and evening to accommodate various schedules.

Application Information

Please refer to the online application process described on the NMSU Admissions website for specific instructions for each program.

School Psychology - Doctor of Philosophy

The School Psychology Program at New Mexico State University is housed in and administered through the department of Counseling and Educational Psychology (CEP). Our program is guided by the standards of the American Psychological Association. The School Psychology PhD program at NMSU is Accredited, on Contingency by the American Psychological Association (APA) effective December 4, 2024. The expiration date of contingency status is December 4, 2029. We will apply for full accreditation at that time.

**Questions related to the program's accredited status should be directed to the Commission on Accreditation:*

Office of Program Consultation and Accreditation

American Psychological Association

750 1st Street, NE, Washington, DC 20002

Phone: (202) 336-5979 / E-mail: apaaccred@apa.org

- Student Admissions, Outcomes, and Other Data (https://cep.nmsu.edu/academic-programs/2025_c-26d-template-final.pdf)

The School Psychology Program at New Mexico State University is fully accredited from the National Association of School Psychologists (NASP).

- Program Annual Report and Student Outcomes Data (https://apps.nasponline.org/standards-and-certification/graduate-education/school-psychology-program-information/?id=941429)

Mission

The mission of the school psychology doctoral program is to prepare school psychologists as scientists, practitioners and advocates for mental health and social justice in health service psychology settings, including public schools. The program addresses state and national shortages of personnel who are fully credentialed to serve the needs of children with disabilities. The primary goal of the school psychology program is to prepare scholars to become problem-solvers with the essential entry-level competencies to serve in the schools and agencies that serve school age populations. The program develops 3 major components: 1) *Knowledge of psychological and educational foundations, 2) skills in data-based decision-making, assessment, consultation, intervention and research, and 3) the capacity to apply knowledge and skills to promote*

mental health and development and prevent school failure and other disabling conditions. Specifically, the program accomplishes the following goals.

1. Prepare and graduate highly qualified school psychologists to meet the academic and psychological needs of infants, toddlers, children, youth and their families from diverse backgrounds (i.e., high need children with disabilities).
2. Increase the number of personnel who demonstrate the competencies needed to provide high-quality instruction, evidence-based interventions and services for children with disabilities.
3. Retain scholars in a high quality-preparation program to increase the numbers of school psychologists including scholars from bilingual and traditionally underrepresented backgrounds.
4. Provide the workforce needed to meet state licensure for Level 3 school psychologists

For more information on program application requirements and process, see School Psychology, Ph.D. program website: https://cep.nmsu.edu/academic-programs/school-psychology-phd.html

Curriculum

Preparation occurs from a developmental sequence of courses that follow scientifically based research and empirically validated strategies. The school psychology program at NMSU adheres to the scientist-practitioner model. This integrated approach to scholarship and practice promotes development of interlocking skills fostering a career-long process of psychological investigation, assessment, and intervention. Throughout the curriculum, the importance of knowledge and experience with a wide range of individual differences including, but not limited to ethnicity, gender, disability, age, culture, sexual orientation, religion, and race are emphasized. Ethical and legal issues, which guide service delivery, are also stressed throughout the curriculum. The American Psychological Association (APA) and National Association of School Psychologists (NASP) Standards and competencies provide the foundation for the program's conceptual framework. Candidates will complete 81 credits of coursework, at least 450 clock-hours of practicum (9 total credits) and an 1500 clock-hour doctoral internship. Of the 1500 clock-hour internship, 600 hours will be expected to be in a school setting.

Program of Study

Prefix	Title	Credits
CEPY 5235	Counseling Theory and Techniques for School Psychologists	3

Transborder and Global Human Dynamics - Doctor of Philosophy

The Ph.D. program in Transborder and Global Human Dynamics is designed to provide doctoral students with a rigorous program of cultural, anthropological, political, historical, artistic, literary, and linguistic subject matter in the social sciences and humanities. At the heart of the endeavor is a program that fosters the study of the cultural pluralism and social, economic, political, linguistic, and creative interactions that emerge from and shape the diverse practices, interpretations, and reproduction of transnational borders. Such a program is ideally suited to forge new interpretations, solutions, and understandings of relevant issues for scholars and students living and studying in the US-Mexico transborder region, with implications not only for our border region, but also for other border communities around the world.

The program is based on the Cambridge-Oxford collaborative research and instruction model. The program curriculum closely follows the NMSU Graduate School's requirements and timelines for admission, doctoral committee formation, and comprehensive and qualifying examinations. The program has limited residency requirements, since doctoral students will perform research in the field, but come together to participate in colloquia at NMSU. The program centers on a set of common courses and colloquia exploring theory, methods, and mixed methods of quantitative and qualitative analysis, and six interdisciplinary research concentrations. Credits for fieldwork, archival work, and community engagement may involve transborder internships and experiences at universities, policy institutes, archives, and think tanks supervised by the student's committee.

Interdisciplinary Focus Areas:

- Cultural and linguistic translation, interpretation, literature, and heritage
- Refugees, asylum-seekers and migration

- Transnational public policy and human rights
- Environmental justice, landscape, archaeology, and heritage management
- Food security, water and energy security, human health, and sustainability
- Power, inequality, and racial justice

Sponsoring departments include Anthropology, Political Science, Public Law and Administration (formerly Government), and Languages and Linguistics. Related, affiliated, and sponsoring departments and programs also include English, Gender and Sexuality Studies, Geography and Environmental Studies, History, Borderlands and Ethnic Studies (BEST), Philosophy, Criminal Justice, Sociology, Latin American Programs, Center for Latin American and Border Studies, the American Indian Program, and NMSU Library and Archives.

Prefix	Title	Credits
Core Requirements		*6*
TBGD 5110	Introduction to Transborder and Global Human Dynamics (co-taught modules)	
TBGD 6991	Research Design in Transborder and Global Human Dynamics (Individualized study with committee)	
Methods: Select Two Courses [2]		*6*
ANTH 520	Ethnographic Field Methods	
ANTH 522	Archaeological Field School	
BEST 5110	Decolonial Research I: Overview [5]	
BEST 5125	Decolonial Research II: Methodologies [5]	
GEOG 602	Integrative Research Design	
GEOG 584	Qualitative, Critical, and Creative Methodologies	
GNDR 555	Advanced Feminist Research Methodologies	
HIST 590	Reading Seminar: Borders, Boundaries and Frontiers	
HIST 594	Public History Seminar	
HIST 598	Craft of History: Historical Theories, Methods, and Criticism (f)	
POLS 502	Research Methods in Government	
POLS 503	Qualitative Research Methods	
SOCI 5153	Seminar in Sociological Research	
SOCI 5157	Seminar in Qualitative Research Methods	
SPAN 500	Methods of Research and Literary Criticism	
SPAN 580	Research Methodology in Spanish Linguistics	
SPAN 595	Advanced Topics in Applied Spanish Linguistics	
Analysis: select two courses (with comittee)		*6*
ANTH 512	Quantitative Analytical Methods in Anthropology	
ANTH 579	Qualitative Data Analysis and Interpretation	
GEOG 578	Fundamentals of GIS	
GEOG 585	Spatial Analysis and Modeling	
POLS 544	Public Policy Analysis	
SOCI 5163	Issues in Advanced Quantitative Analysis	
SPAN 590	Advanced Special Topics (La Nueva Frontera: Critical Analysis of Border Theory & Cultural Identities)	
SPAN 597	Advanced Strategies for Teaching Spanish for Heritage/Native Speakers	
Field work and data collection: Select 6 credits in consultation with committee)		*6*
TBGD 6998	Fieldwork and Community Engagement in Transborder and Global Human Dynamics [3]	
Focus Areas: Select 12 credits each from at least two areas [4]		**24**
Cultural and linguistic translation, interpretation, literature and heritage		
ENGL 526	Special Topics in Critical Theory (with appropriate subtitle)	
ENGL 536	The Borderlands Writing Project	
ENGL 558	Latino/a Literature and Culture	
ENGL 589	Cultural Studies: Literature and Theory (Borderlands Representations)	
ENGL 649	Graduate Study in Writing (Subtitle: Transborder Rhetoric & Professional Communication)	
FREN 649	Readings in Transborder and Global Human Dynamics	
GNDR 508	Advanced Feminist Food Studies	
GNDR/ENGL 582	Gender and Popular Culture	
HIST 511	Making the American West	
SPAN 521	Advanced Culture and Literature of New Mexico	
SPAN 523	Colonial Legacy: Representations in Chican@ Literature & Culture	
SPAN 550	Advanced Chicana and Chicano Studies	
SPAN 551	Advanced Hispanic Cultures	
SPAN 558	Bilinguismo	
Refugess, asylum seekers, and migration		
CJUS 529	Advanced Immigration & Justice	
GNDR 511	Advanced Gender and Migration	
GNDR 554	Advanced Issues in Women Crossing Borders	
POLS 563	Issues in International Relations	
POLS 578	Seminar in the U.S.-Mexican Border	
POLS 596	International Law	
SOCI 5430	Seminar in International Migration	
SPAN 550	Advanced Chicana and Chicano Studies	
Transnational Public Policy and Human Rights		
GNDR 501	Advanced Women & Immigration	
GNDR 502	Advanced Transnational Feminisms	
GNDR 506	Advanced Women and Human Rights	
HIST 590	Reading Seminar: Borders, Boundaries and Frontiers	
PHIL 532	Advance Studies in Ethics and Global Poverty	
POLS 536	Public Policy and Indigenous Communities	
POLS 579	Seminar in Mexican Politics	
SOCI 5440	Seminar in Sociological Perspectives on the U.S.-Mexico Border	
SPAN 542	Adv. Formation of Hispanic National Identities	
Environmental justice, landscape, archaeology, and heritage management		
ANTH 516	Advanced Archaeology of Ancient Southwest	
ANTH 518	Advanced Historical Archaeology	
ANTH 540	Cultural Resource Management	
ANTH 545	Advanced Museology	
GEOG 555	Southwest Environments	
GEOG 598	Special Topics (Geohumanities)	
HIST 583	Advanced Historic Preservation	
HIST 586	Interpreting Historic Places for the Public	
Food security, water security, human health, and sustainability		
ANTH 586	Advanced Community Engagement and Service Learning	

ANTH 546	Advanced Contemporary Medical Anthropology	
ANTH 538	Plants, Culture, and Sustainable Development	
ANTH 535	Adv. Human Health and Biological Variation	
POLS 537	Issues in Public Policy (Subtitle: Environmental & Energy Policy)	
Power, inequality, and racial justice		
BEST 5105	Foundations in Borderlands & Ethnic Studies [5]	
BEST 5120	Theories in Borderlands and Ethnic Studies [5]	
BEST 5999	Capstone in Borderlands and Ethnic Studies [5]	
CJUS 514	Advanced Race, Crime, and Justice	
CJUS 528	Advanced Mexican-Americans and Issues of Social Justice	
GNDR 571	Advanced Seminar in Feminist and Queer Theories	
POLS 536	Public Policy and Indigenous Communities	
SOCI 5320	Seminar in Social Movements and Activism	
SOCI 5410	Seminar in Race and Ethnic Relations	
SOCI 5420	Seminar in Sociology of Latinos/as in the United States	
SOCI 5415	Seminar in Social Stratification	
SPAN 522	Adv. Cultural Production of Hispanic Revolutions and Wars	
Dissertation (18 credits)		*18*
TBGD 7000	Dissertation	
Total Credits		**66**

1. Student must satisfy all other requirements for the PhD as laid out in the Academic Regulations (https://catalogs.nmsu.edu/nmsu/regulations-policies/#academicprogramsofstudytext) section of the NMSU catalog
2. Two separate methods courses are recommended, if a student elects to take GEOG 578 Fundamentals of GIS for 6 credits they should consult with their advisor first.
3. TBGD 6998 Fieldwork and Community Engagement in Transborder and Global Human Dynamics may be substituted by field work, archival work, community consultation, or internship under an affiliated prefix, numbered 500 or above, approved by the student's committee
4. Courses listed are representative for each focus area. Other courses may be used to satisfy a focus area as approved by the student's committee.
5. This course supports the Borderlands and Ethnic Studies graduate certificate

This roadmap assumes prospective students have entered the PhD program with 12-30 credits from a completed Master's program (Years 1 and 2) that may be used to satisfy different requirements, and that graduate students pursue the degree full time, taking 9 credit hours per semester. Each student will work out a plan of study with their committee during the first semester in the program. In all cases, students will complete 54 credits, 9 per semester in each of Fall and Spring of Years 3, 4 and 5.

First Year		**Credits**
Master's degree credit transfer courses [1]		12-30
Between 12 and 30 credits that meet the goals and requirements of this Ph.D. Program, contingent on approval by the program committee		
	Credits	**12-30**
Second Year		
Master's degree credit transfer courses [1]		
	Credits	**0**
Third Year		
Fall		
TBGD 5110	Introduction to Transborder and Global Human Dynamics	3
Methods Course [2]		3
Choose one from the following:		3
Analysis Course [3]		
Focus Area Course [4]		
Required Benchmarks [5]		
	Credits	**9**
Spring		
TBGD 6991	Research Design in Transborder and Global Human Dynamics	3
Methods Course [2]		3
Choose one from the following:		3
Analysis Course [3]		
Focus Area Course [4]		
Required Benchmarks [6]		
	Credits	**9**
Fourth Year		
Fall		
TBGD 6998	Fieldwork and Community Engagement in Transborder and Global Human Dynamics	3
Focus Area Course [4]		3
Focus Area Course [4]		3
Spring		
TBGD 6998	Fieldwork and Community Engagement in Transborder and Global Human Dynamics	3
Focus Area Course [4]		3
Focus Area Course [4]		3
	Credits	**18**
Fifth Year		
Fall and Spring		
TBGD 7000	Dissertation (9 credit per semester)	18
Required Benchmarks		
	Credits	**18**
	Total Credits	**66-84**

1. The assumption for Year 1 and Year 2 of the road map is that students may transfer between 12 and 30 credits, depending on their fit with the goals and requirements of this program. It is not required that students transfer 30 credits (however, they must have completed a Masters degree to be eligible for admission), and if they do not have at least 12 relevant graduate credits to transfer, the first two years will be used to complete those credit to reach the required total of 66, taking account of the fact that they must take 54 credits in Years 3, 4 and 5. The eligibility of transfer credits will be determined by their committee.
2. **Methods Courses:** (students must take two different ones. Refer to list under course requirements)
3. **Analysis Courses:** students must take two different ones. Refer to list under course requirements.
4. **Focus Areas:** Select at least 12 credits (24 credits total) from at least two areas. Courses for each focus area are listed under course requirements.
5. **Required Benchmarks Year 3**
   - Form graduate committee, select two area concentrations, and curriculum plan in the first semester.

- Pass qualifying doctoral examination scheduled by the student's graduate committee chair and the Transborder and Global Human Dynamics Executive Committee by the end of Year 3.
  - For students who enter with a master's degree or equivalent from another university, or another department, the qualifying examination should be taken before the end of the second semester of Year 3 of graduate work.
  - For students who earn their master's degree at New Mexico State University and will continue in the Transborder and Global Human Dynamics doctoral program, the department may allow the master's final examination to serve as the doctoral qualifying examination or may require a separate examination.

[6] **Required Benchmarks Year 4:**

1. Comprehensive Examination
   - Completion of adequate course work, to the satisfaction of the graduate committee, the Transborder and Global Human Dynamics Executive Committee, and the Graduate School
   - The graduate committee determines the student is adequately prepared for the examination
   - Successful completion of language requirement.

2. Advancement to Candidacy: For advancement to candidacy the following criteria must be met
   - Successful completion of the comprehensive examination
   - Recommendation of the graduate committee
   - Approval of the Dean of the Graduate School Upon receiving advancement to candidacy, students must establish residency and follow the Dissertation Registration Requirements

[7] **Required Benchmarks Year 5:**

- Completion and Submission of Dissertation
- Final Oral Examination (Defense)

Water Science and Management - Doctor of Philosophy

This degree is designed to give students a thorough and comprehensive knowledge of water science and hydrology and training in methods of research. The Ph.D. degree can be earned in about 33-35 credits of formal course work beyond the Masters Degree, plus 18 additional dissertation research credits, for a minimum total of 75 credits beyond the BS degree, as detailed below. This degree has five available concentrations.

Prefix	Title	Credits
Core Courses		
AEEC 5350	Economics of Water Resource Management and Policy	3
RGSC 518	Watershed Methods and Management	3
or SOIL 456	Irrigation and Drainage	
C E 557	Water Resources Development	3
Select one from the following:		3-4
GEOG 578	Fundamentals of GIS	
GEOG 588	GIS and Water Resources	
Select one from the following: [1]		3-4
A ST 505	Statistical Inference I	
C E 582	Statistical Hydrology	
GEOG 585	Spatial Analysis and Modeling	
Seminar Credits OR Select one from the following: [2]		2
WSAM 605	Arid Land Water Resources	
WSAM 610	Water and Sustainable Economic Development	
GEOG 501	Introduction to Geographic Theory and Application	
Electives/transfer credits chosen in consultation with the student's committee (enough to meet the required minimum of 75 credits)		**40**
Dissertation		**18**
WSAM 700	Doctoral Dissertation	
Total Credits		**75-77**

[1] With the consent of the instructor and the approval of the student's advisor, C E 582 Statistical Hydrology or GEOG 585 Spatial Analysis and Modeling may be used as a substitute.

[2] Seminar may be substituted by WSAM 605 Arid Land Water Resources, or WSAM 610 Water and Sustainable Economic Development, or GEOG 501 Introduction to Geographic Theory and Application.

Students are expected to have a basic foundation in Geographic Information System (GIS) within a classroom, research experience, or professional experience. Students without this background are required to take an appropriate GIS class as advised by their advisor such as: GEOG 578 Fundamentals of GIS, or FWCE 535 Special Topics.

Water Science and Management (Agricultural Water Resources) - Doctor of Philosophy

This degree is designed to give students a thorough and comprehensive knowledge of water science and hydrology and training in methods of research. The Ph.D. degree can be earned in about 33-35 credits of formal course work beyond the Masters Degree, plus 18 additional dissertation research credits, for a minimum total of 75 credits beyond the BS degree, as detailed below. This degree has five available concentrations.

Prefix	Title	Credits
Core Courses		
AEEC 5350	Economics of Water Resource Management and Policy	3
RGSC 518	Watershed Methods and Management	3
or SOIL 456	Irrigation and Drainage	
C E 557	Water Resources Development	3
Select one from the following:		3-4
GEOG 578	Fundamentals of GIS	
GEOG 588	GIS and Water Resources	
Select one from the following: [1]		3-4
A ST 505	Statistical Inference I	
C E 582	Statistical Hydrology	
GEOG 585	Spatial Analysis and Modeling	
Seminar Credits OR Select one from the following: [2]		2-3
WSAM 605	Arid Land Water Resources	
WSAM 610	Water and Sustainable Economic Development	
GEOG 501	Introduction to Geographic Theory and Application	
Concentration Electives		
Students must work with their committee to select 12 credits of elective courses that would meet the Agricultural Water Resources concentration		12

Electives chosen in consultation with the student's committee (enough to meet the required minimum of 75 credits)		**28**
Dissertation		**18**
WSAM 700	Doctoral Dissertation	
Total Credits		**75-78**

1 With the consent of the instructor and the approval of the student's advisor, C E 582 Statistical Hydrology or GEOG 585 Spatial Analysis and Modeling may be used as a substitute.

2 Seminar may be substituted by WSAM 605 Arid Land Water Resources, or WSAM 610 Water and Sustainable Economic Development, or GEOG 501 Introduction to Geographic Theory and Application.

Students are expected to have a basic foundation in Geographic Information System (GIS) within a classroom, research experience, or professional experience. Students without this background are required to take an appropriate GIS class as advised by their advisor such as: GEOG 578 Fundamentals of GIS, or FWCE 535 Special Topics.

Water Science and Management (International Water Resilience) - Doctor of Philosophy

Prefix	Title	Credits

WSAM 700	Doctoral Dissertation	
Total Credits		**75-77**

1. With the consent of the instructor and the approval of the student's advisor, C E 582 Statistical Hydrology or GEOG 585 Spatial Analysis and Modeling may be used as a substitute.
2. Seminar may be substituted by WSAM 605 Arid Land Water Resources, or WSAM 610 Water and Sustainable Economic Development, or GEOG 501 Introduction to Geographic Theory and Application.

Students are expected to have a basic foundation in Geographic Information System (GIS) within a classroom, research experience, or professional experience. Students without this background are required to take an appropriate GIS class as advised by their advisor such as: GEOG 578 Fundamentals of GIS, or FWCE 535 Special Topics.

Water Science and Management (Water Quality Treatments) - Doctor of Philosophy

This degree is designed to give students a thorough and comprehensive knowledge of water science and hydrology and training in methods of research. The Ph.D. degree can be earned in about 33-35 credits of formal course work beyond the Masters Degree, plus 18 additional dissertation research credits, for a minimum total of 75 credits beyond the BS degree, as detailed below.

Prefix	Title	Credits
Core Courses		
AEEC 5350	Economics of Water Resource Management and Policy	3
RGSC 518	Watershed Methods and Management	3
or SOIL 456	Irrigation and Drainage	
C E 557	Water Resources Development	3
Select one from the following:		3-4
GEOG 578	Fundamentals of GIS	
GEOG 588	GIS and Water Resources	
Select one from the following: [1]		3-4
A ST 505	Statistical Inference I	
C E 582	Statistical Hydrology	
GEOG 585	Spatial Analysis and Modeling	
Seminar Credits OR Select one from the following: [2]		2
WSAM 605	Arid Land Water Resources	
WSAM 610	Water and Sustainable Economic Development	
GEOG 501	Introduction to Geographic Theory and Application	
Concentration Electives		
Students must work with their committee to select 12 credits of elective courses that would meet the Water Quality Treatment concentration		12
Electives chosen in consultation with the student's committee (enough to meet the required minimum of 75 credits)		**28**
Dissertation		**18**
WSAM 700	Doctoral Dissertation	
Total Credits		**75-77**

1. With the consent of the instructor and the approval of the student's advisor, C E 582 Statistical Hydrology or GEOG 585 Spatial Analysis and Modeling may be used as a substitute.

[2] Seminar may be substituted by WSAM 605 Arid Land Water Resources, or WSAM 610 Water and Sustainable Economic Development, or GEOG 501 Introduction to Geographic Theory and Application.

Students are expected to have a basic foundation in Geographic Information System (GIS) within a classroom, research experience, or professional experience. Students without this background are required to take an appropriate GIS class as advised by their advisor such as: GEOG 578 Fundamentals of GIS, or FWCE 535 Special Topics.

Wildlife and Fisheries Ecology - Doctor of Philosophy

Candidates are accepted into the department to work with a specific faculty member that serves as their major advisor and committee chair. Students will develop their dissertation committee before the end of the second semester of study. Students will form the dissertation committee in consultation with their advisor and the committee must include a minimum of four members with at least two other members from the FWCE graduate faculty and a Dean's Representative that must come from outside the FWCE department. Students will select courses in consultation with their major advisor and committee members based on their background and interests.

A total of 66 credits will be required for students entering the Doctoral program in Wildlife and Fisheries Ecology, including 18 doctoral dissertation credits. Students who have already completed an Master of Science can transfer a maximum of 24 credits from their Master of Science program to the doctoral program. Additionally, students that enter the program having only completed a bachelor's degree must also complete the Master of Science degree requirements for Fish, Wildlife and Conservation Ecology as part of their coursework requirements. This includes 6 credits of quantitative foundations and three courses from Ecological Concepts, Organismal Biology, and Ecological Techniques (see graduate catalog for eligible courses). A maximum of 9 credits of course work below 500 but at or above 450 can count toward doctoral coursework.

Doctor of Philosophy students must:

- Complete a minimum of 6 semesters, with at least two occurring after the comprehensive exam.
- A maximum of 6 credits of FWCE 699 Doctoral Research doctoral research may apply toward graduation.
- Complete a minimum of 30 credits of graduate work excluding dissertation credits (FWCE 700 Doctoral Dissertation). This must include 2 credits of FWCE 690 Doctoral Seminar and BIOL 540 Science and Ethics (2 credits).
- Complete 18 credits of FWCE 700 Doctoral Dissertation after passing the comprehensive exams.
- At least 15 credits of the required elective courses must come from FWCE courses numbered 500 or above.
- Maintain a minimum grade point average of 3.0.
- Enroll in at least 1 credit/semester or 9 credits if full-time.
  - Full-time domestic students may file a request for waiver permitting them to enroll for only 6 credits in their second to last semester and to enroll for only 1 credit during their final semester if coursework and comprehensive exam requirements have been fulfilled.
- Successfully complete a qualifying exam (if a Ph.D. student without a master's degree), proposal defense, comprehensive exam, and dissertation defense. (see below)

Other recommendations for Ph.D. students:

- Ph.D. candidates are encouraged to do the following:
  - Consider including a committee member from outside NMSU, whether from a non-governmental organization, state/federal agency, or other university.
  - Gain experience as a teaching assistant for at least one semester and/or enroll in FWCE 510 Wildlife Ecology Teaching Practicum.
  - Present research at least once in a poster or oral format at a regional, national, or international conference.
  - Submit at least one manuscript as first author for publication in a peer-reviewed journal.

Exams

Qualifying exam – Students with an Master of Science degree do not need to take a qualifying exam. Students with a bachelor's degree must take a qualifying exam after completion of at least 18 credits. The qualifying exam will consist of an oral exam administered by the student's committee. If a student does not pass the qualifying exam, they can coordinate with their major advisor to potentially pursue a Master of Science degree.

Proposal defense – The student should defend their proposal to their committee no later than the end of the fourth semester of their studies. The students will prepare a short presentation summarizing the proposal chapters and will then answer questions related to their proposal from the committee.

Comprehensive exam – This exam covers all phases of the major and minor fields of study and is given after passing the proposal defense and before the end of the sixth semester, and when sufficient progress has been made toward fulfilling agreed upon research goals. The examination will have both written and oral portions. The written portion may be in the form of a research proposal (that does not overlap with their existing dissertation research) or may consist of questions presented by the students' committee. The student must pass their graduate committee's expectation on the written portion before taking the oral portion. Students will not be allowed to register for 700 level courses until both parts of the comprehensive exam have been passed. If a student does not pass the comprehensive exam, they will have the opportunity to retake their comprehensive exam no sooner than three months and no later than 12 months after their initial attempt.

Dissertation Defense – The dissertation defense shall be completed after all degree requirements are satisfied. However, dissertation credits can be taken during the same semester as the dissertation defense. A minimum of 2 semesters must elapse between the comprehensive exam and dissertation defense.

Failure to pass an exam does not necessarily mean removal from the Ph.D. program. Students may be given the option to continue the program or pursue a Master of Science degree after discussion with their major advisor and (or) academic dean. Note that for each of the exam stages (e.g., qualifying exam, comprehensive exam, and dissertation defense), when an Master of Science degree-holding student does not pass, they may not be allowed to continue in the program. Such a case will be dealt with on an individual basis with active participation from the graduate dean.

Students should consult the Graduate School website for specific information regarding the completion of the degree and submission of the dissertation.

Prefix	Title	Credits
Required Courses		
BIOL 540	Science and Ethics	2
Take 2 credits of Doctoral Seminar		2
FWCE 690	Doctoral Seminar	
Take 18 credits of Doctoral Dissertation after Comprehensive Exam		18

Reading - Specialist in Education

The Reading Specialist in Education is for educators who are interested in becoming a reading specialist, literacy director, school district administrator in curriculum and instruction, or engage in leadership at the district and state levels. The program can be completed in two forms (1) solely as a Specialist in Education; (2) simultaneously with the Master of Arts in Education with a Concentration in Language, Literacy & Culture.

Reading Specialist in Education

For students wishing to only receive the Specialist in Education for Reading the following coursework will need to be completed.

Prefix	Title	Credits
Required Coursework		
Reading Specialist Coursework		
READ 5330	Content Area Literacy	3
READ 6110	Critical Issues in Literacy Education	3
READ 6120	Multiple Critical Literacies	3
READ 6130	Multiculturalism, Literature, and Inquiry	3
READ 6210	Ethnography of Reading and Writing	3
READ 6320	Praxis and Reflexivity	3
READ 5990	Practicum in Literacy Education	6
READ 6999	Research Project	9
Total Credits		**33**

Reading Specialist with the M.A. in Education (LLC)

For students who have already pursued a master's degree in reading/literacy (LLC) and are eligible to apply for the PED Reading Endorsement, the specialist can be added to their current curriculum the following coursework will need to be completed.

Prefix	Title	Credits
Required Coursework		
Language, Literacy and Culture Coursework		
EDUC 5120	Multicultural Education	3
EDUC 5140	Research in Curriculum and Pedagogy	3
EDUC 5160	Curriculum and Pedagogy	3
EDUC 5170	Action Research Projects	3
READ 5210	Language and Literacy Acquisition	3
READ 5220	Sociopsycholinguistics of Reading	3
READ 5340	Literacy Assessment and Evaluation	3

School Psychology - Specialist in Education

The CEP Department offers a School Psychology program that leads to a Specialist in Education (Ed. S.) degree. The National Association of School Psychologists accredits the program. The program provides additional education beyond the M.A. degree to prepare professionals for licensure as school psychologists in New Mexico and throughout the United States. The School Psychology program prepares its candidates to work with preschoolers, children, adolescents, and families. The various settings where School Psychologists are employed include public schools and other organizations that require advanced assessment, counseling, consultation, and other interventions. The program trains its candidates to serve students from various backgrounds with diverse educational, psychological, and emotional needs. Such training also includes working with all school personnel to help make education a positive and rewarding student experience.

For more information on program application requirements and process, see School Psychology, Ed.S., program website: https://cep.nmsu.edu/academic-programs/school-psychology.html

Total Credits		**12**

Borderlands and Ethnic Studies - Graduate Certificate

Borderlands and Ethnic Studies (BEST) is a multidisciplinary program that critically explores the social, historical, cultural, and legal ways communities experience and navigate social constructs such as race, gender, and sexual orientation. These constructs permeate life, are entrenched in social structures and institutions, and shift and mutate over place and time in ways that reproduce existing power relations. The program outlines and analyzes the history, cultural production, politics and consequences of racialization and identity formation from an Indigenous, Diasporic and Transnational/Transborder, Decolonizing approach that remains rooted in a place-based, Borderlands imperative.

The graduate certificate advances an understanding of human relationships informed by unequal power and resource distribution to prepare students for service in various fields such as: education, government, law enforcement, health, environmental justice, sustainable agriculture, communications, social work, law and policy, public history, business and social entrepreneurship, and others. The certificate addresses a growing need for knowledge and skills in the areas

of cultural competency, equity and inclusion, critical thinking an conscientious problem solving, and effectively working with diverse populations.

Within the field of education, currently employed teachers and future teachers will be trained in historical and contemporary knowledge of Borderlands and ethnic Studies through a locally-relevant approach. nationally, Ethnic Studies is part of a burgeoning K-12 and higher education focus because of its potential for creating stronger and healthier communities. This certificate serves a growing cadre of educators as well as others pursuing careers in the public services sector. The certificate is comprised of 15 credits of graduate level work.

The certificate serves:

- Current NMSU degree seeking graduate students who wish to expand their primary area of study to include a specialization in Borderlands and Ethnic Studies.
- Non-degree seeking professionals who have completed an undergraduate degree in any major and who wish to invite, refresh, update and extend their knowledge and skill sets in Borderlands and Ethnic Studies.

Overview

The Graduate Certificate in Borderlands and Ethnic Studies is offered in the traditional classroom format as well as on-line. The program is designed to be completed in 4 semesters, with a requirement to successfully culminate in completion of BEST 5999 Capstone in Borderlands and Ethnic Studies - which will be tailored to the students' trajectory. Students must earn a minimum 3.0 in all 5 courses, including the Elective.

The certificate may be completed as a stand-alone certification or in conjunction with a graduate degree in another field.

If you wish to complete a graduate certificate, you must apply for admission to this program. Even if you already enrolled in a graduate program at NMSU, you will need to complete a separate application to be admitted to the certificate program. Once you have been admitted to the program and have completed all of the necessary coursework, you will need to file a Completion of Graduate Certificate form to be awarded the certificate.

Please contact the Borderlands and Ethnic Studies Advisor to further assist in completion of the application.

[1] Students must make a B or better before taking additional music theory/music history courses.

Cultural Resource Management - Graduate Certificate

The Graduate Certificate in Cultural Resource Management provides specialized archaeological training that enables students to pursue careers cultural resource management, heritage, and historic preservation in the public or private sectors. The curriculum includes cultural resource management and historic preservation laws and regulations, area classes in prehistoric and historical archaeology, field classes, and laboratory methods courses in archaeology, history, and geography. Students take courses in traditional classroom and laboratory formats, as well as in the field. The core requirements (ANTH 540 Cultural Resource Management and ANTH 542 Cultural Resource Management II) are offered during the fall (ANTH 540) and spring (ANTH 542) semesters *every other year*. If you enroll in a year when these courses are not being offered, it will take you at least two years to complete your certificate.

The Certificate may be completed as a stand alone certification or in conjunction with the M.A. degree in Anthropology or any other related field.

If you wish to complete a graduate certificate, you must apply (https://gradschool.nmsu.edu/) for admission to this non-degree program. Even if you already enrolled in a graduate program at NMSU, you will need to complete a separate application to be admitted to the certificate program. Once you have been admitted to the program and have completed all of the necessary coursework, you will need to apply to be awarded the certificate through your myNMSU account.

Please contact the Anthropology Graduate Advisor, Dr. Kelly Jenks kljenks@nmsu.edu (istanfor@nmsu.edu) for information about how to complete the application.

The Graduate Certificate in Cultural Resource Management requires 18 credits of coursework and must be completed within 3 years. The certificate requires six credits from two required courses and 12 credits from a comprehensive list of electives in anthropology and related fields. Students are required to take at least one elective course in History or Geography. All these courses are designed to promote expertise in cultural resource management. The core requirements (ANTH 540 Cultural Resource Management and ANTH 542 Cultural Resource Management II) are offered in a sequence *every other year*. If you enroll in a year when these courses are not being offered, it will take you at least two years to complete your certificate.

Prefix	Title	Credits
Required Courses		
ANTH 540	Cultural Resource Management	3
ANTH 542	Cultural Resource Management II	3
Elective Courses		**12**
Select 12 credits from the following: [1,2]		
At least three credits must be in HIST or GEOG		
ANTH 507	Advanced Studies in Archaeology	
ANTH 512	Quantitative Analytical Methods in Anthropology	
ANTH 516	Advanced Archaeology of Ancient Southwest	
ANTH 514	Advanced Archaeology of Magic, Witchcraft, and Religion	
ANTH 518	Advanced Historical Archaeology	
ANTH 522	Archaeological Field School	
ANTH 523	Archaeological Mapping	
ANTH 564	Advanced Curation Crisis in Archaeology	
ANTH 574	Advanced Human Osteology	
ANTH 575	Advanced Pottery Analysis in Archaeology	
ANTH 576	Lithic Technology Organization	
ANTH 577	Advanced Zooarchaeology	
ANTH 578	Advanced Lab Methods in Archaeology	
GEOG 553	Geomorphology	
GEOG 573	Introduction to Remote Sensing	
GEOG 578	Fundamentals of GIS	
HIST 579	Oral History	
HIST 586	Interpreting Historic Places for the Public	
HIST 583	Advanced Historic Preservation	
HIST 594	Public History Seminar	
Total Credits		**18**

1. Some of these courses have prerequisites, consult the graduate catalog for details.
2. Other classes maybe included in the list of elective courses at the discretion of the Department and with approval of the Anthropology Department Head.

Elementary Education Alternative Licensure - Graduate Certificate

The NMSU Elementary Alternative Licensure Certificate aims to recruit highly qualified individuals who have earned at least a bachelor's degree in a related field and are eligible for a temporary two-year alternative license in the State of New Mexico. We seek individuals who will have positive impact on the social, cultural, emotional, and intellectual growth of youth with whom they will work throughout their career.

Eligible Participants must:

- Meet minimum state requirements of at least a bachelor's degree and course requirements of 30 undergraduate credit hours (6.60.3.7 NMAC) in the teaching field with a minimum 2.75 cumulative undergraduate GPA
- Be hired and submit a copy of a current teaching contract from a school district in New Mexico that indicates the candidate is the teacher of record in grades K to 8th
- Be admitted to the NMSU Graduate School
- Be admitted to the School of Teacher Preparation, Administration and Leadership

Prefix	Title	Credits
Required Courses		
EDUC 5120	Multicultural Education	3
EDUC 5310	Methods of Teaching Elementary School Science	3
EDUC 5320	Methods of Teaching Elementary School Mathematics	3
EDUC 5330	Methods of Teaching Elementary School Social Studies	3
READ 5310	Elementary School Literacy I	3
READ 5320	Elementary School Literacy II	3
SPED 5105	Introduction to Special Education in a Diverse Society	3
Total Credits		**21**

All licensure courses are eligible for transfer into a regular TPAL master's program.

Other Program Requirements to be completed by the end of the two-year program:

- Complete and maintain a 3.0 minimum GPA in all courses throughout the program
- Participate in two full semesters of observation (8 total observations) by a University Supervisor with a fee for each semester
- Teach with a provisional/intern license throughout the program and provide annual verification of continued elementary education employment at a New Mexico school district.
- Upon completion of the program students can apply for Level I Teaching License with NM PED by submitting their Elementary

Alternative Licensure Certificate and passing the following Praxis exams: Principles of Learning and Teaching: (https://praxis.ets.org/on/demandware.store/Sites-ETS-Praxis-Site/en_US/Product-Show/?pid=5622) K to 8th, **and Elementary Education: Curriculum, Instruction, and Assessment (https://praxis.ets.org/on/demandware.store/Sites-ETS-Praxis-Site/en_US/Product-Show/?pid=5017) 5017,** and Teaching Reading: Elementary (https://praxis.ets.org/on/demandware.store/Sites-ETS-Praxis-Site/en_US/Product-Show/?pid=5205) 5205.

Finance - Graduate Certificate

Admission requirements:

1. Completion of a Bachelors or other advanced degree with a minimum GPA of 3.0.
2. Earned a B or better in the following NMSU courses — or their equivalents — within seven years prior to acceptance into the program:

Prefix	Title	Credits
BFIN 341	Financial Analysis and Markets	3
MATH 1430G	Applications of Calculus I	3
MATH 1350G	Introduction to Statistics	3
or		
Undergraduate GPA of at least 3.25 with 2 or more years of experience [1]		

[1] Two or more years of relevant, full-time, post-degree, professional work experience in the finance industry. See Finance Graduate Certificate for more details.

3. Please visit gradschool@nmsu.edu and submit an application online.

Certificate Course Requirements

Courses are offered in a traditional classroom and/or online.

Prefix	Title	Credits
Choose four from the following:		**12**
BFIN 503	Financial Management	
BFIN 511	Financial Derivative Markets	
BFIN 521	Personal Financial Planning for Professionals	
BFIN 535	Investment Concepts	
BFIN 545	Fixed Income Markets, Instruments and Derivatives	
BFIN 555	Derivative Markets and Securities	
BFIN 566	Advanced Financial Management	
BFIN 575	International Managerial Finance	
BFIN 581	Management of Financial Institutions	
Total Credits		**12**

Museum Studies - Graduate Certificate

The Graduate Certificate in Museum Studies provides specialized interdisciplinary training that enables students to pursue careers in museums in the public or private sectors. The curriculum includes museology, methods, exhibit development, collections management, conservation, curation, and practice in Museum Studies. The core requirements for ANTH 545 Advanced Museology and HIST 594 Public History Seminarr alternate on rotation with controlled electives *every other year*. If you enroll in a year when these courses are not being offered, it will take you at least two years to complete your certificate.

The Certificate may be completed as a stand alone certification or in conjunction with the M.A. degree in Anthropology, History, Art, and related fields.

If you wish to complete a graduate certificate, you must apply (https://gradschool.nmsu.edu/) for admission to this non-degree program. Even if you already enrolled in a graduate program at NMSU, you will need to complete a separate application to be admitted to the certificate program. Once you have been admitted to the program and have completed all of the necessary coursework, you will need to apply to be awarded the certificate through your myNMSU account.

Please contact the Anthropology Graduate Advisor (kljenks@nmsu.edu) for information about how to complete the application.

The Museum Studies Graduate Certificate program is a program designed for individuals who want to enhance their understanding of museum work. It may be completed as a stand-alone certification or in conjunction with a Master's degree in Anthropology, Art History, History, Public History, Studio Art or other related disciplines.

Prefix	Title	Credits
Core Curriculum		
ANTH 545	Advanced Museology	3
ARTS 503	Preventive Conservation/Collections Care	3
HIST 594	Public History Seminar	3
Internship (credits from ANTH, ART, or HIST)		*3*
ANTH 597	Internship	
ARTS 490	Museum Conservation Internship

[1] Students must make a B or better before taking additional music theory/music history courses.

Principal Licensure - Graduate Certificate

Students seeking to complete the Principal Licensure Graduate Certificate program for the purpose of obtaining administrative licensure must already hold an MA or MS and New Mexico Level III teacher licensure. Students must complete the required 24 credit hours of coursework, which includes field-based experiences and six credit hours of a university-supervised administrative internship (over the course of two semesters). Students must earn a final grade of B- or better in all classes. Courses in which a student earns a "C" grade or below will need to be repeated and not count towards graduation. Important information about the Educational Leadership & Administration Programs can be found here (https://ela.nmsu.edu/).

Prefix	Title	Credits

Public Health - Graduate Certificate

The graduate certificate program in public health is not an official graduate degree offered by NMSU but rather a focused collection of courses that enrolled students complete in public health. These courses are designed to provide and/or enhance students' knowledge of and skills in public health practice. Those students who successfully complete the

previously listed courses receive a certificate of completion statement on their official transcript and a formal certificate from the university.

Prefix	Title	Credits

Public Utility Regulation and Economics - Graduate Certificate

The certificate in Public Utility Regulation and Economics (PURE) is a professional educational program designed for post-baccalaureate students pursuing a career in the utility sector, with an electric utility company, natural gas utility, water distribution utility, or with a government agency regulating these types of companies. PURE students must meet the general regulations and minimum requirements for admission to the graduate school and complete 12 credit hours including

Prefix	Title	Credits

Secondary Education Alternative Licensure - Graduate Certificate

The NMSU Secondary Education Alternative Licensure program aims to recruit highly qualified individuals who have earned *at least* a bachelor's degree in a related field and are eligible for a temporary two-year alternative license in the State of New Mexico. We seek individuals who will have dramatic impact on the social. cultural, emotional, and intellectual growth of youth with whom they will work throughout their career.

Applicants must meet the following minimum requirements and submit the required documentation for consideration:

- Meet minimum state requirements of *at least* a bachelor's degree and course requirements of 30 undergraduate credit hours (6.60.3. 7 NMAC) in the teaching field (12 upper division) with a minimum 2.75 cumulative undergraduate GPA.
- Be hired as a teacher of record in a K-12 school, and submit a copy of a current teaching contract from a school district in New Mexico that indicates the candidate is the teacher of record in the teaching field for each year of employment.
- Admission to the NMSU Graduate School (https://gradschool.nmsu.edu/)
- Admission to the School of Teacher Preparation, Administration, and Leadership in the College of Education.

Prefix	Title	Credits
Required Courses		
EDUC 5120	Multicultural Education	3
EDUC 5130	Technology and Pedagogy	3
EDUC 5150 or EDUC 5110	Classroom Management Exploration in Education	3
Choose one from the following (based on content area):		3
EDUC 5410	Teaching Science at the Middle and High School Level	
EDUC 5420	Teaching Mathematics at the Middle and High School Level	
EDUC 5430	Teaching Social Studies at the Middle and High School Level	
EDUC 5440	Teaching Language Arts at the Middle and High School Level	
READ 5330	Content Area Literacy	3
SPED 5105	Introduction to Special Education in a Diverse Society	3
Total Credits		**18**

All licensure courses are eligible for transfer into a regular TPAL master's in education program.

Other Program Requirements to be completed by the end of the program:

- Complete and maintain a 3.0 minimum GPA in all courses throughout the program
- Complete two full consecutive semesters of observation by a University Supervisor with a fee for each semester (8 formal observations)
- To transition from an alternative license to a Level I license, NM PED requires additional requirements to be met. These requirements can be found on the NM PED website (https://web.ped.nm.gov/bureaus/licensure/licensure-requirements/secondary-6-12/). These requirements are not required for program completion.

First Year		
Semester 1		**Credits**
SPED 5105	Introduction to Special Education in a Diverse Society	3
Choose one from the following (based on content area)		3
EDUC 5410	Teaching Science at the Middle and High School Level

	Credits	**6**
	Total Credits	**18**

A total of 8 formal observations must be completed from an assigned university supervisor. These are typically complete during the last Fall and Spring semester.

Sustainability - Graduate Certificate

The Sustainability Graduate Certificate is open to students admitted to the Graduate School who have a GPA of 3.0 or higher. Completion of the certificate requires completion of each of the individual courses with a B or better.

A minimum of 12 credits are required for the certificate. At least 6 credits are from 500/5000-level and above.

Prefix	Title	Credits
The following courses are required and are expected to be taken in sequence:		
ENVS 451	Special Topics (Special Topics in Sustainability)	3
RGSC 575	Climate Studies, Water and Society	3
ENVS 605	Arid Land Water Resources	3
Electives (choose two from the following): [1]		**6**
AEEC 5350	Economics of Water Resource Management and Policy	
AGRO 483	Advanced Sustainable Crop Production	
ECON 571	Regulatory Policy and Industry Analysis: Electricity I	
ENVS 460	Introduction to Air Pollution	
ENVS 462	Sampling and Analysis of Environmental Contaminants	
ENVS 470	Environmental Impacts of Land Use and Contaminant Remediation	
GEOG 535	Planning a Sustainable World	
GEOG 555	Southwest Environments	
SOCI 4335V	Advanced Environmental Sociology	
SOCI 5310	Seminar in Community Development	
WSAM 590	System Dynamics	
Total Credits		**15**

[1] **Other potential courses** may be available in the catalog. Discuss with your Sustainability Advisor whether the course would be suitable. Substitutions and exceptions can be made with the approval of the Sustainability faculty advisor and Department Head of Plant & Environmental Sciences Department.

Systems Engineering - Graduate Certificate

Program Availability

This distance education program is available to working professionals who have undergraduate degrees in engineering, engineering technology, and related fields. It is also an option for persons with graduate degrees who seek career renewal. Systems engineering provides a unique opportunity for working professionals to integrate their work experience with advanced coursework.

Program Objectives

The objectives of this program are:

- To provide technical professionals an opportunity to advance their careers through advanced education in systems engineering.
- To develop and improve relationships with the College of Engineering's constituencies by offering a program that addresses a known need for professional graduate-level development.
- To provide an opportunity for non-traditional students to consider advancing their education in areas that will foster their career development.
- To enable program students to become aware of current faculty research in systems engineering areas.

Requirements

A 3.0 minimum cumulative GPA in four courses as described below will be required for award of the Systems Engineering Graduate Certificate Program.

Admission to the NMSU Graduate School

Students must apply and be admitted to NMSU as a non-degree student to take classes. For more information, contact:

NMSU Graduate School
Box 30001, MSC 3G
Las Cruces, NM 88003
(575) 646-2736
http://gradschool.nmsu.edu/ (http://gradschool.nmsu.edu)

To complete the Certificate Program, students must be admitted to the Graduate School as certificate students. If you are considering pursuing a degree in electrical or industrial engineering, you should contact that department for admissions
requirements and advising.

Teaching Spanish for Heritage Language Learners - Graduate Certificate

The Department of Languages and Linguistics offers a graduate certificate program in Teaching Spanish for Heritage Language Learners. The certificate requires a student to complete 18 credit hours (a total of six courses) that could be completed in one year and to submit a portfolio. Four courses are mandatory core courses. The remaining two courses can be selected by the student from the list of approved courses. Upon completion of all six courses, students will be guided as they prepare and submit an online reflective portfolio. Students may choose to apply to our master's program online or on campus and upon completion, all six courses can be used towards final degree completion in our MA program. This certificate program is open to applicants not currently enrolled as well as to current NMSU graduate students and to students who already hold a master's degree who can benefit from the certificate as an additional credential.

***Program does NOT lead to licensure. However, students are encouraged to inquire with their local districts to see if this can be added as an endorsement to their CV. Students can work in conjunction with our master's degree to earn a graduate certificate at the same time.**

Prefix	Title	Credits
Core Courses		*12*
SPAN 594	Theory and Methodology of Spanish Pedagogy	
SPAN 597	Advanced Strategies for Teaching Spanish for Heritage/Native Speakers	
SPAN 510	Assessing the National Standards	
SPAN 503	Critical Language Awareness in Teaching SHL	
Approved Electives (must take two)		*6*
SPAN 502	Sentipensar Pedagogy: Anzaldúa and Other Theorists	
SPAN 507	Technology Enhanced Language Learning	
SPAN 508	Teaching Literature with Technology	
SPAN 509	Teaching Culture with Technology	
SPAN 545	Advanced Dialectos del Espanol	
SPAN 558	Bilinguismo	
SPAN 589	Spanish Sociolinguistics	
SPAN 591	Advanced Study in History of the Spanish Language	
SPAN 493	Espanol de los Estados Unidos	
SPAN 504	Culturally Sensitive Teaching in SHL: Teaching Spanish as a Heritage Language in the United States	

Online Portfolio Submission

Detailed instructions for the online portfolio submission guidelines will be provided during advising in the department, but will include deliverable items such as lesson plans, projects, and other pedagogical items that have been completed as part of the courses in the certificate that the student can use in their planned careers with heritage learners.

The program requirements can be completed in one year, including Summer, but can also be completed in multiple years. The following sample Plan of Study is based on one-year completion and lists sample elective courses. Some of the elective courses are offered in alternating (even or odd) years.

First Year

Fall		**Credits**
I E 590	Selected Topics	3
500 level Course (approved from the Department Course List)		3
	Credits	**6**
Spring		
C E 510	Introduction to Nondestructive Testing	3

CHME 491	Undergraduate Special Topics (Development of Agricultural Technologies)	3
	Credits	**6**
	Total Credits	**12**

Agribusiness - Graduate Minor

The graduate minor in Agribusiness requires at least 9 credit hours of graduate coursework within the AEEC prefix.
Students wishing to obtain a minor in Agricultural Economics and Agricultural Business (AEAB) while majoring in another academic program should:
1) Select an advisor from the Agricultural Economics and Agricultural Business (AEAB) Graduate Faculty.
2) Complete six hours of core courses, listed below.
3) Complete at least 3 additional credit hours of approved graduate-level AEEC courses.

Prefix	Title	Credits
AEEC 5330	Agribusiness Marketing	3
AEEC 5340	Agribusiness Management	3
Additional Graduate AEEC Course (5000 and above course)		3
Total Credits		**9**

Agricultural and Extension Education - Graduate Minor

A graduate student who wishes to minor in AXED, while majoring in another academic program, should select an advisor from the AXED Graduate Faculty. A student minoring in AXED must complete at least nine credit hours of approved courses in the AXED department. A copy of the minor program must be approved by the AXED department head. Contact an advisor in AXED.

Animal Science - Graduate Minor

A minimum of 9 credit hours in graduate level classes with the ANSC prefix are required to obtain a graduate minor in Animal Science. Approval by the Animal and Range Sciences Department Head is required.

Anthropology - Graduate Minor

Students who earn a graduate minor in Anthropology must complete at least 9 credits (3 courses) of graduate-level anthropology coursework at the level of 500 or above. Graduate students majoring in anthropology may **not** also earn a minor in the same field.

Applied Statistics - Graduate Minor

The minor in applied statistics is designed for graduate students majoring in other fields. It provides credentials that the student is capable of conducting statistical analyses in their area of specialization.

Master's level students wishing to minor in applied statistics at the master's level must have at least 10 credits of 500-level applied statistics courses. In accordance with Graduate School requirements, doctoral students must have at least 12 credits of 500-level applied statistics courses for a minor.

Students who wish to focus on experimental statistics typically complete A ST 503 SAS Basics, A ST 504 Statistical Software Applications, A ST 505 Statistical Inference I, A ST 506 Statistical Inference II. A typical course sequence for students interested in data analytics consists of A ST 505 Statistical Inference I, A ST 507 Advanced Regression, A ST 515 Statistical Analysis with R, and A ST 540 Predictive Analytics.

Students wishing to obtain the minor in applied statistics should contact an applied statistics faculty member to recommend appropriate applied statistics course work to be included in the plan of study and to serve as the graduate committee representative from the minor area.

Archaeology - Graduate Minor

The graduate minor in archaeology allows students in other programs to develop a specialization in archaeology. A minor in archaeology provides a useful concentration for students developing professional careers in cultural resource management, public lands management, environmental sciences, public history, geography, or teaching.

In order to complete the minor requirements, students are required to complete 9 credit hours (3 classes) of graduate level courses. The core courses for the minor are:

Prefix	Title	Credits
Course Requirements		
Select 9 credits from the following:		9
ANTH 514	Advanced Archaeology of Magic, Witchcraft, and Religion	
ANTH 516	Advanced Archaeology of Ancient Southwest	
ANTH 518	Advanced Historical Archaeology	
ANTH 522	Archaeological Field School	
ANTH 523	Archaeological Mapping	
ANTH 540	Cultural Resource Management	
ANTH 564	Advanced Curation Crisis in Archaeology	
ANTH 542	Cultural Resource Management II	
ANTH 575	Advanced Pottery Analysis in Archaeology	
ANTH 576	Lithic Technology Organization	
ANTH 577	Advanced Zooarchaeology	
ANTH 578	Advanced Lab Methods in Archaeology	
Total Credits		**9**

Students should choose among these core offerings with the advice of their MA thesis chair and minor area committee member. The minor in archaeology is not available to graduate anthropology majors. Substitutions for special topics courses available by permission of Anthropology Department Head.

Bioinformatics (with Computer Science) - Graduate Minor

The Bioinformatics minor is jointly offered with the Department of Computer Science and consists of 9 credit hours for Master's students and 12 credit hours for Ph.D. students, including BIOL 550 Special Topics/GENE 452 Applied Bioinformatics, and additional courses selected from those listed at http://research.nmsu.edu/molbio/ (https://molb.nmsu.edu/curriculum/under-graduate-minor-in-bioinformatics.html). The courses selected will depend on whether the student is majoring in a biological or non-biological science and include courses from the graduate Computer Science and Molecular Biology curricula. Please inquire with the Molecular Biology Program office for the most recent requirements for the bioinformatics minor.

Communication Studies - Graduate Minor

Students who wish to take a minor in Communication Studies will need to accumulate a minimum of 9 graduate credits in Communication Studies courses. Students are encouraged to contact the Communication Studies Department Head for direction in the selection of courses.

Computer Science - Graduate Minor

Students who wish to take a minor in Computer Science will need to accumulate a minimum of 9 graduate credits not including the CSCI 4540 Computer Science I Transition Computer Science course. Students are encouraged to contact the Computer Science Graduate Committee Chair for directions in the selection of courses.

Economics - Graduate Minor

The graduate minor in economics is appropriate for those who seek a better understanding of how micro- and macro- economic forces influence individuals, business and government decision making. Students interested in public utility regulation, banking and finance, government service, or law will find the minor especially interesting.

Graduate students wishing to earn a minor in economics must complete 12 semester credit hours, including:

Prefix	Title	Credits
Select at least two from the following:		6
AEEC 5120	Microeconomic Theory	
AEEC 5130	Macroeconomic Theory	
AEEC 5240	Econometrics	
ECON or AEEC 500 or higher courses (excluding ECON 503) [1]		6
Total Credits		**12**

[1] ECON 503 Managerial Economics cannot be counted toward the minor.

Students pursuing the economics minor must fulfill the course prerequisites before enrolling in the graduate courses.

Educational Administration (Doctoral) - Graduate Minor

Doctoral Graduate Minor

Doctoral students who wish to earn a minor in Educational Leadership and Administration should meet with an ELA faculty member to discuss program and/or courses. NOTE: Faculty will prescribe a plan of study for the minor that takes into consideration the career aspirations and goals of the student.

Students must earn a minimum of a "B" grade in all minor coursework. Students who receive a grade of "B-" or below will be required to retake the course.

Educational Administration (Higher Ed.) - Graduate Minor

Master's students may earn a minor in educational administration, with a focus in Higher Education Administration, by passing **three** of the listed classes below.

How to Apply

Students wishing to obtain the minor should contact ELA Doctoral Programs Coordinator at edmandev@nmsu.edu.

Minimum Grade Requirement

Students must earn a minimum "B-" grade in all required coursework. Students who receive a grade of "C+" or below will be required to retake the course.

Prefix	Title	Credits
ELAD 5215	Higher Education Administration	3
or ELAD 5210	Community College Administration	
ELAD 5250	Higher Education Law	3
ELAD 5230	Higher Education Finance and Funding	3
ELAD 5240	Management of Student Services in Higher Education	3
Total Credits		**12**

Educational Administration (Pk-12) - Graduate Minor

Master's level students wishing to earn a minor in educational administration, with a focus in Pk-12 Educational Administration, must pass **three** of the listed classes below.

How to Apply

Students wishing to obtain the minor should contact ELA Doctoral Programs Coordinator at edmandev@nmsu.edu.

Minimum Grade Requirement

Students must earn a minimum "B-" grade in all required coursework. Students who receive a grade of "C+" or below will be required to retake the course.

Prefix	Title	Credits
ELAD 5110	The Principalship	3
ELAD 5140	Educational Financial Management	3
ELAD 5150	Public School Law	3
ELAD 5320	Educational Leadership, Supervision, and Evaluation	3
Total Credits		**12**

Fish, Wildlife and Conservation Ecology - Graduate Minor

A minor in Fish, Wildlife, and Conservation Ecology requires 9 credits of graduate coursework that carries the FWCE prefix. Official minor documentation must be completed with the Department of Fish, Wildlife and Conservation Ecology. Students wishing to obtain to obtain a graduate minor in Fish, Wildlife and Conservation Ecology (FWCE) must: 1) obtain approval from the Department Head of the Department of Fish,

Wildlife and Conservation Ecology Department Head; 2) have a FWCE faculty member as part of their graduate advisory committee; FWCE faculty member needs to approve the proposed program of study for the minor; 3) complete a minimum of 9 credit hours in graduate level (500) classes with the FWCE prefix. FWCE 509 Population Ecology (s) (3 s.h.) is required, plus an additional 6 credit hours.

Prefix	Title	Credits
The graduate minor in FWCE would require nine credit hours in FWCE graduate-level courses and would include the following:		
Required course		*3*
FWCE 509	Population Ecology (s)	
Required elective (at least 3-4 credits from one of the following		*3-4*
FWCE 459	Aquatic Ecology	
FWCE 547	Wildlife Law and Policy	
Elective		
Three credits from any of the remaining graduate courses in Wildlife Science		3
Total Credits		**9-10**

Food Studies - Graduate Minor

The purpose of the Food Studies Graduate Minor is to:

1. Enable students to develop a specialization in food studies within their respective graduate program
2. Develop specialized knowledge of the complex and dynamic relationship between food and culture
3. Explore the role of culture in food production, distribution and consumption across different cultures
4. Apply ideas and knowledge from graduate seminars to fieldwork for MA thesis or internship in a food studies topic

Program Requirements

Prefix	Title	Credits
Core Curriculum		
Select three from the following: [1]		9
ANTH 520	Ethnographic Field Methods	
ANTH 531	Issues in Nutritional Anthropology	
ANTH 538	Plants, Culture, and Sustainable Development	
ANTH 539	Culture and Foodways	
ANTH 515	Applied Anthropology [2]	
ANTH 535	Adv. Human Health and Biological Variation [2]	
Total Credits		**9**

[1] Alternative classes may be substituted for one of the core classes with the approval of the Anthropology Department Head.

[2] In these cases, the student's class research project should focus on a food studies theme.

Students are expected to conduct a food studies thesis, applying anthropological theoretical frameworks and ethnographic methodologies to the study of a food-related topic. Non-thesis students may select a food studies internship. Possible topics include sustainable development, alternative food movements, community food security, community health, nutrition, food safety, globalization of food, indigenous knowledge systems, food self-sufficiency, among others.

Gender and Sexuality Studies - Graduate Minor

The graduate minor in Gender and Sexuality Studies specializes in the examination of gender; gender identity; queer and transgender studies; feminisms; and social justice from interdisciplinary perspectives. Students develop a strong understanding of how interconnected social formations such as race, class, age, nation, citizenship, ability, and other categories of difference are constructed and intersect with gender and sexuality. The graduate minor in Gender and Sexuality Studies offers students a documented emphasis in their academic training in the field of Gender and Sexuality Studies. The graduate minor allows students to acquire specialized knowledge through the interdisciplinary curriculum offered by Gender and Sexuality Studies and to integrate theoretical perspectives and methodologies from Gender and Sexuality Studies into diverse academic fields. Our courses equip students with analytical skills and knowledge to engage power structures critically and transform lives and communities.

We offer a plan of study that integrates humanities and social sciences methods and objects of study, including areas of concentration such as human rights and transnational migration; socially engaged literature, film, and other creative media; and transnational and decolonial methodologies. The graduate minor in Gender and Sexuality Studies complements many advanced degree programs at NMSU including Anthropology, Art, Biology, Business Administration, Chemistry, Clinical and Mental Health Counseling, Communication Studies, Creative Writing, Criminal Justice, Curriculum and Instruction, Economics, Education, English, Government, History, Psychology, Public Health Sciences, Social Work, Sociology, Spanish, and others.

Gender and Sexuality Studies students prepare for careers in such fields as advocacy and social organizing, community development, creative writing, criminal justice, education, filmmaking and video production, health care, human resources, journalism, law, music production, social services, and visual arts. Many students declare a graduate minor in Gender and Sexuality Studies to enhance career opportunities and learning.

Courses are offered both online and on campus. In addition to the graduate minor, Gender and Sexuality Studies offers a B.A. and undergraduate minor.

Master's and Doctoral minor candidates:

Prefix	Title	Credits
Required Core Course		
GNDR 571	Advanced Seminar in Feminist and Queer Theories	3

For a Master's Degree minor candidate:

6 additional credit hours from upper level Gender & Sexuality Studies courses or courses cross-listed with Women's Studies and other departments/programs are required. (9 credit hours total)

For a Doctoral Degree minor candidate:

9 additional credit hours from upper level Gender & Sexuality Studies courses or courses cross-listed with Women's Studies and other departments/programs are required. (12 credit hours total)

Geographic Information Science and Technology - Graduate Minor

Overview

The Department of Geography and Environmental Studies offers a Graduate Minor in Geographic Information Science and Technology (GIS&T). This minor is available to all graduate students and provides a valuable concentration for those seeking jobs that involve spatial data collection and analysis.

Graduates find career opportunities in diverse fields such as data and information management, urban and regional planning, water resource management, ecology, cultural resource management, emergency management, and public health.

Program Learning Outcomes

Upon completion of the Graduate Minor in Geographic Information Science & Technology, students will be able to:

1. Think spatially, geographically, and geospatially.
2. Explain basic and advanced concepts, methods, and applications in geographic information science and technology, including geographic information systems and remote sensing.
3. Solve real-world problems by acquiring, analyzing, interpreting, evaluating, and visualizing spatial data.

More Information

See the Requirements tab for details on course and credit expectations for earning the Graduate Minor in GIS&T.

Course and Credit Requirements

The Department of Geography and Environmental Studies offers a graduate minor in Geographic Information Science and Technology (GIS&T). This minor is available to all graduate students and provides a valuable concentration for those pursuing professional careers that involve spatial data collection and analysis. Career opportunities span diverse fields, including data and information management, urban and regional planning, water resource management, ecology, cultural resource management, emergency management, and public health.

To earn the minor in GIS&T, students must complete the following required courses, totaling 11-12 credits. All courses must be taken for a letter grade, with a minimum grade of B- required in each course. Students must also include a representative from the Department of Geography and Environmental Studies on their graduate committee.

Prefix	Title	Credits
Requirements		
GEOG 573	Introduction to Remote Sensing	4
GEOG 578	Fundamentals of GIS	4
Select 3-4 credits from the following:		3-4
GEOG 542	Programming for GIS	
GEOG 571	Cartography and GIS	
GEOG 582	Advanced Remote Sensing	
GEOG 585	Spatial Analysis and Modeling	
GEOG 588	GIS and Water Resources	
GEOG 544	GIS&T Professional Portfolio	
GEOG 545	Geospatial Professionalism	
Total Credits		**11-12**

Gerontology - Graduate Minor

A grade of B or higher is required in all coursework for the Graduate Minor in Gerontology.

Prefix	Title	Credits
Required Courses		
Select four courses from the list below (12 credits)		*12*
PHLS 4740	Aging and Public Policy	
PHLS 5650	Coping with Loss and Grief: A Cross-Cultural Perspective	
PHLS 5710	Introduction to Gerontology	
PHLS 5720	Health Promotion for the Older Adult	
PHLS 5730	Adulthood and Aging	
PHLS 5996	Special Topics (Aging in a Multicultural Society)	
Total Credits		**12**

History - Graduate Minor

Students may earn a graduate minor in History by passing the following courses:

Prefix	Title	Credits
Craft of History		3
Select one from the following:		3
HIST 590	Reading Seminar: Borders, Boundaries and Frontiers	
HIST 591	Reading Seminar: Modernity and its Discontents	
HIST 592	Reading Seminar: Nature and Society	
Select two additional 3-credit 500-level and above courses		6
Total Credits		**12**

Graduate students in History must maintain a 3.0 grade point average in their History courses. A graduate student earning a C or lower grade in one History course will receive a letter of warning. A graduate student earning two or more C or lower grades in History courses or whose History grade point average falls below 3.0 will be removed from the History graduate program. Students must earn at least one B or higher grade in a seminar during their first year in the graduate program, and must take at least one seminar during each year in which they are enrolled in the program. If a graduate student receives one U (Unsatisfactory) grade on his/her thesis or internship, the student will receive a written warning, and if a student received two or more U grades on his/her thesis or internship, the student will be removed from the program.

Information Systems - Graduate Minor

This minor is for master's-level students who are not in the Masters of Business Administration (MBA) program. Students in the MBA program may choose a concentration in Information Systems (see the Business Administration (p. 986) section).

To obtain a graduate minor in Information Systems (IS) students must satisfy the requirements as stated below for a minor at the master's level. For it to appear on the transcript, the student must list the minor on the Program of Study and Committee for Master's Student (Application for Admission to Candidacy) and have it signed by the head of the department offering the minor.

Requirements

The minor requires a minimum of 9 credits of graduate work.

Prefix	Title	Credits
Requirements		
BCIS 550	Information Systems Analysis and Design	3
BCIS 575	Database Management Systems	3
Select 3 credits from the following:		3
BCIS 561	Business Analytics I	
BCIS 566	Business Analytics II	
BCIS 580	Introduction to Cybersecurity: Exploring Computer, Network, and Data Security Principles	
BCIS 582	Management of Information Security	
BCIS 590	Special Topics	
Total Credits		**9**

Integrated Behavioral Health Care - Graduate Minor

The Minor in Integrated Behavioral Health Care, offered through the Counseling and Educational Psychology (CEP) department, is open to graduate students enrolled in CEP programs Clinical Mental Health Counseling, School Psychology, Counseling Psychology and to graduate students who are enrolled in Social Work, Public Health, Nursing and Marriage and Family Therapy programs.

It was established in the interest of meeting the needs of graduate students in the health professions who are receiving or seeking training in interdisciplinary or interprofessional collaborations with other healthcare disciplines. The provision of integrated behavioral health services fits within the university's broader goal of meeting the needs of the citizens of New Mexico and the department's commitment to graduating competent service providers who can be effective members of a healthcare team.

Students will complete 9 credits of coursework specific to this program of study in order to obtain a Minor in Integrated Behavioral Health Care. For application and coursework details, please get in touch with the CEP department office or visit the departmental website: https://cep.nmsu.edu

Through the courses in this minor students develop knowledge and skills in the following areas:

1. Apply the biopsychosocial model of health and illness with primary care patients,
2. Apply knowledge regarding the mind-body connection to address such issues as stress management, emotion regulation and sleep medicine,
3. Apply culturally responsive behavioral assessment/interventions,
4. Demonstrate behavioral health consultation skills with other health care providers, and
5. Develop interprofessional collaboration skills that include understanding the roles of all healthcare professionals and learning how to communicate effectively in order to engage in service delivery as a team.

Prerequisites

In order to begin the Minor courses, students **must currently be enrolled in a Behavioral Health program**. There are no other prerequisites.

How to Apply

If you are interested in pursuing a minor in Integrated Behavioral Healthcare, you are advised to meet with the CEP Program Coordinator, Yadira Ibanez (y1banez@nmsu.edu). It is best to meet with the program coordinator before enrolling in relevant coursework, but it is possible to obtain the minor after taking one of the courses in the program of study. This meeting will ensure that the minor is declared for graduation purposes. In addition, this meeting allows the CEP department to keep track of potential minors in order to determine what courses need to be offered at any given time. An IBH Minor faculty member is also required to sit on the committee for the student's final exam. For Doctoral students, this includes orals, dissertation proposal, and defense exams. Students should work with their advisor to ensure that an IBH faculty is in their committee requirements.

Program of Study

Students will successfully complete 9 credits of work from the courses listed below in order to obtain a Minor in Integrated Behavioral Health Care.

Prefix	Title	Credits
Core Courses		
Choose 9 credits from the following:		9
CEPY 5150	The Art & Science of Mindfulness for Helping Professionals	
CEPY 5280	Primary Care Psychology	
CEPY 5997	Special Research Programs	
or CEPY 6996	Selected Topics	
CEPY 6590	Behavioral Health Practicum	
Total Credits		**9**

CEPY 5150 The Art & Science of Mindfulness for Helping Professionals (1-3 s.h.)In this course, students learn about contemplative practices by learning about and participating in various mindfulness practices. This course engages students in a practice or experience that leads to reflection and, thus, acquired knowledge about themselves, others, and group functioning. The students learn how to increase well-being through mind-body integration, and they learn how to teach others mindfulness techniques. Students are required to explore the research on mindfulness for some medical condition or for its use with a specific population. This course has been taught in the spring semester, for five years, to CEP, MSW, MPH, and FCS students.

CEPY 5280 Primary Care Psychology (3 s.h.) Didactic and experiential learning in primary care psychology issues. Through this course students will learn about the cultural necessity of the integration of mental and physical health issues and multidisciplinary collaboration. Activities include 1) guest speakers on American Indian Health, the Mexican Healthcare System, and Integrated Care in primary care settings; 2) visits to 2 interdisciplinary, integrative, border community health centers; 3) shadowing residents at the Family Medicine Center and observing the

integration of psychological and medical aspects of the cases observed; and 4) exposure to the interventions of Motivational Interviewing and Mindfulness-Based Stress Reduction. CEP, MSW, and MPH trainees have enrolled in this course, taught during the fall semester, over the last 11 years.

CEPY 5997 Special Research Programs (1-6 s.h.)/CEPY 6996 Selected Topics (1-6 s.h.). This course will require students to spend a minimum of 6 hours per week at a primary care site, providing counseling, assessment, supervision, or psychoeducational services. The Minor coordinator must approve all placements. CEP students have enrolled in this course over the last 4 years. This course is available fall, spring and summer. During the summer, a special section of this course is subtitled, "Interprofessional Immersion" as CEP, DNP, and Family Medicine and PharmD residents learn interprofessional competencies related to providing geriatric care. This special section has been offered for two summers.

CEPY 6590 Behavioral Health Practicum (1-6 s.h.). An intensive supervised experience in providing behavioral health services at an on or off campus interdisciplinary health setting. This course will provide students the opportunity to participate in a supervised service-learning experience within community-based, interdisciplinary, primary care settings that serve medically underserved and high-risk groups. Students write and present a case study utilizing the biopsychosocial model of health. MSW and CEP students are placed in community-based organizations with Family Medicine residents or other medical personnel in order to provide integrated care. This course has been offered in the spring semester for the last 11 years.

Materials Engineering - Graduate Minor

The Materials Engineering minor at New Mexico State University is part of a materials education program that addresses the growing demand for engineers and scientists with understanding of the wide range of materials, their properties and means of characterization. A student must pass 18 credits of courses with a grade C or better. The minor includes one required course (CHME 361 Engineering Materials), and the balance elective courses chosen from menus available on the Chemical and Materials Engineering website (http://chme.nmsu.edu/academics/minors/materials-engineering/ (https://chme.nmsu.edu/academics/minors/materials-engineering/)). No courses may be taken S/U. All prerequisites for the classes must be met or consent of the instructor obtained before enrolling in class.

Prefix	Title	Credits
Required Courses		
CHME 361	Engineering Materials	3
Electives		15
Total Credits		**18**

Mathematics - Graduate Minor

Mathematics – Graduate Minor

Students pursuing a graduate minor in Mathematics must complete a minimum of 9 credit hours in graduate-level coursework with the MATH or STAT prefix at the 5200 level or above. Graduate students majoring in Mathematics may **not** also earn a minor in the same field. Students are encouraged to consult with the Department of Mathematical Sciences for guidance in selecting appropriate courses.

Prefix	Title	Credits
9 Credits of MATH or STAT Courses from the following list		9
MATH 5210	Complex Variables	
MATH 5220	Fourier Series and Boundary Value Problems	
MATH 5310	Introduction to Topology	
MATH 5320	Logic and Set Theory	
MATH 5330	Elementary Number Theory	
MATH 5340	Abstract Algebra I: Groups and Rings	
MATH 5350	Advanced Linear Algebra	
MATH 5360	Introduction to Real Analysis I	
MATH 5365	Introduction to Real Analysis II	
MATH 5410	Complex Analysis	
MATH 5420	Topology I	
MATH 5425	Topology II	
MATH 5428	Topics in Topology	
MATH 5430	Mathematical Structures in Logic	
MATH 5435	Universal Algebra and Model Theory	
MATH 5438	Topics in Foundations	
MATH 5440	Partial Differential Equations I	
MATH 5445	Partial Differential Equations II	
MATH 5450	Abstract Algebra II: Fields, Rings and Modules	
MATH 5453	Module Theory and Homological Algebra	
MATH 5455	Introduction to Commutative Algebra and Algebraic Geometry	
MATH 5458	Topics in Algebra	
MATH 5460	Measure and Integration	
MATH 5463	Real Analysis	
MATH 5465	Introduction to Functional Analysis	
MATH 5468	Topics in Analysis	
MATH 5996	Special Topics	
STAT 5210	Probability: Theory and Applications	
STAT 5220	Statistics: Theory and Applications	
STAT 5230	Elementary Stochastic Processes	
STAT 5310	Foundations of Probability	
STAT 5320	Advanced Topics in Stochastic Processes	
STAT 5330	Continuous Multivariate Analysis	
STAT 5335	Linear Models	
STAT 5340	Advanced Theory of Statistics I	
STAT 5345	Advanced Theory of Statistics II	
STAT 5348	Topics in Probability and Statistics	

Molecular Biology - Graduate Minor

The Molecular Biology Minor consists of 10 credit hours including MOLB 545; either MOLB 520 or MOLB 542; any of the tier II courses; and one MOLB 590 seminar.

Prefix	Title	Credits
Required Courses		
MOLB 545	Molecular and Biochemical Genetics	3
MOLB 520	Molecular Cell Biology	3
or MOLB 542	Biochemistry I	
MOLB 590	Discussions in Molecular Biology	1
Molecular Biology Tier II Courses		
Select one from the following:		3
AGRO 516	Molecular Analysis of Complex Traits	
ANSC 602	Advanced Reproductive Physiology (fo)	
ANSC 621	Metabolic Functions and Dysfunctions (fe)	

BCHE 546	Biochemistry II
BCHE 647	Physical Biochemistry
BIOL 451	Physiology of Microorganisms
BIOL 470	Developmental Biology
BIOL 474	Immunology
BIOL 475	Virology
BIOL 477	Applied and Environmental Microbiology
BIOL 478	Molecular Biology of Microorganisms
BIOL 490	Neurobiology
BIOL 541	Professional Development Seminar
BIOL 550	Special Topics
BIOL 577	Advanced Topics in Environmental Microbiology
BIOL 590	Neuroscience
BIOL 698	Selected Topics
EPWS 486	Plant Virology
MOLB 546	Biochemistry II
MOLB 650	Advanced Topics in Molecular Biology
TOX 461	Toxicology I
GENE 486	Genes and Genomes
Total Credits	**10**

Native American Studies - Graduate Minor

The purpose of the Native American Studies Graduate Minor are to:

- Provide an opportunity for all students to learn about Native American cultures and societies.
- Facilitate research and other creative activities that concern Native American peoples and that have potential benefit for them.
- Serve the University and State of New Mexico in ways that support and illuminate the rich heritage of Native American peoples.

The Graduate minor in Native American Studies focuses on Native American cultures and societies, deals with contemporary and historical experiences of American Indians, and examines the contributions of Indigenous peoples to life in the United States and other American nations. This specialization has developed in reaction to Western academic views of Native Americans and to the frequently restrictive, assimilationist approach within universities to issues concerning Native peoples. NAS contributes to a new understanding of Native American cultures and societies from contemporary and historical perspectives.

To qualify for a graduate minor in Native American Studies, students are required to complete 9 credit hours of graduate level courses. Two core requirements are NATV 5110 and NATV 4130. The third course is an elective from the remaining listed courses. To record a minor on a student's transcript, the minor must be listed on the Graduate School's Program of Study form, and the Native American Studies advisor in the Department of Borderlands and Ethnic Studies must sign this form.

Prefix	Title	Credits
Required Courses		
NATV 5110	Advanced Indigenizing Methodologies in Native American Studies	3
NATV 4130	Indigenous Ways of Knowing	3
Choose one course from the following:		*3*
NATV 4220	Federal Indian Policy (Choose one course from the following:)	
NATV 5210	Advanced Native American Education	
PHLS 5996	Special Topics (American Indian Health)	
NATV 5520	Advanced Native American Women	
Total Credits		**9**

[1] Alternative classes may be substituted with the approval of the student's MA chair and the Director for the Graduate Minor in Native American Studies, Dr. Georgina Badoni (gbadoni@nmsu.edu).

Physics - Graduate Minor

Eligibility

This minor is available to graduate students not majoring in Physics.

Requirements

A student must satisfy the following requirements to earn a graduate minor in Physics:

- Successfully complete 12 credit hours of courses in Physics numbered above 500. Of these, not more than 3 credit hours can be for research, independent study, or other informal courses.
- Pass one of the four sections of the Physics Department's Qualifying Exam at the Ph.D. level.
- A member of the Physics faculty must be a member of the student's graduate committee.

Psychology - Graduate Minor

Any master's or doctoral student can declare a minor in Psychology in addition to their major area of study.

Students may earn a minor in psychology at the M.A. or Ph.D. level by completing nine credits of any 500-level and above coursework in psychology EXCEPT the following courses (PSYC 5110 Quantitative Methods in Psychology I, PSYC 5120 Quantitative Methods in Psychology II, PSYC 5910 Research Seminar in Psychology, PSYC 5991 Special Research Programs, PSYC 5999 Master's Thesis, PSYC 6991 Doctoral Research, PSYC 7000 Doctoral Dissertation).

All minors must be approved by the minor department head and dean of the Graduate School. Students must declare the Psychology minor on a Program of Study and Committee Form for the Master's and doctoral level. Demonstration of competency in the minor area will be required at both comprehensive and final examinations. Students must also include a representative from the Psychology department on their thesis, comprehensive, and/or dissertation committees. The representative from the minor department can also serve as the Dean's Representative on the committee.

Range Science - Graduate Minor

A minimum of 9 credit hours in graduate level classes with the RGSC prefix are required to obtain a graduate minor in Range Science. Approval by the Animal and Range Sciences Department head is required.

Security Studies - Graduate Minor

Additional Courses

Other graduate courses may become available during the year which may be substituted for the above listed courses. Consideration may be made on a case-by-case basis.

Prefix	Title	Credits
Requirements		
Select three from the following:		9
POLS 549	Ethics in Government	
POLS 560	Seminar in International Relations Theory	
POLS 564	Advanced National Security Policy	
POLS 569	Advanced Issues in Globalization	
POLS 574	Contemporary Comparative Studies	
POLS 596	International Law	
Total Credits		**9**

Sociology - Graduate Minor

The Department of Sociology offers a Graduate Minor in Sociology to graduate students in other departments on campus at NMSU. For the minor in Sociology, students are required to complete 9 credits (3 courses) of graduate-level Sociology coursework. One course must be a core graduate Sociology course (SOCI 5153 Seminar in Sociological Research, SOCI 5157 Seminar in Qualitative Research Methods, SOCI 5163 Issues in Advanced Quantitative Analysis, and SOCI 5165 Foundations of Social Theory), and the remaining two courses must be elective Sociology courses. An elective Sociology course is any other non-core SOCI 5000+ course except for: SOCI 5110 Perspectives on Sociology, SOCI 5998 Internship and SOCI 5999 Master's Thesis.

Prefix	Title	Credits
Complete one course (3 credits) from the following:		3
SOCI 5153	Seminar in Sociological Research	
SOCI 5157	Seminar in Qualitative Research Methods	
SOCI 5163	Issues in Advanced Quantitative Analysis	
SOCI 5165	Foundations of Social Theory	
Complete two courses (6 credits) from any other SOCI 5000+ courses with the exception of SOCI 5110, 5998, 5999.		6
Total Credits		**9**

Spanish Counseling - Graduate Minor

The Minor in Spanish Counseling, offered through the Counseling and Educational Psychology department is open to graduate students who are enrolled in CEP's Counseling, School Psychology, and Counseling Psychology programs, and to graduate students who are enrolled in Social Work and Marriage and Family Therapy programs. It was established in the interest of meeting the needs of bilingual counseling students who seek training in the provision of Spanish language mental health services.

Prerequisites

In order to begin the Minor courses, students **must currently be enrolled in a Mental Health program** as described above. They must **demonstrate intermediate level Spanish language skills** as evidenced by the Spanish Placement Exam and an oral interview with the program coordinator. Advanced level in Spanish counseling skills is required for the completion of the Minor. If a student feels that he/she needs to improve his/her level of academic Spanish prior to completing the required course work, or if the program coordinator determines that it is necessary, the student has the option of taking additional Spanish courses through the Languages and Linguistics department. Students will be required to take Spanish language courses until they have satisfied this requirement. Please note that online courses will not fulfill this requirement.

How to Apply

If you are interested in pursuing a minor in Spanish Counseling, you are advised to meet with the CEP Program Coordinator, Yadira Ibanez (y1banez@nmsu.edu). It is best to meet with the program coordinator before enrolling in relevant coursework, but it is possible to obtain the minor after taking one of the courses in the program of study. This meeting will ensure that the minor is declared for graduation purposes. In addition, this meeting allows the CEP department to keep track of potential minors in order to determine what courses need to be offered at any given time. A Spanish Counseling Minor faculty member is also required to sit on the committee for the student's final exam. For Doctoral students, this includes orals, dissertation proposal and defense exams.

Program of Study

Students will successfully complete 9 credits of coursework specific to this program of study in order to obtain a Minor in Spanish Counseling. Courses will be taught by culturally competent faculty, adjunct professors, or community mental health professionals in the aforementioned disciplines. Students will choose one course from each of the following components: 1) Counseling language development, 2) Clinical experience, and 3) Sociocultural experiences.

Prefix	Title	Credits
Course Requirements		
Counseling Language Development (Component #1)		
Choose one from the following:		3
CEPY 6220	Spanish for Mental Health Professionals	
CEPY 5230	Counseling Theory and Technique	
Clinical Experience (Component #2)		
Choose one from the following:		3
CEPY 5997	Special Research Programs	
or CEPY 6996	Selected Topics	
CEPY 6590	Behavioral Health Practicum	
SOWK 5996	Special Topics	
FCST 5990	Supervised Clinical Practice	
Sociocultural Experiences (Comoonent #3)		
Choose one from the following:		3
SPAN 547	Advanced Hispanic Film	
or SPAN 548	Advanced U.S.-Hispanic Film	
SPAN 567	Advanced Study in Chicano Literature	
Total Credits		**9**

Component #1: Counseling Language Development

CEPY 6220 Spanish for Mental Health Professionals This course will help students acquire the necessary Spanish language skills needed to function as Spanish-speaking mental health professionals. The course will cover psychological terminology, concepts, and theories in Spanish. Examination of the professional roles of bilingual mental health professionals and their roles within Latina/o and underserved communities will also be addressed in this course.

CEPY 5230 Counseling Theory and Technique This course will assist students in learning and practicing basic, culturally-appropriate micro counseling skills in Spanish through individual, dyad, and small group participation.

Component #2: Clinical Experience

CEPY 5997 Special Research Programs/ CEPY 6996 Selected Topics This course will require students to spend a minimum of 6 hours per week at a bilingual site, providing counseling, assessment, or supervision services within a variety of clinical settings that serve Spanish-speaking populations. The Minor coordinator must approve all placements. This course will also integrate a Spanish-speaking student process group for bilingual counseling students. In this group, students will have the opportunity to develop bilingual multicultural counseling competencies. Students may also present clinical cases, theoretical perspectives, interventions or techniques in Spanish and receive feedback and support from other bilingual members. A summer semester immersion experience in providing counseling services in Spanish in a Latin American and/ or primarily Spanish-speaking country may be substituted for this experience.

Students have the option of completing their clinical hours for this course over **2 semesters** if so desired. The course requires an additional 6 clinical hours/week (if taken in one semester) or 3 clinical hours/week (if class is taken over the course of two semesters).

Note: *This course is not to replace required practicum or internship experiences necessary for degree completion. Students are allowed to count hours they are accruing for their internship and/or practicum as long as they are (1) enrolled in both courses [598/698 and either 578/675 or 580/684] (2) are meeting the requirements for the 598/698 course [i.e. attending class meetings, etc.] and (3) a separate log is kept documenting work with Spanish speaking clients; this log also has to be signed by both 598/698 instructor and site supervisor*

CEPY 6590 Behavioral Health Practicum This course will provide students the opportunity to participate in a supervised service-learning experience within community-based, interdisciplinary, primary care settings that serve medically underserved and high-risk groups. Students will each write and present a case study in Spanish regarding a Spanish-speaking client. Students will receive bilingual supervision regarding various topics such as training in Motivational Interviewing and discussion of Spanish-speaking clients from their practicum experience.

SOWK 5996 Special Topics This course will allow students to develop and practice skills in Spanish relevant to working with children and families in the child welfare system with a focus on the child protection process.

FCST 5990 Supervised Clinical Practice This course offers supervised clinical experience in Marriage and Family Therapy.

Component #3: Sociocultural Experiences

SPAN 547 Advanced Hispanic Film**/**SPAN 548 Advanced U.S.-Hispanic Film Advanced study of major films from Spain and Spanish-America and/or by Hispanics of the U.S.

SPAN 567 Advanced Study in Chicano Literature Study of all genres of Chicano literature.

*All courses outlined in the Program of Study have to be taken face-to-face. However, Spanish Counseling Minor Committee will review individual requests for any exceptions to this requirement.

Special Education - Graduate Minor

A minor in special education requires 9 credits of graduate coursework that carries the SPED prefix. Official minor documentation must be completed with the School of TPAL.

U.S.-Mexico Border Health Issues - Graduate Minor

A grade of B or higher is required for all requirements for this graduate minor.

Prefix	Title	Credits
Select four courses from the following:		12
PHLS 5610	Health Disparities: Determinants and Interventions	
PHLS 5620	Cross-Cultural Aspects of Health	
PHLS 5630	International Health Problems	
PHLS 5640	Rural Health Issues	
PHLS 5660	U.S.-Mexico Border Health Issues	
PHLS 5670	American Indian Health	
PHLS 5680	Hispanic Health Issues	
Total Credits		**12**

General Education & Viewing a Wider World Courses

Associates/Bachelor's General Education

The New Mexico General Education Requirements

General Education at NMSU provides all students with a broad foundation and common framework upon which to develop knowledge and skills, social consciousness and respect for self and others, thus enabling them to function responsibly and effectively now and in the future. General education courses at NMSU can be identified by the G suffix.

In accordance to state law (Post-Secondary Education Articulation Act) (https://www.srca.nm.gov/parts/title05/05.055.0006.html), the New Mexico Higher Education Department has established a state-wide model for General Education. Within the General Education model, is nine credits of electives that will be determined at an institutional level. The current approved NMSU General Education courses are listed below under each of the six general education areas.

Prefix	Title	Credits
Area I: Communications		**10**
Select one course from each sub group:		
English Composition-Level 1		
ENGL 1110G	Composition I	
ENGL 1110H	Composition I Honors	
ENGL 1110M	Composition I Multilingual	
English Composition-Level 2		
ENGL 2130G	Advanced Composition	
ENGL 2210G	Professional and Technical Communication	
ENGL 2210H	Professional and Technical Communication Honors	
ENGL 2210M	Professional and Technical Communication for Multilingual Students

THEA 1110G	Introduction to Theatre	
THEA 1210G	Acting for Non-Majors	
General Education Elective		**3-4**
This requirement can be met with any "G" course in any area, excluding Area I: Communications and any crosslisted courses, that exceeds the minimum requirement.		
or		
ENGR 100G	Introduction to Engineering	
or ENGR 100GH	Introduction to Engineering Honors	
Total Credits		**32-35**

[1] For Area III: Laboratory Sciences and Area IV: Social/Behavioral Sciences, students ***must*** take one course from each for a total of 7 credits.
Students will then take an additional course in either Area III or Area IV for 3-4 credits depending on the student's selection (i.e. Area III is 4 credits, Area IV is 3 credits).

Alternatives for Meeting General Education Requirements (9 credit hour rule)

Students taking nine or more credits in a specific subject area, even though the courses are not designated as General Education courses, will have met the general education requirements for that subject area. The courses can meet both major and general education requirements for the degree. For example, a student may complete ARTS 2610 Drawing II, ARTS 1240 Design I and ARTS 1250 Design II (9 hours) and thereby satisfy one course from the Area VI: Creative and Fine Arts category even though none of those courses carries a G suffix. Please check with the Center for Academic Advising and Student Support.

Applied Associates Degree

The New Mexico General Education Requirements

General Education at NMSU provides all students with a broad foundation and common framework upon which to develop knowledge and skills, social consciousness and respect for self and others, thus enabling them to function responsibly and effectively now and in the future. General education courses at NMSU can be identified by the G suffix.

In accordance to state law (Post-Secondary Education Articulation Act) (https://www.srca.nm.gov/parts/title05/05.055.0006.html), the New Mexico Higher Education Department has established a state-wide model for General Education. Within the General Education model, is nine credits of electives that will be determined at an institutional level. The current approved NMSU General Education courses are listed below under each of the six general education areas.

Prefix	Title	Credits
Select one course from four of the following six content areas for a total of 12-14 credits		**12-14**
Each course selected must be from a different area and students cannot take multiple courses in the same area.

Alternatives for Meeting General Education Requirements (9 credit hour Rule)

Students taking nine or more credits in a specific subject area, even though the courses are not designated as General Education courses, will have met the general education requirements for that subject area. The courses can meet both major and general education requirements for the degree. For example, a student may complete ARTS 2610 Drawing II, ARTS 1240 Design I and ARTS 1250 Design II (9 hours) and thereby satisfy one course from the Area VI: Creative and Fine Arts category even though none of those courses carries a G suffix. Please check with the Center for Academic Advising and Student Support.

NMSU Viewing a Wider World Requirements

The Viewing a Wider World (VWW) requirement fosters intelligent inquiry, abstract logical thinking, critical analysis, as well as the integration and synthesis of knowledge. The program strives for literacy in writing, reading, speaking and listening. It teaches mathematical structures, acquainting students with precise abstract thought about numbers and space. The program also encourages an understanding of science and scientific inquiry, as it provides a historical consciousness, including an understanding of one's own heritage as well as respect for other peoples and cultures. To achieve its goals, the program includes an examination of values and stresses the importance of a carefully considered values system as it fosters an appreciation of the arts and general education. It provides the breadth necessary to have a familiarity with the various branches of human understanding. All VWW courses can be identified by the "V" suffix.

Prior to graduating, NMSU students are required to take two courses from separate colleges from the Viewing a Wider World list in the Catalog. These courses are upper-division (300/300-400/4000 level) Viewing a Wider World courses and should be taken in a student's junior and/or senior year. One of the two courses must be in a college other than their own. The other course may be taken within their home college, but this course:

1. must be in a different department from their major department;
2. must not be cross-listed with a course in their home department;
3. cannot be counted as one of the requirements for the student's major.

These courses strongly emphasize the international character and multicultural influences in the fields of study and strengthen information retrieval skills. There are two options that NMSU allows for replacing 3 credits of VWW requirement with another form of educational experience, these are:

1. **Study Abroad Experience**- consisting of at least four weeks of a Study Abroad program or university coursework in a foreign country earning 3 credits.
2. **Military Experience**- for students who have served at least four weeks of military service in a foreign country.

The Military and Veterans Programs Office website (https://mvp.nmsu.edu/military-members/military-experience-waiver.html) provides the instructions on how to request the waiver for Military Experience replacing 3 credits of VWW.

NOTE: This list is under continuous revision. Please check with the office of the college associate dean or with college advisors for additional eligible courses. Honors courses have a specific college designation based on course content. These are listed near the end of this section.

Alternatives for Meeting Viewing a Wider World Requirements

Students taking nine or more credits in a specific subject area, even though the courses are not designated as Viewing a Wider World courses, will have met the VWW requirements for that subject area.

The 9 credit hours must be in 300 to 400 or 3000 to 4000 level courses in one prefix area. For example, 9 upper-division ECON credits would fulfill one VWW area for students majoring in programs other than Economics.

Common Course Numbering Crosswalk

The Post-secondary Education Articulation Act (https://hed.state.nm.us/resources-for-schools/public_schools/nm-course-numbering-system/) charges the New Mexico Higher Education Department with establishing and maintaining a common course numbering system, in consultation with faculty. To this end, the common course numbering system includes both equivalent (Common) and unique courses.

- **Common Course:** is any course that is offered at multiple institutions throughout the state, has the same prefix/number combination, the same title, the same description, and at least 80% of the learning outcomes for the course are the same.
- **Unique Course:** is any course that is unique to the institution (the NMSU system), has a prefix/number combination, title, description and learning outcomes that are unique to the institution (the NMSU System).

The table below shows the previous NMSU System-wide course prefix/number combination, the future Common Course Numbering prefix/number combination, and an indicator of whether the course is deemed Common or Unique throughout the state.

Current Course	Past Course	Course Type Indicator

College of Agricultural, Consumer, and Environmental Sciences

Dean and Chief Administrative Officer- ***Rolando A. Flores Galarza***

Associate Dean and Director of Academic Programs - ***Robert Torres***

Associate Dean and Director of the Cooperative Extension Service - ***Jon C. Boren***

Associate Dean and Director of the Agricultural Experiment Station - ***Jay Lillywhite***

Mission

The College of Agricultural, Consumer and Environmental Sciences (ACES) is an engine for economic and community development in New Mexico, improving the lives of New Mexicans through research, extension and teaching. ACES teaching programs help students discover new knowledge and become leaders in food and fiber production, environmental stewardship, water use and conservation and improving health in New Mexico and beyond.

The College's Academic Programs prepare students for a wide array of careers via its 20 plus bachelor degree programs, most of which are offered at no other institution in New Mexico. In addition to our undergraduate programs, ACES offers five doctoral and nine master's degree programs at the graduate level.

The College of Agricultural, Consumer and Environmental Sciences is comprised of eight departments:

- Agricultural and Extension Education (p. 329)
- Agricultural Economics and Agricultural Business (p. 343)
- Animal and Range Sciences (p. 357)
- Entomology, Plant Pathology and Weed Science (p. 380)
- Family and Consumer Sciences (p. 397)
- Fish, Wildlife and Conservation Ecology (p. 426)
- Plant and Environmental Sciences (p. 443)
- School of Hotel, Restaurant and Tourism Management (p. 477)

College Undergraduate Degree Requirements

1. Complete general education common core requirements.
2. Complete course requirements for the major.

3. Earn a minimum of 120 semester credits. Of this total at least 48 semester credits must be in upper-division courses (numbered 300 or above).
4. Earn a cumulative grade-point average of no less than 2.0.

Preprofessional Programs

NMSU offers a number of programs designed for transfer to professional schools through its undergraduate colleges. The program that is administered by the College of Agricultural, Consumer and Environmental Sciences is Preveterinary Medicine. Several majors are aligned for students to apply for the New Mexico State University Osteopathic Medicine Pathway Program to Burrell College of Osteopathic Medicine.

Veterinary Medicine (Preprofessional Training Only, Non-Degree)

The Doctor of Veterinary Medicine (D.V.M.) degree is a professional degree that is not offered by any college or university in New Mexico; however, you may complete the preparatory program required for admittance to the professional colleges of veterinary medicine at New Mexico State University.

The D.V.M. degree normally requires four years of training in a professional college subsequent to completion of a preveterinary program that requires at least three years of college-level instruction. In most instances a baccalaureate degree is a distinct advantage to the applicant.

Curriculum requirements are determined by the particular school or college of veterinary medicine. The Department of Animal and Range Sciences maintains current requirements for Colorado State University, Washington State, Oregon State, Texas Tech, and Texas A&M. You should check with an advisor for specific course requirements. As a student from New Mexico, you may be eligible for financial assistance under the program of the Western Interstate Commission for Higher Education (WICHE). See the section on WICHE in the General Information chapter under Resources for Students for more information.

Bachelor Degrees

A

- Agricultural and Extension Education (Agricultural Communications) - Bachelor of Science in Agriculture (p. 338)
- Agricultural and Extension Education (Agricultural Education Teaching) - Bachelor of Science in Agriculture (p. 339)
- Agricultural and Extension Education (Agricultural Extension/Development) - Bachelor of Science in Agriculture (p. 341)
- Agricultural Communications - Undergraduate Minor (p. 343)
- Agricultural Economics and Agricultural Business - Bachelor of Science in Agriculture (p. 352)
- Agronomy - Bachelor of Science in Agriculture (p. 458)
- Animal Science (Animal Industry) - Bachelor of Science in Agriculture (p. 372)
- Animal Science (Science) - Bachelor of Science in Agriculture (p. 374)
- Applied and Agricultural Biology (Applied Biology) - Bachelor of Science in Agriculture (p. 387)
- Applied and Agricultural Biology (Applied Microbiology) - Bachelor of Science in Agriculture (p. 389)
- Applied and Agricultural Biology (Entomology) - Bachelor of Science in Agriculture (p. 390)
- Applied and Agricultural Biology (Environmental Biology) - Bachelor of Science in Agriculture (p. 391)
- Applied and Agricultural Biology (Invasive Pest Biology and Management) - Bachelor of Science in Agriculture (p. 393)

C

- Conservation Ecology - Bachelor of Science in Conservation Ecology (p. 436)

E

- Environmental Science - Bachelor of Science in Environmental Science (p. 460)

F

- Family and Consumer Sciences Education - Bachelor of Science in Family and Consumer Sciences (p. 414)
- Fashion Merchandising and Design - Bachelor of Science in Family and Consumer Sciences (p. 415)
- Fisheries and Wildlife Science (Aquatic Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology (p. 437)
- Fisheries and Wildlife Science (Wildlife Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology (p. 440)
- Food Science and Technology (Science, Technology and Engineering) - Bachelor of Science in Food Science and Technology (p. 418)

G

- General Agriculture - Bachelor of Science in Agriculture (p. 395)
- Genetics and Biotechnology - Bachelor of Science in Genetics (p. 462)

H

- Horticulture (Turfgrass Science and Management) - Bachelor of Science in Agriculture (p. 467)
- Horticulture - Bachelor of Science in Agriculture (p. 464)
- Hotel, Restaurant and Tourism Management - Bachelor of Science (p. 489)
- Hotel, Restaurant and Tourism Management - Bachelor of Science (Online) (https://catalogs.nmsu.edu/global/nmsu-global/hotel-restaurant-tourism-mgt-bs-online/)
- Human Development and Family Science - Bachelor of Science (Online) (https://catalogs.nmsu.edu/global/nmsu-global/human-development-family-science-bs-online/)
- Human Nutrition and Dietetic Science (Nutrition Education) - Bachelor of Science in Family and Consumer Sciences (p. 419)
- Human Nutrition and Dietetic Science (Pre-Dietetics/Dietetics) - Bachelor of Science in Family and Consumer Sciences (p. 422)

N

- Natural Resource Economics and Policy - Bachelor of Science in Agriculture (p. 354)

R

- Range Science - Bachelor of Science in Agriculture (p. 377)

S

- Soil Science (Environment and Resource Management) - Bachelor of Science in Agriculture (p. 470)
- Soil Science (Soil and Water Science) - Bachelor of Science in Agriculture (p. 472)
- Soil Science (Soils) - Bachelor of Science in Agriculture (p. 474)

Masters Degrees

A

- Agricultural and Extension Education (Agricultural Strategic Communications) - Master of Arts (Online) (https://catalogs.nmsu.edu/global/nmsu-global/agricultural-extension-education-agricultural-strategic-comm-ma-online/)
- Agricultural and Extension Education - Master of Arts (p. 99)
- Agricultural and Extension Education - Master of Arts (Online) (https://catalogs.nmsu.edu/global/nmsu-global/agricultural-extension-education-ma-online/)
- Agricultural Economics - Master of Science (p. 102)
- Agriculture (Agribusiness) - Master of Agriculture (p. 97)
- Agriculture (Agribusiness) - Master of Agriculture (Online) (https://catalogs.nmsu.edu/global/nmsu-global/agriculture-agribusiness-mag-online/)
- Agriculture (Domestic Animal Biology) - Master of Agriculture (p. 98)
- Agriculture (Domestic Animal Biology) - Master of Agriculture (Online) (https://catalogs.nmsu.edu/global/nmsu-global/agriculture-domestic-animal-biology-master-agriculture-online/)
- Animal Science - Master of Science (p. 104)
- Applied and Agricultural Biology - Master of Science (p. 101)

F

- Family and Consumer Sciences (Couples, Marriage and Family Therapy) - Master of Science (p. 159)
- Family and Consumer Sciences (Food Science and Technology) - Master of Science (p. 159)
- Family and Consumer Sciences (Food Science and Technology) - Master of Science (Online) (https://catalogs.nmsu.edu/global/nmsu-global/family-consumer-sciences-food-science-technology-ms-online/)
- Family and Consumer Sciences (Hotel, Restaurant and Tourism Management) - Master of Science (p. 160)
- Family and Consumer Sciences (Hotel, Restaurant and Tourism Management) - Master of Science (Online) (https://catalogs.nmsu.edu/global/nmsu-global/family-consumer-sciences-hrtm-ms-online/)
- Family and Consumer Sciences (Human Nutrition and Dietetic Sciences) - Master of Science (Online) (https://catalogs.nmsu.edu/global/nmsu-global/family-consumer-sciences-hnds-ms-online/)
- Fish, Wildlife and Conservation Ecology - Master of Science (p. 162)

H

- Horticulture - Master of Science (p. 168)

P

- Plant and Environmental Science - Master of Science (p. 180)

R

- Range Science - Master of Science (p. 185)

W

- Water Science and Management (Agricultural Water Resources) - Master of Science (p. 196)
- Water Science and Management (International Water Resilience) - Master of Science (p. 196)
- Water Science and Management (Water Economics and Policy) - Master of Science (p. 197)
- Water Science and Management (Water Informatics) - Master of Science (p. 197)
- Water Science and Management (Water Quality and Treatment) - Master of Science (p. 198)
- Water Science and Management (Watersheds and Aquatic/Riparian Wetlands) - Master of Science (p. 199)
- Water Science and Management - Master of Science (p. 195)

Doctoral Degrees

A

- Animal Science - Doctor of Philosophy (p. 200)
- Applied and Agricultural Biology - Doctor of Philosophy (p. 201)

P

- Plant and Environmental Science - Doctor of Philosophy (p. 233)

R

- Range Science - Doctor of Philosophy (p. 234)

W

- Water Science and Management (Agricultural Water Resources) - Doctor of Philosophy (p. 239)
- Water Science and Management (International Water Resilience) - Doctor of Philosophy (p. 240)
- Water Science and Management (Water Economics and Policy) - Doctor of Philosophy (p. 240)
- Water Science and Management (Water Informatics) - Doctor of Philosophy (p. 241)
- Water Science and Management (Water Quality Treatments) - Doctor of Philosophy (p. 241)
- Water Science and Management (Watershed and Aquatic/Riparian Wetlands) - Doctor of Philosophy (p. 242)
- Water Science and Management - Doctor of Philosophy (p. 239)
- Wildlife and Fisheries Ecology - Doctor of Philosophy (p. 242)

Undergraduate Minors

A

- Agricultural Business Management- Undergraduate Minor (p. 357)
- Agricultural Communications - Undergraduate Minor (p. 343)
- Agronomy - Undergraduate Minor (p. 476)

C

- Conservation Ecology - Undergraduate Minor (p. 443)
- Culinary Science - Undergraduate Minor (p. 424)

D

- Dairy Science - Undergraduate Minor (p. 379)

E

- Entomology - Undergraduate Minor (p. 397)
- Environmental Science - Undergraduate Minor (p. 476)

F

- Fashion Merchandising & Design - Undergraduate Minor (p. 425)
- Food Science - Undergraduate Minor (p. 425)

G

- Genetics and Biotechnology - Undergraduate Minor (p. 476)

H

- Horse Management - Undergraduate Minor (p. 379)
- Horticulture - Undergraduate Minor (p. 477)
- Hotel, Restaurant and Tourism Management - Undergraduate Minor (p. 491)
- Hotel, Restaurant and Tourism Management - Undergraduate Minor (Online) (https://catalogs.nmsu.edu/global/nmsu-global/hotel-restaurant-tourism-management-undergraduate-minor-online/)
- Human Animal Interaction - Undergraduate Minor (p. 379)
- Human Development and Family Science - Undergraduate Minor (Online) (https://catalogs.nmsu.edu/global/nmsu-global/human-development-family-science-undergraduate-minor-online/)

I

- Interior Spaces - Undergraduate Minor (p. 425)

L

- Leadership in Agricultural Communications - Undergraduate Minor (p. 343)
- Livestock Production - Undergraduate Minor (p. 379)

M

- Meat Science - Undergraduate Minor (p. 425)

N

- Natural Resource Economics - Undergraduate Minor (p. 357)
- Nutrition - Undergraduate Minor (p. 426)

P

- Pest Management - Undergraduate Minor (p. 397)
- Plant Pathology - Undergraduate Minor (p. 397)

R

- Ranch Management - Undergraduate Minor (p. 380)
- Range Science - Undergraduate Minor (p. 380)

S

- Soil Science - Undergraduate Minor (p. 477)

W

- Weed Science - Undergraduate Minor (p. 397)
- Wildlife Science - Undergraduate Minor (p. 443)

Graduate Minors

A

- Agribusiness - Graduate Minor (p. 254)
- Agricultural and Extension Education - Graduate Minor (p. 254)
- Animal Science - Graduate Minor (p. 254)

F

- Fish, Wildlife and Conservation Ecology - Graduate Minor (p. 255)
- Food Studies - Graduate Minor (p. 256)

R

- Range Science - Graduate Minor (p. 260)

Accreditation

The Agricultural Education Teaching program in the Department of Agricultural and Extension Education is accredited by the Council for the Accreditation of Educator Preparation (formerly NCATE) and the State Public Education Department of New Mexico. It is critical that students consult their academic advisor prior to selection of courses for the agriculture, secondary science and teaching endorsements.

The Family and Consumer Sciences Education major in the Department of Family and Consumer Sciences is accredited by the Council for the Accreditation of Educator Preparation (formerly NCATE) and the State Public Education Department of New Mexico, and meets the teacher licensure requirements for the State of New Mexico. Course selection is restricted to meet accreditation requirements, so students should consult their academic advisor prior to selection of courses for the Family and Consumer Sciences Education program.

The Human Nutrition & Dietetic Science (HNDS) major, Dietetics option, is a Didactic Program in Dietetics (DPD) accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). The program meets national requirements to prepare students for a Dietetic Internship. Course selection is restricted to meet accreditation requirements. Students should consult their academic advisor prior to selection of courses for the HNDS Dietetics program.

Agricultural and Extension Education

Undergraduate Program Information

The department offers a broad curriculum with majors, options, and minors that prepare students for many careers as professional educators, communicators, and leaders in agricultural, natural resource, technology, and related disciplines. Some example occupations that the department prepares its students to enter are agricultural education teacher, media specialist, technology teacher, Extension agent, NMDA or USDA professional, industry educational specialist, and development specialist. Graduates work in domestic and/or international settings.

General Undergraduate Degree Requirements

You must meet the general education and departmental requirements for the degree and the major, option or minor chosen. You must establish a cumulative grade-point average of not less than 2.5 before you are admitted into the student teaching or other internship program. You need a minimum of 48 hours in technical agriculture for the secondary teaching certificate program in agriculture.

You may select technical courses required for completion of the majors and options from the following areas:

- Agricultural economics (p. 343)
- Agricultural mechanics
- Animal and range sciences (p. 357)
- Entomology, plant pathology and weed science (p. 380)
- Fish, wildlife and conservation ecology (p. 426)
- Plant and environmental sciences (p. 443)

Graduate Program Information

The Department of Agricultural and Extension Education requires the following items be sent directly to the department for admission:

- **Three letters of recommendation -** Applicants should request letters of recommendation from individuals who know them well enough to comment on their professional skills and abilities, and on their ability to complete graduate-level work.
- **Career statement -** The two-page letter of application should clearly identify applicant's professional and career goals as well as reasons for pursuing the degree.
- **Personal Interview -** Upon receipt of all application materials, a personal interview may be required at the discretion of the Departmental Graduate Committee.

***Do not send the above items to the Graduate School as this will cause a delay on your admission status. For questions regarding AXED Graduate Programs, please contact Dr. William Norris, Graduate Coordinator,* wnorris1@nmsu.edu.**

General Graduate Degree Requirements

The major requires courses in research methods, teaching methods and data collection and analysis; a graduate seminar; and a thesis or creative component. The department also have two 9 credit minors which are available to students completing major work in other departments.

Thesis plan: Requires a minimum of 30 semester credits which includes 4-6 credits of thesis. *(Both plans require a final oral examination).*

Non-Thesis plan: Requires 32 semester credits of course work which includes a focused creative component. *(Both plans require a final oral examination).*

Flexibility in each program allows students to pursue professional interests and develop specialized competencies in agricultural and extension education, technology education, and technical and scientific areas. The department delivers courses in evening, weekend, and distance formats (go to https://global.nmsu.edu/ and click on degree programs, then Agricultural and Extension Education) to accommodate student needs. Previous experience in teaching, extension, and/or other professional education positions is highly recommended to be considered for a graduate teaching assistantship.

The department offers major work for a Master of Arts in Agricultural and Extension Education. The degree can be obtained with an emphasis in

- Agricultural Teacher Education,
- Extension Education,
- Strategic Communications

Degrees for the Department

Bachelor's Degree(s)

- Agricultural and Extension Education (Agricultural Communications) - Bachelor of Science in Agriculture (p. 338)
- Agricultural and Extension Education (Agricultural Education Teaching) - Bachelor of Science in Agriculture (p. 339)
- Agricultural and Extension Education (Agricultural Extension/ Development) - Bachelor of Science in Agriculture (p. 341)

Master's Degrees

- Agricultural and Extension Education - Master of Arts (p. 99)

Minors for the Department

- Agricultural and Extension Education - Graduate Minor (p. 254)
- Agricultural Communications - Undergraduate Minor (p. 343)
- Leadership in Agricultural Communications - Undergraduate Minor (p. 343)

Dr. Richie Roberts, Department Head

Professors: *Richie Roberts*; ***Assistant Professors*** Norris, Spears, Rankin, Dyment

Richie Roberts, Ph.D. (Oklahoma State University)- agricultural education, agricultural extension, global education; Kristopher Rankin, Ph.D. (Oklahoma State University)– agricultural education, agricultural mechanization, methods of instruction, curriculum design; William Norris, Ph.D. (Mississippi State)– youth development, youth leadership, youth program development; Madison Dyment, Ph.D. (University of Florida) - visual and science communication, streaming science, and the scholarship of teaching and learning; L Spears, Ph.D. (Iowa State University) - agricultural education and studies, curriculum and instructional technology.

Agricultural Extension Education Courses

AXED 1110. Introduction to Agricultural, Extension, and Technology Education
3 Credits (3)
Orientation to programs, philosophies, competencies and leadership skills needed by professionals in agricultural and technology education,

extension education, agricultural communications, and related career opportunities in industry, governmental agencies, and international organizations.

Learning Outcomes

1. Orient student to the AXED Department and their role as students.
2. Explore career opportunities (and the related skill sets needed for success) in public schools, career and technical institutions, the cooperative extension service, community, and international development, agricultural communications, agricultural industry associations and public service (e.g., NMDA and USDA).
3. Develop an understanding of the self-leadership skills needed to be effective in a variety of professional and personal environments.
4. Familiarize students with the aspects included within a total program in agricultural or technology education.
5. Strengthen skills in oral and written communications.

AXED 1130. Techniques in Agricultural Mechanization
3 Credits (2+2P)

Development of competencies in agricultural mechanics including safety, tool identification, operation and maintenance of hand and power tools, cold metal, drafting, and plumbing procedures. Designed for any major wishing to improve mechanical skills needed in agriculturally related occupations in education and industry.

Learning Outcomes

1. To understand basic drafting language used in orthographic and isometric drawings.
2. To develop an understanding of the proper use and safety of basic hand and power tools.
3. To develop skills needed to operate basic hand and power tools correctly.
4. To develop an understanding of surveying methods and building layout for construction.
5. To develop an adequate level of competence in workshop techniques.
6. To prepare students to properly teach and demonstrate these techniques to others who may use them as a means of earning a living.

AXED 2110. Metal Fabrication
3 Credits (2+4P)

Instruction and skill development in process and procedures of metal fusion, including gas and electric welding techniques, safety, and oxy-acetylene cutting and welding. Designed to improve mechanical skills needed in agriculturally related occupations in education and industry.

Learning Outcomes

1. To develop students understanding and appreciation for metal fabrication, design and teaching.
2. To develop in the student an adequate level of competence in shop work techniques, so that the student may be able to properly teach and demonstrate multiple metal fabrication techniques to others who may use them as a mean of earning a living.
3. To develop the student's fundamental techniques in shielded metal arc welding, oxy-acetylene welding and cutting operations, metal inert gas welding (MIG), and gas tungsten-arc welding as needed in repair and construction of agricultural equipment.
4. Student will understand appropriate shop management techniques and have an appreciation for mechanized agriculture.
5. To assist the student in developing an understanding and comprehension of the fundamental principles that apply to the area of basic shop work included in this course; such as proper selection of electrodes, oxy-acetylene filler rods, welding processes best suited for given welding conditions, the proper tool for the job, etc.
6. To develop in the student comprehension of safety practices that apply to the areas of basic shop work, tools, and equipment required in the course.

AXED 2130. Early Field-Based Experience
2 Credits (2)

First Hand view of the roles of professional educators through field experiences with Cooperative Extension or other government agencies. Includes 4 weeks of classroom instruction and 30 hours of observation in a work setting. Consent of Instructor required. Restricted to Las Cruces campus only.

Learning Outcomes

1. Identify successful characteristics, tips and strategies that an agricultural education professional may use as part of their program.
2. Identify key components of an agricultural education program
3. Actively observe a local agricultural education program.
4. Identify ways that your agency program networks and interacts with clientele and community

AXED 2996. Special Topics
1-4 Credits (1-4)

Specific subjects and credits to be announced in the Schedule of Classes. Student can only take up to 6 credits per semester, and will not be able to have more than 12 credits count towards their degree. May be repeated up to 12 credits.

Learning Outcomes

1. Varies

AXED 3105. Introduction to Special Education in Career and Technical Education
3 Credits (3)

Characteristics, identification, and educational needs of exceptional learners. Attention is given to the various types of programs serving exceptional learners. Designed for all professional personnel who work with exceptional learners. Specific strategies for working with students with special needs in a shop or laboratory setting within the Career and Technical Education environment will be included.

Learning Outcomes

1. Discuss historical and current legislation pertaining to exceptional learners and their families and its impact on professional practice in the field.
2. Discuss historical and current legislation pertaining to exceptional learners and their families and its impact on professional practice in the field.
3. Explain the major components of an IEP and its processes, as well as the roles of learners, families and professionals on the team.
4. Discuss the different service delivery models and discuss the principles, practices, and pragmatics of inclusion co-teaching.
5. Analyze the disability categories under IDEA, 2004; characteristics, etiology, and diagnostic criteria.
6. Examine educational considerations for exceptional learners (educational approaches [Universal design and differentiated instruction], assistive technology, accommodations, modifications, and related supports and services).
7. Employ culturally responsive evidence-based practices to create family/school/community partnerships to promote academic achievement and prepare students for their post-school transitions.

8. Evaluate and synthesize research literature on a selected topic from current special education research.
9. Develop hands-on laboratory activities and educational strategies that are appropriate for a wide variety of learners.

AXED 3115. Small Engine Technology
3 Credits (2+2P)
Development of competencies in small gasoline engines; theory, operation, design, maintenance and safety. Designed for any major wishing to improve mechanical skills needed in agriculturally related occupations in education and industry. May be repeated up to 3 credits.

AXED 3120. Agricultural Structures
3 Credits (2+3P)
Selection and use of agricultural building materials. Design, construction, and maintenance of agricultural structures. Development of competencies in carpentry, concrete, electricity, masonry, and safety. Designed for any major wishing to improve mechanical skills needed in agriculturally related occupations in education and industry. May be repeated up to 3 credits.

AXED 3130. Advanced Technology in the Agricultural Mechanization
3 Credits (2+3P)
Students will construct a project in the area of agricultural mechanization under the direction of instructor. Project must be completed within a semester and of sufficient complexity for 3 credits.
Prerequisite: AXED 1130 and AXED 2110 or consent of instructor.

AXED 3150. Philosophy and Methods of Contests
3 Credits (3)
Covers the roles that career development events (contests) play in agricultural and technology education and in extension programs. Topics include competition and cooperation, winning and losing, ethics, use of community resources, and academic and employability skills taught through contests. Coaching as a teaching method is introduced and expanded. Students will assist with the coordination of various career development events. May be repeated up to 3 credits.

AXED 3210V. John Muir: Lessons in Sustainability
3 Credits (3)
This course examines the life of John Muir in the context of sustainability. Muir was a farmer, inventor, explorer, botanist, glaciologist, conservationist, and noted nature author. He was influential in the National Parks movement and in starting the Sierra Club. Living in the natural world influenced his faith and philosophy. By examining his life and the themes that shaped it, students will develop an understanding of what it means to live sustainably and to contribute beyond their personal lives to a sustainable future. May be repeated up to 3 credits.

AXED 3996. Special Topics
1-4 Credits (1-4)
Course addresses specific subjects and issues as identified by department. Topics and credits to be announced in the Schedule of Classes. Students can only take up to 4 credits per semester and no more than 6 credits of the course may be applied to a degree. May be repeated up to 12 credits.
Learning Outcomes
1. Various

AXED 4110. Management of Change, Diffusion, and Adoption of Innovations
3 Credits (3)
Factors that influence the rates of diffusion and adoption of innovations. Consequences of adopting or rejecting innovations. Processes by which change agents influence introduction and adoption of innovations. Taught with AXED 5110. May be repeated up to 3 credits.
Learning Outcomes
1. Critically examine the adoption-diffusion model. Included are issues such as social class differentials in the dissemination of ideas and technology, non-adoption as a form of behavior, social and economic constraints on adoption behavior, and the consequences of adoption at both the individual and social levels.
2. Demonstrate understanding of how the rapid pace of change in technology and applied science may have good and bad outcomes.
3. Discuss the dissemination of new ideas and technology within various social units.
4. Discuss the applications of the adoption-diffusion model from the perspective of the change agent.
5. Enhance the development of leadership skills required to work with people in times of change.

AXED 4210. Curriculum Development and Assessment in Agricultural Education
3 Credits (3)
This course prepares students to develop curriculum, design lessons, and prepare appropriate assessments in an agricultural education setting. An emphasis will be placed on the developing curriculum using the currently established resources that are available to agriculture teachers.
Prerequisite: 2.5 GPA.

AXED 4215. Developing Excellent Programs in Career and Technical Education
3 Credits (3)
This course prepares students to effectively manage Supervised Agricultural Experiences (SAEs) as part of a comprehensive agricultural education program. Participants will learn strategies for guiding students in planning and conducting meaningful SAEs, utilizing the Agricultural Experience Tracker (AET) for recordkeeping and progress tracking, and developing high-quality award applications for proficiency awards, degrees, and other recognitions. Emphasis will be placed on integrating SAEs into classroom instruction and FFA activities to support the three-component model of agricultural education.
Learning Outcomes
1. Recognize the underlying philosophy of the SAE/FFA as an integral part of the total agricultural education program.
2. Describe ethical behavior as an FFA advisor and agricultural educator, including the proper management of finances.
3. Develop a personal philosophy for implementing SAE/FFA into the total agricultural education program.
4. Identify principles and practices for developing and conducting SAE programs.
5. Identify the importance of effectively supervising student SAEs, including safety considerations.
6. Apply record keeping skills in the use of the AET record book system.
7. Interpret the types of awards offered through the State and National FFA Organization.
8. Describe various opportunities, offered in the total agricultural education program at the local, state, and national level.

AXED 4220. Methods for Teaching Agricultural and Technology Education
3 Credits (3)
Methods of instruction and presentation, selection of teaching aids and support materials, classroom management, development of a complete educational program, and microteaching experiences. May be repeated up to 3 credits.

Prerequisite: GPA of 2.5 or above.

AXED 4230. Directed Teaching in Agricultural or Technology Education
15 Credits (15)
Semester-long off-campus professional experience in directed teaching and observation provided in selected centers under secondary agricultural or technology education supervising teachers. Consent of Instructor required.
Prerequisite: AXED 4215, AXED 4220 and consent of instructor.

AXED 4235. Directed Teaching in Extension Education
3-12 Credits (3-12)
Four-to-fourteen-week, professional experiences in directed teaching and observation provided in cooperative extension at the county, regional, or state level. Consent of instructor required. May be repeated up to 12 credits.

AXED 4330. Content Area Literacies
3 Credits (3)
Surveys integrated reading/writing/discursive practices in middle/secondary content areas.

Learning Outcomes

1. Analyze literacy processes, as they pertain to adolescent learners.
2. Discuss current trends and issues in content area literacy instruction with a specific focus on practices that promote achievement and equity.
3. Evaluate instructional practices that help students use reading, writing, speaking, listening, viewing and visually representing to learn the content areas.
4. Illustrate ethical reasoning and decision making in your approach to content area literacy education.
5. Integrate research, reflection, and best practices that positively impact students in a diverse society.

AXED 4510. Introduction to Research Methods
3 Credits (3)
Introduction to research design and methodology in education and behavioral sciences. Overview of common research designs and data collection strategies. Prepares students to critique published research and understand basic skills including hypothesis development and conducting a literature search. Students must be in junior standing to enroll. May be repeated up to 3 credits.

AXED 4520. Methods in Career and Technical Laboratory Instruction
2 Credits (2)
For students planning to teach agricultural or technology education at a secondary or postsecondary level. Focus on planning, delivering, and evaluating instruction in laboratories; and on CPR, first aid, and NCCER certifications. Laboratory safety and tool, equipment, and laboratory management systems are also emphasized. Restricted to AXED Majors. May be repeated up to 2 credits.

AXED 4610. Leadership On Agricultural and Natural Resource Issues
3 Credits (3)
Investigates leadership concepts and group dynamics as they relate to a changing world and complex agricultural and natural resource issues. Topics include emotional intelligence, leading change, political leadership, facilitating agreement, team building, and managing conflict in agricultural and natural resource settings. May be repeated up to 3 credits.

AXED 4620. Methods of Teaching Biological, Earth and Physical Sciences in Agriculture
3 Credits (3)
Students learn to set up and teach in a modular agriscience laboratory, utilizing a variety of technologies. Modules covered focus on incorporating biological, earth and physical sciences into agricultural instruction and may include: Tissue culture, animal anatomy, hydroponics microscopy, electrophoresis, microbiology, soils and plant nutrients, water quality, water systems, entomology, integrated pest management, and renewable energy applications. Students develop their own modules and/or experiments.

AXED 4710. 4-H Youth Development
1 Credit (1)
On-line course explores 4-H Youth Development as an integral part of the Cooperative Extension Service. Topics to be addressed include mission, philosophy, delivery modes, audiences and partnerships. Course is relevant for anyone interested in pursuing a career in Cooperative Extension. May be repeated up to 1 credit.

AXED 4715. The FFA Organization: An Overview
1 Credit (1)
Online course addressing the history, mission, philosophy and structure of the New Mexico and National FFA Organizations and their relationship to supervised agriculture experiences and the agricultural education curriculum. Course is relevant for anyone interested in pursuing a career in agricultural education. May be repeated up to 1 credit.

AXED 4991. Undergraduate Research
1-4 Credits (1-4)
Research experience in agricultural, extension, and technology education with applications to selected issues and problems. May be repeated up to 4 credits.

AXED 4997. Independent Study in Agricultural, Extension, or Technology Education
1-3 Credits (1-3)
Specific subjects are agreed upon by the student and instructor. Students must be juniors or seniors to enroll. May be repeated up to 6 credits.

AXED 5105. Introduction to Special Education in Career and Technical Education
3 Credits (3)
Characteristics, identification, and educational needs of exceptional learners. Attention is given to the various types of programs serving exceptional learners. Designed for all professional personnel who work with exceptional learners. Specific strategies for working with students with special needs in a shop or laboratory setting within the Career and Technical Education environment will be included.

Learning Outcomes

1. Discuss historical and current legislation pertaining to exceptional learners and their families and its impact on professional practice in the field.
2. Discuss historical and current legislation pertaining to exceptional learners and their families and its impact on professional practice in the field.
3. Explain the major components of an IEP and its processes, as well as the roles of learners, families and professionals on the team.
4. Discuss the different service delivery models and discuss the principles, practices, and pragmatics of inclusion co-teaching.
5. Analyze the disability categories under IDEA, 2004: characteristics, etiology, and diagnostic criteria.
6. Examine educational considerations for exceptional learners (educational approaches [Universal design and differentiated instruction], assistive technology, accommodations/modifications, and related supports and services).

7. Employ culturally responsive evidence-based practices to create family/school/community partnerships to promote academic achievement and prepare students for their post-school transitions.
8. Evaluate and synthesize research literature on a selected topic from current special education research.
9. Develop hands-on laboratory activities and educational strategies that are appropriate for a wide variety of learners.

AXED 5110. Management of Change, Diffusion, and Adoption of Innovations
3 Credits (3)
Factors that influence rates of diffusion and adoption of innovations. Consequences of adopting or rejecting innovations. Processes by which change agents influence introduction and adoption of innovations. Taught with AXED 4110 with differential assignments for graduate students. May be repeated up to 3 credits.
Learning Outcomes
1. Critically examine the adoption-diffusion model. Included are issues such as social class differentials in the dissemination of ideas and technology, non-adoption as a form of behavior, social and economic constraints on adoption behavior, and the consequences of adoption at both the individual and social levels.
2. Demonstrate understanding of how the rapid pace of change in technology and applied science may have good and bad outcomes.
3. Discuss the dissemination of new ideas and technology within various social units.
4. Discuss the applications of the adoption-diffusion model from the perspective of the change agent.
5. Enhance the development of leadership skills required to work with people in times of change.

AXED 5130. Advanced Agricultural Mechanization
3 Credits (3)
This course provides an overview of advanced agriculture mechanization techniques and concepts. Precision farming tools and applications will be introduced, and hands-on activities will be utilized. A discussion about applications and benefits will frame the course lectures.
Learning Outcomes
1. Describe and classify various precision agriculture software/hardware technologies
2. Demonstrate usage of various precision agriculture technologies
3. Understand decision making processes associated with implementation of precision agriculture technologies
4. Analyze the costs, time, and application of precision agriculture technologies

AXED 5150. Strategic Communications Campaigns and Evaluation
3 Credits (3)
Client-based marketing and communication needs for stakeholders in agricultural and life sciences. Students will learn brand awareness for agricultural stakeholders by developing a campaign of communications and marketing materials using multiple channels (e.g., written, visual, social). Students will also evaluate the materials for their audience reach, visibility, and effectiveness. Strategic communications involve planning, prioritizing, and evaluating. Students will gain experience implementing these needs with a real-world client to keep materials relevant to industry demands. May be repeated up to 3 credits.
Learning Outcomes
1. Identify communications-related needs with a client or stakeholder in the food, agricultural, natural resources, and human (FANH) sciences.
2. Define priority communications areas to address client or stakeholder needs.
3. Direct a communications plan with channels, tactics, steps, and timelines.
4. Develop a campaign of communications materials (e.g., written, visual, social) around a client's needs.
5. Evaluate the reach, visibility, and effectiveness of the communications materials.
6. Manage a client's brand with desired audiences through establishing, promoting, and reinforcing messages.
7. Publish portfolio materials showcasing the client's brand.

AXED 5155. Youth Program Development and Management
3 Credits (3)
Designed for professionals involved in youth group activities. Basic concepts in planning, conducting, and managing educational youth programs in a variety of organizations. Taught with AXED 415 with differentiated assignments for graduate students. May be repeated up to 3 credits.

AXED 5160. Teaching Adults in Nonformal Settings
3 Credits (3)
The adult and postsecondary learner; adult learning styles and principles; use of community resources and problem-solving techniques; and learning strategies for adults in formal and nonformal education. Taught with AXED 430 with differentiated assignments for graduate students. May be repeated up to 3 credits.

AXED 5165. History and Philosophy of Agricultural and Extension Education
3 Credits (3)
History and Philosophy of Agricultural and Extension Education serves as a foundational core of graduate studies in Agricultural and Extension Education. The design of the course is to acquaint the student with a broad perspective of cultural and historical conditions that have shaped both education and agricultural education as we know it today. The primary purpose of this course is to explore the nature of selected philosophical concepts and philosophers and to evaluate their influence upon education and agricultural/extension education in the United States. In addition to philosophical influences, students will examine the historical events and governmental laws and policies that have evolved and developed our educational system of today.
Learning Outcomes
1. Understand the principles of philosophy in education and agricultural and extension education.
2. Recognize the influence of philosophers and philosophical documents upon education and agricultural and extension education.
3. Analyze the historical foundations that have established our modern educational system.
4. Develop a personal philosophy regarding education and agricultural education.

AXED 5170. Keys for Agricultural and Rural Development
3 Credits (3)
Introduction to concepts of development, the process of change, key factors that contribute to agricultural and rural development in a community, and strategies employed to effect change with implications for international students or domestic students planning to work internationally. May be repeated up to 3 credits.

AXED 5210. Curriculum Development and Assessment in Agricultural Education
3 Credits (3)
This course prepares students to develop curriculum, design lessons, and prepare appropriate assessments in an agricultural education setting. An emphasis will be placed on the developing curriculum using the currently established resources that are available to agriculture teachers.
Prerequisite: 2.5 GPA.

AXED 5215. Developing Excellent Programs in Career and Technical Education
3 Credits (3)
Students learn to develop excellence in the three components of a successful secondary school program in career and technical education: classroom and laboratory instruction, career and technical student organizations, and career development activities. Community-based program planning, utilizing partners, program marketing, and professional development are addressed as strategies for achieving excellence. Methods of obtaining financing and maintaining accountability of the program are discussed. Taught with AXED 445 with differentiated assignments for graduate students. May be repeated up to 3 credits.

AXED 5220. Methods for Teaching Agricultural and Technology Education
3 Credits (3)
Methods of instruction and presentation, selection of teaching aids and support materials, classroom management, development of a complete educational program, and microteaching experiences. Taught with AXED 446. May be repeated up to 3 credits.
Prerequisite: GPA of 3.0 or above.

AXED 5230. Directed Teaching in Agricultural or Technology Education
4-9 Credits (4-9)
Semester-long off-campus professional experience in directed teaching and observation provided in selected centers under secondary agricultural and technology supervising teachers. Students need to have completed a teaching methods class prior to enrolling in this course. Consent of Instructor required.

AXED 5235. Directed Teaching in Extension Education
4-9 Credits (4-9)
Four- to fourteen-week professional experiences in directed teaching and observation provided in cooperative extension at the county, regional, or state level. Taught with AXED 448 with reduced credit hours for graduate students. Restricted to AXED majors. May be repeated up to 9 credits.

AXED 5310. New Mexico Water Issues
3 Credits (3)
Designed for agricultural and natural resource professionals who must educate others or provide leadership on complex water issues in New Mexico. Students will travel to four distinct geographic and cultural regions of the state and study water policies, issues, and delivery technologies in each region. Specific areas covered will be determined by resource professionals who will present past, current and future issues involved in the distribution of water. Urban impacts on water use will also be investigated. May be repeated up to 3 credits.

AXED 5320. Risk and Crisis Communications in Agricultural, Consumer, and Environmental Sciences
3 Credits (3)
The purpose of this course is to introduce risk and crisis as interdisciplinary concepts, reviewing theoretical frameworks from a variety of fields and perspectives, such as communication, social psychology and public relations. Students will develop a theoretical understanding of all aspects of strategic communication pertaining risks. Using readings and reflective writings, you will understand how individuals cognitively process risks and how to leverage trust and knowledge to facilitate public understanding. In addition, you will learn crisis communication and management from an organizational perspective. Using case studies and discussions, students will be able to recommend strategies for managing crises occurred to agricultural and natural resource industries.
Learning Outcomes
1. Develop a critical understanding of theoretical and conceptual frameworks related to risk and crisis communications
2. Use an integrated framework to analyze the communication strategies used by the agricultural and natural resource industries
3. Recommend effective and ethical strategies for managing actual and potential crises

AXED 5330. Content Area Literacies
3 Credits (3)
Surveys integrated reading/writing/discursive practices in middle/secondary content areas.
Learning Outcomes
1. Analyze literacy processes, as they pertain to adolescent learners.
2. Discuss current trends and issues in content area literacy instruction with a specific focus on practices that promote achievement and equity.
3. Evaluate instructional practices that help students use reading, writing, speaking, listening, viewing and visually representing to learn the content areas.
4. Illustrate ethical reasoning and decision making in your approach to content area literacy education.
5. Integrate research, reflection, and best practices that positively impact students in a diverse society.

AXED 5510. Research Methods
3 Credits (3)
Students learn the research process as it is applied to solving problems in the behavioral sciences. Prepares students to conduct and critique research and to diffuse research findings. Implications, applications, and ethics of research also stressed. Students develop a research proposal for a problem of their choice. May be repeated up to 3 credits.

AXED 5515. Data Collection and Analysis
3 Credits (3)
Introduction to basic concepts of data collection and analysis. Interpretations from observational studies and controlled experiments. Roles of descriptive and inferential statistics in a complete data analysis. Mean, median, standard deviation, and graphical summaries of data. Correlation and simple regression. One- and two-sample tests and confidence intervals. Chi-square tests and basic analysis of variance. Competency in arithmetic and algebra required. An undergraduate statistics course recommended. May be repeated up to 3 credits.

AXED 5610. Leadership on Agricultural and Natural Resource Issues
3 Credits (3)
Investigates leadership concepts and group dynamics as they relate to a changing world and complex agricultural and natural resource issues. Topics include emotional intelligence, leading change, political leadership, facilitating agreement, team building, and managing conflict in agricultural and natural resource settings. Taught with AXED 475 with differential assignments for graduate students. May be repeated up to 3 credits.

AXED 5615. Effective Management of Volunteer Programs
3 Credits (3)
For individuals currently involved in, or interested in being involved in, the management and supervision of volunteer programs. Emphasis on

practical application, utilizing a research and academic base. Explores the roles, functions, and tasks of volunteers and managers of volunteers including recruitment, orientation and training, supervision, evaluation, recognition and retention. May be repeated up to 3 credits.

AXED 5993. Workshops in Agricultural, Extension, and Technology Education
1-3 Credits (1-3)
Workshop procedures applied to current trends in agricultural, extension, and technology education. A maximum of seven credits will count towards a degree. May be repeated up to 7 credits.

AXED 5994. Creative Component
1-4 Credits (1-4)
For nonthesis program. Individual investigations or projects, either qualitative or quantitative studies. A maximum of six credits will count towards a degree. May be repeated up to 88 credits.

AXED 5996. Special Topics
1-4 Credits (1-4)
Specific subjects and credits to be announced in the Schedule of Classes. Students can take only a maximum of four credits per semester and no more than six credits will count towards a degree. May be repeated up to 6 credits.

AXED 5998. Internship/Cooperative Experience
1-6 Credits (1-6)
Supervised professional on-the-job learning experience. May be repeated up to 6 credits.

AXED 5999. Master's Thesis
1-6 Credits (1-6)
Thesis. May be repeated up to 88 credits.

AXED 7000. Doctoral Dissertation
1-9 Credits (1-9)
Independent research planned, conducted and reported in consultation with and the direction of a major professor. Open only to students pursuing graduate study beyond the master's degree level. Offered for variable credit, 1-18 credit hours, maximum of 18 credit hours. May be repeated up to 18 credits.
Prerequisite: Graduate Advisor Approval.
Learning Outcomes
1. Identify/define problems pertinent to the discipline.
2. Generate questions and/or a hypothesis to provide a solution to the problem.
3. Review and summarize the literature relative to the problem.
4. Apply appropriate research methods and collect data systematically.
5. Conduct research responsibly and ethically.
6. Evaluate, interpret, and analyze a body of empirical data and evidence.
7. Discuss findings in the broader context of the field.
8. Develop and sustain an evidence#based argument.
9. Write and speak critically and coherently. 1
10. Produce publishable results.

Agricultural Communication Courses

ACOM 1110. Introduction to Agricultural Communication
3 Credits (3)
Students will learn about the history and theories of agricultural communications, be introduced to the degree program, explore careers in the field, and examine the role of media in agricultural communications. May be repeated up to 3 credits.
Learning Outcomes
1. Identify classes needed in the degree program and relevant clubs.
2. Recall important times in history of agricultural communication and journalism.
3. Comprehend the communication process and identify its components.
4. Identify effective and efficient media for agricultural communication.
5. Analyze the various roles and uses of media in agriculture communication.
6. Apply theories of communication and journalism to class assignments.

ACOM 1120. Introduction to Graphic Design in Agriculture
3 Credits (3)
This course focuses on introducing students to creating and critiquing visual communication materials in agricultural communications by developing understanding of visual communications, graphic design and branding principles as well as basic skills in using Adobe Illustrator and Photoshop software.
Learning Outcomes
1. Understand and demonstrate the correct use of formats, modes, and resolutions when creating or using graphics for various mediums and audiences.
2. Critique and evaluate graphic and photographic design elements in agricultural communications pieces.
3. Demonstrate a working knowledge of the Adobe Illustrator and Photoshop software and their uses for implementing principles of graphic design and branding.

ACOM 1130G. Effective Leadership and Communication in Agriculture
3 Credits (2+2P)
Theory and practice in leadership and communication for professionals who must work effectively in leadership and supervisory roles with people in agricultural business, industry, government agencies, and education. Course focuses on contemporary leadership theories. Oral communication skills in informative and persuasive speaking, parliamentary procedure, and for small groups are developed. May be repeated up to 3 credits.
Learning Outcomes
1. Understanding Leadership: Definitions of Leadership; Agricultural Education, FFA , Leadership; Leadership Categories; Democratic, Authorization, and Situational Leadership; Personality and Leadership Relations; Developing Leaders; Personal Leadership Development; Ability, Experience, and the Opportunity to Lead; Leadership in the Workplace; Human Relations, Technical, and Conceptual Skills
2. Communication Skills: Communication and Leadership; The Purpose of Communication; Forms of Communication; Communication Barriers and Styles; Verbal and Nonverbal Communication; Feedback; Self Communication and Interpersonal Communication
3. Leading Individuals and Groups: Group Dynamics and Team Building; Democratic Group Leadership; Importance of Groups; Types of Groups; Organizing Groups; Group Dynamics, Development, and Discussion
4. Conducting Successful Meetings: Skills Developed by Bring an Officer; Basic Meeting Functions; Characteristics of a Good Meetings; Planning and Preparing for Meetings; The Meeting Room; Committees; Informative and Motivational Meetings; Group Member Involvement; Officer and Member Responsibilities; Developing a Program of Activities

ACOM 2120. Photography in Agriculture
3 Credits (1+2P)
This is a field-based course focused on how to students use the camera as a tool to make the rules of photography and design work for the student's style, creativity, and goals pertaining to application of photography in agricultural communications. Students develop and disseminate a photography portfolio through a variety of communications channels.
Learning Outcomes
1. Utilize a DSLR or mirrorless camera to analyze scenarios to effectively curate a body of work that compliments agricultural communications practice
2. Demonstrate working knowledge of camera equipment and photography principles to create visual stories
3. Evaluate and critique imagery for use of photography skills and principles

ACOM 2998. Early Field- Based Experience in Agricultural Communications
1-4 Credits (1-4)
This course is designed to help you understand people and how to communicate with people. The key to all journalism or communications-related courses is to understand the audience well enough to know how to speak like them, to them, and to your stakeholders. The most successful communicators exhibit greatness in themselves and in their peers. Communicators cannot do their job if they do not show up with their best attitude and work ethic. Don't let your audience down, and we will make sure you are equipped to do so. May be repeated up to 6 credits.
Learning Outcomes
1. Explain the role of communications in the agricultural or science industries.
2. Develop a communication campaign for an agriculturally related client.
3. Identify key principles of communication channels including newswriting, radio production, and communication plans.
4. Create effective internship application materials to meet needs in the industry.
5. Design a job portfolio that includes examples of communications experience.

ACOM 3110. Agricultural Communications
3 Credits (3)
Principles and practical experience in news writing, radio production, newsletter design, public meeting presentations, video productions, graphics, and public relations activities, especially as related to the fields of agriculture and family and consumer sciences.

ACOM 3115. Global Issues in Agricultural Communications and Marketing
3 Credits (3)
Global perspectives related to international agricultural communications and marketing. The course will provide real-world settings for students to advance their awareness of international issues influencing marketing and trade in the United States and abroad. The course will expose students to high-impact learning, research skill development, communication skill development with a global mindset, and international travel. May be repeated up to 6 credits.
Learning Outcomes
1. Explain the role of communications and marketing in international agriculture.
2. Develop an awareness of global agricultural issues and how they impact domestic and international trade.
3. Increase awareness of global perspectives in agriculture.
4. Discover cultural similarities and differences within the U.S. and the selected country.
5. Investigate agricultural communications and marketing issues using an applied perspective.
6. Communicate course experiences through reflective analyses, photojournalism blog entries, social media campaigns, and presentations.

ACOM 3125. Website User Experience Design in Agriculture
3 Credits (3)
The purpose of this course is for students acquire user experience development, coding and web design skills in order to create a live personal portfolio website that demonstrates their professional skills and experiences in agriculture.
Learning Outcomes
1. Evaluate websites based on user experience principles
2. Use the fundamentals of HTML and CSS to edit code
3. Implement user experience principles in website design
4. Develop a website using WordPress
5. Explain and justify web design decisions

ACOM 3150. Communications Campaigns in Agriculture
3 Credits (3)
Client-based marketing and communication needs for stakeholders in agricultural and life sciences. Students will learn brand awareness for agricultural stakeholders by developing a campaign of communications and marketing materials using multiple modes (e.g., written, visual, social). Students in this course will gain an overall understanding of the agricultural communications industry by developing portfolio materials, prepare for the job and internship search process, and identify the skills necessary to grow in and contribute to a communications profession.
Learning Outcomes
1. Students will be able to identify communications-related needs with a client or stakeholder in the food, fiber, and natural resources industries.
2. Direct a communications plan with channels, tactics, steps, and timelines for a client.
3. Develop a campaign of communications materials (e.g., written, visual, social) around a client's needs.
4. Manage a client's brand with desired audiences through establishing, promoting, and reinforcing messages.

ACOM 3160V. Communicating Agriculture & Science to the Public
3 Credits (3)
Principles and practical experience in general communications channels (i.e., news writing, radio production, newsletter design, public meeting presentations, video productions, graphics, and public relations activities) related to the fields of agricultural, consumer, or environmental sciences. Students in this course will gain an overall understanding of the agricultural communications industry and identify the skills necessary to grow in and contribute to a communications profession.
Learning Outcomes
1. Explain the role of communications in the agricultural, consumer, or environmental science industries.
2. Develop a communication campaign for an agricultural, consumer, or environmental science related client.

3. Identify key principles of communication channels including news writing, radio production, and communication plans.
4. Design a social media campaign including Instagram, Facebook, Twitter,and/or other emerging platforms.
5. Develop skills in media communications including public relations, conducting radio and television interviews, developing interview skills and identifying the needs of an audience.
6. Create effective internship application materials to meet needs in the industry.
7. Design a job portfolio that includes examples of communications experience.
8. Examine social, ethical, and legal issues related to communicating components related to the agricultural, consumer, and environmental science industries.
9. Conduct an audience analysis of key issue related to the agricultural, consumer, and environmental science industries by analyzing demographics, psychographics, sociographics, and geographics of affiliated audience personas.

ACOM 4115. Agricultural and Scientific Publications
3 Credits (3)
Learn and gain experience with the principles and concepts of designing, writing, editing, producing and distributing a student insert to the ACES Magazine, including practical applications of writing feature articles, magazine design, layout and graphics.
Learning Outcomes
1. Execute the steps necessary to be a freelance writer.
2. Identify feature story ideas, contact sources and develop publishable stories.
3. Compare and contrast the varying types of publication materials (connection/spotlights, feature stories, social media sprints, etc.).
4. Comprehend publication design principles and current practices used in print communication industries.
5. Create, produce, publish and publicize a print magazine.
6. Connect with an audience through soft news.

ACOM 4120. Advanced Graphic Design and Layout in Agriculture
3 Credits (3)
This class provides an in-depth examination of visual communication principles and theories, design applications, and design topics relevant to the agricultural industry. Students will learn how to more deeply evaluate designs and layouts, create effective design pieces for targeted agricultural audiences, and further utilize the Adobe Creative Cloud software.
Learning Outcomes
1. Analyze and apply the principles underlying effective graphic design and layout
2. Recognize and discuss communication and visual theories for developing effective designs and layouts for intended purposes and audiences
3. Demonstrate an extensive working knowledge of Adobe Illustrator, Photoshop, and InDesign to create effective designs for both print and digital platforms

ACOM 4130. Strategic Brand Identity & Design in Agriculture
3 Credits (3)
The purpose of this course is for students to develop extensive understanding of strategic and visual theory and principles specific to branding as a critical aspect of business development in all aspects of agriculture and natural resources. Students will utilize research and Adobe Creative Cloud to design targeted brand strategy, client brief, and design strategy to effectively build a client pitch.
Prerequisite: ACOM 1120.
Learning Outcomes
1. Articulate the significance of utilizing brand identity for differentiation
2. Apply extensive knowledge of visual and brand theory, principles, strategy and application to various contexts in agriculture and natural resources
3. Research, design and pitch a brand strategy, client brief and design strategy

ACOM 4998. Internship in Agricultural Communications
3-12 Credits (3-12)
The experiential learning experience selected by students and approved by their academic advisor will form the basis of this course. Students will apply problem-solving skills, communication skills, and disciplinary knowledge through an internship related to agricultural communications. During the internship, students will gain real-world experience in their specific field of interest within the discipline. May be repeated up to 12 credits.
Learning Outcomes
1. Synthesize discipline-specific knowledge and its application to real-world contexts
2. Design and implement solutions to meet project-related tasks
3. Produce professional-quality deliverables for the employer and for the course
4. Handle a high level of responsibility with professionalism and care in preparation and presentation

ACOM 5115. Global Issues in Agricultural Communications and Marketing
3 Credits (3)
Graduate-level course broadening global perspectives related to international agricultural communications and marketing. The course will provide real-world settings for students to advance their awareness of international issues influencing marketing and trade in the United States and abroad. The course will expose students to high-impact learning, research skill development, communication skill development with a global mindset, and international travel. May be repeated up to 6 credits.
Learning Outcomes
1. Explain the role of communications and marketing in international agriculture.
2. Develop an awareness of global agricultural issues and how they impact domestic and international trade.
3. Increase awareness of global perspectives in agriculture.
4. Discover cultural similarities and differences within the U.S. and the selected country.
5. Investigate communications and marketing issues using an applied perspective.
6. Communicate course experiences through reflective analyses, photojournalism blog entries, social media campaigns, and presentations.
7. Research and dissemination information regarding international issues in agriculture using critical thinking skills.

Agricultural and Extension Education (Agricultural Communications) - Bachelor of Science in Agriculture

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300/3000 or above. At least 19–22 hours must be in Agricultural, Consumer, and Environmental Sciences (ACES) (*in addition to the courses listed for the ACES minor*). At least 18 hours for the Journalism/Media Studies Minor. At least 18 hours for Agricultural, Consumer, and Environmental Sciences (ACES) Minor

Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

See your academic advisor for more information.

Prefix	Title	Credits

	Credits	**15**
	Total Credits	**120**

[1] Journalism Minor Courses from one of the following Minors:

- Journalism and Media Studies - Undergraduate Minor (https://catalogs.nmsu.edu/nmsu/arts-sciences/journalism-media-studies/journalism-media-studies-undergraduate-minor/)
- Social Media Management - Undergraduate Minor (https://catalogs.nmsu.edu/nmsu/arts-sciences/journalism-media-studies/social-media-management-undergraduate-minor/)
- Strategic Communications - Undergraduate Minor (https://catalogs.nmsu.edu/nmsu/arts-sciences/journalism-media-studies/strategic-communication-undergraduate-minor/)

[2] ACES Electives- 15 credits from either of the following departments/areas:

- Agricultural and Extension Education
- Agricultural Economics and Agricultural Business
- Animal and Range Sciences
- Entomology, Plant Pathology and Weed Sciences
- Family and Consumer Sciences
- Fish, Wildlife and Conservation Ecology
- Hotel, Restaurant and Tourism Management
- Plant and Environmental Sciences

[3] AEEC Minor Courses listed on the Requirements (p. 338) tab

Agricultural and Extension Education (Agricultural Education Teaching) - Bachelor of Science in Agriculture

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix	Title	Credits
General Education		
Area I: Communications (10 credits)		
English Composition - Level 1 [1]		
ENGL 1110G or ENGL 1110H or ENGL 1110M	Composition I Composition I Honors Composition I	4

English Composition - Level 2 [1]		
ENGL 2210G	Professional and Technical Communication	3
or ENGL 2210H	Professional and Technical Communication	
or ENGL 2210M	Professional and Technical Communication for Multilingual Students	
Oral Communication		
ACOM 1130G	Effective Leadership and Communication in Agriculture	3
Area II: Mathematics (6 credits) [1]		
MATH 1220G	College Algebra	3
MATH 1130G	Survey of Mathematics	3
Area III/IV: Laboratory Sciences and Social/Behavioral Sciences		
Area III: Laboratory Sciences Course (8 credits) [1]		
CHEM 1120G	Introduction to Chemistry Lecture and Laboratory (non majors)	4
AGRO 1110G	Introduction to Plant Science (Lecture & Lab)	4
or HORT 1115G	Introductory Plant Science	
Area IV: Social/Behavioral Sciences Course (3 credits) [1]		
AEEC 2130G	Survey of Food and Agricultural Issues	3
Area V: Humanities (3 credits)		
Choose one from the following:		
HIST 1110G	United States History I	
or HIST 1120G	United States History II	
Area VI: Creative and Fine Arts (3 credits)		
Select one course from Area VI [1]		3
Viewing A Wider World (6 credits) [3]		
ANSC 351V	Agricultural Animals of the World	
or EPWS 325V	Insects, Humans, and the Environment	
Choose one additional VWW Course from a College outside of the College of ACES		
GEOG 315V	World Agriculture and Food Problems (recommended)	
Departmental/College Requirements (64 credits)		
ACES 1120	Freshman Orientation	1
ACES 1210	Financial Fitness for College Students	1
AXED 1110	Introduction to Agricultural, Extension, and Technology Education	3
AXED 1130	Techniques in Agricultural Mechanization	3
AXED 2110	Metal Fabrication	3
AXED 2130	Early Field-Based Experience	2

ANSC 310	Exhibiting Livestock	3
ACOM 3160V	Communicating Agriculture & Science to the Public	3
Agricultural Science Electives (7 - 13 credits) [2]		
Select from 7 to 13 credits from the following:		13
Agricultural Economics		
Plant, Pest and Soil Sciences		
Animal Science		
Horticulture		
Natural Resources		
Second Language: (not required)		
Electives, to bring the total credits to 120 (0-6 credits) [4]		**6**
Total Credits		**120**

1 See the General Education (p. 262) section of this catalog for a full list of courses

2 ACOM 1130G Effective Leadership and Communication in Agriculture will also count towards the Departmental/College requirements.

3 See the Viewing a Wider World (p. 266) section of the catalog for a full list of courses

4 Elective credit may vary based on General Education course selection, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Leadership in Agricultural Communications - Undergraduate Minor

The department offers a minor in Leadership in Agricultural Communications, which may be earned by completing the following coursework.

Prefix	Title	Credits
Required Courses		
Agricultural Leadership or Communication Courses in the Department of Agricultural and Extension Education [1]		12
Leadership Related Course from Outside the Department of Agricultural and Extension Education		3
Agricultural or Natural Resource Policy Course		3
Total Credits		**18**

[1] Student must get approval from Agricultural and Extension Education (AXED) Faculty

Minor must include 9 credits of upper division courses.

Agricultural Economics and Agricultural Business

Undergraduate Program Information

The Department of Agriculture Economics and Agricultural Business offers two Bachelor of Science in Agriculture degrees. A Bachelor of Science in Agriculture with a major in Agricultural Economics and Agricultural Business (AEAB) and a Bachelor of Science in Agriculture with a major in Natural Resource Economics and Policy (NREP).

Agricultural Economics and Agricultural Business - Bachelor of Science in Agriculture

The AEAB degree prepares students for leadership positions with companies that operate in the food and fiber supply chain. Positions may focus on areas of agribusiness management, agricultural production, financing, marketing, and economics. Recent AEAB graduates have accepted positions with national and international companies, non-profits, and government agencies. Many graduates are also successful entrepreneurs.

In this program, faculty, students, and industry stakeholders work together to provide students with real-world examples and opportunities to apply their skills and knowledge through departmental course offerings. The curriculum is designed to educate students as business professionals with the necessary skills to succeed in professional positions. Depending on their interest, students can customize their path of study to include additional courses in marketing, finance, or natural resource management.

Natural Resource Economics and Policy - Bachelor of Science in Agriculture

The Department of Agriculture Economics and Agricultural Business offers the Bachelor of Science in Natural Resource Economics and Policy (NREP); an undergraduate degree that trains students on the socio-economic and bio-physical aspects of environmental and natural resource management and policy. With increasing competition for limited land, water, and other natural resources in the U.S. and throughout the world, as well as growing concern about environmental degradation, there is a growing need for professionals who can assist in the process of balancing economic and environmental tradeoffs. The NREP major provides students with knowledge and skills to articulate and apply economic principles to a range of public and private sector issues such as land use, energy, wildlife, climate and air resources, and water. This major prepares students for private and public sector positions in resource assessment, management, or administration.

Graduate Program Information

The Department of Agricultural Economics and Agricultural Business supports six graduate programs. Several of these programs are offered with cooperation from other departments on campus. The six programs supported by AEAB include:

- Masters of Science in Agricultural Economics;
- Masters of Agriculture with a concentration in agribusiness;
- Masters of Business Administration with a concentration in agribusiness;
- Doctorate of Economic Development;
- MS & Ph.D. in Water Science Management; and
- Minor in Agribusiness.

Masters of Science in Agricultural Economics

Master of Science (MS) in Agricultural Economics program provides rigorous training in economic theory, applied economic analysis, and quantitative methods. The degree and curriculum are designed to prepare students for professional careers in business, government, research, and for continued education in pursuit of a Ph.D. The program requires students to complete a Master's thesis working closely with a faculty committee.

Masters of Agriculture with a concentration in Agribusiness

Master of Agriculture (MAG-AB) with a concentration in Agribusiness provides students with backgrounds or interests in agriculture with graduate-level training in agribusiness and applied economics. Students are able to develop knowledge and skills related to applied economics, finance, marketing, management, and quantitative methods and skills commonly used in managing businesses operating within the food and fiber value chain. The degree offers an alternative for individuals holding undergraduate degrees in various agricultural and food science fields to learn and develop skills needed to start or manage an agricultural business. The program requires students to complete a creative component or thesis working closely with a faculty committee. Courses are offered in a hybrid format allowing students not living in or near Las Cruces to participate in the program. This program is also offered online allowing working professionals to participate in it.

Masters of Business Administration with a concentration in Agribusiness

Master of Business Administration with a concentration in Agribusiness (MBA-AB) prepares students for business and public sector careers in agriculture and the food and fiber industry. Graduates from this program are knowledgeable about the U.S. and international food and fiber sectors and hold an AACSB International accredited MBA degree.

Doctor of Economic Development

Doctor of Economic Development (DED) is a professional doctorate designed to provide advanced training for economic development professionals. It is not designed to prepare graduates for academic careers.

Interdisciplinary Masters in Water Science and Management and Ph.D. in Water Science and Management

The Water Science program is an interdisciplinary program supported by AEAB faculty that provides graduate education for the next generation of water resources researchers, educators, and managers. The program provides knowledge and tools that can be used to address state, national, and international water challenges including water quality, quantity, timing/availability, and location of water resources.

Minor in Agribusiness

The graduate minor in Agribusiness provides graduate students training on business and economics methods to analyze agribusiness enterprises.

Degrees for the Department

Bachelor Degree(s)

- Agricultural Economics and Agricultural Business - Bachelor of Science in Agriculture (p. 352)
- Natural Resource Economics and Policy - Bachelor of Science in Agriculture (p. 354)

Master Degree(s)

- Agricultural Economics - Master of Science (p. 102)
- Agriculture (Agribusiness) - Master of Agriculture (p. 97)
- Agriculture (Agribusiness) - Master of Agriculture (Online) (https://catalogs.nmsu.edu/global/nmsu-global/agriculture-agribusiness-mag-online/)
- Business Administration (Agribusiness) - Master of Business Administration (p. 117)

Doctoral Degree(s)

- Economic Development - Doctor of Economic Development (p. 214)

Minors for the Department

Undergraduate Minors

- Agricultural Business Management- Undergraduate Minor (p. 357)
- Natural Resource Economics - Undergraduate Minor (p. 357)

Graduate Minors

- Agribusiness - Graduate Minor (p. 254)

Professor, Carlos E. Carpio Ochoa, Department Head

Professors Acharya, Hurd, Lillywhite, Patrick, Ward
Associate Professors Robinson
Assistant Professors Boufous, Dsouza, Miller, Regmi, Torell
College Professors Townsend

Department of Agricultural Economics and Agricultural Business:

C.E. Carpio Ochoa, Department Head, Ph.D. (North Carolina State University)– food and agricultural economics, applied econometrics/statistics; ***Professors*** *R.N. Acharya, Ph.D. (Auburn)– food safety, logistics management, technology adoption, and marketing; B. H. Hurd, Ph.D. (California-Davis)– water and natural resource economics; J. Lillywhite, Ph.D. (Purdue)– food and agribusiness management and marketing; M. Patrick, Ph.D. (Michigan State University)– Economic Development; F. A. Ward, Ph.D. (Colorado State)– resource economics, welfare economics;* ***Associate Professors*** *C. Robinson, Ph.D. (New Mexico State)- consumer behavior, agricultural production, marketing sales;* ***Assistant Professors*** *S. Boufous, Ph.D. (Texas Tech University)- sustainability, production economics, consumer demand analysis, and non-market valuation; A. Dsouza, Ph.D. (Arizona State University)- production economics, food supply chain management, and marketing; F. Miller, Ph.D. (University of Texas-Dallas)- agricultural economics, policy, dairy, range livestock; M. Regmi, Ph.D. (Kansas State University)- agricultural finance, risk management, production economics; G. Torell, Ph.D. (University of Wyoming)- agricultural economics, natural resources, environmental economics;* ***College Professors*** *J. Townsend, Ph.D. (Oklahoma State University) commodity risk management, agricultural marketing;* ***Affiliated Faculty*** *D. Blayney, Ph.D. (Washington State University) agricultural supply chain; dairy production;* ***Emeritus Faculty*** *V. Bullock M.S. (Emeritus) (New Mexico State University) real estate, real estate appraisal; P. Gutierrez, Ph.D. (Emeritus) (Oklahoma State)– extension, ranch economics, economic development; J. D. Libbin, Ph.D. (Emeritus) (Iowa State)– farm management, production economics; R. Skaggs, Ph.D. (Emeritus) (Utah State)– agriculture and natural resource policy*

Department of Economics, Applied Statistics and International Business:

Y. F. Lee, Ph.D. (Southern Illinois-Carbondale)-international finance and trade, international monetary system, economic development; ***Professors*** *L. Blank, Ph.D. (Tennessee, Knoxville)- microeconomic theory, managerial economics, and regulatory economics; C, Erickson, Ph.D. (Arizona State)-regional (Latin American) economic growth and development; money and banking; R. L. Steiner, Ph.D. (Oklahoma State)-likelihood methods, discrete distributions, and exact tests; B. Widner, Ph.D. (Colorado State)-urban/regional development, managerial economics, and public finance; D. M. VanLeeuwen, Ph.D. (Oregon State)-statistics;* ***Associate Professors*** *J. Caldwell Ph.D. (Illinois)-energy economics, utility rate design, climate policy; C. Gard, Ph.D. (Washington)-biostatistics, and breast cancer risk prediction; L. LaPlue (Tennessee)-international and environmental economics; M. Li, Ph.D.(Pennsylvania State)-labor, urban, and agricultural economics; J. Mamkhezri, Ph.D. (New Mexico)-energy, natural resources, environmental and health economics; C. Sroka (Ohio State)-count data models, and health economics;* ***Assistant Professors*** *J. Dawson Ph.D. (UW-Madison)–statistics, biostatistics; S. Jeon Ph.D. (North Carolina)-environmental statistics, extreme value analysis, and spatio-temporal modeling;* ***College Assistant, Associate, and Full Professors:*** *(College Associate Prof.) B. Bai, MS (New Mexico State)-applied statistics, behavioral science; (College Assistant Prof.) C. Blume, Master of Accountancy (New Mexico State); (College Full Prof.) M. Downes, Ph.D. (New Mexico)–environmental and natural resources economics, econometries and quantitative economics; (College Associate Prof.) F. Pallares, DED (New Mexico State)–economic development; (College Full Prof.) L. Vargas, DED (New Mexico State)-international development, institutional economics, and border economics;* ***Emeritus Faculty*** *R. V. Adkisson, Ph.D. (Nebraska)-international, public finance, economic development; K. Brook, Ph.D. (Texas-Austin)-macroeconomic theory, monetary policy; D.L. Clason, Ph.D. (Kansas State); D. L. Daniel, Ph.D. (Southern Methodist)-nonparametric, statistical computing, and environmental research; C. Enomoto, Ph.D. (Texas A&M)-econometrics, economic theory; M. Ellis, Ph.D. (California-Riverside)-economic development; D. A. Gegax, Ph.D. (Wyoming)-public utility economics, industrial organization; W. R. Gould, Ph.D. (North Carolina State)-biological sampling, wildlife and fisheries estimation. B. N. Matta, Ph.D. (Texas-Austin); J. T. McGuckin, Ph.D. (Wisconsin-Madison); J. T. Peach, Ph.D. (Texas-Austin)-quantitative economics, border studies, economic development; A.V. Popp, Ph.D., (Northern Illinois); D.B. Smith, Ph.D., E. S. Willman, Ph.D. (Indiana).*

Agricultural Economics Courses

AEEC 1110. Introduction to Agricultural Economics and Business
3 Credits (3)
This course is an orientation to agricultural economics and business through the discovery process for the consumer in the food, fiber, and natural resource sectors of the global economy. The course discusses the application of micro-and macro-economic principles as they relate to agricultural economics and business. May be repeated up to 3 credits.
Learning Outcomes
1. Gain a broad understanding of the role of the consumer in the market-place for agricultural commodities, producers, agencies and the global market structure.
2. Apply introductory economic principles to applied global situations.
3. Employ economic concepts in the application of production level decision making.
4. Employ economic principles to the basic and global agricultural community.
5. Understand relationships that exist between producers and consumers.

AEEC 1120. Careers in Food and Agribusiness
1 Credit (1)
This course provides an orientation to careers in agricultural economics and agricultural business. Students will learn about the agricultural supply chain in New Mexico, the United States, and the world. Students will be introduced to faculty and staff within the department, learn about career opportunities available to AEAB graduates, and develop a greater appreciation of current agricultural issues. Freshman status or consent of instructor required. May be repeated up to 1 credit.
Learning Outcomes
1. Become familiar with career opportunities in agricultural economics and agricultural business
2. Understand knowledge and skills desired by employers
3. Become acquainted with faculty and staff in the Department of Agricultural Economics and Agricultural Economics and resources available to students within the Department
4. Refine written and verbal communication skills

AEEC 2110. Principles of Food and Agribusiness Management
3 Credits (3)
This course introduces business management theory and application of theory related to businesses within the food and fiber supply chain. Topics include management and financial principles, market planning, and organization theory. May be repeated up to 3 credits.
Learning Outcomes
1. Demonstrate, refine and expand written and oral communication skills
2. Develop an understanding of basic financial statements, their use and analysis
3. Understand the roles management and management styles play in modern agribusiness
4. Learn about the history of agribusiness domestically and internationally
5. Integrate the role of technology into modern agribusiness management

AEEC 2120. Introduction to Food and Agribusiness Accounting
3 Credits (3)
This course outlines the purpose and methods of keeping and analyzing farm and ranch records. Course topics include financial statements, efficiency measures, analysis of the business, and tax computations.
Learning Outcomes
1. Understand the terminology and principles used in modern farm and ranch financial management statements.
2. Evaluate capital investments, analyze farm business performance, and develop tools for financial planning and analysis
3. Evaluate farm and ranch cash flows

AEEC 2130G. Survey of Food and Agricultural Issues
3 Credits (3)
Survey of food and agricultural issues, including: geography of food production and consumption; human-agricultural-natural resource relations; agriculture in the United States and abroad; modern agribusiness; food safety; food, agriculture, and natural resources policy; ethical questions; role and impact of technology. Crosslisted with: FSTE 2130G.
Learning Outcomes
1. Understand of global agriculture including production techniques used in various geographical regions, consumption trends, and political and social constraints.
2. Synthesis information about agricultural issues and make informed arguments

3. Articulately discuss modern issues in agriculture
4. Write coherent arguments relative to personal beliefs regarding agricultural issues

AEEC 2140. Technology and Communication for Business Management
3 Credits (2+2P)
This course helps students improve their skills related to data analysis, information management, and communication. Drawing examples from a variety of management, business, technological and research situations, students discover the versatility and functionality of modern computer software. The course emphasizes a 'hands-on' approach. May be repeated up to 3 credits.
Learning Outcomes
1. Demonstrate an understanding of the terminology used to describe common techniques and concepts in business information systems.
2. Demonstrate a mastery of spreadsheet design and use.

AEEC 2996. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. Consent of instructor required.
Learning Outcomes
1. Varies

AEEC 3110V. World Agriculture and Food Problems
3 Credits (3)
This course examines key concepts and issues relevant to the world's food production systems. Topical highlights include the causes and consequences of hunger, agriculture's economic and environmental significance, sustainable development, biotechnology, and globalization of agricultural markets. As students learn about these issues from both local and global perspectives they are engaged in the development of both their literacy of economic concepts and their core research and communication skills. We do this through a combination of relevant course readings, in-class discussion exercises, and focused writing assignments on current issues of relevance. Same as GEOG 315V. May be repeated up to 3 credits.
Learning Outcomes
1. Demonstrate conceptual and systems thinking and design
2. Assess the nutrition and healthfulness of food choices
3. Describe the structure and function of food and agricultural systems
4. Analyze roles of and relationships between food producers, consumers, and policymakers
5. Apply basic economic concepts to describe and interpret food and agricultural issues
6. Explain the environmental context and role of agriculture
7. Articulate key arguments that favor and oppose food biotechnology
8. Recognize several of the benefits and barriers in international trade of food and agricultural products

AEEC 3120V. Natural Resource Economics
3 Credits (3)
This course helps students gain insight into important natural resource problems of our time. Apply economic principles to problems in the preservation, use, and development of agricultural, range, mineral, water, forestry, fishery, and environmental resources. Understand the use of cost-benefit analysis for government natural-resource projects, policies, and programs. Same as ECON 337V. May be repeated up to 3 credits.
Prerequisite: ECON 1110G or ECON 2120G or ECON 2120H.
Learning Outcomes
1. Demonstrate knowledge of economic principles to better understand natural resource issues
2. Document understanding of current and emerging natural resource issues
3. Apply economic principles to guide selected natural resource policy debates
4. Demonstrate the application of economic principles to inform policy debates addressing current water resources issues

AEEC 3130V. Water Resource Economics
3 Credits (3)
This course uses economic principles to evaluate current and emerging issues in water resources. Applications focus on the use of economic methods of analysis to current policy decisions surrounding agricultural, municipal, industrial, and environmental uses of water. Same as ECON 384V. May be repeated up to 3 credits.
Learning Outcomes
1. Demonstrate knowledge of economic principles to better understand water resource issues
2. Show understanding of current and emerging water issues
3. Apply economic principles to guide selected water resource policy debates
4. Demonstrate the application of economic principles to inform policy debates addressing current water resources issues

AEEC 3140V. Agricultural Policy
3 Credits (3)
This course provides a historical and cultural background of food and agricultural policy in the United States. Analysis of food and agricultural problems, policy-making, and implementation. Economic evaluation of specific U.S. food and agricultural policy instruments, their domestic and international impacts.
Learning Outcomes
1. Apply economic concepts to deepen understanding of agricultural policy, particularly with regard to macroeconomic importance to agriculture
2. Describe inherent tradeoffs and opportunity costs in policy
3. Identify the global impacts of U.S. agricultural policy
4. Explain and describe important agricultural policy issues for a lay audience

AEEC 3210. Marketing and Food Agricultural Products
3 Credits (3)
This course provides a review of marketing principles and techniques used throughout the food and fiber supply chain. The course introduces a broad variety of marketing topics including marketing strategy, consumer behavior, market segmentation, market research, competitive analysis, and the marketing mix. The course serves as a foundation for advanced courses in agricultural marketing. Same as MKTG 305.
Prerequisite: ECON 1110G or ECON 2120G.
Learning Outcomes
1. Articulate how agricultural commodities move through the food and fiber supply chain.
2. Understand the importance of strategic marketing and how organizations within the food and fiber supply chain identify consumers and their preferences.

3. Understand key marketing concepts used by agribusiness marketers, including SWOT analysis, the marketing mix, advertising and public relations.
4. Know the basic outline and components of a marketing plan.

AEEC 3220. Financial Derivative Markets
3 Credits (3)
This course explores the role of financial derivatives in modern business, including income generation, risk management, and price discovery. Derivatives markets covered in the course include futures, options, and swaps. Course content focuses on the fundamentals of trading and hedging in a wide variety of markets, e.g., agriculture, interest rates, exchange rates. Students participate in simulated futures and options trading. Same as AEEC 5220/BFIN 511 with additional coursework required at the graduate level. Cannot receive credit for both AEEC 3220/BFIN 311 and AEEC 5220/BFIN 511. Same as BFIN 311.
Learning Outcomes
1. Understand and explain the concept of risk, list various sources of risks observed in businesses, and identify common methods used to manage risk
2. Demonstrate an understanding of the vocabulary associated with derivatives and derivative markets
3. Articulate the role that derivative markets play in reducing risk and illustrate how they can be used in practice to reduce risk
4. Illustrate how derivative markets can be used to generate income and manage risk through hedging

AEEC 3230. Food and Agricultural Sales
3 Credits (3)
This course reviews the techniques of salesmanship. Course topics include identification and classification of buyer type and different approaches to sales based on client base. Improving oral communication skills through individual and/or group sales presentations. Students must be in Junior or above standing to enroll. May be repeated up to 3 credits.
Learning Outcomes
1. Analyze sales situations and effectively identify pathways to closing the sale.
2. Demonstrate execution of the sales process – prepare, learn, communicate, evaluate.
3. Conduct product and customer analysis to build a sales strategy.
4. Exhibit enhanced relationship management and communication skills.

AEEC 3240. Agricultural and Natural Resource Law
3 Credits (3)
This course discusses the relationship of common-law principles, statutory law and regulatory law to problems involving agriculture with an emphasis on New Mexico issues. Legal problems relevant to agribusiness, torts, fencing laws, liability for agricultural pollution, irrigation water rights, corporations and partnerships, land tenure, farm and ranch tenancy, agricultural labor, farm and ranch management, and taxation. May be repeated up to 3 credits.
Learning Outcomes
1. Understand the complexity of law as it relates to agriculture and natural resources
2. Develop a basic understanding of the legal system in the U.S. including the role of federal and state agencies responsible for agricultural and natural resource regulation
3. Articulate at a layperson's level, the roles of the legislative, judicial, and executive branches of the government as they relate to agriculture and natural resources.

AEEC 3250. Economics of Food and Agricultural Markets
3 Credits (3)
This course focuses on the analysis of supply and demand characteristics of commodities with particular attention to agricultural products. Pays special attention to empirical analysis. Includes institutional aspects of pricing, temporal and spatial price relationships, price forecasting, and the economic consequences of pricing decisions. May be repeated up to 3 credits.
Prerequisite: ECON 2120G, MATH 1430G, and A ST 311 or MATH 1350G.
Learning Outcomes
1. Become familiar with commonly used data analysis methods and tools.
2. Develop an understanding of the factors that influence agricultural prices.
3. Use data to analyze and solve real-world problems related to agricultural prices.

AEEC 3260. Economic Analysis of Food and Agribusiness
3 Credits (3)
This course uses economic and business theory to analyze business decision making. The course includes a discussion of economic, managerial, and financial considerations relevant to modern agribusinesses. May be repeated up to 3 credits.
Prerequisite: ECON 2110G, ECON 2120G.
Learning Outcomes
1. Understand the role of managers within the food and fiber supply chain.
2. Develop an understanding of the applications of managerial economics as they related to businesses within the food and fiber supply chain.
3. Analyze market conditions and assess the position of a business within the market.
4. Identify and articulate optimal business decisions by analyzing economic and business information.

AEEC 3270. Spreadsheet Applications in Food and Agriculture
3 Credits (2+2P)
This course is an advanced course in electronic spreadsheets. Concepts and tools of data analysis and database management within a spreadsheet, emphasizing agricultural applications, are presented. Same as AEEC 5320 with additional work required at the graduate level. Cannot receive credit for both AEEC 3270 and AEEC 5320. May be repeated up to 3 credits.
Prerequisite: AEEC 2140 or consent of instructor.
Learning Outcomes
1. Ability to effectively utilize some of the advanced features in Microsoft Excel by course end.
2. Transforming agricultural and agribusiness problems into spreadsheet models for analysis.
3. Increase critical thinking capacity with respect to solving problems/tasks.
4. Develop creativity in solving problems/tasks.

AEEC 3280. Applied Production Economics
3 Credits (3)
This course introduces students to fundamental economic theories and analytical tools required for managing an agricultural operation. In

particular, the principles of microeconomics will be reviewed and applied to the problems faced by farms and ranches. The course focuses only on economic making at the farm or ranch level. May be repeated up to 3 credits.
Prerequisite: (ECON 2120G or ECON 2120H) and (MATH 1430G) and (A ST 311 or MATH 1350G).
Learning Outcomes
1. Analyze production function and calculate the total, average, and marginal products
2. Derive profit-maximizing input and output combinations
3. Evaluate the relationship between production, revenue, and profit functions
4. Analyze crop budgets and determine optimal acreage allocation
5. Measure the impact of risk and uncertainty on agricultural production

AEEC 3998. Internship
1-4 Credits (1-4)
Professional work experience under the supervision of a faculty member. May be repeated up to 6 credits.
Prerequisite: Consent of instructor.

AEEC 4110. Food and Agribusiness Financial Management
3 Credits (3)
This course provides a description and application of techniques and principles of financial management to problem situations faced by agricultural businesses, including financial statement development and analysis, capital budgeting, sources and costs of capital. May be repeated up to 3 credits.
Prerequisite: ECON 2120G or ECON 2120H and ACCT 2110.
Learning Outcomes
1. Understand the time value of money and perform capital investment analysis for agricultural firms
2. Interpret financial statements used by agricultural firms
3. Comprehend farm financial risks and returns
4. Discuss financing options for U.S. farm businesses

AEEC 4410. Senior Seminar
1 Credit (1)
This course focuses on current topics and cases in the agribusiness literature stressing rigorous qualitative analysis of current problems and policy issues. During the course, students provide feedback about their experience within the Department and help identify ways in which the Department can improve. Restricted to: AEAB; NREP majors. Must be Senior standing to enroll. May be repeated up to 1 credit.
Learning Outcomes
1. Illustrate an understanding of economic and business concepts as illustrated and applied in case analyses.
2. Articulate ways in which the Department can improve academically.
3. Prepare future steps in careers, e.g., resumes, cover letters, mock interviews.
4. Develop interpersonal communication skills.

AEEC 451. Food and Agribusiness Market Assessment
3 Credits (3)
This course is an application course in which self-managed teams develop and present marketing plans for agribusiness firms. Emphasis on integrating the marketing mix, particularly promotional elements. May be repeated up to 3 credits. Crosslisted with: AEEC 4510.
Prerequisite(s): AEEC 3210 or MKTG 305 or consent of instructor.
Learning Outcomes
1. Identify, organize ad conduct market research specific to the project
2. Develop an understanding of primary and secondary research collection and analysis
3. Exhibit enhanced relationship management, communication skills, and team building
4. Develop written communication with final deliverable for implementation into the business world

AEEC 4510. Food and Agribusiness Market Assessment
3 Credits (3)
This course is an application course in which self-managed teams develop and present marketing plans for agribusiness firms. Emphasis on integrating the marketing mix, particularly promotional elements. May be repeated up to 3 credits. Crosslisted with: MKTG 451.
Prerequisite(s): AEEC 3210 or MKTG 305 or consent of instructor.
Learning Outcomes
1. Identify, organize ad conduct market research specific to the project.
2. Develop an understanding of primary and secondary research collection and analysis.
3. Exhibit enhanced relationship management, communication skills, and team building.
4. Develop written communication with final deliverable for implementation into the business world.

AEEC 4520. Food and Agribusiness Marketing Plan Development
3 Credits (3)
This course focuses on learning marketing research methods applicable to developing new food and agricultural products and repositioning existing products for new markets. Students will be required to prepare precise written and oral marketing plans to industry standards and will have opportunities to present written and oral plans at national competitions. May be repeated up to 3 credits.
Learning Outcomes
1. Illustrate abilities to make decisions based on market research and analysis, including financial analysis, analysis of consumer trends, and the business environment.
2. Create professional marketing and business presentation.
3. Build effective teams to analyze and present real-world marketing opportunities.
4. Practice business decision making founded on evidence from market research.

AEEC 4530. Case Studies in Food and Agribusiness Management
3 Credits (3)
This course integrates production, marketing, accounting, finance, agricultural policy, human behavior, and business environment concepts in the management of agricultural businesses using a decision case approach. May be repeated up to 3 credits.
Learning Outcomes
1. Exhibit an ability to understand complex and varying business and resource issues, including financial analysis, natural resource issues, and business operations.
2. Provide reasoning and rationale for decision making, identifying the best options from many potential decisions.
3. Practice business writing and communication skills.

AEEC 4540. Economics of Making and Marketing Wine
3 Credits (3)

This course is designed to provide a basic knowledge of the principles of winemaking with emphases on wine production and economics for small wineries and home winemaking. The course also focuses on the investment costs of starting small wineries and the costs of making wine and successful market strategies for small wineries. The class includes a hands-on lab that includes selecting, crushing, fermenting grapes, and all the steps required through bottling the wine. Students must be 21 to enroll in the class. Consent of instructor required. May be repeated up to 3 credits.

Learning Outcomes

1. Identify and evaluate production costs, economics, and marketing strategies for small wineries.
2. Identify current technologies used in the production of wine for home and in a small winery.
3. Identify the processes required to make high-quality wine using hands-on winemaking techniques, sensory analysis, and testing.
4. Learn the basics of Viticulture (wine grape growing) practices.

AEEC 4550. Real Estate Appraisal
3 Credits (2+2P)

This course addresses issues influencing the value of real estate with some emphasis upon rural properties. Topics include courthouse records, property taxes, appraisal methodology, expert courtroom testimony, condemnation, and legal issues. Students will take field trips and write appraisals. Course material is relevant to students in Finance, Accounting, and Pre-Law, as well as Agriculture. Accredited for hours to apply to both pre-licensing and continuing education requirements of the New Mexico Real Estate Commission for both Appraisers and Real Estate Brokers. Crosslisted with BFIN 470.

Learning Outcomes

1. Distinguish between the Income Approach, Cost Approach, and Sales Comparison Approach.
2. Identify market abstracted influences on value.
3. Apply proper appraisal methodology.
4. Demonstrate appraisal knowledge by writing a residential appraisal and a farm appraisal.

AEEC 4997. Special Problems
1-3 Credits

Special problems in agricultural economics or agricultural business of particular interest to the individual student. Maximum of 3 credits per semester. No more than 6 credits toward degree. Consent of instructor required. May be repeated up to 6 credits.

AEEC 4999. Senior Thesis
3 Credits (3)

Develop a thesis project with a faculty advisor. The senior thesis requires students to work creatively to apply business and economic principles to address a problem of concern. May be repeated up to 3 credits. Restricted to AEAB majors.

Prerequisite: consent of department head and have senior standing.

AEEC 5110. Introduction to Quantitative Methods
3 Credits (3)

Introduce students to quantitative tools widely used in applied economic analysis such as regression analysis, statistical tests, and mathematical programming. Restricted to: Agricultural Economics and Business (Masters) majors.

Learning Outcomes

1. Course objectives for the statistics module include helping students master basic statistical tests/methods commonly used in research and business analysis. Specific methods / tests include: One-sample mean hypothesis tests, Two-sample mean hypothesis tests, Analysis of Variance (mean tests for three or more samples), and Nonparametric methods to test proportions.
2. Course objectives for the econometrics/regression module include introducing students to the field of econometrics and helping them master a basic understanding of econometrics and its use in agricultural economics and business. Specific topics that will be covered include: Correlation analysis, Simple least squares regression; and Multiple regression analysis.
3. Course objectives for the math programming module including helping students formulate, specify, build and interpret linear programming models using Microsoft Excel's Solver feature and the specialized software package, GAMS.

AEEC 5120. Microeconomic Theory
3 Credits (3)

A rigorous re-examination of the pricing mechanism in the goods and factor markets. Development of theoretical tools of general applicability. May be repeated up to 3 credits.

Prerequisite: ECON 371 and ECON 457, or consent of instructor.

Learning Outcomes

1. A rigorous re#examination of the structure and function of the price mechanism to guide resource allocation and policy analysis in the goods and factor markets.
2. Introduce the models that economists use to explain the behavior of consumers, firms, and markets.
3. Development of theoretical tools used for economic analysis.

AEEC 5130. Macroeconomic Theory
3 Credits (3)

This course provides contemporary aggregative theory regarding the interrelationships among national income, employment, the price level, money supply and interest rates, and implications of this theory for public policy in a mixed economy. May be repeated up to 3 credits.

Learning Outcomes

1. Develop an in-depth understanding of the IS/LM model.
2. Understand how fiscal and monetary policy affect output, employment, interest rates and prices.
3. Develop and use mathematical models of the economy.
4. Derive the effect of a change in tax rates, government spending, or a change in the money supply, on the nation's output through expenditure multipliers.
5. Understand how fiscal and monetary policy work in an Open economy.
6. Understand the basics of Exogenous and Endogenous Growth Theory.

AEEC 5140. Agricultural Policy
3 Credits (3)

Historical and cultural background of food and agricultural policy in the United States. Analysis of food and agricultural problems, policy-making and implementation. Economic evaluation of specific U.S. food and agricultural policy instruments, their domestic and international impacts. Same as AEEC 3140V with additional work required at the graduate level. Cannot receive credit for both AEEC 3140V and AEEC 5140.

Prerequisite: Consent of instructor.

Learning Outcomes

1. Apply economic concepts to deepen understanding of agricultural policy, particularly regarding the macroeconomic importance to agriculture.
2. Be able to describe inherent tradeoffs and opportunity costs in policy.

3. Acquire an international perspective with respect to food and agricultural policy.
4. Develop an appreciation for history and trajectory of agricultural policy.

AEEC 5150. Economic and Financial Analysis of Agribusiness
3 Credits (3)
This course focuses on common analytical tools used to evaluate the economic and financial performance of businesses operating in the food and fiber supply chain. The course uses a combination of course discussions, assignments, and case studies to present the material critical to the successful management of agribusinesses. Topics include financial statements and analysis, financial planning/modeling, financial risk and risk management, the time value of money, and capital budgeting methods used in agribusiness.
Learning Outcomes
1. Read, understand, and create financial statements used in agribusiness, including income statements, balance sheets, cash flow statements, and owner's equity statements.
2. Describe and conduct financial analysis including comparative analysis, change analysis, and common-size analysis, and ratio analysis.
3. Describe and understand credit in agricultural production and agribusiness.
4. Understand the importance of capital budgeting within agribusiness and be able to conduct capital budgeting.
5. Describe, calculate, and use standard measures of investment return including net present value, internal rate of return, discounted payback period, and simple payback period.

AEEC 5210. International Agricultural Trade Theory and Policy
3 Credits (3)
This course provides a review and analysis of international trade models. Analysis of the effects of trade instruments such as tariffs, quotas, and subsidies on welfare and income distribution. Analysis of bilateral, regional, and multilateral trade agreements and their effect on the agricultural sector from both country-specific and global perspectives. May be repeated up to 3 credits.
Learning Outcomes
1. Understand and be able to describe the importance of international trade to U.S. agriculture.
2. Familiar with commonly used trade models to describe impacts of trade barriers, for example tariffs, quotas, and subsidies.
3. Analyze trade agreements and their impact on economies of different trade partners.

AEEC 5220. Financial Derivative Markets
3 Credits (3)
This course examines advanced futures and options strategies for income generation and risk management. Coverage includes a variety of markets, e.g., interest rates, stock indexes, metals, currencies, livestock, and grains. Both technical and fundamental trading strategies are identified and discussed. Same as AEEC 3220/BFIN 311 with additional coursework required at the graduate level. Cannot receive credit for both AEEC 3220/BFIN 311 and AEEC 5220/BFIN 511. Taught with BFIN 511.
Learning Outcomes
1. Define risk and identify methods of managing risk.
2. Demonstrate understanding of vocabulary associated with derivatives and derivative markets.
3. Identify the role that derivative markets play in reducing risk.
4. Demonstrate a basic understanding of derivative markets including their use in risk management and income generation.

AEEC 5230. Public Sector Economics
3 Credits (3)
Introduction to the economic rationale for government intervention in the economy and the effects of that intervention on economic agents and the economy in general. Emphasis on the expenditure side of government policies. Same as POLS 522. May be repeated up to 3 credits.
Learning Outcomes
1. The focus of Public Sector Economics I, which draws on microeconomic theory, concentrates on the development of analytical tools and their application to key issues relating to the spending activities of government.
2. This course aims to provide students with a solid grounding in the analytical methods that are important for studying the role of government in society.
3. Moreover, it will provide students with an economics perspective of that role and when it is appropriate for governments to intervene in an economy.
4. Once established, students will have a practical way to examine a modern government's programs such as social Security and other welfare programs.

AEEC 5240. Econometrics
3 Credits (3)
An integration of quantitative and statistical techniques for research and management in economics and business. May be repeated up to 3 credits.
Prerequisite: ECON 457 and ECON 405 or A ST 505.
Learning Outcomes
1. This course will cover simple linear regression on cross-sectional data; multiple-regression, data with limited dependent variables (including binary, truncated/censored, and count data); and if time permits, time series econometrics.
2. After this course, you will understand the theories behind these methods, know when to use them, and be able to carry them out in Stata®, a popular commercial software for applied econometricians.

AEEC 5320. Microcomputer Applications in Agriculture
3 Credits (2+2P)
An advanced course in electronic spreadsheets and the concepts and tools of database management emphasizing agricultural applications. Same as AEEC 3270 with additional work required at the graduate level. Cannot receive credit for both AEEC 3270 and AEEC 5320. May be repeated up to 3 credits.
Prerequisite: AEEC 2140G or consent of instructor.
Learning Outcomes
1. Understand and apply descriptive, predictive, and prescriptive analysis to solve business problems.
2. Use Excel spreadsheet formula in modeling agribusiness problems/solutions.
3. Use basic spreadsheet skills to conduct simple business feasibility analyses.
4. Conceptualize and solve a research problem.

AEEC 5330. Agribusiness Marketing
3 Credits (3)
Applications course in which self-managed teams apply marketing theory in the development and presentation of marketing plans for food and agribusiness firms. Course includes analysis of marketing problems with

emphasis on strategic marketing issues changing trade policies, and global competiveness. May be repeated up to 3 credits.

Learning Outcomes

1. Estimate consumer demand and supply functions using regression analysis.
2. Measure consumer willingness to pay for food products using conjoint analysis.
3. Evaluate the value of new product attributes using contingent valuation.
4. Conduct market research and present results.

AEEC 5340. Agribusiness Management
3 Credits (3)

Integration of production, marketing, accounting, finance, agricultural policy, human behavior, and business environment concepts in management of agricultural businesses using a decision case approach. May be repeated up to 3 credits.

Learning Outcomes

1. To provide an integrated approach to marketing, financial, and strategic management problems of agribusiness and commercial farm and ranch businesses.
2. To develop a deeper understanding of the agribusiness system through the investigation of selected U.S. agribusinesses.

AEEC 5350. Economics of Water Resource Management and Policy
3 Credits (3)

Focuses on issues, approaches and methods used in the assessment of water resource management and policy problems. Extends and further develops student understanding and comprehension of specific economic concepts and methods that are useful in the assessment and management of water resources, including cost-benefit analysis, welfare economics, non-market valuation, watershed management, and consideration of equity and ethical concerns. Students will develop critical reasoning, communication and analytic skills through active class discussions and assignments that emphasize both quantitative and written products.

Learning Outcomes

1. Describe the major categories of water use and explain their role, function, and economic value of water within natural and human systems.
2. Apply basic economic concepts to the assessment of water quantity and quality issues.
3. Analyze impacts of water management and policy decisions on competing water resource users, public interests, and address their potential for conflict.
4. Demonstrate conceptual and systems thinking applied to water resource problems.
5. Apply quantitative and qualitative reasoning, modeling, and decision-support methods to water resource problems, including Integrated Water Resources Management (IWRM), Cost-Benefit Analysis (CBA), and Economic and Environmental Impact Assessment.
6. Compare analytic methods for watershed assessment, including statistical, optimization, and simulation methods applied to watershed assessment.

AEEC 5360. Production Economics
3 Credits (3)

Application of microeconomic theory to problems and decisions of food and agricultural firms. The theoretical foundation of production economics and the theory of the firm are developed. May be repeated up to 3 credits.

Prerequisite: MATH 1430G, ECON 312, and ECON 457.

Learning Outcomes

1. Students should be able demonstrate an understanding of the microeconomic underpinnings of production economics, as well as how theoretical assumptions are made regarding physical production of agricultural products.
2. Students should be able to examine production decisions by agricultural firms, and determine economically optimal decisions, including under cases of risk and uncertainty.

AEEC 5402. AI Applications in Fiber and Food Systems
3 Credits (3)

Focusing on food and fiber systems, the course includes applications of AI to food processing, food safety, nutrition, and sustainability. Students in the course will explore demand forecasting, labor management, consumer behavior, and other economic and sociocultural aspects of food and fiber systems. The course will incorporate concepts of equitable access, job quality, transparency, data privacy and security, and responsible and ethical use of AI in fiber and food systems.

Learning Outcomes

1. Identify application areas in food and fiber systems for AI opportunities.
2. Evaluate AI tools for nutrition, food processing, food safety, supply chain management, and sustainability in food and fiber systems.
3. Assess the impact of AI tools on demand forecasting, labor management and consumer behavior in food and fiber systems.
4. Apply machine learning and AI methods to enhance decision-making across food and fiber value chains.
5. Develop and evaluate predictive and classification models using real-world data from food and fiber systems.
6. Discuss and apply ethical and responsible AI frameworks to food and fiber systems.

AEEC 5404. Emerging Topics in AI for Food and Agriculture
3 Credits (3)

Analyze emerging applications and uses of AI in food systems, agriculture, and the environment. Project impacts of emerging AI topics to agriculture, the environment, and food and fiber industries. Evaluate new developments in AI for application to food, fiber, agriculture, and the environment. Explore ethical dimensions of AI in agriculture.

Learning Outcomes

1. Analyze emerging applications and uses of AI in food systems, agriculture, and the environment.
2. Describe and discuss how emerging developments in AI can impact food, fiber, and agriculture businesses.
3. Describe and discuss impacts of emerging AI technologies to agriculture, the environment, and food and fiber industries.
4. Evaluate new developments in AI for application to food, fiber, agriculture, and the environment.

AEEC 590. Special Topics
3 Credits (3)

Seminars in selected current topics in the various areas of agricultural economics and economics. Offerings will carry a subtitle.

Prerequisite: consent of instructor.

AEEC 593. Internship
1-6 Credits

Supervised professional on-the-job training experience in policy analysis.

AEEC 594. Internship
1-6 Credits

One semester to six months internship with a regulated firm or public utility commission. A faculty member will direct and evaluate the internship. For AEEC regulatory option students only.

AEEC 595. Internship
3 Credits (3)
Supervised professional on-the-job learning experience.
Prerequisite(s): Consent of instructor.

AEEC 596. Individual Study
1-3 Credits
Individual study programs. Each offering will carry a subtitle. Maximum of 3 credits in a semester and 6 credits in a program.
Prerequisite: consent of instructor.

AEEC 599. Master's Thesis
1-15 Credits
Thesis.

AEEC 5991. Non-Thesis Research Project
1-3 Credits (1-3)
Individual investigations, either analytical or experimental. Maximum of 3 credits per semester. No more than 3 credits toward a degree. May be repeated up to 3 credits.

AEEC 5994. Creative Component Project
3-6 Credits (3-6)
Individual investigations, either analytical or experimental. A minimum of 3 to 6 credits per semester. No more than 6 credits toward degree. Consent of instructor required. May be repeated up to 6 credits.
Prerequisite: Consent of Instructor.

AEEC 5996. Special Topics
3 Credits (3)
Seminars in selected current topics in the various areas of agricultural economics and economics. Offerings will carry a subtitle.
Prerequisite: consent of instructor.

AEEC 5997. Individual Study
1-3 Credits
Individual study programs. Each offering will carry a subtitle. Maximum of 3 credits in a semester and 6 credits in a program.
Prerequisite: consent of instructor.

AEEC 5998. Internship
1-6 Credits
Supervised professional on-the-job training experience in policy analysis.

AEEC 5999. Master's Thesis
1-15 Credits
Thesis.

Name: Dr. Carlos Carpio Ochoa, Department Head

Office Location: GT Room 387

Agricultural Economics and Agricultural Business - Bachelor of Science in Agriculture

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300/3000 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix	Title	Credits
General Education		
Area I: Communications		
English Composition - Level 1		
ENGL 1110G	Composition I	4
or ENGL 1110H	Composition I Honors	
English Composition - Level 2		
Select one from the following:		3
ENGL 2130G	Advanced Composition	
ENGL 2210G	Professional and Technical Communication	
ENGL 2210H	Professional and Technical Communication	
ENGL 2215G	Advanced Technical and Professional Communication	
ENGL 2221G	Writing in the Humanities and Social Science	
Oral Communication		
Select one from the following:		3
ACOM 1130G	Effective Leadership and Communication in Agriculture	
COMM 1115G	Introduction to Communication	
COMM 1130G	Public Speaking	
HNRS 2175G	Introduction to Communication Honors	
Area II: Mathematics		
MATH 1430G	Applications of Calculus I [2]	3
Area III/IV: Laboratory Sciences and Social/Behavioral Sciences		*10*
ECON 2110G	Macroeconomic Principles (Economic Theory Coursework)	
ECON 2120G	Principles of Microeconomics Honors (Economic Theory Coursework)	
Area III: Laboratory Sciences (4 credits) [1]		
Area V: Humanities [1]		*3*
Area VI: Creative and Fine Arts [1]		*3*
General Education Elective [1]		*3-4*
Viewing a Wider World [3]		**6**
Departmental/ College Requirements		
Quantitative		*12*
AEEC 2140	Technology and Communication for Business Management	
AEEC 3260	Economic Analysis of Food and Agribusiness	
AEEC 3270	Spreadsheet Applications in Food and Agriculture	
Choose one from the following:		
A ST 311	Statistical Applications	
MATH 1350G	Introduction to Statistics	
General Business		*15*
ACCT 2110	Principles of Accounting I	
ACCT 2120	Principles of Accounting II	
BLAW 316	Legal Environment of Business	
BFIN 341	Financial Analysis and Markets	
Select one from the following:		
MGMT 309	Human Behavior in Organizations	
MGMT 332	Human Resources Management	
MGMT 361	Small Business Management	
Economic Theory [4]		*6*

AEEC 3250	Economics of Food and Agricultural Markets	
or ECON 312	Intermediate Microeconomic Theory	
ECON 304	Money and Banking	
or ECON 311	Intermediate Macroeconomic Theory	
Applied Economics/Business		*25*
ACES 1120	Freshman Orientation	
ACES 1210	Financial Fitness for College Students	
AEEC 1110	Introduction to Agricultural Economics and Business	
AEEC 1120	Careers in Food and Agribusiness	
AEEC 2110	Principles of Food and Agribusiness Management	
AEEC 3210	Marketing and Food Agricultural Products	
or MKTG 305	Marketing and Food Agricultural Products	
AEEC 3280	Applied Production Economics	
AEEC 4410	Senior Seminar	
AEEC 4110	Food and Agribusiness Financial Management	
AEEC 3140V	Agricultural Policy	
AEEC 4530	Case Studies in Food and Agribusiness Management	
Required Specialty Area [5]		*6*
Select and Complete two courses (6 hrs) from one Specialty Area:		
Natural Resources		
AEEC 3240	Agricultural and Natural Resource Law	
AEEC 3130V	Water Resource Economics	
or ECON 384V	Water Resource Economics	
AEEC 3120V	Natural Resource Economics	
or ECON 337V	Natural Resource Economics	
Finance		
AEEC 3220	Financial Derivative Markets	
AEEC 4550	Real Estate Appraisal	
or BFIN 470	Real Estate Appraisal	
Marketing		
AEEC 3230	Food and Agricultural Sales

or MKTG 451	Food and Agribusiness Market Assessment	
AEEC 4520	Food and Agribusiness Marketing Plan Development	
Second Language: (not required)		
Electives, to bring the total credits to 120 [6]		**17-18**
Total Credits		**120**

1. See the General Education (p. 262) section the catalog for a full list of courses. It is strongly encouraged that students satisfy the Area II Laboratory Science category by enrolling in AGRO 1110G Introduction to Plant Science (Lecture & Lab).
2. MATH 1430G Applications of Calculus I is required for the degree but students may need to take any prerequisites needed to enroll in MATH 142G first.
3. See the Viewing a Wider World (p. 266) section of the catalog for a full list of courses.
4. Students who are interested in graduate degrees should consult with their academic advisor or faculty mentor early in their undergraduate program as some courses may have specific grade requirements and/or prerequisites. Our department participates in NMSU's Graduate School MAP Program where students can take graduate courses during the last part of their undergraduate degree.
5. Specialty Areas are Natural Resources, Finance, and Marketing. Students must complete two courses from the selected Specialty Area.
6. Elective credits may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with the academic advisor.

A Suggested Plan of Study for Students

A roadmap for students coming into Department of Agricultural Economics and Agricultural Business without deficiencies and without advanced coursework, e.g., AP course credit or dual credits wishing to pursue a degree in Agricultural Economics and Agricultural Business (AEAB).

This roadmap assumes student placement in MATH 1215 and ENGL 1110G. The contents and order of this roadmap may vary depending on initial student placement in mathematics and english. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year		
Fall		**Credits**
ACES 1120	Freshman Orientation	1
ACES 1210	Financial Fitness for College Students	1
AEEC 1120	Careers in Food and Agribusiness	1
AEEC 1110	Introduction to Agricultural Economics and Business	3

VWW - Viewing a Wider World Course [3]		3
BLAW 316	Legal Environment of Business	3
Free Elective Course [4, 6]		3
	Credits	**13**
	Total Credits	**120**

1 See the General Education (p. 262) section the catalog for a full list of courses. It is strongly encouraged that students satisfy the Area II Laboratory Science category by enrolling in AGRO 1110G Introduction to Plant Science (Lecture & Lab).

2 MATH 1430G Applications of Calculus I is required for the degree but students may need to take any prerequisites needed to enroll in MATH 1430G Applications of Calculus I first.
**MATH 1215 and MATH 1220G are prerequisites, but if they are not needed use Free Elective Courses to replace the courses in the Roadmap*

3 See the Viewing a Wider World (p. 266) section of the catalog for a full list of courses.

4 Elective credits may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with the academic advisor.

5 Specialty Area courses can be found on the Requirements (p. 352) tab of this degree. The areas are Natural Resources, Finance and Marketing. Students must complete two courses from the selected Specialty Area

6 Students who are interested in graduate degrees should consult with their academic advisor or faculty mentor early in their undergraduate program as some courses may have specific grade requirements and/or prerequisites. Our department participates in NMSU's Graduate School MAP Program where students can take graduate courses during the last part of their undergraduate degree.
**The 4th Year Semester (Spring) shows 13 hours. Student's financial aid requirement may require them to enroll in 15 hours.*

Natural Resource Economics and Policy - Bachelor of Science in Agriculture

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300/3000 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Electives, to bring the total credits to 120 [6]		**12**
Total Credits		**120**

1 See the General Education (p. 262) section of the catalog for a full list of courses.

2 MATH 1430G Applications of Calculus I is required for the degree but students may first need to take any prerequisites needed before taking MATH 1430G. Students who place or transfer in a higher-level course are exempt from MATH 1430G.

3 See the **General Education** section of the catalog for a full list of courses. Students are strongly encouraged to satisfy the Area III Laboratory category by enrolling in courses related to their area of interest in environmental and natural resource sciences, which are prerequisites to upper-level courses. Recommended options include FWCE 1110G Introduction to Natural Resources Management, BIOL 2610G Principles of Biology: Biodiversity, Ecology, and Evolution, CHEM 1120G Introduction to Chemistry Lecture and Laboratory (non majors), CHEM 1215G General Chemistry I Lecture and Laboratory for STEM Majors.

4 See the **General Education** section of the catalog for a full list of courses. Students are strongly encouraged to satisfy this General Education Elective with another Laboratory Science related to their area of interest in environmental and natural resource sciences (in addition to that required in Area III). These courses are prerequisites to upper-level courses in these fields. Recommended options include FWCE 1110G Introduction to Natural Resources Management, BIOL 2610G Principles of Biology: Biodiversity, Ecology, and Evolution, CHEM 1120G Introduction to Chemistry Lecture and Laboratory (non majors), CHEM 1215G General Chemistry I Lecture and Laboratory for STEM Majors.

5 See the Viewing a Wider World (p. 266) section of the catalog for a full list of courses.

6 It is strongly suggested that students use their elective credits to earn a minor (or two) such as Sustainability, Conservation Ecology, Environmental Science, Range Science, Soil Science, Wildlife Science, Economics, Public Law, Public Administration, or Geographic Information Systems.

Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credit and may appear in variable form base on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their academic advisor.

A Suggested Plan of Study for Students

A roadmap for students coming into the Department of Agricultural Economics and Agricultural Business without deficiencies and without advanced coursework, e.g., AP course credit or dual credits wishing to pursue the degree in Natural Economics and Policy (NREP).

This roadmap assumes student placement in MATH 1215 and ENGL 1110G. The contents and order of this roadmap may vary depending on initial student placement in mathematics and english. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

Science, Policy and Ethics (300/3000-level or above)		3
AEEC Elective Course (300/3000-level or above)		3
Free Elective Course [2, 6]		3
	Credits	**13**
	Total Credits	**120**

1 See the General Education (p. 262) section of the catalog for a full list of courses.

2 It is strongly suggested that students use their elective credits to earn a minor (or two) such as Sustainability, Conservation Ecology, Environmental Science, Range Science, Soil Science, Wildlife Science, Economics, Public Law, Public Administration, or Geographic Information Systems.
Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

3 See the **General Education** section of the catalog for a full list of courses. Students are strongly encouraged to satisfy the Area III Laboratory category by enrolling in courses related to their area of interest in environmental and natural resource sciences, which are prerequisites to upper-level courses. Recommended options include FWCE 1110G Introduction to Natural Resources Management, BIOL 2610G Principles of Biology: Biodiversity, Ecology, and Evolution, CHEM 1120G Introduction to Chemistry Lecture and Laboratory (non majors), CHEM 1215G General Chemistry I Lecture and Laboratory for STEM Majors.

4 See the **General Education** section of the catalog for a full list of courses. Students are strongly encouraged to satisfy this General Education Elective with another Laboratory Science related to their area of interest in environmental and natural resource sciences (in addition to that required in Area III). These courses are prerequisites to upper-level courses in these fields. Recommended options include FWCE 1110G Introduction to Natural Resources Management, BIOL 2610G Principles of Biology: Biodiversity, Ecology, and Evolution, CHEM 1120G Introduction to Chemistry Lecture and Laboratory (non majors), CHEM 1215G General Chemistry I Lecture and Laboratory for STEM Majors.

5 See the Viewing a Wider World (p. 266) section of the catalog for a full list of courses.

6 The 4th year semester (Spring) shows 13 hours. Student's financial aid requirement may require them enroll in 15 hours.

Agricultural Business Management-Undergraduate Minor

The minor in Agricultural Business Management (ABM) consists of 18 or more credit hours of approved course work from the list below. All courses must be completed with grades of "C" or better. Once courses are completed or show "IP" status, students pursuing the ABM minor need to log in to their myNMSU and print out the STAR Audit for the minor and obtain departmental approval. The course requirements for the ABM minor are as follows:

Prefix	Title	Credits
Required Core		
AEEC 2110	Principles of Food and Agribusiness Management	3
AEEC 3210	Marketing and Food Agricultural Products	3
AEEC 2140	Technology and Communication for Business Management	3
Agricultural Policy		
Choose one from the following		*3*
AEEC 3110V	World Agriculture and Food Problems	
AEEC 3120V	Natural Resource Economics	
AEEC 3130V	Water Resource Economics (Agribusiness Electives)	
AEEC 3140V	Agricultural Policy (Technical Courses (6))	
Ag Business and Ag Economics		
Choose two from the following		*6*
AEEC 3220	Financial Derivative Markets	
AEEC 3230	Food and Agricultural Sales	
AEEC 3240	Agricultural and Natural Resource Law	
AEEC 3250	Economics of Food and Agricultural Markets	
AEEC 3270	Spreadsheet Applications in Food and Agriculture [0,3]	
AEEC 3280	Applied Production Economics	
AEEC 4110	Food and Agribusiness Financial Management	
AEEC 4510	Food and Agribusiness Market Assessment	
AEEC 4520	Food and Agribusiness Marketing Plan Development	
AEEC 4530	Case Studies in Food and Agribusiness Management	
AEEC 4540	Economics of Making and Marketing Wine	
AEEC 4550	Real Estate Appraisal	
Total Credits		**18**

Natural Resource Economics - Undergraduate Minor

The minor in Natural Resource Economics (NRE) consists of 18 or more credit hours of approved course work of which at least 9 hours must be numbered 300/3000 or above and completed with grades of "C" or better. Once courses are completed or show "IP" status in the audit, students pursuing the NRE minor need to log in to their MyNMSU and print out the STAR Audit and obtain departmental approval. The course requirements for the NRE minor are as follows:

Prefix	Title	Credits
Required Courses		
ECON 2120G	Principles of Microeconomics	3
Select one course from the following:		*3*
AEEC 3120V	Natural Resource Economics	
or ECON 337V	Natural Resource Economics	
AEEC 3130V	Water Resource Economics	
or ECON 384V	Water Resource Economics	
Select two courses from the following		*6*
FWCE 2110	Principles of Fish and Wildlife Management	
AEEC 3140V	Agricultural Policy	
POLS 330	Introduction to Public Administration	
Select two courses from the following		*6*
FWCE 1110G	Introduction to Natural Resources Management	
FWCE 301	Wildlife Ecology	
GEOG 2130	Map Use and Analysis	
RGSC 2110	Introduction to Rangeland Management	
PHIL 300/3000+		
Total Credits		**18**

Animal and Range Sciences

Undergraduate Program Information

The Department of Animal and Range Sciences provides opportunities for you to follow a variety of interests in modern scientific agriculture. The animal science curriculum provides a background for many phases of the food animal industry, from farm animal production on rangelands to management positions in the food processing industry to highly technical careers in research and companion animal management. The range science curriculum provides you with knowledge and skills necessary to sustainably manage rangelands for multiple uses. These curricula allow you to acquire the background necessary to adjust easily to variations in specific job opportunities. If you are majoring in either animal science or range science, you must meet general education requirements, have a minimum of 48 credits of upper-division courses (numbered 300 and above), and complete a minimum of 35 credits in courses in the College Agricultural, Consumer and Environmental Sciences.

Graduate Program Information

The Department of Animal and Range Sciences offers graduate work leading to the Master of Science and the Doctor of Philosophy degrees with majors in animal science and range science. The Doctor of Philosophy degree in animal science is only in the areas of reproductive physiology or ruminant nutrition.

Prerequisite for admission as a regular graduate student in the department is the completion of a curriculum, substantially equivalent to that required of undergraduate students in animal or range science at this institution, 3.0 GPA, and three letters of reference.

For the Master of Science degree, a minimum of 30 semester credits of graduate work in the major and related subjects will be required, together with a thesis for most majors. A non-thesis option is available for certain students.

For the Master of Agriculture with specialization in Domestic Animal Biology, students must complete 32 credit hours of graduate courses which include 2 credits of ANSC 598 Special Research Programs for the creative component.

The Doctor of Philosophy student must demonstrate proficiency in a foreign language or research tool, such as experimental statistics,

philosophy of science, computer science, or mathematics. Choice of the research tool will remain the option of the student subject to approval by the student's graduate committee. Demonstration of proficiency may be accomplished by satisfactory completion of courses or by other suitable evidence acceptable to the student's committee. In addition, doctoral students are required to complete advanced courses in a field of study closely related to animal science or range science. The number of courses to be completed in the related area will be determined by the student's committee. Related areas of study often are biology, chemistry, or experimental statistics.

The Department of Animal and Range Sciences is a sponsoring department in the recently approved interdisciplinary graduate degree program that offers both a MS and Ph.D. degree in Water Science Management. The degree program is being handled through the College of Agricultural, Consumer and Environmental Sciences (ACES), and the program description, including application guidelines, classes involved, and topic areas being supported can be found in the catalog under the section describing ACES Programs. Interested students are encouraged to contact the Department Head of Animal and Range Sciences, Shanna Ivey at (575) 646-2515 for more information.

Graduate work in the department is designed to prepare the student for work in the fields of research, extension, teaching, production, and conservation.

Facilities available to graduate students include herds and flocks of the major livestock species, animal nutrition laboratories, physiology laboratories, meats laboratory, small animal laboratory, 25,000-specimen herbarium, two ranches of approximately 92,000 acres, and a 1,000-head experimental feedlot. Active cooperation is maintained with federal research agencies located on and off the campus.

A number of graduate assistantships will be available each year. Inquiries should be addressed to the head of the department.

Degrees for the Department

Bachelor Degree(s)

- Animal Science (Animal Industry) - Bachelor of Science in Agriculture (p. 372)
- Animal Science (Science) - Bachelor of Science in Agriculture (p. 374)
- Range Science - Bachelor of Science in Agriculture (p. 377)

Master Degree(s)

- Agriculture (Domestic Animal Biology) - Master of Agriculture (p. 98)
- Agriculture (Domestic Animal Biology) - Master of Agriculture (Online) (https://catalogs.nmsu.edu/global/nmsu-global/agriculture-domestic-animal-biology-master-agriculture-online/)
- Animal Science - Master of Science (p. 104)
- Mathematics - Graduate Minor (p. 259)
- Music (Collaborative Piano) - Master of Music (p. 176)
- Range Science - Master of Science (p. 185)

Doctoral Degree(s)

- Animal Science - Doctor of Philosophy (p. 200)
- Mathematics - Graduate Minor (p. 259)
- Music (Collaborative Piano) - Master of Music (p. 176)
- Range Science - Doctor of Philosophy (p. 234)

Minors for the Department

- Animal Science - Graduate Minor (p. 254)
- Dairy Science - Undergraduate Minor (p. 379)
- Horse Management - Undergraduate Minor (p. 379)
- Human Animal Interaction - Undergraduate Minor (p. 379)
- Livestock Production - Undergraduate Minor (p. 379)
- Ranch Management - Undergraduate Minor (p. 380)
- Range Science - Graduate Minor (p. 260)
- Range Science - Undergraduate Minor (p. 380)

Department Head **Shanna L. Ivey**

Professors Ashley, Fasenko, Fernald, Hernandez Gifford, Ivey, Löest, Scholljegerdes, Soto

Associate Professors Fuentes-Soriano, Geli, Gifford, Utsumi

Assistant Professors Garbowksi, Mezzomo Giotto, Wendt

College Track Associate Professors Campbell

College Track Assistant Professor Smythe

Instructors Bilovesky; Painter; Priest, Rogers

Co-operators (USDA) Estell, Herrick, Peters

Emeritus Faculty Allred, Bailey, Cibils, Holechek, McDaniel, Ross, Thomas

S. L. Ivey, Department Head, Ph.D. (New Mexico State University)- ruminant nutrition/microbiology; K. W. Allred, Ph.D. (emeritus, Texas A&M University)– plant taxonomy; R.L. Ashley, Ph.D. (Colorado State University)– physiology of reproduction; D.W. Bailey, Ph.D. (emeritus, Colorado State University)– rangeland management; J.W. Campbell, Ph.D. (New Mexico State University)- reproductive physiology; A.F. Cibils, Ph.D. (emeritus, Colorado State University)– grazing management and ecology; G.C. Duff, Ph.D. (New Mexico State University)-animal nutrition; G.M. Fasenko, Ph.D. (North Carolina State University)– companion animal management; A. G. Fernald, Ph.D. (Colorado State University)– land use hydrology and water quality hydrology; S. Fuentes-Soriano, Ph.D. (University of Missouri-Saint Louis)- biology in plant systematics and evolution; M. Garbowksi, Ph.D. (Colorado State University) - restorative ecology; H. M. E. Geli, Ph.D. (Utah State University)-landscape hydrology; C. Gifford, Ph. D. (University of Idaho)- animal science; J. Hernandez-Gifford, Ph.D. (Washington State University)- reproductive physiology; J. L. Holechek, Ph.D. (emeritus, Oregon State)– range ecology; C. A. Löest, Ph.D. (Kansas State University)– ruminant nutrition; K. C. McDaniel, Ph.D. (emeritus, Texas A&M University)– brush management; F. Mezzomo Giotto, Ph. D. (University of Nevada, Reno) - meat science and food safety; L. Prihodko, Ph.D. (Colorado State University)- range ecology; T. T. Ross, Ph.D. (emeritus, North Carolina State University)– physiology of reproduction and sheep production; E.J. Scholljegerdes, Ph.D. (University of Wyoming)– ruminant nutrition; B.G. Smythe, Ph.D. (New Mexico State University)- veterinary entomology; S.A. Soto-Navarro, Ph.D. (New Mexico State University)– ruminant nutrition; J. D. Thomas, Ph.D. (emeritus, University of Missouri-Columbia)– meat science; S. Utsumi, Ph. D. (New Mexico State University) - range ecology; J .Wendt, Ph.D. (Montana State University) - Ecology and Environmental Sciences

Adjunct faculty: *C. D. Allison, Ph.D. (Texas A&M University)– range management; R.A. Cushman, Ph.D. (North Carolina State University)- physiology of reproduction; A. Faist, Ph. D. (University Colorado Boulder) - range ecology; K. M. Harvstad, Ph.D. (Utah State University)– range animal*

nutrition; J.E. Herrick, Ph.D. (Ohio State University)– soils; M.R. Levi, Ph. D. (University of Arizona)-soil morphology/classification; T.J. Nagaraja, Ph.D. (Kansas State University)-rumen microbiology; D.P. Peters, Ph.D. (Colorado State University)– landscape ecology; S. Spiegal, Ph.D. (University of California Berkeley)-range management; M. Steele, Ph.D. (University of Guelph)– ruminant nutrition; A.F. Summers, Ph.D. (University of Nebraska)-physiology of reproduction.

Cooperative Extension Service: *D. Cram, Ph.D. (New Mexico State University)-range science; R. Hagevoort, Ph. D. (*Texas A&M University) - dairy science; *R. Sallenave, Ph.D (*University of Guelph*)-aquatic ecology; S. Smallidge, Ph.D. (New Mexico State University) - wildlife; C. Spackman, Ph.D. (*Utah State University*)- range science; J. L. Turner, Ph.D. (Kansas State University)– equine immunology and physiology; M. Ward, Ph.D. (North Dakota State University)- ruminant nutrition;*

Animal Science Courses

ANSC 1110. Animal Science Careers
1 Credit (1)
Introduction to scientific disciplines and career options in animal-agriculture career skill development, including resume preparation, networking, importance of internships, and leadership experiences in animal agriculture.
Learning Outcomes
1. Increasing the understanding of career opportunities in animal agriculture.
2. Gain a broad experience in the development of creative thinking about the career choices available in animal agriculture.
3. Apply the increased knowledge of career development in the career path and internship directions for each student.
4. Gain leadership experience that will be impactful for the student in their pursuit of a career in animal agriculture.

ANSC 1120. Introduction to Animal Science
3 Credits (3)
Survey of the livestock industry throughout the world. Basic management practices will be covered, including livestock selection, nutrition, reproduction, anatomy and marketing to the consumer. This course will also discuss animal behavior and welfare.
Learning Outcomes
1. Understand the role of farm animals in a global setting.
2. Describe the role of nutrition, breeding, behavior, welfare, and physiology of livestock in the world.
3. Explain the structure and organization of livestock industries.
4. Discuss concepts and terminology of the livestock industries as they relate to the global perspective.
5. Classify the overall management, care, marketing of animals, represented in the various livestock industries.

ANSC 1120H. Introduction to Animal Science Honors
3 Credits (3)
This course is designed to provide an introduction to nutrients and their function in livestock animals. Basic feed identification, evaluation, and diet formulation will be discussed. The anatomy of the digestive tract of animals and their ability to utilize feedstuffs is presented. Classification, digestion, absorption, transport and metabolism of major nutrients required by animals are studied. Additional course work will be required. Restricted to Las Cruces campus only.
Prerequisite(s): Eligibility for membership in honors college.
Learning Outcomes
1. Identify conventional and non-conventional feedstuffs that are fed to livestock animals.
2. Describe various methods for feed processing and storage.
3. Assess the nutritional value of a ration or feed ingredients.
4. Interpret the NRC (Nutrient Requirement Council) guidelines for feeding livestock.
5. List the basic digestive anatomy for all classes of livestock.
6. Describe nutritional deficiencies and digestive disorders common to livestock animals

ANSC 1120L. Introduction to Animal Science Lab
1 Credit (2P)
Students will observe and participate in activities related to farm animal management and will include areas of livestock selection, nutrition, reproductive physiology, animal ID and animal health. This lab is required for animal science majors.
Prerequisite(s)/Corequisite(s): ANSC 1120.
Learning Outcomes
1. To provide the students with an understanding of the principles, concepts and terminology of today's livestock industry

ANSC 1125. Equestrian Team Competition
1 Credit (1)
Basic principles of equestrian team competition, including care and management of the riding horse, equitation equipment, and development of riding skills. Emphasis will be placed competition within the Intercollegiate Horse Show Association. Consent of Instructor required. May be repeated up to 8 credits.
Learning Outcomes
1. Have a general knowledge of horses and basic horsemanship/ equitation position.
2. Explain and demonstrate basic techniques of balance, control, and safety skills while being in contact and mounted on a horse.
3. Explain and demonstrate proper handling and safety around horses and the proper care of the stable and tack.
4. Be able to ride unassisted at the walk, jog, and lope in either English or Western tack.
5. Apply general knowledge of horsemanship and equitation to competitive equine events in a safe manner including equitation on the flat, equitation over fences, horsemanship, ranch riding and reining.

ANSC 1130. Western Equitation I
2 Credits (4P)
Basic principles of Western riding, including care and management of the riding horse, equitation equipment, and development of riding skills.
Learning Outcomes
1. Articulate basic horsemanship position and how it is used to communicate with the horse.
2. Implement proper handling and basic techniques of balance, control, and safety while working with or riding a horse.
3. Execute a basic horsemanship pattern at a walk, jog, and lope.
4. Integrate general knowledge of horsemanship to competitive equine events in a safe manner.

ANSC 1140. Introduction to Dairy Science
3 Credits (3)
Introduction to the basic aspects of dairy science and how to apply key concepts to the practical feeding and management of dairy cattle

and production of dairy products. Students should also obtain an appreciation for the size and diversity of the dairy industry.
Prerequisite(s)/Corequisite(s): ANSC 1120. Restricted to Las Cruces campus only.

Learning Outcomes

1. Learn key concepts in dairy production and management
2. Be familiar with terms used in production of milk and milk products

ANSC 1160. Introductory Horse Science
3 Credits (2+2P)
The light horse industry; breeds; introduction to feeding, breeding, marketing and management; handling and selecting horses for breeding and performance.

Learning Outcomes

1. Describe and identify breeds of horses, their characteristics and their uses.
2. Demonstrate knowledge of basic physiology of horses by recalling parts of the horse, including bones, muscle, tendons and ligaments. Also, by ageing horses via teeth, body condition scoring and taking vital signs.
3. Demonstrate safe and proper handling of horses.
4. Demonstrate comprehension of basic nutrition and feedstuffs by formulating/correcting diets in clinical and non-clinical situations.
5. Recall aspects of basic reproduction by calculating a stallion book and recalling appropriate procedures for breeding.
6. Create informative articles that seek to educate the lay horse person about a topic covered in class.

ANSC 1170. Introduction to Animal Metabolism
3 Credits (3)
Principles underlying the mechanisms of animal metabolism as they relate to production, maintenance, and health of animals.
Prerequisite: CHEM 1215G.

Learning Outcomes

1. This course provides an introduction to the study of the physiology of life.
2. The first part of the course covers acids and bases and the chemical nature of organic compounds.
3. The second part of the course relates to the chemistry of biomolecules (nutrients) and summarizes the chemical reactions of life (metabolism).

ANSC 1180. Companion Animal in Society
3 Credits (3)
Examination of the historical, current, and potential future roles of companion animals in human society. Topics include animal domestication, breeds, exotic companion animals, the companion animal industry, and competitions and sports involving companion animals. Emphasis is on canine and feline species. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

Learning Outcomes

1. Discuss the theories regarding why, how, and when companion animals became domesticated.
2. Describe how selective breeding has optimized certain physiological and behavioral traits of companion animals in order to fulfill the needs of individual people and society.
3. Explain the concept of human-companion animal interaction (HAI) and the influence this bond has on human behavior, health, society, and government policy/laws.
4. Understand the breadth and economic impact of the rapidly expanding companion animal industry and the recent expenditure trends of pet owners.
5. Discuss the past and present uses of companion animals and theorize regarding the future uses of companion animals in society
6. Be effective in searching for, and critically evaluating, scientific based resources.

ANSC 2120. Equine Management
3 Credits (3)
Introduction and application of the business skills necessary to effectively manage the equine operation. Students will learn how to use strategic thinking and sound business management practices to succeed in the demanding equine industry.
Prerequisite: ANSC 1160.

Learning Outcomes

1. Develop a working knowledge of the business principles needed to operate a successful entrepreneurial enterprise.
2. Increase the awareness of the need for business principles in the aggregate function of an equine operation.
3. Gain a greater perspective of accounting, economic and financial principles in an equine business operation.

ANSC 2130. Western Equitation II
2 Credits (4P)
Intermediate principles of Western riding, including reading horse behavior, limbering-up exercises, and developing riding skills. Introduction to rollbacks, turnarounds and stops.
Prerequisite: consent of instructor.

Learning Outcomes

1. Increasing the understanding of the student relative to equitation practices
2. Increase the students' ability to apply principles of Western Equitation to applied settings across a broad spectrum of outlets
3. Prepare the student to engage equine in a professional manner

ANSC 2140. Introduction to Companion Animal Science
3 Credits (3)
Introduction to the care of common companion animal species. Species specific housing and nutrition are covered in the context of maximizing animal health and well-being and reducing disease. May be repeated up to 3 credits.

Learning Outcomes

1. Accurately use scientific terminology common to the companion animal discipline.
2. Compare and contrast the physiological similarities and differences between the various companion animal species studied in class.
3. Create dietary plans based on the nutritional needs of different companion animal species to optimize animal health and lifespan.
4. Identify symptoms of disease/injury at the early stages of illness in order to obtain Veterinary care and treatment as quickly as possible.
5. Design and construct species specific cages/vivariums to maximize animal well- being and health.
6. Educate others regarding providing the best possible care for a variety of companion animal species.

ANSC 2150. Management of Equine Operations
3 Credits (3)
Introduction and application of business skills necessary to effectively manage the equine operation. Students will learn how to use strategic

thinking and sound business management practices to succeed in the demanding equine industry.
Prerequisite(s): ANSC 1160.
Learning Outcomes
1. Acquire a working knowledge of different sectors of the equine industry, including business practices, management and marketing skills.

ANSC 2310. Introduction to Meat Science
3 Credits (2+3P)
Fundamental aspects of the red meat industry. Lecture topics and laboratory exercises include the nutrient value of meat, meat preservation, meat safety, muscle structure and contraction, slaughter and processing of beef, lamb and pork, sausage manufacture, meat curing, meat cookery, and muscle and bone anatomy.
Learning Outcomes
1. Increasing the understanding of meat science applications across animal agriculture.
2. Increase the students' ability to apply principles of production to the industry perspective.
3. Apply the increased knowledge of meat science in a global situation.
4. Gain an understanding of the components involved in the development and processing of the red meat industry.

ANSC 2330. Animal Production
3 Credits (2+2P)
Production and utilization of beef cattle, sheep, and swine; emphasis on feeding, breeding, management problems and marketing; selection of animals for breeding and market
Learning Outcomes
1. Increasing the understanding of meat animal production.
2. Increase the students' ability to apply principles of production to the industry perspective.
3. Apply the increased knowledge of meat animal production to global situations.
4. Gain a broader understanding of the importance of meat animals in the global food system.

ANSC 2340. Genetics in Animal Science
3 Credits (3)
Introduction to genetics and inheritance relative to livestock production. Introduction to procedures for collection and use of performance information in livestock improvement programs.
Prerequisites: BIOL 2610G.
Learning Outcomes
1. Gain a broader understanding of the role genetic impacts in the livestock industry.
2. Employ an increased knowledge of impact of genetics in the food animal industry and the production and economic principles that apply.
3. Recognition of the global impacts of genetics in the food animal industry in a global setting.

ANSC 2996. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.
Learning Outcomes
1. Varies

ANSC 301. Animal and Carcass Evaluation
3 Credits (2+2P)
Determination of the market value of meat animals by relating live animal and carcass traits. Topics include the identification of economically important traits, grading, growth and development, wholesale and retail pricing, and futures and options markets. May be repeated up to 3 credits.
Learning Outcomes
1. Students should have a basic understanding of basic animal internal and external anatomy Yield and quality grades.
2. Students should have a basic understanding of live animal evaluation Carcass evaluation.
3. Students should have a basic understanding of economically important live and carcass traits.

ANSC 303. Livestock, Meat and Wool Evaluation
4 Credits (3+2P)
Selection, classification, grading, and judging of livestock, meat, and wool. May be repeated up to 4 credits.
Learning Outcomes
1. Judge all species of livestock to make decisions on class evaluation.
2. Assess classes of wool and make decisions on placing and be able to determine grade and quality of fleeces.
3. Evaluate and grade classes of meat and be able to make decisions on placing classes.
4. Defend decisions on class placing through written and oral defense.

ANSC 304. Feeds and Feeding
3 Credits (2+2P)
Digestibility of feeds, their nutritive values, grades, and classes, principles of ration formulation and computer ration formulations, and practical feeding of farm animals. May be repeated up to 3 credits.
Prerequisite: CHEM 1215G.
Learning Outcomes
1. Discuss how animals utilize nutrients.
2. Explain why feedstuffs differ in nutritional value.
3. Apply nutritional concepts to the practical feeding of farm animals.
4. Formulate diets that balance nutrient supply with the requirements of farm animals.

ANSC 305. Principles of Genetics
3 Credits (3)
Covers fundamental principles of reproduction, variation, and heredity in plants and animals. May be repeated up to 3 credits.
Prerequisite: (BIOL 2610G and BIOL 2110G, or BIOL 2110G and BCHE 140, and either CHEM 1215G or CHEM 1216).
Learning Outcomes
1. To provide an introduction to the basic concepts, methods, and terminology of genetics. Introduction to genomics and bioinformatics.
2. To develop a working understanding of genetics and heredity
3. To understand in some depth, the mechanism of DNA replication, transcription and protein synthesis. To understand the regulation of gene expression.
4. To examine the impact of genetics on both basic and applied aspects of the biological sciences, as well as its effects on our everyday lives.

ANSC 308. Horse Evaluation
4 Credits (2+4P)
Students will acquire a working knowledge of selection and classification of horses, learn criteria for evaluation and selection of breeding and

show animals, gain a broad understanding of judging conformation and performance in the horse, and learn effective oral and written communication skills through defense of class placings. This course is considered an introduction to the NMSU Horse Judging Team. May be repeated up to 4 credits.

Learning Outcomes

1. Evaluate the conformation and performance of horses using established criteria and demonstrate proficiency in applying these skills.
2. Formulate decisions confidently and efficiently based on observed data and established selection principles.
3. Apply a working vocabulary of equine industry terminology to accurately describe and discuss horse evaluation and classification.
4. Identify conformational faults in horses and analyze how these faults relate to potential performance or soundness issues.
5. Defend class placings through effective oral and written communication, demonstrating clarity, reasoning, and industry appropriate language.

ANSC 310. Exhibiting Livestock
3 Credits (1+4P)

Fitting and showing beef cattle, dairy cattle, sheep and swine. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate proper grooming, fitting, and handling techniques for multiple species of livestock commonly exhibited at fairs and shows.
2. Apply principles of animal selection and evaluation to choose appropriate livestock for exhibition based on conformation, health, and market readiness.
3. Implement best practices in animal care and management to ensure ethical treatment, optimal health, and performance of livestock throughout the exhibition process.
4. Analyze the rules, ethics, and regulations governing youth livestock exhibitions at local, state, and national levels.

ANSC 312V. Companion Animals and the Human- Animal Interaction
3 Credits (3)

The science behind human-animal interactions (HAI). An examination of the interactions between humans and companion animals and the effects on human and animal health and wellness. Cultural differences in HAI will be explored. Topics will include Animal Assisted Activity (AAA), Animal Assisted Therapy (AAT), and service animals. Emerging and future uses of companion animals in HAI will be discussed.

Learning Outcomes

1. Provide an overall description of "Human-Animal Interaction" (HAI).
2. Understand and accurately use terminology common to the discipline of HAI.
3. Be able to demonstrate how HAI has influenced human behavior, health, society, and government policy/laws.
4. Provide examples of how HAI influences human and animal physical and psychological health and well-being.
5. Accurately compare and contrast the different categories of HAI animals (ESA, AAA, AAT, Facility and Service Animals) and the training and laws that apply to each animal's presence in public places with a handler.
6. Provide examples of how the field of HAI is interdisciplinary and applies to both social (sociology, psychology, child development, criminal justice) and physical (physiology, animal behavior) sciences.
7. Theorize the future roles of companion animals in HAI.
8. Be competent in applying the knowledge gained in this class to everyday situations, and educate family, friends and members of society, using factual information, about the roles and benefits of companion animals in HAI.

ANSC 320. Equine Behavior and Training
3 Credits (6P)

Basic principles, methods and philosophies of handling, breaking and training the two-year-old Western horse. May be repeated up to 6 credits.
Prerequisite: ANSC 2130 or consent of instructor.

Learning Outcomes

1. Demonstrate ability to acceptably catch, lead, tie, pick up all four feet, and groom an assigned horse.
2. Develop a means of communication to work a young horse in the round pen to develop confidence in both handler and young horse.
3. Evaluate horse natural abilities to determine its direction of training.
4. Integrate desensitizing techniques in order to saddle and unsaddle a horse safely.

ANSC 321. Advanced Equine Behavior and Training
3 Credits (6P)

Continuation of ANSC 320. Further development of skills required to advance the training of the two-year-old Western horse. Emphasis will be placed on lateral work, lead changes, turn-arounds, obstacles, and making the horse accustomed to ranch and trail riding situations.
Prerequisite: ANSC 320 or consent of instructor.

Learning Outcomes

1. Students will apply knowledge gained on natural behavior of the horse while working horses in the round pen, and all groundwork associated with starting a young horse under saddle.
2. Students will demonstrate the ability to use natural aids as a means of communication while putting the first rides on their assigned horse in a safe environment.
3. Students will demonstrate their understanding of the natural reactions and instincts of a young horse by completing a 5 minute demonstration of their assigned horse at the Horse Preview before the NMSU Horse Sale.

ANSC 350. Special Topics
1-4 Credits

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

ANSC 351V. Agricultural Animals of the World
3 Credits (3)

Global study of the development and use of animals for production of food and nonfood products. Climatic, cultural, and economic influences on systems of livestock production and species and breeds of livestock utilized will be evaluated.

Learning Outcomes

1. Define fundamental/basic terms related to animal science systems.
2. Reproduce the cycles of reproduction and nutrition related to farm animals.
3. Give examples of animal domestication.
4. Compare and contrast ruminate and non-ruminate farm animals.
5. Identify and list characteristics of common breeds of farm animals.
6. List farm animals used in other parts of the world.

ANSC 360. Meat and Muscle Biology
3 Credits (3)

Course will explore in depth the antemortem and postmortem factors that influence the properties of meat.
Prerequisite: BIOL 2610G.
Learning Outcomes
1. Identify anatomical parts of the animal's muscular system.
2. Employ principles of respiration within muscle contraction and relaxation.
3. Contrast the relationship between biochemistry and physiology in the context of muscle to meat conversion.
4. Explain the influence of stressors on meat quality.
5. Identify campus resources to successfully complement classroom materials.

ANSC 370. System Physiology of Farm Animals
4 Credits (3+2P)
Structure and function of the animal body. Includes studies of the horse, cow, sheep, pig, and comparisons with the human body. May be repeated up to 4 credits.
Prerequisite: CHEM 1215G and BIOL 2610G or BIOL 2110G.
Learning Outcomes
1. The objective of this course is to introduce the basic terminology and concepts of animal anatomy and physiology.
2. The course will stress the understanding of the functions of the entire body.
3. The interaction of different systems and the effect of environmental factors will be emphasized.

ANSC 383. Equine Reproductive Management
3 Credits (1+4P)
Anatomy, physiology, and endocrinology of reproduction of the mare and stallion; training in modern reproductive techniques employed in the horse industry. May be repeated up to 3 credits.
Prerequisite: ANSC 1160, ANSC 2150, and ANSC 370.
Learning Outcomes
1. Develop an equine management plan related to reproduction to improve the health and performance of horses.
2. Recognize behaviors and signs of the mare's estrous cycle and interpret reproductive records to make informed breeding decisions.
3. Identify and explain the anatomy and physiology of the mare's and stallion's reproductive tract.
4. Compare and contrast various breeding methods, including their advantages, challenges, and suitability for specific scenarios.
5. Assess a mare's pregnancy status and calculate expected foaling dates based on diagnostic and observational data.

ANSC 390. Internship
1-3 Credits
Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 3 credits toward a degree. Graded S/U.
Prerequisite: consent of instructor.

ANSC 391. Undergraduate Research Experience
1-3 Credits (1-3)
Formal laboratory, library, or field study of problems related to animal sciences, emphasizing hypothesis development, testing, and reporting results. Projects are preplanned, reviewed, and approved. Students submit periodic written reports and final written and oral reports. May be repeated for a maximum of three credits. Consent of Instructor required.

ANSC 392. Animal Sciences Teaching/Extension Experience
1-3 Credits (1-3)
: Formal teaching experience related to animal sciences supervised by a faculty member. May involve classroom instruction, educational material development, and/or student evaluation and assessment. Students may also be involved in development, implementation, or assessment of adult or youth educational programs related to animal sciences, supervised by a faculty member. Students submit periodic written reports and a final written and oral report. May be repeated for a maximum of three credits. Consent of Instructor required.

ANSC 402. Animal Science Seminar
1 Credit (1)
A seminar course designed to inform students of the career opportunities, develop their interviewing and other interpersonal skills may also include reading, discussions, written reports, and seminar presentations of current relevant literature.
Learning Outcomes
1. Design resume and cover letter.
2. Develop a 30 second elevator speech.
3. Create answers to common interview questions.
4. Outline personal skills for professional settings.

ANSC 402 H. Animal Science Seminar
1 Credit (1)
Taught with ANSC 402 with additional work. Before enrollment, student must meet Honors eligibility and/or Crimson Scholar status.
Learning Outcomes
1. Design resume and cover letter.
2. Develop a 30 second elevator speech.
3. Create answers to common interview questions.
4. Outline personal skills for professional settings.

ANSC 411. Canine and Feline Behavior and Training
3 Credits (3)
The influence of domestication, breeds, genetics, and physiology on the behavior of canine and feline species. Training methods and modification of problem behaviors are examined. The impact of the pet parent on their animal's behavior is addressed.
Prerequisite: Junior or Senior status or consent of the instructor.
Learning Outcomes
1. Provide evidence why the dominance theory and use of punishment are outdated methods of training.
2. Be able to fully describe and provide examples of classical and operant conditioning learning methods.
3. Justify the importance of socialization in puppies and kittens and the impact this has on adult animals.
4. Accurately interpret canine and feline visual and vocal communication.
5. Demonstrate how to use reward-based learning.
6. Assess the most common behavioral issues in dogs and cats and describe in detail the steps to take to redirect and/or modify undesirable behaviors.
7. Be able to demonstrate how a clicker is used including appropriate timing and reward.
8. Critically evaluate, summarize, and effectively articulate information on behavior and training using both verbal and written skills.
9. Be confident in applying the knowledge gained in this class to everyday situations, and educate family, friends and members of society about companion animal behavior and humane training.

ANSC 412. Canine and Feline Health and Diseases
3 Credits (3)
A review of common infectious and non-infectious diseases and the basics of the immune response. Pathophysiology and treatment of these diseases and the role the pet parent plays in pre-disposing their animals to disease.
Prerequisite: ANSC 2140 or consent of instructor.
Learning Outcomes
1. Accurately use scientific terminology common to the canine and feline health and diseases discipline.
2. Describe what a disease is and the difference between non-infectious and infectious disease.
3. Identify normal versus abnormal vital signs in canines and felines and how they differ between the species.
4. Explain how non-specific (innate) and specific (adaptive) immunity defend against disease.
5. Compare and contrast the etiology (cause) and pathophysiology (physical symptoms) of different canine and feline diseases and identify and understand appropriate preventative measures and treatments.
6. Be competent and confident in educating dog and cat owners regarding the important role they play in disease prevention of their animals.

ANSC 421. Physiology of Reproduction
4 Credits (3+2P)
Fertility and the role of hormones, nutrition, selection, management and environment in the maintenance of high reproductive rate. May be repeated up to 4 credits.
Prerequisite: ANSC 370.
Learning Outcomes
1. Debate past, present, and future ethical issues in the animal science industries.
2. Compare relationships between anatomy, physiology, nutrition, genetics, and reproduction among animal species.
3. Examine interrelationships between nutrition, genetics, reproduction, and their effects on animal health and the environment.

ANSC 422. Animal Nutrition
3 Credits (3)
Nutrient utilization and measurement and nutrient requirements for the various body functions. May be repeated up to 3 credits.
Prerequisite: CHEM 313 or ANSC 1170.
Learning Outcomes
1. Compare digestion, absorption and metabolism of nutrients between ruminants and non-ruminants.
2. Demonstrate how animal physiology drives nutrient usage in the body.
3. Integrate animal nutrition concepts to better understand efficient animal production and health.

ANSC 423. Animal Breeding
3 Credits (2+2P)
Mating systems, and selection procedures; calculation of inbreeding coefficients, genetic relationships, and gene frequency. May be repeated up to 3 credits.
Prerequisite: ANSC 2340 or 305.
Learning Outcomes
1. Explain the basic principles of Mendelian and quantitative genetics.
2. Interpret and apply population genetics and selection models to livestock breeding programs.
3. Calculate and analyze genetic parameters such as heritability, repeatability, and breeding values.
4. Evaluate breeding strategies including inbreeding, crossbreeding, and composite formation.
5. Apply molecular genetics tools and genomic concepts to animal breeding.
6. Design simple breeding plans incorporating selection, mating strategies, and reproductive technologies.

ANSC 424. Swine Production
3 Credits (2+2P)
Breeding, feeding, and care of swine. May be repeated up to 3 credits.
Prerequisite: ANSC 304.
Learning Outcomes
1. Identify major livestock production systems in the US.
2. Analyze basic animal physiological adaptations to environmental challenges.
3. Analyze production losses due to environmental challenges.
4. Explain physiological mechanisms resulting in production losses.
5. Research management intervention strategies to mitigate environmental challenges.
6. Solve a production loss scenario using an economically viable management strategy.
7. Generate research article based on thermography research.

ANSC 425. Horse Science and Management
3 Credits (2+2P)
Senior level course requiring students to apply basic knowledge acquired in the previous courses to solve typical problems encountered in the horse industry. Specific topics include genetics and animal breeding, business and legal issues, reproduction, health, nutrition and exercise physiology. May be repeated up to 3 credits.
Prerequisite: ANSC 304 and ANSC 370 or concurrent registration.
Learning Outcomes
1. Demonstrate advanced knowledge of equine genetics, breeding and reproduction.
2. Demonstrate advanced knowledge of equine management.
3. Demonstrate advanced knowledge of equine health, nutrition and exercise physiology.
4. Demonstrate advanced knowledge of equine business and legal issues.
5. Effectively problem solve issues pertaining to management of equine programs and facilities.
6. Develop a comprehensive business and management plan for an equine business such as a breeding farm, training center, boarding facility, etc.

ANSC 426. Beef Production: Cow-Calf Management
3 Credits (2+2P)
Senior level course examining management practices for the cow-calf producers. Specifically focusing on nutrition, reproduction, genetics, marketing, and health. May be repeated up to 3 credits.
Prerequisite: ANSC 304 and (ANSC 2340 or ANSC 305) or concurrent registration.

Learning Outcomes

1. Demonstrate knowledge of the different systems utilized to produce a unit of beef: topics considered will include discussion of breeding, reproduction, nutrition, health, management, and marketing strategies.

ANSC 427. Dairy Production
3 Credits (2+2P)
Breeding, nutrition, physiology and management of dairy cattle. May be repeated up to 3 credits.
Prerequisite: ANSC 304 and (ANSC 2340 or ANSC 305) or concurrent registration.
Learning Outcomes

1. Students will be able to evaluate appropriate housing for production practices.
2. Summarize ethical issues in the dairy industry along with regulations guiding production of the dairy industry.
3. Evaluate popular press and scientific literature related to dairy production practices.

ANSC 428. Sheep and Wool Production
3 Credits (2+2P)
Genetics, nutrition, physiology and management of sheep. Wool grading, shearing, and disease control. May be repeated up to 3 credits.
Prerequisite: ANSC 304, ANSC 370.
Learning Outcomes

1. Enhance knowledge and understanding of the different systems utilized to produce a sheep and wool: topics discussed will include breeding, nutrition, reproduction, management and marketing strategies.

ANSC 429. Beef Production: Feedlot Management
3 Credits (2P)
Senior level course in feedlot management of beef cattle. Topics of interest include cattle handling and processing, health and nutrition, intake management, and growth. Feed mill operation, marketing strategies, and regulatory concerns associated with finishing cattle production may also be discussed.
Prerequisite: ANSC 304 or Consent of Instructor.
Learning Outcomes

1. Examine requirements necessary to optimize animal health and welfare and growth performance. By the end of the semester, students will be able to plan appropriate management decisions to increase productivity in stocker/feedlot production.
2. Determine selective breeding decisions on productivity of stocker/feeder cattle.
3. Review appropriate scientific and popular press literature to improve management of stocker/feedlot cattle.

ANSC 448. Problems
1-4 Credits
Individual investigation in a specific area of animal science. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

ANSC 458. Livestock Behavior, Welfare and Handling
3 Credits (2+3P)
Principles of animal behavior and evaluation of management practices on animal welfare in confined and rangeland livestock operations. Low stress livestock handling techniques. Design of livestock handling facilities. Crosslisted with: RGSC 458
Prerequisite(s): RGSC 2110 or ANSC 1120.

ANSC 462. Parasitology
3 Credits (3)
Same as EPWS 462.

ANSC 468. Advanced Dairy Herd Management
3 Credits (3)
The course is offered through the Southern Great Plains Dairy Consortium in Clovis, NM, and will include breeding, nutrition, physiology, health and management of large herd dairies of the Southwest. Students must apply for the course through the Consortium, and can take it more than once, as topics vary. Consent of instructor required.
Prerequisite(s): ANSC 304.

ANSC 480. Environmental Physiology of Domestic Animals
3 Credits (3)
Influence of environmental factors on physiological processes of domestic animals.
Prerequisite: ANSC 370.
Learning Outcomes

1. Identify major livestock production systems in the US.
2. Analyze basic animal physiological adaptations to environmental challenges.
3. Analyze production losses due to environmental challenges.
4. Explain physiological mechanisms resulting in production losses.
5. Research management intervention strategies to mitigate environmental challenges.
6. Solve a production loss scenario using an economically viable management strategy.
7. Generate research article based on thermography research.

ANSC 484. Ruminant Nutrition
3 Credits (3)
Energy, nitrogen, and mineral nutrition of ruminants with special emphasis on digestive physiology and metabolism of nonprotein nitrogen compounds.
Prerequisite/Corequisite: ANSC 422.
Learning Outcomes

1. Examine the parts of the ruminant digestive tract and their function in digestion.
2. Integrate ruminal bacteria and their role into fermentation pathways.
3. Appraise fermentation/metabolic modifiers and their role in improving animal performance.
4. Calculate energy and protein requirements.
5. Integrate environmental and physiological impacts on intake and digestibility.
6. Combine animal requirements, feed nutrients, and knowledge of fermentation into feeding recommendations for various classes of ruminants.

ANSC 501. Advanced Animal Nutrition
3 Credits (3)
Emphasis on digestive physiology and metabolism. Basic mechanisms involved in the intake, digestion, and absorption of nutrients studied.
Learning Outcomes

1. Describe how animals utilize nutrients.
2. Explain why feedstuffs differ in nutritional value.
3. Apply nutritional concepts to practical feeding of domestic livestock ('critical thinking' skills).

4. Formulate diets for domestic livestock, with emphasis on mixing feedstuffs to balance nutrient supply with nutrient requirements ('quantitative reasoning' skills).

ANSC 507. Laboratory Techniques in Nutrition
4 Credits (2+6P)
Methodology and experimental procedures in measuring nutrient requirements and value of diets. May be repeated up to 4 credits.
Prerequisite: ANSC 422 or consent of instructor.
Learning Outcomes
1. Orient to the NMSU Animal Science Nutrition Laboratory.
2. Gain an understanding and familiarity with the basic techniques used in nutrition research.
3. Develop critical, scientific thinking.
4. Facilitate use of communication skills.

ANSC 509. Endocrinology of Domestic Animals
3 Credits (3)
The role of hormones in growth, development, metabolism, temperature regulation, lactation, and reproduction of domestic animals, including commercial applications.
Learning Outcomes
1. Explain the mechanisms in which physiological systems are influenced by hormonal regulation and chemical mediators.
2. Describe cellular and whole animal behavior related to endocrine function.
3. Interpret scientific literature related to molecular and endocrine physiology.
4. Articulate in comprehensive and succinct manner written communication specific functions of the endocrine system.

ANSC 510. Range Nutrition Techniques
3 Credits (3)
Animal and plant methods of determining quantity and quality of range forage. Taught with RGSC 510.
Prerequisite: ANSC 484 or consent of instructor.
Learning Outcomes
1. Students will organize a protocol with a description of research techniques needed to answer a research question related to grazing management.
2. Students will be able calculate diet digestibility of a diet using marker data.
3. Students will be able design a set of experiments that utilize a variety of techniques to answer hypothesis related to animal and range interactions.

ANSC 512. Research Methods in Animal Science
4 Credits (3+2P)
Procedures used in animal science research, including planning and conduct of investigations and interpretation of results. May be repeated up to 4 credits.
Learning Outcomes
1. Design rigorous animal science experiments.
2. Apply statistical methods to analyze experimental data.
3. Critically evaluate experimental designs and statistical methods of published research.
4. Communicate experimental statistical findings clearly and effectively.
5. Differentiate among core experimental designs.

ANSC 515. Graduate Seminar
1 Credit (1)
Exploration of current and emerging topics, with subject matter varying based on recent developments and trends. May be repeated up to 4 credits.
Learning Outcomes
1. Design a structured outline for a seminar presentation that reflects clear organization and purpose.
2. Analyze the key elements that contribute to an effective and professionally designed PowerPoint presentation.
3. Evaluate the relevance and appropriateness of content for inclusion in a professional presentation.
4. Create a PowerPoint presentation on a self-selected topic, demonstrating effective visual and informational design.
5. Analyze the content and structure of the presentation to predict potential audience questions.
6. Deliver a professional PowerPoint presentation tailored to a target audience.
7. Assess peer presentations using established criteria for content, design, and delivery.

ANSC 520. Advanced Nutritional Management I: Feedlot
3 Credits (3)
Emphasis on feeding systems for beef cattle from weaning to slaughter. Primary focus on feedlot nutrition and management.
Prerequisite: ANSC 484 or consent of instructor.
Learning Outcomes
1. Explain concepts and applications of nutritional management of feedlot cattle.
2. Critique scientific literature on nutritional management of feedlot cattle.
3. Solve feedlot case studies by analyzing, interpreting, and evaluating real-world cattle feeding scenarios.
4. Create a diet formulation using National Research Council equations to meet feedlot cattle nutrient requirements.

ANSC 521. Advanced Nutritional Management II: Cow Calf/Stocker
3 Credits (3)
Emphasis on nutritional management for cow-calf and stocker operations. Primary focus on applications to range animal nutrition and management.
Prerequisite: ANSC 484 or consent of instructor.
Learning Outcomes
1. Summarize basic nutrient metabolism in ruminants.
2. Identify physiological factors that influence maintenance requirements.
3. Characterize physiological factors that influence reproductive processes.
4. Outline nutrient requirements for calves, cows, steers, heifers, and bulls.
5. Formulate rations for calves, cows, steers, heifers, and bulls.
6. Justify nutritional recommendations that address a real-world scenario.

ANSC 522. Animal Nutrition
3 Credits (3)
Nutrient utilization and measurement; nutrient requirements for the various body functions. Taught with ANSC 422 with additional requirements for graduate students. Recommended for nonmajors.

Learning Outcomes

1. Compare digestion, absorption and metabolism of nutrients between ruminants and non-ruminants.
2. Demonstrate how animal physiology drives nutrient usage in the body.
3. Integrate animal nutrition concepts to better understand efficient animal production and health.

ANSC 560. Rumen Microbiology
3 Credits (3)
Issues in ruminal and gastrointestinal microbiology. Includes physiological and genetic mechanisms in carbohydrate and nitrogen utilization. Taught with FSTE 560.
Prerequisite: ANSC 501.
Learning Outcomes

1. Explain the mechanisms by which the rumen microbial population contributes to rumen function and structure.
2. Illustrate nutrient digestion and metabolism by rumen microbes.
3. Interpret scientific literature related to rumen microbiology.
4. Manage livestock in real world scenarios utilizing skills gained throughout the course.

ANSC 580. Environmental Physiology of Domestic Animals
3 Credits (3)
Influence of environmental factors on physiological processes of domestic animals. Specific focus on fetal and developmental programming, heat and cold stress.
Learning Outcomes

1. Identify major livestock production systems in the US.
2. Analyze basic animal physiological adaptations to environmental challenges.
3. Analyze production losses due to environmental challenges.
4. Explain physiological mechanisms resulting in production losses.
5. Research management intervention strategies to mitigate environmental challenges.
6. Solve a production loss scenario using an economically viable management strategy.
7. Generate research article based on thermography research.

ANSC 598. Special Research Programs
1-4 Credits (1-4)
Individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

ANSC 599. Master's Thesis
1-15 Credits (1-15)
Thesis. Consent of Instructor required. Thesis/Dissertation Grading. May be repeated up to 88 credits.
Learning Outcomes

1. Various

ANSC 600. Research
1-15 Credits
This course is for Ph.D. students before they have completed qualifiers. Consent of Instructor required. Thesis/Dissertation Grading.
Prerequisite(s): ANSC 421 or consent of instructor.

ANSC 602. Advanced Reproductive Physiology
3 Credits (3)
Mechanisms of reproductive function; research methodology.
Prerequisite: ANSC 421 or consent of instructor.
Learning Outcomes

1. Assess the biochemical properties and mechanisms of action for reproductive hormones, including receptor interactions and intracellular signaling.
2. Summarize endocrine regulation in reproduction, mapping the HPG axis and its role in puberty, cycles, and gametogenesis.
3. Compare ovarian and testicular functions including follicular development, ovulation, spermatogenesis, and steroidogenesis.
4. Integrate the physiological steps of fertilization, including gamete transport, capacitation, acrosome reaction, and sperm-egg interactions.
5. Evaluate hormonal and physiological mechanisms in pregnancy, including maternal recognition, implantation, and placental function.
6. Develop a proposal outlining the stages of parturition, including fetal signaling, maternal adaptations, and hormonal control.

ANSC 604. Hypothalamo-Hypophyseal-Pineal Endocrinology (fe)
1 Credit (1)
Hormones and other neurochemicals synthesized and secreted by the hypothalamus, pituitary, and pineal glands. Neuroendocrinology of the hypothalamo-hypophyseal axis.
Prerequisite: ANSC 509.

ANSC 605. Gonadal and Uterine Endocrinology
1 Credit (1)
Endocrinology of mammalian ovaries, testes, and uteri including developing trophoblasts.
Prerequisite: ANSC 509.
Learning Outcomes

1. Explain and evaluate advanced reproductive endocrine concepts of the uterus, ovaries, and testes in domestic animals.
2. Critically analyze and synthesize foundational and modern research literature on gonadal and uterine endocrinology.
3. Effectively communicate complex concepts in reproductive endocrinology through written discussion and abstract composition.
4. Integrate knowledge across modules to evaluate reproductive regulation and dysfunction in livestock.

ANSC 606. Endocrinology of Pregnancy, Parturition, and Lactation (fe)
1 Credit (1)
Hormones and other chemical messengers involved in maintenance of pregnancy, control of parturition, and initiation and maintenance of lactation in farm animals.
Prerequisite: ANSC 509.

ANSC 621. Metabolic Functions and Dysfunctions
3 Credits (3)
Physiological chemistry of ruminants and other domestic animals, with attention to metabolic dysfunctions and nutritional toxicology.
Prerequisite: CHEM 345 and ANSC 501.
Learning Outcomes

1. Explain the cellular and molecular mechanisms that control metabolic function and dysfunction in major organ systems.
2. Analyze the roles of organ systems in maintaining metabolic homeostasis.
3. Evaluate metabolic disorders in terms of pathophysiology, clinical symptoms, and treatments.
4. Integrate knowledge of proper metabolic functions to understand how metabolic dysfunction of one system affects the function of other systems.

5. Design evidence-based management strategies to mitigate common metabolic dysfunctions in livestock.

ANSC 625. Nutrient Metabolism I: Mineral, Vitamin, and Nitrogen Metabolism
4 Credits (4)
Cellular metabolism, physiological function(s), toxicities, and deficiencies of minerals, vitamins and nitrogen in ruminants and nonruminants.
Prerequisite: ANSC 501.
Learning Outcomes
1. To introduce the student to the absorption and disposition of vitamins and minerals in the animal.
2. To provide the student with a basic understanding of the importance of vitamins and minerals in animal metabolism.
3. To introduce the student to the concept of nitrogen metabolism and the partitioning of nitrogen in the animal.

ANSC 626. Nutrient Metabolism II: Carbohydrates, Lipids, and Energetics
4 Credits (4)
Basic principles of carbohydrate, lipid, and energy metabolism; integration of metabolism with emphasis on nutritional and biochemical processes related to efficiency of nutrient use.
Prerequisite: ANSC 501.
Learning Outcomes
1. Varies.

ANSC 698. Special Research Programs
1-4 Credits
Advanced individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

ANSC 700. Doctoral Dissertation
15 Credits
Dissertation. Consent of Instructor required. Thesis/Dissertation Grading.

Range Science Courses

RGSC 1110. The Range Science Profession
1 Credit (1)
Introduction to scientific disciplines and career opportunities in rangeland science and management.
Learning Outcomes
1. To introduce students to the Range Science program and to a variety of career opportunities in Range Science.
2. To develop an individualized course curriculum that prepares the student to achieve their career goals.
3. To examine opportunities to gain practical work experience through internships and cooperative employment.

RGSC 2110. Introduction to Rangeland Management
3 Credits (3)
This course covers the principles of managing and understanding pasture and rangelands. Plant physiology and ecology, plant communities and rangeland sustainability and how they relate to livestock production and wildlife management will be discussed. Restricted to: Main campus only.
Learning Outcomes
1. Understand rangeland management operations.
2. Identify rangeland plants.
3. Gain a perspective of watershed management.
4. Discuss the management of rangeland resources.
5. Understand the process of rangeland evaluation through a broad understanding of monitoring and production of these rangelands.
6. Gain a perspective of the correlation of rangelands and the economic principles guiding resource management.
7. Understand the process of rangeland condition.
8. Understand the concepts of stocking rates and usage of rangelands.
9. Gain a broad perspective of different classes of land ownership; Tribal, federal, private and state. 1
10. Recognize vegetative communities, ecological sites, plant physiology andapplication to rangeland management considerations.

RGSC 2996. Special Topics
1-4 Credits
Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.
Learning Outcomes
1. Varies

RGSC 302V. Forestry and Society
3 Credits (3)
Global study of the development and use of forest resources for production of wood, fuel, fiber, and food products. Climatic, edaphic, cultural, and economic influences on forests of the world evaluated. Same as HORT 302V.
Learning Outcomes
1. Demonstrate comprehension of basic plant physiology.
2. Analyze various inputs and environmental factors that affect trees and forests.
3. Identify forest biomes based on plant morphology and environmental characteristics.
4. Categorize different types of forest products and harvesting methods.
5. Compare and contrast various forest management practices in the US and worldwide.
6. Evaluate climate and ecological issues as they relate to society.
7. Develop an awareness of the interconnection of nature and society.

RGSC 316. Rangeland Plants
3 Credits (2+3P)
Identification, classification, cultural uses, and economic importance of native and introduced rangeland plants. May be repeated up to 3 credits.
Learning Outcomes
1. Describe the physical characteristics of plants within key Representative Rangeland Plant Groups.
2. Explain the scientific classification system and accurately place plants within the correct taxonomic hierarchy (kingdom to species).
3. Apply plant morphology and classification knowledge to identify rangeland plants using field guides, dichotomous keys, and other botanical tools.
4. Demonstrate proficiency in field methods through plant surveys and specimen collection, connecting practical skills with theoretical concepts.
5. Analyze selected rangeland plant species for their unique traits, ecological roles, and potential uses in land management or restoration.

RGSC 317. Rangeland Communities
3 Credits (3)
Rangeland associations and communities, their plant species composition, and ecological factors affecting management of communities.

Learning Outcomes

1. Identify and distinguish the major rangeland associations and plant communities found across different regions of the United States.
2. Explain the ecological and geographical characteristics (ecogeographic) of rangeland communities and evaluate the primary management challenges associated with each.
3. Recognize and describe key plant and wildlife species that characterize each rangeland community, highlighting their ecological roles and interactions.

RGSC 318. Watershed Management
3 Credits (2+2P)
Management of rangeland and forest watersheds with emphasis on hydrologic cycle and land use effects on runoff and water quality. May be repeated up to 3 credits.
Learning Outcomes

1. Understand impacts of land use on water quantity and quality.
2. Quantify components of the hydrologic cycle.
3. Learn watershed management techniques and practices.
4. Apply scientific principles to evaluate current issues in watershed management.

RGSC 325. Rangeland Restoration Ecology
3 Credits (3)
Principles and practices of vegetation management and ecological restoration. Course emphasizes problems associated with rangeland degradation, and implementation of rangeland restoration and improvements.
Prerequisite: Sophomore standing or consent of instructor.
Learning Outcomes

1. Use fundamental knowledge of plants, soils, and climate to explain how changes in the structure and function of ecological systems can cause ecological degradation, and how management actions can implement changes to facilitate ecological restoration.
2. Compare and contrast the four major plant control methods (mechanical, chemical, fire, and biological) in terms of their effects on vegetation and soils and demonstrate how this knowledge informs management decisions.
3. Describe the biotic and abiotic factors that must be considered to design and implement feasible revegetation and restoration plans and explain the importance of these factors in an ecological context.
4. Apply the concepts and principles learned in this course to predict the effect of vegetation management activities on common North American rangeland plant communities.
5. Effectively communicate understanding of land degradation and restoration practices via writing and oral presentations.

RGSC 350. Special Topics
1-4 Credits
Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

RGSC 357. Grass Taxonomy and Identification
3 Credits (1+4P)
Taxonomy of grasses; grass anatomy, variation in reproductive structures, and identification of grasses by sight and through the use of dichotomous keys. Students must be Junior standing to enroll in this course. May be repeated up to 3 credits.
Learning Outcomes

1. Use terminology to describe and identify grasses.
2. Apply dichotomous keys to unknown grass species so they can be identified.
3. Recognize numerous important rangeland grasses.
4. Understand the taxonomic classification of grasses.
5. Describe the important characteristics of grasses for disciplines related to range science, wildlife management, and natural history.

RGSC 390. Internship
1-3 Credits
Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 3 credits toward a degree. May be repeated up to 3 credits.
Learning Outcomes

1. Apply foundational knowledge of rangeland science to practical field and management settings.
2. Gain firsthand experience working with professionals in the rangeland ecology and management field and develop key workplace skills such as communication, collaboration, and time management.
3. Describe the goals, roles, and daily operations of the host agency or organization, and reflect on how the internship experience informs their career interests and personal development.
4. Through documentation and final reporting, students will demonstrate an ability to communicate the value of their internship work and articulate how it connects to broader concepts in rangeland ecology and management.

RGSC 402. Seminar
1 Credit (1)
A seminar course designed to inform students of the career opportunities, develop their interviewing and other interpersonal skills may also include reading, discussions, written reports, and seminar presentations of current relevant literature.
Prerequisite(s): Senior standing.

RGSC 402 H. Range Science Seminar
1 Credit (1)
Taught with RGSC 402 with additional work.
Prerequisite(s): Meets Honors eligibility and/or Crimson Scholar status and senior standing.

RGSC 440. Rangeland Resource Ecology
3 Credits (3)
Plant adaptations to arid environments. Life histories of arid land plants. Biotic interactions among rangeland organisms. Arid land plant communities: their physiognomy, diversity, productivity, and response to disturbance. Arid land ecosystem dynamics.
Learning Outcomes

1. Students who complete this course will have a better understanding of mechanisms that determine how rangeland plant communities and ecosystems respond to natural and human-induced disturbance regimes.

RGSC 440 L. Rangeland Resource Ecology Lab
1 Credit (2P)
Living and nonliving factors of the range environment, the life forms and role of range plants and animals on succession and interactions in range ecosystems. Corerequisite(s): RGSC 440. May be repeated up to 1 credit.

Learning Outcomes

1. Students who complete this course will gain a comprehensive understanding of the interplay between abiotic and biotic factors in shaping rangeland plant communities.
2. Learn how rangeland ecosystems adapt and respond to both natural and human-induced disturbances and change.
3. Students will apply field measurement techniques and remote sensing to develop and evaluate rangeland monitoring assessment plans.

RGSC 448. Problems
1-4 Credits (1-4)
Individual investigation in a specific area of range science. Maximum of 4 credits per semester and a grand total of 6 credits. Consent of Instructor required.

RGSC 452. Vegetation Measurements for Rangeland Assessment
4 Credits (2+4P)
Sampling principles, sampling design, and measurement methods used to quantify vegetation attributes and to assess the structure and function of rangeland ecosystems. Laboratory emphasizes practical field techniques, quantitative analysis, and interpretation of results. May be repeated up to 4 credits.
Prerequisite: RGSC 294 and A ST 311.
Learning Outcomes

1. Choose from many available tools and methods for measuring and quantifying vegetation.
2. Design appropriate sampling protocols to meet monitoring objectives in various types of vegetation.
3. Measure vegetation cover, density, frequency, species inventory and production on rangelands.
4. Estimate utilization of forage.
5. Explain advantages and disadvantages of different sampling and measurement methods.
6. Use standard approaches to land classification and evaluation to interpret results in the context of resource management decisions.
7. Clearly communicate results through graphics as well as writing.

RGSC 458. Livestock Behavior, Welfare and Handling
3 Credits (2+3P)
Principles of animal behavior and evaluation of management practices on animal welfare in confined and rangeland livestock operations. Low stress livestock handling techniques. Design of livestock handling facilities. Crosslisted with: ANSC 458
Prerequisite(s): RGSC 2110 or ANSC 1120.

RGSC 460. Rangeland and Natural Resource Planning and Management
4 Credits (3+3P)
Planning and problem solving in rangeland and natural resource management. Public land planning and policy. Application of land management principles to resolve rangeland, riparian and habitat issues. May be repeated up to 4 credits.
Prerequisite: Senior or graduate student standing.
Learning Outcomes

1. Apply previous course work and skills to evaluate approaches to rangeland management issues.
2. Prepare a proposal for a practitioner-scientist research and management project which will include a comprehensive literature review of a specific topic, a directed research and project objective, partnerships among stakeholders, a project budget and timeline, and a monitoring and evaluation plan.

RGSC 485. Land Cover Analysis for Natural Resources
3 Credits (3)
This course is designed to help students understand, manipulate and extract Earth Observation (EO) data and to conduct land cover analysis related to natural resources including water and vegetation. The course provides and highlights means to identify and access EO data in different formats, extract meaningful information, and to help students developing critical thinking skills. The course introduces tools such as python and ArcGIS Pro to handle different data formats (e.g. hdf) efficiently; develop and present creative maps. The course provides basic information about how to conduct land use, land cover change analysis, mapping vegetation, water related variables and plant and animal distribution analysis.
Learning Outcomes

1. Identify sources of and obtain land cover GIS data.
2. Handle GIS data in different formats.
3. Extract meaningful information.
4. Development of qualitative reasoning and analytical thinking skills to address research questions related to natural resources.

RGSC 509. Approaches to Rangeland Research
3 Credits (3)
Experimental design and statistical analysis of experimental results.
Prerequisite: A ST 505 or consent of instructor.
Learning Outcomes

1. Define and articulate problems related to rangeland resources with clarity and relevance.
2. Formulate researchable questions based on clearly defined problems.
3. Identify and justify key variables relevant to addressing specific research questions.
4. Develop testable hypotheses and clearly defined research objectives.
5. Evaluate and compare alternative sampling methods for rangeland data collection.
6. Assess the strengths and limitations of various experimental designs in rangeland research.
7. Use statistical software tools, including Excel and SAS, to organize, analyze, and interpret data.
8. Critically analyze research publications and ongoing projects, including those of peers and professionals, for methodological rigor and scientific validity.

RGSC 513. Advanced Rangeland Ecology
3 Credits (3)
Overview of the current state of knowledge in selected areas of rangeland ecology, with emphasis on currently developing ideas and issues relevant to rangeland management.
Prerequisite: RGSC 440 or equivalent.
Learning Outcomes

1. Define rangelands and describe their global distribution, ecological characteristics, and historical context within the field of natural resource management.
2. Explain key ecological principles and functional traits (morphology and physiology) that influence rangeland ecosystem structure, function, and response to disturbance.
3. Apply foundational methods for rangeland inventory, monitoring, and assessment, including techniques for evaluating vegetation, soil condition, and ecosystem health.

4. Evaluate strategies for sustainable rangeland management, including livestock grazing systems, vegetation management, restoration practices, and watershed/riparian area protection.

RGSC 515. Graduate Seminar
1 Credit (1)
Current topics. Graded S/U.

RGSC 516. Arid Land Management
3 Credits (3)
Survey of seminal and current literature dealing with management of arid and semiarid lands including soil-plant-animal interactions, plant community ecology, arid land assessment methods, and arid land hydrology.
Learning Outcomes
1. Gain a better understanding of the basic science underlying the management of semi-arid and arid range lands.
2. Have an increased appreciation of relevant topics, seminal papers, as well as key researchers in each of the areas of arid land management mentioned above.
3. Become familiarized with the history, academic traditions, and current issues in arid land management in the western United States.

RGSC 518. Watershed Methods and Management
3 Credits (3)
Management of rangeland and forest watersheds with emphasis on the hydrologic cycle and land use effects on runoff and water quality. Hydrologic monitoring methods problem sets required for graduate credit.
Learning Outcomes
1. Understand impacts of land use on water quantity and quality.
2. Quantify components of the hydrologic cycle.
3. Learn watershed management techniques and practices.
4. Apply scientific principles to evaluate current issues in watershed management.

RGSC 520. Arid Land Plant Herbivore Interactions
3 Credits (3)
Survey of seminal and current literature dealing with plant- and animal-related factors that influence herbivory patterns in arid landscapes. Although ungulate herbivory is a central focus of the course, the role of plant defenses in deterring both vertebrate and invertebrate herbivores is discussed in detail.
Learning Outcomes
1. To develop a holistic systems thinking and problem-solving approach to understanding plant and animal interrelationships, as well as addressing issues relevant to both managed and natural ecosystems.
2. Students who complete this course will develop a comprehensive understanding of these dynamics and be equipped with the skills to apply this knowledge in practical scenarios.
3. Students will deepen their understanding of how to read, review, and present scientific literature, and conduct scientific paper annotations.
4. Develop a first draft of a scientific paper reporting either experimental results, a meta-analysis of existing data, or an in-depth literature review on a topic related to the student's dissertation.

RGSC 525. Advanced Rangeland Restoration Ecology
3 Credits (3)
Theory and application of restoration ecology and the principles and practices of ecological restoration. Course emphasizes problems associated with rangeland degradation and highlights current restoration management actions.
Learning Outcomes
1. Use fundamental knowledge of plants, soils, and climate to explain how changes in the structure and function of ecological systems can cause ecological degradation, and how management actions can implement changes to facilitate ecological restoration.
2. Compare and contrast the four major plant control methods (mechanical, chemical, fire, and biological) in terms of their effects on vegetation and soils and demonstrate how this knowledge informs management decisions.
3. Describe the biotic and abiotic factors that must be considered to design and implement feasible revegetation and restoration plans and explain the importance of these factors in an ecological context.
4. Apply the concepts and principles learned in this course to predict the effect of vegetation management activities on common North American rangeland plant communities.
5. Effectively communicate understanding of land degradation and restoration practices via writing and oral presentations.

RGSC 550. Special Topics
1-4 Credits
Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

RGSC 551. Earth Data Retrieval
3 Credits (3)
This course covers topics related to identifying sources, preprocessing, utilizing earth data that can be used to monitor some hydrological and water related variables, vegetation growth and related biophysical properties. The course focuses on developing students' skills on how to handle and analyze high-level large amounts of research data in different formats (i.e. .hdf). The course highlights the use of remote sensing and land surface models-based (NLDAS) earth observation datasets (e.g. NDVI, LST, Ta, and ET). The course uses some open-source tools including Python, API as well as MATLAB. Crosslisted with: WSAM 551.
Learning Outcomes
1. Identify, retrieve, and visualize earth observation datasets that are relevant to individual research activities.
2. Understand the nature and formats of earth observation data.
3. Handle, process, and conduct quantitative analysis of earth observation datasets using python, MATLAB, and cloud computing (GEE).
4. Development of qualitative reasoning and analytical thinking skills to address research questions related to earth observation datasets.

RGSC 557. Advanced Grass Taxonomy and Identification
3 Credits (1+4P)
Taxonomy of grasses; grass anatomy, variation in reproductive structures, and identification of grasses by sight and through the use of dichotomous keys. Additional writing and grass identification assignments are required for graduate credit. May be repeated up to 3 credits.
Learning Outcomes
1. Use terminology to describe and identify grasses.
2. Apply dichotomous keys to unknown grass species so they can be identified.
3. Recognize numerous important rangeland grasses.
4. Understand the taxonomic classification of grasses.
5. Describe the important characteristics of grasses for disciplines related to range science, wildlife management, and natural history.

RGSC 575. Climate Studies, Water and Society
3 Credits (3)
The course provides a brief description of the Earth's climate system, an in-depth review and methodologies used to investigate climate change and variability, evidence of climate change on natural systems (water availability) vulnerability of human systems (e.g. agriculture) to climate change, and mitigation and adaptation strategies.

Learning Outcomes

1. Know, identify, and interrogate Earth's climate observation datasets.
2. Evaluate and understand Earth's climate systems.
3. Conduct meaningful investigations, prediction, and inferencing.
4. Critical thinking about climate change impacts on human and natural resources.

RGSC 585. Land Cover Analysis for Natural Resources
3 Credits (3)
This course is designed to help students understand, manipulate and extract Earth Observation (EO) data and to conduct land cover analysis related to natural resources including water and vegetation. The course provides and highlights means to identify and access EO data in different formats, extract meaningful information, and to help students developing critical thinking skills. The course introduces tools such as python and ArcGIS Pro to handle different data formats (e.g. hdf) efficiently; develop and present creative maps. The course provides basic information about how to conduct land use, land cover change analysis, mapping vegetation, water related variables and plant and animal distribution analysis. Crosslisted with: WSAM 585.

Learning Outcomes

1. Identify sources of and obtain land cover GIS data.
2. Handle GIS data in different formats.
3. Extract meaningful information.
4. Development of qualitative reasoning and analytical thinking skills to address research questions related to natural resources.

RGSC 589. Landscape Hydrology Modeling
3 Credits (3)
The course "Landscape Hydrology Modeling" offers topics related to the physical hydrological processes that occur at different spatial and temporal scales in terms of understanding, quantitative evaluation, modeling, and visualization. It addresses precipitation, runoff, infiltration, and evaporation, as well as understanding impact of land use change on these processes. The course highlights and provide training on the use of hydrological modeling tools including WMS software, HydroVIS and ArcGIS software to help students understand, model, manipulate, and visualize hydrological data processes. The course offers hands-on learning experience on the use of these tools.

Learning Outcomes

1. Identify the different components of a landscape scale hydrologic system and quantitatively evaluate the associated physical processes including precipitation, runoff, streamflow, infiltration, evapotranspiration.
2. Retrieve and visualize a hydrologic system data along with the associated datasets.
3. Be able to model hydrological processes within a watershed and understand the streamflow generation process and the effect of vegetation and topography on streamflow generation.
4. Gain knowledge about, and be able to use, some of the available tools that can be used in spatial and temporal hydrological process modeling.

RGSC 598. Special Research Program
1-4 Credits
Individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

RGSC 599. Master's Thesis
15 Credits
Thesis. Consent of Instructor required. Thesis/Dissertation Grading.

RGSC 600. Doctoral Research
1-15 Credits
Research. Consent of Instructor required. Thesis/Dissertation Grading.

RGSC 616. Advanced Arid Land Management
3 Credits (3)
In depth discussion of seminal and current literature dealing with management of arid and semiarid lands including land tenure systems, soil-plant-animal interactions (emphasis on livestock grazing), plant community ecology and assessment methods, and arid land hydrology.

RGSC 620. Advanced Arid Land Plant-Herbivore Interactions
3 Credits (3)
In depth discussion of seminal work dealing with plant- and animal-related factors that influence herbivory patterns in arid landscapes. Although ungulate herbivory is a central focus of the course, the role of plant defenses in deterring both vertebrate and invertebrate herbivores is discussed in detail.

Learning Outcomes

1. To develop a holistic systems thinking and problem-solving approach to understanding plant and animal interrelationships, as well as addressing issues relevant to both managed and natural ecosystems.
2. Students will deepen their understanding of how to read, review, and present scientific literature, and conduct scientific paper annotations.
3. Develop a first draft of a scientific paper reporting either experimental results, a meta-analysis of existing data, or an in-depth literature review on a topic related to the student's dissertation.
4. Students who complete this course will develop a comprehensive understanding of these dynamics and be equipped with the skills to apply this knowledge in practical scenarios.

RGSC 698. Special Research Programs
1-4 Credits (1-4)
Advanced individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

RGSC 700. Doctoral Dissertation
15 Credits
Dissertation. Consent of Instructor required. Thesis/Dissertation Grading.

Animal Science (Animal Industry) - Bachelor of Science in Agriculture

The animal industry concentration includes courses that prepare you for work in many phases of the livestock industry, such as livestock production on farms and ranches, the meat industry, the feed industry, livestock breed associations, and livestock publications.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix	Title	Credits
General Education		
Area I: Communications		
English Composition - Level 1 [1]		*4*
English Composition - Level 2 [1]		*3*
Oral Communication		*3*
Area II: Mathematics		
MATH 1220G	College Algebra [2]	3-4
or MATH 1511G	Calculus and Analytic Geometry I	
or MATH 1511H	Calculus and Analytic Geometry I Honors	
Area III/IV: Laboratory Sciences and Social/Behavioral Sciences		
BIOL 2610G & BIOL 2610L	Principles of Biology: Biodiversity, Ecology, and Evolution and Principles of Biology: Biodiversity, Ecology, and Evolution Laboratory	4
CHEM 1215G	General Chemistry I Lecture and Laboratory for STEM Majors	4
Choose one from the following:		3
ECON 1110G	Survey of Economics	
ECON 2110G	Macroeconomic Principles	
ECON 2120G	Principles of Microeconomics Honors	
Area V: Humanities [1]		*3*
Area VI: Creative and Fine Arts [1]		*3*
General Education Elective [1]		*3-4*
Viewing A Wider World [3]		**6**

Electives		
Production Electives		
Select 9 credits from production courses offered in the department		9
ANSC 424	Swine Production	
ANSC 425	Horse Science and Management	
ANSC 426	Beef Production: Cow-Calf Management	
ANSC 427	Dairy Production	
ANSC 428	Sheep and Wool Production	
ANSC 429	Beef Production: Feedlot Management	
ANSC 468	Advanced Dairy Herd Management	
Ranch Management Electives		
Select three courses from the following:		9
AEEC 2140	Technology and Communication for Business Management	
AEEC 3270	Spreadsheet Applications in Food and Agriculture	
ANSC 383	Equine Reproductive Management	
ANSC 480	Environmental Physiology of Domestic Animals	
RGSC 316	Rangeland Plants	
RGSC 318	Watershed Management	
RGSC 325	Rangeland Restoration Ecology	
Or any AEEC or RGSC numbered 300/3000 & above except AEEC 3210 and AEEC 4530		
Business Electives		
Select one from the following:		
AEEC 3210	Marketing and Food Agricultural Products	
AEEC 4530	Case Studies in Food and Agribusiness Management	
MGMT 361	Small Business Management	
MKTG 312	Personal Selling	
Or any BUSA, MGMT, MKTG numbered 300/3000 & above that are not VWW courses		
Non-Departmental Requirements (in addition to Gen.Ed/VWW)		
A ST 311	Statistical Applications	3
Second Language: (not required)		
Electives, to bring the total to 120 [5]		**13-15**
Total Credits		**120**

1. See the General Education (p. 262) section of the catalog for a full list of courses.
2. MATH 1220G College Algebra or MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G or MATH 1511G first.
3. See the Viewing a Wider World (p. 266) section of the catalog for a full list of courses
4. Required of Industry and Science Options
5. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in

the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year		
Semester 1		**Credits**
ANSC 1120	Introduction to Animal Science	3
ANSC 1120L	Introduction to Animal Science Lab	1
MATH 1220G	College Algebra	3
ENGL 1110G or ENGL 1110H	Composition I or Composition I Honors	4
ACES 1120	Freshman Orientation	1
Ag Elective: choose one based on interest		3
ANSC 1160	Introductory Horse Science	
ANSC 1180	Companion Animal in Society	
RGSC 2110	Introduction to Rangeland Management	
ANSC 2310	Introduction to Meat Science	
	Credits	**15**
Semester 2		
ANSC 1110	Animal Science Careers	1
ANSC 2330	Animal Production	3
BIOL 2610G	Principles of Biology: Biodiversity, Ecology, and Evolution	3
BIOL 2610L	Principles of Biology: Biodiversity, Ecology, and Evolution Laboratory	1
ACOM 1130G	Effective Leadership and Communication in Agriculture	3
Choose an elective course. Consider a minor in horse management, human animal interaction, dairy science range science or ranch management.		3
	Credits	**14**
Second Year		
Semester 1		
ANSC 2340	Genetics in Animal Science	3
CHEM 1215G	General Chemistry I Lecture and Laboratory for STEM Majors	4
ACCT 2110	Principles of Accounting I	3
ENGL 2210G or ENGL 2210H	Professional and Technical Communication or Professional and Technical Communication	3
ANSC 303 or ANSC 308	Livestock, Meat and Wool Evaluation or Horse Evaluation	4
	Credits	**17**
Semester 2		
ANSC 1170	Introduction to Animal Metabolism	3
ANSC 304	Feeds and Feeding	3

VWW: Viewing a Wider World Course [3]		3
Choose an elective course. Consider a minor in horse management, human animal interaction, dairy science range science or ranch management.		3
AG Elective: see catalog for complete list		3
Choose any two production courses from the following:		6
ANSC 424	Swine Production	
ANSC 425	Horse Science and Management	
ANSC 426	Beef Production: Cow-Calf Management	
ANSC 427	Dairy Production	
ANSC 428	Sheep and Wool Production	
ANSC 429	Beef Production: Feedlot Management	
ANSC 468	Advanced Dairy Herd Management	
	Credits	**15**
	Total Credits	**120-122**

1 These courses have prerequisites and it is the students responsibility to check and fulfill all course prerequisites listed for these courses.
2 See the General Education (p. 262) section of the catalog for a full list of courses.
3 See the Viewing a Wider World (p. 266) section of the catalog for a full list of courses.

Range Science - Bachelor of Science in Agriculture

The following course work prepares you for study and management of rangelands through an integrated ecological approach with special emphasis on rangeland plants, livestock, wildlife, soils and watersheds. The course work is also well designed for those who want to continue study in graduate school. Any undergraduate student majoring in Range Science must earn a grade of C- or higher in Range Science (RGSC prefix) courses to satisfy degree requirements. Students earning a D or F in a Range Science (RGSC prefix) course will be expected to repeat that course until the student earns a grade of C- or higher.

Requirements

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300/3000 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix	Title	Credits
General Education		
Area I: Communications		*10*
English Composition - Level 1 [1]		
English Composition - Level 2 [1]		
Oral Communication [1]		
ACOM 1130G	Effective Leadership and Communication in Agriculture	
or COMM 1115G	Introduction to Communication	
or HNRS 2175G	Introduction to Communication Honors	
Area II: Mathematics [2]		
MATH 1220G	College Algebra	3
Area III/IV: Laboratory Sciences and Social/Behavioral Sciences		
CHEM 1215G	General Chemistry I Lecture and Laboratory for STEM Majors	4
CHEM 1225G	General Chemistry II Lecture and Laboratory for STEM Majors	4
Select one from the following:		3
ECON 1110G	Survey of Economics	
ECON 2110G	Macroeconomic Principles	
ECON 2120G	Principles of Microeconomics Honors	
Area V: Humanities		
PHIL 1145G	Philosophy, Law, and Ethics	3
or PHIL 2110G	Introduction to Ethics	
Area VI: Creative and Fine Arts [1]		*3*
General Education Elective		
BIOL 2610G	Principles of Biology: Biodiversity, Ecology, and Evolution	3
Viewing A Wider World [3]		**6**
Departmental/College Requirements		
Range Science Core		
RGSC 1110	The Range Science Profession	1
RGSC 2110	Introduction to Rangeland Management	3
RGSC 316	Rangeland Plants	3
RGSC 317	Rangeland Communities	3
RGSC 318	Watershed Management	3
RGSC 325	Rangeland Restoration Ecology	3
RGSC 357	Grass Taxonomy and Identification	3
RGSC 402	Seminar	1
or RGSC 402 H	Range Science Seminar	
RGSC 440	Rangeland Resource Ecology	3
RGSC 440 L	Rangeland Resource Ecology Lab	1
RGSC 452	Vegetation Measurements for Rangeland Assessment	4
RGSC 460	Rangeland and Natural Resource Planning and Management	4
Non-Departmental Requirements (in addition to Gen.Ed/VWW)		
Other Required Courses		
A ST 311	Statistical Applications	3
ANSC 1170	Introduction to Animal Metabolism	3-4
or CHEM 2115	Survey of Organic Chemistry and Laboratory	
BIOL 2110G	Principles of Biology: Cellular and Molecular Biology	3
EPWS 314	Plant Physiology	3
FWCE 1110G	Introduction to Natural Resources Management	4
Select one from the following:		4
GEOG 381	Cartography and GIS	
or FWCE 471	GIS for Natural Resource Scientists	
A 300/400-level GIS Course		
SOIL 2110	Introduction to Soil Science	3
SOIL 2110L	Introduction to Soil Science Laboratory	1
SOIL 472	Soil Morphology and Classification	4
Natural Resource Management		
Choose two courses from the following:		6
AEEC 3120V	Natural Resource Economics	
AEEC 3130V	Water Resource Economics	
AEEC 3280	Applied Production Economics	
AEEC 4530	Case Studies in Food and Agribusiness Management	
FWCE 437	Wildlife Damage Management	
FWCE 2110	Principles of Fish and Wildlife Management	
RGSC 302V	Forestry and Society	
ANSC Elective		*3*
ANSC 1120	Introduction to Animal Science	
or ANSC 1120H	Introduction to Animal Science Honors	
ANSC 304	Feeds and Feeding	
ANSC 351V	Agricultural Animals of the World	
ANSC 422	Animal Nutrition	
ANSC 426	Beef Production: Cow-Calf Management	
ANSC 428	Sheep and Wool Production	
Second Language: (not required)		
Electives, to bring the total credits to 120 [4]		**12-13**
Total Credits		**121**

[1] See the General Education (p. 262) section of the catalog for a full list of courses
[2] MATH 1220G College Algebra is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G first.
[3] See the Viewing a Wider World (p. 266) section of the catalog for a full list of courses
[4] Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I . The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year		
Semester 1		**Credits**
ENGL 1110G or ENGL 1110H	Composition I or Composition I Honors	4
MATH 1220G	College Algebra	3
RGSC 2110	Introduction to Rangeland Management	3
ACES 1120	Freshman Orientation	1
Area VI: Creative and Fine Arts [2]		3
Elective		3
ANSC 1120	Introduction to Animal Science	
FWCE 1110G	Introduction to Natural Resources Management	
	Credits	**17**
Semester 2		
ACOM 1130G	Effective Leadership and Communication in Agriculture	3
CHEM 1215G	General Chemistry I Lecture and Laboratory for STEM Majors	4
PHIL 2110G or PHIL 1145G	Introduction to Ethics or Philosophy, Law, and Ethics	3
RGSC 1110	The Range Science Profession	1
BIOL 2610G	Principles of Biology: Biodiversity, Ecology, and Evolution	3
Designated Elective: choose from the following		3
FWCE 1110G	Introduction to Natural Resources Management	
ANSC 1120	Introduction to Animal Science	
	Credits	**17**
Second Year		
Semester 1		
CHEM 1225G	General Chemistry II Lecture and Laboratory for STEM Majors	4
BIOL 2110G	Principles of Biology: Cellular and Molecular Biology	3
SOIL 2110	Introduction to Soil Science	3
SOIL 2110L	Introduction to Soil Science Laboratory	1
Choose from one of the following Area IV General Education Courses: [2]		3
ECON 1110G	Survey of Economics	
ECON 2110G	Macroeconomic Principles	
ECON 2120G	Principles of Microeconomics Honors	
	Credits	**14**
Semester 2		
RGSC 317	Rangeland Communities	3
RGSC 325	Rangeland Restoration Ecology	3
EPWS 314	Plant Physiology	3
A ST 311	Statistical Applications [1]	3
Choose from one of the following:		3-4
ANSC 1170	Introduction to Animal Metabolism (Spring Only) [1]	
CHEM 2115	Survey of Organic Chemistry and Laboratory [1]	
	Credits	**15-16**
Third Year		
Semester 1		
RGSC 452	Vegetation Measurements for Rangeland Assessment [1]	4
RGSC 316	Rangeland Plants	3
SOIL 472	Soil Morphology and Classification	4
Viewing a WIder World		3
	Credits	**14**
Semester 2		
RGSC 357	Grass Taxonomy and Identification	3
RGSC 318	Watershed Management	3
GEOG 381	Cartography and GIS	4
RGSC 325	Rangeland Restoration Ecology	3
Choose a course from the Natural Resource Management List:		3
AEEC 3120V	Natural Resource Economics	
AEEC 3130V	Water Resource Economics	
AEEC 3280	Applied Production Economics	
AEEC 4530	Case Studies in Food and Agribusiness Management	
FWCE 437	Wildlife Damage Management	
FWCE 2110	Principles of Fish and Wildlife Management	
RGSC 302V	Forestry and Society	
	Credits	**16**
Fourth Year		
Semester 1		
RGSC 402	Seminar	1
RGSC 440	Rangeland Resource Ecology	4
RGSC 440 L	Rangeland Resource Ecology Lab	1
Choose an elective course. Consider requirement for a minor		3
Choose from one of the following Natural Resource Management courses:		3-4
AEEC 3120V	Natural Resource Economics	
AEEC 3130V	Water Resource Economics (Spring Only)	
AEEC 3280	Applied Production Economics (Fall Only)	
AEEC 4530	Case Studies in Food and Agribusiness Management (Spring Only)	
FWCE 437	Wildlife Damage Management	
FWCE 2110	Principles of Fish and Wildlife Management	
RGSC 302V	Forestry and Society	
	Credits	**12-13**

Semester 2		
RGSC 460	Rangeland and Natural Resource Planning and Management	4
ENGL 2210G	Professional and Technical Communication	3
Viewing a Wider World		3
Choose 6 credits of electives. Consider courses that may count towards a minor.		6
	Credits	**16**
	Total Credits	**121-123**

1 These courses have prerequisites and it is the students responsibility for checking and fulfilling all course prerequisites listed for these courses.

2 See the General Education (p. 262) section of the catalog for a full list of courses.

3 See the Viewing a Wider World (p. 266) section of the catalog for a full list of courses.

Dairy Science - Undergraduate Minor

A minor in Dairy Science consists of at least 18 credits.

Prefix	Title	Credits
Core ANSC courses (all of the following are required)		**12**
ANSC 1120	Introduction to Animal Science	
or ANSC 1120H	Introduction to Animal Science Honors	
ANSC 1140	Introduction to Dairy Science	
ANSC 304	Feeds and Feeding	
ANSC Elective Course		
Dairy Science Electives:		**6**
ANSC 427	Dairy Production	
ANSC 468	Advanced Dairy Herd Management	
ANSC Science Experience (no more than 3 credits; must be in field of dairy science):		
ANSC 390	Internship	
ANSC 391	Undergraduate Research Experience	
ANSC 392	Animal Sciences Teaching/Extension Experience	
Total Credits		**18**

Horse Management - Undergraduate Minor

A minor in Horse Management consists of at least 18 credits.

Prefix	Title	Credits
Required Courses		
All of the following:		
ANSC 1160	Introductory Horse Science	3
ANSC 2120	Equine Management	3
ANSC 308	Horse Evaluation	4
ANSC 383	Equine Reproductive Management	3
ANSC 425	Horse Science and Management	3
Choose 2 or 3 credits of the following:		3
ANSC 1125	Equestrian Team Competition	
ANSC 1130	Western Equitation I	
ANSC 2130	Western Equitation II	
ANSC 320	Equine Behavior and Training	
ANSC 321	Advanced Equine Behavior and Training	
ANSC 390	Internship	
ANSC 391	Undergraduate Research Experience	
ANSC 392	Animal Sciences Teaching/Extension Experience	
Total Credits		**19**

Human Animal Interaction - Undergraduate Minor

A minor in Human Animal Interaction consists of at least 18 credits.

Prefix	Title	Credits
Required Courses		
ANSC 1180	Companion Animal in Society	3
ANSC 2140	Introduction to Companion Animal Science	3
ANSC 312V	Companion Animals and the Human- Animal Interaction	3
ANSC 390	Internship [1]	3
ANSC 411	Canine and Feline Behavior and Training	3
ANSC 412	Canine and Feline Health and Diseases	3
Total Credits		**18**

1 Must complete 3 credit hours of internship

Livestock Production - Undergraduate Minor

A minor in Livestock Production consists of at least 18 credits. Animal science majors may NOT minor in Livestock Production.

Prefix	Title	Credits
Core ANSC Courses		
All of the following		
ANSC 1120	Introduction to Animal Science	3
ANSC 304	Feeds and Feeding	3
Production Electives		
Choose 6 credits of the following:		6
ANSC 424	Swine Production	
ANSC 425	Horse Science and Management	
ANSC 426	Beef Production: Cow-Calf Management	
ANSC 427	Dairy Production	
ANSC 428	Sheep and Wool Production	
ANSC 429	Beef Production: Feedlot Management	
ANSC Electives		
Choose 6 credits of the following:		6
ANSC 301	Animal and Carcass Evaluation	
Or any ANSC course numbered 300 and above [1]		
Total Credits		**18**

1 Only one ANSC VWW is eligible towards minor

Ranch Management - Undergraduate Minor

The Ranch Management minor consists of at least 18 credits. Animal science majors may NOT minor in ranch management.

Prefix	Title	Credits
Core ANSC Courses		
ANSC 1120	Introduction to Animal Science	3
ANSC 304	Feeds and Feeding	3
Production Electives		
Choose 2 of the following		6
ANSC 425	Horse Science and Management	
ANSC 426	Beef Production: Cow-Calf Management	
ANSC 428	Sheep and Wool Production	
ANSC 429	Beef Production: Feedlot Management	
Range Electives		
RGSC 2110	Introduction to Rangeland Management	3
Choose 3 credits from the following		3
RGSC 302V	Forestry and Society	
RGSC 316	Rangeland Plants	
RGSC 317	Rangeland Communities	
RGSC 318	Watershed Management	
RGSC 440	Rangeland Resource Ecology	
Total Credits		**18**

Range Science - Undergraduate Minor

A minor in Range Science consists of at least 18 credits in courses with a RGSC prefix and achieve a C- or higher in all RGSC classes.

Prefix	Title	Credits
Choose 18 credits from the following courses		**18**
RGSC 2110	Introduction to Rangeland Management	
RGSC 302V	Forestry and Society	
RGSC 316	Rangeland Plants	
RGSC 317	Rangeland Communities	
RGSC 318	Watershed Management	
RGSC 325	Rangeland Restoration Ecology	
RGSC 357	Grass Taxonomy and Identification	
RGSC 440	Rangeland Resource Ecology	
RGSC 440 L	Rangeland Resource Ecology Lab	
RGSC 452	Vegetation Measurements for Rangeland Assessment [1]	
RGSC 460	Rangeland and Natural Resource Planning and Management	
Total Credits		**18**

[1] RGSC 2110 Introduction to Rangeland Management & A ST 311 Statistical Applications are pre-requisites for this course

Entomology, Plant Pathology and Weed Science

Undergraduate Program Information

Specific courses that meet these and the university general education requirements and additional courses in biology, chemistry, mathematics and seminar are included below in departmental requirements. A total of 120 credits are required for graduation. At least 48 credits must be 300-level courses and above. Schedules in specific semesters will be developed with the help of a student's academic advisor.

Graduate Program Information

The complexity of managing insects, plant diseases, and weeds is increasing environmental concerns, costs, and regulations requiring an integrated approach to management strategies. Future professionals in integrated pest management will be ecologically oriented, trained to manipulate biological and cultural technologies while minimizing chemical control options. The Master of Science degree program in agricultural biology is designed to produce graduates with the academic and research background needed to facilitate effective, innovative, and environmentally sound protection of plants and animals from a wide and varied spectrum of pests. Students will be prepared for careers in research, extension, teaching, private consulting, industry, and government or to continue in a broad range of Ph.D. programs. Specific opportunities will include positions as agricultural consultants, technical and sales representatives for industry, state departments of agriculture and USDA specialists, agricultural extension agents, and industry research and environmental technicians. There is currently a strong need for MS graduates trained in these areas, and the demand is expected to increase dramatically.

Students may wish to concentrate their graduate program in entomology, plant pathology, or weed science, or conversely may wish to be broadly trained in all three pest-management disciplines. Most students will be expected to complete a thesis. A non-thesis option is available, depending on prior training and experience and subject to approval by the department head. A nonthesis research option requires completion of a research paper, suitable as judged by the student's graduate committee, for journal publication. Completion of an undergraduate degree essentially equivalent to that offered by the department is required for admission to the MS graduate program. Qualifications for admission will be reviewed by the departmental Graduate Admissions committee. Prospective graduate students must have at least a 3.0 undergraduate GPA, complete the GRE, and submit an official transcript, a letter of intent and three letters of recommendation.

Degrees for the Department

Bachelor Degree(s)

- Applied and Agricultural Biology (Applied Biology) - Bachelor of Science in Agriculture (p. 387)
- Applied and Agricultural Biology (Applied Microbiology) - Bachelor of Science in Agriculture (p. 389)
- Applied and Agricultural Biology (Entomology) - Bachelor of Science in Agriculture (p. 390)
- Applied and Agricultural Biology (Environmental Biology) - Bachelor of Science in Agriculture (p. 391)

- Applied and Agricultural Biology (Invasive Pest Biology and Management) - Bachelor of Science in Agriculture (p. 393)
- General Agriculture - Bachelor of Science in Agriculture (p. 395)

Master Degree(s)

- Applied and Agricultural Biology - Master of Science (p. 101)

Doctoral Degree(s)

- Applied and Agricultural Biology - Doctor of Philosophy (p. 201)

Minors for the Department

- Entomology - Undergraduate Minor (p. 397)
- Pest Management - Undergraduate Minor (p. 397)
- Plant Pathology - Undergraduate Minor (p. 397)
- Weed Science - Undergraduate Minor (p. 397)

Professor, Ricardo Ramirez, Department Head

Professors Bundy, Creamer, Randall, Sanogo; ***Associate Professors*** Beck, Hanson, Lehnhoff, Mesbah, Pierce, Schutte; ***Assistant Professor*** Bloese, Bowers, Hubbard, King; Affiliated Faculty Bleiweiss, De Ley;

R. Ramirez, Department Head, Ph.D. (Washington State)– Entomology; L. Beck, Ph.D. (Texas Tech)- Weed Specialist; J. Bloese, Ph.D. (California-Davis) - Small Farms IPM Specialist; K. Bowers, Ph.D. (University of Florida)-Entomology; C. S. Bundy, Ph.D. (Georgia)– Entomology; R. Creamer, Ph.D. (California-Davis)– Plant Pathology; S. Hanson, Ph.D. (University of Wisconsin)– Molecular Plant Pathology; C. Hubbard, Ph.D. (California-Riverside) - Urban Entomology; E. Lehnhoff, Ph.D. (Montana State) Ecology and Environmental Science; J. Breen Pierce (Rutgers)– Entomology; J. Randall, Ph.D. (New Mexico State University)-Plant Pathology; S. Sanogo, Ph.D. (Pennsylvania State)– Plant Pathology; B. Schutte, Ph.D. (Ohio State)– Horticulture & Crop Science.

Entomology, Plant Pathology and Weed Science Courses

EPWS 1110G. Applied Biology
3 Credits (3)
Introduction to applied biology and ecology focusing on insects, plants and pathogens in natural areas, crops and urban settings. EPWS 1110L is strongly recommended to take in the same semester. May be repeated up to 3 credits.
Learning Outcomes
1. Students will learn about the Department of Entomology Plant Pathology and Weed Science and will have the opportunity to meet the Las Cruces-based faculty in the department.
2. By the end of this course students will have gained a broad understanding of the pests in a wide range of systems, their interactions with other organisms, and the methods available to minimize the influence of pests on target commodities.

EPWS 1110L. Applied Biology Lab
1 Credit (1)
Study of applied biology and ecology of insects, plants and pathogens in natural areas, crops, and urban settings. EPWS 1110 strongly recommended to take in the same semester. May be repeated up to 1 credits. Restricted to Las Cruces campus only.
Learning Outcomes
1. Students will learn about the Department of Entomology Plant Pathology and Weed Science and will have the opportunity to meet the Las Cruces-based faculty in the department.
2. By the end of this course students will have gained a broad understanding of the pests in a wide range of systems, their interactions with other organisms, and the methods available to minimize the influence of pests on target commodities.

EPWS 2996. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.
Learning Outcomes
1. Varies

EPWS 300. Special Topics
1-4 Credits
Specific topics and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

EPWS 301. Agricultural Biotechnology
3 Credits (2+2P)
The principles of molecular biology will be introduced and used to explore the past, present, and future applications of biotechnology in agriculture. Specific topics include methodologies for making transgenic plants with increased pest resistance, the use of biotechnology in pest detection, and improving nutritional value. The laboratory will provide students with hands-on experience with equipment used for biotechnology research.
Prerequisites: CHEM 1225G, BIOL 2610G, or BIOL 2110G.

EPWS 302. General Entomology
4 Credits (4)
An introduction to the biology and classification of insects. Lecture covers life histories, classification, ecology and behavior of insect orders and families. Laboratory focuses on identification of insect orders and families. May be repeated up to 4 credits.
Prerequisite: BIOL 2610G, or BIOL 2110G.
Learning Outcomes
1. Have a detailed understanding of the biology and taxonomy of insects.
2. Be able to identify all insect orders.
3. Be able to sight identify common families of North American Insects.
4. Be able to properly curate insect specimens.

EPWS 302 H. General Entomology Honors
4 Credits (4)
An introduction to the biology and classification of insects. Lecture covers life histories, classification, ecology and behavior of insects orders and families. Laboratory focuses on identification of insect orders and families. Students in the Honors section will be given the opportunity to enhance their understanding of entomology with a more detailed examination into the lives of these fascinating organisms.
Prerequisite: BIOL 2610G, or BIOL 2110G.
Learning Outcomes
1. Have a detailed understanding of the biology and taxonomy of insects.
2. Be able to identify all insect orders.
3. Be able to sight identify common families of North American Insects.
4. Be able to properly curate insect specimens.

EPWS 303. Economic Entomology
3 Credits (3+2P)
Identification and life cycles of insects of economic significance, their relationship to humans and agriculture including biological interactions and controls. May be repeated up to 3 credits.
Prerequisite: BIOL 2610G, or BIOL 2110G.
Learning Outcomes
1. Know the names and functions of insect arthropod organs and how these organisms sense the environment and maintain homeostasis within their environment.
2. Understand the importance of naming and classifying insects and be able to name the important orders and families of pest and beneficial insects.
3. Define what a pest arthropod and how to establish economic thresholds for pests.
4. Understand pest management theory and tactics and be able to describe including pest management with natural enemies, environmental manipulation, insecticides, biopesticides, sterile insect technique and others.

EPWS 310. Plant Pathology
4 Credits (3+2P)
Causes and methods of prevention and treatment of diseases in plants.
Prerequisite(s): BIOL 2610G, or BIOL 2110G.

EPWS 310 H. Plant Pathology Honors
4 Credits (4)
Cause and methods of prevention and treatment of diseases in plants. Students with an Honors designation will have additional project and report assignments.
Prerequisite(s): BIOL 2610G, or BIOL 2110G.

EPWS 311. Introduction to Weed Science
4 Credits (3+2P)
Principles of weed science, with emphasis on characteristics of invasive plants, methods of integrated weed management, and current issues impacting weed management. Identification of local weeds. Taught with AGRO 311. May be repeated up to 4 credits.
Prerequisite: CHEM 1215G, and BIOL 2110G.
Learning Outcomes
1. Describe the environmental conditions and inherent traits that promote the growth and persistence of weed populations in managed and natural ecosystems.
2. Predict causes and consequences of weed management failures in agricultural and natural ecosystems.
3. Apply knowledge of herbicidal, mechanical and cultural weed control to develop integrated strategies for weed problems.
4. Classify herbicides based on injury symptoms, mode of action, site of action, translocation, selectivity, potential uses and potential dangers.
5. Identify common weeds found in southern New Mexico by providing correctly spelled botanical and common names, as well as lifecycles.
6. Demonstrate the ability to safely apply herbicide solutions including: perform the activities and calculations to ensure that a sprayer delivers the appropriate amount of solution over the sprayed area, interpret herbicide labels to identify guidelines for safety, dosage and application procedures, and perform the calculations necessary for determining appropriate amounts of herbicide, carrier and adjuvant to add to a spray tank.

EPWS 314. Plant Physiology
3 Credits (3)
Overview of photosynthesis, respiration, water relations of plants, minerals and organic nutrition, growth and development. Same as BIOL 314.
Prerequisite: BIOL 2110G, CHEM 1225G.
Learning Outcomes
1. Summarize the chemical and physical bases for processes in plants involving water relations, metabolism, and growth.
2. Compare and contrast forms of photosynthesis that are adaptive, and not adaptive, to heat and drought.
3. Explain physiological mechanisms supporting plant tolerance to abiotic and biotic stresses.
4. Predict consequences of environmental change on physiological processes and growth of individual plants.
5. Apply course concepts to real-world scenarios that involve plant function and plant development.

EPWS 325V. Insects, Humans, and the Environment
3 Credits (3)
Overview of the interactions of the world's largest group of organisms with humans. Emphasizing the role of insects in the development of human cultures, including health, food and fiber production, art, music, and environmental issues; with discussions of historic, present day, and future impacts in underdeveloped, developing, and developed civilizations.
Learning Outcomes
1. Have an understanding and appreciation of the importance of insects and other arthropods to humans and the natural world.
2. Have a basic understanding of the biology of important insect groups.

EPWS 373. Fungal Biology
3 Credits (2+2P)
Introduction to the taxonomy, morphology, physiology, and ecology of fungi. Same as BIOL 373. May be repeated up to 3 credits.
Prerequisite: EPWS 310 or BIOL 311, or consent of instructor.
Learning Outcomes
1. To describe the importance of fungi in our environment.
2. To explore the morphology and physiology of major groups of fungi.
3. To describe the associations of fungi with humans, animals, and plants.

EPWS 380V. Science & Society
3 Credits (3)
Analysis and evaluation of how human activities affect the earth's environment or ecosystems. Several examples, from global issues to local issues will be studied in detail. Current science and the intersection of science and public policy will be discussed in relation to problems like world population, agricultural productivity, deforestation, medical advances, and future prospects for the environment.
Learning Outcomes
1. Become familiar with current science topics affecting society such as climate change, pandemics, vaccinations and the anti-vaccination movement, food production, and others to be discussed in class.
2. Improve critical thinking skills and become comfortable with evaluating claims using a data and evidence based approaches.
3. Gain an appreciation of how science affects society and how fake science can hurt society.

EPWS 390. Internship
1-3 Credits

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. Maximum of 3 credits. May be repeated up to 3 credits.

Learning Outcomes

1. Varies.

EPWS 420. Environmental Behavior of Pesticides
3 Credits (3)

Behavior of pesticide compounds in the environment, their function toward target and non target pest organisms including humans, effect of environmental conditions on pesticide function, ecology of organisms involved in pesticides degradation,overview of environmental regulation. CHEM 2115 recommended prior to course. May be repeated up to 3 credits.

EPWS 440. Tropical Insect Ecology
3 Credits (3)

This course is designed to expose students to world of insects and other arthropods living in a variety of tropical environments. We will explore multiple habitats in search of these fascinating organisms. Students will gain valuable experience on the biology, identification, field sampling techniques, and ecology of tropical arthropods. We will examine the biodiversity of these important organisms and gain a better understanding of their diminishing habitats.

Learning Outcomes

1. Students will gain experience in the biology and identification of tropical insects and other arthropods.
2. Students will gain experience in insect biodiversity and proper field sampling techniques in a variety of habitats.
3. Students will gain experience on the issues affecting threatened habitats.

EPWS 447. Seminar
1 Credit (1)

Organization and techniques for the oral presentation of research information. Restricted to: Main campus only.

EPWS 447 H. Seminar Honors
1 Credit (1)

Organization and techniques for the oral presentation of research information. Students taking EPWS 447 H will have the additional assignment of making a poster on either scientific research or a scientific topic.

Prerequisite(s): Honors eligibility requirements.

EPWS 449. Special Problems
1-3 Credits

Individual investigation in specific areas of entomology, plant pathology or plant physiology. Maximum of 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits.

Learning Outcomes

1. Varies.

EPWS 451. Special Topics
1-4 Credits

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits.

Learning Outcomes

1. Varies.

EPWS 455. Advanced Integrated Pest Management
3 Credits (3)

Examination of factors affecting the biology and ecology, population evaluations, and control of insect, disease, and weed pests with an emphasis on integrating management practices. Credit cannot be given for both EPWS 455 and EPWS 505. Taught with: EPWS 505.

Prerequisite: Either EPWS 303 or EPWS 310 or EPWS 311, or consent of instructor.

Learning Outcomes

1. Understand the basic tenets of pest management.
2. Classify the different pest groups and their ecology.
3. Comprehend the variety of management strategies.
4. Understand how management effects the ecosystem.
5. Comprehend a systems approach to management.
6. Critically analyze, develop, present, and discuss pest management systems.

EPWS 456. Biological Control
3 Credits (3)

Principles of plant and animal suppression using living organisms. Interaction of biological control organisms with biotic and abiotic factors will be stressed. Credit cannot be given for both EPWS 456 and EPWS 506. Students should complete an introductory course in entomology prior to enrollment.

Learning Outcomes

1. Summarize the basic concepts of biological control of arthropods, weeds, and some pathogens.
2. Explain the benefits, challenges, and risks of biological control technologies.
3. Apply course concepts to real-world scenarios that involve biological control.

EPWS 462. Parasitology
3 Credits (3)

Introduction to classification, biology, ecology and management of the major parasites of human, domestic animals and wildlife.

Learning Outcomes

1. Students will learn about the major parasites of human, domestic animals, and wildlife.
2. Students will learn how to detect, identify, and manage parasites in the above mentioned mediums.

EPWS 471. Plant Mineral Nutrition
3 Credits (3)

Same as HORT 471 and AGRO 471.

EPWS 486. Plant Virology
3 Credits (3)

An overview of viral pathogens associated with infectious plant disease. Includes pathogens, replication, genetics, transmission, and movement of plant viruses.

Learning Outcomes

1. Understand the basic tenets of plant virology.
2. Determine different plant virus groups.
3. Comprehend the variety of genome strategies and organization.
4. Understand viral replication processes.
5. Comprehend transmission and viral ecology/epidemiology.
6. Critically analyze, present, and discuss current journal articles in plant virology.

EPWS 492. Diagnosing Plant Disorders
3 Credits (2+3P)

Systematic diagnosis of the physiological, pathological, and entomological causes of plant disorders. Same as AGRO 492 and HORT 492. May be repeated up to 3 credits.
Prerequisite: EPWS 303, EPWS 310.
Learning Outcomes

1. To describe the major types of plant disorders.
2. To identify the biotic and abiotic agents causing plant disorders.
3. To define the approaches used in diagnosing plant disorders.

EPWS 502. General Entomology
4 Credits (4)
An introduction to the biology and classification of insects. Lecture covers life histories, classification, ecology and behavior of insect orders and families. Laboratory focuses on identification of insect orders and families.
Prerequisite: BIOL 2610G or BIOL 2110G.
Learning Outcomes

1. Have a detailed understanding of the biology and taxonomy of insects.
2. Be able to identify all insect orders.
3. Be able to sight identify common families of North American Insects.
4. Be able to properly curate insect specimens.

EPWS 505. Advanced Integrated Pest Management
3 Credits (3)
Examination of the factors affecting the biology and ecology, population evaluations, and control of insect, disease, and weed pests, with an emphasis on integrating management practices. Crosslisted with: EPWS 455.
Prerequisite(s): EPWS 303 or EPWS 310 or EPWS 311 or consent of instructor.

EPWS 506. Biological Control
3 Credits (3)
Principles of plant and animal pest suppression using living organisms. Interaction of biological control organisms with biotic and abiotic factors will be stressed. Individual paper or project required. An introductory course in entomology should be completed before enrollment. Credit cannot be given for both EPWS 456 and EPWS 506.
Learning Outcomes

1. Summarize the basic concepts of biological control of arthropods, weeds, and some pathogens.
2. Explain the benefits, challenges, and risks of biological control technologies.
3. Apply course concepts to real-world scenarios that involve biological control.

EPWS 511. Introduction to Weed Science (f)
4 Credits (3+2P)
Covers the principles of weed science with emphasis on characteristics of invasive plants, methods of integrated weed management, and current issues impacting weed management. Includes identification of local weeds. Research paper required for graduate credit. Taught with AGRO 511. May be repeated up to 4 credits.
Prerequisite: CHEM 1215G and BIOL 2110G.
Learning Outcomes

1. Describe the environmental conditions and inherent traits that promote the growth and persistence of weed populations in managed and natural ecosystems.
2. Predict causes and consequences of weed management failures in agricultural and natural ecosystems.
3. Apply knowledge of herbicidal, mechanical and cultural weed control to develop integrated strategies for weed problems.
4. Classify herbicides based on injury symptoms, mode of action, site of action, translocation, selectivity, potential uses and potential dangers.
5. Identify common weeds found in southern New Mexico by providing correctly spelled botanical and common names, as well as lifecycles.
6. Demonstrate the ability to safely apply herbicide solutions includes: perform the activities and calculations to ensure that a sprayer delivers the appropriate amount of solution over the sprayed area, interpret herbicide labels to identify guidelines for safety, dosage and application procedures, and perform the calculations necessary for determining appropriate amounts of herbicide, carrier and adjuvant to add to a spray tank.

EPWS 513. Introduction to Scientific Writing
3 Credits (3)
Students will learn how to communicate, through written format, to both the scientific community and diverse audiences. Students will be introduced to new technologies and new genres of scientific writing. Students will also learn basic reviewing and writing skills that underlie efficient preparation of literature reviews, scientific manuscripts, project reports, blog-posts, opinion or perspective pieces for more popular venues, advocacy articles for legislators, and descriptive pieces for popular venues such as newspapers, magazines, and broadcast media. Emphasis will be on the communication of experimental findings in peer-reviewed scientific journals.
Learning Outcomes

1. Students will review the basics of rhetoric and the technology of language.
2. Students will learn how to overcome writing barriers and gain confidence in their writing skills.
3. Students will improve their writing skills so that manuscript preparation becomes more efficient and productive.
4. Students will learn professional standards for the conduct of ethical reporting of scientific results.
5. Students will learn to recognize structural and stylistic elements in scientific articles that help researchers achieve certain communication goals.
6. Students will learn the basics of table, figure, diagram, and image presentation in manuscripts.
7. Literature reviews, framed so that they answer an important question in the field, and lead to peer-reviewed publication, may also be prepared. (With permission of the instructor.)

EPWS 514. Plant Physiology
3 Credits (3)
Overview of photosynthesis, respiration, water relations of plants, minerals and organic nutrition, growth and development.
Prerequisite: BIOL 2110G, CHEM 1225G.
Learning Outcomes

1. Summarize the chemical and physical bases for processes in plants involving water relations, metabolism, and growth.
2. Compare and contrast forms of photosynthesis that are adaptive, and not adaptive, to heat and drought.
3. Explain physiological mechanisms supporting plant tolerance to abiotic and biotic stresses.
4. Predict consequences of environmental change on physiological processes and growth of individual plants.

5. Apply course concepts to real-world scenarios that involve plant function and plant development.

EPWS 520. Environmental Behavior of Pesticides (so)
3 Credits (3)
Behavior of these compounds in the environment, their function toward target and non target pest organisms including humans, effect of environmental conditions on pesticide function, ecology of organisms involved in pesticides degradation,overview of environmental regulation. CHEM 2115 recommended prior to course. May be repeated up to 3 credits.

EPWS 525. Scientific Writing- How to be a Productive and Effective Writing
1-3 Credits (1-3)
Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Crosslisted with: AGRO 525, HORT 525 and SOIL 525.

EPWS 549. Special Problems
1-4 Credits
Individual investigation in specific areas of entomology, plant pathology, and weed science. Maximum of 4 credits per semester and a total of 6 credits.

EPWS 551. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

EPWS 560. Ecology and Management of Invasive Plant Species
3 Credits (3)
An overview of the causes and consequences of plant invasions and invasive plant management, with a focus on critical examination of current literature and paradigms.
Learning Outcomes
1. Students will gain practical and theoretical knowledge to facilitate improved vegetation management by engaging in critical thinking and discussion on a wide variety of topics related to invasive plants.
2. Students will understand why plants invade and how to facilitate prevention of invasion in natural and rangeland areas
3. Further, students will gain knowledge of the tools and practices of invasive plant management.

EPWS 562. Parasitology
3 Credits (3)
Introduction to classification, biology, ecology and management of the major parasites of human, domestic animals and wildlife.
Learning Outcomes
1. Students will learn about the major parasites of human, domestic animals, and wildlife.
2. Students will learn how to detect, identify, and manage parasites in the above mentioned mediums.

EPWS 562 L. Parasitology Lab
1 Credit (1)
Introduction to classification, biology, ecology and management of the major parasites of human, domestic animals and wildlife.
Learning Outcomes
1. Students will learn how to conduct lab work to analyze, detect, and identify major parasites of human, domestic animals and wildlife.

EPWS 573. Fungal Biology
3 Credits (2+2P)
Introduction to the taxonomy, morphology, physiology, and ecology of fungi. Same as BIOL 573. May be repeated up to 3 credits.
Prerequisite: EPWS 310 or consent of instructor.
Learning Outcomes
1. To describe the importance of fungi in our environment.
2. To explore the morphology and physiology of major groups of fungi.
3. To describe the associations of fungi with humans, animals, and plants.

EPWS 590. Graduate Seminar
1 Credit (1)
Review of current scientific literature in entomology, plant pathology, and weed science, and verbal presentation of information. No more than 2 credits toward a degree. May be repeated up to 2 credits.
Learning Outcomes
1. To expose students to the fundamentals of speaking, including organization, listening, gestures, vocal variety, and language.
2. To understand components of abstracts for professional meetings and learn to write abstracts.
3. To understand and gain practice in preparation of PowerPoint presentations.
4. To present a professional PowerPoint talk on a scientific topic.
5. To become familiar with components of and preparation of posters for professional meetings.

EPWS 598. Graduate Internship
1-6 Credits
Supervised professional on-the-job learning experience. Limited to Master of Agriculture candidates. Not more than 6 credits toward the degree.

EPWS 599. Master's Thesis
15 Credits
Thesis.

EPWS 606. Biological Control
3 Credits (3)
An introduction to biological control that relies on ecological relationships among populations and the direct or indirect effects of these relationships to humans.
Learning Outcomes
1. Summarize the basic concepts of biological control of arthropods, weeds, and some pathogens.
2. Explain the benefits, challenges, and risks of biological control technologies.
3. Apply course concepts to real-world scenarios that involve biological control.

EPWS 613. Introduction to Scientific Writing
3 Credits (3)
Students will learn how to communicate, through written format, to both the scientific community and diverse audiences. Students will be introduced to new technologies and new genres of scientific writing. Students will also learn basic reviewing and writing skills that underlie efficient preparation of literature reviews, scientific manuscripts, project reports, blog-posts, opinion or perspective pieces for more popular venues, advocacy articles for legislators, and descriptive pieces for popular venues such as newspapers, magazines, and broadcast media. Emphasis will be on the communication of experimental findings in peer-reviewed scientific journals.

Learning Outcomes

1. Students will review the basics of rhetoric and the technology of language.
2. Students will learn how to overcome writing barriers and gain confidence in their writing skills.
3. Students will improve their writing skills so that manuscript preparation becomes more efficient and productive.
4. Students will learn professional standards for the conduct of ethical reporting of scientific results.
5. Students will learn to recognize structural and stylistic elements in scientific articles that help researchers achieve certain communication goals.
6. Students will learn the basics of table, figure, diagram, and image presentation in manuscripts.
7. Literature reviews, framed so that they answer an important question in the field, and lead to peer-reviewed publication, may also be prepared. (With permission of the instructor.)

EPWS 625. Advanced Scientific Writing
3 Credits (3)
The class is intended for graduate students who have obtained data from their graduate research program and are engaged in the analyses of their results (typically at or beyond the midway mark of their research program). At the end of the semester, it is anticipated that Ph.D. students enrolled in the 625 level offering shall have completed a manuscript that is essentially ready for submission to a journal. Master of Science students may also reach this level of completion, but it is dependent on each student's specific situation.
Learning Outcomes

1. Students will learn how to overcome writing barriers and develop a writing schedule.
2. Students will learn how to better organize the results of their experiments into effective tables and figures.
3. Students will improve their writing skills so that manuscript preparation becomes more efficient and productive.
4. Students will learn how to successfully navigate a manuscript through the entire manuscript preparation, revision, review and publishing process.
5. Students will learn professional standards for the conduct of ethical reporting of scientific results.
6. Students will learn professional standards for conducting objective, rigorous reviews of scientific manuscripts.
7. Students will successfully communicate their research findings to the scientific community through publication in peer-reviewed, scientific journals.

EPWS 640. Tropical Insect Ecology
3 Credits (3)
This course is designed to expose students to world of insects and other arthropods living in a variety of tropical environments. We will explore multiple habitats in search of these fascinating organisms. Students will gain valuable experience on the biology, identification, field sampling techniques, and ecology of tropical arthropods. We will examine the biodiversity of these important organisms and gain a better understanding of their diminishing habitats.
Learning Outcomes

1. Students will gain experience in the biology and identification of tropical insects and other arthropods.
2. Students will gain experience in insect biodiversity and proper field sampling techniques in a variety of habitats.
3. Students will gain experience on the issues affecting threatened habitats.

EPWS 660. Ecology and Management of Invasive Plant Species
3 Credits (3)
An overview of the causes and consequences of plant invasions and invasive plant management, with a focus on critical examination of current literature and paradigms.
Learning Outcomes

1. Students will gain practical and theoretical knowledge to facilitate improved vegetation management by engaging in critical thinking and discussion on a wide variety of topics related to invasive plants.
2. Students will understand why plants invade and how to facilitate prevention of invasion in natural and rangeland areas.
3. Further, students will gain knowledge of the tools and practices of invasive plant management.

EPWS 662. Parasitology
3 Credits (3)
Introduction to classification, biology, ecology and management of the major parasites of human, domestic animals and wildlife. May be repeated up to 3 credits.
Learning Outcomes

1. Students will learn about the major parasites of human, domestic animals, and wildlife.
2. Students will learn how to detect, identify, and manage parasites in the above mentioned mediums.

EPWS 662 L. Parasitology Lab
1 Credit (1)
Introduction to classification, biology, ecology and management of the major parasites of human, domestic animals and wildlife.
Learning Outcomes

1. Students will learn how to conduct lab work to analyze, detect, and identify major parasites of human, domestic animals and wildlife.

EPWS 675. Urban Entomology
3 Credits (3)
Study of insects and related arthropods in urban settings, about their impact on humans and damages to building. Principles of Integrate Pest Management (IPM) strategies with emphasis on current control techniques for detection, control and monitoring. May be repeated up to 3 credits.
Prerequisite: Either BIOL 2610G or BIOL 2110G.
Learning Outcomes

1. Students will learn about arthropods commonly located in urban environments.
2. Students will learn how to properly manage Pests and strategies implemented in modern pest management.
3. Students will gain sufficient knowledge in how to detect, monitor, control, and implement pest management strategies in the modern world.

EPWS 690. Doctoral Seminar
1 Credit (1)
Current research discussions presented by doctoral level graduate students. Not more than 2 credits toward the degree. May be repeated up to 2 credits.
Learning Outcomes

1. Students will learn how to gather, structure, and give oral presentations of research at the doctoral level.

EPWS 6991. Doctoral Research
1-15 Credits (1-15)
Research. May be repeated up to 88 credits.
Learning Outcomes
1. Varies based on research being conducted and type of outcome being sought.

EPWS 6996. Advanced Topics
1-6 Credits (1-6)
Topics of current interest, designated by title and credit. Maximum of 6 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits.
Learning Outcomes
1. Student learning outcomes will varied based on type of research, topic, or subject being taught.

EPWS 7000. Doctoral Dissertation
1-15 Credits (1-15)
Dissertation. May be repeated up to 88 credits.
Learning Outcomes
1. Varies.

Name: Entomology, Plant Pathology & Weed Science Department

Office Location: Skeen Hall, Room N141

Phone: (575) 646-3225

Applied and Agricultural Biology (Applied Biology) - Bachelor of Science in Agriculture

The agricultural biology course work prepares you for a variety of careers in the biological sciences and agriculture. You will develop your curriculum with an academic advisor to attain your individual goals. Many will pursue advanced degrees in the sciences or prepare for admittance to professional schools (medical, dental, etc.). A diverse program is offered with five separate concentrations that allow you to tailor your program for careers in the commercial sector, such as agricultural consulting, and pest management or for careers with county, state, or federal agencies, such as research technicians, land managers, and extension agents. A minimum of 120 credit hours is required for graduation. Any undergraduate student majoring in Agricultural Biology must earn a grade of C- or higher in core (EPWS prefix) courses to satisfy degree requirements. Students earning a D or F in a core (EPWS prefix) course will be expected to repeat that course until the student earns a grade of C- or higher. The following courses are required for a major in Agricultural Biology.

The Applied Biology concentration prepares you for professional advancement including admittance to medical, dental, veterinary and graduate schools. Students interested in the health professions must register with the Health Professional Advisory Committee no later than the sophomore year. Students should check the specific entrance requirements for the professional or graduate school of their choice prior to selecting electives within this option.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix	Title	Credits
General Education		
Area I: Communications		
English Composition - Level 1		
ENGL 1110G	Composition I	4
or ENGL 1110H	Composition I Honors	
English Composition - Level 2		
Choose one from the following:		3
ENGL 2130G	Advanced Composition	
ENGL 2210G	Professional and Technical Communication	
ENGL 2210H	Professional and Technical Communication	
ENGL 2215G	Advanced Technical and Professional Communication	
Oral Communication		
Choose one from the following:		3
ACOM 1130G	Effective Leadership and Communication in Agriculture	
COMM 1115G	Introduction to Communication	
or HNRS 2175G	Introduction to Communication Honors	
COMM 1130G	Public Speaking	
Area II: Mathematics		
MATH 1220G	College Algebra [1]	3
Area III/IV: Laboratory Sciences and Social/Behavioral Sciences		*11*
CHEM 1215G	General Chemistry I Lecture and Laboratory for STEM Majors	
CHEM 1225G	General Chemistry II Lecture and Laboratory for STEM Majors	
Area IV: Social/Behavioral Sciences Course (3 credits) [2]		
Area V: Humanities [2]		*3*
Area VI: Creative and Fine Arts [2]		*3*
General Education Elective		
BIOL 2610G	Principles of Biology: Biodiversity, Ecology, and Evolution	3
Viewing a Wider World [3]		**6**
One must be from outside of the College of ACES		
Departmental/College Requirements		
CHEM 1216G, CHEM 1226G and BIOL 2610G will count towards Departmental/College and General Education Requirements		
A ST 311	Statistical Applications	3
AGRO 305	Principles of Genetics	3
BIOL 2110G	Principles of Biology: Cellular and Molecular Biology	3
BIOL 311	General Microbiology	3
BIOL 313	Structure and Function of Plants	3
or BIOL 322	Zoology	
EPWS 1110	Applied Biology	3
EPWS 1110L	Applied Biology Lab	1
EPWS 301	Agricultural Biotechnology	3
EPWS 302	General Entomology	4
EPWS 310	Plant Pathology	4
EPWS 311	Introduction to Weed Science	4

EPWS 447	Seminar	1
Concentration Coursework		
CHEM 313	Organic Chemistry I	3
CHEM 314	Organic Chemistry II	3
CHEM 315	Organic Chemistry Laboratory	2
MATH 1250G	Trigonometry & Pre-Calculus	4
MATH 1511G	Calculus and Analytic Geometry I	4
or MATH 1511H	Calculus and Analytic Geometry I Honors	
PHYS 1230G	Algebra-Based Physics I	3
or PHYS 2230G	General Physics for Life Science I	
PHYS 1230L	Algebra-Based Physics I Lab	1
or PHYS 2230L	Laboratory to General Physics for Life Science I	
Choose 6-8 credits from the following:		6-8
ANSC 370	System Physiology of Farm Animals	
BIOL 312	Plant Taxonomy	
BIOL 354	Physiology of Humans	
BIOL 377	Cell Biology	
EPWS 314	Plant Physiology	
EPWS 373	Fungal Biology	
EPWS 486	Plant Virology	
Non- Departmental Requirements (in addition to Gen.Ed/VWW)		
Second Language: (not required)		
Electives, to bring the total credits to 120 [4]		**15-17**
Suggested Electives		
MATH 1521G	Calculus and Analytic Geometry II	
or MATH 1521H	Calculus and Analytic Geometry II Honors	
PHYS 1240G	Algebra-Based Physics II	
or PHYS 2240G	General Physics for Life Science II	
BCHE 395	Biochemistry I	3
Total Credits		**120**

1. MATH 1220G College Algebra is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G College Algebra first.
2. See the General Education (p. 262) section of the catalog for a full list of courses
3. See the Viewing a Wider World (p. 266) section of the catalog for a full list of courses
4. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year		
Semester 1		**Credits**
ENGL 1110G or ENGL 1110H	Composition I [1] or Composition I Honors	4
MATH 1220G	College Algebra [1]	3
EPWS 1110 & 1110L	Applied Biology and Applied Biology Lab	4
ACES 1120	Freshman Orientation	1
Area IV: Social and Behavioral Science Course [2]		3
	Credits	**15**
Semester 2		
ENGL 2210G or ENGL 2210H	Professional and Technical Communication [1] or Professional and Technical Communication	3
MATH 1250G	Trigonometry & Pre-Calculus [1]	4
BIOL 2610G	Principles of Biology: Biodiversity, Ecology, and Evolution [1]	3
ACOM 1130G	Effective Leadership and Communication in Agriculture	3
Area V: Humanities Course [2]		3
	Credits	**16**
Second Year		
Semester 1		
CHEM 1215G	General Chemistry I Lecture and Laboratory for STEM Majors	4
BIOL 2110G	Principles of Biology: Cellular and Molecular Biology	3
BIOL 313 or BIOL 322	Structure and Function of Plants or Zoology	3
VWW: Viewing a Wider World Course [3]		3
Area VI: Creative and Fine Arts Course [2]		4
	Credits	**17**
Semester 2		
MATH 1511G or MATH 1511H	Calculus and Analytic Geometry I [1] or Calculus and Analytic Geometry I Honors	4
CHEM 1225G	General Chemistry II Lecture and Laboratory for STEM Majors	4
BIOL 311	General Microbiology [1]	3
Elective Course		2
	Credits	**13**
Third Year		
Semester 1		
CHEM 313	Organic Chemistry I	3
A ST 311	Statistical Applications	3
EPWS 302	General Entomology	4
Choose from one of the following: [1]		3
ANSC 370	System Physiology of Farm Animals	
BIOL 312	Plant Taxonomy	
BIOL 354	Physiology of Humans	
BIOL 377	Cell Biology	
EPWS 314	Plant Physiology

Electives, to bring the total credits to 120 [4]		**4-5**
Total Credits		**120**

1. MATH 1220G College Algebra is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G College Algebra first.
2. See the General Education (p. 262) section of the catalog for a full list of courses
3. See the Viewing a Wider World (p. 266) section of the catalog for a full list of courses
4. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor

Applied and Agricultural Biology (Entomology) - Bachelor of Science in Agriculture

The agricultural biology course work prepares you for a variety of careers in the biological sciences and agriculture. You will develop your curriculum with an academic advisor to attain your individual goals. Many will pursue advanced degrees in the sciences or prepare for admittance to professional schools (medical, dental, etc.). A diverse program is offered with five separate concentrations that allow you to tailor your program for careers in the commercial sector, such as agricultural consulting, and pest management or for careers with county, state, or federal agencies, such as research technicians, land managers, and extension agents. A minimum of 120 credit hours is required for graduation. Any undergraduate student majoring in Agricultural Biology must earn a grade of C- or higher in core (EPWS prefix) courses to satisfy degree requirements. Students earning a D or F in a core (EPWS prefix) course will be expected to repeat that course until the student earns a grade of C- or higher. The following courses are required for a major in Agricultural Biology.

The Entomology concentration prepares you for graduate degrees in entomology. Emphasis is placed on a broad background in field and laboratory aspects of insect biology and management.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year		
Semester 1		**Credits**
ENGL 1110G or ENGL 1110H	Composition I [1] or Composition I Honors	4
MATH 1220G	College Algebra [1]	3
EPWS 1110 & 1110L	Applied Biology and Applied Biology Lab	4
ACES 1120	Freshman Orientation	1
Area IV: Social and Behavioral Science Course [2]		3
	Credits	**15**
Semester 2		
ENGL 2210G or ENGL 2210H	Professional and Technical Communication [1] or Professional and Technical Communication	3
MATH 1430G	Applications of Calculus I [1]	3
BIOL 2610G	Principles of Biology: Biodiversity, Ecology, and Evolution [1]	3
ACOM 1130G	Effective Leadership and Communication in Agriculture	3
Area V: Humanities Course [2]		3
	Credits	**15**
Second Year		
Semester 1		
CHEM 1215G	General Chemistry I Lecture and Laboratory for STEM Majors	4
BIOL 2110G	Principles of Biology: Cellular and Molecular Biology	3
EPWS 380V	Science & Society	3
Area VI: Creative and Fine Arts Course [2]		3
Elective Course		2
	Credits	**15**

Semester 2		
CHEM 1225G	General Chemistry II Lecture and Laboratory for STEM Majors	4
BIOL 311	General Microbiology [1]	3
BIOL 313 or BIOL 322	Structure and Function of Plants (Fall Only) [1] or Zoology	3
VWW: Viewing a Wider World Course [3]		4
	Credits	**14**
Third Year		
Semester 1		
CHEM 2115	Survey of Organic Chemistry and Laboratory	4
AGRO 305	Principles of Genetics	3
SOIL 2110	Introduction to Soil Science	3
EPWS 310	Plant Pathology (Fall Only) [1]	4
A ST 311	Statistical Applications [1]	3
	Credits	**17**
Semester 2		
PHYS 1230G & PHYS 1230L	Algebra-Based Physics I and Algebra-Based Physics I Lab	4
EPWS 301	Agricultural Biotechnology (Spring Only) [1]	3
VWW: Viewing a Wider World Course [3]		3
Departmental Elective Course [4]		3
Elective Course		3
	Credits	**16**
Fourth Year		
Semester 1		
EPWS 311	Introduction to Weed Science	4
EPWS 302	General Entomology	4
EPWS 492	Diagnosing Plant Disorders	3
TOX 361	Basic Toxicology	3
Elective Course		1
	Credits	**15**
Semester 2		
EPWS 447	Seminar	1
EPWS 455	Advanced Integrated Pest Management (Odd Year Spring Only) [1]	3
ENVS 301	Principles of Ecology	3
EPWS 314	Plant Physiology [1]	3
Departmental Elective Course [4]		3
	Credits	**13**
	Total Credits	**120**

1 These courses have prerequisites and it is the students responsibility to check and fulfill all course prerequisites listed for these courses.

2 See the General Education (p. 262) section of the catalog for a full list of courses.

3 See the Viewing a Wider World (p. 266) section of the catalog for a full list of courses.

4 Departmental Elective Course LIst (two required):

- AGRO 365 Principles of Crop Production (Odd Years Fall Only)
- AGRO 471 Plant Mineral Nutrition (Odd Years Spring Only)
- EPWS 325V Insects, Humans, and the Environment
- EPWS 420 Environmental Behavior of Pesticides
- EPWS 451 Special Topics (Spring Only)
- ENVS 370 Environmental Soil Science
- GEOG 381 Cartography and GIS

Applied and Agricultural Biology (Invasive Pest Biology and Management) - Bachelor of Science in Agriculture

The agricultural biology course work prepares you for a variety of careers in the biological sciences and agriculture. You will develop your curriculum with an academic advisor to attain your individual goals. Many will pursue advanced degrees in the sciences or prepare for admittance to professional schools (medical, dental, etc.). A diverse program is offered with five separate concentrations that allow you to tailor your program for careers in the commercial sector, such as agricultural consulting, and pest management or for careers with county, state, or federal agencies, such as research technicians, land managers, and extension agents. A minimum of 120 credit hours is required for graduation. Any undergraduate student majoring in Agricultural Biology must earn a grade of C- or higher in core (EPWS prefix) courses to satisfy degree requirements. Students earning a D or F in a core (EPWS prefix) course will be expected to repeat that course until the student earns a grade of C- or higher. The following courses are required for a major in Agricultural Biology.

The Pest Biology and Management concentration prepares you for careers such as insect, weed and disease management; in both field and urban environments, including IPM and Sustainable/Organic Techniques research technician; federal and state agencies; border security; agricultural consulting; and extension positions.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

General Agriculture - Bachelor of Science in Agriculture

The general agriculture major is designed for students searching for a well-rounded education that builds on the diversity of the other degree programs in the College of Agricultural, Consumer and Environmental Sciences (ACES). The flexibility of the general agriculture degree allows students to tailor a program to fit their individual interests and career goals. Students completing the program earn a Bachelor of Science in General Agriculture. Students choose general agriculture for a variety of reasons. Some may enter the program with a specific career goal in mind. Others may choose general agriculture to obtain a broader education that will give them more flexibility. The curriculum in General Agriculture is administered by the Department of Entomology, Plant Pathology and Weed Science.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Departmental/College Requirements		
Additional College Requirements [4]		
Select three areas of concentration from the following ACES departments: [5]		52
Agricultural Economics and Agricultural Business		
Agricultural and Extension Education		

Animal and Range Science	
Entomology, Plant Pathology and Weed Science	
Family and Consumer Sciences	
Fish, Wildlife and Conservation Ecology	
Plant and Environmental Sciences	
Hotel, Restaurant and Tourism Management	
Second Language: (not required)	
Electives, to bring total credits to 120 [6]	**33-36**
Total Credits	**120**

1 See the General Education (p. 262) section of the catalog for a full list of courses

2 A Mathematics course is required for the degree but students may need to take any prerequisites needed to enter the course first.

3 See the Viewing a Wider World (p. 266) section of the catalog for a full list of courses

4 Some ACES classes will meet general education requirements.

5 At least 18 credits must be taken from the primary department and at least 12 credits must be taken from two secondary departments. A minimum of 52 credits (20 of which need to be 300+) of the 120 required for the degree, must be completed in courses offered by the College of Agricultural, Consumer, and Environmental Sciences.

6 Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G College Algebra and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year		
Semester 1		**Credits**
ACES 1120	Freshman Orientation	1
ACES 1210	Financial Fitness for College Students	1
ENGL 1110G or ENGL 1110H	Composition I [1] or Composition I Honors	4
MATH 1220G	College Algebra [1]	3
Area VI: Creative and Fine Arts Course [2]		3
Area V: Humanities Course [2]		3
	Credits	**15**
Semester 2		
ENGL 2210G or ENGL 2210H	Professional and Technical Communication [1] or Professional and Technical Communication	3
Area III: Laboratory Science Course (recommend one of the following): [2]		3-4
BIOL 2610G & BIOL 2610L	Principles of Biology: Biodiversity, Ecology, and Evolution and Principles of Biology: Biodiversity, Ecology, and Evolution Laboratory [1]	
BIOL 2110G	Principles of Biology: Cellular and Molecular Biology [1]	
HORT 1115G	Introductory Plant Science [1]	
EPWS 1110	Applied Biology [1]	
CHEM 1215G	General Chemistry I Lecture and Laboratory for STEM Majors	
Area IV: Social and Behavioral Science Course (recommend one of the following): [2]		3
AEEC 2130G	Survey of Food and Agricultural Issues	
ECON 1110G	Survey of Economics	
ECON 2110G	Macroeconomic Principles	
ECON 2120G	Principles of Microeconomics Honors	
Elective Course		3
Primary Concentration Elective Course		3
	Credits	**15-16**
Second Year		
Semester 1		
ACOM 1130G	Effective Leadership and Communication in Agriculture [1]	3
Area III: Laboratory Science Course (recommend one of the following): [2]		3-4
BIOL 2610G & BIOL 2610L	Principles of Biology: Biodiversity, Ecology, and Evolution and Principles of Biology: Biodiversity, Ecology, and Evolution Laboratory [1]	
BIOL 2110G	Principles of Biology: Cellular and Molecular Biology [1]	
HORT 1115G	Introductory Plant Science [1]	
EPWS 1110	Applied Biology [1]	
CHEM 1215G	General Chemistry I Lecture and Laboratory for STEM Majors	
General Education Elective Course [2]		3-4
Primary Concentration Elective Course		3
Secondary Concentration Elective Course		3
	Credits	**15-17**
Semester 2		
Primary Concentration Elective Course		3
Primary Concentration Elective Course		3
Secondary Concentration Elective Course		3
VWW: Viewing a Wider World Course [3]		3
Upper-Division Elective Course [3]		3
	Credits	**15**
Third Year		
Semester 1		
Primary Concentration Elective Course		3
Primary Concentration Elective Course		3
VWW: Viewing a Wider World Course [3]		3
Elective Course		3
Elective Course		3
	Credits	**15**
Semester 2		
Upper-Division ACES Elective Course		3
Upper-Division ACES Elective Course		3
Secondary Concentration Elective Course		3
Elective Course		3
Elective Course		3
	Credits	**15**

Fourth Year		
Semester 1		
Upper-Division ACES Elective Course		3
Upper-Division ACES Elective Course		3
Upper-Division ACES Elective Course		3
Secondary Concentration Elective Course		3
Elective Course		3
	Credits	**15**
Semester 2		
Upper-Division ACES Elective Course		3
Upper-Division ACES Elective Course		3
Elective Course		3
Elective Course		3
Elective Course		3
	Credits	**15**
	Total Credits	**120-123**

[1] These courses have prerequisites and it is the students responsibility to check and fulfill all course prerequisites listed for these courses.

[2] See the General Education (p. 262) section of the catalog for a full list of courses.

[3] See the Viewing a Wider World (p. 266) section of the catalog for a full list of courses.

Entomology - Undergraduate Minor

Prefix	Title	Credits
Courses required for minor:		
EPWS 302	General Entomology	4
EPWS 325V	Insects, Humans, and the Environment	3
EPWS 303	Economic Entomology	3
Choose from the following courses:		**8**
EPWS 1110	Applied Biology	
EPWS 1110L	Applied Biology Lab	
EPWS 455	Advanced Integrated Pest Management	
EPWS 462	Parasitology	
Total Credits		**18**

Pest Management - Undergraduate Minor

Prefix	Title	Credits
Courses required for minor		
EPWS 302	General Entomology	4
EPWS 310	Plant Pathology	4
EPWS 311	Introduction to Weed Science	4
Choose from the following Courses:		**6**
EPWS 1110	Applied Biology	
EPWS 1110L	Applied Biology Lab	
EPWS 303	Economic Entomology	
EPWS 455	Advanced Integrated Pest Management	
Upper-division EPWS course(s): (3-6 credits)		
Total Credits		**18**

Plant Pathology - Undergraduate Minor

Prefix	Title	Credits
Courses required for minor:		
EPWS 310	Plant Pathology	4
EPWS 373	Fungal Biology	3
EPWS 486	Plant Virology	3
Choose from the following Courses:		**8**
BIOL 311	General Microbiology	
BIOL 311 L	General Microbiology Laboratory	
EPWS 1110	Applied Biology	
EPWS 1110L	Applied Biology Lab	
EPWS 314	Plant Physiology	
EPWS 455	Advanced Integrated Pest Management	
EPWS 492	Diagnosing Plant Disorders	
Total Credits		**18**

Weed Science - Undergraduate Minor

Prefix	Title	Credits
Courses required for minor:		
EPWS 311	Introduction to Weed Science	4
EPWS 314	Plant Physiology	3
EPWS 420	Environmental Behavior of Pesticides	3
Choose from the following Courses:		**8**
EPWS 1110	Applied Biology	
EPWS 1110L	Applied Biology Lab	
BIOL 312	Plant Taxonomy	
BIOL 301	Principles of Ecology	
BIOL 313	Structure and Function of Plants	
EPWS 455	Advanced Integrated Pest Management	
Total Credits		**18**

Family and Consumer Sciences

Undergraduate Program Information

Where Science Meets the Human Experience

The Department of Family and Consumer Sciences (FCS) at NMSU is dedicated to improving the quality of life for individuals, families, and communities in a rapidly changing global society. Our curriculum blends **scientific rigor with social impact**, equipping you with the research-backed tools needed to solve real-world problems.

Whether you are interested in the global fashion industry, the chemistry of food, or the complexities of human development, our programs provide a clear pathway from the classroom to a meaningful career.

Our Specialized Fields of Study

Explore our diverse program areas through our specialized course prefixes:

- **CTFM | Clothing, Textiles, and Fashion Merchandising:** The business, design, and sustainability of the global apparel industry.
- **FCST | Family and Child Science:** Understanding human development and strengthening the bonds of families and communities.

- **NUTR | Nutrition:** The science of health, wellness, and medical nutrition therapy.
- **FSTE | Food Science and Technology:** Innovation in food safety, processing, and the future of the food supply.
- **FCSC | Family and Consumer Sciences:** Core foundations and cross-disciplinary leadership in the field.

Graduate Program Information

Elevate your professional impact with a Master's degree from NMSU. Our graduate programs are designed for specialized research and leadership roles in the human sciences.

- **Who Should Apply:** Prospective students should hold an undergraduate degree in a field related to their intended area of specialization.
- **How to Apply:** In addition to Graduate School requirements, the department evaluates letters of reference, standardized test scores, and personal statements to ensure a holistic admission process.
- **Timelines:** To ensure a seamless start, we recommend submitting all materials at least **six weeks prior** to the start of your desired semester.

Note: For a full list of admission criteria and specialized prerequisites, please contact the department directly to connect with a faculty advisor.

Degrees for the Department

Bachelor Degree(s)

- Family and Consumer Sciences Education - Bachelor of Science in Family and Consumer Sciences (p. 414)
- Fashion Merchandising and Design - Bachelor of Science in Family and Consumer Sciences (p. 415)
- Food Science and Technology (Science, Technology and Engineering) - Bachelor of Science in Food Science and Technology (p. 418)
- Human Development and Family Science - Bachelor of Science (Online) (https://catalogs.nmsu.edu/global/nmsu-global/human-development-family-science-bs-online/)
- Human Nutrition and Dietetic Science (Nutrition Education) - Bachelor of Science in Family and Consumer Sciences (p. 419)
- Human Nutrition and Dietetic Science (Pre-Dietetics/Dietetics) - Bachelor of Science in Family and Consumer Sciences (p. 422)

Master Degree(s)

- Family and Consumer Sciences (Couples, Marriage and Family Therapy) - Master of Science (p. 159)
- Family and Consumer Sciences (Food Science and Technology) - Master of Science (p. 159)
- Family and Consumer Sciences (Hotel, Restaurant and Tourism Management) - Master of Science (p. 160)

Doctoral Degree(s)

- Food Science - Doctor of Philosophy (p. 225)

Minors for the Department

- Culinary Science - Undergraduate Minor (p. 424)
- Fashion Merchandising & Design - Undergraduate Minor (p. 425)
- Fashion Merchandising and Design - Bachelor of Science in Family and Consumer Sciences (p. 415)
- Food Science - Undergraduate Minor (p. 425)
- Interior Spaces - Undergraduate Minor (p. 425)
- Meat Science - Undergraduate Minor (p. 425)
- Nutrition - Undergraduate Minor (p. 426)

Efren Delgado, Department Head

Laura Bittner, Associate Department Head

Professors Delgado, Floros, Marin, Montañez

Associate Professors Martin, Martinez-Monteagudo

Assistant Professors Ahn, Mezzomo Giotto, Molina, Ruiz, Sabillon Galeas,

College Professor Vaillancourt

College Associate Professor Coffeen

College Assistant Professors

I. Ahn, Ph.D. (Chung-Ang University, Korea)- textile and clothing; K. Coffeen, Ph.D. (New Mexico State University)- educational leadership; E. Delgado, Ph.D. (Technical University of Berlin, Germany)–food science and technology; J. Floros, Ph. D. (University of Georgia) Food Science & Technology; S. Martin, Ph.D. (South Dakota State University)- nutrition and exercise science; M. Marin, Ph.D. (New Mexico State University)– counseling and educational psychology; F. Mezzomo Giotto, *Ph.D. (*University of Nevada); M. Molina, Ph.D. (Texas Tech University) - Family and Consumer Sciences Education; M. *Montanez, Ph.D. (Michigan State University)– psychology; S. Phillips, M.S. (New Mexico State University)- family and consumer sciences; Ruiz, S. Ph.D.* (University of Texas at El Paso)- Interdisciplinary Health Sciences ; *L. Sabillon Galeas, Ph.D. (University of Nebraska-Lincoln)- food science and technology; K. Vaillancourt, Ph.D. (Virginia Tech University)– family studies*

Cooperative Extension Service *L. Bittner, Ph.D. (New Mexico State University)-Educational Leadership and Administration; L. Banegas-Carreon, Ph.D. (New Mexico State University)- Educational Leadership and Administration; W. Fedio, Ph.D. (University of Alberta-Canada)– food microbiology; B. Jorgensen, Ph.D. (Virginia Tech University)– family studies; K. Martinez, Ph.D. (New Mexico State University)- educational leadership and administration; L. Olivas, M.Ed. (New Mexico State University)- education/ curriculum and instruction; L. Sabillon Galeas, Ph.D. (University of Nebraska-Lincoln)- food science and technology; C. Vanderpool, M.S. (University of New Mexico)- nutrition*

Clothing, Textiles & Fashion Merchandising

CTFM 1110. Fundamentals of Fashion
3 Credits (3)
Survey of the fashion business from fiber to end product.
Learning Outcomes

1. Describe the roles and functions of industry jobs and sectors involved in the designing, production, marketing, and distribution of fashion brands within the global context.

2. Describe the business strategies of industry sectors involved in the designing, production, marketing, and distribution of fashion brands within the global context.
3. Describe the interrelationships among line planning, line development, and line presentation at manufacturing and retail levels.
4. Provide examples of the fashion industry's environmental and social impact.
5. Learn about all career tracks involved in the fashion industry and the global fashion supply chain.
6. Synthesize industry-relevant information on current issues in the fashion industry.

CTFM 2120. Fashion Illustration
3 Credits (1+4P)
This course explores aspects of fashion illustration, from drawing basic fashion figures to producing finished professional illustrations in color. This course provides the opportunity for students to integrate their fashion design development with computer-aided systems. The emphasis is on fashion innovation and concept design exploration enhanced by computer applications. May be repeated up to 3 credits.. Prerequisites: ARTS 1145G and CTFM 1110
Learning Outcomes
1. To learn Adobe Illustrator and Adobe Photoshop as drawing and design tools for electronic design and rendering.
2. To understand and utilize the computer as a tool for fashion design.
3. To understand methods of design input, including scanning, digitizing and resizing.
4. To develop customer profiles
5. To Understand Concept Style

CTFM 2130. Concepts in Apparel Construction
3 Credits (1+4P)
Students are introduced to professional standard sewing techniques and apparel construction. The techniques learned are applied to produce finished garments. Restricted to: FCSE,CTFM majors. Restricted to Las Cruces campus only.
Learning Outcomes
1. Define sewing construction terminology, equipment and sewing machine parts.
2. Learn to select suitable patterns and fabrics for garments.
3. Learn to alter commercial patterns for different body types.
4. Identify fabric types, finishes, and labeling.
5. Perform standard operating procedures on sewing machines.
6. Perform clothing construction techniques for various garments.
7. Apply knowledge of industry sewing methods to recognition of garment workmanship.

CTFM 2990. Fashion Practicum
1-3 Credits (1-3)
Applied field experience in the related areas of apparel design, fashion merchandising, and textile science. May be repeated up to 3 credits. Restricted to: CTFM majors. Restricted to Las Cruces campus only.
Learning Outcomes
1. Gain hands-on knowledge of the fashion industry.
2. Demonstrate the ability to analyze the practices of management, as observed in the industry.
3. Demonstrate an attitude that is appropriate for a prospective manager in the industry.
4. Demonstrate the understanding of, and the ability to use research and problem solving methods to develop, analyze, and present a critical incident analysis.

CTFM 300. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree. Restricted to Las Cruces campus only.
Prerequisite(s): CTFM 1110; CTFM 2120.

CTFM 365. Apparel Analysis
3 Credits (3)
An in-depth investigation of the development, production and comparison of wearing apparel. Focus on the structural, functional and decorative aspects of apparel. Emphasis on sourcing of companies and materials, costing of the product line, comparing design and manufacturing techniques that affect price, quality, and size of apparel. Restricted to: CTFM majors.
Prerequisite(s): CTFM 1110 and CTFM 2130.

CTFM 366V. Historic Fashion and Society
3 Credits (3)
This course will introduce you to the clothing history, sociocultural aspects of clothing, the use of historic clothing as inspiration for fashion design, clothing as an aspect of material culture, or adaptation of styles to amplify character or aesthetic expression in theater or dance. Additionally, we look at the history of clothing as a way to understand how this medium of expression in our lives has been used to elevate, suppress, unite and separate society.
Learning Outcomes
1. Compare and contrast the functions and uses of Euro American dress in historic periods.
2. Explain international issues in specific timelines in regards to dress and society.
3. Compare and contrast multicultural and economic issues.
4. Compare and Contrast specific political, cultural, economic, or technological developments in relationship to clothing through themes.
5. Illustrate and Summarize of the evolution of Western clothing in chronological time periods.
6. Define period and clothing terminology.
7. Identify themes in the study of clothing history.

CTFM 371. Textile Science
3 Credits (1+4P)
The study of fiber characteristics, fabric properties and the manufacturing processes that affect the selection, use, and care of textile goods. Restricted to: CTFM majors.
Prerequisite(s): CTFM 1110.

CTFM 372. Fashion Merchandising
3 Credits (3)
A study of the processes required to bring consumer goods to the marketplace.
Prerequisite(s): CTFM 1110 and CTFM 2130.

CTFM 373. Advanced Apparel Construction II
3 Credits (1+4P)
This course builds on Basics of Apparel Construction and explores the application of advanced sewing technology across a range of fashion products. Restricted to: CTFM majors.
Prerequisite(s): CTFM 2130.

CTFM 375. Fashion Buying
3 Credits (3)
The application of planning, purchasing and controlling inventories using industry data and analytics. Includes merchandising math with an emphasis on product selection and pricing.
Prerequisite(s): ACCT 2110, CTFM 1110, and CTFM 2130.

CTFM 377. Fashion Study Tour
1-3 Credits (1-3)
Study of international/domestic fashion, designers, manufacturers, merchandisers and/or retailers. May be repeated up to 6 credits. Consent of Instructor required.

CTFM 401. Professional Development
1 Credit (1)
Introduction to the field experience including resume writing, interviewing skills, understanding business ethics and etiquette. Also includes a discussion of career paths and advice from industry guest speakers. Restricted to: CTFM majors.
Prerequisite(s): CTFM 372 and CTFM 375.

CTFM 402. Field Experience
1-3 Credits (1-3)
Practical experience in fashion, clothing design, manufacturing, merchandising, or retailing. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: CTFM majors.
Prerequisite(s): CTFM 401.

CTFM 403. Post-Field Experience
1 Credit (1)
A case based approach to analyzing internship experiences. Students will share their experiences and prepare case studies about specific business issues they encountered during CTFM 402. Restricted to: CTFM majors.
Prerequisite(s): CTFM 402.

CTFM 460. Cultural Perspectives in Dress
3 Credits (3)
Explores the social, psychological and cultural aspects of dress and appearance. Consent of Instructor required.

CTFM 473. Flat Pattern for Apparel Design
3 Credits (1+4P)
Applied design principles to flat patterns techniques including bodies, skirts, sleeves, neckline, and bodies-sleeve combinations. Projects will require three-dimensional approaches in apparel design. Restricted to: CTFM majors.
Prerequisite(s): CTFM 2120 and CTFM 373.

CTFM 474. Fashion Promotion
3 Credits (3)
A comprehensive examination of promotion in the merchandising environment of fashion related goods. Restricted to: CTFM majors.
Prerequisite(s): CTFM 372.

CTFM 476. Draping for Apparel Design
3 Credits (1+4P)
Development of garment shapes using draping techniques. Emphasis placed on torso development, contouring principles and desgin development on the form. This course exposes the student to the design process, from initial concept and muslin sample development to final execution of the finished garments. Restricted to: CTFM majors.
Prerequisite(s): CTFM 2120 and CTFM 373.

CTFM 477. Capstone in Fashion Mechandising
3 Credits (3)
Synthesizes previous coursework. Students apply multi-disciplinary principles to the analysis of fashion merchandising case studies and industry related challenges.
Prerequisite(s): CTFM 372, CTFM 375 and CTFM 402.

CTFM 492. Special Problems
1-4 Credits
Individual research study in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and a total of 6 credits toward a degree.

CTFM 571. Textile Science
3 Credits (1+4P)
The study of fiber characteristics, fabric properties and the manufacturing processes that affect the selection, use and care of textile goods. Students will be required to complete additional assignments beyond what is required for CTFM 371.

CTFM 598. Special Research Programs
1-4 Credits
Individual investigations, either analytical or experimental. May be repeated for a maximum of 4 credits per semester and no more than 6 credits toward a degree.

Family and Child Studies Courses

FCST 1130. Interpersonal Skills in Intimate Relationships
3 Credits (3)
Developing social skills within friendships, dating relationships, marriage, parenting, and families.
Learning Outcomes
1. To understand several theories that explain why some people have healthy interpersonal relationships while others do not.
2. To gain insight about one's self.
3. To learn and improve upon selected relationship skills that improve quality of life.
4. To learn skills that improve interpersonal relationships

FCST 2110. Infancy Through Middle Childhood in the Family
3 Credits (3)
This course discusses research and theory relevant to prenatal development and the physical, mental, and socio- emotional development of the child from birth through age 12. This developmental period will be examined across different cultures and in real world contexts. Attitudes, knowledge, and skills needed for working with young children and their families will be introduced. Restricted to Las Cruces campus only.
Learning Outcomes
1. Evaluate how genes and the environment interact to impact human development from prenatal stages through age twelve.
2. Assess the effects of environmental influences on the developing fetus.
3. Discuss the capacities of newborn development through age twelve.
4. Evaluate how individuals and couples change during the transition to parenthood.
5. Analyze the physical, cognitive, and social-emotional development of the child from birth through age twelve.

FCST 2135. Adolescent Development and the Family
3 Credits (3)
Research and theory relevant to the physical, mental, social, and emotional development of the children ages 12 to 18. Attitudes, knowledge, and skills related to working with adolescents in the family system. Observation in a variety of settings may be required.

Learning Outcomes

1. Compare adolescents of today with adolescents of the past.
2. Describe the physical, cognitive, and psychosocial development of the adolescent in the family system and evaluate individual differences in development.
3. Contrast ways in which culture impacts adolescent development.
4. Assess effective parenting strategies with adolescents.
5. Analyze the influence of family, peers, school, and work on adolescent development.

FCST 2140. Adult Development and Aging
3 Credits (3)
Research and theory related to the physical, mental, social, and emotional development of older adults. Attitudes, knowledge, and skills related to working with older adults in the family system, including normative, and nonnormative transitions.

Learning Outcomes

1. Contrast theories of adult development and aging and apply theories to adult behavior.
2. Hypothesize how physical, emotional, cognitive, and psychosocial aspects of adult development change over time.
3. Describe multicultural factors that impact attitudes toward aging and coping with aging family members.
4. Evaluate ways in which special issues (including but limited to Alzheimer's Disease, heart disease, end of life issues) impact aging.
5. Devise a conceptualization of one's own perspective in dealing with aging and aging family members.

FCST 3110V. Introduction to Child Advocacy
3 Credits (3)
Historical review and evolution of child welfare policies, initiatives and factors that influence child welfare service. Child welfare policies and services specific to the state of New Mexico are infused throughout the course. May be repeated up to 3 credits.

Learning Outcomes

1. To understand how to apply a model of critical thinking/analysis to child maltreatment issues using a systems framework.
2. Compare and contrast historical trends in child maltreatment an child advocacy.
3. Analyze individual, family and community risk factors for maltreatment.
4. Explain cultural issues related to assessing and working with diverse families.

FCST 3120V. Family Ethnicities and Subcultures
3 Credits (3)
Comparative study of American family subsystems with respect to selected social, economic, and cultural backgrounds. Interaction of these subsystems in American society. Differentiated assignments for graduate students. May be repeated up to 3 credits.

FCST 3210. Family Resource Management
3 Credits (3)
This course provides an understanding of the decision-making process of families concerning the utilization of financial, personal, environmental, and social resources. In particular, the class will focus on how families develop, exchange, and allocate resources throughout the lifespan with the expectation that the most effective resource management decisions are made from positions of knowledge and understanding. May be repeated up to 3 credits.

FCST 3220. Family Dynamics
3 Credits (3)
The dynamics of family relationships and changes influencing contemporary families. Interaction between the family and other social systems will be examined. Open to nonmajors.

Learning Outcomes

1. Apply theories to families throughout the family life cycle.
2. Appraise family development as an institution in society.
3. Identify the components of intra-familial dynamics.

FCST 3230. Parenting and Child Guidance
3 Credits (3)
Theories, principles, and skills essential for parents and professionals in guiding children within the family system. Problem prevention techniques are stressed. May be repeated up to 3 credits.

FCST 4310. Community Programs in Family Life
3 Credits (3)
The purpose of this course is for students to learn through class lectures, readings, and community based activities, about issues related to the formulation, delivery, and evaluation of family life education programs in the local community and through virtual delivery. Students will also learn about conducting needs assessments in the community, and evaluating programs after their implementation in preparation for jobs in the field of Family Science.

Learning Outcomes

1. Identify conceptual frameworks suitable in the development of family life programs.
2. Demonstrate knowledge and understanding of techniques and strategies useful in the delivery of family life education programs.
3. Conduct needs assessments and critiques of existing family life/parent education programs and methods of delivering information to parents and families.
4. Apply evaluation strategies for analyzing program effectiveness.
5. Demonstrate knowledge of the legal, moral, and ethical dimensions of family life education and certification standards.

FCST 4997. Special Problems
1-4 Credits
Individual research in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and a total of 6 credits. May be repeated up to 6 credits.

FCST 4998. Field Experience: Issues and Ethics
3 Credits (3)
Supervised work experience in community agencies providing services to family systems. Discussion of professional issues and ethical dilemmas. A total of 6 credits must be taken. Restricted to: FCS majors. Students must be in junior standing to enroll. May be repeated up to 6 credits.
Prerequisite: FCST 3220 or equivalent, and an overall GPA of at least 2.5.

Learning Outcomes

1. Complete 150 hours of professional experience.
2. Illustrate the interrelationship of theory, research, and intervention strategies through reflective writing.
3. Evaluate ethical issues in family life education and human services through class discussions and case studies.
4. Employs ethical decisions making using professional guidelines and rubrics.

FCST 5110. Infancy Through Middle Childhood in the Family
3 Credits (3)

Research and theory relevant to prenatal development and the physical, mental, and socio-emotional development of the child from birth to age 5. Attitudes, knowledge, and skills needed for working with young children and their families.

FCST 5120. Family Ethnicities and Subcultures
3 Credits (3)
Comparative study of American family subsystems with respect to selected social, economic and cultural backgrounds. Interaction of these subsystems in American society. Students responsible for all requirements for FCST 449V plus additional work. May be repeated up to 3 credits.

FCST 5135. Adolescent Development and the Family
3 Credits (3)
Advanced study in research and theory relevant to the physical, mental, social, and emotional development of the child, ages 12-18. Attitudes, knowledge, and skills related to working with adolescents in the family system.

Learning Outcomes

1. Compare adolescents of today with adolescents of the past.
2. Contrast ways in which culture impacts adolescent development.
3. Assess effective interventions with adolescents.
4. Analyze the influence of family, peers, school, and work on adolescent development.
5. Assess effective parenting strategies with adolescents.

FCST 5140. Adult Development and Aging
3 Credits (3)
Advanced study in research and theory related to the physical, mental, social, and emotional development of older adults. Attitudes, knowledge, and skills related to working with older adults in the family system, including normative and non-normative role transitions. May be repeated up to 3 credits.

FCST 5210. Family Law and Ethics
3 Credits (3)
Study of selected aspects of federal and state laws and ethical issues as they relate to the family system.

FCST 5220. The Business and Practice of Marriage and Family Therapy
1 Credit (1)
This seminar course will provide students with an overview of the business and practice of Marriage and Family Therapy to the end that they will understand how to develop and maintain a private practice in the field of MFT. Restricted to: FCS (MFT) majors. Graded: S/U Grading (S/U, Audit).

FCST 5230. Parenting and Child Guidance
3 Credits (3)
Theories, principles, and skills essential for parents and professionals in guiding children within the family system. Problem prevention techniques are stressed.

FCST 5310. Family Dysfunction and Diagnosis
3 Credits (3)
A study of the development of abnormal behavior patterns and characteristics to include the major mental and personality disorders and how these can influence and impact family systems. Emphasis is on the symptomology and/or life circumstances and events described in the various diagnostic categories.
Prerequisite(s): Students must be enrolled in a clinical program (i.e MFT, CEP, MSW).

FCST 5320. Theories of Marriage and Family Therapy
3 Credits (3)
A balanced study of major theories, research, applications and principles of marriage and family therapy. This course will examine major therapy models and the theories they are derived from as well as the effectiveness of specific therapy models for specific mental health disorders through research.

FCST 5330. Strategies in Family Therapy
3 Credits (3)
Effective intervention strategies in family therapy practice. Live and taped role plays of interventions for various family problems required. Constructive approaches for working with family systems and third-party payers.

FCST 5340. The Family System
3 Credits (3)
Contemporary family interaction: concepts, composition, resource and environment.

FCST 5410. Sexuality and Family Dynamics
3 Credits (3)
Psychosocial and physiological aspects of human sexuality from a life span and family systems perspective.

FCST 5420. Contemporary Marriage and Family Issues
3 Credits (3)
Investigation of one of the following topics each semester: dual career marriages, nontraditional relationships, aged in marriage.

FCST 5430. Family Crises and Rehabilitation
3 Credits (3)
Examination of the major crises experienced by families. Emphasis on family system functioning rather than individual functioning. Preventative measures, positive coping strategies, and therapeutic intervention approaches examined.

FCST 5990. Supervised Clinical Practice
1-9 Credits (2-18P)
Supervised clinical experience in Marriage and Family Therapy. Includes reviews of audio, video, and/or live sessions and case presentations. Maximum of 9 credits toward a degree. May be repeated up to 20 credits.

FCST 5991. Special Research Programs
1-4 Credits
Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree.

FCST 5996. Special Topics
1-4 Credits
Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree.

FCST 5998. Supervised Practicum
1-9 Credits
Supervised experience in organizations providing services to families and children. Course subtitled in the Schedule of Classes. May be repeated for a maximum of 9 credits. Graded S/U.
Prerequisite: consent of instructor.

FCST 5999. Master's Thesis
15 Credits
Thesis

Family and Consumer Science Courses

FCSC 2250. Overview of Family and Consumer Sciences Teaching
3 Credits (3)
Overview of planning and teaching skills. Supervised experiences in observing and directing the learning of secondary family and consumer sciences students. Philosophy and history of the profession.

Learning Outcomes

1. Explain the foci of FCS—past, present and future.
2. Begin to develop a professional role in FCS.
3. Formulate a personal philosophy of FCS, and of teaching.
4. Explain the teaching process.
5. Give examples of roles, responsibilities and qualities of effective and ethical teachers.
6. Assess the characteristics, backgrounds, and needs of learner audiences.
7. Explain various learning theories/principles.
8. Illustrate how various input factors influence teaching decisions.
9. Plan a researched based student-centered lesson with a learning activity in a FCS content area. 1
10. Give examples of ways to evaluate learner growth.1
11. Present a FCS content-based lesson effectively to learners using PowerPoint presentation software and a selected teaching method. 1
12. Evaluate one's own teaching and the teaching of others. 1
13. Exhibit increased confidence in one's abilities as a teacher/educator.1
14. Exhibit excitement about assuming the teacher/educator role.

FCSC 2330. Housing and Interior Design
3 Credits (3)
Investigation of types of housing and factors impacting housing decisions for families. Selection, planning, and arrangement of interior components of homes to meet the needs of the family. Restricted to Las Cruces campus only.

Learning Outcomes

1. Differentiate between different architectural designs (i.e., Cape Cod, contemporary, craftsman, ranch, southern colonial, Spanish, Victorian, pueblo, New Mexican territorial, and territorial revival) and be able to identify historical, cultural, demographic, geographical, and environmental influences on style and aesthetics.
2. Analyze the fundamentals of housing for all families and cultures and understand the role housing plays in the ecological model of human ecology.
3. Define elements of design as related to housing and interiors (i.e., color, form, line, space texture).
4. Define principles of design as related to housing and interiors (i.e., balance emphasis, harmony, proportion, unity).
5. Compare and contrast the different periods of interior design from the 20th century to the present.
6. Analyze the influence of historical and cultural factors in the development of current interior trends.
7. Select and arrange interiors that are functional and aesthetically pleasing to designated interior design situations.
8. Identify, describe and make application of textiles as related to various furniture and interior design styles.
9. Design a three-dimensional tiny house or an interior space, using all concepts learned.

FCSC 3110. Management Concepts in Family and Consumer Sciences Teaching
3 Credits (3)
Incorporation and application of management concepts in family and consumer sciences subject matter. Practical experience teaching management and ways to use management skills to plan, implement, and evaluate the teaching-learning transaction. May be repeated up to 3 credits.

FCSC 4110. Teaching in Informal Family and Consumer Sciences Settings
3 Credits (3)
Learning principles and theories with application in informal family and consumer sciences education situations. Includes supervised experience in use of teaching strategies. May be repeated up to 3 credits.
Prerequisite: overall GPA of at least 2.5 or consent of instructor.

FCSC 4120. Career and Technical Education Programs
3 Credits (3)
History and development of career and technical programs. Ancillary functions of family and consumer sciences teachers, including student evaluation and leadership development for students. Experiences in extension programs and teaching. Ethical issues and concerns of educators are introduced. Lifelong leadership development and evaluation tools for educators are explored. May be repeated up to 3 credits.

FCSC 4510. Teaching Methods I for Family and Consumer Sciences
3 Credits (3)
Methods and strategies for teaching Family & Consumer Sciences content in middle and secondary schools. Organization and development of curriculum. May be repeated up to 3 credits.
Prerequisite: FCSC 2250 and FCSC 3110 and an overall GPA of 2.75, admitted to FCSE program; completion of NES Essential Basic Skills Tests I, II, & III; Human Nutrition Education Majors.
Corequisite: FCSC 4120.

Learning Outcomes

1. Methods and strategies for teaching Family Consumer Sciences content in middle and secondary schools.
2. Organization and development of curriculum.

FCSC 4520. Teaching Methods II for Family and Consumer Sciences
3 Credits (3)
Planning, preparation, and strategies for teaching family and consumer sciences in middle and secondary schools. Preparation for employment. Restricted to: FCSE majors and Human Nutrition Education Majors. May be repeated up to 3 credits.
Prerequisite: FCSC 4510; overall GPA of 2.75,admitted to program.

Learning Outcomes

1. Planning, preparation, and strategies for teaching family and consumer sciences in middle and secondary schools.
2. Preparation for employment.

FCSC 4810. Supervised Teaching in Family and Consumer Sciences
12 Credits (12)
Seventy (70) days of full-time supervised teaching in selected middle or secondary schools. May be repeated up to 12 credits. Restricted to: FCSE majors.
Prerequisite: FCSC 4510, an overall GPA of 2.75, and admitted to FCSE Program.
Corequisite: FCSC 4520.

FCSC 4815. Research Methods in Family and Consumer Sciences
3 Credits (3)
Introduction to research design and methodology in Family and Consumer Sciences. Overview of common research designs and data collection strategies. Prepares students to critique published research and perform basic skills including hypotheses development and conducting a literature search. May be repeated up to 3 credits.

FCSC 4997. Special Problems
1-4 Credits

Individual research study in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and 6 credits toward degree.

FCSC 5815. Research Methods
3 Credits (3)
This course covers the critical evaluation of research literature, development of research proposals and principles of program evaluation. Students will be introduced to the application of qualitative or quantitative methods. Students will be expected to develop research questions and test hypotheses using statistical analysis and a variety of methodologies.

FCSC 5991. Special Research Programs
1-4 Credits
Individual investigations, either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree. May be repeated up to 4 credits.

FCSC 5996. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. May be repeated for a maximum of 9 credits toward a degree, 4 credits per semester.

FCSC 5999. Master's Thesis
1-15 Credits
May be repeated up to 88 credits.

Food Science and Technology Courses

FSTE 1120. ACES in the Hole Foods I
4 Credits (4)
Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products Restricted to Las Cruces campus only. Students enrolled in this class must possess A Food Handler Card
Learning Outcomes
1. Apply basic scientific principles, procedures, techniques and standards in the production of food products.
2. Apply principles of sanitation and safety to the production of food products.
3. Assist in the development and evaluation of new and/or existing food products made for human consumption.
4. Prepare a resume and portfolio

FSTE 2110G. Food Science I
4 Credits (3+2P)
The scientific study of the principles involved in the preparation and evaluation of foods. May be repeated up to 4 credits.
Learning Outcomes
1. Explain basic scientific principles involved in the preparation of high quality food products.
2. Utilize scientific inquiry in the experimental investigation of factors influencing the chemical, physical and sensory properties of food products.
3. Apply basic scientific principles, procedures, techniques and standards in the preparation of all types of high quality food products.
4. Use basic methods of quantitative analysis to critically evaluate quality characteristics of food.
5. Use sensory science techniques and terminology to critically evaluate acceptability and quality characteristics of food.
6. Describe high quality characteristics of a variety of food products using appropriate terminology.
7. Apply principles of sanitation and safety to food preparation.

FSTE 2120. ACES in the Hole Foods II
4 Credits (8P)
Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products. Student must also have a Food Handler Card to enroll in this course.
Prerequisite(s): FSTE 1120.
Learning Outcomes
1. Apply basic scientific principles, procedures, techniques and standards in the production of food products.
2. Apply principles of sanitation and safety to the production of food products.
3. Assist in the development and evaluation of new and/or existing food products made for human consumption.
4. Prepare a resume and portfolio

FSTE 2130G. Survey of Food and Agricultural Issues
3 Credits (3)
Survey of food and agricultural issues, including: geography of food production and consumption; human-agricultural-natural resource relations; agriculture in the United States and abroad; modern agribusiness; food safety; food, agriculture, and natural resources policy; ethical questions; role and impact of technology. Crosslisted with AEEC 2130G.
Learning Outcomes
1. Understand of global agriculture including production techniques used in various geographical regions, consumption trends, and political and social constraints.
2. Synthesis information about agricultural issues and make informed arguments
3. Articulately discuss modern issues in agriculture
4. Write coherent arguments relative to personal beliefs regarding agricultural issues

FSTE 2996. Special Topics
1-4 Credits
Specific topics and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.
Learning Outcomes
1. Varies

FSTE 3110. Professional Development in Food Science
1 Credit (1)
Covers essential elements of career management including preparation for a successful internship. Students must have a Food Handler Card. Restricted to: FSTE majors. Graded S/U.
Prerequisite: FSTE 2120.
Learning Outcomes
1. Describe their Jung Type.
2. Articulate their personal mission.
3. Identify their personal strengths and weaknesses.
4. Establish short and long term career goals.
5. Prepare an effective cover letter.
6. Develop a professional resume.
7. Understand the dos and dont's of interviewing.

8. Properly dress for interviewing.
9. Understand the factors to consider when deciding what job offer to accept. 1
10. Understand the objectives and requirements of the Food Science internship program.

FSTE 4110. Food Microbiology
4 Credits (3+2P)
Detrimental and beneficial microbiological aspects of food products. Methods of quantification and identification of microorganisms associated with food spoilage and preservation. May be repeated up to 4 credits. Prerequisite(s): (BIOL 2610G and BIOL 2610L), or (BIOL 2110G and BIOL 2110L)

FSTE 4120. Food Chemistry
3 Credits (3)
Comprehensive study of the chemical and physiochemical properties of food constituents. Chemical changes involved in the production, processing, and storage of food products and basic techniques used to evaluate chemical and physiochemical properties of foods.
Prerequisites: CHEM 1215G, CHEM 1225G, and CHEM 2115, or consent of instructor.

FSTE 4130. Food Preservation
3 Credits (2+2P)
Processes used in home and commercial food preservation, including canning, freezing, drying, and irradiation. May be repeated up to 3 credits.
Prerequisite(s): FSTE 2110G.

FSTE 4140. Food Analysis
3 Credits (2+2P)
Basic chemical and physical techniques used in establishing nutritional properties and overall acceptance of food products. May be repeated up to 3 credits.
Prerequisite(s): CHEM 1215G or consent of instructor.

FSTE 4150. Food Safety
3 Credits (3)
Provide students' knowledge on good manufacturing practices and prequisite programs, conduct hazard analysis and determine preventive controls, define process, food allergen, sanitation and supply-chain preventive controls and discuss verification validation, recall and recordkeeping requirements with training and educational opportunities related to current best practices and guidane, and future regulatory requirements by establishing the Produce Safety Alliance. Students participate in a Mock Audit. Participants will receive an official FSPCA Preventive Controls Qualified Individual certificate issues by AFDO after attending this training program.
Prerequisite(s): FSTE 4110 or BIOL 311, or consent of instructor.

FSTE 4210. Cereal Technology
3 Credits (2+2P)
This course provides students with an understanding of chemistry and technology of the cereal grains. The course is structured as a combination of theory, demonstrations, and practical laboratory exercises on the fundamentals of cereal processing. Students will learn about post-harvest processing and utilization of major cereal grains for food and feed, current industrial processes and practices, and the theoretical basis for these operations.
Learning Outcomes
1. Understand principles of cereal chemistry and processing.
2. Understand how cereal grains are produced, stored, marketed, and converted into food products.
3. Describe unit operations and procedures involved in the manufacture of cereal-based food and animal feed products.

FSTE 4220. Dairy Technology
3 Credits (2+2P)
This course provides general knowledge on dairy technology as well as on various processing technologies regarding the science behind a variety of dairy products. It is designed to give a thorough understanding of the composition and properties of milk, and of the physical and chemical changes occurring in milk during processing and storage. These products include fluid milk, fermented dairy products, concentrated and dried dairy products, butter, cream and various frozen dairy desserts. Principles and practices in assembling, receiving, processing, and packaging milk and dairy products, including beverage, frozen, cream, butter, concentrated and fractionated milks, dried milks, casein, and lactose.
Prerequisite: FSTE 2110G.
Learning Outcomes
1. To gain an understanding of dairy processing technologies, unit operation and production of dairy products and ingredients.
2. To understand the principles of processing of dairy products by integrating the concepts of chemistry, biochemistry, microbiology, nutrition, sensory properties, and engineering relevant to dairy processing operations.
3. To gain an ability to think critically on practical problems that occur in the dairy industry and to appreciate the many challenges in dairy research technology and dairy product development.
4. To engage in group discussion on current issues pertinent to culture dairy industry.

FSTE 4230. Food Processing Technologies
4 Credits (3+2P)
Common food processing unit operations such as raw material preparation, separation, concentration, fermentation, pasteurization, sterilization, extrusion, dehydration, baking, frying, chilling, freezing, controlled atmosphere storage, water, waste and energy management, packaging, materials handling and storage and process control. Application of principles to processing food in a laboratory setting.

FSTE 4240. Processed Meats
3 Credits (2+2P)
This course provides students with an understanding of physical, chemical and functional characteristics of meat raw materials. Modern meat processing industry and its use of science and technology. The fabrication, processing, preservation, sanitation, food safety, ethnic evolvement, and utilization of manufactured and processed meat. Regulatory compliance and quality assurance in commercial processed meat operations.
Learning Outcomes
1. The theory and chemistry of meat processing.
2. Processing techniques and basic formulations of different categories of processed meats.
3. The effect of type and composition of raw materials and added ingredients on processed meat quality and safety.
4. To evaluate products for consumer and analytical quality and composition.
5. To evaluate and assess defective products and propose processing/ingredient solutions.

FSTE 4250. Sensory Evaluation of Foods and Product Development
3 Credits (2+2P)

Application of affective sensory tests, chemical, physical, and experimental methods to the development and evaluation of a food product. Sensory test methods and procedures used to evaluate the flavor, color and texture of foods. Relationships between sensory and instrumental measurements quality parameters. The course will present the parametric and non-parametric tests that are used in sensory evaluation. May be repeated up to 3 credits.
Prerequisite: FSTE 2110G and (A ST 311 or MATH 1350G).
Learning Outcomes
1. Describe the chemical senses and the receptors that mediate the basic taste modalities.
2. Match sensory tests to research questions and to use the suitable statistical tests.
3. Design and develop a food product and conduct a basic research project.
4. Communicate research results using written, oral, and visual communication techniques.

FSTE 4996. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits towards a degree. Consent of instructor required.

FSTE 4997. Special Problems
1-4 Credits
Individual research study in a selected subject of Family and Consumer Sciences. Maximum of 4 credits per semester and a grand total of 8 credits towards a degree. Consent of instructor required.

FSTE 4998. ACES Foods at NMSU-Experiential Learning
1 Credit (2-8P)
Professional work experience for FSTE majors only.
Prerequisite: FSTE 3110.
Learning Outcomes
1. Students will collect a minimum of four hundred hours.

FSTE 5110. Food Microbiology
3 Credits (2+3P)
Detrimental and beneficial microbiological aspects of food products. Methods of quantification and identification of microorganisms associated with food spoilage and preservation. Additional work required at the graduate level.
Learning Outcomes
1. Understand the principles behind growth of microorganisms in foods.
2. Identify factors associated with growth, prevalence, and survival of microorganisms.
3. Use proper microbiological techniques for detection, isolation, and enumeration of microbial contaminants.
4. Understand the principles of food preservation.

FSTE 5120. Food Chemistry
3 Credits (3)
Comprehensive study of the chemical and physiochemical properties of food constituents. Chemical changes involved in the production, processing and storage of food products and basic techniques used to evaluate chemical and physiochemical properties of foods. Additional work required at the graduate level.
Learning Outcomes
1. Describe the major components, including water, carbohydrates, lipids, and proteins, of foods (edible plant products, milk, and eggs) in chemical and biochemical terms.
2. Relate the chemical nature of foods to the techniques used in and the changes occurring processing of foods.
3. Describe the chemical and biochemical basis of food quality problems.
4. Select ingredients and processes necessary to the composition of specific foods.
5. Select and apply techniques appropriate for producing specific food characteristics.
6. Evaluate food products to determine their quality and safety.
7. Apply chemical and biochemical principles in the design and creation of various food products.

FSTE 5130. Food Preservation
3 Credits (3)
Processes used in home and commercial food preservation, including canning, freezing, drying, and irradiation. Same as FSTE 4130 with additional work required at the graduate level.

FSTE 5140. Food Analysis
3 Credits (2+3P)
Covers basic chemical and physical techniques used in establishing nutritional properties and overall acceptance of food products. Additional work required at the graduate level.
Learning Outcomes
1. Explain the principles behind the analytical techniques used in the chemical and physical analyses of food.
2. Understand food constituents and functional properties important in quality control and research laboratories.
3. Acquire laboratory skills required for performing a range of chemical analyses of food.
4. Acquire writing skills related to food composition and analyses.

FSTE 5210. Cereal Technology
3 Credits (2+2P)
This course provides students with an understanding of chemistry and technology of the cereal grains. The course is structured as a combination of theory, demonstrations, and practical laboratory exercises on the fundamentals of cereal processing. Students will learn about post-harvest processing and utilization of major cereal grains for food and feed, current industrial processes and practices, and the theoretical basis for these operations.
Learning Outcomes
1. Understand principles of cereal chemistry and processing.
2. Understand how cereal grains are produced, stored, marketed, and converted into food products.
3. Describe unit operations and procedures involved in the manufacture of cereal-based food and animal feed products.

FSTE 5241. Processed Meats
3 Credits (2+2P)
This course provides students with an understanding of physical, chemical and functional characteristics of meat raw materials. Modern meat processing industry and its use of science and technology. The fabrication, processing, preservation, sanitation, food safety, ethnic involvement, and utilization of manufactured and processed meat. Regulatory compliance and quality assurance in commercial processed meat operations.
Learning Outcomes
1. Upon successful completion of this course, the student will learn the theory and chemistry of meat processing.

2. Upon successful completion of this course, the student will learn processing techniques and basic formulations of different categories of processed meats.
3. Upon successful completion of this course, the student will learn the effect of type and composition of raw materials and added ingredients on processed meat quality and safety.
4. Upon successful completion of this course, the student will learn to evaluate products for consumer and analytical quality and composition.

FSTE 5230. Food Processing Technologies
4 Credits (3+2P)
Common food processing unit operations such as raw material preparation, separation, concentration, fermentation, pasteurization, sterilization, extrusion, dehydration, baking, frying, chilling, freezing, controlled atmosphere storage, water, waste and energy management, packaging, materials handling and storage and process control. Application of principles to processing food in a laboratory setting. Additional work beyond that for FSTE 4230 required at the graduate level.
Learning Outcomes
1. Manage safety considerations and engineering controls for food processing operations.
2. Describe the effects of heat, cold, and pressure on microorganisms, particularly spoilage microorganisms.
3. Describe the effects of heat, cold, and pressure on foods, specifically on texture, flavor, and nutrition.
4. Choose heat, cold, and/or pressure treatment for foods based on desired characteristics of the product.
5. Evaluate and/or troubleshoot finished food products using sensory evaluation terminology and tools.
6. Create, and subsequently modify, a multi-step food processing regimen based desired outcomes, such as preservation, stylistic guidelines, production costs, and shelf-life.
7. Size and cost food processing operations, processes, ingredients, and utilities.
8. Create a food processing business plan for a food production facility, incorporating regulatory considerations.

FSTE 5250. Sensory Evaluation of Foods
3 Credits (2+3P)
Principles and procedures involved in the sensory evaluation of foods. Physiological, psychological and environmental factors affecting the evaluation of sensory properties. Analysis and interpretation of sensory data.
Learning Outcomes
1. Describe the chemical senses and the receptors that mediate the basic taste modalities.
2. Understand the capabilities and limitations of sensory tests.
3. Develop a food-based product.
4. Match sensory tests to research questions and use suitable statistical tests.
5. Design and conduct a basic research project.
6. Communicate research results using written, oral, and visual communication techniques.

FSTE 5310. Designing and Brewing Great Beers of the World
3 Credits (2+2P)
The science and technology of brewing unit operations and the ingredients used in beer brewing. That knowledge is then applied to designing and brewing classic world beer styles. Styles investigated change every semester but typically include India Pale Ale, Pale Ale, Stout, Porter, Hefeweisen, Scottish Ale, and Black IPA. Comprehensive evaluation of the product relative to style guidelines completes the design-brew-evaluate cycle. Students must be at least 21 years of age on the first day of class.

FSTE 5997. Special Research Programs
1-4 Credits
Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits towards a degree. Consent of instructor required.

FSTE 6910. Doctoral Seminar
1 Credit (1)
Current topics and research in Food Science and Human Nutrition. Course will include experts from the field as guest speakers. Students will have the opportunity to present their doctoral proposals and/or research findings.

FSTE 6991. Doctoral Research
1-6 Credits (1-6)
Research May be repeated up to 6 credits. Consent of Instructor required.

FSTE 6997. Special Research Program
1-6 Credits (1-6)
Special research for doctoral students May be repeated up to 6 credits. Consent of Instructor required.
Prerequisite(s): Consent of instructor.

FSTE 6998. Cooperative Extension Service Field Experience
1-3 Credits (1-3)
This course will provide students with knowledge and experience in community outreach through the cooperative extension service. This course is required for students pursuing a Ph.D. in FSHN. Students will work collaboratively with extension faculty on applied projects. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: FSHN majors.

FSTE 7000. Doctoral Dissertation
1-12 Credits (1-12)
Dissertation May be repeated up to 18 credits. Consent of Instructor required.
Prerequisite(s): Passed the qualifying exam and comprehensive exam.

Nutrition Courses

NUTR 1120. Dietary Guidelines
4 Credits (4)
A presentation and explanation in detail of the Dietary Guidelines for Americans developed by the U.S. Department of Agriculture (U.S.D.A.) and the U.S. Department of Health and Human Services.
Learning Outcomes
1. Recall, interpret and explain each of the Dietary Guidelines and U.S.D.A. nutrition education tools.
2. Translate the Dietary Guidelines into a diet and exercise program.
3. List and describe methods to select and prepare food which are consistent with the Dietary Guidelines for Americans.
4. Identify risk factors related to disease prevention.

NUTR 2110. Human Nutrition
3 Credits (3)
This course provides an overview of nutrients, including requirements, digestion, absorption, transport, function in the body and food sources. Dietary guidelines intended to promote long-term health are stressed.

Learning Outcomes

1. Evaluate sources of nutrition information for reliability
2. Identify elements of a nutritious diet
3. Describe the digestion, transport, and absorption of nutrients
4. Describe the importance of nutrition in weight control and health
5. Identify nutritional needs as they relate to the life cycle and performance
6. Describe behavior modification techniques that promote good health
7. Evaluate popular nutrition trends for scientific accuracy and effectiveness
8. Develop skills in the planning and assessing of healthy meal plans
9. Describe the role of food choices in the development of chronic disease 1
10. Describe the role of food in the promotion of a healthful lifestyle

NUTR 2120. Seminar I - Becoming a Nutrition Professional
1 Credit (1)
This course will introduce students to the field experience, careers, and professions in nutrition. This course is required for students pursuing a Didactic Program in Dietetics verification statement.
Learning Outcomes

1. Describe career options within the fields of Nutrition Dietetics.
2. Outline the HNDS field experience process.
3. Explain the educational pathways in HNDS.
4. List requirements for admission into the HNDS Dietetics pathway.
5. Begin an HNDS student portfolio.
6. Discuss the importance of personal responsibility accountability.

NUTR 3110. Nutrition Throughout the Lifecycle
3 Credits (3)
Relationship of the stages of the human life cycle to changes in nutrient need. Consent of Instructor required.
Prerequisite(s): NUTR 2110, BIOL 354 and BIOL 354L OR SPMD 2210 and SPMD 2210L.
Learning Outcomes

1. Understand the value of collaborative work in nutrition care of individuals.
2. Compare and contrast the physiological, behavioral, and psychosocial factors associated with each life stage that affect nutritional status.
3. For each life cycle stage, create a nutritionally adequate menu that meets key nutrient needs.
4. Culturally appropriate evidence-based interventions to address common nutrition-related conditions experienced in each lifecycle stage.
5. Utilize the Nutrition Care Process to complete a nutrition assessment.

NUTR 3710. Food Systems & Policy in Dietetics
3 Credits (3)
This course introduces students to food and nutrition policy issues, institutions, and stakeholders and their impacts on public health, sustainability, and the practice of dietetics in the US. The course will examine policy development and the roles of federal agencies, private firms, non-governmental organizations, and the media in food and nutrition policy. It will also examine international perspectives on food and nutrition policies and programs used to support global nutrition, health promotion, and wellness.
Prerequisite(s): Junior standing, NUTR 2120 (for HNDS majors), ENGL 2130G (or ENGL 2210G, 2215G, or 2221G).

Learning Outcomes

1. Discuss the economic, political, social, and cultural factors that influence US food and nutrition policies and impact national food systems and population health.
2. Identify the psychological, social, cultural, and environmental factors that influence food choices, eating behaviors, and nutrition-related practices.
3. Describe the processes and major players involved in US food and nutrition policy development, implementation, monitoring/evaluation, and regulation.
4. Recognize the influence of food and nutrition policy on the practice of dietetics.

NUTR 3750. Applied Nutrition Research
3 Credits (3)
This course will introduce students to various types of nutrition research and equip them to locate and critique nutrition and dietetics research articles. Research analysis skills will then be applied to a review of the current literature on a nutrition topic and applied to dietetics practice.
Prerequisite: MATH 1350G (OR A ST 311); NUTR 3110.
Learning Outcomes

1. Recall the various research methods, study designs, and statistical analyses used in nutrition research.
2. Compare and contrast research methods and analyses in nutrition research.
3. Analyze nutrition research for appropriateness of the methods and analyses.
4. Evaluate nutrition research to form sound, ethical conclusions and practice recommendations.

NUTR 3996. Special Topics
1-4 Credits (1-4)
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required.
Prerequisite(s): Junior or Senior standing, consent of instructor.
Learning Outcomes

1. Develop foundational knowledge in a specialized area of dietetics practice.

NUTR 4110. Advanced Nutrition
3 Credits (3)
Application of biochemistry and physiology to nutrition.
Prerequisite(s): SPMD 1120 or NURS 150; CHEM 2120; NUTR 3110.
Learning Outcomes

1. Describe the processes of digestion and absorption within the human body.
2. Compare and contrast the structure and function of key nutrients.
3. Describe the metabolism of key nutrients under various conditions.
4. Apply concepts of energy and nutrient metabolism to common medical conditions and other relevant situations such as exercising or fasting.

NUTR 4205. Nutrition Communication and Education
3 Credits (3)
In this course, HNDS students learn about the foundation, design, and delivery of nutrition communication and nutrition education. Students will learn ways to develop audience-focused communication and learning assessment. This course will cover the communication methods used in all facets of the nutrition and dietetics field including oral presentations, writing, video, food photography, and food demonstrations. Students will

utilize a large variety of channels to communicate and educate different target audiences.
Prerequisite: NUTR 3750 and NUTR 4210.
Learning Outcomes
1. Identify a minimum of four reliable sources of nutrition information.
2. Interpret and clearly communicate evidence-based nutrition information.
3. Evaluate the application of behavior change theories and models to nutrition communications.
4. Adapt nutrition communication and education to target specific cultural and age groups.
5. Develop a nutrition education lesson plan with SMART learning objectives, learning activities, and learning assessments.

NUTR 4207. Nutrition Services
3 Credits (3)
In this course, HNDS Dietetic students will learn about the promotion and payment of nutrition services along with aspects related to reimbursement and partnering with allied professionals. The HNDS Dietetics students will also engage in clinical and community nutrition field experiences. This course will provide HNDS Dietetic students with the opportunity to assess their knowledge of professional competencies within the field of dietetics. Restricted to students with senior standing within the Dietetics Option of the HNDS major. Must be in final spring semester.
Prerequisite(s): NUTR 4210 and NUTR 4230 and 4230L.
Corequisite(s): NUTR 4240 and 4240L.
Learning Outcomes
1. Compare best practice guidelines to actual practice in the provision of nutrition services within community settings.
2. Explain at least two processes in delivering quality food and nutrition services.
3. Identify private and public healthcare funding sources.
4. Explain Medicare, Medicaid, and private payer coverage for medical nutrition therapy.
5. Discuss referrals, primary care partnership and promoting nutrition services.
6. Describe best practices, resources and guidelines related to the reimbursement for nutrition services.
7. Compare best practice guidelines to actual practice in the provision of nutrition services within clinical nutrition settings.
8. Evaluate the content of the Commission on Dietetic Registration RDN credentialing exam.

NUTR 4210. Community Nutrition
3 Credits (3)
Overview of the practice of community nutrition. Includes program planning, needs assessment, program implementation and program evaluation. Role of public and private agencies in nutrition programs that impact on nutrition of individuals and groups in the community. Same as NUTR 5210.
Prerequisite: NUTR 3710 and NUTR 3750.
Learning Outcomes
1. Summarize the components of current national and local community nutrition programs.
2. Explain how national or state level policy influences a community nutrition issue.
3. Write a needs assessment for a community nutrition issue using reliable sources of community nutrition information and data and relevant research.
4. Develop goals and objectives of a nutrition program that address a community nutrition issue.
5. Develop a culturally appropriate nutrition education lesson plan that addresses a specific nutrition program objective.

NUTR 4220. Food Service Organization and Management
3 Credits (3)
Personnel, financial and general management in institutional and commercial food service operations.
Prerequisite: HRTM 3310 or 363.
Learning Outcomes
1. Evaluate food products and menu plans through the application of food service management theories and principles.
2. Describe the process of and ethical considerations surrounding purchasing, receiving, storing and controlling inventory of a given food item.
3. Evaluate food system, food safety practices, and scenarios.
4. Evaluate a nutrition and foodservice budget and interpret financial data.

NUTR 4230. Medical Nutrition Therapy I
3 Credits (3)
Special diets and physiological basis for their use. Laws and regulations concerning the practice of dietetics.
Prerequisite(s): NUTR 4110, BCHE 341.Corequisite(s): NUTR 4230, NUTR 4233.
Learning Outcomes
1. Examine the role of medical nutritional therapy in disease processes.
2. Apply nutritional assessment techniques utilizing the Nutrition Care Process.
3. Compose nutrition care plans and utilize various styles of medical charting.
4. Describe the interdisciplinary nature of working with a health care team in the delivery of medical nutritional therapy.

NUTR 4230L. Medical Nutrition Therapy I Lab
1 Credit (1P)
Supplements NUTR 4230. Students will perform nutrition assessments, nutrition focused physical exams, apply medical nutrition therapy-based interventions and practice patient discharge education for specific disease states. Elements of pathology and biochemistry of nutrition-related conditions are integrated into course topics. Restricted to: HNDS majors.
Corequisite: NUTR 4230.
Learning Outcomes
1. Examine the role of medical nutrition therapy in disease processes.
2. Conduct nutrition assessments.
3. Apply the Nutrition Care Process Model.
4. Apply medical terminology to nutrition interventions.
5. Apply therapeutic approaches to treating medical conditions and their associated symptoms via the use of specifically tailored diets.

NUTR 4233. Nutrition Counseling
3 Credits (3)
This course is designed to meet the needs of individuals entering the healthcare/dietetics field who have little counseling experience, but have a strong foundational knowledge in the field of dietetics. It includes counseling techniques and strategies, behavior change, interviewing, cultural competence, mass media, and nutrition education.
Prerequisite: NUTR 3750,NUTR 4110.

Learning Outcomes

1. Evaluate nutrition counseling strategies tools in promoting behavior change and self-management.
2. Apply behavior change theories and models to nutrition counseling sessions.
3. Develop nutrition care plans for nutrition counseling clients.
4. Analyze professionalism and ethics within nutrition counseling and education.

NUTR 4235. Entering the Field of Dietetics
1 Credit (1)
Students will develop professional materials that will be used in their future careers including a personal statement, resume, and interview dialogues. Students will become familiar with career options in the field of dietetics and learn to navigate the processes of becoming a registered dietitian or dietetic technician, registered. Restricted to: HNDS majors. Students must be a Senior to enroll. Final fall semester of dietetics program.
Learning Outcomes

1. Develop professional materials to use when applying to dietetic careers, including a personal statement, resume, and interview dialogue.
2. Become familiar with with career options in the field of dietetics by reviewing current job postings.
3. Navigate the process of becoming a registered dietitian or dietetic technician, registered.
4. Prepare a dietetic internship application using DICAS and DD Digital Matching Service.
5. Create both primary and alternative career plans within the field of dietetics.
6. Learn how to apply professional resources to aid in career development and continuing education.

NUTR 4240. Medical Nutrition Therapy II
3 Credits (3)
Continuation of NUTR 4230.
Prerequisite: NUTR 4230 and 4230L.
Corequisite: NUTR 4240L.
Learning Outcomes

1. Select appropriate medical nutrition therapy interventions for various disease processes.
2. Master nutrition assessment of patients/clients utilizing the Nutrition Care Process Model.
3. Interpret medical terminology in patient chart notes and medical history records.
4. Evaluate laws regulations concerning dietetics.

NUTR 4240L. Medical Nutrition Therapy II Laboratory
1 Credit (1P)
Supplements NUTR 4240. Students will apply medical nutrition therapy to specific disease states with special emphasis on writing nutrition support orders and learning to utilize nutrition support equipment. Students will learn and apply advanced nutritional therapies and patient management strategies. Restricted to: HNDS majors.
Prerequisite(s): NUTR 4230.
Corequisite(s): NUTR 4240.
Learning Outcomes

1. Calculate nutrition support recommendations and document orders in the patient's medical chart.
2. Demonstrate safe use of nutritional support equipment.
3. Master use of the Nutrition Care Process in case-based and simulated patient scenarios to conduct nutrition assessments and implement evidence-based interventions.
4. Critically evaluate lab values and client anthropometric data.
5. Select therapeutic diets for the treatment of medical conditions and their symptoms.

NUTR 4565. Field Experience Community Nutrition
1-8 Credits (1-8)
Experience working with nutritional problems of individual families of all socioeconomic and age levels and with agencies concerned with community nutrition. Practical experience with supervision by resident faculty as well as supervisor at the work site. Performance at work site graded in accordance with university standards. May be repeated up to 8 credits. Consent of Instructor required.
Prerequisite(s): Senior standing, NUTR 4210, consent of instructor.
Learning Outcomes

1. Apply dietetics knowledge to practice in various community settings.
2. Develop a field experience portfolio highlighting the development of community nutrition knowledge and skills.
3. Compare and contrast the responsibilities of Registered Dietitians in various community practice organizations.

NUTR 4991. Special Problems
1-4 Credits (1-4)
Individual research study in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and a total of 8 credits. May be repeated up to 8 credits. Consent of Instructor required.
Prerequisite(s): Junior or Senior standing.
Learning Outcomes

1. Develop specialized knowledge and competencies in a selected nutrition and dietetics subject area.

NUTR 5110. Graduate Studies in Advanced Nutrition
3 Credits (3)
Covers biochemistry and physiology applied to nutrition. Students enrolled in the 5000-level class will be required to complete additional assignments beyond what is required for NUTR 4110. Crosslisted with: NUTR 4110.
Prerequisite(s)/Corequisite(s): NUTR 3110. Student must be classified as a Graduate student to enroll in this course, BIOL 2221, BCHE 341, and NUTR 2110, or consent of instructor.
Learning Outcomes

1. Describe the processes of digestion and absorption within the human body.
2. Compare and contrast the structure and function of key nutrients.
3. Describe the metabolism of key nutrients under various conditions.
4. Apply concepts of energy and nutrient metabolism to common medical conditions and other relevant situations such as exercise or fasting.

NUTR 5150. Orientation to Dietetic Internship
3 Credits (3)
Dietetic interns prepare for supervised practice rotations. Topics include professionalism, Code of Ethics, and dietetic internship portfolios. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.
Learning Outcomes

1. Assembly of dietetic intern portfolio that will be kept throughout dietetic internship.

2. Readiness to begin supervised practice rotations.
3. Understanding of steps and processes to successfully complete requirements of dietetic internship and Masters of Science in Family Consumer Sciences.
4. Upon completion of the course, students will be able to understand the importance of evidence-based information, research ethics, the Code of Ethics of the Profession of Dietetics, and the basic structure of an IRB proposal.

NUTR 5210. Graduate Study in Community Nutrition
3 Credits (3)
Overview on the practice of community nutrition to include program planning, needs assessment, program implementation and program evaluation. Role of public and private agencies in nutrition programs that impact on nutrition of individuals and groups in the community. Students enrolled in the 5000-level class will be required to complete additional assignments beyond what is required for NUTR 4110. May be repeated up to 3 credits. Crosslisted with: NUTR 4210.
Prerequisite(s): Graduate student, NUTR 3110, NUTR 3710, NUTR 3750, or consent of the instructor.
Learning Outcomes
1. Summarize the components of current national and local community nutrition programs.
2. Explain how national or state-level policy influences a community nutrition issue.
3. Write a needs assessment for a community nutrition issue using reliable sources of community nutrition information and data, and relevant research.
4. Develop goals and objectives of a nutrition program that address a community nutrition issue.
5. Develop a culturally appropriate nutrition education lesson plan that addresses a specific nutrition program objective.

NUTR 5220. Graduate Studies in Food Service Organization and Management
3 Credits (3)
Personnel, financial and general management in institutional and commercial food service operations. Students enrolled in the5000-level class will be required to complete additional assignments beyond what is required for NUTR 4220. May be repeated up to 3 credits.
Prerequisite(s): Graduate Students; HRTM 2120, NUTR 3120, or consent of instructor.
Learning Outcomes
1. Evaluate food products and menu plans through the application of food service management theories and principles.
2. Describe the process of and ethical considerations surrounding purchasing, receiving, storing, and controlling inventory of a given food item.
3. Evaluate food system, food safety practices, and management practices of a specific food service establishment.
4. Apply management theories and principles to quality assurance and human resource case scenarios.
5. Evaluate a nutrition and food service budget and interpret financial data.

NUTR 5230. Graduate Studies in Medical Nutrition I
3 Credits (3)
Special diets and physiological basis for their use. Laws and regulations concerning the practice of dietetics. Additional assignments beyond NUTR 4230 required. May be repeated up to 3 credits. Crosslisted with: NUTR 4230.
Prerequisite(s): Graduate student, NUTR 3110, NUTR 4110, BIOL 2225 or BIOL 2221, or consent of instructor.
Learning Outcomes
1. Examine the role of medical nutritional therapy in disease processes.
2. Apply nutritional assessment techniques utilizing the Nutrition Care Process.
3. Compose nutrition care plans and utilize various styles of medical charting.
4. Describe the interdisciplinary nature of working with a health care team in the delivery of medical nutritional therapy.

NUTR 5233. Graduate Studies in Nutrition Counseling & Education
3 Credits (3)
This course is designed to meet the needs of individuals entering the healthcare/dietetics field who have little counseling experience, but have a strong foundational knowledge in the field of dietetics. It includes counseling techniques and strategies, behavior change, interviewing, cultural competence, mass media, and nutrition education. Additional assignments beyond NUTR 4233 required. May be repeated up to 3 credits. Crosslisted with: HNDS 4233.
Prerequisite(s)/Corequisite(s): NUTR 5230. Students must be classified as a Graduate student to enroll in this course, NUTR 2110, NUTR 3110, FCSC 348.
Learning Outcomes
1. Evaluate nutrition counseling strategies and tools in promoting behavior change and self-management.
2. Apply behavior change theories and models to nutrition counseling sessions.
3. Develop nutrition care plans for nutrition counseling clients.
4. Analyze professionalism and ethics within nutrition counseling and education.
5. Develop and present a nutrition education lesson based on current nutrition research.

NUTR 5240. Graduate Studies in Medical Nutrition Therapy II
3 Credits (3)
Continuation of HNDS 546. May be repeated up to 3 credits. Crosslisted with: NUTR 4240.
Prerequisite(s): Graduate student, NUTR 5230 and NUTR 4230L or consent of instructor.
Learning Outcomes
1. Select appropriate medical nutrition therapy interventions for various disease processes.
2. Master nutrition assessment of patients/clients utilizing the Nutrition Care Process model.
3. Interpret medical terminology in patient chart notes and medical history records.
4. Evaluate laws regulations concerning dietetics.

NUTR 5610. Dietetic Intern Seminar
1 Credit (1)
Portfolio development for dietetic interns during supervised practice rotations. May be repeated up to 3 credits. Consent of Instructor required.
Prerequisite(s): Acceptance into Dietetic Internship.
Learning Outcomes
1. CRDN
2. 2: Apply evidence-based guidelines, systematic reviews and scientific literature.

3. CRDN
4. 3: Justify programs, products, services and care using appropriate evidence or data.
5. CRDN
6. 4: Evaluate emerging research for application in nutrition and dietetics practice.
7. CRDN
8. 6: Incorporate critical-thinking skills in overall practice.
9. CRDN
10. 1: Practice in compliance with current federal regulations and state statutes and rules, as applicable and in accordance with accreditation standards and the Scope of Nutrition and Dietetics Practice and Code of Ethics for the Profession of Nutrition and Dietetics.
11. CRDN
12. 2: Demonstrate professional writing skills in preparing professional communications.

NUTR 5620. Dietetic Internship: Supervised Practice in Community Nutrition
1-8 Credits (2-6P)
Provides dietetic interns with a minimum of 500 clock hours of supervised practice in community nutrition to include an emphasis in Cooperative Extension Service. Dietetic interns work under the the guidance of faculty and community nutrition professionals. May be repeated up to 8 credits. Consent of Instructor required. Restricted to: HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.
Learning Outcomes
1. CRDN
2. 1 Select indicators of program quality and/or customer service and measure achievement of objectives.
3. CRDN
4. 2 Apply evidence-based guidelines, systematic reviews and scientific literature.
5. CRDN
6. 4 Evaluate emerging research for application in nutrition and dietetics practice.
7. CRDN
8. 5 Conduct projects using appropriate research methods, ethical procedures and data analysis.
9. CRDN
10. 14 Demonstrate advocacy on local, state or national legislative and regulatory issues or policies impacting the nutrition and dietetics profession.
11. CRDN
12. 1 Perform the Nutrition Care Process and use standardized nutrition language for individuals, groups and populations of differing ages and health status, in a variety of settings.
13. CRDN
14. 5 Develop nutrition education materials that are culturally and age appropriate and designed for the literacy level of the audience.
15. CES
16. Consult with organizations regarding food access for target populations.
17. CES
18. Evaluate the operation of Cooperative Extension Service nutrition programs in the areas of policies and procedures. 1
19. CES
20. Develop and deliver nutrition presentations to client/consumer audiences on various topics related to client/consumer needs. 1
21. CES
22. Ensure cultural relevancy and appropriateness of nutrition education. 1
23. CES
24. Assess educational needs and provide nutrition counseling based on individual needs, knowledge, medical needs, and socioeconomic status.

NUTR 5630. Community Nutrition for Dietetic Interns
3 Credits (3)
Advanced topics in community nutrition to include conducting community nutrition needs assessments, program planning and grant writing. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.
Learning Outcomes
1. CRDN
2. 1 Select indicators of program quality and/or customer service and measure achievement of objectives.
3. CRDN
4. 2 Apply evidence-based guidelines, systematic reviews and scientific literature.
5. CRDN
6. 4 Evaluate emerging research for application in nutrition and dietetics practice.
7. CRDN
8. 5 Conduct projects using appropriate research methods, ethical procedures and data analysis.
9. CRDN
10. 14 Demonstrate advocacy on local, state or national legislative and regulatory issues or policies impacting the nutrition and dietetics profession.
11. CRDN
12. 1 Perform the Nutrition Care Process and use standardized nutrition language for individuals, groups and populations of differing ages and health status, in a variety of settings.
13. CRDN
14. 5 Develop nutrition education materials that are culturally and age appropriate and designed for the literacy level of the audience.
15. CES
16. Consult with organizations regarding food access for target populations.
17. CES
18. Ensure cultural relevancy and appropriateness of nutrition education.

NUTR 5640. DI SUP PRACT FS MGT
1-5 Credits (2-10P)
Provides dietetic interns with a minimum of 300 clock hours of supervised practice in foodservice management. Dietetic interns work under the guidance of faculty and foodservice management professionals. Students must complete a total of 4 credit hours of NUTR 5640. May be repeated up to 5 credits. Consent of Instructor required. Restricted to: HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.

NUTR 5650. Foodservice Management for Dietetic Interns
3 Credits (3)
Advanced topics in foodservice systems management to include business planning and marketing. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.
Learning Outcomes
1. CRDN
2. 2: Demonstrate professional writing skills in preparing professional communications.
3. CRDN
4. 15: Practice and/or role play mentoring and precepting others.
5. CRDN
6. 4: Design, implement and evaluate presentations to target audiences.
7. CRDN
8. 3: Demonstrate active participation, teamwork and contributions in group setting.
9. CRDN
10. 7: Apply leadership skills to achieve desired outcomes.
11. CRDN
12. 8: Demonstrate negotiation skills.
13. CRDN
14. 4: Apply current informatics technology to develop, store, retrieve and disseminate information and data.
15. CRDN
16. 6: Analyze quality, financial and productivity data for use in planning.
17. CRDN
18. 7: Conduct feasibility studies for products, programs, or services with consideration of costs and benefits.1
19. CRDN
20. 8: Develop a plan to provide or develop a product, program, or service that includes a budget, staffing needs, equipment and supplies.

NUTR 5660. Dietetic Internship: Supervised Practice in Clinical Dietetics
1-8 Credits (2-16P)
Provides dietetic interns with a minimum of 500 clock hours of supervised practice in clinical dietetics. Dietetic interns work under the guidance of faculty and dietetics professionals. May be repeated up to 8 credits. Consent of Instructor required. Restricted to: HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.
Learning Outcomes
1. CRDN
2. 1 Select indicators of program quality and/or customer service and measure achievement of objectives.
3. CRDN
4. 4 Function as a member of interprofessional teams.
5. CRDN
6. 11 Show cultural competence/sensitivity in interactions with clients, colleagues and staff.
7. CRDN
8. 1 Perform the Nutrition Care Process and use standardized nutrition language for individuals, groups and populations of differing ages and health status, in a variety of settings.
9. CRDN
10. 2 Conduct nutrition focused physical exams.
11. CRDN
12. 3 Demonstrate effective communication skills for clinical and customer services in a variety of formats

NUTR 5670. Nutrition Care Process for Dietetic Interns
3 Credits (3)
Advanced topics in nutrition care process and model to include medical nutrition therapy and evidence-based research and outcomes assessment in clinical dietetics. Consent of Instructor required.
Prerequisite(s): Acceptance into Dietetic Internship.Restricted to: HNDS majors.
Learning Outcomes
1. CRDN
2. 2: Apply evidence-based guidelines, systematic reviews and scientific literature.
3. CRDN
4. 3: Justify programs, products, services and care using appropriate evidence or data.
5. CRDN
6. 4: Evaluate emerging research for application in nutrition and diet.
7. CRDN
8. 4 Evaluate emerging research for application in dietetics practice.
9. CRDN
10. 2 Demonstrate professional writing skills in preparing professional communication. Perform the nutrition care process and use standardized nutrition language for individuals, groups, and populations of differing ages and health status, in a variety of settings.
11. CRND
12. 2 Conduct nutrition focused physical exams.

NUTR 5680. Review Course for National RD Exam
3 Credits (3)
Completion of dietetic internship portfolio and preparation for the national registration examination for dietitians. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: exclude HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.
Learning Outcomes
1. Demonstrate readiness to take the National Registration Examination for Dietitians.
2. Completion of all requirements of the NMSU Dietetic Internship.
3. Completion of all requirements to receive a Master of Science in Family Consumer Sciences from New Mexico State University

NUTR 5991. Special Research Programs
1-4 Credits (1-4)
Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree. May be repeated up to 6 credits.
Prerequisite(s): Graduate Student.
Learning Outcomes
1. Develop analytical or experimental research skills in the areas of human nutrition and dietetics.

NUTR 5996. Special Topics
1-4 Credits (1-4)
Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.
Prerequisite(s): Graduate student.

Learning Outcomes

1. Evaluate issues surrounding advanced nutrition and dietetics topics.

Gerald Thomas Hall, Room 308

Family and Consumer Sciences Education - Bachelor of Science in Family and Consumer Sciences

This major prepares you to teach in middle or high school or in other settings such as the Cooperative Extension Service or community agencies. The major is an accredited education program which meets the teacher licensure requirements for the State of New Mexico. In the spring semester of the senior year, you will apply all the principles of teaching that you have learned in a semester of student teaching in a selected school. Requirements for admission to the student teaching component of the Family and Consumer Sciences Education are

1. an overall grade-point average of 2.75 or higher, and a grade-point average of 2.75 or higher in family and consumer sciences courses;
2. evidence of passing NES Essential Academic Tests I, II, III;
3. a C or better in all departmental courses; and
4. recommendation of the advisor.

You must have passed the NES Essential Academic Tests I, II, III and you must have a GPA of 2.75 or higher before enrolling in the following FCSE courses:

Prefix	Title	Credits
FCSC 4510	Teaching Methods I for Family and Consumer Sciences	3
FCSC 4520	Teaching Methods II for Family and Consumer Sciences	3
FCSC 4810	Supervised Teaching in Family and Consumer Sciences	12

Requirements

A list of specific requirements is available in the department. Please check with your advisor.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 3000 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix	Title	Credits
General Education		
Area I: Communications		
ENGL 1110G	Composition I	4
or ENGL 1110H	Composition I Honors	
English Composition - Level 2		
ENGL 2221G	Writing in the Humanities and Social Science	3
or ENGL 2210G	Professional and Technical Communication	
or ENGL 2210H	Professional and Technical Communication	
Oral Communication:		
ACOM 1130G	Effective Leadership and Communication in Agriculture	3
Area II: Mathematics		
MATH 1130G	Survey of Mathematics [1]	3
Area III/IV: Laboratory Sciences and Social/Behavioral Sciences		
BIOL 1120G & BIOL 1120L	Human Biology and Human Biology Laboratory	4
CHEM 1120G	Introduction to Chemistry Lecture and Laboratory (non majors)	4
Choose one from the following:		3
ECON 1110G	Survey of Economics	
ECON 2110G	Macroeconomic Principles	
ECON 2120G	Principles of Microeconomics Honors	
Area V: Humanities		
HIST 1110G	United States History I	3
or HIST 1120G	United States History II	
Area VI: Creative and Fine Arts		
ARTH 1115G	Orientation in Art	3
or ARTS 1145G	Visual Concepts	
General Education Elective

	Total Credits	**120**

1 Approved VWW courses are: PHLS 3110V Human Sexuality,BLAW 385V Employment and Consumer Law and MKTG 311V Consumer Behavior

2 Before being admitted to the program and enrolling in 4000-level classes, students must pass the National Evaluation Series for Certification: Essential Academic Skills, Subtests I, II, and III.

3 Students must have a 2.75 GPA or higher in order to register for these courses.

Fashion Merchandising and Design - Bachelor of Science in Family and Consumer Sciences

The Fashion Merchandising and Design major prepares students to achieve career goals in the diverse areas of the fashion industry. Students

are prepared with well-rounded coursework related to the creative, technical and business aspects of the industry. The program develops the business knowledge, design fundamentals and industry experience needed to compete in today's fashion industry. The required coursework includes completion of a minor in Marketing as well as gaining valuable hands-on field-experience. A GPA of 2.5 or better is required to enroll in CTFM 402 Field Experience to complete the degree requirements.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix	Title	Credits

MKTG 317	International Marketing	3
One MKTG 300 or above		*3*
Choose one course from the following:		*3*
AEEC 2140	Technology and Communication for Business Management	
BCIS 1110	Introduction to Information Systems	
Choose one course from the following:		*3*
MGMT 309	Human Behavior in Organizations	
MGMT 332	Human Resources Management	
Second Language: (not required)		
Electives, to bring the total credits to 120 [8,9]		**10**
Total Credits		**120-123**

1. See the General Education (p. 262) section of the catalog for a full list of courses
2. MATH 1350G Introduction to Statistics is required for the degree but students may need to take MATH 1215 as a prerequisite. If this course is used to fulfill the Math Basic Skills requirement, a C- or better is required.
3. See the Viewing a Wider World (p. 266) Section of the catalog for a full list of courses.
4. Offered summers only.
5. A GPA of 2.5 or higher is required before enrolling in CTFM 402 Field Experience.
6. Should be completed last semester.
7. Please review prerequisites prior to enrolling.
8. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
9. ACES 1120 Freshman Orientation/ACES 1210 Financial Fitness for College Students are strongly recommended for freshmen.

NOTE: This degree includes the requirements necessary to complete a minor in Marketing. The student is responsible for completing the necessary paperwork in order for the minor to be awarded.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1350G Introduction to Statistics . The contents and order of this roadmap may vary depending on initial student placement in mathematics and english. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year		
Fall		**Credits**
English Composition - Level 1 Course [1]		4
ARTS 1145G	Visual Concepts	3
CTFM 1110	Fundamentals of Fashion	3
CTFM 2130	Concepts in Apparel Construction	3
Elective Course(s)		2
ACES 1120	Freshman Orientation (Strongly Recommended)	
ACES 1210	Financial Fitness for College Students (Strongly Recommended)

	Credits	**14-16**
Spring		
MKTG Elective Course (Upper-Division)		3
FCST or FCSC Elective Courses [6]		3
Free Elective Course [2]		3
CTFM 476	Draping for Apparel Design	3
CTFM 477	Capstone in Fashion Mechandising	3
	Credits	**15**
	Total Credits	**120-123**

1. See the General Education (p. 262) section of the catalog for a full list of courses
2. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However, students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.
3. MATH 1350G Introduction to Statistics is required for the degree but students may need to take MATH 1215 as a prerequisite. If this course is used to fulfill the Math Basic Skills requirement, a C- or better is required.
4. One Area IV: Social/Behavioral Sciences course and one Area V: Humanities course must be taken in order to fulfill the General Education requirements
5. If THTR 307V is taken than students will not need to take an additional Viewing a Wider World course.
6. Departmental Electives can be completed by taking either CTFM 377 Fashion Study Tour, any FCS course or any FCSE course, but make sure to check any prerequisites on courses before enrolling.

Please Note: Many scholarships require enrollment in a minimum of 15 credits per semester, so additional elective coursework may be required to remain eligible for scholarships.

Food Science and Technology (Science, Technology and Engineering) - Bachelor of Science in Food Science and Technology

Food science is the science of food. Food scientists study the physical microbiological, and chemical makeup of food. Food technology is the application of food science to the selection, preservation, processing, packaging, distribution, and use of safe food. The food industry is the largest manufacturing industry in the United States. This multidisciplinary field applies scientific disciplines including chemistry, microbiology, nutrition and engineering to develop new food products as well as the processes designed to improve food safety and the quality of foods. Food scientists develop new foods, add value to raw food commodities and improve the quality and safety of foods.

Consider exploring food science through our introductory course: FSTE 2110G Food Science I which fulfills the general education Area III Laboratory Science requirement. Food scientists typically work in the food and beverage industry in the areas of quality assurance, product development, product procurement, research, sensory evaluation, sales, and food safety regulations. Graduates of the program will also be prepared for postgraduate studies leading to research, production and management careers in the food and feed industries, goverment and academia.

A minimum grade of C- is required in all classes with CHEM, BCHE, BIOL, FSTE, or NUTR prefix.

Requirements

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Human Nutrition and Dietetic Science (Nutrition Education) - Bachelor of Science in Family and Consumer Sciences

This concentration prepares students to become nutrition educators that work within the community and public health settings. This concentration focuses on health and wellness, the association between nutrition

and health, and teaching healthy living. Graduates from the Nutrition Education concentration will have learned the skills to communicate evidence-based nutrition information, provide nutrition education, and blend nutrition with other health science subjects. The job opportunities for those graduating from this program include working as a nutrition educator or nutrition assistant in county agencies, Extension Services, community nutrition programs, schools and with health organizations.

Unlike the Dietetics concentration, this concentration does **not** prepare students to pursue the credential of a Registered Dietitian.

Concentration: Nutrition Education (General)

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Due to the large number of PHLS course in the Nutrition Education option, students are encouraged to pursue a Public Health minor. Please see an advisor for more information and to view a Nutrition Education & Public Health minor roadmap.

3 See the Viewing a Wider World (p. 266) section of the catalog for a full list of courses.
**Refer to the "List of Recommended GE courses" for HNDS students in the HNDS Undergraduate Student Handbook for a list of field-related course options that can be selected from the GE Core Curriculum and Viewing a Wider World course requirements*.

4 Students who have taken a second level English course may be required to take another to fulfill the program's technical/scientific writing requirement.

Concentration: Nutrition Education

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1220G Intermediate Algebra and ENGL 1110G Rhetoric and Composition. The contents and order of this roadmap may vary depending on initial student placement in mathematics and english. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change. Please meet with an advisor to determine course progression.

First Year		
Fall		**Credits**
ENGL 1110G or ENGL 1110H	Composition I (C or better) or Composition I Honors	4
MATH 1220G	College Algebra (C or better) [1]	3
Choose one from the following:		3
ACOM 1130G	Effective Leadership and Communication in Agriculture (C- or better)	
COMM 1115G or HNRS 2175G	Introduction to Communication (C- or better) or Introduction to Communication Honors	
COMM 1130G	Public Speaking (C- or better)	
CHEM 1215G	General Chemistry I Lecture and Laboratory for STEM Majors	4
Recommended courses for 2 credits (not required) [2]		
ACES 1120 or ACES 1210	Freshman Orientation or Financial Fitness for College Students	
	Credits	**14**
Spring		
Choose one from the following:		3
ENGL 2130G	Advanced Composition	
ENGL 2210G	Professional and Technical Communication (C or better)	
ENGL 2210H	Professional and Technical Communication	
ENGL 2215G	Advanced Technical and Professional Communication	
ENGL 2221G	Writing in the Humanities and Social Science (C or better)	
NUTR 2110	Human Nutrition (C or better)	3
NUTR 2120	Seminar I - Becoming a Nutrition Professional (C or better and only available in Spring semesters)	1
PHLS 1110G	Personal Health & Wellness	3
BIOL 2610G	Principles of Biology: Biodiversity, Ecology, and Evolution	3
Electives		2
	Credits	**15**
Second Year		
Fall		
Area VI- Creative & Fine Arts Course [5]		3
FCSC 2250	Overview of Family and Consumer Sciences Teaching (C or better and only available in Fall semesters)	3
FSTE 2110G	Food Science I (C or better)	4
SPMD 2210 & 2210L	Anatomy and Physiology I and Anatomy and Physiology Laboratory (C or better)	4
	Credits	**14**
Spring		
HRTM 2110	Safety, Sanitation and Health in the Hospitality Industry	1
HRTM 2120	Food Production and Service Fundamentals	3
PHLS 2110	Foundations of Health Education (C- or better and at DACC only)	3
PHIL 1145G or PHIL 2110G	Philosophy, Law, and Ethics or Introduction to Ethics	3
SPMD 2225 & 2225L	Anatomy and Physiology II and Anatomy and Physiology II Lab (C or better in both)	4
	Credits	**14**
Third Year		
Fall		
Choose one from the following:		4-5
FSTE 4110	Food Microbiology (C or better)	
BIOL 311 & 311 L	General Microbiology and General Microbiology Laboratory (C or better for both)	
BIOL 2320 & BIOL 311 L	Public Health Microbiology and General Microbiology Laboratory (C or better for both)	
PHLS 3120V	Women's Health Issues	3
PHLS 3220	Foundations of Public Health (C- or better)	3
NUTR 3110	Nutrition Throughout the Lifecycle (C or better)	3
Viewing A Wider World [3]		3
	Credits	**16-17**
Spring		
NUTR 3710	Food Systems & Policy in Dietetics	3
NUTR 3750	Applied Nutrition Research	3
FCSC 3110	Management Concepts in Family and Consumer Sciences Teaching (C or better and only available in Spring semesters)	3
PHLS 4620V	Cross-Cultural Aspects of Health (C- or better)	3
HRTM 3310	Quantity Food Production and Service	4
	Credits	**16**

Fourth Year		
Fall		
NUTR 4210	Community Nutrition	3
PHLS 4610	Health Disparities: Determinants and Interventions	3
NUTR 4220	Food Service Organization and Management (C or better, Fall only)	3
FCSC 4120	Career and Technical Education Programs	3
FCSC 4510	Teaching Methods I for Family and Consumer Sciences (C or better and only available in Fall semesters)	3
	Credits	**15**
Spring		
PHLS 4810	Infectious and Noninfectious Disease Prevention (C or better and only available in Spring semesters)	3
NUTR 4565	Field Experience Community Nutrition	2
NUTR 4205	Nutrition Communication and Education	3
FCSC 4520	Teaching Methods II for Family and Consumer Sciences (C or better, Spring only)	3
ELAD 3110V	Introduction to Educational Leadership in a Global Society	3
Electives		2
	Credits	**16**
	Total Credits	**120-121**

1 MATH 1220G College Algebra is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G College Algebra first.

2 Not required for the degree. Highly recommended if new to NMSU

3 AXED 4510 Introduction to Research Methods is only taught in the Fall semesters, this will require changes to year three- spring and year four- fall semesters, speak with your advisor if you'd like to take this course.

4 See the Viewing a Wider World (p. 266) section of the catalog for a full list of courses, cannot be offered through the College of Health and Social Services.

5 See the General Education (p. 262) section of the catalog for a full list of courses

Human Nutrition and Dietetic Science (Pre-Dietetics/Dietetics) - Bachelor of Science in Family and Consumer Sciences

The Dietetics option prepares students to become registered dietitians (RD) and dietetic technicians, registered (DTR). This option encompasses nutritional science, clinical dietetics, community nutrition, food science and food service management.

All students enrolled in this option begin as Pre-Dietetics students. **All Pre-Dietetics students are required to apply for admission into the Dietetics option in the fall semester of their junior year as indicated on the Pre-Dietetics/Dietetics road map.** Please refer to the HNDS Undergraduate Student Handbook for information on the admissions criteria, application instructions, and the application process. Pre-Dietetic students are termed Dietetic students upon formal notification of admission into the Dietetics program.

The Dietetics option is a Didactic Program in Dietetics (DPD) that is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). This option enables graduates to continue pursuing the credentials of a registered dietitian (RD). Becoming an RD is currently a three-step process:

1. Successfully complete an ACEND-accredited DPD program (e.g. the NMSU Dietetics Option), earn a degree and a verification statement
   a. The verification statement ensures eligibility to apply to the next step.
2. Successfully complete an ACEND-accredited Dietetic Internship (DI) program, earn another verification statement.
   a. This 2nd verification statement ensures eligibility to begin the next step.
3. Pass the Commission on Dietetic Registration (CDR) registration exam.

To earn a Verification Statement from the NMSU DPD, students must:

1. Complete all classes outlined in the Dietetics option roadmap.
2. Attain a C or higher (on campus or transfer) in classes with CHEM, BCHE, BIOL, SPMD, AHS/CHSS/NURS, FSTE and NUTR prefixes (C- does not count toward degree).

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 121 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix	Title	Credits
General Education		
Area I: Communications		*10*
English Composition - Level 1 [1]		
English Composition - Level 2 [1,4]		
Choose one ENGL course from the following:		
ENGL 2130G	Advanced Composition	
ENGL 2210G	Professional and Technical Communication	
ENGL 2210H	Professional and Technical Communication	
ENGL 2215G	Advanced Technical and Professional Communication	
ENGL 2221G	Writing in the Humanities and Social Science	
Oral Communication		
Choose one from the following:		
ACOM 1130G	Effective Leadership and Communication in Agriculture	
COMM 1115G	Introduction to Communication	
COMM 1130G	Public Speaking	
HNRS 2175G	Introduction to Communication Honors	
Area II: Mathematics		
MATH 1220G	College Algebra [2]	3
or MATH 1430G	Applications of Calculus I	
Area III/IV: Laboratory Sciences and Social/Behavioral Sciences		*11*
PHLS 1110G	Personal Health & Wellness (Recommended) [1]	3
CHEM 1215G	General Chemistry I Lecture and Laboratory for STEM Majors	4
Choose one sequence from the following (4 credits):		

BIOL 2610G & BIOL 2610L	Principles of Biology: Biodiversity, Ecology, and Evolution and Principles of Biology: Biodiversity, Ecology, and Evolution Laboratory	
BIOL 2110G & BIOL 2110L	Principles of Biology: Cellular and Molecular Biology and Principles of Biology: Cellular and Molecular Biology Laboratory	
Area V: Humanitites		*3*
PHIL 1145G or PHIL 2110G	Philosophy, Law, and Ethics (recommended) Introduction to Ethics	
Area VI: Creative and Fine Arts [1]		*3*
General Education Elective		
FSTE 2110G	Food Science I	4
Viewing A Wider World [3]		**6**
Departmental/College Requirements		
FSTE Upper Division Course - any 300 or 400 level FSTE, except FTSE 4310		3
NUTR 2110	Human Nutrition (FSTE Upper Division Course - any 3000 or 4000 level FSTE, except FSTE 4310)	3
NUTR 2120	Seminar I - Becoming a Nutrition Professional	1
NUTR 3110	Nutrition Throughout the Lifecycle	3
NUTR 3710	Food Systems & Policy in Dietetics	3

NUTR 4207	Nutrition Services	3
NUTR 4210	Community Nutrition	3
NUTR 4220	Food Service Organization and Management	3
NUTR 4230	Graduate Studies in Medical Nutrition I	3
NUTR 4230L	Medical Nutrition Therapy I Lab	1
NUTR 4233	Nutrition Counseling	3
NUTR 4235	Entering the Field of Dietetics	1
NUTR 4240	Medical Nutrition Therapy II	3
NUTR 4240L	Medical Nutrition Therapy II Laboratory	1
Choose one from the following:		*3-4*
FSTE 4110	Food Microbiology	
BIOL 311	General Microbiology	
BIOL 2320	Public Health Microbiology	
Non-Departmental Requirements (in addition to Gen.Ed/VWW)		
A ST 311 or MATH 1350G	Statistical Applications Introduction to Statistics	3
ACCT 2110	Principles of Accounting I	3
CHEM 1225G	General Chemistry II Lecture and Laboratory for STEM Majors	4
CHEM 2120	Integrated Organic Chemistry and Biochemistry	3
HRTM 2110	Safety, Sanitation and Health in the Hospitality Industry	1
HRTM 2120	Food Production and Service Fundamentals	3
HRTM 363	Quantity Food Production and Service	4
SPMD 2210 & 2210L	Anatomy and Physiology I and Anatomy and Physiology Laboratory	4
SPMD 2225 & 2225L	Anatomy and Physiology II and Anatomy and Physiology II Lab	4
Choose one from the following:		
SPMD 1120	Medical Terminology	
NURS 1150	Medical Terminology	
Second Language: (not required)		
Electives, to bring the total credits to 121		**0**
Total Credits		**122-123**

1 See the General Education (p. 262) section of the catalog for a full list.

Please refer to the HNDS Undergraduate Student Handbook for a list of recommended courses to choose from in order to fulfill these requirements.

2 MATH 1220G College Algebra or MATH 1430G Applications of Calculus I is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G or MATH 1430G first.

3 See the Viewing a Wider World (p. 266) section of the catalog for a full list of courses.
Refer to the "List of Recommended GE courses" for HNDS students in the HNDS Undergraduate Student Handbook for a list of field-related course options that can be selected from the GE Core Curriculum and Viewing a Wider World course requirements.

4 Students who have taken a second level English course may be required to take another to fulfill the program's technical/ scientific writing requirement.

A Suggested Plan of Study for Students

During the following semesters, a student may need to submit for an overload to enroll in over 18 credits of course work (see the NMSU Regulations section-Course Load for Undergraduate Students (p. 40) for more information):

- Third Year- Fall Semester

This roadmap assumes student placement in MATH 1220G and ENGL 1110G. The contents and order of this roadmap may vary depending on initial student placement in mathematics and english. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year		
Fall		**Credits**
ENGL 1110G or ENGL 1110H	Composition I [1] or Composition I Honors	4
MATH 1220G	College Algebra [1, 2]	3
CHEM 1215G	General Chemistry I Lecture and Laboratory for STEM Majors (C or better) [1,3]	4
PHLS 1110G	Personal Health & Wellness (Recommended)	3
Recommended courses (not required)		1
ACES 1120	Freshman Orientation	
ACES 1210	Financial Fitness for College Students	
	Credits	**15**
Spring		
CHEM 1225G	General Chemistry II Lecture and Laboratory for STEM Majors (C or better) [1, 3]	4
Choose one from the following:		4
BIOL 2610G & BIOL 2610L	Principles of Biology: Biodiversity, Ecology, and Evolution and Principles of Biology: Biodiversity, Ecology, and Evolution Laboratory (C or better) [1, 3]	
BIOL 2110G & BIOL 2110L	Principles of Biology: Cellular and Molecular Biology and Principles of Biology: Cellular and Molecular Biology Laboratory (C or better) [1,3]	

Choose one from the following:		3
ENGL 2130G	Advanced Composition	
ENGL 2210G	Professional and Technical Communication	
ENGL 2210H	Professional and Technical Communication	
ENGL 2215G	Advanced Technical and Professional Communication	
ENGL 2221G	Writing in the Humanities and Social Science

A ST 311 or MATH 1350G	Statistical Applications [1, 3] or Introduction to Statistics	3
NURS 1150 or SPMD 1120	Medical Terminology [3, 6] or Medical Terminology	3
	Credits	**16**
Third Year		
Fall		
SPMD 2225 & 2225L	Anatomy and Physiology II and Anatomy and Physiology II Lab (C or better) [1,3]	4
FSTE 4110	Food Microbiology (C or better and only available Fall semesters) [1, 3]	4
NUTR 3110	Nutrition Throughout the Lifecycle (C or better, and only available in Fall semesters) [1, 3]	3
HRTM 363	Quantity Food Production and Service (C or Better) [1, 3]	4
Apply to the HNDS- Didactic Program in Dietetics		
	Credits	**15**
Spring		
FSTE Upper Division Course (C or better) Any 3000 or 4000 level FSTE except FSTE 4310 [3,6]		4
FSTE 4250	Sensory Evaluation of Foods and Product Development	
NUTR 3750	Applied Nutrition Research (C or better, and only available in Spring semesters) [3,7]	3
NUTR 4110	Advanced Nutrition (C or better, Spring only) [3, 7]	3
NUTR 3710	Food Systems & Policy in Dietetics (C or better, Spring only) [3,7]	3
Area VI- Creative & Fine Arts Course		3
	Credits	**16**
Fourth Year		
Fall		
VWW- Viewing a Wider World Course [6,8]		3
NUTR 4210	Community Nutrition (C or better, Fall only) [3,7]	3
NUTR 4235	Entering the Field of Dietetics (C or better, Fall only) [3,7]	1
NUTR 4230 & 4230L	Graduate Studies in Medical Nutrition I and Medical Nutrition Therapy I Lab (C or better, Fall only) [3,7]	4
NUTR 4233	Nutrition Counseling (C or better, Fall only) [3,7]	3
NUTR 4220	Food Service Organization and Management (C or better, Fall only) [3,7]	3
	Credits	**17**
Spring		
VWW - Viewing a Wider World Course [6, 8]		3
NUTR 4240 & 4240L	Medical Nutrition Therapy II and Medical Nutrition Therapy II Laboratory (C or better, Spring Only) [3,7]	4
NUTR 4207	Nutrition Services (C or Better Spring Only) [3,7]	3
NUTR 4205	Nutrition Communication and Education (C or Better Spring Only) [3,7]	3
	Credits	**13**
	Total Credits	**121**

1 Pre-Dietetics courses must be completed and/or enrolled in prior to applying to the Dietetics program.

2 MATH 1220G College Algebra or MATH 1430G Applications of Calculus I is required for the degree but students may need to take any prerequisites needed to enter MATH 1220G College AlgebraMATH 1220G College Algebra or MATH 1430G Applications of Calculus IMATH 1430G Applications of Calculus I first.

3 **Courses are required for application to a dietetic internship, GPAs in the application will be calculated using these classes.**

4 See the General Education (p. 262) section of the catalog for a full list.

5 CHEM 313 Organic Chemistry I, CHEM 314 Organic Chemistry II, and CHEM 315 Organic Chemistry Laboratory combination for the Organic Chemistry requirement is a total of 8 credits,

6 Required courses are upper-division courses that can be completed in the junior year prior to admission to the Dietetics program.

7 Dietetics courses can only be completed by Dietetic students who have been admitted into the Dietetics program.

8 See the Viewing a Wider World (p. 266) section of the catalog for a full list.

Culinary Science - Undergraduate Minor

A minor in Culinary Science is available. The minor requires a minimum of 20 credits of which a minimum of 9 hours must be at the 300 or higher level. A grade of "C-" or better is required in all classes to be counted towards the minor. Prerequisites for a given course must be completed

before taking the course or consent of instructor must be obtained before enrolling in the course.

Prefix	Title	Credits
FSTE 2110G	Food Science I	4
FSTE 4110	Food Microbiology	4
HRTM 1310	Safety, Sanitation and Health in the Hospitality Industry	1
HRTM 1320	Food Production and Service Fundamentals	3
HRTM 3310	Quantity Food Production and Service	4
HRTM 4320	Restaurant Operations Management	4
Total Credits		**20**

Fashion Merchandising & Design - Undergraduate Minor

A minor in Fashion Merchandising and Design is available. The minor requires a minimum of 18 hours of which a minimum of 9 hours must be at the 300 or higher level. A grade of "C" or better is required in all classes to be counted towards the minor. Prerequisites for a given course must be completed before taking the course or consent of instructor must be obtained before enrolling in the course.

Prefix	Title	Credits
Course Requirements		
CTFM 1110	Fundamentals of Fashion	3
CTFM 2130	Concepts in Apparel Construction	3
CTFM 371	Textile Science	3
Choose three Upper-Division courses from the following:		9
CTFM 365	Apparel Analysis	
CTFM 366	Historic Fashion and Society	
CTFM 372	Fashion Merchandising	
CTFM 373	Advanced Apparel Construction II	
CTFM 375	Fashion Buying	
CTFM 377	Fashion Study Tour	
CTFM 460	Cultural Perspectives in Dress	
CTFM 473	Flat Pattern for Apparel Design	
CTFM 474	Fashion Promotion	
CTFM 476	Draping for Apparel Design	
Total Credits		**18**

Food Science - Undergraduate Minor

A minimum of 18 credits of courses with the FSTE prefix are required for a minor in Food Science and Technology. A grade of "C-" or better is required in all classes to be counted toward the minor. Prerequisites for a given course must be completed before taking the course, or consent of instructor must be obtained before enrolling in the course.

Prefix	Title	Credits
Required Courses		
FSTE 4110	Food Microbiology	4
FSTE 4250	Sensory Evaluation of Foods and Product Development	3
FSTE 4998	ACES Foods at NMSU-Experiential Learning	1
Electives (select at least three courses from the following):		*10*
FSTE 4140	Food Analysis	
FSTE 4120	Food Chemistry	
FSTE 4230	Food Processing Technologies	
FSTE 4310		
Total Credits		**18**

Interior Spaces - Undergraduate Minor

Requirements for a Minor in Interior Spaces

A minimum of eighteen (18) credits is required for a minor in Interior Spaces, of which a minimum of nine (9) credits must be at the 300/3000 or higher level. A grade of "C" or better is required in all classes to be counted towards the minor. Prerequisites for a given course must be completed before taking the course, or consent of the instructor must be obtained before enrolling in the course.

Prefix	Title	Credits
Required Courses (9 Credits)		
FCSC 2330	Housing and Interior Design	3
CTFM 371	Textile Science	3
ARTH 1115G	Orientation in Art	3
Choose 3 Courses (9 credits) from the following:		*9*
ARCH 1120	Introduction to Architecture	
MKTG 311V	Consumer Behavior	
PSYC 315	Emotion	
FCST 3120V	Family Ethnicities and Subcultures	
FCSC 4110	Teaching in Informal Family and Consumer Sciences Settings	
FCSC 4120	Career and Technical Education Programs	
Total Credits		**18**

Meat Science - Undergraduate Minor

Requirements for a Minor in Meat Science

A minimum of eighteen (18) credits is required for a minor in Meat Science.

A grade of "C" or better is required in all classes to be counted towards the minor.

Prerequisites for a given course must be completed before taking the course, or consent of the instructor must be obtained before enrolling in the course.

Prefix	Title	Credits
Complete 16 credits from the following required courses:		*16*
ANSC 2310	Introduction to Meat Science	
ANSC 301	Animal and Carcass Evaluation	
ANSC 360	Meat and Muscle Biology	
FSTE 4110	Food Microbiology	
FSTE 4240	Processed Meats	
Choose one course from the list below:		*2*
FSTE 4140	Food Analysis	
FSTE 4250	Sensory Evaluation of Foods and Product Development	
Total Credits		**18**

Nutrition - Undergraduate Minor

A minor in Human Nutrition is available. The minor requires a minimum of 19 hours. Specific coursework requirements may apply, including prerequisites. See an advisor for course requirements and scheduling. Students should take the following courses:

Prefix	Title	Credits
Required Courses		
NUTR 2120	Seminar I - Becoming a Nutrition Professional (only offered in Spring semesters)	1
NUTR 2110	Human Nutrition	3
NUTR 3110	Nutrition Throughout the Lifecycle (only offered in Fall semesters)	3
Choose a minimum of 12 credits from the following		12
HRTM 3310	Quantity Food Production and Service	
NUTR 3710	Food Systems & Policy in Dietetics (only offered in Spring semesters)	
NUTR 3750	Applied Nutrition Research (only offered in Spring semesters)	
NUTR 4220	Food Service Organization and Management (only offered in Fall semesters)	
NUTR 4233	Nutrition Counseling and Education (only offered in Fall semesters)	
Total Credits		**19**

Fish, Wildlife and Conservation Ecology

Undergraduate Program Information

Through lecture courses, labs, hands-on field experience and internships, the Department of Fish, Wildlife and Conservation Ecology will prepare you for a career in a variety of natural resource fields related to the conservation and management of wild animal populations and the natural systems they perpetuate. Award-winning professors will guide students in the study of how to manage fish and wildlife populations, their habitats, how their populations grow and contract, how different species influence the biotic community in which they live and how natural systems are affected by human activities.

Bachelor of Science in Fish, Wildlife and Conservation Ecology.

With the continuous growth of human populations and the ever dwindling of natural resources, natural resource professionals are needed now more than ever. Learn how to sustainably manage fish and wildlife populations and the habitats they utilize to ensure their long-term successful conservation. We offer two options within this degree. The Wildlife Ecology and Management option focuses on the ecology, conservation and management of wildlife (including mammals, birds, amphibians, and reptiles) in their natural habitats. The Aquatic Ecology and Management option focuses on the ecology, conservation and management of aquatic resources and the animals and plants found in them.

The department offers a minor in Wildlife Science for students majoring in other disciplines. The minor includes a minimum of 18 credit hours.

Bachelor of Science in Conservation Ecology

New Mexico State University offers an interdisciplinary, undergraduate program in Conservation Ecology. The goal of this program is to train biologists for the current and future challenges that we face in the conservation and wise use of natural resources. An overriding principle of the program is to provide a solid foundation in basic science coupled with a practical approach towards sustainability and stewardship. The curriculum encompasses several disciplines and includes a wide variety of courses from Fish, Wildlife and Conservation Ecology, Biology, and Geography.

This educational experience will provide students with an overview of global biodiversity and an understanding of the ecological and evolutionary processes that have created and sustained it. Courses in population and community ecology coupled with population viability analysis and risk assessment will give students the necessary background to understand the theory and development of these fields as well as the tools to tackle real-world problems. Courses in basic genetics, evolution, and conservation genetics will expose students to the importance of conserving genetic variation in order to maintain adaptive potential within populations, thereby sustaining the evolutionary process. Students will also receive background on wildlife law and environmental policy, information vital for assisting governing bodies in making decisions regarding the protection and wise use of our natural resources. Skills obtained in the application of geographic information systems, molecular genetics, and professional communication can also be acquired through various electives. If biochemistry is taken as an elective, this curriculum provides the necessary educational background for pre-vet requirements, thus preparing students for veterinary school and future jobs such as wildlife or zoo veterinarian, or conservation medicine practioner. In sum, we seek to provide undergraduate students with an education that will allow them the opportunity to contribute to the conservation of all life on Earth.

The department offers a minor in Conservation Ecology for students majoring in other disciplines. The minor includes 20 credits.

To graduate from the Department of Fish, Wildlife and Conservation Ecology, an overall grade point average of 2.0 is required in courses taken in the major field and in all courses taken at NMSU.

Graduate Program Information

Master of Science in Fish, Wildlife and Conservation Ecology.

The Department of Fish, Wildlife and Conservation Ecology (FWCE) offers graduate work leading to the Master of Science degree with a major in Fish, Wildlife and Conservation Ecology. Faculty members in the department also may advise Ph.D. candidates through the graduate program in the Department of Biology, Department of Animal and Range Sciences, Department of Plant and Environmental Sciences, as well as other Ph.D. granting departments. For additional information please see the graduate catalog entries for the respective departments.

Minimum qualifications for admission to the graduate program include the following:

- 3.0 grade-point average in the last two years of undergraduate work
- Students who are most competitive for admission are those with a combined average GRE score greater than 70th percentile on the verbal and quantitative parts of the GRE.
- Course work in zoology, botany and animal ecology and a basic appreciation of sustainable use of natural resources, with supporting courses in mathematics, chemistry, physics and written and oral communication.

Applicants should submit a written composition of approximately 350 words that indicates the applicant's reasons for pursuing advanced study, explains personal and educational goals, and any additional experiences (e.g., military or career) or skills that might provide a foundation for graduate study. Applicants should submit three letters of recommendation (it is preferred that at least two letters come from university instructors) along with official GRE scores (use NMSU code 4531). Applicants should also contact a faculty member in the department that they would like to work with as an advisor, and that faculty member needs to agree to serve as the student's advisor. Application forms, application fee and transcripts, GRE scores, letters of recommendation and letter of application should be submitted online to the Graduate School. Successful applicants will be selected from those who meet the criteria of grade-point average, GRE scores, and educational background described above and who appear to have professional promise as indicated by personal history and written references.

For the Master of Science degree, a minimum of 30 semester credits of graduate work in the major and related subjects is required, together with a thesis for most students. Of these credits, at least 15 must be in courses numbered 500 or above, and at least 15 must be for courses with the FWCE prefix. Those programs involving a thesis or research project include 4 to 6 credits of research (FWCE 598 Special Research Programs or FWCE 599 Master's Thesis). Students electing a minor in FWCE are required to take at least 9 credits in the minor field. A nonthesis option is available to some students, depending on prior training and experience, and subject to approval by the advisor and department head.

All students in the program must complete the following requirements:

- A ST 505 Statistical Inference I or equivalent
- One semester of Graduate Seminar (FWCE 515 Graduate Seminar - may be repeated for credit)
- A minimum of 3 additional credits from the Quantitative Methods category in addition to A ST 505 Statistical Inference I (eligible courses listed below)
- One course each from the Ecological Concepts, Organismal Biology and Ecological Techniques categories (eligible courses listed below)
- 4 to 9 credits from the Independent Study category (eligible courses listed below)

In addition, a student may petition to have up to 3 credits of special topics courses (FWCE 548 Graduate Problems) to apply to one of the three areas. Courses other than those listed may be acceptable, given permission by the student's supervisory committee

Degrees for the Department

Bachelor Degree(s)

- Conservation Ecology - Bachelor of Science in Conservation Ecology (p. 436)
- Fisheries and Wildlife Science (Aquatic Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology (p. 437)
- Fisheries and Wildlife Science (Wildlife Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology (p. 440)

Master Degree(s)

- Fish, Wildlife and Conservation Ecology - Master of Science (p. 162)

Doctoral Degree(s)

- Wildlife and Fisheries Ecology - Doctor of Philosophy (p. 242)

Minors for the Department

- Conservation Ecology - Undergraduate Minor (p. 443)
- Fish, Wildlife and Conservation Ecology - Graduate Minor (p. 255)
- Wildlife Science - Undergraduate Minor (p. 443)

Regents Professor, Martha Desmond, Department Head

Professors Boeing, Desmond, Frey, Jones; ***Associate Professor*** Gebreselassie; ***Assistant Professors*** Hernandez-Gomez, Klein, Lawson, Laverty, Pregler, Young

M.J. Desmond, Ph.D. (University of Nebraska)– avian ecology and conservation; W.J. Boeing, Ph.D. (Louisiana State University)– aquatic ecology; J.K. Frey, Ph.D. (University of New Mexico)– ecology and conservation of mammals; F.A. Gebreselassie, Ph.D. (University of Bern Switzerland)- Capture-recapture models, Integrated population models; O. Hernandez-Gomez, Ph.D. (Purdue University)- disease ecology, herpetology, conservation genetics; K. Jones, Ph.D. (University of Wisconsin-Madison)- human dimensions of conservation, environmental economics, evidence-based conservation; Z. Klein, Ph.D. (University of Idaho)-fish ecology, fisheries management, fish conservation, population ecology; A. Lawson, Ph.D. (Clemson University)- vertebrate population ecology, analytical tool development; T. Laverty, Ph.D. (Colorado State University)- applied population, community and conservation ecology; K.C. Pregler, Ph.D. (Colorado State University)- population and evolutionary ecology, conservation biology; A. Young, Ph.D. (University of Idaho) - Wildlife Conservation and Management, Avian Ecology, Quantitative Ecology

Fish, Wildlife and Conservation Ecology Courses

FWCE 1110G. Introduction to Natural Resources Management
4 Credits (3+2P)
This class covers historical and current issues affecting the management of renewable natural resources with an emphasis on water, soil, rangeland, forest, fish, and wildlife resources. An emphasis is placed on the scientific method and critical thinking. In the laboratory students collect and analyze field data on topics covered above and write up each unit as a laboratory report.
Learning Outcomes

1. Students should be able to recall, describe and explain the laws, treaties and acts that have led to our current management of natural resources in the United States.
2. Students should recognize or explain what ecological processes are, the importance of ecological processes in maintaining ecosystem function and how human activities change ecological processes and the ecosystems dependent on those processes.
3. In each of the six course and lab modules (water quality, soils, forestry, rangelands, wildlife and fisheries) students should be able to recall, describe and explain basic terminology, fundamental ecological principles and management techniques and challenges.
4. Students should be able to interpret data presented graphically and in tables from class exercises and lectures.
5. Students should be able to solve problems scientifically through field data collection, laboratory analyses and the use of quantitative methods (basic statistics, tables and graphs).

6. Students should be able to communicate results from laboratory exercises (6 lab modules) orally and in writing.
7. Students will learn to apply scientific thinking to real world problems through in class discussion and short essays based on material from case studies presented in class and guest speakers.

FWCE 1120. Contemporary Issues in Wildlife and Natural Resources Management
3 Credits (3)
Ecological, socioeconomic, and political issues surrounding the management of our natural resources with an emphasis on fish and wildlife resources.

FWCE 2110. Principles of Fish and Wildlife Management
3 Credits (3)
Basic principles of fish and wildlife management including history, ecology, economics, and policy. Emphasis on wildlife and fisheries. Uses an ecosystem approach integrating living and nonliving resources.
Prerequisite(s): FWCE 1110G.
Learning Outcomes
1. The goal of this course is to provide a firm foundation in the principles of wildlife and fisheries management.
2. Material will include a background in biological principles geared towards animal populations, characteristics and management of the habitats utilized by fish and wildlife, techniques used to study and manage animals and their habitats, and aspects of the human dimension involved in wildlife and fisheries issues.
3. This course serves as a core requirement for degrees offered in the Department of Fish, Wildlife and Conservation Ecology and as a required course for degrees in other departments such as Rangeland Resources.

FWCE 301. Wildlife Ecology
3 Credits (3)
General ecological theory with emphasis on concepts including how organisms interact with their abiotic environment and with each other, population dynamics, community and ecosystem ecology, and biogeography. Emphasis on how these concepts relate to the management and conservation of vertebrates.
Prerequisite: BIOL 2610G.
Learning Outcomes
1. Students can describe major concepts and theories in ecology that relate to Fish and Wildlife conservation and management (niche, succession).
2. Students will understand population dynamics.
3. Students will learn concepts related to density dependence, population growth, and carrying capacity.
4. Students will learn concepts related to species interactions (predator prey-dynamics, intra- and inter-specific competition, mutualism, and disease dynamics).
5. Students will understand concepts related to the abiotic component of the ecosystem.
6. Students can articulate principles of fishery and wildlife management and apply ecological principles to conservation.

FWCE 325. Human Dimensions of Fish and Wildlife
3 Credits (3)
This course provides a foundational understanding of multiple perspectives in human dimensions of fish and wildlife. The course provides the information needed to identify stakeholders, engage them, understand their concerns, and communicate management plans effectively. Specific topics include the social, psychological, and economic underpinnings of human interactions with wildlife; qualitative and quantitative methods to gather information from people; and ethical considerations. Students will be challenged to approach human dimensions of wildlife issues from multiple perspectives. While this course is focused on fish and wildlife, the concepts covered about human dimensions will be relevant to a broader audience interested in environmental and natural resource conservation, management, or stewardship.
Learning Outcomes
1. Students will learn about human-wildlife conflicts and strategies to mitigate those conflicts.
2. Students will understand how human values, attitudes, and behaviors influence fish and wildlife management.
3. Students will become familiar with stakeholder engagement and communication techniques able to communicate with non-scientist stakeholders.
4. Students will learn to use logic and reasoning to arrive to reasonable conclusions.

FWCE 330. Natural History of the Vertebrates
4 Credits (3+1P)
This course provides students with a foundation in vertebrate natural history, including the evolution, ecology, behavior, anatomy, and physiology of extant and extinct vertebrates. Field trips may be required.
Prerequisite: BIOL 2610G and BIOL 2610L.
Learning Outcomes
1. Students can identify common vertebrate taxa, arrange them into phylogenetic order, and describe their anatomy and physiology.
2. Students understand the major precepts of evolutionary biology.
3. Students are proficient in the use and application of peer-review literature (access, proper use).
4. Students can communicate effectively via technical writing.
5. Students can disseminate information via oral communication.
6. Students will understand concepts related to the abiotic component of the ecosystem.

FWCE 355. Wildlife Management and Analysis
4 Credits (3+1P)
This course is intended to provide a broad overview of basic skills and statistical interpretation that are commonly used by biologists in performing management, research, and reporting functions in natural resource fields with an emphasis on terrestrial wildlife techniques, study design, and data processing/analysis. Field trips may be required.
Prerequisite: FWCE 301 and A ST 311 or consent of instructor.
Learning Outcomes
1. Students can describe major concepts and theories in ecology that relate to Fish and Wildlife conservation and management (niche, succession).
2. Students will understand population dynamics.
3. Students are familiar with techniques used to study fish and wildlife (common capture marking methods).
4. Students can visualize and summarize ecological data using graphs and descriptive statistics.
5. Students can perform basic data analysis and interpret results to draw meaningful conclusions.
6. Students are familiar with common statistical software (R).
7. Students will develop professional (field skills) and interpersonal skills (working in groups).

FWCE 357. Fisheries Management and Analysis
4 Credits (3+1P)
Lectures and laboratory exercises provide a broad overview of basic skills and techniques used for assessing and managing fish populations.
Prerequisite: FWCE 301 and A ST 311.
Learning Outcomes
1. Students can describe major concepts and theories in ecology that relate to animal conservation and management, especially niche, habitat, succession, etc.
2. Students will understand concepts related to population ecology, especially density dependence, population growth and dynamics, metapopulation dynamics, and carrying capacity.
3. Students have hands-on experience with techniques used to study fish and wildlife (common capture marking methods).
4. Students can understand and apply the methods used to measure abiotic and biotic variables.
5. Students can visualize and summarize ecological data using graphs and descriptive statistics.
6. Students can perform basic data analysis and interpret results to draw meaningful conclusions.
7. Students understand the law and policy underlying fish and wildlife management and conservation (North American Model, Public Trust Doctrine).

FWCE 391. Internship
1-3 Credits (1-3)
Professional work experience under the joint supervision of the employer and a faculty member. No more than 3 credits toward a degree.
Learning Outcomes
1. Students are familiar with techniques used to study fish and wildlife (common capture marking methods).
2. Students are familiar with methods used to measure environmental variables.
3. Student can design basic scientific experiments.
4. Students are familiar with the scientific method and its application.
5. Students will develop professional (field skills) and interpersonal skills (working in groups).
6. Students will become familiar with stakeholder engagement and communication techniques able to communicate with non-scientist stakeholders.

FWCE 393. Professional Experience and Communication
3 Credits (3)
Professional work experience under the supervision of employer and/or a faculty member. Written report and presentation is required. Students will learn oral and written communication, interviewing, and networking skills.
Prerequisite/Corequisite: FWCE 2110.
Learning Outcomes
1. Communicate effectively via technical writing.
2. Disseminate information via oral communication.
3. Learn to use logic and reasoning to arrive to reasonable conclusions.
4. Develop professional (field skills) and interpersonal skills (working in groups).

FWCE 402. Seminar in Natural Resource Management
1 Credit (1)
Review and discussion of current topics in natural resource management.
Prerequisite: Senior standing or above.
Learning Outcomes
1. Students can describe major concepts and theories in ecology that relate to FW conservation and management.
2. Students can articulate principles of fishery and wildlife management and apply ecological principles to conservation.
3. Students can understand concepts related to interconnectedness of habitat, abiotic factors, and Fish and Wildlife species common to the Southwest.
4. Students can disseminate information via oral communication.
5. Students will learn to use logic and reasoning to arrive to reasonable conclusions.
6. Students will understand population dynamics.
7. Students will understand concepts related to the abiotic component of the ecosystem.
8. Students will understand genetic concepts as they relate to FW management and conservation.
9. Students will understand how human values, attitudes, and behaviors influence fish and wildlife management. 1
10. Students will become familiar with stakeholder engagement and communication techniques able to communicate with non-scientist stakeholders. 1
11. Students are familiar with the law and policy underlining fish and wildlife management and conservation.

FWCE 409. Introduction to Population Ecology
3 Credits (3)
This course introduces students to the fundamental concepts and principles of population ecology. It covers topics such as population growth and regulation, life history, species interactions, age-structured population models, and metapopulation dynamics. Students will develop skills in applying basic models and interpreting data, with introductory exposure to relevant software tools such as R and Program MARK. The course also emphasizes the role of population ecology in the management and conservation of animal populations.
Prerequisite: MATH 1430G and FWCE 2110.
Learning Outcomes
1. Describe and compare exponential and logistic models of population growth.
2. Construct and interpret simple life tables and basic matrix population models.
3. Explain factors influencing population regulation and viability.
4. Describe and analyze key species interactions (competition, predation) using graphical models.
5. Apply basic models to analyze population dynamics, including metapopulation dynamics.
6. Communicate core concepts and findings effectively through written assignments.

FWCE 425. Evidence-Based Conservation and Management
3 Credits (3)
This course will explore theories and concepts that are fundamental to applied conservation management and evaluation. There is increasing need to justify and evaluate conservation and management actions, and this course will provide students with the insight and knowledge on how to consult the best evidence in conservation planning and how to set up and evaluate a conservation action plan. This course also provides insight into systems thinking, which is needed to address the complex problems faced by conservation managers. Finally, this course teaches students a specific adaptive management framework that has been

adopted by several leading conservation organizations and agencies. While this course is focused on biodiversity conservation, the concepts covered about systems thinking and applied conservation planning and management will be relevant to a broader audience interested in environmental and natural resources management or stewardship.

Learning Outcomes

1. Students will understand how human values, attitudes, and behaviors influence fish and wildlife management.
2. Students will learn to use logic and reasoning to arrive to reasonable conclusions.
3. Students can disseminate information via oral communication.
4. Students are proficient in the use and application of peer-review literature (access, proper use).

FWCE 430. Avian Field Ecology
4 Credits (3+1P)

Principles of avian ecology and management with an emphasis on taxonomy, physiology, behavior and field studies. Includes weekly field trips focusing on identification and behavior of Southwest birds.

Prerequisite: FWCE 2110.

Prerequisite/Corequisite: FWCE 330 or Consent of Instructor.

Learning Outcomes

1. Students can understand concepts related to interconnectedness of habitat, abiotic factors, and Fish and Wildlife species common to the Southwest.
2. Students are proficient in the use and application of peer-review literature (access, proper use).
3. Students are familiar with the scientific method and its application.
4. Students can identify common vertebrate taxa, arrange them into phylogenetic order, and describe their anatomy and physiology.
5. Students can communicate effectively via technical writing.
6. Students will learn to use logic and reasoning to arrive to reasonable conclusions.
7. Students will develop professional (field skills) and interpersonal skills (working in groups).
8. Students can perform basic data analysis and interpret results to draw meaningful conclusions.
9. Students will learn concepts related to species interactions (predator prey-dynamics, intra- and inter-specific competition, mutualism, and disease dynamics). 1
10. Students will understand genetic concepts as they relate to Fish and Wildlife management and conservation (population size, connectivity, inbreeding depression).

FWCE 431. Mammalogy
4 Credits (3+1P)

This course provides an overview of the biology of Class Mammalia, the mammals. We will cover the classification, distribution, anatomy, physiology, life history, and ecology of mammals in lecture and learn to identify mammal orders, families, and species in lab with an emphasis on those found in the Southwest. Field trips may be required.

Prerequisite: FWCE 2110 and FWCE 330 or consent of instructor.

Learning Outcomes

1. Students can understand concepts related to interconnectedness of habitat, abiotic factors, and Fish and Wildlife species common to the Southwest.
2. Students can identify common vertebrate taxa, arrange them into phylogenetic order, and describe their anatomy and physiology.
3. Students are proficient in the use and application of peer-review literature (access, proper use).
4. Students will learn concepts related to species interactions (predator prey-dynamics, intra- and inter-specific competition, mutualism, and disease dynamics).
5. Students can communicate effectively via technical writing.
6. Students can disseminate information via oral communication.

FWCE 432. Environmental Biology of Fishes
4 Credits (3+3P)

What makes a fish, a fish? Mechanisms of circulation, gas exchange, osmotic and ionic regulation, swimming, migration, reproduction, and chemoreception will be covered in this class. Taught with FWCE 532.

Prerequisite(s): CHEM 1215G and senior standing.

FWCE 434. Aquatic Contaminants and Toxicology
4 Credits (3+3P)

Basic principles and methodologies of aquatic toxicity testing; routes of exposure and modes of action; environmental legislation and ecological risk assessment. Taught with FWCE 534. Crosslisted with: ENVS 434.

Prerequisite(s): CHEM 1215G and senior standing.

FWCE 437. Wildlife Damage Management
3 Credits (3)

Introduction to basic need and appropriate methods for resolving human-wildlife conflicts and management of animal damage. Socioeconomic, ecological, and political factors. Field trips required. Taught with FWCE 537.

Prerequisite: BIOL 2610G, FWCE 2110, FWCE 301, FWCE 409.

Learning Outcomes

1. Students can articulate principles of fishery and wildlife management and apply ecological principles to conservation.
2. Students are familiar with the scientific method and its application.
3. Students can disseminate information via oral communication.
4. Students will learn to use logic and reasoning to arrive to reasonable conclusions.
5. Students will learn concepts related to density dependence, population growth, and carrying capacity.
6. Students will learn concepts related to species interactions (predator prey-dynamics, intra- and inter-specific competition, mutualism, and disease dynamics).
7. Students will learn about human-wildlife conflicts and strategies to mitigate those conflicts.
8. Students are proficient in the use and application of peer-review literature (access, proper use).

FWCE 442. Wildlife Disease Ecology and Management
4 Credits (3+1P)

This course will provide students with an understanding of the ecological and evolutionary complexity inherent to host-pathogen interactions in wildlife systems. FWCE 442/542 introduces students to parasite and pathogen diversity, core concepts in disease ecology (e.g., pathogen population dynamics, transmission, disease models, virulence), host-pathogen coevolution, community ecology of host-pathogen interactions, and the importance of pathogens in conservation and management. In the laboratory, students will learn basic techniques to isolate pathogens from living organisms, detect pathogens using molecular tools, and model disease outbreaks using bioinformatics. Field trips are required.

Prerequisite: FWCE 2110, FWCE 330.

Learning Outcomes

1. Students can describe major concepts and theories in ecology that relate to Fish and Wildlife conservation and management (niche, succession).
2. Students can articulate principles of fishery and wildlife management and apply ecological principles to conservation.
3. Students understand the major precepts of evolutionary biology.
4. Students are familiar with techniques used to study fish and wildlife (common capture marking methods).
5. Student can design basic scientific experiments.
6. Students are proficient in the use and application of peer-review literature (access, proper use).
7. Students are familiar with the scientific method and its application.
8. Students can identify common vertebrate taxa, arrange them into phylogenetic order, and describe their anatomy and physiology.
9. Students can communicate effectively via technical writing. 1
10. Students can disseminate information via oral communication. 1
11. Students will develop professional (field skills) and interpersonal skills (working in groups). 1
12. Students can visualize and summarize ecological data using graphs and descriptive statistics. 1
13. Students can perform basic data analysis and interpret results to draw meaningful conclusions. 1
14. Students are familiar with common statistical software (R). 1
15. Students will understand population dynamics. 1
16. Students will learn concepts related to density dependence, population growth, and carrying capacity. 1
17. Students will learn concepts related to species interactions (predator prey-dynamics, intra- and inter-specific competition, mutualism, and disease dynamics).

FWCE 447. Wildlife Law and Policy
3 Credits (3)
Introduction to state and federal laws and policies for wildlife and the historical context for their development. Taught with FWCE 547.
Prerequisite: Junior or Senior level standing.
Learning Outcomes

1. Students will learn about human-wildlife conflicts and strategies to mitigate those conflicts.
2. Students will understand how human values, attitudes, and behaviors influence fish and wildlife management.
3. Students will become familiar with stakeholder engagement and communication techniques able to communicate with non-scientist stakeholders.
4. Students are familiar with the law and policy underlining fish and wildlife management and conservation (NAM, PTD).

FWCE 448. Problems
1-3 Credits (1-3)
Individual investigations in fishery or wildlife science. Maximum 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.
Prerequisite(s): 18 credits in WLSC.

FWCE 450. Special Topics
1-4 Credits (1-4)
Specific subjects and credits as announced in the Schedule of Classes. Maximum of 4 credits per semester. May be repeated up to 9 credits. Consent of Instructor required.

FWCE 457. Ecological Biometry
3 Credits (3)
This course introduces students to basic statistical methods used in ecology. Topics include data visualization, basic probability and probability distributions, estimation, hypothesis testing, and simple and multiple linear regression. Students will develop essential skills in summarizing and analyzing ecological data using R, a widely used open-source statistical software. Emphasis will be placed on practical application in ecological studies.
Prerequisite: MATH 1430G or MATH 1511G, A ST 311, FWCE 301.
Learning Outcomes

1. Demonstrate a solid understanding of basic statistical concepts and their application in ecology.
2. Summarize ecological data and create graphs and charts to effectively visualize it.
3. Apply common statistical methods to address real-world ecological questions.
4. Interpret results from statistical tests and draw inference from ecological data.
5. Develop skills in using R for ecological data analysis and visualization.
6. Communicate core statistical concepts and findings effectively through written assignments.

FWCE 459. Aquatic Ecology
4 Credits (4)
Ecological functions of plant and animal communities in aquatic ecosystems with emphasis on chemical and physical properties, productivity, species interactions, population dynamics, and concepts for diagnosing problems and restoring aquatic ecosystems. Taught with FWCE 559.
Prerequisite(s): FWCE 301 or BIOL 301, CHEM 1225G, MATH 1430G.

FWCE 464. Fish and Wildlife Management, Law, and Policy
3 Credits (3)
The course will focus on the policy and governance surrounding fish and wildlife management with the goal of preparing students for careers in fish and wildlife management.
Learning Outcomes

1. Students can apply the scientific method.
2. Students are proficient the finding, using and applying peer-review literature (access, proper use).
3. Students can communicate effectively via technical writing.
4. Students can disseminate information via oral communication.
5. Students understand the law and policy underlying fish and wildlife management and conservation (North American Model, Public Trust Doctrine).

FWCE 467. Herpetology
4 Credits (4)
Systematics, taxonomy, ecology, behavior, and conservation of amphibians and reptiles. Field trips required. Taught with FWCE 567.
Prerequisite(s): FWCE 330.

FWCE 471. GIS for Natural Resource Scientists
4 Credits (4)
Practical GIS class for students with little or no GIS experience. Class focuses on learning to use industry-standard software and applications in natural resource management. Taught with FWCE 571.
Learning Outcomes

1. Students can articulate principles of fishery and wildlife management and apply ecological principles to conservation.

2. Students can understand concepts related to interconnectedness of habitat, abiotic factors, and FW species common to the Southwest.
3. Students are familiar with methods used to measure environmental variables.
4. Students are familiar with the scientific method and its application.
5. Students will learn to use logic and reasoning to arrive to reasonable conclusions.
6. Students can perform basic data analysis and interpret results to draw meaningful conclusions.

FWCE 472. Wildlife Museum Internship
1-4 Credits (1-4)
Substantial directed work experience in various functions of the wildlife natural history museum developed by the student in consultation with the faculty curator. Internships may involve aspects of collection development and management, public education programs, or other related museum activities. Internship must be approved by the faculty curator. May be repeated up to 9 credits. Consent of Instructor required.
Prerequisite(s): BIOL 2610G and BIOL 2610L.

FWCE 482. Ichthyology
4 Credits (3+1P)
Fishes are an incredibly diverse group and have evolved numerous anatomical, physiological, behavioral, and ecological adaptations. In an effort to better understand how fish function within a broader ecosystem, we will take a holistic view of the group. We will first focus on the phylogeny, physiology, and anatomy of fishes such that we can better understand fishes within an ecological context in the later part of the course. Collectively, our treatment of fish should provide a broad overview that will improve your understanding of the form, function, and ecology of fishes.
Prerequisite: FWCE 330 or consent of instructor.
Learning Outcomes
1. Students will understand concepts related to conservation biology, especially the drivers of biodiversity patterns, biodiversity crisis and its causes, extinction vortex, etc.
2. Students will understand concepts related to the abiotic component of the ecosystem (biomes, lentic zones, nutrient cycling), with an emphasis on global change.
3. Students can identify common vertebrate taxa, arrange them into phylogenetic order, and describe their anatomy, physiology, and natural history.
4. Students can interpret and understand analytical results.

FWCE 509. Population Ecology
3 Credits (3)
This course introduces students to the fundamental theories and quantitative methods of population ecology. It covers topics such as population growth and regulation, demographic analysis, species interactions, and spatial population dynamics. Students will gain hands-on experience in applying these concepts by implementing relevant models and analytical techniques using the open-source statistical software R and Program MARK.
Learning Outcomes
1. Develop and apply deterministic and stochastic population growth models.
2. Construct and interpret life tables and matrix population models.
3. Assess population viability and metapopulation dynamics.
4. Examine species interactions using competition and predation models.
5. Apply quantitative methods to estimate population abundance and survival rates.

FWCE 510. Wildlife Ecology Teaching Practicum
3 Credits (3)
This doctoral-level practicum provides hands-on experience in teaching undergraduate courses in wildlife and fisheries ecology. Students will engage in course planning, instructional delivery, and assessment under faculty supervision. Emphasis is placed on applying evidence-based teaching practices, communicating ecological concepts effectively, and fostering inclusive learning environments. Participants will also reflect on their teaching, receive feedback, and develop a professional teaching portfolio. Designed for future educators and academic professionals, this course prepares students for teaching roles in higher education and science communication. May be repeated once for credit with departmental approval.
Prerequisite: Doctoral standing in the Department of Fish, Wildlife and Conservation Ecology.
Learning Outcomes
1. The students will effectively communicate scientific information verbally and in written format.
2. The students will understand how to conduct scholarly and professional activities in an ethical manner.
3. The students will demonstrate thorough knowledge of their chosen disciplines within fish, wildlife and conservation ecology.

FWCE 512. Scientific Writing
3 Credits (3)
This graduate-level course will guide students through the development of a scientific manuscript suitable for submission to a peer-reviewed journal. We will cover the structure of a scientific paper, how to approach drafting each section, as well as give guidance on the submission and peer-review process, and other ethical considerations such as coauthorship. By the end of this course each student will have produced a manuscript based on their research focus.
Learning Outcomes
1. The students will effectively communicate the importance of their research, research hypotheses, data collection and analytical methods, and study conclusions.
2. The students will effectively communicate their research in writing.

FWCE 515. Graduate Seminar
1 Credit (1)
Current topics.

FWCE 523. Model Selection and Multimodel Inference in Ecology
2 Credits (2)
This course will introduce students to the theory and practice of model selection and multimodel inference in ecology. Both techniques are widely used in ecology, natural resources, and related disciplines and have become essential tools in gaining reliable inference from data. A substantial number of novel model selection techniques have emerged in recent years, and are accompanied by their unique drawbacks and potential pitfalls. The objective of this class if to provide students with background knowledge to select the appropriate model selection and inferential tools and interpret the results with confidence and accuracy. The course will comprise a mixture of short lectures, lab exercises, and discussions of the primary literature. There are no course prerequisites, though students are encouraged to have successfully completed at least one semester of graduate-level statistics.

Learning Outcomes

1. Students will demonstrate theoretical and practical understanding of data analysis methods employed.
2. Students will correctly interpret the results of their data analyses.
3. The students will select and use the most appropriate research methodologies and technologies to address the research questions in their thesis/proposal.

FWCE 524. Structured Decision Making in Fish and Wildlife Management
3 Credits (3)

This course will introduce students to the theory and application of structured decision making (SDM). SDM incorporates human-centered values into the decision making process, identifies a set of actions to achieve those values, and creates models that connect actions to outcomes. Though SDM has long been used in business contexts, SDM has recently been applied to diverse problems in wildlife and fisheries management at local, state, and federal levels. Unlike other decision processes that strive to separate management and scientific endeavors, SDM is a collaborative process that unites managers and scientists, and adds transparency to decision making to promote buy-in and trust. The course will comprise a mixture of lectures, discussions of the primary literature, lab exercises, and mock workshop sessions.

Learning Outcomes

1. Students will demonstrate theoretical and practical understanding of the data analysis methods employed.
2. Students will correctly interpret the results of their analyses.
3. Students will select and use the most appropriate research methodologies and technologies to address the research hypothesis in their thesis/proposal.

FWCE 525. Evidence-Based Conservation and Management
3 Credits (3)

This course will explore theories and concepts that are fundamental to applied conservation management and evaluation. There is increasing need to justify and evaluate conservation and management actions, and this course will provide students with the insight and knowledge on how to consult the best evidence in conservation planning and how to set up and evaluate a conservation action plan. This course also provides insight into systems thinking, which is needed to address the complex problems faced by conservation managers. Finally, this course teaches students a specific adaptive management framework that has been adopted by several leading conservation organizations and agencies. While this course is focused on biodiversity conservation, the concepts covered about systems thinking and applied conservation planning and management will be relevant to a broader audience interested in environmental and natural resources management or stewardship.

Learning Outcomes

1. The students will effectively communicate the importance of their research, research hypotheses, data collection and analytical methods, and study conclusions.
2. The students will effectively communicate their research orally.
3. The students will develop professional working relationships with colleagues and agency personnel.

FWCE 526. Demographic Modeling and Bayesian Inference in Modern Wildlife Management
3 Credits (3)

This course introduces students to the practical application of demographic models in wildlife management. It explores how wildlife laws and regulations are created in the United States, how science is being formally incorporated into the regulatory process, and how advanced quantitative methods are used to connect wildlife ecology with wildlife law. Students will gain hands-on experience using popular software such as R and JAGS to implement these methods within a Bayesian framework.

Learning Outcomes

1. Explain how wildlife laws and regulations are developed and informed by science.
2. Apply advanced demographic models to analyze real-world wildlife datasets.
3. Demonstrate proficiency in statistical software for Bayesian analysis.
4. Interpret and effectively present quantitative findings for management decisions.

FWCE 530. Large Mammal Ecology, Conservation and Management
3 Credits (3)

This course will cover aspects of large mammal ecology, management and conservation. Will include aspects of foraging ecology, resource and habitat selection, competition and resource partitioning, predation and population dynamics. Taught with FWCE 436.

Learning Outcomes

1. Students possesses the ability to develop and articulate appropriate research hypotheses consistent with the overall goals of the thesis research project.
2. The students will effectively communicate their research in writing.

FWCE 531. Mammalogy
4 Credits (3+1P)

Classification, identification, anatomy, physiology, life history, and ecology of mammals. Field trips required.

Learning Outcomes

1. Students will demonstrate theoretical and practical understanding of the data analysis methods employed.
2. Students will effectively communicate their research in writing.
3. Students will effectively communicate their research orally.

FWCE 532. Environmental Biology of Fishes
4 Credits (3+3P)

What makes a fish, a fish? Mechanisms of circulation, gas exchange, osmotic and ionic regulation, swimming, migration, reproduction, and chemoreception will be covered in this class. Taught with FWCE 432; however, students are responsible for all requirements in FWCE 432, plus additional assignments.

FWCE 535. Special Topics
1-4 Credits (1-4)

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

FWCE 537. Wildlife Damage Management
3 Credits (3)

Introduction to basic need and appropriate methods for resolving human-wildlife conflicts and management of animal damage. Socioeconomic, ecological, and political factors. Field trips required. Taught with FWCE 437. Students are responsible for all requirements for FWCE 437 plus additional work. Prerequisite(s): BIOL 2610G, FWCE 2110, FWCE 301 and FWCE 409

FWCE 540. Wildlife Habitat Relationships
4 Credits (4)

The study of wildlife-habitat relationships primarily seeks to describe how the distribution and abundance of resources used for food, cover and security, and constraints on the use of these resources influence the distribution of animals. This course will cover aspects of animal

behavior related to how animals select habitat, theoretical models of habitat selection, the influence of inter- and intra-specific interactions on habitat selection, habitat quality, study designs for wildlife-habitat studies, modeling habitat selection and data analyses.

Learning Outcomes

1. Students can select and use the most appropriate data analysis methodologies given the research design and hypothesis being tested.
2. Students will demonstrate theoretical and practical understanding of the data analysis methods employed.
3. Students will correctly interpret the results of their data analyses.
4. Students will effectively communicate their research in writing.

FWCE 541. Conservation Genetics
3 Credits (3)

This course will provide a broad introduction to the use of molecular markers to address questions in ecology, evolution, behavior, and especially conservation. We will begin by learning about genetic variation and basic population genetic principles, then we will explore the applications of genetic markers for understanding relatedness, population structure, and conservation of biodiversity. Finally, we will discuss how to apply and interpret molecular approaches in conservation.

Learning Outcomes

1. Students will demonstrate theoretical and practical understanding of the data analysis methods employed.
2. Students will correctly interpret the results of their data analyses.
3. The students will effectively communicate the importance of their research, research hypotheses, data collection and analytical methods, and study conclusions.
4. The students will effectively communicate their research in writing.
5. The students will effectively communicate their research orally.

FWCE 542. Wildlife Disease Ecology and Management
4 Credits (3+1P)

This course will provide students with an understanding of the ecological and evolutionary complexity inherent to host-pathogen interactions in wildlife systems. FWCE 442/542 introduces students to parasite and pathogen diversity, core concepts in disease ecology (e.g., pathogen population dynamics, transmission, disease models, virulence), host-pathogen coevolution, community ecology of host-pathogen interactions, and the importance of pathogens in conservation and management. In the laboratory, students will learn basic techniques to isolate pathogens from living organisms, detect pathogens using molecular tools, and model disease outbreaks using bioinformatics. Field trips are required.
Prerequisite: FWCE 2110, FWCE 330.

Learning Outcomes

1. The students can formulate a scientifically sound study/research design linking the overall goals of the thesis research project with the research hypothesis.
2. Students can select and use the most appropriate data analysis methodologies given the research design and hypothesis tested.
3. The students will select and use the most appropriate research methodologies and technologies to address the research hypothesis in their thesis/proposal.
4. The students will effectively communicate the importance of their research hypothesis, data collection and analytical methods, and study conclusions.
5. The students will effectively communicate their research in writing.
6. The students will effectively communicate their research orally.
7. The students will develop professional working relationships with colleagues and agency personnel.

FWCE 546. Conservation Social Sciences
3 Credits (3)

This course provides an overview of social science concepts and research important to the conservation and management of wildlife and natural resources. The course will introduce students to the social, psychological, and economic underpinnings of human dimensions research, and specific approaches used to change human behaviors to improve conservation outcomes. Some of the approaches covered in the course include economic incentives, behavioral nudges, and community-based conservation. Additionally, the course will provide an overview of the methods used by conservation social scientists including participatory, qualitative, and quantitative methods. Students will be challenged to approach human dimensions issues from multiple perspectives. The concepts covered about human dimensions will be relevant to a broad audience interested in environmental and natural resource conservation, management, and stewardship.

Learning Outcomes

1. The students will select and use the most appropriate research methodologies and technologies to address the research hypotheses in their thesis/proposal.
2. The students will effectively communicate the importance of their research, research hypotheses, data collection and analytical methods, and study conclusions.
3. The students will effectively communicate their research in writing.

FWCE 547. Wildlife Law and Policy
3 Credits (3)

Introduction to state and federal laws and policies for wildlife and the historical context for their development. Taught with FWCE 447.

FWCE 548. Graduate Problems
1-3 Credits (1-3)

Individual studies in fishery and wildlife sciences. Maximum of 3 credits per semester. No more than 6 credits of this course and FWCE 598, combined, toward a degree. May be repeated up to 6 credits.

FWCE 557. Ecological Biometry
3 Credits (3)

This course introduces students to fundamental descriptive and inferential statistical methods commonly used in ecological research. Topics include data visualization, estimation, hypothesis testing, and statistical modeling. Students will develop essential skills in summarizing and analyzing ecological data using R, a powerful open-source statistical software. Emphasis will be placed on practical applications of statistics to real-world problems in ecology.

Learning Outcomes

1. Demonstrate a critical understanding of fundamental statistical concepts in ecological contexts.
2. Summarize and visualize ecological data.
3. Apply a range of statistical methods to address real-world ecological problems.
4. Interpret statistical findings and draw inference from ecological data.
5. Demonstrate proficiency in using R for ecological data analysis and visualization.

FWCE 558. Nonthesis Project
1-6 Credits (1-6)

Independent study to satisfy nonthesis project requirement. Maximum of 6 credits toward degree. Available only to nonthesis students. May be repeated up to 6 credits.

FWCE 559. Aquatic Ecology
4 Credits (3+1P)
Ecological functions of plant and animal communities in aquatic ecosystems with emphasis on chemical and physical properties, productivity, species interactions, population dynamics, and concepts for diagnosing problems and restoring aquatic ecosystems. Taught with FWCE 459.
Prerequisite: FWCE 301 or BIOL 301, CHEM 1225G, MATH 1430G.
Learning Outcomes
1. Students can possesses the ability to develop and articulate appropriate research hypotheses consistent with the overall goals of the thesis research project.
2. Students can select and use the most appropriate data analysis methodologies given the research design and hypothesis being tested.
3. The students will effectively communicate the importance of their research, research hypotheses, data collection and analytical methods, and study conclusions.
4. The students will effectively communicate their research in writing.
5. The students will effectively communicate their research orally.
6. The students will select and use the most appropriate research methodologies and technologies to address the research hypotheses in their thesis/proposal.
7. Students will correctly interpret the results of their data analyses.
8. Students can formulate a scientifically sound study/research design linking the overall goals of the thesis research project with the research hypothesis.

FWCE 567. Herpetology
4 Credits (3+1P)
Systematics, taxonomy, ecology, behavior and conservation of amphibians and reptiles. Field trips required. Taught with FWCE 467.
Learning Outcomes
1. The students can formulate a scientifically sound study/research design linking the overall goals of the thesis research project with the research hypothesis.
2. Students will demonstrate theoretical and practical understanding of the data analysis methods employed.
3. The students will select and use the most appropriate research methodologies and technologies to address the research hypothesis in their thesis/proposal.
4. The students will effectively communicate the importance of their research hypothesis, data collection and analytical methods, and study conclusions.
5. The students will develop professional working relationships with colleagues and agency personnel.

FWCE 571. GIS for Natural Resource Scientists
4 Credits (4)
Practical GIS class for students with little or no GIS experience. Class focuses on learning to use industry-standard software and applications in natural resource management. Taught with FWCE 471.
Learning Outcomes
1. Students can select and use the most appropriate data analysis methodologies given the research design and hypothesis being tested.
2. Students will demonstrate theoretical and practical understanding of the data analysis methods employed.
3. Students will correctly interpret the results of their data analyses.
4. Students will select and use the most appropriate research methodologies and technologies to address the research hypotheses in their proposal.

FWCE 582. Ichthyology
4 Credits (4)
Fishes are an incredibly diverse group and have evolved numerous anatomical, physiological, behavioral, and ecological adaptations. In an effort to better understand how fish function within a broader ecosystem, we will take a holistic view of the group. We will first focus on the phylogeny, physiology, and anatomy of fishes such that we can better understand fishes within an ecological context in the later part of the course. Collectively, our treatment of fish should provide a broad overview that will improve your understanding of the form, function, and ecology of fishes. Taught with FWCE 482.
Learning Outcomes
1. Students understand the major precepts of evolutionary biology.
2. Students can understand concepts related to interconnectedness of habitat, abiotic factors, and FW species common to the Southwest.
3. Students can identify common vertebrate taxa, arrange them into phylogenetic order, and describe their anatomy and physiology.
4. Students can communicate effectively via technical writing.
5. Students will develop professional (field skills) and interpersonal skills (working in groups).

FWCE 598. Special Research Programs
1-3 Credits (1-3)
Individual investigations, either analytical or experimental. Maximum of 3 credits per semester. No more than 6 credits of this course and FWCE 548, combined, toward a degree. Not available to students in the nonthesis program. May be repeated up to 6 credits.

FWCE 599. Master's Thesis
1-9 Credits (1-9)
Thesis. May be repeated up to 30 credits. Thesis/Dissertation Grading.

FWCE 690. Doctoral Seminar
1 Credit (1)
This doctoral-level seminar provides an interdisciplinary forum for engaging with a distinguished seminar series featuring guest speakers from academia, government agencies, national laboratories, non-governmental organizations (NGOs), and industry. Through weekly presentations and discussions, students gain exposure to cutting-edge research, policy-relevant insights, and real-world applications across a range of fields. The course emphasizes critical analysis, cross-sector dialogue, and professional development. Students will prepare for and respond to each seminar through guided readings, written reflections, and facilitated discussions. Designed to foster intellectual breadth and career-relevant perspectives, this seminar supports doctoral students in connecting their research to broader societal challenges and opportunities. May be repeated up to 2 credits.
Learning Outcomes
1. Students will demonstrate theoretical and practical understanding of the data analysis methods employed.
2. Students will correctly interpret the results of their data analyses.
3. The students will select and use the most appropriate research methodologies and technologies to address the research hypotheses in their thesis/proposal.

4. The students will effectively communicate the importance of their research, research hypotheses, data collection and analytical methods, and study conclusions.
5. The students will develop professional working relationships with colleagues and agency personnel.

FWCE 699. Doctoral Research
1-18 Credits (1-18)
Research units that are preformed prior to the students comprehensive exam. May be repeated up to 88 credits.
Learning Outcomes
1. Students will be able to formulate hypotheses and conduct research.
2. Students will demonstrate thorough knowledge of their chosen discipline in Fish, Wildlife and Conservation Ecology.

Conservation Ecology - Bachelor of Science in Conservation Ecology

Co-directors of the Program:

Professor, Charles Shuster, Department Head, Biology
Professor, Matthew Gompper, Department Head, Fish, Wildlife and Conservation Ecology

Professors Bailey, Boecklen, Boeing, Caldwell, Cowley, Desmond, Gompper, Hanley, Houde, James, Milligan, Roemer, Smith, Wright; ***Associate Professors*** Cain, Mabry; ***Assistant Professors*** Orr

New Mexico State University offers an interdisciplinary, undergraduate program in Conservation Ecology. The goal of this program is to train biologists for the current and future challenges that we face in the conservation and wise use of our Earth's natural resources. An overriding principle of the program is to provide a solid foundation in basic science coupled with a practical approach towards sustainability and stewardship. The curriculum encompasses several disciplines and includes a wide variety of courses from the Biology; Fish, Wildlife and Conservation Ecology; Geography; and Range Science departments.

The educational experience will provide students with an overview of global biodiversity and an understanding of the ecological and evolutionary processes that have created and sustained it. Courses in population and community ecology coupled with population viability analysis and risk assessment will give students the necessary background to understand the theory and development of these fields as well as the tools to tackle real-world problems. Courses in basic genetics, evolution, and conservation genetics will expose students to the importance of conserving genetic variation in order to maintain adaptive potential within populations, thereby sustaining the evolutionary process. Students will also receive background on wildlife law and environmental policy, information vital for assisting governing bodies in making decisions regarding the protection and wise use of our natural resources. Skills obtained in the application of geographic information systems, molecular genetics, and professional communication can also be acquired through various electives. In sum, we seek to provide undergraduate students with an education that will allow them the opportunity to contribute to the conservation of all life on Earth.

The requirements are listed below. In addition, each required course must be passed with a grade of C- or better.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

Prefix	Title	Credits
General Education		
Area I: Communications		
English Composition - Level 1 [1]		*4*
English Composition - Level 2		*3*
ENGL 2210G	Professional and Technical Communication (preferred)	
Oral Communication [1]		*3*
Area II: Mathematics		*3-4*
MATH 1430G	Applications of Calculus I [2]	
or MATH 1521G	Calculus and Analytic Geometry II	
Area III/IV: Laboratory Sciences and Social/Behavioral Sciences		*11*
CHEM 1215G	General Chemistry I Lecture and Laboratory for STEM Majors	
CHEM 1225G	General Chemistry II Lecture and Laboratory for STEM Majors	
Choose one from the following (3 credits):		
ECON 1110G	Survey of Economics	
ECON 2110G	Macroeconomic Principles	
ECON 2120G	Principles of Microeconomics Honors	
Area V: Humanities [1]		*3*
Area VI: Creative and Fine Arts [1]		*3*
General Education Elective		
FWCE 1110G	Introduction to Natural Resources Management	4
Viewing a Wider World		**3**
One VWW course will be met with the 9-credit rule [3]		
Major Requirements		
BIOL 2610G & BIOL 2610L	Principles of Biology: Biodiversity, Ecology, and Evolution and Principles of Biology: Biodiversity, Ecology, and Evolution Laboratory	4
BIOL 2110G & BIOL 2110L	Principles of Biology: Cellular and Molecular Biology and Principles of Biology: Cellular and Molecular Biology Laboratory	4
BIOL 301	Principles of Ecology	3
or FWCE 301	Wildlife Ecology	
BIOL 305	Principles of Genetics	3
or AGRO 305	Principles of Genetics	
BIOL 312	Plant Taxonomy	3
or RGSC 316	Rangeland Plants	
BIOL 313	Structure and Function of Plants	3
BIOL 322	Zoology	3
BIOL 455	Biometry	3
or FWCE 457	Ecological Biometry	
BIOL 462	Conservation Biology	3
BIOL 467	Evolution	3
BIOL 488	Principles of Conservation Genetics	3

FWCE 2110	Principles of Fish and Wildlife Management	3
FWCE 330	Natural History of the Vertebrates	4
FWCE 402	Seminar in Natural Resource Management	1
FWCE 409	Introduction to Population Ecology	3
FWCE 447	Wildlife Law and Policy	3
FWCE 464	Fish and Wildlife Management, Law, and Policy	3
Physiology Requirement		*3-4*
BIOL 314	Plant Physiology	
BIOL 354 & 354 L	Physiology of Humans and Laboratory of Human Physiology	
BIOL 381	Animal Physiology	
ANSC 370	System Physiology of Farm Animals	
FWCE 432	Environmental Biology of Fishes	
Diversity of Life Requirement		*6-8*
BIOL 480	Animal Behavior	
EPWS 303	Economic Entomology	
EPWS 462	Parasitology	
FWCE 430	Avian Field Ecology	
FWCE 431	Mammalogy	
FWCE 467	Herpetology	
FWCE 482	Ichthyology	
Non-Departmental Requirements (in addition to Gen.Ed/VWW)		
CHEM 2120 & 2120L	Integrated Organic Chemistry and Biochemistry and Integrated Organic Chemistry and Biochemistry Lab	4
Choose one from the following:		4
PHYS 1230G & PHYS 1230L	Algebra-Based Physics I and Algebra-Based Physics I Lab	
PHYS 2230G & PHYS 2230L	General Physics for Life Science I and Laboratory to General Physics for Life Science I	
Choose one from the following:		4
PHYS 1240G & PHYS 1240L	Algebra-Based Physics II and Algebra-Based Physics II Lab	
PHYS 2240G & PHYS 2240L	General Physics for Life Science II and Laboratory to General Physics for Life Science II	
Second Language: (not required)		
Electives, to bring the total credits to 120 [4]		**6-10**
Select additional electives to bring total to 120 credits including 48 upper division credits. [5]		
Total Credits		**120**

1. See the General Education (p. 262) Section of the catalog for a full list of courses.
2. Either MATH 1430G Applications of Calculus I or MATH 1521G Calculus and Analytic Geometry II is required for the degree but students may need to take any prerequisites needed to enter these courses.
3. One Viewing a Wider World (p. 266) course will be satisfied using the 9-hour rule: students with Biology as home department use FWCE courses and students with Fish, Wildlife and Conservation Ecology as home department use BIOL courses.
4. Other related courses may include BIOL 436 Disease Vector Biology, BIOL 442 Genomics Technology, BIOL 446 Bioinformatics and NCBI Database, BIOL 469 Biology of Emerging Infectious Diseases, ECON 337V Natural Resource Economics, GEOG 381 Cartography and GIS, GEOG 481 Fundamentals of GIS, GEOL 1110G Physical Geology, GEOL 424 Soil Chemistry, POLS 378 U.S.-Mexico Border Politics, RGSC 318 Watershed Management, RGSC 325 Rangeland Restoration Ecology, RGSC 452 Vegetation Measurements for Rangeland Assessment.
5. Elective credit may vary based on prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The elective credits in the requirements list is the amount needed to bring the total to 120 credits and may vary based on the degree. Students may need to complete more or less courses on a case-by-case basis and each student should discuss elective requirements with their advisor.

Second Language Requirement

For the Bachelor of Science in Conservation Ecology there is no second language requirement for the degree.

Fisheries and Wildlife Science (Aquatic Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology

The Department of Fish, Wildlife and Conservation Ecology prepares you for careers in a variety of natural resource fields related to the management of wild animal populations and the natural systems they share.

To graduate, an overall grade point average of 2.0 is required in courses taken in the major field and in all courses taken at NMSU. In addition, each required course must be passed with a grade of C- or better. The department offers a minor in Fish, Wildlife and Conservation Ecology for students majoring in other disciplines. The minor includes a minimum of 18 credit hours.

The Aquatic Ecology and Management Concentration is for students who want to focus on fish and aquatic systems.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.

The second VWW requirment (3 credits) may be filled with the 9-credit hour rule. Please see your advisor for more information.		
Departmental/College Requirements		
Departmental Core Courses (29 credits)		
FWCE 1110G	Introduction to Natural Resources Management [4]	4
or FWCE 1120	Contemporary Issues in Wildlife and Natural Resources Management	
FWCE 2110	Principles of Fish and Wildlife Management	3
FWCE 301	Wildlife Ecology	3
FWCE 330	Natural History of the Vertebrates	4
FWCE 391	Internship	1
FWCE 393	Professional Experience and Communication	3
FWCE 402	Seminar in Natural Resource Management	1
FWCE 409	Introduction to Population Ecology	3
FWCE 457	Ecological Biometry	3
FWCE 464	Fish and Wildlife Management, Law, and Policy	
or FWCE 325	Human Dimensions of Fish and Wildlife	
Departmental Botany Requirements (9 credits)		
BIOL 312	Plant Taxonomy	3
or RGSC 316	Rangeland Plants	
BIOL 313	Structure and Function of Plants	3
Select one from the following:		3
BIOL 314	Plant Physiology	
RGSC 325	Rangeland Restoration Ecology	
RGSC 357	Grass Taxonomy and Identification	
RGSC 440	Rangeland Resource Ecology	
Departmental Physiology Requirements (3-4 credits)		
Select 3-4 credits from the following:		3-4
ANSC 370	System Physiology of Farm Animals	
BIOL 314	Plant Physiology	
BIOL 381	Animal Physiology	
FWCE 432	Environmental Biology of Fishes	
Concentration Coursework		
Techniques		
FWCE 357	Fisheries Management and Analysis	4
Management		
Choose one from the following:		3-4
FWCE 434	Aquatic Contaminants and Toxicology	
FWCE 459	Aquatic Ecology	
RGSC 318	Watershed Management	
Organismal Biology		
Choose one from the following: [5]		3-4
EPWS 462	Parasitology	
FWCE 467	Herpetology	
FWCE 482	Ichthyology	
Wildlife Ecology and Management Electives [6]		*3-4*
Non-Departmental Requirements (in addition to Gen.Ed/VWW) [7]		
AGRO 305	Principles of Genetics	3
or BIOL 305	Principles of Genetics	
A ST 311	Statistical Applications	3
BIOL 322	Zoology	3
CHEM 1215G	General Chemistry I Lecture and Laboratory for STEM Majors	4
CHEM 1225G	General Chemistry II Lecture and Laboratory for STEM Majors	4
Select one from the following:		4
GEOL 1110G	Physical Geology	
SOIL 2110 & 2110L	Introduction to Soil Science and Introduction to Soil Science Laboratory	
Second Language: (not required)		
Electives, to bring the total credits to 120 [8]		**4-9**
Total Credits		**117**

1. MATH 1430G Applications of Calculus I or MATH 1511G Calculus and Analytic Geometry I is required for the degree but students may need to take any prerequisites needed to enter MATH 1430G or MATH 1511G first.
2. See General Education (p. 262) section of the catalog for a full list of courses.
3. See Viewing a Wider World (p. 266) section of the catalog for a full list of courses.
   Three credits can be taken inside the College of ACES, but three credits must also be taken outside the College of ACES or 9 credits can be taken within a single department (e.g. Biology) that is outside the College of Aces.
4. Off campus students can take FWCE 1120 Contemporary Issues in Wildlife and Natural Resources Management Distance Education.
5. At least one course chosen must be a vertebrate taxonomy course with FWCE prefix, i.e., one of FWCE 467 Herpetology or FWCE 482 Ichthyology.
6. Wildlife Concentration Electives (any course for 3-4 credits from the Techniques, Management or Organismal Biology areas):

   Techniques
   - FWCE 355 Wildlife Management and Analysis

   Management
   - FWCE 437 Wildlife Damage Management
   - FWCE 447 Wildlife Law and Policy
   - RGSC 325 Rangeland Restoration Ecology

   Organismal Biology
   - BIOL 484 Animal Communication
   - EPWS 303 Economic Entomology

- EPWS 462 Parasitology
- FWCE 430 Avian Field Ecology
- FWCE 431 Mammalogy
- FWCE 467 Herpetology

[7] Students intending to pursue graduate studies should also take CHEM 2115 Survey of Organic Chemistry and Laboratory.

[8] Elective credit may vary based on General Education course selection, prerequisites, dual credit, AP credit, double majors, and/or minor coursework. The amount indicated in the requirements list is the amount needed to bring the total to 120 credits and may appear in variable form based on the degree. However students may end up needing to complete more or less on a case-by-case basis and students should discuss elective requirements with their advisor.

Additional Electives

Take additional credits so the total adds up to at least 120 credits including 55 credits 300- and 400-level classes.

Students are encouraged to pursue a minor course of study with a department of their choosing.

Compatible minors include, but are not limited to:

- animal science,
- biology,
- chemistry,
- environmental science,
- forensic sciences,
- geography,
- journalism,
- management,
- and range science.

Notes:

1. No more than 6 credits of Physical Education classes will count towards your degree.
2. Maximum of two grades of 'D' in FWCE classes will count towards a student's degree.

A Suggested Plan of Study for Students

This roadmap assumes student placement in MATH 1430G Applications of Calculus I and ENGL 1110G Composition I. The contents and order of this roadmap may vary depending on initial student placement in mathematics and English. It is only a suggested plan of study for students and is not intended as a contract. Course availability may vary from fall to spring semester and may be subject to modification or change.

First Year		
Semester 1		**Credits**
MATH 1430G	Applications of Calculus I [1]	3
ENGL 1110G or ENGL 1110H	Composition I [1] or Composition I Honors	4
FWCE 1110G	Introduction to Natural Resources Management	4
ACES 1120	Freshman Orientation	1
Area V: Humanities Course [2]		3
	Credits	**15**
Semester 2		
BIOL 2610G & BIOL 2610L	Principles of Biology: Biodiversity, Ecology, and Evolution and Principles of Biology: Biodiversity, Ecology, and Evolution Laboratory [1]	4
FWCE 2110	Principles of Fish and Wildlife Management	3
Choose from one of the following:		3
ACOM 1130G	Effective Leadership and Communication in Agriculture	
COMM 1115G or HNRS 2175G	Introduction to Communication or Introduction to Communication Honors	
Area VI: Creative and Fine Arts [2]		3
Choose from one of the following:		3
ECON 2110G	Macroeconomic Principles	
ECON 2120G	Principles of Microeconomics Honors	
	Credits	**16**
Second Year		
Semester 1		
CHEM 1215G	General Chemistry I Lecture and Laboratory for STEM Majors [1]	4
FWCE 301	Wildlife Ecology	3
PHYS 1115G	Survey of Physics with Lab	4
Elective Course		4
	Credits	**15**
Semester 2		
CHEM 1225G	General Chemistry II Lecture and Laboratory for STEM Majors [1]	4
BIOL 2110G & BIOL 2110L	Principles of Biology: Cellular and Molecular Biology and Principles of Biology: Cellular and Molecular Biology Laboratory	4
BIOL 313	Structure and Function of Plants	3
Choose from one of the following:		4
FWCE 434	Aquatic Contaminants and Toxicology	
FWCE 459	Aquatic Ecology	
RGSC 318	Watershed Management	
	Credits	**15**
Third Year		
Semester 1		
ENGL 2210G or ENGL 2210H	Professional and Technical Communication or Professional and Technical Communication	3
BIOL 322	Zoology (Fall Only) [1]	3
A ST 311	Statistical Applications [1]	3
VWW: Viewing a Wider World Course [3]		3
Choose from one of the following:		4
SOIL 2110 & 2110L	Introduction to Soil Science and Introduction to Soil Science Laboratory [1]	
GEOL 1110G	Physical Geology [1]	
	Credits	**16**
Semester 2		
FWCE 330	Natural History of the Vertebrates (Spring Only) [1]	4
FWCE 357	Fisheries Management and Analysis (Spring Only in Even Years) [1]	4
Choose from one of the following:		4
EPWS 462	Parasitology	
FWCE 467	Herpetology [1]	
FWCE 482	Ichthyology [1]	

Elective Course		2
	Credits	**14**
Fourth Year		
Semester 1		
FWCE 391	Internship (Fall Only must be taken with FWCE 393) [1]	1
FWCE 393	Professional Experience and Communication (Fall Only Must be taken with FWCE 391) [1]	3
BIOL 312	Plant Taxonomy (Fall Only) [1]	3
FWCE 457	Ecological Biometry (Fall Only) [1]	3
FWCE 402	Seminar in Natural Resource Management	1
Choose from one of the following:		3
BIOL 305	Principles of Genetics [1]	
AGRO 305	Principles of Genetics [1]	
Elective Course		1
	Credits	**15**
Semester 2		
FWCE 409	Introduction to Population Ecology (Spring Only)	3
