How do Shakespeare's plays continue to speak to us through the medium of film? Written in a time of rapid social change,Shakespeare's plays invited audiences to think critically about the relationship between the self and others and to question conventions. Performances of Shakespeare have long been used to call out social injustice, from western anti-Semitism prior to World War II (The Merchant of Venice), to civil rights-era white supremacy in the US and apartheid in South African (Othello),and authoritarianism in the Arab Spring (Richard III). This course focuses on post-1980 Hollywood film versions of Shakespeare's plays and a few prior landmark adaptations around the world, examining how they use Shakespeare as a medium for debate and even a catalyst for social change.

Learning Outcomes

1. Demonstrate critical thinking by identifying issues and problems in the film adaptation of Shakespeare; 2 .Engage in intercultural reasoning and develop intercultural competence and historical consciousness in analyzing film adaptations from the US, Europe, and Asia;
2. Engage with questions of personal and social responsibility as explored in Shakespeare's plays and modern film adaptations;
3. Conduct effective research on a relevant topic, evaluating the validity and authority of secondary sources, synthesizing ideas, and drawing reasonable conclusions; 5 .Present independent research in collaboration with other student researchers and reflect on this teamwork experience

HNRS 2140G. Plato and the Discovery of Philosophy
3 Credits (3)
Examines arguments and theories found in the Platonic dialogues with a view to determining the nature and value of philosophy both from Plato's point of view and absolutely.
Prerequisite: A High School GPA of 3.75; or a NMSU cumulative GPA of 3.5 or higher.

Learning Outcomes

1. Students will evaluate a number of Plato’s dialogues to understand his doctrines and arguments.
2. Students will use their understanding to further evaluate why his philosophies have remained influential in modern, Western society and beyond.
3. Students will develop well-formulated, compelling arguments from philosophical texts.

HNRS 2141G. Bamboo and Silk: The Fabric of Chinese Literature
3 Credits (3)
Introductory survey of traditional and modern Chinese prose and poetry in translation with emphasis on genre, theme, and social/historical context.
Prerequisite: A High School GPA of 3.75; or a NMSU cumulative GPA of 3.5 or higher.

Learning Outcomes

1. Students will acquire extensive knowledge of one of the world's oldest and richest literary traditions.
2. Not incidentally, students will also gain knowledge of China's history and philosophical traditions.
3. As this class is based on reading, writing, and discussion, students will hone their interpretive and expressive skills.

HNRS 2145G. Celtic Literature
3 Credits (3)
This course provides an overview of the most important early literary works of the so-called Celtic nations, principally Ireland and Wales, from a literary and historical approach. This literature stems from the period 600-1200 and ends with the development of the Romances under influence from the French

Learning Outcomes

1. Students will learn the concept of the international folk tale,
2. Students will learn about the history of the Celts
3. Students will learn about the concept of Celtic nations' formed during the 19th Century.
4. Students will enhance critical thinking skills.
5. Students will enhance written and oral communication.

HNRS 2160G. New Testament as Literature
3 Credits (3)
Literature of the New Testament examined from a literary perspective. Emphasis on translation history of the New Testament, generic features of gospel, epistle and apocalypse, precedent literary models, problems of authorship, classification of New Testament texts.
Prerequisite(s): A High School GPA of 3.75; or a NMSU cumulative GPA of 3.5 or higher.
Learning Outcomes
1. Students will hone critical thinking skills by analyzing arguments and controversies surrounding the roots of Christianity.
2. Students will discern and discuss the viability of both literary and historical sources with debated authorship, dating, and interdependency.
3. Students will practice interpersonal navigation and maintaining an academic environment of respect as they discuss a number of topics that can be considered controversial or subjective.

HNRS 2161G. Window of Humanity
3 Credits (3)
Anthropology is the most humanistic of the sciences, and the most scientific of the humanities. This course will use anthropological perspectives to examine the human experience from our earliest origins, through the experiences of contemporary societies. We will gain insights into the influence of both culture and biology on shaping our shared human universals, and on the many ways in which human groups are diverse.
Prerequisite: A High School GPA of 3.75; or a NMSU cumulative GPA of 3.5 or higher.
Learning Outcomes
1. Explain the concepts that define Anthropology (along with its subfields) as a specific research discipline.
2. Possess a growing vocabulary for anthropology, cultural study, ethnographic research and writing that will empower them as they continue with their degrees and professional careers.
3. Recognize how Anthropological concepts, terms, and methods are valuable for present-day concerns and how these tools can be used to engage life and the world at large.

HNRS 2165G. Introduction to Humanities in the 21st Century
3 Credits (3)
An exploration of the global humanities according to its various manifestations: environmental, public, digital, and applied.
Learning Outcomes
1. Articulate what the humanities are and what role they have played in education throughout the ages
2. Critically analyze and communicate orally and in writing various humanities concepts and global interconnections among peoples and cultures.
3. Describe, through the study of the global humanities, how cultural contexts and human practices influence individuals and societies.
4. Apply the knowledge and skills gained through the study of the global humanities to explore their majors, their career goals, and the responsibilities of individuals in their communities.
5. Demonstrate information literacy and technological skills in researching and presenting themes related to the global humanities.
6. Reflect on the effects of the global humanities on individuals.

HNRS 2170G. The Human Mind
3 Credits (3)
The primary course objective is to develop an appreciation of the variety and complexity of problems that are solved by the human mind. The course explores how problems are solved by a combined computational analysis (computational theory of mind), and evolutionary (evolution by natural selection) perspective. The mind is what the brain does (i.e. information processing) and the brain is a computational device that is a product of evolution by natural selection. Note that this is not a neuroscience course, we will be focusing on the mind (what the brain does) rather than on the brain. Restricted to Las Cruces campus only.
Learning Outcomes
1. Enhance written and oral communication
2. Stimulate critical thinking and learn to weigh scientific evidence
3. Challenge students to make ethical decisions and promote personal and social responsibility

HNRS 2172G. Archaeology: Search for the Past
3 Credits (3)
A critical evaluation of various approaches to understanding prehistory and history. The methods and theories of legitimate archaeology are contrasted with fantastic claims that invoke extraterrestrials, global catastrophes, transoceanic voyages, and extra-sensory perception.
Prerequisite: A High School GPA of 3.75; or a NMSU cumulative GPA of 3.5 or higher.
Learning Outcomes
1. Identify, describe, and explain how human lifeways changed in diverse communities in different parts of the globe.
2. Select and use relevant archaeological evidence to articulate how people's beliefs and values were influenced by politics, geography, economics, culture, biology, history, and social institutions in the past.
3. Analyze the significance of archaeological artifacts in context and explain their relevance to understanding relations among individuals, their society, and the environment.
4. Evaluate how practices in research, conservation, and tourism to archaeological sites promote ethical stewardship of non-renewable archaeological resources.
5. Design a study tour to archaeological sites that will address a key question or argument in prehistory and promote historic/archaeological preservation.

HNRS 2175G. Introduction to Communication Honors
3 Credits (3)
Study and practice of interpersonal, small group, and presentational skills essential to effective social, business, and professional interaction. May be repeated up to 3 credits.
Prerequisite: A High School GPA of 3.75; or a NMSU cumulative GPA of 3.5 or higher.
Learning Outcomes
1. Analyze and evaluate oral and written communication in terms of situation, audience, purpose, aesthetics, and diverse points of view.
2. Express a primary purpose in a compelling statement and order supporting points logically and convincingly.
3. Use effective rhetorical strategies to persuade, inform and engage.
4. Employ writing and/or speaking processes such as planning, collaborating, organizing, composing, revising editing to create presentations using correct diction, syntax, grammar and mechanics.
5. Integrate research correctly and ethically from credible sources to support the primary purpose of a communication.
6. Engage in reasoned civil discourse while recognizing the distinctions among opinions, facts, and inferences.

HNRS 2178G. Theatre: Beginnings to Broadway
3 Credits (3)
Intercultural and historical overview of live theatre production and performance, including history, literature and professionals. Students attend and report on stage productions. May be repeated up to 3 credits.
Prerequisite: A High School GPA of 3.75; or a NMSU cumulative GPA of 3.5 or higher.
Learning Outcomes
1. Distinguish and differentiate the characteristics of theatre from other art forms.
2. Describe the major components of a theatrical event.
3. Describe the functions of various theatre personnel.
4. Define specific terms relating to the study of theatre.
5. List and describe the parts of a play.
6. Define the different parts of plot.
7. Critique plays.
8. Describe the characteristics of theatre in the different periods of history.
9. Develop an appreciation for theatre as an art form and a reflection of society.

HNRS 2180G. Citizen and State Great Political Issues
3 Credits (3)
The fundamental questions of politics: why and how political societies are organized, what values they express, and how well they satisfy those normative goals and the differing conceptions of citizenship, representation, and freedom.
Prerequisite: A High School GPA of 3.75; or a NMSU cumulative GPA of 3.5 or higher.
Learning Outcomes
1. Students will investigate the fluid state of American politics by discerning the decisions and policies of a selection of presidents.
2. Students will investigate the complex operations behind a representative democracy.
3. Students will examine how the sociopolitical environment surrounding a president influences his policies, and how a president's policies affect the broader society.
4. Students will assess and measure how politics can be affected by active and engaged citizens.

HNRS 2190G. Claiming a Multiracial Past
3 Credits (3)
Survey of history of the United States in the nineteenth and twentieth centuries, with an emphasis on multicultural social and cultural history. Focus on understanding American history from the point of view of dispossessed, impoverished, and disenfranchised Americans who have fought to claim both their rights as Americans and American past.
Prerequisite: A High School GPA of 3.75; or a NMSU cumulative GPA of 3.5 or higher.
Learning Outcomes
1. Students will contextualize the current state of American "being" by focusing on the multicultural-social and cultural history of the U.S. in the nineteenth and twentieth centuries.
2. Students will hone public speaking and presentation skills through classroom discussions and activities.
3. Students will practice interpersonal navigation and maintaining an academic environment of respect as they discuss a number of topics that can be considered controversial or subjective.

HNRS 2996. Special Topics
1-3 Credits (1-3)
Special course offerings, with unique titles listed in Schedule of Classes. May be repeated up to 6 credits.
Learning Outcomes
1. Students will experience multiple topics by different professors and departments.

HNRS 303 V. Personal Financial Planning and Investing in a Global Economy
3 Credits (3)
Provides a framework for successful personal financial planning within an individual's career and income. Covers personal money management, federal and state taxation, the mathematics of finance and credit, housing, inflation, insurance, savings, and investments. Majors and minors may not use this course to satisfy their finance requirements.
Learning Outcomes
1. Students will develop an understanding of how globalization and international affairs impact their personal financial planning.
2. Students will develop an understanding of how knowledge from a variety of disciplines, including capital market history, the political environment, government, mathematics, behavioral economics, and statistics, are important to financial planning.
3. Students will develop an understanding of the core areas of a personal financial planning course which include: the financial planning process, time value of money, measuring financial health, tax planning, liquid asset management, the role of credit, consumer loans, home and auto financing, investment basics, domestic and international securities markets, bond investing, equity investing, mutual funds and retirement planning.
4. Students will integrate knowledge of international financial markets into the personal financial planning process by developing and writing their own personal financial plan.

HNRS 304V. Dilemmas of War and Peace
3 Credits (3)
A multi-disciplinary introduction to war, peace, and world order studies. The origins of war and the foundations of peace are explored in the context of a rapidly changing world order.

HNRS 305V. Is Fake News Real: Journalism, Community, and Mass Communications
3 Credits (3)
Overview of how technology, money, politics, and human desire have changed journalism since 1963. Explores role of journalism in news dissemination, influencing opinion, and political behavior. Course includes guest lectures from regional journalists and media experts.

HNRS 306V. Science, Ethics and Society
3 Credits (3)
Investigation of the ethical issues related to scientific investigation and the ethical implications of scientific discoveries for society. Emphasis on discussion of case studies about specific ethical issues in science, and readings by both scientists and non-scientists.

HNRS 308V. Into the Final Frontier
3 Credits (3)
Exploration of space; a brief review of the history of space flight, the Apollo program, joint U.S.-Soviet space missions, and unstaffed exploration of the planets. Emphasis on knowledge gained through these efforts. Includes new space initiatives. May be repeated up to 3 credits.

Learning Outcomes

1. Students will be able to compare and contrast previous history with current global events.
2. Students will able to use perspectives from history to draw conclusions about the geopolitical, economic, ethnic, and cultural outcomes of current geopolitical policies and events (especially as they relate to expanding the space frontier), and to draw your their conclusions.
3. Students will understand how critical it is to the human conditon that humanity is always breeching a PHYSICAL frontier.

HNRS 309. Honors Global Citizenship
3 Credits (3)

University students live in an age of globalization with daily impacts on every aspect of their lives. Combining explorations of the dimensions of global citizenship with an international abroad experience, this seminar is designed to help students become more internationally informed, interculturally competent, and globally minded as they learn about the experiences of citizens in other parts of the world and reflect about their own place in the world in new ways. May be repeated up to 6 credits.

Learning Outcomes

1. Identify dimensions of globalization and how they impact citizens from the local to the global.
2. Describe and reflect appreciation for unique cultural-historical contexts and how these shape personal judgments and world views.
3. Explain how national identities have significance for global citizenship – including students' identities as Americans abroad.
4. Demonstrate intercultural competence through both travel and engagement with others while abroad.
5. Synthesize lessons from content and experiences to develop a personal statement about global citizenship as a concept and as a personal identity with plans for future action.

HNRS 3110V. Human Sexuality
3 Credits (3)

Examination of human sexuality from a variety of perspectives: cultural, sociological, physiological and psychological. Issues examined from viewpoints such as gender, individual, family, and professional roles.
Prerequisite: 3.5 GPA for continuing student, 3.75 for incoming High School student, and/or Crimson Scholar status.

Learning Outcomes

1. Understand the cultural and historical inputs resulting in our current understanding of the human sexual experience.
2. Examine the early and modern researcher in the field of human sexuality, along with an overview of basic research skills.
3. Study gender roles and similarities and differences between men and women.
4. Examine male and female reproductive anatomy and the physiology of sexual arousal.
5. Identify the factors affecting love and attraction, and the development of relationships.
6. Discuss homophobia and the factors associated with negative attitudes toward homosexuality.
7. Identify and discuss current techniques of contraception along with fertility problems.
8. Discuss the sexual behavior of adults.
9. Examine the medical, relational, and stress factors related to sexual dysfunction. 1
10. Learn the facts and fallacies about sexually transmitted diseases. 1
11. Identify the continuum of behaviors related to paraphililias. 1
12. Examine sexual coercion and violence.

HNRS 3115V. Service Learning through Civic Engagement
3 Credits (3)

This class focuses on academic service learning through Civic Engagement. Academic service learning is a high impact form of pedagogy that integrates community-based service or outreach with classroom instruction to enhance both student learning and promote values of constructive civic engagement. This project-based class is designed to help make linkages between the academic world and the community by providing students with a supervised experience implementing service activities to meet an identified community need. Students learn about the world and the importance of their involvement in working with vulnerable, marginalized populations and the barriers these populations experience. Such barriers are legal, historical, related to discrimination and biases, misinformation, and etc. From explorations of root causes of problems and the development of objectives to the challenges of implementation and assessment, students will be encouraged to think more critically about social problems and the complexity of identifying lasting solutions.
Prerequisite: 3.5 GPA for continuing students, 3.75 for incoming High School students, and/or Crimson Scholar status.

Learning Outcomes

1. Describe the process required to assess real world community problems.
2. Clarify short- and long-term goals and objectives for any project.
3. Synthesize and analyze information to solve a complex problem that have multiple solutions.
4. Apply knowledge and concepts to new situations.
5. Identify, analyze, and reflect on core concepts related to service learning and constructive civic engagement.
6. Reflect on their service to enhance their personal development as active citizens.
7. Successful engagement with a local community organization that serves vulnerable populations.

HNRS 314. Successful Fellowship Writing
1 Credit (1)

Provides scholars with hands-on skills to complete proposals for scholarships and fellowships, such as the Truman, Rhodes, Marshall, Goldwater, Udall, and others. Other skills include how to write resumes, develop general research skills, and find grant and foundation sources.

HNRS 317V. Cultural Lessons on Nazism
3 Credits (3)

Examination of the values and cultural manifestations of fascism in the period 1918-45 with multidisciplinary emphasis on European forms of fascism, particularly German Nazism. Course features a survey of literary, dramatic, poetic, cinematic, and artistic treatments of human behavior leading up to fascism, living under fascist rule, and coming to grips with the consequences of war and genocide.

HNRS 318V. The World of Cinema
3 Credits (3)

Appreciation of the art of motion pictures as world-wide medium specific to national cultures. Refinement of cinematic literacy and critical viewing skills. Historical and thematic overview emphasizes collaborative nature of medium in various genres from 1895 to present. Selected films from different periods and different countries. Substantial library research projects.

HNRS 321V. Agriculture in an Interconnected World
3 Credits (3)
Study of the impact of agriculture on cultural and social systems, with special emphasis on twentieth century urban development.

HNRS 324V. Science and the Arts: Theatre and Story
3 Credits (3)
This course examines present day relations between the sciences and the representation and communication of science, especially in connection with theatre, narrative fiction, and autobiography.

HNRS 325V. Insects, Humans, and the Environment
3 Credits (3)
Overview of the interactions of the world's largest group of organisms with humans. Emphasizing the role of insects in the development of human cultures, including health, food and fiber production, art, music, and environmental issues; with discussions of historic, present-day, and future impacts in underdeveloped, developing, and developed civilizations. Students with an Honors designation will have additional assignments that require them to synthesize information from primary literature sources.

Learning Outcomes

1. Students will gain sufficient knowledge in the prevalence and magnitude of insects in the world and their interactions with humans.
2. Students will learn how insects influence development of human culture, art, music, and environmental issues.
3. Students will conduct assignments and final projects that further enhance their knowledge of insects in the environment and how to collect samples through independent projects.
4. Students with an Honors designation will have additional assignments that require them to synthesize information from primary literature sources.

HNRS 326V. Art and Mythology
3 Credits (3)
Mythological figures, past and present, in the visual arts. Through iconographical studies (attributes and symbols), trace the development of visual traditions that evolved from the literary sources of classical Mediterranean mythology.

HNRS 328V. Rock History: 20th Century Popular Music
3 Credits (3)
Evolution of popular music in the 20th Century. Examines the history of popular music conventions, influences, and breakthroughs through the 20th Century. Topics include the originations of major music styles and their evolution as cultivated by key artists, scientific advancements, and sociopolitical change, contextualized within the contemporaneous history. Of particular concern are the influences of groundbreaking artists; the effect of evolving playback electronics, recording devices, and musical instruments; and the interplay between music and economic depression, war, civil rights, sexual revolution, and other sociopolitical events. May be repeated up to 3 credits.

Learning Outcomes

1. Develop active listening skills by using the various book listening guides and homework assignments/listening projects.
2. Recall the names of major performers and recordings from each style period of popular music, offer specific work examples, and develop a general understanding of the evolutional nature of popular music as it moves through the various large style periods surveyed in the textbook.
3. Apply terminology learned throughout the class to your active listening experiences.
4. Apply the skills you learn from the textbook and through homework assignments to independent listening experiences.
5. While totally subjective, using your learned active listening skills, develop your own aesthetic for what you like and don't care for from the numerous genres found throughout the various periods of popular music. (Don't worry; there's no "wrong" answer here!)
6. Develop a broader worldview of the possible future for popular music and explore a broader range of musical styles beyond the mainstream.

HNRS 335V. Legal Issues in Modern Society
3 Credits (3)
Case study approach to contemporary legal problems involving environment, consumer protection, international law, corporate responsibility.

HNRS 336V. Testimonios from the Borderlands
3 Credits (3)
This course is about the testimonies (testimonios) and autobiographical writings about and by Latinas in the United States. Life stories are told through many forms: "testimonios," memoirs, autobiographies and autobiographical fiction, oral histories and short stories, poetry and poetic prose pieces, essays, and audio-stories. The course focuses on testimonios as method, epistemology, and pedagogy. Among the questions we will examine will be those concerning knowledge production, sexual politics, the mind-body-spirit connection, voice, representation, and truth. May be repeated up to 3 credits.

Learning Outcomes

1. The course focuses on testimonios as method, epistemology, and pedagogy. Among the questions we will examine will be those concerning knowledge production, sexual politics, the mind-body-spirit connection, voice, representation, and truth.

HNRS 341V. The Old Testament as Literature
3 Credits (3)
Old Testament surveys a portion of the thirty-nine canonical books of the Old Testament from a literary approach, centered on the so-called historical-critical method that developed in the 19th C under such figures as Julius Wellhausen. Higher criticism of the texts, their sources, authorship, dating and interdependency has led to deepened insights as well as scholarly conflict. In addition, we will examine several apocryphal books that have continuing importance in our understanding of Old Testament. We will read the Old Testament along with an introduction and some supplementary materials.

HNRS 347V. World Dance
3 Credits (3)
Examination of dance forms from a cross-cultural perspective, focusing on the role of dance in different cultures around the globe. Same as DANC 3510V with differential assignments for Honors students. May be repeated up to 3 credits.

HNRS 348V. Comparative Mythology: Myth, Ritual, and the Life Cycle
3 Credits (3)
Exploration of the central myths of several religious traditions and investigation of how each, through ritual, has given meaning to key moments in the journey of the individual through life.

HNRS 353V. Justice without Prejudice
3 Credits (3)
Exploration of central questions about race, ethnicity, and justice. Students will learn to argue persuasively from different perspectives, both orally and in writing. May be repeated up to 3 credits.

Learning Outcomes

1. Through this course, we will explore the diversity and commonality of Latina/x experiences. We will each write our own scripts, narrate them, scan and apply images to the narration and add music and special effects.

HNRS 370V. Design: The Creative Act
3 Credits (3)
Explores the nature of design and what it means to design in various diverse media. Included are creative efforts in writing, art, music, and technology. Commonalities and differences are considered.

HNRS 374V. The European City: History and Culture
3 Credits (3)
Historical overview of development, growth, and culture of European cities.

HNRS 378V. Technology and Policy
3 Credits (3)
Study of the processes through which society sets goals for science and technology, of the allocation of resources needed to achieve these goals, and of the obligations and conflicts that develop as the goals are realized. International comparisons of public policies.

HNRS 381V. Economic Development of Latin America
3 Credits (3)
Economic analysis of problems related to development in Latin America, including the agrarian problem, debt and austerity programs, industrialization, inflation and unemployment, the drug trade, U.S.-Latin American relations, development strategies. Also individual counties' problems.
Prerequisite(s): 3.75 High School GPA; or NMSU cumulative GPA of 3.50; and/or Crimson Scholar status.
Learning Outcomes

1. Analysis of problems related to economic development in Latin America.

HNRS 387V. Comparative Perspectives on Women
3 Credits (3)
The history, antecedents, and consequences of sex and gender systems around the world from the perspective of sociology, anthropology, and psychology. May be repeated up to 3 credits.
Learning Outcomes

1. Identify and evaluate multiple scholarly approaches to the study of gender and identity.
2. Develop and employ analytical and critical thinking skills.
3. Demonstrate proficiency in oral and written communication.
4. Understand and demonstrate ability in discuss the complicated ways in which political/economic/cultural sites discipline/produce subjects and the ways in which power emerges to create intersectional barriers and concerns (overlaps in institutional sexism/racism, etc).
5. Integrate and synthesize knowledge of gender-related topics in a scholarly research paper.

HNRS 388V. Leadership and Society
3 Credits (3)
Exploration of the multifaceted nature of leadership in modern society through readings and seminar discussion. May be repeated up to 3 credits.
Learning Outcomes

1. Students will gain understanding of ethical principals of leadership.
2. Students will be able to apply ethical principals of leadership.
3. Students will be able to identify differing ways of enacting leadership across different cultures.

HNRS 390V. Worlds of Buddhism
3 Credits (3)
This course is an introduction to Buddhism and its contribution to the formation of (East) Asian cultures. It provides students with Buddhist and (East) Asian "case studies" - i.e., examples of the ways in which Buddhism has influenced, and has been influenced by, the region's various cultural and social milieus over time. The course is designed to offer opportunities to critically reflect on Buddhism as a transformative philosophical, cultural and individual system. May be repeated up to 3 credits.
Learning Outcomes

1. Use analytic skills in interpreting historical changes and continuity.
2. Critically interpret significant primary texts and/or works of art, and learn how to evaluate varying historical interpretations.
3. Evaluate the chronological and geographic context of important historical events.
4. Identify the social, cultural, and political components of the societies under study in this course.
5. Conduct independent research and synthesize your interests with the required material.

HNRS 394V. Southwestern and Border Literature
3 Credits (3)
Introduction to the culturally diverse literature of the American Southwest and borderlands region. Class analyzes evolution of the Southwest concept and considers degree to which the existence of a borderlands culture is manifest in literature.
Prerequisite: honors eligibility.

HNRS 400. Honors Capstone
3 Credits (3)
Independent-study research and writing project to be carried out under the supervision of a faculty member. Consent of instructor required. May be repeated up to 6 credits.
Learning Outcomes

1. Students will apply concepts from their discipline in the development and implementation of a capstone research or creative activity project.

HNRS 410. Honors Internship
3-6 Credits
Assignments in departments to be supervised by faculty in the area. A cumulative 3.5 GPA is required. May be repeated up to 12 credits.
Learning Outcomes

1. Students will experience professional development through participating in an internship with a professional organization.

HNRS 4110. U-RISE Seminar
1,3 Credits
This course is only available to students in the U-RISE program at NMSU. This course is part of that program. It includes a two-year research education program bolstered by this inclusive and affirming honors seminar series which is built into students' curriculum and a summer internship at a research-intensive institution. Complementary activities are focused on the acquisition of knowledge, skills, and confidence building in five major areas that will prepare undergraduate student researchers to fulfill their potential toward achieving their career goals in biomedical sciences. These include: basic research skills, a quantitative-based approach to analyze and solve problems, scientific communication

skills, building professional networks, and development of a science identity. May be repeated up to 12 credits.

Learning Outcomes

1. Students will be able to clarify their scientific values, interests, strengths and skills.
2. Students will be able to discuss and detail the graduate admission process and requirements to obtain an advanced degree.
3. Students will be able to cultivate a professional network among student peers and faculty at NMSU.
4. Students will be able to articulate (communicate) their scientific knowledge and research skills to a wide range of community audiences (through written and oral presentations – "data blitzes", "elevator pitches," email and social media outlets).
5. Students will be able to represent themselves effectively to prospective graduate programs (through written documents, online presence, and skillful oral communication).
6. Students will be able to identify and research a wide variety of summer research internships and graduate programs.
7. Students will be able to navigate and plan for scientific and professional opportunities at a national meeting.

HNRS 411V. Great Theorems in Mathematics

3 Credits (3)

Same as MATH 411V.

Prerequisite: Grade of C- or higher in MATH 1531, or grade of B or higher in any upper-division math course, or consent of instructor.

Learning Outcomes

1. At the end of this course, students will be able to: Describe the history of the development of some key mathematical concepts.
2. Describe the connections between mathematical ideas in different historical periods and places.
3. Recognize the role of abstraction and logic in the progress of mathematics.
4. Describe the contribution of mathematics to culture and science in different historical eras.
5. Determine if a mathematical conjecture is correct and provide rigorous written mathematical justification.
6. Provide sound, complete and clear mathematical arguments involving simple calculations, geometric constructions, and/or written mathematical proofs.
7. Communicate mathematical ideas, both written and orally.

HNRS 412. Medical College Admission Test Preparation

3 Credits (3)

This course prepares students to optimize their performance on the Medical College Admission Test that is required for admission to medical schools throughout North America. This course should be taken only after completing requisite courses in biology, chemistry and biochemistry, physics, health sciences, and appropriate social science electives.

Prerequisite(s): Completion of basic courses in STEM, health sciences and behavioral sciences.

HNRS 413. Medical Shadowing

1-3 Credits (1-3)

For students who are shadowing medical professionals this course will provide academic credit for completion of this experience. May be repeated up to 9 credits.

Learning Outcomes

1. Students will experience the medical profession through shadowing a medical professional.

HNRS 415. Internship: Non-Capstone Practicum

1-6 Credits (1-6)

In this class students will be working to gain professional experiences by extensively immersing yourself in a professional setting. Students will be required to 1) complete all pre and post paperwork and requirements, 2) complete their placement hours, and 3) complete a weekly reflection prompt. May be repeated up to 6 credits.

Learning Outcomes

1. Demonstrating understanding of professional customs and practices.
2. Organizing and maintaining information.
3. Applying knowledge to the task.
4. Serving clients and stakeholders.
5. Negotiating and arriving at a decision.
6. Working with diversity/diverse populations.
7. Identifying, understanding, and working with professional standards.
8. Improving problem-solving and critical thinking skills.
9. Monitoring and correcting performance. 1
10. Exercising leadership. 1
11. Behaving professionally and ethically. 1
12. Listening effectively. 1
13. Dressing appropriately. 1
14. Addressing colleagues and superiors appropriately. 1
15. Allocating time effectively. 1
16. Adapting effectively to changing conditions. 1
17. Participating as a member of a team. 1
18. Developing appropriate workplace attitudes. 1
19. Understanding and managing personal behavior and attitudes. 2
20. Developing individual responsibility.

HNRS 420. Independent Studies

1-3 Credits

Directed, individual studies and projects.

Prerequisites: consent of instructor and honors eligibility.

HNRS 421. Special Topics

1-3 Credits (1-3)

Course will be cross-listed with HNRS 521/HNRS 421 Special Topics.

Learning Outcomes

1. Students will experience different courses with professors or mentors from across NMSU.

HNRS 422. Directed Research

3 Credits (3)

Individual research projects supervised by faculty advisers. Consent of instructor required. May be repeated up to 12 credits.

Learning Outcomes

1. Students will learn how to conduct research or complete a creative activity with a mentor.

HNRS 4222. Research and Writing

3 Credits (3)

Workshop format designed to prepare students for research and writing associated with production of an honors thesis or a major research assignment. Does not count for general education or honors certification credit.

Learning Outcomes

1. Students will conduct research on multiple topics with mentors.
2. Students will learn how to write up results from research they conduct.

HNRS 4230. McNair Engaged Scholar Junior Session I
1 Credit (1)

This is one of a series of courses designed to prepare McNair Scholars for competitive, successful application to graduate/Ph.D. programs in their field of choice. Combining personal exploration and engagement with faculty narratives in a cohort-based learning environment, students will begin the process of exploring pathways and critical steps to their doctoral degree. By the end of the course students will have secured a faculty mentor and developed a final draft of a research proposal in preparation for the McNair Summer Immersive Research Internship.

Learning Outcomes

1. Demonstrate an increased understanding of the meaning, value, and steps to attain a doctoral degree.
2. Demonstrate understanding of key concepts and best practices in the Faculty Mentor relationship.
3. Demonstrate understanding of required elements of the Research Proposal.

HNRS 4231. McNair Engaged Scholar Junior Session II
2 Credits (2)

This is one of a series of courses designed to prepare McNair Scholars for competitive, successful application to graduate/Ph.D. programs in their field of choice. Combining personal exploration and engagement with faculty narratives in a cohort-based learning environment, students will begin the process of exploring pathways and critical steps to their doctoral degree. By the end of the course students will have secured a faculty mentor and developed a final draft of a research proposal in preparation for the McNair Summer Immersive Research Internship.

Learning Outcomes

1. Demonstrate an increased understanding of the meaning, value and steps to attain a doctoral degree.
2. Demonstrate understanding of key concepts and best practices in the Faculty Mentor relationship.
3. Demonstrate understanding of required elements of the Research Proposal.

HNRS 4330. McNair Engaged Scholar Senior Session I
2 Credits (2)

This is one of a series of courses designed to prepare McNair Scholars for competitive, successful application to graduate/Ph.D. programs in their field of choice. Continuing exploration of their research interests and related graduate programs, students will begin the process of applying to graduate programs in their field of interest. By the end of the course students will have identified and completed the application materials and submitted complete applications with attendant materials by each institution's application deadline.

Learning Outcomes

1. Demonstrate an understanding of the meaning, value and opportunities of academic conferences and networking.
2. Demonstrate understanding of key concepts and best practices in the graduate application process.
3. Demonstrate understanding of required elements and key concepts of research presentations and communicating your research.

HNRS 4331. McNair Engaged Scholar Senior Session II
1 Credit (1)

This is one of a series of courses designed to prepare McNair Scholars for competitive, successful application to PhD/ graduate programs in their field of choice. Students will continue exploration of their research interests and communicate their work through presentations. They will explore factors influencing selection of doctoral program offers. Students will also continue exploring differences between undergraduate and graduate education/culture and learn strategies for navigating these differences as they prepare for transition to their own graduate programs.

Learning Outcomes

1. Demonstrate an increased understanding of differences between undergraduate and graduate education settings, and strategies to address inherent challenges in the transition to the graduate education environment.
2. Demonstrate an understanding of required elements and key concepts of research presentations and communicating your research.
3. Demonstrate an understanding of the meaning, value and opportunities of academic conferences and networking.

HNRS 4440. Honors Leadership Ambassador Program
1-3 Credits (1-3)

This course is designed to build leadership and teamwork skills. Students will work together to plan events for other Honors students and our community. Through participation in this course students will learn how to plan and manage events as well as learn how to work better with colleagues in teams, they will also learn the importance of civic engagement in their community. May be repeated up to 9 credits.
Prerequisite: At least 1 HNRS course completed.

Learning Outcomes

1. Develop team-building skills.
2. Plan, organize, and/or manage events.
3. Support other Honors students through community-building events.
4. Support our community through a service event/program.
5. Express persuasive arguments in support of the Honors College and related programs at NMSU.
6. Assess their own leadership abilities and seek to improve leadership skills.

HNRS 450V. The Sundt Honors Seminar
3 Credits (3)

The Sundt Honors Seminar is a unique, experience-based, interdisciplinary seminar developed and taught by the holder of the Sundt Honors Professorship for the year. The subject of the course will vary according to the discipline of the Sundt Professor. The course may include a travel experience related to the seminar topic, hosting of outside specialists, or other unique activity. May be repeated up to 6 credits.

Learning Outcomes

1. The Sundt Honors Seminar is a unique, experience-based, interdisciplinary seminar developed and taught by the holder of the Sundt Honors Professorship for the year.
2. The subject of the course will vary according to the discipline of the Sundt Professor.
3. he course may include a travel experience related to the seminar topic, hosting of outside specialists, or other unique activity.

HNRS 521. Special Topics
1-3 Credits (1-3)

Course will be cross-listed HNRS 521/HNRS 421 Special Topics. May be repeated up to 12 credits.

Learning Outcomes

1. Students will experience different courses with professors or mentors from across NMSU.

HORT-HORTICULTURE

HORT 1115G. Introductory Plant Science
4 Credits (3+2P)
Introduction to the physical, biological, and chemical principles underlying plant growth and development in managed ecosystems. In the laboratory portion of the class, students perform experiments demonstrating the principles covered in lecture. The course uses economic plants and agriculturally relevant ecosystems to demonstrate basic principles. Appropriate for nonscience majors. Same as AGRO 1110G.
Learning Outcomes

1. Describe the role plants play in everyday lives
2. Introduce career opportunities in plant and soil sciences, and related fields
3. Define plants through the concepts of plant structure and anatomy
4. Introduce the wide variety of plants cultivated throughout the world
5. Describe how plants work (growth, reproduction, physiology, and soil)
6. Describe how plants are manipulated to feed, clothe and entertain the world

HORT 2110. Ornamental Plants I
4 Credits (2+3P)
Covers identification, botanical characteristics, culture, and landscape uses of woody plants. Emphasis on deciduous trees, native shrubs, and evergreens.
Learning Outcomes

1. Identify landscape plants by scientific names, including family, genus and specific epithet.
2. Use scientific terminology to accurately describe landscape plant morphology.
3. Illustrate plant family relationships at the family and genus level.
4. Apply landscape design principles and knowledge of plant requirements to arrange plants in a landscape.

HORT 2120. Ornamental Plants II
4 Credits (2+3P)
Identification, botanical characteristics, culture, and landscape uses of woody plants. Emphasis on flowering trees, cacti, and members of the pea and rose families.
Learning Outcomes

1. Identify landscape plants by scientific names, including family, genus and specific epithet.
2. Use scientific terminology to accurately describe landscape plant morphology.
3. Illustrate plant family relationships at the family and genus level.
4. Apply landscape design principles and knowledge of plant requirements to arrange plants in a landscape.

HORT 2130. Floral Quality Evaluation and Design
2 Credits (1+2P)
Critical hands-on evaluation of the quality of cut and potted floral and tropical foliage crops, their specific merits and faults, and fundamentals of floral design.
Learning Outcomes

1. Identify common floriculture crops, or know resourcing to help identify the crop.
2. Evaluate quality (merit and fault) of common floriculture crops, based on industry standards and merit. Pi Alpha Xi and American Floral Endowment standards will be used for the purpose of this class.
3. Have a basic understanding of the floriculture industry, and identify career pathways within the industry.
4. Know, understand, creatively interpret, and execute basic principles of design in regards to floral design.
5. Use interpersonal communication, problem solving, basic math, and marketing during cash and carry "lab" time (flower sales) in developing job ready skills in floristry.
6. Layer principles of design, marketing, sales, and time management to create floral art in real-world scenarios.

HORT 2160. Plant Propagation
3 Credits (2+2P)
Practical methods of propagating horticultural plants by seed, cuttings, layering, grafting, division and tissue culture. Examination of relevant physiological processes involved with successful plant propagation techniques. Same as AGRO 2160.
Learning Outcomes

1. Practical methods of propagating plants by seed, cuttings, layering, grafting, division, and tissue culture through experiential, “hands-on” laboratories.
2. Relevant physiological principles involved in propagating horticultural plants through lecture discussions and readings.

HORT 2990. Floriculture Field Practicum
1 Credit (1)
Participation as team member in the National Intercollegiate Floral Quality Evaluation and Design Competition. Intensive week-long travel for competition, networking with industry, academia, and floriculture tours. May be repeated for a maximum of 3 credits.
Prerequisite(s): HORT 2130 or consent of instructor.
Learning Outcomes

1. Varies

HORT 2996. Special Topics
1-4 Credits
Specific subjects and credits as announced. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required.
Learning Outcomes

1. Varies

HORT 300. Special Topics
1-4 Credits
Specific subjects as announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

HORT 302V. Forestry and Society
3 Credits (3)
Global study of the development and use of forest resources for production of wood, fuel, fiber, and food products. Climatic, edaphic, cultural, and economic influences on forests of the world evaluated. Same as RGSC 302V.

Learning Outcomes

1. Demonstrate comprehension of basic plant physiology.
2. Analyze various inputs and environmental factors that affect trees and forests.
3. Identify forest biomes based on plant morphology and environmental characteristics.
4. Categorize different types of forest products and harvesting methods.
5. Compare and contrast various forest management practices in the US and worldwide.
6. Evaluate climate and ecological issues as they relate to society.
7. Develop an awareness of the interconnection of nature and society.

HORT 304. Hydroponics
4 Credits (4)
This course will introduce students to the basics of the different soil-less growing systems: hydroponics, aeroponics and aquaponics. Topics will include growing systems and environments, crop management, business aspects of hydroponic growing, integrated pest management, commercial and restaurant systems, and plant nutrition. Labs will reinforce lecture topics and give students practical experience growing different types of crops in different types of systems.
Prerequisite: AGRO 1110G or HORT 1115G.
Learning Outcomes

1. Discuss the benefits and constraints of different hydroponic systems.
2. Evaluate different crops for each type of system.
3. Identify the components and calculate costs of different systems.
4. Demonstrate how to build and maintain each type of system.
5. Discuss how soilless growing relates to sustainability and local food production.

HORT 305. Principles of Genetics
3 Credits (3)
Covers fundamental principles of reproduction, variation, and heredity in plants and animals. May be repeated up to 3 credits.
Prerequisite: (BIOL 2610G and BIOL 2110G, or BIOL 2110G and BCHE 140, and either CHEM 1215G or CHEM 1216).
Learning Outcomes

1. To provide an introduction to the basic concepts, methods, and terminology of genetics. Introduction to genomics and bioinformatics.
2. To develop a working understanding of genetics and heredity
3. To understand in some depth, the mechanism of DNA replication, transcription and protein synthesis. To understand the regulation of gene expression.
4. To examine the impact of genetics on both basic and applied aspects of the biological sciences, as well as its effects on our everyday lives.

HORT 307. Landscape Design
4 Credits (3+3P)
Design elements, the design process, and contemporary planting design used in the design of residential and small commercial landscapes. Basic drafting, drawing, and landscape plan presentation techniques.
Prerequisite: HORT 2110 or HORT 2120 or consent of instructor.
Learning Outcomes

1. Access a residential site for landscape design.
2. Create a landscape plan that addresses and solves a client's needs and wishes.
3. Incorporate ideas into the landscape plan that reflects the region.
4. Incorporate sustainable ideas into a landscape plan.
5. Analyze a landscape plan for aesthetics and functionality.
6. Verbally and visually present a landscape plan in a professional manner.

HORT 310. Medicinal Herbs
3 Credits (3)
Introduction to ethnobotany, including plant cultivation, extraction methods, and analysis of active chemistries.
Learning Outcomes

1. Describe relationships between people and plants.
2. Identify cultural uses of plants by peoples across the world.
3. Discuss the westernized use of plants and regulations associated with medicinal plant products.
4. Discuss the scientific methods employed to study medicinal plant compounds.
5. Identify medicinal plant chemical structures.
6. List medicinal plant tincture preparation methods.
7. Discuss analytical chemistry instrumentation used to identify plant compounds.

HORT 318V. Urban Water Issues and Society
3 Credits (3)
Global study of water science, development, law, and use for agriculture, manufacturing, landscaping, home use, and other urban uses. This course allows students to become familiar with important issues concerning the interaction between water use and humans. Topics include the water cycle, water chemistry, human-water relations, plant-water relations, water users, water-dependent population placement and growth, water regulation, and the future of water.
Learning Outcomes

1. Define and describe Earth's water sources and the water cycle.
2. Describe the chemical processes associated with water and analyze the composition of several water sources.
3. Summarize the interactions of water with the human body.
4. Explain the use of water in agricultural and other plants on both a regional scale and cellular level.
5. Identify, explain, and compare all water users and categorize their demand and availability for water.
6. Analyze the interconnection of the human societies and water while discussing locations of civilizations and communities.
7. Analyze, from a historical perspective, the interrelationships of all water users and all water decision makers. Describe the history of US and world water regulation and analyze its success rate.
8. Predict and recommend how water will be used and distributed in the future.

HORT 340. Greenhouse Retailing
2 Credits (1+1P)
A hands-on experience in weekly organizing, management, propagation and sale of greenhouse crops. This course is to learn how to propagate crops to achieve the fastest finished products, maintain the stock plant, and create opportunities for sales. Students will work 2 hours a week in the greenhouse with instructor, and choose one day a week to maintain and check on the greenhouse throughout the semester. May be repeated up to 4 credits.
Learning Outcomes

1. Identification and propagation of common greenhouse plants.
2. Create care sheets and propagation manuals for potential buyers of greenhouse crops.

3. Propagate, maintain, water, schedule and sell greenhouse products.
4. Practice team communication and support to create an equitable division of labor during the semester.
5. Learn to maintain labor and sales records.

HORT 365. Principles of Crop Production
4 Credits (3+3P)
Basic principles of crop production including environmental and physiological factors limiting production, plant nutrition and soil science, soil-water management, cropping systems and management, pest management, and economic factors influencing crop production. Taught with AGRO 365. May be repeated up to 4 credits.
Prerequisite: AGRO 1110G/HORT 1115G, CHEM 1215G or equivalent and MATH 1215 or equivalent.
Learning Outcomes
1. Analyze and apply core principles of crop production, including environmental, physiological, and climatic factors, to optimize plant growth, yield, and overall production efficiency.
2. Demonstrate understanding of plant biology by identifying structures, growth stages, and functions across the plant life cycle.
3. Evaluate plant propagation and reproduction methods by distinguishing between sexual and asexual techniques, explaining pollination and fertilization processes, and discussing their impact on genetic improvement and crop uniformity.
4. Demonstrate proficiency in seed and equipment technologies, including identification and calibration of farm implements, calculation of seed rates, and evaluation of certified seed quality and planting operations.
5. Apply experiential learning methods to design, manage, and assess crop production systems using real-world data and reflection-based decision-making models (Kolb's learning cycle).

HORT 377. Introduction to Turfgrass Management
4 Credits (3+3P)
Establishment and maintenance of turfgrass with emphasis on seeding methods, soil and water management, mowing, disease, insects and turfgrass varieties. Consent of instructor required. Crosslisted with: AGRO 377
Learning Outcomes
1. Identify the general morphology of grass plants and the characteristics of cool- and warm-season grasses.
2. Explain various turf establishment techniques and procedures.
3. Demonstrate understanding of basic soil science, soil testing, amendments, and fertilization regarding cultural and maintenance procedures as well as seasonal projects to maintain healthy turf.
4. Recognize and identify common turf disturbances including weed, pest, and disease identification.
5. Communicate turf conditions and the rationale for different maintenance processes on the course or field.

HORT 378. Turfgrass Science
4 Credits (3+3P)
Introduction to the scientific fundamentals for turfgrass management cultural practices, pest management, rootzone construction and ecology. May be repeated up to 4 credits.
Prerequisite: HORT 377 or consent of instructor.
Learning Outcomes
1. Explain the benefits and history of turfgrass.
2. Apply basic plant physiological knowledge to turfgrass adaptation, growth and function.
3. Demonstrate ability to identify known and unknown turfgrasses and appraise how, when and why specific turfgrasses are used in certain environments.
4. Examine the basic principles of turfgrass soils, turfgrass establishment and major turfgrass management practices (mowing, fertility, irrigation, cultivation, secondary cultural practices).
5. Examine basic turfgrass pest management principles and practices in order to be able to identify, analyze and implement solutions.
6. Calculate common turfgrass math calculations and perform equipment calibrations.
7. Analyze how the environment influences turfgrass growth and management.
8. Prepare a consulting appraisal and specific turfgrass management plan using learned turfgrass knowledge.

HORT 391. Internship
1-6 Credits
Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 6 credits toward a degree. Consent of instructor required. Graded: S/U. Crosslisted with: AGRO 391 and SOIL 391

HORT 447. Seminar
1 Credit (1)
Organization, preparation, and presentation of current topics in agronomy, environmental sciences, horticulture, and soil science. Crosslisted with: AGRO 447, SOIL 447 and ENVS 447.
Learning Outcomes
1. Develop professional communication skills through teamwork, case study preparation and presentation, data interpretation, and role-playing in mock interviews.
2. Prepare a professional resume, personal statement of goals for graduate school or permanent employment and make a Case Study presentation to faculty and peers.

HORT 449. Special Problems
1-3 Credits
Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

HORT 450. Special Topics
1-4 Credits
Specific subjects as announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required.

HORT 462. Plant Breeding
3 Credits (3)
Principles and practices involved with the genetic improvement of plants.
Prerequisite: ANSC/AGRO/BIOL/HORT/GENE 305 or GENE 320.
Learning Outcomes
1. Learn the principles and practices involved in plant genetic improvement.
2. Be able to apply principles and practices in real life scenarios.

HORT 471. Plant Mineral Nutrition
3 Credits (3)
Basic and applied aspects of plant requirements for soil-derived minerals and the processes whereby minerals are acquired, absorbed, translocated, and utilized throughout the plant. Same as AGRO/EPWS 471.

Prerequisite/Corequisite: EPWS/BIOL 314, or concurrent enrollment, or consent of instructor.

Learning Outcomes

1. Describe how minerals function in plants, including uptake, transport and heritability factors.
2. Explain how plants regulate internal mineral content.
3. Compare different crop nutrient management practices.
4. Identify plant mineral disorders and stressors.
5. Prepare and present information on crop mineral nutrition.

HORT 479. Advanced Turfgrass Science
3 Credits (3)

Extensive reviews of turfgrass sciences including ecology, physiology, entomology, pathology, weed science, and soil science.

Prerequisite: HORT 378 or consent of instructor.

Learning Outcomes

1. Discuss the fundamentals of turfgrass management practices including mowing, fertilization, irrigation, cultural practices and pest management, and use these practices to plan an integrated turfgrass management plan.
2. Identify common and unique turfgrass problems and situations and formulate a solution based on prior knowledge learned.
3. Analyze how stresses, construction and turfgrass management practices affect growth, development, and physiology of turfgrasses.
4. Ascertain how environmentally sound management practices can be modified to promote optimal turfgrass health under stress conditions.
5. Critically evaluate scientifically based literature on turfgrass management.

HORT 483. Advanced Sustainable Crop Production
4 Credits (3+3P)

Characteristics and objectives of sustainable agricultural systems with application to the production, utilization, and improvement of agronomic and vegetable crops.

Prerequisite: AGRO 365 or HORT 365.

Learning Outcomes

1. Design and evaluate sustainable cropping systems by integrating principles of crop diversification, crop rotation, no-till, and organic practices, and assessing their advantages, challenges, and impact on long-term agricultural sustainability.
2. Analyze and apply crop and soil management strategies using holistic and integrated approaches, including mycorrhizal fungi use in arid environments, IPM (Integrated Pest Management), and the "many little hammers" approach to weed control.
3. Select and recommend crop cultivars and management practices for specific agronomic and horticultural crops using tools such as growing degree days, variety test reports, and region-specific criteria (for New Mexico).
4. Critically review and communicate sustainable agricultural research and practices by analyzing case studies, scientific literature, and peer presentations to evaluate the effectiveness of sustainability-focused strategies.
5. Identify and engage with agricultural support systems and sustainability networks, including agencies like Western SARE, to explore resources for funding, research, and application of sustainable agriculture practices.

HORT 488. Greenhouse Management
4 Credits (3+3P)

Principles and practices involved in greenhouse structures and construction, site considerations, heating and cooling systems, greenhouse crop production techniques, sustainability practices. May be repeated up to 4 credits.

Prerequisite: HORT/AGRO 365 or consent of instructor.

Learning Outcomes

1. Establish, operate, and maintain a greenhouse.
2. Demonstrate greenhouse business and marketing skills, horticulture techniques.
3. Practice "hands-on" greenhouse production.
4. Describe greenhouse sustainability issues.
5. Identify emerging trends in the greenhouse industry.

HORT 492. Diagnosing Plant Disorders
3 Credits (2+3P)

Systematic diagnosis of the physiological, pathological, and entomological causes of plant disorders. Same as EPWS 492 and AGRO 492.

Prerequisites: EPWS 303 and EPWS 310.

HORT 500. Special Topics
1-4 Credits

Specific subjects and credits to be announced in the Schedule of Classes . Maximum of 4 credits per semester. No more than 9 credits toward a degree.

HORT 505. Research Orientation
4 Credits (3+2P)

Training in writing research proposals, presentation of research results, and interpretation of research results. Crosslisted with: AGRO 505, SOIL 505 and ENVS 505.

Learning Outcomes

1. Gain insight into the nature of scientific research and skills vital for graduate research and future careers in science.
2. Navigate graduate school processes and protocols.
3. Demonstrate critical thinking.
4. Generate a scientific hypothesis.
5. Communicate science effectively in written and oral formats, including drafting a proposal for thesis or dissertation research.

HORT 513. Introduction to Scientific Writing
3 Credits (3)

Students will learn how to communicate, through written format, to both the scientific community and diverse audiences. Students will be introduced to new technologies and new genres of scientific writing. Students will also learn basic reviewing and writing skills that underlie efficient preparation of literature reviews, scientific manuscripts, project reports, blog-posts, opinion or perspective pieces for more popular venues, advocacy articles for legislators, and descriptive pieces for popular venues such as newspapers, magazines, and broadcast media. Emphasis will be on the communication of experimental findings in peer-reviewed scientific journals.

Learning Outcomes

1. Students will review the basics of rhetoric and the technology of language.
2. Students will learn how to overcome writing barriers and gain confidence in their writing skills.
3. Students will improve their writing skills so that manuscript preparation becomes more efficient and productive.
4. Students will learn professional standards for the conduct of ethical reporting of scientific results.

5. Students will learn to recognize structural and stylistic elements in scientific articles that help researchers achieve certain communication goals.
6. Students will learn the basics of table, figure, diagram, and image presentation in manuscripts.
7. Literature reviews, framed so that they answer an important question in the field, and lead to peer-reviewed publication, may also be prepared. (With permission of the instructor.)

HORT 525. Scientific Writing How to be a Productive and Effective Writer
1-3 Credits (1-3)
Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review Crosslisted with: AGRO 525, AGRO 625, EPWS 525, SOIL 625 and SOIL 525.

HORT 590. Graduate Seminar
1 Credit (1)
Current research discussions presented by masters level graduate students. Not more than one credit toward the degree. Same as AGRO/SOIL 590. Crosslisted with: AGRO 590 and SOIL 590.

HORT 595. Internship
1-6 Credits
Supervised professional on-the-job learning experience. Limited to Master of Horticulture or Plant & Environmental Science candidates. Not more than 6 credits toward the degree.

HORT 596. Master's Proposal
1 Credit (1)
Current research proposal written by masters level graduate students. Consent of Instructor required. Crosslisted with: AGRO 596, ENVS 596, GENE 596 and SOIL 596. Restricted to: Masters HORT; Masters PLEN majors.
Prerequisite: Master level graduate students.
Learning Outcomes
1. Student will review academic literature and draft a research proposal.

HORT 598. Special Research Programs
1-6 Credits
Individual investigations, either analytical or experimental. Maximum of 6 credits per semester. No more than 9 credits toward a degree.
Prerequisite: consent of instructor.

HORT 599. Master's Thesis
15 Credits
Thesis.

HOST-HOSPITALITY AND TOURISM

HOST 155. Special Topics
1-3 Credits (1-3)
Specific subjects to be announced in the Schedule of Classes. May be repeated up to 9 credits.
Learning Outcomes
1. Varies.

HOST 201. Introduction to Hospitality Industry
3 Credits (3)
Overview of hospitality industry; organization and operation of lodging, food and beverage, and travel and tourism segments; focus on career opportunities and future trends of hospitality industry. Restricted to: Community College campuses only.
Learning Outcomes
1. Analyze the interrelationship between lodging, food beverage operations, and the travel and tourism industry.
2. Evaluate the scope of the travel and tourism industry and assess its economic impact at the local, national, and international levels.
3. Investigate and propose opportunities for education, training, and career development in the hospitality industry.
4. Analyze the effects of globalization on the hospitality industry and predict future trends.
5. Critically examine and discuss major factors, developments, and trends that have affected lodging and food service operations in recent years and anticipate their future impact on the industry.
6. Analyze the effects of franchising, management contracts, referral organizations, independent and chain ownership, and condominium growth on the industry, and develop a comparative analysis of their implications.
7. Classify hotels based on their general characteristics and evaluate the distinctive features of each classification.
8. Identify and describe the common divisions or functional areas of hotel organization (rooms, food beverage, engineering, marketing and sales, accounting, human resources, and security), and analyze the interdependence and collaboration among these divisions in achieving organizational goals.

HOST 202. Front Office Operations
3 Credits (3)
Hotel/motel front office procedures detailing flow of business, beginning with reservations and extending to the night audit process. Restricted to: Community College campuses only.
Learning Outcomes
1. Analyze and differentiate the responsibilities for each job description in the front office.
2. Evaluate the significance of important factors in the day-to-day operation of the front office and propose strategies for optimal performance.
3. Explain front office technology and assess its impact on operational efficiency and guest satisfaction.
4. Develop and implement operational procedures/tasks that are critical to the registration process.
5. Demonstrate effective techniques for handling guest complaints and create a set of best practices for complaint resolution.
6. Analyze the key points regarding front office security functions and develop a comprehensive security plan.
7. Define and explain key terms in front office accounting and apply them to real-world scenarios.
8. Analyze the functions and tasks involved in the night audit processes and develop a step-by-step guide for conducting a successful night audit.

HOST 203. Hospitality Operations Cost Control
3 Credits (3)
Management of Food & Beverage facilities using cost control techniques. Functional training in menu analysis and development with all phases of product flow through a Food & Beverage organization explored. Restricted to: Community Colleges only.
Learning Outcomes
1. Explain the concept of "control" and analyze its importance in the management system.

2. Analyze the purposes and applications of standard costs and evaluate the uses of standard cost tools.
3. Evaluate the role of budget standards in planning and control and create cost-volume-profit analysis models for food and beverage operations.
4. Analyze and compare methods for estimating allowable food and beverage costs based on forecasted sales levels.
5. Evaluate subjective and objective menu pricing methods and create menu prices that incorporate profit requirements.
6. Apply principles and procedures important in controlling the purchasing and receiving processes and analyze the need to incorporate quality requirements in purchasing and receiving activities.
7. Analyze sales history records and time series data to create accurate production forecasts.
8. Evaluate the importance of standard recipes (including computerized standard recipes) as production tools and create a plan for incorporating production planning time.
9. Apply the basic formula for calculating cost of sales and analyze sources of information for each component of the formula. 1
10. Analyze the role of analysis, corrective action, and evaluation in the control process, and create a plan for implementing these steps effectively.

HOST 204. Promotion of Hospitality Services
3 Credits (3)
Organization of hotel marketing functions; developing a marketing plan to sell the varied services of the hotel/motel property. Restricted to: Community College campuses only.

Learning Outcomes

1. Analyze the distinctive aspects of marketing within service industries in relation to the intangibility of services, service encounters, service chains, and service quality.
2. Create an appropriate marketing mix to meet guest needs and achieve company goals.
3. Evaluate several methods of segmenting and targeting markets and apply market segmentation criteria effectively.
4. Analyze the kinds of marketing data needed for effective marketing efforts, apply the marketing research process to solve marketing problems, and create marketing information, systems that meet a hospitality company's real marketing needs.
5. Design a product/service mix (or product offer) that meets guest and company needs.
6. Develop and implement a distribution mix of hospitality networks to deliver hospitality products and services effectively and efficiently.
7. Evaluate and apply pricing mix strategies and tactics as an active and critical component of the overall marketing plan.
8. Analyze the components and interrelationships of the communications mix.
9. Evaluate and apply advertising, public relations, personal selling, merchandising, and promotion to better achieve company goals and objectives.

HOST 205. Housekeeping, Maintenance, and Security
3 Credits (3)
Function of housekeeping departments, including personnel, sanitation, maintenance, and materials. A survey of security procedures to include guest protection and internal security of hotel/motel assets. Restricted to: Community College campuses only.

Learning Outcomes

1. Analyze and differentiate various positions and job descriptions within the housekeeping, maintenance, and security departments.
2. Apply and evaluate various scheduling methods to optimize departmental efficiency.
3. Evaluate the role of the Maintenance department in the success of the operation and propose strategies for effective collaboration with other departments.
4. Identify and classify various types of floor, wall, and ceiling coverings and develop a comprehensive care and maintenance plan for each type.
5. Analyze the sanitation responsibilities of the Housekeeping department and develop a detailed sanitation protocol.
6. Evaluate the importance of an effective security program and design a comprehensive security plan for a hospitality establishment.
7. Investigate and recommend innovative technologies and practices that can enhance the efficiency and effectiveness of housekeeping, maintenance, and security operations.
8. Develop and implement training programs for housekeeping, maintenance, and security staff to ensure consistent quality and adherence to industry standards.
9. Analyze the impact of sustainable practices in housekeeping, maintenance, and security operations and develop a sustainability plan for these departments. 1
10. Evaluate the role of effective communication and collaboration among housekeeping, maintenance, security, and other departments in ensuring guest satisfaction and operational success.

HOST 206. Travel and Tourism Operations
3 Credits (3)
Transportation, wholesale and retail operations, attractions, the traveler, tourism development, and operational characteristics of tourism business. Restricted to: Community College campuses only.

Learning Outcomes

1. Analyze the economic importance of travel and its impact on local, national, and global economies.
2. Evaluate the historical evolution of travel and its influence on contemporary tourism practices.
3. Identify and explain the roles of various travel and tourism organizations in promoting and regulating the industry.
4. Compare and contrast various modes of transportation, assessing their strengths, weaknesses, and suitability for different types of travel.
5. Investigate and categorize barriers to tourism, proposing strategies to mitigate their impact on the industry.
6. Develop a comprehensive understanding of the global tourism landscape, including popular destinations, emerging markets, and niche travel segments.
7. Analyze the social, cultural, and environmental impacts of tourism on host communities and propose sustainable tourism practices.
8. Evaluate the role of technology in shaping the travel and tourism industry, including its influence on booking systems, customer experiences, and destination marketing.
9. Create a hypothetical travel itinerary that showcases an understanding of transportation logistics, destination management, and customer preferences. 1

10. Assess the importance of customer service in the travel and tourism industry and develop strategies for delivering exceptional experiences to travelers.

HOST 208. Hospitality Supervision
3 Credits (3)
Strategies for directing, leading, managing change and resolving conflict. Prepares students to meet expectations of management, guests, employees, and governmental agencies. Restricted to: Community College campuses only.
Learning Outcomes
1. Apply the management process to business activities, analyzing its effectiveness in achieving organizational goals.
2. Evaluate the importance of the communication process in relation to productivity and morale and develop strategies for effective communication within the organization.
3. Analyze and select appropriate recruitment channels and apply interviewing and screening skills to identify and hire the most qualified employment candidates.
4. Develop and implement effective orientation and training programs to prepare employees for their roles and responsibilities.
5. Integrate standard operating procedures into performance evaluation processes and utilize coaching and ongoing training techniques to support employee development.
6. Evaluate and apply motivational tools to maximize productivity levels while implementing labor cost reduction strategies.
7. Analyze special management concerns, including EEO policy, sexual harassment, safety and security, ethics, substance abuse, and unions, and develop policies and procedures to address these issues effectively.
8. Apply conflict management, communication, and motivational skills to build and lead effective work teams.
9. Evaluate professional development needs and future trends and create strategies for managing change within the organization. 1
10. Design and implement a performance management system that aligns with organizational objectives, incorporates employee feedback, and supports continuous improvement.

HOST 210. Catering and Banquet Operations
3 Credits (3)
Teaches the basics of catering and banquet operations, including computer coordination, planning, set up, service, and completion.
Learning Outcomes
1. Identify and analyze the types of caterers and customer markets, evaluating their unique characteristics and needs.
2. Evaluate and apply various marketing methods used in catering to effectively reach target audiences and promote catering services.
3. Analyze the process of client negotiation and problem resolution and develop strategies for effective communication and conflict management in catering.
4. Apply knowledge of menu planning, truth-in-menu guidelines, pricing, and types of meal functions to create and execute successful catering events.
5. Evaluate beverage service considerations, including pricing, types of beverage functions, liquor laws, and third-party liability, and develop strategies for responsible and profitable beverage service in catering.
6. Analyze special set up considerations, such as space requirements, cleaning and maintenance, equipment, and client services (audiovisual, entertainment, and lighting), and create comprehensive event plans that address these factors.
7. Evaluate recruitment, orientation, training, and compensation practices in catering, and develop strategies for building and managing effective catering teams.
8. Apply understanding of the banquet event order, contract, change order, and other related reports to effectively manage catering events and maintain accurate documentation.
9. Analyze payroll cost control techniques, credit management, and food and beverage cost control methods, and apply these concepts to optimize profitability in catering operations. 1
10. Develop and implement a comprehensive risk management plan for catering operations, addressing issues such as food safety, liability, and emergency preparedness.

HOST 214. Purchasing and Kitchen Management
3 Credits (3)
Technical purchasing concepts, product selection, and specifications. Safety and sanitation as they relate to food service establishments. Prepares student for work with HACCP programs.
Prerequisite: Grade of C- or better in HOST 203.
Learning Outcomes
1. Analyze and apply government and industry standards and specifications to ensure compliance and maintain quality in food service operations.
2. Create detailed specifications for a product or service, taking into account operational requirements, quality standards, and cost considerations.
3. Evaluate the appropriateness of bid purchasing programs for various operational types, considering factors such as volume, frequency, and supplier relationships.
4. Analyze and select the most cost-effective bids by compiling and calculating relevant data, such as price, quality, and delivery terms.
5. Identify and assess the benefits of labor-saving equipment in kitchen operations, and develop strategies for their effective implementation and use.
6. Design and implement a procedural method for improving kitchen efficiency, considering factors such as workflow, ergonomics, and resource optimization.
7. Analyze the inherent dangers found in kitchens and develop a comprehensive safety plan to mitigate risks and protect staff and customers.
8. Identify the major microbial causes of Food Borne Illnesses (FBI), and evaluate their origins, transmission methods, and potential impacts on public health.
9. Apply food safety principles and develop a comprehensive food safety management system to minimize hazards in kitchen environments. 1
10. Evaluate the role of state and local health departments, CDC, WHO, and the HACCP model in controlling Food Borne Illnesses, and incorporate their guidelines and best practices into kitchen operations.

HOST 216. Event, Conference and Convention Operations
3 Credits (3)
The ability to successfully plan, organize, arrange, and execute special events is critical to the success of many hospitality organizations. This course gives the student a grounding in the skills necessary to achieve success in this area. A variety of events are discussed and the similarities and differences with conferences and conventions are explored. Students

are taught to organize and plan events of varying type and durations. Sales, logistics, and organizing skills are emphasized. Restricted to: Community College campuses only.

Learning Outcomes

1. Identify and analyze the major requirements for successful event production, including organizational, financial, and operational factors.
2. Create a marketing plan for an event, incorporating strategies for target audience segmentation, promotional activities, and ROI measurement.
3. Demonstrate and apply effective customer service techniques and negotiating skills in the context of event planning and implementation.
4. Design and optimize the layout and functional space for an event, considering factors such as guest flow, accessibility, and aesthetic appeal.
5. Analyze the importance of financial contracts and controls in event planning, and develop strategies for budgeting, cost management, and revenue generation.
6. Evaluate the legal responsibilities of event planners and develop a risk management plan to mitigate potential liabilities and ensure compliance with relevant regulations.
7. Assess and select appropriate vendors and suppliers for events, considering factors such as quality, reliability, and cost-effectiveness.
8. Develop and implement a comprehensive project management plan for an event, including timelines, milestones, and contingency plans.
9. Analyze post-event data and feedback to identify areas for improvement and develop strategies for enhancing future event outcomes. 1
10. Evaluate the sustainability and environmental impact of events and develop strategies for incorporating Eco-friendly practices into event planning and execution.

HOST 219. Safety, Security and Sanitation in Hospitality Operations
3 Credits (3)

It is the responsibility of the manager to provide appropriate security, sanitation, and safety precautions in hospitality operations. Preparation for internal and external disasters is an important task for the Hospitality Manager. This course uses the National Restaurant Association ServSafe¬ training material.

Learning Outcomes

1. Analyze the steps of the HACCP process and evaluate the significance of each in ensuring food safety in hospitality operations.
2. Design an effective accident prevention program for a hospitality operation, incorporating strategies for hazard identification, risk assessment, and employee training.
3. Evaluate how equipment and facility design impacts employee and guest safety and propose improvements to enhance safety in hospitality settings.
4. Develop and implement loss control/theft prevention policies, considering factors such as asset protection, inventory management, and employee accountability.
5. Create a comprehensive emergency response procedure for hotels and restaurants, including protocols for evacuation, communication, and coordination with local authorities.
6. Analyze the impact of 9/11 on security in the hospitality industry and evaluate the effectiveness of subsequent security measures and policies.
7. Assess the importance of cyber-security in the hospitality industry, and develop strategies for protecting sensitive data, preventing breaches, and responding to cyber incidents.
8. Apply principles of risk management to identify and mitigate potential safety and security threats in hospitality operations.
9. Evaluate the role of technology in enhancing safety and security in the hospitality industry, and propose the adoption of innovative solutions, such as biometrics and AI-based surveillance. 1
10. Analyze the legal and ethical implications of safety and security practices in the hospitality industry and develop policies that prioritize guest and employee well-being while complying with relevant regulations.

HOST 220. Experiential Travel
1-3 Credits (1-3)

Course provides an opportunity for students to plan, prepare for and experience travel to destinations they might not otherwise have visited. Students experience local culture and peoples. Restricted to Community Colleges campuses only. May be repeated up to 9 credits.

Prerequisite: Grade of C- or better in HOST 201 or consent of instructor.

Learning Outcomes

1. Evaluate the marketing and promotional material used by the destination service providers to determine the target market demographics.
2. Recognize and discuss the cultural variations of the host venue and their impact on tourism.
3. Develop plans for cost effective utilization of the services of transportation, activity and lodging providers.
4. Prepare a detailed itinerary for the planned travel to manage time maximizing traveler's experiences.
5. Discuss the economic, cultural and political issues in the destination country and their impact on the tourism industry.
6. Describe customer service strengths and weaknesses experienced at the destination during the travel event.

HOST 221. Internship I
1,3 Credits (1,3)

Work experience that directly relates to a student's major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships may be paid or unpaid. Students are supervised/evaluated by both the employer and the instructor. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate proficiency in performing assigned tasks and responsibilities and contribute meaningfully to the internship host company's operations.
2. Evaluate personal strengths, weaknesses, and areas for improvement based on feedback received during the internship and develop a professional development plan.
3. Create a portfolio showcasing the skills, knowledge, and experiences gained during the internship, and reflect on how these align with career goals and industry expectations.
4. Develop a professional network within the hospitality industry, and leverage internship experiences to explore career opportunities and pathways.
5. Evaluate the internship experience holistically and provide constructive feedback and recommendations to the internship host company and the academic program for continuous improvement.

HOST 222. Cooperative Experience II
3 Credits (3)
Continuation of HOST 221. Restricted to majors. May be repeated up to 3 credits. Restricted to: Community College campuses only. Restricted to HOST majors.
Prerequisite: Grade of C- or better in HOST 221.
Learning Outcomes
1. Student Learning Outcomes vary.

HOST 239. Introduction to Hotel Management
3 Credits (3)
This course covers basic management functions in hotels, resorts, Boutique Hotels, Bed & Breakfast establishments, and other lodging operations. All aspects of the operation are covered including guest management, operations, and sales and marketing. Restricted to: Branch campuses only.
Learning Outcomes
1. Analyze the historical evolution of hotels and evaluate how they have developed into their current form.
2. Describe and explain the basic operational structure of lodging operations.
3. Analyze the different divisions in hotels and evaluate how they interact and contribute to the overall success of the property.
4. Evaluate the functions of the Front Office area and assess its impact on other departments and overall guest experience.
5. Analyze the various functions of the housekeeping department and develop strategies for optimizing its efficiency and effectiveness.
6. Evaluate the role of the sales and marketing department in driving occupancy and revenue.
7. Identify and explain the duties of the Human Resources department in a lodging operation and propose strategies for effective talent management and employee engagement.
8. Analyze the operation of a Food Beverage department in a lodging property, and develop strategies for enhancing its profitability and guest satisfaction.
9. Evaluate the importance of safety and security in a hotel operation and design a comprehensive risk management plan that addresses potential threats and emergencies. 1
10. Compare and contrast the various types of properties in the specialty hotel/lodging market, and analyze their unique characteristics, target markets, and operational requirements.

HOST 255. Special Topics
3 Credits (3)
Specific subjects to be announced in the Schedule of Classes. May be repeated up to 9 credits.
Learning Outcomes
1. Course Learning Outcomes are based on the topical outline for the Special Topic.

HOST 298. Independent Study
1-3 Credits (1-3)
Individual studies directed by consenting faculty with prior approval of department chair. May be repeated for a maximum of 3 credits. Restricted to: Community College campuses only.
Prerequisite(s): Minimum 3.0 GPA and sophomore standing.

HRTM-HOTEL/RESTRNT/TOURISM MGT

HRTM 1120G. Introduction to Tourism
3 Credits (3)
Survey of travel and tourism development and operating characteristics.
Learning Outcomes
1. Define tourism and related terms.
2. Identify and explain the role of the elements of the destination mix.
3. Identify the potential socio-cultural, economic and environmental impacts of tourism.
4. Identify and describe the role of key governmental and nongovernmental organizations in tourism.
5. Describe basic tourism planning and development principles.
6. Discuss the unique challenges of tourism marketing and standard marketing methods.
7. Describe the components of the tourism distribution system.
8. Demonstrate a basic understanding of traveler behavior including motivations and barriers to travel.
9. Identify major factors that influence traveler flows. 1
10. Describe the role of major modes of transportation in the tourism system. 1
11. Identify and describe the three pillars of sustainable tourism development. 1
12. Explain personal and social responsibility as it relates to sustainable tourism development. 1
13. Demonstrate effective communication and critical thinking skills.

HRTM 1130. Introduction to Hospitality Management
3 Credits (3)
Overview of the major segments of the hospitality industry, with a focus on basic management principles.
Learning Outcomes
1. Understand the concept of management contracts and franchising.
2. Recognize and understand needed leadership qualities to achieve organizational objectives.
3. Understand the hospitality industry within the global environment.
4. Identify company and industry trends.
5. Understand the functions of all departments in a hospitality organization (restaurant, hotel, club, etc.).
6. Apply the concepts of convention management, meeting and event planning, and casino management.
7. Understand the concepts of quick and institutional/contract foodservice management.
8. Understand the principles of bar management and compare and contrast wines, beers and distilled spirits.
9. Manage the process of service delivery. 1
10. Identify and solve managerial problems 1
11. Manage a diverse workforce and develop positive employee relations to reduce turnover.

HRTM 1310. Safety, Sanitation and Health in the Hospitality Industry
1 Credit (1)
Addresses public health, HACCP, and food safety responsibilities in the hospitality industry. Sanitation certification test allows students to receive national ServSafe Food Protection Manager Certification.

Learning Outcomes

1. Identify the hazards to safe food and the foods at risk in a foodservice operation.
2. Identify and discuss the Hazard Analysis Critical Control Point (HACCP) system and be able to design a HACCP flowchart.
3. Demonstrate knowledge of how to protect food during purchasing, receiving, storing, preparing, holding, and serving.
4. Discuss the procedures for ensuring sanitary equipment, facilities, and food-handling practices.
5. Explain how to set-up cleaning, safety, pest control, crisis management, and training programs.
6. Also meets KRDNs for the Accreditation Council for Education in Nutrition and Dietetics (ACEND).

HRTM 1320. Food Production and Service Fundamentals
3 Credits (1+4P)

Basic overview of food service systems including menu management, purchasing and production. The course includes basic principles of food fabrication and production. Topics include knife skills, culinary terminology, product identification, quality standards, nutritional cooking theory and application of food preparation techniques. The course includes laboratory aspects and demonstration of basic food production techniques, service styles, practices and procedures in food service operations including culinary math. This course provides students with an understanding of food service sanitation and culinary nutrition. Completion of a national certification examination is required. Students who have not completed HRTM 1310 before enrolling in the course must have proof of valid ServSafe Food Protection Manager certificate. May be repeated up to 3 credits.

Prerequisite: HRTM 1130 or FSTE 2110G.
Prerequisite/Corequisite: HRTM 1310.

Learning Outcomes

1. Demonstrate use of standard recipes and how to reduce and increase their yields
2. Demonstrate basic culinary knife cuts, basic fabrication and mise en place
3. Demonstrate basic cookery techniques of dry, moist and a combination of heat
4. Demonstrate the proper plating and garnishing of foods
5. Describe proper personal behaviors required for the safe handling of food
6. Identify and properly operate kitchen equipment.
7. Pass the ServSafe Exam
8. Describe the three forms of food contaminants and preventative measures.
9. Demonstrate how to properly “set” a table for service 1
10. Demonstrate how to provide dining room service with proper etiquette 1
11. Demonstrate safe work habits, identify safety hazards, and employ preventative safety measures. 1
12. Maintain positive relations with fellow students and faculty through teamwork. 1
13. Exhibit appropriate work habits and attitudes; demonstrate a willingness to compromise. 1
14. Demonstrate a positive attitude, conversation skills, personal hygiene and work attire.

HRTM 2130. Hotel Operations I
3 Credits (3)

Analysis of hotel operations to include: guest services, reservations, reception, guest/city ledger and the night audit. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

Prerequisite(s): HRTM 1130.

Learning Outcomes

1. Outline the history, magnitude and culture of the hotel industry
2. Define and identify hotel ownership and operational structures
3. Outline the organization and structure of a hotel and resort.
4. Describe and calculate the components and processes of room reservation forecasting, pricing and revenue management.
5. Outline and explain the flow of the guest from pre-arrival through arrival, room occupancy and departure.
6. Demonstrate the procedures and processes for Guest Accounting, the City Ledger, Guest Credit and the Night Audit.
7. Discuss problem solving and guest service associated with the front office and other departments of the hotel and resort.
8. Forecast impacts of technology to the guest services and hotel operations
9. Describe the day to day activities and responsibilities of a Hotel Front Office Manager or a Hotel Assistant General Manager (AGM).

HRTM 2996. Special Topics
1-4 Credits

Specific subjects and credits to be assigned on a semester basis for both lecture and laboratory assignments. May be repeated for a maximum of 4 credits.

Prerequisite: consent of instructor.

Learning Outcomes

1. Varies

HRTM 3210. Hotel, Restaurant, and Tourism Marketing
3 Credits (3)

The development of effective marketing programs for hospitality service organizations.

Prerequisite: HRTM 1130.

Learning Outcomes

1. Understand the unique challenges involved in marketing and managing services.
2. Describe the hospitality marketing concepts.
3. Define the characteristics of hospitality marketing.
4. Understand management strategies for service businesses.
5. Discuss the role of marketing in strategic planning.
6. Explain how customer behavior influences individual customer buying decisions.
7. Discuss market segmentation, targeting, and positioning.
8. Use the elements of the marketing mix to create a marketing action plan targeting a specific market.

HRTM 3220. Hospitality and Travel Law
3 Credits (3)

Specialized applications of the law to the hospitality and tourism industry.

Prerequisite: HRTM 1130.

Learning Outcomes

1. Describe the history and origins of hospitality law.
2. Identify the differences between the types of laws governing the hospitality industry.
3. Explain how civil and disability rights laws impact hospitality operations and their duties to guests.

4. Determine how contract law applies to the hospitality industry.
5. Describe the concepts of negligence and due diligence and the actions that can be used to minimize potential legal liability.
6. Interpret laws associated to hotel guests' right to privacy, personal safety and safekeeping of personal property.
7. Assess hospitality operators' legal obligations in safely serving food and alcoholic beverages.
8. Analyze hospitality related legal case studies.

HRTM 3230. Hospitality Leadership Management
3 Credits (3)
Examines modern leadership theory in the context of the hospitality industry. Connects contemporary leadership topics to their historical antecedents through focused reading, discussion and assignments.
Prerequisite: HRTM 1130 and HRTM 1120G.
Learning Outcomes
1. Analyze leadership theories and the current research on effective leadership behavior.
2. Apply leadership theories to management practice.
3. Identify relevant characteristics, skills, and situations that contribute to leadership effectiveness.
4. Explain the importance of ethical leadership and how promoting diversity, inclusion, and equity benefits organizations.
5. Discuss what hospitality organizations must do to empower their managers and staff.
6. Explain why conflict occurs in organizations and describe positive and negative aspects of organizational conflict.

HRTM 3310. Quantity Food Production and Service
4 Credits (1+6P)
Covers quantity food production and service including cooking concepts, sanitation and safety, teamwork, dining room service, and management responsibilities. Students will apply this knowledge developing product for sale in a student run restaurant. Proof of current ServSafe Food Protection Manager or NM Food Handler certification required. May be repeated up to 4 credits.
Prerequisite(s): HRTM 1320.
Learning Outcomes
1. Describe and apply the process of planning and producing foods in quantity.
2. Follow, extend, and reduce a recipe.
3. Prepare and plate foods for service to guests.
4. Demonstrate dining room set up skills.
5. Demonstrate food serving skills.
6. Operate a foodservice establishment using proper food safety practices.
7. Work as a team to operate a foodservice establishment.
8. Evaluate the quality and profitability of menu items.
9. Evaluate a budget and interpret financial data. 1
10. Evaluate guests perceptions of food and service.

HRTM 3410. Hospitality Management Accounting
3 Credits (3)
Specialized accounting for hotel revenue and expenses; accounting for inventory, property, and equipment; hospitality payroll accounting; hotel departmental financial statements; income statement, balance sheet, and statement of cash flows; the analysis of financial statements; interim and annual reports; budgeting expenses; forecasting sales; budgetary reporting and analysis; and financial decision making.
Prerequisite: ACCT 2110.
Learning Outcomes
1. Present the terminology and principles required to develop modern Hospitality Management financial statements.
2. Present the primary principles of managerial accounting and applications to modern Hospitality Management cost and profit analysis.
3. Demonstrate the concepts of financial analysis required to evaluate capital investments, analyze business performance, and to develop tools for financial planning and analysis.
4. Develop the analytical concepts required to understand and evaluate money flows over time and apply these concepts to the use of capital and credit.

HRTM 3910. Professional Development
1 Credit (1)
Covers essential elements of career management including preparation for a successful internship. Restricted to majors.
Learning Outcomes
1. Classify your personality type and its relationship to career goals and strategies.
2. Write an effective resume in the appropriate style.
3. Recognize the importance of appropriate and effective communications with potential employers using a various professional behavior methods.
4. Demonstrate effective interview preparation and engagement.
5. Determine appropriate professional dress and etiquette for various business and dining experiences.
6. Select an appropriate internship experience.
7. Transform the base tools of resume writing, interview preparation, and professional development into future adaptations of career progress and network growth and determine what criteria are important when hiring.

HRTM 4110. Meetings, Conventions and Special Events
3 Credits (3)
Examination of the role of the meeting/event planner, including setting objectives, site selection, negotiations, design, budgeting, marketing, registration, on-site logistics, and evaluation.
Learning Outcomes
1. Identify and differentiate between different types of meetings, conventions, and events.
2. Analyze the scope and complexity of meetings, conventions, and special events.
3. Develop realistic goals, strategic plans, action plans, production schedules, budgets, and facilities designs for meetings and special events.
4. Apply group dynamics, management, and leadership skills to accomplish organizational tasks.
5. Implement an effective communication network among different parties involved in meetings and special events.
6. Organize and facilitate contacts with hospitality industry leaders, vendors, and media personnel.
7. Evaluate the outcomes of meetings and events.

HRTM 4115. Entertainment Business and Venue Management
3 Credits (3)
This course will review and examine the principles and practices associated with managing a public assembly venue and the nature of the venue and entertainment business. This is a comprehensive course

designed to cover all aspects of incorporated event practices such as marketing, production, contracts, ticketing, and security.

Learning Outcomes

1. Analyze the origin and history of public assembly venues and the role they play within the community.
2. Analyze different ownership and management structures and how governance relationships impact operational management.
3. Analyze the business and financial operations of a public assembly venue.
4. Describe the booking process, the entities involved, and the importance of relationships.
5. Analyze and create marketing and sales strategies for both a public assembly venue and an event that is booked in the venue.
6. Identify and analyze the ticket system options available to venue managers, as well as their importance in access management, financial accountability, and data collection.
7. Analyze the role and importance of ancillary revenue sources, as well as the need for creativity and entrepreneurship.
8. Describe the operational systems and processes required to maintain a venue and produce events.
9. Analyze the event planning process and how it is used to produce an event experience for guests and clients. 1
10. Analyze management's role in developing and maintaining a safe and secure public assembly venue.

HRTM 4120. An Overview of Italian Tourism focused on Food, Wine, Art and Culture
3 Credits (3)

The course content provides a global perspective and understanding of Italian food, wine, art and culture and their integration into tourism. The content is designed to provide students an appreciation of Italian cultural values and an overview of food, wine and art in the tourism regions of Italy.

Learning Outcomes

1. Describe and explain the basic history of the tourism regions of Italy.
2. Recognize and describe the Italian food and wine industry and its impact on tourism.
3. Detail how the Italian's integrate sustainability into tourism.
4. Recognize the impact of culture and art on tourism.
5. Explain strategies for responsible travel abroad in Italy and the European Union focused on personal and group safety.
6. Analyze and evaluate multicultural differences between Italian and American societies focused on effective personal communication practices.
7. Produce a 20 slide narrated online presentation with pictures that focused on at least two course learning objectives

HRTM 4130. Advanced Hotel Operations
3 Credits (3)

The duties and administration of a hotel front office, including housekeeping. Additional focus on the procedures of reservations and night audit. Students also gain exposure to property management systems.

Prerequisite: HRTM 2130.

Learning Outcomes

1. Describe day-to-day responsibilities for a hotel General Manager.
2. Explain departmental competencies for a hotel (Human Resources, Accounting, Revenue Management, Sales and Marketing, Front Office, Housekeeping, Food and Beverage, and Property Operation and Maintenance).
3. Compare and contrast management roles and responsibilities between limited service and full service hotels.
4. Describe hotel organizational, ownership, and franchising structures and their effect on hotel operations.
5. Explain the role of service throughout hotel operation departments.

HRTM 4135. Hospitality Facilities Management
3 Credits (3)

Exploration of the engineering and maintenance requirements specific to the hospitality industry. Emphasis on environmental issues, renovation and management of the physical plant.

Prerequisite: HRTM 2130, HRTM 4998.

Learning Outcomes

1. Manage property assets using planning and budgeting strategies and the appropriate type of maintenance.
2. Explain how technology is used to make maintenance and operations more efficient and effective.
3. Devise strategies to sustainably manage operational areas and systems in a hospitality business.
4. Manage water, HVAC, electrical, lighting, laundry safety and security, and waste management systems safely and efficiently.
5. Interpret construction drawings and schematics in a basic manner.
6. Describe various kitchen hood systems and individual pieces of kitchen equipment from a mechanical, maintenance and operational perspective.
7. Explain how risk management strategies for a hospitality business relate to facilities management.
8. Describe the importance of building design and engineering to guest experiences, safety, government compliance, and brand identity.
9. Describe real-world facility management activities for hotels and restaurants as described by industry professionals active within their career. 1
10. Apply effective communication and critical thinking skills.

HRTM 4140. Hotel Revenue and Sales Management
3 Credits (3)

Examines methods used for profitably managing capacity, including dynamic pricing and allocation of the rooms inventory across market segments to maximize revenues. Focuses on the integration of revenue management principles with information technology, management, marketing and sales concerns at the property and market level.

Prerequisite: HRTM 2130.

Learning Outcomes

1. Describe and discuss the role and function of revenue management in a hotel organization.
2. Evaluate pricing techniques and effects on demand.
3. Determine market segmentation for a hotel.
4. Demonstrate inventory management strategies.
5. Discuss legal and ethical aspects of revenue management.
6. Perform various analysis for a hotel as a function of revenue management.
7. Evaluate distribution channels for hotels.
8. Evaluate and recommend revenue management techniques.

HRTM 4145. Resort Management
3 Credits (3)

This course introduces students to the operation and management of full service resort properties, including the management of resort recreational amenities.
Prerequisite: HRTM 2130 or consent of instructor.
Learning Outcomes

1. Explain the history and structure of the resort industry, and its various products.
2. Describe the operations and management between resorts and hotels.
3. Identify and explain concepts and terminology for various resort amenities and activities.
4. Evaluate resort amenities and activities for various market segments.
5. Discuss trends in the resort industry.
6. Describe best practices in resort management.

HRTM 4230. Hotel, Restaurant and Tourism Industry Purchasing, Selection, and Procurement
3 Credits (3)
Purchasing methods for the hotel, restaurant and tourism industries based on standards of quality, grade, care, and storage for food and nonfood supplies. Purchasing, installation, operation, and care of large foodservice equipment.
Learning Outcomes

1. Differentiate purchasing functions in different types of hotel, restaurant and tourism operations and determine how internal and external forces impact purchasing decisions.
2. Outline and describe the duties and responsibilities of hotel, restaurant and tourism purchasing managers.
3. Develop product recommendations for hotel, restaurant and tourism food and equipment through the use of various product evaluation methods.
4. Identify examples of unethical purchasing practices throughout history, research present a code of purchasing ethics for a hotel, restaurant or tourism company.
5. Analyze hotel, restaurant and tourism industry supplier selection criteria and recommend a supplier based on those criteria.
6. Apply mathematical models to calculate recipe costs as well as order quantities and times. Determine how to reduce AP prices.
7. Outline and describe each step of the flow of inventory and determine which controls are needed for security of inventory.
8. Explain product grades and explain grading procedures and procurement criteria for meats, poultry, eggs, dairy, produce, marine products, groceries, and nonfood items.

HRTM 4235. Club Management and Marketing
3 Credits (3)
Provides an understanding of the general operational and administrative procedures practiced in private clubs from a marketing perspective with a special emphasis on managing and marketing club food and beverage operations and service. It will provide the professional golf management and hospitality students with the unique sensitivities required in managing and operating in the increasingly lucrative club management market.
Learning Outcomes

1. Describe the different types of private clubs and their specific operations.
2. Describe the different types of membership categories offered by private clubs.
3. Describe the responsibilities of the board of directors of private clubs.
4. Identify the typical organizational structure in private clubs.
5. Distinguish the functions and responsibilities of a club's board of directors from those of the club's general manager and staff.
6. Identify tips for long-term success to become an effective leader and communicator.
7. Explain the importance of a club strategic plan and strategic implementation.
8. Explain the role of marketing in a private club setting.
9. Summarize the importance of training and lifelong learning to the success of private clubs. 1
10. Describe the different types of food and beverage operations found in private clubs. 1
11. Identify the different financial statements used by clubs. 1
12. Describe the functions and ethical interdependencies among the major departments within a club. 1
13. Describe a manager's operational inspection and critique of one of the major departments within a club from an overall department manager's leadership perspective. 1
14. Explain the importance of facility management in clubs, particularly as it relates to members, employees and costs. 1
15. Summarize the duties and responsibilities of golf professionals, greens and grounds departments, and other golf staff members. 1
16. Describe a club fitness operation, and common programs of a club fitness center.

HRTM 4240V. Sustainability in the Hospitality Industry
3 Credits (3)
This course provides a summary and definition of the concept and roots of sustainability and climate change as well as their impact and effect on the hospitality industry while providing the rationale for sustainable development for the industry. A review of environmentally sound management strategies for all operational management areas ranging from eco-design, energy, waste and water management, food security, sourcing of agricultural products leads to a detailed strategy for planning and evaluating the sustainability of a hospitality operation in terms of corporate responsibility and social entrepreneurship. The content is focused on a global perspective of sustainability in the industry.
Learning Outcomes

1. Recognize, interpret and summarize the global challenges facing the hospitality industry caused by climate change driving the need for sustainability in the industry.
2. Explain implementation strategies for responsible environmentally sound hospitality management practices for hotel, food and beverage and tourism businesses.
3. Evaluate sustainable development practices and the importance of personal and corporate social development.
4. Analyze, evaluate and communicate the sustainability practices of a hospitality operation.

HRTM 4310. Beverage Management
3 Credits (3)
Survey of all aspects of beverage management, including wine/beer/distilled spirits origins and trends, cost control, bar management, beverage purchasing, and wine appreciation.
Prerequisite: HRTM 3310.
Learning Outcomes

1. Identify beverage industry career opportunities and trends that impact hospitality beverage operations.

2. Discuss responsible alcohol service principles in compliance with legal and ethical standards.
3. Explain the basic components of bar and beverage operations', design, layout and equipment.
4. Differentiate between the various beverage production processes and service standards.
5. Classify types of alcoholic and non-alcoholic beverages.
6. Develop beverage menus that align with food offerings, customer preferences, and business goals.
7. Describe the key principles of beverage inventory management and control.
8. Illustrate the role of beverage sales in operational profitability including pricing strategies and marketing techniques.

HRTM 4320. Restaurant Operations Management
4 Credits (1+6P)
Provides a detailed understanding of the processes of restaurant operations management. Students are expected to increase kitchen and service technical skills, develop and cook from recipes, develop a personal leadership style, understand food and wine pairing, and supervise front and back of the house operations. Provides the opportunity to perform a detailed analysis of a food and beverage operation. Proof of valid ServSafe Food Protection Manager or NM Food Handler certification and current NM Alcohol Server certification required.
Prerequisite: HRTM 3310.
Learning Outcomes
1. Demonstrate the skill of planning, designing, pricing and evaluating menus.
2. Demonstrate servant leadership skills during fine dining meals.
3. Demonstrate cost control through budget, income and expense reports.
4. Demonstrate how to construct, portion and cost standard recipes.
5. Demonstrate how to inventory, purchase, receive and store foods for production.
6. Demonstrate back of house production, service, and management.
7. Demonstrate how to manage alcoholic beverages with emphasis on wines.
8. Demonstrate front of house service and management.
9. Demonstrate how labor costs effect menu, food production, and desired service. 1
10. Demonstrate application of revenue control in the food service facility. 1
11. Demonstrate ability to implement change within the restaurant setting.

HRTM 4330. Wine Appreciation
3 Credits (3)
An experiential examination of wine through lectures, guest speakers and focused tasting of wine and food. Topics include viticulture, wine making varietals, terroir, wine service, tasting and evaluation techniques, and food pairings. Student must be at least 21 years old. Consent of instructor required.
Learning Outcomes
1. Discuss the historical and cultural significance of wine.
2. Compare and contrast the production processes for wines.
3. Describe and analyze the characteristics of popular wine varietals.
4. Describe how viticultural practices and geography/climate factors relate to the quality and variation in wines.
5. Perform evaluation and appraisal of wines based on quality, value, and intended use.
6. Apply knowledge of terminology related to labeling laws, practices, and geography of the major wine-growing regions of the world to the effective selection of both domestic and imported wines.
7. Pair wine with foods.
8. Examine the distribution and service systems for wine, including current issues affecting them.

HRTM 4410. Hospitality Cost Control
3 Credits (3)
Familiarizes students with all aspects of cost control including financial data entry and hospitality accounting practices, financial report production, analysis and problem solving. Students will learn to understand the roles of the various stakeholders (owners, managers, employees and customers.) Provides tools needed to communicate effectively about global financial issues affecting the hospitality business.
Prerequisite: HRTM 3310, HRTM 3410.
Learning Outcomes
1. Analyze relationships between hospitality business traffic, revenue, expense, and contribution margin as key variables associated with demand and profitability.
2. Explain professional purchasing, storage, and receiving techniques managers use to minimize spoilage and prevent product shortages.
3. Apply standardized recipes and effective menu planning techniques to efficiently manage food and beverage production systems.
4. Outline the steps managers take to control costs and achieve operational profit goals.
5. Categorize types of expenses accurately.
6. Calculate expenses by the cost per guest served and by the percentage of sales revenue.
7. Evaluate operational cost effectiveness through income (PL) statement analysis, including sales volume and all expense categories.
8. Prepare cost-volume-profit analysis(s) to evaluate the contribution of menu items to operational profits, including calculating break-even points.
9. Propose systems to prevent potential internal and external revenue theft threats. 1
10. Solve detailed virtual restaurant simulation exercises, including start-up and turnaround scenarios.

HRTM 4910. HRTM Internship Seminar
1 Credit (1)
A case based approach to analyzing internship experiences. Students will write case studies about specific business issues they encountered during HRTM 4998 and analyze them. Restricted to HRTM majors. May be repeated up to 1 credit.
Prerequisite: HRTM 4998.
Learning Outcomes
1. Explain the strengths and weaknesses of departments and work units from the hospitality operation in which they interned.
2. Compare and contrast management styles, leadership skill, and effectiveness of supervisors and managers.
3. Offer solutions to problems and challenges encountered in the workplace.
4. Write a comprehensive case study about their internship experiences.

HRTM 4991. Special Problems
1-4 Credits (1-4)
Individual research in a selected subject area of hospitality management. Consent of instructor required. Maximum of 4 credits per semester and a total of 6 credits toward a degree. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

HRTM 4996. Special Topics
1-4 Credits (1-4)
Specific subjects to be announced in the Schedule of Classes. Consent of instructor required. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits.
Learning Outcomes
1. Varies.

HRTM 4998. Hospitality Internship
1 Credit (1)
Hospitality and tourism professional work experience for HRTM majors only. Consent of instructor required. May be repeated up to 1 credit.
Prerequisite: HRTM 3910.
Learning Outcomes
1. Secure and maintain an internship opportunity that includes leadership/cross training industry-related experience and work.
2. Recognize current and key concepts and principles related to market trends, teamwork and ethical management and decision-making strategies in the operation of hospitality and tourism organizations.
3. Demonstrate principles of ethical leadership and effective teamwork within diverse hospitality and tourism management contexts, and the ability to apply these principles in real-world scenarios.
4. Apply current and emerging professional operational systems, service management techniques and service quality measurement systems.
5. Create favorable guest experiences in hospitality and tourism settings.
6. Use current and emerging operational methods and relevant technologies.
7. Exercise effective written, oral, visual, and interpersonal communication skills.

HRTM 4999. Senior Capstone Experience
3 Credits (3)
Synthesizes all previous work. Students apply multi-disciplinary principles to the analysis of hospitality business cases and tourism problems.
Prerequisite: HRTM 4998.
Learning Outcomes
1. Apply the ethical lens framework to business decisions.
2. Evaluate the importance of the effects of the Covid-19 pandemic, diversity, equity, and inclusion, the guest service experience, including service failure, and recovery, innovation, technology, corporate social responsibility, business models, and other trends to the hospitality and tourism industry.
3. Use research and the case study method to analyze hospitality business issues and trends.
4. Present case and research findings in a professional manner
5. Write professional reports.

HRTM 5115. Graduate Entertainment Business and Venue Management
3 Credits (3)
This course will review and examine the principles and practices associated with managing a public assembly venue and the nature of the venue and entertainment business. This is a comprehensive course designed to cover all aspects of incorporated event practices such as marketing, production, contracts, ticketing, and security.
Learning Outcomes
1. Analyze the origin and history of public assembly venues and the role they play within the community.
2. Evaluate different ownership and management structures and how governance relationships impact operational management.
3. Analyze the business and financial operations of a public assembly venue.
4. Describe the booking process, the entities involved, and the importance of relationships.
5. Investigate and create marketing and sales strategies for both a public assembly venue and an event that is booked in the venue.
6. Identify and analyze the ticket system options available to venue managers, as well as their importance in access management, financial accountability, and data collection.
7. Analyze the role and importance of ancillary revenue sources, as well as the need for creativity and entrepreneurship.
8. Describe the operational systems and processes required to maintain a venue and produce events.
9. Analyze the event planning process and how it is used to produce an event experience for guests and clients. 1
10. Evaluate management's role in developing and maintaining a safe and secure public assembly venue.

HRTM 5120. Hospitality Services Management
3 Credits (3)
This course explores and applies the design and management of service quality in global hospitality organizations.
Learning Outcomes
1. Investigate the design and management of service quality in global hospitality organizations to create authentic and memorable hospitality experiences.
2. Design and manage service delivery systems to create a culture of service excellence.
3. Define and discuss the relationship between service and financial performance in hospitality organizations.

HRTM 5130. Graduate Advanced Hotel Operations
3 Credits (3)
The duties and administration of a hotel front office, including housekeeping. Additional focus on the procedures of reservations and night audit. Students also gain exposure to property management systems. Same as HRTM 4130 with additional work for graduate credit.
Learning Outcomes
1. Describe day-to-day responsibilities for a hotel General Manager.
2. Explain departmental competencies for a hotel (Human Resources, Accounting, Revenue Management, Sales and Marketing, Front Office, Housekeeping, Food and Beverage, and Property Operation and Maintenance).
3. Compare and contrast management roles and responsibilities between limited service and full service hotels.
4. Describe hotel organizational, ownership, and franchising structures and their effect on hotel operations.
5. Explain the role of service throughout hotel operation departments.

HRTM 5140. Hotel Revenue and Sales Management
3 Credits (3)

Examines methods used for profitably managing capacity, including dynamic pricing and allocation of the rooms inventory across market segments to maximize revenues. Focuses on the integration of revenue management principles with information technology, management, marketing and sales concerns at the property and market level. Same as HRTM 4140 with additional work for graduate credit. Consent of Instructor required.

Learning Outcomes

1. Describe and discuss the role and function of revenue management in a hotel organization.
2. Evaluate pricing techniques and effects on demand.
3. Determine market segmentation for a hotel.
4. Demonstrate inventory management strategies.
5. Discuss legal and ethical aspects of revenue management.
6. Perform various analysis for a hotel as a function of revenue management.
7. Evaluate distribution channels for hotels.
8. Evaluate and recommend revenue management techniques.

HRTM 5145. Resort Management
3 Credits (3)

This course introduces students to the operation and management of full service resort properties, including the management of resort recreational amenities. Consent of instructor required. Must be in Graduate Student standing to enroll. Same as HRTM 4145 with additional work for graduate credit.

Learning Outcomes

1. Explain differences in operations and management between resorts and hotels.
2. Identify and explain concepts and terminology for various resort amenities and activities.
3. Evaluate resort amenities and activities for various market segments.
4. Identify and discuss trends in the resort industry.
5. Describe best practices in resort management.
6. Evaluate resort amenities, activities, markets and products.

HRTM 5210. The Hospitality Industry and Sustainable Competitive Strategy
3 Credits (3)

An examination of the hospitality industry, and its contemporary strategic management principles and practices. Key components, industry organization, and competitive environment of the hospitality industry are analyzed. Strategic decision making principles are examined to create sustainable competitive advantages for hospitality and service industry leaders and organizations.

Learning Outcomes

1. Analyze key components, industry organization, and competitive environment of the hospitality industry.
2. Examine strategic decision making principles to create sustainable competitive advantages for hospitality and service industry leaders and organizations.

HRTM 5220. Contemporary Global Issues in Hospitality
3 Credits (3)

Contemporary issues confronting the global hospitality industry.

Learning Outcomes

1. Discuss contemporary issues confronting the global hospitality industry.
2. Project how contemporary global issues will impact hospitality organizations.
3. Evaluate new developments in hotel and restaurant management.

HRTM 5230. Hotel, Restaurant and Tourism Industry Purchasing, Selection and Procurement
3 Credits (3)

Purchasing methods for the hotel, restaurant and tourism industries based on standards of quality, grade, care, and storage for food and nonfood supplies. Purchasing, installation, operation, and care of large foodservice equipment. Same as HRTM 4230 with additional work for graduate credit.

Learning Outcomes

1. Differentiate purchasing functions in different types of hotel, restaurant and tourism operations and determine how internal and external forces impact purchasing decisions.
2. Outline and describe the duties and responsibilities of hotel, restaurant and tourism purchasing managers.
3. Develop product recommendations for hotel, restaurant and tourism food and equipment through the use of various product evaluation methods.
4. Identify examples of unethical purchasing practices throughout history, research present a code of purchasing ethics for a hotel, restaurant or tourism company.
5. Analyze hotel, restaurant and tourism industry supplier selection criteria and recommend a supplier based on those criteria.
6. Apply mathematical models to calculate recipe costs as well as order quantities and times. Determine how to reduce AP prices.
7. Outline and describe each step of the flow of inventory and determine which controls are needed for security of inventory.
8. Explain product grades and explain grading procedures and procurement criteria for meats, poultry, eggs, dairy, produce, marine products, groceries, and nonfood items.

HRTM 5240. Sustainability in the Hospitality Industry
3 Credits (3)

This course provides a summary and definition of the concept and roots of sustainability and climate change as well as their impact and effect on the hospitality industry while providing the rationale for sustainable development for the industry. A review of environmentally sound management strategies for all operational management areas ranging from eco-design, energy, waste and water management, food security, sourcing of agricultural products leads to a detailed strategy for planning and evaluating the sustainability of a hospitality operation in terms of corporate responsibility and social entrepreneurship. The content is focused on a global perspective of sustainability in the industry. Same as HRTM 4240V with additional work for graduate credit.

Learning Outcomes

1. Recognize, interpret and summarize the global challenges facing the hospitality industry caused by climate change driving the need for sustainability in the industry.
2. Explain implementation strategies for responsible environmentally sound hospitality management practices for hotel, food and beverage and tourism businesses.
3. Evaluate sustainable development practices and the importance of personal and corporate social development.
4. Analyze, evaluate and communicate the sustainability practices of a hospitality operation.

HRTM 5310. Beverage Management
3 Credits (3)
Survey of all aspects of beverage management, including wine/beer/distilled spirits origins and trends, cost control, bar management, beverage purchasing, and wine appreciation. Same as HRTM 4310 with additional work for graduate credit. Consent of Instructor required.
Learning Outcomes
1. Identify beverage industry career opportunities and trends that impact hospitality beverage operations.
2. Discuss responsible alcohol service principles in compliance with legal and ethical standards.
3. Explain the basic components of bar and beverage operations' design, layout, and equipment.
4. Differentiate between the various beverage production processes and service standards.
5. Classify types of alcoholic and non-alcoholic beverages.
6. Develop beverage menus that align with food offerings, customer preferences, and business goals.
7. Describe the key principles of beverage inventory management and control.
8. Illustrate the role of beverage sales in operational profitability, including pricing strategies and marketing techniques.

HRTM 5330. Graduate Wine Appreciation
3 Credits (3)
An experiential examination of wine through lectures, guest speakers and focused tasting of wine and food. Topics include viticulture, wine making varietals, terroir, wine service, tasting and evaluation techniques, and food pairings.
Learning Outcomes
1. Discuss the historical and cultural significance of wine.
2. Compare and contrast the production processes for wines.
3. Describe and analyze the characteristics of popular wine varietals.
4. Describe how viticultural practices and geography/climate factors relate to the quality and variation in wines.
5. Perform evaluation and appraisal of wines based on quality, value, and intended use.
6. Apply knowledge of terminology related to labeling laws, practices, and geography of the major wine-growing regions of the world to the effective selection of both domestic and imported wines.
7. Pair wine with foods.
8. Examine the distribution and service systems for wine.
9. Critically research and evaluate current issues in wine production, marketing, and distribution.

HRTM 5402. AI Applications in Fiber and Food Systems
3 Credits (3)
Focusing on food and fiber systems, the course includes applications of AI to food processing, food safety, nutrition, and sustainability. Students in the course will explore demand forecasting, labor management, consumer behavior, and other economic and sociocultural aspects of food and fiber systems. The course will incorporate concepts of equitable access, job quality, transparency, data privacy and security, and responsible and ethical use of AI in fiber and food systems.
Learning Outcomes
1. Identify application areas in food and fiber systems for AI opportunities.
2. Evaluate AI tools for nutrition, food processing, food safety, supply chain management, and sustainability in food and fiber systems.
3. Assess the impact of AI tools on demand forecasting, labor management and consumer behavior in food and fiber systems.
4. Apply machine learning and AI methods to enhance decision-making across food and fiber value chains.
5. Develop and evaluate predictive and classification models using real-world data from food and fiber systems.
6. Discuss and apply ethical and responsible AI frameworks to food and fiber systems.

HRTM 5404. Emerging Topics in AI for Food and Agriculture
3 Credits (3)
Analyze emerging applications and uses of AI in food systems, agriculture, and the environment. Project impacts of emerging AI topics to agriculture, the environment, and food and fiber industries. Evaluate new developments in AI for application to food, fiber, agriculture, and the environment. Explore ethical dimensions of AI in agriculture.
Learning Outcomes
1. Analyze emerging applications and uses of AI in food systems, agriculture, and the environment.
2. Describe and discuss how emerging developments in AI can impact food, fiber, and agriculture businesses.
3. Describe and discuss impacts of emerging AI technologies to agriculture, the environment, and food and fiber industries.
4. Evaluate new developments in AI for application to food, fiber, agriculture, and the environment.

HRTM 5410. Hospitality Cost Control
3 Credits (3)
Familiarizes students with all aspects of cost control including financial data entry and hospitality accounting practices, financial report production, analysis and problem solving. Students will learn to understand the roles of the various stakeholders (owners, managers, employees and customers). Provides tools needed to communicate effectively about global financial issues affecting the hospitality business. Same as HRTM 4410 with additional work for graduate credit. Consent of Instructor required.
Learning Outcomes
1. Analyze relationships between hospitality business traffic, revenue, expense, and contribution margin as key variables associated with demand and profitability.
2. Explain professional purchasing, storage, and receiving techniques managers use to minimize spoilage and prevent product shortages.
3. Apply standardized recipes and effective menu planning techniques to efficiently manage food and beverage production systems.
4. Outline the steps managers take to control costs and achieve operational profit goals.
5. Categorize types of expenses accurately.
6. Calculate expenses by the cost per guest served and by the percentage of sales revenue.
7. Evaluate operational cost effectiveness through income (PL) statement analysis, including sales volume and all expense categories.
8. Prepare cost-volume-profit analysis(s) to evaluate the contribution of menu items to operational profits, including calculating break-even points.
9. Propose systems to prevent potential internal and external revenue theft threats. 1

10. Solve detailed virtual restaurant simulation exercises, including start-up and turnaround scenarios.

HRTM 5420. Hospitality Research Methods & Analysis
3 Credits (3)
Application of appropriate statistical procedures and research methodologies within the hospitality industry.
Learning Outcomes
1. Analyze hospitality operational data.
2. Develop the framework for researching hospitality operations and organizations.
3. Implement appropriate statistical procedures and research methodologies to hospitality operations.
4. Examine problems in hospitality, formulate and clarify research topics to address these problems.

HRTM 550. The World of Hospitality Higher Education
3 Credits (3)
Survey of the history, organization, and administration of hospitality higher education programs. Explores differences between types of degree programs – associate, bachelor, graduate and sources of funding – public, private, proprietary. Investigates the role of the faculty member in non-instructional activities, such as working with administrative and support departments, accreditation, service, community outreach, fundraising, and industry relations. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.
Learning Outcomes
1. Discuss the history of higher education and hospitality management programs.
2. Analyze how general higher education principles, laws, and finance apply to hospitality management programs.
3. Compare the characteristics, administration, and operations of programs based on type of degrees offered.
4. Compare the characteristics, administration, and operations of programs based on sources of funding.
5. Analyze the role of the faculty in hospitality education in collaborating with various educational departments and support services.
6. Analyze the role of the faculty in hospitality education in collaborating with external stakeholders.

HRTM 5510. The World of Hospitality Higher Education
3 Credits (3)
Survey of the history, organization, and administration of hospitality higher education programs. Explores differences between types of degree programs – associate, bachelor, graduate and sources of funding – public, private, proprietary. Investigates the role of the faculty member in non-instructional activities, such as working with administrative and support departments, accreditation, service, community outreach, fundraising, and industry relations. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.
Learning Outcomes
1. Discuss the history of higher education and hospitality management programs.
2. Analyze how general higher education principles, laws, and finance apply to hospitality management programs.
3. Compare the characteristics, administration, and operations of programs based on type of degrees offered.
4. Compare the characteristics, administration, and operations of programs based on sources of funding.
5. Analyze the role of the faculty in hospitality education in collaborating with various educational departments and support services.
6. Analyze the role of the faculty in hospitality education in collaborating with external stakeholders.

HRTM 598. Special Research Programs
1-4 Credits
Individual investigations, either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree.
Prerequisite: consent of instructor.

HRTM 5991. Special Research Programs
1-4 Credits (1-4)
Individual investigations, either analytical or experimental. Consent of instructor required. Maximum of 4 credits per semester and no more than 6 credits toward a degree.
Learning Outcomes
1. Explain and deliver a summary and definition for planning research in hospitality and tourism.
2. Demonstrate effective academic reading skills, articulate your research goal, define parameters and organization for your literature search, appropriately document and cite sources from your search.
3. Develop a topic statement and the framework for researching specific hospitality operations and organizations.
4. Design and implement appropriate statistical procedures and research methodologies to hospitality operations.
5. Evaluate problems in hospitality, formulate and clarify research topics to address these problems.

HRTM 5992. Applied Management Project
3 Credits (3)
Students will develop a project scope based on problems presented within the hospitality industry. Projects incorporate concepts and skills developed in previous coursework. Students will take this course in their last semester of the Master of Hospitality Degree.
Learning Outcomes
1. Develop a project scope based on problems presented within the hospitality industry.
2. Use collaborative problem solving to execute the project.
3. Define and identify a business research problem and explain its importance to study.
4. Identify sources and strategies for locating related literature.
5. Plan research regarding the business problem.
6. Write the professional paper.
7. Present the professional paper.

HRTM 5996. Special Topics
1-4 Credits (1-4)
Specific subjects and credits to be announced in the Schedule of Classes. Consent of instructor required. Maximum of 4 credits per semester and a total of 9 credits toward a degree. May be repeated up to 9 credits.
Learning Outcomes
1. Varies

HRTM 5998. Graduate Hospitality Internship
3 Credits (3)
Hospitality and tourism industry professional, structured and supervised work experience for HRTM graduate students only.

Learning Outcomes

1. Develop and apply interviewing and negotiating skills during the process of seeking and being hired into an internship.
2. Recall and explain the strengths and weaknesses of departments and work units from the hospitality operation in which they interned.
3. Describe and explain interactions with the hospitality operation's guests and the development of a positive service oriented attitude as well as be able to describe the service management delivery system.
4. Compare and contrast the management styles, leadership skills, and effectiveness of supervisors and managers. analyze which type of style or skill fits best with their style.
5. Analyze which styles and leadership skills best fit their personal management abilities.
6. Identify new and different experiences encountered during the internship, distinguish the positive and negative aspects of the experience, and appraise these experiences as to their value to their future hospitality management career.
7. Apply coursework related knowledge to demonstrate coursework related knowledge to the internship position.
8. Synthesize the total internship learning experience by completing a comprehensive management report.

HRTM 5999. Master's Thesis
1-6 Credits (1-6)
Thesis. Consent of instructor required. May be repeated up to 6 credits.
Learning Outcomes

1. Varies

HVAC-HEATING/AC/REFRIGERATION

HVAC 1105. Introduction to Fundamentals of Refrigeration
4 Credits (3+2P)
Demonstrate the ability to perform HVAC/R Technician duties in a safe manner. Accurately perform HVAC/R related calculations and interpret results for the purpose of diagnosis, repair, or installation of HVAC/R equipment and systems. Professionally communicate in oral and written forms. Demonstrate the use of current industry techniques including tools, testing equipment, manufacturers' apps. Determine the appropriate ethical action that should occur in a given circumstance. Work effectively in a team-based environment. Possess a mastery of the refrigeration cycle and its components.
Learning Outcomes

1. Demonstrate working knowledge of heat theory, safety, and temperature/pressure/volume gas laws as they relate to the refrigeration cycle.
2. Identify and demonstrate heat transfer by conduction, convection, and radiation and describe their effects on temperature change using latent and sensible heat transfer.
3. Safely demonstrate the refrigeration process using system components such as compressors, condensers, evaporators, metering (expansion) devices and accessories.
4. Demonstrate a knowledge of industry standards for system installation of equipment and tubing and safely demonstrate tubing operations including cutting, reaming, flaring, swaging, and brazing.

HVAC 1110. Introduction to Fundamentals of Electricity
4 Credits (3+2P)
Introduces the student to electrical theory, generation and distribution, OHM's Law, series and parallel circuits, A/C / D/C, practical applications and electrical safety.
Learning Outcomes

1. Demonstrate the use of industry practices: safety, use of lockout/tagout, diagnosing , repairing, and installing electrical components in HVAC/R equipment and systems; use of test instruments both digital and analog, comprehension of wiring diagrams, proper use of tools specific to the industry, mastery of electrical theory and circuits, single-phase and three-phase applications; use of symbols and terminology, and the ability to communicate professionally in oral and written forms.

HVAC 1111. EPA Clean Air Act: Section 608
1 Credit (1)
Refrigerant certification preparation to include basics of refrigerant bearing equipment, ozone depletion and the new legislation, technician categories covered and the certification examination.
Learning Outcomes

1. Use oral communication effectively, use written communication effectively.
2. Accurately perform calculations related to refrigeration.
3. Accurately perform calculations related to refrigeration.
4. Accurately perform calculations related to air conditioning.
5. Accurately perform conversions between various units.

HVAC 1125. Electrical and Mechanical Controls I
4 Credits (3+2P)
Applications of basic electrical and mechanical controls. Reading and drawing diagrams of simple refrigerating equipment. Safe use of testing equipment.
Prerequisite: HVAC 1105 and HVAC 1110, or consent of instructor.
Learning Outcomes

1. Use oral communication and written communication effectively.
2. Determine the appropriate ethical action that should occur in a given circumstance.
3. Perform technician duties safely.
4. Service refrigeration systems, repair refrigeration systems, maintain refrigeration systems.
5. Accurately perform calculations related to refrigeration.
6. Work effectively as a team.
7. Troubleshoot refrigeration systems.
8. Accurately perform conversions between various units.

HVAC 1233. Professional Development and Leadership
1 Credit (1)
As members and/or officers of various student professional organizations, students gain experience in leadership, team building, and community service. Students competing in Skills USA are required to register for the course. May be repeated up to 6 credits.
Learning Outcomes

1. Professionally communicate in oral and written forms.
2. Work effectively in a team-based environment.
3. Demonstrate the ability to perform HVAC/R Technician duties in a safe manner.

HVAC 1238. Introduction to Sheet Metal Fabrication
4 Credits (3+2P)
Introduction to sheet metal fabrication to include hands-on practical laboratory applications, cutting and forming procedures, identifying types and gauges. Design and layout techniques.
Prerequisite: OETS 118 or equivalent math or consent of instructor.

Learning Outcomes

1. Professionally communicate in oral and written forms.
2. Demonstrate the ability to perform HVAC/R Technician duties in a safe manner.
3. Demonstrate sheet metal design and layout techniques to fabricate ducting and associated fittings accurately.
4. Determine the appropriate ethical action that should occur in a given circumstance.
5. Accurately perform HVAC/R related calculations and interpret results for the purpose of diagnosis, repair, or installation of HVAC/R equipment and systems.

HVAC 1243. Residential Air Conditioning Systems
4 Credits (3+2P)
Applications and types of equipment used in comfort cooling. Preventive maintenance, service, and repairs common to evaporative coolers and refrigerated air conditioning systems. Air properties and psychometrics. May be repeated up to 4 credits.
Prerequisite: C- or better in HVAC 1105 and HVAC 1110.
Learning Outcomes

1. Use oral and written communication effectively.
2. Work effectively as a team.
3. Determine the appropriate ethical action that should occur in a given circumstance.
4. Troubleshoot heating systems accurately perform conversions between various units, accurately perform calculations related to heating systems.

HVAC 1245. Gas Heating Furnaces
4 Credits (3+2P)
The study and application of gas furnaces including installation, operation, service, maintenance and controls. The students will learn about natural gas, and electric heating systems used for residential and/or light commercial heating systems including furnace and boiler package systems and alternative heating sources. Highlights electrical and electronic trouble shooting, service, maintenance, repair and replacement of residential and light commercial heating systems. The course will include service, maintenance and troubleshooting.
Prerequisite: C- or better in HVAC 1105 and HVAC 1110.
Learning Outcomes

1. Identify the components and describe the sequence of operation of gas furnaces.
2. Use proper procedures to troubleshoot gas furnaces.
3. Describe and demonstrate proper procedures for conducting service calls and delivering customer service.
4. Demonstrate the use of proper procedures for preventative maintenance of gas furnaces.
5. Describe how gas pressure is measured, what unit of measurement is used and what is the purpose of a water manometer, gas combustion, four means of proof flame, why there is a fan-on and fan-off delay, flue gas venting systems, gas piping adjacent to the gas valve, calculate the correct orifice size, derate sea level input for altitude, calculate the correct gas pipe sizing for a one-story building with several gas appliances.

HVAC 1250. Heat Pump Systems
4 Credits (3+2P)
The student will acquire the knowledge to identify heat pump components, explain the sequence of operation, and develop troubleshooting skills for both mechanical and electrical issues associated with reverse cycle refrigeration systems used in comfort heating and cooling, a while utilizing the proper tools and equipment.
Prerequisite: C- or better in HVAC 1105 and HVAC 1110.
Learning Outcomes

1. Professionally communicate in oral and written forms.
2. Work effectively in a team-based environment.
3. Accurately perform HVAC/R related calculations and interpret results for the purpose of diagnosis, repair, or installation of HVAC/R equipment and systems.
4. Demonstrate the use of current industry techniques and equipment to diagnose HVAC/R systems and perform appropriate repairs.
5. Demonstrate the use of current industry techniques and equipment to perform the service and maintenance of HVAC/R equipment and systems.
6. Demonstrate the use of current industry techniques and equipment in the installation of HVAC/R equipment and systems.
7. Determine the appropriate ethical action that should occur in each circumstance.

HVAC 1410. Commercial Refrigeration Systems
4 Credits (3+2P)
This course covers the installation, service, and maintenance of a wide range of refrigeration equipment, including reach-in and walk-in coolers, ice machines, ice cream machines, as well as mechanical and electrical troubleshooting of refrigeration systems. Encompassing the service and maintenance of commercial refrigeration equipment, which involves procedures for evacuation and charging, understanding electrical diagrams, and handling compressors and related accessories.
Prerequisite: Grade of C- or better in HVAC 1105 and HVAC 1110.
Learning Outcomes

1. Read and interpret model numbers, nomenclature, and component capacities.
2. Use industry techniques and equipment for diagnosing and repairing HVAC/R systems.
3. Perform service and maintenance on HVAC/R equipment and systems.
4. Determine ethical actions in given circumstances.
5. Demonstrate safe HVAC/R Technician duties.
6. Work effectively in a team-based environment.
7. Accurately perform HVAC/R calculations and interpret results.
8. Communicate professionally, both orally and in writing.
9. Perform leak checks, repairs, recovery, evacuation, and recharging of refrigeration systems. 1
10. Identify components and troubleshoot parallel refrigeration systems. 1
11. Start up, troubleshoot, and explain Lab Systems.1
12. Address various refrigeration accessories. 1
13. Assemble, pipe, pressure test, and operate systems. 1
14. Troubleshoot refrigeration defrost timer systems. 1
15. Calculate heat gain and specify refrigeration systems. 1
16. Understand the use of water and brines as secondary refrigerants. 1
17. Diagnose and repair refrigerant side problems. 1
18. Set controls for temperature regulation. 1
19. Locate information in reference sources. 2
20. Evaluate system performance using data. 2
21. Size and assemble refrigeration systems to meet customer needs. 2
22. Handle refrigerant, including recovery, recycling, and reclamation. 2

23. Identify and troubleshoot various safety controls. 2
24. Troubleshoot line voltage thermostats and compressor contactors. 2
25. Diagnose and repair air side problems. 2
26. Troubleshoot electrical problems using schematics. 2
27. Use pressure/enthalpy charts and understand the refrigeration cycle.

HVAC 2098. Heating, Ventilating, Air Conditioning, and Refrigeration Field Experience
1 Credit (1)
The course will provide students with actual hands-on exposure to HVAC/R fieldwork, offering insights into the expectations of field technicians as they shadow experienced HVAC/R professionals. Students will gain practical experience through supervised training at an approved Heating, Ventilation, Air Conditioning, and Refrigeration workplace.
Learning Outcomes
1. Effectively utilize verbal and written communication, collaborate efficiently within a team, diagnose issues in refrigeration systems, precisely execute unit conversions, accurately conduct refrigeration-related calculations, identify the ethical course of action in specific situations, safely execute technician responsibilities, provide maintenance for refrigeration systems, conduct repairs on refrigeration systems, and service refrigeration systems.

HVAC 2210. Commercial Air Conditioning and Heating Systems
4 Credits (3+3P)
Covers troubleshooting mechanical and electrical problems associated with HVAC equipment in commercial buildings. Includes gas, electric, and heat pump systems.
Prerequisite: Grade of C- or better in HVAC 1105 & HVAC 1110.
Learning Outcomes
1. Professionally communicate in oral and written forms.
2. Determine the appropriate ethical action that should occur in a given circumstance.
3. Demonstrate the ability to perform HVAC/R Technician duties in a safe manner.
4. Demonstrate the use of current industry techniques and equipment in the installation of HVAC/R equipment and systems.
5. Demonstrate the use of current industry techniques and equipment to perform the service and maintenance of HVAC/R equipment and systems.
6. Accurately perform HVAC/R related calculations and interpret results for the purpose of diagnosis, repair, or installation of HVAC/R equipment and systems.
7. Demonstrate the use of current industry techniques and equipment to diagnose HVAC/R systems and perform appropriate repairs.
8. Work effectively in a team-based environment.

HVAC 2990. Practicum
3 Credits (3)
Working in the field with journeymen service technicians. Develop and apply job skills.
Prerequisite: HVAC 2098.
Learning Outcomes
1. Varies.

HVAC 2996. Special Topics
1-6 Credits
Topics to be announced in the Schedule of Classes. May be repeated up to 12 credits.
Learning Outcomes
1. Varies.

I B-INTERNATIONAL BUSINESS

I B 317. International Marketing
3 Credits (3)
Focuses on decisions relating to entering markets, market segmentation, marketing strategies, and tactics in the international arena. Same as MKTG 317.
Learning Outcomes
1. Develop understanding about what is involved in making international marketing decisions, including product, price, promotion, and place decisions to create a marketing mix.
2. Acquire an overview on the contemporary issues in global marketing and the unique challenges faced by marketing managers in the dynamic global environment.
3. Develop insights into how differences in global economic, cultural, social, political, and legal environments can affect marketing decisions.
4. Develop strategic thinking in the context of complex problems and challenges faced by the contemporary global executives and managers.
5. Develop ability to integrate the important global societal dimensions of diversity, environmental concerns, ethics, and technological change into their thinking.
6. Develop knowledge and skills to analyze cross-cultural variables and their impact on international marketing.
7. Discover sources of information for researching and evaluating international markets.
8. Communicate effectively about marketing issues in group discussions, oral presentations and written reports.
9. Work effectively as a team member in analyzing marketing issues. 1
10. Develop leadership skills necessary to deal with the uncertainty and changes faced by today's global marketers.

I B 351. International Business
3 Credits (3)
The various aspects of international business, and identification and analysis of problems encountered by multinational companies.
Prerequisite: Junior standing or consent of instructor.
Learning Outcomes
1. To understand the operations of international business including international trade, finance, marketing, corporate management, political relations, business culture and ethics, and other business topics.

I B 398. International Business and Economic Environments
3 Credits (3)
Description and analysis of various world regions, e.g., Pacific Rim, Eastern Europe, South Asia. Region will vary from semester to semester.

I B 449. Open Economy Macroeconomics
3 Credits (3)
This course studies theoretical and empirical macroeconomics in international dimension. It covers from the fundamental concepts of national income and growth, monetary/fiscal and exchange rate policies, foreign exchange markets, international trade and finance, and regionalization/economic integration to the impact analysis of these macroeconomic fundamentals in the open economy. Crosslisted with: ECON 449.

Prerequisite(s): BFIN 341 OR ECON 311.

I B 450. International Economics
3 Credits (3)
Trade and capital flows between countries, international payments, government policy in balance-of-payments and tariff matters, international organizations. Crosslisted with: ECON 450G
Prerequisite(s): ECON 2110G or ECON 2110H and ECON 2120G or ECON 2120H.

I B 475. International Finance
3 Credits (3)
International aspects of financial transactions, decision-making, banking and financial markets. Crosslisted with: BFIN 475 and BFIN 575.
Prerequisite(s): BFIN 341.

I B 489. Senior Seminar in International Business
3 Credits (3)
Capstone class for I B majors. Integration of previous classwork via the examination of case studies and completion of a major project.
Prerequisite: I B core.

I E-INDUSTRIAL ENGINEERING

I E 151. Computational Methods in Industrial Engineering
3 Credits (3)
History, social implications, and application of computers and an introduction to computer programming, word processing, and database management systems. Satisfies General Education computer science requirement. May be repeated up to 3 credits.
Prerequisite: MATH 1220G.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

I E 200. Special Problems-Sophomore
1-3 Credits
Directed individual projects. May be repeated up to 3 credits.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to communicate effectively with a range of audiences.

I E 217. Manufacturing Processes
3 Credits (2+3P)
Introduction to manufacturing and processing, including: casting, forming, and machining. Emphasis on creating products with the appropriate techniques. Crosslisted with: E T 217.
Prerequisite(s): A grade of C- or better in either E T 110 or ENGR 110 and C- or better in MATH 1220G.
Learning Outcomes
1. Identify the different manufacturing processes and their applications.
2. Use, set up, and calibrate measuring tools.
3. Apply geometric tolerances to engineering drawings.
4. Demonstrate basic knowledge of materials and material properties.
5. Demonstrate basic knowledge of GM codes and their application.
6. Proficiently use CAM packages such as SolidWorks CAM.
7. Identify different tooling, their use, and manufacturing application.

I E 300. Special Problems-Junior
1-3 Credits
Directed individual projects. May be repeated up to 3 credits.
Prerequisite: consent of faculty member.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to communicate effectively with a range of audiences.

I E 311. Engineering Data Analysis
3 Credits (3)
Methodology and techniques associated with identifying and analyzing industrial data.
Prerequisite: C- or better in MATH 1521G or MATH 1521H or ENGR 190.
Learning Outcomes
1. Ability to correctly interpret statistical reports
2. Ability to correctly identify and solve problems involving continuous and discrete probability and random variables.
3. Ability to correctly analyze random samples using methods that include: point estimates, confidence intervals, tests of hypothesis, analysis of variance (ANOVA), and linear regression.

I E 316. Methods Engineering
3 Credits (2+3P)
Methods analysis and design. Work measurement techniques. Job evaluation and wage incentive methods. May be repeated up to 3 credits.
Corequisite: I E 311.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
5. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

I E 351. Applied Problem Solving in Industrial Engineering
3 Credits (3)
Application of computational techniques to engineering problems including the use of commercial programs in statistics and applied mathematics. Restricted to majors.
Corequisite: I E 311.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to communicate effectively with a range of audiences.
3. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

I E 365. Quality Control
3 Credits (3)
Statistical analysis of quality in manufacturing. Acceptance sampling and control charts.
Prerequisite: I E 311 or equivalent.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.

I E 375. Manufacturing Processes II
3 Credits (3)
Review of basic manufacturing processes. Advanced topics in casting, forming, machining and joining; major process parameters; economics of processes.
Prerequisite: I E 217 or E T 217.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
4. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

I E 400. Undergraduate Research
1-3 Credits
Directed individual projects. May be repeated up to 6 credits.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to communicate effectively with a range of audiences.

I E 411. Occupational Safety
3 Credits (3)
Practical methods to improve safety in the workplace. Topics include OSHA and other regulations, hazard recognition, assessment and control, industry standards, risk assessment and safety management. Material is applicable to a variety of workplace settings. This course is intended for College of Engineering students who have completed their lower-division requirements in mathematics, engineering, technology, and basic science. Same as I E 561 with differential assignments. May be repeated up to 3 credits.
Prerequisite: Junior standing.
Learning Outcomes
1. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
2. An ability to communicate effectively with a range of audiences.
3. An ability to recognize ethical and professional responsibilities in engineering situations, and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

I E 412. Design for Manufacturing and Assembly
3 Credits (3)
Engineering methodology focusing on reducing time-to-market and total production costs by prioritizing both the ease of manufacture for the product's parts and the simplified assembly of those parts into the final product.
Prerequisite: (ENGR 217 or I E 217) and I E 316.
Learning Outcomes
1. The ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. The ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
3. The ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
4. The ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

I E 413. Engineering Operations Research I
3 Credits (3)
Deterministic operations research modeling including linear and integer programming.
Prerequisite: MATH 1521G or MATH 1521H or ENGR 190.
Corequisite: MATH 480 or MATH 2415.
Learning Outcomes
1. Ability to model optimization problems that can be solved by linear optimization.
2. Ability to solve linear optimization problems
3. Ability to interpret solutions of linear optimization problems in the context of the larger problem.

I E 423. Engineering Operations Research II
3 Credits (3)
Probabilistic operations research modeling, including queuing systems and their optimization; Markov chains.
Prerequisite: I E 311.
Corequisite: MATH 392.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to communicate effectively with a range of audiences.
3. An ability to recognize ethical and professional responsibilities in engineering situations, and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

I E 424. Manufacturing Systems
3 Credits (3)

Organization and functions of manufacturing planning and control systems including forecasting, MRP, capacity planning, JIT systems, scheduling, and inventory control.
Prerequisite: I E 311.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

I E 425. Supply Chain Modeling and Analysis
3 Credits (3)
This course introduces supply chain and logistics concepts integrating theory and its application. The course emphasis is on understanding the role of supply chains for competitive advantage, when and how these concepts are applied to improve the distribution of goods and services, as well as in using mathematical programming and optimization methods for their adequate implementation.
Prerequisite: MATH 1521G or MATH 1521H or ENGR 190.
Corequisite: MATH 2415.
Learning Outcomes
1. Define and understand different structures and the importance of the supply chain.
2. Identify the main drivers of supply chain performance and measure them using precise metrics.
3. Integrate production operations management topics in the context of the supply chain.
4. Develop the ability to formulate quantitative decision models for supply chain and logistics management.
5. Study inventory planning decisions, Economic Order Quantity (EOQ), and its variants.

I E 451. Engineering Economy
3 Credits (3)
Discounted cash flows, economics of project, contract and specifications as related to engineering design.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations, and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

I E 456. Large Scale Systems Engineering
3 Credits (3)
Systems engineering approaches to large-scale complex technological and societal problems. Concepts of interaction and structural graphs, matrices, delta, and Gantt charts. The hall matrix approach, structural concepts, reachability matrices, and cross impact-analysis, modeling and decision making. May be repeated up to 3 credits.
Learning Outcomes
1. Ability to describe the systems engineering standards and best practices
2. Ability to characterize the limitations of the way that current systems engineering is practiced in terms of dealing with lifecycle uncertainty.

I E 459. Systems Thinking and Decision Making
3 Credits (3)
A general introduction to systems engineering. Topics include General Systems Theory, Systems Thinking and emerging concepts, Systems Dynamics approaches for modelling and analyzing non-linear feedback mechanisms in complex systems, and Complexity science and complex adaptive systems. May be repeated up to 3 credits.
Learning Outcomes
1. Ability to understand the complexities of engineering systems, and the implications of change on system behavior
2. Ability to understand the nature of complex systems in respect to people, processes, the environment and development organization
3. Ability to understand Systems Thinking's' role and value within organizations
4. Ability to recognize the advantages, as well as the flaws of our present predominant way of thinking (Cartesian), while looking at the changes that would enable us to deal with complex issues in daily practice (Systems Thinking)
5. Ability to recognize the value and limitations of modeling and simulation as well as how to construct and interpret various models to support decision making.

I E 460. Evaluation of Engineering Data
3 Credits (3)
Analysis of engineering systems possessing variability, employing regression, analysis of variance, distribution theory, and experimental design methods.
Prerequisite: I E 311 or equivalent.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to communicate effectively with a range of audiences.
3. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

I E 466. Reliability
3 Credits (3)
Application of statistical theory to engineering reliability estimation, reliability improvement, and the analysis of reliability test data.
Prerequisite: I E 311 or equivalent.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to communicate effectively with a range of audiences.

3. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

I E 467. Discrete-Event Simulation Modeling
3 Credits (3)
Basic modeling concepts, organizations of simulations, input data analysis, random variate generation, simulation design and analysis, model validation, output analysis, and management of simulations. Differentiated graduate assignments.
Prerequisite: I E 311 or equivalent.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to communicate effectively with a range of audiences.
3. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
4. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
5. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

I E 468. Advanced Discrete-Event Simulation Applications
3 Credits (3)
Semester long project involving development and application of advanced simulation skills. May be repeated up to 3 credits.
Prerequisite: I E 467.
Learning Outcomes
1. Ability to understand the techniques of computer simulation modeling in the context of hierarchy of knowledge about a system and develop the capability to apply the same to study systems through available computer simulation software

I E 478. Facilities Planning and Design
3 Credits (3)
Plant location methods, total process analysis, process integration, materials handling analysis, and traditional and computerized plant layout methodologies.
Prerequisite: I E 316.
Prerequisite/Corequisite: I E 424.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

I E 490. Selected Topics
1-3 Credits
This course offers an in-depth exploration of specific topics within a given field or discipline. The content may vary each time the course is offered, allowing for flexibility in addressing emerging trends, current issues, or specialized areas of study. May be repeated up to 9 credits.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to communicate effectively with a range of audiences.
3. An ability to recognize ethical and professional responsibilities in engineering situations, and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

I E 505. Directed Readings
1-3 Credits
The Directed Readings course provides students with the opportunity to pursue an in-depth exploration of a specific topic or area of interest under the guidance of a faculty mentor. Through independent study and directed readings, students will delve into scholarly literature, research articles, and relevant texts to deepen their understanding of the chosen subject matter. The course allows for a flexible learning experience tailored to the student's academic goals and interests. Students will work closely with their mentor to develop a reading list, set learning objectives, and engage in discussions to enhance their comprehension and critical analysis skills. May be repeated up to 6 credits.
Learning Outcomes
1. An ability to demonstrate a comprehensive understanding of the chosen topic or area of interest through in-depth reading and analysis of relevant literature.
2. An ability to develop critical thinking skills by evaluating and synthesizing information from scholarly sources, research articles, and other relevant texts.
3. An ability to effectively communicate their insights, findings, and reflections on the chosen topic through written assignments, discussions, and presentations.
4. An ability to acquire research skills, including the ability to locate, evaluate, and integrate scholarly sources into their analysis and writing.

I E 511. Survey of Industrial Engineering
3 Credits (3)
A project-based course covering methods of engineering, plant layout, production and inventory control, economic analysis, etc. May be repeated up to 3 credits.
Learning Outcomes
1. Ability to apply the various techniques of Industrial Engineering to solve real-life problems

I E 515. Stochastic Processes Modeling
3 Credits (3)
Introduction to the use of stochastic processes in the modeling of physical and natural systems. Use of generating functions, conditional probability and expectation, Poisson processes, random walk models, Markov chains, branching processes, Markov processes, and queuing processes in an applied setting.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to communicate effectively with a range of audiences.

3. An ability to recognize ethical and professional responsibilities in engineering situations, and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

I E 522. Queuing Systems
3 Credits (3)
Elements and classification of queuing systems, single server models, multi-server models, cost analysis and applications.
Learning Outcomes
1. Ability to model, analyze, and apply solutions to problems involving queueing systems
2. Ability to read and understand literature in the queueing system analysis field.

I E 523. Advanced Engineering Economy
3 Credits (3)
Theoretical basis for engineering economy methods, problems of cost estimation, replacement, nonmonetary factors, and feasibility studies. Same as C E 523.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations, and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

I E 524. Advanced Production and Inventory Control
3 Credits (3)
Organization and functions of manufacturing planning and control systems including forecasting, MRP, capacity planning, JIT systems, scheduling and inventory control. Same as I E 424 with differentiated assignments.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

I E 525. Systems Synthesis and Design
3 Credits (3)
Examination of the production management complex in terms of its components and the synthesis of these components into an effective operating unit. Development of input-output models representing the basis structure of all production activities.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to communicate effectively with a range of audiences.
3. An ability to recognize ethical and professional responsibilities in engineering situations, and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

I E 530. Environmental Management Seminar
1 Credit (1)
Survey of practical and new developments in hazardous and radioactive waste management provided through a series of guest lectures and reports of ongoing research. Same as C E 530, E E 530, CHME 530.
Learning Outcomes
1. An ability to demonstrate a comprehensive understanding of key concepts, principles, and theories related to environmental management, including environmental policy, sustainability, resource conservation, and pollution control.
2. An ability to develop critical thinking and analytical skills by evaluating environmental issues, assessing their impact on ecosystems and human populations, and proposing evidence-based solutions to address complex environmental challenges.
3. An ability to gain an interdisciplinary perspective by exploring environmental management topics from multiple viewpoints, integrating knowledge from fields such as ecology, economics, sociology, and public policy.
4. An ability to develop an awareness of ethical considerations and values relevant to environmental management, including principles of environmental justice, equity, and responsibility towards future generations.

I E 533. Linear Programming
3 Credits (3)
Linear programming problem formulation, simplex algorithm, theory of linear programming, duality, revised simplex algorithm, and sensitivity analysis.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to communicate effectively with a range of audiences.
3. An ability to recognize ethical and professional responsibilities in engineering situations, and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

I E 534. Nonlinear Programming
3 Credits (3)

Theoretical and computational methods to solve optimization problems in engineering, statistics, economics, and operations research. Topics include convexity, optimality conditions, Newton's method, Lagrange multipliers, search algorithms for unconstrained and constrained problems, as well as barrier and penalty methods.

Learning Outcomes

1. Ability to model situations which may be solved by nonlinear optimization and to interpret the results in the context of the larger problem
2. Ability to employ several computer tools to correctly solve nonlinear optimization problems.
3. Ability to read and understand literature in the field of nonlinear optimization
4. Ability to select appropriate methods and algorithms from a core representative set of methods and tools to solve nonlinear optimization problems

I E 535. Discrete Optimization
3 Credits (3)

Combinatorial Optimization problems using both integer programming and graph theoretic approaches. Emphasis on modeling and computational algorithms. May be repeated up to 3 credits.

Learning Outcomes

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to communicate effectively with a range of audiences.
3. An ability to recognize ethical and professional responsibilities in engineering situations, and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

I E 537. Large Scale Systems Engineering
3 Credits (3)

Systems engineering approaches to large-scale complex technological and societal problems. Concepts of interaction and structural graphs, matrices, delta, and Gantt charts. The hall matrix approach, structural concepts, reachability matrices, and cross impact-analysis, modeling and decision making.

Learning Outcomes

1. Ability to describe the systems engineering standards and best practices.
2. Ability to characterize the limitations of the way that current systems engineering is practiced in terms of dealing with lifecycle uncertainty.

I E 545. Characterizing Time-Dependent Engineering Data
3 Credits (3)

Theory and techniques employed in the characterization of stochastic processes commonly found in engineering applications. Distribution models include exponential, gamma, Weibull, and extreme value. Design and analysis of experiments involving complete and censored data and elevated stress. Analytical techniques include parametric, nonparametric, and graphical approaches with emphasis on modern computer tools. Exact and approximate maximum-likelihood techniques are stressed.

Learning Outcomes

1. Ability to characterize a process, based on data that is time-dependent or sequential in nature.

I E 561. Advanced Safety Engineering
3 Credits (3)

Regulation as well as qualitative, and quantitative methods to achieve and maintain safety in the workplace. Includes liability, worker's compensation, OSHA, hazard control, safety assessment, cost justification, and system analysis.

Learning Outcomes

1. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
2. An ability to communicate effectively with a range of audiences.
3. An ability to recognize ethical and professional responsibilities in engineering situations, and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

I E 563. Topics in Engineering Administration
3 Credits (3)

Study of qualitative and quantitative aspects. Consideration given to philosophical, psychological, political and social implications of engineering administrative decisions.

Learning Outcomes

1. An ability to demonstrate a comprehensive understanding of key principles, theories, and practices related to engineering administration, including organizational management, leadership, strategic planning, and decision-making processes.
2. An ability to apply management techniques and tools to analyze and solve complex administrative problems commonly encountered in engineering organizations, such as resource allocation, project management, and risk assessment.
3. An ability to develop effective communication skills, including written, oral, and interpersonal communication, to convey technical information, lead teams, and interact with stakeholders in engineering settings.
4. An ability to enhance critical thinking and problem-solving abilities by evaluating case studies, identifying challenges, and proposing innovative solutions to address administrative issues in engineering contexts.
5. An ability to demonstrate an understanding of ethical and professional responsibilities in engineering administration, including considerations of integrity, fairness, and accountability in decision-making and leadership roles.
6. An ability to develop strategic leadership abilities by analyzing case studies, formulating organizational strategies, and articulating visions for future growth and innovation within engineering organizations.

I E 567. Design and Implementation of Discrete-Event Simulation
3 Credits (3)

Basic modeling concepts, organizations of simulations, input data analysis, random variate generation, simulation design and analysis, model validation, output analysis, and management of simulations. Taught with I E 467 with differentiated assignments for graduate students.

Learning Outcomes

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to communicate effectively with a range of audiences.

3. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
4. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
5. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

I E 571. Advanced Quality Control
3 Credits (3)
Advanced topics in quality control and design of experiments for improvement of quality.
Prerequisite: I E 311 or equivalent.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.

I E 575. Advanced Manufacturing Processes
3 Credits (3)
Covers major process parameters in casting, forming, machining, and joining. Process economics and selection of processes design and interactions.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
4. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

I E 590. Selected Topics
1-3 Credits
This course offers an in-depth exploration of specific topics within a given field or discipline. The content may vary each time the course is offered, allowing for flexibility in addressing emerging trends, current issues, or specialized areas of study. May be repeated up to 9 credits.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to communicate effectively with a range of audiences.
3. An ability to recognize ethical and professional responsibilities in engineering situations, and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

I E 598. Special Research Programs
1-3 Credits (1-3)
Individual analytical or experimental investigations. May be repeated up to 6 credits.
Learning Outcomes
1. An ability to demonstrate the ability to develop a well-defined research question, formulate hypotheses or objectives, and design a research plan or methodology appropriate to address the research question or problem.
2. An ability to conduct a comprehensive literature review related to their research topic, critically evaluating existing scholarship, identifying gaps in the literature, and synthesizing relevant theoretical frameworks or conceptual models.
3. An ability to collect, analyze, and interpret data using appropriate qualitative or quantitative research methods, techniques, and tools, demonstrating proficiency in data management, statistical analysis, and data visualization.
4. An ability to apply critical thinking skills to evaluate research findings, draw conclusions, and generate insights that contribute to knowledge advancement or address practical problems in their field of study.
5. An ability to effectively communicate their research findings, methodologies, and interpretations to both specialized and non-specialized audiences through written reports, oral presentations, and visual aids, demonstrating clarity, coherence, and persuasiveness.
6. An ability to demonstrate an understanding of ethical principles and guidelines governing research conduct, including issues related to research integrity, confidentiality, informed consent, and the responsible conduct of research.
7. An ability to manage their research projects effectively, including setting timelines, allocating resources, and adapting to unforeseen challenges or setbacks, demonstrating skills in organization, time management, and project coordination.

I E 599. Master's Thesis
1-15 Credits
Thesis. May be repeated up to 88 credits.
Learning Outcomes
1. An ability to demonstrate the ability to develop a well-defined research question, formulate hypotheses or objectives, and design a research plan or methodology appropriate to address the research question or problem.
2. An ability to conduct a comprehensive literature review related to their research topic, identifying gaps in the literature, and synthesizing relevant theoretical frameworks or conceptual models.
3. An ability to collect, analyze, and interpret data using appropriate qualitative or quantitative research methods, techniques, and tools, demonstrating proficiency in data management, statistical analysis, and data visualization.
4. An ability to apply critical thinking skills to evaluate research findings, draw conclusions, and generate insights that contribute to knowledge advancement or address practical problems in their field of study.
5. An ability to effectively communicate their research findings, methodologies, and interpretations to both specialized and non-specialized audiences through written reports, oral presentations, and visual aids, demonstrating clarity, coherence, and persuasiveness.

6. An ability to demonstrate an understanding of ethical principles and guidelines governing research conduct, including issues related to research integrity, confidentiality, informed consent, and the responsible conduct of research.
7. An ability to manage their research projects effectively, including setting timelines, allocating resources, and adapting to unforeseen challenges or setbacks, demonstrating skills in organization, time management, and project coordination.

I E 610. Topics in Operations Research
3 Credits (3)
Selected topics of current interest, to be designated by subtitle. May be repeated up to 6 credits.
Learning Outcomes
1. An ability to demonstrate a deep understanding of advanced topics in operations research, including but not limited to optimization theory, stochastic processes, queuing theory, decision analysis, and simulation modeling.
2. An ability to apply mathematical modeling techniques to formulate and solve complex optimization problems arising in real-world contexts, such as production planning, logistics, supply chain management, transportation, and resource allocation.
3. An ability to analyze and interpret optimization solutions generated by mathematical models, identifying optimal solutions, sensitivity analysis, trade-offs, and implications for decision-making under uncertainty or constraints.
4. An ability to develop algorithmic problem-solving skills by implementing and applying optimization algorithms, heuristic methods, and computational techniques to solve large-scale optimization problems efficiently and effectively.
5. An ability to demonstrate proficiency in using operations research software tools and programming languages commonly used in the field, such as linear programming solvers, simulation software, mathematical modeling languages (e.g., Xpress, CPLEX, AMPL, GAMS), and general-purpose programming languages (e.g., Python, MATLAB).
6. An ability to critically evaluate the application of operations research techniques in various industries and domains, assessing the strengths, limitations, and practical considerations of OR models and methodologies in addressing complex decision problems.
7. An ability to effectively communicate the results of their operations research analyses and findings to diverse stakeholders, including technical and non-technical audiences, through written reports, presentations, and visualizations.

I E 620. Topics in Computer Modeling
3 Credits (3)
Selected topics of current interest, to be designated by subtitle. May be repeated up to 6 credits.
Learning Outcomes
1. An ability to demonstrate an understanding of fundamental principles and techniques used in computer modeling, including conceptual modeling, mathematical modeling, simulation, and computational algorithms.
2. An ability to apply computer modeling tools and software packages to develop, implement, and validate models for solving real-world problems across various domains, such as engineering, science, economics, and social systems.
3. An ability to develop, analyze, and interpret computer models to simulate complex systems, processes, or phenomena, identifying relevant input parameters, defining system boundaries, and evaluating model outputs to draw meaningful conclusions.
4. An ability to acquire proficiency in programming languages and scripting tools commonly used for computer modeling, such as Python, MATLAB, R, or specialized simulation software, enabling them to implement and customize models to address specific requirements.
5. An ability to employ verification and validation techniques to assess the accuracy, reliability, and credibility of computer models, including sensitivity analysis, calibration, uncertainty quantification, and comparison with empirical data or experimental results.
6. An ability to integrate optimization techniques and decision support tools into computer models to optimize system performance, resource allocation, scheduling, or decision-making processes, considering constraints, objectives, and stakeholder preferences.
7. An ability to utilize visualization techniques and graphical representation methods to visualize model outputs, communicate results effectively, and facilitate stakeholders' understanding and interpretation of complex modeling scenarios.
8. An ability to apply critical thinking and problem-solving skills to analyze real-world problems, formulate hypotheses, design experiments, and iteratively refine models based on feedback and empirical observations.

I E 630. Topics in Engineering Management
3 Credits (3)
Selected topics of current interest, to be designated by subtitle. May be repeated up to 6 credits.
Learning Outcomes
1. An ability to demonstrate an understanding of fundamental concepts, theories, and principles in engineering management, including organizational behavior, project management, strategic planning, leadership, and decision-making processes.
2. An ability to apply engineering management techniques and tools to analyze, plan, and optimize engineering projects, processes, and systems, considering factors such as cost, quality, time, risk, and stakeholder requirements.
3. An ability to develop skills in strategic planning and decision-making, identifying organizational goals, formulating strategies, evaluating alternatives, and making informed decisions to achieve desired outcomes in engineering contexts.
4. An ability to acquire proficiency in project management methodologies, tools, and techniques, including project planning, scheduling, budgeting, resource allocation, risk management, and performance monitoring, to successfully execute engineering projects.
5. An ability to recognize the ethical and social responsibilities of engineering managers, considering the impact of engineering projects on society, environment, and stakeholders, and integrating ethical considerations into decision-making processes.
6. An ability to engage in cross-functional collaboration, interacting with professionals from diverse disciplines such as engineering, business, finance, marketing, and operations to address complex engineering management challenges and opportunities.
7. An ability to evaluate and mitigate risks associated with engineering projects and operations, applying risk assessment techniques, developing risk management plans, and implementing proactive measures to minimize potential negative impacts.

I E 690. Selected Topics
1-15 Credits
This course offers an in-depth exploration of specific topics within a given field or discipline. The content may vary each time the course is offered, allowing for flexibility in addressing emerging trends, current issues, or specialized areas of study. May be repeated up to 99 credits.
Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to communicate effectively with a range of audiences.
3. An ability to recognize ethical and professional responsibilities in engineering situations, and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

I E 700. Doctoral Dissertation
15 Credits
Dissertation. May be repeated up to 88 credits.
Learning Outcomes
1. An ability to demonstrate the ability to develop a well-defined research question, formulate hypotheses or objectives, and design a research plan or methodology appropriate to address the research question or problem.
2. An ability to conduct a comprehensive literature review related to their research topic, identifying gaps in the literature, and synthesizing relevant theoretical frameworks or conceptual models.
3. An ability to collect, analyze, and interpret data using appropriate qualitative or quantitative research methods, techniques, and tools, demonstrating proficiency in data management, statistical analysis, and data visualization.
4. An ability to apply critical thinking skills to evaluate research findings, draw conclusions, and generate insights that contribute to knowledge advancement or address practical problems in their field of study.
5. An ability to effectively communicate their research findings, methodologies, and interpretations to both specialized and non-specialized audiences through written reports, oral presentations, and visual aids, demonstrating clarity, coherence, and persuasiveness.
6. An ability to demonstrate an understanding of ethical principles and guidelines governing research conduct, including issues related to research integrity, confidentiality, informed consent, and the responsible conduct of research.
7. An ability to manage their research projects effectively, including setting timelines, allocating resources, and adapting to unforeseen challenges or setbacks, demonstrating skills in organization, time management, and project coordination.

ICT-INFO &COMMUNICATION TECH

ICT 141. IT Essentials I: A+ Certification Training Focused on the Hardware Exam
3 Credits (3)
Installing, configuring, troubleshooting, and maintaining personal computer hardware components and will assist in preparation for the CompTIA A+ Hardware certification.
Learning Outcomes
1. Configure and support PC, mobile, and IoT device hardware.
2. Perform basic computer diagnostic and maintenance operations.
3. Implement basic data backup and recovery methods.
4. Apply basic hardware maintenance best practices.
5. Demonstrate baseline security practices for hardware.

ICT 145. Network Essentials: N+ Certification Training
3 Credits (3)
Focuses on the installation and administration of network communication systems and will assist in preparation for the CompTIA N + Network certification.
Learning Outcomes
1. Explain basic networking concepts including network services, physical connections, topologies, and architecture.
2. Explain security concepts and network attacks in order to harden networks against threats.
3. Explain routing technologies and networking devices; deploy Ethernet solutions and configure wireless technologies.
4. Troubleshoot common cable, connectivity, and software issues related to networking.
5. Monitor and optimize networks to ensure business continuity.

ICT 152. Java Programming
3 Credits (3)
Programming in the Java language.
Learning Outcomes
1. Set up a rich programming environment.
2. Analyze existing code.
3. Create/modify/debug/test programs.
4. Employ software documentation and programming best practices.

ICT 161. IT Essentials II: A+ Certification Training focused on the Software exam
3 Credits (3)
Installing, configuring, troubleshooting, and maintaining personal computer operating systems and will assist in preparation for the CompTIA A+ Software certification.
Prerequisite: A grade of C- or better in ICT 141.
Learning Outcomes
1. Configure device operating systems, including Windows, Mac, Linux, Chrome OS, Android, and iOS.
2. Administer client-based and cloud-based software.
3. Troubleshoot and problem-solve core service and support challenges.
4. Apply best practices for documentation, change management, and scripting.
5. Support basic IT infrastructure and networking.

ICT 220. Discrete Math and Its Relationship to Information Technology
3 Credits (3)
Focuses on developing software coding skills using a programming language and its application to discrete mathematics, the use discrete structures in computer science. Topics included are logic, sets, relations, functions, methods of proof, recursion, combinatorics, graph theory, and algorithms
Prerequisite: A grade of C- or better in MATH 1220G or higher.
Corequisite: ICT 152.

Learning Outcomes

1. Explain the relationship between discrete math sets and coded arrays, finite and infinite, subsets, intersection, unions, and other set operations.
2. Explain binary Trees and know how to use demonstrate them using code.
3. Demonstrate the use of code applied to group and subgroup theory.
4. Demonstrate the use of code to create functions and algorithms.
5. Identify and explain logical operations and their application in coding.
6. Demonstrate the use of Probability Theory in code to predict random outcomes.

ICT 267. Information Security+ Certification Preparation
3 Credits (3)
The course covers the Sec+ exam objectives and detailed preparation for certification in information security.
Prerequisite: A grade of C- or better in both, ICT 141 and ICT 145.
Learning Outcomes

1. The student will select appropriate mitigation and deterrent techniques to address network attacks and vulnerabilities.
2. The student will examine how access control, identity management, and cryptography can secure a network and manage risk.
3. The student will identify privacy and policy issues.
4. The student will apply activities that an Information Systems Security specialist would normally carry out in the performance of his/her duties.

ICT 280. Introduction to Web Development
3 Credits (3)
Introduction to front-end web development including webpage design, structure, layout, positioning, responsiveness, and foundational layers of how the web works.
Learning Outcomes

1. Explain the Document Object Model of HTML5 web pages.
2. Organize web page contents with Lists, figures, and organizational elements.
3. Develop web page layout templates.
4. Implement style application inline, via style blocks, and using external resources.
5. Develop and apply javascript event-driven programming to web pages.
6. Explain the difference between client and server-side scripting and data processing.

ICT 300. Special Topics
3 Credits (3)
Directed study or project. Students must be in Junior standing and have the consent of department head to enroll. May be repeated up to 3 credits.
Learning Outcomes

1. Various.

ICT 320. Introduction to Internet Protocols
3 Credits (3)
Present a overview of Internet Protocols Applications. Students must be in Junior or Senior standing only.
Learning Outcomes

1. Students will apply an understanding of basic Networking.
2. Students will employ effective use of Packet analysis software to troubleshoot network issues.
3. Explain the RFC process for developing network protocols.
4. Explain network protocol security implications.

ICT 339. Introduction to Digital Forensics and Incident Response
3 Credits (3)
Introduction to the skills required to perform digital forensics and incident response on Windows operating systems. Topics include: live response, evidence acquisition, Windows operating system artifacts, documentation and reporting.
Prerequisite: A grade of C- or better in ICT 141 or ICT 161.
Learning Outcomes

1. To understand Digital Forensics terms and definitions and why digital forensics is needed.
2. To study what is required and how to perform digital forensics.
3. To become familiar and aware of the hindrances/obstacles that affects effective digital/computer forensic operations.
4. To learn about the tools and procedures for how deleted data is recovered during digital forensic operations.
5. To use forensic tools and procedures to perform digital forensic operations on Windows operating systems, Emails, Mobile devices, and Communication networks (Computer, wireless, cellular networks).
6. To learn about incident response and procedures.

ICT 350V. Introduction to Personal Computer Security and Privacy
3 Credits (3)
Introduction to Information Security and Privacy – Have you ever wondered what happens to all of your browsing history or data you fill out on websites go? Who has this data? What do they do with this data? How do you stop sharing your private information? This class will answer those questions and provide steps to make your online presence more secure.
Learning Outcomes

1. Classify security issues
2. Classify Privacy protections
3. Evaluate threats and countermeasures based on personal security breaches.
4. Formulate a real-time privacy response
5. Assess international privacy protections through a multicultural focus.

ICT 352. Software Technology I
3 Credits (3)
This course focuses on reading, writing, debugging, testing, and documenting computer programs. May be repeated up to 3 credits.
Learning Outcomes

1. Set up a rich programming environment
2. Analyze existing code
3. Create/modify/debug/test programs
4. Employ software documentation and programming best practices

ICT 355. Linux System Administration
3 Credits (3)
Operating systems applications and interfacing with an introduction to systems administration. Topics include Shell Programming, Programming Tools, Database Management, System Backups, Security, Setup, and Maintenance of Linux Servers.
Learning Outcomes

1. Create a virtual environment on a host system using VirtualBox.
2. Develop single and multiple Linux Operating Systems within The VirtualBox Virtual Environment.

3. Select applications on production Linux Operating systems.
4. Support the operation of the Linux Operating system using System Administration Techniques.

ICT 360. Operating Systems for ICT
3 Credits (3)
Fundamentals of operating systems with Windows and Linux including installation and configuration using the GUI as well as the command line, text editors, file systems, scripting and operating system management.
Learning Outcomes
1. Create a virtual environment on a host system using VirtualBox.
2. Create multiple Operating Systems in a Virtual Environment.
3. Manage error codes in Virtual Machines.
4. Support the operation of the CentOS GUI and Windows Operating Systems.

ICT 362. Software Technology II
3 Credits (3)
Topics include problem analysis, object-oriented programming (OOP), structured logic, and development concepts. May be repeated up to 3 credits.
Prerequisite: A grade of C- or better in ICT 152 or ICT 352 or E T 262 or OECS 195 or C S 152 or C S 172.
Learning Outcomes
1. Set up and use a rich programming environment for programming with Python.
2. Analyze existing code.
3. Employ effective use of basic programming and basic troubleshooting.
4. Employ effective use of Object-Oriented Programming (OOP) and troubleshooting.
5. Apply testing and documentation best practices.

ICT 364. Windows Enterprise Administration
3 Credits (3)
Installation, configuration, and maintenance of Windows Enterprise services which includes Active Directory, distributed file systems, SQL Server, Web Server, Authentication Procedures, and enterprise elasticity. Topics covered include: Server Maintenance and Troubleshooting Methodologies.
Prerequisite: A grade of C- or better in ICT 152.
Learning Outcomes
1. Set up and use a Windows Enterprise environment with Active Directory.
2. Use best practices to design an organizational structure and define AD DS Objects.
3. Deploy an AD DS embedded DHCP server with IPv4, IPv6, and Failover.
4. Analyze and use PowerShell code for process automation.
5. Deploy security and user settings using Group Policy.
6. Apply version updates and establish an intra-forest trust relationship.

ICT 372. Software Engineering and Design
3 Credits (3)
Topics include the software development lifecycle, problem analysis, and implementing software testing routines to improve the quality, integrity, and security of code.
Prerequisite: A grade of C- or better in ICT 362.
Learning Outcomes
1. Identify, explain, and apply the phases of the SDLC.
2. Identify different Agile methodologies and practices for software project management.
3. Use different development tools and apply best practices.
4. Apply best practices in the creation of business objects, data storage and access, testing, and debugging.
5. Configuring, handling, testing, and deploying services.

ICT 377. Computer Networking I
3 Credits (3)
Computer network design and applications for LAN, TCP/IP networks, routing and switching technologies, VLANs, and the OSI layers from physical to transport.
Prerequisite/Corequisite: A grade of C- or better MATH 1220G or higher.
Learning Outcomes
1. Define and distinguish the role of a network administrator (from other roles in the IT world).
2. Identify the OSI model, its layers, and the relationship to the TCP/IP model.
3. Identify different cable media and networking devices and their use.
4. Design, configure and troubleshoot basic networks.
5. Identify MAC, IPvfour, and IPvsix addressing.
6. Apply different techniques for IP allocation and subnet design (IPvfour).
7. Use the Cisco IOS software for basic switch and router configurations.
8. Configure and troubleshoot basic setup for static and dynamic routing protocols.

ICT 380. Web Design and Multimedia
3 Credits (3)
Introduction to front-end web development including webpage design, structure, layout, positioning, responsiveness, and foundational layers of how the web works. Video, audio, and other digital presentation tools are covered.
Learning Outcomes
1. Create multiple front-end development micro-components.
2. Create single and multi-page websites.
3. Use flexbox, grid, and media queries and different design patterns.
4. Employ effective use of web development and basic troubleshooting.
5. Build small web site projects.

ICT 400. Special Topics
1-3 Credits (1-3)
Directed study or project. Students must be in Senior standing and have the consent of department head to enroll. May be repeated up to 6 credits.
Learning Outcomes
1. Various.

ICT 435. Senior Project
3 Credits (3)
Capstone course. Practical application of student's cumulative knowledge to an assigned design project. Design principles, teamwork, and project management skills are stressed. Demonstration of written and oral communication skills via project documentation and presentation of results. Must be graduating senior. Consent of Instructor required. Restricted to ICT Majors.

Prerequisite: A grade of C- or better in the following: ICT 364 and ICT 377 and (ICT 462 or ICT 355).

Learning Outcomes

1. Demonstrate ability to manage a complex technical project.
2. Demonstrate the ability to create an engineering project timeline.
3. Demonstrate the ability to self-motivate and organize project.
4. Demonstrate the ability to work in teams and execute project.
5. Goal setting, skills assessment and portfolio development included.

ICT 439. Advanced Digital Forensics and Incident Response
3 Credits (3)

Advanced topics in digital forensics and incident response. Topics include network analysis and advanced cybersecurity concepts.

Prerequisite: A grade of C- or better in both, (E T 339 or ICT 339 or ICT 450) and (E T 377 or ICT 377).

Learning Outcomes

1. Demonstrate the use of forensic tools and procedures to perform digital forensic operations on Windows operating systems, Emails, Mobile devices, and Communication networks (Computer, wireless, cellular networks).
2. Demonstrate proper incident response procedures and proper chain of custody when handling digital evidence.
3. Students will become familiar with tools and processes to analyze and detect memory resident processes that include malware, rootkits, and user recoverable data.
4. Students will also have exposure to methods and processes used by hackers to penetrate and compromise targets.

ICT 450. Ethical Hacking
3 Credits (3)

Ethical Hacking and Penetration testing techniques. Students must be in senior standing to enroll.

Prerequisite: A grade of C- or better in ICT 350V.

Learning Outcomes

1. Analyze networking concepts as they relate to hacking vulnerabilities.
2. Define contract requirements necessary to avoid legal liability during Ethical Hacking.
3. Employ tools and techniques to scan and do reconnaissance on potential targets.
4. Demonstrate use of vulnerability testing tools to identify vulnerabilities and exploits.
5. Identify the role of sniffers and session Hijacking in Ethical Hacking.
6. Demonstrate the use of Social Engineering tools and techniques used in Ethical Hacking.

ICT 457. Information Security Principles
3 Credits (3)

This course provides an overview of security challenges and strategies of countermeasure in the information systems environment. Topics include definition of terms, concepts, elements, and goals incorporating industry standards and practices with a focus on availability, vulnerability, integrity and confidentiality aspects of information systems.

Prerequisite: A grade of C- or better in ICT 350V.

Learning Outcomes

1. Demonstrate an understanding of the information security concepts.
2. Demonstrate an understanding of the diversity of potential attacks against an organization.
3. Demonstrate an understanding of cryptographic techniques.
4. Demonstrate an understanding of authentication methods.
5. Demonstrate an understanding of access control systems.
6. Demonstrate an understanding of various network security controls.
7. Demonstrate an understanding of the legal, ethical, and professional issues in information security.

ICT 458. Web Development and Database Applications
3 Credits (3)

Design, plan, and build interactive and dynamic web applications. Topics include relational databases, object-oriented programming, and the application of backend frameworks.

Prerequisite/Corequisite: A grade of C- or better in ICT 362.

Learning Outcomes

1. Build knowledge of Web Servers.
2. Plan, design, and create code for backend web development.
3. Design, create, and access databases that support web applications.
4. Implement adequate security and authentication for the deployment of Web applications.

ICT 460. Advanced Software Development Concepts
3 Credits (3)

This course focuses on advanced software development concepts to help embed security into code, protecting software applications.

Prerequisite: A grade of C- or better in ICT 362.

Learning Outcomes

1. Application of best practices against software vulnerabilities.
2. Identification of code defects, bugs, and logic flaws.
3. Assessment and testing of code.
4. Utilization of secure code alternatives.
5. Code refactoring to improve design and structure and prevent vulnerabilities.

ICT 462. Linux System Administration
3 Credits (3)

Operating system applications and interfacing with an introduction to systems administration. Topics include Shell Programming, Programming Tools, Database Management, System Backups, Security, Setup and Maintenance of Linux Servers.

Learning Outcomes

1. Create a virtual environment on a host system using VirtualBox.
2. Develop single and multiple Linux Operating Systems within The VirtualBox Virtual Environment.
3. Select applications on production Linux Operating systems.
4. Support the operation of the Linux Operating system using System Administration Techniques.

ICT 463. Enterprise Linux Network Administration Tools
3 Credits (3)

Advanced methods and tools used to deploy, manage, and administer networked devices.

Prerequisite: A grade of C- or better in ICT 377.

Learning Outcomes

1. Demonstrate the ability to use Software Versioning systems using Windows and Linux.
2. Apply best practices with versioning repositories when creating software.
3. Deploy single and clustered microservice containers to support a web application.
4. Use script-based code to deploy and configure a full stack web server.

5. Use infrastructure management software to deploy defined roles in multiple environments.

ICT 467. Communication Network Security
3 Credits (3)
The course provides a technical perspective on maintaining the security of communication network systems. It covers a wide range of technical issues, including wired, wireless and Internet communication fundamentals, communication network security mechanisms and configuration, standards and protocols, vulnerabilities, attacks and countermeasures.
Prerequisite: A grade of C- or better in both, ICT 320 and ICT 377.
Learning Outcomes
1. Demonstrate an understanding of key and basic communication network security concepts, terminologies, standards, issues, and policies.
2. Apply the principles of network security techniques such as Cryptography, Cryptanalysis, Biometrics, Watermarking, and Stenography.
3. Implement security techniques with commonly available network security software.
4. Examine the fundamentals of Wired and Wireless communication network systems including Cellular, Bluetooth, Wi-Fi, Internet, Cloud Networking, and the Internet of Things.
5. Explain the TCP/IP security protocols that pertain to communication network systems.
6. Explain the security attacks, threats, risks, mechanisms, and tools associated with and used for securing network devices especially mobile devices.
7. Demonstrate an understanding of the operation and countermeasures against Malwares in network systems and the implementation of intrusion detection and prevention, and firewall technologies.

ICT 477. Computer Networking II
3 Credits (3)
Advanced concepts in computer network design and applications including managing the campus network infrastructure (LANs and virtual LANs), network services (DNS and DHCP), network security as well as network monitoring.
Prerequisite: A grade of C- or better in either ICT 377 or E T 377 or CTEC 285.
Learning Outcomes
1. VLSM, Summarization, and the TCP/IP model.
2. Understanding of IPvsix basics
3. Configuration of routing protocols using IPvsix
4. Configuration of advanced router configurations
5. Configuration of route redistribution, DHCP, DNS, NAT and PAT
6. Configure network security and Access Control Lists (ACLs)
7. Perform basic analysis of network data traffic
8. Create, test and troubleshoot software simulations (Cisco Packet Tracer)

ICT 487. Data Security
3 Credits (3)
Delving into the realm of advanced data security is the essence of this senior-level undergraduate course. Students will immerse themselves in the intricacies of safeguarding digital information by covering an array of topics, from encryption to secure data transmission, and extending to secure data storage and data security in use. The course takes a comprehensive approach, encompassing three key domains of data security: data in motion, data at rest, and data in use. Throughout the journey, students will grasp the technical and theoretical underpinnings of data security and cultivate practical, hands-on expertise in fortifying data against vulnerabilities.
Prerequisite: A grade of C- or better in both, ICT 320 and ICT 360.
Learning Outcomes
1. Understand the fundamental concepts of data security, including data in motion, data at rest, and data in use.
2. Explore encryption algorithms and their applications in data security.
3. Evaluate the importance of secure communication protocols in data transmission.
4. Develop skills in secure data storage and backup techniques.
5. Analyze various security architectures, such as network security, cloud security, and mobile security.

INST-INSTRUMENT & CONT TECH

INST 133. Process Technology and Systems
4 Credits (4)
Provides instruction in the use of common process equipment. Students will use appropriate terminology and identify process equipment components such as piping and tubing, valves, pumps, compressors, turbines, motors, engines, heat exchangers, heaters, furnaces, boilers, filters dryers and other miscellaneous vessels. Included are the basic functions, scientific principles and symbols. Students will identify components on typical Process Flow Diagrams and Process and Instrument Diagrams. Restricted to: Instrumentation and Control Technology majors. Restricted to Carlsbad campus only.
Learning Outcomes
1. Explain the different pieces of equipment used in moving fluids through a process plant such as piping, valves, pumps, compressors, motors, engines, turbines, and power transmission devices. Explain the purpose of each component. Understand the applications for the different types of equipment in each classification and their operating principles.
2. Explain the different types of heat exchangers and cooling towers used in the Process Industry as well as their components. Describe their operating principles and the operator's role in their operation.
3. Explain the different types of boilers and furnaces as well as their components. Describe their operating principles and the operator's role in their operation.
4. Explain the function of filters and dryers along with their principles of operation and the operator's role in their operation.
5. Explain the different types of vessels used in the process industry and well as their components and auxiliary systems. Define what happens internally in the different vessels.
6. Demonstrate reading Process Flow Diagrams and Piping and Instrumentation Diagrams.
7. Apply terms used when describing the various pieces of equipment

INST 165. Equipment Processes
4 Credits (4)
This course introduces Thermal Energy and Mechanical alignment in equipment and machinery components. Students will learn the operation, maintenance, and troubleshooting of these types of equipment. Consent of Instructor required. Restricted to: Instrumentation and Control majors. Restricted to Carlsbad campus only.

Learning Outcomes

1. Explain how Thermal Process System works.
2. Identify parts of Thermal System and Steam machines.
3. Identify troubleshooting of thermal machine.
4. Explain the steps of how to operate the Thermal Systems

INST 205. Programmable Logic Controllers and Applications
4 Credits (4)
This learning system is set up in a self-directed format where students can proceed forward at their own pace. The directions are provided in a series of Learning Activity Packets (LAPs), which include text and lab activity directions. LAPs book will be handed out at the start of every class day and must be returned before the class day begins. This learning system can be used as a stand-alone teaching learning system within any class to give hands-on experience in electrical systems. Computer Literacy and internet literacy is required to enroll in this course. Restricted to: Instrumentation and Control Technology majors. Restricted to Carlsbad campus only.
Learning Outcomes

1. Explain the basics of PLCs.
2. Describe how PLCs are used in industrial environments.
3. Demonstrate ability to program a PLC unit to solve a problem

INST 251. Instrumentation and Measurement
5 Credits (5)
The overall aim of this course is to present the students with the basic principles and techniques required for the design and analysis of measurement systems. The course introduces the theory of measurement as well as the sensors and instruments typically used for measuring various physical quantities. Restricted to: Instrumentation and Control Technology majors. Restricted to Carlsbad campus only.
Learning Outcomes

1. Understand measurement principles and apply them within measurement systems
2. Select and specify suitable instrumentation for measurement of physical quantities
3. Analyze and interpret experimental data
4. Perform analog and digital signal processing
5. Identify various sensor technologies and their use in measurement systems

INTR-INTERDISCIPLINARY STUDIES

INTR 300. Foundations of Interdisciplinary Studies
3 Credits (3)
Introduction to Bachelor of Individualized Studies (BIS) and Bachelor of Applied Studies (BAS) degree programs. Explores roles of interdisciplinary studies in contemporary world and how emerging and perennial problems and issues can be comprehended utilizing multiple theoretical and analytic methods. Students design or update their course of study for earning the BIS or BAS degree. Consent of Instructor required. Restricted to Las Cruces campus only.

INTR 301. Interdisciplinary Research: Theory & Practice
3 Credits (3)
Focuses on knowledge gained through interdisciplinary research. Students develop comprehensive understanding of steps of systematic inquiry into interdisciplinary research questions. Includes active learning through design and implementation of an interdisciplinary research project. For BIS and BAS majors only. Consent of Instructor required.

JAPN-JAPANESE

JAPN 1110. Japanese I
4 Credits (4)
This course focuses on the basics of the Japanese language with a balanced approach to the development of four skills: listening, speaking, reading and writing. The course is designed to teach students to communicate with Japanese socially and to utilize culturally appropriate manners to engage in Japanese daily life. While conversational skills are emphasized, the student will also be introduced to the various Japanese scripts.
Learning Outcomes

1. Become introduced to the sound system of the Japanese language.
2. Gain a basic understanding of Japanese scripts.
3. Learn and utilize vocabulary needed for basic conversation.
4. Converse and write on topics related to immediate personal needs, greetings, introductions, personal data, daily routines and school.
5. Comprehend both artificial and authentic written and aural texts of short length on familiar topics.
6. Comprehend and use essential grammar concepts.
7. Identify patterns of cultural behavior or customs in Japan, including gestures, greetings, and body language.
8. Gain the ability to converse using Japanese idiomatic expressions.

JAPN 1120. Japanese II
4 Credits (4)
This course focuses on building upon the basics of the Japanese language with a balanced approach to the development of four skills: listening, speaking, reading and writing. The course is designed to teach students to communicate with Japanese socially and to utilize culturally appropriate manners to engage in Japanese daily life. Along with further developing conversational skills, the student will also continue to learn about and utilize various Japanese scripts.
Prerequisite: grade of C or better in JPNS 1110 or consent of instructor.
Learning Outcomes

1. Understand and utilize in more depth the sound system of the Japanese language.
2. Gain a greater understanding of Japanese scripts.
3. Utilize expanded vocabulary in conversation.
4. Converse and write on topics related to personal, social, geographical, and political life.
5. Comprehend both artificial and authentic written and aural texts of longer, but still brief length, such as personal letters, messages, journals, and narrative accounts.
6. Comprehend and use essential and more complex grammatical concepts.
7. Continue to develop a sense of culturally appropriate conduct.
8. Build upon the ability to converse using Japanese idiomatic expressions.

JAPN 2110. Japanese III
3 Credits (3)
This course is designed for students who have completed 12 credit hours or the equivalent of Japanese study. This course continues to expand vocabulary, grammar and 209 Kanji to deal with daily activities. Its objective is to teach students to communicate in a meaningful way using all four language skills: speaking, listening comprehension, reading and writing. Students will be able to manage not-complicated daily situation. Students will attain ACTFL intermediate-low level in four skills.

Prerequisite: grade of C or better in JPNS 1120 or consent of instructor.

Learning Outcomes

1. Participate in conversations on familiar topics, such as applying part-time job, gift giving/receiving,planning a trip, lost and found, using sentences and short series of sentences.
2. Handle short social interactions in everyday situations by asking and answering a variety of questions.
3. Usually say what they want to say about themselves and their everyday life.
4. Write on a variety of familiar topics in Japanese characters using connected sentences.
5. Understand the main idea in messages and presentations in Japanese on a variety of topics related to everyday life and personal interests and studies.
6. Sometimes understand the main idea of conversations that they overhear.
7. Understand the main idea of texts in Japanese characters related to everyday life and personal interests or studies.
8. Describe and make comparisons between cultures about beliefs, behaviors and cultural artifacts in Japan.

JAPN 2120. Japanese IV

3 Credits (3)

This course is designed for students who have completed 15 credit hours or the equivalent of Japanese study. This course continues to expand vocabulary, grammar and 271 Kanji to deal with not-complicated daily situation with ease. Also students acquire a competence for Japanese pragmatic usage. This course follows ACTFL language guidelines, integrating the five C's: communication, cultures, connections, comparisons and communities, to offer the student a well- rounded classroom experience. Students will attain ACTFL intermediate-mid level in four skills.

Prerequisite: grade of C or better in JPNS 2110 or consent of instructor.

Learning Outcomes

1. Participate with ease and confidence in conversations on familiar topics, such as relationships, par-time job, shopping with a variety of request, meeting socially superiors.
2. Usually describe people, places,and things, and talk about events and experiences in various time frames.
3. Handle social interactions in everyday situations, sometimes even when there is an unexpected complication.
4. Write about topics related to school, work, and community in a generally organized way in Japanese characters.
5. Write some simple paragraphs in Japanese characters about events and experiences in various time frames.
6. Easily understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies.
7. Usually understand a few details of what they overhear in conversations, even when something unexpected is expressed.
8. Sometimes follow what they hear about events and experiences in various time frames.
9. Understand the main idea of texts in Japanese characters with topics related to everyday life, personal interests, and studies, as well as sometimes follow stories and descriptions about events and experiences in various time frames. 1
10. Describe and make comparisons between cultures about beliefs, behaviors and cultural artifact in Japan. 1
11. Start using languages in a culturally appropriate way based on the understanding of cultural similarities and differences, including the use of "honorific" and "humble" expression.

JAPN 320. Oral Practicum in Japanese

1-3 Credits

Service training for facilitators leading informal conversation groups in Japanese. May be repeated up to 4 credits.

Prerequisite: fluency in Japanese and consent of instructor.

JAPN 453. Independent Studies in Japanese

1-3 Credits (1-3)

Individualized, self-paced projects for advanced students. May be repeated up to 6 credits.

JOUR-JOURNALISM

JOUR 105G. Media and Society

3 Credits (3)

Functions and organization of the mass media system in the United States; power of the mass media to affect knowledge, opinions, and social values; and the impact of new technologies.

Learning Outcomes

1. Describe the structure and functions of major US media institutions and their roles in shaping public knowledge and opinion.
2. Analyze the social, political, and cultural impacts of mass media on audiences and communities, with attention to issues of power and representation.
3. Evaluate the influence of emerging technologies on media practices, audience behavior, and the future of journalism.

JOUR 110. Media Writing I

3 Credits (2+2P)

Introduction to media writing basics including news writing for print and web, feature writing, sports writing and writing for public relations. Course emphasizes fundamental news values, journalism ethics and Associated Press style. Restricted to all Campuses. May be repeated up to 3 credits.

Learning Outcomes

1. Know and put into practice news writing basics including the five W's, inverted pyramid, basic news leads, quotations, interviews, attributions and cutlines.
2. Know how to cover scheduled and breaking news events, and put knowledge into practice.
3. Know how to write for different media, including print, web and broadcast, and put knowledge into practice.
4. Know fundamentals of writing news stories, features, editorials, obituaries, and press releases, and put knowledge of each into practice.
5. Develop and practice basic copy editing skills.

JOUR 201. Introduction to Multimedia Journalism

3 Credits (2+2P)

Introduction to journalistic storytelling using text, photos, audio, video and infographics. Students produce their own multimedia stories in intensive, hands-on environment using digital cameras and audio recorders, mobile phones, external microphones and digital editing software applications including Adobe Premiere Pro, Audition and Photoshop. May be repeated up to 3 credits.

Learning Outcomes

1. Learn how to recognize and accurately define multimedia journalism.
2. Improve visual literacy by viewing and analyzing a variety of work produced by professional multimedia journalists.
3. Know the basic requirements and parts of a story, and know how to map and structure a story.
4. Know and put into practice news writing basics including the five W's.
5. Know what makes a good image, and put into practice composing and framing photographs and videos.
6. Understand and put into practice still photography, video and audio capture and editing fundamentals using a variety of tools.
7. Know how to combine different media to create a logical and effective story.

JOUR 210. Copyediting
3 Credits (2+2P)

Introduction to various aspects of copyediting with an emphasis on accuracy and style. Includes hands-on, directed practice in editing for Associated Press style, punctuation and grammar. Includes headline and cutline writing. May be repeated up to 3 credits.
Prerequisite: JOUR 110.
Learning Outcomes

1. Know and put into practice news writing basics including the five W's, inverted pyramid, basic news leads, quotations, interviews and attributions.
2. Know fundamentals of writing news stories, sports stories, features and editorials, and put knowledge of each into practice.
3. Know how to write for different media, including print, web and social media, and put knowledge into practice.
4. Develop and practice basic copy editing skills.
5. Understand fundamentals of media law and ethics, and know basic press rights.
6. Understand basic math principles used by reporters.
7. Practice and understand the importance of meeting deadlines.
8. Develop a habit of consuming news and monitoring daily headlines.

JOUR 300. Introduction to Advertising
3 Credits (3)

This course introduces students to the principles and practices of integrated marketing communications (IMC) and their role in promoting goods, services, and organizations. Students explore the creative and strategic processes behind advertising campaigns, including media planning, message design, and consumer behavior analysis. The course also addresses social and ethical issues in advertising, providing a foundation for further study in media strategy, creative development, and campaign evaluation.
Learning Outcomes

1. Explain the role of integrated marketing communications in the promotion of goods, services, and organizations within the broader marketing landscape.
2. Analyze consumer behavior and media trends to inform strategic planning and message development for advertising campaigns.
3. Apply creative and ethical principles to design basic advertising concepts or campaign strategies that address specific communication objectives.

JOUR 302. Television Videography & Editing
3 Credits (3)

Classroom instruction on basic studio and single camera video productions. The focus is placed on introductory practical aspects of news and videography, reporting and storytelling. Lab experience in camera basics, studio functions and digital video editing. Includes practical experience through crew assignments on the live student - produced newscast, News22, which airs on KRWG-TV, a PBS affiliate station. May be repeated up to 3 credits.
Learning Outcomes

1. The students will be able to have a broader introductory understanding of video production for broadcasting media
2. The students will be able to edit video and digital production
3. The students will be able to create media reporting for News and Sports

JOUR 305. Visual Communication in Media
3 Credits (3)

How one sees, perceives, interprets, creates and applies visual language. Explores the history, techniques, application and practice of the various visual media. May be repeated up to 3 credits.
Learning Outcomes

1. Give students an understanding of the historical, critical, theoretical and practical aspects of visual culture in digital media era.
2. Sharpen students' visual acuity
3. Enhance students' understanding of point of view
4. Help students to broaden their perspective of visual communication from the storytelling perspective in social and digital media
5. Enlarge students appreciation of visual culture

JOUR 306. Sports Writing and Reporting
3 Credits (3)

Fundamental principles of sports writing and reporting with an emphasis on accuracy and style. Includes a mix of classroom instruction and hands-on, directed practice in game coverage sports feature writing, sports commentary and sports statistics. Students have the opportunity to produce sports content for Kokopelli online news outlet. May be repeated up to 6 credits.
Prerequisite: JOUR 210 or consent of instructor.
Learning Outcomes

1. Know how to recognize and accurately define sports journalism and different sports story types
2. Improve sports journalism literacy by reading, viewing and analyzing a variety of work produced by professional sports writers and reporters
3. Know the basic parts of a sports story, and know how to structure and package various types of sports stories
4. Know and put into practice sports writing basics including the five W's, leads, interviews, quotations and attributions
5. Know how to write sports stories for different media, including print, web and social media, and put knowledge into practice
6. Know basic sports terminology, and know how to compile, compute and interpret a wide variety of sports statistics

JOUR 310. Media Writing II
3 Credits (3)

Field reporting and writing for web and print publication. Includes a mix of classroom instruction and hands-on, directed practice in local news and sports reporting, feature writing, opinion writing and social media content creation. Students produce written and visual content for Kokopelli online news outlet. Course emphasizes accuracy, news values and ethics in fast-paced, deadline-oriented environment. May be repeated up to 3 credits. May be repeated up to 3 credits.
Prerequisite: JOUR 210.

Learning Outcomes

1. Write an inverted pyramid on deadline.
2. Use AP style in all written assignments.
3. Incorporate news writing conventions in all stories.
4. Identify the differences between hard news stories and features.
5. Conduct interviews using best journalistic practices and professionalism.
6. Demonstrate news judgment in pitching, reporting, and writing stories.
7. Build a personal website and use digital media to report, publish and promote stories.
8. Understand basic libel law and journalistic ethics.

JOUR 312. Advertising/Copywriting
3 Credits (3)

This course explores the creative and strategic processes involved in developing effective advertising messages. Students will learn the principles of persuasive copywriting, visual storytelling, and layout design, applying these skills to create integrated advertising materials for clients. Emphasis is placed on aligning creative executions with brand strategy and audience insights while adhering to ethical and professional standards.

Prerequisite: JOUR 110 or consent.

Learning Outcomes

1. Apply principles of persuasive writing and strategic thinking to develop advertising copy that aligns with client objectives and target audiences.
2. Design storyboards and layouts that integrate copy and visuals to communicate cohesive advertising messages across multiple media platforms.
3. Evaluate advertising concepts for effectiveness, creativity, and alignment with ethical and professional standards in the industry.

JOUR 314. Broadcast Reporting
3 Credits (3)

Students learn the techniques of reporting and writing news stories for broadcast, including how to incorporate video and natural sound so all elements work together for good storytelling. May be repeated up to 3 credits.

Prerequisite: JOUR 302.

Learning Outcomes

1. Students will learn the basics of television reporting.
2. Students will learn and practice the skills of broadcast news reporting, especially, broadcast writing, reporting, interviewing, videography and audio recording, editing, and how to tell stories with video and audio.

JOUR 315. News 22
1-3 Credits (1-3)

Students will report news stories for live, student-produced television newscast that airs on KRWG-TV, public television for Southern New Mexico. May be repeated up to 3 credits.

Prerequisite: JOUR 314 or JOUR 330.

Learning Outcomes

1. Students will learn to report professional news stories for News twenty-two
2. Students will learn the fundamentals of live broadcast news production.

JOUR 319. Intro Photography
3 Credits (3)

Introduction to photography emphasizing composition, camera techniques, post-production skills in Photoshop, Lightroom, and InDesign and storytelling skills. History of photography overview. This class is the starting point for students interested in a photojournalism emphasis. May be repeated up to 3 credits.

Learning Outcomes

1. Students will be able to use "visual language" for use across multiple platforms including print, video and web.
2. Students will acquire post-production skills used in various industries.
3. Students will be able to produce powerful and effective communication through image-making.

JOUR 320. Photojournalism
3 Credits (3)

Communication photography on multiple platforms for sports, news, advertising/public relations and other editorial and commercial needs. Photography lighting techniques, photo-editing software, and website skills will be expanded and further developed. May be repeated up to 3 credits.

Prerequisite: JOUR 319 or Consent of instructor.

Learning Outcomes

1. Students will be able to use specialty techniques, especially sports photography and studio/portraiture/product photography.
2. Students will expand skills needed in editorial, advertising and other communication industries.

JOUR 321. Media Graphic Design
3 Credits (3)

Introduction to graphic design fundamentals for print and web publication including page layout, typography, color theory and photo editing. Students produce their own print and web-based design pieces using Adobe InDesign and Photoshop. May be repeated up to 3 credits.

Learning Outcomes

1. Know and put into practice fundamental design principles including proximity, alignment, repetition and contrast.
2. Know fundamentals of color theory and typography, and apply this knowledge to a variety of media design projects.
3. Know fundamental rules of photography composition and cropping.
4. Know fundamental rules and principles of printed newspaper and magazine design and put knowledge into practice.
5. Know fundamental rules and principles of printed newsletter and brochure design and put knowledge into practice.

JOUR 330. TV News Shooting & Editing
3 Credits (2+4P)

Advanced technical and aesthetic skills and journalism basics needed for videography and editing on-location news stories. Single camera videography and nonlinear/digital editing. May be repeated up to 3 credits.

Prerequisite: JOUR 314 or permission of instructor.

Learning Outcomes

1. Learn or continue exploring and mastering the concept of video sequencing in the field, gathering great natural sound, opening and closing shots and improve your overall storytelling process in the field and during the edit process.
2. Learn or continue exploring the fundamentals of non-linear digital editing, using Adobe Premier.
3. Expand knowledge of field sound recording.

4. Learn and distinguish the difference between uncontrolled action and controlled action.

JOUR 350V. Media History
3 Credits (3)
Historical overview of media including newspapers, magazines, radio, television, photography, entertainment media, advertising, public relations, and digital media. The history of American media development is directly intertwined with American history. Newspapers, magazines, television, and radio have not just reported on news and events; by virtue of what facts and sources editors and reporters have chosen to use, journalists have framed how the public should think about events. Editorials also provided further framing guidance on issues to readers and viewers. Students will study media history from social, intellectual, and cultural history perspectives. Students will examine the historical relationship of the media to American social, political, economic, and cultural patterns and developments. And, conversely, students will examine how these same forces impacted and changed all forms of media through a multi-cultural approach. May be repeated up to 3 credits.
Learning Outcomes
1. Survey the development of various forms of media and the changes in the media as they relate to the larger social, economic, and political sphere
2. Learn the methods and processes of historical research and engage in historical research.
3. Learn that the development of all fields of communication are interrelated
4. Discover how American media have attempted to influence how Americans perceive the world around them (including perceptions of other nations) via their coverage and portrayal of global events.
5. Learn that America's historical events played out through the media. As such, students will gain a deeper understanding of how media personnel helped "frame" the discussion and debate about news and information from the 1600s to present day
6. Discover that the ethical and professional foundations of media industries have adjusted and changed over time due to external and internal forces, including the rise of the professionalism movement across the nation in the late nineteenth century, the internal response to public demands for licensing of news media following World War I, and modern pressures caused by digitization of the industry and the parallel fragmentation of audiences
7. Learn how to determine how various groups outside the mainstream contributed to overall press development. This includes an examination of how women and ethnic minorities influenced how and why the press became a force for social, cultural, political, and economic change in society.
8. Discover and appreciate that history is NOT just the study of names, dates, and places, but of people
9. Discover that the history of media is not the province of any one individual, corporation, or entity. Instead, a variety of factors: social, economic, political, legal, ethical, and cultural, helped shape the media's development

JOUR 360. Media Literacy
3 Credits (3)
This course is designed to help students develop an informed, critical, and practical understanding of media including analysis of online and social media and to help students develop their media literacy and analytical skills.
Learning Outcomes
1. Write clearly, precisely, and in a well-organized manner.
2. Demonstrate critical thinking, reading, and viewing skills.
3. Research, develop, evaluate, and present arguments grounded in research-based knowledge.
4. Apply analytical, precise, and elaborated terms and concepts for talking and writing about media and the ways in which they communicate meaning.
5. Demonstrate how images are constructed via specific formal and technical elements and how those images construct meaning about national and global communities.
6. Interpret media texts (film, television, etc.) to expand experience and understanding of the self and society.

JOUR 374. Introduction to Public Relations
3 Credits (3)
This course is designed to familiarize students with the basic concepts, principles, practices, and professions of public relations (PR). It is the foundation course for other PR courses in Journalism and a supplemental course for students majoring in other fields.
Learning Outcomes
1. The role and functions of public relations in contemporary society.
2. The contingency views of public relations practice in the worlds of managing competition and conflict.
3. The historical evolution of public relations, career opportunities in the field, and professional/ethical/legal responsibilities.
4. The basic process of public relations—research, planning, communication, evaluation—and the use of communications strategies and tactics to achieve organizational goals and objectives.
5. The persuasion of public opinion and audience analyses and how to reach diverse audiences.
6. Practical guidelines for utilizing written, spoken, and visual techniques to reach selected audiences.
7. An understanding of how public relations is a global phenomenon.
8. How the Internet and social media are changing the way public relations professionals build and sustain relationships between an organization and its constituents.
9. An understanding of public relations activities in business, sports, tourism, entertainment, nonprofit, education, and government organizations.

JOUR 377V. Mass Media Ethics
3 Credits (3)
Philosophical and moral examination of problems relating to mass media. Use of case study method to analyze media situations; development of framework for media professionalism.
Learning Outcomes
1. Analyze ethical dilemmas in mass media using established philosophical theories and ethical frameworks.
2. Evaluate media case studies to determine the ethical responsibilities and professional standards applicable to journalists and media practitioners.
3. Construct a personal code of media ethics informed by moral reasoning, professional guidelines, and critical reflection on case studies.

JOUR 380. Women and the Media
3 Credits (3)
Portrayal and participation of women in mass media from colonial to contemporary times. Same as GNDR 450.

Learning Outcomes

1. Examine the historical evolution of women's roles and representations in mass media from colonial America to the present.
2. Critique media portrayals of women across different time periods and platforms, using feminist theory and media analysis frameworks.
3. Develop original media content, presentations, or arguments that reflect an informed understanding of gender dynamics in media industries.

JOUR 384. Public Relations Storytelling
3 Credits (3)
This course will help students understand the concept of using storytelling as a tool for public relations, branding, and social change. Students will learn how to use storytelling on traditional and social media platforms. Upon completion of this course, students should have attained knowledge of essential elements of storytelling, audience-led narratives, transmedia storytelling, etc.
Learning Outcomes

1. Students will attain knowledge and understanding of the essential elements of branding through storytelling.
2. Students will attain knowledge and understanding of the assessment of brand stories and customer-led narratives.
3. Students will attain knowledge and understanding of integrating brand storytelling into the marketing mix.
4. Students will attain knowledge and understanding of data-driven storytelling.
5. Students will attain knowledge and understanding of personal branding of leaders and brand storytelling success.
6. Students will attain knowledge and understanding of research skills for brand storytelling.
7. Students will attain knowledge and understanding of the future of brand storytelling.

JOUR 407. Media Internship
1-3 Credits (1-3)
Supervised work with a media organization. 1-3 credits. May be repeated up to 3 credits. Restricted to: JOUR majors.
Prerequisite: Consent of internship coordinator.
Learning Outcomes

1. Varies.

JOUR 408. Media Practicum
1-3 Credits
Advanced supervised work with a media organization. May be repeated up to 3 credits.
Prerequisite: Consent of internship coordinator.
Learning Outcomes

1. Varies.

JOUR 412. Documentary Photojournalism
3 Credits (3)
Production of documentary photography for web, print, broadcasting and exhibition emphasizing deep visual storytelling. Multimedia, social media distribution and website techniques including WordPress website design and maintenance. Discussion of notable photographers. Multiple Field Trips to produce material for the Small Village New Mexico term project (SVNM). Students produce an individual Term Project book and multimedia show. May be repeated up to 3 credits.
Prerequisite: JOUR 319.
Learning Outcomes

1. Students will learn "slow photojournalism," and be able to produce visual stories done with deep immersion in whatever community or subject they work in.
2. Students will be able to use photography for communication, giving deeper meaning to subjects than transitory "news" type photography allows.

JOUR 414. Broadcast Reporting Portfolio
3 Credits (3)
This is course is designed to help students who are preparing for a career in broadcasting. Students will refine reporting, shooting and editing skills and build a professional website containing a reporter reel, resume and proof of other skills needed for success in broadcasting. The class also features guest speakers throughout the semester who work in the broadcast and digital world of media. May be repeated up to 3 credits.
Prerequisite: JOUR 314.
Learning Outcomes

1. To practice, hone, and improve scriptwriting skills, especially news writing.
2. To practice and improve audio announcing skills and on-camera announcing skills.
3. To practice and improve overall videography and digital editing skills.
4. To learn more and prepare for related careers.

JOUR 425. Media Planning and Buying
3 Credits (3)
Covers the principles of media planning for an IMC campaign and procedures for purchasing ad time or space.
Prerequisite: JOUR 300 or consent of instructor.
Learning Outcomes

1. Analyze audience demographics, psychographics, and media consumption data to determine optimal media channels for journalistic content placement.
2. Design comprehensive media plans that align with campaign objectives, budget constraints, and ethical journalism practices.
3. Evaluate the effectiveness of media buys using key performance indicators (KPIs) and adjust strategies based on data-driven insights.

JOUR 427. Media Writing III
3 Credits (3)
Advanced field reporting and writing for web and print publication. Includes hands-on, directed practice in local news and sports reporting, feature writing, opinion writing, social media content creation and web publishing. Students produce written and visual content for Kokopelli online news outlet, and prepare final portfolio. Course emphasizes accuracy news values and ethics in fast-paced, deadline-oriented environment. May be repeated up to 3 credits.
Prerequisite: JOUR 310.
Learning Outcomes

1. Sharpen and expand advanced reporting, interviewing, writing, and editing skills for print and online publication.
2. Sharpen multimedia reporting and storytelling skills including photography skills.
3. Improve and expand professional portfolio through online publication of original work.
4. Demonstrate effective use of social media platforms.
5. Demonstrate understanding of fundamentals of journalism ethics.

6. Learn to work effectively under deadline pressure.
7. Produce a final portfolio or "string book" of published work.

JOUR 457. Social Media Management and Analytics
3 Credits (3)
This course is designed to help students to understand how marketing has (and has not) changed due to the rise of social media and changes in various underlying contextual factors, such as dramatically increased speed of information dissemination across consumers and brands. The overarching goal is to obtain a clear perspective on what's really going on in digital/social/mobile marketing so that you can begin to appreciate its true value to consumers, to managers, and to other corporate stakeholders. It will equip students with the relevant knowledge, perspectives, and practical skills required to develop marketing strategies that leverage the opportunities inherent in social media and consumer-to-consumer social interactions for achieving business and marketing goals.
Prerequisite: JOUR 374.
Learning Outcomes
1. Understand what social media is and how this new type of media and communications technology influences how business and marketing is done
2. Develop skill in using the predominant social media tools currently available for business/marketing communication
3. Understand how to use various social media channels to publish and disseminate relevant branded content in order to engage consumers and to increase social impact, influence, and value
4. Develop a strategic plan for identifying opportunities for using social media in a company

JOUR 460V. Sports & Entertainment P.R.
3 Credits (3)
This course aims to provide a basic understanding of sports and entertainment PR and its industry trends, theories, techniques, case studies, global trends, and future directions. Upon completion of this course, students will be able to use the theories and techniques to plan, implement, and evaluate sports and entertainment PR campaigns and activities. May be repeated up to 3 credits.
Learning Outcomes
1. Describe the nature of public relations practice in sports
2. Practice the primary research methods employed in sports public relations.
3. Recognize the major steps involved in planning a public relations campaign and the key considerations at each step in the process.
4. Identify the various types of paid/earned/shared/owned media commonly utilized in the profession
5. Comprehend the different tactics used to generate publicity.
6. Become proficient in writing news releases.
7. Distinguish among the various response strategies sports managers may employ in a crisis.
8. Describe unique aspects of social responsibility in the sports and entertainment industry
9. Identify legal issues in sports PR, anticipate emerging ethical issues, evaluate ethical dilemmas present in sports PR, and recognize the need for ethical decision-making in sports PR. 1
10. Describe current global trends and multicultural issues, which have impacted the global sports and entertainment industry.

JOUR 463. Public Relations for Social Impact
3 Credits (3)
This course aims to provide a basic understanding of the role of PR in influencing public behavior and creating positive social impact. This course offers different approaches to solving a range of social problems in the areas of health, safety, environmental protection, and community involvement.
Learning Outcomes
1. Apply social marketing theories for developing, implementing, and evaluating social marketing campaigns
2. Utilize nudge techniques to improve decisions about health, wealth, and happiness in both personal and societal levels
3. Prepare a prosocial campaign plan using social media and public relations strategies
4. Identify examples of successful social marketing campaigns

JOUR 470. Environmental, Social, & Governance Public Relations
3 Credits (3)
This course will explore how organizations create values by investigating the concept of environmental, social, and governance (ESG) and social responsibility campaigns in the light of public relations. Students will learn about philanthropy, sustainability, reputation building, and ESG for the media and entertainment industry.
Learning Outcomes
1. Understand the basic concepts and elements of Strategic Corporate Social Responsibility (Strategic CSR).
2. Understand company's value-creating activities through strategic CSR.
3. Understand company's CSR strategy under the context of economical and social exchanges
4. Understand the process of creating comprehensive strategic CSR communications plan

JOUR 476. Advertising & Public Relations Campaigns
3 Credits (3)
In this capstone course, students will utilize the principles and techniques of advertising and public relations to research and develop a comprehensive campaign plan. Students will develop a portfolio to demonstrate their skills to prospective employers. Restricted to Journalism and Media Studies Majors. May be repeated up to 3 credits.
Prerequisite: JOUR 374.
Learning Outcomes
1. Students will independently work on two projects to practice how to promote themselves and develop a professional point of view.
2. Students will create a portfolio at the end of the course that can be used to help demonstrate their skills to prospective employers.
3. Students' projects will demonstrate that they understand how to utilize the principles and techniques of advertising and PR to research and develop a comprehensive campaign plan.

JOUR 489. Media Research
3 Credits (3)
This course introduces students to the methods and applications of empirical research in mass communication. Students explore survey design, field studies, content analysis, and basic data analysis to address real-world media problems. Emphasis is placed on understanding research ethics, interpreting quantitative and qualitative data, and applying research findings to inform media strategies and evaluate communication effectiveness.
Learning Outcomes
1. Explain key research methodologies used in mass communication, including surveys, content analysis, and field studies.

2. Conduct basic empirical research by designing instruments, collecting data, and applying appropriate analytical techniques.
3. Interpret and evaluate research findings to address communication problems and inform media strategies or journalistic practices.

JOUR 490. IMC Campaign
3 Credits (3)
Capstone course utilizing all previous instruction to create and develop plans for a long-term national or local IMC (Integrated Marketing Communications) campaign. May be repeated up to 3 credits. Consent of Instructor required.
Prerequisite(s): JOUR 300 and 312 or consent of instructor.
Learning Outcomes
1. Students will learn how to create IMC campaign for client or for brands, and will be able to apply this for the real world when they apply for job.

JOUR 493. Media Law
3 Credits (3)
Examination of legal issues relating to mass media in the United States. Invasion of privacy, libel, sedition, copyright, and advertising regulation. Same as COMM 493, POLS 493.
Learning Outcomes
1. Identify and explain major legal principles, statutes, and court decisions governing mass media in the United States.
2. Analyze legal issues such as privacy, libel, copyright, and advertising regulation in the context of real or hypothetical media scenarios.
3. Evaluate the legal and ethical implications of media practices to ensure compliance with professional and constitutional standards.

JOUR 494. Special Topics
3 Credits (3)
Specific subjects to be announced in the Schedule of Classes. May be repeated up to 9 credits.
Learning Outcomes
1. Varies.

JOUR 495. Media Theory
3 Credits (3)
Theoretical approaches to media communications. Examination of media effects, audiences, and media socialization. May be repeated up to 3 credits.
Learning Outcomes
1. Trace the historical development of major media theories and explain their relevance to contemporary media landscapes.
2. Apply theoretical frameworks to analyze media content, audience behavior, and the role of media institutions in society.
3. Evaluate scholarly research and communication practices using media theory to support critical thinking and effective written communication.

JOUR 499. Independent Study in Media
1-3 Credits
Individual study directed by consenting instructor with prior approval of department head. May be repeated up to 6 credits.
Prerequisite: 2.5 GPA and consent of instructor.
Learning Outcomes
1. Varies.

JOUR 501. Global Strategic Communications: Cultural Perspective
3 Credits (3)
This course is set up to combine both theory and practice, regarding global communications, especially from cultural perspectives. Also, this course is designed for students to understand persuasive strategic communications in different nations. Markets are no longer bound with their physical locations because of the communication technologies. To successfully address the strategic communications in global market, marketers and advertisers need to fully understand “local” challenges coming “deep” from cultural, economic, regulatory and competitive differences. Based on theoretical and practical understanding of the dynamic interplay between global and local forces, students will acquire theoretical as well as practical understandings of how to accomplish the goals of strategic communications in global markets. Thus, the core objective of this class is to develop an ability to analyze and map out persuasive communication strategies that are effective in global markets.
Learning Outcomes
1. Know how to analyze cultural norms and recognize strategic communications practices that are congruent to such cultural norms.
2. Identify similarities and differences in different consumer segments according to dimensions of culture.
3. Develop a deeper understanding of cultural dimensions.
4. Implement effective market research applications in different regions of the world.
5. Conceptualize and operationalize theoretical frameworks.

L SC-LIBRARY SCIENCE

L SC 110. Reference and Information Resources I
3 Credits (3)
Overview of reference services. Introduction to, and evaluation of, basic types of information resources (both print and electronic) and their application in libraries.

L SC 111. Introduction to Information Literacy in an Electronic Environment
3 Credits (3)
Introduction to the basics of the research process; the organization, location and evaluation of information using print, non-print and electronic resources. Restricted to: Community Colleges only.

L SC 130. Introduction to Technical Services in Libraries
3 Credits (3)
Introduction to technical services in libraries, including acquisitions, bindery, cataloging, gifts, and serials. Restricted to Dona Ana campus only.

L SC 200. Collection Management and Development in Libraries
3 Credits (3)
Principles of identifying, selecting, acquiring, managing, and evaluating resources for libraries. Restricted to Dona Ana campus only.

L SC 210. Technology Planning in Libraries
3 Credits (3)
Overview of computer applications in libraries. Topics may include automated systems and electronic resources, introduction to evaluation of technology, and writing a technology plan. Restricted to Dona Ana campus only.

L SC 221. Experiential Learning I
1-3 Credits
Student is employed (paid or non-paid) in an approved work site and evaluated by their supervisor. Each credit requires a specified number of hours of on-the job work experience. Consent of Instructor required. Graded: S/U Grading (S/U, Audit). Restricted to Dona Ana campus only.
Prerequisite(s): Consent of instructor.

L SC 240. Internet Resources and Research Strategies
3 Credits (3)
Introduction to retrieving and evaluating information found on the Internet and in selected Internet-accessible databases. Restricted to: Dona Ana campus only.

L SC 255. Special Topics
1-3 Credits
Special topics to be announced in Schedule of Classes. May be repeated for a maximum of 12 credits. Restricted to: Dona Ana campus only.

L SC 298. Independent Study
1-3 Credits
Individual studies directed by consenting faculty with prior approval of department chair. May be repeated for a maximum of 12 credits. Restricted to: Dona Ana campus only.

LANG-LANGUAGE

LANG 111. Beginning Language I
4 Credits (4)
Developing language skills through study abroad for languages not offered at NMSU main campus. Specific languages to be identified with course subtitles. Main campus only.
Prerequisite: Language placement exam or consent of the instructor.

LANG 451. Special Topics
1-3 Credits
Selected topics relating to cultures or literatures of a specific country. Credit can be applied only towards fulfilling second language requirement. Credit is not accepted towards any graduate level major or minor. May be repeated for a maximum of 12 credits. Consent of instructor required.

LANG 453. Independent Studies
1-3 Credits
Individualized, self-paced projects for advanced students. May be repeated under different subtitles for a maximum of 6 credits.
Prerequisite: consent of instructor.

LAWE-LAW ENFORCEMENT

LAWE 180. Public Safety First Line Supervisor
3-6 Credits (3-6)
This course is designed to enhance public safety personnel's human resource management and reduce organizational liability. Consent of Instructor required. Restricted to Community Colleges campuses
Learning Outcomes
1. Describe and explain police administration.
2. Explain and discuss the various leadership and management theories.
3. Define and discuss the various types of leadership skills and management styles.
4. Express and discuss the role of the police administrator and police administration.
5. Explain the leadership required of police administrators for an effective Law Enforcement administration.
6. Describe and interpret the "quality approach to managing community relations"
7. Explain and discuss the necessities of introducing organizational change.
8. Explain and discuss the planning, programming and budgetary process including: variables that affect the decision-making process.
9. Analyze and discuss the role of effective communications in a police organization including negotiations and conflict resolution. 1
10. Explain and analyze the role of human resources in the organization including: their role in the recruitment and selection process; training; performance evaluations; promotions; and assessment centers. K) Discuss the role of police unions and explain their significance in labor relations.

LAWE 201. Introduction to Juvenile Delinquency
3 Credits (3)
An introductory overview of the juvenile justice system of due process, custody, detention and release. Note: course does not meet upper division requirements towards completion of Bachelor of Science in Criminal Justice. Restricted to: Community Colleges Only.
Learning Outcomes
1. Explain the foundations of today's juvenile justice system - including the history and philosophy behind contemporary practices.
2. Identify and explain theories of juvenile offending and victimization.
3. Communicate what risk and protective factors contribute to juvenile victimization and offending.
4. Describe juvenile involvement with police, courts, and corrections.
5. Compare and contrast the effectiveness of interventions that can prevent delinquency or decrease recidivism rates.
6. Articulate and analyze potential avenues for reforming the juvenile justice system.
7. Exhibit familiarity and comfort with original source materials in the field of juvenile delinquency.
8. Demonstrate competency in writing about juvenile delinquency, utilizing original source materials.

LAWE 202. Police Patrol Procedures
3 Credits (3)
A critical review of police procedures and the influences on police behavior; policy development, including the police role; discretion; police community interaction and arrest, search and seizure. Restricted to: Community Colleges only.
Learning Outcomes
1. Define and discuss the definition of police patrol and operations including their significance within the criminal justice system.
2. Identify and discuss the special proceedings in the criminal law process including detention, arrest, as well as search and seizure.
3. Explain and discuss the exceptions to search warrant requirements including stop and frisk, search incident to arrest, consent searches, plain view doctrine, search and seizure of vehicles, and containers, as well as abandoned property.
4. Identify and explain the police patrol functions and responsibilities and the need for building credibility by maintaining ethics and integrity in the application of law.
5. Identify and discuss the most frequent incidents encountered by the law enforcement officer and the suggested method for handling.
6. List and discuss the methods, modes and techniques of conducting police patrol including goals of crime detection, keeping the peace, maintenance of equipment, and their impact on the community.
7. Review and discuss the New Mexico Uniform Traffic Laws including apprehension methods of citation, and traffic investigations.

LAWE 203. Introduction to Police Supervision
3 Credits (3)
An introductory overview of police supervision and concerns as it applies to law enforcement. (Note: Course does not meet upper division

requirements toward completion of Bachelor of Science in Criminal Justice.) Restricted to: Community Colleges only.

Learning Outcomes

1. Describe and explain police administration.
2. Explain and discuss the various leadership and management theories.
3. Define and discuss the various types of leadership skills and management styles.
4. Express and discuss the role of the police administrator and police administration.
5. Explain the leadership required of police administrators for an effective law enforcement administration.
6. Describe and interpret the "quality approach to managing community relations".
7. Explain and discuss the necessities of introducing organizational change.
8. Explain and discuss the planning, programming and budgetary process including variables affecting the decision-making process.
9. Analyze and discuss the role of effective communications in a police organization including negotiations and conflict resolution. 1
10. Explain and analyze the role of Human Resources in the organization including their role in the recruitment and selection process, training, performance and evaluations, promotions, and assessment centers. 1
11. Discuss the role of police unions and explain their significance in labor relations.

LAWE 204. Introduction to Homeland Security
3 Credits (3)

A historical perspective of international and domestic terrorist threats and the need to develop cohesive response policies and practices in the interest of National Security. Course does not meet requirements towards completion of Bachelor of Science in Criminal Justice. Restricted to: Community Colleges only.

Learning Outcomes

1. Describe the rationale for the creation of the Department of Homeland Security.
2. Analyze the purpose of the DHS, its component agencies, and their specific function and role.
3. Understand and discuss the politico-social ramifications of DHS, including legal complications and issues.
4. Discuss terrorist organizations - their rationale, motivation, methodology, and its impact on DHS.
5. Discuss intelligence efforts, to include counter-intelligence, both within the United States and internationally.
6. Describe and analyze the creation of the United States Department of Homeland Security in its proper historical context.
7. Describe and analyze methodologies utilized by DHS to achieve its goals.
8. Describe and analyze the impact of security measures on American politics, culture, and international relations.

LAWE 206. Traffic Enforcement and Crash Investigations
3 Credits (3)

History and development of traffic laws and regulations, including basic elements of traffic violations, detection, apprehension, impaired drivers and guidelines and procedures for effective crash investigations and reporting. Restricted to: Community Colleges only.

Learning Outcomes

1. Students will analyze the application of the constitutional case studies and their relationships to due process.
2. Students will analyze the relationship between ethics and morality in relation to Criminal Justice and Law Enforcement practices.
3. Students will demonstrate how to conduct a traffic stop and felony stop.
4. Students will be able to perform a standardized field sobriety test.
5. Students will demonstrate how to take measurements at a crash scene and draw a field sketch.
6. Students will research online for medi and department of motor vehicle documents and present to the class.
7. Students will complete a FEMA online class.

LAWE 207. Legal Aspects of Law Enforcement
3 Credits (3)

An evaluation of police authority including responsibilities, civil liability, liability implications, legal obligations, legal restraints, laws of arrest, and search and seizure. Restricted to: Community Colleges only.

Learning Outcomes

1. Explain what constitutes evidence, including rules of evidence and role of the prosecution and defense.
2. Analyze the sequence of events in a typical criminal trial, from arrest through pretrial including the use of witnesses and types of questioning allowed during trial.
3. Identify and explain the basic concepts of evidence used in the American legal system.
4. Explain the general concepts involving witnesses' competency and privileged communications.
5. Analyze the basic elements including credibility and impeachment as it relates to serving as both a lay and expert witness.
6. Explain the rules and exceptions to hearsay testimony.
7. Discuss and explain the law of evidence as it relates to statements including admissions and confessions made by the accused in a criminal case.
8. Analyze the Fourth Amendment as it relates to the law of search and seizure, and the exclusionary rule as it relates to lineups and other identification procedures.
9. Discuss and explain the rules surrounding circumstantial evidence and admissibility of other crimes, acts, or wrongs.

LAWE 221. Law Enforcement Internship
3 Credits (3)

Application of knowledge, skills and abilities, in an agency as an intern and integrated member of a law enforcement affiliated agency.
Prerequisite: consent of instructor.

LAWE 233. Practical Approach to Terrorism
3 Credits (3)

Gives responders an overall safety approach in recognizing and responding to incidents involving terrorism. Presents an overview in types of harm, explosive weapons, chemical weapons, biological weapons and radiological weapons. Restricted to: Community Colleges only.

Learning Outcomes

1. Define Terrorism.
2. Explain the various harm threats that pose a significant risk to response personnel.
3. Define the response challenges terrorism acts pose to response personnel.
4. Explain the management of terrorism incidents.

5. Describe the various materials used in criminal/terrorist acts.
6. Explain the importance of developing in-depth response plans.
7. Explain the importance of preparing for terrorist acts.
8. Describe the various locations that may be subject to terrorist acts.
9. Describe the warning signs that may indicate a terrorist attack. 1
10. Explain the consideration that responders face during crime scene management. 1
11. Discuss the self-protective measures used by response personnel. 1
12. Explain the decontamination process involving weapons of mass destruction.

LAWE 255. Special Topics
1-3 Credits (1-3)
Introductory special topics of lower division level work that provides a variety of timely subjects and content material. Specific subjects to be announced in the Schedule of Classes. A passing grade of C- or better is required. May be repeated up to 6 credits. Consent of Instructor required. Restricted to Community Colleges campuses
Learning Outcomes
1. Obtaining foundational skills in the administration of justice by differentiating the role of police and corrections in contemporary America.
2. Competence in the legal elements of constitutional, criminal, and substantive law, rules of evidence, search and seizure, and the role of the courts in the adjudication of the law in America.
3. Ability to identify, analyze, and synthesize knowledge from discipline-specific courses in criminalistics, legal aspects, homeland security, terrorism, and patrol operations to effectively conduct a practical field investigation and traffic crash investigation.
4. Ability to develop a criminal justice ethical perspective consistent with 21st century America to, effectively and ethically, perform a criminal justice role in law enforcement or corrections.
5. Basic crime scene management, crime scene note-taking techniques, collection of evidence, and case presentations.
6. An application of knowledge, skills, and abilities, as an intern or integrated member of a criminal justice affiliated agency.

LAWE 298. Independent Study
3 Credits (3)
Individual studies directed by the consenting faculty with prior approval of the department chair. A passing grade of C- or better is required. May be repeated up to 6 credits. Consent of Instructor required. Restricted to Community Colleges campuses
Prerequisite(s): Sophomore standing with a 3.0 or better GPA.
Learning Outcomes
1. Obtaining foundational skills in the administration of justice by differentiating the role of police and corrections in contemporary America.
2. Competence in the legal elements of constitutional, criminal, and substantive law, rules of evidence, search and seizure, and the role of the courts in the adjudication of the law in America.
3. Ability to identify, analyze, and synthesize knowledge from discipline-specific courses in criminalistics, legal aspects, homeland security, terrorism, and patrol operations to effectively conduct a practical fietd investigation and traffic crash investigation.
4. Ability to develop a criminal justice ethical perspective consistent with 21 st century America to, effectively and ethically, perform a criminal justice role in law enforcement or corrections.
5. Basic crime scene management, crime scene note-taking techniques, collection of evidence, and case presentations.
6. An application of knowledge, skills, and abilities, as an intern or integrated member of a criminal justice affiliated agency.
7. Effective communication, orally and in writing, using appropriate references and technologies.
8. Analytical and critical thinking skills when solving complex issues in criminology and the criminal justice system.
9. Competence using and applying appropriate criminological theories on crime causation. 1
10. Competence in understanding and describing how gender, race, ethnicity, age, social class, and sexuality contribute to differing experiences in the criminal justice system. 1
11. Competence in understanding how the inter-dependence of the major components of the criminal justice system (i.e., police, courts, correctional agencies) affect victims, offenders, justice professionals, and society. 1
12. Competence in understanding and applying the fundamental elements of both criminal and constitutional law. 1
13. Competence in the legal foundation of criminal justice and the importance of due process.

LIBR-LIBRARY SCIENCE

LIBR 1110. Introduction to Research
1 Credit (1)
The goal of this course is to provide students with techniques and tools to become better researchers. This course introduces students to the research process, and the organization, location, and evaluation of information.
Learning Outcomes
1. Develop a research plan based on an information need.
2. Find information efficiently and effectively using a variety of search tools.
3. Evaluate the reliability of an information resource.
4. Practice ethical behavior in using information.

LIBR 311V. Information Literacy
3 Credits (3)
Lecture, hands-on assignments, and written research projects to give students the technological skills and critical thinking abilities needed to use the printed and electronic information resources found on the Information Highway. Includes how to locate, critically evaluate, and apply information for academic, professional, and personal purposes.
Prerequisite: ENGL 1110G or equivalent; and consent of instructor.

LIBR 3996. Topics in Information Skills, Research and Scholarship
3 Credits (3)
Offered under various subtitles in the Schedule of Classes. May be taken for a maximum of 3 credits per semester and a total of 6 credits overall. May be repeated up to 6 credits.
Learning Outcomes
1. Learning outcomes will vary by subtitle.

LING-LINGUISTICS

LING 2110G. Introduction to the Study of Language and Linguistics
3 Credits (3)
This course presents an introduction to the study of language through the basic aspects of linguistic analysis: the sound system (phonetics

and phonology), the structure of words and sentences (morphology and syntax), and the ways in which language is used to convey meaning (semantics and pragmatics). In addition, the course will investigate how language is acquired and stored in the brain, and how differences in speech styles and dialects reflect different social and cultural backgrounds of individual speakers.

Learning Outcomes

1. Understand the basic concepts and terminology associated with phonetics, phonology, morphology, syntax, semantics, and pragmatics.
2. Comprehend how language evolves over history and over an individual's lifespan.
3. Describe some common, but mistaken, beliefs about language and to distinguish between descriptive and prescriptive approaches to language.
4. Describe the social, psychological, geographic and historical influences that lead to language dominance or language endangerment.
5. Be aware of the relations among various languages in the world, between dialects and slang, and between human and non-human languages.
6. Apply methods of linguistic analysis as introduced in the course.
7. Critically engage with the works of linguistic researchers.
8. Stimulate curiosity about language and what it reveals about the human mind.

LING 302V. Language and Society
3 Credits (3)
Study of how social identity including such factors as ethnicity, age, sex, education, power and socio-economic class is expressed in language systems and how misunderstandings arise between groups. Research skills are emphasized.

LING 303. Exploring Language Systems
3 Credits (3)
Forms of linguistic semantic, syntactic and phonological organization.
Prerequisite(s): LING 2110G.

LING 405. Topics in Linguistics
3 Credits (3)
Selected linguistics topics subtitled in the Schedule of Classes. May be repeated for a maximum of 6 credits under different subtitles.
Prerequisite: consent of instructor.

LING 425. Language and the Mind: Introduction to Psycholinguistics
3 Credits (3)
This course is an introduction to psycholinguistics; the study of how humans learn, represent, comprehend and produce language. Throughout this course, we address a variety of questions on the psychology of language most of which are still being answered. These include: What does it mean to know a language? What are the cognitive processes involved in language use? How do we produce and recognize speech? How can we improve texts and make them easier to read? How can we control speech in special situations to avoid errors?
Prerequisite(s): LING 2110G or consent of instructor.

LING 451. Independent Studies in Linguistics
1-3 Credits
Individual or group study of selected topics to be identified by subtitle. May be repeated for a maximum of 6 credits.
Prerequisites: LING 2110G and prior arrangement with faculty supervisor.

LING 455. Research in Linguistics
3 Credits (3)
This course will provide a capstone experience for students who have progressed through the program in linguistics and provide the foundation for further study at the post-graduate level in a linguistics-related field. Students will apply their foundation of knowledge and skills in linguistics through the realization of an individualized, inquiry-based project. Consent of instructor may enroll student only in case of elective credit shortfall with concurrent enrollment.
Prerequisite(s): LING 2110G, LING 301, LING 302V, LING 303, plus 9 credit hours of related electives.

LING 500. Introduction to Linguistics
3 Credits (3)
Survey of the main branches of linguistics: phonology, morphology, syntax, semantics, language acquisition, sociolinguistics, historical linguistics and some of the theoretical issues in the field.

LING 502. Graduate Study in Sociolinguistics
3 Credits (3)
Study of how social identity including factors such as ethnicity, age, gender education and socio-economic class is expressed in language systems.
Prerequisites: LING 2110G or LING 500 recommended.

LING 503. Exploring Language Systems- Grad
3 Credits (3)
Students will be responsible for all requirements of LING 303 and will undertake independent,directed research.
Prerequisite(s): LING 2110G or LING 500.

LING 505. Selected Topics
3 Credits (3)
Studies, varying from year to year, in linguistics.

M E-MECHANICAL ENGINEERING

M E 228. Engineering Analysis I
3 Credits (3)
Introduction to engineering analysis with emphasis on engineering applications. Topics include ordinary differential equations, linear algebra, and vector calculus with focus on analytical methods. May be repeated up to 3 credits.
Prerequisite: C- or better grades in MATH 2530G.

Learning Outcomes

1. An ability to derive differential equation models of phenomena relevant to mechanical and aerospace engineering.
2. An ability to use basic methods for solution of these ordinary and partial differential equations.
3. An ability to apply the solutions to simple analysis and design situations.

M E 234. Mechanics-Dynamics
3 Credits (3)
Kinematics and dynamic behavior of solid bodies utilizing vector methods. May be repeated up to 3 credits.
Prerequisite: A grade of C- or better grade in the following: C E 233 and PHYS 1310G and MATH 1521G or MATH 1521H.

Learning Outcomes

1. Student will be able to apply concepts of kinematics and accelerated motion.

M E 240. Thermodynamics
3 Credits (3)
First and second laws of thermodynamics, irreversibility and availability, applications to pure substances and ideal gases.

Prerequisite: C- or better grades in PHYS 1310G.

Learning Outcomes

1. An ability to apply the first law of thermodynamics to energy systems.
2. Understanding and application of thermodynamic concepts and properties to analyze systems with pure substances and ideal gases.

M E 261. Numerical Methods

3 Credits (2+3P)

Introduction to programming syntax, logic, and structure. Numerical techniques for root finding, solution of linear and nonlinear systems of equations, integration, differentiation, and solution of ordinary differential equations will be covered. Multi function computer algorithms will be developed to solve engineering problems. May be repeated up to 3 credits.

Prerequisite: C- or better grades in MATH 1521G or MATH 1521H or ENGR 190.

Learning Outcomes

1. Ability to use a variety of numerical methods in both basic and advanced engineering calculations.
2. Ability to formulate algorithms and write programs to solve engineering problems.
3. Ability to develop an appreciation for the hazards and limitations of numerical solutions, including accuracy, stability, and computer limitations of memory and speed.

M E 326. Mechanical Design

3 Credits (3)

Kinematics and dynamics of machinery, analytical and computer-aided design of kinematics, mechanism synthesis involving linkages, cam and gear design, and motion analysis and balancing of forces. Project-based learning of multi-mechanism system design, analysis, fabrication, and evaluation. May be repeated up to 3 credits.

Prerequisite: C- or better in ENGR 234 and C E 301.

Learning Outcomes

1. An ability to perform motion analysis of mechanisms involving various mechanical components such as linkages, cams, and gears.
2. An ability to analyze and balance dynamic forces in machines.
3. Knowledge of how to design mechanism synthesis that can function as required in machines.
4. Understanding of ethics and professional responsibilities in engineering design.

M E 328. Engineering Analysis II

3 Credits (3)

Advanced engineering analysis with emphasis on engineering applications. Topics include systems of ordinary differential equations, Fourier analysis, partial differential equations, and functions of complex variable with focus on analytical methods.

Prerequisite: C- or better grades in M E 228.

Learning Outcomes

1. An ability to use basic properties of Laplace Transforms and apply to initial value problems.
2. Understanding of basics of phase space analysis for ordinary differential equations.
3. An ability to obtain Fourier Series representations of functions.
4. An ability to apply the method of separation of variables to solve linear homogeneous partial differential equations.
5. An ability to perform basic operations involving complex numbers.

M E 331. Intermediate Strength of Materials

3 Credits (3)

Covers stress and strain, theories of failure, curved flexural members, flat plates, pressure vessels, buckling, and composites. May be repeated up to 3 credits.

Prerequisite: C E 301 and M E 328.

Learning Outcomes

1. An ability to perform stress and strain analysis for bending of straight and curved beams, torsion of prismatic bars, and complex loading cases.
2. Application of governing equations of elasticity.
3. Use of common failure theories for failure prediction of ductile metals.

M E 332. Vibrations

3 Credits (3)

Vibration of single and n-degree of freedom systems considering free, forced, and damped motion. Lagrange s equations. Dynamic stability. Controls. Matrix iteration. May be repeated up to 3 credits.

Prerequisite: M E 328, ENGR 234, and M E 261.

Learning Outcomes

1. Ability to analyze free and forced vibrations of a single degree-of-freedom (DOF).
2. Ability to analyze free and forced vibrations of multi-DOF systems.
3. Ability to perform modal analysis for engineering structures to understand mechanical vibrations in terms of normal modes.

M E 333. Intermediate Dynamics

3 Credits (3)

Three dimensional kinematics and kinetics, orbal motion, Lagrange s equations, dynamic stability, and controls. May be repeated up to 3 credits.

Prerequisite: M E 328 and ENGR 234.

Learning Outcomes

1. An ability to derive the equations of motion for particles and rigid bodies based on analytical dynamics theories.
2. Analysis of linear / nonlinear dynamical systems with their equations of motion by finding the associated solutions and by performing simulations.
3. Application of dynamics theory to engineering applications in vehicle dynamics, gyroscopes, aircraft / spacecraft dynamics, and celestial mechanics.

M E 338. Fluid Mechanics

3 Credits (3)

Properties of fluids. Fluid statics and fluid dynamics. Applications of the conservation equations continuity, energy, and momentum to fluid systems.

Prerequisite: C- or better grade in ENGR 234 and in (M E 228 or MATH 3160).

Learning Outcomes

1. Ability to apply knowledge of mathematics, science, and engineering.
2. Ability to design and conduct experiments, as well as to analyze and interpret data.
3. Ability to design a system, component or process to meet desired needs within realistic constraints.
4. Ability to identify, formulate, and solve engineering problems.

M E 340. Applied Thermodynamics

3 Credits (3)

Thermodynamic cycles, availability, Maxwell relations, Gibbs and Helmholtz functions, mixtures, psychrometrics, implications for engineering materials.

Prerequisite: C- or better grades in M E 240.

Learning Outcomes

1. A thorough understanding of the transfer of work, heat, and energy by various thermodynamic processes in open and closed systems, and which processes and allowed and not allowed, and spontaneous and non-spontaneous.
2. An applied knowledge predicated on the four laws of thermodynamics and application to work producing and consuming devices where efficiency must optimized by selection of appropriate fuels, energy sources, working fluids, and design considerations for engineering devices such as nozzles, turbines, condensers, diffusers, regenerators, intercoolers, and feedwater systems.
3. The skills necessary to be successful in their professional duties in employment or further educational pursuits related to the automotive, commercial aviation, space, and energy sectors, and to be able to clearly identify, communicate, formulate, analyze, and deduce solutions to technical problems in the field of thermodynamics with peers in engineering and allied fields.

M E 341. Heat Transfer

3 Credits (3)

Heat balance equation. Fundamentals of conduction, convection, and radiation. Design of heat transfer systems.

Prerequisite: C- or better grades in M E 240 and in (M E 338 or A E 339).

Learning Outcomes

1. A thorough understanding of the three modes of heat transfer (conduction, convection, and radiation).
2. Basic knowledge required to apply heat transfer principles to practical and contemporary engineering problems (primarily in thermal management of electronics such as in data centers and smart phones, buildings, automobiles, and energy and power generation systems).
3. The skills necessary to be successful in their professional duties in employment or further educational pursuits and be able to clearly identify, communicate, formulate, analyze, and deduce solutions to technical problems in the field of heat transfer.

M E 345. Experimental Methods I

3 Credits (2+3P)

Emphasis on experimental techniques, basic instrumentation, data acquisition and analysis, and written presentation of results. Includes experiments in dynamics and deformable body mechanics. May be repeated up to 3 credits.

Prerequisite: C- or better grades in (M E 228 or MATH 3160), in (ENGR 140 or PHYS 2140), and in ENGR 234.

Prerequisite/Corequisite: C E 301.

Learning Outcomes

1. A thorough understanding of how to work in a laboratory with a focus on safety (use of PPE, waste disposal, and knowledge of common laboratory hazards and their mitigation).
2. An ability to implement good laboratory practice (GLP) to ensure proper documentation of results, accuracy of results, and adherence to written procedures to allow replication of results.
3. Hands-on laboratory skills using lab equipment (sensors, data-recording software, scales, calipers, micrometers, strain gages, tensile testing machines/load cells, vibration generators, oscilloscopes, function generators, power supplies, Wheatstone bridges, physical reference standards, and specimen preparation equipment) along with various tools and equipment accessories.
4. An ability to corroborate experimental findings with theoretical predictions.
5. An ability to apply the scientific method to experiments, including hypothesis, deduction, extrapolation (trend analysis), and inference.
6. Experience reducing data including error analysis, basic statistics, basic plotting and graphing, outlier identification, propagation of errors, SI/English units, and appropriate use of implied precision and significant figures.
7. Technical writing skills as a team and individual, effective team presentation skills, and delivering peer review.

M E 349. MAE Career Seminar

1 Credit (1)

Seminar course covering topics relevant to mechanical and aerospace engineering juniors (job placement, interviewing techniques, resume preparation, etc.). May be repeated up to 3 credits. Restricted to: M E and A E majors.

Prerequisite: Sophomore Standing.

Learning Outcomes

1. Students will learn how to prepare for their future career by learning job placement, resume preparation, interview skills, and others.

M E 400. Undergraduate Research

1-3 Credits

Performed with the direction of a department faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: consent of faculty member.

M E 401. Building Energy and Environment

3 Credits (3)

Building energy and greenhouse gas emissions; energy usage distribution in residential and commercial buildings, HVAC, other end use entities (lighting, water heating, refrigeration, and computers and electronics), energy efficiency in buildings, indoor air quality, air filtration and purification, economics.

Prerequisite: C- or better grades in M E 340 and M E 341.

Learning Outcomes

1. Understanding of the energy usage in buildings and their impact on the environment.
2. Calculation of the energy loads for various end use entities and understand their role in building energy.
3. Analysis of HVAC systems and heat transfer and apply the knowledge for realizing energy efficiency in buildings.
4. An ability to write a technical term paper discussing the current and future trends on the topics of building energy and environmental impact and indoor air quality.

M E 405. Special Topics

3 Credits (3)

Topics of modern interest to be offered by the departmental staff. May be repeated up to 12 credits.

Prerequisite(s): Senior standing.

M E 425. Design of Machine Elements

3 Credits (3)

Design and analysis of machinery for load-bearing and power transmission by considering material failure modes such as yielding, fracture, and fatigue. Design and selection of machine elements including threaded fasteners, springs, rolling-element bearings, cams, gears and friction drives.

Prerequisite: C- or better grades in M E 326.

Learning Outcomes

1. An ability to incorporate analysis and design methods for designing and prototyping machine elements.

2. An ability to recognize the design process, to breakdown this complex process into a series of simple tasks, and to carry out those tasks to achieve the desired design.
3. Knowledges of how to apply the industrial specifications and requirements regarding the design of machine elements.
4. Implementation of these knowledge and experiences to real-world engineering projects with finite element method.

M E 445. Experimental Methods II
3 Credits (2+3P)
Emphasis on experimental techniques, instrumentation and data acquisition in fluid mechanics, heat transfer, and thermodynamics. Laboratory results will be presented in written and verbal formats. May be repeated up to 3 credits.
Prerequisite: C- or better grades in (M E 338 or A E 339), M E 340, M E 341, and M E 345.
Learning Outcomes
1. A thorough understanding of how to work in a laboratory with a focus on safety (use of PPE, waste disposal, and knowledge of common laboratory hazards and their mitigation).
2. An ability to implement good laboratory practice (GLP) to ensure proper documentation of results, accuracy of results, and adherence to written procedures to allow replication of results.
3. Hands-on laboratory skills using lab equipment (sensors, data-recording software, scales, calipers, micrometers, straingages, tensile testing machines/load cells, vibration generators, oscilloscopes, function generators, power supplies, Wheatstone bridges, physical reference standards, and specimen preparation equipment) along with various tools and equipment accessories.
4. An ability to corroborate experimental findings with theoretical predictions.
5. An ability to apply the scientific method to experiments, including hypothesis, deduction, extrapolation (trend analysis),and inference.
6. Experience reducing data including error analysis, basic statistics, basic plotting and graphing, outlier identification, propagation of errors, SI/English units, and appropriate use of implied precision and significant figures.
7. Technical writing skills as a team and individual, effective team presentation skills, and delivering peer review.

M E 452. Control System Design
3 Credits (3)
Introduction to the control of dynamical systems, with a focus on mechanical and aerospace systems, including basic systems theory, controllability / observability, feedback and stabilization, PID controls, root-locus plot, and Bode diagram. May be repeated up to 3 credits.
Prerequisite: M E 261, M E 328 and ENGR 234.
Learning Outcomes
1. Construction of a block diagram of control systems to find a transfer function for a dynamical system.
2. Analysis of control systems by utilizing various linear control theories such as root-locus design method, bode, and lead / lag compensation techniques.
3. Design and simulation of PID control systems for mechanical / aerospace engineering applications.
4. Derivation of state space representation of a dynamical systems.

M E 456. Experimental Modal Analysis
3 Credits (3)
Emphasis on hands-on techniques for structural vibration tests for practical applications. Interpretation of experimental results by means of advanced signal processing tools, basic system identification methodology, and reduced-order modeling procedures.
Prerequisite: M E 328 and M E 261 or consent of instructor.
Learning Outcomes
1. An ability to understand fundamentals of linear vibrations theory for discrete and continuous systems.
2. An ability to perform basic numerical and experimental modal analysis of structures.
3. An ability to utilize basic and advanced signal processing tools.
4. An ability to extract system parameters for a mathematical model from a physical model.

M E 457. Engineering Failure Analysis
3 Credits (3)
Introduction to failure theories and causes. Topics include general procedures for failure analysis, ductile and brittle modes of failure, elements of fracture mechanics, fractography, and failures in various engineering applications due to fatigue, wear, corrosion, design or processing defects.
Prerequisite: Grade of C- or better in C E 301 and CHME 361 or consent of instructor.
Learning Outcomes
1. An ability to systematically conduct failure analysis, identify cause(s) of failure, suggest remedial steps to prevent failures and/or improve performance for a variety of engineering applications involving metals, polymers, ceramics and composites.
2. Use of skills and knowledges in any industry and engineering applications such as in aerospace, mechanical, microelectronics, construction, chemical, automotive, energy, and medical areas.

M E 458. Properties and Mechanical Behavior of Materials
3 Credits (3)
Understanding the microstructure of engineering materials and their influence on mechanical behavior. Topics include Material Structure and Physical Properties, Thermodynamics and Kinetics of Materials, Mechanical Properties, Strengthening Mechanisms, Time and Temperature Dependent Behavior, Degradation, Fatigue, and Fracture.
Prerequisite: (Grade of C- or better in C E 301 and CHME 361) or consent of instructor.
Learning Outcomes
1. An ability to correlate mechanical behavior of materials with their microstructure, processing history and composition.
2. An ability to recognize impact of operating conditions, predict life span, and design materials to improve reliability and efficiency.
3. An ability to select appropriate materials for a given application from class of materials such as metals, polymers, ceramics and composites.

M E 460. Applied Finite Elements
3 Credits (3)
Introduction to the practical aspects of structural finite element modeling. Course focuses on providing a working knowledge of how to effectively incorporate finite element techniques into the design process.
Corequisite: M E 425 or consent of instructor.
Learning Outcomes
1. Use of direct stiffness and potential energy approaches to assemble global system of linear equations for static elastic and steady state heat transfer problems (bar, beam, plane stress / strain elements).

2. An ability to solve the global system of linear equations for unknown degrees of freedom (displacements or temperatures).
3. An ability to postprocess the solution to find stresses, strains, or temperature gradients.
4. An ability to solve two-dimensional and three-dimensional problems of elasticity and heat transfer using commercial general purpose finite element analysis software.

M E 481. Alternative and Renewable Energy
3 Credits (3)
Current and future energy needs of the United States and the world will be considered primarily from the standpoint of renewable energy sources such as solar, wind, ocean, and biomass. Technical, economic, and environmental aspects of each technology will be addressed.
Prerequisite: (M E 338 or A E 339) and M E 340 or consent of instructor.
Prerequisite/Corequisite: M E 341.
Learning Outcomes
1. Understanding of current and future energy needs of the United States and the whole world.
2. Understanding of the role of renewable and alternative energy sources such as solar, wind, ocean, and biomass.
3. An ability to conduct basic techno-economic analysis of various renewable and alternative energy technologies.

M E 483. Introduction to Combustion
3 Credits (3)
Introduction to combustion kinetics, combustion thermochemistry, flame dynamics, flame stability, and pollutant formation. Course coverage includes laminar and turbulent flames, premixed and diffusion flames, and detonations. Emphasis is placed on the role of chemical kinetics, heat transfer, mass transfer, and fluid dynamics on flame structure and flame stability. May be repeated up to 3 credits.
Prerequisite: M E 228 and M E 340 or consent of instructor.
Learning Outcomes
1. Understanding of reaction rates of chemical processes.
2. Derivation of simplified reactor models based on coupled chemical and thermal analysis.
3. Knowledge of conservation / transport equations for reacting flows.
4. Calculation of structure and propagation limits of laminar premixed combustion waves.
5. Analysis of structure and controlling processes in laminar diffusion flames, time and spatial scales in turbulent flames, and basic issues in turbulent combustion.

M E 486. Introduction to Robotics
3 Credits (3)
This course provides students with an introduction to the theories and methods for analysis, design, and control of robotic manipulators. This course is devoted to understanding the spatial descriptions and transformations, kinematics, and dynamics of these mechanisms and how to practically implement these concepts into actual robotic manipulators.
Prerequisite: M E 328 and ENGR 234.
Learning Outcomes
1. An ability to develop spatial description and transformations of rigid body motion and coordinate frames.
2. An ability to derive the kinematics and dynamics of robotic manipulators in forward and inverse forms.
3. An ability to plan motion and trajectories, program, and control these robotic platforms.
4. Application of the theoretical methods into industrial robots, and implementation of the knowledge and experiences to real-world engineering projects.

M E 487. Mechatronics
3 Credits (2+3P)
Introduction to the analysis and design of computer-controlled electromechanical systems, including data acquisition and conversion, force and motion sensors, actuators, mechanisms, feedback control, and robotic devices. Students required to work in teams to construct and test simple robotic systems.
Prerequisite: M E 345.
Learning Outcomes
1. An ability to define a mechatronic system and its primary elements.
2. An ability to exercise a computational model of the mechatronic system and evaluate the system response.
3. An ability to design, formulate and implement an appropriate closed-loop controller.
4. An ability to design and demonstrate a functional physical device that solve a practical problem while meets system requirements.
5. Knowledge of contemporary issues.

M E 502. Elasticity I
3 Credits (3)
Introduction to the theory of elastic media with emphasis on understanding the fundamental principles and solution methods used in the analysis of elastic solids and structures. Cartesian tensors are introduced for formulations of general deformations and states of stress. May be repeated up to 3 credits.
Learning Outcomes
1. An ability to understand the fundamental principles and solution methods used in the analysis of elastic solids and structures.
2. Use of cartesian tensors for formulations of general deformations and states of stress.

M E 503. Thermodynamics
3 Credits (3)
A comprehensive study of the first and second laws of thermodynamics, nonequilibrium processes, equations of state, and statistical thermodynamics.
Prerequisite: C- or better grade in M E 340 or consent of instructor.
Prerequisite/Corequisite: M E 570.
Learning Outcomes
1. Application of 1st law and 2nd law of thermodynamics to closed and open systems for analysis of thermodynamic cycles with and without phase change and for pure substances and mixtures as the working fluids.
2. Understanding of thermodynamic properties and their relationships, thermodynamics equilibrium and stability.
3. Understanding of the basics of statistical thermodynamics and its differences from classical thermodynamics.

M E 504. Continuum Mechanics
3 Credits (3)
Introduction to the fundamentals of the mechanics for continuous media. This covers the concepts and general principles common to all branches of mechanics to facilitate further study in various fields such as elasticity, plasticity, fluid, and continuum damage mechanics. Computational aspects of the theory are also discussed. May be repeated up to 3 credits.

Learning Outcomes

1. An ability to understand the fundamentals of the continuum mechanics, which covers the concepts and general principles common to all branches of mechanics to facilitate further study in various fields such as elasticity, plasticity, fluid, and continuum damage mechanics.

M E 509. Individualized Study
3 Credits (3)
Individualized study covering specialized topics in mechanical and aerospace engineering. Consent of instructor required.

M E 510. Special Topics
1-6 Credits
Topics in mechanical engineering. May be repeated for a maximum of 6 credits.
Prerequisite: consent of the department head.

M E 511. Dynamics
3 Credits (3)
An advanced study of the dynamical behavior of systems of particles and rigid bodies, with emphasis on the theoretical background of dynamics.
Prerequisite: ENGR 234 and M E 328.
Learning Outcomes

1. Knowledge of the techniques to describe the motion of mechanical systems.
2. Ability to derive the equations of motion of dynamical systems.
3. Understanding of the difference between several methodologies used to derive the governing equations of systems.
4. Ability to find and classify the dynamical responses of systems.

M E 512. Vibrations
3 Credits (3)
Free and forced vibrations for discrete and continuous systems with single or multiple degrees of freedom. Introduction to nonlinear and random vibration and solution techniques for such systems.
Prerequisite: M E 511 or consent of instructor.
Learning Outcomes

1. Ability to derive equations of motion of single- and multi-degree-of-freedom (DOF) systems.
2. Ability to analyze free and forced vibrations of single- and multi-DOF systems.
3. Ability to perform modal analysis of single- and multi-DOF systems.
4. Ability to derive equations of motion of continuous systems including beams, strings, and rods.
5. Ability to solve the governing equations of motion for several dynamical systems.

M E 517. Nonlinear Dynamics and Chaos
3 Credits (3)
Singular points, periodic solutions, stability, and local bifurcations for ODEs and maps; phase space methods, invariant manifolds, and Poincare maps; nonsmooth, periodic, time-delay, and Hamiltonian systems; perturbation, averaging, and harmonic balance methods; center manifold reduction and normal forms; strange attractors, Liapunov exponents, attractor dimension; dissipative and Hamiltonian chaos. May be repeated up to 3 credits.
Learning Outcomes

1. Ability to qualitatively and quantitatively understand and determine the dynamical response of nonlinear systems.
2. Understanding of various nonlinear behaviors and concepts.
3. Ability to use several perturbation techniques to solve the governing equations of motion.
4. Ability to characterize the response of a nonlinear dynamical system.

M E 518. Finite Element Analysis
3 Credits (3)
Introduction to finite element method. Topics include mathematical modeling, variational formulation, shape functions, truss, beam, solid, and shell elements. Includes static, dynamic, and nonlinear analysis.

M E 527. Linear Systems Theory
3 Credits (3)
Introduction to control of linear multi-input-multi-output (MIMO) systems. Topics include representation of system dynamics using the state-space model, linearization, internal and input-to-output stability, controllability, observability, optimal control, linear quadratic regulator, and observer.
Prerequisite: M E 452 or A E 452 or consent of instructor.
Learning Outcomes

1. Modeling of linear dynamical systems using state space methods.
2. Analysis of stability, controllability, and observability of linear systems.
3. Design of controllers and observers for linear systems using pole placement methods.

M E 530. Intermediate Fluid Mechanics
3 Credits (3)
Application of exact and empirical solutions to fundamental flow problems, including viscous and inviscid behavior. These applications establish a theoretical basis for the origin and physical role of common terms in the governing equations.
Prerequisite: M E 338 or A E 339 or consent of instructor.
Learning Outcomes

1. A basic knowledge of incompressible, viscous flows of Newtonian fluids, boundary layers and boundary layer behavior, vortex dynamics and 1D isentropic compressible flows, shocks and expansion waves.

M E 533. Numerical Methods for Fluid Mechanics and Heat Transfer
3 Credits (3)
Development of numerical techniques for the solution of ordinary and partial differential equations that arise in heat transfer and fluid mechanics; classification of equations, methods of solutions, examples.
Prerequisite: M E 530 or consent of instructor.
Learning Outcomes

1. An ability to understand fundamental aspects of solving differential equations using finite difference methods.
2. An ability to understand fundamental concepts such as stability, accuracy, consistency, systematic errors (phase/amplitude errors), artificial diffusion, etc.
3. An ability to implement and test algorithms for the solution of ordinary and partial differential equations.
4. An ability to develop ability to analyze numerical results and report results in a meaningful way.

M E 536. Hydrodynamic Stability and Turbulence
3 Credits (3)
Introduction to fundamentals of hydrodynamic stability, classical linear stability analysis of parallel shear flows and rotating flows, nonlinear stability, basic concepts in turbulence theory.
Prerequisite/Corequisite: M E 530.

Learning Outcomes

1. An ability to understand fundamentals of hydrodynamic stability.
2. An ability to apply classical linear / nonlinear stability analysis of parallel shear flows and rotating flows.
3. Understanding of basic concepts in turbulence theory.

M E 540. Intermediate Heat Transfer
3 Credits (3)

Fundamentals of conduction, convection, and radiation heat transfer. Emphasis on the application of combined heat transfer to the solution of problems not accessible at the undergraduate level.

Prerequisite: M E 341.

Prerequisite/Corequisite: M E 570.

Learning Outcomes

1. An ability to solve heat transfer problems involving conduction, convection, and radiation.
2. Use of algebra and differential and integral calculus to obtain solutions to heat transfer problems.
3. Understanding of the final solution for a heat transfer problem and predict its correctness using fundamental heat transfer principles.

M E 557. Engineering Failure Analysis
3 Credits (3)

Introduction to failure theories and causes. Topics include general procedures for failure analysis, ductile and brittle modes of failure, elements of fracture mechanics, fractography, and failures in various engineering applications due to fatigue, wear, corrosion, design or processing defects. May be repeated up to 3 credits.

M E 558. Properties and Mechanical Behavior of Materials
3 Credits (3)

Understanding the microstructure of engineering materials and their influence on mechanical behavior. Topics include Material Structure and Physical Properties, Thermodynamics and Kinetics of Materials, Mechanical Properties, Strengthening Mechanisms, Time and Temperature Dependent Behavior, Degradation, Fatigue, and Fracture. May be repeated up to 3 credits.

Prerequisite: CHME 361.

M E 570. Engineering Analysis I
3 Credits (3)

Introduction to engineering analysis with emphasis on engineering applications. Topics include linear algebra, linear ordinary differential equations, and linear partial differential equations with focus on analytical methods.

Prerequisite: M E 328 or PHYS 395 or equivalent.

Learning Outcomes

1. Proficient knowledge of Laplace Transforms and application to initial value problems.
2. Basic knowledge of phase space analysis for ODEs.
3. Proficient knowledge of Fourier Series representations of functions, and basic knowledge of Fourier Transforms.
4. Proficient knowledge of linear, homogeneous boundary value PDEs; basic knowledge of nonhomogeneous BVP, Poisson's equation and Green's Functions.
5. Proficient knowledge of elementary complex functions, basic knowledge of theory of analytic functions, contour integral theorems, Laurent Series and Residue Theorem.

M E 583. Introduction to Combustion
3 Credits (3)

Introduction to combustion kinetics, combustion thermochemistry, flame dynamics, flame stability, and pollutant formation. Course coverage includes laminar and turbulent flames, premixed and diffusion flames, and detonations. Emphasis is placed on the role of chemical kinetics, heat transfer, mass transfer, and fluid dynamics on flame structure and flame stability. May be repeated up to 3 credits.

Prerequisite: (M E 228 and M E 340) or consent of instructor.

Learning Outcomes

1. Understanding of reaction rates of chemical processes.
2. Derivation of simplified reactor models based on coupled chemical and thermal analysis.
3. Knowledge of conservation / transport equations for reacting flows.
4. Calculation of structure and propagation limits of laminar premixed combustion waves.
5. Analysis of structure and controlling processes in laminar diffusion flames, time and spatial scales in turbulent flames, and basic issues in turbulent combustion.

M E 586. Introduction to Robotics
3 Credits (3)

This course provides students with an introduction to the theories and methods for analysis, design, and control of robotic manipulators. This course is devoted to understanding the spatial descriptions and transformations, kinematics, and dynamics of these mechanisms and how to practically implement these concepts into actual robotic manipulators.

Prerequisite: M E 328 and ENGR 234 or consent of instructor.

Learning Outcomes

1. An ability to develop spatial description and transformations of rigid body motion and coordinate frames.
2. An ability to derive the kinematics and dynamics of robotic manipulators in forward and inverse forms.
3. An ability to plan motion and trajectories, program, and control these robotic platforms.
4. Application of the theoretical methods into industrial robots, and implementation of the knowledge and experiences to real-world engineering projects.

M E 587. Mechatronics
3 Credits (2+3P)

Introduction to the analysis and design of computer-controlled electromechanical systems, including data acquisition and conversion, force and motion sensors, actuators, mechanisms, feedback control, and robotic devices. Students required to work in teams to construct and test simple robotic systems. Crosslisted with: M E 487.

Prerequisite: M E 345.

Learning Outcomes

1. An ability to define a mechatronic system and its primary elements.
2. An ability to exercise a computational model of the mechatronic system and evaluate the system response.
3. An ability to design, formulate and implement an appropriate closed-loop controller.
4. An ability to design and demonstrate a functional physical device that solve a practical problem while meets system requirements.
5. Knowledge of contemporary issues.

M E 598. Special Research Programs
1-3 Credits

Individual investigations, either analytical or experimental. May be repeated for a maximum of 6 credits.

M E 599. Master's Thesis
15 Credits
Thesis.

M E 600. Doctoral Research
1-15 Credits
This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination.

M E 698. Special Research Programs
1-3 Credits
May be repeated for a maximum of 6 credits.

M E 700. Doctoral Dissertation
15 Credits
Dissertation.

MAT-AUTOMATION & MANUFACTURING

MAT 101. General Industry Safety
1 Credit (1)
Overview of general industry safety for entry-level individuals. Students will have the opportunity to earn a 10-hour general industry OSHA card. Restricted to Community Colleges campuses only.
Learning Outcomes
1. Discuss the general history of OSHA.
2. Discuss the general history of the U.S. safety movement.
3. Utilize the OSHA web site as a basic safety resource.
4. Recognize industry-related hazards.
5. Identify industry-related hazards.
6. Avoid industry-related hazards.
7. Follow proper basic first aid procedures in an emergency.
8. Avoid exposure to blood-borne pathogens in an emergency situation.
9. Interpret hazard communication. 1
10. Recognize proper lifting techniques. 1
11. Recognize personal protective equipment.

MAT 102. Print Reading for Industry
3 Credits (2+2P)
Reading, interpretation, and revisions of industrial technical drawings common to manufacturing, Aerospace, machine parts, electrical, hydraulic, and pneumatic drawings. Interpretation of engineering drawings and related shop calculations.
Learning Outcomes
1. Recognize fundamentals of shape descriptions.
2. Recognize fundamentals of size description and annotations.
3. Recognize industrial drawing types.
4. Recognize Industrial drawing types.
5. Understand basic geometric dimensioning and tolerances practices that applied to working drawings.
6. Identify standard threads and fasteners callouts and specifications.

MAT 105. Introduction to Manufacturing
3 Credits (2+2P)
Introduction to manufacturing evolution from basic assembly process to modern automated processes. Covers history, employability, soft skills, quality measurements, teamwork concept, production requirements, and considerations in plan layout and design. Minimum math proficiency of CCDM 114 required or math placement into MATH 1215 or higher. Restricted to: Community Colleges only.
Learning Outcomes
1. Classify Hazardous Materials.
2. Perform an Electrical Lockout/Tagout.
3. Locate and Interpret a Safety Data Sheet.
4. Interpret a Hazardous Material Identification Label.

MAT 106. Applied 3D Manufacturing Practices
3 Credits (2+2P)
Introduction to part production and manufacturing utilizing 3D printing processes. Introduction to creating 3D solid models utilizing CAD software and the creation of 3d printed parts utilizing filament or resin style 3D printers. Students will learn how to make selected parts starting from drawings/prints to completed projects. Basic elements of quality control will be introduced.
Learning Outcomes
1. Produce 3D solid models in CAD Software.
2. Read basic 2D technical drawings.
3. Manage Electronic files.
4. Utilize slicing software to prepare 3D solid models for 3d printing.
5. Apply industry standard design practices to produce desired 3D printed parts.
6. Produce 3D printed parts.
7. Apply elements of quality control in the 3D printing process.

MAT 110. Machine Operation and Safety
3 Credits (2+2P)
Introduction to the operation and safety aspects of various types of machinery and equipment, including both mechanical and electrical machines, Rigid Tubing, and Flexible Lines. Maintenance and safety operation of industrial equipment will also be covered. Restricted to: Community Colleges only. Crosslisted with: AERT 115
Learning Outcomes
1. Identify and analyze potential hazards associated with the operation of machinery and equipment, and apply appropriate safety measures to mitigate risks.
2. Demonstrate proficiency in implementing safety protocols and procedures when operating machinery and equipment, adhering to industry standards and regulations.
3. Apply critical thinking and problem-solving skills to troubleshoot issues related to the operation and safety of machinery and equipment, fostering a proactive approach to maintenance and risk management.
4. Gain practical skills in the maintenance and upkeep of industrial equipment, ensuring optimal performance, reliability, and safety.
5. Foster a safety-oriented mindset by recognizing the importance of personal protective equipment (PPE), safe work practices, and the responsibility to create a secure working environment for oneself and others.
6. Gain a deep understanding of file management principles, including folder structures, naming conventions, and version control, to ensure easy accessibility and retrieval of files.

MAT 130. Applied Industrial Electricity I
4 Credits (3+2P)
Electrical safety, AC and DC circuits, use and care of common measuring instrumentation, schematic and wiring diagrams, electromagnetism, National Electric Code branch circuits. Restricted to: Community Colleges only.
Prerequisite(s): MATH 1215 or ELT 120 or OETS 118.

MAT 135. Applied Industrial Electricity II
4 Credits (3+2P)
Relationship between motor power, speed, and torque, basic application of relay circuits, motor control circuits, inductance and capacitance factors, transformers, solid state devices circuits and applications. Restricted to: Community Colleges only.
Prerequisite(s): MAT 130.

MAT 221. Cooperative Experience I
1-6 Credits
Supervised cooperative work program. Student is employed in an approved occupation and rated by employer and instructor. Student meets in a weekly class. Graded S/U.
Prerequisite: consent of instructor.

MAT 234. Industrial Electricity Maintenance
3 Credits (2+2P)
Introduction into electrical systems, theory and uses for the different types of motors used in the industry and related industrial safety practices. DC, AC stepper and servo motors, motor speed and torque, motor performance, and efficiency, motor control fundamentals using variable frequency drives, vector controls, servo and stepper drives. Restricted to: Community Colleges only.

MAT 265. Special Topics
1-6 Credits
Course subtitled in the Schedule of Classes. May be repeated up to 12 credits.
Learning Outcomes
1. Learning goals will vary with the special topic selected for the course.

MATH-MATHEMATICS

A student may not receive credit for a lower-division mathematics course if it serves as a prerequisite to a lower-division math course that the student had previously passed with a grade of C- or better.

Students without adequate placement to enroll in MATH 1134, MATH 1215 or MATH 1130G can gain admission to the course by earning a C- or better in CCDM 114 N at an NMSU Community College campus, or in ARSC 1120.

Students wishing to enroll in MATH 1220G, MATH 1430G, MATH 1511G, MATH 1521G, or MATH 1350G must satisfy one of the following:

1. have passed the stated prerequisite course or an equivalent transfer course with a C- or better
2. have placed into the course with an adequate ACT Math score or through the Mathematics Placement Examination (MPE), the results of which will be made available to the student's advisor. The MPE is given daily in Walden Hall when school is in session and during new student orientation programs.

MATH 1130G. Survey of Mathematics
3 Credits (3)
This course will develop students' ability to work with and interpret numerical data, to apply logical and symbolic analysis to a variety of problems, and/or to model phenomena with mathematical or logical reasoning. Topics include financial mathematics used in everyday life situations, statistics, and optional topics from a wide array of authentic contexts.
Prerequisite: Adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in CCDM 113 N or CCDM 114 N.
Learning Outcomes
1. Construct and analyze graphs and/or data sets: Gather and organize information; Understand the purpose and use of various graphical representations such as tables, line graphs, tilings, networks, bar graphs, etc.; Interpret results through graphs, lists, tables, sequences, etc.; Draw conclusions from data or various graphical representations.
2. Use and solve various kinds of equations: Understand the purpose of and use appropriate formulas within a mathematical application; Solve equations within a mathematical application; Check answers to problems and determine the reasonableness of results.
3. Understand and write mathematical explanations using appropriate definitions and symbols: Translate mathematical information into symbolic form; Define mathematical concepts in the student's own words; Use basic mathematical skills to solve problems.
4. Demonstrate problem solving skills within the context of mathematical applications; Show an understanding of a mathematical application both orally and in writing; Choose an effective strategy to solve a problem; Gather and organize relevant information for a given application.

MATH 1134. Fundamentals of Elementary Mathematics I
3 Credits (3)
Numbers and the four operations of arithmetic. Understanding and comparing multiple representations of numbers and operations, in particular how these representations build from whole numbers to integers to fractions and decimals. Applying properties of numbers and operations in contextual situations. Reasoning, communicating, and problem solving with numbers and operations. Applications to ratio, and connections with algebra. Taught primarily through student activities and investigations. Restricted to: EDUC,EPAR,E ED,ECED majors.
Prerequisite: C- or better in ENGL 1110G; adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1215.
Learning Outcomes
1. As future elementary teachers you will be teaching mathematics to children.
2. In order to teach a subject well you need not only to know the material that you will teach, but you need to know more than what you will teach, and know it well,in order to be able to answer questions, understand student reasoning, give alternate explanations when your students do not understand something, and be able to adjust to changes in the mathematical curriculum.
3. Furthermore, even if you hope to teach a given grade, you should be prepared to teach a variety of grades since what a person ends up teaching is often not what they planned to do.
4. We will explore ideas of arithmetic in a way to help you improve your mathematical ability, gain confidence in your ability, introduce to you different ideas and models, and to see a variety of mathematical activities that are appropriate for people of all ages.
5. Everything we study will be done with the aim of developing your ability to relate to the mathematics of elementary school and to help children develop mathematical understanding.

MATH 1215. Intermediate Algebra
3 Credits (3)
A study of linear and quadratic functions, and an introduction to polynomial, absolute value, rational, radical, exponential, and logarithmic functions. A development of strategies for solving single-variable equations and contextual problems.

Prerequisite: Adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in CCDM 113 N or CCDM 114 N.

Learning Outcomes

1. Students will build on their knowledge of linear and quadratic functions and will begin to build an understanding of absolute value, polynomial, rational, power, radical, exponential and logarithmic functions in the following contexts: Demonstrate appropriate use of basic function language and notation; Convert between equivalent forms of algebraic expressions; Solve single-variable equations of the types listed above; Interpret and communicate algebraic solutions graphically and numerically; Demonstrate contextual problem-solving skills that include setting up and solving problems, and interpreting solutions in context; Apply appropriate problem solving methods from among algebraic, graphical, and numerical.

MATH 1217. General Supplemental Instruction I

1 Credit (2P)

Collaborative workshop for students enrolled in Intermediate Algebra.

Corequisite: MATH 1215.

Learning Outcomes

1. Intermediate Algebra Workshop provides time for students to work on problems from Intermediate Algebra under the guidance of their instructor.

MATH 1220G. College Algebra

3 Credits (3)

The study of equations, functions and graphs, reviewing linear and quadratic functions, and concentrating on polynomial, rational, exponential and logarithmic functions. Emphasizes algebraic problem solving skills and graphical representation of functions.

Prerequisite: Adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1215.

Learning Outcomes

1. Use function notation; perform function arithmetic, including composition; find inverse functions.
2. Identify functions and their transformations given in algebraic, graphical, numerical, and verbal representations, and explain the connections between these representations.
3. Graph and interpret key feature of functions, e.g., intercepts, leading term, end behavior, asymptotes.
4. Solve equations algebraically to answer questions about graphs, and use graphs to estimate solutions to equations.
5. Solve contextual problems by identifying the appropriate type of function given the context and creating a formula based on the information given.
6. Communicate mathematical information using proper notation and verbal explanations.

MATH 1221. General Supplemental Instruction II

1 Credit (1+2P)

Collaborative workshop for students enrolled in College Algebra.

Corequisite: MATH 1220G.

Learning Outcomes

1. College Algebra Workshop provides time for students to work on problems from College Algebra under the guidance of their instructor.

MATH 1250G. Trigonometry & Pre-Calculus

4 Credits (3+2P)

Trigonometry & Pre-Calculus includes the study of functions in general with emphasis on the elementary functions: algebraic, exponential, logarithmic, trigonometric and inverse trigonometric functions. Topics include rates of change, limits, systems of equations, conic sections, sequences and series, trigonometric equations and identities, complex number, vectors, and applications.

Prerequisite: Adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1220G.

Learning Outcomes

1. (Trigonometry) Students will be able to define and evaluate the trigonometric functions as functions of angle in both degree and radian measure using the definitions in terms of x, y, and r; as the ratio of sides of a right triangle; using the unit circle; using reference angles, commonly used (0 o, 30 o, 45 o, 60 o, 90o) angles and using a calculator.
2. (Trigonometry) Students will be able to solve right triangles. They will be able to draw a sketch in an applied problem when necessary.
3. (Trigonometry) Students will be able to solve non-right triangles using the law of sines and the law of cosines.
4. (Trigonometry) Students will be able to prove trigonometric identities and apply addition and subtraction, doubleangle, half-angle and power reduction formulas.
5. (Trigonometry) Students will be able to graph the six trigonometric functions, their transformations and their inverses.
6. (Trigonometry) Students will be able to use algebraic methods, including the use of identities and inverses, to solve trigonometric equations and demonstrate connections to graphical and numerical representations of the solutions.
7. (Trigonometry) Students will be able to add and subtract vectors in two dimensions. They will be able to use the dot product to project one vector onto another and to determine the angle between two vectors. They will be able to solve a variety of word problems using vectors.
8. (Trigonometry) Students will be able to work with polar coordinates; this includes graphing in polar coordinates and transforming an equation with polar coordinates into one with rectangular coordinates, and vice versa.
9. (Trigonometry) Students will be to work with the trigonometric form of complex numbers, including using De Moivre's formula. 1
10. (Pre-Calculus) Functions: Reinforce recognizing a function from its graph and from its algebraic expression; Reinforce identification of a one-to-one function graphically and from its algebraic expression; Reinforce identification of inverse functions graphically and algebraically; Reinforce combining functions arithmetically and compositionally; Be able to calculate the average rate of change of a function using the difference quotient and depict it graphically; Be able to find a limiting value of a function and be able to identify and use the notation that describes this. 1
11. (Pre-Calculus) Graphing: Reinforce using key characteristics of functions to graph them; Be able to graph conic sections from their key characteristics such as foci, eccentricity and asymptotes; Be able to identify all functions mentioned from their graphs, describing their key aspects. 1
12. (Pre-Calculus) Solving: Exponential/Logarithmic equations using the rules of exponents and logarithms; Systems of linear equations by elimination; Non-linear systems algebraically and graphically. 1
13. (Pre-Calculus) Applications: Modeling with functions with an emphasis on exponential and logarithmic functions, growth and decay. 1

14. (Pre-Calculus) Sequences and series: Understand the concept and notation of a sequence; Understand the concept and notation of a series; Be able to find limits of basic sequences; Be able to find sums of basic series.

MATH 1350G. Introduction to Statistics
3 Credits (3)
This course discusses the fundamentals of descriptive and inferential statistics. Students will gain introductions to topics such as descriptive statistics, probability and basic probability models used in statistics, sampling and statistical inference, and techniques for the visual presentation of numerical data. These concepts will be illustrated by examples from a variety of fields.
Prerequisite: Adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1215 or higher.
Learning Outcomes

1. Explain the general concepts of statistics: Explain and evaluate statistics used in the real world (from a news article, research project, etc.); Use statistical vocabulary appropriately; Distinguish between descriptive and inferential statistics; Distinguish between qualitative and quantitative data; Distinguish between populations and samples, and parameters and statistics; Give examples of independent and dependent variables.
2. Presentation and description of data: Present data graphically using histograms, frequency curves and other statistical graphs; Interpret graphs of data, including histograms and shapes of distributions.
3. Summarize data using measures of central tendency and variation: Calculate and interpret the mean, median, and mode to describe data; Calculate and interpret range, variance, and standard deviation to describe data.
4. Present the concepts of probability: Interpret basic probabilities; Calculate probabilities using compound probability rules and the binomial distribution; Calculate probabilities using the standard normal distribution and relate them to areas under the curve; Determine if the binomial distribution can be approximated with the normal distribution; Describe the relationship between the sampling distribution and the population distribution; Use the central limit theorem to approximate the probability distribution and calculate probabilities.
5. Compute point and interval estimates: Determine the confidence interval for a parameter; Interpret the confidence level and margin of error; Determine whether a statistical technique is appropriate under stated conditions.
6. Perform hypothesis tests: Determine whether a statistical test is appropriate under stated conditions; Identify null and alternative hypothesis; Perform and interpret statistical tests (e.g. z-test, t-test, one-tailed and two-tailed, one-sample, two-sample) and determine whether data is statistically significant; State the conclusion of a hypothesis test; Interpret a p-value as compared to a significance level; Explain why a test can lead us to reject a null hypothesis, not accept one; Distinguish between Type I and Type II errors.
7. Analyze data using regression and correlation: Explain the difference between correlation and causation; Construct and interpret scatter plots; Calculate and interpret the linear correlation coefficient; Determine and use the equation of a least-squares regression line between two variables to make predictions; Interpret the meaning of the coefficient of determination.
8. Optional topics: Inter-quartile range, box-plots, stem-and-leaf plots; Combinations and permutations; The Poisson distribution; Statistical power; Chi-square; Analysis of variance.

MATH 1430G. Applications of Calculus I
3 Credits (2+2P)
An algebraic and graphical study of derivatives and integrals, with an emphasis on applications to business, social science, economics and the sciences.
Prerequisite: Adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1220G or higher.
Learning Outcomes

1. Find limits algebraically and graphically, and use limits to analyze continuity.
2. Find the derivative of a function by applying appropriate techniques (limit of the difference quotient, general derivative rules, product rule, quotient rule, chain rule, and higher order derivatives).
3. Perform implicit differentiation. Use implicit differentiation to solve related rate application problems.
4. Use the derivative to describe the rate of change and slope of a curve in general and at particular points. Compare and contrast average rates of change to instantaneous rates of change.
5. Find the maxima, minima, points of inflections, and determine concavity of a function by applying the first and second derivatives. Use these results to sketch graphs of functions and to solve optimization problems in context.
6. Find the antiderivative and indefinite integral functions to include integration by substitution. Apply the Fundamental Theorem of Calculus in computing definite integrals of functions.
7. Approximate the area under the curve using Riemann sums.
8. Use the integral to determine the area under a curve and to find the accumulated value of a function in context.
9. Solve contextual problems by identifying the appropriate type of function given the context, creating a formula based on the information given, applying knowledge of algebra and calculus, and interpreting the results in context. 1
10. Communicate mathematical information using proper notation and verbal explanations.

MATH 1435. Applications of Calculus I
3 Credits (3)
Intuitive differential calculus with applications to engineering.
Prerequisite(s): C- or better in MATH 1250G.
Learning Outcomes

1. Find limits algebraically and graphically, and use limits to analyze continuity.
2. Find the derivative of a function by applying appropriate techniques (limit of the difference quotient, general derivative rules, product rule, quotient rule, chain rule, and higher order derivatives).
3. Learn derivative rules for polynomial, exponential, logarithmic, trigonometric and inverse trigonometric functions.
4. Perform implicit differentiation. Use implicit differentiation to solve related rate application problems.
5. Find the maxima, minima, points of inflections, and determine concavity of a function by applying the first and second derivatives. Use these results to sketch graphs of functions and to solve optimization problems in context.
6. Find partial derivatives and find maxima, minima in three dimensions.

7. Find the linear approximation of a function.
8. Find Maclaurin and Taylor series.
9. Find limits via L'Hospital's rule. 1
10. Communicate mathematical information using proper notation and verbal explanations.

MATH 1440. Applications of Calculus II
3 Credits (3)
Topics in this second course of Applications of Calculus include functions of several variables, techniques of integration, an introduction to basic differential equations, and other applications.
Prerequisites: C or better in MATH 1435 or in MATH 1521G, or in MATH 1521H.
Learning Outcomes
1. Find definite and indefinite integrals using integration by parts, integral tables, and numerical integration.
2. Analyze multivariable functions using partial derivatives and double integrals, and apply these techniques to applications such as optimization, least squares, and volumes.
3. Solve differential equations graphically, numerically, and algebraically using separation of variables, and apply differential equations in context.
4. Apply differentiation and integration to other areas, for example to Taylor polynomials and Taylor series, probability, trigonometric functions, etc.

MATH 1511G. Calculus and Analytic Geometry I
4 Credits (4)
Limits and continuity, theory and computation of derivatives, applications of derivatives, extreme values, critical points, derivative tests, L'Hopital's Rule.
Prerequisite: Adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1250G.
Learning Outcomes
1. The goals are to present the concepts of calculus, stressing techniques, applications, and problem solving, and emphasizing numerical aspects such as approximations and order of magnitude.
2. Overall, the goals are to illustrate the power of calculus as a tool for modeling situations arising in physics, science, engineering and other fields.
3. In fulfillment of these goals, this and later courses will stress topics such as polynomial approximation, setting up integrals, as well as the use of appropriate technology.

MATH 1521G. Calculus and Analytic Geometry II
4 Credits (4)
Riemann sums, the definite integral, antiderivatives, fundamental theorems, techniques of integration, applications of integrals, improper integrals, Taylor polynomials, sequences and series, power series and Taylor series.
Prerequisite: C- or better in MATH 1511G.
Learning Outcomes
1. Recognize the interplay between Riemann sums and definite integrals.
2. Use the Fundamental Theorem of Calculus to compute definite and indefinite integrals.
3. Demonstrate an understand of the relationship between the derivative and the definite integral.
4. Evaluate integrals numerically using standard rules (midpoint, trapezoid, Simpson's).
5. Evaluate integrals analytically using standard methods (substitution, integration by parts, trigonometric substitution and identities, inverse functions and partial fractions.
6. Use integration to solve problems in geometry, physics, science, engineering and other fields.
7. Use appropriate methods such as L'Hopital's Rule to evaluate improper integrals.
8. Approximate functions using Taylor polynomials.
9. Apply standard tests to determine convergence or divergence of sequences and series. 1
10. Find a power series representation for a function and determine where it converges. 1
11. Identify and evaluate first order differential equations.

MATH 1511H. Calculus and Analytic Geometry I Honors
4 Credits (4)
Limits and continuity, theory and computation of derivatives, applications of derivatives, extreme values, critical points, derivative tests, L'Hopital's Rule. This is an Honors version of MATH 1511G. It is taught with MATH 1511G with differentiated assignments.
Prerequisite: Adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1250G or higher.
Learning Outcomes
1. The goals are to present the concepts of calculus, stressing techniques, applications, and problem solving, and emphasizing numerical aspects such as approximations and order of magnitude.
2. Overall, the goals are to illustrate the power of calculus as a tool for modeling situations arising in physics, science, engineering and other fields.
3. In fulfillment of these goals, this and later courses will stress topics such as polynomial approximation, setting up integrals, as well as the use of appropriate technology.
4. Gain a deeper understanding of the mathematics behind Limits and Derivatives and be able to use mathematical ideas (such as the Intermediate Value Theorem, the Mean Value Theorem, and the Extreme Value Theorem) in applied contexts.

MATH 1521H. Calculus and Analytic Geometry II Honors
4 Credits (4)
A more advanced treatment of the material of MATH 1521G with additional topics. Consent of Instructor required. Restricted to Las Cruces campus only.
Learning Outcomes
1. Recognize the interplay between Riemann sums and definite integrals.
2. Use the Fundamental Theorem of Calculus to compute definite and indefinite integrals.
3. Demonstrate an understand of the relationship between the derivative and the definite integral.
4. Evaluate integrals numerically using standard rules (midpoint, trapezoid, Simpson's).
5. Evaluate integrals analytically using standard methods (substitution, integration by parts, trigonometric substitution and identities, inverse functions and partial fractions.
6. Use integration to solve problems in geometry, physics, science, engineering and other fields.

7. Use appropriate methods such as L'Hopital's Rule to evaluate improper integrals.
8. Approximate functions using Taylor polynomials.
9. Apply standard tests to determine convergence or divergence of sequences and series. 1
10. Find a power series representation for a function and determine where it converges. 1
11. Identify and evaluate first order differential equations.

MATH 1531. Introduction to Higher Mathematics
3 Credits (3)
Logic; sets, relations, and functions; introduction to mathematical proofs.
Prerequisite(s): C- or better in MATH 1521G or MATH 1521H.
Learning Outcomes
1. The primary objective of this course is to serve as a bridge between the calculus courses you have taken, where the focus is on computations and solving problems, to more abstract mathematics courses.
2. In particular, we will discuss logical reasoning, definitions, proofs, and certain basic building blocks such as sets, functions, and relations.
3. By the end of the course, you should be able to understand and construct well-written proofs of basic mathematical arguments involving simple properties of the real numbers, integers, sets, functions, and relations using universal and existential quantifiers, absolute values and inequalities, modular arithmetic, and proof by induction.

MATH 1531H. Introduction to Higher Mathematics Honors
3 Credits (3)
Logic; sets, relations, and functions; introduction to mathematical proofs. A more advanced treatment of the material of MATH 1531 with additional topics and/or assignments. Consent of Instructor required. Restricted to Las Cruces campus only.
Prerequisite: C- or better in MATH 1521G or MATH 1521H.
Learning Outcomes
1. The primary objective of this course is to serve as a bridge between the calculus courses you have taken, where the focus is on computations and solving problems, to more abstract mathematics courses.
2. In particular, we will discuss logical reasoning, definitions, proofs, and certain basic building blocks such as sets, functions, and relations.
3. By the end of the course, you should be able to understand and construct well-written proofs of basic mathematical arguments involving simple properties of the real numbers, integers, sets, functions, and relations using universal and existential quantifiers, absolute values and inequalities, modular arithmetic, and proof by induction.
4. Since this is an honors course, you should be able to understand higher-level properties of the mathematical objects and ideas arising in the class. You should also be able to write, edit, revise, and ultimately construct well-written proofs and mathematical arguments.

MATH 1996. Topics in Mathematics
1-3 Credits
Topics to be announced in the Schedule of Classes. Maximum of 3 credits per semester. Total credit not to exceed 6 credits. Community Colleges only.
Prerequisite: consent of instructor.
Learning Outcomes
1. Varies

MATH 2134G. Fundamentals of Elementary Math II
3 Credits (3)
Geometry and measurement. Multiple approaches to solving problems and understanding concepts in geometry. Analyzing and constructing two- and three-dimensional shapes. Measurable attributes, including angle, length, area, and volume. Understanding and applying units and unit conversions. Transformations, congruence, and symmetry. Scale factor and similarity. Coordinate geometry and connections with algebra. Reasoning and communicating about geometric concepts. Taught primarily through student activities and investigations.
Prerequisite: C- or better in MATH 1134.
Learning Outcomes
1. The primary objectives are mathematical: to understand some of the basic concepts of geometry, and measurement with an appropriate level of rigor; to appreciate the historical, cultural and educational contributions and potential applications in real life situations; and to gain problem solving skills using these concepts.
2. The secondary goal is to appreciate the importance of this material in the elementary school curriculum.

MATH 2350G. Statistical Methods
3 Credits (3)
Exploratory data analysis. Introduction to probability, random variables and probability distributions. Concepts of Central Limit Theorem and Sampling Distributions such as sample mean and sample proportion. Estimation and hypothesis testing single population parameter for means and proportions and difference of two population parameters for means and proportions. Analysis categorical data for goodness of fit. Fitting simple linear regression model and inference for regression parameters. Analysis of variance for several population means. Techniques in data analysis using statistical packages.
Prerequisite: Adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1215 or higher.
Learning Outcomes
1. Summarize Data through graphs and Descriptive statistics: Define qualitative and quantitative data; Provide examples of a population, a sample, independent and dependent variables, parameters and statistics; Construct and interpret histograms, stem plots, bar charts, and boxplot; Summarize distributions with numerical measures such as mean, median, standard deviation, percentiles, interquartile range.
2. Present the concepts of probability: Explain related to probability axioms (e.g. mutually exclusive events and independent events); Apply applications of probability rules; Apply Conditional probability and Bayes Rule.
3. Distinguish between discrete and continuous random variables: Calculate probabilities using Binomial and Poisson distributions; Calculate probabilities using the standard normal distribution by finding the area underneath the curve.
4. Explain the Central Limit Theorem: Introduce the concept of a sampling distribution; Discuss the distribution of the sample mean and sample proportion under repeated sampling; Generate and interpret a sampling distribution using repeated sampling; Determine if the Binomial and Poisson distribution can be approximated with the normal distribution.
5. Estimate a population parameter: Determine confidence interval for population mean, proportion, difference of means, and difference of proportions; Interpret the confidence interval and margin of error;

Explain the dependence of margin of error on sample size and confidence level.

6. Perform hypothesis tests for population parameters (population mean, proportion, difference of means, and difference of proportions); Describe the logic and framework of the inference of hypothesis testing; Make a decision using a p-value and draw an appropriate conclusion; Distinguish between Type I and Type II errors; Explain power of the test.
7. Perform Hypothesis Tests for Categorical data: Determine and analyze Chi-square test for Independence; Determine and analyze Chi-square test for Goodness of fit.
8. Analyze data using regression and correlation: Construct scatterplots and analyze the scatter plots; Calculate the linear correlation coefficient and determine whether a linear relationship exists between two variables; Fit the least-squares regression line between two variables; Predict the response variable from the regression line; Apply statistical inference to regression parameters.
9. Perform analysis of variance: State hypotheses for the test of several population means; Construct the AVOVA Table; Explain the significance of multiple comparisons. 1
10. Demonstrate the appropriate use of technology (e.g., Excel, an appropriate graphing calculator or other software (Minitab, SAS)

MATH 2415. Introduction to Linear Algebra
3 Credits (3)
Systems of equations, matrices, vector spaces and linear transformations. Applications to computer science.
Prerequisite(s): Grade of C- or better in MATH 1521G or MATH 1521H.
Learning Outcomes

1. Use row reduction and echelon forms of a matrix to solve linear systems of equations.
2. Use matrix operations, inverse matrices, and matrix factorizations to solve matrix equations.
3. Study the properties of vector spaces and subspaces (e.g., the null and column spaces of a matrix); linear transformations, isomorphisms and kernels; linear independence, bases, and dimension.
4. Apply appropriate matrix manipulations to perform a change of basis.
5. Understand determinants and their properties.
6. Find eigenvalues and eigenvectors and use them to diagonalize matrices.
7. Understand inner product spaces and apply them to real-world problems.

MATH 2530G. Calculus III
3 Credits (3)
Continuation of Calculus II including multivariate and vector calculus, level curves and surfaces, partial derivatives, gradient, directional derivatives, tangent planes, optimization, multiple integrals in Cartesian, cylindrical and spherical coordinate systems.
Prerequisite: Grade of C- or better in MATH 1521G or MATH 1521H.
Learning Outcomes

1. Use vector notation correctly.
2. Perform vector operations, including dot product, cross product, differentiation and integration, and demonstrate their geometric interpretations.
3. Perform operations on vector valued functions and functions of a parameter.
4. Identify and graph the equations of cylinders and quadratic surfaces in 3-dimensional space.
5. Determine the domain of continuity of a vector valued function and of a function of multiple variables.
6. Compute partial derivatives, generally and at a point, and sketch their graphical representation on a surface in space.
7. Recognize when the chain rule is needed when differentiating functions of multiple variables, parametric equations and vector valued functions, and be able to use the chain rule in these situations.
8. Compute curvature of a parameterized vector representation of a curve in 2- and 3-dimensional space and be able to explain its meaning.
9. Compute the unit tangent and unit normal vectors to a curve and be able to sketch them with the curve. 1
10. Computationally move among position vector, velocity vector, speed, and acceleration vectors; recognize and demonstrate their use as applied to motion in space. 1
11. Determine the equation of the tangent plane to a surface at a point. 1
12. Use the tangent plane to a surface to approximate values on the surface and estimate error in approximation using differentials 1
13. Compute directional derivatives and represent them graphically relative to the inherent surface. 1
14. Compute the gradient vector; represent it graphically relative to the inherent surface and use it to maximize or minimize rate of change of the function. 1
15. Locate local and global maxima and minima of a function. 1
16. Use Lagrange multipliers to maximize output with one or two constraints. 1
17. Compute arc length and be able to explain its derivation as a limit. 1
18. Calculate double and triple integrals independently and with their geometric representations as surfaces, areas and volumes. 1
19. Calculate iterated integrals in polar, cylindrical and spherical coordinate systems.

MATH 2992. Directed Study
1-3 Credits
May be repeated for a maximum of 6 credits. Graded S/U.
Prerequisite: consent of the instructor.
Learning Outcomes

1. Varies

MATH 3110. Introduction to Modern Algebra
3 Credits (3)
Elements of abstract algebra, including groups, rings and fields.
Prerequisite: C or better in MATH 1531 and MATH 2415.
Learning Outcomes

1. Varies.

MATH 3120. Introduction to Analysis
3 Credits (3)
Development of the real numbers, a rigorous treatment of sequences, limits, continuity, differentiation, and integration.
Prerequisite: C- or better in MATH 1531 or MATH 1531H.
Learning Outcomes

1. Understand the Axiom of Completeness and be able to work with suprema and infima.
2. Know the basic definitions of sequences and be able to understand and construct rigorous epsilon-N proofs.

3. Understand the properties of convergent sequences and be able to construct related proofs.
4. Know the basic definitions of limits and be able to understand and construct epsilon-delta proofs.
5. Be familiar with the basic properties and topology of the reals.

MATH 3130. Introduction to Geometry
3 Credits (3)
Building on ideas from high school geometry, an introduction to the axiomatic method, transformation groups, and non-Euclidean geometry.
Prerequisite: C- or better in MATH 1531 (or MATH 1531H) and MATH 2415.
Learning Outcomes
1. Demonstrate the ability to make conjectures in geometry, refine conjectures, and prove or refute conjectures.
2. Understand how transformations of the plane can be used to define and apply the concepts of congruence and similarity in Euclidean geometry.
3. Solve problems in geometry using different approaches (axioms, coordinates, transformations), and explain how the different approaches are related.
4. Compare the definitions and theorems of Euclidean geometry with the corresponding definitions and theorems in non-Euclidean geometry.

MATH 3140. Introduction to Numerical Methods
3 Credits (3)
Basic numerical methods for interpolation, approximation, locating zeros of functions and integration; numerical linear algebra. Computer-oriented methods will be emphasized. Student must also have some programming experience in order to enroll.
Prerequisite: C- or better in one of MATH 2415, M E 228, or E E 200.
Learning Outcomes
1. Understand the limitations, advantages, and disadvantages of common numerical methods and how they are used to obtain approximate solutions.
2. Apply numerical methods to obtain approximate solutions to mathematical problems.
3. Analyze and evaluate the accuracy of common numerical methods.
4. Write efficient, well-documented code to implement numerical methods.

MATH 3160. Introduction to Ordinary Differential Equations
3 Credits (3)
Introduction to differential equations and dynamical systems with emphasis on modeling and applications. Basic analytic, qualitative and numerical methods. Equilibria and bifurcations. Linear systems with matrix methods, real and complex solutions.
Prerequisite: C or better in MATH 1521G or MATH 1521H or B or better in MATH 1440.
Learning Outcomes
1. Solve basic linear and nonlinear linear first order equations using appropriate methods (both explicit and qualitative).
2. Model both linear and nonlinear physical entities such as population, income growth, mixing and cooling, as well as systems of physical entities such as predator/prey models and electric circuits.
3. Classify higher order equations as homogeneous/nonhomogeneous and linear/nonlinear.
4. Solve second order homogeneous and nonhomogeneous linear equations using appropriate techniques.
5. Solve differential equations using Laplace Transforms.
6. Solve systems of linear equations using basic matrix methods.

MATH 3997. Directed Readings
1-3 Credits
A selection of readings and reports in the mathematical sciences, the breadth and depth of which is deemed to fit the needs of the student. May be repeated up to 3 credits.
Prerequisite: consent of instructor.

MATH 4110V. Great Theorems in Mathematics
3 Credits (3)
This course examines some significant mathematical achievements from antiquity to the modern era. Evolution of notions and methods in geometry, number theory, algebra, and calculus will be supplemented by cultural and biographical history, placing mathematics in a broad human context.
Prerequisite: Grade of C- or higher in MATH 1531, or grade of B or higher in any upper-division math or stat course, or consent of instructor.
Learning Outcomes
1. At the end of this course, students will be able to: Describe the history of the development of some key mathematical concepts.
2. Describe the connections between mathematical ideas in different historical periods and places.
3. Recognize the role of abstraction and logic in the progress of mathematics.
4. Describe the contribution of mathematics to culture and science in different historical eras.
5. Determine if a mathematical conjecture is correct and provide rigorous written mathematical justification.
6. Provide sound, complete and clear mathematical arguments involving simple calculations, geometric constructions, and/or written mathematical proofs.
7. Communicate mathematical ideas, both written and orally.

MATH 4210. Complex Variables
3 Credits (3)
A first course in complex function theory, with emphasis on applications.
Prerequisite: C- or better in both MATH 3160 and MATH 2530G.
Learning Outcomes
1. Define analytic function, the Cauchy-Riemann equations, and harmonic functions.
2. Recognize elementary analytic functions such as the exponential function, trigonometric functions, and branches of the logarithmic function and their properties.
3. Understand mapping by elementary functions, linear fractional transformations, and powers.
4. Compute line integrals, making appropriate use of the Cauchy-Goursat Theorem, the Cauchy Integral Formula, and Morera's Theorem.
5. Relate complex power series (including Laurent series) to their singularities (removable singularities, poles, and essential singularities).
6. Evaluate improper integrals using the Residue Theorem.

MATH 4220. Fourier Series and Boundary Value Problems
3 Credits (3)
Fourier series and methods of solution of the boundary value problems of applied mathematics.
Prerequisite: C- or better in MATH 3160.

Learning Outcomes

1. Learn the standard boundary/initial value problems for the partial differential equations of mathematical physics: wave equation, heat equation, Laplace's equation and Poisson's equation.
2. Be able to use the method of separation of variables to solve the boundary/initial value problems.
3. In learning the method, understand orthogonal sets of functions, eigenvalues, eigenfunctions, Fourier series, generalized Fourier series.
4. Understand Fourier integrals, Fourier transforms and their applications.

MATH 4230. Applied Linear Algebra
3 Credits (3)
An application-driven course, whose topics may include the four fundamental subspaces, inner products, orthogonality, diagonalization, and complex matrices. Applications may include factorization, least squares, data compression, singular value decomposition, and discrete Fourier transform.
Prerequisite: C- or better in one of MATH 2415, E E 200, or M E 228.
Learning Outcomes

1. Understand higher-level linear algebra concepts for which matrix linear algebra is the basic tool.
2. Understand how to apply higher-level linear algebra concepts to problems that arise in real-world applications.

MATH 4310. Introduction to Topology
3 Credits (3)
Topological spaces: general spaces and specific examples such as metric spaces, Hausdorff spaces and/or normed vector spaces; separation axioms; continuity, compactness, connectedness; related theorems. Crosslisted with: MATH 5310.
Prerequisite: MATH 3120.

MATH 4320. Logic and Set Theory
3 Credits (3)
Propositional and first order logic; axioms, proofs, models. Semantic and syntactic consequence. Soundness, completeness, compactness, and Loewenheim –Skolem theorems. The Zermelo-Fraenkel axioms for set theory. Well orderings, ordinals, cardinals, the axiom of choice, and the von Neumann hierarchy.
Learning Outcomes

1. Define the fundamental notions of set theory (ordinals, cardinals) and apply transfinite induction/recursion to construct proofs.
2. Explain the Axiom of Choice and relate set-theoretic and logical techniques to topics in algebra and analysis.
3. Construct formal proofs in first-order logic and distinguish between semantic and syntactic consequence.
4. Prove the Completeness and Compactness theorems of first-order logic and apply metatheorems (Löwenheim–Skolem) to analyze formal theories and their models.

MATH 4330. Elementary Number Theory
3 Credits (3)
Covers primes, congruences and related topics.
Prerequisite: Grade of C or better in MATH 3110 or consent of instructor.

MATH 4340. Abstract Algebra I: Groups and Rings
3 Credits (3)
Group theory, including cyclic groups, homomorphisms, cosets, quotient groups and Lagrange's theorem. Introduction to rings: ring homomorphisms, ideals, quotient rings, polynomial rings, and principal ideal domains. Taught with MATH 5340.
Prerequisite(s): MATH 3110 or consent of instructor.

MATH 4350. Advanced Linear Algebra
3 Credits (3)
Rigorous treatment of vector spaces and linear transformations including canonical forms, spectral theory, inner product spaces and related topics.
Prerequisite: Grade of C or better in MATH 3110.
Learning Outcomes

1. Apply the fundamental properties of abstract vector spaces to solve algebraic problems.
2. Define and evaluate linear independence, bases, and dimension within abstract vector spaces.
3. Construct matrix representations for linear transformations between vector spaces.
4. Compute determinants, eigenvalues, and eigenvectors of linear operators.
5. Prove theorems regarding direct sums, kernels (null spaces), and ranges of linear transformations.
6. Apply the properties of adjoint operators to solve problems in inner product spaces.

MATH 4360. Introduction to Real Analysis I
3 Credits (3)
Rigorous discussion of the real numbers for topics introduced in calculus: limits and continuity, followed by differentiation, integration, and series of functions.
Prerequisite: Grade of C- or better in MATH 3120 or consent of instructor.
Learning Outcomes

1. Understand two-sided limits, one-sided limits, limits at infinity, continuity and uniform continuity for functions on the real line.
2. Understand derivatives, differentiability theorems, the Mean Value Theorem, Taylor's Theorem, L'hospital's Rule and the Inverse Function Theorem for functions on the real line.
3. Understand integration on the real line: the Riemann integral, Riemann sums, the Fundamental Theorem of Calculus and improper Riemann integrals.
4. Understand sequences and infinite series of functions, including uniform convergence, limit supremum, limit infimum, power series and analytic functions.

MATH 4365. Introduction to Real Analysis II
3 Credits (3)
Extension of the ideas of Math 4360 to higher dimensions and more general contexts (metric spaces, differentiability on higher dimensional Euclidean space, integration on higher dimensional Euclidean space).
Prerequisite: C- or better in MATH 4360 or consent of instructor.
Learning Outcomes

1. Understand the algebraic structure, including planes and linear transformations, of Euclidean spaces.
2. Understand the fundamental notions of metric spaces: limits of functions, interior/closure/boundary of sets, compact sets, connected sets, continuous functions and the Stone-Weierstrass Theorem.
3. Understand derivatives, differentials, tangent planes, the Chain Rule, the Mean Value Theorem, Taylor's Formula and the Inverse Function Theorem for functions on n-dimensional Euclidean space.
4. Apply the Ascoli Theorem for relative compactness of sets of continuous functions on a compact metric space.

MATH 4991. Undergraduate Research
1-3 Credits

May be repeated for a maximum of 6 credits. Graded S/U.

MATH 4996. Special Topics
1-3 Credits (1-3)
Specific subjects to be announced in the Schedule of Classes. May be used to fulfill a course requirement for the mathematics major. May be repeated up to 99 credits.

Learning Outcomes

1. Analyze concepts in the selected topic area.
2. Apply mathematical methods to solve complex problems within the topic area.
3. Communicate findings from the topic area in written and oral formats.

MATH 4997. Directed Reading
1-6 Credits
May be repeated for a maximum of 6 credits. Graded S/U.

MATH 5110. Fundamentals of Elementary Mathematics I
3 Credits (3+1P)
Topics from real numbers, geometry, measurement, and algorithms, incorporating calculator technology. Intended for K-8 teachers. As part of course students mentor MATH 1134 undergraduates. Does not fulfill degree requirements for M.S. in mathematics.

MATH 5120. History and Theories of Mathematics Education
3 Credits (3)
A study of the history of the mathematics taught in American schools, including an examination of authentic original textbooks and the changes in their content and the approach to the subject over time, together with writings of people who have influenced the development and changes of mathematics education. Theories of learning mathematics, and current issues in mathematics education.
Prerequisite(s): Restricted to graduate students.

MATH 5130. Algebra with Connections
3 Credits (3)
Connections between Algebra and other K-12 curriculum strands, especially Geometry and Probability / Data Analysis. Apply algebraic modeling and reasoning to a variety of mathematical problem solving situations. Does not fulfill requirements for degrees in mathematics.
Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 5140. From Number to Algebra
3 Credits (3)
The progression from Number to Algebra in the K-12 curriculum as a concrete-to-abstract progression. Key concepts considered across the grade levels include the different uses of variables, equivalence in different contexts, patterns, and ratios. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.
Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 5150. Data Analysis with Applications
3 Credits (3)
Statistical concepts and terminology in professional uses of data by teachers, such as standardized test score reports and educational research; visual displays of data; measures of variation and central tendency; consideration of how K-12 topics in Data Analysis are developed from one grade level to the next. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.
Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 5160. From Measurement to Geometry
3 Credits (3)
The progression from Measurement to Geometry in the K-12 curriculum as a concrete-to abstract progression. Important concepts such as angle, length, and area progress from concrete, measurable situations to more abstract problems which require reasoning and proof. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.
Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 5170. Using Number Throughout the Curriculum
3 Credits (3)
Understand number concepts more deeply by seeing many examples of those concepts applied in other content strands. Develop mathematical knowledge and understanding to build a repertoire of ways for students to practice and review basic number skills and concepts as part of later, more advanced courses. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.
Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 5180. Geometry with Connections
3 Credits (3)
Connections between Geometry and other K-12 curriculum strands, especially Algebra and Probability / Data Analysis. Address key attributes of geometric concepts by considering their connections within and across grade levels. Does not fulfill requirements for degrees in mathematics.
Prerequisite: Admittance into the MC2-LIFT program.

MATH 5210. Complex Variables
3 Credits (3)
Same as MATH 4210 with additional work for graduate students.

Learning Outcomes

1. Define analytic function, the Cauchy-Riemann equations, and harmonic functions.
2. Recognize elementary analytic functions such as the exponential function, trigonometric functions, and branches of the logarithmic function and their properties.
3. Understand mapping by elementary functions, linear fractional transformations, and powers.
4. Compute line integrals, making appropriate use of the Cauchy-Goursat Theorem, the Cauchy Integral Formula, and Morera's Theorem.
5. Relate complex power series (including Laurent series) to their singularities (removable singularities, poles, and essential singularities).
6. Evaluate improper integrals using the Residue Theorem.

MATH 5220. Fourier Series and Boundary Value Problems
3 Credits (3)
Same as MATH 4220 with additional work for graduate students.

Learning Outcomes

1. Derive the partial differential equations of physics: wave equation, heat equation, Laplace's equation, and Poisson's equation, including boundary/initial values.
2. Use the method of separation of variables to solve the boundary/initial value problems.
3. Recognize the role of orthogonal sets of functions, eigenvalues, eigenfunctions, Fourier series, generalized Fourier series in the method of separation of variables.
4. Compute Fourier integrals and Fourier transforms, and apply them to physical problems.

MATH 5310. Introduction to Topology
3 Credits (3)
Topological spaces: general spaces and specific examples such as metric spaces, Hausdorff spaces and/or normed vector spaces; separation axioms; continuity, compactness, connectedness; related theorems. Crosslisted with: MATH 4310.

Learning Outcomes

1. Define the topology induced from a total ordering or metric.
2. Construct new topological spaces by taking subspaces, products, and quotients.
3. Compare different topologies on the same set to determine which is finer.
4. Determine whether a function is continuous with respect to a particular topology.
5. Classify topological spaces based on fundamental properties (connectedness, compactness, Hausdorff).
6. Construct examples and counter-examples of topological spaces satisfying a given set of properties.

MATH 5320. Logic and Set Theory
3 Credits (3)
Same as MATH 4320 with additional assignments for graduate students.

MATH 5330. Elementary Number Theory
3 Credits (3)
Same as MATH 4330 with additional assignments for graduate students.
Learning Outcomes

1. Apply various properties of the integers to solve number theory problems.
2. Analyze the properties of number theoretic functions.
3. Construct proofs using the concept of a congruence.
4. Solve certain types of Diophantine equations using number theoretic methods.
5. Explain how number theory is related to and used in modern cryptography.

MATH 5340. Abstract Algebra I: Groups and Rings
3 Credits (3)
Same as MATH 4340 with additional work for graduate students. Taught with MATH 4340.
Prerequisite: MATH 5350 or consent of instructor.
Learning Outcomes

1. Apply the fundamental properties of groups to solve abstract algebra problems and analyze the structure of rings.
2. Construct subgroups and factor groups of given groups.
3. Prove key theorems related to cyclic groups, Sylow groups, and permutation groups.
4. Prove that certain algebraic structures are isomorphic using homomorphism properties.
5. Determine group structures based on analyzing information about their subgroups.

MATH 5350. Advanced Linear Algebra
3 Credits (3)
Same as MATH 4350 with additional work for graduate students.
Learning Outcomes

1. Apply the fundamental properties of abstract vector spaces to solve algebraic problems.
2. Define and evaluate linear independence, bases, and dimension within abstract vector spaces.
3. Construct matrix representations for linear transformations between vector spaces.
4. Compute determinants, eigenvalues, and eigenvectors of linear operators.
5. Prove theorems regarding direct sums, kernels (null spaces), and ranges of linear transformations.
6. Apply the properties of adjoint operators to solve problems in inner product spaces.

MATH 5360. Introduction to Real Analysis I
3 Credits (3)
Same as MATH 4360 with additional work for graduate students.
Learning Outcomes

1. Understand two-sided limits, one-sided limits, limits at infinity, continuity and uniform continuity for functions on the real line.
2. Understand derivatives, differentiability theorems, the Mean Value Theorem, Taylor's Theorem, L'hospital's Rule and the Inverse Function Theorem for functions on the real line.
3. Understand integration on the real line: the Riemann integral, Riemann sums, the Fundamental Theorem of Calculus and improper Riemann integrals.
4. Understand sequences and infinite series of functions, including uniform convergence, limit supremum, limit infimum, power series and analytic functions.

MATH 5365. Introduction to Real Analysis II
3 Credits (3)
Same as MATH 4365 with additional work for graduate students.
Learning Outcomes

1. Understand the algebraic structure, including planes and linear transformations, of Euclidean spaces.
2. Understand the fundamental notions of metric spaces: limits of functions, interior/closure/boundary of sets, compact sets, connected sets, continuous functions and the Stone-Weierstrass Theorem.
3. Understand derivatives, differentials, tangent planes, the Chain Rule, the Mean Value Theorem, Taylor's Formula and the Inverse Function Theorem for functions on n-dimensional Euclidean space.
4. Apply the Ascoli Theorem for relative compactness of sets of continuous functions on a compact metric space.

MATH 5410. Complex Analysis
3 Credits (3)
Rigorous treatment of complex differentiation and integration, properties of analytic functions, series and Cauchy's integral representations.
Prerequisite: MATH 3120.
Learning Outcomes

1. Analyze the definitions and properties of analytic functions (the Cauchy-Riemann equations, harmonic functions).
2. Explain and apply Cauchy's Integral Theorem/Formula, primitive functions, Liouville's Theorem and the Maximum Modulus Principle.
3. Construct Taylor/Laurent series, analyze their convergence, and (where applicable) classify isolated singularities (poles, essential).
4. Prove the Residue Theorem and use it to compute line integrals and improper real integrals.
5. Analyze such concepts as the Argument Principle, Rouche's Theorem, Jordan's Lemma, the Schwarz Lemma, and Montel's Theorem.

MATH 5420. Topology I
3 Credits (3)
Connectedness and compactness of topological spaces, introduction to the quotient topology, elementary homotopy theory, the fundamental group, the Seifert-van Kampen theorem.
Prerequisite(s): MATH 5350 and MATH 5365, or consent of instructor.

Learning Outcomes

1. Formulate explicit homotopies between functions and construct homotopy equivalences between topological spaces.
2. Construct standard examples of manifolds and CW-complexes.
3. Prove basic properties of the fundamental groups of topological spaces.
4. Calculate fundamental groups of topological spaces using the Van Kampen Theorem.
5. Construct the covering space corresponding to a particular subgroup.
6. Determine when a group action on a space is a deck transformation action and compute the corresponding base space.

MATH 5425. Topology II
3 Credits (3)
Covering spaces and their classification, singular homology, degree theory, Brouwer's fixed point theorem, CW-complexes and cellular homology, and other applications.
Prerequisite(s): MATH 5420 or consent of instructor.
Learning Outcomes

1. Define singular chain complexes and singular homology.
2. Prove basic properties such as functoriality and homotopy invariance of singular homology groups.
3. Define and calculate cellular homology groups of CW-complexes using degree theory.
4. Prove geometric theorems (Brouwer's Fixed-point Theorem) using properties of homology groups.
5. Calculate singular homology groups of CW-Complexes using the singular/cellular equivalence.

MATH 5428. Topics in Topology
3 Credits
Topics in modern topology. The material covered will reflect current research topics in the field and may vary each time the course is offered. To be taken up to 3 times. May be repeated up to 9 credits.
Learning Outcomes

1. Gain knowledge of advanced methods in the area of topology.
2. Develop potential to explore literature in the area of topology.
3. Develop potential to conduct supervised research in the area of topology.

MATH 5430. Mathematical Structures in Logic
3 Credits (3)
Lattices, distributive lattices, Boolean algebras, Heyting algebras. Lindenbaum-Tarski algebras of classical and intuitionistic logics. Representation theorems. Modal logics and their algebraic counterparts. Kripke semantics. Goedel translation.
Prerequisite: MATH 5320.
Learning Outcomes

1. Explain the basic theory of posets and lattices and apply closure operators, ideals, and completions to solve related problems.
2. Analyze the basic theory of distributive lattices, Boolean algebras, and Heyting algebras, and construct related algebraic structures (homomorphisms, subalgebras).
3. Illustrate the connections between various algebraic systems and the propositional logics they model, and translate statements between an algebraic structure and its dual space.
4. Explain the theoretical motivation for various modal logics and relate properties of modal algebras with their corresponding dual frames.

MATH 5435. Universal Algebra and Model Theory
3 Credits (3)
Universal algebra, homomorphisms, subalgebras, products, congruences. Varieties and class operators. Free algebras and Birkhoff's theorem. Ultraproducts and Los's theorem. Congruence distributive varieties and Jonsson's theorem. Universal classes and quasi-varieties.
Prerequisite: MATH 5320.
Learning Outcomes

1. Analyze standard examples of universal algebras arising from logic, algebra, and linear algebra.
2. Construct and manipulate homomorphisms, subalgebras, products, and congruences within universal algebraic systems.
3. Apply the relationships between equations, free algebras, and varieties to characterize algebraic classes.
4. Classify subdirectly irreducible algebras within various varieties.
5. Apply Jonsson's lemma and Los's theorem to solve complex problems related to varieties.
6. Relate the theory of varieties to broader concepts and special cases within model theory.

MATH 5438. Topics in Foundations
3 Credits
Topics in modern foundations. The material covered will reflect current research topics in the field and may vary each time the course is offered. To be taken up to 3 times. May be repeated up to 9 credits.
Learning Outcomes

1. Gain knowledge of advanced methods in the area of foundations.
2. Develop potential to explore literature in the area of foundations.
3. Develop potential to conduct supervised research in the area of foundations.

MATH 5440. Partial Differential Equations I
3 Credits (3)
The basic equations of mathematical physics. Laplace, Heat and Wave Equations. The method of characteristics, introduction to conservation laws, special solutions.
Prerequisite(s): MATH 5220 and MATH 5365 or consent of instructor.
Learning Outcomes

1. Formulate the basic equations of mathematical physics from physical principles and classify them (elliptic, parabolic, hyperbolic).
2. Apply analytical techniques (separation of variables, Fourier series) to solve the Heat and Wave equations.
3. Solve boundary and initial value problems for classical Partial Differential Equations (PDEs).
4. Interpret special solutions of PDEs in applied contexts.
5. Evaluate the stability and uniqueness of solutions to PDEs.

MATH 5445. Partial Differential Equations II
3 Credits (3)
Sobolev spaces theory: basic definitions and properties, embedding theorems, weak solutions of boundary value problems and variational methods for partial differential equations.
Prerequisite(s): MATH 5460 or consent of instructor.
Learning Outcomes

1. Define and apply key concepts in Sobolev space theory.
2. Apply embedding theorems to analyze function spaces.
3. Formulate and solve boundary value problems for PDEs using weak solutions.

4. Apply variational methods to analyze solutions of partial differential equations.

MATH 5450. Abstract Algebra II: Fields, Rings and Modules
3 Credits (3)
Topics covered include field extensions; algebraic closure; polynomials rings; irreducibility criteria; Noetherian rings; algebraic sets; Nullstellensatz; modules; applications to linear algebra.
Prerequisite(s): MATH 5340 or consent of instructor.
Learning Outcomes
1. Apply factorization properties of rings (UFD, PID, ED) to solve algebraic problems.
2. Apply irreducibility criteria to univariate polynomials over various fields.
3. Construct field extensions and determine their key properties.
4. Analyze the structure and basic properties of modules.
5. Apply the structure theorem for modules over a PID to classify modules.
6. Compute the rational canonical form of a matrix.

MATH 5453. Module Theory and Homological Algebra
3 Credits (3)
Introductory concepts of homological algebra, including projective, injective and flat modules; projective and injective resolutions; exactness of functors; homology of chain complexes; derived functors.
Prerequisite(s): MATH 5450 or consent of instructor.

MATH 5455. Introduction to Commutative Algebra and Algebraic Geometry
3 Credits (3)
Introduction to the basic notions and techniques of modern algebraic geometry, including the necessary commutative algebra foundation. Topics likely to include algebraic and projective varieties, Nullstellensatz, morphisms, rational and regular functions, local properties. Other topics may include Noether normalization, dimension theory, singularities, sheaves, schemes, Grobner bases.
Prerequisite(s): MATH 5450 or consent of instructor.

MATH 5458. Topics in Algebra
3 Credits
Topics in modern algebra. The material covered will reflect current research topics in the field and may vary each time the course is offered. To be taken up to 3 times. May be repeated up to 9 credits.
Learning Outcomes
1. Gain knowledge of advanced methods in the area of algebra.
2. Develop potential to explore literature in the area of algebra.
3. Develop potential to conduct supervised research in the area of algebra.

MATH 5460. Measure and Integration
3 Credits (3)
Measure spaces, measurable functions, extension and decomposition theorems for measures, integration on measure spaces, absolute continuity, iterated integrals.
Prerequisite: MATH 5365 or consent of instructor.
Learning Outcomes
1. Define key concepts in measure theory and distinguish between them.
2. Apply extension and decomposition theorems to determine the structure of measures.
3. Construct the Lebesgue integral on general measure spaces.
4. Compare the Lebesgue integral to the Riemann integral using concrete examples.
5. Evaluate and manipulate iterated integrals using absolute continuity and Fubini's theorem.

MATH 5463. Real Analysis
3 Credits (3)
Differentiation, Lp spaces, Banach spaces, measure and topology, other selected topics.
Prerequisite: MATH 5460.
Learning Outcomes
1. Analyze the topological structure, duality properties, and important inequalities of Lp spaces.
2. Apply concepts from measure theory and topology to analyze the behavior of functions and sets in real analysis.
3. Evaluate differentiability and integrability using advanced real analysis techniques.
4. Distinguish between pointwise and norm-based convergence of function sequences.
5. Solve problems involving the completeness, continuity, and compactness of Banach spaces.

MATH 5465. Introduction to Functional Analysis
3 Credits (3)
Banach spaces. The three basic principles: uniform boundedness principle, closed graph/open mapping theorems, Hahn-Banach theorem.
Prerequisite: MATH 5463, or consent of instructor.
Learning Outcomes
1. Define and analyze the structure of normed and Banach spaces.
2. Apply the Hahn-Banach Theorem to investigate the properties of dual spaces.
3. Apply the Uniform Boundedness Principle, the Open Mapping Theorem, and the Closed Graph Theorem to solve problems in functional analysis.
4. Define the properties of compact and self-adjoint operators.
5. Apply spectral theory to analyze self-adjoint operators.

MATH 5468. Topics in Analysis
3 Credits
Topics in modern analysis. The material covered will reflect current research topics in the field and may vary each time the course is offered. To be taken up to 3 times. May be repeated up to 9 credits.
Learning Outcomes
1. Gain knowledge of advanced methods in the area of analysis.
2. Develop potential to explore literature in the area of analysis.
3. Develop potential to conduct supervised research in the area of analysis.

MATH 5996. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. May be for unlimited credit with approval of the department.
Learning Outcomes
1. Analyze advanced concepts in the selected topic area.
2. Apply specialized mathematical methods to solve complex problems within the topic area.
3. Critique current research and developments in the topic area.
4. Communicate findings from the topic area in professional written and oral formats.

MATH 5997. Directed Reading
1-6 Credits
Readings. May be repeated for a maximum of 6 credits. Consent of instructor required. Graded: S/U.
Learning Outcomes
1. Summarize key concepts from assigned mathematical literature in a written report.
2. Critique mathematical arguments presented in advanced texts.
3. Synthesize information from multiple mathematical sources to form a coherent overview.
4. Communicate understanding of the assigned readings through a written report or oral presentation.

MATH 5999. Master's Thesis
1-15 Credits
Thesis. May be repeated up to 99 credits.
Learning Outcomes
1. Formulate a significant mathematical research problem suitable for a Master's thesis.
2. Apply appropriate mathematical methods to investigate the research problem.
3. Interpret research results in the context of existing mathematical literature.
4. Produce a Master's thesis meeting scholarly standards.
5. Defend the Master's thesis in an oral examination.

MATH 6991. Doctoral Research
1-15 Credits
Research. May be repeated up to 88 credits.
Learning Outcomes
1. Identify and refine an original doctoral research problem into a testable hypothesis or clear objectives.
2. Design a rigorous research plan for the doctoral research.
3. Implement the initial stages of the rigorous research plan.
4. Evaluate initial research findings within the academic context.
5. Communicate research progress and results through appropriate scholarly formats (written paper, oral presentation).

MATH 6996. Special Topics
1-15 Credits
Selected topics. May be repeated up to 88 credits.
Learning Outcomes
1. Integrate advanced mathematical theories to solve problems related to the selected topic.
2. Solve complex problems requiring specialized mathematical tools.
3. Critique research trends and debates in the topic area.
4. Present an advanced analysis of the topic area through written and oral communication.

MATH 7000. Doctoral Dissertation
1-15 Credits
Dissertation. May be repeated up to 88 credits.
Learning Outcomes
1. Conduct original research advancing knowledge in mathematics.
2. Apply rigorous methodologies to address complex research questions.
3. Integrate research findings into the scholarly literature through a publishable paper.
4. Produce a doctoral dissertation meeting professional standards.
5. Defend the doctoral dissertation in an oral examination.

MGMT-MANAGEMENT

MGMT 2110. Principles of Management
3 Credits (3)
An introduction to the basic theory of management including the functions of planning, organizing, staffing, leading, and controlling; while considering management's ethical and social responsibilities.
Learning Outcomes
1. Explain the major functions of management including planning, organizing, communications, controlling, motivating, leading, and staffing.
2. Recognize major developments in the history of management thought.
3. Describe the basic managerial processes including decision-making and other key skills necessary for managers to perform their roles.
4. Identify an organization's stakeholders and the importance of social and ethical responsibility of managers.
5. Explain the formulation and implementation of strategic planning, including the relationship between goals, plans, vision statements, and mission statements.
6. Describe the strategies managers use to help organizations adapt to changing internal and external environments.
7. Explain organizational change, forces for change, sources of resistance to change, and the techniques managers can use to implement and facilitate change.

MGMT 309. Human Behavior in Organizations
3 Credits (3)
Interpersonal and organizational behavior, motivation, communication, team building, leadership, diversity management, legal and ethical issues, and politics in organizations.
Learning Outcomes
1. Analyze behavior of people at work in all types of organizations.
2. Understand what influences human motivation, communication, team relationships.
3. Understand how human interactions in an organization influence employee and organizational performance.

MGMT 310V. Entrepreneurial Mindset
3 Credits (3)
This course provides the opportunity to learn to think like an entrepreneur in the broader context of social entrepreneurship, intrapreneurship, creative problem solving, opportunity recognition, and innovation.
Learning Outcomes
1. Define and explain entrepreneurial skills, behaviors, and attributes.
2. Describe and assess your own entrepreneurial skills, behaviors, and attributes and evaluate your potential for an entrepreneurial career.
3. Describe and assess the entrepreneurial process by identifying and employing various strategies for business idea generation, assessing business opportunities, and identifying the key steps in the start-up process.

MGMT 332. Human Resources Management
3 Credits (3)
Introductory course in human resources management. Includes recruitment, selection, legal and ethical implications, performance

appraisal, training, compensation, safety, and union-management relations.

Learning Outcomes

1. Provides basic understanding of the functional areas in Human Resource Management (HRM), including recruitment, selection, performance management, compensation, employee development, legal compliance, and union-management relations.
2. Understand the concerns and functions of the principal actors in employment systems: employees, management, and government.
3. Enable an understanding of how to strategically align HR practices with organizational goals and achieve effective workforce management and performance.

MGMT 333. Training and Development
3 Credits (3)

Training and development of human capital, including training needs assessment, training approaches and techniques, and evaluation of training effectiveness.

Learning Outcomes

1. Research and practice various methods of delivering management training and development programs, including, lectures, experiential exercises, simulations, self-assessment tools and questionnaires to stimulate self-reflection.
2. Analyze one's own skills as a trainer and areas needing improvement.
3. Conduct training needs assessments via questionnaires and interviews.
4. Evaluate the success of a training program by collecting and interpreting feedback from training session participants and the course instructor.

MGMT 335V. Business and Government
3 Credits (3)

Crosslisted with: ECON 335G

MGMT 344. Production and Operations Management
3 Credits (3)

Management of physical and human resources; management of information systems and decision-making in operations; applications in various organizations.

Prerequisite: MATH 1350G or A ST 311; and BCIS 338 or BCIS 350.

Learning Outcomes

1. Develop an understanding of the challenges and solutions in operations, production, and delivery of goods and services in manufacturing and service organizations.
2. Employ quantitative and analytical techniques in industrial and service settings to enhance decision-making in operations management.
3. Evaluate the use of sustainable practices in operations and their influence on the environment and business efficiency, encouraging the development of responsible management decisions.
4. Cultivate critical thinking skills and apply operations management concepts and methodologies to address and solve specific operational problems.

MGMT 345V. Quality and Competitiveness: An International Perspective
3 Credits (3)

Quality management and competitiveness are studied in manufacturing, services, and the public sector with an international perspective. Topics include: global history of quality, foreign competition and its impact on quality and productivity, quality management and continuous improvement, international operations management, quality assessment, and a review of the emergence of quality and competitiveness in government, education and health care. May be repeated up to 3 credits.

Learning Outcomes

1. Developing critical thinking skills through challenging material and assignments.
2. Foster intelligent inquiry through assignments, participative lectures, team projects.
3. Develop an integration and synthesis of knowledge through applications to case studies and individual assignments.
4. Promote a breadth of knowledge on international developments in quality and competitiveness with a holistic view of quality and its impact on businesses, organizations, nations and individuals.

MGMT 347. Management Functions and Processes
3 Credits (3)

Planning, organizing, directing, and controlling operating units in an organization. Applications to a variety of types of organizations.

Learning Outcomes

1. Understand and explain the theory and role of planning and organizing in today's organizations or operating units.
2. Understand and explain the theory and role of leading and directing today's organizations or operating units.
3. Understand and explain the concept and role of control in today's organizations.

MGMT 351. Supply Chain Management
3 Credits (3)

Acquisition and control and delivery of materials, parts, equipment, and services for end use in the organization. Applications to service and manufacturing industries, nonprofit, and governmental institutions.

Learning Outcomes

1. Acquire an understanding of supply chain management (SCM) topics, including integration and management of supply chain processes, strategic purchasing management, accurate demand forecasting, customer relationship management, and supply chain performance measurement.
2. Recognize the strategic significance of effective supply chain design, planning, and operations for business success.
3. Learn to leverage key supply chain performance drivers at conceptual and practical levels to enhance supply chain efficiency, employing analytical methodologies for in-depth supply chain analysis.
4. Explore using digital technologies to enhance supply chain transparency, visibility, and efficiency, including implementing IoT, blockchain, and AI solutions to streamline operations and improve supply chain resilience.

MGMT 361. Small Business Management
3 Credits (3)

Principles and practice of managing a small enterprise with emphasis on growth and performance.

Learning Outcomes

1. Understand the small business environment and operations.
2. Understand various strategies and processes unique to small business, including forms of ownership, sustainability issues, strategic planning, alternative forms of business, and succession issues.
3. Analyze the financial reporting, financial performance, and risks associated with small businesses.

MGMT 388V. Leadership and Ethics
3 Credits (3)

Exploration of the multifaceted nature of leadership and principal-based ethics in modern society through readings, cases, and seminar discussion.

Learning Outcomes

1. Provide students with a critical and multi-perspectival and leadership understanding of business ethics and the social responsibilities of businesses today.
2. Understand how to apply this knowledge to actual cases and especially to students' own experiences and understandings of ethics in organizations.
3. Develop more complex moral reasoning and understand important principles of ethics (integrity, trust, accountability, transparency, fairness, respect, rule of law and viability) and how to apply and practice them.

MGMT 391. Management Internship and Cooperative Education I
1,3 Credits

Application of management skills to the work environment. Open only to students majoring or minoring in management. The amount of academic credit (1-3 cr.) will be determined by the academic experience and not by the work experience. May be repeated up to 3 credits.

Prerequisite: MGMT 309.

Learning Outcomes

1. Student learning outcomes will vary for each student.

MGMT 449. Strategic Management
3 Credits (3)

Integrative approach to envisioning the future and shaping strategies for business success.

Prerequisite: BCIS 338 or BCIS 350; BLAW 316; BFIN 341; MGMT 309; MKTG 303; and one of the following: MGMT 344 or MGMT 470 or BCIS 485.

Learning Outcomes

1. Apply strategic management ideas, frameworks, and concepts to analyze situations and identify strategic management issues.
2. Create and evaluate alternative courses of action.
3. Communicate and support conclusions to others using strategic analysis tools, and in writing and speech.
4. Think in a critical, analytic, integrative, and ultimately strategic manner.

MGMT 450. Business Process Improvement
3 Credits (3)

Identify, design, and implement process change techniques to create efficient and effective processes in various business context. Student must be in final academic year before graduation or have consent of instructor.

Learning Outcomes

1. Describe the benefits and steps of process improvement.
2. Provide examples of resources and tools to support process improvement.
3. Demonstrate an ability to utilize practice improvement tools such as process mapping and PDSA (Plan-Do-Study-Act) cycles.

MGMT 451. Strategic Talent Management
3 Credits (3)

Staffing and talent management processes for organizational selection, promotion, and retention. Use of selection methods and measurement of work behavior for the evaluation of employee performance.

Prerequisite: MGMT 332 or instructor permission.

Learning Outcomes

1. Understand the legal and regulatory environment surrounding the human resources functions of selection, placement, and evaluation.
2. Understand how to select, develop and implement reliable, valid, and cost-effective employee selection and evaluation procedures, specific to job analysis, job application and resume screening, various employment tests, role of virtual mediums, and structured interviews.

MGMT 458. International Business Management
3 Credits (3)

Cultural influences on management are examined in a global business environment with a particular emphasis on human behavior and people management in multinational organizations. Same as I B 458.

Learning Outcomes

1. Understand the global business environment as it relates to HR and people management, including the economic, social, political, cultural, and legal environments of different countries.
2. Develop a capacity to think about business and human behavior in a global context, and how to adapt to cultural differences.
3. Assess the risks and opportunities of doing business in different countries.
4. Understand the ethical considerations and decision-making differences of doing business in a global context.

MGMT 459. Transportation Optimization
3 Credits (3)

Equip students with a deep understanding of logistics network design, transportation planning, and cost optimization strategies while exploring emerging technologies such as AI, IoT, and blockchain. This course will develop the analytical and strategic skills needed to enhance efficiency, resilience, and sustainability in modern global supply chains.

Prerequisite: MGMT 344, MGMT 351.

Learning Outcomes

1. Develop an ability to critically analyze transportation data and logistics to make informed decisions that optimize operational efficiency and reduce costs.
2. Learn how to strategize and plan transportation routes and schedules that meet business objectives while considering budget, time, and environmental impact constraints.
3. Develop and apply optimization models to solve real-world transportation problems, utilizing linear programming, network design, and routing algorithms.
4. Gain experiential learning with advanced transportation technologies and software, including GIS (Geographic Information Systems), GPS (Global Positioning System), and real-time data analytics platforms and leverage these technologies to enhance route planning, fleet management, and overall transportation system performance.

MGMT 460. Compensation Management
3 Credits (3)

An overview of wage and salary administration, including job evaluation, wage and salary surveys, program administration, legal aspects of pay systems, and benefits administration.

Prerequisite: MGMT 332 or consent of instructor.

Learning Outcomes

1. Understand and design effective compensation systems within an organization that seek to define and measure employee work performance.
2. Understand foundational concepts such as the different compensation philosophies, components of a total compensation package, and market competitiveness analysis.

3. Understand relevant employment laws and ethical principles that impact compensation.

MGMT 461. Entrepreneurial Decision Making
3 Credits (3)
Explore the fundamentals of lean startup methodologies and customer discovery in this hands-on course. Students will learn to develop and test business ideas using the Lean Canvas, conduct effective customer interviews, and apply continuous feedback to iterate on their concepts. By the end of the course, students will be equipped to make strategic decisions and validate their business models with real-world insights. Crosslisted with: MKTG 461.
Prerequisite: Students in final year or consent of instructor.
Learning Outcomes
1. Explore the fundamentals of lean startup methodologies.
2. Develop skills to conduct effective customer interviews and apply continuous feedback in concept development.
3. Possess competency to make strategic decisions and validate business models with real-world insight.
4. Learn to develop and test business ideas through customer discovery.

MGMT 465. Contemporary Issues in Human Resources Management
3 Credits (3)
Integrative course in human resources management, emphasizing the application of advanced contemporary concepts to complex personnel cases and strategic human resource initiatives.
Prerequisite: MGMT 332.
Learning Outcomes
1. Develop increased understanding of current trends in Human Resource Management.
2. Understand how HR trends can be used to optimize HR strategy in the 21st century.
3. Develop critical thinking skills and communication skills.

MGMT 470. Project Management in Organizations
3 Credits (3)
Roles, responsibilities, and techniques of project managers in managing projects effectively. Preparation for professional certification.
Learning Outcomes
1. Develop an understanding of a project manager's roles and responsibilities.
2. Develop knowledge of the skills and abilities needed to manage a project effectively, to include effective communication, leadership, time management, problem-solving, adaptability, and decision-making.
3. Gain an ability to develop the foundations of a project plan, implement and control the project, and terminate a project effectively.
4. Provide a foundation for preparation for project management certification.

MGMT 490. Selected Topics
1-18 Credits (1-18)
Seminars in selected current topics in the various areas of management and administration. Prerequisites vary according to the seminar being offered.

MGMT 491. Management Internship and Cooperative Education II
1-3 Credits
Covers the application of management skills to the work environment. The amount of academic credit (1-3 cr.) will be determined by the academic experience and not be the work experience. May be repeated for a maximum of 3 credits. Restricted to majors and minors.
Prerequisite: MGMT 309 and consent of instructor.

MGMT 498. Independent Study
1-3 Credits
Individual studies directed by consenting faculty with the prior approval of the department head. A maximum of 3 credits may be earned.
Prerequisites: junior or above standing and consent of instructor.

MGMT 502. Operations Management
3 Credits (3)
Systems and specialized models applied to the management of production facilities and service operations, including physical and human resources.
Learning Outcomes
1. Explain the elements of design, operation and improvement of productive systems that creates the firm's products and services.
2. Develop working knowledge of operations principles and techniques that will increase customer satisfaction and value to the firm.

MGMT 503. Organizational Behavior and Management Processes
3 Credits (3)
Covers the theory and practice related to the successful management of human capital in organizations operating within a dynamic global environment. Course goals include developing alternative frameworks for analyzing issues related to human behavior, management science, and organizational structure and theory.
Learning Outcomes
1. Discern, analyze, and evaluate issues at the individual, group, and organizational levels of analysis, understanding these levels are both separate and interrelated forces in need of alignment.
2. Understand how effective leaders communicate, influence, motivate, negotiate, and build and manage teams.
3. Apply problem solving methods and develop action plans and recommendations to optimize, resolve, or mitigate complex problems or opportunities.
4. Recognize, describe, compare, and contrast the central concepts and theories of organizational behavior, including organizational culture, change, and social and political processes, team dynamics, individual and team decision making, and leadership.

MGMT 510. AI and Machine Learning for Supply Chain Decision-Making
3 Credits (3)
This course provides an understanding of the use of artificial intelligence (AI) and machine learning (ML) in supply chain operations, focusing on data-driven decision-making. Students will apply predictive and prescriptive models to address challenges in forecasting, inventory management, customer segmentation, and sourcing, among others.
Prerequisite: Programming Foundations (either CSCI 4525 or CSCI 4520), AI Foundations (CSCI 5405, CSCI 5420 or EE 565).
Learning Outcomes
1. Understand the most common supply chain management challenges and the potential for AI to address them.
2. Apply traditional AI and ML techniques such as regression and clustering to solve supply chain problems.
3. Assess model performance in the context of the supply chain.
4. Compare customer and supplier segmentation models.
5. Develop basic AI-driven supply chain decision support tools.
6. Reflect on the ethical implications of AI/ML applications in the supply chain.

7. Understand the implications of data management on developing AI decision support tools.

MGMT 520. Advanced Supply Chain Intelligence: Optimization and Generative AI
3 Credits (3)
This advanced course is complementary to MGMT/BCIS 510. It equips students to design and optimize emerging intelligent supply chain systems using mathematical optimization, simulation, and generative AI technologies, including large language models (LLMs) and generative adversarial networks (GANs). Students will develop planning, risk management, and automation models using system development platforms such as Nvidia Developer or Llama through hands-on projects like digital twinning or agentic decision tools, while critically evaluating their strategic and ethical implications in supply chain operations. Students will collaborate to bridge technical and business knowledge.
Prerequisite: MGMT 510 or BCIS 510.
Learning Outcomes
1. Formulate and solve supply chain optimization problems using Nvidia Developer or Llama.
2. Design and evaluate simulation models for decision-making under uncertainty.
3. Utilize large language models (LLMs) for supply chain documentation and automation.
4. Generate synthetic data for risk analysis and what-if scenarios using generative AI.
5. Design basic AI-driven agents for supply chain automation.
6. Critically assess generative AI's operational, strategic, and ethical implications in supply chains.
7. Integrate technical and strategic perspectives to develop AI-driven supply chain solutions.
8. Develop vector databases for customer sentiment analysis and update LLMs with current supply chain information.

MGMT 548. Small Business Consulting
3 Credits (3)
Study, analysis, and presentation of recommendations for solving significant problems confronting small businesses. Same as MGMT 448 with differentiated assignments for graduate students.
Prerequisite(s): Graduate standing.

MGMT 550. Small Business Consulting
3 Credits (3)
Study, analysis, and presentation of recommendations for solving significant problems confronting small businesses. Same as MGMT 450 with differentiated assignments for graduate students.
Learning Outcomes
1. Understand financials and other indicators of firm health.
2. Understand how to analyze a firm's market and competitive environment.
3. Identify warning signs that a business turnaround may be needed.
4. Formulate a recovery plan for a troubled company.

MGMT 590. Strategic Management
3 Credits (3)
Covers the integration of functional, human, technological, and environmental aspects of business within the framework of management policy and strategy formulation. Formulate, implement, evaluate and control the various functions of the organization from a systems perspective. Understand the external environment and its impact on the organization. Restricted to majors.
Prerequisite: M.B.A. student in his or her final semester.

MGMT 591. Seminar in Entrepreneurship
3 Credits (3)
For students interested in owning and operating their own business; students desiring hands-on, real-time experience in helping start up a business. Same as MGT 461 with differentiated assignments for graduate students. Crosslisted with: MKTG 591.
Prerequisite(s): Graduate standing.

MGMT 598. Special Research Programs
1-3 Credits
Individual investigations either analytical or experimental. A maximum of 6 credits may be earned.
Prerequisite: consent of instructor.

MGMT 600. Doctoral Research
1-15 Credits (1-15)
This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination. Restricted to management majors. May be repeated up to 88 credits.

MGMT 601. Research in Management
1 Credit (1)
Ph.D. course provides opportunities for significant interaction between Management faculty and Management Ph.D. students. The course also provides opportunities for development of professional scholarly standards, ethics, and critiques, as well as insight into current research areas and topics supported by the Management Department and other relevant disciplinary areas. May be repeated for a maximum of 6 credits. Restricted to Ph.D. students. Graded S/U.

MGMT 645. Seminar in Human Resources Management
3 Credits (3)
Seminar will address current issues in human resources management. Focus on research related to the selection, development, and effective use of human resources. Restricted to doctoral students. May be repeated up to 3 credits.

MGMT 650. Seminar in Organizational Behavior
3 Credits (3)
Seminar will include specific organizational behavior topics; motivation, leadership, group and inter-group relations, and attitude theory. Focus on current research and theory. Restricted to doctoral students. May be repeated up to 3 credits.
Learning Outcomes
1. Varies

MGMT 655. Seminar in Organizational Systems and Theory
3 Credits (3)
Analysis of organizations from a macro perspective. Topics include organizational theory, organizational design, organizational environment, and sociotechnical systems. Restricted to doctoral students. May be repeated up to 3 credits.

MGMT 660. Research Design and Methodology
3 Credits (3)
Topics will include philosophy of science, theory building, and research methods applicable to the study of organizational behavior. Restricted to doctoral students. May be repeated up to 3 credits.
Learning Outcomes
1. Varies

MGMT 661. Qualitative Research Methods
3 Credits (3)
In-depth coverage of selected topics in research methodology, including theory and logic of scientific investigation, grounded theory, action

research, and ethnomethodology. Restricted to doctoral students. May be repeated up to 3 credits.

MGMT 670. Seminar in Operations Management
3 Credits (3)
Seminar examines the major problem areas, research findings, and research methodologies of operations management. Focus on the critical evaluation of current theory and methodology. Restricted to Doctoral students. May be repeated up to 3 credits.

MGMT 675. Seminar in Strategic Management
3 Credits (3)
Survey of current and classical readings in strategy. Introduces the doctoral level student to strategic issues, strategic topics for research, and publication venues. Restricted to doctoral students. May be repeated up to 3 credits.

MGMT 685. Story Consulting to Organizations
3 Credits (3)
Apply various qualitative story and narrative research methods (plot analysis, script analysis, life history, and restoring) to action research consulting project. Students will conduct story assessment and (propose or enact)intervention with a local consenting organization. Restricted to doctoral students.

MGMT 690. Special Topics
3 Credits (3)
Seminars in selected current topics in the various areas of management. May be repeated for unlimited credit. Restricted to doctoral students.
Prerequisite(s): Vary according to seminar being offered.

MGMT 698. Special Topics
1-3 Credits
Prerequisite: consent of instructor.

MGMT 700. Doctoral Dissertation
1-15 Credits (1-15)
May be repeated up to 88 credits.
Prerequisite: advancement to candidacy.

MKTG-MARKETING

MKTG 1111. Level 1, PGA's PGM Education Program (Part 1)
3 Credits (3)
Level 1 Part 1 of the PGA PGM Education Program. Introduction to the Policies and Procedures of the PGA Golf Mgt. Program and the PGA of America. Students will complete the PGA Qualifying Level, Facility Management 1A (Tournament Ops A, Rules of Golf B, and Career Enhancement B), and the corresponding Work Experience Activities. Additional course fee required.
Learning Outcomes

1. Knows the career opportunities, challenges, and benefits of PGA.
2. Can distinguish significant differences between Teaching and Player Development and the Facility Operations Management pathways to PGA membership.
3. Understands the structure and requirements of the PGM Program.
4. Knows how to maintain acceptable progress.
5. Knows the courses at each level of the PGM Program.
6. Knows how to access resources that facilitate progress through the PGM Program.
7. Discuss how the PGA of America began and evolved and be familiar with key milestones in PGA history.
8. State the mission of the PGA of America and the structure of the PGA Constitution, Bylaws and Regulation.
9. Describe how the PGA of America is organized, including its Officers, Board of Directors, The Chief Executive Officer and headquarters staff. 1
10. Describe the role of Sections and Districts, the PGA Officers and Board of Directors, The Chief Executive Officer and headquarters staff. 1
11. Recognize the requirements for PGA Recognized Golf Facilities and employment definitions. 1
12. Describe the importance of the PGA of America's dedication to professionalism and ethical practices, what constitutes a Code of Ethics violation, and the procedures for processing Code of Ethics violations. 1
13. Identify eligibility requirements for apprentices and members, the rights of membership, the different membership classifications, how to maintain active status, and the process for appealing to the Board of Control on membership issues. 1
14. Review the organization of The Rules of Golf. 1
15. Understand proper etiquette of the game of golf. 1
16. Review the history and development of the Rules. 1
17. Understand how the Rules are maintained and changed. 1
18. Prepare a professional resume and cover letter for an employment interview.

MKTG 1112. Level 1, PGA's PGM Education Program (Part 2)
3 Credits (3)
Level 1 Part 2 of the PGA PGM Education Program. This class will focus on Teaching and Coaching 1, the corresponding PGA Work Experience Activities, and PGA Teaching Seminars. Additional course fee required.
Learning Outcomes

1. Know how students learn and process golf knowledge and skills, and identify the implications for teaching.
2. Know how to define and distinguish between learning and performance.
3. Understand how juniors learn golf knowledge and skills, and identify implications for teaching.
4. Conduct a physical evaluation of a junior golfer and create developmentally appropriate exercise and training programs.
5. Establish student/teacher relationships that promote greater student learning and enjoyment.
6. Develop a communication style that fits the student and increases instructional effectiveness.
7. Analyze student's instructional needs and set clear, purposeful learning and practice goals.
8. Know the format for an effective golf lesson.
9. Deliver effective explanations and demonstrations during a golf lesson. 1
10. Engage in self-assessment of teaching skills and competencies. 1
11. Recognize the appropriate clubhead path and clubface position information to improve a golfer's performance. 1
12. Conduct appropriate assessments to determine the short game skill level of the golfer. 1
13. Gain understanding of the short game elements to help lower scores and improve the player. 1
14. Define club performance terms and specifications, including lie angle and clubface angle or position, and describe their effect on ball flight and player performance: Define what information is require to properly assess a player's golf equipment. 1

15. Define club performance terms and specifications, including lie angle and clubface angle or position, and describe their effect on ball flight and player performance: Observe a player's swinging motion, ball flight, and equipment to evaluate the effectiveness of their equipment.

MKTG 1210. Advertising
3 Credits (3)
A survey of currently available advertising media. A psychological approach to consumer persuasion; applied techniques in media selection, layout mechanics, production methods, and campaign structures.
Prerequisite: MKTG 2110.
Learning Outcomes
1. Define advertising and the relevant application of psychology in delivering the message.
2. Explain the importance of various advertising media in the marketing mix.
3. Identify and explain the social, ethical and legal issues advertisers must consider.
4. Describe the significance of the marketing function in business.
5. Explain the importance of advertising and other marketing communication tools.
6. Demonstrate application of the planning process as it applies to marketing and advertising.
7. Describe the factors that are weighted when considering the use of radio and television in the creative advertising mix.
8. Describe the relationship between market segment, consumer behavior and selection of advertising campaign types.
9. List the alternative means of reaching a target market and the technical challenges of each.

MKTG 1220. Small Business Marketing
3 Credits (3)
An overview of public relations principles, practices and purposes as applied to small business. Topics include basics of news release writing, media awareness, development and maintenance of a positive public image, branding, ethical marketing, and the relationships of public relations with advertising and marketing. Methods and practices used in small business are explored.
Prerequisite/Corequisite: MKTG 2110.
Learning Outcomes
1. Explain the importance of creating and sustaining a positive public awareness and image.
2. Identify public relations practices as they relate to the management and marketing processes.
3. Define branding and discuss its importance for small business.
4. Describe the value of business event management and promotion for small business.
5. Discuss how media relations, public relations, advertising and marketing efforts are interrelated and the importance of each.

MKTG 180. Level 1, PGA's PGM Education Program (Part 1)
3 Credits (3)
Level 1 Part 1 of the PGA PGM Education Program. Introduction to the Policies and Procedures of the PGA Golf Mgt. Program and the PGA of America. Students will complete the PGA Qualifying Level,Facility Management 1A (Tournament Ops A, Rules of Golf B, and Career Enhancement B), and the corresponding Work Experience Activities. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.

MKTG 181. Level 1, PGA's PGM Education Program (Part 2)
3 Credits (3)
Level 1 Part 2 of the PGA PGM Education Program. This class will focus on Teaching and Coaching 1, the corresponding PGA Work Experience Activities, and PGA Teaching Seminars. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.
Learning Outcomes
1. Know how students learn and process golf knowledge and skills, and identify the implications for teaching
2. Know how to define and distinguish between learning and performance
3. Understand how juniors learn golf knowledge and skills, and identify implications for teaching
4. Conduct a physical evaluation of a junior golfer and create developmentally appropriate exercise and training programs
5. Establish student/teacher relationships that promote greater student learning and enjoyment
6. Develop a communication style that fits the student and increases instructional effectiveness
7. Analyze student's instructional needs and set clear, purposeful learning and practice goals
8. Know the format for an effective golf lesson
9. Deliver effective explanations and demonstrations during a golf lesson 1
10. Engage in self-assessment of teaching skills and competencies 1
11. Recognize the appropriate clubhead path and clubface position information to improve a golfer's performance 1
12. Conduct appropriate assessments to determine the short game skill level of the golfer 1
13. Gain understanding of the short game elements to help lower scores and improve the player 1
14. Define club performance terms and specifications, including lie angle and clubface angle or position, and describe their effect on ball flight and player performance: Define what information is require to properly assess a player's golf equipment 1
15. Define club performance terms and specifications, including lie angle and clubface angle or position, and describe their effect on ball flight and player performance: Observe a player's swinging motion, ball flight, and equipment to evaluate the effectiveness of their equipment

MKTG 2110. Principles of Marketing
3 Credits (3)
Survey of modern marketing concepts and practices focusing on the marketing mix: product, pricing, promotion, and distribution strategies. Topics include: the marketing environment, consumer behavior, marketing research, target marketing, and the ethical and social responsibilities of marketers. May be repeated up to 6 credits.
Prerequisite: BUSA 1110.
Learning Outcomes
1. Describe the professional, ethical, and social responsibilities of marketers.
2. Explain the role of the product in the marketing mix, including the product life cycle, the relevance of product innovation, and product classifications.
3. Illustrate the role of promotion in the marketing mix, including the communication process and the promotional mix.
4. Explain the role of price in the marketing mix, including pricing objectives, pricing policies, and pricing methods.

5. Describe the operation of channels of distribution and supply chains, including functions of intermediaries and degrees of coverage.
6. Define the concepts of target markets and market segmentation with respect to elements of the marketing mix.
7. Explain the importance of market research and information systems in supporting marketing decision making.
8. Describe the dynamic environment(s) in which marketing decisions must be made.

MKTG 2111. Level 1, PGA's PGM Education Program (Part 3)
3 Credits (3)
Level 1 Part 3 of the PGA PGM Education Program. This class will focus on Facility Management 1B (Business Planning A, Customer Relations A, Golf Car A, Merchandising A, Turfgrass A), Level 1 Checkpoint Exams, and the corresponding PGA Work Experience Activities. Students will also be required to provide an internship evaluation report. Additional course fee required.

Learning Outcomes

1. Understand the PGA Business Planning Model.
2. Use case studies to apply business planning concepts.
3. Define the business at the facility in terms of vision, core values, facility characteristics, and mission.
4. Assess the current state of the business by conducting a SWOT analysis.
5. Develop appropriate business goals and objectives.
6. Develop strategies to achieve goals and objectives.
7. Analyze financial history to create a financial forecast and operating budget.
8. Monitor performance and make necessary modifications to the plan.
9. Utilize the PGA PGM Work Experience Portfolio to display relevant training and experience. 1
10. Describe the golf industry job market and the knowledge and skills required to succeed. 1
11. Access PGA employment resources and participate in professional growth and development. 1
12. Utilize negotiation strategies for a compensation package. 1
13. Understand the major components of an employment agreement or contract. 1
14. Understand the business value of customer relations. 1
15. Describe the components of the PGA Customer Relations Model. 1
16. Utilize the four Interaction Strategies in a variety of routine and challenging customer situations. 1
17. Utilize the seven Interpersonal Skills in a variety of routine and challenging customer situations. 1
18. Initiate the PGA Experience using a systematic engagement routine. 1
19. Understand the importance of the golf car to the customer, the golf professional, and the facility. 2
20. Know the characteristics of a well-managed golf car fleet. 2
21. Utilize policies and procedures necessary for the operation of a safe and efficient golf car program. 2
22. Evaluate the components and potential benefits of an effective maintenance program and a proper storage facility. 2
23. Determine golf car needs in order to acquire a fleet that supports the facility's mission, customers, and physical characteristics. 2
24. Project fleet revenue, costs, and profit, and identify how budgeting changes impact the bottom line. 2
25. Evaluate the advantages and disadvantages of lease-purchase options. 2
26. Determine optimal rental fees. 2
27. Define key terms used in the Rules of Golf. 2
28. Locate and apply Rules to frequently encountered situations. 2
29. Encourage the use of the Rules and etiquette at your facility. 3
30. Understand how to define, assess, and develop tournament business at a facility. 3
31. Identify and define a tournament's purpose to develop an event that meets the needs of the customer and the facility. 3
32. Know how golf courses and facilities prepare for an event. 3
33. Define staff requirements for tournament operations. 3
34. Understand and communicate tasks required for tournament execution. 3
35. Manage situations and make rulings during events. 3
36. Review tournaments and suggest improvements for future events.

MKTG 2112. Level 2, PGA's PGM Education Program (Part 1)
3 Credits (3)
Level 2 Part 1 of the PGA PGM Education Program. This class will focus on Teaching and Coaching 2, Teaching and Coaching Seminars, and the corresponding PGA Work Experience Activities. Additional course fee required.

Learning Outcomes

1. Explain how students learn golf knowledge and skills, and identify the implications for teaching.
2. Explain how students process information when learning golf skills.
3. Identify and explain the principles of effective practice.
4. Explain how juniors learn golf knowledge and skills, and identify the implications for teaching.
5. Structure an effective golf lesson.
6. Analyze student's instructional needs and set clear, purposeful learning and practice goals.
7. Deliver effective explanations and demonstrations during a golf lesson.
8. Engage in self-assessment of teaching skills and competencies.
9. Recognize and apply the appropriate clubhead path and clubface position information to improve a golfer's performance. 1
10. Conduct appropriate assessments to determine the skill level of the golfer. 1
11. Demonstrate basic knowledge of anatomy and physiology, and conduct a physical observation to identify movement capabilities and limitations that may affect a golfer's performance. 1
12. Define club performance terms and specifications, and describe their effect on ball flight and player performance.

MKTG 2220. Digital Marketing
3 Credits (3)
This course focuses on planning to create and market a website. Internal marketing topics such as registering with search engines, increasing traffic, segmenting and targeting markets, establishing an online presence, developing a marketing plan and reshaping business for the Web market are covered.
Prerequisite: MKTG 2110.

Learning Outcomes

1. Describe how search engines work. (Use knowledge to make recommendations to a website on how it can improve its organic search rankings - perform search engine optimization).

2. Describe the various methods of online display advertising.
3. Determine the appropriate key performance indicators (KPIs) for any type of website.
4. Describe and implement best practices in marketing to a database of current and potential customers via email.
5. Utilize knowledge of social media tactics to design an effective social media campaign.
6. Implement online reputation management tactics to improve the online reputation of a brand.
7. Develop and present a digital marketing plan for a small, local business.

MKTG 280. Level 1, PGA's PGM Education Program (Part 3)
3 Credits (3)
Level 1 Part 3 of the PGA PGM Education Program. This class will focus on Facility Management 1B (Business Planning A, Customer Relations A, Golf Car A, Merchandising A, Turfgrass A), Level 1 Checkpoint Exams, and the corresponding PGA Work Experience Activities. Students will also be required to provide an internship evaluation report. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.

MKTG 281. Level 2, PGA's PGM Education Program (Part 1)
3 Credits (3)
Level 2 Part 1 of the PGA PGM Education Program. This class will focus on Teaching and Coaching 2, Teaching and Coaching Seminars, and the corresponding PGA Work Experience Activities. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.
Learning Outcomes
1. Explain how students learn golf knowledge and skills, and identify the implications for teaching
2. Explain how students process information when learning golf skills
3. Identify and explain the principles of effective practice
4. Explain how juniors learn golf knowledge and skills, and identify the implications for teaching
5. Structure an effective golf lesson
6. Analyze student's instructional needs and set clear, purposeful learning and practice goals
7. Deliver effective explanations and demonstrations during a golf lesson
8. Engage in self-assessment of teaching skills and competencies
9. Recognize and apply the appropriate clubhead path and clubface position information to improve a golfer's performance 1
10. Conduct appropriate assessments to determine the skill level of the golfer 1
11. Demonstrate basic knowledge of anatomy and physiology, and conduct a physical observation to identify movement capabilities and limitations that may affect a golfer's performance 1
12. Define club performance terms and specifications, and describe their effect on ball flight and player performance

MKTG 303. Principles of Marketing
3 Credits (3)
Process, functions, and principles in the current marketing system.
Learning Outcomes
1. Understand primary and changing perspectives on marketing and strategic management.
2. Understand the fundamental principles and theories of marketing.
3. Develop the capacity to obtain and process relevant information and analytical skills.
4. Evaluate the impact of interactive media on marketing management.
5. Apply relevant marketing concepts and analytical tools, identify viable alternatives, make informed choices, and recommend marketing implementation plans.
6. Develop skills in organizing more effective strategic marketing and in implementing the market planning process.
7. Develop, evaluate, and implement marketing management strategies in complex environments through recent, popular case study analyses.
8. Formulate marketing management strategies on critical issues, problems, and business opportunities.
9. Broaden perspectives of ethics and social responsibility, keep abreast of global developments, and adapt to changing environments.

MKTG 305. Marketing and Food Agricultural Products
3 Credits (3)
This course provides a review of marketing principles and techniques used throughout the food and fiber supply chain. The course introduces a broad variety of marketing topics including marketing strategy, consumer behavior, market segmentation, market research, competitive analysis, and the marketing mix. The course serves as a foundation for advanced courses in agricultural marketing. May be repeated up to 3 credits.
Prerequisite: ECON 1110G or ECON 2120G.
Learning Outcomes
1. Articulate how agricultural commodities move through the food and fiber supply chain.
2. Understand the importance of strategic marketing and how organizations within the food and fiber supply chain identify consumers and their preferences
3. Understand key marketing concepts used by agribusiness marketers, including SWOT analysis, the marketing mix, advertising and public relations
4. Know the basic outline and components of a marketing plan

MKTG 310. Marketing Research
3 Credits (3)
Design, collection analysis, and presentation of research data.
Prerequisite: MATH 1350G or A ST 311 and C- or better in MKTG 303, or consent of instructor.
Learning Outcomes
1. Translate a marketing problem into a feasible research question.
2. Recognize marketing research as a process that involves a sequence of activities, each compatible with the preceding activities.
3. Compare and contrast alternative research designs.
4. Identify the sources of marketing information and the various means for gathering such information.
5. Recognize the biases and limitations of marketing data and basic data analysis.
6. Interpret univariate and basic bivariate data analysis techniques (i.e., should be able to decide when a technique is appropriate and recognize the managerial implications of analytical results).
7. Design and execute a basic survey research project.
8. Assess ethical issues associated with various research approaches.

MKTG 311V. Consumer Behavior
3 Credits (3)
The different aspects of consumer behavior and the variables affecting consumer decisions. Analysis of current concepts and models.

Learning Outcomes

1. Know the consumer behavior concepts by integrating and adapting theories developed in disciplines such as psychology, sociology, anthropology, and economics.
2. Use specific tools to tackle and analyze customer issues.
3. Develop the ability to apply consumer behavior concepts from the perspective of marketing managers and public policy makers.
4. Increase the awareness of and enhance the ability to make ethical decisions in consumer-related issues.

MKTG 312. Personal Selling
3 Credits (3)
Implementation of the promotion process through interpersonal communications between salesperson and prospects. Serving customers by sales representatives.

Learning Outcomes

1. Demonstrate how personal selling can strategically enhance interpersonal communication skills, career management, personal productivity.
2. Identify key issues and trends such as opportunities or threats, for evolving emerging sales approaches platforms.

MKTG 313. Retail Management
3 Credits (3)
Investigates retail business operations and focuses on the strategic profit model, store location, layout, display, merchandising, operations, and personnel.

Learning Outcomes

1. Analyze the role of retailing in society and basic retailing principles, ideas, and concepts as they relate to an understanding of our market-driven system
2. Compare and contrast segmentation and target market selection relative to a specific population product/service for different markets and retailing opportunities
3. Apply the concepts of the marketing mix to the formulation and evaluation of retailing strategies relative to particular target markets, environments (economic, technological and competitive), and desired positions in market places (both local and global)
4. Areas to be addressed include communication strategy, branding, packaging, pricing, product/service design, methods of delivery and the product life cycle
5. Relate the concepts of marketing and retailing research, consumer behavior and strategy and their interrelationships
6. Compare and contrast analysis techniques and judgment that are useful to managers in acting with integrity to make decisions and taking action

MKTG 314. Advertising Strategy
3 Credits (3)
Utilization of advertising as a business administration function; communication with consumers as a means of attaining marketing goals.

Learning Outcomes

1. Analyze advertising from a consumer perspective
2. Compare advertising strategy theories and concepts
3. Evaluate advertising critically and creatively

MKTG 317. International Marketing
3 Credits (3)
Focuses on decisions relating to entering markets, market segmentation, marketing strategies, and tactics in the international arena. Same as I B 317.

Learning Outcomes

1. Develop understanding about what is involved in making international marketing decisions, including product, price, promotion, and place decisions to create a marketing mix.
2. Acquire an overview on the contemporary issues in global marketing and the unique challenges faced by marketing managers in the dynamic global environment.
3. Develop insights into how differences in global economic, cultural, social, political, and legal environments can affect marketing decisions.
4. Develop strategic thinking in the context of complex problems and challenges faced by the contemporary global executives and managers.
5. Develop ability to integrate the important global societal dimensions of diversity, environmental concerns, ethics, and technological change into their thinking.
6. Develop knowledge and skills to analyze cross-cultural variables and their impact on international marketing.
7. Discover sources of information for researching and evaluating international markets.
8. Communicate effectively about marketing issues in group discussions, oral presentations and written reports.
9. Work effectively as a team member in analyzing marketing issues. 1
10. Develop leadership skills necessary to deal with the uncertainty and changes faced by today's global marketers.

MKTG 324. Product/Service Development
3 Credits (3)
Covers product innovation, development, commercialization and resource recovery, price determination and administration strategies, and complementing planning processes.

Learning Outcomes

1. Understand the product/service development process.
2. Identify market opportunities for new products.
3. Use structured methods to evaluate and test product concepts.
4. Apply tools learned in class to develop new products/services.
5. Plan the launch of a product and evaluate its impact on the market.
6. Efficiently work with and communicate ideas to team members.

MKTG 354. Sports Marketing
3 Credits (3)
The application of marketing concepts to the sports industry. Topics include fans/customers, products, and promotions across a range of sports.

Learning Outcomes

1. Discuss the domain of sports marketing
2. Apply basic marketing tools (e.g., research, segmentation) to sports marketing contexts
3. Recognize, evaluate, and accommodate the perspectives of participants and spectators as sports consumers
4. Identify appropriate marketing mix options for sports products
5. Appraise recent sports marketing trends
6. Plan a career in sports marketing

MKTG 357. Digital Marketing Strategy
3 Credits (3)

This course explores how organizations plan, execute, and evaluate marketing strategies in digital environments. Emphasis is placed on strategic frameworks and decision-making approaches that adapt to evolving technologies and market conditions.

Learning Outcomes

1. Apply the concepts of the marketing mix to the formulation/ evaluation of marketing strategies relative to Social Media policies that combine business objectives with appropriate use of Social Media channels and content.
2. Compare and contrast the history of Social Media and recognize the various platforms of Social Media.
3. Select/defend segmentation and target market selection relative to a specific population product/service that engages target audiences with a marketing message.
4. Analyze business objectives and connect to appropriate Social Media tactics.
5. Evaluate Social Media marketing content to shape the way we connect to and build relationships with users, consumers and businesses.
6. Relate the concepts of marketing research to establish metrics for measuring Social Media marketing success.

MKTG 380. Level 2, PGA's PGM Education Program (Part 2)
3 Credits (3)

Level 2 Part 2 of the PGA PGM Education Program. This class will focus on Facility Managment 2 and the corresponding PGA Work Experience Activities. Students will also be required to provide an internship evaluation report. Additional course fee required. Consent of Instructor required. Restricted to: MKTG/PGA Golf Management majors.

Learning Outcomes

1. Define the business at the facility level in terms of vision, core values, facility characteristics and mission.
2. Utilize the four Interaction Strategies in a variety of routine and challenging customer situations.
3. Identify core business areas that support a customer-focused environment
4. Know the characteristics of a merchandising operation that align with a facility's business plan
5. Understand how to define, assess, and develop tournament business at a facility.

MKTG 381. Level 3, PGA's PGM Education Program (Part 1)
3 Credits (3)

Level 3 Part 1 of the PGA's PGM Education Program. This class will focus on Teaching and Coaching 3, Teaching and Coaching Seminars, and the corresponding PGA Work Experience Activities. Additional course fee required. Consent of Instructor required. Restricted to: MKTG/PGA Golf Management

Learning Outcomes

1. Explain how various types of feedback function to influence learning
2. Define the major variables that influence learning and explain how they operate with implications for practice, learning, and teaching
3. Provide effective instructional feedback after students' practice and performance
4. Explain how the form, precision, timing, frequency, and regulation of augmented feedback influence learning with implications for teaching and practice conditions
5. Explain how the key practice factors influence learning with implication for designing practice conditions
6. Establish relationships that promote greater student learning and enjoyment
7. Plan long-term developmental programs for beginning and intermediate players
8. Communicate effectively with students
9. Develop a communication style that increases instructional effectiveness 1
10. Effectively determine and design an appropriate practice routine to the benefit of the golfer 1
11. Effectively determine and assign the appropriate drill or drill with an aid to improve the swing shape of the golfer 1
12. Use relevant technology to promote student learning 1
13. Effectively demonstrate and apply the appropriate specialty shot information to the benefit of the golfer 1
14. Demonstrate basic knowledge of current swing methodologies of noted instructors 1
15. Physical development of junior golfers 1
16. Assess the physical capabilities of adult golfer, describe implications for performance, and provide potential physical adjustments 1
17. Describe how to use bench skills, tools, and technologies for measuring and altering club performance 1
18. Perform analyses and make appropriate alterations to change ball flight, players performance, and teacher effectiveness

MKTG 400. Marketing Internship/Field Experience
3 Credits (3)

Internship of field experience in application of marketing principles. The student must accept an internship before being allowed to enroll in the course. Consent of instructor required. Restricted to MKTG majors.

MKTG 440. Sales, Negotiations, and Customer Relationship Management
3 Credits (3)

This course focuses on addressing the issues, processes and strategies related to professional selling and sales management. This is a comprehensive course in the art of selling, focusing on relationship building, negotiating, and sales management. Various techniques will be explored, including prospecting, lead management, product introduction, negotiation, closing strategies, and relationship management.

Learning Outcomes

1. Understand concepts and frameworks that help you analyze each negotiation situation.
2. Develop a strategic plan and preparation documents in advance of each negotiation.
3. Master a toolkit of useful negotiation skills, strategies and tactics.
4. Improve your ability to predict and understand the other party's behavior during negotiations
5. Gain valuable experience and confidence in your own negotiating skills.
6. Improve future outcomes whenever you enter into a negotiation or are engaged in a dispute.

MKTG 449. Promotion Management
3 Credits (3)

Covers concepts and problems in the use of advertising, internet marketing, social media marketing, personal selling, publicity, and other forms of promotion; planning, coordination, control, and evaluation of effectiveness.

Learning Outcomes

1. Analyze the role of advertising and promotion in society and basic marketing principles, ideas, and concepts as they relate to an understanding of our market-driven system
2. Compare and contrast segmentation and target market selection relative to a specific population product/service for different markets and promotional opportunities
3. Apply the concepts of the marketing mix to the formulation and evaluation of promotional strategies relative to particular target markets, environments (economic, technological and competitive), and desired positions in market places (both local and global)
4. Areas to be addressed include communication strategy, branding, pricing, product/service design, and e-commerce
5. Relate the concepts of marketing and advertising research, consumer behavior and strategy and their interrelationships
6. Compare and contrast analysis techniques and judgment that are useful to managers in acting with integrity to make decisions and taking action in the promotional environment

MKTG 450. Sales, Negotiations, and Customer Relationship Management
3 Credits (3)

This course focuses on addressing negotiations and strategies related to professional selling and sales management. This is a comprehensive course in the art of selling, focusing on relationship building, negotiating, and sales management. Various techniques will be explored, including prospecting, lead management, product introduction, negotiation, closing strategies, and relationship management.

Learning Outcomes

1. Understand concepts and frameworks that help you analyze each negotiation situation.
2. Develop a strategic plan and preparation documents in advance of each negotiation.
3. Master a toolkit of useful negotiation skills, strategies and tactics.
4. Improve your ability to predict and understand the other party's behavior during negotiations.
5. Gain valuable experience and confidence in your own negotiating skills.
6. Improve future outcomes whenever you enter into a negotiation or are engaged in a dispute.

MKTG 451. Food and Agribusiness Market Assessment
3 Credits (3)

This course is an application course in which self-managed teams develop and present marketing plans for agribusiness firms. Emphasis on integrating the marketing mix, particularly promotional elements. May be repeated up to 3 credits. Crosslisted with: AEEC 4510.

Prerequisite(s): AEEC 3210 or MKTG 305 or consent of instructor.

Learning Outcomes

1. Identify, organize ad conduct market research specific to the project.
2. Develop an understanding of primary and secondary research collection and analysis.
3. Exhibit enhanced relationship management, communication skills, and team building.
4. Develop written communication with final deliverable for implementation into the business world.

MKTG 453. Sales Management
3 Credits (3)

The nature of the sales management function in industry. Focuses on intra and interdepartmental sales management activities.

Prerequisite: MKTG 312.

Learning Outcomes

1. Examined the linkage between personal selling, as a basket of activities, and the management of those marketing personnel who do selling (i.e., salespeople).
2. Examined the role of the sales force in the achievement of a firm's marketing objectives.
3. Undertaken numerous case-based analyses of typical sales management issues, including the hiring, firing, training, motivation, compensation, deployment, and evaluation of the firm's sales personnel.
4. Developed decision-making skills and analytic capabilities in the development and management of both sales programs and salespeople.

MKTG 461. Entrepreneurial Decision Making
3 Credits (3)

Explore the fundamentals of lean startup methodologies and customer discovery in this hands-on course. Students will learn to develop and test business ideas using the Lean Canvas, conduct effective customer interviews, and apply continuous feedback to iterate on their concepts. By the end of the course, students will be equipped to make strategic decisions and validate their business models with real-world insights. Crosslisted with: MGMT 461.

Prerequisite: Students in final year or consent of instructor.

Learning Outcomes

1. Explore the fundamentals of lean startup methodologies.
2. Develop skills to conduct effective customer interviews and apply continuous feedback in concept development.
3. Possess competency to make strategic decisions and validate business models with real-world insight.
4. Learn to develop and test business ideas through customer discovery.

MKTG 462. Advanced Sales
3 Credits (3)

Advanced instruction and skill development in interpersonal communication skills to broaden understanding of the professional sales role (especially in team selling situation), career management, personal productivity, negotiation, and coordination with other functional areas.

Prerequisite: MKTG 312.

Learning Outcomes

1. Students will learn "how" to sell (i.e., the behaviors and planning associated with selling today).
2. Analyze the concept of what/how is perhaps equally important but not nearly as obvious, how and why buyers "buy".
3. The course focus will be particularly on so-called "business-to-business" (B2B) sales jobs, as that is where many of the most interesting – and lucrative – sales positions reside.

MKTG 480. Level 3, PGA's PGM Education Program (Part 2)
3 Credits (3)

Level 3 Part 2 of the PGA's PGM Education Program. This class will focus on Facility Management 3, the Business Simulation Seminars, and the corresponding PGA Work Experience Activities. Students will also be required to provide an internship evaluation report. Additional course fee required. Consent of Instructor required. Restricted to: MKTG/PGA Golf Management Majors

Learning Outcomes

1. Assess the current state of the business by conducting a SWOT Analysis

2. Describe the golf industry job market and the knowledge and skills required to succeed
3. Identify areas where food services and golf operations should coordinate efforts
4. Determine golf car needs in order to acquire a fleet that supports the facility's mission, customers, and physical characteristics
5. Describe the organizational structure, key departments, reporting relationships, and job descriptions of a facility
6. Utilize industry-proven pricing strategies to meet business objectives
7. Describe the Performance System for supervising and delegating
8. Describe practices that improve the golf course and protect the environment

MKTG 481. PGA Golf Management Final Experience
1 Credit (1)
The following are requirements for successful completion of this senior level PGA Golf Management capstone course: 16 months of internship, completion of the Qualifying Level, Level 1, Level 2, and Level 3 of the PGA's PGM Education Program and successful completion of the PGA's Playing Ability Test. Consent of Instructor required. Restricted to: MKTG/PGA Golf Management majors.
Learning Outcomes
1. Describe the golf industry job market and the knowledge and skills required to succeed
2. Access PGA employment resources and participate in professional growth and development

MKTG 489. Strategy and Policy
3 Credits (3)
Techniques and analysis of marketing strategy and policy planning and formulation. Restricted registration to senior standing or by consent of instructor.
Prerequisite: C- or better in MKTG 310.
Learning Outcomes
1. Relate marketing strategy to the environmental constraints and opportunities with which managers must deal.
2. Compare marketing strategy theories and concepts.
3. Evaluate appropriate strategic marketing decisions in various situations.

MKTG 490. Selected Topics
1-18 Credits (1-18)
Covers materials and subjects not offered in regular Marketing courses. Students can take 18 credit hours of MKTG 490 if each class is a different subtitle. A maximum of 18 credit hours can be earned through MKTG 490.

MKTG 498. Independent Study
1-3 Credits
Individual studies directed by consenting faculty with the prior approval of the department head. A maximum of 3 credits may be earned.
Prerequisites: junior or above standing and consent of instructor.

MKTG 503. Marketing Management
3 Credits (3)
Analysis of marketing problems and the integration of organizational resources as well as behavioral and quantitative techniques into the development and implementation of solutions.
Learning Outcomes
1. Identify the fundamental principles and theories of marketing
2. Outline primary and changing perspectives on marketing and strategic management
3. Apply relevant marketing concepts and analytical tools
4. Develop capacity to obtain and process relevant information with enhanced analytical skills
5. Identify viable alternative to make informed choices and recommend marketing implementation plans
6. Evaluate the impact of interactive media on marketing management
7. Develop skills in organizing more effective strategic marketing and implementing the market planning process
8. Practice implementing marketing management strategies in complex environments through case study analyses
9. Formulate marketing management strategies on critical issues, problems, and business opportunities 1
10. Synthesize perspectives of ethics and social responsibility in adapting to changing environments

MKTG 591. Seminar in Entrepreneurship
3 Credits (3)
For students interested in owning and operating their own business; students desiring hands-on, real-time experience in helping start up a business. Same as MKTG 461 with differentiated assignments for graduate students. Crosslisted with: MGMT 591.
Prerequisite(s): Graduate standing.

MKTG 601. Marketing Management
3 Credits (3)
Covers the conceptual foundations of contemporary marketing management research, concepts, and literature. Fundamental to the understanding of contemporary marketing and the breadth of the field of marketing study.
Learning Outcomes
1. Identify the contemporary principles and theories of marketing strategy research
2. Outline primary guidelines and trendy directions of marketing strategic research
3. Improve theoretical foundation for research development in marketing strategy
4. Develop capacity of analytical and quantitative skills required for empirics
5. Apply relevant marketing theories, concepts and analytical methodology in research development
6. Formulate research ideas pertinent to marketing strategies on critical issues, problems, and phenomena
7. Practice complex research design, theoretical development and empirical operationalization
8. Synthesize perspectives of ethics and social responsibility in scholarly research

MKTG 620. Contemporary Marketing Readings
3 Credits (3)
Theoretical and methodological issues involved in translating a theory into a research study. Prepares Ph.D. students to undertake dissertation research. Consent of instructor required. May be repeated up to 3 credits.
Learning Outcomes
1. Students will be able to apply theory that they have learned to the process of doing research.

MKTG 625. Consumer Behavior
3 Credits (3)
Extensive reading of seminal and contemporary articles on consumer behavior and developing original research to explore cross-disciplinary

issues relevant to the study of marketing. May be repeated up to 3 credits.

Learning Outcomes

1. Students will be able to develop theories and frameworks.
2. Students will be able to discuss the latest research topics related to consumer behavior.
3. Students will be able to generate research ideas (interesting questions about consumer behavior and research hypotheses).
4. Students will be able to design experiments to test their research ideas and hypotheses.

MKTG 640. Measurement and Structural Equation Modeling
3 Credits (3)

Explores theories of measurement that underlie all quantitative analysis, including the use of structural equation models. Contrasts classical test theory with item response theory and generalizability theory. Covers PRELIS and LISREL, and critiquing structural equation models by other researchers. May be repeated up to 3 credits.

Prerequisite(s): A ST 505.

MKTG 670. Marketing Theory
3 Credits (3)

The evolution, development, construction, and evaluation of the major theoretical perspectives of marketing. Fundamental to the understanding of contemporary marketing and preparation for investigations into the nature and role of theory in marketing. May be repeated up to 3 credits.

Learning Outcomes

1. Students will be able to identify the contemporary principles and theories of marketing strategy research.
2. Students will be able to outline primary guidelines and trendy directions of marketing strategic research.
3. Students will be able to improve theoretical foundation for research development in marketing strategy.
4. Students will be able to develop capacity of analytical and quantitative skills required for empirics.
5. Students will be able to apply relevant marketing theories, concepts and analytical methodology in research development.
6. Students will be able to formulate research ideas pertinent to marketing strategies on critical issues, problems, and phenomena.
7. Students will be able to immplement complex research design, theoretical development, and empirical operationalization.
8. Students will be able to synthesize perspectives of ethics and social responsibility in scholarly research.

MKTG 690. Special Topics in Marketing
3 Credits (3)

A seminar on special topics in marketing. The topic of the course will vary according to the needs of the students in the program and the instructor. Ph.D. students may repeat this course up to three times for a maximum total of 9 credits.

MKTG 698. Selected Topics
1-9 Credits (1-9)

Materials and subjects not offered in regular marketing courses. May be repeated for a maximum of 18 credits under different subtitles.

MKTG 700. Doctoral Dissertation
1-15 Credits (1-15)

May be repeated up to 88 credits.

Prerequisite: advancement to candidacy.

MLSL-MILITARY SCIENCE

MLSL 1110. Introduction to Army Leadership
2 Credits (1+1,2P)

This course provides an introduction to the Army and basic Soldier skills. Students receive an introduction to the Army Profession and examine what it means to be a professional in the U.S. Army. The overall focus is on developing fundamental knowledge and comprehension of the Army Leadership Requirements Model (ALRM) while understanding the Reserve Officers' Training Corps (ROTC) program, its purpose in the Army, and its advantages for the student. Students also begin learning map reading and land navigation.

Learning Outcomes

1. Identify and describe the Army leader attribute and competency categories described in the Army Leadership Requirements Model.
2. Analyze and demonstrate methods for creating and sustaining an organizational climate of trust, ensuring all individuals are treated with dignity and respect.
3. Develop and implement plans for prioritizing, planning, preparing, executing, evaluating, and assessing training within a military context.
4. Apply critical and creative thinking to solve problems and make decisions in Army scenarios.

MLSL 1110L. Introduction to Army Leadership I Laboratory
1-3 Credits (1-3)

In this weekly lab, students will apply initial instruction from MLSL 1110 on fieldcraft, first aid, and team building. The lab will be facilitated by MS III Cadets and supervised by MS IV's and cadre.

Learning Outcomes

1. Demonstrate proficiency in individual Soldier skills such as fieldcraft and first aid through practical exercises and assessments.
2. Explain and practice Army customs and courtesies in various scenarios, demonstrating appropriate behavior and respect.
3. Execute team, squad, and platoon movements, showcasing knowledge of tactical formations and commands.

MLSL 1120. Introduction to Army Leadership II
2 Credits (1+1,2P)

This course introduces students to the personal challenges and competencies that are critical for effective leadership. Students learn how to develop personal life skills such as critical thinking, time management, goal setting, and communication. Students learn the basics of the communication process and the importance for leaders to develop the essential skills to effectively communicate in the Army.

Learning Outcomes

1. Identify and describe the Army leader attribute and competency categories as outlined in the Army Leadership Requirements Model.
2. Demonstrate methods for creating and sustaining an organizational climate of trust in which all individuals are treated with dignity and respect.
3. Develop plans for prioritizing, planning, preparing, executing, evaluating, and assessing training within a military context.
4. Apply critical and creative thinking skills to solve problems and make decisions in Army scenarios.

MLSL 1120L. Introduction to Leadership Lab
1 Credit (1P)

Planning, coordination, execution and evaluation of training and activities in a collaborative training environment with both basic and advanced course students from within the ROTC program. Students develop and

refine leadership skills in positions of responsibility. Restricted to Las Cruces campus only.
Prerequisite: MLSL 1110.
Learning Outcomes
1. Leadership Development: Demonstrate an understanding of leadership theories and principles, Apply leadership skills in a real-world context Reflect on personal leadership strengths and areas for growth.
2. Effective Communication: Develop effective communication skills to peers, cadre, and instructors, Foster positive and open communication, Demonstrate the ability to adapt to constructive feedback and guidance.
3. Reflective Practice: Engage in reflective practice to assess personal growth and learning throughout the course, Identify strategies for continuous improvement in leadership skills.
4. Teamwork and Collaboration: Collaborate effectively within the ROTC cadet cohort, Work as a team to address challenges and enhance the ROTC program.
5. Time Management and Goal Setting: Learn time management techniques, Learn and apply study skills, Learn to develop SMART goals and implement plans to achieve them.

MLSL 1129. Introduction to Military Fitness I
2 Credits (2)
This course provides a hands-on overview of the fitness requirements needed to serve in the U.S. Army. Students are introduced to, and expected to complete exercises and routines to build their individual strength, endurance, and speed to meet the demands of training and Soldier tasks.
Learning Outcomes
1. Identify and describe the key physical requirements for successful service in the U.S. Army.
2. Complete the Army Combat Fitness Test (ACFT) and achieve a passing score.
3. Complete the Combat Water Survival Test (CWST) and achieve a passing score.

MLSL 1130. Introduction to Military Fitness II
2 Credits (2P)
This course provides a hands-on overview of the fitness requirements needed to serve in the U.S. Army. Students are introduced to and expected to complete exercises and routines to build their individual strength, endurance, and speed to meet the demands of training and Soldier tasks.
Learning Outcomes
1. Describe the physical requirements for service in the U.S. Army.
2. Pass the Army Combat Fitness Test (ACFT).
3. Pass the Combat Water Survival Test (CWST).

MLSL 2110. Foundations of Army Leadership I
3 Credits (2+1,2P)
This course focuses on leadership and ethics. The course adds depth to the Cadets knowledge of the different leadership styles. Cadets will conduct a leadership analysis of famous leaders and self-assessment of their leadership style. The Army Profession is presented through understanding Culture Awareness, Values, Ethics, and how to apply both to different situations they may encounter as a leader. Army Values and Ethics and their relationship to the Law of Armed Conflict (LOAC) and philosophy of military service are presented through video clips and historical vignettes followed small group discussions with cadets.
Learning Outcomes
1. Apply the Army leader attributes and competency categories described in the Army Leadership Requirements Model.
2. Design and implement strategies for creating and sustaining an organizational climate of trust in which all individuals are treated with dignity and respect.
3. Develop a systematic approach to prioritizing, planning, preparing, executing, evaluating, and assessing training exercises and demonstrate their execution.
4. Use critical and creative thinking skills to analyze historical leaders and develop a personal leadership philosophy.

MLSL 2110L. Foundations of Army Leadership I Laboratory
1,3 Credits (1,3P)
Planning, coordination, execution and evaluation of training and activities in a collaborative training environment with both basic and advanced course students from within the ROTC program. Students develop and refine leadership skills in positions of responsibility. Restricted to Las Cruces campus only.
Learning Outcomes
1. Demonstrate proficiency in individual Soldier skills.
2. Apply Army customs and courtesies.
3. Demonstrate effective team, squad, and platoon movement drills by conducting exercises and adhering to tactical procedures.

MLSL 2120. Foundations of Army Leadership II
3 Credits (2+1,2P)
This course focuses on Army doctrine and decision-making. The course begins with analytical techniques, creative thinking skills, and the Army problem-solving process related to situations faced by leaders when making decisions. Troop Leading Procedures (TLPs) and Operations Orders (OPORDs) will lead Cadets to understand Army Doctrine and Symbology. Squad tactics will be covered in classes on Offensive Operations and Defensive Operations inside of the Army's operating environmental concept of Multidomain Operations.
Learning Outcomes
1. Apply the Army leader attribute and competency categories from the Army Leadership Requirements Model by demonstrating their integration into various leadership plans.
2. Implement strategies to create and sustain an organizational climate of trust by developing plans that promote dignity and respect for all individuals.
3. Develop and apply an approach to prioritizing, planning, preparing, executing, evaluating, and assessing training by creating and demonstrating successful exercise plans in a practical setting.
4. Demonstrate critical and creative thinking to analyze complex decision-making scenarios related to Army doctrine and tactics, develop solutions, and present a decision-making strategy that addresses the challenges of Multidomain Operations, Offensive Operations, and Defensive Operations.

MLSL 2120L. Foundations of Army Leadership II Lab
1 Credit (1,3P)
Cadets apply their knowledge outside the classroom in hands-on performance-oriented environments during the weekly lab, which is facilitated by MS III Cadets and supervised by MSIVs and cadre.
Prerequisite: MLSL 2120.
Learning Outcomes
1. Demonstrate proficiency in individual Soldier skills by successfully executing practical exercises as assessed by MS IVs and cadre.

2. Apply Army customs and courtesies in various lab scenarios and perform protocols correctly.
3. Coordinate team, squad, and platoon exercises by leading these exercises in a lab setting and adhering to tactical procedures.

MLSL 2129. Foundations of Military Fitness I
2 Credits
This course provides a hands-on overview of the fitness requirements needed to serve in the U.S. Army. Students are introduced to, and expected to complete exercises and routines to build their individual strength, endurance, and speed to meet the demands of training and Soldier tasks.
Learning Outcomes
1. Summarize the physical requirements for service in the US Army.
2. Pass the Army Combat Fitness Test (ACFT).
3. Pass the Combat Water Survival Test (CWST).

MLSL 2130. Foundations of Military Fitness II
2 Credits (2P)
This course provides a hands-on overview of the fitness requirements needed to serve in the U.S. Army. Students are introduced to and expected to complete exercises and routines to build their individual strength, endurance, and speed to meet the demands of training and Soldier tasks.
Learning Outcomes
1. Summarize the physical requirements for service in the United States Army.
2. Pass the Army Combat Fitness Test (ACFT).
3. Pass the Combat Water Survival Test (CWST).

MLSL 2992. Directed Studies in Military Science
1-3 Credits
Independent projects conducted under the direction of designated faculty.
Learning Outcomes
1. Identify and articulate key concepts and theories relevant to the specific topic of study by preparing a comprehensive research paper, report, portfolio, or presentation that synthesizes current knowledge and insights.

MLSL 3103. Recent American Military History
3 Credits (3)
History explains the present and informs the future. We will cover America's major military engagements from the Colonial Period to today's headlines. Whatever challenges you encounter as a leader – conflict resolution, resource limitations, teamwork deficiencies – leaders who served before you confronted many of the same issues. You can draw from their experiences to create your own solution. History teaches that while we may learn from our mistakes, it is generally much less painful to learn from the mistakes of others.
Learning Outcomes
1. Describe the military's role in society.
2. Examine the evolution of war and the progression of military professionalism.
3. Analyze the major wars fought by the US Army, using the Principles of War.
4. Discuss the role of the US military in joint operations.
5. Discuss the role of the US Army in humanitarian operations and nation-building at home and abroad.
6. Analyze lessons learned from military history to the Contemporary Operating Environment.

MLSL 3110. Leading Small Organizations I
3 Credits (3)
Part of the Senior ROTC Advanced Course, this course provides a Focus on training management and the warfighting functions. It is an academically challenging course were Cadets study, practice, and apply the fundamentals of Training Management and how the Army operates through the Warfighting functions. At the conclusion of this course, Cadets will be capable of planning, preparing, and executing training for a squad conducting small unit tactics. Includes one lab meeting per week using peer facilitation overseen by MSL IV, supervised by ROTC Cadre and three physical fitness sessions per week. Students must meet Basic Course of Military Science requirements to enroll in this course.
Corequisite: MLSL 3110L.
Learning Outcomes
1. Demonstrate an understanding of leadership theories and principles.
2. Foster positive and open communication.
3. Engage in reflective practice to assess personal growth and learning throughout the course.
4. Collaborate effectively within the ROTC cadet cohort.
5. Develop effective communication skills to peers, cadre, and instructors.
6. Apply leadership skills in a real-world context Reflect on personal leadership strengths and areas for growth.
7. Demonstrate the ability to adapt to constructive feedback and guidance.
8. Identify strategies for continuous improvement in leadership skills.
9. Work as a team to address challenges and enhance the ROTC program.

MLSL 3110L. Leading Small Organizations I Lab
1 Credit (1,3P)
Planning, coordination, execution and evaluation of training and activities with advance course students and ROTC program. Students develop and refine leadership skills in positions of responsibility. Open only to students taking MLSL 3110.
Corequisite(s): MLSL 3110.
Learning Outcomes
1. Collaborate effectively within the ROTC cadet cohort.
2. Demonstrate an understanding of leadership theories and principles.
3. Apply leadership skills in a real-world context Reflect on personal leadership strengths and areas for growth.
4. Develop effective communication skills to peers, cadre, and instructors.
5. Foster positive and open communication.
6. Demonstrate the ability to adapt to constructive feedback and guidance.
7. Engage in reflective practice to assess personal growth and learning throughout the course.
8. Identify strategies for continuous improvement in leadership skills.
9. Work as a team to address challenges and enhance the ROTC program.

MLSL 3120. Leading Small Organizations II
3 Credits (3)
Part of the Senior ROTC Advanced Course, this course provides a focus on applied leadership in small unit operations. Cadets will be capable of

planning, coordinating, navigating, motivating and leading a platoon in the execution of a mission. This includes one lab meeting per week using peer facilitation overseen by MSL IVs, supervised by ROTC Cadre and three physical fitness sessions per week. Successful completion of this course is a requirement to Cadet Summer Training Advance Camp during the summer, at Fort Knox, KY. Successful in completion of this course is a requirement to attend Summer Camp or Advanced Camp during the summer.
Prerequisite: MLSL 3110.
Corequisite: MLSL 3120L.
Learning Outcomes

1. Focus on applied leadership in small unit operations.
2. Cadets study, practice, and apply the fundamentals of direct level leadership and small unit tactics at the platoon level.
3. Cadets will be capable of planning, coordinating, navigating, motivating and leading a platoon in the execution of a mission.

MLSL 3120L. Leading Small Organizations II Lab
1 Credit (1,3P)
Practice and refinement of leadership skills. Different roles assigned for students at different levels in the program. Planning, coordination, execution and evaluation of training and activities with advance course students and ROTC program. Open to students taking MLSL 3120.
Corequisite: MLSL 3120.
Learning Outcomes

1. Leadership Development: Demonstrate an understanding of leadership theories and principles, Apply leadership skills in a real-world context Reflect on personal leadership strengths and areas for growth.
2. Effective Communication: Develop effective communication skills to peers, cadre, and instructors, Foster positive and open communication, Demonstrate the ability to adapt to constructive feedback and guidance.
3. Reflective Practice: Engage in reflective practice to assess personal growth and learning throughout the course, Identify strategies for continuous improvement in leadership skills.
4. Teamwork and Collaboration: Collaborate effectively within the ROTC cadet cohort, work as a team to address challenges and enhance the ROTC program.
5. Time Management and Goal Setting: Learn time management techniques, Learn and apply study skills, Learn to develop SMART goals and implement plans to achieve them.

MLSL 3129. Military Fitness III
2 Credits (2)
A general program that focuses on activities and principles that promote physical fitness, achieve and maintain athletic prowess, and accomplish related research and service goals. Includes instruction in human movement studies, motivation studies, rules and practice of specific sports, exercise and fitness principles and techniques, basic athletic injury prevention and treatment, and organizing and leading fitness and sports programs.
Prerequisite: MLSL 2229.
Learning Outcomes

1. Demonstrate an understanding of leadership theories and principles.
2. Work as a team to address challenges and enhance the ROTC program.
3. Collaborate effectively within the ROTC cadet cohort.
4. Identify strategies for continuous improvement in leadership skills.
5. Engage in reflective practice to assess personal growth and learning throughout the course.
6. Demonstrate the ability to adapt to constructive feedback and guidance.
7. Foster positive and open communication.
8. Develop effective communication skills to peers, cadre, and instructors.
9. Apply leadership skills in a real-world context Reflect on personal leadership strengths and areas for growth.

MLSL 3130. Remember Bataan
2 Credits (2)
This will be a history course that explores the impacts of WWII on the state of New Mexico, with a particular emphasis on the Battle of Bataan. This course will incorporate a few different approaches to achieve the desired learning objectives listed below. 1) Historical Approach: The traditional lecture-based approach to history will be utilized to cover some of the course content. Two texts will largely inform the discussion: Dorothy Cave's Beyond Courage and It Tolled for New Mexico by Eva Matson. 2) Living History: Examining living history artifacts that exist throughout the state; discussions with families of survivors; discussions about what the legacy of Bataan means to today's society. 3) Service-based learning: This is an educational approach that integrates meaningful community service with academic learning. In a service-based learning course, students engage in hands-on experiences that address real community needs while reflecting on and applying academic concepts. The goal is to enhance students' understanding of course content, develop their civic responsibility, and foster a sense of social awareness. Only one module of the course will be devoted to this style of learning. Instructors will steer students towards volunteering with the Remember Bataan Foundation, volunteering at White Sands Missile Range to support the Bataan Memorial Death March, or designed and implementing their own community service initiative in close coordination with and incorporating guidance from the instructors if they decide to go this third route. May be repeated up to 8 credits.
Learning Outcomes

1. Understanding the Context of World War II: Define the key events and factors that led to the outbreak of World War II, explain the geopolitical and economic situation of New Mexico before the war.
2. Analyzing New Mexico's Role in the War Effort: Assess the contributions of New Mexico to the war effort, including the development of the Manhattan Project and the establishment of military bases.
3. Examining Social Changes on the Home Front: Describe the social and economic changes that occurred in New Mexico during World War II, analyze the impact of wartime policies on women, minorities, and everyday life in the state.
4. Exploring the Battle of Bataan: Summarize the key events and significance of the Battle of Bataan, evaluate the role of New Mexican units and individuals in the battle.
5. Examining the Experiences of POWs and Veterans: Explore the experiences of New Mexican soldiers as prisoners of war in Bataan, analyze the challenges faced by veterans upon their return to New Mexico and their integration into post-war society.
6. Assessing Economic and Technological Changes: Evaluate the economic boom in New Mexico after World War II, examine the technological advancements that occurred and their long-term effects on the state.

7. Analyzing the Legacy and Commemoration: Assess how the Battle of Bataan is memorialized in New Mexico, analyze the lasting impact of World War II on the state and its modern perspectives.
8. Research and Communication Skills: Conduct independent research on specific aspects of New Mexico's history during World War II, communicate findings effectively through written assignments and discussions.
9. Critical Thinking and Synthesis: Apply critical thinking skills to analyze historical sources and perspectives, synthesize information to form well-reasoned arguments about the impact of World War II on New Mexico. 1
10. Cultural Competency: Recognize and appreciate the diverse contributions of individuals from different backgrounds in New Mexico during World War II, understand the cultural implications of wartime experiences on various communities within the state.

MLSL 3992. Advanced Directed Studies
1,3 Credits (1,3)
Directed individual study of advanced subjects under the guidance of ROTC Instructors.
Learning Outcomes
1. Demonstrate an understanding of leadership theories and principles.
2. Demonstrate the ability to adapt to constructive feedback and guidance.
3. Engage in reflective practice to assess personal growth and learning throughout the course.
4. Identify strategies for continuous improvement in leadership skills.
5. Collaborate effectively within the ROTC cadet cohort.
6. Work as a team to address challenges and enhance the ROTC program.
7. Foster positive and open communication.
8. Develop effective communication skills to peers, cadre, and instructors.
9. Apply leadership skills in a real-world context Reflect on personal leadership strengths and areas for growth.

MLSL 3999. Cadet Summer Training Advanced Course
3 Credits (3)
Advanced Camp is a 31-day training event which takes place at Fort Knox, KY. Cadets are mentally and physically tested during a 12-day consequence driven field training exercise that replicates a combat training center rotation. Successful completion of the Advanced Camp is a requirement for commissioning. Each cadet will be evaluated during the time they are at Advanced Camp.
Prerequisite: MLSL 3110, MLSL 3110L, MLSL 3120, MLSL 3120L.
Learning Outcomes
1. Designed for the cadet to demonstrate proficiency to the Advanced Camp Instructor.
2. Cadets are evaluated on their ability to lead at the Squad and Platoon levels, both in garrison and tactical environments.
3. Assess a Cadet's ability to demonstrate proficiency in basic officer leadership tasks.

MLSL 4110. Leadership Challenges and Goal Setting
3 Credits (3)
Part of the Senior ROTC Advanced Course, this course provides a focus on development of the Army Officer. It is an academically challenging course were Cadets develop knowledge, skills, and abilities to plan, resource, and assess training at the small unit level. Cadets also learn about Army programs that support counseling subordinates and evaluating performance, values and ethics, career planning, and legal responsibilities. At the conclusion of this course, Cadets will be familiar with how to plan, prepare, execute, and continuously assess the conduct of training at the company or field grade officer level. Includes a lab per week overseeing MSL IV lesson facilitation and supervised by ROTC Cadre and three physical fitness sessions per week.
Prerequisite: MLSL 3120.
Corequisite: MLSL 4110L.
Learning Outcomes
1. Leadership and the Army Profession: Proficiency in creating and sustaining an organizational climate of trust in which all individuals are treated with dignity and respect, Proficiency in the Army leader attribute and competency categories described in the Leadership Requirements Model, Proficiency in developing others (i.e. setting conditions, creating opportunity, providing feedback, and enhancing learning) across the institutional, operational, and self-development domains, Proficiency as an Army professional who embraces the Army's culture of service, instills discipline, and lives the Army Values.
2. Mission Command: Proficiency in the principles of mission command, Proficiency in the elements of command and the elements of control, Proficiency in C2 Warfighting Function tasks and employment of the C2 system to generate and apply combat power, Proficiency in the fundamentals of the operations process to enable leaders to understand, visualize, describe, direct, lead, and assess operations, Proficiency in critical creative thinking.
3. Operations: Proficiency in synchronizing all Warfighting Functions in Multi-Domain Operations in support of Joint Operations, Proficiency in understanding the Operational Environment across all domains, Proficiency in sustainment functions supporting Army Operations.
4. Training: Proficiency in prioritizing, planning and preparing, executing, evaluating and assessing training.

MLSL 4110L. Leadership Challenges and Goal Setting Lab
1,3 Credits (1,3P)
Different roles assigned for students at different levels in the program. Practice and refinement of leadership skills. Planning coordination, execution and evaluation of training and activities with basic course students and ROTC program. This course is a leadership lab and its for all MLSL levels of the program as they all work together in getting all of the drills and trainings done with one another.
Corequisite: MLSL 4110.
Learning Outcomes
1. Leadership and the Army Profession: Proficiency in creating and sustaining an organizational climate of trust in which all individuals are treated with dignity and respect, Proficiency in the Army leader attribute and competency categories described in the Leadership Requirements Model, Proficiency in developing others (i.e. setting conditions, creating opportunity, providing feedback, and enhancing learning) across the institutional, operational, and self-development domains, Proficiency as an Army professional who embraces the Army's culture of service, instills discipline, and lives the Army Values.
2. Mission Command: Proficiency in the principles of mission command, Proficiency in the elements of command and the elements of control, Proficiency in C2 Warfighting Function tasks and employment of the C2 system to generate and apply combat power, Proficiency in the fundamentals of the operations process to enable leaders to understand, visualize, describe, direct, lead, and assess operations, Proficiency in critical creative thinking.
3. Operations: Proficiency in synchronizing all Warfighting Functions in Multi-Domain Operations in support of Joint Operations, Proficiency

in understanding the Operational Environment across all domains, Proficiency in sustainment functions supporting Army Operations.
4. Training: Proficiency in prioritizing, planning and preparing, executing, evaluating and assessing training.

MLSL 4120. Transition to Lieutenant
3 Credits (3)
The final course within the Senior ROTC Advanced Course, this course is an academically challenging course were Cadets further develop knowledge, skills, and abilities required of junior officers pertaining to the Army in Unified Land Operations and Company Grade Officer roles and responsibilities. This course includes reading assignments, homework assignments, small group assignments, briefings, case studies, practical exercises, a mid-term exam, and an Oral Practicum as the final exam. The Oral Practicum explores the Cadet's knowledge of how they will be prepared for the 20 Army Warfighting Challenges (AWFC) covered throughout the ROTC Advanced Course. Successful completion of this course will assist in preparing Cadets for their BOLC B course following graduation and commissioning. It is a mandatory requirement for commissioning. Includes a lab per week overseeing MSL III lesson facilitation and supervised by ROTC Cadre and three physical fitness sessions per week.
Prerequisite: MLSL 4110.
Corequisite: MLSL 4120L.
Learning Outcomes
1. Leadership and the Army Profession: Proficiency in creating and sustaining an organizational climate of trust in which all individuals are treated with dignity and respect, Proficiency in the Army leader attribute and competency categories described in the Leadership Requirements Model, Proficiency in developing others (i.e. setting conditions, creating opportunity, providing feedback, and enhancing learning) across the institutional, operational, and self-development domains, Proficiency as an Army professional who embraces the Army's culture of service, instills discipline, and lives the Army Values.
2. Mission Command: Proficiency in the principles of mission command, Proficiency in the elements of command and the elements of control, Proficiency in C2 Warfighting Function tasks and employment of the C2 system to generate and apply combat power, Proficiency in the fundamentals of the operations process to enable leaders to understand, visualize, describe, direct, lead, and assess operations, Proficiency in critical creative thinking.
3. Operations: Proficiency in synchronizing all Warfighting Functions in Multi-Domain Operations in support of Joint Operations, Proficiency in understanding the Operational Environment across all domains, Proficiency in sustainment functions supporting Army Operations.
4. Training: Proficiency in prioritizing, planning and preparing, executing, evaluating and assessing training.

MLSL 4120L. Transition to Lieutenant Lab
1,3 Credits (1,3P)
Different roles assigned for students at different levels in the program. Practice and refinement of leadership skills. Planning, coordination, execution, and evaluation of training and activities with basic course students and ROTC program.
Corequisite: MLSL 4120.
Learning Outcomes
1. Leadership and the Army Profession: Proficiency in creating and sustaining an organizational climate of trust in which all individuals are treated with dignity and respect, Proficiency in the Army leader attribute and competency categories described in the Leadership Requirements Model, Proficiency in developing others (i.e. setting conditions, creating opportunity, providing feedback, and enhancing learning) across the institutional, operational, and self-development domains, Proficiency as an Army professional who embraces the Army's culture of service, instills discipline, and lives the Army Values.
2. Mission Command: Proficiency in the principles of mission command, Proficiency in the elements of command and the elements of control, Proficiency in C2 Warfighting Function tasks and employment of the C2 system to generate and apply combat power, Proficiency in the fundamentals of the operations process to enable leaders to understand, visualize, describe, direct, lead, and assess operations, Proficiency in critical creative thinking.
3. Operations: Proficiency in synchronizing all Warfighting Functions in Multi-Domain Operations in support of Joint Operations, Proficiency in understanding the Operational Environment across all domains, Proficiency in sustainment functions supporting Army Operations.
4. Training: Proficiency in prioritizing, planning and preparing, executing, evaluating and assessing training.

MLSL 4129. Military Fitness IV
2 Credits (2)
A general program that focuses on activities and principles that promote physical fitness, achieve and maintain athletic prowess, and accomplish related research and service goals. Includes instruction in human movement studies, motivation studies, rules and practice of specific sports, exercise and fitness principles and techniques, basic athletic injury prevention and treatment, and organizing and leading fitness and sports programs. May be repeated up to 6 credits.
Prerequisite: MLSL 3329.
Learning Outcomes
1. Proficiency in developing others (i.e. setting conditions, creating opportunity, providing feedback, and enhancing learning) across the institutional, operational, and self-development domains.
2. Proficiency in creating and sustaining an organizational climate of trust in which all individuals are treated with dignity and respect.
3. Proficiency as an Army professional who embraces the Army's culture of service, instills discipline, and lives the Army Values.
4. Proficiency in the Army leader attribute and competency categories described in the Leadership Requirements Model.

MLSL 4992. Practicum
1,3 Credits (1,3+1,3P)
Independent projects conducted under the direction of the Professor of Military Science, and concerned with analysis of selected leadership or management problems. Course not eligible for S/U grade.
Learning Outcomes
1. Leadership and the Army Profession.
2. Proficiency in creating and sustaining an organizational climate of trust in which all individuals are treated with dignity and respect.
3. Proficiency as an Army professional who embraces the Army's culture of service, instills discipline, and lives the Army Values.
4. Proficiency in developing others (setting conditions, creating opportunity, providing feedback, and enhancing learning) across the institutional, operational, and self-development domains.
5. Proficiency in the Army leader attribute and competency categories described in the Leadership Requirements Model.

MOLB-MOLECULAR BIOLOGY

MOLB 448. Special Research Problems
1-3 Credits

Individual investigation, theoretical or experimental, under the supervision of a molecular biology faculty member. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

MOLB 520. Molecular Cell Biology
3 Credits (3)
Same as BIOL 520.

MOLB 542. Biochemistry I
3 Credits (3)
Same as BCHE 542. B or better required.

MOLB 545. Molecular and Biochemical Genetics
3 Credits (3)
Same as BCHE 545 and BIOL 545.

MOLB 546. Biochemistry II
3 Credits (3)
Same as BCHE 546.

MOLB 550. Topics in Molecular Biology
1-3 Credits
Selected topics of current interest in field of molecular biology for master's level students. May be repeated up to 12 credits.
Learning Outcomes
1. Learning goals are dependent upon topic and instructor.

MOLB 590. Discussions in Molecular Biology
1 Credit (1)
Oral presentations of ongoing research and/or research proposal for the masters thesis. Must be repeated twice for masters and a minimum of three times for doctoral students. May be repeated up to 4 credits.
Learning Outcomes
1. To expose students to the fundamentals of speaking, including organization, and listening.
2. To understand and gain practice oral presentations.
3. Encourage critical thinking and discussion of scientific material during presentations.

MOLB 597. Laboratory Rotations/Research Discussions
1-3 Credits
All entering students are required to take at least one credit, during their first semester, in which they will circulate through at least three different labs working on assigned problems and discussing research programs. May be repeated for a maximum of 4 credits. Graded S/U.

MOLB 598. Special Research Programs
1-3 Credits
Individual investigation, experimental or theoretical, under the supervision of a molecular biology faculty member. Course may be repeated up to a total of 6 credits with committee approval.

MOLB 599. Master's Thesis
1-15 Credits (1-15)
Experimental and scholarly research leading to the preparation of a master's thesis.

MOLB 600. Molecular Biology Research
1-15 Credits
Laboratory research efforts prior to successful completion of doctoral comprehensive exam.

MOLB 650. Advanced Topics in Molecular Biology
1-3 Credits
Discussions and lectures on topics of current interest in molecular biology for doctoral students.

MOLB 698. Advanced Research Projects
1-9 Credits
Individualized special research assignments for doctoral-level students. Up to 9 credits, with approval of committee. Graded S/U.

MOLB 700. Doctoral Dissertation Research
1-15 Credits
Research for doctoral students after completing comprehensive exams.

MUSC-MUSIC

MUSC 1110G. Music Appreciation: Jazz
3 Credits (3)
This course explores the ideas of music in society and its cultural relevance and is designed to increase the students' appreciation of music as well as to enhance their listening skills. Students are introduced to various periods, styles, and composers of music and become acquainted with knowledge and appreciation of Jazz from various cultures and times.
Learning Outcomes
1. Develop a vocabulary of musical terms, and be able to describe music using those terms
2. Demonstrate knowledge of composers, their music and their relationship to historical periods
3. Recognize how music played and plays a political, social, and cultural function
4. Identify well-known pieces and the historical and social context in which they were composed
5. Demonstrate basic understanding of music notation and musical communication

MUSC 1130G. Music Appreciation: Western Music
3 Credits (3)
This course explores the ideas of music in society and its cultural relevance and is designed to increase the students' appreciation of music as well as to enhance their listening skills. Students are introduced to various periods, styles, and composers of music and become acquainted with knowledge and appreciation of Western music from various cultures and times.
Learning Outcomes
1. Develop a vocabulary of musical terms, and be able to describe music using those terms
2. Demonstrate knowledge of composers, their music and their relationship to historical periods
3. Recognize how music played and plays a political, social, and cultural function
4. Identify well-known pieces and the historical and social context in which they were composed
5. Demonstrate basic understanding of music notation and musical communication

MUSC 1210. Fundamentals of Music for Non-majors
3 Credits (3)
A beginning course in the fundamentals of music, this course includes notation, scales, key signatures and intervals. Aural comprehension is introduced through singing intervals, scales and triads and dictating simple rhythmic and melodic patterns and students explore the basic components of music. Traditional Grading with RR.

Learning Outcomes

1. Demonstrate and apply standard notation of pitch, rhythm, scales, intervals, key signatures, triads, and simple melodic and harmonic composition
2. Develop and improve basic aural skills
3. Read musical notation
4. Improve and expand understanding of fundamental musical techniques and concepts

MUSC 1310. Recital Attendance
0.5 Credits (.5+1P)
This course is for music students to attend and participate in a good number of convocation, concert, and recital performances, creating a wider appreciation for the performing arts. May be repeated up to 4 credits. Restricted to: Music and Music Education majors. S/U Grading with RR. Restricted to Las Cruces campus only.

Learning Outcomes

1. Encourage student observation of serious music
2. Provide opportunities for public performances
3. To create a greater sense of community within the student body

MUSC 1410. Introduction to Music Education
2 Credits (2)
This course is an overview of teaching in the music classroom through readings and observations. Students will be introduced to the skills needed to become a reflective educator, develop observation techniques, and demonstrate knowledge of the current state of the profession. Restricted to Las Cruces campus only.

Learning Outcomes

1. Make observations and analyze the current state of musical education in public schools
2. Describe characteristics of good teaching in music
3. Articulate a personal philosophy of music education
4. Reflect on personal strengths and weaknesses as a teacher of music

MUSC 1440. Class Voice I
1 Credit (1)
Group instruction in voice and vocal pedagogy for instrumental Music Education majors, offering basic principles of healthy vocal production with particular attention to diction, development of vocal range, and the ability to impart that knowledge to elementary, junior and/or high school age students. Restricted to: Music Education majors. Traditional Grading with RR. Restricted to Las Cruces campus only.

Learning Outcomes

1. Provide the basic understanding of healthy vocal production. Including, but is not limited to, the following topics: Expanding vocal range; Learning how to practice and learn songs effectively and efficiently; Provide basic understanding of vocal pedagogy; Introduction to diction
2. Aims to equip students with the ability to impart that knowledge to elementary, junior and/or high school age students.

MUSC 1450. Ear Training I
1 Credit (1)
To develop the ability to accurately hear, identify, sing and notate musical elements including rhythm, melody, intervals and harmony Traditional Grading with RR. Restricted to Las Cruces campus only. May be repeated up to 1 credit.

Learning Outcomes

1. Counting rhythms at sight using the Eastman Counting System.
2. Singing melodies at sight using solfege syllables.
3. Writing out rhythmic patterns.
4. Writing out melodic patterns.
5. Identifying and singing intervals.
6. Identifying and singing chord / triad qualities.

MUSC 1451. Ear Training II
1 Credit (1)
To develop the ability to accurately hear, identify, sing and notate musical elements including rhythm, melody, intervals and harmony Restricted to Las Cruces campus only.
Prerequisite(s): Grade of C- or better in MUSC 1450.

Learning Outcomes

1. Counting rhythms at sight using the Eastman Counting System
2. Singing melodies at sight using solfege syllables
3. Writing out rhythmic patterns
4. Writing out melodic patterns
5. Identifying and singing intervals
6. Identifying and singing chord / triad qualities

MUSC 1460. Music Theory I
3 Credits (3)
Introduction to vocabulary and syntax of 4-voice 18th c. chorale music through study and harmonic analysis. May be repeated up to 3 credits.

Learning Outcomes

1. To learn the vocabulary and syntax of 4-voice 18th c. chorale music through study and harmonic analysis.

MUSC 1461. Music Theory II
3 Credits (3)
Expansion of vocabulary and syntax of 4-voice 18th c. chorale music through study, harmonic analysis, and part writing.
Prerequisite(s): Grade of C or better in MUSC 1460.

Learning Outcomes

1. To expand and apply the vocabulary and syntax of 4-voice, 18th c. chorale music through study, harmonic analysis, and part writing.

MUSC 1470. Functional Piano I
2 Credits (2)
Scales, chords, memorization. Harmonization of simple melodies with the ability to play simple melodies and rhythms. May be taken for unlimited credit. Restricted to music majors. No S/U option.

Learning Outcomes

1. 5 finger hand position in all keys
2. I-IV-I-V7-I cadences in all keys
3. One octave scales with hands together in C, G, D and F (major and minor)
4. Root position cross–over triads, solid and broken (major and minor)
5. Simple sight reading, harmonizing and transposition
6. Prepared pieces from the textbook
7. Simple improvisation
8. Play 2 simple vocal exercises
9. Identify intervals, key signatures and chords 1
10. Correct posture and hand position 1
11. Musical issues such as phrasing, slurs and dynamics 1
12. Good practice habits and techniques

MUSC 1471. Functional Piano II
2 Credits (2)

Scales, chords, memorization. Harmonization of simple melodies with the ability to play simple melodies and rhythms. May be taken for unlimited credit. Restricted to music majors. No S/U option.
Prerequisite: MUSC 1470 or consent of instructor.
Learning Outcomes
1. Two octave scales with hands separate in C, G, D, A, E, B and F (major and minor)
2. I-IV-I-V-V7-I cadences in above mentioned keys in root position and 1st inversion
3. Simple sight reading, harmonization and transposition
4. Prepared pieces from the book
5. Simple improvisation
6. Identify intervals, key signatures and chords
7. Correct posture and hand position
8. Musical issues such as phrasing, slurs and dynamics
9. Good practice habits and techniques

MUSC 1472. Functional Piano III
2 Credits (2)
For music majors preparing for the Piano Proficiency Examination. May be taken for unlimited credit. Restricted to music majors. No S/U option.
Prerequisite: MUSC 1471 or consent of instructor.
Learning Outcomes
1. Keys learned in previous semesters, adding F# and C# (D flat)
2. Secondary dominant chords added to cadence patterns
3. Two-octave, , root position arpeggios, major and minor
4. Intro to chord charts, harmonization
5. More difficult sight--reading and transpositions
6. More difficult prepared pieces
7. Accompany a piece for any instrument on the Mid-Term Recital (required)

MUSC 1992. Applied Music
1-2 Credits (1-2)
Private or group instruction for non-music majors, secondary instruments, and music majors preparing for 2000-level applied music. May be taken for unlimited credit. May be repeated up to 99 credits.
Learning Outcomes
1. Development of Musical Abilities.
2. Development of Technical Abilities.

MUSC 2110. Chamber Ensemble
1 Credit (1)
This course is an exploration of chamber ensembles, allowing students to develop their abilities with their instruments in a group setting. Students will gain a broader understanding of chamber ensemble through study of musical history, as well as various practice exercises and performances. May be repeated up to 16 credits. Restricted to Las Cruces campus only.
Prerequisite(s): by audition only.
Learning Outcomes
1. Improve performance skills
2. Develop and improve performance skills in a group setting
3. Develop understanding and interpretation within the context of music history
4. Refine and improve technical ability
5. Demonstrate proper technique and usage

MUSC 2120. Major Ensemble
1 Credit (1)
This course is an exploration of major ensembles, allowing students to develop their abilities with their instruments in a group setting. Students will gain a broader understanding of major ensemble through study of musical history, as well as various practice exercises and performances. May be repeated up to 24 credits.
Prerequisite: by audition only.
Learning Outcomes
1. Improve performance skills
2. Develop and improve performance skills in a group setting
3. Develop understanding and interpretation within the context of music history
4. Refine and improve technical ability
5. Demonstrate proper technique and usage

MUSC 2130. Jazz Ensemble
1 Credit (1)
This course is an exploration of jazz ensembles, allowing students to develop their abilities with their instruments in a group setting. Students will gain a broader understanding of jazz ensemble through study of musical history, as well as various practice exercises and performances. May be repeated up to 10 credits. Restricted to Las Cruces campus only.
Prerequisite(s): By audition only.
Learning Outcomes
1. Improve performance skills
2. Develop and improve performance skills in a group setting
3. Develop understanding and interpretation within the context of music history
4. Refine and improve technical ability
5. Demonstrate proper technique and usage
6. Develop and improve improvisation skills

MUSC 2132. Percussion Ensemble
1 Credit (1)
Study and performance of contemporary percussion ensemble literature. May be repeated up to 5 credits. Restricted to Las Cruces campus only.
Prerequisite(s): by audition only.
Learning Outcomes
1. Improve performance skills
2. Develop and improve performance skills in a group setting
3. Develop understanding and interpretation within the context of music history
4. Refine and improve technical ability
5. Demonstrate proper technique and usage

MUSC 2151. An Introduction to World Music, Jazz and Music Research
3 Credits (3)
Introduces world music and jazz within a historical and cultural context, considering significant musical figures, forms, genres, styles, and representative works. A major component will be the development of effective research and scholarly writing skills for the music major or minor. May be repeated up to 3 credits. Restricted to: Music majors and minors. Restricted to Las Cruces campus only.
Learning Outcomes
1. This course will cover fundamental concepts and styles associated with world music (ethnomusicology), jazz and popular music, an overview of the Western European tradition, and an intense focus on research and writing about music.
2. Emphasis will be placed on writing skills as they apply to the college experience in general and the world of music education and performance in particular.

3. Students will become acquainted with the diverse ways cultures create and are affected by their respective musical arts.
4. Focus will be on style evolution, forms, genres, composers, literature, and, where appropriate, performers

MUSC 2210. Diction I
2 Credits (2)
This course is designed to prepare students for singing in multiple languages using concepts of the International Phonetic Alphabet. Students will work to master the basics of phonetic singing to improve their overall musical abilities. Restricted to Las Cruces campus only.
Learning Outcomes
1. Correctly and consistently form vowel and consonant sounds when speaking and singing in multiple languages
2. Correctly and consistently transcribe texts in multiple languages using the International Phonetic Alphabet
3. Understand and explain the International Phonetic Alphabet's usage and symbols
4. Develop and apply the concept of lyric diction to singing
5. Gain fluency, accuracy, and confidence in pronunciation of sung text

MUSC 2220. Diction II
2 Credits (2)
This course serves as a continuing study in the concepts of the International Phonetic Alphabet. Students will continue to improve and practice their diction to develop their singing and musical abilities in order to begin the mastery of lyric diction. Restricted to music majors. Restricted to Las Cruces campus only.
Prerequisite: MUSC 2210 or consent of instructor.
Learning Outcomes
1. Correctly and consistently form vowel and consonant sounds when speaking and singing in multiple languages
2. Correctly and consistently transcribe texts in multiple languages using the International Phonetic Alphabet
3. Understand and explain the International Phonetic Alphabet's usage and symbols
4. Develop and apply the concept of lyric diction to singing.
5. Gain fluency, accuracy, and confidence in pronunciation of sung text.
6. Demonstrate ability to notate song texts according to IPA standards

MUSC 2240. Music History and Literature: Antiquity through Baroque
3 Credits (3)
Surveys Western art music within a historical and cultural context, considering significant musical figures, forms, genres, styles, and representative works from antiquity through the end of the Baroque era. An additional emphasis will be given to effective research and scholarly writing skills. May be repeated up to 3 credits.
Prerequisite: A grade of C- or better in MUSC 1450 and 1460.
Learning Outcomes
1. The purpose of the course is to survey the beginning history of music from the earliest ancient times through the Baroque period, ca.

MUSC 2310. Sound and Music Technology
1 Credit (1)
This course serves as an overview of current technologies and principles for the recording and production of sound, and the use of computer-based technologies for the production of music. Restricted to: MUSC,MED majors. Traditional Grading with RR. Restricted to Las Cruces campus only.
Prerequisite(s): MUSC 1460.
Learning Outcomes
1. Demonstrate fundamental knowledge of techniques and practices of music recording and production
2. Demonstrate ability to properly use computer-based technologies to produce and record music
3. Demonstrate ability to create music recordings
4. Work with a variety of recording, production, and sound reinforcement tools
5. Apply basic and mixed editing techniques
6. Use audio editing and file management techniques
7. Demonstrate knowledge of music technology vocabulary
8. Explain and understand the development of various music technologies

MUSC 2451. Ear Training III
1 Credit (1)
Continuation of MUSC 1451, advanced sight singing, dictation. Restricted to Las Cruces campus only.
Prerequisite(s): Grade of C- or better in MUSC 1451.
Learning Outcomes
1. Count rhythms at sight using the Eastman Counting System
2. Sing melodies at sight and prepared using Solfege syllables
3. Write out rhythmic patterns
4. Write out melodic patterns
5. Identify and singing intervals
6. Identify and sing chord / triad qualities
7. Write out harmonic dictation

MUSC 2452. Ear Training IV
1 Credit (1)
Continuation of MUS 2451, advanced sight singing, dictation. Restricted to Las Cruces campus only.
Prerequisite(s): Grade of C or better in MUSC 2451 and MUSC 2460.
Learning Outcomes
1. Count rhythms at sight using the Eastman Counting System
2. Sing scales and sequences as assigned for the level
3. Sing melodies at sight using solfege syllables
4. Write out rhythmic patterns in both simple and compound meters
5. Write out melodic patterns in both major and minor tonalities
6. Identify, label and sing intervals
7. Identify, label and sing chords and extended harmonic qualities, i.e. V7 and inversions
8. Write out harmonic progressions in both two and four part forms including secondary dominants and modulations.
9. Accurately detect melodic and rhythmic errors in dictation examples.

MUSC 2460. Music Theory III
3 Credits (3)
Analysis of Baroque and Classical Music. Vocabulary and syntax of 18th and 19th c. Western art music through study, chordal/formal analysis, and composition. Restricted to Las Cruces campus only.
Prerequisite(s): Grade of C or better in MUSC 1461.
Learning Outcomes
1. To learn and apply the vocabulary and syntax of 18th and 19th c. Western art music through study, chordal/formal analysis, and composition.

2. Topics covered include: Two-Voice Eighteenth Century Counterpoint; Fugue; Borrowed Chords; Neapolitan 6th Chords; Augmented 6th Chords; Sonata Form; Rondo Form.

MUSC 2461. Music Theory IV
3 Credits (3)
Analysis of Romantic, Post-Romantic, Impressionist, and Twelve-Tone Music. Vocabulary and syntax of late 19th and early 20th c. Western art music through study, micro/macro analysis, and composition. Restricted to Las Cruces campus only.
Prerequisite(s): Grade of C or better in MUSC 2460.
Learning Outcomes
1. To learn and apply the vocabulary and syntax of late 19th and early 20th c. music through study, micro/macro analysis, and composition.

MUSC 2470. Functional Piano IV
2 Credits (2)
For music majors preparing for Piano Proficiency Examination. May be taken for unlimited credit. Restricted to music majors. No S/U option. May be repeated up to 99 credits.
Prerequisite: MUSC 1472 or consent of instructor.
Learning Outcomes
1. Keys learned in previous semesters, adding A flat, E flat, and B flat
2. Secondary dominant chords added to cadence patterns, all inversions
3. Arpeggios, all inversions
4. More difficult sight--reading and transpositions
5. More difficult prepared pieces
6. Four part pieces (hymns)
7. Accompany a piece for any instrument onthe Mid-Term Recital (required) Score reading and transposition

MUSC 2510. Applied Music I
1-4 Credits
Individual instruction to develop technique, musicianship, performance and improvisational skills, as well as knowledge of significant repertoire. Prerequisite of an audition to register for course. May be repeated up to 16 credits.
Learning Outcomes
1. Individual instruction to develop technique, musicianship, performance and improvisational skills.

MUSC 2740. Pride Marching Band
1 Credit (1)
The Pride Marching Band performs at all NMSU home football games and select away games. The marching band is open to all students at NMSU and supports both instrumental and visual units. May be repeated up to 8 credits.
Learning Outcomes
1. To cultivate within the student a value system that encourages community service.
2. To provide the performer with experiences that will enable them to communicate thoughts/ideas/emotions in a unique and personal manner using his/her instrument, body, and physical motion.
3. To instill in students a commitment to life-long learning.
4. To promote personal growth through the rehearsal and performance of music, choreography, and drill of high quality.
5. To encourage students to continuously participate in and support artistic performances following graduation.

MUSC 2993. Opera Workshop
1 Credit (1)
Study, translation, analysis, rehearsal and performance of opera. Entry into course by audition. May be repeated up to 10 credits.
Learning Outcomes
1. Students will learn fundamentals of acting for singers, stage technique, movement, role preparation, character development, and audition techniques.
2. Students will prepare and perform Opera/Musical Theatre Scenes.

MUSC 2996. Special Topics I
1-3 Credits
Emphasis on special areas of music; designed for highly motivated students. May be repeated up to 99 credits.
Learning Outcomes
1. Varies.

MUSC 301. Marching Band Techniques
2 Credits (2)
This course will help students develop the techniques needed to administer and teach all aspects of a contemporary high school marching band. This includes drill conception and design, instruction, organization, and administration. Stylistic varieties of marching fundamentals, show conception, fundamentals of charting and teaching drill, computer-aided drill design, traditional show design, contemporary show design, rehearsal techniques, and organizational concepts. Restricted to: Music, Music Education majors. Traditional Grading with RR.
Learning Outcomes
1. Develop the techniques needed to administer and teach all aspects of a contemporary high school marching band.

MUSC 302. Music History and Literature: Classic through Romantic
3 Credits (3)
Surveys Western art music within a historical and cultural context, considering significant musical figures, forms, genres, styles, and representative works from the beginnings of the Classic era through the end of the Romantic era. An additional emphasis will be given to effective research and scholarly writing skills. Restricted to: Music Majors and Minors majors.
Prerequisite: A grade of C- or better in MUSC 2240.
Learning Outcomes
1. A study of Western Culture music from the beginnings of the Classic Era through the end of the Romantic Era.

MUSC 303. Music History and Literature: 20th Century Through the Present
3 Credits (3)
Surveys Western art music within a historical and cultural context, considering significant musical figures, forms, genres, styles, and representative works from the beginning of the 20th Century through the Present. An additional emphasis will be given to effective research and scholarly writing skills. Restricted to: MUS minors and majors.
Prerequisite: A grade of C- or better in MUSC 302.
Learning Outcomes
1. To develop an understanding Western Art Music within a historical and cultural context, focusing on representative works from the beginning of the 20th Century through the Present.

MUSC 315. Brass Techniques I
1 Credit (1)
Methods and techniques of teaching high brass instruments, for music education majors. Main campus only.

Learning Outcomes

1. To learn the fundamentals of playing the trumpet and horn.
2. To learn basic maintenance of the instrument and common problems that may arise.
3. Learn instrument assembly, embouchure formation, tone production, hand position and fingerings.

MUSC 316. Brass Techniques II

1 Credit (1)

Methods and techniques of teaching low brass instruments, for music education majors. Las Cruces campus student only.

Learning Outcomes

1. To learn the fundamentals of playing brass instruments.
2. To learn basic maintenance of the instrument and common problems that may arise.

MUSC 317. Woodwind Techniques I

1 Credit (1)

Methods and techniques of teaching woodwind instruments (clarinet and Basson), for music education majors. Las Cruces campus only.

Learning Outcomes

1. To prepare students to teach clarinet and bassoon at the beginning and intermediate levels in a public school environment.

MUSC 318. Woodwind Techniques II

1 Credit (1)

Methods and techniques of saxophone and oboe, for music education majors.

Learning Outcomes

1. To learn the fundamentals of playing the flute, saxophone, and oboe.
2. To learn basic maintenance of the instrument and common problems that may arise.
3. Learn instrument assembly, embouchure formation, hand position and fingerings.

MUSC 319. String Techniques I

1 Credit (1)

Methods and techniques of teaching low string instruments, for music education majors. Las Cruces Campus Only.

Learning Outcomes

1. Knowledge of pedagogy required to answer questions about posture, position, and technique for cello and bass in addition to history and evolution of the instruments.
2. Play Major scales in keys up to two sharps and two flats on both the cello and bass.

MUSC 321. Instrumental Techniques for Vocal Music Education Majors

2 Credits (2)

Methods of teaching brass, woodwind, percussion, stringed and fretted instruments for vocal music education majors. Restricted to: Music and Music Education majors. Traditional Grading with RR.

Learning Outcomes

1. Demonstrate an understanding of various approaches and teaching techniques that may be utilized in the instruction of beginning-level instrumental music students.
2. Develop knowledge of selection, purchase, and maintenance of equipment.

MUSC 322. Guitar Methods

1 Credit (1)

Methods and techniques of teaching guitar, for Music Education majors.

Learning Outcomes

1. Demonstrate appropriate strategies for teaching guitar in individual and class settings.
2. Diagnose and guide correct guitar performance techniques.
3. Have a working knowledge of guitar specific topics, including correct left- hand and right-hand position and technique, classical and American sitting position, finger style and flat pick technique, multi-part solo playing, chord strumming, reading standard notation, reading tablature.

MUSC 323. Percussion Technique I

1 Credit (1)

Methods and techniques of teaching fundamental percussion instruments (snare drum, timpani, keyboards and essential accessories).

Learning Outcomes

1. Demonstrate appropriate strategies for teaching percussion in individual and class settings.
2. Diagnose and guide correct percussion performance techniques.

MUSC 324. Percussion Technique II

1 Credit (1)

Methods and techniques of teaching marching percussion, drum set, and a continuation of techniques discussed in MUS 323. Restricted to: MUS,M ED majors. Traditional Grading with RR.

Prerequisite: A grade of C- or better in MUS 323.

Learning Outcomes

1. Demonstrate advanced strategies for teaching percussion in individual and class settings.

MUSC 325. Beginning Conducting

1 Credit (1)

A study of the fundamentals of conducting and rehearsal strategies with an emphasis on beginning technique applicable to all ensembles. Reading of musical scores with application via laboratory ensemble experience is included. Restricted to: Music and Music Education majors. May be repeated up to 1 credit.

Prerequisite: A grade of C or better in MUSC 2451 and MUSC 2460.

Learning Outcomes

1. Develop the musicianship of the student.
2. Development of basic conducting techniques.
3. Develop a knowledge of appropriate terminology, tempi, and transpositions.
4. Establishment of a gestural (nonverbal) vocabulary.
5. Cultivation of self-awareness and effective interaction through nonverbal communication.

MUSC 326. Instrumental Conducting

3 Credits (3)

Will continue from MUSC 325 in the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques as it relates to the instrumental ensemble. The class will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS,M ED majors. Traditional Grading with RR.

Prerequisite: A grade of C- or better in MUSC 325.

Learning Outcomes

1. Establishment of a gestural (nonverbal) vocabulary as it relates to the instrumental ensemble.

MUSC 327. Choral Conducting
3 Credits (3)
Continuation of conducting study with emphasis on choral rehearsal techniques, ensemble management, and literature. Restricted to: Music and Music Education majors. Traditional Grading with RR.
Prerequisite: A grade of C or better in MUSC 325.
Learning Outcomes
1. Establishment of a gestural (nonverbal) vocabulary as it relates to choral ensembles.

MUSC 330. Applied Music II
1-4 Credits
Continuation from MUS 2510. Individual instruction to develop technique, musicianship, performance and improvisational skills, as well as knowledge of significant repertoire. May be repeated up to 16 credits. Restricted to: Music and Music Education majors. Traditional Grading with RR.
Prerequisite: A grade of C or better in MUSC 2992 plus a juried audition.
Learning Outcomes
1. Individual instruction to develop technique, musicianship, performance and improvisational skills.

MUSC 340. Junior Recital
1 Credit (1)
Public solo performance under the supervision of the appropriate applied instructor. 30 minutes of musical performance is required. Consent of Instructor required.
Corequisite: MUSC 330.
Learning Outcomes
1. Development of the ability to Perform publicly in a solo capacity.
2. Development of practice skills and time management.

MUSC 341. BA Capstone
1-2 Credits (1-2)
The objective of the Capstone course for the BA degree in Music is to demonstrate the accumulation, understanding and knowledge of the student's course of study. This will take the form of an analytical paper, recital, research paper, composition or other equally encompassing project approved by the Instructor of Record. This may involve coursework from the student's minor area of study and be a multi-disciplinary collaborative effort. Restricted to: Music majors.
Prerequisite: A B- or better in MUSC 2460 and MUSC 302.
Learning Outcomes
1. Each project results in a scholarly and creative product that serves as a tangible and measurable indication of the extent to which students have mastered the critical thinking, reading, writing, and oral communication skills that are part of the learning objectives of the program.

MUSC 346. Elementary Music Methods
2 Credits (2)
Lesson planning, curriculum, teaching methodology, materials, and procedures for teaching music in an elementary school. Emphasis on methodology of Koday and Orff, teaching in a multicultural setting, and developing reflective practitioners. This course requires field experience in the public schools. May be repeated up to 2 credits.
Prerequisite: A grade of C or better in MUSC 1410.
Learning Outcomes
1. Students will identify and apply ideas from various music education pedagogical approaches including Orff and Kodaly.
2. The ability to develop lesson plans for primary school teaching.

MUSC 349. Secondary Music Methods
2 Credits (2)
Lesson planning, curriculum, teaching methodology, materials, and procedures for teaching music in the middle school and high school. Emphasis on teaching in a multicultural setting and developing reflective practitioners. Restricted to: Music Education majors.
Prerequisite(s): A grade of C or better in MUSC 346.

MUSC 350. Chamber Music
1 Credit (1)
Small performing ensembles that may include strings, woodwinds, brass, pianos, percussion, and voices. Prerequisite of an audition for this course. May be repeated up to 16 credits.
Learning Outcomes
1. Gain practical experience in the art of collaborative performance.
2. Prepare and perform chamber works.
3. Learn to express musical opinions, and to respect those of others.

MUSC 351. Opera Workshop
1 Credit (1)
Study, translation analysis, rehearsal and performance of opera or musical theater. Prerequisite of an audition. May be repeated up to 10 credits.
Learning Outcomes
1. Gain practical experience in the art of collaborative performance.
2. Learn to express musical opinions, and to respect those of others.
3. Prepare and perform a large work.

MUSC 360. Special Topics II
1-3 Credits
Emphasis on special areas of music; designed for highly motivated students. May be repeated up to 99 credits.
Learning Outcomes
1. Varies.

MUSC 361. Concert Choir II
1 Credit (1)
Composed of both music and nonmusic majors. Emphasis on vocal techniques, sight-singing, and basics of choral musicianship. Students must assume leadership role. Registration into course based on audition. May be repeated up to 88 credits.
Learning Outcomes
1. Demonstrate a thorough knowledge of the ensemble's repertoire.
2. Articulate an understanding of the fundamental practical and musical elements necessary to the development of a successful choral ensemble.
3. Possess an expanded knowledge of vocal technique, vocal health, choral techniques, choral repertoire, expressive diction, and the relationship between text and music.

MUSC 362. Philharmonic Orchestra II
1 Credit (1)
The University Philharmonic Orchestra is open to all students and performs a wide variety of standard orchestral literature. The orchestra performs each semester and the objectives include refining technique, stylistic characteristics, intonation, balance, bowings, color, rhythmic integrity and dynamics. Prerequisite of an audition. May be repeated up to 10 credits.
Learning Outcomes
1. Participants will improve the way they listen to themselves, to each other into the composers work.

2. Participants will also learn to perform with an adequate level of proficiency.
3. Identify how their individual parts relate to the rest of the orchestra.

MUSC 363. Jazz Ensembles II
1 Credit (1)
Performance ensemble that explore repertoire written for big band, including (but not limited to) dance band, swing, and contemporary compositions. May be repeated up to 10 credits.
Prerequisite: By audition only.
Learning Outcomes
1. Improve Performance Skills.
2. Improve Group Performance Skills.
3. Gain Improvisations Skills.
4. Develop knowledge of Repertoire.
5. Refine and improve technical ability.

MUSC 365. Composition I
2 Credits (2)
Significant forms for various media. Emphasis on structural aspects of original composition. May be repeated up to 2 credits.
Prerequisite: A grade of B or better in MUSC 1460.
Learning Outcomes
1. Demonstrate the ability to analyze a variety of musical compositions
2. Demonstrate the ability to develop musical compositions from basic melodic, harmonic, rhythmic, and formal structures
3. Create new musical compositions from variety of perspectives for smaller chamber ensembles

MUSC 368. University Singers II
1 Credit (1)
Select concert and touring choir of undergraduate and graduate students performing a cappella and accompanied choral literature. May be repeated up to 10 credits.
Prerequisite: By audition only.
Learning Outcomes
1. Develop Performance Skills.
2. Develop ensemble performance skills.
3. Refine and improve technical ability.
4. Demonstrate proper technique and usage.

MUSC 370. Wind Symphony II
1 Credit (1)
This elite ensemble of 50 highly qualified graduate and undergraduate students performs a varied repertoire of the highest quality literature for winds. Members will also perform concerts of chamber winds literature each semester. This ensemble is dedicated to professional level performance while fostering the musical growth of its members. Conducted by the Director of Bands, this group serves as the flagship for the entire university bands program. May be repeated up to 10 credits.
Prerequisite: by audition only.
Learning Outcomes
1. Develop Performance Skills.
2. Develop Ensemble Performance Skills.
3. Demonstrate proper technique and usage.
4. Develop understanding and interpretation within the context of music history.
5. Refine and improve technical ability.

MUSC 372. Marching Band II
1 Credit (1)
Composed of both majors and nonmajors. Opportunity to perform all varieties of music in a contemporary style marching unit. May be repeated up to 5 credits.
Learning Outcomes
1. Develop and improve performance skills in a group setting.
2. Demonstrate proper technique and usage.
3. Refine and improve technical ability.
4. Develop understanding and interpretation within the context of music history.

MUSC 374. Percussion Ensembles II
1 Credit (1)
Study and performance of contemporary percussion ensemble literature. Students must assume a leadership role. May be repeated up to 5 credits.
Prerequisite: By audition only.
Learning Outcomes
1. Improve performance skills.
2. Develop and improve performance skills in a group setting.
3. Develop understanding and interpretation within the context of music history.
4. Refine and improve technical ability.
5. Demonstrate proper technique and usage.

MUSC 380. Symphonic Band II
1 Credit (1)
This is a select large ensemble, chosen by audition. It provides a challenging musical environment for skilled performers by programming repertoire that ranges from works for chamber winds, to standards of the wind band literature, to cutting edge literature. Conducted by the Associate Director of Bands, this ensemble is comprised of music majors and non-music majors alike and provides the less experienced student an opportunity to hone and refine performance skills. May be repeated up to 10 credits.
Prerequisite: By audition only.
Learning Outcomes
1. Improve Performance Skills.
2. Develop and improve performance skills in a group setting.
3. Develop understanding and interpretation within the context of music history.
4. Refine and improve technical ability.
5. Demonstrate proper technique and usage.

MUSC 386. Applied Music Pedagogy and Literature I
2 Credits (2)
Methods, materials, problems, literature, and techniques in teaching individual lessons. Consent of Instructor required.
Learning Outcomes
1. Development of appropriate pedagogical skills.
2. Development of ability to write program notes.

MUSC 390. Survey of Wind Literature
2 Credits (2)
An examination of beginning to advanced literature for wind bands with an emphasis on the needs of middle and high school ensembles. It will include a means to determine the quality of a piece as well as the standardized level of difficulty (grading).
Prerequisite: A grade of C- or better in MUSC 2452 and MUSC 2461.

Learning Outcomes

1. Understanding of wind band literature with an emphasis on the needs of middle and high school ensembles.
2. Understanding a means to determine the quality of a piece as well as the standardized level of difficulty.

MUSC 391. Survey of Orchestral Literature
2 Credits (2)
An examination of beginning to advanced literature for both string orchestra and symphony orchestra with an emphasis on the needs of middle and high school ensembles. A means to determine the quality of a piece as well as the standardized level of difficulty (grading) will be included. May be repeated up to 2 credits.
Prerequisite: A grade of C- or better in MUSC 2452 and MUSC 2461.
Learning Outcomes

1. Identify significant composers and compositions that are appropriate for all grade levels and applicable to teaching music through a performance-based environment in an orchestral setting
2. Determine the quality of a work based on aesthetic ideals
3. Determine appropriate programming strategies and repertoire selection dependent upon level of difficulty and/or varying ability levels.

MUSC 392. Survey of Choral Literature
2 Credits (2)
An examination of beginning to advanced literature for choir with an emphasis on the needs of middle and high school ensembles. A means to determine the quality of a piece as well as the standardized level of difficulty (grading) will be included. Restricted to: Music and Music Education majors.
Prerequisite: A grade of C- or better in MUSC 2452 and MUSC 2461.
Learning Outcomes

1. Identify significant composers and compositions that are appropriate for all grade levels and applicable to teaching music through a performance-based environment in a choral setting.

MUSC 393. Instructional Strategies I for Instrumentalists
2 Credits (2)
An examination of beginning to advanced literature for instrumentalists with an emphasis on the needs of middle and high school ensembles. The course includes a means to determine the quality of a piece as well as the standardized level of difficulty (grading). It also allows for full ensemble instrumentation to experience both playing the repertoire and peer teaching to better rehearsal skills.
Prerequisite: A grade of C- or better in MUSC 1410.
Learning Outcomes

1. The ability to assess the graded needs of middle and high school ensembles.
2. The development of rehearsal skills.

MUSC 394. Instructional Strategies II for Instrumentalists
2 Credits (2)
The course focuses on rehearsal techniques for middle and high school ensembles. It includes a means to determine the quality of a piece of music as well as the standardized level of difficulty (grading). Students must also passing the TEP exam in order to enroll in this course.
Prerequisite: A grade of C- or better in MUSC 1410.
Learning Outcomes

1. The development of rehearsal techniques for middle and high school ensembles

MUSC 395. Instructional Strategies I for Vocalists
2 Credits (2)
An examination of beginning to advanced literature for vocalists with an emphasis on the needs of middle and high school ensembles. The course includes a means to determine the quality of a piece as well as the standardized level of difficulty (grading). It also allows for full ensemble instrumentation to experience both playing the repertoire and peer teaching to better rehearsal skills. Students must also pass the TEP exam to enroll in this course.
Prerequisite: A grade of C- or better in MUSC 1410.
Learning Outcomes

1. The ability to assess the graded needs of middle and high school ensembles.
2. The development of rehearsal skills.

MUSC 396. Instructional Strategies II for Vocalists
2 Credits (2)
The course focuses on rehearsal techniques for middle and high school ensembles. It includes a means to determine the quality of a piece of music as well as the standardized level of difficulty (grading). Students will also need to pass the TEP exam in order to enroll in the course.
Prerequisite: A grade of C- or better in MUSC 1410.
Learning Outcomes

1. The development of rehearsal techniques for middle and high school ensembles.

MUSC 397. Administrative Music Methods
1 Credit (1)
Lesson planning, curriculum, teaching methodology, materials, and procedures for teaching music in the middle school and high school. Emphasis on administration. Students must also pass the TEP exam to enroll in this course.
Prerequisite: A grade of C- or better in MUSC 1410.
Learning Outcomes

1. Gain insight and experience with administrative strategies and procedures in secondary classroom
2. Work on interview skills as well as resume and cover letter composition
3. Collect a set of usable tools that a student can carry with them into their first job.
4. Gain familiarity with laws and regulations regarding programs and money spent

MUSC 413. Form and Analysis
3 Credits (3)
Forms in tonal music and basic analytic techniques including music from diverse cultures and media. May be repeated up to 3 credits.
Prerequisite: A grade of C- or better in MUSC 2452 and MUSC 2461.
Learning Outcomes

1. Gain a fuller knowledge of musical patterns of organization, and use that knowledge in learning repertoire.
2. Communicate the essence of a work in performance more effectively by making interpretive decisions that are in alignment with the work's formal processes and the composer's intent.
3. Listen to performances and recordings with a deeper, quicker understanding of the web of structure that gives coherence to a work.

MUSC 415. Orchestration
3 Credits (3)
Scoring for full orchestra and various instrumental combinations with consideration of instrument timbres, strengths, weaknesses and

ranges. May be repeated up to 3 credits. Restricted to: Music and Music Education majors.
Prerequisite: A grade of C- or better in MUSC 2452,MUSC 2461 and MUSC 2310.
Learning Outcomes
1. Write effectively and idiomatically for voice, orchestra, and Band.

MUSC 417. Studio Accompanying
2 Credits (2)
Practical application of collaborative piano skills in a studio setting for Piano Performance majors. May be repeated up to 12 credits.
Learning Outcomes
1. Benefit from the teaching of other faculty, and learn more about the specific challenges of playing each instrument.
2. Explore how to adapt factors such as dynamics and pacing when accompanying different instruments and voices.
3. Discover the balance between musical leading and following.

MUSC 421. Music of the Baroque Era
3 Credits (3)
An overview of the music of the Baroque era with an emphasis on history and literature. May be repeated up to 3 credits.
Prerequisite: MUSC 303.
Learning Outcomes
1. Discuss the historical and social context from which Baroque music developed.
2. Summarize the career of several well-known Baroque composers.
3. Outline the musical traits common and unique to different regions in the Baroque period and name the most important Baroque genres.
4. Describe the musical style of several well-known and lesser-known Baroque composers, citing examples from specific works.
5. Examine thirty-three Baroque musical works.
6. Write a term paper based on an analysis of a Baroque musical work.
7. Interpret and perform Baroque works with an understanding of historically-informed performance.
8. Describe Baroque string, wind, brass, keyboard, and percussion instruments: their appearance, construction, and manner of playing.

MUSC 422. Music of the Classic Era
3 Credits (3)
An overview of the music of the Classic era with an emphasis on history and literature.
Prerequisite: MUSC 303.
Learning Outcomes
1. Discuss the historical and social context from which Classical music developed.
2. Outline the musical traits common and unique to different regions in the Classical period.
3. Summarize the development of the symphony, opera and other main genres in the eighteenth century.
4. Write scholarly papers on music.

MUSC 424. Music of the Twentieth Century
3 Credits (3)
An overview of the music of the Twentieth Century with an emphasis on history and literature. Consent of Instructor required.
Prerequisite: MUSC 303.
Learning Outcomes
1. Discuss the historical and social context from which Twentieth Century music developed.

MUSC 429. Opera: History and Literature
3 Credits (3)
An overview of the operatic art form from the Florentine Camerata and Baroque opera through current 21st-century works, with an emphasis on historical context, composers, and significant works. Restricted to: Music, Music Education majors.
Prerequisite(s): MUSC 303 or consent of instructor.
Learning Outcomes
1. The student will be able to effectively identify and discuss operatic developments and traditions in historical context as well as demonstrate a knowledge of operatic composers and significant operatic works.

MUSC 430. Applied Music III
1-4 Credits
Continuation from MUS 330. Individual instruction to develop technique, musicianship, performance and improvisational skills, as well as knowledge of significant repertoire. May be repeated up to 16 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.
Prerequisite(s): A grade of C or better in MUSC 330 plus a juried audition.

MUSC 432. 21st Century Piano Skills
1 Credit (1)
To guide students' keyboard versatility, particularly the skills practical and meaningful in various roles as a professional pianist in the 21st century music. The course explores performance in a variety of settings including sight-reading, efficient music learning, jazz, lead sheet harmonization, improvisation and arranging, alto and tenor clef reading, transposition, and quickly grasping the musical styles of the given new repertoire. May be repeated up to 6 credits.
Learning Outcomes
1. Sight-read and learn new music efficiently across a range of genres and ensemble settings.
2. Harmonize melodies using lead sheets and chord symbols in jazz, folk, hymn, and popular music stylistic appropriateness.
3. Arrange and improvise music in various musical contexts, including classical, jazz, and contemporary idioms.
4. Transpose short passages and chord progressions into different keys at sight.
5. Read and play treble, bass, alto, and tenor clefts with functional fluency (such as reading the B-flat clarinet part in duo music and SATB choir repertoire, with selected parts).
6. Identify and apply appropriate stylistic features when performing new repertoire.
7. Demonstrate professional preparation and keyboard versatility in mock performance scenarios reflective of real-world gigs (for example: church, musical theater, cocktail hour, large ensemble, etc).

MUSC 440. Senior Recital
1-2 Credits (1-2)
Public solo performance under the supervision of the appropriate applied instructor. 60 minutes of musical performance is required for enrollment of 2 hours credit. 30 minutes of musical performance is required for enrollment of 1 hour credit. May be repeated up to 2 credits. Traditional Grading with RR.
Corequisite: MUSC 430.

Learning Outcomes

1. Cumulation of public performance skills.
2. The ability to write program notes.

MUSC 441. Supervised Studio Teaching
2 Credits (2)
Teaching of private lessons under supervision. May be repeated up to 6 credits.
Learning Outcomes

1. Development of applied teaching skills.

MUSC 450. Research Methods
3 Credits (3)
Introduction to methodology of music research. Emphasis on important scholarly resources and academic writing. Restricted to Music majors. No S/U grading option.
Learning Outcomes

1. Develop an understanding methodology of music research.

MUSC 470. Special Topics III
1-3 Credits
Designed for highly motivated students. Independent study and individual guidance. May be taken for unlimited credit. May be repeated up to 99 credits.
Learning Outcomes

1. Varies.

MUSC 471. Graduate Theory Review
3 Credits (3)
Comprehensive and accelerated study of modes, diatonic harmony, and classical form of the common practice period. Restricted to: Music majors. Traditional Grading with RR.
Learning Outcomes

1. Develop an understanding of modes, diatonic harmony, and classical form of the common practice period.

MUSC 475. Intermediate Conducting
3 Credits (3)
Serves as a bridge from undergraduate conducting study to the graduate level. Advanced undergraduate students may enroll to learn how the graduate program in conducting functions. The course also serves as the introductory experience for newly admitted graduate conducting majors. After successful completion of this course, students will be able to: Study musical scores from a conducting perspective; Demonstrate effective predetermined gestures and movements; Lead an ensemble; Research and give presentations related to composers and their music; Demonstrate advanced knowledge of conducting practices.
Prerequisite: A grade of C- or better in MUSC 326 or MUSC 327.
Learning Outcomes

1. Develop the musicianship of the student.
2. Development of basic to advanced conducting techniques.
3. Gain a knowledge of appropriate terminology, tempi, and transpositions.
4. Cultivation of self-awareness and effective interaction through nonverbal communication.

MUSC 476. Diction Review
2 Credits (2)
Review of the International Phonetic Alphabet (IPA) and pronunciation rules for singing in English, Latin, Italian, German and French. For graduate choral conducting and vocal performance (students who did not pass the diction proficiency exam).

Learning Outcomes

1. Refamiliarize their knowledge of the IPA and its uses in singing including its symbols and connection to vocal anatomy and physiology.
2. Apply knowledge of IPA to pronunciation and enunciation of English, Latin, Italian, German and French.
3. Continue to refine awareness of the movements of the vocal articulators and their effect on speech sounds and singing tone.
4. Gain further exposure to role models for lyric diction in all languages studied.
5. Reinforce fluency, accuracy, and confidence in pronunciation, enunciation, and expression of sung text.
6. Apply the concept of lyric diction to both solo and ensemble singing at a graduate level as well as applying pedagogical concepts into professional contexts.

MUSC 477. Graduate Music History Review
3 Credits (3)
Comprehensive and accelerated study of music history from antiquity to the present Restricted to: Music majors. Traditional Grading with RR.
Learning Outcomes

1. Develop an understanding of music history from antiquity to the present.

MUSC 481. The Collaborative Musician
1-15 Credits (1-15)
This course integrates one-on-one meeting and group performance. The goal is to guide the students' topic interests, expand their knowledge of musical repertoire, styles, composers, and/or interpretation. May be repeated up to 15 credits.
Learning Outcomes

1. Prepare and perform a mixture of vocal one instrumental collaborative work.
2. Learn the skills necessary to collaborate successfully with other musicians, including listening, having an open and constructive communication, and developing stronger keyboard skills as applicable to ensemble settings.
3. Prepare a professional comprehensive Repertoire List with all categories (solo piano, collaborative music, chamber music, large ensemble).
4. Learning diversity of teaching styles.
5. Learn more about the specific challenges of playing each instrument and instrumental family.
6. Adapt factors such as dynamics and pacing when collaborating with different instruments and voices.
7. Discover and apply the balance between musical leading and following.
8. Learn to express musical opinions and respect those of others.

MUSC 486. Applied Music Pedagogy and Literature II
2 Credits (2)
Methods, materials, problems, literature, and techniques in teaching individual lessons. Consent of Instructor required. Restricted to: Music majors. Traditional Grading with RR.
Learning Outcomes

1. Development of appropriate pedagogical skills.

MUSC 498. Independent Study
1-3 Credits

For students with a strong musical background wishing to explore content beyond the traditional curriculum. May be repeated up to 6 credits. Restricted to majors.
Prerequisite: consent of instructor.
Learning Outcomes
1. Varies.

MUSC 511. Survey of Traditional Harmony
3 Credits (3)
Tonal harmony in common practice and theory of the late 17th, 18th, and early 19th centuries. Restricted to: Music majors. Traditional Grading with RR.
Prerequisite(s): A grade of B or better in MUSC 471.

MUSC 513. Twentieth Century Art Music
3 Credits (3)
Analytical techniques, structural design and compositional materials from Debussy to the Minimalist school in historical context. Restricted to: Music majors.
Prerequisite(s): A grade of B or better in MUSC 471.

MUSC 518. Seminar in Music Theory
3 Credits (3)
Varying topics in Music Theory, providing a more specific and in-depth study of the particular topic. Restricted to: Music majors. Traditional Grading with RR. May be repeated up to 6 credits.
Prerequisite: A grade of B or better in MUSC 471.
Learning Outcomes
1. Varies.

MUSC 519. Seminar in Music History
3 Credits (3)
Varying topics in Music History, providing a more specific and in-depth study of the particular topic. May be repeated up to 6 credits. Restricted to: MUS majors.
Prerequisite: A grade of B or better in MUSC 477.
Learning Outcomes
1. Varies.

MUSC 521. Music of the Baroque Era: History and Literature
3 Credits (3)
An overview of the music of the Baroque Era with an emphasis on history and literature. May be repeated up to 3 credits.
Prerequisite: A grade of B or better in MUSC 477.
Learning Outcomes
1. Discuss the historical and social context from which Baroque music developed.
2. Summarize the career of several well-known Baroque composers.
3. Outline the musical traits common and unique to different regions in the Baroque period and name the most important Baroque genres.
4. Describe the musical style of several well-known and lesser-known Baroque composers, citing examples from specific works.
5. Examine thirty-three Baroque musical works.
6. Write a term paper based on an analysis of a Baroque musical work.
7. Interpret and perform Baroque works with an understanding of historically-informed performance.
8. Describe Baroque string, wind, brass, keyboard, and percussion instruments: their appearance, construction, and manner of playing.

MUSC 522. Music of the Classical Era: History and Literature
3 Credits (3)
An overview of the music of the Classical era with an emphasis on history and literature. Restricted to: MUS majors.
Prerequisite(s): A grade of B or better in MUSC 477.

MUSC 523. Music of the Romantic Era: History and Literature
3 Credits (3)
An overview of Romantic era music, with an emphasis on history and literature. Restricted to MUS Majors. May be repeated up to 3 credits.
Prerequisite: A grade of B or better in MUSC 477.
Learning Outcomes
1. Develop an in depth knowledge of composers of the Romantic era
2. Develop the ability to Recognize Major compositions of the Romantic Era
3. Develop the ability to analyze works from the Romantic Era.

MUSC 529. Opera History and Literature
3 Credits (3)
An overview of the operatic art form from the Florentine Camerata and Baroque opera through current 21st-century works, with an emphasis on historical context, composers, and significant works. Restricted to: M ED,MUS majors.
Prerequisite(s): A grade of B or better in MUSC 477.
Learning Outcomes
1. The student will be able to effectively identify and discuss operatic developments and traditions in historical context as well as demonstrate a knowledge of operatic composers and significant operatic works.

MUSC 530. Seminar in Music Education
3 Credits (3)
Varying topics in Music Education, providing a more specific and in-depth study of the particular topic. Restricted to: MUS majors. May be repeated up to 3 credits.
Learning Outcomes
1. Varies.

MUSC 531. Music Education in the Diverse Classroom
3 Credits (3)
This course is designed to provide an introduction to diverse and at-risk student groups in educational settings in the music classroom. It will help the course participants explore strategies and gain skills to enhance the musical growth of marginalized groups of students. There is an emphasis on identification, behavioral patterns, building interpersonal relationships, and will include a critical review of selected current research studies in music education. Armed with this knowledge, course participants will be better prepared to understand at-risk students and how best to implement strategies in the classroom. May be repeated up to 3 credits. Restricted to: MUS majors.
Learning Outcomes
1. Students will access and utilize the basic research journals and other sources of research reports and summaries, including those identified using computer technology in the field of music education.
2. Students will describe the structure of most qualitative research studies and their aide in identifying student traits.
3. Students will understand and use most of the language, terms and vocabulary found in qualitative research reports in discussing and identifying behavioral patterns of at-risk students.
4. Students will appraise qualitative research in a systematic way; analyze and review what the research produced in order to isolate the strategies available to incorporate in classroom teaching scenarios.

5. Students will independently retrieve, critique and summarize research related to at-risk students in music education.

MUSC 532. 21st Century Piano Skills
1 Credit (1)
To guide students' keyboard versatility, particularly the skills practical and meaningful in various roles as a professional pianist in the 21st century music—The course explores performance in a variety of settings including sight-reading, efficient music learning, jazz, lead sheet harmonization, improvisation and arranging, alto and tenor clef reading, transposition, and quickly grasping the musical styles of the given new repertoire. May be repeated up to 15 credits.
Learning Outcomes
1. Sight-read and learn new music efficiently across a range of genres and ensemble settings.
2. Harmonize melodies using lead sheets and chord symbols in jazz, folk, hymn, and popular music stylistic appropriateness.
3. Arrange and improvise music in various musical contexts, including classical, jazz, and contemporary idioms.
4. Transpose short passages and chord progressions into different keys at sight.
5. Read and play treble, bass, alto, and tenor clefts with functional fluency (such as reading the B-flat clarinet part in duo music and SATB choir repertoire, with selected parts).
6. Identify and apply appropriate stylistic features when performing new repertoire.
7. Demonstrate professional preparation and keyboard versatility in mock performance scenarios reflective of real-world gigs (for example: church, musical theater, cocktail hour, large ensemble, etc).

MUSC 533. Vocal Literature for Piano
2 Credits (2)
This course provides pianists with an in-depth exploration of voice literature from the Baroque and Classical periods to contemporary repertoire, with a focus on art song traditions across languages and cultures. Emphasis is placed on the stylistic, historical, and linguistic aspects of major song literature, including German Lieder, French mélodie, English and American art song, and other significant repertoires beyond canon. Through listening, score study, and performance, students will develop the collaborative skills necessary for effective partnership with vocalists, including issues of interpretation, diction, phrasing, and stylistic nuance. Special attention will be given to repertoire selection, transposition, and the pianist's role in rehearsal and performance. This course is designed to build both knowledge and practical tools for pianists. Basic knowledge of vocal diction is needed to take this course.
Learning Outcomes
1. Identify and describe key composers, styles, and historical contexts of major vocal literature from Baroque period through the 21st century.
2. Analyze and interpret art song and operatic Aria repertoire across multiple languages and traditions, including German Lieder, French mélodie, Italian, English, American, Spanish, and Russian songs.
3. Explore and contextualize art song from Japanese, Korean, Chinese, and Indigenous traditions, and demonstrate familiarity through listening, discussion, and performance.
4. Demonstrate effective collaborative skills with vocalists, including score preparation, phrasing, and stylistic sensitivity.
5. Apply knowledge of IPA and diction principles to support accurate pronunciation and interpretation in German, French, English, Spanish, and other languages commonly found in vocal repertoire.
6. Evaluate, translate, and discuss song texts, musical settings, and performance practices.
7. Perform representative works from multiple stylistic periods in a collaborative setting, exhibiting both technical proficiency and interpretive insight.

MUSC 534. Instrumental Sonatas and Duo Repertoire for Piano
2 Credits (2)
This course provides pianists with an in-depth study of major sonatas and duo repertoire for piano and instruments—including strings, woodwinds, brass, and selected percussion. Emphasis is placed on historical style, interpretive collaboration, rehearsal strategies, and performance practice. In addition, skills for quickly learning new pieces, reducing orchestral reduction effectively, and developing technical and musical refinement skills will be covered. Students will explore key repertoire from the Baroque through Contemporary eras, developing the musical, technical, and interpersonal skills needed to perform as equal partners in recital settings. The course includes score study, listening, class coaching, and ensemble work. Pianists will gain practical experience performing with a variety of instrumentalists and develop fluency in stylistic nuance, balance, articulation, and cueing.
Learning Outcomes
1. Analyze and interpret instrumental duo repertoire from the Baroque through Contemporary periods, with attention to historical style, performance practice, and techniques.
2. Demonstrate collaborative rehearsal techniques, including cueing, balance, articulation, and phrasing appropriate to various instrumental partners.
3. Apply practical strategies for quickly learning new repertoire, including major Sonatas, complex stand-alone pieces, and orchestral reductions with skills to adjust the orchestral reduction as needed.
4. Perform collaboratively with a range of instrumentalists (strings, woodwinds, brass, and percussion), showing stylistic fluency, musicality, and technical confidence.
5. Identify and discuss defining characteristics of major composers and stylistic schools represented in the duo repertoire.
6. Exhibit professional rehearsal and communication etiquette, score preparation, and adaptability across diverse collaborative settings.

MUSC 535. Current Issues in Music Education
3 Credits (3)
This course examines the rich and challenging complexities of music teaching and learning from a variety of perspectives. Educational theory to pedagogical inquiry of current educational practice will be examined, calling students to critically reflect on such professional activities as lesson planning, curriculum design, repertoire choice, program assessment, advocacy in the arts, and student evaluation. Restricted to: MUS (Music Ed track only) majors.
Learning Outcomes
1. An understanding of the complexities of music teaching and learning from a variety of perspectives.

MUSC 540. Graduate Recital/Analytical Paper
4 Credits (4)
This course is for students completing a Master of Music with a Performance emphasis. A public recital will be given and an accompanying research paper will be submitted. Restricted to: MUS majors.

Learning Outcomes

1. Development of performance skills.
2. Development of research ability.
3. Development of writing skills.

MUSC 574. Advanced Choral Conducting I
3 Credits (3)
This course will continue the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors.
Prerequisite(s): A grade of B or better in MUSC 475.

MUSC 575. Advanced Choral Conducting II
3 Credits (3)
This is the final course in preparation for the student's graduate conducting concert. It will continue the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors.
Prerequisite(s): A grade of B or better in MUSC 574.

MUSC 576. Advanced Instrumental Conducting I
3 Credits (3)
The role of the conductor is to lead, react to, alter, and reinforce the performance of the ensemble. This course will continue in the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors.
Prerequisite(s): A grade of B or better in MUSC 475.

MUSC 577. Advanced Instrumental Conducting II
3 Credits (3)
The role of the conductor is to lead, react to, alter, and reinforce the performance of the ensemble. This course will continue in the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors.
Prerequisite(s): A grade of B or better in MUSC 576.

MUSC 578. Advanced Choral Literature
2-3 Credits (2-3)
An examination of significant choral works from 1200 to the present, including composers, genres, and historical context May be repeated up to 3 credits. Restricted to: MUS majors.
Prerequisite(s): A grade of B or better in MUSC 475.

MUSC 579. Advanced Instrumental Literature
2-3 Credits (2-3)
An examination of significant instrumental works from the Baroque period to the present, including composers, genres, and historical context May be repeated up to 3 credits. Restricted to: MUS majors.
Prerequisite(s): A grade of B or better in MUSC 475.

MUSC 580. Ensemble Performance
1 Credit (1)
Performance in university ensembles. May be repeated up to 99 credits.
Prerequisite: By audition only.
Learning Outcomes

1. Improve performance skills.
2. Develop and improve performance skills in a group setting.
3. Develop understanding and interpretation within the context of music history.
4. Refine and improve technical ability.
5. Demonstrate proper technique and usage.

MUSC 581. The Collaborative Pianist
1 Credit (1)
This course integrates one-on-one meeting and group performance. The goal is to guide the students' topic interests, expand their knowledge of musical repertoire, styles, composers, and/or interpretation. May be repeated up to 15 credits.
Learning Outcomes

1. Prepare and perform a mixture of vocal one instrumental collaborative work.
2. Learn the skills necessary to collaborate successfully with other musicians, including listening, having an open and constructive communication, and developing stronger keyboard skills as applicable to ensemble settings.
3. Prepare a professional comprehensive Repertoire List with all categories (solo piano, collaborative music, chamber music, large ensemble).
4. Learning diversity of teaching styles.
5. Learn about the specific challenges of playing each instrument and instrumental family.
6. Adapt factors such as dynamics and pacing when collaborating with different instruments and voices.
7. Discover and apply the balance between musical leading and following.
8. Learn to express musical opinions and respect those of others.

MUSC 582. Applied Music
2-4 Credits (2-4)
For music majors, individual instruction, including improvisation skills and techniques. Students may enroll for 2 or 4 credits. Students must audition in order to enroll. Consent of instructor required. May be repeated up to 24 credits.
Learning Outcomes

1. Develop of Musical Performance Attributes.
2. Development of technical Skills.
3. Development of Aural Skills.
4. Development of Musical Analytical Skills.
5. Development of Improvisatory Skills.

MUSC 586. Applied Music Pedagogy and Literature III
2 Credits (2)
Methods, materials, problems, literature, and techniques in teaching individual lessons. Restricted to: Music majors.
Prerequisite: A grade of B or better in MUSC 486.
Learning Outcomes

1. Development of appropriate pedagogical skills.

MUSC 598. Special Research Programs
1-4 Credits

May be taken for unlimited credit. May be repeated up to 99 credits.

Learning Outcomes

1. Varies.

MUSC 599. Master's Thesis

15 Credits

Thesis. May be repeated up to 88 credits.

Learning Outcomes

1. Varies.

NATV-NATIVE AMERICAN STUDIES

NATV 1150G. Introduction to Native American Studies

3 Credits

This course surveys the significance of Native American Studies through an inter-disciplinary approach to two areas of academic concentration: Indigenous Learning Communities, and Leadership and Building Native Nations.

Learning Outcomes

1. Students will develop a general understanding of the various concentration areas in Native American Studies throughout the United States.
2. Students will identify the contributions of various academic disciplines to Native American Studies.
3. Students will understand the intricacies and intersections of Indigenous scholarship in Native American Studies.
4. Students will articulate the importance of Native American Studies as a stand-alone discipline in academia.
5. Students will be able to connect community issues in both Native and Non-Native America to concepts taught in Native American Studies.

NATV 2120. Native American Experience

3 Credits (3)

Introductory survey of Native American History, culture an contemporary issues. Students read literature by and about Native Americans covering a variety of topics including tribal sovereignty, federal policy, activism, economic development, education and community life.

Learning Outcomes

1. Apply cultural and historical context to text about Native Americans (by Natives and non-Natives).
2. Analyze texts about Native Americans in relation to tribal sovereignty, federal policy, activism, economic development, education and community life.
3. Evaluate texts by and about Native Americans from an NAS perspective.

NATV 3120. An Indigenous Peoples History of the United States

3 Credits (3)

This course is a history of United States as experienced by the Indigenous people. It delineates the Indigenous experience as reflected in Native American scholarship and research. The Indigenized and decolonized Native perspective provides an educative authenticity of Indigenous knowledge comprehensible to all, particularly the non-Indian.

Learning Outcomes

1. The student can identify and describe significant historic periods as experienced by the Indigenous inhabitants in United States.
2. The student is able to identify and differentiate aspects of the Native American historic experience in relationship to the standard linear chronicle timeline as reflected in U.S. history.
3. The student it able to compose a brief summary review of the Native American historic periods as evidenced in scholarship and research.

NATV 4110. Native American Women

3 Credits (3)

Students investigate the status, experience, and contributions of Native American women from pre-contact to contemporary times. Identifying the contribution of Native American women to societies, communities, and Nations as keepers of knowledge, teachings, and traditions. Crosslisted with: ANTH 553.

Learning Outcomes

1. Explore and examine the roles of American Indian women within a tribal society and analyze the impact of colonization and decolonization upon their place / roles over time.
2. Evaluate historical and contemporary issues of importance to American Indian women and their communities.
3. Assess a topic, book or issue of importance to Native women through a research paper, case study, or exam demonstrating in-depth knowledge and understanding.
4. Demonstrate in-depth knowledge and understanding of Native American women histories and contemporary issues.
5. Formulate a paper on Native woman/tribal women from historical or contemporary sources and share with class (undergraduates).
6. Demonstrate in-depth knowledge and understanding of Native American women through an exam/final (undergraduates).

NATV 4120V. Native American Visual Culture

3 Credits (3)

This course examines the various theoretical and methodological challenges inherent to the study of indigenous art, including the issues of identity, sovereignty, gender, cultural critique, and the role of the artist.

Learning Outcomes

1. Identify NA / Indigenous, film/video writers and directors.
2. Locate NA / Indigenous nations with their geo-physical location.
3. Consider issues of identity concerning Indigenous population.
4. Apply “colonizing” / “decolonizing” methodologies.
5. To practice writing short analytical journal entries.
6. To learn effective group discussion techniques

NATV 4130. Indigenous Ways of Knowing

3 Credits (3)

This course examines Indigenous knowledge and ways of knowing to gain an appreciation of an epistemology and ontology that may be outside the boundaries of Eurocentric theory, concepts, and principles. The course explores and analyzes the nature and ways that Native Americans’ develop knowledge as well as the concepts and composition of metaphysics and cosmology. Students analyze knowledge development through mythology and storytelling by emphasizing the nature of difference rather than comparative analysis.

Learning Outcomes

1. By the end of the semester, through dialogue and interaction, reading, writing, exercises, out of classroom experiences, auto/visual aids and computer technologies, the student is able to describe and explain characters and ways that Native Americans’ develop knowledge (epistemology); as measured by reports, critiques, reflective summaries, learning logs, analysis techniques and assessments.
2. By the end of the semester, through dialogue and interaction, reading, writing, exercises, out of classroom experiences, auto/visual aids and computer technologies, the student is able to describe and explain concepts and composition of the metaphysics and cosmology

(ontology) of Native American knowledge; as measured by reports, critiques, reflective summaries, learning logs, analysis techniques, and assessments.

NATV 4210. Native American Education
3 Credits (3)
This is a survey course that explores the education of Natives from multiple perspectives; the perspectives of Native theories and practices, the colonizers'-imposed education theories and practices, U.S. federal educational policies and practices, tribal systems of education, and responses from those experiencing the education. Starting with traditional education, the course will examine colonial education, federal and tribal efforts, contemporary models of Indian education including issues and challenges, and the educational sovereignty of tribes.
Learning Outcomes
1. Describe (verbally and written) traditional methods of education used by Native Americans.
2. Discuss and interpret (verbally and written) the theories and practices of educating Natives in different eras.
3. Compare (verbally and written) the different systems of education for Native Americans.
4. Articulate (verbally and written) contemporary Native American educational issues and challenges.
5. Be able to articulate (verbally and written) support for educational sovereignty of tribes.
6. Research, analyze and orally present a written a paper about an American Indian boarding school and its legacy.

NATV 4210V. Native American Education
3 Credits (3)
Native American education will be examined by investigating historical and contemporary perspectives of Native Peoples' and settlers' ideas of education and the latter's development of educational systems. Students will survey various types of schools (missionary, boarding, public, etc.), read Native student accounts of westernized schooling, and examine key historical and contemporary policies, laws, and reports, as well as curricular and pedagogical literature. Native perspectives will become central to understanding present and future trends in education to transform educational futures while centering and supporting sovereignty, self-determination, and cultural continuance.
Learning Outcomes
1. Describe (verbally and/or written) traditional methods of education used by Native Americans.
2. Discuss and interpret (verbally and/or written) the theories and practices of educating Natives in different eras.
3. Compare (verbally and/or written) the different systems of education for Native Americans.
4. Articulate (verbally and/or written) contemporary Native American educational issues and challenges.
5. Be able to articulate (verbally and/or written) support for educational sovereignty of tribes.

NATV 4220. Federal Indian Policy
3 Credits (3)
This course provides a basic historic overview of federal Indian policy. As preexisting sovereign nations, the U. S. Constitution acknowledges only states, foreign nations, and Indian tribes as sovereign governments. The purpose is to provide a fundamental understanding of the unique position Indian tribes occupy in this country. It examines impacts and effects on culture and contemporary livelihood.
Learning Outcomes
1. The student can recall and identity fundamental laws, policies, and court actions affecting Indian tribes.
2. The student can describe and explain the effects of federal Indian policy on activities and interactions between Native American and the overall society.
3. The student can analyze and interpret the impacts and effects of federal Indian policy on culture and contemporary lives of Native Americans

NATV 4310. Indigenizing Methodologies in Native American Studies
3 Credits (3)
This course utilizes decolonizing (indigenizing) methodologies and praxis to gain insight into the complex effects of oppression and colonization. The course uses critical and indigenous concepts to identify and analyze hegemonic, ethnocentric, historic and contemporary human rights and social justice issues of indigenous people. Emphasis includes research theory and methodology, such as community participatory action research, that is collaborative, inclusive, and pragmatic to ethics, intellectual property, and cultural boundaries of indigenous people. Crosslisted with: ANTH 541.
Learning Outcomes
1. The student is able to describe and explain some of the complex effects of oppression and colonization on indigenous peoples.
2. The student is able to identify historic and contemporary issues that have influenced and affected the study and research of indigenous peoples.
3. The student is able to convey particular research theory and methodology that is collaborative, inclusive, and pragmatic to ethics and cultural boundaries of indigenous people.

NATV 5110. Advanced Indigenizing Methodologies in Native American Studies
3 Credits (3)
This course utilizes indigenizing methodologies and praxis to gain insight into the complex effects of oppression and colonization. Critical and indigenous concepts are used to identify and analyze hegemonic, ethnocentric, historic and contemporary human rights and social justice issues of indigenous people. Research theory and methodology such as community participatory action research that is collaborative, inclusive, and pragmatic to ethics, intellectual property, and cultural boundaries of indigenous people is emphasized.
Learning Outcomes
1. Explain how producing research is connected to producing knowledge.
2. Identify and describe the impact of colonialism and imperialism on disrupting ways of knowing.
3. Recognize political and cultural implications of the world seen as a colonial, constructed narrative.
4. Describe how a social reality can have set political and ideological conditions.
5. Distinguish how indigenous methodologies relate to decolonizing methods.
6. Describe how decolonizing methods are a different approach to research.
7. Identify decolonizing methods that have been used in research.
8. Critically engage with research lenses stemming from a decolonizing standpoint.

NATV 5120. Advanced Indigenous Peoples History of the United States
3 Credits (3)
This course is a history of United States as experienced by the Indigenous people. It delineates the Indigenous experience as reflected in Native American scholarship and research. The Indigenized and decolonized Native perspective provides an educative authenticity of Indigenous knowledge comprehensible to all, particularly the non-Indian.
Learning Outcomes
1. The student can identify and describe significant historic periods as experienced by the Indigenous inhabitants in United States
2. The student is able to identify and differentiate aspects of the Native American historic experience in relationship to the standard linear chronicle timeline as reflected in U.S. history.
3. The student it able to compose a brief summary review of the Native American historic periods as evidenced in scholarship and research.

NATV 5210. Advanced Native American Education
3 Credits (3)
This is a survey course that explores the education of Natives from multiple perspectives; the perspectives of Native theories and practices, the colonizers'-imposed education theories and practices, U.S. federal educational policies and practices, tribal systems of education, and responses from those experiencing the education. Starting with traditional education, the course will examine colonial education, federal and tribal efforts, contemporary models of Indian education including issues and challenges, and the educational sovereignty of tribes.
Learning Outcomes
1. Describe (verbally and written) traditional methods of education used by Native Americans.
2. Discuss and interpret (verbally and written) the theories and practices of educating Natives in different eras.
3. Compare (verbally and written) the different systems of education for Native Americans.
4. Articulate (verbally and written) contemporary Native American educational issues and challenges.
5. Be able to articulate (verbally and written) support for educational sovereignty of tribes.
6. Research, analyze and orally present a written a paper about an American Indian boarding school and its legacy.

NATV 5220. Advanced Native American Visual Cultures
3 Credits (3)
This course examines the various theoretical and methodological challenges inherent to the study of indigenous art, including the issues of identity, sovereignty, gender, cultural critique, and the role of the artist.
Learning Outcomes
1. Identify NA/Indigenous, film/video writers and directors.
2. Locate NA/Indigenous nations with their geo-physical locations.
3. Consider issues of identity concerning Indigenous populations.
4. Apply "colonizing"/ "decolonizing" methodologies.
5. To Practice writing short analytical journal entries.
6. To learn effective group discussion techniques.

NATV 5520. Advanced Native American Women
3 Credits (3)
Students investigate the status, experience, and contributions of Native American women from pre-contact to contemporary times. Identifying the contribution of Native American women to societies, communities, and Nations as keepers of knowledge, teachings, and traditions.
Learning Outcomes
1. Explore and examine the roles of American Indian women within a tribal society and analyze the impact of colonization and decolonization upon their place / roles over time.
2. Evaluate historical and contemporary issues of importance to American Indian women and their communities.
3. Assess a topic, book or issue of importance to Native women through a research paper, case study, or exam demonstrating in-depth knowledge and understanding.
4. Demonstrate in-depth knowledge and understanding of Native American women histories and contemporary issues.
5. Formulate a paper on Native woman/tribal women from historical or contemporary sources and share with class (undergraduates).
6. Demonstrate in-depth knowledge and understanding of Native American women through an exam/final (undergraduates).

NAV-NAVAJO

NAV 101. Introduction to Navajo Studies
3 Credits (3)
Covers geography, demography, institutions of modern Navajo society with historical overview. Restricted to: Community Colleges only.

NAV 111. Elementary Navajo I
4 Credits (4)
Navajo for beginners with emphasis on speaking skills.
Prerequisite: not open to Navajo-speaking students except by consent of instructor.

NGEC-NATURAL GAS ENGINE COMP

NGEC 133. Natural Gas Engine Repair Technology
5 Credits (5)
This course will cover the engine fundamentals, cylinder head and valve trains, engine block, engine servicing, lubrication and cooling Systems. Restricted to: Natural Gas Engine Compression majors. Restricted to Carlsbad campus only.
Learning Outcomes
1. A basic knowledge about engine operation.
2. Practice shop safety, ability to identify potential hazards, tool identification, proper rigging and crane operation.
3. Ability to identify specific components of a natural gas engine and their function.
4. Locate and identify various components on and off an engine.
5. Safely start large stationary industrial natural gas engines.
6. List the steps of preventive maintenance on natural gas engines.
7. Completely disassemble a natural gas engine, clean and organize parts, and measure critical clearances using appropriate precision measuring tools.
8. Replace or repair any defects that are found on assigned engine, compile a list of parts needed to make repairs, assemble engine correctly, and start and run the engine.

NGEC 175. Natural Gas Compression Technology I
4 Credits (4)
This course delivers an introduction to the theory, application, rotary, and centrifugal natural gas compressor including operating principles, maintenance, and repair of the reciprocating, identification of the component parts and their functions, methods of balancing, and lubrication systems, and design characteristics. This course will

also include calculations of gas flow, compressor sizing, rod loads, compressor analysis charts and horsepower ratings. In addition, this course will cover safety, precision measurement, use of the manuals, use of tools, and proper adjustments will be included with overhaul exercises. Restricted to: Natural Gas Engine Compression majors. Restricted to Carlsbad campus only.

Learning Outcomes

1. Identify and analyze the re-usability of basic compressor parts.
2. Accurately diagnose failure of key core components of basic compressors.
3. Identify basic preventive maintenance tasks on natural gas compressors.
4. Identify the key concept of troubleshooting of natural gas compressors by applying failure analysis techniques to arrive at the root cause of the failure.
5. Demonstrate safety procedures in the workshop and follow appropriate steps to work with the compressor.

NGEC 246. Fuel and Emissions Technology
5 Credits (5)

This course delivers operational and application studies of fuel components and emissions control system. Restricted to: Natural Gas Engine Compression majors. Restricted to Carlsbad campus only.

Learning Outcomes

1. Identify specific components of a natural gas engine and their function.
2. List the steps of preventive maintenance on natural gas engines.
3. Know the fuel components and operation
4. Locate and identify various components on and off an engine.
5. Safely start stationary industrial natural gas engines.

NGEC 295. Special Topics
2 Credits (2)

Topics are to be announced in the Schedule of Classes. The topic and project are to be discussed and implemented between faculty member and student. Student gives presentation to class at the end of the term of study. All-Natural Gas Compression Technology classes in the NGEC Program must be completed or in progress before enrolling in this course. Restricted to: Natural Gas Engine Compression majors. Restricted to Carlsbad campus only.

Learning Outcomes

1. The student should provide an overall meaning during the individual time in the NGEC Program for this final project.

NMNC-NEW MEXICO NURSING EDUCATION CONSORTIUM

NMNC 3110. Introduction to Nursing Concepts
3 Credits (3)

This course introduces the nursing student to the concepts of nursing practice and conceptual learning. Same as NMNC course number: NMNC 1110. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.

Corequisite: NMNC 3120, NMNC 3135.

Learning Outcomes

1. Integrate knowledge from nursing pre- and co-requisites into a conceptual learning model.
2. Apply conceptual learning to select nursing concepts.
3. Define personal values, beliefs, and attitudes about health and wellness.
4. Describe importance of identifying patient safety issues.
5. Describe roles and values of nursing and members of the health care team.
6. Describe standards and regulations that apply to nursing practice.

NMNC 3120. Evidence-Based Practice
3 Credits (3)

The focus of this course is the principles of evidence-based nursing practice. It includes the identification of clinical practice problems, the evaluation of available evidence, and the integration of evidence with clinical expertise and patient preferences in application to practice. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.

Corequisite: NMNC 3110, NMNC 3135.

Learning Outcomes

1. Examine integrating evidence-based practice with diverse patients' values.
2. Identify clinical practice problems and issues.
3. Explain the research process.
4. Describe how evidence is generated through the research process.
5. Appraise evidence and standards of care that support best clinical outcomes and patient safety.
6. Utilize informatics to access evidence-based practice guidelines.

NMNC 3135. Principles of Nursing Practice
4 Credits (4)

This course introduces the nursing student to the application of concepts through clinical skills in seminar, laboratory, and/or clinical settings. Principles of communication, assessments, safety, and interventions including accurate calculation, measurement, and administration of medications will be included. Same as NMNC course number: NMNC 1135. Restricted to: BSN, BSNP, and BSNR Majors. May be repeated up to 4 credits.

Corequisite: NMNC 3110, NMNC 3120.

Learning Outcomes

1. Describe the different types and characteristics of communication in professional nursing practice.
2. Utilize the concepts presented in Level One nursing courses in the application to the care of the patient.
3. Demonstrate the principles of safety during the implementation of nursing skills.
4. Demonstrate the learned skills in patient based scenarios.
5. Utilize the nursing process to provide safe and effective care.

NMNC 3210. Health and Illness Concepts I
3 Credits (3)

This course will focus on health and illness concepts across the lifespan. Concepts covered are related to homeostasis/regulation, sexuality/reproductive, protection/movement, and emotional processes. Same as NMNC course number: NMNC 1210. May be repeated up to 3 credits.

Prerequisite: NMNC 3110, NMNC 3120, NMNC 3135.

Corequisite: NMNC 3220, NMNC 3230, NMNC 3235.

Learning Outcomes

1. Describe the scope, risk factors, physiologic processes, attributes, and clinical management of selected concepts and exemplars across the lifespan.
2. Discuss evidence-based practices and health care standards of care related to the concepts/exemplars of the course.

3. Explain the collaboration necessary related to the concepts/ exemplars of the course.
4. Utilize informatics and resources related to the concepts/exemplars of the course.
5. Integrate considerations of normal physiology and healthy adaptations into nursing practice of patients across the lifespan.

NMNC 3220. Health Care Participant
3 Credits (3)
This course introduces the nursing student to the attributes of the health care participant as an individual, a family, or a community. Same as NMNC course number: NMNC 1220. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.
Prerequisite: NMNC 3110, NMNC 3120, NMNC 3135.
Corequisite: NMNC 3210, NMNC 3230, NMNC 3235.
Learning Outcomes
1. Identify values, beliefs and attitudes toward health and illness of the health care recipient.
2. Articulate the role of nursing in relation to the health of vulnerable populations and elimination of health disparities.
3. Describe the protective and predictive factors which influence the health of families, groups, communities, and populations.
4. Describe the use of evidence-based practices to guide health teaching, health counseling, screening, outreach, disease and outbreak investigation, referral, and follow-up throughout the lifespan.
5. Describe the use of information and communication technologies in preventive care.
6. Examine the health care and emergence preparedness needs of the local community and in the state of New Mexico.
7. Identify clinical prevention and population-focused interventions with attention to effectiveness, efficiency, cost-effectiveness, and equity.

NMNC 3230. Nursing Pharmacology
3 Credits (3)
This course introduces the nursing student to pharmacologic nursing practice from a conceptual approach. Same as NMNC course number: NMNC 1230. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.
Prerequisite: NMNC 3110, NMNC 3120, NMNC 3135.
Corequisite: NMNC 3210, NMNC 3220, NMNC 3235.
Learning Outcomes
1. Identify the nurse's professional role related to pharmacotherapeutics in diverse populations across the lifespan.
2. Identify safety issues and minimize risk potential associated with pharmacotherapeutics and complementary and alternative medicine.
3. Utilize evidence-based information integrating pharmacologic and pathophysiologic concepts to guide medication therapeutics.
4. Describe health care system protocols related to pharmacotherapeutics.
5. Identify methods of communication with the health care team related to pharmacotherapeutics.
6. Utilize informatics systems related pharmacotherapeutics.
7. Describe common classes of drugs that are used in health care, including pharamacokinetics, pharmacodynamics, and pharmacotherapeutics.

NMNC 3235. Assessment and Health Promotion
4 Credits (4)
This course introduces the nursing student to the assessment of and the health promotion for the health care participant as an individual, a family, or a community. This course uses seminar, laboratory and/or clinical settings. Same as NMNC course number: NMNC 1235. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 4 credits.
Prerequisite: NMNC 3110, NMNC 3120, NMNC 3135.
Corequisite: NMNC 3210, NMNC 3220, NMNC 3230.
Learning Outcomes
1. Assess physical health including a focus on the health/illness beliefs, values, attitudes, developmental level, functional ability, culture, and spirituality of the participant.
2. Assess family health including a focus on family health history, environmental exposures, and family genetic history to identify current and future health problems.
3. Collaborate with a community to assess their health needs
4. Utilize community assessment data and evidence-based practice as basis for identifying community health needs.
5. Document health assessments in electronic health record or written formats.
6. Share community assessment data with other health care professionals to identify needed interventions.
7. Explain the role of the nurse in relation to advocacy for the health care recipient.
8. Analyze education materials for health literacy concerns.

NMNC 4310. Health & Illness Concepts II
3 Credits (3)
This course covers health and illness concepts across the lifespan with the focus on chronic conditions. Concepts covered are related to oxygenation and hemostasis, homeostasis and regulation, protection and movement, and cognition and behavior processes. Same as NMNC course number: NMNC 2310. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.
Prerequisite: NURS 328, NMNC 3210, NMNC 3220, NMNC 3230, NMNC 3235.
Corequisite: NMNC 4320, NMNC 4335.
Learning Outcomes
1. Relate the scope, risk factors, physiologic processes, attributes, and clinical management of selected concepts and exemplars across the lifespan.
2. Investigate evidenced-based practice, standards of nursing care, and factors to improve safety related to selected concepts and exemplars.
3. Examine how members of the health care team collaborate in the delivery of care related to selected concepts and exemplars.
4. Discuss available technology for the delivery of nursing care related to selected concepts and exemplars.
5. Apply selected health and illness concepts to the nursing care of patents across the lifespan.

NMNC 4320. Professional Nursing Concepts I
3 Credits (3)
This course covers foundational concepts for professional development, including selected professional attributes and care competencies. Same as NMNC course number: NMNC 2320. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.
Prerequisite: NURS 328, NMNC 3210, NMNC 3220, NMNC 3230, NMNC 3235.
Corequisite: NMNC 4310, NMNC 4335.
Learning Outcomes
1. Examine the ethical values, virtues, principles, and policies that guide the moral delivery of health care.

2. Relate the nurse's interpretation of patient needs, concerns, and health problems with nursing decisions.
3. Discuss the factors which motivate individuals, groups, and organization to deliver quality nursing care.
4. Determine how interactions of health care team members provide quality patient care.

NMNC 4335. Care of Patients with Chronic Cndtns
4 Credits (8P)
The focus of this course is to provide safe, evidence-based nursing care for patients with chronic conditions, across the lifespan in a variety of settings. This course builds upon curricular concepts. This course is a combination of lab and clinical. Same as NMNC course number: NMNC 2335. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 4 credits.
Prerequisite: NURS 328, NMNC 3210, NMNC 3220, NMNC 3230, NMNC 3235.
Corequisite: NMNC 4310, NMNC 4320.
Learning Outcomes
1. Demonstrate ethical practice in the delivery of nursing care to patients with chronic conditions.
2. Apply understanding of the principles of safe nursing care for patients with chronic conditions.
3. Demonstrate knowledge of appropriate evidence-based protocols when providing nursing care to patients with chronic conditions.
4. Apply understanding of appropriate health care policy, finance, and regulatory environments in the care of patients with chronic conditions.
5. Communicate effectively with patients with chronic conditions and health care team members.
6. Demonstrate an understanding of the technology used in the care of patients with chronic conditions.
7. Utilize the nursing process to deliver nursing care to patients with chronic conditions.

NMNC 4410. Health & Illness Concepts III
4 Credits (4)
This course will cover health and illness concepts, with the focus on acute conditions across the lifespan. Concepts covered are related to homeostasis/ regulation, oxygenation/ hemostasis, protection/ movement, and emotional processes. Same as NMNC course number: NMNC 2410. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 4 credits.
Prerequisite: NMNC 4310, NMNC 4320, NMNC 4335.
Corequisite: NMNC 4435, NMNC 4445.
Learning Outcomes
1. Anticipate health care participant's risk for potentially harmful situations related to the concepts/exemplars of the course.
2. Integrate evidence-based practices and health care standards of care related to the concepts/exemplars of the course.
3. Differentiate the multiple roles of the health care team related to the concepts/exemplars of the course.
4. Integrate use of appropriate technology related to the concepts/ exemplars of the course.
5. Interrelate risk factors, concepts, physiologic processes, patient attributes, and clinical management of the exemplars covered in this course.

NMNC 4435. Clinical Intensive I
4 Credits (4)
This is the first of two Level Four clinical courses in which the student will apply the curricular concepts in the management of care participants with acute conditions across the lifespan. Same as NMNC course number: NMNC 2435. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 4 credits.
Prerequisite: NMNC 4310, NMNC 4320, NMNC 4335.
Corequisite: NMNC 4410, NMNC 4445.
Learning Outcomes
1. Integrate nursing practice concepts into their professional nursing practice.
2. Integrate diverse patient values into plan of care for patients with acute illness.
3. Interpret and analyze factors and system contributions that impact the quality and safety of nursing practice.
4. Integrate an evidence-based approach in the delivery and evaluation of nursing care to acutely ill patients across the lifespan.
5. Evaluate the use of policies and procedures within the acute care settings.
6. Effectively collaborate with the health care team in the delivery of patient care.
7. Integrate use of appropriate technology for the delivery of nursing care to acutely ill patients.

NMNC 4445. Clinical Intensive II
4 Credits (4)
This is the second of two Level Four clinical courses in which the student will apply the curricular concepts in the management of care participants with acute conditions across the lifespan. Same as NMNEC course number: NMNC 404. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 4 credits.
Prerequisite: NMNC 4310, NMNC 4320, NMNC 4335.
Corequisite: NMNC 4410, NMNC 4435.
Learning Outcomes
1. Integrate nursing practice concepts into their professional nursing practice.
2. Integrate diverse patient values into pan of care for patients with acute illness.
3. Interpret and analyze factors and system contributions that impact the quality and safety of nursing practice.
4. Integrate an evidence-based approach in the delivery and evaluation of nursing care to acutely ill patients across the lifespan.
5. Evaluate the use of policies and procedures within the acute care setting.
6. Effectively collaborate with the health care team in the delivery of patient care.
7. Integrate use of appropriate technology for the delivery of nursing care to acutely ill patients.

NMNC 4510. Concept Synthesis
3 Credits (3)
This course focuses on the synthesis of curricular concepts in the care of complex patients. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.
Prerequisite: NMNC 4410, NMNC 4435, NMNC 4445.
Corequisite: NMNC 4520, NMNC 4535, NMNC 4545.
Learning Outcomes
1. Synthesize curricular concepts into patient-centered nursing practice that is appropriate for diverse individuals, families, and communities.
2. Synthesize the evidence base into nursing care of patients across the lifespan.

3. Evaluate leadership principles that integrate the application of health care policies and standards.
4. Evaluate effectiveness of interprofessional collaboration in the delivery of health care for quality patient outcomes.
5. Evaluate technologies for the management of information and in the delivery of patient care.

NMNC 4520. Professional Nursing Concepts II
3 Credits (3)
This course covers policy concepts for professional nursing. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 3 credits.
Prerequisite: NMNC 4410, NMNC 4435, NMNC 4445.
Corequisite: NMNC 4510, NMNC 4535, NMNC 4545.
Learning Outcomes
1. Integrate principles of quality improvement and safety into nursing practice within health care organizations and systems.
2. Demonstrate leadership behaviors through the application of policies that apply to health care delivery.
3. Synthesize care delivery concepts to improve quality patient outcomes and professional nursing practice.
4. Analyze impact of health care delivery systems on patient care outcomes.
5. Compare and contrast health care policies and evidence-based practice.

NMNC 4535. Clinical Intensive III
4 Credits (4)
The focus of this clinical course is application of the curricular concepts in the management of care participants with complex conditions across the lifespan. Same as NMNEC course no.: NMNEC503. Restricted to: BSN,BSNP,BSNR,NURS majors. May be repeated up to 4 credits.
Prerequisite: NMNC 4410, NMNC 4435, NMNC 4445.
Corequisite: NMNC 4510, NMNC 4520, NMNC 4545.
Learning Outcomes
1. Engage in professional nursing practice that is patient--centered and appropriate for diverse individuals, families, and communities.
2. Integrate principles of quality improvement and safety into nursing practice within health care organizations and systems.
3. Deliver nursing care that is evidence-based across the lifespan.
4. Demonstrates leadership behaviors through the application of policies that apply to health care delivery.
5. Engage in effective interprofessional collaboration in the delivery of health care for quality patient outcomes.
6. Utilize technologies for the management of information and in the delivery of patient care.

NMNC 4545. BSN Capstone
4 Credits (4)
The synthesis, integration, and application of concepts to professional nursing practice will be applied in the final clinical course to ensure readiness to enter practice. Restricted to: BSN, BSNP, and BSNR majors. May be repeated up to 4 credits.
Prerequisite: Successful completion of all previous nursing courses.
Corequisite: NMNC 4510, NMNC 4520, NMNC 4535.
Learning Outcomes
1. Synthesize and integrate nursing practice concepts into their professional nursing practice.
2. Engage in professional nursing practice that is patient-centered and appropriate for diverse individual, families, and communities.
3. Integrate principles of quality improvement and safety into nursing practice within health care organizations and systems.
4. Deliver nursing care that is evidence-based.
5. Demonstrate leadership behaviors through the application of policies that apply to health care delivery.
6. Engage in effective interprofessional collaboration in the delivery of health care for quality patient outcomes.
7. Utilize technologies for the management of information and in the delivery of patient care.

NURS-NURSING

NURS 1110. Pre-Nursing Freshman Seminar
1 Credit (1)
This Freshman seminar provides an introduction to the university and its resources, an orientation to the pre-nursing curriculum, and overview of concepts for professional nursing practice. Emphasis is placed on exploring the nurse's role as an integral member of the healthcare team across multiple contexts and settings, and developing a professional identity. Consent of Instructor required.
Learning Outcomes
1. Develop strategies for transitioning to university life and a pathway to the nursing program, through evaluating knowledge, skill, and experience strengths and deficits.
2. Understand the role nurses and other interprofessional partners play in addressing issues regarding the patient experience across multiple healthcare settings.
3. Identify and examine cultural, professional and personal beliefs and values of nurses as they relate to patient care and working in multidisciplinary teams.
4. Begin to explore nursing careers in a variety of healthcare settings, across the nation.

NURS 1120. Fundamentals of Nursing Lecture and Laboratory
6 Credits (4+6P)
This course will introduce the nursing student to foundational theoretical concepts of professional nursing practice, the nursing process, and fundamental nursing skills. It includes developmental concepts related to clients across the lifespan. Clinical experiences in various healthcare settings will provide the student with the opportunity to apply learned skills to provide total care to meet client needs and to develop care planning skills related to actual problems. May be repeated up to 6 credits.
Corequisite: NURS 1154.
Learning Outcomes
1. Describe personally held values, attitudes, and beliefs related to health and wellness.
2. Describe scopes of practice, roles and values of health care team members.
3. Describe an evidence-based practice approach to provision of patient care and professional nursing practice across the lifespan.
4. Identify policies, procedures, standards of care and nursing leadership and management skills related to the provision of professional nursing care.
5. Describe strategies that reduce the risk of harm to self and others.
6. Identify essential information that must be available in a common database to support patient care across the lifespan.

NURS 1121. Foundations of Nursing Practice
4 Credits (4)

This course will introduce the nursing student to foundational theoretical concepts of professional nursing practice, the nursing process, and fundamental nursing skills. It includes developmental concepts related to clients across the lifespan. Clinical experiences in various healthcare settings will provide the student with the opportunity to apply learned skills to provide total care to meet client needs and to develop care planning skills related to actual problems.
Prerequisite/Corequisite: NURS 1134, NURS 1134L, NURS 1121L.
Learning Outcomes

1. Describe personally held values, attitudes, and beliefs related to health and wellness.
2. Describe scopes of practice, roles and values of health care team members.
3. Describe an evidence-based practice approach to provision of patient care and professional nursing practice across the lifespan.
4. Identify policies, procedures, and standards of care related to the provision of professional nursing care.
5. Describe strategies that reduce the risk of harm to self and others.
6. Identify essential information that must be available in a common database to support patient care across the lifespan.

NURS 1121L. Foundations of Nursing Lab
2 Credits (6P)
This course will introduce the nursing student to foundational theoretical concepts of professional nursing practice, the nursing process, and fundamental nursing skills. It includes developmental concepts related to clients across the lifespan. Clinical experiences in various healthcare settings will provide the student with the opportunity to apply learned skills to provide total care to meet client needs and to develop care planning skills related to actual problems.
Prerequisite/Corequisite: NURS 134, NURS 134L, NURS 136.
Learning Outcomes

1. Describe personally held values, attitudes, and beliefs related to health and wellness.
2. Describe scopes of practice, roles and values of health care team members.
3. Describe an evidence-based practice approach to provision of patient care and professional nursing practice across the lifespan.
4. Identify policies, procedures, standards of care and nursing leadership and management skills related to the provision of professional nursing care.
5. Describe strategies that reduce the risk of harm to self and others.
6. Identify essential information that must be available in a common database to support patient care across the lifespan.

NURS 1125. Medical Surgical Nursing I
4 Credits (4)
This course introduces nursing care and management of the adult client with common medical-surgical conditions.
Prerequisite: NURS 1134, NURS 1134L, NURS 1121, NURS 1121L.
Prerequisite/Corequisite: NURS 1130, NURS 1125L.
Learning Outcomes

1. Recognize personally held values and demonstrate assessment of the values held by diverse patients, as well as their preferences and expressed needs related to health and wellness.
2. Communicate with other members of the healthcare team to establish a plan to meet the needs of individuals, including commonly occurring chronic and acute health care problems throughout the lifespan.
3. Compare an individualized patient care plan utilizing an evidence-based approach for patient(s) across the lifespan to outcomes for the patient(s).
4. Demonstrate adherence to policies, procedures, and standards of care for the provision of care in healthcare delivery systems.
5. Apply strategies to reduce the risk of harm to self or others while providing professional nursing care.
6. Utilize varied communication technologies, electronic healthcare databases, and electronic health records to plan nursing care for patients with chronic illnesses across the lifespan.

NURS 1125L. Medical/Surgical Nursing I Clinical
2 Credits (6P)
Clinical experiences provide the student an opportunity to apply theoretical concepts and implement safe patient care to adults in a variety of settings.
Prerequisite: NURS 1134, NURS 1134L, NURS 1121, NURS 1121L.
Prerequisite/Corequisite: NURS 1130, NURS 1125L.
Learning Outcomes

1. Patient Centered Care: Recognize personally held values and demonstrate assessment of the values held by diverse patients, as well as their preferences and expressed needs related to health and wellness.
2. Teamwork and Collaboration: Communicate with other members of the healthcare team to establish a plan to meet the needs of individuals, including commonly occurring chronic and acute health care problems throughout the lifespan.
3. Evidenced Based Practice: Prepare an individualized patient care plan utilizing an evidence- based approach for patient(s) across the lifespan to outcomes for the patient(s).
4. Quality Improvement: Demonstrate adherence to policies, procedures, and standards of care for the provision of care in healthcare delivery systems.
5. Safety: Apply strategies to reduce the risk of harm to self or others while providing professional nursing care.
6. Informatics: Utilize varied communication technologies, electronic healthcare databases, and electronic health records to plan nursing care for patients with chronic illnesses across the lifespan.

NURS 1131. Foundations of Pharmacology
5 Credits (5)
This course provides the nursing student with an introduction to the foundations of pharmacology including: science of drug action, principles of medication administration, accurate calculation of drug doses, medication therapy across the lifespan, application of medications to treat health alterations, normal and adverse responses by the client to medication therapy, medication safety, medication regulation, national patient safety goals, and appropriate nursing interventions to achieve the desired goals of medication therapy.
Learning Outcomes

1. Recognize personally held values and demonstrate assessment of the values held by diverse patients, as well as their preferences and expressed needs related to pharmacological therapy.
2. Communicate with other members of the healthcare team to establish a plan to meet the needs of individuals, including commonly related to adverse or side effects of pharmacological therapy throughout the lifespan.
3. Compare an individualized patient care plan utilizing an evidence-based approach for patient(s) across the lifespan to outcomes related to the administration of pharmacological therapy.

4. Demonstrate adherence to policies, procedures, and standards of care for the administration of pharmacological therapy in healthcare delivery systems.
5. Apply strategies to reduce the risk of harm to self or others while providing professional nursing care.
6. Utilize varied communication technologies, electronic healthcare databases, and electronic health records to plan nursing care for the administration of pharmacological therapy across the lifespan.

NURS 1134. Foundation of Nursing Skills and Assessment
1 Credit (1)
This course provides nursing students with introductory nursing knowledge related to performance of nursing skills and assessment including: techniques of fundamental nursing care, basic and intermediate nursing skills, and foundational physical assessment techniques associated with care across the lifespan.
Corequisite: NURS 1134L, NURS 1121, NURS 1121L.
Learning Outcomes
1. Describe personally held values, attitudes, and beliefs related to health and wellness as measured by: Describe modifications to nursing care based on client cultural and religious influences; Demonstrate physical assessment skills for clients across the lifespan utilizing appropriate equipment and techniques.
2. Describe scopes of practice, roles and values of health care team members as measured by: Identify independent and collaborative nursing interventions.
3. Describe an evidence-based practice approach to provision of patient care and professional nursing practice across the lifespan as measured by: Demonstrate safe performance of basic nursing procedures; Identify quality sources of information to verify skills and interventions are based on evidence.
4. Identify policies, procedures, and standards of care related to the provision of professional nursing care as measured by: Identify need/situation where reporting of incident/event/irregular occurrence/variance is appropriate.
5. Describe strategies that reduce the risk of harm to self and others as measured by: Identify methods utilized to provide safe and effective care; Identify and document changes in patient status.
6. Identify essential information that must be available in a common database to support patient care across the lifespan as measured by: Select standard technology utilized to provide basic care to clients across the lifespan; Identify approved abbreviations and standard terminology for documenting care.

NURS 1134L. Foundation of Nursing Skills and Assessment Laboratory
2 Credits (6P)
This course provides nursing students with introductory nursing knowledge related to performance of nursing skills and assessment including: techniques of fundamental nursing care, basic and intermediate nursing skills, and foundational physical assessment techniques associated with care across the lifespan.
Corequisite: NURS 1134, NURS 1121, NURS 1121L.
Learning Outcomes
1. Describe personally held values, attitudes, and beliefs related to health and wellness.
2. Describe scopes of practice, roles and values of health care team members.
3. Describe an evidence-based practice approach to provision of patient care and professional nursing practice across the lifespan.
4. Identify policies, procedures, and standards of care related to the provision of professional nursing care.
5. Describe strategies that reduce the risk of harm to self and others.
6. Identify essential information that must be available in a common database to support patient care across the lifespan.

NURS 1150. Medical Terminology
3 Credits (3)
Study and understanding of medical terminology. Emphasis will be placed on learning the basic elements of medical words, appropriate spelling and use of the terms, and abbreviations.
Learning Outcomes
1. Demonstrate proficient interpretation of medical abbreviations.
2. Explain the importance of utilizing medical terms/abbreviations in the medical field.
3. Define medical terms correctly.
4. Interpret medical language including roots, prefixes and suffixes.
5. Pronounce medical terms correctly.
6. Spell medical terms correctly.

NURS 1153. Medication & Dosage Calculation
2 Credits (2)
Techniques of dosage calculation for medication and fluid administration. May be repeated up to 2 credits.
Learning Outcomes
1. Utilize the nursing process, clinical judgment, evidenced based information and knowledge from the arts and sciences to provide safe client centered care.
2. Coordinate and collaborate effectively through verbal, nonverbal, and technological means with individuals, families and the interdisciplinary team.
3. Integrate accountability and responsibility for practice within the legal and ethical standards of the nursing profession.
4. Apply the principles of delegation, management and leadership in providing client centered care.
5. Participate in activities that promote professional development and personal growth.

NURS 1154. Physical Assessment
2 Credits (2)
Beginning techniques of physical assessment by systems will be presented using the nursing process as a guide for providing safe client centered care throughout the life span. Laboratory experiences provide an opportunity to practice assessment skills on patients across the lifespan in a variety of settings.
Prerequisite: BIOL 1130 or BIOL 2210.
Corequisite: NURS 1153, NURS 1120.
Learning Outcomes
1. Discuss the purpose, guidelines, safety factors, and equipment necessary for performing a physical exam.
2. Discuss and demonstrate techniques necessary to facilitate communication to obtain a health history.
3. Identify and demonstrate correct documentation of each body system.
4. Define ethical/legal implications as they relate to documentation and the physical assessment exam.
5. Identify and discuss the nutritional implications as they relate to the physical assessment exam.

6. Recognize key terms, exam techniques, and the anatomy and physiology on the assessment of each body system.
7. Discuss developmental and cultural differences in performing a physical assessment.
8. Identify and discuss components of the nursing process focusing on assessment and beginning to recognize self-care deficits.
9. Identify opportunities to promote self-care assessment within the physical exam. 1
10. Identify methods by which airing behaviors facilitate the nurse-patient relationship in the performance of a physical assessment.

NURS 1157. Maternal/Child Health Deviations Lecture
5 Credits (5)
This course provides the intermediate nursing student with an in-depth review of care of the childbearing woman, family structures and roles, and nursing care of the child from birth through adolescence. Emphasis includes the care of pre-partum, intra-partum and postpartum clients, the neonate and health deviations in pediatric clients. Clinical experiences in the simulation laboratory, the community, and acute care settings will provide the student with the opportunity to apply learned skills to provide total care to meet needs of up to two adult, neonatal, or pediatric clients and to apply care planning skills related to actual, psychosocial and potential problems. Students must be concurrently enrolled in both the lecture and laboratory sections of the course. Students must be admitted into the Nursing Program to enroll in this course.
Prerequisite: NURS 1130, NURS 1134, NURS 1134L, NURS 1121, NURS 1121L, NURS 1125, NURS 1125L, NURS 2214, NURS 2214L.
Prerequisite/Corequisite: NURS 1157L.
Learning Outcomes
1. Utilize diverse patients' values, preferences, and expressed needs to drive development of the plan of care for the child bearing woman (19-65 years) and pediatric client (newborn-18).
2. Evaluate ability to function within own scope of practice as a member of the healthcare team to deliver care to individuals and families across the lifespan with complex health alterations as it relates to the child bearing woman (19-65 years) and pediatrics.
3. Demonstrate the use of evidence-based approaches for the delivery and evaluation of care to patients across the lifespan as it relates to the child bearing woman (19-65 years) and pediatric client (newborn-18).
4. Formulate a plan of care for the provision of care in healthcare delivery systems using policies, procedures and standards of care as it relates to the child bearing woman (19-65 years) and pediatric client (newborn-18).
5. Interpret effective use of strategies to reduce risk of harm to self or others while providing professional nursing care including evidence-based practice, national patient safety goals, and core measures as it relates to the child bearing woman (19-65 years) and pediatric client (newborn-18).
6. Utilize information management tools to monitor outcomes of care processes and deliver nursing care to patients with chronic or acute illness across the lifespan as it relates to the child bearing woman (19-65 years) and pediatric client (newborn-18).

NURS 1157L. Maternal/Child Health Deviations Laboratory
2 Credits (6P)
This course provides the intermediate nursing student with an in-depth review of care of the childbearing woman, family structures and roles, and nursing care of the child from birth through adolescence. Emphasis includes the care of pre-partum, intra-partum and postpartum clients, the neonate and health deviations in pediatric clients. Clinical experiences in the simulation laboratory, the community, and acute care settings will provide the student with the opportunity to apply learned skills to provide total care to meet needs of up to two adult, neonatal, or pediatric clients and to apply care planning skills related to actual, psychosocial and potential problems.
Prerequisite: NURS 1130, NURS 1134, NURS 1134L, NURS 1121, NURS 1121L, NURS 1125, NURS 1125L, NURS 2214, NURS 2214L.
Prerequisite/Corequisite: NURS 1157.
Learning Outcomes
1. Utilize diverse patients' values, preferences, and expressed needs to drive development of the plan of care for the childbearing woman (19-65 years) and pediatric client (newborn-18).
2. Evaluate ability to function within own scope of practice as a member of the healthcare team to deliver care to individuals and families across the lifespan with complex health alterations as it relates to the childbearing woman (19-65 years) and pediatric client (newborn-18).
3. Demonstrate the use of evidence-based approaches for the delivery and evaluation of care to patients across the lifespan as it relates to the childbearing woman (19-65 years) and pediatric client (newborn-18).
4. Formulate a plan of care for the provision of care in healthcare delivery systems using policies, procedures, and standards of care as it relates to the childbearing woman (19-65 years) and pediatric client (newborn-18).
5. Interpret effective use of strategies to reduce risk of harm to self or others while providing professional nursing care including evidence-based practice, national patient safety goals, and core measures as it relates to the childbearing woman (19-65 years) and pediatric client (newborn-18).
6. Utilize information management tools to monitor outcomes of care processes and deliver nursing care to patients with chronic or acute illness across the lifespan as it relates to the childbearing woman (19-65 years) and pediatric client (newborn-18).

NURS 2210. Pharmacological Requisites of the Childbearing Family
1 Credit (1)
Basic concepts of pharmacology including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics, and their relationship to nursing care will be discussed focusing on medications commonly utilized with the childbearing family. Medication classes to be discussed include labor and delivery, analgesic, vitamins, respiratory, gynecological, endocrine, and anti-microbial/anti-infective drugs. May be repeated up to 1 credit.
Prerequisite: NURS 1154 and NURS 1120.
Learning Outcomes
1. Incorporate the values, preferences and expressed needs of maternal/child and pediatric clients in the administration of pharmacotherapeutics to these clients.
2. Apply principles of teaching/learning in education maternal/child and pediatric clients on the use, adverse effects and interactions of pharmacotherapeutic agents.
3. Explain how members of the health care team collaborate in the delivery of pharmacotherapeutics to maternal/child and pediatric clients.
4. Discuss pharmacokinetics and pharmacodynamics of drugs specific to the maternal/child and pediatric client.
5. Apply evidenced based information to the administration of pharmacotherapeutics to maternal/child and pediatric clients.

6. Give examples of policies, procedures and standards of care related to pharmacotherapeutics utilized in the care of maternal/child and pediatric clients.

NURS 2214. Psychiatric Mental Health Nursing Theory
3 Credits (3)
This course will allow the nursing student to develop skills necessary to provide nursing care for clients with mental health problems in various health care settings including: common mental health disorders, psychosocial dysfunction, psychosocial safety/substance abuse issues, violence, suicide, restraints, developmental age related pathophysiology, psychopharmacology, cultural/religious considerations, grief/loss, promotion of mental health, and therapeutic communication.
Prerequisite: NURS 1134, NURS 1134L, NURS 1121, NURS 1121L.
Prerequisite/Corequisite: NURS 1130, NURS 2214L.
Learning Outcomes
1. Recognize personally held values and demonstrate assessment of the values held by diverse patients, as well as their preferences and expressed needs related to health and wellness. wellness.
2. Communicate with other members of the healthcare team to establish a plan to meet the needs of individuals, including commonly occurring chronic and acute health care problems throughout the lifespan.
3. Compare an individualized patient care plan utilizing an evidence-based approach for patient(s) across the lifespan to outcomes for the patient(s).
4. Demonstrate adherence to policies, procedures, and standards of care for the provision of care in healthcare delivery systems.
5. Apply strategies to reduce the risk of harm to self or others while providing professional nursing care.
6. Utilize varied communication technologies, electronic healthcare databases, and electronic health records to plan nursing care for patients with chronic illnesses across the lifespan.

NURS 2214L. Psychiatric Mental Health Nursing Clinical
1 Credit (3P)
This course will allow the nursing student to develop skills necessary to provide nursing care for clients with mental health problems in various health care settings including: common mental health disorders, psychosocial dysfunction, psychosocial safety/substance abuse issues, violence, suicide, restraints, developmental age related pathophysiology, psychopharmacology, cultural/religious considerations, grief/loss, promotion of mental health, and therapeutic communication. Selected clinical learning experiences in the simulation Laboratory, acute care, and community settings will allow the student to develop ability to develop: proficiency in performance of nursing skills, collaborative skills with clients, families, peers and health care team members, care planning skills related to patient actual, psychosocial, and potential problems in the delivery of total nursing care to meet needs of one client across the life span with acute/chronic mental health needs.
Prerequisite: NURS 1134, NURS 1134L, NURS 1121, NURS 1121L.
Prerequisite/Corequisite: NURS 1134, NURS 2214.
Learning Outcomes
1. Recognize personally held values and demonstrate assessment of the values held by diverse patients, as well as their preferences and expressed needs related to health and wellness.
2. Communicate with other members of the healthcare team to establish a plan to meet the needs of individuals, including commonly occurring chronic and acute health care problems throughout the lifespan.
3. Compare an individualized patient care plan utilizing an evidence-based approach for patient(s) across the lifespan to outcomes for the patient(s).
4. Demonstrate adherence to policies, procedures, and standards of care for the provision of care in healthcare delivery systems.
5. Apply strategies to reduce the risk of harm to self or others while providing professional nursing care.
6. Utilize varied communication technologies, electronic healthcare databases, and electronic health records to plan nursing care for patients with chronic illnesses across the lifespan.

NURS 2225. Medical Surgical Nursing II
4 Credits (4)
This course focuses on the care of adult clients with complex medical/surgical health problems. Emphasis is placed on helping clients and their families cope with alterations in body functions. Concepts of pharmacology, health promotion and education, evidence-based practice, and interdisciplinary collaboration will be integrated throughout the course.
Learning Outcomes
1. Utilize diverse patients' values, preferences, and expressed needs to drive development of the plan of care for the adult client with acute illness.
2. Evaluate ability to function within own scope of practice as a member of the healthcare team to adult clients with acute illness.
3. Demonstrate the use of evidence-based approaches for the delivery and evaluation of care to patients across the lifespan as it relates to adult clients with acute illness.
4. Formulate a plan of care for the provision of care in healthcare delivery systems using policies, procedures and standards of care as it relates to adult clients with acute illness.
5. Interpret effective use of strategies to reduce risk of harm to self or others while providing professional nursing care including evidence-based practice, national patient safety goals, and core measures as it relates to adult clients with acute illness.
6. Utilize information management tools to monitor outcomes of care processes and deliver nursing care to adult clients with acute illness.

NURS 2225L. Medical Surgical Nursing Clinical II
2 Credits (6P)
Clinical experiences provide the student an opportunity to apply theoretical concepts and implement safe care to clients and selected groups in a variety of settings.
Prerequisite: NURS 1130, NURS 1134, NURS 1134L, NURS 1121, NURS 1121L, NURS 1125, NURS 1125L, NURS 2214, NURS 2214L.
Corequisite: NURS 2225, NURS 1157, NURS 1157L.
Learning Outcomes
1. Utilize diverse patients' values, preferences, and expressed needs to drive development of the plan of care for the adult client with acute illness.
2. Evaluate ability to function within own scope of practice as a member of the healthcare team to adult clients with acute illness.
3. Demonstrate the use of evidence-based approaches for the delivery and evaluation of care to patients across the lifespan as it relates to adult clients with acute illness.
4. Formulate a plan of care for the provision of care in healthcare delivery systems using policies, procedures and standards of care as it relates to adult clients with acute illness.
5. Interpret effective use of strategies to reduce risk of harm to self or others while providing professional nursing care including evidence-

based practice, national patient safety goals, and core measures as it relates to adult clients with acute illness.

6. Utilize information management tools to monitor outcomes of care processes and deliver nursing care to adult clients with acute illness.

NURS 2235. Medical Surgical Nursing III
3 Credits (3)
This course focuses on advanced concepts of nursing care as they relate to patients across the lifespan with complex, multisystem alterations in health. Emphasis is placed on implementing time management and organizational skills while managing the care of patients with multiple needs and collaborating with the interdisciplinary team. Complex clinical skills, as well as priority setting, clinical judgment, and tenets of legal and ethical practice, are integrated throughout the course.
Prerequisite: NURS 1130, NURS 1134, NURS 1134L, NURS 1121, NURS 1121L, NURS 1125, NURS 1125L, NURS 2214, NURS 2214L, NURS 1157, NURS 1157L, NURS 2225, NURS 2225L.
Prerequisite/Corequisite: NURS 2996, NURS 2235L.
Learning Outcomes

1. Integrate the values, preferences, attitudes, and expressed needs of the acutely ill patient into the plan of care related to the care of the adult client with complex health deviations.
2. Integrate the contributions of other members of the healthcare team into the delivery of nursing care for individuals across the lifespan with complex or multi-system health alterations related to the care of the adult client with complex health deviations.
3. Discriminate between valid and invalid reasons for modifying evidence-based clinical practice based on clinical expertise or patient/family preferences in the creation of a plan of care for delivery and evaluation of care for patients across the lifespan related to the care of the adult client with complex health deviations.
4. Evaluate the use of policies, procedures and standards of care in healthcare delivery systems and adapt the care as appropriate related to the care of the adult client with complex health deviations.
5. Interpret and analyze effective use of strategies to reduce risk of harm to self or others while providing professional nursing care, creating a structure for implementation of evidence- based practice, national patient safety goals, and core measures in the care of the adult client with complex health deviations.
6. Integrate use of appropriate technology and information management tools to support safe delivery of care to the adult client with complex health deviations.

NURS 2235L. Medical Surgical Nursing III Clinical
4 Credits (12P)
Clinical experiences provide the student an opportunity to apply theoretical concepts and implement safe care to clients and selected groups in a variety of settings. Experiences that facilitate entry into practice are included in this practicum.
Prerequisite: NURS 1130, NURS 1134, NURS 1134L, NURS 1121, NURS 1121L, NURS 1125, NURS 1125L, NURS 2214, NURS 2214L, NURS 1157, NURS 1157L, NURS 2225, NURS 2225L.
Prerequisite/Corequisite: NURS 2996, NURS 2235.
Learning Outcomes

1. Integrate the values, preferences, attitudes, and expressed needs of the acutely ill patient into the plan of care related to the care of the adult client with acute, chronic, or complex health deviations.
2. Integrate the contributions of other members of the healthcare team into the delivery of nursing care for individuals across the lifespan with complex or multi-system health alterations related to the care of the adult client with acute, chronic, or complex health deviations.
3. Discriminate between valid and invalid reasons for modifying evidence-based clinical practice based on clinical expertise or patient/family preferences in the creation of a plan of care for delivery and evaluation of care for patients across the lifespan related to the care of the adult client with acute, chronic, or complex health deviations.
4. Evaluate the use of policies, procedures, and standards of care in healthcare delivery systems and adapt the care as appropriate related to the care of the adult client with acute, chronic, or complex health deviations.
5. Interpret and analyze effective use of strategies to reduce risk of harm to self or others while providing professional nursing care, creating a structure for implementation of evidence- based practice, national patient safety goals, and core measures in the care of the adult client with acute, chronic, or complex health deviations.
6. Integrate use of appropriate technology and information management tools to support safe delivery of care to the adult client with acute, chronic, or complex health deviations.

NURS 2996. Nursing Topics
3 Credits (3)
Varies.
Prerequisite: NURS 1130, NURS 1134, NURS 1134L, NURS 1121, NURS 1121L, NURS 1125, NURS 1125L, NURS 2214, NURS 2214L, NURS 1157, NURS 1157L, NURS 2225, NURS 2225L.
Corequisite: NURS 2235, NURS 2235L.
Learning Outcomes

1. Varies.

NURS 3110. Human Pathophysiology Foundation for Nursing
4 Credits (4)
Human pathophysiology concepts of adaptation and alteration in function and structure across the life span and their implications for nursing practice. Restricted to: BSNR,BSN,BSNP or consent of instructor majors. May be repeated up to 4 credits.
Prerequisite: Grade of C- or better in both (BIOL 353 & BIOL 2221/ BIOL 354), or (BIOL 2210 & BIOL 2225), or (SPMD 2210 & SPMD 3210).
Corequisite: NMNC 3110, NMNC 3135.
Learning Outcomes

1. Identify the functional and structural (pathophysiology) alterations that occur in the human body.
2. Relate the impact of functional and structural alterations on human health.
3. Recognize the relationships of pathophysiology to the practice of professional nursing.
4. Discuss the basic concepts of patterns of genetic inheritance of disease with related nursing implications and ethical considerations.
5. Use medical terminology appropriately.
6. Relate the impact of socio-cultural, legal-ethical factors, and scientific advances on pathophysiology.

NURS 3115. Care of the Veteran Population
3 Credits (3)
This course prepares healthcare and other professionals to care for the Veteran population. Specific topics and health issues explored include military and veteran culture, women in the military, post-traumatic stress disorder, traumatic brain injury, military sexual trauma, and chemical exposures. An overview of the Veterans Health Administration, the largest healthcare system in the USA, will be provided. May be repeated up to 3 credits.

Learning Outcomes

1. Examine Veterans' demographics and the impact of political, social, cultural, and environmental factors.
2. Analyze the mission of the Veterans Health Administration with a focus on healthcare system and services.
3. Evaluate health concerns, issues, and health seeking behaviors within the diverse Veteran population.
4. Appraise available evidence on delivering culturally sensitive care that addresses the needs of the Veteran patient and their family.

NURS 3996. Special Topics
1-9 Credits (1-9)
Specific subjects to be announced in the Schedule of Classes. May be repeated up to 21 credits.
Learning Outcomes

1. Varies

NURS 4110. Strategies for Student Success
3 Credits (3)
This course is designed to assist and support students as they identify learning needs and develop a plan for successfully mastering nursing knowledge. Course activities and assignments will be designed to address student's self-identified learning goals to enhance their opportunity for success. Restricted to NURS, BSN, BSNP, BSNR majors. May be repeated up to 3 credits.

NURS 4997. Independent Study
1-3 Credits (1-3)
Individual studies with prior approval of department head. May be repeated up to 3 credits.
Learning Outcomes

1. Varies

NURS 5105. Scholarly Preparation for the Doctor of Nursing Practice
1 Credit (1)
This course is designed to enhance students' scholarly writing skills while fostering an effective school and study mindset. Students will explore current research on the science of learning, delving into evidence-based practices that improve student learning outcomes. Students will also identify techniques and habits that support an effective school/study mindset, essential for academic success. By the end of the course, students will be equipped with practical skills to enhance their academic performance and produce high-quality scholarly writing.
Learning Outcomes

1. Explore strategies to improve memory and make learning easier.
2. Compare and contrast the common myths with scientifically-backed facts about learning.
3. Utilize APA formatting guidelines to properly format a given writing assignment, including citations and references.
4. Identify key characteristics of professional writing, such as clarity, conciseness, proper grammar, and appropriate tone.

NURS 5110. Evidence-Based Practice for Healthcare Leaders
3 Credits (3)
This course is designed to prepare nurse administrators and other healthcare leaders with the skills and knowledge needed to critically analyze and synthesize scholarly evidence to promote high quality evidence-based practice.
Learning Outcomes

1. Utilize information sources, such as bibliographic databases and electronic resources and experts, to locate existing knowledge relevant to healthcare and nursing practice.
2. Critically appraise selected research designs, methods of data collection (quantitative and qualitative), and data analytic methods in relation to selected clinical practice and healthcare systems problems.
3. Discuss the relevance of theory and conceptual frameworks to health care research and practice.
4. Evaluate the use of evidence-based practice models to investigate clinical practice and healthcare systems problems.
5. Discuss the ethical, cultural, and professional concerns with human subjects in nursing research and considerations for evidence-based practice.
6. Propose a clinical practice change utilizing evidence-based practice guidelines.

NURS 5115. Quality Improvement for Healthcare Leaders
3 Credits (3)
This course prepares nurse administrators and healthcare leaders to be engaged in the process of continuous quality improvement on interprofessional healthcare teams. Healthcare improvement principles and practice will focus on improving patient care and outcomes, lowering costs, reducing healthcare disparities, and increasing access to healthcare. Restricted to: exclude Online MSN in Nursing Administration majors.
Learning Outcomes

1. Explain the value of improvement science in healthcare and its impact on healthcare quality.
2. Articulate the role of administrators in leading and facilitating change in healthcare systems through quality improvement processes.
3. Compare and contrast conceptual models and frameworks that guide quality improvement work in healthcare systems.
4. Articulate the principles for selecting a systems-level problem for continuous quality improvement action.
5. Demonstrate the use of quality improvement methods, tools and clinical data to address a systems-level problem in the clinical setting.
6. Examine the role of health policy and national standards in guiding quality improvement initiatives.

NURS 5120. Nursing Informatics
3 Credits (3)
This course is designed to meet the needs of the doctoral nurse of practice and master's prepared nurse in acquiring informatics knowledge for the use of information technology in meeting today's health care challenges. Areas of concentration examine the implications of informatics for practice, including nursing, public health, and healthcare in general, electronic health record issues, related ethical, legislative, standardization and political issues in health informatics and explore global and future informatics issues. Restricted to: NURS, NUSC, NURP majors.
Learning Outcomes

1. Analyze the rationale for the development of informatics competencies at all levels of nursing practice.
2. Synthesize knowledge management principles with the advanced practice and nurse leadership role.
3. Use the knowledge of information technology to inform and guide the design of databases that generate meaningful evidence for nursing practice.
4. Analyze critical elements necessary for the selection, use, and evaluation of healthcare information systems and patient care technology.

5. Appraise the impact of the legal, ethical and policy issues surrounding technological advances in health care systems to include the use of information, information technology, communication networks and patient care technology.
6. Evaluate programs that monitor outcomes of care, care systems and quality improvement including consumer use of healthcare information systems.

NURS 5125. Health Policy for Advanced Nursing Practice
3 Credits (3)
Course provides a conceptual approach to understanding and analyzing the environment of professional nursing practice. Focus on the impact of health care economics, financing, law and regulation, ethics and health policy on individual and collaborative nursing practice. Restricted to: NURS, NUSC, NURP majors.
Learning Outcomes
1. Demonstrates an understanding of the interdependence of policy and practice.
2. Advocate for ethical policies that promote access, equity, quality, and cost.
3. Analyze ethical, legal, and social factors influencing policy development.
4. Demonstrate ability to contribute to the development of health policy.
5. Analyze the implications of health policy in the development of collaboration, interdisciplinary, and inter-organizational practices.
6. Evaluate the impact of globalization on health care policy development.
7. Advocate for policies for safe and healthy practice environments.

NURS 5130. Promoting Health Behavior
3 Credits (3)
This course provides an overview of the advance practice nurse's role in affecting health behavior change. Relationships among health behaviors and health status are examined to include education and structural approaches to the modification of those behaviors, ethics of health promotion, sites for health promotion activities, and evaluation of health promotion. Theoretical models of behavior change, and primary, secondary, and tertiary prevention concepts serve as a basis for developing nursing interventions that promote behavior change.
Learning Outcomes
1. Identify determinants of health-related behavior, behavior change, and relevant outcomes.
2. Describe the relationships between health promotion intervention activities, expected changed in behavior, and expected outcomes.
3. Apply theories of health behavior, learning, and changes as a basis for planning health promotion programs.
4. Conduct a needs assessment that includes the use of epidemiological methods to determine learning needs of a specific community, group of individuals, or health-related organization.
5. Evaluate the effectiveness of educational methods and materials in achieving behavior changes using appropriate measures of health-related behavior change.
6. Develop a nursing intervention with an evaluation plan to promote behavior change in a given population.
7. Explore the use/integration of an array of interdisciplinary paraprofessionals and professional health providers along with that of the advance education nurse in efforts to promote behavior change.

NURS 5210. Advanced Leadership in Healthcare
3-5 Credits (3+1-2P)
Analysis of leadership theories as they pertain to the nurse executive and the advanced practice nurse in complex health care organizations. Emphasis will be placed on organizational change and conflict management in working with interdisciplinary health care teams. Clinical component included for DNP students only. Restricted to: NURS,NUSC,NURP majors. May be repeated up to 5 credits.
Learning Outcomes
1. Develop strategies for managing the ethical concerns inherent to in-patient care, the health care organization, and research.
2. Demonstrate knowledge required to initiate and guide change, work collaboratively with other professionals for the improvement of healthcare practices and outcomes.
3. Apply leadership, change, and management theories to practice at the organizational and individual levels.
4. Develop written and verbal communication skills necessary to advance innovations in health care systems and health care practice.
5. Develop strategies that promote/improve access to quality, cost-effective health care.
6. Apply the principles of persuasion, influence, negotiation, and consensus-building to lead high-reliability teams.

NURS 5220. Management of Human and Fiscal Resources in Nursing
4 Credits (3+3P)
This graduate level course examines and applies contemporary concepts of human and fiscal resource management for the nurse administrator. Focus is placed on achieving quality outcomes through effective management of human assets and organizational resources in health care settings. The course includes a clinical component. May be repeated up to 4 credits.
Learning Outcomes
1. Demonstrate an understanding of the economic and market factors that affect health care organizations.
2. Demonstrate understanding of financial reports common to health care organizations.
3. Utilize common strategies and techniques for fiscal planning and management in health organizations.
4. Demonstrate understanding of the legal and regulatory environment of health care organizations that influence fiscal planning and management.
5. Address current issues facing Human Resource managers and organizational leaders, from a nursing perspective.
6. Determine how organizational vision sets the context for strategic objectives and action plans.
7. Demonstrate application of human resources management through case analysis.
8. Enhance leadership skills in performance evaluation, motivation and professional development.
9. Evaluate how an organization improves administrative effectiveness, productivity, and systems.1
10. Analyze ethical, legal, and regulatory issues in Human Resource Management and organizational leadership.

NURS 5230. Seminar in Nursing Administration- Roles
3 Credits (3)
This course is designed for role preparation for the nurse administrator as manager, leader, collaborator and change agent. It involves synthesis of concepts from management and nursing as a basis for role effectiveness in nursing administration.

Corequisite: NURS 5240.

Learning Outcomes

1. Differentiate between levels of preparation for nursing practice at the graduate level.
2. Differentiate the nature and scope of the role of the nurse administrator among the roles of various healthcare team members.
3. Analyze role expectations of selected career options for the graduate prepared nurse administrator.
4. Articulate the role of the nurse administrator in relation to the health of vulnerable populations and elimination of health disparities.
5. Synthesize theories from the disciplines of nursing, business, organizational, fiscal, and human resource management for the application to the role of the nurse administrator.
6. Evaluate leadership responsibilities of the nurse administrator in health care organizations in relation to the accepted scope and standards for that role.
7. Analyze and evaluate evidence-based practice for effective administration in health care organizations.

NURS 5240. Advanced Field Work in Nursing
1-3 Credits (1P)

A practicum in Nursing Administration. Application of concepts from management and nursing to the clinical, educational, or community setting. Restricted to: MSN, DNP, PHD majors. May be repeated up to 12 credits.

Prerequisite: NURS 5210.

Corequisite: NURS 5230.

Learning Outcomes

1. Analyze organizational processes observed/experienced in the clinical setting and the roles of nursing administrators in these processes.
2. Utilize research findings as a basis for nursing administration practice.
3. Establish networking relationships with colleagues in nursing administration and related areas.

NURS 5996. Special Topics
1-3 Credits (1-3)

Specific subjects to be announced in the Schedule of Classes. May be repeated up to 12 credits.

NURS 5997. Independent Study
1-10 Credits (1-10)

Individual studies and directed research with prior approval of department head. May be repeated up to 20 credits.

NURS 6110. Introduction to Population Health
1 Credit (1)

This interprofessional survey course will provide the student with a theoretical foundation in population health approaches to improving systems of care and health outcomes. The student will analyze empirical evidence in population health and appraise interprofessional population health strategies from a local, national, and international perspective. Students will identify and demonstrate methods for completing a community or health systems assessment and apply the assessment to the conceptualization of interprofessional strategies for improving population health systems of care.

Learning Outcomes

1. Analyze key concepts in population health.
2. Examine population-based services from a local, national and international perspective with an emphasis on opportunities for interprofessional collaborations and contributions.
3. Appraise the population health evidence-based literature on a topic of interest.
4. Develop a community health or health systems assessment within an interprofessional student team and propose strategies for improving the delivery of population health services within a community of interest.

NURS 6112. Population Health Leadership and Epidemiologic Decision-Making
3 Credits (3)

This course prepares advanced nursing students to integrate epidemiologic principles with population health strategies to improve outcomes across diverse populations. The course emphasizes data-driven decision-making, evidence-based interventions, interprofessional collaboration, and advocacy for health equity. Students will analyze disease patterns, assess community health needs, and design interventions to address social determinants of health, health disparities, and system-level barriers to care.

Learning Outcomes

1. Use epidemiologic methods to evaluate health disparities and needs in populations.
2. Evaluate the impact of social determinants of health on population health outcomes.
3. Synthesize evidence-based practices to inform equitable and culturally competent population health programs.
4. Develop a comprehensive program management plan, including budget analysis and evaluation strategies, to address a population health priority.

NURS 6115. Advanced Nursing Knowledge and the DNP Role
3 Credits (3)

This course provides an exploration of advanced nursing knowledge and the pivotal role of the Doctor of Nursing Practice (DNP) in healthcare. Students will examine the theoretical foundations and advanced practices that underpin the DNP role and review nursing's scientific and disciplinary knowledge.

Learning Outcomes

1. Analyze theoretical concepts, principles and processes to create a framework for advanced nursing practice.
2. Discuss the history and structure of nursing knowledge.
3. Assess the roles of the DNP from a nursing theory lens.
4. Conceptualize the role and function of the DNP within healthcare systems.

NURS 6120. Quality Improvement in Healthcare
3 Credits (3)

This course prepares advanced practice nurses to be leaders of inter-professional teams engaged in the process of continuous quality improvement in healthcare settings. Healthcare quality improvement principles and practice will focus on improving patient care and outcomes, lowering costs, reducing health disparities, and increasing access to healthcare. May be repeated up to 3 credits.

Learning Outcomes

1. Explain the value of improvement science in healthcare and its impact on healthcare quality.
2. Articulate the role of the doctorally-prepared nurse in leading and facilitating change in healthcare systems through quality improvement processes.
3. Compare and contrast conceptual models and frameworks that guide quality improvement work in healthcare systems.

4. Articulate the principles for selecting a systems-level problem for continuous quality improvement action.
5. Demonstrate the use of quality improvement methods, tools and clinical data to address a systems-level problem in the clinical setting.
6. Understand the role of health policy and national standards in guiding quality improvement initiatives.

NURS 6125. Evidence-Based Practice in Healthcare
3 Credits (3)
This course is designed to prepare nurse practitioners and other advanced practice nurses with the skills and knowledge needed to critically analyze and synthesize scholarly evidence to promote high quality evidence-based practice. Restricted to: Family Nurse Practitioner; Psych/Mental Health Nursing; Nursing Practice; Family Nurse Practitioner Certificate; and Psych/Mental Health Nursing Certificate majors.
Prerequisite: NURS 6120.
Learning Outcomes
1. Utilize information sources, such as bibliographic databases and electronic resources and experts, to locate existing knowledge relevant to healthcare and nursing practice.
2. Critically appraise selected research designs, methods of data collection (quantitative and qualitative), and data analytic methods in relation to selected clinical practice and healthcare systems problems.
3. Discuss the relevance of theory and conceptual frameworks to health care research and practice.
4. Evaluate the use of evidence-based practice models to investigate clinical practice and healthcare systems problems.
5. Discuss the ethical, cultural, and professional concerns with human subjects in nursing research and considerations for evidence-based practice.
6. Propose a clinical practice change utilizing evidence-based practice guidelines.

NURS 6130. Epidemiology for Advanced Nursing Practice
2 Credits (2)
Emphasis is on the practical application of the principles of epidemiology in the measurement and evaluation of population health. Epidemiological literature will be critiqued and synthesized to evaluate population-based public health nursing problems. Issues related to disease surveillance, causation, genetic patterns, screening and social trends in population health will be examined. Use of existing data bases and technology programs are covered. Restricted to: NURP, NURS, NUSC majors.
Learning Outcomes
1. Analyze epidemiological evidence for rigor and application in designing population- based intervention strategies for selected health issues.
2. Evaluate current legislative and regulatory policies that have influenced the impact of the epidemiological factors on health and disease in human populations.
3. Integrate knowledge of epidemiological concepts when evaluating population based public health nursing problems within diverse/ undeserved populations.
4. Synthesize data from existing sources to assess, plan, implement and evaluate population-based interventions.

NURS 6135. Interdisciplinary Leadership and Role Development for Practice Excellence
3 Credits (3)
This required course prepares students for organizational and systems leadership and knowledge and skills critical to role development in independent and inter and intra-disciplinary practice. Content includes communication, conflict resolution, collaboration and negotiation, leadership, and team functioning to maximize success in the establishment of safe, effective patient-centered care in complex environments.
Learning Outcomes
1. Evaluate interdisciplinary care delivery models from a systems perspective using evidence-based findings.
2. Incorporate principles of specialty practice management, quality improvement, and interdisciplinary teamwork in order to meet the health needs of the specialty population served.
3. Analyze effective strategies for the management of ethical dilemmas, incorporation of sensitivity to diverse cultures, and elimination of health disparities.
4. Differentiate among the multiple roles in advanced nursing practice.
5. Evaluate leadership styles in a team environment in the analysis of complex practice and organizational issues.
6. Incorporate consultative and leadership skills with inter and intra-disciplinary teams to facilitate change.

NURS 6150. Advanced Anatomy
3 Credits (2+1P)
This course presents an extensive exploration of human anatomy from a topographical and regional perspective. The knowledge gained in this course serves as a foundation for advanced clinical assessment for anesthesia practice, clinical decision-making, and patient management.
Learning Outcomes
1. Survey the regional organization and topography of anatomical structures within the key clinical regions of the human body with a focus on neurovascular anatomy and internal organs.
2. Discover the structure and function of the central nervous system and the distribution of all of the major peripheral nerves in the body.
3. Classify the relationship between palpable anatomical landmarks and the deep anatomy of the head, neck, thorax, abdomen, pelvis and limbs.
4. Evaluate major anatomical structures in the human body using radiographs, ultrasound, CT, MRI images.

NURS 6155. Advanced Physiology
3 Credits (3)
This course presents an extensive and detailed exploration of human physiology from a molecular, cellular, tissue, organ, and system perspective. The course will cover individual differences in physiology and how they relate to culture, gender, race, age, and genetics. The knowledge gained in this course serves as a foundation for advanced nursing clinical assessment, pharmacology, clinical decision-making, and patient management. This course provides an in-depth exploration of human physiology with a focus on the principles and mechanisms relevant to advanced nurse practice. Students will study advanced concepts in cardiovascular, respiratory, renal, endocrine, and neurological systems. Emphasis is placed on understanding the physiological responses to critical care scenarios and how to manage patient homeostasis throughout. The course aims to enhance the student's ability to assess, analyze, and intervene in complex clinical situations, ensuring safe and effective advanced nursing care.

Learning Outcomes

1. Identify structures and normal physiologic physiological functions of the human body organs and Systems.
2. Demonstrate knowledge of the concept of homeostasis and be able to Analyze the physiological impact on different organ systems and apply this knowledge to clinical practice.
3. Summarize the complexities of normal human physiologic physiological multi-system interactions.
4. Discuss how principles of normal physiology impact advance practice nursing care of individuals and develop critical thinking skills to identify and manage complex physiological changes, complications, and emergencies related to anesthesia, using evidence-based practices to guide clinical decision-making.
5. Understand advanced physiological mechanisms within the cardiovascular, respiratory, renal, endocrine, and nervous systems, and how these systems are affected by disease processes and medications.

NURS 6160. Chemistry and Physics for Anesthesia
3 Credits (3)

This course synthesizes the principles of math, inorganic chemistry, organic chemistry, biochemistry, and physics to advanced nursing practice, specifically nurse anesthesiology. Topics are covered from a molecular, cellular, tissue, organ, and system perspective. The knowledge gained in this course serves as a foundation for advanced clinical assessment, pharmacology, clinical decision-making, and patient management.

Learning Outcomes

1. Demonstrate proficiency in medical mathematics: algebraic equations, math conversions, and medical word problems.
2. Interpret physical and chemical principles related to concentration gradients, thermodynamics, the gas laws, solutions, fluids, volume and flow.
3. Evaluate and analyze basic and advanced bio-scientific concepts to normal and abnormal human physiologic states and critically assess the effectiveness and limitations of various types of clinical monitoring equipment in patient care.
4. Interpret basic and advanced bioscience concepts to assess hazards and implement electrical, fire, and radiation safety in the clinical anesthesia setting.
5. Formulate solutions to patient and equipment clinical dilemmas using the scientific underpinnings of bio-scientific principles.

NURS 6210. Professional Roles for Advanced Practice Clinical Nursing
3 Credits (3)

This course will focus on providing an in depth understanding of the legal, historical, political, social, and ethical aspects of advanced practice nursing. Traditional and emerging roles for advanced practice nursing are examined. Students must be Admitted to the DNP program. Restricted to DNP majors. May be repeated up to 3 credits.

Prerequisite: NURS 6430 OR NURS 6520.

Learning Outcomes

1. Analyze the development, functions and roles of advance practice nurse in multidisciplinary and collaborative settings.
2. Use conceptual and analytical skills to evaluate the links among practice, organizational, population, fiscal, and policy issues related to advance practice nurses.
3. Create a practice framework for entry into advanced practice with a complex, multicultural health care system.
4. Articulate the role of the advance practice nurse in resolution of ethical and legal, and policy issues within a complex health care system.
5. Analyze the role of the Advance Practice Nurse in promoting positive changes in the health status of individuals, families, groups, communities and populations.
6. Describe the role of the Advance Practice Nurse in dissemination of nursing knowledge.

NURS 6215. Professional Aspects of Nurse Anesthesiology Practice
3 Credits (3)

This course examines professional role development of the nurse anesthetist with an emphasis on the history and evolution of nurse anesthesiology practice, as well as scope, standards, legal aspects, ethics, quality, and regulations. Professional advocacy topics and the business of anesthesiology practice will be appraised. This course also addresses the risks of the role related to wellness and substance use disorder. Cultural competence modules for healthcare workers will be completed during this course.

Learning Outcomes

1. Discuss the history and evolution of nurse anesthesiology practice.
2. Analyze the professional components of nurse anesthesiology practice, emphasizing scope, standards, legal aspects, ethics, and regulation.
3. Differentiate between state, national, and international anesthesia organization roles and functions.
4. Identify quality assessment tools in anesthesiology practice.
5. Compare various business models of anesthesia, reimbursement methods, payment policies, reimbursement, and nurse anesthesiology practice patterns.
6. Examine the impact of wellness and substance use disorder on anesthesia providers.
7. Demonstrate cultural awareness and sensitivity of patient background characteristics including, but not limited to race, ethnicity, socioeconomic status, age, gender and sexuality.
8. Examine professional advocacy and other selected current issues affecting nurse anesthesiology practice.

NURS 6220. Advanced Pathophysiology for Clinical Nursing
3 Credits (3)

In-depth study of the physiological and pathological bases of altered health states of patients across the life span. Case studies facilitate application of complex concepts to clinical nursing practice. Restricted to: NURS, NUSC, NURP majors.

Learning Outcomes

1. Identify the functional alterations that occur as a result of illness in individuals across the life span.
2. Recognize risk factors, signs, and symptoms produced by the physiological changes to frequently occurring illnesses as a basis for health care, evidence-based practice, and therapeutic nursing interventions.
3. Analyze the concepts of altered molecular and cellular function related to selected disease processes.
4. Critically analyze the impact of alterations in structure and function including the relationship of genetics and environment on the individual as a system.
5. Discuss effective and ineffective adaptations to stressors by the human body across the lifespan.

NURS 6224. Diagnostic Reasoning and Advanced Health Assessment
3 Credits (3)
This course is designed to assist students to refine history taking, psychosocial assessment and physical assessment skills. Content focuses on assessment of individuals throughout the lifespan. Emphasis is placed on detailed health history taking, differentiation, interpretation and documentation of normal and abnormal findings. Diagnostic reasoning skills are emphasized as students develop processes to formulate differential diagnoses for acute and chronic physical and mental illnesses in the primary care setting across the lifespan.
Prerequisite: NURS 6235.
Learning Outcomes
1. Analyze and use the most effective communication methods to obtain a health history and to develop a therapeutic relationship.
2. Differentiate variations in normal and abnormal health and physical data.
3. Explore processes of diagnostic reasoning and potential cognitive biases.
4. Using data from the health and physical assessment, formulate differential diagnoses for given physical and mental illnesses across the lifespan.
5. Demonstrate advanced clinical judgment by using data from the health and physical assessment to design and implement clinically safe and patient-focused interventions.

NURS 6226. Advanced Health Assessment Practicum
1 Credit (1P)
Assessment skills for advanced clinical practice. Emphasis on assessment of patients across the life span. May be repeated up to 2 credits.
Corequisite: NURS 6225.
Learning Outcomes
1. Conduct a comprehensive and systematic assessment of health and illness in complex situations.
2. Collect and interpret health data related to the health history, chief complaint, and history of the present illness.
3. Use effective communication methods to obtain a health history and to develop a therapeutic relationship
4. Assess variations in normal and abnormal health and physical data.
5. Document advanced clinical judgment by using data from the health and physical assessment to determine a health status.

NURS 6230. Advanced Clinical Pharmacology
3 Credits (3)
Principles of clinical pharmacology and the related human physiology and pharmacology for advanced clinical practice.
Learning Outcomes
1. Relate associated physiology.
2. Classify drugs based on their mechanism of action.
3. Examine and discuss the pharmacokinetics, pharmadynamics, contraindications, and anesthesia implication for the following drug categories: Sympathomimetic and Sympatholytic, Respiratory pharmacology, Vasodilators, Antiarrhythmic, Neurologically active drugs, Diuretics, Lipid-lowering drug, Antacids, gastrointestinal motility, and antiemetics, Hypothyroidism and hyperthyroidism, Glucose regulation, Other endocrine drugs, Antimicrobials, antiseptics, and disinfectants, Chemotherapeutic, Psychopharmacologic.
4. Articulate and correlate drug characteristics and rationale for use in a professional manner.
5. Apply, appraise, and evaluate pharmaceutical characteristics when applied to a clinical scenario.
6. This course covers the following NCE content: Pharmacokinetics, Pharmadynamics, Sympathomimetic and Sympatholytic, Respiratory pharmacology, Vasodilators, Antiarrhythmic, Neurologically active drugs, Diuretics, Lipid-lowering drugs, Antacids, gastrointestinal motility, and antiemetics, Hypothyroidism and hyperthyroidism, Glucose regulation, Other endocrine drugs, Antimicrobials, antiseptics, and disinfectants, Chemotherapeutic, Psychopharmacologic.

NURS 6235. Advanced Pathophysiology for Nurse Anesthesiology Practice
4 Credits (4)
This course focuses on pathophysiology of diseases relevant to nurse anesthesiology practice. Evidence-based practice resulting from relevant research will be incorporated in discussions related to anesthesia management of patients with health status alterations. Students will utilize this information to build a foundation for anesthesia clinical reasoning and principles of nurse anesthesiology practice.
Learning Outcomes
1. Analyze the relationship between normal physiology and pathologic consequences produced by selected disease states.
2. Demonstrate understanding of selected biochemical, genetic, and cellular mechanisms that lead to common health alterations that occur in individuals across the lifespan.
3. Identify various pathologic alterations relevant to anesthesia practice.
4. Integrate the clinical application of pathophysiology into the practice of nurse anesthesiology.
5. Discuss the relationship between pathophysiology of various systems and anesthesia planning and management.

NURS 6240. Advanced Health Assessment for Nurse Anesthesiology Practice
4 Credits (3+1P)
This course focuses on development of knowledge and skills necessary to conduct comprehensive and focused health assessments for patients across the lifespan with special attention given to nurse anesthesiology practice. Principles of conducting detailed health histories, physical examinations, and diagnostic study interpretations will be featured. Students will obtain and document detailed culturally sensitive health histories and physical examinations. They will use critical thinking to identify and/or interpret pertinent diagnostic studies related to alterations in health patterns. Emphasis is placed on differentiation between normal and abnormal health history, physical assessment, and diagnostic findings.
Learning Outcomes
1. Demonstrate a systematic approach to the collection and documentation of data for health history and physical assessment while maintaining confidentiality and respecting privacy.
2. Collect and interpret health data related to the health history, history of the present illness, laboratory and other diagnostic findings.
3. Document relevant findings for both comprehensive and focused health histories and physical assessments.
4. Identify potential anesthesia risks based on patient health history, physical exam findings, and current literature.
5. Conduct and document a comprehensive preanesthesia evaluation to include health and surgical history, physical examination, and

interpretation of diagnostic data using effective communication while maintaining confidentiality and respecting privacy.

NURS 6245. Advanced Pharmacology for Nurse Anesthesiology Practice
3 Credits (3)
This course builds upon the advanced clinical pharmacology course and is designed to provide an evidence-based in-depth foundation of pharmacology and its application to anesthesiology practice across the lifespan. The primary focus will be on topics such as pharmacodynamics, pharmacokinetics, pharmacotherapeutics, pharmacy, and toxicology of currently used anesthetic agents

Learning Outcomes

1. Identify general pharmacokinetic, pharmacodynamic, pharmacogenetic, and pharmacotherapeutic principles related to anesthetic agents and adjunct drugs
2. Discuss the uptake and distribution of primary anesthetic agents and adjunct drugs.
3. Summarize indications/contraindications for selected anesthetic agents and adjunct drugs.
4. Calculate accurate doses of selected anesthetic agents and adjunct drugs.
5. Review potential adverse effects and drug interactions of selected anesthetic agents and adjunct drugs.
6. Describe evidence-based anesthetic considerations of anesthetic agents and adjunct drugs used for various procedures and various patients across the lifespan with diverse comorbidities and demographics.

NURS 6250. Healthcare Policy and Ethics
3 Credits (3)
This course examines complex challenges faced in the US healthcare system for nurses in advanced practice roles within an ethical framework. Ethical, social, and political issues that affect the provision of health care, communities, and society are critically analyzed with an emphasis on interprofessional roles in health care. Concepts that support advocating for social justice, reducing healthcare disparities. improving quality, promoting ethical aspects of care, and cost containment are overarching themes in the course discussions and assignments. Students use self-reflection, case studies and presentations to apply ethical principles, develop healthcare policy recommendations to improve care access, and reduce disparities in professional practice and population health.

Learning Outcomes

1. Analyze the historical evolution of health care systems and their influence on the development of institutional, local, state, federal and international health policy.
2. Critique socioeconomic, legal, ethical, and political issues relevant to policymaking and provision of equitable, safe, and quality health care at the local, state, and national levels.
3. Assess health policies, infrastructure, financing, and complex systems in the US in contrast to other nations.
4. Critically analyze bioethical issues in clinical practice settings as they impact policy, disparities, advocacy, ethics, improved patient outcomes and reduced costs.
5. Synthesize the principle of human rights and ethics in conduct of health care research and policy design.
6. Interpret the value and importance of advanced practice nursing role(s) to policy makers, health care professionals, and consumers.

NURS 6255. Innovations and Health Care Organizations
3 Credits (3)
Examines complexity and innovation within health care systems, health care delivery, and population health. Areas of focus are systems, organizations, health disparities, and ethical decision making. Emphasis is on improvement in services and outcomes. Restricted to: NURS, NUSC, NURP majors.

Learning Outcomes

1. Apply knowledge of organizational practices and complex systems to improve health care delivery.
2. Facilitate the development of health care systems that address the needs of culturally diverse populations, providers, and other stakeholders.
3. Evaluate the impact of health care delivery on patients, providers, other stakeholders, and the environment.
4. Analyze organizational structure, functions, and resources to improve the delivery of care.
5. Evaluate the relationships among access, cost, quality, and safety and their influence on health care.
6. Evaluate how organizational structure, care processes, financing, marketing, and policy decisions impact the quality of health care.

NURS 6260. Population Health and the Environment
3 Credits (3)
This course provides an overview of the core principles in environmental health. Emphasis is on the integration of key concepts of environmental health into nursing education, practice, research, and policy/advocacy efforts. Students will apply the key concepts to address specific environmental hazards that affect the health of individuals and populations.
Prerequisite: NURS 6110.

Learning Outcomes

1. Describe the scope and nature of environmental health sciences and relevance to population health, nursing research and practice, and theory.
2. Analyze the impact of environmental health hazards including mechanisms of exposure, health effects of exposure, and populations more vulnerable to exposure.
3. Apply risk management and risk communication strategies for environmental health exposures.
4. Appraise the impact of climate change on population health and its implications for nursing practice.
5. Describe the effect of regional, national, and international legislation on environmental health.
6. Discuss the role of advocacy and justice in environmental health in achieving equity and countering injustice in the form of systemic and structural conditions such as racism and privilege.

NURS 6265. Strategic and Financial Planning for Population Health Programs
3 Credits (3)
This course explores the role of nurses in advanced nursing practice within a rapidly changing healthcare system. Theories of leadership, quality, risk outcomes, and financial structures for healthcare organizations are discussed providing a framework for change within advanced nursing practice specialties. Accounting, finance, and marketing principles are presented enabling students to complete a financial plan for an evidence based practice change.
Prerequisite: NURS 6270.

Learning Outcomes

1. Use the principles of population focused program planning, development, implementation, and evaluation to develop an evidence-based population focused strategy to address a health priority issue.
2. Analyze the potential influence of cultural, ethical, and public health policy issues when working with diverse populations.
3. Analyze aspects of organizational culture and planned change that may influence success of planned interventions.
4. Evaluate feasibility issues related to implementing planned interventions such as cost, time, and available resources.
5. Integrate principles of program evaluation to determine impact and sustainability of evidence-based interventions.
6. Analyze the impact of financial models on costs, quality and health outcomes.

NURS 6266. Strategic and Financial Decision-Making in Healthcare Systems
3 Credits (3)
This course prepares graduate nursing students to lead within complex healthcare organizations. The course emphasizes the clinical leader's role in understanding the structure, function, and financing of healthcare systems and organizations. Students will develop systems-based practice competencies, financial literacy, and strategic planning skills necessary to guide evidence-based organizational change.
Learning Outcomes

1. Evaluate healthcare systems as complex adaptive environments, integrating organizational learning and interconnected subsystems to inform strategic decision-making.
2. Apply financial literacy and financial stewardship principles to assess revenue streams, cost structures, and ethical resource management in healthcare organizations.
3. Analyze healthcare financing models, reimbursement structures, and economic influences to support ethical financial decision-making and long-term sustainability.
4. Develop a comprehensive strategic plan that incorporates budgeting methodologies, technology-driven decision-making, and community relations to advance healthcare innovation.

NURS 6270. Clinical Data Management and Analysis
2 Credits (2)
This required course provides students with the knowledge base to understand, collect, manage, and measure clinical data. Students will explore data collection and management processes, levels of measurement, basic statistics, and measurement for improvement in order to effectively use clinical data. Data entry exercises employed through analytical tools and statistical software packages will allow the students practice and apply the basic data management and analysis skills needed for the evaluation of clinical data and evidence-based practice.
Learning Outcomes

1. Apply principles of sound data collection and management.
2. Create a database to collect and aggregate data.
3. Promote internal and external validity by identifying appropriate levels of measurement.
4. Organize data through use of Microsoft Excel and/or IBM SPSS Statistics Software.
5. Perform basic statistical analysis using descriptive, parametric, and non-parametric statistics appropriately.
6. Construct statistical analyses while preventing the introduction of errors.

NURS 6305. Introduction to the DNP Project
1 Credit (1)
This course is designed to assist the student in exploring a clinical problem and selecting an area of interest within a practice specialization, and in demonstrating professional competencies related to an area of interest to begin foundational development of the scholarly project. The student will document previously acquired abilities and competencies while developing an understanding of the scholarly project process. Students will work towards selection of a setting (hospital, long-term, primary care or community health agency) where concepts, theories, and principles of leadership, administration, and management can be applied.
Learning Outcomes

1. Examine the role of the DNP in the development and implementation of evidence based change of practice projects.
2. Identify a DNP Project practice site and clinical advisor.
3. Develop a portfolio demonstrating expertise in the specialty area of interest and understanding of a clinical problem.

NURS 6307. DNP Project Practicum
1-3 Credits (1-3P)
This leadership practicum courses provide for the development of a population health leader as demonstrated through the DNP project. The student will conduct an assessment of a population, community and/or organization where evidenc- based leadership activities may be employed. Once a problem or issue is identified in the practice setting, the student will develop an evidence-based project designed to positively impact population- specific and/or patient care outcomes. After approval of the DNP project proposal, the student will implement an evidence-based project designed to positively impact population health and/or patient/client care outcomes. The culmination of the DNP project is evaluation and dissemination of the evidence-based changes. May be repeated up to 9 credits.
Learning Outcomes

1. Demonstrate competence in the role of population health leader who delivers advanced practice nursing, including educators, clinicians, administrators, and translators of research.
2. Execute the DNP Project that meets the needs of diverse populations
3. Collaborate with DNP committee and the organization to establish an intra- and inter-professional continuous quality improvement process for achievement of the desired outcomes
4. Exhibit consistent professional behavior, performance, accountability, and responsibility within a population health leadership role

NURS 6310. DNP Project I
1 Credit (1)
This is the first in a three-course series that culminates in the implementation, evaluation and dissemination of scholarly work that demonstrates the student's synthesis of the Essentials of Doctoral Education for Advanced Practice Nursing (i.e., the DNP Essentials). The project must use evidence to improve clinical practice, healthcare delivery and/or patient outcomes. Upon completion of this course, students will identify a problem in healthcare, explore the existing evidence and develop a preliminary proposal for a project that demonstrates synthesis of DNP coursework and lays the groundwork for future scholarship.
Prerequisite: NURS 6120 and NURS 6125.
Learning Outcomes

1. Systematically review the existing evidence pertaining to selected clinical problem, generating a written review of the existing evidence.

2. Identify a theoretical framework or model that will guide the development of a solution or intervention and/or the execution of the DNP project.
3. Identify a theoretical framework or model that will guide the development of a solution or intervention and/or the execution of the DNP project.
4. Defend the DNP project proposal in front of the student's project committee and submit to IRB

NURS 6340. Clinical Scholarly Project
1-4 Credits (1-4)
Building on the practice expertise of the DNP student, this series of credits is to provide the student with the opportunity to design an innovative clinical practice improvement project/program addressing an actual health care concern. Through mentored activities, the DNP student will identify, develop, implement, evaluate, and disseminate an independent analytic. Graded: S/U Grading (S/U, Audit). Students must be Admitted to the DNP program.Restricted to: NURP majors. May be repeated up to 4 credits.
Learning Outcomes
1. Within the context of the chosen clinical problem, identify an evidence-based, system-level change or intervention that has the potential to address the problem.
2. Develop a detailed implementation plan to guide the execution of the proposed DNP project.
3. Develop a detailed evaluation plan that includes the identification of outcome measures that will allow the student to determine whether the project objectives were met.
4. Identify the DNP Essentials that are represented in the project and describe how the project addresses the requirement.
5. Defend the DNP project proposal in front of the student's project committee.
6. After successfully defending the DNP project proposal, submit an Institutional Review Board (IRB) application for the proposed project.
7. Initiate the approved DNP project implementation and evaluation plan.

NURS 6352. Integrated Care for Diverse Populations
2 Credits (2)
This course examines integrated health care as an approach to health care delivery characterized by a high degree of collaboration and communication among health professionals. Students expand their knowledge of interprofessional competencies and learn the concepts of the development of comprehensive treatment plans to address the biological, psychological and social needs of the patient in diverse patients across care settings. The focus is on delivering behavioral or biomedical health interventions relevant to everyday clinical practice across disciplines and practice settings. There is a strong emphasis on feasible brief interventions in a fast-paced clinical context and on adapting interventions to each patient's unique biopsychosocial, socioeconomic, and cultural context.
Prerequisite: NURS 6410 or NURS 6510.
Learning Outcomes
1. Analyze the relationship between behavioral and biomedical health and cultural contexts, including an understanding of the common health/illness presentations.
2. Compare and contrast models of integrated health.
3. Develop a treatment plan for a given patient addressing the investigation and management of the patient's illness, and the personal and social issues to which the illness may give rise.
4. Identify strategies for communicating clearly and sensitively with patients and their families and with other health professionals.
5. Analyze inter-professional team members roles in collaboration and cooperation with other team members as an integral component of team function.

NURS 6404. Neurobiology of Mental Disorders
2 Credits (2)
This course advances foundational knowledge of anatomy, physiology, and pathophysiology, focusing on the neurobiological mechanisms that sustain homeostasis within the brain and body. It explores the multifactorial etiology of mental disorders, including genetic, developmental, traumatic, infectious, and degenerative influences. The curriculum focuses on important biological theories, exploring how psychiatric disorders interact with brain structures, chemical pathways, and the related behaviors and symptoms. Mental disorders across the lifespan, including autism spectrum disorder, obsessive-compulsive disorder, attention deficit hyperactivity disorder, and substance use disorders, are critically analyzed.
Learning Outcomes
1. Synthesize foundational concepts of anatomy, physiology, and pathophysiology to understand the neurobiological mechanisms that maintain homeostasis within the brain and body.
2. Evaluate the multifactorial causes of major mental disorders, including genetic, developmental, traumatic, infectious, and degenerative factors.
3. Investigate the relationship between psychiatric disorders and their associated neuroanatomical structures and neurochemical pathways.
4. Identify the genetic etiology and neuropathological alterations associated with major mental disorders and substance use disorders.
5. Incorporate current research findings to inform evidence-based approaches to the care of individuals with mental health disorders.

NURS 6405. Psychopharmacology for Advanced Practice
3 Credits (3)
Principles of clinical psychopharmacology with emphasis on clinical application of major drug classifications including decision making, prescribing, drug monitoring and patient education.
Learning Outcomes
1. Utilize scientific and evidence-based findings to understand the molecular-physiological bases and chemical action of psychopharmacological agents.
2. Evaluate the clinical pharmacotherapeutics of broad categories of drugs along with alternative therapies needed for the therapeutic interventions.
3. Evaluate the legal, financial, policy and ethical issues with administering psychopharmacological agents.
4. Implement and analyze the role of the advanced practice nurse in delivering safe and effective psych pharmacotherapeutic agents for patient-centered care.
5. Serve as a role model for advanced practice nursing when administering psychopharmacological agents in collaborative settings.
6. Apply evidence-based findings to develop and improve practice.

NURS 6408. PMHNP Role in Diagnostics and Screening
3 Credits (3)
This course explores the diagnostics and screening of mental health disorders across the lifespan, focusing on advanced assessment techniques, diagnoses, and care strategies. Students will engage in

risk assessment and develop individualized treatment plans based on relevant theoretical frameworks.

Learning Outcomes

1. Apply advanced assessment techniques to effectively evaluate mental health conditions across the lifespan.
2. Formulate individualized care strategies informed by relevant theoretical frameworks and best practices.
3. Utilize appropriate assessment tools to facilitate accurate diagnoses based on the DSM-5-TR.
4. Analyze cultural aspects of clinical practice to provide effective care for diverse populations and promote optimal outcomes.
5. Identify risk assessment strategies and tools to identify potential challenges and needs of individuals with mental health disorders.
6. Apply ethical considerations and legal requirements relevant to mental health practice.

NURS 6410. PMHNP Across the Lifespan I
3 Credits (3)

This is the first in a series of three didactic for the psychiatric mental health nurse practitioner (PMHNP) student. This course introduces the PMHNP student to the scope and standards of practice; legal and ethical issues; comprehensive psychiatric assessment and evaluation; developmental theories; and the theory and practice of psychotherapy. Emphasis is placed on individuals across the lifespan from diverse populations. May be repeated up to 6 credits.

Prerequisite: NURS 6220, NURS 6230.

Corequisite: NURS 6411.

Learning Outcomes

1. Synthesize the current scientific evidence along with theoretical models for personality development into therapeutic interventions within a healthy environment.
2. Promote and evaluate the role of the Advanced Practice Nurse in the management of evidence-based interventions with individuals experiencing psychosocial and neurobiological disorders.
3. Apply theoretical concepts and psychotherapeutic modalities to develop age appropriate therapeutic alliances with mental health individuals during developmental transitions and life-style adjustments across the lifespan, including focus on vulnerable populations at risk for mental health problems, based on current evidence and clinical practice guidelines.
4. Evaluate strategies to promote the negotiation of mutually acceptable and collaborative treatment plans.
5. Apply evidence-based findings to develop and improve practice.

NURS 6411. PMHNP Across the Lifespan I Practicum
2-4 Credits (2-4P)

This is the first in a series of three clinical practicum courses for the psychiatric mental health nurse practitioner (PMHNP) student. This course provides the family psychiatric nurse practitioner student opportunities to work with a preceptor to gain advanced practice skills in individual therapies, comprehensive psychiatric evaluation, personality development concepts, dual diagnoses and psychotherapy principles; including management of health promotion, health maintenance and disease prevention activities. Students will work in practice settings that see patients across the lifespan to include: children, adolescents, women, men and older adults. Multiple clinical settings may be required; however, students must spend a minimum of 64 clock hours in each clinical setting and should have no more than two clinical settings per semester. 1 P = 64 clock hours of practicum. May be repeated up to 6 credits.

Prerequisite: NURS 6220, NURS 6230.

Corequisite: NURS 6410.

Learning Outcomes

1. Utilize communication skills and ethical strategies to develop and terminate therapeutic relationships.
2. Promote and evaluate the role of the Advanced Practice Nurse in the management of evidence-based interventions with individuals experiencing psychosocial and neurobiological disorders.
3. Demonstrate knowledge of psychotherapeutic theories and concepts by independently conducting psychotherapy with individuals with mental illness or at risk for mental health problems, under the supervision of a preceptor.
4. Apply theoretical concepts and psychotherapeutic modalities to develop age appropriate therapeutic alliances with mental health individuals during developmental transitions and life-style adjustments across the lifespan, including focus on vulnerable populations at risk for mental health problems.
5. Use current evidence and clinical practice guidelines in the assessment and management of patients across the lifespan.

NURS 6420. PMHNP Across the Lifespan II
3 Credits (3)

This is the second in a series of three didactic courses for the psychiatric mental health nurse practitioner (PMHNP) student. This course provides further theoretical foundations, knowledge and evidence-based practice experiences in differential diagnosis for mental health conditions; family and group therapy; and integrated management of mental health conditions. Emphasis is placed on working with families from diverse populations. May be repeated up to 6 credits.

Prerequisite: NURS 6410.

Corequisite: NURS 6421.

Learning Outcomes

1. Evaluate core professional values and ethical/legal standards in the implementation of the nurse practitioner role, identifying and maintaining professional boundaries to preserve the integrity of the therapeutic process.
2. Integrate history, laboratory and physical exam data with the knowledge of pathophysiology and psychopathology of acute and chronic diseases across the life span, to construct comprehensive and concise biopsychosocial assessments and diagnosis of individuals with common psychiatric disorders.
3. Identify age appropriate theoretical concepts and psychotherapeutic modalities to develop age-appropriate therapeutic alliances with individuals and families during developmental transitions and life-style adjustments across the lifespan.

NURS 6421. PMHNP Across the Lifespan II Practicum
3-4 Credits (3-4P)

This is the second in a series of three clinical practicum courses for the psychiatric mental health nurse practitioner (PMHNP) student. The student gains knowledge and evidence-based practice experiences in differential diagnosis for mental health conditions; family and group therapy; and integrated management of mental health conditions. The course involves working with a preceptor to develop and implement comprehensive treatment plans that include psychotherapy and psychopharmacology in inpatient and/or outpatient settings. May be repeated up to 8 credits.

Prerequisite: NURS 6411.

Corequisite: NURS 6420.

Learning Outcomes

1. Demonstrate self-awareness of core professional values and ethical/legal standards in the implementation of the nurse practitioner role.
2. Integrate history, laboratory and physical exam data with the knowledge of pathophysiology and psychopathology of acute and chronic diseases across the life span, to construct comprehensive and concise biopsychosocial assessments and diagnosis of individuals with common psychiatric disorders.
3. Demonstrate interdisciplinary communication and care coordination by seeking consultation with colleagues to improve clinical outcomes for individuals with mental health problems and psychiatric disorders.
4. Recognize cultural diversity, spiritual preferences, values, and beliefs to create a climate of patient-centered care demonstrating confidentiality, privacy, comfort, emotional support, mutual trust, and respect.
5. Apply theoretical concepts and psychotherapeutic modalities to develop age-appropriate therapeutic alliances with individuals and families during developmental transitions and life-style adjustments across the lifespan based on current evidence and clinical practice guidelines.
6. Demonstrate increasing independence in the application of supportive, psychodynamic principles, cognitive-behavioral and other evidence- based psychotherapy/-ies to both brief and long-term individual encounters, family therapy and group therapy.

NURS 6430. PMHNP Across the Lifespan III
1 Credit (1)

This is the third in a series of three didactic/clinical courses for the psychiatric mental health nurse practitioner (PMHNP) student. This course provides further knowledge and skills for the family psychiatric nurse practitioner student to refine competencies in neuropsychology, assessment, diagnosis and treatment. Emphasis will be placed on individuals, families and groups across the lifespan in a multicultural environment. May be repeated up to 5 credits.

Prerequisite: NURS 6420.

Corequisite: NURS 6431.

Learning Outcomes

1. Synthesize and use current scientific evidence, differential and diagnostic reasoning along with theoretical models for group dynamics into therapeutic interventions.
2. Utilize communication skills, self-reflection, and ethical strategies to develop and terminate therapeutic relationships.
3. Promote and evaluate the role of the advanced practice nurse in the management of evidence-based interventions with groups experiencing psychosocial and neurobiological disorders.
4. Evaluate strategies to promote the negotiation of mutually acceptable and collaborative treatment plans.
5. Apply evidence-based findings to develop and improve practice.

NURS 6431. PMHNP Across the Lifespan III Practicum
3,4 Credits (3,4P)

This third course in the series of PMHNP clinical courses provides further knowledge and skills for the psychiatric nurse practitioner student to refine competencies in neuropsychology, assessment, diagnosis and treatment of patients with mental health illness. Emphasis will be placed on psychotherapeutic and psychopharmacologic treatment of individuals, families and groups across the lifespan in a multicultural environment. May be repeated up to 6 credits.

Prerequisite: NURS 6421.

Corequisite: NURS 6430.

Learning Outcomes

1. Demonstrate self-awareness of core professional values and ethical/legal standards in the implementation of the nurse practitioner role, identifying and maintaining professional boundaries to preserve the integrity of the therapeutic process.
2. Independently integrate history, laboratory and physical exam data with the knowledge of pathophysiology and psychopathology of acute and chronic diseases across the life span, to construct comprehensive and concise biopsychosocial assessments and diagnosis of individuals with common psychiatric disorders.
3. Demonstrate interdisciplinary communication and care coordination by seeking consultation with colleagues to improve clinical outcomes for individuals with mental health problems and psychiatric disorders.
4. Apply theoretical concepts and psychotherapeutic modalities to develop age-appropriate therapeutic alliances with individuals and/or families during developmental transitions and life-style adjustments across the lifespan based on current evidence and clinical practice guidelines.
5. Demonstrate theoretical concepts, evidence-based psychotherapeutic modalities, and knowledge of psychopharmacology to independently develop, implement and document comprehensive treatment plans.

NURS 6432. PMHNP Across the Lifespan Residency
2 Credits (2P)

The nurse practitioner student will be expected to fully immerse in the role of the Psychiatric Mental Health Nurse Practitioner (PMHNP) with increasing levels of autonomy, under the supervision of qualified preceptors. Students will demonstrate efficacy in practice, management, and treatment of broad types of mental health issues that present in children, adolescents, adults and/or geriatric individuals and families in a variety of settings. The student will demonstrate the ability to utilize psychopharmacological and psychotherapeutic (individual, family and group) interventions in specialty or subspeciality clinical settings, particularly those that are of clinical relevance to the student's area of intended practice. In this course, the student will demonstrate proficiency in the PMHNP role in integrated healthcare settings. Students must complete psychiatric mental health clinical rotation hours treating patients across the lifespan while offering opportunities for board certification exam preparation. Restricted to Nursing majors. May be repeated up to 4 credits.

Prerequisite: NURS 6421.

Corequisite: NURS 6431.

Learning Outcomes

1. Fully integrate the mental health nurse practitioner role in the implementation of practice in diverse practice settings.
2. Provide high quality, safe, cost-effective, patient centered care recognizing cultural diversity and the patient or designee as a full partner in decision-making.
3. Appropriately diagnose, manage, and develop treatment plans for patients experiencing mental health care problems, to maximize the patient's health potential using psychosocial, psychopharmacologic and psychotherapeutic interventions.
4. Demonstrate the highest level of accountability for ethical professional practice.
5. Evaluate patient outcomes and responses, and modify the patient plan of care accordingly.
6. Participate in opportunities for board certification exam preparation

NURS 6450. Advanced Concepts in the Treatment of Substance Use Disorders
1 Credit (1)
This course examines scope of practice, epidemiology, cultural issues, and common co-occurring psychiatric, medical and legal problems related to substance use disorders, including opioid use disorder. Students will review theories and research as the basis for psychometric screening and evidence-based interventions, including medication-assisted treatment for substance use disorders. Emphasis is placed on individuals across the lifespan from diverse populations. Consent of Instructor required.
Learning Outcomes
1. Demonstrate the significance of professionalism and self-awareness by maintaining professional, ethical and legal standards, preserving the integrity of the therapeutic process, demonstrating commitment to the health and well-being of individuals and society ethical practice, and upholding high personal standards of behavior.
2. Recognize addictive disorders as developmental biopsychosocial disorders using a model of interconnection encompassing neurobiology, genetic, medical and mental health co-morbidities, familial, social, environmental, cultural, spiritual influences as contributors of substance use disorders.
3. Apply an evidence-based approach to detecting substance use disorders by recognizing medical, psychological, social, and functional indicators of subclinical addiction disorders through use of validated standardized substance use disorder screening instruments, and accurately interpret screening results indicative of hazardous and harmful substance use. Integrate positive substance use screening results with therapeutic and counseling strategies appropriate to the patient's readiness to change, by assessing the patient's background, ethnicity, and belief system to accommodate and respect the values and attitudes of various cultures.
4. Recognize the indications, contraindications, duration and utilization of evidence-based medication-assisted treatment and pharmacotherapy for substance use disorders including medications for acute withdrawal and relapse prevention.
5. Diagnose substance use disorders and existing co-occurring mental health and/or medical disorders, and match appropriate level or care, secure consultation and referrals for specialty treatment of addiction and other medical and psychiatric conditions.

NURS 6506. Health Needs of Women and Children
3 Credits (3)
The course will examine patient and family perspectives as well as health care system variables and societal issues affecting the organization and delivery of primary care for women, adolescent, and pediatric populations. Emphasis includes a focus on ways in which poverty, politics, racial and ethnic disparities affect the health of families, women, children, and adolescents. Content addresses comprehensive diagnosis and management of common health problems, including appropriate diagnostic procedures, laboratory tests, and follow-up care for patients with both acute and chronic conditions. There is a strong focus on health promotion, disease prevention, the care of underserved populations, and culturally competent care.
Prerequisite: NURS 6220, NURS 6225, NURS 6230.
Learning Outcomes
1. Analyze the etiology, pathophysiology, presentation, and prognosis of women and children's conditions as they present in clinical settings.
2. Assess the public health impact of clinical problems for both women and children in the community, including the epidemiology of common risk factors and early intervention strategies.
3. Synthesize scientific and evidence-based knowledge along with theory to promote health, prevent illness and treat common acute and chronic conditions of women and children.
4. Apply the principles of health care ethics to the care of women and children with an understanding of legal implications within the sociopolitical environment.
5. Formulate a plan to investigate and manage the health state of women and children taking into account the values and preferences of the patient and addressing the personal and social issues to which the health status may give rise.

NURS 6507. Pediatric Primary Care
3 Credits (3)
This didactic course provides foundational knowledge and clinical decision-making skills necessary for Family Nurse Practitioner (FNP) students to provide safe, developmentally appropriate, and evidence-based care to pediatric patients from infancy through adolescence. The course addresses common acute and chronic pediatric conditions, growth and development milestones, anticipatory guidance, and preventive care, including immunizations, screenings, and nutritional counseling.
Learning Outcomes
1. Provide evidence based assessments and screenings using age appropriate frameworks.
2. Develop differential diagnoses and evidence-based treatment plans for common pediatric conditions.
3. Identify developmental, behavioral, and family-centered care needs in pediatric populations.
4. Apply principles of health promotion, immunization, and disease prevention in managing care across pediatric age groups.
5. Analyze how social, cultural, and environmental determinants influence child health outcomes.

NURS 6510. FNP Across the Lifespan I
3 Credits (3)
The course provides the Family Nurse Practitioner student with advanced theoretical knowledge and practice in the assessment and management of health promotion, health maintenance and disease prevention activities across the lifespan; including the assessment and management of common acute and chronic health concerns. Emphasis will be placed on primary health care of individuals and their families in a multicultural environment. May be repeated up to 6 credits.
Prerequisite: NURS 6220, NURS 6230.
Corequisite: NURS 6511.
Learning Outcomes
1. Apply evidence-based knowledge and theory related to the prevention, diagnosis and management of selected common acute health problems in clients across the lifespan.
2. Plan collaborative case to assist clients and their families from diverse backgrounds to maximize functional health status
3. Formulate patient centered therapeutic plans based on holistic health assessment, risk reduction and safety for the treatment and prevention of select, uncomplicated and common, acute illnesses.

NURS 6511. FNP Across the Lifespan Practicum I
2-4 Credits (2-4P)
This is the first in a series of three clinical courses for the family nurse practitioner (FNP) student. Working with a preceptor students will use advance skills in patient history taking, performing physical assessments, and interpreting laboratory and other test results. Development of a plan of care with health promotion components is also expected. Students will

work in practice settings that see patients across the lifespan to include: children, adolescents, women, men and older adults. Multiple clinical settings may be required; however, students must spend a minimum of 64 clock hours in each clinical setting and should have no more than two clinical settings per semester. 1 P = 64 clock hours of practicum. May be repeated up to 8 credits.
Prerequisite: NURS 6220, NURS 6230.
Corequisite: NURS 6510.

Learning Outcomes

1. Develop physical exam competency.
2. Integrate, implement and evaluate evidence-based therapeutic interventions in complex acute care practice situations.
3. Develop and sustain therapeutic relationships with patients across the life span (child, adolescents, young adult, adult, older adult, seniors) and other professional to optimize patient-centered outcomes.
4. Demonstrate advanced clinical judgment based on current standards of practice.
5. Synthesize clinical judgment, systems thinking, and accountability to provide evidenced based care.

NURS 6520. FNP Across the Lifespan II
3 Credits (3)
This is the second in a series of three didactic courses for the family nurse practitioner (FNP) student. This course provides further theoretical foundations, knowledge and evidence-based practice experiences in the differential diagnosis and management of acute and chronic diseases. Emphasis is placed on individuals across the lifespan from diverse populations. Building on knowledge and skills from the previous course, students will be expected to manage patients with an increasing complexity of health issues and multiple co-morbidities. May be repeated up to 6 credits. NURS 6511.
Prerequisite: NURS 6510.
Corequisite: NURS 6521.

Learning Outcomes

1. Integrate knowledge of pathophysiologic and psychosocial changes associated with common chronic health problems into immersion in practice decision-making.
2. Demonstrate an advanced knowledge base of normal changes and common patterns across the life span, including the physiologic, psychological, social, and spiritual domains.
3. Demonstrate an advanced knowledge base of common pathologies across the life span, and the diagnosis and treatment of common chronic health problems, including referral and follow-up.
4. Evaluate the relationships between access, cost, quality, and safety and their influence on health care.

NURS 6521. FNP Across the Lifespan II Practicum
3,5 Credits (3,5P)
This is the second in a series of three clinical courses for the family nurse practitioner (FNP) student. This course builds on knowledge and skills from the previous course, students will be expected to manage patients with an increasing complexity of health issues and multiple co-morbidities. This course involves working with a preceptor to refine skills in assessment and differential diagnosis as well as the development and implementation of comprehensive treatment plans, that include referrals to other specialties and services. Students are expected to work within Integrated Health Care settings for a minimum of 64 hours of practicum. May be repeated up to 10 credits.
Prerequisite: NURS 6510, NURS 6511.
Corequisite: NURS 6520.

Learning Outcomes

1. Apply conceptual frameworks to and compare strategies for risk analysis and reduction, screening, disease and injury prevention, and health promotion across the life span.
2. Integrate relevant research findings in management of selected health care conditions across the life span.
3. Use the principles of case management process to coordinate effective therapeutic interventions, referrals, and collaboration with other health care providers for clients/patients with chronic illness across the life span.
4. Demonstrate cultural competence related to the individual's ethnicity, culture and lifestyle when considering prevention strategies or developing the health promotion and disease management plan for chronic conditions across the life span.
5. Analyze client and patient outcomes to identify the effectiveness of treatment, the need for change, and the health status of client/patient across the life span in an integrated care setting.
6. Apply inter-professional competencies in addressing integrated health needs of patients across the lifespan.

NURS 6530. FNP Across the Lifespan III
1 Credit (1)
This is the final didactic course for the family nurse practitioner (FNP) student. The course continues the development of knowledge and skills for the nurse practitioner student for the assessment and management of selected common acute and chronic health conditions across the lifespan. Emphasis will be placed on primary health care of individuals and their families in a multicultural environment. This course includes preparation for the FNP board certification exam. May be repeated up to 5 credits.
Prerequisite: NURS 6520, NURS 6521.
Corequisite: NURS 6531.

Learning Outcomes

1. Integrate knowledge of pathophysiologic and psychosocial changes associated with common chronic health problems into clinical decision-making.
2. Demonstrate an advanced knowledge base of normal changes and common patterns across the life span, including the physiologic, psychological, social, and spiritual domains.
3. Demonstrate an advanced knowledge base of common pathologies across the life span, and the diagnosis and treatment of common chronic health problems, including referral and follow-up.
4. Translate knowledge of acute and chronic illness to the development, implementation and documentation of appropriate comprehensive treatment plans, including referrals to other specialties and services.
5. Use self-reflection to evaluate progress in professional development as an integral member of the interprofessional team.
6. Integrate ethical principles in decision-making and demonstrate core professional values in the implementation of the nurse practitioner role.

NURS 6531. FNP Across the Lifespan III Practicum
3-4 Credits (3-4P)
This is the final clinical course for the family nurse practitioner (FNP) student. In this course, the student works with a preceptor to develop mastery of skills required to assess, diagnose and manage acute and chronic conditions in primary care settings. Advancement of knowledge and skills attained through previous practicum experiences, as well as this final course, produces a capable, qualified provider, who will

transition into a safe, novice, primary care nurse practitioner. May be repeated up to 8 credits.
Prerequisite: NURS 6521.
Corequisite: NURS 6530.
Learning Outcomes

1. Apply theoretical concepts of patient-centered care with emphasis on health promotion, disease prevention, guidance/counseling, disease management, and palliative care during developmental transitions and life-style adjustments.
2. Incorporate primary/secondary prevention guidance into comprehensive treatment plans for patients across the lifespan.
3. Integrate history, physical examination laboratory and other test data with knowledge of pathophysiology of acute and chronic diseases/conditions to develop appropriate differential diagnoses.
4. Identify pharmacological interventions in the treatment and management of illness for diverse populations.
5. Integrate evidence-based clinical guidelines into the diagnosis and management of illness in patients across the lifespan.
6. Translate knowledge of acute and chronic illness to the development, implementation and documentation of appropriate comprehensive treatment plans, including referrals to other specialties and services.

NURS 6610. Nurse Anesthesiology Principles I
2 Credits (2)
This is the first of four sequential nurse anesthesiology principles courses. The course introduces the student to advanced nursing practice in anesthesia and focuses heavily on anesthetic delivery systems. The course design integrates theoretical perspectives from anatomy, physiology, physics, and chemistry. The lab will emphasize perioperative preparation, management, and evaluation of the patient, anesthetizing area, and equipment.
Learning Outcomes

1. Review fundamentals of safe evidence-based anesthesia practice related to anesthesia techniques, airway management techniques, perioperative patient/anesthetizing area preparation, anesthesia planning, safety measures, appropriate use of equipment and monitoring devices, and anesthesia complications.
2. Demonstrate a comprehensive equipment check and proper utilization and/or interpretation of anesthesia delivery systems, airway equipment, monitoring devices, communication techniques, documentation, and patient positioning.
3. Assess patient fluid status and calculate, initiate, and manage fluid/blood component therapy.
4. Examine chemistry, physics, biochemistry, and imaging principles and their relationship to anesthesia.
5. Differentiate between acute and chronic pain management based on the neuroscience of pain.
6. Integrate anesthesia research and best practices related to basic anesthesia care, anesthesia equipment, technology, and pain management into anesthesia planning and delivery.

NURS 6620. Nurse Anesthesiology Principles II
5 Credits (4+1P)
This is the second of four sequential nurse anesthesiology principles courses and expands the knowledge gained from the previous course to include advanced airway management, advanced and invasive monitoring, preoperative assessment and anesthesia plan of care development. This course emphasizes evidence-based anesthesia techniques for fluid volume assessment, fluid/blood component therapy replacement, total intravenous anesthesia (TIVA), monitored anesthesia care (MAC), hypotensive techniques, intraoperative fire safety, and basic regional anesthesia knowledge and skills. Students will also learn anesthesia considerations and complications for a variety of patients undergoing selected procedures. The simulation lab focuses on the application of knowledge and skills from the didactic course.
Learning Outcomes

1. Discuss the integration of anesthesia principles, pathophysiology, physiology, and pharmacology for the planning of safe evidence-based anesthesia care for diverse patients undergoing a variety of surgical procedures.
2. Describe the indications and benefits of neuraxial and peripheral nerve blockade for diverse populations, as well as management of associated complications.
3. Identify via ultrasound key anatomy relevant to the brachial plexus and femoral (adductor canal) peripheral nerve blockade.
4. Demonstrate proper#approach and peripheral nerve block technique for the brachial plexus and femoral nerve(s).
5. Analyze the key anatomical structures when demonstrating correct techniques for a subarachnoid and epidural block.
6. Discover anesthesia techniques, considerations, and complications (and their management) related to intra-abdominal, extra thoracic, extracranial, orthopedic, perineal, pelvic, non-operating room, robotic, pediatric, obstetrics, and geriatric procedures.
7. Integrate anesthesia research and best practice guidelines into anesthesia planning and delivery for patients undergoing intra-abdominal, extra thoracic, extracranial, orthopedic, perineal, pelvic, non-operating room, robotic, pediatric, obstetrics, and geriatric procedures and/or regional anesthesia techniques.

NURS 6630. Nurse Anesthesiology Principles III
4 Credits (4)
This is the third of four sequential nurse anesthesiology principles courses and builds upon knowledge gained from previous courses. This course emphasizes evidence-based anesthesia techniques and complications in special populations across the lifespan, as well as selected surgical procedures. The course also addresses scope of practice, standards of practice, central nervous system monitoring devices, massive transfusion protocols, thromboelastography, enhanced recovery after surgery (ERAS), postanesthesia care and respiratory therapy.
Corequisite: NURS 6700.
Learning Outcomes

1. Discuss the integration of anesthesia principles, pathophysiology, physiology, and pharmacology for the planning of safe evidence-based anesthesia care#for#special populations across the lifespan undergoing#intracranial, cardiac, non-cardiac intrathoracic, neck, spine, and vascular surgical procedures.
2. Identify#modifications required for anesthesia planning and management for obese patients across the lifespan related to their physiology, comorbidities, and congenital anomalies as applicable.
3. Individualize common anesthesia techniques across the patients' lifespan undergoing intracranial, cardiac, non-cardiac intrathoracic, neck, spine, and vascular surgical procedures.
4. Identify common comorbid conditions of patients undergoing complex procedures.
5. Integrate anesthesia research and best practice guidelines into anesthesia planning and delivery for patients' undergoing intracranial, cardiac, non-cardiac intrathoracic, neck, spine, and vascular surgical procedures.

6. Examine anesthesia techniques, considerations, and complications (and their management) of diverse patients undergoing a variety of complex procedures.

NURS 6640. Nurse Anesthesiology Principles IV
3 Credits (3)
This is the final of four sequential nurse anesthesiology principles courses and builds upon knowledge gained from previous courses. This course emphasizes evidence-based anesthesia techniques and strategies to mitigate risk from anesthesia complications, as well as considerations for the following special populations: substance use disorder, immunocompromised and oncology populations and selected procedures. A major focus of this course is on pain theory, pain management, imaging, imaging safety and wellness.
Corequisite: NURS 6710.
Learning Outcomes
1. Discuss the integration of anesthesia principles, pathophysiology, physiology, and pharmacology for the planning of safe evidence-based anesthesia care#for#diverse patients undergoing#non-operating room anesthesia (NORA), trauma, burns, organ transplants, organ procurement, and laser procedures.
2. Discuss management of anesthesia complications related to special populations across the lifespan.
3. Examine anesthesia techniques, considerations, and complications (and their management) of diverse patients undergoing a variety of complex procedures.
4. Integrate anesthesia research and best practice guidelines into anesthesia planning and delivery for diverse patients undergoing a variety of complex procedures.

NURS 6650. Nurse Anesthesiology Principles V
4 Credits (3+1P)
This is the final of five sequential nurse anesthesiology principles courses and builds upon knowledge gained from previous courses. This course emphasizes evidence-based anesthesia techniques, complications, and considerations for administering regional anesthesia including spinal, epidural and nerve block procedures and management protocols.
Learning Outcomes
1. Discuss the integration of anesthesia principles, pathophysiology, physiology, and pharmacology for the planning of safe evidence-based anesthesia care for diverse patients undergoing regional anesthesia.
2. Examine regional anesthesia techniques, considerations, and complications (and their management) of diverse patients undergoing a variety of complex procedures.
3. Integrate anesthesia research and best practice guidelines into anesthesia planning and delivery for diverse patients undergoing procedures for regional anesthesia.

NURS 6700. Introduction to the Clinical Residency
3 Credits (3P)
This introductory clinical course provides students extensive simulation in preparation for the clinical environment and the clinical role of advanced nursing practice in anesthesiology. The student will apply concepts in a simulated perioperative environment and begin to learn communication and documentation skills. The student will analyze data from monitors and other equipment to ensure safe delivery of anesthesia care
Learning Outcomes
1. Integrate knowledge of anesthesiology principles, anatomy, physiology, pathophysiology, and pharmacology into evidence-based anesthesia planning and delivery of safe simulated anesthesia care.
2. Formulate a comprehensive history and physical assessment and begin to formulate an evidence-based anesthesia plan of care based on the patient's underlying health status, culturally relevant information, and the surgical or medical procedure.
3. Demonstrate basic anesthesia skills/techniques and incorporate new skills with guidance.
4. Demonstrate safe use of anesthesia monitors and equipment operation, calibration, and interpretation of data.
5. Demonstrate selection of drugs according to surgical patients across the lifespan.
6. In a simulated environment, develop#effective communication strategies and documentation skills in the perioperative environment to facilitate safe patient care.
7. Demonstrate patient positioning requirements for a given surgical procedure and implement appropriate safeguards to protect patients from physiologic compromise or injury.
8. Model integrity, ethics, honesty, and accountability in professional interactions in accordance with the AANA professional practice standards and code of ethics.

NURS 6710. Nurse Anesthesiology Clinical Residency I
3 Credits (3P)
This is the first of six clinical residency courses and provides students with the opportunity to begin developing the advanced nursing practice role in anesthesiology. Students are expected to integrate didactic knowledge learned in previous courses and co-requisite courses into perianesthesia care of the patient. Students begin to incorporate evidence-based research practices with an emphasis on patient safety and vigilance, culturally competent care of the patient throughout the peri-anesthesia continuum, interpersonal communication, and integration of critical and reflective thinking of an anesthesia provider.
Learning Outcomes
1. Summarize knowledge of anesthesiology principles, anatomy, physiology, pathophysiology, and pharmacology into the planning and delivery of an evidence-based safe anesthetic.
2. Translate a comprehensive history and physical assessment into an evidence-based anesthesia plan of care based on the patient's underlying health status, culturally relevant information, and the surgical or medical procedure.
3. Develop new anesthesia skills/techniques with guidance while maintaining basic/foundational anesthesia skills/techniques.
4. Make use of safe use of data from anesthesia monitors, equipment operation, and calibration.
5. Choose a selection of drugs according to surgical patients across the lifespan.
6. Compare and use#effective communication and documentation skills with diverse patients, families, other healthcare workers, and ancillary personnel to facilitate safe patient care.
7. Implement appropriate safeguards to protect patients from physiologic compromise or injury due to patient positioning requirements for a given surgical procedure.
8. Build integrity, ethics, honesty, and accountability in professional interactions in accordance with the AANA professional practice standards and code of ethics.

NURS 6720. Nurse Anesthesiology Clinical Residency II
4 Credits (4P)
This is the second of six clinical residency courses and builds upon the didactic knowledge, clinical knowledge, and foundational concepts developed in Clinical Residency I and in-hospital experiences. Students continue to incorporate evidence-based research practices with an emphasis on patient safety and vigilance, culturally competent care of the patient throughout the peri-anesthesia continuum, interpersonal communication, and integration of critical and reflective thinking of an anesthesia provider. Students progressively assume more responsibility for patients as they gain skills and knowledge.
Learning Outcomes
1. Organize knowledge of anesthesiology principles, anatomy, physiology, pathophysiology, and pharmacology into evidence-based anesthesia planning and delivery of safe anesthesia care.
2. Utilize an evidence-based anesthesia plan of care based on a comprehensive history and physical assessment that takes into account the patient's underlying health status, culturally relevant information, and the surgical or medical procedure.
3. Utilize basic anesthesia skills/techniques and discover new skills with guidance.
4. Analyze data from the anesthesia monitors, equipment operation, and calibration to increase patient safety.
5. Dissect selection of drugs according to surgical patients across the lifespan.
6. Construct effective communication and documentation skills with diverse patients, families, other healthcare workers, and ancillary personnel to facilitate safe patient care.
7. Utilize patient positioning requirements for a given surgical procedure and implement.
8. Dissect integrity, ethics, honesty, and accountability in professional interactions in accordance with the AANA professional practice standards and code of ethics.

NURS 6730. Nurse Anesthesiology Clinical Residency III
4 Credits (4P)
This is the third of six clinical residency courses and builds upon the didactic knowledge, clinical knowledge, and foundational concepts developed in previous clinical residency courses and in-hospital experiences. Students continue to incorporate evidence-based research practices with an emphasis on patient safety and vigilance, culturally competent care of the patient throughout the peri-anesthesia continuum, interpersonal communication, and integration of critical and reflective thinking of an anesthesia provider. As students complete clinical experiences in various specialties, they will provide anesthesia services to patients with more complex alterations in health patterns requiring more expertise in anesthesia management.
Learning Outcomes
1. Categorize knowledge of anesthesiology principles, anatomy, physiology, pathophysiology, and pharmacology into evidence-based anesthesia planning and delivery of safe anesthesia care.
2. Infer an evidence-based anesthesia plan of care based on a comprehensive history and physical assessment taking into account the patient's underlying health status, culturally relevant information, and the surgical or medical procedure.
3. Utilize new skills with guidance while maintaining basic anesthesia skills/techniques.
4. Interpret data for safe use of anesthesia monitors, equipment operation, and calibration.
5. Discover selection of drugs according to surgical patients across the lifespan.
6. Discover and simplify effective communication and documentation skills with diverse patients, families, other healthcare workers, and ancillary personnel to facilitate safe patient care.
7. Survey appropriate safeguards to protect patients from physiologic compromise due to patient positioning requirements for a given surgical procedure.
8. Judge integrity, ethics, honesty, and accountability in professional interactions in accordance with the AANA professional practice standards and code of ethics.

NURS 6740. Nurse Anesthesiology Clinical Residency IV
4 Credits (4P)
This is the fourth of six clinical residency courses and builds upon the didactic knowledge, clinical knowledge, and foundational concepts developed in previous clinical residency courses and in-hospital experiences. Students continue to incorporate evidence-based research practices with an emphasis on patient safety and vigilance, culturally competent care of the patient throughout the peri-anesthesia continuum, interpersonal communication, and integration of critical and reflective thinking of an anesthesia provider. As students complete clinical experiences in various specialties, they will provide anesthesia services autonomously to patients with more complex alterations in health patterns requiring more expertise in anesthesia management.
Learning Outcomes
1. Appraise knowledge of anesthesiology principles, anatomy, physiology, pathophysiology, and pharmacology into evidence-based anesthesia planning and delivery of safe anesthesia care.
2. Design an evidence-based anesthesia plan of care based on a comprehensive history and physical assessment taking into account the patient's underlying health status, culturally relevant information, and the surgical or medical procedure.
3. Adapt new skills with guidance while maintaining basic anesthesia skills/techniques.
4. Deduct data from the use of anesthesia monitors, equipment operation, and calibration to increase patient safety.
5. Determine #effective communication and documentation skills with diverse patients, families, other healthcare workers, and ancillary personnel to facilitate safe patient care.
6. Evaluate patient positioning requirements for a given surgical procedure and implement appropriate safeguards to protect patients from physiologic compromise or injury.
7. Develop integrity, ethics, honesty, and accountability in professional interactions in accordance with the AANA professional practice standards and code of ethics.

NURS 6750. Nurse Anesthesiology Clinical Residency V
5 Credits (5P)
This is the last of five clinical residency courses and builds upon the didactic knowledge, clinical knowledge, and foundational concepts developed in previous clinical residency courses and in-hospital experiences. Students continue to incorporate evidence-based research practices with an emphasis on patient safety and vigilance, culturally competent care of the patient throughout the peri-anesthesia continuum, interpersonal communication, and integration of critical and reflective thinking of an anesthesia provider. Students are expected to provide anesthesia services independently to patients with more complex alterations in health patterns requiring more expertise in anesthesia management.

Learning Outcomes

1. Maximize knowledge of anesthesiology principles, anatomy, physiology, pathophysiology, and pharmacology into evidence-based anesthesia planning and delivery of safe anesthesia care.
2. Design an evidence-based anesthesia plan of care based on a comprehensive history and physical assessment taking into account the patient's underlying health status, culturally relevant information, and the surgical or medical procedure.
3. Identify new skills with guidance while mastering basic anesthesia skills/techniques.
4. Analyze data with the use of anesthesia monitors, equipment operation, and calibration to increase patient safety.
5. Modify selection of drugs according to surgical patients across the lifespan.
6. Adapt#effective communication and documentation skills with diverse patients, families, other healthcare workers, and ancillary personnel to facilitate safe patient care.
7. Improve patient positioning requirements for a given surgical procedure and implement appropriate safeguards to protect patients from physiologic compromise or injury.
8. Maximize integrity, ethics, honesty, and accountability in professional interactions in accordance with the AANA professional practice standards and code of ethics.

NURS 6760. Nurse Anesthesiology Clinical Residency VI
5 Credits (5P)

This is the final clinical residency course and builds upon the didactic knowledge, clinical knowledge, and foundational concepts developed in previous clinical residency courses and in-hospital experiences. Students continue to incorporate evidence-based research practices with an emphasis on patient safety and vigilance, culturally competent care of the patient throughout the peri-anesthesia continuum, interpersonal communication, and integration of critical and reflective thinking of an anesthesia provider. Students are expected to provide anesthesia services independently to patients with more complex alterations in health patterns requiring more expertise in anesthesia management.

Learning Outcomes

1. Adapt knowledge of anesthesiology principles, anatomy, physiology, pathophysiology, and pharmacology into evidence-based anesthesia planning and delivery of safe anesthesia care.
2. Improve an evidence-based anesthesia plan of care based on a comprehensive history and physical assessment attacking into account the patient's underlying health status, culturally relevant information, and the surgical or medical procedure.
3. Maximize new skills with guidance while solidifying mastery of basic anesthesia skills.
4. Interpret data with the use of anesthesia monitors, equipment operation and calibration to increase patient safety.
5. Invent selection of drugs according to surgical patients across the lifespan.
6. Imagine and originate effective communication and documentation skills with diverse patients, families, other healthcare workers, and ancillary personnel to facilitate safe patient care.
7. Construct appropriate safeguards to protect patients from physiologic compromise or injury given patient positioning requirements for a given surgical procedure and implement.
8. Internalize integrity, ethics, honesty, and accountability in professional interactions in accordance with the AANA professional practice standards and code of ethics.

NURS 6770. Rural Health Anesthesiology Seminar
3 Credits (3)

This course focuses on unique issues and challenges surrounding the provision of nurse anesthesiology services in rural communities. Topics covered include working with scarce resources, needs of individuals/populations living in rural communities, regulatory issues, health policy, reimbursement practices, cultural issues, technology, and local/state/federal aspects that impact rural nurse anesthesiology practice.

Learning Outcomes

1. Define unique needs of individuals and/or populations living in rural communities.
2. Identify challenges of working with scarce resources.
3. Discuss regulatory, policy, reimbursement, and cultural issues unique to rural nurse anesthesiology practice.
4. Illustrate local, state, and/or federal issues that impact rural nurse anesthesiology practice.

NURS 6771. Anesthesiology Integration/Clinical Correlation I
4 Credits (4)

This course highlights the culmination of reflective learning that the nurse anesthesiology resident has accomplished over the three years of the program.

Learning Outcomes

1. Actively engage in professional advocacy by effectively representing the interests of the nurse anesthesiology profession, contributing to policy development, participating in the state and national organizations, and promoting ethical standards and social responsibility within anesthesia.
2. Prioritize sustainable personal and professional wellness practices by integrating strategies for physical, emotional, and mental well-being, maintaining work-life balance, managing stress effectively, and fostering resilience to support long-term career success and personal fulfillment.
3. Improve leadership and interpersonal effectiveness by applying emotional intelligence, communication, teamwork, adaptability, conflict resolution, and problem-solving skills to lead and collaborate within diverse professional settings.
4. Examine foundational financial literacy principles in both personal and business contexts, including budgeting, debt management, investment planning, financial decision-making, and understanding basic accounting and entrepreneurship practices.
5. Produce educational content using evidence-based teaching strategies, communication techniques, and presentation skills to facilitate learning in academic, clinical, or public settings.
6. Demonstrate readiness for professional practice and certification through active participation in simulation-based assessments, development and execution of a personalized study plan, and successful completion of comprehensive final evaluations that integrate theoretical knowledge with practical application.

NURS 6772. Anesthesiology Integration/Clinical Correlation II
2 Credits (2)

This course is the second of a two-course sequence and continues to further develop critical thinking skills and foster continued integration of theoretical knowledge into clinical practice. Clinically relevant evidence-based research and anesthesia topics will be presented by students and faculty. This course also includes student participation in discussion of clinical experiences and case presentations. Students will continue to critically analyze, synthesize, and evaluate the knowledge gained in all previous nurse anesthesiology courses in preparation for the national certification examination and clinical practice.

Learning Outcomes

1. Demonstrate the ability to critically review pertinent literature and its application to clinical practice.
2. Deliver case-based presentations that incorporate current evidence-based best practices and culturally relevant information.
3. Demonstrate consistent professional growth and development through discussion, presentation, interaction, and individual and/or group participation.
4. Complete the student self-evaluation of graduate standards form.
5. Implement the previously created action plan to pass the NBCRNA NCE and revise it as needed.

NURS 6990. Advanced Practice Nursing Immersion
1-4 Credits (1-4)
Practicum experience for advanced practice students. Focus will be on a practice issue chosen by the student for further development as an evidence-based doctoral project. Clinical practice hours as needed to meet DNP requirements. Up to 24 credits may be completed by student. Restricted to: NURP majors. May be repeated up to 24 credits.
Prerequisite: NURS 6220, NURS 6530 or enrollment in post-masters track.

NURS 6991. DNP Project Development
1,2 Credits (1,2+1,2P)
The DNP Project course is repeated for a minimum of three (3) semesters and is the culmination of the DNP coursework. The three semesters of coursework include development, implementation, evaluation and dissemination of scholarly work that demonstrates the student's synthesis of the Essentials of Nursing Education, Advanced Level. The project must use evidence to improve clinical practice, healthcare delivery and/or patient outcomes. Students will actively participate with their DNP project chair each semester to develop a learning contract with individualized learning objectives based on the student's progression in the DNP project process. The student will register for a minimum of 2 credits which will include 1 hour of didactic and 1 hour of practicum credit (for leading the DNP Project) each semester following NURS 6305 (Intro to the DNP Project) until project completion and a minimum of six (6) credit hours during the course of the program of study. Students who have not completed the DNP Project will repeat the course until the student has met all DNP project requirements for graduation. S/U PR grading. May be repeated up to 8 credits.
Prerequisite: NURS 6305.
Learning Outcomes

1. Synthesize knowledge from experience and specialty literature for application to the project area of interest.
2. Demonstrate the ability to complete a organizational needs assessment, literature review, executive summary, IRB application and write a scholarly manuscript for public dissemination.
3. Identify a theoretical framework or model that will guide the development of a solution or intervention and/or the execution of the DNP project.
4. Incorporate elements of scientific inquiry into a defined project in the specialty practice area or area of clinical interest.
5. Demonstrate the ability to present in a scholarly fashion for the DNP project proposal comprehensive examination and the DNP project final defense.
6. Develop a portfolio demonstrating expertise in the specialty practice area.

NURS 6993. Doctoral Nursing APRN Seminar
1 Credit (1P)
Seminar to build APRN clinical skills, consisting of a 32-40 hour on-site immersion with skills labs and Objective Structured Clinical Evaluation using standardized patients that are used as formative and summative evaluation. May be repeated up to 6 credits.
Prerequisite: NURS 6220, NURS 6224.
Learning Outcomes

1. Apply clinical decision making skills to diagnose and treat given patient cases in area of specialty.
2. Integrate screening and diagnostic tools into diagnosis and treatment of given patient cases in area of specialty.
3. Use advanced health assessment skills to differentiate between normal, variations of normal and abnormal findings.
4. Develop skills in the interpretation of commonly used diagnostic tests in management of patient conditions in area of specialty.
5. Perform procedures commonly used in the treatment of patients in area of specialty.

NURS 6997. Independent Study
1-6 Credits (1-6)
Individual studies and directed research with prior approval of department head. May be repeated up to 12 credits.

NURS 7000. Doctoral Dissertation
1-9 Credits (1-9)
Dissertation may be repeated to maximum of 30 credits. Minimum requirements are 21 credit hours. Comprehensive examine is included within these 21 credits. May be repeated up to 30 credits.
Learning Outcomes

1. Varies.

NURS 999. Practical Nursing Requirements Completed
99 Credits
A phantom course created to indicate a student has met Practical Nursing requirements. Used to indicate this in academic history to replace an administrative message not converted from SOLAR to VISTAS. 01/97 May be repeated up to 99 credits.
Learning Outcomes

1. N/A

NUTR-NUTRITION

NUTR 1120. Dietary Guidelines
4 Credits (4)
A presentation and explanation in detail of the Dietary Guidelines for Americans developed by the U.S. Department of Agriculture (U.S.D.A.) and the U.S. Department of Health and Human Services.
Learning Outcomes

1. Recall, interpret and explain each of the Dietary Guidelines and U.S.D.A. nutrition education tools.
2. Translate the Dietary Guidelines into a diet and exercise program.
3. List and describe methods to select and prepare food which are consistent with the Dietary Guidelines for Americans.
4. Identify risk factors related to disease prevention.

NUTR 2110. Human Nutrition
3 Credits (3)
This course provides an overview of nutrients, including requirements, digestion, absorption, transport, function in the body and food sources. Dietary guidelines intended to promote long-term health are stressed.

Learning Outcomes

1. Evaluate sources of nutrition information for reliability
2. Identify elements of a nutritious diet
3. Describe the digestion, transport, and absorption of nutrients
4. Describe the importance of nutrition in weight control and health
5. Identify nutritional needs as they relate to the life cycle and performance
6. Describe behavior modification techniques that promote good health
7. Evaluate popular nutrition trends for scientific accuracy and effectiveness
8. Develop skills in the planning and assessing of healthy meal plans
9. Describe the role of food choices in the development of chronic disease 1
10. Describe the role of food in the promotion of a healthful lifestyle

NUTR 2120. Seminar I - Becoming a Nutrition Professional
1 Credit (1)
This course will introduce students to the field experience, careers, and professions in nutrition. This course is required for students pursuing a Didactic Program in Dietetics verification statement.
Learning Outcomes

1. Describe career options within the fields of Nutrition Dietetics.
2. Outline the HNDS field experience process.
3. Explain the educational pathways in HNDS.
4. List requirements for admission into the HNDS Dietetics pathway.
5. Begin an HNDS student portfolio.
6. Discuss the importance of personal responsibility accountability.

NUTR 3110. Nutrition Throughout the Lifecycle
3 Credits (3)
Relationship of the stages of the human life cycle to changes in nutrient need. Consent of Instructor required.
Prerequisite(s): NUTR 2110, BIOL 354 and BIOL 354L OR SPMD 2210 and SPMD 2210L.
Learning Outcomes

1. Understand the value of collaborative work in nutrition care of individuals.
2. Compare and contrast the physiological, behavioral, and psychosocial factors associated with each life stage that affect nutritional status.
3. For each life cycle stage, create a nutritionally adequate menu that meets key nutrient needs.
4. Culturally appropriate evidence-based interventions to address common nutrition-related conditions experienced in each lifecycle stage.
5. Utilize the Nutrition Care Process to complete a nutrition assessment.

NUTR 3710. Food Systems & Policy in Dietetics
3 Credits (3)
This course introduces students to food and nutrition policy issues, institutions, and stakeholders and their impacts on public health, sustainability, and the practice of dietetics in the US. The course will examine policy development and the roles of federal agencies, private firms, non-governmental organizations, and the media in food and nutrition policy. It will also examine international perspectives on food and nutrition policies and programs used to support global nutrition, health promotion, and wellness.
Prerequisite(s): Junior standing, NUTR 2120 (for HNDS majors), ENGL 2130G (or ENGL 2210G, 2215G, or 2221G).

Learning Outcomes

1. Discuss the economic, political, social, and cultural factors that influence US food and nutrition policies and impact national food systems and population health.
2. Identify the psychological, social, cultural, and environmental factors that influence food choices, eating behaviors, and nutrition-related practices.
3. Describe the processes and major players involved in US food and nutrition policy development, implementation, monitoring/evaluation, and regulation.
4. Recognize the influence of food and nutrition policy on the practice of dietetics.

NUTR 3750. Applied Nutrition Research
3 Credits (3)
This course will introduce students to various types of nutrition research and equip them to locate and critique nutrition and dietetics research articles. Research analysis skills will then be applied to a review of the current literature on a nutrition topic and applied to dietetics practice.
Prerequisite: MATH 1350G (OR A ST 311); NUTR 3110.
Learning Outcomes

1. Recall the various research methods, study designs, and statistical analyses used in nutrition research.
2. Compare and contrast research methods and analyses in nutrition research.
3. Analyze nutrition research for appropriateness of the methods and analyses.
4. Evaluate nutrition research to form sound, ethical conclusions and practice recommendations.

NUTR 3996. Special Topics
1-4 Credits (1-4)
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required.
Prerequisite(s): Junior or Senior standing, consent of instructor.
Learning Outcomes

1. Develop foundational knowledge in a specialized area of dietetics practice.

NUTR 4110. Advanced Nutrition
3 Credits (3)
Application of biochemistry and physiology to nutrition.
Prerequisite(s): SPMD 1120 or NURS 150; CHEM 2120; NUTR 3110.
Learning Outcomes

1. Describe the processes of digestion and absorption within the human body.
2. Compare and contrast the structure and function of key nutrients.
3. Describe the metabolism of key nutrients under various conditions.
4. Apply concepts of energy and nutrient metabolism to common medical conditions and other relevant situations such as exercising or fasting.

NUTR 4205. Nutrition Communication and Education
3 Credits (3)
In this course, HNDS students learn about the foundation, design, and delivery of nutrition communication and nutrition education. Students will learn ways to develop audience-focused communication and learning assessment. This course will cover the communication methods used in all facets of the nutrition and dietetics field including oral presentations, writing, video, food photography, and food demonstrations. Students will

utilize a large variety of channels to communicate and educate different target audiences.
Prerequisite: NUTR 3750 and NUTR 4210.
Learning Outcomes
1. Identify a minimum of four reliable sources of nutrition information.
2. Interpret and clearly communicate evidence-based nutrition information.
3. Evaluate the application of behavior change theories and models to nutrition communications.
4. Adapt nutrition communication and education to target specific cultural and age groups.
5. Develop a nutrition education lesson plan with SMART learning objectives, learning activities, and learning assessments.

NUTR 4207. Nutrition Services
3 Credits (3)
In this course, HNDS Dietetic students will learn about the promotion and payment of nutrition services along with aspects related to reimbursement and partnering with allied professionals. The HNDS Dietetics students will also engage in clinical and community nutrition field experiences. This course will provide HNDS Dietetic students with the opportunity to assess their knowledge of professional competencies within the field of dietetics. Restricted to students with senior standing within the Dietetics Option of the HNDS major. Must be in final spring semester.
Prerequisite(s): NUTR 4210 and NUTR 4230 and 4230L.
Corequisite(s): NUTR 4240 and 4240L.
Learning Outcomes
1. Compare best practice guidelines to actual practice in the provision of nutrition services within community settings.
2. Explain at least two processes in delivering quality food and nutrition services.
3. Identify private and public healthcare funding sources.
4. Explain Medicare, Medicaid, and private payer coverage for medical nutrition therapy.
5. Discuss referrals, primary care partnership and promoting nutrition services.
6. Describe best practices, resources and guidelines related to the reimbursement for nutrition services.
7. Compare best practice guidelines to actual practice in the provision of nutrition services within clinical nutrition settings.
8. Evaluate the content of the Commission on Dietetic Registration RDN credentialing exam.

NUTR 4210. Community Nutrition
3 Credits (3)
Overview of the practice of community nutrition. Includes program planning, needs assessment, program implementation and program evaluation. Role of public and private agencies in nutrition programs that impact on nutrition of individuals and groups in the community. Same as NUTR 5210.
Prerequisite: NUTR 3710 and NUTR 3750.
Learning Outcomes
1. Summarize the components of current national and local community nutrition programs.
2. Explain how national or state level policy influences a community nutrition issue.
3. Write a needs assessment for a community nutrition issue using reliable sources of community nutrition information and data and relevant research.
4. Develop goals and objectives of a nutrition program that address a community nutrition issue.
5. Develop a culturally appropriate nutrition education lesson plan that addresses a specific nutrition program objective.

NUTR 4220. Food Service Organization and Management
3 Credits (3)
Personnel, financial and general management in institutional and commercial food service operations.
Prerequisite: HRTM 3310 or 363.
Learning Outcomes
1. Evaluate food products and menu plans through the application of food service management theories and principles.
2. Describe the process of and ethical considerations surrounding purchasing, receiving, storing and controlling inventory of a given food item.
3. Evaluate food system, food safety practices, and scenarios.
4. Evaluate a nutrition and foodservice budget and interpret financial data.

NUTR 4230. Medical Nutrition Therapy I
3 Credits (3)
Special diets and physiological basis for their use. Laws and regulations concerning the practice of dietetics.
Prerequisite(s): NUTR 4110, BCHE 341.Corequisite(s): NUTR 4230, NUTR 4233.
Learning Outcomes
1. Examine the role of medical nutritional therapy in disease processes.
2. Apply nutritional assessment techniques utilizing the Nutrition Care Process.
3. Compose nutrition care plans and utilize various styles of medical charting.
4. Describe the interdisciplinary nature of working with a health care team in the delivery of medical nutritional therapy.

NUTR 4230L. Medical Nutrition Therapy I Lab
1 Credit (1P)
Supplements NUTR 4230. Students will perform nutrition assessments, nutrition focused physical exams, apply medical nutrition therapy-based interventions and practice patient discharge education for specific disease states. Elements of pathology and biochemistry of nutrition-related conditions are integrated into course topics. Restricted to: HNDS majors.
Corequisite: NUTR 4230.
Learning Outcomes
1. Examine the role of medical nutrition therapy in disease processes.
2. Conduct nutrition assessments.
3. Apply the Nutrition Care Process Model.
4. Apply medical terminology to nutrition interventions.
5. Apply therapeutic approaches to treating medical conditions and their associated symptoms via the use of specifically tailored diets.

NUTR 4233. Nutrition Counseling
3 Credits (3)
This course is designed to meet the needs of individuals entering the healthcare/dietetics field who have little counseling experience, but have a strong foundational knowledge in the field of dietetics. It includes counseling techniques and strategies, behavior change, interviewing, cultural competence, mass media, and nutrition education.
Prerequisite: NUTR 3750,NUTR 4110.

Learning Outcomes

1. Evaluate nutrition counseling strategies tools in promoting behavior change and self-management.
2. Apply behavior change theories and models to nutrition counseling sessions.
3. Develop nutrition care plans for nutrition counseling clients.
4. Analyze professionalism and ethics within nutrition counseling and education.

NUTR 4235. Entering the Field of Dietetics
1 Credit (1)
Students will develop professional materials that will be used in their future careers including a personal statement, resume, and interview dialogues. Students will become familiar with career options in the field of dietetics and learn to navigate the processes of becoming a registered dietitian or dietetic technician, registered. Restricted to: HNDS majors. Students must be a Senior to enroll. Final fall semester of dietetics program.
Learning Outcomes

1. Develop professional materials to use when applying to dietetic careers, including a personal statement, resume, and interview dialogue.
2. Become familiar with with career options in the field of dietetics by reviewing current job postings.
3. Navigate the process of becoming a registered dietitian or dietetic technician, registered.
4. Prepare a dietetic internship application using DICAS and DD Digital Matching Service.
5. Create both primary and alternative career plans within the field of dietetics.
6. Learn how to apply professional resources to aid in career development and continuing education.

NUTR 4240. Medical Nutrition Therapy II
3 Credits (3)
Continuation of NUTR 4230.
Prerequisite: NUTR 4230 and 4230L.
Corequisite: NUTR 4240L.
Learning Outcomes

1. Select appropriate medical nutrition therapy interventions for various disease processes.
2. Master nutrition assessment of patients/clients utilizing the Nutrition Care Process Model.
3. Interpret medical terminology in patient chart notes and medical history records.
4. Evaluate laws regulations concerning dietetics.

NUTR 4240L. Medical Nutrition Therapy II Laboratory
1 Credit (1P)
Supplements NUTR 4240. Students will apply medical nutrition therapy to specific disease states with special emphasis on writing nutrition support orders and learning to utilize nutrition support equipment. Students will learn and apply advanced nutritional therapies and patient management strategies. Restricted to: HNDS majors.
Prerequisite(s): NUTR 4230.
Corequisite(s): NUTR 4240.
Learning Outcomes

1. Calculate nutrition support recommendations and document orders in the patient's medical chart.
2. Demonstrate safe use of nutritional support equipment.
3. Master use of the Nutrition Care Process in case-based and simulated patient scenarios to conduct nutrition assessments and implement evidence-based interventions.
4. Critically evaluate lab values and client anthropometric data.
5. Select therapeutic diets for the treatment of medical conditions and their symptoms.

NUTR 4565. Field Experience Community Nutrition
1-8 Credits (1-8)
Experience working with nutritional problems of individual families of all socioeconomic and age levels and with agencies concerned with community nutrition. Practical experience with supervision by resident faculty as well as supervisor at the work site. Performance at work site graded in accordance with university standards. May be repeated up to 8 credits. Consent of Instructor required.
Prerequisite(s): Senior standing, NUTR 4210, consent of instructor.
Learning Outcomes

1. Apply dietetics knowledge to practice in various community settings.
2. Develop a field experience portfolio highlighting the development of community nutrition knowledge and skills.
3. Compare and contrast the responsibilities of Registered Dietitians in various community practice organizations.

NUTR 4991. Special Problems
1-4 Credits (1-4)
Individual research study in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and a total of 8 credits. May be repeated up to 8 credits. Consent of Instructor required.
Prerequisite(s): Junior or Senior standing.
Learning Outcomes

1. Develop specialized knowledge and competencies in a selected nutrition and dietetics subject area.

NUTR 5110. Graduate Studies in Advanced Nutrition
3 Credits (3)
Covers biochemistry and physiology applied to nutrition. Students enrolled in the 5000-level class will be required to complete additional assignments beyond what is required for NUTR 4110. Crosslisted with: NUTR 4110.
Prerequisite(s)/Corequisite(s): NUTR 3110. Student must be classified as a Graduate student to enroll in this course, BIOL 2221, BCHE 341, and NUTR 2110, or consent of instructor.
Learning Outcomes

1. Describe the processes of digestion and absorption within the human body.
2. Compare and contrast the structure and function of key nutrients.
3. Describe the metabolism of key nutrients under various conditions.
4. Apply concepts of energy and nutrient metabolism to common medical conditions and other relevant situations such as exercise or fasting.

NUTR 5150. Orientation to Dietetic Internship
3 Credits (3)
Dietetic interns prepare for supervised practice rotations. Topics include professionalism, Code of Ethics, and dietetic internship portfolios. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.
Learning Outcomes

1. Assembly of dietetic intern portfolio that will be kept throughout dietetic internship.

2. Readiness to begin supervised practice rotations.
3. Understanding of steps and processes to successfully complete requirements of dietetic internship and Masters of Science in Family Consumer Sciences.
4. Upon completion of the course, students will be able to understand the importance of evidence-based information, research ethics, the Code of Ethics of the Profession of Dietetics, and the basic structure of an IRB proposal.

NUTR 5210. Graduate Study in Community Nutrition
3 Credits (3)
Overview on the practice of community nutrition to include program planning, needs assessment, program implementation and program evaluation. Role of public and private agencies in nutrition programs that impact on nutrition of individuals and groups in the community. Students enrolled in the 5000-level class will be required to complete additional assignments beyond what is required for NUTR 4110. May be repeated up to 3 credits. Crosslisted with: NUTR 4210.
Prerequisite(s): Graduate student, NUTR 3110, NUTR 3710, NUTR 3750, or consent of the instructor.
Learning Outcomes
1. Summarize the components of current national and local community nutrition programs.
2. Explain how national or state-level policy influences a community nutrition issue.
3. Write a needs assessment for a community nutrition issue using reliable sources of community nutrition information and data, and relevant research.
4. Develop goals and objectives of a nutrition program that address a community nutrition issue.
5. Develop a culturally appropriate nutrition education lesson plan that addresses a specific nutrition program objective.

NUTR 5220. Graduate Studies in Food Service Organization and Management
3 Credits (3)
Personnel, financial and general management in institutional and commercial food service operations. Students enrolled in the5000-level class will be required to complete additional assignments beyond what is required for NUTR 4220. May be repeated up to 3 credits.
Prerequisite(s): Graduate Students; HRTM 2120, NUTR 3120, or consent of instructor.
Learning Outcomes
1. Evaluate food products and menu plans through the application of food service management theories and principles.
2. Describe the process of and ethical considerations surrounding purchasing, receiving, storing, and controlling inventory of a given food item.
3. Evaluate food system, food safety practices, and management practices of a specific food service establishment.
4. Apply management theories and principles to quality assurance and human resource case scenarios.
5. Evaluate a nutrition and food service budget and interpret financial data.

NUTR 5230. Graduate Studies in Medical Nutrition I
3 Credits (3)
Special diets and physiological basis for their use. Laws and regulations concerning the practice of dietetics. Additional assignments beyond NUTR 4230 required. May be repeated up to 3 credits. Crosslisted with: NUTR 4230.
Prerequisite(s): Graduate student, NUTR 3110, NUTR 4110, BIOL 2225 or BIOL 2221, or consent of instructor.
Learning Outcomes
1. Examine the role of medical nutritional therapy in disease processes.
2. Apply nutritional assessment techniques utilizing the Nutrition Care Process.
3. Compose nutrition care plans and utilize various styles of medical charting.
4. Describe the interdisciplinary nature of working with a health care team in the delivery of medical nutritional therapy.

NUTR 5233. Graduate Studies in Nutrition Counseling & Education
3 Credits (3)
This course is designed to meet the needs of individuals entering the healthcare/dietetics field who have little counseling experience, but have a strong foundational knowledge in the field of dietetics. It includes counseling techniques and strategies, behavior change, interviewing, cultural competence, mass media, and nutrition education. Additional assignments beyond NUTR 4233 required. May be repeated up to 3 credits. Crosslisted with: HNDS 4233.
Prerequisite(s)/Corequisite(s): NUTR 5230. Students must be classified as a Graduate student to enroll in this course, NUTR 2110, NUTR 3110, FCSC 348.
Learning Outcomes
1. Evaluate nutrition counseling strategies and tools in promoting behavior change and self-management.
2. Apply behavior change theories and models to nutrition counseling sessions.
3. Develop nutrition care plans for nutrition counseling clients.
4. Analyze professionalism and ethics within nutrition counseling and education.
5. Develop and present a nutrition education lesson based on current nutrition research.

NUTR 5240. Graduate Studies in Medical Nutrition Therapy II
3 Credits (3)
Continuation of HNDS 546. May be repeated up to 3 credits. Crosslisted with: NUTR 4240.
Prerequisite(s): Graduate student, NUTR 5230 and NUTR 4230L or consent of instructor.
Learning Outcomes
1. Select appropriate medical nutrition therapy interventions for various disease processes.
2. Master nutrition assessment of patients/clients utilizing the Nutrition Care Process model.
3. Interpret medical terminology in patient chart notes and medical history records.
4. Evaluate laws regulations concerning dietetics.

NUTR 5610. Dietetic Intern Seminar
1 Credit (1)
Portfolio development for dietetic interns during supervised practice rotations. May be repeated up to 3 credits. Consent of Instructor required.
Prerequisite(s): Acceptance into Dietetic Internship.
Learning Outcomes
1. CRDN
2. 2: Apply evidence-based guidelines, systematic reviews and scientific literature.

3. CRDN
4. 3: Justify programs, products, services and care using appropriate evidence or data.
5. CRDN
6. 4: Evaluate emerging research for application in nutrition and dietetics practice.
7. CRDN
8. 6: Incorporate critical-thinking skills in overall practice.
9. CRDN
10. 1: Practice in compliance with current federal regulations and state statutes and rules, as applicable and in accordance with accreditation standards and the Scope of Nutrition and Dietetics Practice and Code of Ethics for the Profession of Nutrition and Dietetics.
11. CRDN
12. 2: Demonstrate professional writing skills in preparing professional communications.

NUTR 5620. Dietetic Internship: Supervised Practice in Community Nutrition
1-8 Credits (2-6P)
Provides dietetic interns with a minimum of 500 clock hours of supervised practice in community nutrition to include an emphasis in Cooperative Extension Service. Dietetic interns work under the the guidance of faculty and community nutrition professionals. May be repeated up to 8 credits. Consent of Instructor required. Restricted to: HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.
Learning Outcomes
1. CRDN
2. 1 Select indicators of program quality and/or customer service and measure achievement of objectives.
3. CRDN
4. 2 Apply evidence-based guidelines, systematic reviews and scientific literature.
5. CRDN
6. 4 Evaluate emerging research for application in nutrition and dietetics practice.
7. CRDN
8. 5 Conduct projects using appropriate research methods, ethical procedures and data analysis.
9. CRDN
10. 14 Demonstrate advocacy on local, state or national legislative and regulatory issues or policies impacting the nutrition and dietetics profession.
11. CRDN
12. 1 Perform the Nutrition Care Process and use standardized nutrition language for individuals, groups and populations of differing ages and health status, in a variety of settings.
13. CRDN
14. 5 Develop nutrition education materials that are culturally and age appropriate and designed for the literacy level of the audience.
15. CES
16. Consult with organizations regarding food access for target populations.
17. CES
18. Evaluate the operation of Cooperative Extension Service nutrition programs in the areas of policies and procedures. 1
19. CES
20. Develop and deliver nutrition presentations to client/consumer audiences on various topics related to client/consumer needs. 1
21. CES
22. Ensure cultural relevancy and appropriateness of nutrition education. 1
23. CES
24. Assess educational needs and provide nutrition counseling based on individual needs, knowledge, medical needs, and socioeconomic status.

NUTR 5630. Community Nutrition for Dietetic Interns
3 Credits (3)
Advanced topics in community nutrition to include conducting community nutrition needs assessments, program planning and grant writing. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.
Learning Outcomes
1. CRDN
2. 1 Select indicators of program quality and/or customer service and measure achievement of objectives.
3. CRDN
4. 2 Apply evidence-based guidelines, systematic reviews and scientific literature.
5. CRDN
6. 4 Evaluate emerging research for application in nutrition and dietetics practice.
7. CRDN
8. 5 Conduct projects using appropriate research methods, ethical procedures and data analysis.
9. CRDN
10. 14 Demonstrate advocacy on local, state or national legislative and regulatory issues or policies impacting the nutrition and dietetics profession.
11. CRDN
12. 1 Perform the Nutrition Care Process and use standardized nutrition language for individuals, groups and populations of differing ages and health status, in a variety of settings.
13. CRDN
14. 5 Develop nutrition education materials that are culturally and age appropriate and designed for the literacy level of the audience.
15. CES
16. Consult with organizations regarding food access for target populations.
17. CES
18. Ensure cultural relevancy and appropriateness of nutrition education.

NUTR 5640. DI SUP PRACT FS MGT
1-5 Credits (2-10P)
Provides dietetic interns with a minimum of 300 clock hours of supervised practice in foodservice management. Dietetic interns work under the guidance of faculty and foodservice management professionals. Students must complete a total of 4 credit hours of NUTR 5640. May be repeated up to 5 credits. Consent of Instructor required. Restricted to: HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.

NUTR 5650. Foodservice Management for Dietetic Interns
3 Credits (3)
Advanced topics in foodservice systems management to include business planning and marketing. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.
Learning Outcomes
1. CRDN
2. 2: Demonstrate professional writing skills in preparing professional communications.
3. CRDN
4. 15: Practice and/or role play mentoring and precepting others.
5. CRDN
6. 4: Design, implement and evaluate presentations to target audiences.
7. CRDN
8. 3: Demonstrate active participation, teamwork and contributions in group setting.
9. CRDN
10. 7: Apply leadership skills to achieve desired outcomes.
11. CRDN
12. 8: Demonstrate negotiation skills.
13. CRDN
14. 4: Apply current informatics technology to develop, store, retrieve and disseminate information and data.
15. CRDN
16. 6: Analyze quality, financial and productivity data for use in planning.
17. CRDN
18. 7: Conduct feasibility studies for products, programs, or services with consideration of costs and benefits.1
19. CRDN
20. 8: Develop a plan to provide or develop a product, program, or service that includes a budget, staffing needs, equipment and supplies.

NUTR 5660. Dietetic Internship: Supervised Practice in Clinical Dietetics
1-8 Credits (2-16P)
Provides dietetic interns with a minimum of 500 clock hours of supervised practice in clinical dietetics. Dietetic interns work under the guidance of faculty and dietetics professionals. May be repeated up to 8 credits. Consent of Instructor required. Restricted to: HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.
Learning Outcomes
1. CRDN
2. 1 Select indicators of program quality and/or customer service and measure achievement of objectives.
3. CRDN
4. 4 Function as a member of interprofessional teams.
5. CRDN
6. 11 Show cultural competence/sensitivity in interactions with clients, colleagues and staff.
7. CRDN
8. 1 Perform the Nutrition Care Process and use standardized nutrition language for individuals, groups and populations of differing ages and health status, in a variety of settings.
9. CRDN
10. 2 Conduct nutrition focused physical exams.
11. CRDN
12. 3 Demonstrate effective communication skills for clinical and customer services in a variety of formats

NUTR 5670. Nutrition Care Process for Dietetic Interns
3 Credits (3)
Advanced topics in nutrition care process and model to include medical nutrition therapy and evidence-based research and outcomes assessment in clinical dietetics. Consent of Instructor required.
Prerequisite(s): Acceptance into Dietetic Internship.Restricted to: HNDS majors.
Learning Outcomes
1. CRDN
2. 2: Apply evidence-based guidelines, systematic reviews and scientific literature.
3. CRDN
4. 3: Justify programs, products, services and care using appropriate evidence or data.
5. CRDN
6. 4: Evaluate emerging research for application in nutrition and diet.
7. CRDN
8. 4 Evaluate emerging research for application in dietetics practice.
9. CRDN
10. 2 Demonstrate professional writing skills in preparing professional communication. Perform the nutrition care process and use standardized nutrition language for individuals, groups, and populations of differing ages and health status, in a variety of settings.
11. CRND
12. 2 Conduct nutrition focused physical exams.

NUTR 5680. Review Course for National RD Exam
3 Credits (3)
Completion of dietetic internship portfolio and preparation for the national registration examination for dietitians. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: exclude HNDS majors.
Prerequisite(s): Acceptance into Dietetic Internship.
Learning Outcomes
1. Demonstrate readiness to take the National Registration Examination for Dietitians.
2. Completion of all requirements of the NMSU Dietetic Internship.
3. Completion of all requirements to receive a Master of Science in Family Consumer Sciences from New Mexico State University

NUTR 5991. Special Research Programs
1-4 Credits (1-4)
Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree. May be repeated up to 6 credits.
Prerequisite(s): Graduate Student.
Learning Outcomes
1. Develop analytical or experimental research skills in the areas of human nutrition and dietetics.

NUTR 5996. Special Topics
1-4 Credits (1-4)
Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.
Prerequisite(s): Graduate student.

Learning Outcomes

1. Evaluate issues surrounding advanced nutrition and dietetics topics.

OECS-COMPUTER TECHNOLOGY

OECS 105. Introduction to Information Technology
3 Credits (3)
Examination of information systems and their impact on commerce, education, and personal activities. Utilization of productivity tools for communication, data analysis, information management and decision-making.

Learning Outcomes

1. Describe the social impact of information literacy and systems in relation to commerce, education, and personal activities.
2. Explain how to use the information resources legally, safely, and responsibly in relation to ethical, security, and privacy issues.
3. Evaluate bias, accuracy and relevance of information and its sources.
4. Use productivity tools for communications, data analysis, information management and decision-making.
5. Describe and use current information systems and technologies.

OECS 110. Introduction to Power Point
1-3 Credits (1-3)
An introduction to Power Point software to develop business presentations. Includes concepts of basic presentation methods and graphic design principles. Students will create and deliver presentations using text, charts, digitized images, and sound. Restricted to Community Colleges campuses only.

OECS 128. Operating Systems Linux/Unix
3 Credits (3)
Installation, configuration, and use of Linux/Unix operating system software and utilities including hardware management, file management, use of command line, and scripting. Restricted to: Community Colleges only.

OECS 145. Mobile Application Development
1-3 Credits (1-3)
Introduction to elements of mobile application coding including concepts, design strategies, tools needed to create, test and deploy applications for mobile devices. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

OECS 155. Special Topics - Introductory Computer Technology
0.5-4 Credits (.5-4)
Topics to be announced in the Schedule of Classes. May be repeated up to 8 credits.

OECS 192. C++ Programming I
3 Credits (3)
Development of skills in programming using the C++ programming language. Restricted to: Community Colleges only.

OECS 204. Linux Operating System
1-3 Credits
Install and configure the Linux operating system on X86 systems. Covers issues involved in maintaining operating system, networking, creating and managing users, and installing and updating software. General procedures for working with operating system includes maintaining disk space, preserving system security, and other related topics. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

OECS 208. Internet Applications
1-3 Credits
Survey of the Internet to include e-mail, file transfer, current search techniques, the World Wide Web and basic Web page development. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

OECS 209. Computer Graphic Arts
1-3 Credits
Basic graphics composition using computer programs to include editing and manipulating graphic images, clip-art, and printing of pictures. May be repeated for a maximum of 6 credits under different subtitles listed in the Schedule of Classes.
Prerequisite: OECS 105, BCIS 1110, or OECS 101.

OECS 211. Word Processing Applications
1-3 Credits
Basic word processing to include composing, editing, formatting, and printing of documents. May be repeated under different subtitles listed in the Schedule of Classes for a maximum of 6 credits.
Prerequisites: BCIS 1110 or OECS 105.

OECS 215. Spreadsheet Applications
1-3 Credits
Use of spreadsheets to include graphics and business applications. May be repeated for a maximum of 6 credits.
Prerequisites: BCIS 1110 or OECS 105.

OECS 220. Database Application and Design
1-3 Credits
Creating, sorting, and searching of single and multifile databases to include report generation and programming database commands. May be repeated for a maximum of 6 credits under different subtitles listed in the Schedule of Classes. Restricted to: Community Colleges only.
Prerequisite(s): BCIS 1110 OR E T 120 OR E T 122 OR OECS 105.

OECS 221. Internship I
1-3 Credits
Work experience that directly relates to a student's major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships may be paid or unpaid. Students are supervised/evaluated by both the employer and the instructor. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OECS majors. Graded: S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.
Prerequisite(s): Consent of instructor.

OECS 222. Internship II
1-3 Credits
Continuation of OECS 221. Each credit requires specified number of hours of on-the-job work experience. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OECS majors. Graded: S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.
Prerequisite(s): OECS 221 and consent of instructor.

OECS 230. Data Communications and Networks I
1-3 Credits
Definition of data communication; survey of hardware applications and teleprocessor software; examination and design of networks. May be repeated for a maximum of 6 credits.
Prerequisite: OECS 185.

OECS 234. Linux Server
3-4 Credits (3-4)
This course addresses the implementation and support needs of IT professionals that are planning to deploy and support Linux Server(s). It provides in-depth, hands-on training for planning, implementation, management and support of Linux networking services. May be repeated up to 8 credits.

Prerequisite(s)/Corequisite(s): OECS 204. Restricted to: OECS majors. Restricted to Community Colleges campuses only.

OECS 235. Structured Query Language (SQL)
1-3 Credits
Installation, configuration, administration, and troubleshooting of SQL client/server database management system. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): OECS 220. Restricted to Community Colleges campuses only.

OECS 237. Windows Server
3-4 Credits (3-4)
This course addresses the implementation and support needs of IT professionals that are planning to deploy and support Microsoft Windows Server Active Directory Domain Services in medium to large businesses. It provides in-depth, hands-on training for Information Technology (IT) professionals responsible for the planning, implementation, management, and support of Windows Active Directory services. May be repeated up to 4 credits.
Prerequisite(s)/Corequisite(s): OECS 207. Restricted to Community Colleges campuses only.

OECS 253. Applied Data Analysis and Management
3 Credits (3)
Applied use of advanced spreadsheet tools for data analysis and database tools for data and information management. Connect emerging topics in business to tools used in analyzing data and making raw data useful for business decision making.
Prerequisite: BCIS 1110.
Learning Outcomes
1. Manage, integrate, and analyze data with data tools.
2. Generate and summarize data.
3. Use tools for business projections, comparisons, trends, and informed decisions.
4. Create advanced queries and enhance table design.
5. Use form tools and create custom forms.
6. Use automation tools for efficiency.
7. Secure and maintain data.
8. Plan, research, create, and revise spreadsheets and databases for a specific business application.
9. Discuss emerging topics in business related to data analysis and mangement.

OECS 255. Special Topics
1-4 Credits
Topics to be announced in the Schedule of Classes.

OECS 261. Introduction to Networks
3-4 Credits (3-4)
Introduction to networking principles including the practical and conceptual skills for understanding basic networking, planning and designing networks, implementing IP addressing schemes, examining the OSI and TCP/IP layers, and performing basic configurations for routers and switches. Aligns to the first course of the Cisco Networking Academy CCNA curriculum. Restricted to Community Colleges campuses only.

OECS 262. Essentials of Routing and Switching
3-4 Credits (3-4)
Examination of the architecture, components, and operations of routers and switches in a small network. Student will learn how to configure, verify and troubleshoot: routers and switches, static routing, default routing, VLANs, and ACLs. Aligns to the second course of the Cisco Networking Academy CCNA curriculum. May be repeated up to 4 credits.
Prerequisite(s)/Corequisite(s): OECS 261. Restricted to Community Colleges campuses only.

OECS 263. Network Fundamentals
3-4 Credits (3-4)
Fundamentals of networking architecture, components, and operations including practical and conceptual skills using routers and switches. Student will learn how to configure, verify and troubleshoot static routing, default routing, VLANs, and ACLs. This course aligns to the third course of the Cisco Networking Academy CCNA curriculum. May be repeated up to 4 credits.
Prerequisite(s)/Corequisite(s): OECS 262. Restricted to Community Colleges campuses only.

OECS 264. Network Routing Protocols
3-4 Credits (3-4)
Fundamentals of routing protocols for troubleshooting advanced network operations. Covers common networking issues such as RIP, OSPF, and EIGRP for IPv4 and IPv6 networks. This course aligns to the fourth course of the Cisco Networking Academy CCNA curriculum. May be repeated up to 4 credits.
Prerequisite(s)/Corequisite(s): OECS 263. Restricted to Community Colleges campuses only.

OECS 269. Network Security
3-4 Credits (3-4)
Fundamentals of design and implementation of network security solutions that will reduce the risk of system vulnerability. May be repeated up to 8 credits. Restricted to Community Colleges campuses only.
Prerequisite(s): OECS 204 or OECS 207 or OECS 261 or consent of instructor.

OECS 275. PC Maintenance and Repair II
1-3 Credits
Continuation of OECS 185. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.
Prerequisite(s): OECS 185.

OECS 290. Computer Technology Capstone
1-3 Credits
Refines skills learned in the OECS program. Culminates in a review and practice of advanced software applications. May be repeated up to 3 credits. Restricted to: OECS & OECT majors. Restricted to Community Colleges campuses only.
Prerequisite(s): (OECS 125, OECS 128, OECS 207, OR OECS 203) AND (OECS 185 OR E T 283).

OECS 299. Independent Study
1-3 Credits
Specific subjects to be determined based on need. Restricted to: Community Colleges only.

OETS-TECHNICAL STUDIES

OETS 100. Industrial/Construction Safety
2 Credits (2)
Covers safety issues such as PPE, BBP, ladder safety,, RTK, HazCom, MSDS and information about safety organizations such as OSHA, NIOSH, NFPA, National Safety Council. Community Colleges only. Restricted to Dona Ana and Carlsbad campuses.

OETS 102. Career Readiness Certification Preparation
1 Credit (1)
This course is designed to prepare students to successfully obtain Career Readiness Certifications in all areas and at the appropriate levels for their

program of study. Graded: S/U Grading (S/U, Audit). May be repeated up to 3 credits. S/U Grading (S/U, Audit).

OETS 103. Technical Career Skills
4 Credits (4)
This course will be project-based and will encompass writing, presentation, math, reading, and critical thinking skills applied in a technical environment. Restricted to: Community Colleges only.

OETS 104. Basic Mathematics for Technicians
4 Credits (4)
Fundamental mathematical concepts and computations including measurement, ratio and proportions, and pre-algebra as it relates to technical programs.
Prerequisite: appropriate placement test score.

OETS 117. Writing for Technicians
3 Credits (3)
Instruction in the skills for developing clear, written descriptions of processes and procedures used by technicians in various fields. Emphasis on correct grammar, logical organization, and receiving audience. Focuses on clarity, structure, and concise writing methods. Does not substitute for ENGL 111G. Restricted to: Community Colleges only.

OETS 118. Mathematics for Technicians
3 Credits (2+2P)
Analysis and problem solving of technical problems using measuring instruments and techniques of arithmetic, algebra, geometry, and trigonometry. Restricted to Community Colleges campuses only.
Prerequisite: Grade of "C-" or better in OETS 104 or CCDM 103 N, or appropriate placement test score.
Learning Outcomes
1. Use mathematics and problem solving techniques to analyze and find answers to money and financial problems.
2. Use estimations to solve problems and check answers to make sure they are reasonable.
3. Analyze and solve problems using the tools and techniques of algebra.
4. Use geometry to find circumference, perimeters, areas and volumes of various plane and solid materials and spaces.
5. Use trigonometry to solve problems involving triangular shapes.
6. Use systems of equations and quadratic equations to solve technical problems.

OETS 120. Business Fundamentals
3 Credits (3)
Instruction in the skills for basic business concepts used by technicians in various fields. Emphasis placed on basic business concepts; business ownership including marketing, management, accounting, and customer services; interpersonal communication; and basic computer concepts including word processing, spreadsheets, and presentation software. Restricted to Community Colleges campuses only.

OETS 255. Special Topics Technical Studies
1-6 Credits
Topics to be announced in the Schedule of Classes. Restricted to: Community Colleges only.
Prerequisite(s): Consent of instructor.

PHED-PHYSICAL EDUCATION

PHED 1110. Dance:
1 Credit (1)
Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1230. Individual Sport:
1 Credit (1)
Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1290. Team Sport:
1 Credit (1)
Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1310. Swim I:
1 Credit (1)
Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1320. Aqua Fit:
1 Credit (1)
Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1330. Lifeguarding
2 Credits (2)
Skills training for a nonsurf lifeguard. Course will include Standard First Aid and CPR certification. May be repeated up to 2 credits.
Learning Outcomes
1. To help the student become aware of the common hazards associated with various types of aquatic facilities and to develop the knowledge and skills to eliminate or minimize such hazards.
2. To help the student develop the skills necessary to recognize a person in distress or in a drowning situation and to effectively rescue that person.
3. To help the student understand their responsibility to their employer, fellow employees and especially to the patrons of their facility.
4. To provide explanations, demonstrations, practice and review of the rescue skills essential for lifeguarding.
5. To instill in the students an understanding and appreciation for the responsibilities, swimming skills and additional duties of lifeguarding.
6. To develop more advance swimming skills to assist in a water rescue.

PHED 1410. Yoga:
1 Credit (1)
Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

PHED 1430. Pilates:
1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1510. Training:
1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1620. Fitness:
1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1630. Career Fitness:
1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 10 credits.

Learning Outcomes

1. Varies

PHED 1670. Aerobics:
1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1830. Running:
1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 4 credits.

Learning Outcomes

1. Varies

PHED 1910. Outdoor Experience
1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 2120. Healthy Life Skills and Personal Wellness
3 Credits (3)

This course has been designed to provide students with the knowledge and skills necessary to cultivate a holistic approach to well-being by giving students effective strategies for achieving and maintaining a balanced and fulfilling life, including coping skills to navigate the challenges of college life. Through a combination of lectures, discussions, activities, and self-reflection, students will explore various dimensions of wellness and develop practical strategies to enhance their overall health and vitality.

Learning Outcomes

1. Explain the principles of wellness, emphasizing the significance of exercise, nutrition, and wellbeing for sustaining health throughout life.
2. Describe effective strategies and methodologies to enhance wellness.
3. Develop individualized goals pertaining to various facets of wellness to promote personal growth and fulfillment.
4. Evaluate personal wellness levels to establish baseline and monitor progress towards specific goals across diverse dimensions of well-being.
5. Participate in a self-tailored wellness regimen, integrating introspective assessments to monitor personal progress effectively.
6. Critically assess and refine wellness plans based on alterations in wellness evaluations and personal reflections, ensuring continuous alignment with evolving health and fitness aspirations.

PHED 2996. Special Topics
1-3 Credits (1-3)

Specific subjects to be announced in the Schedule of Classes. Each offering will carry appropriate subtitle. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHIL-PHILOSOPHY

PHIL 1115G. Introduction to Philosophy
3 Credits (3)

In this course, students will be introduced to some of the key questions of philosophy through the study of classical and contemporary thinkers. Some of the questions students might consider are: Do we have free will? What is knowledge? What is the mind? What are our moral obligations to others? Students will engage with and learn to critically assess various philosophical approaches to such questions.

Learning Outcomes

1. Comprehend and differentiate between various philosophical approaches to questions within fields such as metaphysics, epistemology, ethics, and aesthetics.
2. Critically evaluate various philosophical arguments and positions.

PHIL 1120G. Logic, Reasoning, & Critical Thinking
3 Credits (3)

The purpose of this course is to teach students how to analyze, critique, and construct arguments.The course includes an introductory survey of important logical concepts and tools needed for argument analysis. These concepts and tools will be use to examine select philosophical and scholarly texts.

Learning Outcomes

1. Comprehend components of arguments.
2. Acquire a general understanding of the essential logical concepts needed for argument analysis, such as validity, soundness, deduction, and induction.
3. Critically assess arguments with an aim toward identifying what constitutes effective and reasonable argument strategies.
4. Learn to identify common logical fallacies.
5. Apply knowledge of argumentation principles to philosophical and scholarly texts

PHIL 1140G. Philosophy and World Religions
3 Credits (3)

A philosophical enquiry into the religious life; an introduction to philosophical questions about religions focused on consideration of some of the traditional approaches to God and what it means to be religious. May be repeated up to 3 credits.

Learning Outcomes

1. Identify and describe philosophical theories regarding religion.
2. Develop and enhance your critical thinking skills, particularly in the evaluation of arguments about the truth or applicability of particular religious or secular viewpoints.
3. Analyze the teachings of world religions by describing their similarities and differences.
4. Explain the philosophical beliefs, practices, and ethical standards of the major world religions as well as emerging religious movements.
5. Explain how each religion evolved historically, philosophically, and spiritually as well as the contemporary ideas and practices each religion.

PHIL 1145G. Philosophy, Law, and Ethics
3 Credits (3)
An introduction to practical problems in moral, social, political, and legal philosophy. Topics to be discussed may include ecology, animal rights, pornography, hate speech on campus, same-sex marriage, justice, abortion, terrorism, treatment of illegal immigrants, and New Mexican Aboriginal Peoples' land claims.

Learning Outcomes

1. The aim of this course is to familiarize students with some of the ethical and philosophical issues that arise in connection with laws/legality in general and criminal and constitutional law in the U.S. in particular.
2. It examines issues in moral philosophy, political philosophy, and philosophy of law.
3. A question to which we repeatedly return is whether the law does and/or ought to have some necessary relation to the demands of justice and morality. Among the topics we'll cover are: What is a law? Natural law vs. positive law and legal positivism vs. natural law theory; Utilitarian, divine command, Kantian, and natural law theories of moral rightness/wrongness; The distinction between the normative and the non-normative; Is there a moral duty to obey the law? Plato's Crito and R.P. Wolff's "philosophical anarchism."; J.S. Mill and classical liberalism; Mill's "harm principle" ("the state should restrict the liberty of competent adults via the criminal law only to prevent them from wrongfully harming other persons"); Legal paternalism. Should the state make it harder for citizens to smoke tobacco and/or marijuana, for their own good?; Should voluntary euthanasia be legal? Is there a constitutional "right to die"?; How should judges determine the meaning of vaguely worded constitutional requirements (e.g. "free exercise of religion," no "unreasonable search and seizure," no "cruel and unusual punishment," etc.)? Originalist vs. nonoriginalist approaches; The First Amendment, free speech, and freedom of religion; The death penalty and "cruel and unusual punishment"; The insanity defense in criminal law; Does the 14th Amendment's requirement of "equal protection" under the law compel states to recognize same sex marriage?; The Fourth Amendment and its prohibition of "unreasonable search and seizure."

PHIL 2110G. Introduction to Ethics
3 Credits (3)
This course introduces students to the philosophical study of morality and will explore questions concerning our human obligations to others and related issues. Students may be asked to relate various approaches to ethics to present-day ethical debates and their own lives.

Learning Outcomes

1. Differential between various ethical theories, which may include virtue ethics, deontology, and consequentialism.
2. Critically evaluate various ethical theories and positions.

PHIL 2230G. Philosophical Thought
3 Credits (3)
In this course, students will grapple with some of the key questions of philosophy through the study of classical and contemporary thinkers. Students will become familiar with the perennial problems in subfields of philosophy such as metaphysics, epistemology, ethics, and aesthetics. They will learn to approach these problems both critically and sympathetically.

Learning Outcomes

1. Comprehend and differentiate between various philosophical approaches to questions within fields such as metaphysics, epistemology, ethics, and aesthetics.
2. Critically evaluate various philosophical arguments and positions.
3. Identify the differences that characterize the major subfields of philosophy.

PHIL 305. Philosophy and Literature
3 Credits (3)
Examination of philosophical ideas as presented in selected literary works and literary criticism.

PHIL 306. Philosophy Through Film
3 Credits (3)
An exploration of a range of philosophical issues through the use of film. Topics include personal identity and memory, faith and the problem of evil, free will and moral responsibility, and the meaning of life. Films may include The Prestige, Memento, The Third Man, A Clockwork Orange, Fight Club, and Synecdoche, New York.

PHIL 312. Formal Logic
3 Credits (3)
Introduction to symbolic logic and its application in the analysis of arguments in scientific and ordinary discourse.

PHIL 315. Philosophy of Language
3 Credits (3)
A critical examination of philosophical inquiries into the syntactic, semantic, and pragmatic dimensions of language.

PHIL 316. Philosophy of Mathematics
3 Credits (3)
Survey of traditional philosophical problems and views concerning the nature of mathematics including such questions as: What is the nature of mathematical knowledge? What is mathematical truth? What is a number? What is proof? What is the relationship between logic and mathematics?

PHIL 320. Social and Political Philosophy
3 Credits (3)
This course critically examines such fundamental concepts as liberty, equality and human rights.

PHIL 322. Environmental Ethics
3 Credits (3)
Explores the ethical and topical issues raised by mining and grazing, air and water pollution, factory farming, global warming, and treatment of animals. It also studies some recent ecological movements such as ecofeminism, social ecology, and deep ecology.

PHIL 328. Applied Ethics
3 Credits (3)

Examines the implications of utilitarianism, Kantian ethics, natural law theory, and other moral theories for controversial moral issues such as the death penalty, euthanasia, abortion, genetic engineering, gay marriage, affirmative action, and pornography.

PHIL 331. Philosophy of Religion
3 Credits (3)
The nature, fundamental concepts, and problems of religion. Emphasis on the significance of religion for creative and practical value.

PHIL 332. Ethics and Global Poverty
3 Credits (3)
Philosophical scrutiny of and moral reflection on various aspects of global poverty and foreign aid. For example: Is poverty fundamentally a lack of income, or can it be understood as a failure to meet basic needs, or as a lack of valuable freedom? Do human rights exist? What, if any, are the moral obligations of rich countries to poor countries? Can foreign aid be immoral? How should the answers to these questions influence public policy? Restricted to: Main campus only.

PHIL 341. Ancient Philosophy
3 Credits (3)
Introduction to the philosophies of the pre-Socratics, Socrates, Plato, Aristotle, with brief discussion of the Epicureans and Stoics.

PHIL 344. Modern Philosophy
3 Credits (3)
Foundations of contemporary thought: introduction to the philosophies of Descartes, Bacon, Spinoza, Leibniz, Locke, Berkeley, Hume, Kant, and Hegel.

PHIL 346. Philosophy of Mind
3 Credits (3)
Examination of some of the most influential accounts of the mind, focusing on such issues as the relation between the mind and the body, mental causation and consciousness.

PHIL 350. Epistemology
3 Credits (3)
Introduction to epistemology. The philosophical critique of alleged ways of knowing. An examination of the nature of truth.

PHIL 351. Philosophy of Science
3 Credits (3)
Philosophical examination of the methodology of science. The logical, metaphysical, epistemological, and ethical critique of science and its impact on human affairs.

PHIL 361. Special Topics
3 Credits (3)
Specific subjects announced in the Schedule of Classes. May be repeated for a maximum of 9 credits.

PHIL 363. Independent Studies
1-3 Credits
For students with some background in philosophy. Independent work in a specific area. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

PHIL 373. Ethical Theory
3 Credits (3)
The critical examination of the justification of ethical theories with particular attention to the language of moral discourse.

PHIL 376. Philosophy of Law
3 Credits (3)
Ethical, logical, and epistemological implications of law, together with an analysis of the rhetoric of legal practice.

PHIL 380. Metaphysics
3 Credits (3)
Introduction to metaphysics: a treatment of such issues as the meaning of existence, the mind-body problem, the problem of universals, and free will versus determinism.

PHIL 385. Human Nature and the Good Life
3 Credits (3)
An examination of some of the most historically and philosophically influential conceptions of human nature and corresponding accounts of the good life.

PHIL 397. Existentialism
3 Credits (3)
The origins of existentialist thought in philosophy and literature, including the thought of Nietzsche, Kierkegaard, Dostoyevsky, Camus, and Sartre. The course covers topics in ethics and political philosophy, metaphysics, philosophical psychology, philosophy of religion, and other sub-disciplines of philosophy.

PHIL 435. Internship in Philosophy and Law
3 Credits (3)
Supervised hands-on experience for Justice, Political Philosophy, and Law majors to gain professional expertise of the law working with lawyers or judges in law offices, court rooms, and other professional legal settings. Student must be in junior and above standing to enroll. May be repeated up to 6 credits.
Prerequisite: Completion of 12 Philosophy credits; 2.5 GPA;.
Learning Outcomes
1. Demonstrate practical knowledge, analytical ability and critical thinking of professional legal work by becoming familiar with such legal tasks as: preparing pleadings; preparing discovery, responding to discovery; controlling and organizing documents, information; preparing trial notebooks; preparing motions; contacting and responding to clients, witnesses, courts.

PHIL 448. Writing Philosophy
3 Credits (3)
A workshop on writing philosophy papers. Includes how to read and understand philosophical writing, organize a paper effectively, present a clear and forceful argument, and avoid common mistakes.
Prerequisite(s): completed 18 hours of philosophy credit.

PHIL 451. AI, Ethics, and Society
3 Credits (3)
This course explores the ethical dimensions of current and emerging applications of artificial intelligence. Students will engage with key philosophical questions, including the definition of AI and the moral status of advanced AI agents. The course examines pressing societal issues, such as labor automation and technological unemployment, ownership and distributive justice in AI development, the influence of AI on media disinformation, and concerns surrounding plagiarism. Future-oriented topics will address the possibility of AI exceeding human cognitive abilities and the implications of the Technological Singularity hypothesis. Through critical readings, discussion, and analytical writing, students will develop a robust framework for evaluating the ethical challenges posed by AI technologies.
Learning Outcomes
1. Engage philosophical theories and methods to critically analyze AI-related issues.
2. Evaluate competing moral and political arguments about the development and use of AI.
3. Formulate arguments in valid form about responsibility, fairness, and power in algorithmic systems.

4. Critically interpret contemporary academic literature on ethics and technology.
5. Produce philosophical essays that integrate normative theory and applied analysis.

PHIL 463. Independent Studies
1-3 Credits
For students with a strong background in philosophy. Independent work in a specific area. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

PHIL 532. Advance Studies in Ethics and Global Poverty
3 Credits (3)
Advanced philosophical scrutiny of and moral reflection on various aspects of global poverty and foreign aid. For example: Is poverty fundamentally a lack of income, or can it be understood as a failure to meet basic needs, or as a lack of valuable freedom? Do human rights exist? What, if any, are the moral obligations of rich countries to poor countries? Can foreign aid be immoral? How should the answers to these questions influence public policy? Restricted to: Main campus only.

PHLS-PUBLIC HEALTH SCIENCES

PHLS 1110G. Personal Health & Wellness
3 Credits (3)
A holistic and multi-disciplinary approach towards promoting positive lifestyles. Special emphasis is placed on major problems that have greatest significance to personal and community health. Topics to include nutrition, stress management, fitness, aging, sexuality, drug education, and others.
Learning Outcomes
1. Students will identify, describe and explain human health behaviors and how they are influenced by social structures, institutions, and processes within the contexts of complex and diverse communities. Students should: Develop an understanding of self and the world by examining content and processes used by social and behavioral sciences to discover, describe, explain, and predict human behaviors and social systems.
2. Students will articulate how beliefs, assumptions, and values are influenced by factors such as politics, geography, economics, culture, biology, history, and social institutions. Students should: Enhance knowledge of social and cultural institutions and the values of their society and other societies and cultures in the world.
3. Students will describe ongoing reciprocal interactions among self, society, and the environment. Students should: Understand the interdependent nature of the individual, family/social group, and society in shaping human behavior and determining quality of life.
4. Students will apply the knowledge base of the social and behavioral sciences to identify, describe, explain, and critically evaluate relevant issues, ethical dilemmas, and arguments. Students should: Articulate their role in a global context and develop an awareness and appreciation for diverse value systems in order to understand how to be good citizens who can critically examine and work toward quality of life within a framework of understanding and justice.

PHLS 1110H. Personal Health and Wellness Honors
3 Credits (3)
A holistic and multi-disciplinary approach towards promoting positive lifestyles. Special emphasis is placed on major problems that have greatest significance to personal and community health. Topics to include nutrition, stress management, fitness, aging, sexuality, drug education, and others. In addition students will complete an experiential learning component or project.
Learning Outcomes
1. Students will identify, describe and explain human health behaviors and how they are influenced by social structures, institutions, and processes within the contexts of complex and diverse communities. Students should: Develop an understanding of self and the world by examining content and processes used by social and behavioral sciences to discover, describe, explain, and predict human behaviors and social systems.
2. Students will articulate how beliefs, assumptions, and values are influenced by factors such as politics, geography, economics, culture, biology, history, and social institutions. Students should: Enhance knowledge of social and cultural institutions and the values of their society and other societies and cultures in the world.
3. Students will describe ongoing reciprocal interactions among self, society, and the environment. Students should: Understand the interdependent nature of the individual, family/social group, and society in shaping human behavior and determining quality of life.
4. Students will apply the knowledge base of the social and behavioral sciences to identify, describe, explain, and critically evaluate relevant issues, ethical dilemmas, and arguments. Students should: Articulate their role in a global context and develop an awareness and appreciation for diverse value systems in order to understand how to be good citizens who can critically examine and work toward quality of life within a framework of understanding and justice.

PHLS 2110. Foundations of Health Education
3 Credits (3)
Role and responsibility of the health educator with emphasis on small group dynamics, oral and written communication skills, building community coalitions and introduction to grant writing. Taught with PHLS 3210. Cannot receive credit for both PHLS 2110 and PHLS 3210.
Prerequisite: PHLS 1110G or consent of instructor.
Learning Outcomes
1. Define health, three levels of prevention, health education and health promotion, and describe the major determinants of health.
2. Describe the 7 major areas of responsibility, major competencies and sub-competencies of a professional health educator and the CHES's possible roles in various community health settings.
3. Describe and examine the historical context and development of the profession of health education.
4. Identify and critique major processes and practices of health education programming.
5. Describe the steps involved in conducting needs assessments, program and intervention planning, implementation, and program evaluation.
6. Identify, examine and describe elected health behavior change theories and models and explore possible applications in health education practice.
7. Describe and discuss the process of community mobilization and building of a community coalition.
8. Identify health issues and describe effective methods/strategies in health education advocacy.
9. Describe and discuss the future trends and issues in the professional preparation and practice of professional health educators. 1
10. Demonstrate effective and appropriate oral and written communication skills for health education professionals.

PHLS 2120. Essentials of Public Health
3 Credits (3)
The course will focus on principles and major areas if public health, including ecological and total personal concept of health care system, epidemiological approaches to disease prevention and control . Consent of Instructor required.
Learning Outcomes
1. Understand the sources of public health data, and how to interpret that information.
2. Access existing health related data.
3. Analyze health related data.
4. Identify populations for health education programs.
5. Incorporate data analysis and principles of community organization.
6. Interpret results from evaluation and research.
7. Infer implications from findings for future health–related activities.
8. Have a basic understanding of health topics faced by various populations.

PHLS 3110V. Human Sexuality
3 Credits (3)
Examination of human sexuality from a variety of perspectives: cultural, sociological, physiological and psychological. Issues examined from viewpoints such as gender, individual, family, and professional roles.
Learning Outcomes
1. Understand the cultural and historical inputs resulting in our current understanding of the human sexual experience.
2. Examine the early and modern researcher in the field of human sexuality, along with an overview of basic research skills.
3. Study gender roles and similarities and differences between men and women.
4. Examine male and female reproductive anatomy and the physiology of sexual arousal.
5. Identify the factors affecting love and attraction, and the development of relationships.
6. Discuss homophobia and the factors associated with negative attitudes toward homosexuality.
7. Identify and discuss current techniques of contraception along with fertility problems.
8. Discuss the sexual behavior of adults.
9. Examine the medical, relational, and stress factors related to sexual dysfunction. 1
10. Learn the facts and fallacies about sexually transmitted diseases. 1
11. Identify the continuum of behaviors related to paraphililias. 1
12. Examine sexual coercion and violence.

PHLS 3120V. Women's Health Issues
3 Credits (3)
A focus on the unique issues and problems that confront women today and how they affect the health of women. Crosslisted with: GNDR 381V. May be repeated up to 3 credits.

PHLS 3130V. Global Environmental Health Issues
3 Credits (3)
Introduction to global environmental health challenges in the 21st century with an emphasis on environmental problems as they affect public health and personal well-being.
Learning Outcomes
1. Discuss the major environmental health issues facing our global environment in the 21st century.
2. Discuss the status of our global environmental health.
3. Articulate basic concepts of environmental health and convey and understanding of their value and importance.
4. Discuss, define, and develop insight into the following terms and concepts as they relate to global environmental health: population dynamics, population control, the people-food predicament, impacts of growth on ecosystems, environmental disease, toxic substances, pests, pesticides, food quality, radiation, solid waste, and hazardous waste.
5. Specify common environmental hazards that pose risks to human health and safety.
6. Discuss global human population numbers and the impact on our global environmental health.
7. Describe federal and state regulatory programs, guidelines, and authorities that control environmental health issues.
8. Identify sources of reference research relevant to global environmental health.
9. Identify individual and human behaviors that foster or hinder the well-being of our global environmental health.

PHLS 3210. Foundations of Community Health Education
3 Credits (3)
This course introduces students to principles and practices of community health information, perspectives, and competencies necessary to promote health in various settings (e.g., community, school, workplace, and health care). The course explores concepts related to health and health education, including determinants of health, health equity, and various physical, mental, and environmental health conditions. The historical origins of the profession, the roles and responsibilities of community health educators, and the Certified Health Education Specialist competencies are examined. Equivalent to PHLS 2110 for prerequisite purposes.
Learning Outcomes
1. Define health, three levels of prevention, health education and health promotion, and describe the major determinants of health.
2. Describe the seven major areas of responsibility, major competencies and sub-competencies of a professional health educator and the CHES's possible roles in various community health settings.
3. Describe and examine the historical context and development of the profession of health education.
4. Identify and critique major processes and practices of health education programming.
5. Describe the steps involved in conducting needs assessment, program and intervention planning, implementation, and program evaluation.
6. Identify, examine and describe elected health behavior change theories and models and explore possible applications in health education practice.
7. Identify and describe governmental agency roles, and the ethical and economic dimensions of health education and promotion.
8. Identify health issues and describe effective methods/strategies in health education advocacy.
9. Describe and discuss the future trends and issues in the professional preparation and practice of professional health educators. 1
10. Demonstrate effective and appropriate oral and written communication skills for health education professionals.

PHLS 3220. Foundations of Public Health
3 Credits (3)

The course will focus on principles and major areas of public health, including ecological concepts of healthcare systems and epidemiological approaches to disease promotion and control. Equivalent to PHLS 2120 for prerequisites.

Learning Outcomes

1. Describe public health, including key terms, functions, and services.
2. Compare the differences between personal health and public health.
3. Describe analytical methods of public health, including basic principles of epidemiology and identify sources of statistics and data in public health.
4. Describe determinants of health from a global perspective, including environmental, social, cultural, behavioral, and biological factors.
5. Discuss concepts for prevention, detection, and control of infectious and chronic conditions.
6. Discuss the organization, financing, and delivery of medical and population-based US services with roles of quality, cost, access, and organizational structure in influencing population health.
7. Explain the most important health problems and issues facing our society.

PHLS 4130. Environmental Health
3 Credits (3)

Introduction to environmental health designed to address public health issues. Restricted to: PH,PHL majors.

Learning Outcomes

1. Define the major sources and types of environmental agents.
2. Discuss the transport and fate of these agents in the environment.
3. Identify the carriers or vectors that promote the transfer of these agents from the environment to the human.
4. Describe how these agents interact with biological systems and the mechanisms by which they exert adverse health effects.
5. Analyze public health problems using environmental health knowledge.
6. Evaluate and identify environmental health-related issues.

PHLS 4210. Methods of Community Health Education
3 Credits (3)

Responsibilities of health educators, analysis of social forces affecting health needs, application of wide range of health education methods and instructional media, and program implementation skills. Restricted to: Public Health majors.

Prerequisite: PHLS 3220 or PHLS 2120.

Learning Outcomes

1. Integrate two health education theories or models into community health education practice.
2. Identify two steps for conducting a training needs assessment.
3. Analyze training with different delivery methods.
4. Compare advocacy approaches for health issues.
5. Demonstrate methods for the preparation of materials to reach different audiences.

PHLS 4310. Biometrics and Health Research
3 Credits (3)

Critical analysis of community health research and related methodologies. Restricted to: Public Health majors.

Prerequisite: (MATH 1350G) or MATH 2350G or A ST 311.

Learning Outcomes

1. Compare and contrast a population versus a sample.
2. Explore data using appropriate graphs, charts, and tables.
3. Analyze data using descriptive statistics.
4. Formulate and test statistical hypotheses about population means and proportions.
5. Perform an ANOVA to compare multiple population means.
6. Compute and interpret the correlation between two continuous variables.
7. Distinguish between parametric and non-parametric methods.
8. Explain when to use non-parametric methods and why.

PHLS 4320. Epidemiology
3 Credits (3)

Epidemiologic approaches to disease prevention and control. Factors influencing health status. Restricted to: PHL majors.

Prerequisite: PHLS 3220 or PHLS 2120.

Learning Outcomes

1. Define key epidemiological terms and concepts, such as incidence, prevalence, morbidity, and mortality, and apply these concepts to analyze patterns and trends in disease occurrence and distribution.
2. Design and conduct basic epidemiological studies, including cohort, case-control, and cross-sectional studies, and interpret the results to assess associations between exposures and health outcomes.
3. Demonstrate proficiency in using statistical methods to analyze epidemiological data, including calculating measures of association (relative risk, odds ratio) and understanding their implications for public health research.
4. Critically evaluate epidemiological research articles, identify potential biases and limitations, and discuss the implications for public health practice and policy.

PHLS 4410. Administration of Health Programs
3 Credits (3)

Covers administrative responsibilities, organizational theory, strategic planning, and systems theory as applied to the administration of a variety of health programs. Restricted to: PHL majors.

Prerequisite: PHLS 3220, PHLS 2120, or consent of instructor.

Learning Outcomes

1. Compare types of public health leadership, motivation, and management skills needed for today's work environment.
2. Identify operational responsibilities, including processes for hiring, budgets, motivation, and performance management.
3. Discuss various systems thinking tools for strategic planning.
4. Develop systems planning strategies for a health program promoting collaborative efforts.
5. Compare the characteristics of the United States of America health system and health systems in other countries.

PHLS 4420. Health Program Planning
3 Credits (3)

Planning and development of community health education interventions for behavior change at the individual, family, social network levels of practice. Emphasis on applying program-planning models and designs into a grant-writing project. Restricted to: Public Health majors.

Prerequisite: PHLS 3210 or PHLS 2120 and PHLS 4430.

Learning Outcomes

1. Describe the foundational principles and history of health promotion and education, including the roles of planning in public health program development.
2. Conduct (and use data from) a comprehensive needs assessment to identify and plan to address health problems, risk factors, and priorities within a target population.

3. Apply health behavior theories and models, as well as a logic model or conceptual framework, to guide the planning process and design intervention strategies across individual, interpersonal, organizational, and community levels.
4. Discuss the roles of cultural competency and inclusivity in health programs, considering health literacy, social determinants, and community engagement.
5. Identify key stakeholders and build coalitions to support program planning, resource acquisition, and long-term sustainability.
6. Draft a written health program plan proposal integrating all components of the planning process, including budget and resource plans, timeline and implementation plans, staffing, and logistical considerations.

PHLS 4430. Theoretically-Based Interventions
3 Credits (3)
Identifying and developing interventions to problematic health-related behaviors. Restricted to: Public Health majors.
Prerequisite: PHLS 3220 or PHLS 2120.
Learning Outcomes
1. Describe the foremost behavioral theories.
2. Identify the main concepts contained in each of the foremost behavioral theories.
3. Design health promotion programs based on behavioral theory.
4. Identify the use of behavioral theories in product marketing, social marketing, and public service announcements.
5. Identify the necessary links among theory, research, and health promotion practice.

PHLS 4440. Health Program Evaluation and Research
3 Credits (3)
Covers the application of research and evaluation models for decision-making program and policy development of community health education interventions. Focus on the individual, family, and social network levels of practice.
Prerequisite: PHLS 4420.
Learning Outcomes
1. Discuss the concepts, language, methods, and applications of evaluation research.
2. Demonstrate the ability to search, review, and critically appraise evaluation research.
3. Develop a logic model for an intervention to guide evaluation.
4. Formulate clear and answerable research questions for evaluation.
5. Identify, modify, and/or develop appropriate measures of outcomes that are valid, reliable, and feasible.
6. Discuss ethical issues and potential bias in evaluation.
7. Describe how program evaluation results can be used to influence or impact policy.

PHLS 4510. Public Health Seminar in Community Health Education
1 Credit (1)
Critical analysis of issues in CHE and health care. Readings focus on social, economic, cultural, and political issues as they affect the profession and practice. Emphasis on future, local, national, and international health trends. Restricted to: Public Health majors. May be repeated up to 1 credit.
Prerequisite: PHLS 4320, PHLS 4420, and PHLS 4430 or consent of instructor.

PHLS 4515. Approaches to Community-Focused Public Health
3 Credits (3)
Introductory issues-focused course offering reading, writing, and active learning opportunities (including volunteering). Designed to challenge students toward innovative directions in community-focused public health. Select theories and professional practice areas will be emphasized, and students will practice public-friendly strategies relevant for our complex field.
Learning Outcomes
1. Articulate why, and how, a community problem of concern to them should be viewed as a public health issue (including applying a public health theory or model).
2. Discuss at least one way community-focused public health professionals approach identifying and working on public health issues.
3. Identify credible resources, including peer-reviewed sources as well as governmental and organizational reports and websites, and accurately and effectively use and share information from them with a variety of audiences.

PHLS 4610. Health Disparities: Determinants and Interventions
3 Credits (3)
Investigates: descriptions of health disparities and measurement issues; physical environmental factors, behavioral and emotional variables; impact of aging of the populations, increased racial and ethnic diversity, and technological developments; intervention strategies and evaluation results.
Learning Outcomes
1. Examine the impact of structural racism on health in the United States of America.
2. Identify populations who have systematically experienced greater obstacles to health based on their race or ethnicity, religion, socioeconomic status, gender, age, mental health, cognitive, sensory, or physical disability, sexual orientation or gender identity, geographic location, or other characteristics historically linked to discrimination or exclusion in the United States of America.
3. Identify social and structural determinants of health that influence health and health equity.
4. Examine the role that public health professionals can play in advancing health equity.
5. Examine social and structural barriers to health care access and utilization.
6. Explain cultural competence, cultural humility, cultural safety, and structural competence.
7. Discuss research and program designs in health equity research and practice.
8. Examine the role of social determinants of health in achieving health equity.
9. Advocate for policies that advance health equity.

PHLS 4620V. Cross-Cultural Aspects of Health
3 Credits (3)
An examination of health practices from a variety of cultural perspectives: communication, observation, research, and assimilation. Issues to be addressed will be examined from a number of viewpoints, such as individual, family, community, and professional roles. May be repeated up to 3 credits.

PHLS 4630. International Health Problems
3 Credits (3)

Comparison of domestic health programs and problems with those in other parts of the world; emphasis on political parameters and delivery processes. Additional attention is focused on the health issues of the U.S.-Mexico border. Taught with PHLS 5630.

Learning Outcomes

1. Identify many of the current authoritative sources of information about global health, as a potential aid for future educational, training, and research endeavors.
2. Cite examples of specific issues and case studies in global health.
3. Identify key features of global health.
4. Explain the complexities of global health issues.
5. Explain intervention strategies being used to attack problems in global health.

PHLS 4640. Rural Health Issues
3 Credits (3)

Comprehensive overview of rural health services with Southwestern United States and New Mexico focus. Taught with PHLS 5640.

Learning Outcomes

1. Compare and contrast the major perspectives on rural health.
2. Analyze the social, biological, psychological, and societal factors affecting the health of rural residents.
3. Critically analyze contemporary controversies, such as environmental contamination.
4. Evaluate current empirical research in understanding rural health challenges and resources.

PHLS 4650. Coping with Loss and Grief: A Cross-Cultural Perspective
3 Credits (3)

A cross-cultural perspective to death, loss and grief. Hospice philosophy of caring for the dying will be included. Taught with PHLS 5650.

Learning Outcomes

1. Compare and contrast the major theories in thanatology.
2. Analyze the biological, psychological, social, and societal factors affecting the dying process and attitudes towards death and dying.
3. Critically analyze contemporary controversies, for example, physician-assisted suicide.
4. Evaluate current empirical research in thanatology.

PHLS 4660. U.S.-Mexico Border Health Issues
3 Credits (3)

Interdisciplinary analysis of the impact of living conditions and health issues of communities along the U.S.-Mexico border and of the strategies and initiatives to address these issues. Problem-based learning, case analysis, lecture, guest speakers, computer based instruction, and field trips. Taught with PHLS 5660.

Learning Outcomes

1. Analyze the social, economic, cultural, and environmental determinants of health affecting communities along the U.S.–Mexico border using an interdisciplinary framework.
2. Evaluate public health strategies, binational policies, and community-based initiatives aimed at addressing health disparities and improving living conditions in border regions.
3. Develop evidence-informed recommendations for collaborative interventions that incorporate diverse stakeholder perspectives and respect cultural and contextual factors unique to the U.S.–Mexico border.

PHLS 4670. American Indian Health
3 Credits (3)

Critical health issues facing American Indians in the contemporary world.

Learning Outcomes

1. Compare and contrast the major perspectives on Native American health.
2. Analyze the social, biological, psychological, and societal factors affecting the health of Indigenous populations.
3. Critically analyze contemporary controversies, e.g., governmental oversight of sovereign nations.
4. Evaluate current empirical research in understanding Native American health status.

PHLS 4680. Hispanic Health Issues
3 Credits (3)

The course will familiarize public health students with social determinants of health contributing to Hispanic health disparities and the impact that health and immigration policies have on Hispanics' access to insurance and healthcare utilization, with a spotlight on different Hispanic subgroups. Recommendations for policy and research are also discussed.

Learning Outcomes

1. Explain the historical, ancestral, and national origins contributing to the diversity of the U.S. Hispanic population.
2. Assess obstacles researchers have encountered in explaining the Hispanic Epidemiological Paradox and the ethics surrounding them.
3. Compare and contrast health care coverage and access to health care in Hispanics relative to other racial/ethnic groups.
4. Describe factors contributing to health disparities in chronic and infectious diseases among Hispanics.
5. Explain how U.S. health policies negatively impact Hispanics.

PHLS 4710. Introduction to Gerontology
3 Credits (3)

Social, psychological, and physiological aspects of aging, with an interdisciplinary emphasis on health promotion. Demographic characteristics of the aging population. Taught with PHLS 5710. May be repeated up to 3 credits.

PHLS 4720. Health Promotion for the Older Adult
3 Credits (3)

Common health concerns and lifestyle issues relevant to older adults. Facts about the content area, health behaviors, and practices to promote health and prevent disease; program development strategies applicable to a variety of settings. Taught with PHLS 5720. May be repeated up to 3 credits.

PHLS 4730. Adulthood and Aging
3 Credits (3)

Normal transitions in later life; those occurring from 40 years of age to the end of life are discussed. Changes in interpersonal relationships and adaptations commonly made by individuals and meeting those alterations are presented through research findings, case studies, and autobibliographies. Taught with PHLS 5730. May be repeated up to 3 credits.

PHLS 4740. Aging and Public Policy
3 Credits (3)

Exploration of public policies relating to elders, historical development, current status and trends in public policy for this age group. Impact of political behavior of elders on policy making and implementing processes. May be repeated up to 3 credits.

PHLS 4810. Infectious and Noninfectious Disease Prevention
3 Credits (3)

History, etiology, and prevention of diseases affecting humans. Taught with PHLS 5810.
Prerequisite: PHLS 3220, PHLS 2120, PHLS 4320, or consent of instructor.
Learning Outcomes
1. Describe historical context of disease and health.
2. Identify the role of public health, past and present, in the control of communicable and chronic disease.
3. Identify and evaluate the characteristics of major chronic and communicable diseases.
4. Define, classify, and describe the etiology, incidence, and prevalence of major diseases.
5. Describe risk factors related to gender, race, ethnicity, and lifestyle for major diseases.
6. Identify the major diagnostic and treatment protocols for common diseases of humans.
7. Assess psychosocial influences upon diseases including diet, physical activity, rest, and related lifestyle variables.
8. Determine the impact of major diseases on the quality of life for the patient family.

PHLS 4820. Health Informatics
3 Credits (3)
The application of technology to engage communities and individuals in behavioral and environmental change processes. The course will focus on the use of technology to describe the magnitude of health problems and their sources; analyze risk factors; identify community strengths from which strategies may be defined and tools created to intervene, prevent problems, and promote health and well-being; and continuously evaluate, refine, and implement what works. Taught with PHLS 5820. Restricted to: Restricted to Public Health majors.
Prerequisite: PHLS 3220 or PHLS 2120 or consent of instructor.
Learning Outcomes
1. Identify and list the concepts of informatics and its domains.
2. Explain how major theories and models apply to the adoption and use of health information systems.
3. Use project management tools to plan and monitor progress on an informatics project.
4. Describe basic ethical, legal, and policy-related issues in informatics.
5. Develop approaches to communicate and advocate for the use of technologies to address public health issues.

PHLS 4996. Special Topics
3 Credits (3)
Specific subjects to be announced in the Schedule of Classes. May be repeated up to 12 credits.
Learning Outcomes
1. Varies

PHLS 4997. Independent Study
1-6 Credits (1-6)
Individual studies with prior approval of department head. May be repeated up to 12 credits.
Learning Outcomes
1. Varies

PHLS 4998. Applied Practice Experience
1-6 Credits (1-6)
Senior-standing BPH majors will integrate and apply various concepts related to actual public health practice. Experience aims to prepare students to integrate CEPH foundational competencies and responsibilities of community health education specialists. Approximately 42 hours at a field agency are required per credit hour. Restricted to: BPH majors. May be repeated up to 6 credits.
Prerequisite: PHLS 4210 or concurrent enrollment.
Learning Outcomes
1. Varies.

PHLS 5110. Community and Psychosocial Aspects of Public Health
3 Credits (3)
This course examines the major social and behavioral theories that seek to explain and predict human behaviors. Such theories not only serve to explain health behavior but also serve as guidelines for the development of health promotion and public health programs and interventions and their evaluation. The social determinants of health and health disparities, theoretical models of health behavior change, and intervention/behavior change strategies and tools are explored.
Learning Outcomes
1. Discuss behavioral, social and cultural factors associated with health and illness.
2. Describe major behavioral theories and models.
3. Identify the main concepts/constructs/components of each of the major behavioral theories and models.
4. Design or adapt a public health program applying one of the major behavioral theories/models.
5. Discuss the necessary links of theory public health practice and research.

PHLS 5120. Biostatistical Applications in Public Health
3 Credits (3)
Quantitative methods for public health students including tabular, graphical, and numerical descriptive methods, random sampling, principles of statistical inference, confidence intervals, statistical tests of hypothesis through analysis of variance and regression. Restricted to MPH majors.
Learning Outcomes
1. Prepare data for analysis.
2. Analyze data using descriptive statistical methods.
3. Analyze data using inferential statistical methods (t-tests, ANOVA, regression).
4. Formulate and test statistical hypotheses about population means and proportions.
5. Explain how findings relate to hypotheses or research questions based on statistical results.
6. Use statistical results to draw conclusions.

PHLS 5130. Epidemiological Approaches to Disease Control and Prevention
3 Credits (3)
Basic epidemiological principles applicable to infectious and noninfectious disease. Descriptive techniques and analytic designs, and application of statistical and epidemiological investigation methods included. Restricted to MPH majors.
Learning Outcomes
1. Define basic epidemiologic (EPI) terms used in the measurement of health and disease.
2. Summarize the modes of disease transmission.
3. Calculate and restate basic measures of disease frequency, association, and potential impact.
4. Distinguish between the major sources of epi data.

5. Describe patterns of disease and disease determinants by person, place, and time.
6. Compare the basic PH research designs, their strengths and limitations, including potential sources of bias, and inferences that can be drawn from each.
7. Restate disease causation concepts and the meaning of statistical significance in practice.
8. Explain epi principles of screening for disease and risk factors.
9. Describe basic ethical and legal principles involved in the study of human subjects.

PHLS 5140. Health Services System: Administration and Organization
3 Credits (3)
This course focuses on using a systems approach to identify and analyze factors and interrelationships that influence the operation of health services organizations. Specific attention is to administrative structures and operations, finance and quality among public health departments, hospitals, multi-institutional systems, integrated health systems and strategic alliances.
Learning Outcomes
1. Identify the main components of the organization for health care delivery and health care system in the U.S.
2. Compare health care systems in the U.S. and other developed countries.
3. Discuss resources and the principles of resources management in health care delivery.
4. Apply essential management functions (planning, organizing, staffing, leading, and controlling) to health services organizations.
5. Apply leadership and motivation concepts to the management of health services organizations.
6. Apply the principles and models of decision-making, communication, and managing change to address organizational challenges.
7. Demonstrate the knowledge and skills inherent in interprofessional work
8. Discuss how systems thinking works for healthcare delivery systems.

PHLS 5150. Environmental Public Health Issues
3 Credits (3)
This graduate-level course is primarily designed for Master of Public Health (MPH) students. It aims to provide a comprehensive overview of key areas within environmental health as a public health discipline. The course is intended to enhance your understanding of how environmental issues impact your role as a public health practitioner. Restricted to MPH majors.
Learning Outcomes
1. Define and discuss the history of environmental health.
2. Gain a basic knowledge of science that is fundamental to understanding environmental health issues.
3. Discuss the association between population growth and dissemination of environmental pollutants.
4. Describe methods used in toxicology to assess environmental exposures and hazards.
5. Identify chemical, physical, and microbial agents that originate in the environment and can impact human health.
6. Identify challenges and propose potential ways to deal with them in environmental health practices, with particular attention to issues of environmental justice and equity.

PHLS 5160. Public Health Policy Analysis
3 Credits (3)
This graduate-level course presents the key aspects of the policymaking process in the United States. The course introduces students to the steps necessary to formulate, implement, and modify healthcare policies. Economic, cultural, institutional, and social factors influencing policymaking will be explored. The evolution of federal health policy, including major healthcare reform efforts, will be presented. Students will be provided with the necessary tools to comprehend and explain policymaking. The class will primarily focus on federal-level health policymaking, but several examples of state-level policies will be discussed.
Learning Outcomes
1. Define and describe key health policy concepts: health, health determinants, public policy, and health policy.
2. Appreciate the significance of the Patient Protection and Affordable Care Act (ACA) and other major healthcare reform efforts and laws.
3. Describe the Longest Conceptual Model of the Public Policymaking Process and its key components of policy formulation, implementation, and modification.
4. Articulate the roles played by legislators, interest groups, researchers, and citizens in shaping and influencing health policy.
5. Summarize the roles of the three levels of government in making health policy.
6. Identify major health policy issues currently facing U.S. healthcare.

PHLS 5170. Qualitative Methods in Public Health
3 Credits (3)
This course introduces students to the principles and practices of qualitative research in public health. It emphasizes the value of qualitative inquiry for understanding complex health behaviors, cultural contexts, and social determinants of health. The course covers key methodologies including interviews, focus groups, ethnography, and content analysis. Students will develop skills in qualitative research design, data collection, coding, thematic analysis, and ethical considerations. Students will learn to apply qualitative methods to address public health challenges and to complement quantitative approaches in mixed-methods research.
Learning Outcomes
1. Design qualitative research studies to explore public health issues, including the development of research questions, selection of appropriate methods, and ethical considerations.
2. Conduct qualitative data collection using techniques such as in-depth interviews, focus groups, and participant observation, adhering to principles of cultural competence and research ethics.
3. Analyze qualitative data through coding and thematic analysis, utilizing software tools where appropriate, to identify patterns and derive meaningful insights. Critically evaluate qualitative research for methodological rigor, credibility, and relevance to public health practice and policy.
4. Critically evaluate qualitative research for methodological rigor, credibility, and relevance to public health practice and policy.
5. Communicate qualitative research findings effectively in written and oral formats to diverse audiences, integrating findings into public health strategies and interventions.

PHLS 5210. Foundations & Techniques of Public Health Education
3 Credits (3)

Social, behavioral, and educational aspects of disease prevention and health promotion. Includes history and theoretical basis of health education. May be repeated up to 3 credits.

Learning Outcomes

1. Explain, demonstrate, and apply health communication, education, and promotion knowledge and skill competencies.
2. Discuss the means by which structural biases, social inequities, and other social determinants of health undermine health and create challenges to achieving health equity at interpersonal, organizational, community, societal, cultural, and legal and policy levels.
3. Explain and demonstrate ways in which health communication, education, and promotion techniques can be utilized to increase health equity and reduce health disparities.
4. Utilize health behavior change theories to develop health communication, education and promotion materials, processes, and goals.
5. Identify best practices and evidence-based strategies and programs for use in health communication, education, and promotion.

PHLS 5220. Techniques of Health Communication/Education
3 Credits (3)

Application of a wide range of communication and education theories/methods, including program planning and evaluation, in public health programming. Restricted to: MPH majors. May be repeated up to 3 credits.

Prerequisite: PHLS 5110.

PHLS 5230. Community Organization in Public Health
3 Credits (3)

Strategies for identifying and involving community leaders, community needs assessment, small area analysis and planning, and community-level development strategies. Restricted to: MPH majors. May be repeated up to 3 credits.

Prerequisite: PHLS 5110.

PHLS 5240. Health Program Planning
3 Credits (3)

Covers process of successful public health education program planning and grant writing. Restricted to: MPH majors.

Learning Outcomes

1. Explain, demonstrate, and apply health program planning knowledge and skill competencies.
2. Explain, demonstrate, and design strategies and multi-level planned interventions.
3. Explain, demonstrate, and apply health program proposal writing and presentation knowledge and skills.

PHLS 5250. Evaluative Approaches in Public Health
3 Credits (3)

Survey and analyses of health testing and evaluation procedures, uses and limitations of knowledge and attitude tests, behavioral inventories, check lists, questionnaires, interviews, and other techniques. Restricted to: MPH majors.

Learning Outcomes

1. Understand the foundations of program evaluation.
2. Identify multiple program evaluation methods used to assess public health programs.
3. Examine the appropriate use of each evaluation design (process, outcome evaluation, impact monitoring) in relation to evaluating public health programs.
4. Design program logic models for various public health programs.
5. Gain knowledge related to the selection, design, and implementation of quantitative and qualitative research methods in program evaluation.
6. Understand practical issues in designing and implementing health program evaluation.
7. Assess challenges inherent to program evaluation and be able to describe strategies for navigating these challenges.
8. Explore the roles of program evaluators operating at the community and research levels and as external and internal evaluators.

PHLS 5260. Research and Resources in Community Health
3 Credits (3)

This course introduces the fundamentals of and examines the necessary concepts and skills required for research design, implementation, data analysis, statistical testing, and results reporting. The course explores a variety of approaches to ethical issues in conducting research. Restricted to MPH majors.

Learning Outcomes

1. Understand and critique research as described both in technical reports for example, professional journals and in the popular media for example, newspapers, magazines, TV.
2. Identify and critically review quantitative health science research study designs.
3. Discuss problems associated with methodology and logistics of conducting research.
4. Develop the essential elements for a research plan.
5. Plan, design, and carry out a variety of different research projects.
6. Prepare and present a professional quality research plan.
7. Develop the essential elements for a research plan.

PHLS 5310. Principles of Health Program Management
3 Credits (3)

This course prepares the student to assume a supervisory role in the management of health and human services programs. The course will cover essential management functions such as leadership, organizational assessment, planning, decision-making, organizational structure, budgeting, marketing, and human resource management.

Learning Outcomes

1. Discuss organizational and human resources management in public health activities.
2. Demonstrate the knowledge and skills inherent in budgeting.
3. Apply leadership and motivation concepts to the management of public health activities.
4. Apply the concepts, principles, and theories in management to public health settings.

PHLS 5320. Health Services Organization and Delivery
3 Credits (3)

This course includes the framework of the United States healthcare system; organization and administration of health services; alternate ways of organizing and financing health systems; the roles of the government and free market on health care services; and the barriers to health services delivery. May be repeated up to 3 credits.

PHLS 5330. Public Health Finance and Budget Management
3 Credits (3)

Introduces health care accounting and finance to non-financial students. Students are exposed to the financial structure of health care organizations and the environment within which they operate. Instruction also introduces the use of accounting and financial information in investor-owned and not-for-profit organizations in the health care

industry. Topics include understanding the creation and interpretation of financial statements, financial accounting and reporting requirements, financial analysis, budgeting, and resource allocation.

Learning Outcomes

1. Discuss the healthcare environment in which health services providers operate.
2. Analyze basic financial statements: balance sheet, income statement, statement of changes in equity, and statement of cash flows.
3. Assess the financial condition of health services organizations based on the analysis of their financial statements.
4. Apply financial concepts, principles, and models to financial analyses for managerial accounting.
5. Demonstrate familiarity with budgeting processes and assess the financial performance of the organization using variance analysis.
6. Evaluate the financing and capital investment decisions of the organization.

PHLS 5340. Public Health Law and Ethics
3 Credits (3)

This course examines major legal and ethical concepts and their impact on public health policy and practice. The course examines governmental authority, at various jurisdictional levels, to improve public health. This course will focus on public health law in the United States. Restricted to: MPH majors.

Learning Outcomes

1. Discuss legal and ethical concepts underlying (or related to) public health policy and practice.
2. Articulate ethics-related ideas, from documents such as the American Public Health Association's Public Health Code of Ethics, as they apply to contemporary public health issues.
3. Examine national, regional, state, and local government entities in terms of their authority to use legal and ethical concepts and foundations to improve public health.
4. Design or present a case study to support practitioners' or the public's understanding of the legal and ethical underpinnings of public health policy and practice.

PHLS 5410. Human-Animal Interactions in Environmental Contexts
3 Credits (3)

This MPH course will cover foundational concepts of human-animal interactions as they occur in a wide variety of environmental contexts and biomes. Modules of the course will include foci on zoonotic diseases, the impacts of invasive species, climatic shifts, emergent diseases, and companion animals.

Learning Outcomes

1. Describe the One Health approach to global health and the health of humans, animals, environments, and biomes.
2. Recognize the role of human impacts on environments and biomes as they impact human, animal, and environmental health.
3. Be attuned to the global patterning of increased contact between wild animals and humans and the implications for emergent diseases.
4. Analyze how human-animal interactions positively and negatively impact the health of humans, animals, and environments with emphases on wild, domesticated, companion, and service animals.
5. Make a case for the importance of addressing human-animal interactions, the global climate crisis, and environmental degradation and enhancements as part of a comprehensive public health strategy.
6. Demonstrate how transdisciplinary efforts, policies, and programs can be integrated to address current and emergent public health problems.

PHLS 5420. Global Health: One Health, Climate Change, Human Migration
3 Credits (3)

This MPH course will cover foundational concepts of One Health, impacts of the climate crisis on human, animal, and environmental health, the impacts of global human and animal migration and displacement on global health, social and behavioral science theories, and evidence-based prevention and intervention programs aimed at promoting health of individuals, groups, communities and populations.

Learning Outcomes

1. Describe the One Health approach to global health and the health of humans, animals, environments, and biomes.
2. Recognize the role of social and behavioral factors and the natural history of animals in shaping global mortality and morbidity.
3. Be attuned to the global patterning of public health problems and their implications for solutions.
4. Analyze how human-animal interactions positively and negatively impact the health of humans, animals, and environments.
5. Make a case for the importance of addressing human-animal interactions, the global climate crisis, and environmental degradation and enhancements as part of a comprehensive public health strategy.
6. Demonstrate how transdisciplinary efforts, policies, and programs can be integrated to address current and emergent public health problems.

PHLS 5610. Health Disparities: Determinants and Interventions
3 Credits (3)

Investigates: descriptions of health disparities and measurement issues; physical environmental factors, behavioral and emotional variables; impact of aging of the populations, increased racial and ethnic diversity, and technological developments; intervention strategies and evaluation results. Taught with: PHLS 4610.

Learning Outcomes

1. Examine the impact of structural racism on health in the United States of America.
2. Identify populations who have systematically experienced greater obstacles to health based on their race or ethnicity, religion, socioeconomic status, gender, age, mental health, cognitive, sensory, or physical disability, sexual orientation or gender identity, geographic location, or other characteristics historically linked to discrimination or exclusion in the United States of America.
3. Identify social and structural determinants of health that influence health and health equity.
4. Examine the role that public health professionals can play in advancing health equity.
5. Examine social and structural barriers to health care access and utilization.
6. Explain cultural competence, cultural humility, cultural safety, and structural competence.
7. Discuss research and program designs in health equity research and practice.
8. Examine the role of social determinants of health in achieving health equity.
9. Advocate for policies that advance health equity.

PHLS 5620. Cross-Cultural Aspects of Health
3 Credits (3)
An examination of health practices from a variety of cultural perspectives; communication, observation, research, and assimilation. Issues to be addressed will be examined from a number of viewpoints, such as individual, family, community, and professional roles. May be repeated up to 3 credits.

PHLS 5630. International Health Problems
3 Credits (3)
Comparison of domestic health programs and problems with those in other parts of the world; emphasis on political parameters and delivery processes. Additional attention is focused on the health issues of the U.S.-Mexico border. Taught with: PHLS 4630.
Learning Outcomes
1. Identify many of the current authoritative sources of information about global health, as a potential aid for future educational, training, and research endeavors.
2. Cite examples of specific issues and case studies in global health.
3. Identify key features of global health.
4. Explain the complexities of global health issues.
5. Explain intervention strategies being used to attack problems in global health.

PHLS 5635. International Health Practicum
1-3 Credits (1-3)
Intensive examination of health practices and beliefs from a cultural perspective. Focus on health structure, index of diseases, morbidity, mortality and epidemiological approaches to planning. Required travel (personal travel, lodging, and related expenses are extra). May be repeated up to 3 credits.

PHLS 5640. Rural Health Issues
3 Credits (3)
Comprehensive overview of rural health services with southwestern United States and New Mexico focus. Taught with: PHLS 4640.
Learning Outcomes
1. Compare and contrast the major perspectives on rural health.
2. Analyze the social, biological, psychological, and societal factors affecting the health of rural residents.
3. Critically analyze contemporary controversies, for example, environmental contamination.
4. Evaluate current empirical research in understanding rural health challenges and resources.

PHLS 5650. Coping with Loss and Grief: A Cross-Cultural Perspective
3 Credits (3)
A cross-cultural perspective to death, loss and grief. Hospice philosophy of caring for the dying will be included. Taught with: PHLS 4650.
Learning Outcomes
1. Compare and contrast the major theories in thanatology.
2. Analyze the biological, psychological, social, and societal factors affecting the dying process and attitudes towards death and dying.
3. Critically analyze contemporary controversies, physician-assisted suicide.
4. Evaluate current empirical research in thanatology.

PHLS 5660. U.S.-Mexico Border Health Issues
3 Credits (3)
Interdisciplinary analysis of the impact of living conditions and health issues of communities along the U.S.-Mexico border and of the strategies and initiatives to address these issues. Problem-based learning, case analysis, lecture, guest speakers, computer based instruction, and field trips. Taught with: PHLS 4660.
Learning Outcomes
1. Analyze the social, economic, cultural, and environmental determinants of health affecting communities along the U.S.–Mexico border using an interdisciplinary framework.
2. Evaluate public health strategies, binational policies, and community-based initiatives aimed at addressing health disparities and improving living conditions in border regions.
3. Develop evidence-informed recommendations for collaborative interventions that incorporate diverse stakeholder perspectives and respect cultural and contextual factors unique to the U.S.–Mexico border.

PHLS 5670. American Indian Health
3 Credits (3)
Critical health issues facing American Indians in the contemporary world. May be repeated up to 3 credits.

PHLS 5680. Hispanic Health Issues
3 Credits (3)
The course will familiarize public health students with social determinants of health contributing to Hispanic health disparities and the impact that health and immigration policy has on Hispanics' access to insurance and health care utilization, with a spotlight on different Hispanic subgroups. Recommendations for policy and research are also discussed. Taught with PHLS 4680.
Learning Outcomes
1. Explain the historical, ancestral, and national origins contributing to the diversity of the U.S. Hispanic population.
2. Assess obstacles researchers have encountered in explaining the Hispanic Epidemiological Paradox and the ethics surrounding them.
3. Compare and contrast health care coverage and access to health care in Hispanics relative to other racial and ethnic groups.
4. Describe factors contributing to health disparities in chronic and infectious diseases among Hispanics.
5. Explain how U.S. health policies negatively impact Hispanics.

PHLS 5710. Introduction to Gerontology
3 Credits (3)
Social, psychological, and physiological aspects of aging with an interdisciplinary emphasis on health promotion. Demographic characteristics of the aging population. May be repeated up to 3 credits.

PHLS 5720. Health Promotion for the Older Adult
3 Credits (3)
Common health concerns and lifestyle issues relevant to older adults. Facts about the content area, health behaviors, and practices to promote health and prevent disease; program development strategies applicable to a variety of settings. May be repeated up to 3 credits.

PHLS 5730. Adulthood and Aging
3 Credits (3)
Normal transitions in later life; those occurring from 40 years of age to the end of life are discussed. Changes in interpersonal relationships and adaptations commonly made by individuals and meeting those alterations are presented through research findings, case studies, and autobibliographies. May be repeated up to 3 credits.

PHLS 5810. Infectious and Noninfectious Disease Prevention
3 Credits (3)
History, etiology, and prevention of diseases affecting humans. Taught with PHLS 4810.

Prerequisite: PHLS 3220, PHLS 2120, PHLS 4320, or Consent of Instructor.

Learning Outcomes

1. Describe historical context of disease and health.
2. Identify the role of public health, past and present, in the control of communicable and chronic disease.
3. Identify and evaluate the characteristics of major chronic and communicable diseases.
4. Define, classify, and describe the etiology, incidence, and prevalence of major diseases.
5. Describe risk factors related to gender, race, ethnicity, and lifestyle for major diseases.
6. Identify the major diagnostic and treatment protocols for common diseases of humans.
7. Assess psychosocial influences upon diseases including diet, physical activity, rest, and related lifestyle variables.
8. Determine the impact of major diseases on the quality of life for the patient family.

PHLS 5820. Health Informatics
3 Credits (3)

The application of technology to engage communities and individuals in behavioral and environmental change processes. The course will focus on the use of technology to describe the magnitude of health problems and their sources; analyze risk factors; identify community strengths from which strategies may be defined and tools created to intervene, prevent problems, and promote health and well-being; and continuously evaluate, refine, and implement what works.

Learning Outcomes

1. Identify and list the concepts of informatics and its domains.
2. Explain how major theories and models apply to the adoption and use of health information systems.
3. Use project management tools to plan and monitor progress on an informatics project.
4. Describe basic ethical, legal, and policy-related issues in informatics.
5. Develop approaches to communicate and advocate for the use of technologies to address public health issues.

PHLS 5830. Public Health Preparedness and Response
3 Credits (3)

This course is designed to teach students about the role of public health in emergency preparedness and response. It focuses on the nature of public emergencies as well as the role various sectors have in responding to them. One purpose of this online course is to introduce students to the basics of disaster preparedness and responding to disasters, and to build a base for further development in responder training. The course provides training and resources for a basic understanding of the Incident Command System (ICS) and National Incident Management System (NIMS). May be repeated up to 3 credits.

PHLS 5995. Integrative Learning Experience
1-3 Credits (1-3)

Integrative Learning Experience (ILE) is the culminating experience for MPH students. The course is designed to integrate and apply public health knowledge acquired across the PHLS curriculum through a practice-based or policy-oriented project. Under the supervision of a faculty advisor, students will develop a high-quality written product and present their findings in a public or semi-public forum. The ILE requires students to demonstrate synthesis of at least three CEPH Foundational Competencies and one Concentration-Specific Competency.

Learning Outcomes

1. Synthesize and apply CEPH Foundational and Concentration-Specific Competencies to address a public health problem.
2. Apply evidence-based reasoning and appropriate methodologies to solve a practice- or policy-based public health issue.
3. Produce a professional-quality written deliverable suitable for a public health agency, policymaker, or stakeholder group.
4. Demonstrate effective oral communication in a public or semi-public presentation of project findings.
5. Engage in ethical, professional collaboration with academic and/or community partners throughout the project process.

PHLS 5996. Special Topics
3 Credits (3)

Specific subjects to be announced in the Schedule of Classes. Restricted to: MPH majors. May be repeated up to 12 credits.

Learning Outcomes

1. Varies

PHLS 5997. Independent Study
1-6 Credits (1-6)

Individual studies with prior approval of department head. Consent of Instructor required. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHLS 5998. Applied Practice Experience
1-4 Credits (1-4)

Student will work in a public health setting under the supervision of an experienced public health professional and will use acquired knowledge and skills to conduct a project which addresses a specific public health problem or program need. Projects are agreed upon by the student and faculty. Consent of the instructor is required. Restricted to MPH majors.

Learning Outcomes

1. Varies.

PHLS 5999. Master's Thesis
1-6 Credits (1-6)

Minimum of 4 credits required but may be repeated for a maximum of 6 credits. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHYS-PHYSICS

PHYS 1110. Explorations in Physics
1 Credit (1)

This course will introduce students to university resources, pre-professional student societies, learning strategies to help strengthen academic performance, and will explore career paths for graduates. Students will also discuss the roles of physicists in society, physics research being performed at and nearby NMSU, and what the latest discoveries in physics tell us about nature and the universe.

Learning Outcomes

1. Describe effective learning strategies for science/engineering classes.
2. Give examples of impactful scientists from groups underrepresented in physics and describe their career paths.
3. Research examples of positions open to physics majors.
4. Identify critical components of an effective resume.

5. Write a professional cover letter for an internship/undergraduate research application.
6. Discuss the boundaries of ethical science and give an example of an accidental breach of ethics.
7. Describe the societal impact of misinformation about scientific results or research.
8. Explore ways scientists can engage with the general public to shape the discourse of knowledge or the ways scientists are perceived.
9. List some of the burning questions current physicists are trying to answer. 1
10. Establish a sense of community within the department, the university, and the greater physics world. 1
11. Discover useful resources to help with academic success and avoid pitfalls while pursuing a physics degree. 1
12. Better understand the value of a physics degree, and what can be expected entering the workforce or academia. 1
13. Understand and discuss how the field of physics connects with the issues and problems facing society today.

PHYS 1111. Introductory Computational Physics
3 Credits (2+2P)
Introduction to computational techniques for the solution of physics-related problems.
Prerequisite: a C- or better in MATH 1220G or MATH 1250G or MATH 1511G.
Learning Outcomes
1. Use computers for visualizing and analyzing data.
2. Apply techniques of structured programming and software development.
3. Trouble shoot and debug programs.

PHYS 1112. Introductory Physics for the Health Sciences
3 Credits (3)
Algebra-level introduction to topics required for the Health Sciences including basic mechanics (including sound, mechanical waves and fluids), heat and thermodynamics, electricity and magnetism, optics and electromagnetic waves, atomic and nuclear physics and applications to medical imaging. Restricted to Community Colleges campuses only.
Prerequisite(s): MATH 1215 or Equivalent.
Learning Outcomes
1. The objective of the course is to familiarize the student with the concepts and methods used in the underlying physics associated with various Health Science disciplines.
2. The course will demonstrate how the basic principles of mechanics, thermodynamics, electricity, magnetism, electromagnetic waves and optics can be applied to solve particular problems in Health Sciences applications. Introduces the student to selected topics in modern physics including quantum physics, atomic and nuclear physics.

PHYS 1115G. Survey of Physics with Lab
4 Credits (3+3P)
Overview of the concepts and basic phenomena of physics. This course provides a largely descriptive and qualitative treatment with a minimum use of elementary mathematics to solve problems. No previous knowledge of physics is assumed. Includes laboratory.
Learning Outcomes
1. Apply concepts of classical mechanics (such as velocity, acceleration, force, inertia, momentum, torque, work, energy) to simple static and dynamic systems.
2. Apply concepts of thermodynamics (such as heat, temperature, internal energy, entropy) to simple processes.
3. Apply concepts of electricity and magnetism (such as fields, potential, charge conservation, static and dynamic induction) to simple circuits, motors, and other simple contrivances.
4. Apply simple geometric and wave optics in simple situations.
5. Test ideas using modern laboratory equipment.
6. Estimate experimental uncertainties.
7. Use computers to analyze and report laboratory results.
8. Draw appropriate conclusions from quantitative scientific observations.
9. Accurately and clearly communicate the results of scientific experiments.

PHYS 1125G. Physics of Music
4 Credits (3+2P)
Introduction for non-science majors to basic concepts, laws, and skills in physics, in the context of a study of sound, acoustics, and music.
Learning Outcomes
1. Demonstrate converting units and other aspects of dimensional analysis in the working of numerical problems.
2. Apply basic classical mechanics to static and dynamic fluids, including Archimedes'principle and Bernoulli's principle.
3. Apply the general properties of waves to simple models of musical instruments.
4. Demonstrate knowledge of basic operating principles of wind, string, and percussion instruments.
5. Demonstrate knowledge of how objectively measurable properties of sound waves correspond to the perceptions of pitch, loudness, and timbre.
6. Demonstrate understanding of the description of vibrations and waves in terms of Fourier's Theorem and normal modes.
7. Demonstrate understanding of vocalization in terms of physical principles such as resonance and fluid dynamics.
8. Demonstrate understanding of how the ear works.

PHYS 1230G. Algebra-Based Physics I
3 Credits (3)
An algebra-based treatment of Newtonian mechanics. Topics include kinematics and dynamics in one and two dimensions, conservation of energy and momentum, rotational motion, equilibrium, and fluids.
Learning Outcomes
1. Demonstrate converting units and other aspects of dimensional analysis in the working of numerical problems.
2. Apply principles of Newtonian mechanics to predict and account for simple phenomena modeled by the motion of particles in one and two dimensions.
3. Apply principles of Newtonian mechanics to predict and account for simple phenomena modeled by the motion of a rigid body in two dimensions.
4. Apply Newton's theory of gravitation to circular orbits and demonstrate understanding of how Kepler's laws of planetary motion provide the empirical foundation for Newton's theory.
5. Apply the mathematics of vectors to the principles of Newtonian mechanics.
6. Apply principles of Newtonian mechanics to the case of static and dynamic incompressible fluids, including Archimedes'and Bernoulli's principles.

PHYS 1230L. Algebra-Based Physics I Lab
1 Credit (3P)
A series of laboratory experiments associated with the material presented in PHYS 1230G. May be repeated up to 3 credits.
Prerequisite/Corequisite: PHYS 1230G.
Learning Outcomes
1. Explain the scientific method.
2. Test ideas using modern laboratory equipment.
3. Estimate experimental uncertainties using statistical methods.
4. Use computers to analyze and report laboratory results.
5. Draw appropriate conclusions from quantitative scientific observations.
6. Accurately and clearly communicate the results of scientific experiments.

PHYS 1240G. Algebra-Based Physics II
3 Credits (3)
The second half of a two semester algebra-based introduction to Physics. This course covers electricity, magnetism and optics.
Prerequisite(s): a C- or better in PHYS 1230G or PHYS 2230G.
Learning Outcomes
1. Be able to state Coulomb's Law and Gauss's laws and apply them.
2. Apply the concepts of electric charge, electric field and electric potential to solve problems.
3. Analyze simple DC and AC circuits.
4. Apply the Lorentz force to solve problems.
5. Apply Faraday's law of induction (and Lenz's law) to solve problems.
6. Apply ray optics to practical lens systems such as microscopes and corrective lenses.
7. Apply the wave nature of light to the phenomena of reflection, refraction, and diffraction.

PHYS 1240L. Algebra-Based Physics II Lab
1 Credit (3P)
A series of laboratory experiments associated with the material presented in PHYS 1240 May be repeated up to 3 credits.
Prerequisite/Corequisite: PHYS 1240G.
Learning Outcomes
1. Explain the scientific method.
2. Test ideas using modern laboratory equipment.
3. Estimate experimental uncertainties using statistical methods.
4. Use computers to analyze and report laboratory results.
5. Draw appropriate conclusions from quantitative scientific observations.
6. Accurately and clearly communicate the results of scientific experiments.

PHYS 1310G. Calculus -Based Physics I
3 Credits (3)
A calculus level treatment of classical mechanics and waves, which is concerned with the physical motion concepts, forces, energy concepts, momentum, rotational motion, angular momentum, gravity, and static equilibrium.
Prerequisite: a C- or better in ENGR 190 or MATH 1511G or higher.
Learning Outcomes
1. Describe the relationships among position, velocity, and acceleration as functions of time.
2. Use the equations of kinematics to describe motion under constant acceleration.
3. Analyze linear motion using Newton's laws, force, and linear momentum.
4. Analyze rotational motion using torque and angular momentum.
5. Analyze motion using work and energy.

PHYS 1310L. Calculus -Based Physics I Lab
1 Credit (3P)
A series of laboratory experiments associated with the material presented in Calculus-based Physics I. Students will apply the principles and concepts highlighting the main objectives covered in coursework for Calculus-based Physics I.
Prerequisite(s)/Corequisite(s): PHYS 1310G.
Learning Outcomes
1. Develop a reasonable hypothesis.
2. Work effectively as part of a team.
3. Take measurements and record measured quantities to the appropriate precision.
4. Estimate error sources in experimental techniques.
5. Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools.
6. Determine whether results and conclusions are reasonable.
7. Present experimental results in written form in appropriate style and depth.
8. Experience the relationship between theory and experiment.

PHYS 1311. Problems in Calculus-Based Physics I
0.5-1 Credits (.5-1)
This is a supplemental course for Calculus-based Physics I. May be repeated up to 1 credits.
Corequisite(s): PHYS 1310G.

PHYS 1320G. Calculus -Based Physics II
3 Credits (3)
A calculus level treatment of classical electricity and magnetism. It is strongly recommended that this course is taken at the same time as Calculus-based Physics II laboratory.
Prerequisite: a C- or better in (PHYS 2110 or PHYS 1310G) and (ENGR 190 or MATH 1521G or higher).
Learning Outcomes
1. Apply the concepts of electric charge, electric field and electric potential to solve problems.
2. Sketch the electric field in the vicinity of point, line, sheet, and spherical distributions of static electric charge.
3. Sketch the magnetic field in the vicinity of line, ring, sheet, and solenoid distributions of steady current.
4. Describe the relationship between electric field and electric potential.
5. Calculate the Lorentz force on a moving charge for simple geometries of the fields and use it to analyze the motion of charged particles.
6. Apply the integral forms of Maxwell's equations.
7. Calculate the energy of electromagnetic fields.
8. Analyze DC circuits.

PHYS 1320L. Calculus -Based Physics II Lab
1 Credit (3P)
A series of Laboratory experiments associated with the material presented in Calculus-Based Physics II. Students will apply the principles and concepts highlighting the main objectives covered in coursework for Calculus-Based Physics II.
Prerequisite(s)/Corequisite(s): PHYS 1320G. Prerequisite(s): A C- or better in PHYS 2110L or PHYS 1310L.

Learning Outcomes

1. Develop a reasonable hypothesis.
2. Work effectively as part of a team.
3. Take measurements and record measured quantities to the appropriate precision.
4. Estimate error sources in experimental techniques.
5. Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools.
6. Determine whether results and conclusions are reasonable.
7. Present experimental results in written form in appropriate style and depth.
8. Experience the relationship between theory and experiment

PHYS 1321. Problems in Calculus-Based Physics II
0.5-1 Credits (.5-1)
This is a supplemental course for Calculus-based Physics II.
Corequisite(s): PHYS 1320G.

PHYS 2110. Mechanics
3 Credits (3)
Newtonian mechanics.
Prerequisite/Corequisite: MATH 1511G or higher.
Learning Outcomes

1. Describe matter as particles or extended objects, analyze forces or torques acting on it, and apply Newton's laws to determine if the object is in equilibrium or predict any change in the motion of such an object.
2. Apply vector algebra to predict motion or analyze interactions in one or two dimensions.
3. Apply techniques of conservation laws (linear momentum, energy, angular momentum) to determine the effect of interactions that are internal or external to the system studied.
4. Analyze systems in simple harmonic motion and explain qualitatively under what condition a driven oscillating system shows the phenomenon of resonance.
5. Use multiple representations to build, interpret and communicate a model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
6. Given two or more cases, perform a ranking task by evaluating the similarities (comparison) or differences (contrast) in the cases and applying physics principles.
7. Self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
8. Analyze real-world phenomena by defining and formulating the question or problem, constructing simplified idealized models(and stating their limitations), and applying appropriate mathematical reasoning to make predictions or explain a phenomenon or function.
9. Communicate effectively with audiences of different scientific backgrounds by recognizing their needs and making the communication relevant and impactful. 1
10. Work collegially and collaboratively in diverse teams both as a leader and as a member in pursuing a common goal.

PHYS 2110L. Experimental Mechanics
1 Credit (3P)
Laboratory experiments associated with the material presented in PHYS 2110. Science majors.
Prerequisite/Corequisite: PHYS 2110.
Learning Outcomes

1. Test scientific questions or ideas using appropriate laboratory equipment.
2. Collect experimental data and evaluate the outcomes of an experiment qualitatively and quantitatively.
3. Estimate measurement uncertainty.
4. Apply appropriate methods of analysis to raw data, including graphical or statistical methods, and computer-based tools.
5. Draw appropriate conclusions from quantitative scientific data.
6. Communicate the process and the outcomes of an experiment and reflect on possible revisions in the procedure.
7. Work effectively as part of a team.
8. Demonstrate professional responsibility.

PHYS 2111. Supplemental Instruction to PHYS 2110
1 Credit (1)
This Optional workshop as a supplement to PHYS 2110. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credit.
Corequisite: PHYS 2110.
Learning Outcomes

1. Analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. Use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. In the contexts of concepts and physical laws discussed in PHYS 2110, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra.
4. Self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. Develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2120. Heat, Light, and Sound
3 Credits (3)
Calculus-level treatment of thermodynamics, geometrical and physical optics, and sound.
Prerequisite: a C- or better in PHYS 2110 or PHYS 1310G, and MATH 1511G or higher.
Learning Outcomes

1. Analyze real world phenomena that meet specific needs and use scientific judgement to draw conclusions.
2. Use multiple representations to build, interpret and communicate scientific models, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. Analyze oscillations and wave phenomena.
4. Analyze properties of sound waves.
5. Analyze properties of light using interference and diffraction.
6. Analyze light propagation through media using index of refraction and optical apparatus.
7. Analyze optical systems using light propagation.
8. Analyze the laws of thermodynamics and use them to describe processes in gases and other states of matter.

PHYS 2120L. Heat, Light, and Sound Laboratory
1 Credit (3P)

Laboratory experiments associated with the material presented in PHYS 2120. Science majors.
Prerequisite: a C- or better in PHYS 2110L or PHYS 1310L.
Prerequisite/Corequisite: PHYS 2120.
Learning Outcomes

1. Develop a reasonable hypothesis.
2. Work effectively as part of a team.
3. Take measurements and record measured quantities to the appropriate precision.
4. Estimate error sources in experimental techniques.
5. Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools.
6. Determine whether results and conclusions are reasonable.
7. Present experimental results in written form in appropriate style and depth.
8. Understand the relationship between theory and experiment.

PHYS 2121. Supplemental Instruction to PHYS 2120
1 Credit (1)
This optional workshop supplements PHYS 2120 "Heat, Light, and Sound". Students actively apply concepts and methods introduced in PHYS 2120 to problem solving and quantitative analysis. May be repeated up to 1 credit.
Corequisite: PHYS 2120.
Learning Outcomes

1. Analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. Use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. In the contexts of concepts and physical laws discussed in PHYS 2121, apply quantitative analysis to solve problems involving wave propagation and interference, geometric optics, heat transfer and thermodynamics.
4. Self-checkreasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. Develop learning strategies and use metacognition to promote thinking in the discipline

PHYS 2140. Electricity and Magnetism
3 Credits (3)
Charges and matter, the electric field, Gauss law, the electric potential, the magnetic field, Ampere's law, Faraday's law, electric circuits, alternating currents, Maxwell's equations, and electromagnetic waves.
Prerequisite: a C- or better in PHYS 2110 or PHYS 1310G, and MATH 1511G or higher.
Prerequisite/Corequisite: MATH 1521G.
Learning Outcomes

1. Analyze real-world phenomena by deciding what information is relevant and constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomenon or function.
2. Use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. Use a physics problem-solving strategy: i. Identify relevant concepts. ii. Introduce and study simplified models. iii. Use symmetry arguments. iv. Establish the relation between known and unknown quantities. v. Calculate a quantitative result using appropriate mathematical methods. vi. Self-check reasonableness of assumptions and solutions.
4. Analyze/predict the interaction of charged particles, dipoles, or conductors with electric or magnetic fields. Apply concepts of force, work, or energy.
5. Describe sources of electric fields or magnetic fields and calculate field vectors for a point in space.
6. Apply Gauss's law to calculate electric fields for symmetric charge distributions or to determine surface charges on conductors in electrostatic equilibrium.
7. Apply Ampere's law and the Law of Biot-Savart to calculate magnetic fields.
8. Evaluate if magnetic flux changes and if an electric field or electric current is induced. Determine the direction of the induced current or the non-Coulomb electric field by applying Lenz's law. Apply Faraday's law to relate the rate of change of magnetic flux with the magnitude of emf induced.
9. Calculate and discuss properties of electric circuits (dc) with resistors, capacitors, and inductors applying Kirchhoff's rules or Ohm's law. 1
10. Discuss how the presence of a capacitor or an inductor modifies the behavior of a (dc) circuit and determine the time dependence of the current. 1
11. For a series RLC-circuit (or RC, LC, RL) with an ac-voltage source apply the concept of impedance or reactance to calculate the current through or voltages across each of the circuit elements, especially in the low-frequency limit, high-frequency limit, or at the resonant frequency.

PHYS 2140L. Electricity & Magnetism Laboratory
1 Credit (3P)
Laboratory experiments associated with the material presented in PHYS 2140.
Prerequisite: a C- or better in PHYS 2110 or PHYS 1310G.
Prerequisite/Corequisite: PHYS 2140.
Learning Outcomes

1. Develop a reasonable hypothesis.
2. Work effectively as part of a team.
3. Take measurements and record measured quantities to the appropriate precision.
4. Estimate error sources in experimental techniques.
5. Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools.
6. Determine whether results and conclusions are reasonable.
7. Present experimental results in written form in appropriate style and depth.
8. Understand the relationship between theory and experiment.

PHYS 2141. Supplemental Instruction to PHYS 2140
1 Credit (1)
Optional workshop as a supplement to PHYS 2140. The tutorial sessions focus on reasoning and hands-on problem solving.
Corequisite: PHYS 2140.
Learning Outcomes

1. Analyze real-world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomenon or function.

2. Use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. In the contexts of concepts and physical laws discussed in PHYS 2140, apply quantitative analysis to solve problems, including the use of symmetry to study electric and magnetic fields. Practice concepts of calculus applied to charge and current distributions.
4. Self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. Develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2230G. General Physics for Life Science I
3 Credits (3)
This algebra-based introduction to general physics covers mechanics, waves, sound, and heat. Special emphasis is given to applications in the life sciences. This course is recommended for students in the life sciences and those preparing for the physics part of the MCAT.
Prerequisite: A C- or better in MATH 1220G or higher.
Learning Outcomes
1. Modeling: analyze real-world phenomena by deciding what information is relevant and constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain phenomena or function; use multiple representations to build, interpret and communicate the model,including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text; critique assumptions and determine how to test the validity of a model and use the comparison of experimental data and prediction to refine the model.
2. Conceptual understanding: describe the motion of any object in terms of displacement, velocity, and acceleration; analyze external forces acting on an object and determine if a system is in equilibrium or relate the net force to changes in motion; predict or analyze motion using conservation laws for energy and momentum; analyze forces and torques fora rigid object in static equilibrium; for a static fluid determine pressure and the buoyant force; apply idealized models of fluid flow to the circulatory system; describe the properties of pressure waves known as sound, apply the model of standing waves to musical instruments and discuss how sound is used to sense the environment; predict qualitative changes in the internal energy of a thermodynamic system when energy has been transferred due to work or heat and justify those predictions using conservation of energy (First law of thermodynamics). Identify which heat transfer processes occur in a described situation.
3. Quantitative reasoning: use a physics problem-solving strategy (Identify relevant concepts; Introduce and study simplified models; Use symmetry arguments; Establish the relation between known and unknown quantities; Calculate a quantitative result using appropriate mathematical methods; Self-check reasonableness of assumptions and solutions); use scientific notation accurately and convert units if necessary.
4. Communicating scientific information: interpret or generate graphs or other visual representations and be able to switch between various representations including text,mathematical description, or diagrams.

PHYS 2230L. Laboratory to General Physics for Life Science I
1 Credit (1)
Laboratory experiments in topics associated with material presented in PHYS 2230G.
Prerequisite(s)/Corequisite(s): PHYS 2230G. Restricted to Las Cruces campus only.

PHYS 2231. Supplemental Instruction to General Physics for Life Sciences I
1 Credit (1)
This optional workshop supplements Physics for Life Sciences I. The tutorial sessions focus on reasoning and hands-on problem solving.
Corequisite: PHYS 2230G.
Learning Outcomes
1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. in the contexts of concepts and physical laws discussed in PHYS 2230, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra.
4. self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2240G. General Physics for Life Science II
3 Credits (3)
This algebra-based course covers electricity, magnetism, light, atomic physics, and radioactivity. Special emphasis is given to applications in the life sciences This course is recommended for students in the life sciences and those preparing for the physics part of the MCAT.
Prerequisite: a C- or better in PHYS 1230G or PHYS 2230G, and MATH 1220G or higher.
Learning Outcomes
1. Modeling: analyze real world phenomena by constructing simplified idealized models (an abstract description) that allow making predictions or explaining a phenomena or function; use multiple representations to build and communicate the model, including sketches, mathematical expressions, diagrams or graphs; decide what information is relevant and critique assumptions and models of others; determine how to test the validity of a model and use comparison of experimental data and prediction to refine the model.
2. Conceptual understanding: electric or magnetic fields can be used to describe interactions of objects that contain charges with their surroundings; changes that occur as a result of interactions are constrained by conservation laws (such as conservation of energy, conservation of charge or conservation of nucleon number); many macroscopic properties of materials can be described using microscopic models or related to their geometry; electromagnetic radiation can be modeled as a wave or as fundamental particles (photons); the direction of propagation of a wave may change when it encounters a boundary surface between two media of different properties (reflection or refraction); the spontaneous radioactive decay of nuclei is described by probability.
3. Quantitative reasoning: apply quantitative analysis and appropriate mathematical reasoning to describe or explain phenomena; use scientific notation accurately and convert units if necessary.
4. Communicating scientific information: interpretor generate graphs or other visual representations (e.g. field lines, equipotential lines) and be able to switch between various representations including text, mathematical description, or diagrams.

PHYS 2240L. Laboratory to General Physics for Life Science II
1 Credit (1)

Laboratory experiments in topics associated with material presented in PHYS 2240.
Prerequisite(s)/Corequisite(s): PHYS 2240G. Restricted to Las Cruces campus only.

PHYS 2241. Supplemental Instruction to General Physics for Life Sciences II
1 Credit (1)
This optional workshop is a supplement to Physics for Life Science II. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.
Corequisite(s): PHYS 2240G.
Learning Outcomes
1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. in the contexts of concepts and physical laws discussed in PHYS 2240, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra.
4. self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2996. Special Topics
1,4 Credits
Topics to be announced in the Schedule of Classes. May be repeated up to 12 credits.
Learning Outcomes
1. Varies.

PHYS 2997. Independent Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.
Learning Outcomes
1. Varies

PHYS 303V. Energy and Society in the New Millennium
3 Credits (3)
Traditional and alternative sources of energy. Contemporary areas of concern such as the state of depletion of fossil fuels; nuclear energy, solar energy, and other energy sources; environmental effects; nuclear weapons; and health effects of radiation. Discussion of physical principles and impact on society. Focus on scientific questions involved in making decisions in these areas. No physics background required.

PHYS 304. Forensic Physics
4 Credits (3+3P)
Theories, laboratory, and field techniques in the area of forensic physics.

PHYS 305V. The Search for Water in the Solar System
3 Credits (3)
Examines the formation, abundance and ubiquity of water in our Solar System stemming from comets, Martian and Lunar poles, Earth's interior and into the outer reaches of the Solar System. Topics will include nuclear synthesis, Solar System formation, remote sensing, as well as past, present and future NASA missions for water.
Learning Outcomes
1. Learn how to apply scientific reasoning for understanding the evolution of the universe.
2. Learn the location of possible water resources in the solar system and beyond.
3. Learn how to use remote sensing to identify water in distant stellar objects and their atmospheres.
4. Acquire the ability to apply knowledge of mathematics, science and applied sciences (scientific expertise).
5. Recognize the need for an ability to engage in life-long learning (Life-long learning).

PHYS 315. Modern Physics
3 Credits (3)
An introduction to relativity and quantum mechanics, with applications to atoms molecules, solids, nuclei, and elementary particles.
Prerequisite: a C- or better in MATH 2530G and PHYS 2140 or PHYS 1320G.
Learning Outcomes
1. Communication: an ability to communicate effectively with a range of audiences.
2. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
3. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 316. Supplemental Instructions to PHYS 315
1 Credit (1)
This optional workshop supplements PHYS 315 "Modern Physics". Students actively apply concepts and methods introduced in PHYS 315 to problem solving and quantitative analysis.
Corequisite(s): PHYS 315.

PHYS 325. Intermediate Experimental Physics
3 Credits (1+6P)
An exploration of a variety of experimental techniques in physics with an emphasis on the proper determination of statistical and systematic uncertainties. Students will work in teams and prepare professional written and oral reports of their work. This course cannot be used to replace M E 345 for students majoring in engineering.
Prerequisite(s)/Corequisite(s): PHYS 315. Prerequisite(s): a C- or better in PHYS 2140L or PHYS 1320L.
Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
2. Communication: an ability to communicate effectively with a range of audiences.
3. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

5. Collect, Analyze, and Interpret Data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 350. Special Topics
1-3 Credits
Lectures, demonstrations, and discussions on such topics as lasers and holography, energy sources, clouds, and biophysics. May be repeated for a maximum of 12 credits under different subtitles.

PHYS 380. Individual Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

PHYS 395. Intermediate Mathematical Methods of Physics
3 Credits (3)
Introduction to the mathematics used in intermediate-level physics courses. Topics include vector calculus, curvilinear coordinates, matrices, linear algebra, function spaces, partial differential equations, and special functions. This course cannot be used to replace M E 228 or M E 328 for students majoring in engineering. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): MATH 3160. Prerequisite(s): a C- or better in MATH 2530G.
Learning Outcomes
1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 400. Undergraduate Research
1-3 Credits
May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

PHYS 420. Capstone Project I
3 Credits (3P)
Application of engineering physics principles to a significant design project. Includes teamwork, written and oral communication and realistic technical, economic and public safety requirements.

PHYS 421. Capstone Project II
3 Credits (3P)
Continuation of PHYS 420.

PHYS 450. Selected Topics
1-3 Credits
Readings, lectures or laboratory studies in selected areas of physics. May be repeated for a maximum of 12 credits.

PHYS 451. Intermediate Mechanics I
3 Credits (3)
Newtonian mechanics, including an introduction to the Lagrangian formulation. Topics include central force motion, rigid body motion, noninertial reference frames, oscillating systems, and classical scattering.
Prerequisite(s)/Corequisite(s): MATH 3160. Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G, and MATH 2530G.
Learning Outcomes
1. Set up equations of motion for classical mechanical systems and solve them.
2. Identify conserved quantities and understand the circumstances under which they arise (symmetries); in particular, know how to use conservation of energy, momentum, angular momentum to solve problems.
3. Fluently use three-dimensional calculus as a language to do the above; be able to use spherical and cylindrical coordinates.
4. Understand the paradigmatic examples of the harmonic oscillator, central force (in particular, gravitational) motion and rigid body motion, which serve as starting points for investigating more complicated realistic problems.

PHYS 454. Intermediate Modern Physics I
3 Credits (3)
Introduction to quantum mechanics, focusing on the role of angular momentum and symmetries, with application to many atomic and subatomic systems. Specific topics include intrinsic spin, matrix representation of wave functions and observables, time evolution, and motion in one dimension.
Prerequisite: a C- or better in PHYS 315.
Prerequisite/Corequisite: MATH 3160 and PHYS 395.
Learning Outcomes
1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 455. Intermediate Modern Physics II
3 Credits (3)
Continuation of subject matter of PHYS 454. Specific topics include rotation and translation in three dimensions, solution of central potential problems, perturbation theory, physics of identical particles, scattering theory, and the interaction between photons and atoms.
Prerequisite: a C- or better in PHYS 454, MATH 3160, and PHYS 395.
Learning Outcomes
1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 461. Intermediate Electricity and Magnetism I
3 Credits (3)
The first part of a two-course sequence in classical electrodynamics. Covered topics include static electric and magnetic fields, Laplace's and Poisson's equations, electromagnetic work and energy, Lorentz force, Gauss's, Biot-Savart, and Ampere's laws, Maxwell's equations, as well as electric and magnetic fields in matter.
Prerequisite: a C- or better in PHYS 2140 or PHYS 1320G or equivalent and a C- or better in MATH 2530G.
Prerequisite/Corequisite: MATH 3160 and PHYS 395.
Learning Outcomes
1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 462. Intermediate Electricity and Magnetism II
3 Credits (3)
Continuation of subject matter of PHYS 461. Covered topics include Maxwell's equations and their applications, electromagnetic waves, reflection, refraction, dispersion, radiating systems, interference

and diffraction, as well as Lorentz transformations and relativistic electrodynamics.
Prerequisite: a C- or better in PHYS 461, MATH 3160, and PHYS 395.
Learning Outcomes
1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 468. Intermediate X-ray Diffraction
3 Credits (3)
Introduction to x-ray diffraction and reflectivity spectra. Topics include X-ray sources and detectors, atomic spectra, characteristic x-rays, thermionic emission, synchrotron radiation, instrument components, and beam conditioners. Prerequisite(s): a C- or better in PHYS 315 and PHYS 325
Learning Outcomes
1. Knowledge of structural properties of materials
2. Experimental x-ray characterization techniques
3. Presentation and writing skills in the discipline
4. Ethics, teamwork, and career opportunities

PHYS 471. Modern Experimental Optics
3 Credits (1+6P)
Cumulative experience course in experimental optics.
Prerequisite: a C- or better in PHYS 315 and PHYS 325.
Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
2. Communication: an ability to communicate effectively with a range of audiences.
3. Ethical and professional responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
5. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 475. Advanced Laboratory Practices for Materials
3 Credits (1+6P)
Cumulative experience course in advanced laboratory practices involving experiments in atomic, molecular, and condensed matter physics.
Prerequisite: a C- or better in PHYS 315 and PHYS 325.
Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
2. Communication: an ability to communicate effectively with a range of audiences.
3. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
5. Collect, Analyze, and Interpret Data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 476. Computational Physics
3 Credits (3)
Scientific visualization, numerical differentiation and interpolation, numerical integration, root finding, linear algebra, eigensystems, ODE's, Boundary value problems, PDE's, Monte-Carlo calculations, data description and analysis, Fast Fourier Transforms, and applications to advanced physics problems. Recommended is the knowledge of a programming language.
Prerequisite: a C- or better in PHYS 1111 or equivalent and MATH 3160.
Learning Outcomes
1. learn how to use computers for solving problems in the physical sciences,
2. obtain skills to implement numerical simulation and modeling strategies,
3. learn how to monitor and analyze data graphically, during and after computation,
4. obtain workflow organization skills needed for the solution of complicated systems.

PHYS 480. Thermodynamics
3 Credits (3)
Thermodynamics and statistical mechanics. Basic concepts of temperature, heat, entropy, equilibrium, reversible and irreversible processes. Applications to solids, liquids, and gases.
Prerequisite: a C- or better in PHYS 2120, PHYS 315, and MATH 2530G.
Learning Outcomes
1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 485. Independent Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.
Prerequisite: consent of instructor.

PHYS 488. Introduction to Condensed Matter Physics
3 Credits (3)
Crystal structure, X-ray diffraction, energy band theory, phonons, cohesive energy, conductivities, specific heats, p-n junctions, defects, surfaces, and magnetic, optical, and low-temperature properties.
Prerequisite: a C- or better in PHYS 315.
Learning Outcomes
1. Learn the fundamental concepts of solid-state physics: classification of solids, crystal structure, band structure of solids, lattice vibrations, optical and magnetic properties of solids.

2. Develop an ability to formulate and solve complex problems in solid state physics by applying the fundamental principles of physics and mathematics.
3. Develop and ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 489. Introduction to Modern Materials
3 Credits (3)
Structure and mechanical, thermal, electric, and magnetic properties of materials. Modern experimental techniques for the study of material properties.
Prerequisite: a C- or better in PHYS 315.
Learning Outcomes
1. Learn the fundamental concepts of the physics of modern materials, such as crystal structure, properties of materials, and experimental techniques.
2. Develop an ability to formulate and solve complex problems in the area of physics of modern materials by applying the principles of physics and mathematics.
3. Develop an ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 493. Experimental Nuclear Physics
3 Credits (1+6P)
Cumulative experience course in nuclear physics such as measurement of radioactivity, absorption of radiation, nuclear spectrometry.
Prerequisite: a C- or better in PHYS 315 and PHYS 325.
Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
2. Communications: an ability to communicate effectively with a range of audiences.
3. Ethical and professional responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
5. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 495. Mathematical Methods of Physics I
3 Credits (3)
Applications of mathematics to experimental and theoretical physics. Topics include vector analysis, Fourier series and transforms, Green's functions, special functions, complex variables, tensor algebra and analysis.
Prerequisite: a C- or better in MATH 3160 and PHYS 395.
Learning Outcomes
1. Deploy the tools of vector analysis and expansion into complete sets of functions to treat problems arising, e.g., in electrodynamics.
2. Understand the elements of functional analysis underpinning, e.g., quantum mechanics, such as representations, operators and their inverses and spectra.
3. Evaluate integrals of analytic functions using the calculus of residues.
4. Take advantage of the transformation behavior, under symmetry operations, of representations of physical quantities, by casting physical relations in tensor language.

PHYS 500. Special Topics Seminar
1-2 Credits
Treatment of topics not covered by regular courses. Graded S/U. May be repeated.

PHYS 511. Mathematical Methods of Physics I
3 Credits (3)
Applications of mathematics to experimental and theoretical physics. Topics include vector analysis, Fourier series and transforms, Green's functions, special functions, complex variables, tensor algebra and analysis.
Learning Outcomes
1. Deploy the tools of vector analysis and expansion into complete sets of functions to treat problems arising, e.g., in electrodynamics.
2. Understand the elements of functional analysis underpinning, e.g., quantum mechanics, such as representations, operators and their inverses and spectra.
3. Evaluate integrals of analytic functions using the calculus of residues.
4. Take advantage of the transformation behavior, under symmetry operations, of representations of physical quantities, by casting physical relations in tensor language.

PHYS 520. Selected Topics
1-3 Credits
This is a lecture/laboratory course designed to present the basic concepts, the techniques and the tools to synthesize and characterize nanometer scale materials, and the latest achievements in current and future nanotechnology applications in engineering, materials, physics, chemistry, biology, electronics and energy. It is intended for a multidisciplinary audience with a variety of backgrounds. This course should be suitable for graduate students as well as advanced undergraduates. Topics covered will include: nanoscience and nanotechnology, nanofabrication, self-assembly, colloidal chemistry, sol-gel, carbon nanotubes, graphene, thin film, lithography, physical vapor deposition, chemical vapor deposition, quantum dots, lithium batteries, X-ray diffraction, scanning electron microscopy, transmission electron microscopy, nanoelectronics, nanophotonics and nanomagnetics, etc. Students must also have completed (EH&S Safety training to include the courses: (1) Employee & Hazard Communication Safety (HazCom); (2) Hazardous Waste Management; and (3) Laboratory Standard) trainings to enroll. Crosslisted with: CHME 467 . May be repeated up to 3 credits.
Prerequisite: (CHEM 1226 or CHEM 1215G), (PHYS 1230G or PHYS 1310G).

PHYS 521. Individual Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.
Prerequisites: graduate standing, consent of instructor, and selection of a specific topic prior to registration.

PHYS 528. Fundamentals of Photonics
4 Credits (3+3P)
Ray, wave and guided optics, lasers and thermal sources, radiometry, photon detection and signal-to-noise ratio. Elements of photonic crystals, polarization, acousto-optics, electro-optics, and optical nanostructures.

Recommended foundation (PHYS 1320G or PHYS2120) and (E E 473 or PHYS 473), Taught with E E 478. Crosslisted with E E 528.

Learning Outcomes

1. Describe the fundamental properties of light.
2. Formulate the concepts of ray, wave, and photon optics mathematically.
3. Represent and incorporate basic elements of an optical system.
4. Perform an analysis of a simple photonic/optical system mathematically by hand and with computer tools such as MATLAB.
5. Discuss ethical, societal, and professional issues related to photonics and optics.

PHYS 551. Classical Mechanics
3 Credits (3)

Lagrangian and Hamiltonian formulation of dynamics. Advanced treatments of most topics listed under PHYS 451, plus canonical transformations and Hamilton-Jacobi theory. PHYS 451 strongly recommended.

PHYS 554. Quantum Mechanics I
3 Credits (3)

Wave function, indeterminacy, classical limit. Schrodinger equation. Atomic and nuclear systems. Angular momentum, intrinsic spin, identical particles. Scattering theory. Mathematical formalism, symmetry and conserved quantities. Perturbation theory. Dirac theory, introduction to quantized fields. PHYS 451 and PHYS 454 strongly recommended.

PHYS 555. Quantum Mechanics II
3 Credits (3)

Continuation of topics in PHYS 554.
Prerequisites: PHYS 554 or consent of instructor.

PHYS 561. Electromagnetic Theory I
3 Credits (3)

Detailed advanced treatments of most topics listed under PHYS 461, PHYS 462, plus multipole radiation, collisions of charged particles and bremsstrahlung, scattering, and radiation reaction. PHYS 461 and PHYS 462 strongly recommended.

PHYS 562. Electromagnetic Theory II
3 Credits (3)

Continuation of topics in PHYS 561.
Prerequisites: PHYS 561 or consent of instructor.

PHYS 568. Elements of X-ray Diffraction
3 Credits (3)

Same as PHYS 468, but additional work required. Crosslisted with: CHME 588.

PHYS 571. Advanced Experimental Optics
3 Credits (1+6P)

Taught with PHYS 471 with additional work required at the graduate level.

Learning Outcomes

1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
2. Communication: an ability to communicate effectively with a range of audiences.
3. Ethical and professional responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
5. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 575. Advanced Physics Laboratory
3 Credits (1+6P)

Selected experiments in atomic, molecular, nuclear and condensed-matter physics.

Learning Outcomes

1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
2. Communication: an ability to communicate effectively with a range of audiences.
3. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
5. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 576. Advanced Computational Physics I
3 Credits (3)

Advanced treatment of topics listed under PHYS 476 plus additional work. Applications of numerical methods to advanced physics problems. Recommended is the knowledge of a programming language.

Learning Outcomes

1. learn to numerically solve problems that require higher mathematical and theoretical analysis,
2. experience how graduate research will be advanced and accelerated by the use of scientific computing skills.

PHYS 584. Statistical Mechanics
3 Credits (3)

Thermodynamics review. Probability, entropy, equilibrium. Canonical and grand canonical ensembles. Classical and quantum statistics. Degenerate and classical gases. Application to the equilibrium properties of solids, liquids, and gases. Kinetic theory and transport processes.

PHYS 589. Modern Materials
3 Credits (3)

Same as PHYS 489 with differentiated assignments for graduate students. PHYS 554 recommended.

Learning Outcomes

1. Learn the fundamental concepts of the physics of modern materials, such as crystal structure, properties of materials, and experimental techniques.
2. Develop an ability to formulate and solve complex problems in the area of physics of modern materials by applying the principles of physics and mathematics.

3. Develop an ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 591. Advanced High-Energy Physics I
3 Credits (3)
Taught with PHYS 491 with additional work required at the graduate level.
Prerequisite(s): PHYS 555 or consent of instructor.

PHYS 593. Advanced Experimental Nuclear Physics
3 Credits (1+6P)
Advanced experimental investigation of topics such as measurement of radioactivity, absorption of radiation, and nuclear spectrometry.
Learning Outcomes
1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
2. Communication: an ability to communicate effectively with a range of audiences.
3. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
5. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 597. Space Plasma Physics
3 Credits (3)
Same as PHYS 497 but with added requirements.

PHYS 599. Master's Thesis
1-15 Credits (1-15)
Thesis.

PHYS 600. Research
1-15 Credits
Doctoral research. May be repeated.

PHYS 620. Advanced Topics in Physics
1-3 Credits
Advanced formal treatment of topics not covered in regular courses. May be repeated for a maximum of 9 credits.
Prerequisite: consent of instructor.

PHYS 650. General Relativity I
3 Credits (3)
Basic foundations and principles of general relativity, derivation of the Einstein field equations and their consequences, the linearized theory, the Bel-Petrov classification of the curvature tensor, derivation of the Schwarzschild solution and the four basic tests of general relativity.
Prerequisite(s): PHYS 511 or PHYS 561 or consent of instructor.

PHYS 680. Independent Study
1-3 Credits
Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.
Prerequisite: graduate standing or consent of instructor.

PHYS 688. Advanced Condensed Matter Physics
3 Credits (3)
Continuation of the advanced condensed matter physics presented in PHYS 588. Topics include electronic structure methods, optical, magnetic, and transport properties of solids, semiconductors, crystalline defects, nanostructures, and noncrystalline solids. PHYS 588 strongly recommended.
Learning Outcomes
1. Learn the fundamental concepts of advanced condensed state physics: band theory of solids, electronic structure methods, optical and magnetic properties of solids, bulk semiconductors, and properties of nano-structured materials.
2. Develop an ability to formulate and solve complex problems in advanced condensed matter physics.
3. Develop an ability to to study independently and acquire new knowledge using appropriate learning strategies.

PHYS 689. Advanced Modern Materials
3 Credits (3)
Advanced topics in the physics of modern materials, such as crystalline, amorphous, polymeric, nanocrystalline, layered, and composite materials and their surfaces and interfaces. PHYS 555, PHYS 588, and PHYS 589 recommended.
Learning Outcomes
1. Learn the fundamental concepts of the physics of modern materials, such as crystalline, amorphous, polymeric, nanostructured, layered, and composite materials.
2. Develop an ability to formulate and solve complex problems in the area of advanced physics of modern materials.
3. Develop an ability to to study independently and acquire new knowledge using appropriate learning strategies.

PHYS 691. Quantum Field Theory I
3 Credits (3)
Path integrals, gauge invariance, relativistic quantum mechanics, canonical quantization, relativistic quantum field theory, introduction to QED.
Prerequisites: PHYS 555 and PHYS 562, or consent of instructor.

PHYS 692. Quantum Field Theory II
3 Credits (3)
QED, running coupling constant, QCD, electroweak theory, asymptotic freedom, deep inelastic scattering, basic QCD phenomenology, path integrals in quantum field theory, lattice QCD.
Prerequisite: PHYS 691 or consent of instructor.

PHYS 700. Doctoral Dissertation
1-15 Credits (1-15)
Dissertation.

PL-S-PARALEGAL SERVICES

PL S 160. Legal System for the Paralegal
3 Credits (3)
Introduction to the court system, administrative agencies, functions of law offices, and professional conduct and legal ethics. Restricted to: Community Colleges only.
Prerequisite(s): ACT standard score in English of 16 or higher or a Compass score 76 or higher; for those scoring 13-15 in English on ACT or 35-75 on Compass, successful complete of CCDE 105N or CCDE 110N; for those scoring 12 or below on the ACT standard score in English or 34 or below on the Compass, successful completion of CCDE 105N & CCDE 110N.

PL S 162. The Virtual Law Office
3 Credits (3)
The Virtual Law Office class is a 'hands-on', project oriented course designated to provide the student with the basic law office skills needed to function successfully in a law office setting. The student will gain a practical, working knowledge of the procedures necessary to work in a law office. The skills learned in the class will directly translate to real life situations. Restricted to: Community Colleges only.
Prerequisite(s): PL S 160.

PL S 190. Criminal Law for the Paralegal
3 Credits (3)
Introduction to federal and state criminal law; criminal proceedings, prosecution and defense, sentencing and appeal.
Prerequisite: PL S 160.

PL S 200. Legal Ethics for the Paralegal
3 Credits (3)
Introduction to ethical dilemmas faced in the workforce and the rules of ethics developed by the American Bar Association, various national paralegal organizations, and the Supreme Court of New Mexico. Restricted to: Community Colleges only.
Prerequisite(s): PL S 160.

PL S 203. Immigration Law
3 Credits (3)
Survey of the basics of immigration law including the rights and obligations of citizenship and the naturalization process.
Prerequisite: PL S 160.

PL S 221. Internship I
2-4 Credits (2-4)
Work experience that directly relates to a student's major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships can be paid or unpaid. Students are supervised/evaluated by both the employer and the instructor. May be repeated up to 4 credits.
Prerequisite/Corequisite: PL S 274.
Learning Outcomes
1. To identify and demonstrate professional written and oral communication in a professional legal environment.
2. To identify and demonstrate the interpersonal relationships and the paralegal profession.
3. To identify and apply the knowledge and skills learned in the classroom rules, including the rules of professional responsibility, in a professional legal environment.
4. To demonstrate proficiency in appropriate technology in a professional legal environment.
5. To evaluate the internship experience so that the student is better informed when choosing future employment.

PL S 222. Internship II
1-3 Credits
Continuation of PL S 221. Each credit requires specified number of hours of on-the-job work experience. Restricted to Community Colleges campuses only.
Prerequisite(s): PL S 221.

PL S 231. The Law of Commerce for the Paralegal
3 Credits (3)
Law of contracts, negotiable instruments, bank transfers, secured transactions, debtor-creditor relations, agency, and business types and their formation. Students will study the relevant statutes as well as draft documents associated with these types of legal practice. Restricted to: Community Colleges only.
Prerequisite(s): PL S 160.

PL S 274. Legal Research and Writing for the Paralegal I
3 Credits (3)
Legal research materials and techniques will be identified and studied; introduction to online legal research. Legal documents will be prepared and written based on the student's original research, including a Legal Memorandum.
Prerequisite: PL S 160 and ENGL 1110G.
Learning Outcomes
1. Identify the major legal resources.
2. Broadly identify the different types of jurisdiction.
3. Research and describe statutory law.
4. Research and describe case law through a case brief.
5. Identify and write legal information gained from secondary sources.
6. Identify and draft proper legal citations using Bluebook.
7. Analyze and apply valid legal research.
8. Compose an effective legal memorandum.

PL S 275. Tort and Insurance for the Paralegal
3 Credits (3)
Primary legal principles of tort and insurance law and means of establishing insurance plans, types of torts and insurance, as well as use of specific forms and procedures relating to these areas.
Prerequisite: PL S 160.

PL S 276. Wills, Trusts, and Probate for the Paralegal
3 Credits (3)
Analysis of New Mexico statutes, rules, and cases associated with wills and trusts. Study of the probate process. Emphasis on understanding the documents and the practical application of the law and on preparing and drafting documents to address clients' needs.
Prerequisite: PL S 160.
Learning Outcomes
1. Identify, discuss, and apply selected terms and concepts related to the management of illness or incapacity without using guardianships or conservatorships.
2. Identity, define, examine, and discuss selected terms and concepts related to the management of illness or incapacity using guardianships or conservatorships.
3. Identify, examine, discuss, and apply selected terms and concepts related to the use of a Last Will and Testament in estate planning.
4. Identify, discuss, and apply selected terms and standards related to intestate succession and transferring property outside a will.
5. Identify, discuss, and apply selected terms and concepts related to the use of trusts in estate planning.
6. Identify, discuss, and apply selected terms and concepts in the role of probate courts in estate planning.

PL S 277. Family Law for the Paralegal
3 Credits (3)
Examine techniques for effective lawyer-client interaction including conducting client interviews, and practical application of research and drafting of documents and court pleadings in the field of Family Law. Analysis of laws relating to marriage, divorce, custody, child support, adoption, name change, guardianship, and paternity.
Prerequisite: PL S 160.

Learning Outcomes

1. Examine the role as a family law paralegal and how it will intersect with the different areas of law.
2. Draft a client intake memorandum conveying relevant facts for attorney use.
3. Identify the major terminology for premarital law and traditional marriage law.
4. Draft a premarital agreement.
5. Discuss how a marriage may legally dissolve by annulment and by divorce.
6. Draft a divorce complaint/petition.
7. Demonstrate a working knowledge of the legal issues involved in separations agreements, custody issues, and child support.
8. Draft a separation agreement, child custody agreement, and child support agreement.
9. Describe the different types of parentage and how one can obtain and lose that right. 1
10. Explain the varying steps taken for adoption.

PL S 278. Litigation for the Paralegal
3 Credits (3)
The law of procedure and evidence will be considered through rules and cases. Case situations will be used to identify and solve problems.
Prerequisite: PL S 160.

PL S 279. Legal Research and Writing for the Paralegal II
3 Credits (3)
Continuation of PL S 274. Advanced training in legal research with a focus on analysis, writing, and preparation of pleadings, including a trial court legal brief.
Prerequisite: PL S 274.
Learning Outcomes

1. Research legal topics using the internet.
2. Create a legal research strategy and demonstrate complex legal research.
3. Recognize and implement grammar rules.
4. Draft an effective legal letter.
5. Draft an effective legal brief.
6. Identify and draft proper legal citations using Bluebook.
7. Using advanced legal analysis, draft an effective legal brief.

PL S 298. Independent Study
1-3 Credits (1-3)
Individual studies directed by consenting faculty with prior approval by department head. Restricted to Community Colleges campuses only.
Prerequisite(s): PL S 160.

PLEN-PLANT,ENVRMTL SCIENCES

PLEN 5401. Introduction to AI in Agriculture
3 Credits (3)
This course introduces the fundamental concepts, tools, and techniques used to develop and deploy AI systems relevant to agriculture, food production, natural resources, and the environment. Students will gain experience and familiarity with how AI technologies, such as machine learning, computer vision, and IoT, are applied to real-world problems such as precision farming and ranching, crop disease detection, crop breeding, environmental monitoring, natural resource management, and food systems. The course will incorporate concepts of responsible and ethical use of AI in agriculture and natural resource management.
Learning Outcomes

1. Describe the structure of modern agricultural systems through short essays.
2. Classify agricultural challenges by their impact on productivity using case study analysis.
3. Compare traditional and technology-aided approaches to solving farm-level problems in a written critique.
4. Explain how predictive analytics improve yield estimates by interpreting model outputs from sample datasets.
5. Demonstrate the use of a simple AI tool with agricultural data.
6. Evaluate the effectiveness of AI solutions in published case studies using a structured rubric.
7. Design a prototype AI solution and justify its feasibility.
8. Troubleshoot limitations of AI applications through scenario-based discussions.
9. Identify biases in agricultural datasets through hands-on data audits. 1
10. Discuss ethical dilemmas of deploying AI in agriculture. 1
11. Develop guidelines for responsible AI deployment in agriculture.

PLEN 5403. AI Applications in Agriculture, Plant & Environmental Sciences
3 Credits (3)
Practical application of AI concepts, tools, and techniques to agriculture production systems, crop and livestock management, natural resource management, wildlife, and plant and environmental sciences. The course will consider how AI can be used to inform management of agricultural and environmental systems where temporal and spatial variability, feedbacks, and human decision-making create complex, non-linear systems. Data forms, sources, privacy, and security, will also be considered.
Learning Outcomes

1. Develop understanding of various agricultural science fields including agronomy, horticulture, soils, and environmental science.
2. Work with and analyze various agricultural monitoring and measurement data types.
3. Identify major problems and issues facing current and future agricultural production that can be assisted by Artificial Intelligence and Machine Learning.
4. Understand the evolution of agriculture and how machine learning is shaping the future of farming.
5. Explain how and apply clustering and dimensionality reduction techniques help with soil zoning, crop segmentation, and large-scale data analysis.
6. Explain how and apply machine learning can enhance crop price forecasting, logistics, and reduce post-harvest loss.
7. Examine data privacy, algorithmic bias, and the ethical considerations of AI in agriculture (ethics).
8. Discuss future directions including autonomous systems, AI for climate-smart farming, and next-gen opportunities in Agri-AI.

PLEN 6110. Arid Land Water Resources
3 Credits (2+2P)
The course will cover various issues of relevance to water resources and water supply management within the Southwest US and other semiarid and arid regions. Discussions may include development and sustainability, climate change and drought, socioeconomic and cultural, and transboundary issues. Students will develop literature reviews, draft proposals, and conduct presentations. May be repeated up to 3 credits.

Learning Outcomes

1. Write an original research paper based on a literature review that is conceptualized, researched, and orally presented in class.
2. Conduct literature review research and develop a research proposal.
3. Communicate effectively (both oral and written) including engaging in discussion and debate.
4. Describe contemporary issues in water resources in the Southwest US and other arid lands.

PLEN 6120. Instrumentation in Agronomy
3 Credits (3)
Use of instruments used in research in all areas of agronomy including gas chromatography, high performance liquid chromatography, neutron soil moisture probe, and other instruments. May be repeated up to 3 credits.

PLEN 6130. Introduction to Scientific Writing
3 Credits (3)
Students will learn how to communicate, through written format, to both the scientific community and diverse audiences. Students will be introduced to new technologies and new genres of scientific writing. Students will also learn basic reviewing and writing skills that underlie efficient preparation of literature reviews, scientific manuscripts, project reports, blog-posts, opinion or perspective pieces for more popular venues, advocacy articles for legislators, and descriptive pieces for popular venues such as newspapers, magazines, and broadcast media. Emphasis will be on the communication of experimental findings in peer-reviewed scientific journals.
Learning Outcomes

1. Students will review the basics of rhetoric and the technology of language.
2. Students will learn how to overcome writing barriers and gain confidence in their writing skills.
3. Students will improve their writing skills so that manuscript preparation becomes more efficient and productive.
4. Students will learn professional standards for the conduct of ethical reporting of scientific results.
5. Students will learn to recognize structural and stylistic elements in scientific articles that help researchers achieve certain communication goals.
6. Students will learn the basics of table, figure, diagram, and image presentation in manuscripts.
7. Literature reviews, framed so that they answer an important question in the field, and lead to peer-reviewed publication, may also be prepared. (With permission of the instructor.)

PLEN 6210. Advanced Scientific Writing
3 Credits (3)
Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Students are required to have analyzed data ready for incorporation into a finished manuscript. Students will learn professional standards for the conduct of ethical reporting of scientific results. At the end of the course, a manuscript ready for submission to a peer-reviewed journal will have been completed.
Prerequisites: EPWS/AGRO/HORT/SOIL 5213.
Learning Outcomes

1. Students will review the basics of rhetoric and the technology of language.
2. Students will learn how to overcome writing barriers and gain confidence in their writing skills.
3. Students will improve their writing skills so that manuscript preparation becomes more efficient and productive.
4. Students will learn professional standards for the conduct of ethical reporting of scientific results.
5. Students will learn to recognize structural and stylistic elements in scientific articles that help researchers achieve certain communication goals.
6. Students will learn the basics of table, figure, diagram, and image presentation in manuscripts.
7. Literature reviews, framed so that they answer an important question in the field, and lead to peer-reviewed publication, may also be prepared. (With permission of the instructor.)

PLEN 6225. Advanced Scientific Writing
3 Credits (3)
Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Students are required to have analyzed data ready for incorporation into a finished manuscript. Students will learn professional standards for the conduct of ethical reporting of scientific results. At the end of the course, a manuscript ready for submission to a peer-reviewed journal will have been completed.
Prerequisite: AGRO/HORT/SOIL/EPWS 513, or EPWS 613, or PLEN 6130.
Learning Outcomes

1. Students will learn how to overcome writing barriers and develop a writing schedule.
2. Students will learn how to better organize the results of their experiments into effective tables and figures.
3. Students will improve their writing skills so that manuscript preparation becomes more efficient and productive.
4. Students will learn how to successfully navigate a manuscript through the entire manuscript preparation, revision, review, and publishing process.
5. Students will learn professional standards for the conduct of ethical reporting of scientific results.
6. Students will learn professional standards for conducting objective, rigorous reviews of scientific manuscripts.
7. Students will successfully communicate their research findings to the scientific community through publication in peer-reviewed, scientific journals.

PLEN 6320. Advanced Soil Physics
3 Credits (3)
Advanced treatment of soil physics, modeling, includes working on an existing/new research project, modeling existing or new data, step by step guide on the use of some 1-D and 2-D models. Specific areas of specialization will be field scale variability of soil properties, water flow, solute transport, and plant water relations. May be repeated up to 3 credits.

PLEN 6410. Moisture Heat Contaminant Transport Modeling
3 Credits (3)
Provides clear coverage of the basic principles of heat, moisture and contaminant transport through porous media, and a step-by-step guidance and hands on application on the use of some spreadsheet based and physically based one-and two-dimensional transport models. A similar course does not exist in the college for students that can encourage them to pursue modeling as a means of solving vadose zone and groundwater contamination and remediation problems. Consent of instructor required. May be repeated up to 3 credits.

PLEN 6415. Breeding for Plant Disease Resistance
3 Credits (3)
A practically-oriented course of lectures and discussion on concepts and principles of breeding for disease and pest resistance. Labs familiarize students with preparation, quantification, and application of inoculum to hosts. May be repeated up to 3 credits.

PLEN 6420. Advanced Crop Breeding
4 Credits (3+3P)
Applications of breeding principles to crop improvement. Emphasis on breeding methodologies using modern techniques, including biotechnology. May be repeated up to 4 credits.
Learning Outcomes
1. Apply advanced breeding principles and methodologies (conventional and molecular) to the genetic improvement of crops, including self- and cross-pollinated species.
2. Analyze and interpret scientific literature related to plant breeding, with emphasis on critical evaluation of experimental design, data analysis, and breeding outcomes.
3. Utilize genomics tools such as marker-assisted selection, genome-wide association studies (GWAS), and genomic selection in developing breeding strategies for crop improvement.
4. Demonstrate proficiency in quantitative genetics concepts by estimating genetic parameters (heritability, combining ability, genetic gain) and conducting DNA marker-trait association analyses.
5. Integrate plant breeding theories and practices to effectively communicate solutions in professional settings, including job presentations simulating real-world plant breeding positions.

PLEN 6425. Biometrical Genetics and Plant Breeding
3 Credits (3)
A statistical approach to gene action and population parameters as applied to plant improvement. May be repeated up to 3 credits.

PLEN 6610. Introduction to Environmental and Ecological Modeling
4 Credits (4)
The course introduces approaches to modeling environmental and ecological processes. Provides students with valuable tools for mathematical and simulation modeling of environmental systems.
Learning Outcomes
1. Familiarity with diverse modeling approaches used in ecology and environmental sciences.
2. The skills and confidence to use simulation approaches for problem-solving.
3. Familiarity in using 'R' as a tool for data analysis and simulation modeling.
4. An improved understanding and appreciation of complex environmental and ecological issues.

PLEN 6810. University Teaching Experience
1-3 Credits (1-3)
Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ENVS course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures. Consent of instructor required. May be repeated up to 3 credits.
Learning Outcomes
1. Incorporate a variety of teaching and learning strategies.
2. Coach and encourage students to answer questions and solve problems.
3. Engage students in active and collaborative learning.
4. Implement appropriate assessment strategies.
5. Use technology in teaching and learning.

PLEN 6910. Doctoral Seminar
1 Credit (1)
Current research discussions presented by doctoral level graduate students. Not more than 2 credits toward the degree. May be repeated up to 2 credits.

PLEN 6920. Doctoral Proposal
1 Credit (1)
Current research proposal written by doctoral level graduate students. Not more than 1 credits toward the degree. May be repeated up to 1 credit.

PLEN 6991. Doctoral Research
1-15 Credits (1-15)
Research. May be repeated up to 88 credits.
Learning Outcomes
1. Varies

PLEN 6996. Advanced Topics
1-6 Credits (1-6)
Topics of current interest, designated by title and credit. Maximum of 6 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits.

PLEN 7000. Doctoral Dissertation
1-15 Credits (1-15)
Dissertation. May be repeated up to 88 credits.
Learning Outcomes
1. Varies

POLS-POLITICAL SCIENCE

POLS 1110G. Introduction to Political Science
3 Credits (3)
This course covers fundamental concepts in political science, such as political theories, ideologies, and government systems.
Learning Outcomes
1. Construct reasoned civic discourse to advocate a stance or examine alternate positions.
2. Identify fundamental concepts and theories in politicalscience.
3. Analyze data and information in order to gain a deeper understanding of the material.
4. Articulate how the public influence and are influenced by politics.
5. Identify and compare government systems from democracy to authoritarian, as well as models of analysis of contemporary international relations.

POLS 1111. Introductory Government Seminar
1 Credit (1)
Introduction to the government major. Designed to assist students in planning college experience and preparing for upper division course work and resesarch May be repeated up to 1 credit.
Learning Outcomes
1. This course is designed for the beginning government major.
2. Its goal is to improve your educational experience at the university and within the Department of Government. In this class we hope to develop some basic skills necessary for successful completion of a degree in Government.
3. These include the skills of critical reading, critical writing, oral presentation and research methods.

4. Additionally, we will use this seminar to introduce you to Government faculty, to plan your government degree and to acquaint you with the services and opportunities the department and the university has to offer.
5. Finally, we hope to begin the discussion of where you will go next, when you complete your degree in Government.

POLS 1120G. American National Government
3 Credits (3)
This course explains the role of American national government, its formation and principles of the Constitution; relation of state to the national government; political parties and their relationship to interest groups. This course also explains the structure of the legislative, executive, and judicial branches.
Learning Outcomes
1. Explain the historical and political foundations of the government of the United States;
2. Explain the precursors to, and the development and adoption of the United States Constitution;
3. Explain the United States federal system, the basics of federalism, and the changing relationship of state and federal power;
4. Describe the power, structure and operation of the main institutions of government, namely the legislative, executive, judicial, and the federal bureaucracy;
5. Explain the development and role of political parties and interest groups;
6. Identify the constitutional basis of civil rights and civil liberties and their changing interpretation; and
7. Describe the role of demographics, public opinion and the media in American politics.

POLS 1130G. Issues in American Politics
3 Credits (3)
This course is designed to introduce the students to the contemporary study of American political issues. The course analysis of government policies, examining various approaches to the economy, democracy and the structure and the function of American political institutions.
Learning Outcomes
1. Explain the basic themes and concepts of political science and their application to contemporary issues.
2. Explain the major forces, interests, and institutions of American democratic politics.
3. Describe and define how beliefs, assumptions, and values are influences by factors such as politics, geography, economics, culture, biology, history, and social institutions.

POLS 2120G. International Relations
3 Credits (3)
This course covers the analysis of significant factors in world politics, including nationalism, national interest, political economy, ideology, international conflict and collaboration, balance of power, deterrence, international law, and international organization.
Learning Outcomes
1. Explain the interrelationships between countries and people in the world,
2. Demonstrate an awareness of current events in the world.
3. Describe several theories of International Relations
4. Explain and identify theories of power and decision making among states in the world.
5. Describe and evaluate issues that relate to International Politics, and how individuals are affected by them.
6. Describe the role of Intergovernmental Organizations in International Politics.
7. Identify the role war plays in International Politics.
8. Explain how economics is intertwined with International Politics.
9. Demonstrate an understanding of role of international terrorism and its impacts on global diplomacy. 1
10. Articulate how beliefs, assumptions, and values are influenced by factors such as politics, geography, economics, culture, history, government, and social institutions.

POLS 2996. Special Topics
3 Credits (3)
Specific topics to be announced in Schedule of Classes. Community Colleges only. May be repeated for a maximum of 12 credits.
Learning Outcomes
1. Varies

POLS 300. Political Research Skills
3 Credits (3)
Introduction to methods of political analysis and fundamentals of research design, including basic methods for the collection and analysis of political data.
Learning Outcomes
1. To gain understanding of research design and methods for collection and analysis of political data.
2. To understand how political scientists collect and analyze data in their research.
3. To appreciate the ethical and methodological issues that are common in political science research.

POLS 308. Prepping for Law School Admissions Test
1 Credit (1)
This workshop helps students understand the law school application process and prepare to take the Law School Admissions Test (LSAT). May be repeated up to 2 credits.
Learning Outcomes
1. To prepare students to do well in the Law School Admissions Test (LSAT).
2. To help students understand the law school application process.

POLS 313. Model United Nations
3 Credits (3)
Issues related to the United Nations and international law/organizations through simulations, discussions and research projects.
Prerequisite: GPA of 2.5 or better and consent of instructor.
Learning Outcomes
1. Articulate a strong understanding of the UN in international politics and diplomacy.
2. Demonstrate ability in conducting research, public speaking, and diplomacy skills.
3. Demonstrate literacy in current global issues and the politics and cultures of the countries that students are assigned to represent.
4. Express global understanding and appreciation of cultural activities.

POLS 314. Advanced Model UN
3 Credits (3)
Advanced topics, research and preparation for Model United Nations activities. Consent of instructor required. Restricted to: Main campus only.

Prerequisite(s): POLS 313, minimum GPA 2.5.

POLS 315. Politics and Film
3 Credits (3)
Exploration of political themes, images, and representation in film and other media. May be repeated for a maximum of 6 credits under different subtitles.

POLS 320. Making Public Policy
3 Credits (3)
The course examines how U.S. public policy is made, including the examination of the major institutional and non-institutional players, politics, issues and power critical to the policy process. Interactive discussion sessions bridge theory to policy-making and political action in substantive policy issues. Restricted to: Main campus only. May be repeated up to 3 credits.
Learning Outcomes
1. Develop knowledge of how public policy is made in the United States at various levels of government (federal, state and local) and in relation to demands from interest groups and other stakeholders
2. Develop knowledge of specific public policy areas (such as environmental policy, energy policy, etc.
3. Develop excellence in research skills as well as written and oral communication of topics in the area of domestic policy

POLS 321. Topics in Public Policy
3 Credits (3)
Course examines issues in public policy. May be repeated up to 6 credits.
Learning Outcomes
1. Develop knowledge and analytical skills with regard to particular topics within the subfield of public policy

POLS 324. Environmental Policy & Administration
3 Credits (3)
This course introduces students to the history, development and formation of the central dimensions of environmental policy, politics and administration in the United States. Students also explore key substantive environmental policy issues (energy policy, natural resource and waste management policies, national parks and wildlife protection, and air and water pollution), and the global dimensions of climate change, environmental justice and sustainability. May be repeated up to 3 credits.
Learning Outcomes
1. Develop knowledge of historical and contemporary aspects of environmental policy, politics and administration in the United States
2. Develop ability to critically analyze environmental policy debates
3. Develop ability to effectively communicate analysis of environmental policy and administration in oral and written forms

POLS 325. Education Policy and Politics
3 Credits (3)
Overview of current pressing policy issues and political debates on education in the U.S., including school choice, vouchers, accountability, and affirmative action. Multiple topics and perspectives covered, with political economy as the main approach. May be repeated up to 3 credits.
Learning Outcomes
1. Understand the historical development and changing federal role in education policy, including major federal education laws and reforms.
2. Examine critical issues and trends in federal education policy, as well as the various actors and perspectives involved in education debates and decision-making.
3. Explore policy process theories and apply them to the analysis of federal education events.
4. Study in depth a federal education policy issue by examining its progress through the various stages of the policy process.

POLS 326. Public Policy & Indigenous Communities
3 Credits (3)
Study of historical and contemporary public policy and law that deals with the special legal status of Native American tribes and tribal members.
Learning Outcomes
1. Become familiar with the body of public policy and the area of law that deals with the special legal status of Native American tribes and tribal members
2. Examine the history, the public policy and the law that has impacted the ability of these indigenous communities to exercise their inherent sovereignty
3. Investigate the history, legislation, policies and landmark cases that have shaped this important area of government in the United States

POLS 330. Introduction to Public Administration
3 Credits (3)
Public administration involves the full range of government agencies, non-profit organizations, and private contractors involved in the implementation of public policy at the federal, state, and local level. This course introduces students to the formal study of public administration and will explore major challenges in public service, the management of public and non-profit organizations, administrative ethics and law, leadership theory, and financial and personnel management. Restricted to: Main campus only. May be repeated up to 3 credits.
Learning Outcomes
1. Gain a strong foundation in the the major issues, theories and challenges of public administration
2. Develop skills to critically analyze key problems in public administration
3. Develop ability to effectively communicate the main issues, theories and challenges of public administration in both oral and written form

POLS 331. Special Topics in Public Administration
3 Credits (3)
Special topics in public administration. May be repeated for a maximum of 6 credits under different subtitles.

POLS 335. Management of Nonprofit Organizations
3 Credits (3)
This course provides an introduction to the nonprofit sector, its nature, scope, and functions, and an overview of a range of nonprofit management concerns and practices. Students will confront the critical issues facing the sector. Activities are designed to expand the management skills of students by offering analytical tools and knowledge, and providing opportunities to test the application of these skills. May be repeated up to 3 credits.
Learning Outcomes
1. Gain a strong foundation in the study of nonprofit organizations and management issues
2. Expand students' management skills
3. Gain experience in application of management skills

POLS 343. Congress and the Legislative Process
3 Credits (3)
This class reviews the history, structure, membership, operation, power and culture of the American Congress. Restricted to: Main campus only.

Learning Outcomes

1. Develop knowledge of the functions and goals of the US Congress, specifically how federal legislation is drafted, debated and passed.
2. Develop skills in debating legislative bills through in-class simulations
3. Develop excellence in research and written and oral communication of significant topics in the study of the US Congress and legislative processes

POLS 345. The Supreme Court
3 Credits (3)
This class studies the history and operation of the Supreme Court, as well as landmark cases that have shaped American government and the Court.

POLS 348. Political Parties and Interest Groups
3 Credits (3)
Organization, principles, and functions of political parties and interest groups in the U.S.

POLS 350. Special Topics in American Government
3 Credits (3)
Special topics in American government. May be repeated for a maximum of 6 credits under different subtitles.

POLS 351V. Conspiracy Theories in American Politics
3 Credits (3)
This course explores the origins, evolution, and impact of conspiracy theories in American politics. Students analyze prominent theories, their formation and spread, and their influence on public discourse and political life.

Learning Outcomes

1. Identify and analyze the historical origins and evolution of conspiracy theories in American politics.
2. Evaluate the impact of conspiracy theories on public discourse, political movements, and government policies.
3. Critically assess the evidence and arguments presented in support of various conspiracy theories.
4. Explore the psychological factors that contribute to belief in conspiracy theories and their influence on individual and collective behavior.

POLS 353. Women and Politics
3 Credits (3)
An examination of women's participation in U.S. electoral politics as voters, candidates, and officeholders; political activism in issue-based movements and strategies for affecting public policy; leadership as administrators and managers in public service agencies. Also explores the influence of feminism in changing women's roles socially, legally, and politically.

POLS 354. Native American Politics
3 Credits (3)
This course explores the rights of Native Americans and the politics, policy, and administration of tribal governments with a focus on the history and current relationship between Native Nations and the US political system. Students will learn about Native peoples' cultural responses, forms of resistance, and adaptations to colonization. Restricted to: Main campus only.

Learning Outcomes

1. Develop a strong understanding of historical and contemporary issues in Native American policy in the United States
2. Develop skills to critically analyze debates over Native American policy
3. Develop skills to effectively communicate analysis of Native American policy in oral and written forms

POLS 360. World Politics
3 Credits (3)
Introduction to major theories and concepts for understanding fundamental problems and issues in international relations May be repeated up to 3 credits.

Learning Outcomes

1. Identify and critically evaluate the major concepts (theory) and practices (reality) of International Relations.
2. Identify, define, and critically think about themes and key issues unique to International Relations and evaluate their pros and cons.
3. Develop knowledge, analytical ability and critical thinking about global efforts and challenges to International Relations.

POLS 361. Special Topics in International Relations
3 Credits (3)
Course examines contemporary issues in international relations. Repeatable under different subtitles. May be repeated up to 6 credits.

POLS 362. International Political Economy
3 Credits (3)
Political factors in international economic relations; theories of political economy.

POLS 364. National Security
3 Credits (3)
Analysis of theories, concepts, historical development and current issues of significance for US national security

Learning Outcomes

1. Analyze international issues from a National Security policy perspective and examine major theoretical approaches (or "paradigms") of National Security
2. Critically examine the historical evolution and the most prominent and contemporary challenges of National Security
3. Acquire abilities to synthesize and articulate important debates in the National Security literature and connect them to current national, regional, and global crises.

POLS 365. Introduction to Security Studies
3 Credits (3)
Introduction to the field of security studies, with focus on theories and issues in the study of security in international politics, including emerging 21st century security challenges related to cyberspace, A.I., information warfare and virtual deterrence.

Learning Outcomes

1. Analyze international issues from a security studies perspective and examine major theoretical approaches (or "paradigms") of security studies
2. Critically examine the historical evolution and the most prominent and contemporary challenges of security studies
3. Synthesize and articulate important debates in the security studies literature and connect them to current national, regional, and global challenges and crises.

POLS 366. American Foreign Policy
3 Credits (3)
Formulation, content and rationale of current foreign policies of the U.S. May be repeated up to 3 credits.

Learning Outcomes

1. Develop knowledge of the historical development and current practice of US foreign policy
2. Develop the skills necessary to conduct independent research and written and oral communication of significant topics in US foreign policy

POLS 367. Terrorism
3 Credits (3)
An introductory course using an interdisciplinary framework to explore definitions, historical roots, contemporary manifestations and future trends in political terrorism.

POLS 368. Human Security
3 Credits (3)
Introduction to human security, its focus on security of the individual as opposed to the security of the state since the end of the Cold War and the emergence of global challenges such as environmental crises, public health, and cybersecurity of the virtual self.

Learning Outcomes

1. Identify and critically evaluate the major concepts and practices in human security
2. Define, identify and critically think about key issue areas in human security
3. Develop a coherent body of research in regard to a human security topic of your interest; engage with complex knowledge about human security and apply your analysis to a specific phenomenon.
4. Investigate current, global efforts and challenges in regard to human security.

POLS 370. Comparative Politics
3 Credits (3)
Comparative study of similarities and differences to be found in political systems across the world, with emphasis on the structure and performance of modern states, accountability of government institutions, parties and elections, social movements, and public policies. May be repeated up to 3 credits.

Learning Outcomes

1. Develop knowledge of main issues and concepts in the study of comparative politics.
2. Increase analytical ability to explain similarities and differences between political systems
3. Promote critical thinking regarding the human and environmental consequences of government policies in addressing common public policy problems.

POLS 371. Latin American Politics
3 Credits (3)
Comparative study of government systems and political change in Latin American countries, with focus on challenges of social inequality, democratization, regional integration, relations with the United States, and the rights of women, LGBTQ* community, Indigenous and Afro-descendent peoples. May be repeated up to 3 credits.

Learning Outcomes

1. Develop knowledge of how historical legacies, domestic politics, and global relations shape contemporary politics in Latin America
2. Increase analytical ability to explain similarities and variation in contemporary politics in Latin America
3. Develop critical thinking regarding how to explain the persistence and political implications of socioeconomic inequalities and discrimination in Latin America
4. Develop oral and written communication skills in expressing knowledge, concepts, and comparative analysis

POLS 372. Special Topics in Comparative Politics
3 Credits (3)
Course examines contemporary issues in comparative politics. May be repeated under different subtitles. Restricted to: Main campus only.

POLS 373. Resistance Movements in World Politics
3 Credits (3)
Comparative study of contemporary resistance movements and social protests around the world with a focus on their origins, demands, ideologies, strategies and impacts. May be repeated up to 3 credits.

Learning Outcomes

1. Develop knowledge of concepts of power and resistance movements and their applicability in many parts of the world.
2. Increase analytical ability to explain variation in the motives, strategies and impacts of resistance movements.
3. Promote critical thinking regarding how we choose to address inequalities, injustices and dissent.
4. Develop oral and written communication skills of key concepts and original research.

POLS 378. U.S.-Mexico Border Politics
3 Credits (3)
Analysis of contemporary challenges facing the U.S.-Mexican border, including immigration, binational cooperation, drug trafficking, corruption, human rights violations and security. May be repeated up to 3 credits.

Learning Outcomes

1. Develop knowledge of the main issues and controversies in US-Mexico border politics.
2. Increase analytical ability to explain the implementation and results of border policies for local communities and the environment.
3. Promote critical thinking regarding the merits of alternative policies and future possibilities.

POLS 379. Mexican Politics
3 Credits (3)
Study of the politics and government of contemporary Mexico with focus on challenges of democratization, human rights, public policies, Mexico-US relations, and internal security. May be repeated up to 3 credits.

Learning Outcomes

1. Develop knowledge of main issues and concepts in the study of Mexican politics.
2. Develop ability to conduct online research on current issues in Mexican politics.
3. Promote critical thinking regarding the causes and consequences of criminal violence in Mexican politics and how it may be best addressed.

POLS 380V. Political Ideologies
3 Credits (3)
Introduction to the prevailing political ideologies in the modern world and the ways in which modern nations operating under one or more of these ideologies attempt to answer fundamental questions about the allocation and distribution of rights, liberties, and other things of value. In addition, the course work and discussions attempt to address recent political, social, and economic events in various areas of the world. May be repeated up to 3 credits.

Learning Outcomes

1. To understand the historical origins of major political ideologies and their impacts on different societies.

2. To communicate in oral presentation and written work the main characteristics of different political ideologies in a comparative context.
3. To analyze current uses of political ideologies in government and society.

POLS 382. Classical Political Thought
3 Credits (3)
Analysis of main currents in political thought from ancient Greece and Rome to the high Middle Ages.

POLS 383. Modern Political Thought
3 Credits (3)
Historical and theoretical examination of political ideas and ideologies from Machiavelli to Nietzsche. Topics include liberalism, conservatism, romanticism, communism, and Nihilism.

POLS 385. American Political Thought
3 Credits (3)
Introduction to major American thinkers and historical currents from colonial time to the present. May be repeated up to 3 credits.
Learning Outcomes
1. To understand the nature of the specifically American form of constitutionalism, as compared to its alternatives;
2. To understand the idea of progress in American history, including its colonial origins and its contemporary manifestation under the terms of progressivist ideology;
3. To understand the meaning and origin of American conservatism, and its place in contemporary political life;
4. To understand the dynamics of shifting political and institutional power relationships (including issues of centralization and decentralization) in relation to the above; and
5. To understand the general relationship between cultural phenomena and questions of political order.

POLS 387. Religion and Politics
3 Credits (3)
Survey of major points of interaction between politics and religion in the U.S., using theoretical, historical, and institutional analysis.

POLS 388. Contemporary Political Thought
3 Credits (3)
Introduction to the major thinkers and political arguments in contemporary political thought, from after Nietzsche to the present day. Topics include liberalism, fascism, existentialism, and post-liberal thought.
Learning Outcomes
1. Demonstrate an understanding of the critical debates related to political ideologies and movements from the 20th century to the present day.
2. Evaluate the historical, cultural, and intellectual contexts that have shaped contemporary political thought.
3. Critically examine the historical evolution of political thought in the post-Nietzschean world, including its political, cultural, and intellectual causes.

POLS 390. Special Topics in Public Law
3 Credits (3)
Course examines various issues in public law. May be repeated under different subtitles.

POLS 391. Constitutional Law
3 Credits (3)
The class explores the reasoning and political context of the Supreme Court cases that define the distribution and limits of governmental powers and duties under the U.S. Constitution, including separation of powers and federalism. Restricted to: Main campus only.

POLS 392. Civil Liberties
3 Credits (3)
The course examines the reasoning and political context of major Supreme Court cases defining constitutional rights of free speech, religious liberty, free press and criminal procedural rights.

POLS 394. Judicial Process
3 Credits (3)
Class examines the structure, function and purpose of the American judicial system. Restricted to: Main campus only.

POLS 395. Law and Society
3 Credits (3)
Class critically explores the development, role and impact of law on society, covering different philosophies and theories of law, different world legal systems, and different issue areas of law and society. Restricted to: Main campus only. May be repeated up to 3 credits.
Learning Outcomes
1. To understand the development, role and impac to law on society
2. To gain knowledge of different philosophies and theories of law
3. To gain knowledge of different legal systems around the world and key issues in law and society
4. To gain skills in critical analysis of debates in law and society
5. To gain skills in effective communication of analysis of law and society in oral and written forms

POLS 396. International Law
3 Credits (3)
Nature, growth, and scope of law of nations, rights and obligations of states in peace and war, current issues.

POLS 399. New Mexico Law
3 Credits (3)
Examination of the history, development and implementation of law in New Mexico with an emphasis on legal issues unique to New Mexico. Crosslisted with: CJUS 399. May be repeated up to 3 credits.
Learning Outcomes
1. To understant the unique legal issues of New Mexico through critical examination of the history, development and implementation of law in the state.
2. To develop skills to critically analze debates over legal issues in New Mexico.
3. To develop skills to effectively communicate analysis of legal issues in New Mexico in oral and written forms.

POLS 405. Directed Readings
1-3 Credits
Individualized readings. Course subtitled. May be repeated for a maximum of 6 credits. Graded S/U. Consent of instructor required.

POLS 406. Independent Study
1-3 Credits
Individualized research. Course subtitled. May be repeated for a maximum of 6 credits. Consent of instructor required.

POLS 407. Workshop
1-6 Credits (1-6)
Focus on skills related to careers in government and political science. Specific topics announced in the Schedule of Classes; Only three credits

apply toward government major or minor requirements. May be repeated up to 6 credits.

Learning Outcomes

1. Develop skills related to careers in government and public service

POLS 410. Internship
1-12 Credits
Hands-on experience working with public agencies, political campaigns, elected officials & non-profits. May be repeated for a maximum of 12 credits; only 3 credits apply toward government major or minor requirements. Consent of instructor required. Graded: S/U.
Prerequisite(s): Completion of 12 government credits, 2.5 GPA, junior and above standing.

POLS 411. Service Learning Experience
3 Credits (3)
Experiential learning through a community service project. May be subtitled to reflect service activity. May be repeated for a total of 6 credits; only 3 credits apply toward government major or minor requirements.
Prerequisites: completion of 12 government credits, junior or above standing, and consent of instructor.

POLS 412. Practicum in Student Government
3 Credits (3)
Research of issues in student government. Consent of instructor required. Graded: S/U.
Prerequisite(s): Student government participation, completion of 12 POLS credits, junior or senior standing.

POLS 415. Senior Seminar
2 Credits (2)
Review and integration of political skills acquired in the Government Department. Students will focus on critical essay writing and oral presentation of a synthesis of knowledge gained from prior departmental coursework May be repeated up to 2 credits.

Learning Outcomes

1. To integrate knowledge from various classes during the students' coursework as a Government major.
2. To effectively communicate in oral and written forms a synthesis of main issues, theories, scholars and actors in the various sub-fields of the government major.

POLS 469. Globalization
3 Credits (3)
Analysis of the globalization process. Covers theories of globalization, the global economy, political globalization, global culture, transnational social movements, transnational migration and world labor market, global cities, and local-global linkages. Same as SOCI 4460. May be repeated up to 3 credits.

POLS 493. Mass Communications Law
3 Credits (3)
Examination of legal issues relating to mass media in the United States. Invasion of privacy, libel, sedition, copyright, and advertising regulation. Same as JOUR 493 and COMM 493.

POLS 502. Research Methods in Government
3 Credits (3)
Contemporary methods of political analysis, including mathematical and statistical techniques and computer applications. MPA students must complete this class with a B- or better. MA students must complete either POLS 502 or POLS 503 with a B- or better.

POLS 503. Qualitative Research Methods
3 Credits (3)
An overview of qualitative research methods such as fieldwork, ethnography, content analysis, case studies, focus groups and grounded theory. Introduces students to epistemology (the study of knowledge) and to basic components of research design. Explores activist scholarship, ethical dilemmas in research, and software tools for computer assisted analysis. Especially useful for students preparing theses, dissertation, or other research projects. MA students must complete either POLS 503 or POLS 502 with a B- or better.

POLS 505. Directed Readings
1-3 Credits
Selected topics in government. May be repeated for a total of 6 credits. Graded S/U.
Prerequisite: consent of instructor.

POLS 510. Internship
1-6 Credits
Assignment with a public agency and research report. Only 3 credits apply toward degree requirements. Graded S/U.
Prerequisite: approval of graduate advisor.

POLS 517. Selected Topics in Government
3 Credits (3)
Selected issues which may cross sub-fields of the discipline. May be repeated for a total of 6 credits.

POLS 519. Proseminar in Public Administration
3 Credits (3)
Review of classic and contemporary theory and practice in public administration. Application of written and oral skills to the presentation and defense of essays on various aspects of public administration. To be completed with a B- or better.
Prerequisite(s): 30 credits of M.P.A.

POLS 522. Public Sector Economics I
3 Credits (3)
Introduction to the economic rationale for government intervention in the economy and the effects of that intervention on economic agents and the economy in general. Emphasis on the expenditure side of government policies. Same as AEEC 522.

POLS 524. Introduction to the Nonprofit Sector
3 Credits (3)
Advanced study of the nature and operation of the nonprofit sector and how it interacts with public policy. The course provides an overview of the nonprofit sector, its scope, structure, history, values, distinct contributions to society, place in the government service delivery systems, and selected public policy issues that affect it.

Learning Outcomes

1. Demonstrate an understanding of the unique nature of the nonprofit sector, and distinguish it from the public (government) and private (business, for-profit) sectors in form and delivery systems.
2. Provide a description of the historical, theoretical, and legal perspectives on nonprofit organizations, as well as current trends and challenges facing the sector.
3. Evaluate the scope of the nonprofit activity in the U.S. and demonstrate an understanding of the major nonprofit subsectors, such as health care, arts, social service, and religious organizations.
4. Determine how nonprofit organizations and business firms can constructively learn from one another.
5. Explain and justify the role and function of nonprofit organizations and the myriad ways in which nonprofit organizations serve our communities and enhance our society.

POLS 525. Seminar in the Nonprofit and Philanthropic Sector
3 Credits (3)
Advanced study of the role of philanthropy and nonprofit organizations in society. Addresses the theoretical and academic foundations of research literature in the field from a variety of disciplines.

Learning Outcomes
1. A better understanding of the various issues and topics of the Nonprofit/Philanthropic sector studied by scholars in the field.
2. An ability to discuss major findings and theories in the field of Nonprofit and Philanthropic Studies.
3. The knowledge to discuss and critique research designs and methods that have been utilized in Nonprofit/Philanthropic Studies.
4. An ability to frame new research questions (and/or, extend knowledge) related to nonprofit organizations and philanthropy.

POLS 526. Performance Management of Public and Nonprofit Organizations
3 Credits (3)
Advanced study of the theory and practice of performance measurement and management, how to select key performance indicators, implement a performance management system and use performance measures. Examines importance of leadership roles and accountability in managing public and nonprofit organizations.

Learning Outcomes
1. To understand the inextricable connection between performance measurement and strategic planning in developing effective organizations.
2. To develop the skills to implement performance management systems in organizations, regardless of level of authority within these organizations.
3. To gain skills to adeptly navigate organizational challenges that impede implementation of performance management systems.

POLS 527. Issues in Public Management
3 Credits (3)
Selected issues in public management. May be repeated under different subtitles for a total of 6 credits.

POLS 530. Seminar in Public Policy
3 Credits (3)
Survey of the political, administrative, and technical aspects of policy making in government. MA students taking POLS 530 as part of their core requirements must complete the class with a B- or better.

POLS 536. Public Policy and Indigenous Communities
3 Credits (3)
Indigenous communities are found throughout North, Central and South America. This course addresses the history, development and governance of these communities. Different sections of the course may choose to focus on different indigenous communities. All courses will consider the principles of governance internal to indigenous communities as well as the governing relationships between indigenous communities and modern states.

POLS 537. Issues in Public Policy
3 Credits (3)
Selected issues in public policy. May be repeated under a different subtitle for a total of 6 credits.

POLS 540. Seminar in Public Administration
3 Credits (3)
Survey course on the theory and practice of program, personnel, and financial management in government and the private, nonprofit sector. MA students taking POLS 540 as part of their core requirements must complete the class with a B- or better.

POLS 541. Public Budgeting
3 Credits (3)
Budgetary processes; budget classification, analysis, and evaluation. MPA students must complete this class with a B- or better.

POLS 542. Public Sector Human Resources Management
3 Credits (3)
Exploration of public personnel systems and practices, including job analysis, compensation, performance evaluation, recruitment, and labor-management relations. MPA students must complete this class with a B- or better.

POLS 543. Skills Workshop
1-6 Credits (1-6)
Focus on management of task skills in selected areas of public administration. Specific topics will appear in the Schedule of Classes. May be repeated up to 6 credits.

Learning Outcomes
1. Develop specific skills related to the practice of public administration

POLS 544. Public Policy Analysis
3 Credits (3)
Environment of policy analysis; various descriptive and quantitative designs for analyzing and evaluating public policy. Problems of policy analysis. MPA students must complete this class with a B- or better.
Prerequisite(s): POLS 502 or consent of instructor.

POLS 547. Government Organizations
3 Credits (3)
Historical overview and present applications of organization theory in public management. MPA students must complete this class with a B- or better.

POLS 548. Public Sector Leadership
3 Credits (3)
Theories and styles of leadership.

POLS 549. Ethics in Government
3 Credits (3)
Examination of standards, perspectives, and issues for ethical decision-making in public agencies. MPA students must complete this class with a B- or better.

POLS 550. Seminar in American Politics
3 Credits (3)
Overview of American political institutions. Includes study of American constitutional theory; legislative, executive, and judicial functions and processes; political parties and interest groups; and public policy formulation. MA students taking POLS 550 as part of their core requirements must complete the class with a B- or better.

POLS 560. Seminar in International Relations Theory
3 Credits (3)
A critical overview of leading approaches and controversies in international relations theory. The purpose of the course is to introduce students to contending theoretical perspectives and conceptual frameworks that help make sense of contemporary world politics. MA students taking POLS 560 as part of their core requirements must complete the class with a B- or better.

POLS 563. Issues in International Relations
3 Credits (3)
Selected issues in international relations. May be repeated under a different subtitle for a total of 6 credits.

POLS 564. Advanced National Security Policy
3 Credits (3)
Major topical, theoretical, and regional issues in national security policy.

POLS 565. Advanced Issues in Security Studies
3 Credits (3)
Advanced study of theories, concepts and key issues in the area of security studies, including historical security problems and emerging 21st century challenges related to cyberspace, A.I., information warfare and virtual deterrence.

Learning Outcomes
1. Analyze international issues from a security studies perspective and examine major theoretical approaches (or "paradigms") of security studies.
2. Critically examine the historical evolution and the most prominent and contemporary challenges of security studies.
3. Synthesize and articulate important debates in the security studies literature and connect them to current national, regional, and global challenges and crises.

POLS 567. Advanced Issues in Terrorism
3 Credits (3)
Advanced study of theories of the causes of terrorism, responses to varieties of terrorism, and major issues in the study of terrorism, historically and today

Learning Outcomes
1. Examine core ideas in studies of terrorism (theoretically and factually)
2. Introduce and develop an understanding about the causes of terrorism and possible solutions
3. Acquire abilities to gain knowledge, think critically, analytically, and synthetically of countries and violence, and varieties of terrorism over time and throughout the world.

POLS 568. Advanced Issues in Human Security
3 Credits (3)
Advanced study of major theories, concepts and issues in the study of human security, such as environmental crises, public health, and cybersecurity of the virtual self.

Learning Outcomes
1. Identify and critically evaluate the major concepts and practices in human security;
2. Define, identify and critically think about key issue areas in human security.
3. Develop a coherent body of research in regard to a human security topic of your interest; engage with complex knowledge about human security and apply your analysis to a specific phenomenon.
4. Investigate current, global efforts and challenges in regard to human security.

POLS 569. Advanced Issues in Globalization
3 Credits (3)
Analysis of the globalization process. Covers theories of globalization; global economy; political globalization; global culture; transnational social movements; transnational migration and world labor market; global cities; local-global linkages. Same as SOCI 5460. May be repeated up to 3 credits.

POLS 570. Seminar in Comparative Politics
3 Credits (3)
Examination of methods used for comparing various types of political entities. Investigation of criteria needed to examine a concept across cultures or national boundaries. MA students taking POLS 570 as part of their core requirements must complete the class with a B- or better.

POLS 574. Contemporary Comparative Studies
3 Credits (3)
Major topical, theoretical, and regional issues in international politics. May be repeated once.

POLS 578. Seminar in the U.S.-Mexican Border
3 Credits (3)
An analysis of the political environment along the United States-Mexico border and a survey of the literature available for a number of contemporary issues.

POLS 579. Seminar in Mexican Politics
3 Credits (3)
Advanced research on politics and government of Mexico.

POLS 580. Seminar in Political Theory
3 Credits (3)
Examination of major issues in political theory, including democracy, sovereignty, classical and modern traditions of thought. May be repeated with different subject matter. MA students taking POLS 580 as part of their core requirements must complete the class with a B- or better.

POLS 587. Seminar in Religion and Politics
3 Credits (3)
Historical, theoretical and comparative analyses of the interaction between politics and religion.

POLS 593. Issues in Public Law
3 Credits (3)
Selected issues in public law. May be repeated under a different subtitle for a total of 6 credits.

POLS 596. International Law
3 Credits (3)
Nature, growth and scope of law of nations; rights and obligations of states in peace and war; current issues.

POLS 598. Special Research Programs
1-3 Credits
Individual investigations either theoretical, analytical or experimental. Three credits may be taken per semester for a total of 6 credits for thesis students, and 9 credits for non-thesis students. Consent of instructor required.

POLS 599. Master's Thesis
1-15 Credits
Thesis.

PORT-PORTUGUESE

PORT 1110. Portuguese I
3 Credits (3)
Designed for students with no previous exposure to Portuguese, this course develops basic listening, speaking, reading, and writing skills. This is an introductory course aimed at teaching the student to communicate in Portuguese in everyday situations.

Learning Outcomes
1. Students can communicate and exchange information about familiar topics using phrases and simple sentences, sometimes supported by memorized language.
2. Students can handle most short social interactions in everyday situations by asking and answering simple questions.
3. Students can write short messages and notes on familiar topics related to everyday life.

4. Students can often understand words, phrases, and simple sentences related to everyday life.
5. Students can recognize pieces of information and sometimes understand the main topic of what is being said.
6. Students can understand familiar words, phrases, and sentences within short and simple texts related to everyday life.
7. Students can sometimes understand the main idea of what they have read.
8. Students can make connections between beliefs, behaviors and cultural artifactsof the Portuguese-speaking world, and make informed cross-cultural comparisons.

PORT 1120. Portuguese II
3 Credits (3)
A continuation of Portuguese I, students will develop a broader foundation in skills gained during the first semester, including understanding, speaking, reading and writing Portuguese. Students will also gain more in- depth knowledge of Portuguese-speaking cultures.
Prerequisite: C or better in PORT 1110 or consent of instructor.
Learning Outcomes
1. Students can participate in conversations on a number of familiar topics using simple sentences.
2. Students can handle short social interactions in everyday situations by asking and answering simple questions.
3. Students can write about familiar topics and present information using a series of simple sentences.
4. Students can understand the main idea in short, simple messages and presentations on familiar topics.
5. Students can understand the main idea of simple conversations that they overhear.
6. Students can understand the main idea of short and simple texts when the topic is familiar.
7. Students can begin to narrate and describe simple events in the past.
8. Students can make broader connections between beliefs, behaviors and cultural artifacts of the Portuguese-speaking world, and make informed cross-cultural comparisons.

PORT 364V. Brazilian Culture Through Popular Music
3 Credits
This course will present students with an overview of Brazilian popular music, from the late nineteenth century to the present day, concentrating on the 60s, 70s, 80s of the 20th Century. It aims to discuss topics about cultural aspects and current issues in Brazil. It is designed to give students some introductory experience in Portuguese language and emphasizes skill development and refinement in the area of critical reading and writing.
Learning Outcomes
1. Be able to identify and distinguish the Brazilian musical styles including in the course.
2. Informatively discuss the main historical events in Brazil from the XVI to the XXI Century.
3. Be able to link the different musical styles to specific periods and events in Brazilian history.
4. Evaluate Brazil's the triple heritage (Indigenous, European, and African) and how it reflects on the notion of being Brazilian.
5. Demonstrate insight of how globalization has influenced Brazilian music, as well as of the transnational aspects of Brazilian music.
6. Be able to use the previous knowledge to discuss current notions of Brazilian identity, as well as recent developments in Brazilian music and society.
7. Be able to informatively relate Brazilian culture to their own.

PORT 453. Independent Luso-Brazilian Studies
1-3 Credits (1-3)
Individualized, self-paced projects for advanced students in Luso-Brazilian studies. May be repeated up to 12 credits. Consent of Instructor required.

PORT 513. Graduate Portuguese for Romance Language Students I
3 Credits (3)
Portuguese for beginners at the graduate level. May be completed on campus or via Study Abroad. Credit can be applied towards fulfilling the second language requirement. Credit is not accepted towards any graduate level major or minor.

PORT 514. Graduate Portuguese for Romance Language Students II
3 Credits (3)
Portuguese for beginners at the graduate level. May be completed on campus or via Study Abroad. Credit can be applied towards fulfilling the second language requirement. Credit is not accepted towards any graduate level major or minor.
Prerequisite(s): Language placement exam or C or better in PORT 513, or consent of instructor.

PSYC-PSYCHOLOGY

PSYC 1110G. Introduction to Psychology
3 Credits (3)
This course will introduce students to the concepts, theories, significant findings, methodologies, and terminology that apply to the field of psychology.
Learning Outcomes
1. Explain how the scientific method and psychological research methodologies are used to study the mind and behavior.
2. Recall key terms, concepts, and theories in the areas of neuroscience, learning, memory, cognition, intelligence, motivation and emotion, development, personality, health, disorders and therapies, and social psychology.
3. Explain how information provided in this course can be applied to life in the real world.
4. Identify the major theoretical schools of thought that exist in psychology as they relate to the self, the culture, and the society.

PSYC 1115. Introduction to the Psychology Major
1 Credit (1)
This course is designed to give Psychology majors the knowledge and tools they need to get the most out of the major and assist them in making informed decisions about career choices in Psychology. There are two main goals for this course. The first is to provide students with helpful tools and resources to enhance their experience as a Psychology major. The second goal is to delineate the knowledge and skills that students are expected to acquire with a Psychology degree and to convey how these can be applied in their future academic, professional, and personal endeavors beyond graduation. During the semester, students will discuss the subdisciplines of Psychology and explore career options with varying levels of education. Students will learn about course requirements for the Psychology major and experiential learning opportunities available outside the classroom. This 1-credit course is required for Psychology majors. It is recommended that students take

this course as soon as they declare Psychology as their major. This course may be taken in conjunction with Introduction to Psychology.
Prerequisite/Corequisite: PSYC 1110G.

Learning Outcomes

1. Demonstrate knowledge and understanding of the subdisciplines of Psychology.
2. Demonstrate knowledge and understanding of the requirements of the Psychology major and experiential opportunities available to Psychology majors.
3. Identify career opportunities available to individuals with varying levels of education in Psychology and related fields (e.g., BA, MA, PhD, etc.).
4. Adopt strategies to prepare for future success in a job search or graduate school application.
5. Exhibit information literacy skills (e.g., literature searches, use of APA format) that will facilitate success in future Psychology courses.
6. Identify personal attributes as a student, areas of Psychology that are aligned with personal strengths, and strategies to make the most of personal strengths as a student.

PSYC 2110. Social Psychology
3 Credits (3)

This course is an introduction to the scientific study of human social influence and interaction, and explores how an individual's actions, emotions, attitudes and thought processes are influenced by society and other individuals. May be repeated up to 3 credits.
Prerequisite: PSYC 1110G, MATH 1215, and ENGL 1110G.

Learning Outcomes

1. Identify concepts, theories, scientific methods, and research findings relevant to social psychology.
2. Explain how situational, social, and individual factors influence behavior.
3. Apply social psychological concepts to real-life events, current social issues and problems, and one's own life.

PSYC 2120. Developmental Psychology
3 Credits (3)

Study of human physical and psychological change and stability from a lifespan development perspective. May be repeated up to 3 credits.
Prerequisite: PSYC 1110G, MATH 1215, and ENGL 1110G.

Learning Outcomes

1. Explain theories, methods and research findings of lifespan developmental psychology.
2. Describe the interaction between physical, cognitive, and psychosocial development across the lifespan.
3. Compare and contrast major developmental theories and discuss what each brings to or adds to the study of lifespan developmental psychology.
4. Identify factors that influence psychological development across the lifespan.
5. Apply basic principles of developmental psychology to one's own life experiences.
6. Analyze historical and cultural factors that influence development across the lifespan.

PSYC 2210. Abnormal Psychology
3 Credits (3)

This course provides students with an introduction to the field of abnormal psychology. Subject areas include history, methods, theories, etiologies, classification and treatment of disorders. May be repeated up to 3 credits.
Prerequisite: PSYC 1110G, MATH 1215 and ENGL 1110G.

Learning Outcomes

1. Recognize terms used within the field of abnormal psychology.
2. Compare various methods for defining abnormal behavior.
3. Evaluate the development of classification systems that define "normal" and "abnormal" from historical, social, and cultural contexts.
4. Critically evaluate the symptoms and etiologies of mental health disorders in the current psychological diagnostic system.
5. Describe treatment modalities for mental health disorders.
6. Identify biological and psychological processes in mental health disorders.

PSYC 2220. Cognitive Psychology
3 Credits (3)

The course provides an overview of human cognitive processes such as attention, perception, memory, language, categorization, decision-making, reasoning, and problem solving. Includes methods, theories, and applications. May be repeated up to 3 credits.
Prerequisite: PSYC 1110G, MATH 1215, and ENGL 1110G.

Learning Outcomes

1. Describe research findings in the major areas of human cognition.
2. Differentiate the research methods used to study the various topics in cognitive psychology.
3. Apply theories of cognition to the results of laboratory research.
4. Apply the research on cognitive psychology to topics in the real world.

PSYC 2221. Applied Psychology
3 Credits (3)

Explanation of the psychological principles of everyday living. Emphasizes motivation, learning of intelligent behavior, and applications of psychology to social issues. Community Colleges only.

Learning Outcomes

1. The objective of this course is to orient students to the personality characteristics, interpersonal competencies, ethical decision-making skills, and other professional traits associated with pursuing a career in a helping profession.
2. Identify the requirements for becoming a helping professional, characteristics of a skilled helper, and cultural factors that impact helping professionals
3. Explain your personal strengths and weaknesses as a potential helper.
4. Demonstrate appropriate helping strategies based upon the special characteristics of clients.
5. Compare the capabilities that individual, family, group, community, and online interventions offer you as a future helper.
6. Identify the ethical and legal issues that impact helping professionals
7. Analyze the potential impact of your future ethical and professional standards as a helping professional
8. Explain how your role as a helping professional is impacted by your professional affiliation and ethical principles
9. Analyze how worsening personal problems and increasing stress can impact the kinds and quality of our responses to life and the people around us.

PSYC 2230. Psychology of Adjustment
3 Credits (3)

This course focuses on the individual's adjustment to society, and the application of psychological principles to the understanding of adjustment.

Learning Outcomes

1. Explain the internal and external factors associated with the psychology of adjustment.
2. Evaluate contributions from psychology to adjustment concepts and processes.
3. Describe the different explanations of how individuals adjust to their environments.
4. Describe how self-identities develop and how they affect relations with others.
5. Identify resources available for assistance with adjustment-related concerns.

PSYC 2250. Brain and Behavior
3 Credits (3)

A general survey of the biological foundations of behavior and mental processes. Students will gain an understanding of anatomy, physiology, and chemistry of the nervous system and their relationships to human behavior. May be repeated up to 3 credits.

Prerequisite: PSYC 1110G, MATH 1215 and ENGL 1110G.

Learning Outcomes

1. Identify and describe basic neuroanatomical structures and functions.
2. Identify and describe chemical processes of the nervous system.
3. Apply course concepts to psychological processes, such as learning, memory, sensation, perception, drive states, sleep, and language.
4. Apply course concepts to psychological disorders, such as schizophrenia and mood and anxiety disorders.
5. Describe the techniques used to study the relationship between brain and behavior.

PSYC 2311. A Study of Substance Abuse through Learning
3 Credits (3)

Physiological and psychological impact of drug use on human behavior. Emphasizes practical applications of intervention and prevention in the community. Community Colleges only.

Learning Outcomes

1. Through readings and discussions, students will be able to describe the role that gender, ethnicity, and age have in alcohol and drug use.
2. Through readings and discussions, students will be able to learn past and current perspectives of addiction.
3. Through readings, discussions and student presentations, students will be able to distinguish between different types of abuse-able drugs and be able to classify them.
4. Through readings, discussions, lectures and guest speaker's students will be able to describe the role of addiction and criminal behavior.
5. Through readings and discussions, students will be able to discuss the Models and Theories of Drug Dependence and Addiction.
6. Through readings, discussions and evaluation of case studies students will be able to discuss the definitions of Substance Abuse, Dependence Addiction.
7. Through readings and discussions, students will be able to acquaint themselves with the effects of Addictive Behavior on Family Systems.
8. Through readings discussions, students will be able to Discuss Disorders Co-Occurring with Substance Abuse
9. Through readings and community service learning outing, students will be able to discuss how important the concepts of Prevention, Intervention and Treatment in drug addiction.1
10. Through readings and community service learning outing students will be able to discuss Alcohol/Drug Recovery Treatment Relapse Prevention 1
11. Through completion of Service Learning and field assignment students will be able to discuss the role of AA/NA in Recovery Treatment. 1
12. Through attendance of a Drug Court Hearing students will be knowledgeable of the role of Drug Courts in prevention and treatment of drug addiction.

PSYC 3110. Experimental Methods
4 Credits (3+1P)

The basic skills of literature search, experimental design, research methodology, and research reporting are emphasized; includes laboratory.

Prerequisite: PSYC 1110G, PSYC 1115, PSYC 2110, PSYC 2220, and either MATH 1350G, MATH 2350G, or A ST 311.

Learning Outcomes

1. Identify, discuss, synthesize, and present original scientific literature (journal articles) on specific psychological research topics.
2. Pose a testable research question and suggest falsifiable hypotheses.
3. Design and conduct a behavioral research study that satisfies the scientific goals of description, prediction, and explanation.
4. Draw conclusions based on the results of statistical analyses.
5. Write up a behavioral research study in APA format.
6. Discuss and apply the ethical considerations pertaining to conducting psychological research.
7. Apply the techniques of psychological research to real-world societal concerns.

PSYC 3120. Psychological Measurement
3 Credits (3)

The objective of this class is for you to develop broad conceptual knowledge, as well as specific concrete skills, when developing, analyzing and interpreting psychological measures and the data that come from them. We will learn through in-depth discussion and hands-on applications: e.g., exploring the purpose and meaning of measurement, taking a wide range of actual measures, analyzing measurement data in a variety of different ways. Overall, you will learn from this class whether a measure/test is measuring what we think it should, on the basis of reliability, validity, and fairness.

Prerequisite: PSYC 1110G, PSYC 1115, PSYC 2110, PSYC 2220.

Learning Outcomes

1. Learn how to develop, analyze, and interpret psychological measures.
2. Learn how to determine whether a measure/test is measuring what we think it should, on the basis of reliability, validity, and fairness.

PSYC 3210. Perception
3 Credits (3)

Primary emphasis on vision. Topics include measurement of sensations, development of visual-motor coordination, reading, speech perception, picture perception, illusions, 3-dimensional space, and causes and consequences of visual abnormalities.

Prerequisite: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 3110.

Learning Outcomes

1. To provide a comprehensive knowledge of topics within sensation and perception, including topics in vision, hearing, smell, taste, and touch.

PSYC 3220. Learning
3 Credits (3)
Covers: habituation, Pavlovian conditioning, Thorndikian learning, stimulus generalization, transfer of training, and the learning and forgetting of related and unrelated material.
Prerequisite: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 3110.

Learning Outcomes

1. Recognize and distinguish between various learning situations, especially classical/Pavlovian and Instrumental learning and their many facets and applications.
2. Identify some of the key conditions necessary for learning to take place, and that may prevent learning from taking place – rather more nuanced than most intro psych books suggest.
3. Identify and evaluate different basic situations to suggest how learning might be structured to cause changes in behavior in both humans and other animals.

PSYC 3230. Memory
3 Credits (3)
Examines facets of human memory from the information processing viewpoint, including encoding, storage, and retrieval and memory-aiding techniques.
Prerequisite: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 3110 or consent of instructor.

PSYC 3310. Emotion
3 Credits (3)
An overview of the past century of research on human emotion from WIlliam James to Antonio Damasio. Explores a cognitive science perspective on emotion that includes questions about developmental, physiological, and evolutionary aspects of emotion and an exploration of the proximate and ultimate functions of emotion. Topics range from understanding the feeling component of emotion to understanding the role of facial displays of emotion.
Prerequisite: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311G, and PSYC 3110 or consent of instructor.

PSYC 3320. Psychology of Personality
3 Credits (3)
Introduces personality theories and supporting research. Psychoanalytic, physiological, and behavioral theories as they apply to personality are examined. Focuses on normal personality functioning.
Prerequisite: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 3110.

PSYC 3330. Sexual Behavior
3 Credits (3)
Examines viewpoints of the evolution, control and function of human sexual behavior. Includes human sexuality, reproduction, male-female conflicts and the social implications of sex.
Prerequisite: PSYC 1110G, MATH 1215, and ENGL 1110G.

PSYC 3410. Health Psychology
3 Credits (3)
Life stress, surgical stress, coronary-prone behavior, biofeedback, pain control, psychosocial approaches to geriatrics and cancer, behavioral treatments for addictions, obesity, and interpersonal issues in health care.
Prerequisite: PSYC 1110G.

PSYC 3510. Psychology and the Law
3 Credits (3)
Discretionary practices in the judicial system including pretrial procedures, jury selection, jury decision making, eyewitness testimony, insanity, expert witnesses, and probation judgments.
Prerequisite: PSYC 1110G.

PSYC 3520. Evolutionary Psychology
3 Credits (3)
This course introduces the student to the science of Evolutionary Psychology. In this class we will explore how evolutionary psychologists think about a variety of topics ranging from our capacity for (and appreciation of) art, emotions, and beauty to an exploration of the "design" of our minds in regards to mating, status striving, social behavior and cultural production.
Prerequisite: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311G, and PSYC 3110 or consent of instructor.

PSYC 359. Psychology of Gender
3 Credits (3)
Examines theories and research on the psychological functioning of women and men in North American society, including influential theories of gender in psychology and current controversies in the psychological literature. Topics include those unique to women and unique to men in development across the lifespan, work, physical and mental health, sexuality, victimization, gender stereotypes, gender comparisons in abilities and personality, and biological, social, and cultural influences on behavior. Crosslisted with: GNDR 359.
Prerequisite: PSYC 1110G.

PSYC 3910. Advanced Research Seminar
4 Credits (2+4P)
Psychological research in conjunction with designing, conducting, writing, and presenting an independent research project. May also include various computer applications. Will discuss issues regarding application to graduate programs. Course should be taken no later than the first semester of senior year. May be repeated up to 4 credits.
Prerequisite: PSYC 3110.

PSYC 3996. Special Topics
1-3 Credits
May be taken under different subtitles announced in the Schedule of Classes for unlimited credit. May not be taken twice under the same subtitle. May be repeated up to 12 credits.
Prerequisite: PSYC 1110G.

PSYC 4210. Thinking
3 Credits (3)
Research and theory pertaining to human thinking and problem solving. Effective problem-solving methods and common obstacles to problem solving are analyzed.
Prerequisite: PSYC 1110G and PSYC 3110.

PSYC 4220. Human-Computer Psychology
3 Credits (3)
Theories, methodologies, and data from psychology applicable to interface design, with an emphasis on construction and application of conceptual psychological models.
Prerequisite: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 3110 or consent of instructor.

PSYC 4510. History & Systems of Psychology
3 Credits (3)
History of the scientific study of the mind and behavior. Covers the historical origins of philosophical and scientific approaches to

Psychology and the development of influential schools of thought in psychology from the Classical Period through the Modern Era.
Prerequisite: PSYC 1110G and PSYC 3110.

Learning Outcomes

1. Apply knowledge of important historical events/figures in scientific psychology by demonstrating an ability to explain how past ideas/thinkers/events have shaped current theory and methodology in scientific psychology.
2. Explain key ideas and concepts in contemporary scientific psychology by demonstrating an ability to draw connections between our current understanding and earlier approaches to the study of the mind.
3. Generate sophisticated arguments/opinions regarding contemporary questions in scientific psychology by demonstrating an ability to frame questions that draw upon a sophisticated understanding of the history of scientific psychology, while also being able to distinguish between well-informed and naïve answers to those questions.

PSYC 4991. Research
1-3 Credits
Individual research projects supervised by a department faculty member. May be repeated up to 6 credits.
Prerequisite: PSYC 3110 and consent of instructor.

Learning Outcomes

1. Varies.

PSYC 4992. Directed Readings
1-3 Credits
May be repeated up to 6 credits.
Prerequisite: PSYC 1110G and consent of instructor.

PSYC 4996. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. May be repeated up to 12 credits.

Learning Outcomes

1. Varies.

PSYC 4998. Field Experience
1-3 Credits
Working with preschool, juvenile delinquent, handicapped, aged, convict, or mentally ill. Approximately five hours scheduled work per week per credit. May be repeated up to 6 credits.
Prerequisite: 6 psychology credits and consent of instructor.

Learning Outcomes

1. Varies.

PSYC 4999. Senior Capstone Seminar in Psychology
1 Credit (1)
In an architectural context, a capstone is the top-most stone that completes a building. In an academic context, a capstone is the final class that completes a student's curriculum. Capstone classes provide students with an opportunity "to demonstrate comprehensive learning in their major through some type of product or performance" (Palomba & Banta, 1999, p. 124). In other words, a capstone is a class in which senior psychology majors are required to pull together what they have learned in their previous classes and use this integrating experience to demonstrate they are capable of doing what they should be able to do when they graduate from the program (e.g., think critically and develop a realistic plan to pursue a career in psychology or a psychology-related field). This process serves a dual purpose. First, it allows psychology majors with a final opportunity to practice and demonstrate the skills they will need to succeed after graduation on the job or in graduate school. Second, it provides the Psychology Department with a final opportunity to assess whether or not it has been successful in its mission to produce competent psychology majors.
Prerequisite: PSYC 3110, PSYC 3120.

Learning Outcomes

1. Demonstrate critical thinking skills by reading and discussing current topics in Psychology.
2. Demonstrate content knowledge in Psychology by reading and discussing current topics in Psychology.
3. Demonstrate critical thinking skills by performing standardized assessments administered by the Department of Psychology.
4. Demonstrate content knowledge by performing standardized assessments administered by the Department of Psychology.

PSYC 5110. Quantitative Methods in Psychology I
3 Credits (3)
Statistical concepts emphasizing distributions and methods most appropriate to the data, models, and theories in psychology. Emphasis on distributions, probability and basic inferential statistics in Psychological research. Includes basics of Analysis of Variance (ANOVA) and Multiple Regression in Psychological research.

Learning Outcomes

1. Students will be able to recognize appropriate usage of, and be able to implement, basic statistical techniques: Central tendency, variability, z-scores, t-tests, ANOVA, correlation, two predictor regression.

PSYC 5120. Quantitative Methods in Psychology II
3 Credits (3)
Statistical concepts emphasizing distributions and methods most appropriate to the data, models, and theories in psychology. Emphasis on advanced ANOVA and Multiple Regression in Psychological research.
Prerequisite: PSYC 5110 or equivalent.

Learning Outcomes

1. Students will become familiar with situations and applications of advanced ANOVA techniques and Multiple Regression and Correlation.

PSYC 5210. Computer Methodology
3 Credits (3)
Use of computers in psychological research with emphasis on developing experimental control programs.

PSYC 5220. Methods in Cognitive Psychology
3 Credits (3)
Experimental and correlational methodologies appropriate for investigating cognitive psychological theories and problems.
Prerequisite: PSYC 5320 or consent of instructor.

PSYC 5230. Methods in Social Psychology
3 Credits (3)
Experimental, quasi-experimental, and correlational methodologies appropriate for investigating social psychological theories and problems.
Prerequisite: Graduate student in psychology or consent of instructor.

PSYC 5310. Engineering Psychology
3 Credits (3)
Covers concepts, methods, and findings of human performance. Treats the human as a subsystem that receives, stores and processes information, makes decisions, and acts within a human-machine environment system.

PSYC 5320. Cognition
3 Credits (3)

Examines theoretical and empirical work on human cognition. Topics include: information processing theories, pattern recognition, memory, attention, language, problem solving, decision making, and reasoning.

PSYC 5330. Social Psychology
3 Credits (3)
Current and traditional theories, research findings, and research methodologies of social psychology.

PSYC 5340. Learning and Memory
3 Credits (3)
Classical areas of learning, including instrumental and classical conditioning paradigms, habituation, reinforcement variables, stimulus generalization and transfer, and memory.

PSYC 5350. Sensation and Perception
3 Credits (3)
Stimulus and decision variables in judging auditory and visual events. Topics include: detection of signals; signal intensity versus perceived strength; size, shape, and movement perception; reading and listening.

PSYC 540. History and Systems of Psychology
3 Credits (3)
History of scientific method emphasizing outstanding methodological problems of contemporary science, especially psychology. Covers recent history of psychology and development of schools of psychology.

PSYC 5410. Foundations of College Teaching
3 Credits (3)
This class serves both new and experienced teachers. It will help new teachers design and conduct a successful course and help experienced teachers improve their teaching.
Learning Outcomes
1. Identify best practices in research on the scholarship of teaching and learning.
2. Create effective learning activities that: balance theoretical principles and broad application of disciplinary topics, discourage the unauthorized use of generative AI, effectively integrate academic digital tools as appropriate.
3. Practice effective communication and course delivery skills by teaching short lessons given to classmates.
4. Examine tools and techniques for professional development and self-assessment.
5. Explore effective and ethical uses generative AI.

PSYC 5910. Research Seminar in Psychology
1 Credit (1)
Presentations on research by students, faculty, and guest speakers. May be repeated up to 99 credits.
Learning Outcomes
1. Varies.

PSYC 5991. Special Research Programs
1-3 Credits
Individual investigations either analytical or experimental. May be repeated up to 99 credits.
Learning Outcomes
1. Varies.

PSYC 5996. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. May be repeated up to 99 credits.
Learning Outcomes
1. Varies.

PSYC 5999. Master's Thesis
1-15 Credits
Thesis. May be repeated up to 88 credits.
Learning Outcomes
1. Varies.

PSYC 698. Special Research Programs
1-3 Credits
Individual investigations either analytical or experimental. May be repeated for credit.

PSYC 6991. Doctoral Research
1-15 Credits
This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination. May be repeated up to 88 credits.
Learning Outcomes
1. Varies on research.

PSYC 7000. Doctoral Dissertation
1-15 Credits
Dissertation. May be repeated up to 88 credits.
Learning Outcomes
1. Varies.

RADT-RADIOLOGIC TECHNOLOGY

RADT 1115. Fundamentals of Radiographic Imaging
2 Credits (2)
This course provides students with an in-depth knowledge of radiographic exposure techniques and the factors affecting radiographic image quality. It covers digital imaging with related accessories and emphasizes radiographic critique for diagnostic quality control. Additionally, the course reinforces radiologic fundamentals, introducing instrumentation and technology used in digital imaging. Topics include capturing, processing, displaying, and managing digital images, as well as exposure techniques and exposure indicators. Laboratory activities provided to reinforce radiographic concepts.
Learning Outcomes
1. Explain the principles of radiation production, image formation, and digital imaging systems.
2. Demonstrate proper techniques for exposure selection, scatter control, and radiation protection.
3. Compare radiographic digital imaging systems, assessing their advantages and limitations.
4. Evaluate radiographic images for technical accuracy and apply necessary adjustments.
5. Apply quality control measures and automatic exposure control to ensure optimal imaging outcomes.

RADT 1130L. Introduction to Radiographic Imaging Applied Clinic Skills
1 Credit (3P)
Applied clinical skills Laboratory to provide the student with an in-depth knowledge of radiographic exposure technique and the factors affecting radiographic image quality.
Corequisite: RADT 1115.
Learning Outcomes
1. Demonstrate techniques for radiographic scatter control and grid utilization.

2. Apply exposure selection principles.
3. Analyze and utilize automatic exposure control in imaging.
4. Assess radiographic images for technical accuracy and make necessary adjustments.
5. Apply radiation protection methods for patients and personnel.
6. Utilize radiographic equipment and apply quality control measures.

RADT 1140. Radiographic Positioning I
2 Credits (2)
This course covers the fundamental principles and techniques of diagnostic radiography, including radiographic procedures, patient positioning, terminology, and the mechanics of image production. Students will learn and apply these concepts to the upper and lower extremities, chest, abdomen, and pelvis/hip. The course emphasizes radiographic anatomy, particularly osteology and arthrology, as it relates to routine radiographic procedures.
Learning Outcomes
1. Master radiographic terminology related to positioning, projection, anatomy, medical abbreviations, positioning aids, accessory equipment, and lead markers, explaining their function and application.
2. Evaluate patient care considerations.
3. Explain the basic principles of radiation protection.
4. Describe the basic principles of image acquisition, display, and standards, including common errors, appearance characteristics, procedural factors, and corrective actions.
5. Evaluate orders, requests, and diagnostic reports.

RADT 1140L. Radiographic Positioning I Laboratory
1 Credit (3P)
Applied clinical skills Laboratory in radiographic procedures and positioning concepts, techniques, terminology, and mechanics related to upper and lower extremities, chest, abdomen and pelvis/hip.
Corequisite: RADT 1140.
Learning Outcomes
1. Apply knowledge of radiographic procedures, including routine and special views, to clinical simulations for the chest, abdomen, and upper and lower extremities.
2. Demonstrating understanding of positioning considerations.
3. Analyze radiographic images.
4. Apply the basic principles of radiation protection.
5. Apply basic principles of image acquisition, display, and standards, considering common errors, appearance characteristics, procedural factors, and corrective actions.

RADT 1150. Radiographic Positioning II
2 Credits (2)
Continuation of Radiographic Positioning I including a study of the osteology and arthrology of the thorax, vertebral column, skull, facial bones, and sinuses. Discussion and demonstration of the related standard and special radiographic projections resents the fundamentals of radiographic anatomy, positioning, and terminology used in routine fluoroscopic procedures of the gastrointestinal and genitourinary tract with discussion and demonstration of the related radiographic projections.
Prerequisite: RADT 1140.
Learning Outcomes
1. Identify preparation and positioning aides for Radiological Procedures.
2. Identify evaluation criteria to determine acceptable radiographs.
3. Identify anatomy and physiology for Radiological Procedures.
4. Show use of patient care and radiation protection practices in Radiological Procedures.

RADT 1150L. Radiographic Positioning II Laboratory
1 Credit (3P)
Continuation of Radiographic Positioning I. Applied Clinical Skills Laboratory: Includes vertebral column, skull, facial bones, sinuses, gastrointestinal, urinary, and fluroscopic procedures.
Corequisite: RADT 1150.
Learning Outcomes
1. Model knowledge of radiographic procedures, including routine floroscopic procedures.
2. Evaluate positioning considerations.
3. Demonstrate Radiological Procedures and apply proper patient position and CR placement to obtain proper evaluation criteria.

RADT 1154. Radiographic Anatomy and Physiology
3 Credits (3)
Basic A&P for radiographic application. Includes a systems approach to body structures and organs as they relate to anatomical projections, radiographic identification, and various imaging modalities.
Prerequisite: C- or above in the following courses AHS 153 or AHS 140 or BIOL 2210 or BIOL 1130, or consent of instructor.
Learning Outcomes
1. Identify and Laboratoryel the anatomy associated with diagnostic X-ray images.
2. Critique x-ray images for the presence or absence of anatomy in deciding whether the x-ray is appropriately positioned and diagnostic for radiologist assessment.
3. Locate anatomical systems based on background knowledge of typical anatomical locations and identify normal course of system function for appropriate positioning, patient instructions, and x-ray imaging.
4. Apply knowledge in a testing environment mimicking what is expected for the ARRT Registry.

RADT 1175. Introduction to Radiologic Technology and Patient Care
3 Credits (3)
This course provides a foundational overview of the radiology profession, encompassing basic patient care skills, professional standards, and ethical/legal principles. Students will learn essential skills such as patient transportation, vital sign assessment, and effective communication, while also being introduced to specific radiographic patient care techniques including history taking, immobilization, managing medical emergencies, and the administration of contrast media and radiopharmaceuticals. Additionally, the course will cover core concepts of radiation protection, and basic and specialized procedures, all within the framework of professional ethics and terminology.
Learning Outcomes
1. Demonstrate a working knowledge of medical terminology, procedures, and the roles of various healthcare professionals, including those specializing in medical imaging and radiologic sciences.
2. Critically analyze medical reports, orders, and requests, applying evidence-based practices to inform patient care decisions.
3. Evaluate patient health status using vital signs, Laboratory tests, pain assessments, and patient records, and respond appropriately to medical emergencies and traumatic injuries.

4. Implement infection control protocols, utilizing appropriate procedures, equipment, and knowledge of infectious pathogens.
5. Explain drug classifications, administration routes, safety practices, and the use of contrast agents in radiography.
6. Apply ethical principles and legal considerations to healthcare scenarios, including informed consent and navigating ethically complex situations.
7. Exhibit professional behavior in healthcare settings, demonstrating effective communication, cultural sensitivity, and an understanding of the psychological aspects of patient care.

RADT 1190. CT Equipment and Methodology
3 Credits (3)
Skill development in the operation of computed tomographic equipment, focusing on routine protocols, image quality, and quality assurance and radiation protection.
Learning Outcomes
1. Demonstrate acquisition of comprehensive technical knowledge by obtaining a seventy-five percent or greater on all quizzes and exam assessments (this is in alignment with the scoring expectations for the national registry exam).
2. Manipulate and choose the appropriate scan parameters and technical factors on CT equipment while applying the technical science supporting the decision.
3. Demonstrate appropriate use of post-processing options and provide diagnostic quality images.
4. Abide by radiation safety and dosimetry standards for patient care by demonstrating ALARA standards.
5. Select CT scan manipulations for optimal demonstration of anatomic region, according to protocol (delayed imaging, multiplanar reconstructions, filters) and with safe use of iodinated contrast mediums.
6. Recognize and reduce factors that may inhibit diagnostic image quality.

RADT 1191. Computed Tomography (CT) Imaging and Equipment
4 Credits (4)
This course serves as an introduction to computed tomography (CT) for current radiologic technology students. Course will include information on clinical equipment and application of x-rays in CT, CT image formation, evaluation, and archiving, patient radiation safety and dose, and patient interactions and management for imaging.
Learning Outcomes
1. Demonstrate acquisition of comprehensive technical knowledge by obtaining a seventy-five percent or greater on all quizzes and exam assessments (this is in alignment with the scoring expectations for the national registry exam).
2. Identify critical components of CT system equipment and what their purposes are in creating a CT image.
3. Identify CT parameters which allow for safely administering radiation dose; particularly to pediatric patients.
4. List and define the steps required to acquire a CT image, including the theory behind x-ray interaction/absorption/ attenuation, detector capabilities, appropriate reconstruction options, and computer equipment.
5. Identify image display functions and radiology informatic options.
6. Identify the major technical components of image display in CT and common artifacts, including how to reduce artifacts.

RADT 1520. Radiation Biology and Protection
2 Credits (2)
This course explores the biological effects of ionizing radiation on human cells and tissues, including genetic, somatic, short-term, and long-term effects. It covers radiation measurements, policies, and protection measures for technologists, patients, and others, emphasizing minimizing exposure and basic protection methods. The course also reviews current regulations and recommendations by the NRCP and ICRP.
Prerequisite: C- or above in RADT 1115.
Learning Outcomes
1. Radiobiology: Explain fundamental principles, molecular/cellular aspects, early/late radiation effects, and related regulations/ terminology.
2. Radiation Protection: Describe health physics, protection design, and patient/personnel dose management, including methods to limit radiation exposure.
3. Human Biology Ionization: Discuss relevant aspects of human biology and the consequences of ionization in human cells.
4. Cellular Response to Radiation: Examine factors affecting cell radiosensitivity, direct/indirect effects of radiation, dose-response relationships, and the significance of LD50/30 and LD50/60 radiation.

RADT 1811. Radiographic Positioning I Clinical Experience
1 Credit (4P)
Introduction to the clinical environment. Students will complete administrative duties, perform basic diagnostic radiography exams and provide patient care under the direct/indirect supervision of a qualified registered radiologic technologist as required and assigned.
Corequisite: RADT 1140.
Learning Outcomes
1. Demonstrate the ability to safely produce diagnostic radiographic images.
2. Appropriately position patients, identify radiographic anatomy and pathological conditions.

RADT 1812. Radiographic Positioning II Clinical Experience
1 Credit (4P)
Clinical Experience: Students will complete administrative duties, perform diagnostic radiography exams, and provide patient care under the direct/ indirect supervision of a qualified registered radiologic technologist as required and assigned.
Corequisite: RADT 1150.
Learning Outcomes
1. Demonstrate the ability to safely produce diagnostic radiographic images.
2. Appropriately position patients, identify radiographic anatomy and pathological conditions.
3. Model effective communication skills.

RADT 1997. Radiologic Technology Independent Study
1-6 Credits (1-6)
Varies. May be repeated up to 6 credits.
Learning Outcomes
1. Varies.

RADT 2250. Radiographic Image Critique
2 Credits (2)
This course reviews radiographs, evaluating anatomy and technical quality, including positioning and technique. Students learn to make adjustments and reinforce concepts through classroom activities.
Prerequisite: RADT 2811.

Learning Outcomes

1. Optimal Projections Labeling: State key components of optimal projections, properly display body structures, and accurately Laboratoryel projections using markers and annotations.
2. Comprehensive Imaging Knowledge: For all major body regions (chest, abdomen, extremities, pelvis, shoulder girdle, bony thorax, spine, skull): identify anatomy, state technical data, identify positioning errors, describe considerations for special conditions (air-fluid levels, motion, pathology), and discuss adaptive techniques.
3. Digital Imaging: Demonstrate familiarity with digital image acquisition, errors, and display.
4. Image Analysis: Perform image analysis, including appearance standards, characteristics, procedural factors, and corrective actions.

RADT 2404. Radiographic Special Modalities
3 Credits (3)
Introduction and discussion of various special procedures and modalities including but not limited to: interventional radiography, computed tomography, magnetic resonance imaging, nuclear medicine, radiation therapy, ultrasound.
Prerequisite: RADT 1115.
Learning Outcomes

1. Attain basic knowledge of the various imaging modalities and differentiate between images produced by those modalities.
2. Explain general equipment requirements.
3. Identify various contrast agents used by different modalities and define potential contraindications.
4. Explain the use of artificial intelligence for the various modalities.

RADT 2408. Radiographic Pathology
3 Credits (3)
This course explores the pathology of major body systems and corresponding radiographic imaging techniques. Students learn about disease processes (etiology, signs/symptoms, diagnosis, and treatment) and identify pathological signs on various images, emphasizing radiography. Fundamental anatomy and physiology are integrated, focusing on anatomical projections, radiographic identification, and imaging modalities (including CT and MRI).
Prerequisite: RADT 1154.
Learning Outcomes

1. Describe and identify anatomical structures on diagrams and radiographs.
2. Classify and explain pathological conditions affecting major body systems.
3. Identify pathologies, assess radiographic appearance, and evaluate imaging accuracy.
4. Define key terms, use medical abbreviations, and understand diagnostic reports.
5. Position patients correctly, assess images, and apply technical adjustments.
6. Identify radiation types, effects, and imaging modalities for diagnosis and treatment.
7. Critique images, locate pathology, and demonstrate readiness for certification exams.

RADT 2410. Radiographic Physics and Equipment
3 Credits (3)
This course offers a comprehensive exploration of the physical principles of diagnostic radiography, covering radiologic physics, imaging theory, and quality assurance. Students will examine atomic structure, electromagnetism, X-ray production and interaction, exposure factors, scatter control, and image characteristics. The curriculum also includes digital fluoroscopy, X-ray circuitry, and an introduction to advanced imaging modalities such as mammography, CT, and MRI.
Prerequisite/Corequisite: C- or above in RADT 1115.
Learning Outcomes

1. Explain the structure of atoms and types of radiation.
2. Describe X-ray production and factors affecting image quality.
3. Explain photon interactions with matter.
4. Identify key components of the X-ray circuit and X-ray tube.
5. Apply physics and math principles to radiographic procedures and equipment.
6. Analyze radiographic images for accuracy and quality.

RADT 2811. Clinical Experience I
4 Credits (4P)
Clinical Experience: Students will complete administrative duties, perform diagnostic radiography exams, and provide patient care under the direct/indirect supervision of a qualified registered radiologic technologist as required and assigned.
Prerequisite: RADT 2410.
Learning Outcomes

1. Demonstrate the ability to safely produce diagnostic radiographic images.
2. Appropriately position patients, identify radiographic anatomy and pathological conditions.
3. Demonstrate effective communication skills.
4. Accurately document/record data in accordance with clinical site policies and procedures.

RADT 2812. Clinical Experience II
6 Credits (6P)
Clinical Experience: Students will complete administrative duties, perform diagnostic radiograph exams, and provide patient care under direct/indirect supervision of a qualified registered radiologic technologist as assigned. Evening/weekend, CT, and OR rotations will be offered where available.
Prerequisite: RADT 2811.
Learning Outcomes

1. Demonstrate the ability to safely produce diagnostic radiographic images.
2. Appropriately position patients, identify radiographic anatomy and pathological conditions.
3. Demonstrate effective communication skills.
4. Accurately document/record data in accordance with clinical site policies and procedures.
5. Demonstrate the ability to use independent judgement.
6. Analyze radiographic images for technical and positioning accuracy to make modifications as needed.
7. Conduct themselves in a professional manner to function effectively as a member of the healthcare team.

RADT 2813. Clinical Experience III
3 Credits (3P)
Clinical Experience: Students will complete administrative duties, perform diagnostic radiography exams, and provide patient care under the direct/indirect supervision of a qualified registered radiologic technologist as required and assigned. Evening/weekend, CT and OR rotations will be offered where available.
Prerequisite: C- or above in RADT 2812.

Learning Outcomes

1. Students will demonstrate the ability to safely produce diagnostic radiographic images.
2. Be able to position patients and identify radiographic anatomy and pathological conditions.
3. Demonstrate effective communication skills.
4. Accurately document/record data in accordance with clinical site policies and procedures.
5. Demonstrate the ability to use independent judgement.
6. Analyze radiographic images for technical and positioning accuracy to make modifications as needed.
7. Conduct themselves in a professional manner to function effectively as a member of the healthcare team.
8. Identify opportunities for professional growth within medical imaging sciences.

RADT 2814. Special Modalities Clinical Experience IV
3 Credits (3P)
Clinical Experience: Special rotations in advanced imaging modalities to include but are not limited to nuclear medicine, sonography, mammography, MRI, CT, interventional radiology, and cardiac catheterization Laboratory.
Corequisite: C- or above in RADT 2404.
Learning Outcomes

1. Identify, compare, and evaluate various specialized modalities in medical imaging, including but not limited to Computed Tomography (CT), Magnetic Resonance Imaging (MRI), Ultrasound, Nuclear Medicine, and Interventional Radiology.
2. Demonstrate principles, applications, and patient care considerations associated with each modality, as well as the role of advanced imaging in diagnosis and treatment within the healthcare setting.
3. Demonstrate effective communication skills.
4. Conduct themselves in a professional manner to function effectively as a member of the healthcare team.
5. Identify various opportunities for professional growth within medical imaging sciences.
6. Develop and refine professional job-seeking skills, including crafting an effective resume and cover letter, preparing for interviews, and demonstrating workplace professionalism.

RADT 2817. Cross Sectional Anatomy for Medical Imaging
3 Credits (3)
Anatomic relationships that are present under various sectional orientations as depicted by computed tomography or magnetic resonance imaging.
Learning Outcomes

1. Identify and Laboratoryel the anatomy associated with the topical outline in diagnostic CT images.
2. Critique CT images for the presence or absence of anatomy and pathology in deciding whether the image is appropriately positioned and diagnostic for radiologist assessment.
3. Locate anatomical systems and possible pathology based on background knowledge of typical anatomical locations and identify normal course of system function for appropriate positioning, patient instructions, and CT imaging.

RADT 2818. Clinical Experience I (Computed Tomography)
2 Credits (2P)
A basic, introductory health-related, work-based learning experience that enables students to apply specialized occupational theory, skills, and concepts. The clinic professional provides direct supervision.
Learning Outcomes

1. Complete at least 55 high-quality CT scans while maintaining good standing.
2. Engage appropriately with patients using verbal and nonverbal communication at a beginner level.
3. Identify necessary Laboratory values for contrast-enhanced CT exams at a beginner level.
4. Evaluate personal/occupational radiation exposure and explain CT dose measurement.
5. Use post-processing tools to produce diagnostic-quality images and adjust CT parameters for optimal imaging and contrast.

RADT 2819. Clinical Experience II (Computed Tomography)
2 Credits (2P)
An intermediate health-related work-based learning experience that enables students to apply specialized occupational theory, skills, and concepts. The clinic professional provides direct supervision.
Learning Outcomes

1. Complete at least 100 high-quality CT scans while maintaining good standing.
2. Engage appropriately with patients using verbal and nonverbal communication.
3. Identify necessary Laboratory values for contrast-enhanced CT exams.
4. Evaluate personal/occupational radiation exposure and explain CT dose measurement.
5. Use post-processing tools to produce diagnostic-quality images and adjust CT parameters for optimal imaging and contrast safety.

RADT 2820. Clinical Experience III (Computed Tomography)
2 Credits (2P)
Advanced health-related work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinic professional. Upon completion, students will be able to assume most of the duties of an experienced imaging professional in Computed Tomography.
Prerequisite: RADT 2819.
Learning Outcomes

1. Complete at least 125 high-quality CT scans while maintaining good standing.
2. Engage appropriately with patients using verbal and nonverbal communication.
3. Identify necessary Laboratory values for contrast-enhanced CT exams.
4. Evaluate personal/occupational radiation exposure and explain CT dose measurement.
5. Use post-processing tools to produce diagnostic-quality images and adjust CT parameters for optimal imaging and contrast safety.

RADT 2999. Radiologic Technology Capstone
3 Credits (3)
Varies.
Prerequisite: RADT 2812.
Learning Outcomes

1. Varies.

READ-READING

READ 3110. Instruction for Special Reading Needs
3 Credits (3)
Emphasizes appropriate techniques for teaching reading to learners with special needs. Restricted to: TEP. EED, ECED, SED, and SPED majors.
Learning Outcomes
1. Students will demonstrate basic knowledge of the five domains of reading.
2. Students will demonstrate knowledge of characteristics of reading disabilities (including dyslexia) and the cognitive and linguistic difficulties that may underlie these disabilities.
3. Students will recognize the cultural, environmental and social factors that can impact reading success.
4. Students will explore instructional practices in phonological awareness, phonics, spelling, vocabulary and comprehension that are consistent with current scientific research findings.
5. Students will use or analyze informal and/or criterion-based assessments for determining students' skills in phonological awareness, word identification, and reading fluency and for determining appropriate instructional goals for students.
6. Students will be able to develop a Professional Learning Community by researching and sharing the effectiveness of various strategies/methods/commercial programs for different domains of reading.

READ 3996. Special Topics
1-3 Credits (1-3)
Each course will be identified by a qualifying subtitle. A maximum of 3 credits in any one semester and a grand total of 6 credits. May be repeated up to 6 credits.
Learning Outcomes
1. Engage in the study of a specific literacy topic.

READ 4310. Elementary School Literacy I
3 Credits (2+2P)
Reading development, curriculum, and instruction in the elementary grades. Required of all elementary education majors. May be repeated up to 3 credits.
Corequisite: EDUC 4310, EDUC 4320, SPED 3120.
Learning Outcomes
1. Articulate an understanding of developmental theories and processes and their implication for appropriate methods of teaching reading.
2. Demonstrate knowledge of various instructional approaches and strategies for promoting literacy within an integrated curriculum framework.
3. Provide and use anti-bias literacy materials and experiences, including primary language materials.
4. Plan appropriate whole group, small group and individual activities that include culturally and linguistically responsive instruction and appropriate accommodations for working with children with special needs.
5. Understand and articulate the concept of emergent literacy and the processes toward becoming an authentic reader and writer.
6. Understand the role of family and community in literacy development and respect and promote the use of the child's home language for learning.
7. Engage in reflection on current theoretical perspectives on the reading process and the role of print literacy in schools and our society.
8. Demonstrate knowledge of and use effectively, a wide range of literacy assessment strategies and instruments to determine a child's strengths and areas of need.

READ 4320. Elementary School Literacy II
3 Credits (2+2P)
Reading development in curriculum and instruction with assessment and evaluation in the elementary grades (K 8). May be repeated up to 3 credits.
Prerequisite: READ 4310.
Corequisite: EDUC 4330.
Learning Outcomes
1. Engage in reflection on current theoretical perspectives on the reading process, such as understanding linguistics, psycholinguistics, sociolinguistics and their relationships in the reading process, and the role of literacy in schools and our society.
2. Apply knowledge of various instructional approaches and strategies for promoting literacy within an integrated curriculum framework to include culturally and linguistically responsive instruction and appropriate accommodations for working with children with special needs.
3. Evaluate instructional materials in terms of their approach to reading, consider their possible use with children, and adapt the materials so that they reflect an appreciation for child-centeredness and cultural diversity in learning.
4. Use miscue analysis and other literacy assessment tools to understand, describe, and evaluate students' reading strategies and formulate an instructional plan tied to assessment.
5. Utilize children's literature, including multicultural, multilingual children's literature to plan, implement and reflect on innovative strategies for literacy scaffolding.
6. Define oneself as a literate person and revalue readers and writers, and users of language.

READ 4330. Content Area Literacy
3 Credits (2+2P)
Surveys integrated reading/writing/discursive practices in middle/secondary content areas. Taught with READ 5330. Restricted to: TEP-SED majors. May be repeated up to 3 credits.
Learning Outcomes
1. Analyze literacy processes, as they pertain to adolescent learners.
2. Discuss current trends and issues in content area literacy instruction with a specific focus on practices that promote achievement and equity.
3. Evaluate instructional practices that help students use reading, writing, speaking, listening, viewing and visually representing to learn the content areas.
4. Illustrate ethical reasoning and decision making in your approach to content area literacy education.
5. Integrate research, reflection, and best practices that positively impact students in a diverse society.

READ 4530. Teaching Secondary ELA & Social Studies Using Primary Sources, Memoir & Autobiography
3 Credits (3)
This course prepares future language arts and social studies educators to teach structured literacy effectively at the secondary level, with a focus on social studies content for cross-disciplinary instruction. Students will explore reading development and the five essential components of reading—phonemic awareness, phonics, vocabulary, comprehension, and fluency—with particular attention to systematic instruction of vocabulary,

comprehension, and fluency strategies relevant to secondary texts. Through engagement with primary and secondary sources, memoirs/autobiographies, and historical fiction, students will develop instructional approaches to support real-world reading applications, text analysis, inquiry, and historical thinking.

Learning Outcomes

1. Explain the five components of evidence-based reading instruction and their relevance at the secondary level.
2. Design lessons that build Tier 2 (cross-disciplinary) and Tier 3 (discipline-specific) vocabulary knowledge in social studies contexts.
3. Develop instructional strategies to support comprehension and critical thinking through practices such as activating prior knowledge, questioning texts, making inferences, and synthesizing information.
4. Create activities that promote oral reading fluency with an emphasis on prosody, pacing, and expression.
5. Execute a lesson plan that integrates social studies texts—including primary and secondary sources, memoirs/autobiographies, and historical fiction—into reading instruction to foster cross-disciplinary instruction in the humanities.

READ 5210. Language and Literacy Acquisition
3 Credits (3)

Framework and strategies of language and literacy acquisition with attention to bilingual learners and the interrelationship among reading, writing, and oral language. May be repeated up to 3 credits.

READ 5220. Sociopsycholinguistics of Reading
3 Credits (3)

Examines current research on reading process, learning to read, and teaching children to read and evaluates current programs and materials. May be repeated up to 3 credits.

READ 5310. Elementary School Literacy I
3 Credits (2+2P)

Reading development, curriculum, and instruction in the elementary grades. Same as READ 4310 with differentiated assignments for graduate students. May be repeated up to 3 credits.

Corequisite: ECED 5810, EDUC 5310, and EDUC 5320.

Learning Outcomes

1. Articulate an understanding of developmental theories and processes and their implication for appropriate methods of teaching reading;
2. Demonstrate knowledge of various instructional approaches and strategies for promoting literacy within an integrated curriculum framework;
3. Provide and use anti-bias literacy materials and experiences, including primary language materials;
4. Plan appropriate whole group, small group and individual activities that include culturally and linguistically responsive instruction and appropriate accommodations for working with children with special needs;
5. Understand and articulate the concept of emergent literacy and the processes toward becoming an authentic reader and writer;
6. Understand the role of family and community in literacy development and respect and promote the use of the child's home language for learning;
7. Engage in reflection on current theoretical perspectives on the reading process and the role of print literacy in schools and our society;
8. Demonstrate knowledge of and use effectively, a wide range of literacy assessment strategies and instruments to determine a child's strengths and areas of need.

READ 5320. Elementary School Literacy II
3 Credits (2+2P)

Reading development in curriculum and instruction with assessment and evaluation in the elementary grades (K-8). Same as READ 4320 with differentiated assignments for graduate students. May be repeated up to 3 credits.

Prerequisite: READ 5310.

Corequisite: EDUC 5330.

Learning Outcomes

1. Engage in reflection on current theoretical perspectives on the reading process, such as understanding linguistics, psycholinguistics, sociolinguistics and their relationships in the reading process,and the role of literacy in schools and our society;
2. Apply knowledge of various instructional approaches and strategies for promoting literacy within an integrated curriculum framework to include culturally and linguistically responsive instruction and appropriate accommodations for working with children with special needs;
3. Evaluate instructional materials in terms of their approach to reading, consider their possible use with children, and adapt the materials so that they reflect an appreciation for child-centeredness and cultural diversity in learning;
4. Use miscue analysis and other literacy assessment tools to understand, describe, and evaluate students' reading strategies and formulate an instructional plan tied to assessment;
5. Utilize children's literature, including multicultural, multilingual children's literature to plan, implement and reflect on innovative strategies for literacy scaffolding;
6. Define oneself as a literate person and revalue readers and writers, and users of language.

READ 5330. Content Area Literacy
3 Credits (3)

Surveys integrated reading/writing/discursive practices in middle/secondary content areas. "Master' plus Secondary Licensure students Only" and "TEP admission required" May be repeated up to 3 credits.

Prerequisite: SPED 5105, EDUC 5120, EDUC 5110.

Learning Outcomes

1. Define the purpose of schooling begin to articulate the implications for the teacher, youth, teaching, and learning.
2. Explore the historical dimensions of reading instruction in secondary education.
3. Explore the quality and character of life in schools along with the implications for all stakeholders.
4. Explore the roles of reading, writing, listening, and speaking in the content areas.
5. Discuss general pedagogical considerations that extend across all subject matter.
6. Promote the concept that learning in all areas is more authentic and meaningful when knowledge of diverse youth and their communities, content, and pedagogy are valued.
7. Practice strategies that integrate literacy, content, and knowledge of youth.
8. Explore literature in the content area.

9. Develop lesson plans that combine reading, writing, listening, and speaking in the content area that support diversity, integrate technology, and promote effective communication 1
10. Examine the needs of struggling readers. 1
11. Examine the Common Core Standards. 1
12. Engage in research and writing that supports the development of your professional identity as an educator and graduate-level student.

READ 5340. Literacy Assessment and Evaluation
3 Credits (3)
Theoretical and practical aspects of using formal and informal assessment and evaluation procedures in literacy curriculum and instruction. May be repeated up to 3 credits.
Learning Outcomes
1. Students will be able to understand and implement various strategies for assessing and evaluating the literacy practices and knowledge of students.

READ 5350. Adult and Family Literacy
3 Credits (3)
Principles, practices, and instructional materials for adult and family literacy. May be repeated up to 3 credits.
Learning Outcomes
1. Students will be able to understand and implement various strategies for engaging students and their families through literacy practices in a variety of classroom and home settings.

READ 5360. Digital Literacies
3 Credits (3)
Digital Literacies study focuses on the multiple relationships between how we express ourselves to one another and the multiple technological systems and networks that provide context, meaning, and shape to those expressions in both social and academic spaces. This course is designed to examine new literacies theory as it applies to teaching applications and current research on digital literacies within K-12 education. As 21st Century practitioner scholars, we are concerned with both the social aspects of literacy practices, understanding that school-based operations are inseparable from the sociocultural contexts in which they are enacted. Must be an NMSU graduate student to participate in this course.
Prerequisite: READ 5340 with a B- or better.
Learning Outcomes
1. Critically assess K-12 implementation of digital literacies across content area curriculum and instruction.
2. Examine seminal and current research on digital literacies' theory, pedagogy, and practice.
3. Determine the level of cultural relevance in schools and pedagogies for 21st Century students.
4. Interpret how social categories relevant to digital literacy contribute to construction of identity.
5. Develop a critical digital pedagogy that addresses the literacy practices of all learners.

READ 5410. Theory and Pedagogy of Literature for Children and Adolescents
3 Credits (3)
This course provides an in-depth exploration of pedagogy and theory related to literature for adolescents. Students must be in Graduate Standing. May be repeated up to 3 credits.
Learning Outcomes
1. Analyze literacy processes, as they pertain to adolescent learners.
2. Discuss current trends and issues in content area literacy instruction with a specific focus on practices that promote achievement and equity.
3. Evaluate instructional practices that help students use reading, writing, speaking, listening, viewing and visually representing to learn the content areas.
4. Illustrate ethical reasoning and decision making in your approach to content area literacy education.
5. Integrate research, reflection, and best practices that positively impact students in a diverse society.

READ 5420. Theory and Pedagogy of Writing
3 Credits (3)
This course is designed to examine critical writing theory and pedagogy for K-12 teaching and learning, including inclusive and multicultural approaches, with an emphasis in constructive, collaborative practices, and the integration of digital tools across several genres of writing. Through sequential, thematic units, coursework will emphasize: 1) the study of formative theories along with the development of instructional practices to promote achievement and equity in writing education; 2) the application of these skills through pedagogy and curriculum building, and 3) the construction of broad understandings of craft within the context of the current policies and standards which impact education both regionally and nationally.
Learning Outcomes
1. Critically assess writing curriculum and instruction in K-12 learning environments.
2. Develop a critical writing pedagogy that addresses the literacy practices of all learners.
3. Measure the alignment of writing structures in schools with students' cultural literacies.
4. Interpret how social categories relevant to education contribute to construction of identity.
5. Formulate engaging strategies that develop writers who are competent in multiple genres.

READ 5530. Teaching Secondary ELA & Social Studies Using Primary Sources, Memoir & Autobiography
3 Credits (3)
This course prepares future language arts and social studies educators to teach structured literacy effectively at the secondary level, with a focus on social studies content for cross-disciplinary instruction. Students will explore reading development and the five essential components of reading—phonemic awareness, phonics, vocabulary, comprehension, and fluency—with particular attention to systematic instruction of vocabulary, comprehension, and fluency strategies relevant to secondary texts. Through engagement with primary and secondary sources, memoirs/autobiographies, and historical fiction, students will develop instructional approaches to support real-world reading applications, text analysis, inquiry, and historical thinking.
Learning Outcomes
1. Explain the five components of evidence-based reading instruction and their relevance at the secondary level.
2. Design lessons that build Tier 2 (cross-disciplinary) and Tier 3 (discipline-specific) vocabulary knowledge in social studies contexts.
3. Develop instructional strategies to support comprehension and critical thinking through practices such as activating prior knowledge, questioning texts, making inferences, and synthesizing information.

4. Create activities that promote oral reading fluency with an emphasis on prosody, pacing, and expression.
5. Design and execute a lesson plan that integrates social studies texts—including primary and secondary sources, memoirs/autobiographies, and historical fiction—into reading instruction to foster cross-disciplinary instruction in the humanities.

READ 5990. Practicum in Literacy Education
1-6 Credits (1-6)
Supervised laboratory experience with children with reading difficulties. The student implements a program of specific procedures to aid the disabled reader. May be repeated up to 6 credits.
Prerequisite: READ 5340.
Learning Outcomes
1. Students will be able to understand and implement various strategies for assessing and evaluating the literacy practices and knowledge of students.

READ 5992. Special Studies in Literacy
1-6 Credits (1-6)
Each study will be designated by a qualifying subtitle. Taught with READ 6992. May be repeated up to 99 credits.
Learning Outcomes
1. Engage in a specific literacy topic.

READ 5996. Selected Topics in Literacy
1-6 Credits (1-6)
Offered under different subtitles in the Schedule of Classes. Taught with READ 6996 with differentiated subjects for doctoral students. May be repeated up to 6 credits.
Learning Outcomes
1. Engage in the study of a specific literacy topic.

READ 6110. Critical Issues in Literacy Education
3 Credits (3)
Critical issues from historical to current perspectives. May be repeated up to 3 credits.
Learning Outcomes
1. Understand the multiple critical issues central to literacy education from both a historical and contemporary perspective.

READ 6120. Multiple Critical Literacies
3 Credits (3)
An exploration of the multiple literacies that operate on the individual, classroom, community, cultural and societal levels. Same as BLED 6120. May be repeated up to 3 credits.

READ 6130. Multiculturalism, Literature, and Inquiry
3 Credits (3)
Advanced exploration and examination of critical multicultural language education vis-a-vis children's adolescent, young adult, and adult literature, with an eye toward problematizing assumptions about literacy, articulating issues of social justice and enacting transactive, transformative pedagogy. May be repeated up to 3 credits.
Learning Outcomes
1. Understand the theories and approaches necessary for conducting inquiry reading and writing.

READ 6210. Ethnography of Reading and Writing
3 Credits (3)
Covers the dynamics of data interpretation and critical analysis in the study of literacy. May be repeated up to 3 credits.
Learning Outcomes
1. Understand the theories and approaches necessary for conducting ethnographic studies in reading and writing.

READ 6320. Praxis and Reflexivity
3 Credits (3)
The cyclical research processes of continuous self and systemic (re)evaluation vis-a-vis classroom, community, and society with an eye toward reflection, growth, change, and larger forms of social agency. Restricted to doctoral-level students of any major. Same as BLED 6220, EDUC 6220. May be repeated up to 3 credits.

READ 6991. Doctoral Research in Literacy
1-15 Credits (1-15)
Research on topic of interest. May be repeated up to 88 credits.
Learning Outcomes
1. Engage in the study of a specific literacy topic at the doctoral level.

READ 6992. Special Studies in Literacy
1-6 Credits (1-6)
Offered under different subtitles in the Schedule of Classes. Taught with READ 5992 with differentiated assignments for doctoral students. May be repeated up to 6 credits.
Learning Outcomes
1. Engage in the study of a specific literacy topic at the doctoral level.

READ 6996. Selected Topics in Literacy
1-6 Credits (1-6)
Offered under various subtitles that indicate the subject matter. Same as READ 5996. May be repeated up to 99 credits.
Learning Outcomes
1. Engage in the study of a specific literacy topic at the doctoral level.

READ 6997. Independent Study Topics in Reading
1-6 Credits (1-6)
A problem and seminar course for those pursuing an advanced degree. Each course will have an appropriate subtitle. May be repeated up to 99 credits.
Learning Outcomes
1. Engage in the study of a specific literacy topic at the doctoral level.

READ 6999. Research Project
1-15 Credits (1-15)
Offered primarily for those pursuing the research requirement for the Ed.S. degree. Each research project will be designated by a qualifying subtitle. May be repeated up to 88 credits.
Learning Outcomes
1. Engage in the study of a specific literacy topic at the doctoral level.

RESP - RESPIRATORY THERAPY

RESP 1140. Respiratory Therapy Pharmacology
3 Credits (3)
Principles of pharmacology, drug dose calculations, and drug receptor theory as it relates to patients with cardiopulmonary disease. Includes specific emphasis on drugs used by respiratory care practitioners as well as discussion of other drugs used in the treatment of patients under their care.
Learning Outcomes
1. Have an introductory level of knowledge of the basic general principles of pharmacology that relate to all medications, drug actions, routes of administration etc.
2. Accurately calculate typical drug-dose calculations.

3. Demonstrate an in-depth knowledge of the mode of action, desired clinical effect and common and serious adverse effects of the medications commonly used in respiratory care.
4. Relate pharmacologic therapy to common pulmonary pathologies.
5. Effectively evaluate and educate patients regarding self-management of asthma and smoking cessation techniques.
6. Understand the underlying neurophysiology involved with each class of drugs studied in this course.

RESP 1150. Respiratory Therapy I
3 Credits (3)
Introduces respiratory therapy as a health sciences profession. Topics include cardiopulmonary assessment, medical gas administration, aerosol therapy, oxygen therapy, microbiology, infection control, equipment maintenance, incentive breathing exercises and chest physiotherapy.
Learning Outcomes
1. Accurately perform a complete cardiopulmonary assessment of any non-critically ill patient.
2. Apply knowledge of the basic anatomy and physiology of the cardiopulmonary system, especially as it relates to the transportation of oxygen in the human body.
3. Correctly set up equipment and assess effectiveness of bland aerosol equipment.
4. Relate how microbiology impacts respiratory therapy to include using the correct technique for the isolation of patients and utilizing standard precautions in the clinical setting.
5. Evaluate the procedures for cleaning and sterilization of respiratory therapy equipment.
6. Apply basic respiratory treatment to include chest physiotherapy, airway maintenance, and basic medication administration.

RESP 1150L. Respiratory Therapy I Laboratory
2 Credits (2)
Students practice cardiopulmonary assessment, medical gas administration, aerosol therapy, oxygen therapy, microbiology, infection control, equipment maintenance, incentive breathing exercises and chest physiotherapy using state of the art equipment in the learning Laboratory under simulated patient situations.
Learning Outcomes
1. Accurately perform a complete cardiopulmonary assessment of any non-critically ill patient.
2. Apply knowledge of the basic anatomy and physiology of the cardiopulmonary system, especially as it relates to the transportation of oxygen in the human body.
3. Correctly set up equipment and assess effectiveness of bland aerosol equipment.
4. Relate how microbiology impacts respiratory therapy to include using the correct technique for the isolation of patients and utilizing standard precautions in the clinical setting.
5. Evaluate the procedures for cleaning and sterilization of respiratory therapy equipment.
6. Apply basic respiratory treatment to include chest physiotherapy, airway maintenance, and basic medication administration.

RESP 1250. Respiratory Therapy II
4 Credits (4)
Advanced respiratory care techniques. Emphasis on airway management, aerosol treatment, chest physiotherapy, pharmacology, posture pressure breathing, and pulmonary rehabilitation.
Prerequisite: C or Better in RESP 1150 & RESP 1150 L.
Corequisite: RESP 1250 L.
Learning Outcomes
1. Demonstrate a comprehensive understanding of the anatomy and physiology of the arterial system.
2. Apply and explain the basic principles of pharmacology therapy as it relates to the cardiopulmonary system.
3. Analyze and differentiate the basic pulmonary physiology associated with restrictive and obstructive disease processes, analyze test results to identify abnormal findings.
4. Interpret and apply advanced airway management techniques including endotracheal intubation, tracheostomy, laryngeal mask airway, and supraglottic airway.
5. Describe and interpret radiographic images to assess respiratory and cardiopulmonary conditions.
6. Identify the anatomy, physiology and the electrical conduction of the heart.
7. Differentiate between invasive and non-invasive mechanical ventilation techniques, explaining their indications and contraindications.
8. Demonstrate knowledge of emergency life support related to respiratory therapy.

RESP 1250L. Respiratory Therapy II Laboratory
2 Credits (6P)
Students practice airway management, pulmonary function testing, arterial puncture and blood gas analysis and administering home care therapy procedures using state of the art equipment in the learning Laboratory under simulated patient situations. May be repeated up to 2 credits.
Prerequisite: C or Better in the following Courses: RESP 1150, RESP 1150L and RESP 1140.
Learning Outcomes
1. Demonstrate the correct setup, operation, and maintenance of various respiratory therapy equipment; to include oxygen delivery systems, medication delivery devices CPAP/BiPAP machines and ventilators.
2. Complete respiratory assessments including vital signs: arterial blood gas ECG, pulmonary function test and ECG interpretations.
3. Properly assess and ensure airway patency.
4. Respond and react to airway emergencies and initiate proper treatment as indicated.

RESP 1330. Respiratory Therapy II Clinical
3 Credits (9P)
Supervised practice and application in a hospital setting. May be repeated up to 3 credits.
Prerequisite: C or Better in the following courses: RESP 1150 & RESP 1150 L.
Learning Outcomes
1. Maintain Patient confidentiality/privacy as defined by HIPAA.
2. Use critical thinking, problem solving and ethical decision-making in the assessment, diagnosis, planning, evaluation, and implementation of respiratory procedures.
3. Recognize emergency situations and respond appropriately.
4. Compose a patient assessment Compose a patient SOAP/Patient Assessment document.
5. Demonstrate and perform cardiopulmonary diagnostic procedures.
6. Demonstrate how to set up and maintain a mechanical ventilator.

7. Demonstrate appropriate patient/physician interactions in the clinical setting.

RESP 2110. Respiratory Therapy Cardiopulmonary
2 Credits (2)
This course delves into the study of commonly encountered respiratory disorders in adult patients. It encompasses an in-depth examination of the etiology, pathology, pathogenesis, clinical manifestations, and treatment of a variety of common adult pulmonary diseases.
Prerequisite: C or better in the following courses: RESP 2230 RESP 2230L.
Learning Outcomes
1. Identify and describe common adult respiratory disorders, explaining their etiology, pathology, and clinical manifestations, they will be able to formulate appropriate treatment plans for patients with pulmonary diseases, evaluating diagnostic data and applying evidence-based practices.
2. Recognize preventative strategies for respiratory diseases and demonstrate an understanding of COPD, asthma, and pulmonary infections.
3. Apply patient safety and infection control principles while demonstrating effective communication and interprofessional collaboration.

RESP 2120. Respiratory Therapy III
2 Credits (2)
Presents basic concepts of adult care medicine including adult intensive care and pathophysiology of diseases, introduction to concepts of positive pressure ventilation and advanced airway care. Introduction to positive pressure mechanical ventilation equipment and procedures related to basic critical care medicine for adults using state of the art equipment and computer simulations in the learning Laboratory.
Prerequisite: C or better in the following courses: RESP 1250, RESP 1250L, and RESP 1330.
Corequisite: RESP 2120L.
Learning Outcomes
1. Classify foundational concepts and core knowledge of mechanical ventilation.
2. Monitor mechanical ventilation and assessment of patients receiving mechanical ventilation and in the intensive care units.
3. Evaluate when and how to discontinue a patient from ventilation and long-term ventilation.
4. Successfully initiate ventilation.

RESP 2120L. Respiratory Therapy III Laboratory
2 Credits (2)
Introduction to positive pressure mechanical ventilation equipment and procedures related to basic critical care medicine for adults using state of the art equipment and computer simulations in the learning Laboratory.
Prerequisite: C or better in the following courses: RESP 1250, RESP 1250L, and RESP 1330.
Learning Outcomes
1. Apply didactic skills to hands-on, scenario based learning.
2. Compare and contrast the components and settings of mechanical ventilation, IPPB, BiPAP, airway care parameters, components, and settings.
3. Analyze blood gases and advanced pharmacology.
4. Practice airway care and extubation techniques.
5. Explain ACLS protocols and their relevance in emergency situations and interpret hemodynamic monitoring data to assess patient status and guide treatment decisions.

RESP 2150. Neonatal and Pediatric Respiratory Theory
3 Credits (3)
Presents cardiopulmonary assessment and diagnosis in advanced neonatal and pediatric critical care including correlation of cardiopulmonary anatomy, physiology and pathophysiology with evaluation of cardiopulmonary function. Presents concepts of rehabilitative practice for patients with chronic cardiopulmonary diseases. Introduces strategies for successful completion of national board exams. Presents mechanical ventilation procedures related to critical care medicine for children and infants using state of the art equipment and computer simulation in the learning Laboratory.
Prerequisite: C or better in the following courses: RESP 2230, RESP 2230L, RESP 2110 and RESP 2330.
Corequisite: RESP 2150L.
Learning Outcomes
1. Accurately identify and perform a complete cardiopulmonary assessment of a critically ill pediatric patient.
2. Identify and perform a complete cardiopulmonary assessment of a critically ill neonatal patient.
3. Summarize review-content and complete mock CRT and RRT examinations.
4. Compare and contrast the components of pediatric and neonatal ventilators.
5. Correctly perform and assess effectiveness of respiratory therapy on neonatal/pediatric patients.

RESP 2150L. Neonatal and Pediatric Respiratory Laboratory
2 Credits (6P)
Presents mechanical ventilation procedures related to critical care medicine for neonatal and pediatric, children and infants using state of the art equipment and computer simulation in the learning Laboratory. Students will focus on cardiopulmonary assessment and diagnosis with correlation of cardiopulmonary anatomy, physiology and pathophysiology and evaluation of cardiopulmonary function.
Prerequisite: C or better in the following courses: RESP 2230, RESP 2230L, RESP 2110 and RESP 2330.
Corequisite: RESP 2150.
Learning Outcomes
1. Accurately identify and perform a complete cardiopulmonary assessment of a critically ill pediatric patient.
2. Identify and perform a complete cardiopulmonary assessment of a critically ill neonatal patient.
3. Summarize review-content and complete mock CRT and RRT examinations.
4. Compare and contrast the components of pediatric and neonatal ventilators.
5. Correctly perform and assess effectiveness of respiratory therapy on neonatal/pediatric patients.

RESP 2230. Respiratory Therapy V
3 Credits (3)
Emphasis on special modalities.
Prerequisite: C or Better in RESP 2120, 2120L & 2330.
Learning Outcomes
1. Demonstrate and perform cardiopulmonary diagnostic procedures.
2. Determine appropriate interventions in a critical medical situation.

3. Demonstrate how to setup and maintain a mechanical ventilator.
4. Formulate appropriate cardiopulmonary treatment plans.

RESP 2230L. Respiratory Therapy V Laboratory
2 Credits (2)
Advanced practice and procedures of respiratory care. Requires a C or better to remain in program.
Prerequisite: C or better in the Following: RESP 2120L & RESP 2120, RESP 2330.
Learning Outcomes
1. Demonstrate and perform cardiopulmonary diagnostic procedures.
2. Formulate appropriate cardiopulmonary treatment plans.
3. Determine appropriate interventions in a critical medical situation.
4. Demonstrate how to setup and maintain a mechanical ventilator.

RESP 2242. Pediatric Advanced Life Support (PALS)
1 Credit (1)
Etiology, diagnosis, clinical manifestations, and management of cardiopulmonary disorders related to respiratory care.
Prerequisite: C or Better in RESP 2230 & RESP 2230L.
Corequisite: RESP 2230.
Learning Outcomes
1. Accurately identify and perform a complete cardiopulmonary assessment of a critically ill pediatric patient.
2. Summarize review-content and complete mock CRT and RRT examinations.
3. Compare and contrast the components of pediatric and neonatal ventilators.
4. Correctly perform and assess effectiveness of respiratory therapy on neonatal/pediatric patients.

RESP 2243. Respiratory Therapy Neonatal Resuscitation
1 Credit (1)
Advanced practice of the neonatal resuscitation and certification. Students must be admitted into program to enroll in this course.
Prerequisite: C or better in the following courses: RESP 2230, RESP 2230L.
Learning Outcomes
1. Use critical thinking, problem solving and ethical decision-making in the assessment, diagnosis, planning, evaluation, and implementation of respiratory procedures.
2. Recognize emergency situations and respond appropriately.
3. Compose a patient assessment Compose a patient SOAP/Patient Assessment document.
4. Demonstrate and perform cardiopulmonary diagnostic procedures.

RESP 2330. Respiratory Therapy IV Clinical
3 Credits (9P)
Emphasis on mechanical ventilators.
Prerequisite: C or better in the following courses: RESP 1250, RESP 1250L, and RESP 1330.
Learning Outcomes
1. Maintain Patient confidentiality/privacy as defined by HIPAA.
2. Use critical thinking, problem solving and ethical decision-making in the assessment, diagnosis, planning, evaluation, and implementation of respiratory procedures.
3. Recognize emergency situations and respond appropriately.
4. Compose a patient assessment Compose a patient SOAP/Patient Assessment document.
5. Demonstrate and perform cardiopulmonary diagnostic procedures.
6. Demonstrate how to set up and maintain a mechanical ventilator.
7. Demonstrate appropriate patient/physician interactions in the clinical setting.

RESP 2332. Respiratory Therapy V Clinical
3 Credits (3)
Emphasis on special modalities.
Prerequisite: C or better in the following courses: RESP 2120 and RESP 2120L.
Learning Outcomes
1. Demonstrate and perform cardiopulmonary diagnostics procedures during mechanical ventilation.
2. Demonstrate appropriate patient/physician interactions needed in the clinical setting.
3. Demonstrate how to set up, maintain, and wean a patient from a mechanical ventilator.
4. Compose a patient assessment on a patient receiving mechanical ventilation.
5. Formulate appropriate cardiopulmonary treatment plans for mechanical ventilation.
6. Determine appropriate interventions in a critical medical situation.
7. Document ventilator parameters, alarm settings, and patent assessment.

RESP 2334. Respiratory Therapy VI Clinical
3 Credits (9P)
Advanced Clinical experience on special modalities.
Prerequisite: C or better in the following courses: RESP 2230, RESP 2230L, RESP 2110 and RESP 2330.
Learning Outcomes
1. Maintain Patient confidentiality/privacy as defined by HIPAA.
2. Use critical thinking, problem solving and ethical decision-making in the assessment, diagnosis, planning, evaluation, and implementation of respiratory procedures.
3. Recognize emergency situations and respond appropriately.
4. Compose a patient assessment Compose a patient SOAP/Patient Assessment document.
5. Demonstrate and perform cardiopulmonary diagnostic procedures.
6. Demonstrate how to set up and maintain a mechanical ventilator.
7. Demonstrate appropriate patient/physician interactions in the clinical setting.

RGSC-RANGE SCIENCE

RGSC 1110. The Range Science Profession
1 Credit (1)
Introduction to scientific disciplines and career opportunities in rangeland science and management.
Learning Outcomes
1. To introduce students to the Range Science program and to a variety of career opportunities in Range Science.
2. To develop an individualized course curriculum that prepares the student to achieve their career goals.
3. To examine opportunities to gain practical work experience through internships and cooperative employment.

RGSC 2110. Introduction to Rangeland Management
3 Credits (3)

This course covers the principles of managing and understanding pasture and rangelands. Plant physiology and ecology, plant communities and rangeland sustainability and how they relate to livestock production and wildlife management will be discussed. Restricted to: Main campus only.

Learning Outcomes

1. Understand rangeland management operations.
2. Identify rangeland plants.
3. Gain a perspective of watershed management.
4. Discuss the management of rangeland resources.
5. Understand the process of rangeland evaluation through a broad understanding of monitoring and production of these rangelands.
6. Gain a perspective of the correlation of rangelands and the economic principles guiding resource management.
7. Understand the process of rangeland condition.
8. Understand the concepts of stocking rates and usage of rangelands.
9. Gain a broad perspective of different classes of land ownership; Tribal, federal, private and state. 1
10. Recognize vegetative communities, ecological sites, plant physiology andapplication to rangeland management considerations.

RGSC 2996. Special Topics
1-4 Credits

Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

Learning Outcomes

1. Varies

RGSC 302V. Forestry and Society
3 Credits (3)

Global study of the development and use of forest resources for production of wood, fuel, fiber, and food products. Climatic, edaphic, cultural, and economic influences on forests of the world evaluated. Same as HORT 302V.

Learning Outcomes

1. Demonstrate comprehension of basic plant physiology.
2. Analyze various inputs and environmental factors that affect trees and forests.
3. Identify forest biomes based on plant morphology and environmental characteristics.
4. Categorize different types of forest products and harvesting methods.
5. Compare and contrast various forest management practices in the US and worldwide.
6. Evaluate climate and ecological issues as they relate to society.
7. Develop an awareness of the interconnection of nature and society.

RGSC 316. Rangeland Plants
3 Credits (2+3P)

Identification, classification, cultural uses, and economic importance of native and introduced rangeland plants. May be repeated up to 3 credits.

Learning Outcomes

1. Describe the physical characteristics of plants within key Representative Rangeland Plant Groups.
2. Explain the scientific classification system and accurately place plants within the correct taxonomic hierarchy (kingdom to species).
3. Apply plant morphology and classification knowledge to identify rangeland plants using field guides, dichotomous keys, and other botanical tools.
4. Demonstrate proficiency in field methods through plant surveys and specimen collection, connecting practical skills with theoretical concepts.
5. Analyze selected rangeland plant species for their unique traits, ecological roles, and potential uses in land management or restoration.

RGSC 317. Rangeland Communities
3 Credits (3)

Rangeland associations and communities, their plant species composition, and ecological factors affecting management of communities.

Learning Outcomes

1. Identify and distinguish the major rangeland associations and plant communities found across different regions of the United States.
2. Explain the ecological and geographical characteristics (ecogeographic) of rangeland communities and evaluate the primary management challenges associated with each.
3. Recognize and describe key plant and wildlife species that characterize each rangeland community, highlighting their ecological roles and interactions.

RGSC 318. Watershed Management
3 Credits (2+2P)

Management of rangeland and forest watersheds with emphasis on hydrologic cycle and land use effects on runoff and water quality. May be repeated up to 3 credits.

Learning Outcomes

1. Understand impacts of land use on water quantity and quality.
2. Quantify components of the hydrologic cycle.
3. Learn watershed management techniques and practices.
4. Apply scientific principles to evaluate current issues in watershed management.

RGSC 325. Rangeland Restoration Ecology
3 Credits (3)

Principles and practices of vegetation management and ecological restoration. Course emphasizes problems associated with rangeland degradation, and implementation of rangeland restoration and improvements.

Prerequisite: Sophomore standing or consent of instructor.

Learning Outcomes

1. Use fundamental knowledge of plants, soils, and climate to explain how changes in the structure and function of ecological systems can cause ecological degradation, and how management actions can implement changes to facilitate ecological restoration.
2. Compare and contrast the four major plant control methods (mechanical, chemical, fire, and biological) in terms of their effects on vegetation and soils and demonstrate how this knowledge informs management decisions.
3. Describe the biotic and abiotic factors that must be considered to design and implement feasible revegetation and restoration plans and explain the importance of these factors in an ecological context.
4. Apply the concepts and principles learned in this course to predict the effect of vegetation management activities on common North American rangeland plant communities.
5. Effectively communicate understanding of land degradation and restoration practices via writing and oral presentations.

RGSC 350. Special Topics
1-4 Credits

Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

RGSC 357. Grass Taxonomy and Identification
3 Credits (1+4P)
Taxonomy of grasses; grass anatomy, variation in reproductive structures, and identification of grasses by sight and through the use of dichotomous keys. Students must be Junior standing to enroll in this course. May be repeated up to 3 credits.

Learning Outcomes

1. Use terminology to describe and identify grasses.
2. Apply dichotomous keys to unknown grass species so they can be identified.
3. Recognize numerous important rangeland grasses.
4. Understand the taxonomic classification of grasses.
5. Describe the important characteristics of grasses for disciplines related to range science, wildlife management, and natural history.

RGSC 390. Internship
1-3 Credits
Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 3 credits toward a degree. May be repeated up to 3 credits.

Learning Outcomes

1. Apply foundational knowledge of rangeland science to practical field and management settings.
2. Gain firsthand experience working with professionals in the rangeland ecology and management field and develop key workplace skills such as communication, collaboration, and time management.
3. Describe the goals, roles, and daily operations of the host agency or organization, and reflect on how the internship experience informs their career interests and personal development.
4. Through documentation and final reporting, students will demonstrate an ability to communicate the value of their internship work and articulate how it connects to broader concepts in rangeland ecology and management.

RGSC 402. Seminar
1 Credit (1)
A seminar course designed to inform students of the career opportunities, develop their interviewing and other interpersonal skills may also include reading, discussions, written reports, and seminar presentations of current relevant literature.
Prerequisite(s): Senior standing.

RGSC 402 H. Range Science Seminar
1 Credit (1)
Taught with RGSC 402 with additional work.
Prerequisite(s): Meets Honors eligibility and/or Crimson Scholar status and senior standing.

RGSC 440. Rangeland Resource Ecology
3 Credits (3)
Plant adaptations to arid environments. Life histories of arid land plants. Biotic interactions among rangeland organisms. Arid land plant communities: their physiognomy, diversity, productivity, and response to disturbance. Arid land ecosystem dynamics.

Learning Outcomes

1. Students who complete this course will have a better understanding of mechanisms that determine how rangeland plant communities and ecosystems respond to natural and human-induced disturbance regimes.

RGSC 440 L. Rangeland Resource Ecology Lab
1 Credit (2P)
Living and nonliving factors of the range environment, the life forms and role of range plants and animals on succession and interactions in range ecosystems. Corerequisite(s): RGSC 440. May be repeated up to 1 credit.

Learning Outcomes

1. Students who complete this course will gain a comprehensive understanding of the interplay between abiotic and biotic factors in shaping rangeland plant communities.
2. Learn how rangeland ecosystems adapt and respond to both natural and human-induced disturbances and change.
3. Students will apply field measurement techniques and remote sensing to develop and evaluate rangeland monitoring assessment plans.

RGSC 448. Problems
1-4 Credits (1-4)
Individual investigation in a specific area of range science. Maximum of 4 credits per semester and a grand total of 6 credits. Consent of Instructor required.

RGSC 452. Vegetation Measurements for Rangeland Assessment
4 Credits (2+4P)
Sampling principles, sampling design, and measurement methods used to quantify vegetation attributes and to assess the structure and function of rangeland ecosystems. Laboratory emphasizes practical field techniques, quantitative analysis, and interpretation of results. May be repeated up to 4 credits.
Prerequisite: RGSC 294 and A ST 311.

Learning Outcomes

1. Choose from many available tools and methods for measuring and quantifying vegetation.
2. Design appropriate sampling protocols to meet monitoring objectives in various types of vegetation.
3. Measure vegetation cover, density, frequency, species inventory and production on rangelands.
4. Estimate utilization of forage.
5. Explain advantages and disadvantages of different sampling and measurement methods.
6. Use standard approaches to land classification and evaluation to interpret results in the context of resource management decisions.
7. Clearly communicate results through graphics as well as writing.

RGSC 458. Livestock Behavior, Welfare and Handling
3 Credits (2+3P)
Principles of animal behavior and evaluation of management practices on animal welfare in confined and rangeland livestock operations. Low stress livestock handling techniques. Design of livestock handling facilities. Crosslisted with: ANSC 458
Prerequisite(s): RGSC 2110 or ANSC 1120.

RGSC 460. Rangeland and Natural Resource Planning and Management
4 Credits (3+3P)
Planning and problem solving in rangeland and natural resource management. Public land planning and policy. Application of land management principles to resolve rangeland, riparian and habitat issues. May be repeated up to 4 credits.
Prerequisite: Senior or graduate student standing.

Learning Outcomes

1. Apply previous course work and skills to evaluate approaches to rangeland management issues.

2. Prepare a proposal for a practitioner-scientist research and management project which will include a comprehensive literature review of a specific topic, a directed research and project objective, partnerships among stakeholders, a project budget and timeline, and a monitoring and evaluation plan.

RGSC 485. Land Cover Analysis for Natural Resources
3 Credits (3)
This course is designed to help students understand, manipulate and extract Earth Observation (EO) data and to conduct land cover analysis related to natural resources including water and vegetation. The course provides and highlights means to identify and access EO data in different formats, extract meaningful information, and to help students developing critical thinking skills. The course introduces tools such as python and ArcGIS Pro to handle different data formats (e.g. hdf) efficiently; develop and present creative maps. The course provides basic information about how to conduct land use, land cover change analysis, mapping vegetation, water related variables and plant and animal distribution analysis.
Learning Outcomes
1. Identify sources of and obtain land cover GIS data.
2. Handle GIS data in different formats.
3. Extract meaningful information.
4. Development of qualitative reasoning and analytical thinking skills to address research questions related to natural resources.

RGSC 509. Approaches to Rangeland Research
3 Credits (3)
Experimental design and statistical analysis of experimental results.
Prerequisite: A ST 505 or consent of instructor.
Learning Outcomes
1. Define and articulate problems related to rangeland resources with clarity and relevance.
2. Formulate researchable questions based on clearly defined problems.
3. Identify and justify key variables relevant to addressing specific research questions.
4. Develop testable hypotheses and clearly defined research objectives.
5. Evaluate and compare alternative sampling methods for rangeland data collection.
6. Assess the strengths and limitations of various experimental designs in rangeland research.
7. Use statistical software tools, including Excel and SAS, to organize, analyze, and interpret data.
8. Critically analyze research publications and ongoing projects, including those of peers and professionals, for methodological rigor and scientific validity.

RGSC 513. Advanced Rangeland Ecology
3 Credits (3)
Overview of the current state of knowledge in selected areas of rangeland ecology, with emphasis on currently developing ideas and issues relevant to rangeland management.
Prerequisite: RGSC 440 or equivalent.
Learning Outcomes
1. Define rangelands and describe their global distribution, ecological characteristics, and historical context within the field of natural resource management.
2. Explain key ecological principles and functional traits (morphology and physiology) that influence rangeland ecosystem structure, function, and response to disturbance.
3. Apply foundational methods for rangeland inventory, monitoring, and assessment, including techniques for evaluating vegetation, soil condition, and ecosystem health.
4. Evaluate strategies for sustainable rangeland management, including livestock grazing systems, vegetation management, restoration practices, and watershed/riparian area protection.

RGSC 515. Graduate Seminar
1 Credit (1)
Current topics. Graded S/U.

RGSC 516. Arid Land Management
3 Credits (3)
Survey of seminal and current literature dealing with management of arid and semiarid lands including soil-plant-animal interactions, plant community ecology, arid land assessment methods, and arid land hydrology.
Learning Outcomes
1. Gain a better understanding of the basic science underlying the management of semi-arid and arid range lands.
2. Have an increased appreciation of relevant topics, seminal papers, as well as key researchers in each of the areas of arid land management mentioned above.
3. Become familiarized with the history, academic traditions, and current issues in arid land management in the western United States.

RGSC 518. Watershed Methods and Management
3 Credits (3)
Management of rangeland and forest watersheds with emphasis on the hydrologic cycle and land use effects on runoff and water quality. Hydrologic monitoring methods problem sets required for graduate credit.
Learning Outcomes
1. Understand impacts of land use on water quantity and quality.
2. Quantify components of the hydrologic cycle.
3. Learn watershed management techniques and practices.
4. Apply scientific principles to evaluate current issues in watershed management.

RGSC 520. Arid Land Plant Herbivore Interactions
3 Credits (3)
Survey of seminal and current literature dealing with plant- and animal-related factors that influence herbivory patterns in arid landscapes. Although ungulate herbivory is a central focus of the course, the role of plant defenses in deterring both vertebrate and invertebrate herbivores is discussed in detail.
Learning Outcomes
1. To develop a holistic systems thinking and problem-solving approach to understanding plant and animal interrelationships, as well as addressing issues relevant to both managed and natural ecosystems.
2. Students who complete this course will develop a comprehensive understanding of these dynamics and be equipped with the skills to apply this knowledge in practical scenarios.
3. Students will deepen their understanding of how to read, review, and present scientific literature, and conduct scientific paper annotations.
4. Develop a first draft of a scientific paper reporting either experimental results, a meta-analysis of existing data, or an in-depth literature review on a topic related to the student's dissertation.

RGSC 525. Advanced Rangeland Restoration Ecology
3 Credits (3)

Theory and application of restoration ecology and the principles and practices of ecological restoration. Course emphasizes problems associated with rangeland degradation and highlights current restoration management actions.

Learning Outcomes

1. Use fundamental knowledge of plants, soils, and climate to explain how changes in the structure and function of ecological systems can cause ecological degradation, and how management actions can implement changes to facilitate ecological restoration.
2. Compare and contrast the four major plant control methods (mechanical, chemical, fire, and biological) in terms of their effects on vegetation and soils and demonstrate how this knowledge informs management decisions.
3. Describe the biotic and abiotic factors that must be considered to design and implement feasible revegetation and restoration plans and explain the importance of these factors in an ecological context.
4. Apply the concepts and principles learned in this course to predict the effect of vegetation management activities on common North American rangeland plant communities.
5. Effectively communicate understanding of land degradation and restoration practices via writing and oral presentations.

RGSC 550. Special Topics
1-4 Credits

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

RGSC 551. Earth Data Retrieval
3 Credits (3)

This course covers topics related to identifying sources, preprocessing, utilizing earth data that can be used to monitor some hydrological and water related variables, vegetation growth and related biophysical properties. The course focuses on developing students' skills on how to handle and analyze high-level large amounts of research data in different formats (i.e. .hdf). The course highlights the use of remote sensing and land surface models-based (NLDAS) earth observation datasets (e.g. NDVI, LST, Ta, and ET). The course uses some open-source tools including Python, API as well as MATLAB. Crosslisted with: WSAM 551.

Learning Outcomes

1. Identify, retrieve, and visualize earth observation datasets that are relevant to individual research activities.
2. Understand the nature and formats of earth observation data.
3. Handle, process, and conduct quantitative analysis of earth observation datasets using python, MATLAB, and cloud computing (GEE).
4. Development of qualitative reasoning and analytical thinking skills to address research questions related to earth observation datasets.

RGSC 557. Advanced Grass Taxonomy and Identification
3 Credits (1+4P)

Taxonomy of grasses; grass anatomy, variation in reproductive structures, and identification of grasses by sight and through the use of dichotomous keys. Additional writing and grass identification assignments are required for graduate credit. May be repeated up to 3 credits.

Learning Outcomes

1. Use terminology to describe and identify grasses.
2. Apply dichotomous keys to unknown grass species so they can be identified.
3. Recognize numerous important rangeland grasses.
4. Understand the taxonomic classification of grasses.
5. Describe the important characteristics of grasses for disciplines related to range science, wildlife management, and natural history.

RGSC 575. Climate Studies, Water and Society
3 Credits (3)

The course provides a brief description of the Earth's climate system, an in-depth review and methodologies used to investigate climate change and variability, evidence of climate change on natural systems (water availability) vulnerability of human systems (e.g. agriculture) to climate change, and mitigation and adaptation strategies.

Learning Outcomes

1. Know, identify, and interrogate Earth's climate observation datasets.
2. Evaluate and understand Earth's climate systems.
3. Conduct meaningful investigations, prediction, and inferencing.
4. Critical thinking about climate change impacts on human and natural resources.

RGSC 585. Land Cover Analysis for Natural Resources
3 Credits (3)

This course is designed to help students understand, manipulate and extract Earth Observation (EO) data and to conduct land cover analysis related to natural resources including water and vegetation. The course provides and highlights means to identify and access EO data in different formats, extract meaningful information, and to help students developing critical thinking skills. The course introduces tools such as python and ArcGIS Pro to handle different data formats (e.g. hdf) efficiently; develop and present creative maps. The course provides basic information about how to conduct land use, land cover change analysis, mapping vegetation, water related variables and plant and animal distribution analysis. Crosslisted with: WSAM 585.

Learning Outcomes

1. Identify sources of and obtain land cover GIS data.
2. Handle GIS data in different formats.
3. Extract meaningful information.
4. Development of qualitative reasoning and analytical thinking skills to address research questions related to natural resources.

RGSC 589. Landscape Hydrology Modeling
3 Credits (3)

The course "Landscape Hydrology Modeling" offers topics related to the physical hydrological processes that occur at different spatial and temporal scales in terms of understanding, quantitative evaluation, modeling, and visualization. It addresses precipitation, runoff, infiltration, and evaporation, as well as understanding impact of land use change on these processes. The course highlights and provide training on the use of hydrological modeling tools including WMS software, HydroVIS and ArcGIS software to help students understand, model, manipulate, and visualize hydrological data processes. The course offers hands-on learning experience on the use of these tools.

Learning Outcomes

1. Identify the different components of a landscape scale hydrologic system and quantitatively evaluate the associated physical processes including precipitation, runoff, streamflow, infiltration, evapotranspiration.
2. Retrieve and visualize a hydrologic system data along with the associated datasets.
3. Be able to model hydrological processes within a watershed and understand the streamflow generation process and the effect of vegetation and topography on streamflow generation.

4. Gain knowledge about, and be able to use, some of the available tools that can be used in spatial and temporal hydrological process modeling.

RGSC 598. Special Research Program
1-4 Credits
Individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

RGSC 599. Master's Thesis
15 Credits
Thesis. Consent of Instructor required. Thesis/Dissertation Grading.

RGSC 600. Doctoral Research
1-15 Credits
Research. Consent of Instructor required. Thesis/Dissertation Grading.

RGSC 616. Advanced Arid Land Management
3 Credits (3)
In depth discussion of seminal and current literature dealing with management of arid and semiarid lands including land tenure systems, soil-plant-animal interactions (emphasis on livestock grazing), plant community ecology and assessment methods, and arid land hydrology.

RGSC 620. Advanced Arid Land Plant-Herbivore Interactions
3 Credits (3)
In depth discussion of seminal work dealing with plant- and animal-related factors that influence herbivory patterns in arid landscapes. Although ungulate herbivory is a central focus of the course, the role of plant defenses in deterring both vertebrate and invertebrate herbivores is discussed in detail.

Learning Outcomes

1. To develop a holistic systems thinking and problem-solving approach to understanding plant and animal interrelationships, as well as addressing issues relevant to both managed and natural ecosystems.
2. Students will deepen their understanding of how to read, review, and present scientific literature, and conduct scientific paper annotations.
3. Develop a first draft of a scientific paper reporting either experimental results, a meta-analysis of existing data, or an in-depth literature review on a topic related to the student's dissertation.
4. Students who complete this course will develop a comprehensive understanding of these dynamics and be equipped with the skills to apply this knowledge in practical scenarios.

RGSC 698. Special Research Programs
1-4 Credits (1-4)
Advanced individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

RGSC 700. Doctoral Dissertation
15 Credits
Dissertation. Consent of Instructor required. Thesis/Dissertation Grading.

RXPP-PRESCRIP PRIV PRAC PSYCH

RXPP 6110. Introduction to Psychopharmacology for Psychologists I
3 Credits (3)
This course is an introduction to physiology and an overview of gross and microanatomy, with a focus on gross, micro, and chemical anatomy of the nervous system. By the end of the course, psychologists will have an up-to-date understanding of human psychology, anatomy, and neuroanatomy. Doctorate of Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.

RXPP 6120. Introduction to Psychopharmacology for Psychologists II
3 Credits (3)
Principles of organic chemistry and human biochemistry necessary for the understanding of psychopharmacology are discussed and related to the major transmitter systems and dynamics of transmission. By the end of the course, students will have an up-to-date understanding of biochemistry on which to base further didactic study in psychopharmacology. Doctorate of Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.

RXPP 6210. Clinical Psychopharmacology I
3 Credits (3)
This course begins with an introduction to the scope of pharmacology; pharmacoepidemiology, ethical, and legal issues (informed consent, State and Federal regulation of drugs and prescribing, sources of drug information and computer aids) and continues with the principles of pharmacokinetics and pharmacodynamics as they relate to the use of psychotropic medications. It concludes with an introduction to the treatment of anxiety disorders from a biopsychosocial model of care with special emphasis on psychopharmacology for anxiety disorders. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.

RXPP 6220. Clinical Psychopharmacology II
3 Credits (3)
This course is a thorough investigation of the diagnosis and treatment of affective disorders from a biopsychosocial model of care. Particular emphasis is given to psychopharmacological treatment of depressive disorders and bipolar disorders. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.

RXPP 6230. Clinical Psychopharmacology III
3 Credits (3)
This course is an intensive study of the treatment of psychosis from a biopsychosocial model of care. Special consideration is given to: first, second, and third generation antipsychotic drugs and their pharmacology and clinical uses; neurological and metabolic disorders associated with antipsychotic use; and appropriate use of antipsychotics in children and the elderly. Special attention is then given to child and adolescent psychopharmacology, including drugs used in pregnancy and lactation, teratogenicity, embryotoxicity, developmental disorders, conduct disorders, ADHD, and special considerations in use of approved drugs in children. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to the Clinical Psychopharmacology program. May be repeated up to 3 credits.

Learning Outcomes

1. Delineate the biochemical mechanisms underlying the pharmacological efficacy of the three generations of antipsychotic drugs.
2. Differentiate the effects and side effects of first, second and third generation of antipsychotic drugs.

3. Describe the effects of various antipsychotic drugs on the positive and negative symptoms of schizophrenia; including the neurological projections within the Central Nervous System.
4. Describe the biochemical and physiological basis of adverse reactions with antipsychotic treatments.
5. Select anti-psychotics using evidence based criteria and manage the medical issues that arise from their use.
6. Identify the various signs of side effects to antipsychotic drugs and use the appropriate techniques for assessing their severity including the administration of appropriate rating scales assessing those side effects (e.g. AIMS, BMI)
7. Examine the cost-benefit ratio of psychotropic use for adult, child, adolescent and elderly patients with psychotic disorders.
8. Become familiar with current treatment algorithms for the management of psychotic disorders and their limitations.
9. Learn which anti-psychotics that have FDA approval, as well as those that are used off-label in the treatment of children, adolescents and the elderly.

RXPP 6310. Pathophysiology for Psychologists I
3 Credits (3)
This course is an introduction to human clinical physical assessment, history taking, charting, and laboratory testing and neuroimaging. An important emphasis is in functional neuroanatomy and diagnosis and assessment of neurological disorders; role of different components of human nervous system in health and disease; stroke, seizures, and movement disorders (chorea, athetosos, dystonias, dyskinesias, Parkinsonism, akathesia, iatrogenic neurological disorders). Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.

RXPP 6320. Pathophysiology for Psychologists II
3 Credits (3)
Physical assessment and pathophysiology of the cardiovascular system is studied in depth: structure and function of the heart and major blood vessels; innervation of the heart and vessels; electrocardiogram; components of blood; lymphatics; and physical assessment of cardiac function. The physical assessment and pathophysiology of eyes, ears, nose, and the immune system are studied in depth; anatomy and physiology of special senses; assessment of cranial nerves and sensory function; immune function and psychoimmunology. The physical examination and pathophysiology of the chest and pulmonary system and its relationship to the cardiac system is also studied. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.
Learning Outcomes
1. Receive an overview of the pathophysiological mechanisms, relevant assessment findings, treatment recommendations within the pulmonary system.
2. Describe at least 2 symptoms and treatments of COPD.
3. Name at least 2 the symptoms and treatments for asthma.
4. Identify at least 2 signs and symptoms of Cheyne-Stokes respiration.
5. List at least 2 the signs and symptoms of Atelectasis.
6. Explain at least 2 signs and symptoms of Pleurisy.
7. Label at least 2 the signs and symptoms of Emphysema.
8. Explain the signs and symptoms of Tuberculosis.
9. Name at least 2 diagnostic tests that are indicative of a low oxygen level. 1
10. Diagram 2 pathways of oxygenated and de oxygenated blood throughout the body. 1
11. Synthesize assessment findings of pulmonary system into diagnoses using a deliberate and systematic process of data collection and analysis. 1
12. Demonstrate critical thinking and use of research findings in the analysis of a comprehensive health assessment of the pulmonary and circulatory systems as the basis for advanced therapeutic practice interventions.

RXPP 6330. Pathophysiology for Psychologists III
3 Credits (3)
This course continues with an in-depth study of the chest and pulmonary system: pulmonary function and assessment; respiratory exchange and respiratory involvement in acid: base regulation, disorders of respiratory function. The physical assessment of pathophysiology of the gastrointestinal system is discussed in depth: digestion, absorption and excretion of drugs and nutrients from the GI system; disorders of GI function; hepatic function; innervation of GI tract; endocrine and exocrine functions of GI system; physical assessment of GI function. The functions and pathophysiology of the male and female reproductive system, endocrine system, and renal system are discussed as they relate to psychopharmacology. Doctorate of Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.

RXPP 6410. Psychopharmacological Treatment in Special Populations I
3 Credits (3)
The psychopharmacology of several special populations are discussed in detail in this course. Geriatric psychopharmacology includes: geriatric physiology; cardiac, renal, hepatic changes with aging; pharmacokinetics/dynamics in the elderly; cognition enhancers in Alzheimer's and other dementias. Special treatment of personality disorders, eating disorders, the importance of racial, ethnic, and gender differences and culturally sensitive practice is presented with applications. Pain management psychopharmacology is over-viewed, including: pharmacology of opioid and non-opioid analgesics; pain syndromes; acute and chronic pain; headache; pharmacological and non-pharmacological approaches to pain management; pharmacology and actions of abused substances: acute effects, withdrawal, biochemistry of tolerance and dependence, brain central reward pathways. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.
Learning Outcomes
1. Use a GFR calculator to assess the renal function of an elderly patient.
2. Select the most appropriate antidepressant medication for an elderly patient considering the patient's current level of renal function.
3. Analyze a patient's medication list and calculate the Beers score for the patients' medication list.
4. Use knowledge gained from analysis of the patient's Beers score to select an appropriate medication for the following conditions: insomnia; psychosis; depression anxiety.
5. List three psychotropic medications that do not require a dose adjustment based on the patient's GFR.

6. Analyze an elderly patient's current medication list using the STOPP/START guidelines.
7. Select the most appropriate medication for a patient experiencing delirium consistent with the STOPP/START guidelines.
8. Calculate an elderly patient's vulnerability score using the VES – thirteen.
9. List three psychotropic medications that are hepatotoxic and should not be used in patients with cirrhosis. 1
10. List the 10 most common medical illnesses in the elderly. 1
11. Calculate the Child-Turcotte-Pugh Score of hepatic function for a patient. 1
12. Review the current availability of empirically validated Decision Support Tools (DST's) for the treatment of Late Life Depression (LLD) and decide whether the use of DST is supported by the evidence. 1
13. Defend a risk/benefit analysis for the use of the following medication classes in the elderly: SGA's; AZD Rx's; hypnotics; mood stabilizers. 1
14. Explain the relationship between outcome and sponsorship in studies of the comparative efficacy of psychotropic medications and psychotherapy in older adults. 1
15. List expected dosage adjustments for benzodiazepines, SSRI's, anticonvulsants, and hypnotics in older adults. 1
16. Select the appropriate medication for each of 5 patients in cases presented during the class.

RXPP 6420. Psychopharmacological Treatment in Special Populations II
3 Credits (3)
The pathophysiology and treatment of substance use disorders from a biopsychosocial model is presented. Issues of medical comorbidity are studied: psychopharmacological treatment in the medically compromised patient, including case studies and review of comprehensive treatment models; mental disorders due to a general medical condition and/or adverse drug reactions; and referral practices to specialists. Diagnostic rating scales and psychiatric instruments of use to the prescribing psychologist are presented. The course ends with an integration of psychotherapy and pharmacotherapy, including ethical issues such as the right to refuse treatment, treatment compliance/adherence, risk management, and the role of the medical psychologist in the modern, integrated healthcare system. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.

RXPP 6510. Supervised Experience in Psychopharmacology I
1-3 Credits (1-3)
In this applied course, students employ their knowledge of psychopharmacology in treatment setting. Students will participate in the treatment of 50 patients for a minimum of 200 hours under the supervision of a physician. Number of credits taken to be determined in consultation with RXPP Training Director. Maximum of 3 credit hours required by degree program. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.
Learning Outcomes
1. Students will complete eighty hours of practicum in a health care setting while supervised by a licensed physician.
2. Students will demonstrate expertise in providing basic vitals, physical assessment, and laboratory interpretation skills they have been taught in class.
3. Students will demonstrate expertise in performing diagnostics (e.g. imagining studies), differential diagnoses, clinical medicine, and instrumentation.

RXPP 6520. Supervised Experience in Psychopharmacology II
1-3 Credits (1-3)
Continuation and completion of supervised experience in RXPP 6510. Students will participate in the treatment of 50 additional patients for a minimum of 200 hours under the supervision of a physician. The RXPP 6510/6520 sequence must be completed no sooner than three months and no later than three years from initiation. Number of credit hours taken to be determined in consultation with RXPP Training Director. Maximum of 3 credit hours required by degree program. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits.
Learning Outcomes
1. Students will be monitoring the psycho-biosocial treatment of 100 patients, for a minimum of 400 hours.
2. Students will demonstrate expertise in combining psychotropic medication along with psychotherapy.
3. Students will demonstrate knowledge and expertise is practicing enhanced patient education; and making psychotropic medication recommendations, management,and/or consulting with, as needed, allied health professionals.

RXPP 6996. Selected Topics
1-6 Credits (1-6)
Offered under various subtitles which indicate the subject matter covered. A maximum of 6 credits in any one semester and a total of 18 credits overall. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 18 credits.

SIGN-SIGN LANGUAGE

SIGN 1110. American Sign Language I
3 Credits (3)
American Sign Language I is an introductory level language course in the language of the American Deaf Culture. Content includes ASL vocabulary and conversational skills; linguistic features of ASL; and skills in narrative/storytelling. In-class activities, comprehension and expressive examinations, narrative and storytelling assignments in addition to semester projects are venues for students to demonstrate their learning. In addition, Deaf Culture and Deaf Community issues are addressed. May be repeated up to 3 credits.
Learning Outcomes
1. Engage in basic conversations using ASL, such as introducing oneself, exchanging personnel information, and talking about one's surroundings.
2. Demonstrate the use of grammatical structures, including spatial referencing, use of classifiers, role shifting, ASL syntax, and non-manual signals (NMS).
3. Demonstrate clear sign production using an understanding of sign parameters: handshapes, movement, location, palm orientation, and NMS in targeted lexicon.
4. Demonstrate the use of basic ASL vocabulary and expressions necessary for conversationsabout real-life situations.

5. Evaluate and provide feedback concerning peers' and one's own uses of ASL.
6. Develop culturally-appropriate behaviors and conversation strategies within a variety of contexts for interacting with people who are Deaf.
7. Demonstrate effective use of comprehension and expressive ASL skills through narrative and/or storytelling activities.
8. Describe issues of the American Deaf community and Culture.

SIGN 1120. American Sign Language II
3 Credits (3)
American Sign Language II is a continuation course that builds on concepts and skills developed in American Sign Language I. Students gain further exposure to ASL structure and grammar, and Deaf Culture and the Deaf community. Emphasis is on increasing students' ability to comprehend other signers and express themselves with more elaboration when conversing or presenting in ASL. May be repeated up to 3 credits.
Prerequisite: SIGN 1110 or consent of instructor.
Learning Outcomes
1. Further develop basic conversational skills in ASL, taking on more complicated topics.
2. Apply knowledge of ASL grammar, including classifiers, spatial referencing and agreement, role shifting, and non-manual markers.
3. Develop ASL vocabulary, fingerspelling, number, narrative and storytelling skills.
4. Evaluate and provide feedback concerning peers' and one's own uses of ASL.
5. Demonstrate effective use of comprehension and expressive ASL skills through conversation, discussion, narrative and/or storytelling activities.
6. Demonstrate knowledge and appreciation of the American Deaf community and ASL
7. Through first-hand experience in the American Deaf community and ASL, relate and reflect on perspectives of the community.

SIGN 2110. American Sign Language III
3 Credits (3)
This is an intermediate level course in American Sign Language (ASL). Expected areas of intermediate skill and knowledge development include: language comprehension and production, conversational use, narratives, ASL language features and further knowledge of and interaction with Deaf culture and the Deaf community. May be repeated up to 3 credits.
Prerequisite: SIGN 1120.
Learning Outcomes
1. Demonstrate intermediate ASL vocabulary, conversation and narrative/storytelling skills.
2. Demonstrate fundamental ASL features including visual/spatial orientation, constructed dialogue and action, spatial referencing, classifiers, non-manual behaviors and syntax/word order.
3. Demonstrate appropriate use of cultural behaviors and conversational strategies.
4. Translate written and spoken English to ASL and vice versa.
5. Self-evaluate and provide feedback to peers concerning ASL usage.
6. Examine the culture of the American Deaf community through engaging in community activities and its language.

SIGN 3110. American Sign Language IV
3 Credits (3)
This course is a continuation of SIGN 2110 (ASL III) with a focus on more complex grammatical features. Involves intensive practice to include the advance skills of receptive/expressive abilities in complex grammatical dialogues and storytelling, conversational use and expressing narratives. May be repeated up to 9 credits.
Prerequisite: SIGN 2110.
Learning Outcomes
1. Students will recognize sociolinguistic variation in American Sign Language.
2. Students will develop proficiency by learning the semantic and grammatical accuracy of American Sign Language.
3. Students will be able to utilize different strategies dependent on the communication contexts.
4. Students will enhance their receptive and expressive language ability as needed to integrate into the Deaf Culture by communicating in American Sign Language.

SIGN 3210. Introduction to Deaf Community
3 Credits (3)
This course is an introduction to American Deaf Community's cultural versus clinical view of deafness with emphasizes on the language, physical, educational, social, political, and cultural implications within the context of deaf and hard of hearing individuals. The course emphasizes personal lives, family and their current educational and vocational programs, legislation, technology, oppression, and other issues. May be repeated up to 6 credits.
Prerequisite: SIGN 1110 American Sign Language I & SIGN 1120 American Sign Language II.
Learning Outcomes
1. Students will define and comprehend basic terms, causes, conditions and processes relating to hearing loss and how it impacts an individual's personal life, family, language education and vocational services.
2. Students will identify professionals involved in the field and their roles, functions, and professional credentials.
3. Students will identify and define common language and communication methods utilized by deaf and hard of hearing people.
4. Students will compare and contrast cultural versus pathological views of Deaf Community.

SIGN 4110. Deaf Culture
3 Credits (3)
This course offers a historical and contemporary overview of all genres of American Deaf Culture. Topics include education, socio-cultural, political, and economic aspects of the Deaf culture. Cultural identity, values, group norms, communication, language, and the significant contributions made by Deaf/deaf people to the world.
Prerequisite: SIGN 1110 American Sign Language I and SIGN 1120 American Sign Language II.
Learning Outcomes
1. Students will comprehend the Deaf Cultures in America from a multicultural perspective by recognizing the political and cultural importance of the ASL as a language.
2. Students will discuss past, present and future trends for D/deaf and Hard of Hearing communities by outlining the historical roots of American Deaf culture and education.
3. Students will comprehend how significant federal, state, and local legislation contributes to the lives of D/deaf and Hard of Hearing people.

SMET-SCIENCE/MATH/ENG/TECH

SMET 101. Introduction to Science, Mathematics, Engineering, and Technology
1 Credit (1)
An introductory course for science, mathematics, engineering, or technology students, emphasizing introduction to their disciplines. Development of critical thinking and academic success skills for technical disciplines, as well as degree planning for the major.
Learning Outcomes
1. Apply the scientific method of constructing and testing hypotheses.
2. Design and conduct an experiment using Radio Jove.
3. Apply astrobiological knowledge to solve human problems.
4. Develop competence in appropriate scientific laboratory techniques.

SMET 102. Introduction to Engineering Design.
1 Credit (1)
Fundamental concepts of engineering design developed through analysis of case studies and hands-on design projects.
Learning Outcomes
1. Identify assumptions within a given context and be able to predict outcomes through data analysis.
2. Obtain, interpret and analyze numerical information through the use of appropriate tables, diagrams, and algorithms.
3. Develop competency in conveying astrobiological knowledge through laboratory reports and/or written assignments following proper APA documentation style.
4. Design antenna configurations to increase the frequency of the radio Jove.

SMET 201. Research for Visiting Community College Students
1 Credit (1)
Research experience for visiting community college students. Consent of instructor required. Restricted to: Main campus only.

SMET 301. Undergraduate Research Assistantship
0.5 Credits (.5)
Undergraduate research experience in science, technology, engineering, and mathematics Consent of instructor required. Graded: S/U.

SOCI-SOCIOLOGY

SOCI 1110G. Introduction to Sociology
3 Credits (3)
This course will introduce students to the basic concepts and theories of sociology, as well as to the methods utilized in sociological research. The course will address how sociological concepts and theories can be utilized to analyze and interpret our social world, and how profoundly our society and the groups to which students belong influence them. Students will be given the opportunity to challenge their "taken-for-granted" or "common sense" understandings about society, social institutions, and social issues. Special attention will also be paid to the intimate connections between their personal lives and the larger structural features of social life. In addition, the implications of social inequalities, such as race/ethnicity, gender, and social class will be central to the course's examination of social life in the United States.
Learning Outcomes
1. Define sociological perspectives and the contributions that sociological knowledge can bring to the social sciences.
2. Understand the sociological imagination and explain the relationships between social structures, social forces and individuals.
3. Demonstrate the ability to apply the perspectives of symbolic interactionist theory, conflict theory, and structural-functionalist theory to qualitative and/or quantitative data.
4. Understand and explain intersectionality and the connections between race, class, gender, disability, sexual identity and other forms of structural inequality.

SOCI 2230. Sociology of Sexuality
3 Credits (3)
This course explores all aspects of human sexuality from a sociological perspective. Topics include, but are not limited to, sex work, intimate relationships, sexual response, political movements, power, and the social construction of sexuality. The course also considers how various social statuses such as ethnicity, gender, and social class intersect with sexuality.
Learning Outcomes
1. Identify the central research questions, theories, and methodologies used in the study of human sexuality.
2. Identify and describe biological, cultural, social, and psychological sexual behaviors and response across the lifespan.
3. Identify and describe trends and changes that influence sexual attitudes and values in the U.S. and globally.
4. Describe how sexuality is influenced by contextual factors, such as race/ethnicity, gender, socioeconomic status, disability, and nationality.

SOCI 2240. Sociology of Intimate Relationships and Family
3 Credits (3)
This course provides an overview of contemporary intimate relationships and families from sociological perspectives. We will examine intimate relationships and families as social constructions whose meanings have changed over time and from place to place. This course will aid students in developing a greater understanding of intimate relationships and families as institutions in contemporary U.S. society. Intersections of race, class, gender, sexual orientation, nationality, and other factors within these institutions will be addressed. Community Colleges only. May be repeated up to 3 credits.
Learning Outcomes
1. Explain the sociological approaches to researching intimate relationships and families.
2. Describe important sociological research findings concerning intimate relationships and families.
3. Explain how intimate and familial relationships are affected by multiple intersecting inequalities and ongoing events in other social institutions.

SOCI 2261. Issues in Death and Dying
3 Credits (3)
Major personal and social issues related to the process of dying in our culture. Community Colleges only.
Learning Outcomes
1. be able to understand the diversity of the death experience and the various options available in coping with death and bereavement as shown by the student's participation in class discussions and field trips.
2. better understand death and dying as social phenomena as shown by the student's reaction papers.
3. have taken an in-depth look at her or his own death with a researched paper. Comprehension will be shown by the student's grade on the paper.

SOCI 2310G. Contemporary Social Problems
3 Credits (3)
This course studies the nature, scope, and effects of social problems and their solutions. The course will concentrate on sociological perspectives, theories, and key concepts when investigating problems, such as inequality, poverty, racism, alienation, family life, sexuality, gender, urbanization, work, aging, crime, war and terrorism, environmental degradation, and mass media. This course is designed to build students' sociological understanding of how sociological approaches attempt to clarify various issues confronting contemporary life, as well as how sociologists view solutions to these problems.
Learning Outcomes
1. Identify and explain major social problems in the United States, and how social problems become constructed as problems.
2. Describe and analyze policy related solutions associated with social problems from various perspectives.
3. Critically examine social problems through the use of sociological theories, methods, and empirical techniques.
4. Identify connections, both national and global, between social problems and social inequalities (e.g., social class, race/ethnicity, and gender/sexuality).

SOCI 3110V. Sociology of Religion
3 Credits (3)
Provides an overview of old and new methods and theories for the study of religion. Exposure to the ways groups of people in diverse cultural systems construct and change their religious traditions to serve practical and meaningful ends. May be repeated up to 3 credits.

SOCI 3120V. Introduction to Population Studies
3 Credits (3)
Determinants and consequences of changes in fertility, mortality and migration patterns. Introduction to techniques of demographic analysis. Focus on U.S. and world population issues and their relation to social, cultural, and economic systems. May be repeated up to 3 credits.

SOCI 3150. Social Research: Methods
3 Credits (3)
An introduction to research design and data collection strategies commonly employed in the social sciences. Topics include experiments, survey research and various other quantitative and qualitative methods. May be repeated up to 3 credits.
Prerequisite: SOCI 1110G.

SOCI 3160. Sociological Research: Analysis
3 Credits (3)
Elementary data analysis class emphasizing descriptive and inferential statistical techniques commonly employed in the social sciences. Topics range from one variable analysis through regression and correlation analysis of two variables. May be repeated up to 3 credits.
Prerequisite: SOCI 1110G.
Learning Outcomes
1. Critically evaluate understand social statistics from various common sources such as TV, newspapers, research reports, and scholarly articles. --Assessed via discussion, assignments and exams.

SOCI 3165. Sociological Theory
3 Credits (3)
Analysis of the main historical themes underlying contemporary sociological theory. May be repeated up to 3 credits.
Prerequisite: SOCI 1110G.

SOCI 3240. Sociology of the Family
3 Credits (3)
Family patterns, dynamics, and processes in North American and other contemporary families. Emphasis on diversity. May be repeated up to 3 credits.
Learning Outcomes
1. Family patterns, dynamics, and processes in North American and other contemporary families. Emphasis on diversity.

SOCI 3245V. Comparative Family Systems
3 Credits (3)
A comparative analysis of family forms and characteristics in various societies. An examination of the diversity of family practices among ethnic and class groups in the United States. May be repeated up to 3 credits.

SOCI 3250. Sociology of Childhood
3 Credits (3)
This course examines theories, methods, and empirical research in several areas of the sociology of childhood. Major themes are: (1) how social structure constrains children's lives, (2) how children negotiate, share, and create culture, and (3) how children's experiences vary within and across societies. May be repeated up to 3 credits.

SOCI 3255. Youth and Society
3 Credits (3)
Comparative historical analysis of social, economic and cultural forces affecting young people. Emphasis on organizational and institutional effects on the well being of children and young adults. May be repeated up to 3 credits.

SOCI 3270. Gender and Society
3 Credits (3)
Overview of issues related to gender, including how gender is constructed and reproduced in our society. Gender is examined from social psychological and institutional perspectives. May be repeated up to 3 credits.

SOCI 3310V. Social Issues in the Rural Americas
3 Credits (3)
Discussion of the major social issues facing the rural United States and borderland areas. Topics include the social history, governmental policies, water rights, land issues and labor. May be repeated up to 3 credits.

SOCI 3315. Urban Society in a Global World: Problems, Prospects, and Promises
3 Credits (3)
Identification and analysis of the causes and consequences of social issues in urban environments including poverty, crime, terrorism, urban social policy, suburban flight, disinvestment, and deindustrialization. Special emphasis on global forces affecting global urban environments around the world. May be repeated up to 3 credits.

SOCI 3330. Environmental Sociology
3 Credits (3)
This course provides a sociological examination of the interconnections of human social organization and the biophysical environment. The goal is to make sense of these complex interconnections between society and the environment--including examination of potential causes and solutions to environmental problems in real world settings. May be repeated up to 3 credits.

SOCI 3340V. Social Change
3 Credits (3)
Explanations of autonomous and directed social change as occurring at the individual, organizational, societal, and international levels. Case studies from around the world. May be repeated up to 3 credits.

SOCI 3410. Race and Ethnic Relations
3 Credits (3)
Dynamics of racial prejudice and patterns of racial and ethnic interaction in the United States. May be repeated up to 3 credits.

SOCI 3415. Social Inequality
3 Credits (3)
Analysis of the social distinctions arising from sex, age, occupation, and ethnicity. Emphasis on indicators of social class and patterns of social mobility. May be repeated up to 3 credits.

SOCI 3510. Crime and Society
3 Credits (3)
Analysis of crime at the interpersonal, organizational, and social structure levels in society. Exploration of contemporary images of crime in mass media. Examination of connections between race, class, gender, and crime in U.S. society. May be repeated up to 3 credits.

SOCI 3520. Juvenile Delinquency
3 Credits (3)
Nature, extent, and causes of juvenile delinquency; juvenile justice; modern methods of treatment; programs of prevention. May be repeated up to 3 credits.

SOCI 3610V. Sociology of Pop Culture
3 Credits (3)
This course will provide students with a sociological look at creation, distribution, and effects of popular culture that have shaped, preserved, and conveyed distorted images of social class, race, gender and history to unwary consumers. May be repeated up to 3 credits.

SOCI 3620V. Sports and Society: A Global Perspective
3 Credits (3)
A critical examination of sports in a global context, emphasizing the social and cultural factors that shape the world of sports and the consequences of sports for societies. Course examines issues of social inequality, violence, media and corporate influence, religion and sports, and the student-athlete experience. May be repeated up to 3 credits.

SOCI 3630. Culture and Social Life
3 Credits (3)
What exactly does culture look like, and how precisely does it shape---and is shaped by---social behavior? These are the core questions in the sociology of culture and will be the focus of this course. The course begins with an overview of the various ways that culture has been defined in sociological theory and research. The course will then focus on various topics within the contemporary sociology of culture, including, but not limited to, culture and cognition, the production of culture, culture and politics, and culture and inequality.
Learning Outcomes
1. Finish the course with an understanding of the different ways that culture is defined in sociological research.
2. Understand the various ways that culture affects social behavior and how social behavior shapes and changes culture.
3. Finish the course with a sociological imagination that is expanded to included cultural theory.
4. Finish the course with the ability to formulate research projects that involve cultural theories.

SOCI 3635V. Food and Society
3 Credits (3)
This course explores how food and food products are produced, prepared, and consumed. We examine social and structural inequalities, economics, the food-health crisis, and the environmental, political, cultural, and symbolic dimensions of food systems and food-related behaviors. We also discuss the impact of race, class, gender, and socioeconomic matters on food-related issues and investigate how social problems in the food system reflect an ongoing tension between individuals and the power of social institutions.
Learning Outcomes
1. Discuss food, food systems, and food-related topics using sociological terms, concepts, and theories using empirically-based and scholarly research.
2. Demonstrate how sociological perspectives regarding food, food systems, and eating practices can be viewed as social issues and socially constructed.
3. Apply food as a lens to study opportunities and patterns of consumption, distribution, and production, which reflect existing social inequalities.
4. Apply a sociological perspective to students' eating habits, food environments, and food cultures.
5. Identify themselves as competent social actors exploring ways they can make positive contributions to society and be catalysts for change.
6. Develop and express interpretation and analysis of sociological principles through formal and informal writing.

SOCI 3640. Sociology of Digital Media
3 Credits (3)
This course explores how the social, political-economic, and cultural landscape is changing in relation to digital media and information technologies.
Learning Outcomes
1. Develop analytical tools for understanding the complex information society.
2. Examine how the cultural, political, and social environments are changing with the emergence of new media and digital technologies.
3. Place the relationship between society and new media in context – what is interesting about these "new" technologies?
4. Successfully develop, conduct, and present a final project.
5. Understand a central and contemporary issue within the study of social media from a sociological perspective.

SOCI 3645. Music in Society
3 Credits (3)
This course reviews historical, contemporary, and emerging forms of music. We will analyze the fascinating interplay between music and society, delving into how music reflects and shapes cultural attitudes and beliefs. Our focus views music as a primary source of meaning in our lives, exploring individual experiences and collective behavior and analyzing the central role of music in social life and society.
Learning Outcomes
1. Discuss music and its social and individual impact using sociological terms, concepts, and theories.
2. Apply a sociological perspective (using sociological theories and methods) to ask/answer questions about music and music-related topics.
3. Analyze the tremendous influence music has on our understanding and expressions of race, class, gender, sexual orientation, socioeconomic status, and contemporary culture.
4. Examine diversity and culture as they intersect with music in both historical and contemporary contexts.
5. Illustrate the role of music in collective identity and social movements.

6. Identify themselves as competent social actors exploring ways they can make positive contributions to society and be catalysts for change.

SOCI 3650. Film in Society
3 Credits (3)
Using historical, cultural, and social perspectives, this course analyzes the comprehensive scope of classic and contemporary films. It uses examples from a variety of films to discuss how meaning is socially constructed and presented and its overall function in society. We explore the topics of identity, race, social class, gender, sexuality, education, courtship and marriage, religion, and many other elements of society.
Learning Outcomes
1. Express a working knowledge of sociological inquiry and sociological terms, concepts, and the major theoretical approaches that sociologists use to understand the complexities of film in society.
2. Explain how the human experience, personal values, and ideas are shaped and expressed by films at both individual and structural levels.
3. Illustrate expressions of intersectionality and the presentation expressed in contemporary film.
4. Apply a broad, sociological perspective to understand the complex issues involved in the social construction and perpetuation of contemporary social problems.
5. Evaluate the power of classical and contemporary film and their influence on human experience, personal identity, social values and ethics, and American culture.
6. Identify ourselves as competent social actors exploring ways we can make positive contributions to society and be catalysts for change.
7. Develop and express interpretation and analysis of sociological principles through formal and informal writing.

SOCI 4150. Networked and Connected
3 Credits (3)
Introduction to social network analysis in sociology. First half of the course focuses on understanding the structure of social networks. Second half of the course involves examining real-world social networks ranging from romantic relationships to political parties.
Learning Outcomes
1. Finish the course with the ability to interpret, question, and discuss network science theories and methods.
2. Understand which type of network method is appropriate for different kinds of research questions.
3. Finish the course with basic programming and network analysis skills in the R statistical computing environment.

SOCI 4155. Textual Analysis of Digital and Social Media
3 Credits (3)
Introduction to some of the methods that social scientists use to analyze digital and social media. Focus is on developing the fundamentals for designing and conducting text analysis projects.
Learning Outcomes
1. Finish the course with the ability to interpret, question, and discuss text analysis methods accurately.
2. Understand which type of text analysis method is appropriate for different kinds of research questions.
3. Finish the course with basic programming and data analysis skills in the R statistical computing environment.

SOCI 4160. Visualizing Social Life
3 Credits (3)
Introduction to how to communicate sociological findings using graphics. Emphasis is on finding meaningful trends in real-world social science data and creating graphics that best communicate those associations or trends.
Learning Outcomes
1. Finish the course with the ability to create, interrogate, and interpret data visualization.
2. Understand which type of graphic is appropriate for different kinds of social science data.
3. Finish the course with basic programming and data visualization skills in the R statistical computing environment, especially with the ggplot2 package.

SOCI 4240V. Comparative Global Family Systems
3 Credits (3)
The study of families around the world. The comparison will include how capitalism and power differentials have affected the course of family history, gender relations, and family life today. May be repeated up to 3 credits.

SOCI 4270. Sex and Gender
3 Credits (3)
This course is an advanced exploration of gender from a sociological perspective. Topics include cultural constructions of gender, socialization and identity formation. In addition, the course examines how gender is relevant within the institutions of family, work, education, religion and politics, with particular focus on how gender is linked to inequality.
Learning Outcomes
1. Differentiate between biological, psychological and sociological perspectives on sex and gender.
2. Demonstrate an understanding of the social construction of gender.
3. Demonstrate an understanding of gender as it intersects with other social identities such as sexuality, race, ethnicity, religion, and class.
4. Identify the role of culture and socialization in the development of gender.
5. Apply a sociological understanding to how gender is relevant within the institutions of family, work, education, religion, the media and politics.

SOCI 4310. Community Development
3 Credits (3)
This is a holistic view of community development with an emphasis upon how economic development efforts can become more inclusive and sustainable. Topics include examining what 'community' means, community development versus economic development, and alternative economic activities. May be repeated up to 3 credits.
Prerequisite: SOCI 1110G.

SOCI 4315. Public Sociology
3 Credits (3)
This course examines both the theory and practice of public sociology. The course begins by examining the theoretical aspects, challenges, and critiques informing public sociology. After setting these foundations the remainder of the course examines different ways of applying public sociology, whether in the K-12 classroom, through community engagement activities such as nonprofit work, or other endeavors that seek to make the world a better place.
Learning Outcomes
1. Understand the theoretical foundations and debates within public sociology 2)Understand various ways public sociology can be practiced outside academia

SOCI 4317. Social Transformation
3 Credits (3)
This course examines various components of social change. The primary intention of this course is to help students better understand how the United States, and the world, has changed and continues to change. The course begins by examining how social change influences one's personal life, then focuses upon how social change influences inequalities in the United States. The course concludes by examining how individuals can engage in creating social change.

Learning Outcomes
1. Identify how social change has influenced, and continues to influence, their personal lives.
2. Identify the causes and patterns of social change.
3. Identify how different sociological theoretical paradigms and theories explain different facets of social change.
4. Apply these various theoretical perspectives learned to various types of social change.

SOCI 4320. Social Movements and Activism
3 Credits (3)
An overview and exploration of the key concepts of collective behavior and social movements as they apply to both historical and contemporary trends and movements. We examine also social movement tactics and their effectiveness in shaping policy and social norms. May be repeated up to 3 credits.

Learning Outcomes
1. Demonstrate understanding of social movement theory and how it applies to particular cases.
2. Identify and analyze how social movements emerge and the conditions that their success depends on.
3. Analyze the role that movements play in transitions to and consolidations of democracy.
4. Critically examine how: a) State repression incites or threatens the development of movements, and b) which strategies movements use for communicating with the larger society.
5. Demonstrate knowledge of a specific social movement and its relations to broader questions of social, economic, political, and cultural transformations.

SOCI 4325. Digital Media and Activism
3 Credits (3)
This course introduces the study of social movements and activism and their relationship with digital and social media.

Learning Outcomes
1. Understand the most relevant theories of social movements and how these have been affected by the new digital media ecology.
2. Critically examine how the qualities and attributes of digital media contribute to the operation, growth, and success of contemporary activism around the world.
3. Place the relationship between social movements and new media in context.
4. Understand a central and contemporary social movement and its use of social media to further its goals.

SOCI 4335V. Advanced Environmental Sociology
3 Credits (3)
Advanced examination of societal responses to environmental problems including social adjustments to natural and technological hazards, sociocultural aspects of technological risk and impact assessment, and emergence of environmental social movements. May be repeated up to 3 credits.

SOCI 4337. Human Society and the Environment
3 Credits (3)
This course explores the relationship between human societies and the natural environment, with an emphasis on both sustainable human and environmental relationships. May be repeated up to 3 credits.
Prerequisite: SOCI 1110G.

SOCI 4410. Diversity in Alternative Families
3 Credits (3)
Cross-cultural examination of diversity among and within families: analysis of family diversity includes consideration of the theoretical frameworks, ideological commitments, personal experiences, and methodological approaches to examine family life. May be repeated up to 3 credits.

SOCI 4420. Sociology of Latinos/as in the United States
3 Credits (3)
In-depth examination and comparative analysis of political and economic issues affecting Latino/a culture and behavior. Includes the Chicano/a and larger Latino/a movements, the border, immigration, language policies, education, religion, labor, and Latina women s issues. Recommended preparatory courses: SOCI 1110G, SOCI 3410, or HIST 367. May be repeated up to 3 credits.

SOCI 4430. International Migration
3 Credits (3)
This course examines international migration as a social process, focusing on the American experience. Students will examine historical and comparative literature on immigration that puts contemporary questions about policy and immigrant assimilation into a broader sociological perspective. May be repeated up to 3 credits.
Prerequisite: SOCI 1110G.

SOCI 4450. Power and Politics in America
3 Credits (3)
This course provides an introduction to the study of Political Sociology with a focus on the United States. Political Sociology studies the social bases of politics and political systems and facilitates the understanding of the processes and consequences of power distributions in the United States. May be repeated up to 3 credits.
Prerequisite: SOCI 1110G.

SOCI 4455. Inequality and Public Policy
3 Credits (3)
This course explores the reciprocal relationship between inequality and public policy, with a particular focus on poverty and anti-poverty policy in the contemporary United States.

Learning Outcomes
1. Understand and compare different ways in which poverty has been historically measured and understood
2. Understand and apply various types of social inequality
3. Critically read and evaluate empirical research measuring, and policy proposals addressing, poverty and inequality
4. Write your own policy evaluation including empirically grounded policy recommendations
5. More effectively participate in policy debates regarding inequality and poverty

SOCI 4460. Globalization
3 Credits (3)
Analysis of the globalization process. Covers theories of globalization, the global economy, political globalization, global culture, transnational

social movements, transnational migration and world labor market, global cities, and local-global linkages. Same as POLS 469. May be repeated up to 3 credits.

SOCI 4510. Social Deviance
3 Credits (3)
Theoretical approaches to the study of social deviance with emphasis on critical theories. Exploration of forms of deviance in society. Examination of social construction of deviance within mass media and systems of social control. May be repeated up to 3 credits.

SOCI 4555. Sociology of Education
3 Credits (3)
Socio-political and economic factors that shape the structure and operation of educational institutions in modern complex societies. Socio-historical development of the school as a microcosm of society, with examples from American and other school systems. May be repeated up to 3 credits.

SOCI 4992. Directed Readings
1-3 Credits (1-3)
Individual readings or research for either majors or nonmajors. Consent of Instructor required. May be repeated up to 6 credits.

SOCI 4996. Special Topics
3 Credits (3)
Specific subjects to be announced in the Schedule of Classes. May be repeated up to 12 credits.
Learning Outcomes
1. Varies

SOCI 4998. Internship
1-6 Credits (1-6)
Supervised participation in an appropriate community setting. Taught with SOCI 5998. May be repeated up to 9 credits.

SOCI 4999. Sociology Senior Seminar
3 Credits (3)
The main goal of this course is to provide Sociology students the opportunity to integrate the knowledge acquired from the classroom with personal real-world experiences in order to explore how a sociological perspective can be applied to one's everyday life and work. Students must be in senior standing to enroll in this course. May be repeated up to 3 credits.
Prerequisite: SOCI 1110G.
Learning Outcomes
1. Refine and demonstrate students' sociological imaginations.
2. Engage in critical self-reflection by practicing sociological mindfulness on a regular basis.
3. Have the opportunity to apply sociological concepts to a real-world setting.
4. Have the opportunity to critically apply and evaluate the utility of select social theories to a real-world setting.
5. Refine critical writing and thinking skills through class discussions.

SOCI 5110. Perspectives on Sociology
3 Credits (3)
Overview of Sociology and development of students' sociological imaginations. Understanding the place of sociology in career development and the application of Sociology and sociological concepts to the real world. May be repeated up to 3 credits.
Learning Outcomes
1. Refine students' sociological imaginations.
2. Engage in critical self-reflection by practicing sociological mindfulness on a regular basis.
3. Have the opportunity to apply sociological concepts to the real world.
4. Explore how students can utilize sociology in achieving their career goals.
5. Refine students' critical writing and thinking skills through class discussions.

SOCI 5150. Seminar in Social Networks
3 Credits (3)
Advanced introduction to social network methods. First half of the course focuses on understanding the structure of social networks. Second half of the course involves examining real-world social networks ranging from romantic relationships to political parties. Includes hands-on experience with the R statistical computing environment
Learning Outcomes
1. Finish the course with the ability to interpret, question, and discuss network science theories and methods.
2. Understand which type of network method is appropriate for different kinds of research questions.
3. Finish the course with basic programming and network analysis skills in the R statistical computing environment.

SOCI 5153. Seminar in Sociological Research
3 Credits (3)
Exploration of research methods, issues, and practical application. Students must be in graduate standing.
Learning Outcomes
1. Develop the ability to use terms and concepts employed in quantitative social science research methodologies.
2. Understand and critically assess findings published in academic journals and in the public sphere based on your knowledge of research design, for example, the fit of methods, data, and argument.
3. Finish the course with the ability to plan and carry out quantitative research projects on topics relevant to a variety of academic disciplines.

SOCI 5155. Seminar in Text Analysis for the Social Sciences
3 Credits (3)
Advanced exploration into some of the methods that social scientists use to analyze digital and social media. Focus is on developing the fundamentals for designing and conducting text analysis projects. Includes hands-on experience with the R statistical computing environment.
Learning Outcomes
1. Finish the course with the ability to interpret, question, and discuss text analysis methods accurately.
2. Understand which type of text analysis method is appropriate for different kinds of research questions.
3. Finish the course with basic programming and data analysis skills in the R statistical computing environment.

SOCI 5157. Seminar in Qualitative Research Methods
3 Credits (3)
This course provides an in-depth examination of qualitative research methods, including the logic, time, and purpose of using such methods. Students must be in Graduate standing.

SOCI 5158. Seminar in Visual Ethnographic Methodology
3 Credits (3)
This course focuses on the potential and the qualities of visual data collection in research and will start with a review of the diversity of research strategies and ethics that incorporate visual data. We will discuss different ways of using visual methods in research alongside epistemological theory of understanding what it means to look at the world. We will use our own experiences of looking and feeling to consider what visual methods can contribute to effective ethnographic research. Students must be graduate students to enroll.
Learning Outcomes
1. Learn the basic fundaments of visual qualitative inquiry.
2. Learn the concept of ethics and reflexivity in qualitative research.
3. Learn how to design visual qualitative research.
4. Understand the different methods used in visual qualitative research.
5. Select and use appropriate visual qualitative methods to answer research questions.

SOCI 5160. Seminar in Data Visualization
3 Credits (3)
Advanced exploration into how to communicate sociological findings using graphics. Emphasis is on finding meaningful trends in real-world social science data and creating graphics that best communicate those associations or trends. Includes hands-on experience with the R statistical computing environment, especially the ggplot2 package.
Learning Outcomes
1. Finish the course with the ability to create, interrogate, and interpret data visualization.
2. Understand which type of graphic is appropriate for different kinds of social science data.
3. Finish the course with basic programming and data visualization skills in the R statistical computing environment, especially with the ggplot2 package.

SOCI 5163. Issues in Advanced Quantitative Analysis
3 Credits (3)
Advanced methods of sociological analysis are examined in detail. May be repeated up to 3 credits.
Learning Outcomes
1. Finish the course with the ability to interpret, question, and discuss social statistics and their applications.
2. Understand which type of statistical method/analysis is appropriate for different kinds of research questions.
3. Finish the course with basic programming and data analysis skills in a statistical computing environment.

SOCI 5165. Foundations of Social Theory
3 Credits (3)
Analysis of classical social thought within the discipline. Restricted to: Sociology majors. May be repeated up to 3 credits.
Learning Outcomes
1. Know and have an understanding of the history of social thought in Sociology.
2. Know and have an understanding of the fundamental underlying assumptions of many social theories.
3. Be able to effectively write showing an understanding of the theorists/theories as they apply to social phenomena.
4. Be able to openly discuss with confidence the various tenets of social theory.

SOCI 5166. Seminar in Contemporary Theory
3 Credits (3)
This course equips students with the ability to critically analyze contemporary social theory (post World War II) with a particular focus on how these texts apply theoretical frameworks to pressing issues of our time.
Learning Outcomes
1. Understand the main conceptual and theoretical frameworks that have influenced social research post World War II.
2. Improve critical thinking through cross-cultural and cross-disciplinary analyses of social forces.
3. Identify one's own work and interests within/and in relation to these perspectives.
4. Comprehend and evaluate sociology as a discipline that has been shaped by diverse sets of social phenomena.

SOCI 5170. Seminar in Individual and Society
3 Credits (3)
Examines reciprocal relationship between individual and society. Topics include socialization, social influence and persuasion, group structure and performance, altruism, aggression, interpersonal attraction, group cohesion and conformity, and intergroup conflict. May be repeated up to 3 credits.
Learning Outcomes
1. Know and understand the theoretical antecedents for Social Psychology.
2. Know and understand the fundamental underlying assumptions of Social Psychology approaches in Sociology.
3. Know and understand the history and development of Social Psychological Theories.
4. Be able to effectively write a literature review addressing specific topics utilizing Social Psychology as an underlying framework.
5. Understand the relationship between the individual and society, particularly addressing the relationship between structure and agency.

SOCI 5175. Seminar in Symbolic Interaction
3 Credits (3)
This seminar will provide you a backdrop on Symbolic Interactionism, focusing on the direct and indirect antecedents of the theory, as well as current research and theoretical development up to the present. May be repeated up to 3 credits.
Learning Outcomes
1. Know and understand the theoretical antecedents for Symbolic Interaction.
2. Know and understand the fundamental underlying assumptions of Symbolic Interaction.
3. Know and understand the history and development of Symbolic Interaction.
4. Be able to effectively write a literature review addressing specific topics utilizing Symbolic Interaction as an underlying framework.
5. Be able to openly discuss the various tenets of Symbolic Interaction with confidence.

SOCI 5270. Seminar in Sex and Gender
3 Credits (3)
Comprehensive examination of current gender identity and gender stratification issues. May be repeated up to 3 credits.

Learning Outcomes

1. Gain an understanding of gender from a sociological perspective.
2. Critically examine how gender shapes and is shaped by personal interaction and meaning and how it is embedded in the structure of our social institutions.
3. Understand the relationship between gender, the body, media and violence.
4. Gain competence in discussing the biological and psychological explanations of gender differences as well as in discussing cultural and gender socialization and identity formation.
5. Examine how gender is relevant within the institutions of family, work, and education with particular focus on how gender is linked to inequality.

SOCI 5310. Seminar in Community Development
3 Credits (3)

This is in an advanced seminar addressing a holistic view of community development with an emphasis upon how economic development efforts can become more inclusive and sustainable. Students must be in a graduate student to enroll. May be repeated up to 3 credits.

Learning Outcomes

1. Define community development.
2. Apply the different theoretical approaches to community development to an issue.
3. Identify the major challenges confronting various communities today.
4. Understand emerging and radical community development initiatives in both theory and practice.

SOCI 5315. Seminar in Public Sociology
3 Credits (3)

This course examines both the theory and practice of public sociology. The course begins by examining the theoretical aspects, challenges, and critiques informing public sociology. After setting these foundations the remainder of the course examines different ways of applying public sociology, whether in the K-12 classroom, through community engagement activities such as nonprofit work, or other endeavors that seek to make the world a better place.

Learning Outcomes

1. Understand the theoretical foundations and debates within public sociology
2. Understand various ways public sociology can be practiced outside academia

SOCI 5317. Seminar in Social Transformation
3 Credits (3)

This is in an advanced seminar addressing various components of social change. The primary intention of this course is to help students better understand how the United States, and the world, has changed and continues to change. The course begins by examining how social change influences one's personal life, then focuses upon how social change influences inequalities in the United States. The course concludes by examining how individuals can engage in creating social change.

Learning Outcomes

1. Identify how social change has influenced, and continues to influence, their personal lives.
2. Identify the causes and patterns of social change.
3. Identify how different sociological theoretical paradigms and theories explain different facets of social change.
4. Apply these various theoretical perspectives learned to various types of social change.

SOCI 5320. Seminar in Social Movements and Activism
3 Credits (3)

An advanced exploration of the key concepts of collective behavior and social movements as they apply to both historical and contemporary trends and movements. We examine also social movement tactics and their effectiveness in shaping policy and social norms. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate comprehensive understanding of social movement theory and how it applies to particular cases.
2. Identify and analyze how social movements emerge and the conditions that their success depends on.
3. Analyze the role that movements play in transitions to and consolidations of democracy.
4. Critically examine how: a) State repression incites or threatens the development of movements, and b) which strategies movements use for communicating with the larger society.
5. Exhibit scholarly professionalization by successfully developing, conducting and presenting a research project.
6. Demonstrate in-depth knowledge of a specific social movement and its relations to broader questions of social, economic, political, and cultural transformations.

SOCI 5325. Seminar in Digital Media and Activism
3 Credits (3)

This seminar will investigate the interaction between digital media, social movements, and social change.

Learning Outcomes

1. Demonstrate comprehensive understanding of the most relevant theories of social movements and how these have been affected by the new digital media ecology.
2. Critically examine how the specific qualities and attributes of digital media contribute to the operation, growth, and success of contemporary social movements and activism around the world.
3. Place the relationship between social movements and new media in context – what is interesting about these "new" technologies?
4. Exhibit scholarly professionalization by successfully developing, conducting and presenting a research project.
5. Demonstrate in-depth knowledge of a central and contemporary social movement and its use of social media to further its goals.

SOCI 5335. Seminar Environmental Sociology
3 Credits (3)

Advanced examination of societal responses to environmental problems including social adjustments to natural and technological hazards, sociocultural aspects of technological risk and impact assessment, and emergence of environmental social movements. May be repeated up to 3 credits.

SOCI 5337. Seminar in Human Society and the Environment
3 Credits (3)

This is an advanced seminar exploring the relationship between human societies and the natural environment, with an emphasis on both sustainable human and environmental relationships. May be repeated up to 3 credits.

Prerequisite: Graduate Student Status.

SOCI 5410. Seminar in Race and Ethnic Relations
3 Credits (3)

In-depth analysis of the dynamics of prejudice/discrimination and patterns of intergroup interaction in the U.S. May be repeated up to 3 credits.

Learning Outcomes

1. Identify a diverse set of critical sociological approaches to studying race, ethnicity, and racism within the United States.
2. Understand the social construction of race, racialized modernity, and the unequal distribution of racialized power and privilege in local, regional, national, and transnational contexts.
3. Examine the racialized structures of US society and give special consideration to how processes, discourses, and structures of white supremacy and racialization intersect with other systems of inequality, particularly gender, class, sexuality, nation, and settler colonialism.

SOCI 5415. Seminar in Social Stratification
3 Credits (3)

Advanced examination of theories of stratification and current methods of stratification research. Focus on differences by ethnicity, race, class and gender. May be repeated up to 3 credits.

Learning Outcomes

1. Gain an appreciation of the role of stratification as a powerful determinant of the opportunities that individuals experience in modern societies.
2. Critically consider the functions and repercussions of stratification for the individual and society.

SOCI 5420. Seminar in Sociology of Latinos/as in the United States
3 Credits (3)

In-depth examination and comparative analysis of political and economic issues affecting Latino/a culture and behavior. Topics include the Chicano/a and larger Latina/o movements, the border, immigration, language policies, education, religion, labor and Latina women s issues. May be repeated up to 3 credits.

Learning Outcomes

1. Examine the challenges currently facing the Latino population in the U.S. with special attention to three Latino subgroups: Puerto Ricans, Mexican-Americans, and Cubans.
2. Identify that latina/o experiences and identities are far from homogenous.
3. Understand how then has a sense of “Latino community” been created if this is the case? What is a Latina/o? And, how are individual identities among the many Latina/o identities shaped by difference?
4. Know the major Latino peoples, their immigration, migration and settlement patterns, identity formation, socioeconomic and labor conditions, politics, gender relations, and bilingualism.

SOCI 5430. Seminar in International Migration
3 Credits (3)

This course examines international migration as a social process, focusing on the American experience. Students will examine historical and comparative literature on immigration that puts contemporary questions about policy and immigrant assimilation into a broader sociological perspective. Students must be Graduate students to enroll. May be repeated up to 3 credits.

Learning Outcomes

1. Acquire in-depth knowledge, and develop a broad understanding of the historical and theoretical development, of the sociological sub-field of immigration.
2. Develop an ability to examine the processes involved in international migration, and the socioeconomic trajectories of different immigrant groups in the United States, analytically, critically, and comparatively.
3. Develop an understanding of how various social constructs (such as national origin, nativity, generation, length of time spent in the United States, citizenship, legal status, class, race, ethnicity, gender, and religion) influence immigrants’ social positions and organize their daily lives.

SOCI 5440. Seminar in Sociological Perspectives on the U.S.-Mexico Border
3 Credits (3)

Theoretical perspectives and current research on U.S.-Mexico border region, including migration, identity, health, gender, and environment. May be repeated up to 3 credits.

Learning Outcomes

1. Use history, sociology, geography, anthropology, and other disciplines as a framework for understanding the border and analyzing border lives and structural dynamics.
2. Understand border identities, including nationality, ethnicity, and class, and apply them to analyzing border lives.
3. Understand border orientations (nationalist/binationalist; unicultural/bicultural) and apply them to analyzing border lives.
4. Recognize and analyze multiple, often conflicting, perspectives on border issues.
5. Apply the "multiple perspective" approach to U.S.-Mexico migration and know objective facts, humanistic understandings, and policy options for that issue.
6. Use the tools of "culture" and "social structure" to understand border working people, especially those facing poverty, low wages, low or no benefits, and discrimination in public.
7. Use comparisons to other borders to understand two important topics: (a) Border symbols and politics; (b)Border consumption, commerce, smuggling, and other cross-border transactions.

SOCI 5450. Seminar in Power and Politics in the United States
3 Credits (3)

This is an advanced seminar addressing the study of Political Sociology with a focus on the United States. Political Sociology studies the social bases of politics and political systems. it facilitates an understanding of the processes and consequences of power distributions in the United States. Students must be Graduate students to enroll. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate comprehensive understanding of the most relevant theories of political sociology and how these apply to current political issues of the United States.
2. Critically examine the role that civil society plays in shaping contemporary political processes in the United States.
3. Critically examine the role that civil society plays in shaping contemporary political processes in the United States.
4. Exhibit scholarly professionalization by successfully developing, conducting and presenting a research project.
5. Demonstrate in-depth knowledge of a central and contemporary political issue and its relations to broader questions of social, economic and cultural transformations in America.

SOCI 5455. Seminar in Inequality and Public Policy
3 Credits (3)

This course explores the reciprocal relationship between inequality and public policy, with a particular focus on poverty and anti-poverty policy in the contemporary United States.

Learning Outcomes

1. Understand and compare different ways in which poverty has been historically measured and understood.
2. Understand and apply various types of social inequality.
3. Critically read and evaluate empirical research measuring, and policy proposals addressing, poverty and inequality.
4. Write your own policy evaluation including empirically grounded policy recommendations.
5. More effectively participate in policy debates regarding inequality and poverty.

SOCI 5460. Advanced Issues in Globalization
3 Credits (3)
Analysis of the globalization process. Covers theories of globalization; global economy; political globalization; global culture; transnational social movements; transnational migration and world labor market; global cities; local-global linkages. Same as POLS 569. May be repeated up to 3 credits.

SOCI 5510. Issues in Social Deviance
3 Credits (3)
Selected forms of deviant behavior, social issues, and social problems. May be repeated up to 3 credits.

SOCI 5515. Sociology of Organizations
3 Credits (3)
Sociological models of formal organizations relevant to business, education, government, healthcare, military, and religion. Focus on internal organizational structure and dynamics plus the reciprocal relationship between organizations and their operating environment. May be repeated up to 3 credits.

SOCI 5555. Advanced Sociology of Education
3 Credits (3)
Socio-political and economic factors that shape the structure and operation of educational institutions in modern complex societies. Socio-historical development of the school as a microcosm of society, with examples from American and other school systems. May be repeated up to 3 credits.

SOCI 5610. Seminar in Popular Culture
3 Credits (3)
This course delves into Popular Culture and how Sociologists define and evaluate Popular Culture in the world today. Students will learn about diverse forms of Popular Culture, their meanings, and how social theory is applied to how Popular Culture is commodified and consumed. Students must be a graduate student to enroll.

Learning Outcomes

1. Explain and show an advanced understanding of the relationship of popular to culture.
2. Have an in-depth knowledge of Critical Theory as it applies to the culture industry.
3. Understand the relationship of the individual and social issues to both popular culture and technologically driven cultural changes.
4. Apply critical thinking about the popular culture experienced in your day-to-day existence and its meaning to everyday life.
5. Read empirical and theoretical writings, summarize and expand upon their core ideas.
6. Be able to discuss as well as compare and contrast various issues associated with popular culture.

SOCI 5630. Seminar in Culture and Social Life
3 Credits (3)
What exactly does culture look like, and how precisely does it shape---and is shaped by---social behavior? These are the core questions in the sociology of culture and will be the focus of this course. The course begins with an overview of the various ways that culture has been defined in sociological theory and research. The course will then focus on various topics within the contemporary sociology of culture, including, but not limited to, culture and cognition, the production of culture, culture and politics, and culture and inequality.

Learning Outcomes

1. Finish the course with an understanding of the different ways that culture is defined in sociological research.
2. Understand the various ways that culture affects social behavior and how social behavior shapes and changes culture.
3. Finish the course with a sociological imagination that is expanded to included cultural theory.
4. Finish the course with the ability to formulate research projects that involve cultural theories.

SOCI 5640. Seminar in Sociology of Digital Media
3 Credits (3)
This course explores how the social, political-economic, and cultural landscape is changing in relation to digital media and information technologies. Seminar participants work together to explore frameworks, methods, and tools for understanding networked society in the digital media ecology.

Learning Outcomes

1. Develop analytical tools for understanding the complex information society.
2. Examine how the cultural, political, and social environments are changing with the emergence of new media and digital technologies.
3. Place the relationship between society and new media in context – what is interesting about these “new” technologies?
4. Exhibit scholarly professionalization by successfully developing, conducting and presenting a final project.
5. Demonstrate in-depth knowledge of a central and contemporary issue within the study of social media from a sociological perspective.

SOCI 5991. Special Research Problems
1-3 Credits (1-3)
Individual analytic or experimental investigations. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

SOCI 5996. Graduate Special Topics
3 Credits (3)
Specific subjects to be announced in the Schedule of Classes. May be repeated up to 99 credits.

Learning Outcomes

1. Varies

SOCI 5998. Internship
1-6 Credits (1-6)
Supervised participation in appropriate occupational setting. Taught with SOCI 4998 with additional work required at the graduate level. May be repeated up to 12 credits.

Learning Outcomes
1. Various

SOCI 5999. Master's Thesis
1-6 Credits (1-6)
Thesis. Consent of instructor required. Restricted to Sociology majors. May be repeated up to 88 credits.
Learning Outcomes
1. Various

SOCI 6998. Dissertation Research Design in CSS
3 Credits (3)
Design and development of dissertation research project proposal drafts individually and/or in direct collaboration with advisors, peers, and/or community partners.
Learning Outcomes
1. Describe and articulate the topic and questions for the dissertation research proposal.
2. Describe and articulate the methodology and data analysis plan for the dissertation research proposal.
3. Write a completed draft of the dissertation research proposal.
4. Develop a complete draft of the dissertation proposal oral defense slide deck.
5. Prepare for the written and oral comprehensive examination.

SOCI 7000. Dissertation
1-15 Credits
Completion of major research project on a significant aspect that demonstrates expertise in computational social science. Dissemination of findings in academic and community forums. Students must have approval from their doctoral committee to enroll. Students must have completed 36 credits in the Computational Social Science PhD Program and have approval from their doctoral committee to enroll. May be repeated up to 36 credits.
Prerequisite: SOCI 5110, SOCI5150, SOCI5155, SOCI 5166, SOCI 5163, SOCI 6998 and either CS 453 or CS 458 with a grade of B- or better.
Learning Outcomes
1. Completion of a significant and in-depth research project in an area that demonstrates expertise in computational social science.
2. Presentation of findings in academic conferences.
3. Preparation of publishable work from the dissertation research.
4. Dissemination of findings in alternative formats for community partners and the general public.

SOIL-SOIL

SOIL 2110. Introduction to Soil Science
3 Credits (3)
An overview of fundamental concepts in soil science and soils as a natural resource. Students will be introduced to the physical, chemical, and biological properties as it relates to soil management in environmental science, conservation, and agronomy. May be repeated up to 3 credits.
Prerequisite: (CHEM 1120G and MATH 1215 or higher) or CHEM 1215G.
Learning Outcomes
1. Understand and use the technical terminology associated with the use and management of soils.
2. Understand the classification of soils and the processes leading to their formation.
3. Identify key physical, chemical, and biological properties of soils.
4. Explain the impact of land use and management decisions as it relates to soil degradation and environmental problems.

SOIL 2110L. Introduction to Soil Science Laboratory
1 Credit (1)
Morphological, chemical, physical and biological properties of soil in the laboratory and field.
Corequisite(s): SOIL 2110.
Learning Outcomes
1. Learn techniques for sampling and characterizing soils in the region.
2. Understand how soils are formed and the processes that occur within the soil profile.
3. Gain fundamental knowledge on soil physical, chemical, and biological properties and how each can influence the overall function of a particular soil.
4. Develop critical thinking and analytical skills within laboratory and field settings.
5. Encourage collaboration, inclusiveness and critical thinking.

SOIL 2996. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.
Learning Outcomes
1. Varies

SOIL 300. Special Topics
1-4 Credits
Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

SOIL 312. Soil Management and Fertility
3 Credits (3)
Management, conservation, and fertility of soils; physical conditions affecting growth, nutrition, and plant production.
Prerequisite: SOIL 2110.
Corequisite: SOIL 312L.
Learning Outcomes
1. Explain the elements affecting soil productivity.
2. Determine what factors influence fertilizer use and needs.
3. Identify factors affecting soil pH and summarize materials used for pH modification.
4. Recognize typical nutrient deficiency symptoms and their general location on the plant.
5. Calculate soil amendment amounts needed for field applications.

SOIL 312 L. Soil Management and Fertility Lab
1 Credit (1)
Hands-on experience. Includes field trips, videos, calculations, visiting lecturers and other lab activities as possible.
Prerequisite: SOIL 2110.
Corequisite: SOIL 312.
Learning Outcomes
1. Use proper procedures to collect soil samples and prepare them for analyses including documentation, pretreatment, and storage.
2. Extract various nutrients from soil and interpret/convey the results in written reports.
3. Explain the difference between total and plant-available nutrients.

4. Observe lab analytical procedures and field practices common in soil fertility and management.
5. Calculate the amounts of nutrients in soil samples and convert to field scale.

SOIL 370. Environmental Soil Science
3 Credits (3)
Continuation of SOIL 2110 that emphasizes soil properties and processes that directly relate to environmental pollution problems. Same as ENVS 370.
Prerequisite: SOIL 2110.

SOIL 391. Internship
1-6 Credits (1-6)
Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 6 credits toward a degree. Consent of Instructor required. Graded: S/U Grading (S/U, Audit).

SOIL 424. Soil Chemistry
3 Credits (3)
Basic elements of soil chemistry including clay mineralogy, cation and anion exchange and the chemistry of problem (acid, saline and flooded) soils. Credit not given for both SOIL 424 and SOIL 479.
Prerequisite: SOIL 2110L or CHEM 1215G and CHEM 1225G.
Learning Outcomes
1. Explain the solid and liquid phases of soil.
2. Describe the chemical reactions and processes that occur between various soil phases.
3. Describe the techniques used to promote plant productivity and land remediation.
4. Calculate nutrient and contaminant concentrations in soil samples and convert to field scale.
5. Calculate soil chemical properties including CEC, pH, EC, SAR, nitrate, and convert them between old and new units.

SOIL 447. Seminar
1 Credit (1)
Organization, preparation, and presentation of current topics in agronomy, environmental sciences, horticulture, and soil science. Crosslisted with: AGRO 447, HORT 447 and ENVS 447.
Learning Outcomes
1. Develop professional communication skills through teamwork, case study preparation and presentation, data interpretation, and role-playing in mock interviews.
2. Prepare a professional resume, personal statement of goals for graduate school or permanent employment and make a Case Study presentation to faculty and peers.

SOIL 449. Special Problems
1-3 Credits
Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

SOIL 450. Special Topics
1-4 Credits
Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits towards a degree. May be repeated up to 9 credits. Consent of Instructor required.

SOIL 456. Irrigation and Drainage
3 Credits (3)
Principles and practices required for irrigation to exist as a permanent economy. Equipment and methods for measurement and control of water.

SOIL 472. Soil Morphology and Classification
4 Credits (2+2P)
Same as SOIL 472. Crosslisted with: SOIL 472.
Learning Outcomes
1. Describe soil profile morphology at a competitive level.
2. Understand the processes that drive soil formation and use this knowledge to identify common landforms.
3. Classify soils using Soil Taxonomy.
4. Interpret available soil mapping products to infer soil use and management conditions.

SOIL 476. Soil Microbiology
3 Credits (3)
Nature and physiology of soil microorganisms, how they affect plant growth and recycle nutrients. Land farming, bioremediation and other environmental problems as influenced by soil microorganisms. SOIL 2110 and BIOL 311 recommended. Same as BIOL 476.
Learning Outcomes
1. Explain foundational concepts of the soil environment and soil microbiology, including the soil habitat, the rhizosphere, microbial taxonomy, and microbial cell structure and function.
2. Analyze the diversity, physiology, and ecological functions of soil microorganisms—such as bacteria, archaea, fungi, micro-algae, and micro-fauna—and evaluate their interactions with plants and the soil environment.
3. Apply core soil microbiological techniques—including culturing, inoculation, microscopy, and DNA sequencing—to isolate, identify, and characterize soil microorganisms.
4. Evaluate real-world applications of soil microbiology in areas such as organic matter decomposition, nutrient cycling, integrated disease management, bioremediation, and wastewater treatment.
5. Effectively Communicate evidence-based strategies for enhancing soil microbial diversity and soil health through practices like soil amendments, cover cropping, crop rotation, and conservation tillage.

SOIL 476 L. Soil Microbiology Laboratory
1 Credit (3P)
Enumeration of soil microorganisms, their activities, and transformations they mediate. May be repeated up to 1 credit.
Corequisite: SOIL 476.
Learning Outcomes
1. Collect, store, and characterize soil samples using appropriate and sterile techniques of soil microbiology.
2. Observe, describe, and recognize major groups of microbial organisms
3. Develop skills in basic microscopy, isolation and culturing of soil microbes
4. Acquire basic DNA-based molecular skills in soil microbiology.
5. Compare and evaluate soil samples from different microhabitats regarding their soil microbiota.
6. Apply the scientific method including the following steps: developing a research question, constructing a testable hypothesis, design a research study to test the hypothesis, perform the experiment and collect data, analyze the results, evaluate the results and support/reject the hypothesis, and report the results.

SOIL 477. Environmental Soil Physics
3 Credits (3)

A description of the physical characteristics of porous media including soil. Examination of processes describing the transport of water, chemicals, heat and gases through porous media with application to environmental quality, waste management, and crop production.

SOIL 477 L. Environmental Soil Physics Laboratory
1 Credit (1)
Concurrent enrollment with SOIL 477 recommended. Hands on experience with techniques for characterizing soil physical properties such as particle size distribution, bulk density, water retention, hydraulic conductivity and solute transport. Demonstrations of field and laboratory techniques for measuring moisture content, soil water potential, gas/air flow and thermal conductivity.
Prerequisite(s): SOIL 2110.

SOIL 479. Environmental Soil Chemistry
3 Credits (3)
Basic elements of soil chemistry including discussion of clay mineralogy, cation and anion exchange and the chemistry of problem (acid, saline and flooded) soils. Credit not given for both SOIL 424 and SOIL 479.
Prerequisite: SOIL 2110L or CHEM 1215G and CHEM 1225G.
Learning Outcomes
1. Describe and explain the solid and liquid phases of soil.
2. Explain the chemical reactions and processes that occur between soil phases.
3. Use soil chemistry processes and properties to promote plant productivity and land remediation.
4. Calculate nutrient and contaminant concentrations in soil samples and convert to field scale.
5. Calculate soil chemical properties including CEC, pH, EC, SAR, nitrate, and convert them between old and new units.

SOIL 500. Special Topics
1-4 Credits
Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

SOIL 505. Research Orientation
4 Credits (3+2P)
Training in writing research proposals, presentation of research results, and interpretation of research results. Crosslisted with: HORT 505, AGRO 505 and ENVS 505.
Learning Outcomes
1. Gain insight into the nature of scientific research and skills vital for graduate research and future careers in science.
2. Navigate graduate school processes and protocols.
3. Demonstrate critical thinking.
4. Generate a scientific hypothesis.
5. Communicate science effectively in written and oral formats, including drafting a proposal for thesis or dissertation research.

SOIL 513. Introduction to Scientific Writing
3 Credits (3)
Students will learn how to communicate, through written format, to both the scientific community and diverse audiences. Students will be introduced to new technologies and new genres of scientific writing. Students will also learn basic reviewing and writing skills that underlie efficient preparation of literature reviews, scientific manuscripts, project reports, blog-posts, opinion or perspective pieces for more popular venues, advocacy articles for legislators, and descriptive pieces for popular venues such as newspapers, magazines, and broadcast media. Emphasis will be on the communication of experimental findings in peer-reviewed scientific journals.
Learning Outcomes
1. Students will review the basics of rhetoric and the technology of language.
2. Students will learn how to overcome writing barriers and gain confidence in their writing skills.
3. Students will improve their writing skills so that manuscript preparation becomes more efficient and productive.
4. Students will learn professional standards for the conduct of ethical reporting of scientific results.
5. Students will learn to recognize structural and stylistic elements in scientific articles that help researchers achieve certain communication goals.
6. Students will learn the basics of table, figure, diagram, and image presentation in manuscripts.
7. Literature reviews, framed so that they answer an important question in the field, and lead to peer-reviewed publication, may also be prepared. (With permission of the instructor.)

SOIL 525. Scientific Writing- How to be a Productive and Effective Writer
1-3 Credits (1-3)
Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review Crosslisted with: AGRO 525, AGRO 625, HORT 525, HORT 625, SOIL 625 and EPWS 525.

SOIL 590. Graduate Seminar
1 Credit (1)
Current research discussions presented by master level graduate students. Not more than one credit toward the degree. Same as AGRO/HORT 590. Crosslisted with: AGRO 590 and HORT 590.

SOIL 596. Masters Proposal
1 Credit (1)
Current research proposal written by masters level graduate students. Consent of Instructor required. Crosslisted with: AGRO 596, ENVS 596, GENE 596 and HORT 596. Students must be a Master level graduate student to enroll in this course. Restricted to: Masters HORT; Masters PLEN majors.

SOIL 597. University Teaching Experience
1-3 Credits (1-3)
Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ENVS course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures.

SOIL 598. Special Research Programs
1-6 Credits
Individual investigations, either analytical or experimental. Maximum of 6 credits per semester. No more than 9 credits toward a degree.

SOWK-SOCIAL WORK

SOWK 2110G. Introduction to Human Services & Social Work
3 Credits (3)
This course is for students who are interested in social welfare issues and/or are considering entering a social service profession. The course presents an overview of social problems, issues and trends, and the network of social agencies developed to address these concerns. The course examines the influence of personal and professional values and

ethics on the helping relationship. The concept of social welfare will be discussed from a social work perspective (with an emphasis on social justice), and students will gain a basic understanding of social work in U.S. society, social work career opportunities, and contemporary issues facing social workers. Approaches relevant to work with individuals, families, groups and communities are presented, with special emphasis on Hispanic and Indigenous populations of New Mexico and the Southwest. May be repeated up to 3 credits.

Learning Outcomes

1. Explain the interactions of social institutions, cultural factors, dimensions of identity, and environment with the human development and behavior of individuals.
2. Demonstrate knowledge of the social work profession's focus on addressing contemporary social issues in the United States.
3. Describe the mission and services provided by social service agencies at the regional, national, and global levels.
4. Demonstrate a basic understanding of the social work profession, its history, career opportunities, and contemporary issues facing social workers in the United States today.
5. Recognize how students' knowledge, skills, and attitudes impact their competence as helping professionals.

SOWK 3110. Sociocultural Concepts
3 Credits (3)

Theoretical and sociohistorical perspectives on racism, sexism, ageism, heterosexism, classism, ableism, and other forms of discrimination and oppression. Cultural diversity, strengths, and Southwest and border issues are examined. May be repeated up to 3 credits.

Learning Outcomes

1. Examine the role culture, gender, sexual orientation, and socio-economic class play in the way people think, feel, and behave.
2. Examine how diverse populations have been oppressed and exploited by dominant groups throughout U.S. history.
3. Analyze the effects of stereotypes, fallacies, and misconceptions about groups that experience oppression such as the LGBTQIA2S + community, the Elderly, People with Disabilities, BIPOC and people from low socio economic backgrounds and other socially marginalized groups.
4. Recognize theoretical models that describe various forms of discrimination, oppression, privilege and power.
5. Be familiar with relevant knowledge regarding the Southwest, border issues, Native American and Latinx/Chicanx/Hispanic content.
6. Recognize and implement anti racist, anti oppressive, and practice decolonization/indigenization and cultural humility in social work practice and social justice.

SOWK 3120. Human Behavior and the Social Environment I
3 Credits (3)

Major theories of human behavior and the life span from conception to adolescence.

Learning Outcomes

1. Students demonstrate knowledge of human development, diversity, and identity formation.
2. Students will explain how racism and oppression impact human behavior and the social environment.
3. Students will examine environmental systems (families, groups, organizations, and communities) and the complex interplay of biological, psychological, social, spiritual, and cultural dimensions that impact the social work engagement process.
4. Students will assess developmental theories to assess the complex interplay of biological, psychological, social, spiritual, and cultural.
5. Students will apply knowledge of major theories of infancy, childhood, and adolescent development to social work interventions.

SOWK 3130. Human Behavior and the Social Environment II
3 Credits (3)

Continuation of SOWK 3120. Major theories of human behavior and the life span from young adulthood through old age. Restricted to: S WK majors.

Prerequisite: SOWK 3120.

Learning Outcomes

1. Assess human behavior and the environment at the micro, mezzo, and macro levels to understand clients needs.
2. Critique the major theories of human behavior and development processes in the social environment.
3. Apply knowledge of major theories of human behavior and development processes in the social environment.
4. Demonstrate cultural sensitivity and humility for human diversity in micro, mezzo, and macro practice.
5. Apply knowledge of biological, psychological, and sociological aspects of human development and the social environment.

SOWK 3140V. Introduction to Social Policy: History
3 Credits (3)

Historical overview of the economic, political, and cultural impact on social welfare policy, institutions, and professions with international content. May be repeated up to 3 credits.

Learning Outcomes

1. Students will use reflection and self- regulation to manage personal values as they engage in discussion and written reflection around underlying values in social welfare.
2. Students will apply and communicate understanding of the importance of diversity and difference in shaping life experiences in practice at the macro level through written reflection.
3. Students will apply self-awareness and self-regulation to manage the influence of personal biases and values in working with diverse clients and constituencies through self-reflective discussions.
4. Students will apply their understanding of social, economic, and environmental justice to analyze social policy and advocate for just policies.
5. Through policy analysis and review of policy research, students will Identify social policy at the local, state, and federal level that impacts well-being, service delivery, and access to social services; assess how social welfare and economic policies impact the delivery of and access to social services, and apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, economic, and environmental justice.

SOWK 3150. Social Work Research
3 Credits (3)

This undergraduate course is designed to prepare students to be effective consumers of research and to evaluate their own practice. Students will learn to read, critically evaluate and use the research of others to select interventions that are based on evidence of effectiveness. Students will demonstrate the knowledge, values and skills to be critical consumers of research for effective and ethical practice as well as possess the basic skills necessary to evaluate their own social work professional practice. Restricted to Social Work majors.

Prerequisite: MATH 1350G or STAT 2350G.

Learning Outcomes

1. Demonstrate a) understanding of core principles or scientific research and b) methods of analyzing and applying scientific research in social work practice.
2. Demonstrate and apply the integration of social work values and ethics within application of research principles and practices.

SOWK 3210. Social Work Practice Skills
3 Credits (3)
Introduction to generalist social work practice. Interpersonal skills, values, and ethics required in the helping relationship. Taught in a small-group format. Restricted to: S WK majors.
Learning Outcomes

1. Students will explain the role of ethics, values, and principles in generalist social work practice.
2. Students will demonstrate promotion of human rights and social justice in the generalist social work context.
3. Students will demonstrate social work skills of engagement.
4. Students will demonstrate social work skills of assessment with clients.
5. Students will demonstrate social work skills of intervention with clients.
6. Students will demonstrate social work skills of evaluation of practice with clients.

SOWK 3220. Social Work Practice with Individuals
3 Credits (3)
Generalist social work practice theory and skills in engagement, information gathering, assessments, planning, interventions, evaluation, and termination with individual client systems. Restricted to: S WK majors.
Prerequisite: SOWK 3210.
Learning Outcomes

1. Apply skills in ethical and professional standards of the NASW Code of Ethics.
2. Exercise social work direct practice skills of engagement (for example, person-in-environment, human behavior, interprofessional conceptual frameworks, and interpersonal skills).
3. Assess the human behavior, environment, and culture of clients and constituents to understand needs.
4. Critically select appropriate interventions to meet client and constituent needs.
5. Evaluate the results of interventions and goals for change.

SOWK 3230. Social Work Practice with Families
3 Credits (3)
Generalist social work practice theory and skills in engagement, information gathering, assessments, planning, interventions, evaluation, and termination with multicultural family systems.
Prerequisite: SOWK 3210.
Learning Outcomes

1. Students will engage in critical reflection around the value base of social work and its ethical standards as they are applied to work with families.
2. Students will describe how personal experiences in their families of origin impact their professional judgement and behavior.
3. Students will explain how engagement is an ongoing component of the dynamic process of social work with families.
4. Students will demonstrate strategies for engagement with diverse families in order to advance practice effectiveness.
5. Students will demonstrate strategies for assessment with diverse families in order to advance practice effectiveness.
6. Students will demonstrate strategies for intervention with diverse families in order to advance practice effectiveness.

SOWK 4110. Social Welfare Policy: Legislation
3 Credits (3)
Policy practice related to the formation of current social welfare policies that promote social and economic justice. Emphasis is on the development and influences of social policy, policy analysis, and the policy change process. Restricted to: S WK majors. May be repeated up to 3 credits.
Learning Outcomes

1. Describe the social policy development and influence process.
2. Apply a framework for the analysis of current and proposed social policy.
3. Identify and discuss current legislation which addresses social and economic justice.
4. Articulate gaps and/or problems in existing social welfare policies and in social welfare programs.
5. Identify strategies which are appropriate to baccalaureate level practice that may influence policymakers on behalf of people in need.

SOWK 4210. Generalist Social Work Practice with Organizations and Communities
3 Credits (3)
This course focuses on generalist social work values, knowledge and skills regarding practice with larger systems. Course content will include theories of community and organizational assessment and intervention. Strategies for advocacy and change, leadership for community and organizational change. May be repeated up to 3 credits.
Learning Outcomes

1. Analyze various macro theories and apply two or more to a particular issue within a local community or organization.
2. Describe the historical context/foundation of macro practice in social work and identify its application in the community.
3. Identify ethical principles related to macro practice.
4. Describe the use of macro level practice in empowering diverse and oppressed populations
5. Describe an evidence-based practice framework for social work intervention with communities and organizations.

SOWK 4220. Generalist Social Work Practice with Groups
3 Credits (3)
Generalist social work practice skills with group client systems focusing on the planned change process and the empowerment of oppressed populations. Restricted to: S WK majors. May be repeated up to 3 credits.
Learning Outcomes

1. Students will compare foundational concepts of group work practice in social work.
2. Students will examine how diversity shapes clients life experiences in group practice at the micro, mezzo, and macro levels.
3. Students will differentiate the group process in social work, including group development, roles, norms, and dynamics.
4. Students will apply generalist social work practice knowledge, values, and skills when engaging diversity and difference in practice with group client systems.
5. Students will demonstrate skills of engagement, planning, intervention, and evaluation with group client systems.

SOWK 4230. Family and Child Welfare Practice
3 Credits (3)
Current issues and interventions in child protection, foster care, family preservation and support, family reunification, adoption and permanency planning. Course required for Child Welfare Scholarship Program students.

Learning Outcomes

1. Self-assess professional strengths and limitations as a helping professional.
2. Critically examine biases and assumptions through reflective practices.
3. Describe child welfare practices and trends.
4. Apply trauma-informed engagement practices with diverse child welfare populations.
5. Conduct trauma-informed and culturally responsive assessment and intervention with diverse child welfare population.

SOWK 4240. Professionalism in the Field of Social Work
3 Credits (3)
Students will use the field experience as the backdrop for assessing their own progress toward entry level generalist social work practice; to integrate coursework and field experience to develop their professional foundation. Restricted to: S WK majors.
Corequisite: SOWK 4321.

Learning Outcomes

1. Demonstrate professional demeanor in behavior; appearance; and oral, written and electronic communication.
2. Use technology ethically and appropriately to facilitate practice outcomes.
3. Use reflection and self-regulation to manage personal values and maintain professionalism in practice situations.
4. Apply and communicate understanding of the importance of diversity and difference in shaping life experiences in practice at the micro, mezzo, and macro levels.
5. Apply self-awareness and self-regulation to manage the influence of personal biases and values in working with diverse clients and constituencies.
6. Apply their understanding of social, economic, and environmental justice to advocate for human rights at the individual and system levels.
7. Use and translate research evidence to inform and improve practice, policy, and service delivery.
8. Identify social policy at the local, state, and federal level that impacts well-being, service delivery, and access to social services.
9. Apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, economic, and environmental justice. 1
10. Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks to engage with clients and constituencies. 1
11. Collect and organize data, and apply critical thinking to interpret information from clients and constituencies. 1
12. Critically choose and implement interventions to achieve practice goals and enhance capacities of clients and constituencies. 1
13. Select and use appropriate methods for evaluation of outcomes. 1
14. Apply evaluation findings to improve practice effectiveness at the micro, mezzo and macro levels.

SOWK 4310. Practicum I
3 Credits (3)
Supervised professional practice in a community social service agency, providing experiential learning and instruction. 240 clock hours required. Restricted to: S WK majors.
Corequisite: SOWK 4311.

Learning Outcomes

1. Make ethical decisions by applying the standards of the NASW Code of Ethics, relevant laws and regulations, models for ethical decision-making, ethical conduct of research, and additional codes of ethics as appropriate to context.
2. Use reflection and self-regulation to manage personal values and maintain professionalism in practice situations.
3. Demonstrate professional demeanor in behavior; appearance; and oral, written, and electronic communication.
4. Use technology ethically and appropriately to facilitate practice outcomes.
5. Use supervision and consultation to guide professional judgment and behavior.
6. Apply their understanding of social, economic, and environmental justice to advocate for human rights at the individual and system levels.
7. Engage in practices that advance social, economic, and environmental justice.
8. Apply and communicate understanding of the importance of diversity and difference in shaping life experiences in practice at the micro, mezzo, and macro levels.
9. Apply self-awareness and self- regulation to manage the influence of personal biases and values in working with diverse clients and constituencies. 1
10. Use practice experience and theory to inform scientific inquiry and research. 1
11. Apply critical thinking to engage in analysis of quantitative and qualitative research methods and research findings. 1
12. Use and translate research evidence to inform and improve practice, policy, and service delivery. 1
13. Identify social policy at the local, state, and federal level that impacts well-being, service delivery, and access to social services. 1
14. Assess how social welfare and economic policies impact the delivery of and access to social services. 1
15. Apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, economic, and environmental justice. 1
16. Apply knowledge of human behavior and the social environment, person-in- environment, and other multidisciplinary theoretical frameworks to engage with clients and constituencies. 1
17. Use empathy, reflection, and interpersonal skills to effectively engage diverse clients and constituencies. 1
18. Collect and organize data, and apply critical thinking to interpret information from clients and constituencies. 1
19. Apply knowledge of human behavior and the social environment, person-in- environment, and other multidisciplinary theoretical frameworks in the analysis of assessment data from clients and constituencies. 2
20. Critically choose and implement interventions to achieve practice goals and enhance capacities of clients and constituencies. 2

21. Apply knowledge of human behavior and the social environment, person-in- environment, and other multidisciplinary theoretical frameworks in interventions with clients and constituencies. 2
22. Use inter-professional collaboration as appropriate to achieve beneficial practice outcomes. 2
23. Negotiate, mediate, and advocate with and on behalf of diverse clients and constituencies. 2
24. Facilitate effective transitions and endings that advance mutually agreed-on goals. 2
25. Select and use appropriate methods for evaluation of outcomes. 2
26. Apply knowledge of human behavior and the social environment, person-in- environment, and other multidisciplinary theoretical frameworks in the evaluation of outcomes. 2
27. Critically analyze, monitor, and evaluate intervention and program processes and outcomes. 2
28. Apply evaluation findings to improve practice effectiveness at the micro, mezzo, and macro levels.

SOWK 4311. Practicum Seminar I
3 Credits (3)
The practicum seminar course will provide students the opportunities to integrate coursework and field practice experience learning to develop social work competencies. Restricted to: S WK majors.
Corequisite: SOWK 4310.
Learning Outcomes
1. Identify real-world applications of social work competencies.
2. Develop individualized learning goals for your practicum experience that align with the social work competencies.
3. Demonstrate evidence of ethical and professional behaviors in your practicum experience that are aligned with the social work competencies.
4. Reflect on the practice skills of professional social workers in your practicum setting.
5. Valuate the development of your personal practice skills in your practicum setting.

SOWK 4320. Practicum II
3 Credits (3)
This course is a continuation of a supervised professional practice in a community social service agency, providing experiential learning and instruction. 240 clock hours required. Restricted to: S WK majors.
Corequisite: SOWK 4321.
Learning Outcomes
1. Recognize course expectations, practicum requirements and procedures.
2. Recognize social work competencies, and requirements of learning contract goals.
3. Develop learning goals as related to Practicum.
4. Demonstrate Ethical and professional behavior.
5. Critically reflect on their practicum experience.
6. Explain the importance of ethics in social work.
7. Utilize knowledge of culture and background as it relates to documentation and reflection.
8. Articulate how differences in culture impact social work.

SOWK 4321. Practicum Seminar II
3 Credits (3)
The practicum seminar course will provide students the opportunities to integrate coursework and field practice experience learning to demonstrate social work competencies. Restricted to: S WK majors.
Corequisite: SOWK 4320.
Learning Outcomes
1. Make ethical decisions by applying the standards of the National Association of Social Workers Code of Ethics, relevant laws and regulations, models for ethical decision making, ethical conduct of research, and additional codes of ethics within the profession as appropriate to the context; The Nine Social Work Competencies 2022 Educational Policy and Accreditation Standards.
2. Demonstrate professional behavior; appearance; and oral, written, and electronic communication.
3. Use technology ethically and appropriately to facilitate practice outcomes.
4. Use supervision and consultation to guide professional judgment and behavior.
5. Apply research findings to inform and improve practice, policy, and programs.
6. Identify ethical, culturally informed, anti-racist, and anti-oppressive strategies that address inherent biases for use in quantitative and qualitative research methods to advance the purposes of social work.
7. Demonstrate anti-racist and anti-oppressive social work practice at the individual, family, group, organizational, community, research, and policy levels.
8. Demonstrate cultural humility by applying critical reflection, self-awareness, and self-regulation to manage the influence of bias, power, privilege, and values in working with clients and constituencies, acknowledging them as experts of their own lived experiences.
9. Advocate for human rights at the individual, family, group, organizational, and community system levels. 1
10. Engage in practices that advance human rights to promote social, racial, economic, and environmental justice. 1
11. Select and use culturally responsive methods for evaluation of outcomes. 1
12. Critically analyze outcomes and apply evaluation findings to improve practice effectiveness with individuals, families, groups, organizations, and communities. 1
13. Use social justice, anti-racist, and anti-oppressive lenses to assess how social welfare policies affect the delivery of and access to social services. 1
14. Apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, racial, economic, and environmental justice. 1
15. Apply knowledge of human behavior and person-in-environment, as well as interprofessional conceptual frameworks, to engage with clients and constituencies. 1
16. Use empathy, reflection, and interpersonal skills to engage in culturally responsive practice with clients and constituencies. 1
17. Apply theories of human behavior and person-in-environment, as well as other culturally responsive and interprofessional conceptual frameworks, when assessing clients and constituencies. 1
18. Demonstrate respect for client self-determination during the assessment process by collaborating with clients and constituencies in developing a mutually agreed-upon plan. 1

19. Engage with clients and constituencies to critically choose and implement culturally responsive, evidence-informed interventions to achieve client and constituency goals. 2
20. Incorporate culturally responsive methods to negotiate, mediate, and advocate with and on behalf of clients and constituencies.

SOWK 4510. Family and Child Welfare Policy
3 Credits (3)
This course is designed to provide students with an understanding of the history and evolution of child welfare policies, initiatives and factors that influence advocacy and practices within the child welfare system. Child welfare policies and services specific to the state of New Mexico are infused throughout the course. May be repeated up to 3 credits.

SOWK 4996. Special Topics
3 Credits (3)
Specific subjects to be announced in the Schedule of Classes. May be used as a mandatory practice elective. Junior or above standing, majors or consent of instructor. Restricted to: S WK majors. May be repeated up to 3 credits.
Learning Outcomes
1. Varies

SOWK 4997. Independent Study
1-6 Credits (1-6)
Individual studies directed by consenting faculty with the prior approval of the department head. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

SOWK 5110. Sociocultural Concepts and Populations of the Southwest
3 Credits (3)
Theoretical and sociohistorical perspectives on racism, sexism, ageism, heterosexism, classism, ableism, and other forms of discrimination and oppression. Cultural diversity, strengths, and Southwest and border issues emphasized. This course examines the social and cultural landscape of the U.S. Southwest, with a focus on the diverse populations that call this region home. The historical and contemporary experiences of marginalized communities, analyzing the impact of discrimination, oppression, and economic deprivation on their lives will be explored.
Learning Outcomes
1. Correlate the implications of cultural diversity and competent Social Work practice.
2. Apply theories and perspectives on oppression within diverse individuals, groups, and populations.
3. Discuss cultural identities and how intersectionality of social factors affects individuals.
4. Articulate the importance of a cultural competency perspective in Social Work practice.
5. Reflect on your individual cultural identity and experiences and how they influence your approach to culturally grounded Social Work practice.

SOWK 5135. Human Behavior in the Social Environment
3 Credits (3)
The major theories of human behavior and the life span from conception through adolescence, adulthood, and old age. Focuses both on the areas of concern and risk for client systems and on the opportunities and strengths in the social environment.
Learning Outcomes
1. Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks.
2. Evaluate the functioning of individuals, families, and groups through biological, psychological, spiritual, and cultural dimensions.
3. Apply conceptual/theoretical frameworks to assess the functioning of individuals (children, adolescents, and adults), families, groups, organizations and communities.
4. Analyze the ways in which social systems facilitate or impede health and well-being of individuals and families.
5. Evaluate the complex interplay of the environment (family, groups, communities, and organizations) and developmental factors on infants, children, adolescents, and adults of diverse communities.
6. Evaluate theories and their role in assessment with children, adolescents, adults, families, groups, organizations, and communities.

SOWK 5155. Social Policy Issues, Analysis and Change
3 Credits (3)
An overview of social and economic problems in the United States and the historical and current social welfare policies aimed at alleviating these problems. Emphasis on developing an awareness and ability to create, analyze, and change policies that impact vulnerable populations.
Learning Outcomes
1. Comprehend the values, institutional, political, and economic forces that drive social problems and social welfare policy in the US.
2. Analyze past, current, and future social policies developed to respond to social problems from a lens that considers the historical, social, cultural, economic, organizational, environmental, and global influences on social problems and the impact on diverse populations of the Southwest.
3. Evaluate how social work values, ethics, and research impact social policy development, evaluation, and implementation of social policy.
4. Apply a multilevel policy advocacy framework to advocate for policies that promote human rights, social and economic justice and addresses culturally influenced barriers to services presented by practitioners, organizations, and larger systems for populations of the Southwest.

SOWK 5165. Generalist Social Work Practice
3 Credits (3)
An introduction to generalist social work practice skills, focusing on the theoretical foundations of social work as a profession and implementing the planned change process with individual, family, group, community, and organizational client systems within a social work values and ethics framework.
Learning Outcomes
1. Explain the just practice framework for social work practice.
2. Analyze the value of critical self-reflection as a foundation for social work practice.
3. Apply the ethical principles and standards in the NASW code of ethics to frameworks for ethical decision making.
4. Critically select theoretical orientations to address client needs.
5. Apply the planned change process to a range of client systems (individuals, groups, families, communities, and organizations).
6. Demonstrate skills for engagement and assessment with single-client systems.

7. Evaluate the results of intervention/action and evaluation plans of change.

SOWK 5180. Generalist Practicum Experience I
3 Credits (3)
Supervised professional practice in a community social service agency, providing experiential instruction and learning. 225 clock hours required. Seminar required. Restricted to: MSW majors.

SOWK 5181. Generalist Practicum Seminar I
3 Credits (3)
This practicum seminar assists students in integrating knowledge, skills, values, and ethical principles gained in practice and theory courses into social work practice settings. This seminar also aids students in integrating social work practice processes in service planning and delivery. Students explore skills of collaboration and consultation by presenting practicum case examples.
Corequisite: SOWK 5180.
Learning Outcomes
1. Increase awareness of personal strengths and challenges as a developing social work practitioner.
2. Employ knowledge, skills, values, and ethical principles from practice and theory courses in social work practice.
3. Demonstrate application of research findings to social work practice.
4. Collaborate and consult effectively with peers and practicum liaison.
5. Generalize the Council on Social Work Education's core competencies to social work practice.

SOWK 5190. Generalist Practicum Experience II
3 Credits (3)
Supervised professional practice in a community social service agency. 225 clock hours required. Seminar required. Restricted to: MSW majors.
Prerequisite: SOWK 5180.

SOWK 5191. Generalist Practicum Seminar II
3 Credits (3)
This practicum seminar builds on learning from Generalist Practicum Seminar I and assists students in integrating knowledge, skills, values, and ethical principles gained in practice and theory courses into social work practice settings. This seminar also aids students in integrating social work practice processes in service planning and delivery. Students explore skills of collaboration and consultation by presenting practicum case examples.
Prerequisite: SOWK 5180 and SOWK 5181.
Corequisite: SOWK 5190.
Learning Outcomes
1. Increase awareness of personal strengths and challenges as a developing social work practitioner.
2. Employ knowledge, skills, values, and ethical principles from practice and theory courses in social work practice.
3. Demonstrate application of research findings to social work practice.
4. Collaborate and consult effectively with others.
5. Generalize the Council on Social Work Education's core competencies to social work practice.

SOWK 5210. Core Components for Trauma Informed Practice
3 Credits (3)
This course facilitates students' acquisition of the knowledge, skills, and attitudes necessary to effectively use 12 common trauma-informed practice elements in interventions for and the treatment of traumatized children and their families. The course conceptualizes a trajectory of intervention that considers the impact of trauma, intervention objectives, and the practice elements needed to facilitate the intervention objectives. This course is taught using an inquiry-based learning (IBL) pedagogy to enhance students' engagement and learning using full-length cases to exemplify a range of different clients a clinician might encounter.
Learning Outcomes
1. Demonstrate cultural humility by applying critical reflection, self-awareness, and self-regulation to manage the influence of bias, power, privilege, and values in working with clients and constituencies, acknowledging them as experts regarding their own lived experiences.
2. Apply knowledge of human behavior and person-in-environment, as well as interprofessional conceptual frameworks to engage with clients and constituencies.
3. Demonstrate respect for client self-determination during the assessment process by collaborating with clients and constituencies in developing mutually agreed-on goals.
4. Engage with clients and constituencies to critically choose and implement culturally responsive, evidenced-informed interventions to achieve mutually agreed-on plans and increase the capacities of clients and constituencies.

SOWK 5230. Applied Social Work Research
3 Credits (3)
Introduction to skills for research-informed practice and practice-informed research, including problem formulation, research designs, measurement, instrumentation, data collection and analysis, use of human participants in research, and application of research knowledge and professional ethics to social work practice. Focus on the critical analysis, interpretation, and application of existing research and use of data to inform practice and advance the field across a range of client systems.
Learning Outcomes
1. Describe key concepts, theories, and methodologies used in social work research, including qualitative and quantitative approaches.
2. Apply ethical and cultural considerations in social work research and how these apply to working with vulnerable populations.
3. Critically evaluate existing social work research, identifying potential biases, limitations, and areas for improvement.
4. Develop comprehensive research, integrating theory, ethical standards, and appropriate methods to address real-world social work problems.

SOWK 5240. Leadership in Public Health Social Work
3 Credits (3)
This course explores the integrated application of Public Health Social Work (PHSW) models and theories of practice, addressing community and organizational assessment and intervention, interpretation of contexts of power and influence, capacity for conflict and alliances, and strategies for advocacy to promote community and organizational transformation. This course will emphasize assessing and sustaining culturally-sustaining, critical trauma theory-informed rural, tribal, and border area systems response to critical PHSW issues. This course is also designed to prepare students graduating in May 2022 for their MSW Final Program Examination and MPH Competency Exams.
Learning Outcomes
1. Apply Public Health Social Work competencies to social work and public health practice settings.
2. Demonstrate culturally humble, trauma informed public health social work knowledge, skills and values in social work and public health practice settings.

3. Examine culturally- and identity-relevant public health social work practice considerations when serving in border area, tribal and rural communities.
4. Design and implement community and organizational assessment through an integrated public health social work framework.

SOWK 5260. Leadership Action Project
1 Credit (1)
This skills-based course prepares MSW students for management in government and nonprofit organizational contexts, including how to prepare and analyze organizational budgets, develop grant proposals and reports and develop a leadership platform.
Learning Outcomes
1. Identify a problem that can be addressed through new programming, policy change, or collective action.
2. Assess needs and assets through the collection and/or analysis of multiple data sources.
3. Create a proposal to address an identified problem through policy, programming, or collective action.
4. Demonstrate leadership to persuade stakeholders of the relevance and feasibility of a proposal.

SOWK 5270. Social Work Ethics
1 Credit (1)
A bridge course for Advanced Standing students intended to provide a firm foundation in ethical practice before entry into the advanced year. May be repeated up to 2 credits.
Prerequisite: SOWK 5180 and SOWK 5190.
Corequisite: SOWK 5281.
Learning Outcomes
1. Learners will analyze the social work code of ethics.
2. Learners will apply frameworks for ethical decision making.

SOWK 5271. Social Work Policy
1 Credit (1)
A bridge course for Advanced Standing students intended to provide a firm foundation in policy practice before entry into the advanced year. May be repeated up to 2 credits.
Prerequisite: SOWK 5180 and SOWK 5190.
Corequisite: SOWK 5281.
Learning Outcomes
1. Learners will describe key policies impacting social work practice.
2. Learners will analyze policy.
3. Learners will articular policy recommendations and steps for engagement in policy practice.

SOWK 5272. Social Work Research
1 Credit (1)
A bridge course for Advanced Standing students intended to provide a firm foundation research-informed practice and practice-informed research before entry into the advanced year. May be repeated up to 2 credits.
Prerequisite: SOWK 5180 and SOWK 5190.
Corequisite: SOWK 5281.
Learning Outcomes
1. Learners will critically analyze existing research for application to practice.
2. Learners will demonstrate skills for collecting data to inform practice.

SOWK 5280. Advanced Generalist Practicum Experience I
3 Credits (3)
Supervised professional practice in a community social service agency providing experiential learning in advanced generalist practice. 250 clock hours required. Seminar required. Restricted to: MSW majors.
Prerequisite: SOWK 5190.

SOWK 5281. Advanced Generalist Practicum Seminar I
2 Credits
This practicum seminar builds upon students' knowledge, skills, values, and cognitive and affective processes attained in their generalist year to apply, analyze and evaluate advanced generalist social work service planning and delivery with diverse populations. Students develop professional social work practice knowledge in micro, mezzo, macro, and multidisciplinary settings.
Prerequisite: SOWK 5190 and SOWK 5191.
Corequisite: SOWK 5280.
Learning Outcomes
1. Incorporate the Council on Social Work Education's core competencies with social work practice skills and behaviors.
2. Analyze and evaluate the efficacy of social work interventions.
3. Perform critical reflectivity and skills of cultural humility to serve diverse populations competently.
4. Integrate complex critical thinking with various theories and interventions to address complex and diverse practice contexts.

SOWK 5290. Advanced Generalist Practicum Experience II
3 Credits (3)
Supervised professional practice in a community social service agency providing experiential learning in advanced generalist practice. 250 clock hours required. Seminar required. Restricted to: MSW majors.
Prerequisite: SOWK 5280.

SOWK 5291. Advanced Generalist Practicum Seminar II
2 Credits
This practicum seminar builds on learning from Advanced Practicum Seminar I and students' knowledge, skills, values, cognitive and affective processes attained in their generalist year to apply, analyze and evaluate advanced generalist social work service planning and delivery with diverse populations. Students develop knowledge of professional social work practice in micro, mezzo, macro, and multidisciplinary settings.
Prerequisite: SOWK 5280 and SOWK 5281.
Corequisite: SOWK 5290.
Learning Outcomes
1. Incorporate the Council on Social Work Education's core competencies with social work practice skills and behaviors.
2. Analyze and evaluate the efficacy of social work interventions.
3. Perform critical reflectivity and skills of cultural humility to serve diverse populations competently.
4. Integrate complex critical thinking with various theories and interventions to address complex and diverse practice contexts.

SOWK 5310. Social Work Mental Health Practice
3 Credits (3)
This course is designed to add to the practice sequence for Masters Level students in Social Work. It addresses social work assessment of major mental health issues across the life span with an emphasis on resiliency and coping skills. Culturally responsive practices are applied to the major issues of mental health. Basic psychopharmacology, neurobiology and the ways in which Social Workers interact with clients to aid education and effective treatment of medical interventions will be a prominent part of this course. Evidence-based practices useful for work in various disorders will be incorporated.

Learning Outcomes

1. Critically analyze the concepts of mental health and psychopathology.
2. Assess social, political, and economic conditions which interfere with mental health, focusing on populations at risk for discrimination and oppression.
3. Conduct assessments of mental and emotional functioning using approved models and tools.
4. Apply DSM 5 criteria across a range of diverse populations.
5. Differentiate culturally based behaviors from psychopathology.
6. Recognize connections between psychopharmacological interventions, symptom reduction, and side effects.
7. Identify evidence-based practices for work with clients exhibiting a range of mental disorders.

SOWK 5320. Advanced Practice with Individuals
3 Credits (3)
This class builds on Foundation Year Practice courses by integrating theory and practice, and advancing skills in selecting, applying and evaluating practice interventions in a culturally sensitive manner with individuals.
Prerequisite: SOWK 5165.
Learning Outcomes

1. Demonstrate professional behavior, appearance, and oral, written, and electronic communication.
2. Apply cultural understanding, intersectionality, and anti-oppressive social work theories to direct practice with individuals.
3. Assess individuals through the lenses of client self-determination, theories of human behavior, person-in-environment, and culturally responsive conceptual frameworks.
4. Provide culturally responsive, evidence-informed interventions in direct practice with individuals.
5. Evaluate principles of direct practice with individuals.

SOWK 5330. Advanced Practice with Groups
3 Credits (3)
This course will address the knowledge, values and skills needed to work effectively with diverse populations in group settings. The course will build on Foundation Year courses by integrating theory and practice, and advancing skills in selecting, applying and evaluating practice interventions in a culturally sensitive manner with social work groups.
Prerequisite: SOWK 5165.
Learning Outcomes

1. Demonstrate the ability to conduct a group.
2. Apply a theoretically informed knowledge base of group development as it is executed across systems.
3. Demonstrate knowledge of the variety of roles that group leaders and participants need to address in accomplishing the successful mission of the group.
4. Establish a process that encourages clients to embrace the mutual aid function of groups, embracing an attention to multiple helping relationships.
5. Advocate for a democratic process within all groups, encouraging a mutual emphasis on empowerment.
6. Apply skills for social work assessment to group assessments.

SOWK 5340. Advanced Practice with Families
3 Credits (3)
This class builds on Foundation Year Practice courses by integrating theory and practice, and advancing skills in selecting, applying, and evaluating practice interventions in a culturally sensitive manner with families. Restricted to: MSW majors.
Prerequisite: SOWK 5165.
Learning Outcomes

1. Demonstrate professional behavior, ethical conduct, and effective communication in all aspects of family practice.
2. Apply cultural humility and intersectionality to assess and engage with diverse family systems.
3. Conduct comprehensive family assessments using person-in-environment and systems-based approaches.
4. Implement evidence-based interventions that address the unique needs of diverse family systems.
5. Reflect on and evaluate professional practice to ensure growth and improve client outcomes.

SOWK 5350. Advanced Practice with Communities and Organizations
3 Credits (3)
This class builds on Foundation Year Practice courses by integrating theory and practice, and advancing skills in selecting, applying, and evaluating practice interventions in a culturally sensitive manner with organizations and communities. Restricted to: MSW majors.
Prerequisite: SOWK 5165.
Learning Outcomes

1. Integrate professional values, ethical standards, relevant laws and regulations into practice at the micro, mezzo, and macro levels, involving ethical decision-making and principles of critical thinking in practice, research, and policy.
2. Apply frameworks to understand their role in relationship to other professions, leaders and connectors in engaging in interprofessional teams in various settings.
3. Use self-reflection and self-awareness while engaging with diverse client populations using a range of social work practice roles in ethnically diverse communities.
4. Identify at-risk populations to determine their needs within community and organizational settings and determine what social and economic forces affect those persons at risk.
5. Analyze communities from both systems and ecological perspectives and apply ethnographic methods to conduct a community assessment project.
6. Apply policy knowledge and macro practice skills to advance human rights and social justice within practice settings at the micro, mezzo, and macro levels.
7. Identify at-risk populations to determine their needs in community and organizational settings and determine what social and economic forces influence those persons at risk.
8. Engage effectively in “asset mapping” that identifies existing and needed services for populations in a community settings and organizations.

SOWK 5510. Family and Child Welfare Policy
3 Credits (3)
This course will enhance students’ ability to offer child welfare services that respect cultural differences, reflect current policy knowledge concerning child maltreatment, build on the advocacy and protective capacities of individuals, families and communities and encourage permanency for children and preservation of families. Required basic knowledge of child welfare and assessment skills. Outside majors require instructor permission. May be repeated up to 3 credits.

SOWK 5530. Family/Child Welfare Practice
3 Credits (3)

Current issues and interventions in child protection, foster care, family preservation and support, family reunification, adoption and permanency planning.

Learning Outcomes

1. Students will identify and analyze approaches to child protection, foster care, family preservation and support, family reunification, adoption and permanency planning.

SOWK 5540. Introduction to School Social Work Practice in Diverse Communities

3 Credits (3)

An introduction to school social work in diverse communities beginning with systems of service for children with disabilities ages 0-3, continuing into early childhood and emphasizing services in pk-12 settings. The course explores school social work history and roles, ethics for school-based practice, Family support engagement, theoretical frameworks for school-based practice including critical disability theory, major education policies which impact school social work, schoolwide approaches to supporting student wellbeing, and approaches to targeted behavior interventions in schools. Emphasis is placed on culturally and linguistically relevant approaches to practice with diverse communities throughout.

Learning Outcomes

1. Critically analyze the role of the school social worker and how it is distinct from other social work roles.
2. Analyze the role of key federal, state, and district policies on school social work ethics and practice.
3. Apply critical disability theory to analyze approaches to school social work practice and intervention.
4. Describe and evaluate key approaches to school social work practice for students aged birth to twenty one.
5. Analyze the role of culturally and linguistically responsive family engagement and advocacy in school social work practice.

SOWK 5560. Advanced School Social Work Practice: Diverse Students and Families with Special Needs

3 Credits (3)

Advanced policy and practice for school social workers supporting students receiving special education services beginning in early childhood and continuing through primary and secondary school settings. The curriculum will include culturally and linguistically appropriate knowledge, assessment, and interventions for diverse children and families with disabilities. The curriculum that is to be developed will include culturally relevant interventions for students with disabilities, special education policy, writing IEP reports and goals, and engaging in culturally and linguistically engaged family support and advocacy based on scientifically based information. The course will also provide a strong focus on special education specific policy and regulations. Assignments will be created to align with competency knowledge and application (Prerequisite SOWK 5540).

Prerequisite: SOWK 5540.

Learning Outcomes

1. Understand the roles and responsibilities of Related Service Providers (RSP) working with diverse populations.
2. Apply special education policy to practice in schools.
3. Connect culturally responsive advocacy skills and practices to related service social work.
4. Illustrate EBP to engage and assess needs of diverse children with disabilities and their families.
5. Implement and Evaluate EBP for diverse children with disabilities and their families.

SOWK 5994. Final Exit Project

1 Credit (1)

Final Exit Project. This 1-credit course is the School of Social Work's competency examination. The final exit project is non-thesis summative examination of students' ability to apply the Council on Social Work Education's core competencies to a case study. Students may only enroll in this course during the final semester of their MSW Program. May be repeated up to 2 credits.

Prerequisites: 45 Credit Hours and SOWK 5190.

Learning Outcomes

1. Apply Council on Social Work Education's core competencies to a case study.

SOWK 5996. Special Topics

1-3 Credits (1-3)

Specific subjects to be announced in the Schedule of Classes. Open to graduate students in related disciplines and to community professionals in related disciplines and to community professionals in related fields. May be repeated up to 99 credits.

Learning Outcomes

1. Varies

SOWK 5997. Independent Study

1-3 Credits (1-3)

Individual study to augment depth of knowledge in area related to course of study. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

SOWK 5999. Graduate Thesis

1-6 Credits (1-6)

Required for thesis option. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

SPAN-SPANISH

SPAN 1110. Spanish I

4 Credits (4)

Designed for students with little exposure to Spanish, this course develops basic listening, speaking, reading, and writing skills and basic intercultural competence in interpretive, interpersonal and presentational modes of communication at the Novice Level of proficiency based on ACTFL guidelines. During this course, students perform better and stronger in the Novice Mid level while some abilities emerge in the Novice High range. This is an introductory course aimed at helping the student to communicate in Spanish in everyday familiar situations via recognition and production of practiced or memorized words, phrases, and simple sentences.

Prerequisite(s): language placement and/or assessment by departmental examination.

Learning Outcomes

1. Students can communicate on very familiar topics using a variety of words and phrases that they have practiced and memorized.
2. Students can present information about myself and some other very familiar topics using a variety of words, phrases, and memorized expressions.
3. Students can write short messages and notes on familiar topics related to everyday life.

4. Students can often understand words, phrases, and simple sentences related to everyday life.
5. Students can recognize pieces of information and some-times understand the main topic of what is being said.
6. Students can understand familiar words, phrases, and sentences within short and simple texts related to everyday life.
7. Students can sometimes understand the main idea of what they have read.

SPAN 1120. Spanish II
4 Credits (4)
Designed for students with some degree of exposure to Spanish in high school and/or at home, this course continues to develop basic listening, speaking, reading, and writing skills and basic intercultural competence in interpretive, interpersonal and presentational modes of communication based at the Novice High Level of proficiency based on ACTFL guidelines, although a few abilities may emerge in the Intermediate Low Level. Students in this course communicate in Spanish in familiar topics using a variety of words, phrases, simple sentences and questions that have been highly practiced and memorized.
Prerequisite: language placement and/or assessment by departmental examination or a C- or better in SPAN 1110.
Learning Outcomes
1. Students can participate in conversations on a number of familiar topics using simple sentences.
2. Students can handle short social interactions in everyday situations by asking and answering simple questions.
3. Students can present basic information on familiar topics using language they have practiced using phrases and simple sentences.
4. Students can write briefly about most familiar topics and present information using a series of simple sentences.
5. Students can understand the main idea in short, simple messages and presentations on familiar topics.
6. Students can understand the main idea of simple conversations that they overhear.
7. Students can understand the main idea of short and simple texts when the topic is familiar.

SPAN 1210. Elementary Spanish for Heritage Learners I
3 Credits (3)
This is a beginning-level Spanish course designed for students who have a cultural connection to the Spanish language. Some students have had very little exposure to the language and enter the class to develop beginning-level skills. Other students may have grown up hearing the heritage language in the community and may understand some Spanish and speak at a basic level as a result. The objective is to draw upon the connection to the heritage language as a source of motivation and engagement for our learning communities. At the same time, we build upon the language base that students may already have as a result of their heritage learner experience in order to develop new proficiencies in Spanish and reactivate the Spanish that students have learned previously. By the end of this course, students will be able to describe their home, campus surroundings and common activities including cultural traditions. At the same time, students gain cultural competency and develop a critical understanding of their linguistic and cultural background. Students who have previously earned a C or better in SPAN 1110 or SPAN 1120 may not recieve credit for this course.
Learning Outcomes
1. Interpersonal Communication: Students can engage in exchanges in culturally appropriate ways using understandable pronunciation on familiar topics using contextualized words, phrases, common idiomatic expressions, and simple sentences.
2. Written expression: Students can write an essay/poem/story/creative sketch/lyric in the target language that describes a past/present/future (fictional) event to the reader.
3. Interpretive listening: Students can understand familiar questions and statements from simple sentences in conversations.
4. Interpretive reading: Students can identify the topic and some isolated facts from simple sentences in informational and fictional texts.
5. Critical cultural awareness: Students can recognize and explain some of the issues facing bilingual communities in accordance to the instructor expertise and articulation with subsequent courses.

SPAN 1220. Spanish for Heritage Learners II
3 Credits (3)
Spanish as a Heritage Language II is a second semester class designed for students who have developed some basic Spanish proficiency from previous classes and/or from community experiences. This course provides students with the opportunity to develop their proficiency in the four language skills (speaking, listening, reading, and writing). Class activities are designed to strengthen oral communication skills (speaking and listening) through a variety of group activities. By the end of the course students will be able to understand and produce narrations of past events in oral and written Spanish. In order to foster a desire to revitalize and maintain the Spanish language in the US context we attempt to raise students' critical awareness of what it means to be part of a specific speech community.
Learning Outcomes
1. Interpersonal Communication: Students can engage in basic but authentic conversations through providing and obtaining information, expressing likes and dislikes, describing their daily lives, and narrating simple events in the past.
2. Written expression: Students can write an essay/poem/story/creative sketch/lyric in the target language, and that describes a past (fictional) event to the reader.
3. Interpretive listening: can identify the main idea in short conversations.
4. Interpretive reading: Students can identify the topic and related information from simple sentences in short informational and fictional texts.
5. Critical cultural awareness: Students can recognize and explain some of the issues facing bilingual communities in accordance to the instructor expertise and articulation with previous and subsequent courses.

SPAN 1410. Spanish for Health Care Professions
3 Credits (3)
This course is designed to develop the student's ability to understand, speak, read and write the Spanish language within a health profession framework because linguistic and cultural knowledge are essential for communication with patients. Restricted to Community Colleges campuses.
Prerequisite: SPAN 1511.
Learning Outcomes
1. Demonstrate acquisition of intermedia communicative skills in the area of listening, speaking, reading, and writing.
2. Comprehend and participate in conversations in Spanish.
3. Have a working vocabulary which enables to recognize and exchange information in Spanish.

4. Be able to apply some basic and intermediate grammar rules in Spanish.

SPAN 1511. Spanish for Human Services
3 Credits (3)
An introductory Spanish course for professionals in the human services. The course focuses on pertinent vocabulary for situations commonly encountered by professionals in areas such as social work, counseling, case management, Social Security, Medicare, health services, food stamps, child support, vocational rehabilitation, senior citizen issues and other areas. Basic Spanish pronunciation and grammar are introduced in the context of practical social-services situations.
Learning Outcomes
1. Augment basic vocabulary pertinent to professional roles (Vocabulary Journal).
2. Display increased confidence about pronunciation of Spanish and Spanish sentence structure (Role Play Interview).
3. Identify cultural norms working with Hispanic individuals and families (interview of Hispanic Professional).
4. Translate and explain agency forms and documents (Translation of Agency Form).
5. Display listening comprehension of typical dialogues which take place in a variety of human services agencies (Final Exam).

SPAN 2110. Spanish III
3 Credits (3)
This course is based on the integration of learning outcomes across Interpersonal, Interpretive, and Presentational Modes of Communication at the Intermediate Low Level of proficiency based on ACTFL guidelines. Students accomplish real-world communicative tasks in culturally appropriate ways as they gain familiarity with the target culture(s). This is an intermediate course aimed at helping the student to communicate in Spanish on familiar topics about self, others and everyday life at the same time that they recognize and handle short social interactions in interactions in everyday situations by asking and answering a variety of questions.
Prerequisite: language placement and assessment by departmental examination or C or better in SPAN 1120.
Learning Outcomes
1. Students can participate in conversations on familiar topics using sentences and series of sentences.
2. Students can handle short social interactions in everyday situations by asking and answering a variety of questions.
3. Students can usually say what they want to say about themselves and their everyday life.
4. Students can make presentations on a wide variety of familiar topics using connected sentences
5. Students can write on a wide variety of familiar topics using connected sentences.
6. Students can understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies.
7. Students can under-stand the main idea in conversations that they overhear.
8. Students can understand the main idea of texts related to everyday life and personal interests or studies.

SPAN 2120. Spanish IV
3 Credits (3)
This course is based on the integration of learning outcomes across Interpersonal, Interpretive, and Presentational Modes of Communication at the Intermediate Low Level of proficiency based on ACTFL guidelines. Students accomplish real-world communicative tasks in culturally appropriate ways as they gain familiarity with the target culture(s). This is an intermediate course aimed at helping the student to communicate in Spanish on familiar topics about self, others and everyday life at the same time that they recognize and handle short social interactions in interactions in everyday situations by asking and answering a variety of questions.
Prerequisite: language placement and assessment by departmental examination or C or better in SPAN 2110.
Learning Outcomes
1. Students can participate with ease and confidence in conversations on familiar topics.
2. Students can usually talk about events and experiences in various time frames.
3. Students can usually describe people, places, and things.
4. Students can handle social interactions in everyday situations, sometimes even when there is an unexpected complication.
5. Students can make presentations in a generally organized way on school, work, and community topics, and on topics they have researched.
6. Students can make presentations on some events and experiences in various time frames.
7. Students can write on topics related to school, work, and community in a generally organized way.
8. Students can write some simple paragraphs about events and experiences in various time frames.
9. Students can easily understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies. 1
10. Students can usually understand a few details of what they overhear in conversations, even when something unexpected is expressed. 1
11. Students can sometimes follow what they hear about events and experiences in various time frames. 1
12. Students can easily understand the main idea of texts related to everyday life, personal interests, and studies. 1
13. Students can sometimes follow stories and descriptions about events and experiences in various time frames.

SPAN 2210. Spanish for Heritage Learners III
3 Credits (3)
Intermediate Spanish for Heritage Speakers I is a third semester course designed for students who have been raised in a Spanish-speaking environment and speak, or understand, some Spanish as a result of hearing it in the home, and in the community by family, friends, and neighbors. Students in this course will continue to develop their ability to narrate events in the past and will be able to describe hypothetical situations. Students will also develop their ability to express wishes, desires, and necessities. This course will help the student build confidence in their Spanish abilities and expand the language use in the areas of writing, reading, oral production and listening comprehension. In order to foster a desire to revitalize and maintain the Spanish language we attempt to raise students' critical awareness of wider issues facing Spanish speakers in the US context. May be repeated up to 3 credits.
Learning Outcomes
1. Interpersonal Communication: Students can exchange information on a wide variety of familiar topics in which the students use appropriate

vocabulary to describe their daily lives and narrate events in the past with some degree of ease and confidence.
2. Written expression: Students can write an essay/poem/story/creative sketch/lyric in the target language, and that effectively conveys a series of past (fictional) events to the reader that may include recent and distant past.
3. Interpretive listening: Students can identify the main idea and key information in short straightforward conversations.
4. Interpretive reading: Students can understand the main idea and key information in short straightforward informational and fictional texts.
5. Critical cultural awareness: Students can recognize and explain some of the issues facing bilingual communities in accordance to the instructor expertise and articulation with previous and subsequent courses.

SPAN 305. Topics in Hispanic Civilization
3 Credits (3)
Group study of selected topics focusing on Hispanic culture and civilization. Topics announced in the Schedule of Classes. May be repeated for a maximum of 6 credits.
Prerequisite: SPAN 2120 or SPAN 2210 or consent of instructor.

SPAN 306. Special Topics
3 Credits (3)
Group study of Spanish for specialized purposes (e.g. court interpreting, professional language for bilingual teachers, technical writing for the business community). Course subtitled in the Schedule of Classes. May be repeated for a maximum of 12 credits.
Prerequisite: SPAN 2120 or SPAN 2210 or consent of instructor.

SPAN 316. Grammar for Non-Native Speakers of Spanish
3 Credits (3)
For students who did not grow up speaking Spanish. A review of the rules of Spanish grammar. Students cannot receive credit for both SPAN 316 and SPAN 318.
Prerequisite(s): SPAN 2120 or SPAN 2210 or consent of instructor.
Learning Outcomes
1. Students will be better equipped academically to continue into upper-division Spanish courses.
2. Students will be better equipped to communicate in Spanish by becoming more adept at using a variety of grammatical structures.
3. Students will gain an appreciation for diverse languages and cultures that exist in the borderlands and will be able to contribute to the diversity.
4. Students will gain critical thinking skills as they develop their bilingual abilities.
5. Students will be encouraged after becoming bilingual and will desire to make language learning life-long goal.

SPAN 317. Composition for Non-Native Speakers of Spanish
3 Credits (3)
For students who did not grow up speaking Spanish. Development of professional and academic writing skills in Spanish. Students cannot receive credit for both SPAN 317 and SPAN 319.
Prerequisite(s): SPAN 2120 or SPAN 2210 or consent of instructor.
Learning Outcomes
1. Students will be better equipped academically to continue into upper-division Spanish courses.
2. Students will be better equipped to communicate in written Spanishby employing a more clear and structured writing style.
3. Students will gain an appreciation for diverse languages and cultures that exist in the borderlands and will be able to contribute to the diversity.
4. Students will gain critical thinking skills as they develop their bilingual abilities.
5. Students will be encouraged after becoming bilingual and will desire to make language learning life-long goal.

SPAN 318. Grammar for Heritage/Native Speakers of Spanish
3 Credits (3)
For students who speak or have been exposed to Spanish at home or in the community. A review of grammatical concepts and analysis of both spoken and written Spanish. Students cannot receive credit for both SPAN 316 and SPAN 318.
Prerequisite(s): SPAN 2120 or SPAN 2210 or consent of instructor.
Learning Outcomes
1. Students will be better equipped academically to continue into upper division Spanish courses.
2. Students will be better equipped to communicate in written and spoken Spanish by using a variety of grammatical structures.
3. Students will sharpen their Spanish communication skills, which will assist them in securing employment as bilingual speakers.
4. Students will develop a stronger appreciation for the Spanish communication skills and cultural awareness which will assist them in contributing to their communities in meaningful ways.
5. Students will gain critical thinking skills as they sharpen their bilingual abilities.

SPAN 319. Composition for Heritage/Native Speakers of Spanish
3 Credits (3)
For students who speak or have been exposed to Spanish at home or in the community. Development of writing strategies, styles and techniques in the Spanish language. Students cannot receive credit for both SPAN 317 and SPAN 319.
Prerequisite(s): SPAN 2120 or SPAN 2210 or consent of instructor.
Learning Outcomes
1. Students will be better equipped academically to continue into upper-division Spanish courses.
2. Students will be better equipped to communicate in written Spanish by employing a more clear and structured writing style.
3. Students will gain an appreciation for diverse languages and cultures that exist in the borderlands and will be able to contribute to the diversity.
4. Students will gain critical thinking skills as they develop their bilingual abilities.
5. Students will be encouraged after becoming bilingual and will desire to make language learning life-long goal.

SPAN 325. Advanced Conversation
3 Credits (3)
Intensive oral practice. Not open to heritage/native speakers of Spanish.
Prerequisite(s): SPAN 2120 or consent of instructor.

SPAN 327. Spanish in the Community
3 Credits (3)
Emphasis on use of Spanish outside the classroom in the local communities. Activities include but are not limited to oral histories, language mentoring in schools, assisting with cultural activities and language research.
Prerequisite: SPAN 2120 or SPAN 2210 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will learn how to apply bilingual and bicultural skills to serve the community.

SPAN 330. Variations in Spanish
3 Credits (3)
The study of social variation within the Spanish language, examining both social and linguistic factors that affect language change.
Prerequisite: SPAN 316 or SPAN 318 or consent of instructor.
Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the terms and concepts related to linguistic variations.
5. Students will learn about variations in the Spanish language and how to apply these ideas to a greater linguistics body of knowledge.

SPAN 340. Introduction to Spanish Linguistics
3 Credits (3)
General aspects of Spanish linguistics: traditional, descriptive, historical and dialectal.
Prerequisite: SPAN 316 or SPAN 318 or consent of instructor.
Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the terms and concepts related to Spanish linguistics.
5. Students will learn about a wide range of linguistics topics and how to apply these ideas to a greater linguistics body of knowledge.

SPAN 350. Introduction to Chicano Studies
3 Credits (3)
Covers Mexican-American life including language, history, education, politics and literature.
Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of Chicano Studies.
5. Students will learn about various Chicano cultural and historical themes and how they affect the Chicano community today.

SPAN 361. US-Mexico Border Culture & Literature
3 Credits (3)
Study of major authors and/or cultural trends in the U.S.-Mexico border. Selected subject to be identified by subtitle in the Schedule of Classes. May be repeated up to 6 credits.
Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of border literature and culture.
5. Students will learn about the value of US-Mexico border culture and literature and how they help form unique border communities.

SPAN 364V. Culture and Civilization of Mexico
3 Credits (3)
Familiarization with culture, civilization and regions of Mexico. History, geography, art, literature, folklore, customs, economics and politics of each region. Impact of Mexican culture and civilization on the Southwest United States. Taught in English. Does not satisfy Arts and Sciences second language requirement.

SPAN 365V. Culture and Civilization of Spanish America
3 Credits (3)
Familiarization with culture, civilization and regions of Spanish America. Study of history, geography, art, literature, folklore, customs, economics and politics of each region. Impact of Spanish American culture and civilization on the Southwest United States. Taught in English. Does not satisfy College of Arts and Sciences second language requirement.

SPAN 380. Introduction to Hispanic Literature
3 Credits (3)
Works in Spanish, all genres and periods. How to read literature in all forms.
Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of Hispanic literature..
5. Students will read foundational Hispanic texts of various genres and periods and learn how they create and inform Hispanic histories, identities, and nations.

SPAN 385. Introduction to Chicano/US-Mexican Literature
3 Credits (3)
Introduction to the study of major works by Chicano/US-Mexican authors.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of Chicano literature.
5. Students will read foundational Chicano texts of various genres and learn how they create and sustain a national Chicano consciousness.

SPAN 388. Contemporary Hispanic Literature
3 Credits (3)
Study of Peninsular and Spanish-American literature from the 20th century to the present.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of Hispanic literature.
5. Students will read foundational Hispanic texts of various genres from the 20th and 21st centuries and learn how they create and inform Hispanic histories, identities, and nations.

SPAN 393. Introduction to Translation and Interpretation
3 Credits (3)
General aspects of translation and interpretation from English to Spanish and Spanish to English. Selected subject to be identified by subtitle in the Schedule of Classes.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms, concepts, and strategies related to translation and interpretation.
5. Students will learn how to translate written texts and/or interpret live communication between the Spanish and English languages. However, other languages may be included at instructor's discretion.

SPAN 399. Independent Studies in Literature, Language, or Culture
1-3 Credits
Individualized, self-paced projects for advanced students. Students must present formal proposal of study.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will learn how to connect the value between literature, language, and culture and how to apply this knowledge to serve their community.

SPAN 411. Creative Writing
3 Credits (3)
Creative writing in Spanish.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of creative writing and the publication process.
5. Students will read and learn about the process and types of creative writing and publication, how to create original texts, and how to edit and publish creating works.

SPAN 412. Spanish-American Poetry
3 Credits (3)
Study of major works by Spanish-American poets.
Prerequisite: SPAN 380 or consent of instructor.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of the poetry genre.
5. Students will read foundational Hispanic poetry from different periods and learn how poets and poetry create and inform Hispanic histories, identities, and nations.

SPAN 414. Coyolxauhqui: La literatura chicana femenil
3 Credits (3)
This course is designed to introduce students to Chicano Studies through the exploration of literature and cultural representations. Students will examine the history of Chican@s and discuss contemporary issues affecting their life, work, and expressions. The study of cultural representations such as Coyolxauhqui, La Malinche, La Virgen de

Guadalupe, La Llorona, La Maqui-Loca, and La Chican@ Queer through a feminist perspective will allow a closer look at the work done by Chicana writers, poets, and artists who share a locus of enunciation. Most importantly, this course helps situating the individual experiences in relationship and connection to other Chican@s in the world.

Learning Outcomes

1. Become familiar with the main theoretical and pedagogical aspects of Chican@ Studies through a feminist perspective.
2. Reflect on the diversity of Chican@ scholars.
3. Observe the uniqueness in Chican@ Studies as compared to other fields.
4. Critically examine current research areas involving the interdisciplinary field.
5. Explore innovative theoretical research in history, politics and cultural topics.

SPAN 418. Spanish-American Short Story
3 Credits (3)

Study of major short stories by Spanish-American authors.
Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of the short story genre.
5. Students will read foundational Hispanic short stories from various periods and learn how this genre creates and informs Hispanic histories, identities, and nations.

SPAN 419. Spanish American Drama
3 Credits (3)

Study of major works by Spanish-American dramatists.
Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of the drama genre.
5. Students will read foundational Hispanic short stories from various periods and learn how this genre creates and informs Hispanic histories, identities, and nations.

SPAN 420. The Art of Storytelling
3 Credits (3)

The study of the genesis of storytelling and its structure, learning how and why to apply oral storytelling in our personal and professional lives, and practicing the art of storytelling in front of an audience.
Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of oral storytelling and the significance of this skill in creating personal and national narratives.
5. Students will learn how to write and present original oral stories, myths, and other forms of oral storytelling for a public audience.

SPAN 421. New Mexico Culture and Literature
3 Credits (3)

The study of the development and flourishing of New Mexican culture and literature.
Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will learn about key cultural, literary, and historical elements of New Mexico.
5. Students will learn how to apply knowledge about New Mexico to serve their communities.

SPAN 422. Cultural Production of Hispanic Revolutions and Wars
3 Credits (3)

The study of Hispanic literature, art, and film dealing with revolutionary movements and wars.
Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of revolutions and wars as they relate to literary production and other modes of cultural expression.
5. Students will learn about various revolutions and wars throughout Spain and Latin America and how they have helped form our regional and national identities, especially through a cultural production lens.

SPAN 423. Colonial Legacy: Representations in Chican@ Literature & Culture
3 Credits (3)

The course offers an overview of the research surrounding the legacy of colonial practices. Presents key concepts in colonial studies (colonialism,

colonies, colonization, enclosures, exploitation, settlements), along with the ideologies of colonialism, to build the theoretical framework that will help analyze our colonial legacy through the exploration of Chican@ literature and cultural representations of writers, poets, and artists. Students will reflect on their own colonial/postcolonial ideologies and practices. The course helps situate the individual experiences in relationship and connection to others in the world.

Learning Outcomes

1. Become familiar with the main theoretical and pedagogical aspects of colonial studies.
2. Reflect, observe and explore the colonial practices and approaches.
3. Critically examine current research areas involving the interdisciplinary field.
4. Explore innovative theoretical research in history, politics, literature and culture.

SPAN 424. Post-Modern Hispanic Literature
3 Credits (3)

The study of Post-Modern experimental literary genres, from Post-boom to the present.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of post-modernism, especially in relation to Hispanic literary production.
5. Students will read a variety of post-modern Hispanic texts from various genres and learn how they help develop regional and national identities.

SPAN 426. Spanish-American Novel
3 Credits (3)

Study of major works by Spanish-American novelists.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of the novel genre.
5. Students will read foundational Hispanic novels from various periods and learn how this genre creates and informs Hispanic histories, identities, and nations.

SPAN 427. Chicano Literature
3 Credits (3)

Study of Chicano/US-Mexican authors.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop advanced comprehension of the terms and concepts of Chicano literature.
5. Students will read foundational Chicano texts of various genres, but with a focus on narratives, and learn how they create and sustain a national Chicano consciousness.

SPAN 439. Topics in Applied Spanish Linguistics
3 Credits (3)

Group study of selected topics to be identified by subtitle in the Schedule of Classes. May be repeated once under different subtitle for a maximum of 6 credits.

Prerequisite: SPAN 340.

SPAN 442. Formation of Hispanic National Identities
3 Credits (3)

Study of seminal texts on the formation of Hispanic national identities and counternarratives against homogenous notions of nationhood.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Improve critical thinking skills through deep-level readings and class discussions.
2. Strengthen academic research and writing skills through high-level research and writing projects.
3. Understand how Hispanic identities were formed through various narrative practices and how that informs media representations of Hispanic people and culture.
4. Analyze how Hispanic identities were formed and with what motivations.
5. Assess national narratives and counter-narratives to understand their political-social worlds better.

SPAN 444. Body Studies
3 Credits (3)

Interdisciplinary study of the body in Hispanic societies and others and its associated political meaning.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Improve critical thinking skills through deep-level readings and class discussions.
2. Strengthen academic research and writing skills through high-level research and writing projects.
3. Understand how the Hispanic body became a cultural and political object and how it is changing by the means of new media.
4. Analyze how the understanding of the Hispanic body has changed throughout history and how local politics affect it.
5. Learn how the body has served as the locus of culture and the principle of social interaction and politics.

SPAN 446. Speculative Fiction
3 Credits (3)

Study of Hispanic speculative fiction and its related utopian/dystopian societies.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Improve critical thinking skills through deep-level readings and class discussions.
2. Strengthen academic research and writing skills through high-level research and writing projects.
3. Understand how social anxieties produced a Hispanic literary corpus to deal with the past, the present, and the future.
4. Analyze and compare how genre fiction challenges or supports hegemonic national discourses.
5. Learn how speculative fiction serves as an expression of social desires.

SPAN 447. Hispanic Film
3 Credits (3)
Study of major films from Spain and Spanish-America. Restricted to: Main campus only.

SPAN 448. U.S.-Hispanic Film
3 Credits (3)
Study of major films about and/or by Hispanics of the U.S. Restricted to: Main campus only.

SPAN 449. Special Problems
1-3 Credits
Directed reading for graduate students in their specific fields to satisfy language requirement for master's or doctoral programs. May be repeated for a maximum of 6 credits.

SPAN 451. Hispanic Cultures
3 Credits (3)
Issues in Hispanic cultures of the U.S., Spanish-America and Spain. Also focuses on U.S.-Mexico border culture. Selected topics to be identified by subtitle in the Schedule of Classes.
Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will learn about various modes of Hispanic cultural production and how they create regional and national Hispanic identifies.

SPAN 461. Introduction to Spanish Phonetics
3 Credits (3)
An introduction to Spanish phonetics including basic dialectal variation and comparison with English.
Prerequisite: SPAN 340.

SPAN 474. Pragmatics
3 Credits (3)
The study of theory and pragmatic notions such as implicatures, presuppositions, deixis, speech acts, and politeness.
Prerequisite(s): SPAN 340.

SPAN 476. Semantics
3 Credits (3)
The investigation of language from a semantic-pragmatic perspective and the use of formal logic to communicate meaning.
Prerequisite(s): SPAN 340.

SPAN 483. Literature and Law
3 Credits (3)
The advanced study of Latin American and Latino literature and its historical and cultural connections to the development of laws and the influence of both on modern society.
Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of legal themes as found in literature.
5. Students will read foundational Hispanic texts of various genres and learn how they create a narrative that embodies or implies legal issues that affect the Hispanic community.

SPAN 485. Literature and Mental Health
3 Credits (3)
The advanced study of Latin American and Latino literature and how storytelling, through various literary genres, can inform our understanding of mental health issues and propose possible solutions to improve our quality of mental health.
Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of mental health themes as found in literature.
5. Students will read foundational Hispanic texts of various genres and learn how they create a narrative that embodies or implies mental health issues that affect the Hispanic community.

SPAN 490. Special Topics
3 Credits (3)
Selected topic to be identified by subtitle in the Schedule of Classes.
Prerequisite: SPAN 316 or SPAN 318 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will learn about various topics of Hispanic literature or linguistics that can be applied to advanced research projects.

SPAN 491. History of the Spanish Language
3 Credits (3)
The development of Spanish from its origins.
Prerequisite(s): SPAN 340.

SPAN 492. Structure of Spanish
3 Credits (3)
Topics in Spanish linguistics including phonology, morphology, syntax and semantics.
Prerequisite: SPAN 316 or SPAN 318 or SPAN 340.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the terms and concepts related to the structure of Spanish.
5. Students will learn about the formation of the structure of Spanish and how to apply these ideas to a greater linguistics body of knowledge.

SPAN 493. Espanol de los Estados Unidos
3 Credits (3)
Linguistic issues and studies of U.S. Spanish-speaking communities. Taught with SPAN 593. May be repeated up to 3 credits.
Prerequisite(s): SPAN 340.

SPAN 500. Methods of Research and Literary Criticism
3 Credits (3)
Advanced methods of research and literary criticism.

SPAN 502. Sentipensar Pedagogy: Anzaldúa and Other Theorists
3 Credits (3)
The course offers an overview of the theory, research and practice concerning Sentipensar pedagogy. Through the exploration of literature and cultural representations, students will interpret the works of theorist that promote the connections between the body, mind, and heart in their academic research and curriculum. The course will also discuss contemporary issues affecting our life, work, and expressions. The study of Gloria Anzaldúa's Coatlicue state, linguistic terrorism, Nepantla and Consciencia Mestiza, are only some of the approaches to academia that will be discussed in this course. We will also have a closer look at the work done by writers, poets, and artists who share a locus of enunciation. Most importantly, this course helps situating the individual experiences in relationship and connection to others in the world. This course focuses on strategies and techniques in curriculum development appropriate for teaching students at different levels. The materials and resources for the class are mostly written in English because the field research is done in this language. However, all work turned in for this class (discussions, quizzes, homework, presentations, etc.) must be written and developed in Spanish.
Learning Outcomes
1. Become familiar with the main theoretical and pedagogical aspects of Sentipensar pedagogy.
2. Reflect and explore on the diversity in the approaches and methodologies in Sentipensar pedagogy.
3. Observe the uniqueness in the field as compared to others.
4. Critically examine current research areas involving the interdisciplinary field.
5. Explore innovative theoretical research in history, politics and culture.

SPAN 503. Critical Language Awareness in Teaching SHL
3 Credits (3)
This course is designed to introduce students to the theory, research, and practice of Critical Language Awareness. Students will read about the theoretical framework established when teaching heritage language learners. The study of Critical Language Awareness will allow educators to take a closer look at their own sociocultural concerns and influences in their education. Most importantly, this course will help us understand how our individual experiences connect in relationship to other heritage and native language users in the world. The materials and resources for the class are mostly written in English because the field research is done in this language. However, all work turned in for this class (discussions, quizzes, homework, presentations, etc.) must be written and developed in Spanish.
Learning Outcomes
1. Become familiar with the main theoretical and pedagogical aspects of Critical Language Awareness.
2. Reflect on the diversity in the writings of scholars in the field.
3. Observe the uniqueness of Critical Language Awareness in heritage language pedagogy.
4. Critically examine current research areas involving the interdisciplinary field.
5. Explore innovative theoretical research in history, politics, and cultural topics.

SPAN 504. Culturally Sensitive Teaching in SHL: Teaching Spanish as a Heritage Language in the United States
3 Credits (3)
This course focuses on presenting the theories, strategies and techniques in curriculum development appropriate for teaching Spanish for Native Speakers (SNS/EHN) and Heritage Language Speakers (HLS/EHH) in a culturally and linguistically sensitive environment. Students will conduct classroom observations and prepare presentations on aspects of CLR and SHL instruction in addition to preparing a research project to illustrate all their preparation towards creating a more sensitive and responsive curriculum.
Learning Outcomes
1. Become familiar with the main theoretical and pedagogical aspects of culturally and linguistically responsive teaching of SHL.
2. Reflect on the linguistic diversity of SHL speakers.
3. Observe the uniqueness in the use of SHL as compared to the Spanish in other parts of the world.
4. Critically examine current research areas involving U.S. Spanish, family and community settings, policies, programs and curriculum.
5. Explore innovative techniques, materials and activities in culturally and linguistically responsive SHL instruction.
6. Design new evaluation practices in all four skills.

SPAN 507. Technology Enhanced Language Learning
3 Credits (3)
Strategies for enhancing language learning with emerging technologies. Course is taught in Spanish.

SPAN 508. Teaching Literature with Technology
3 Credits (3)
Strategies and techniques for enhancing the teaching of all literature genres using emerging technologies. Course is taught in Spanish. Co/

Prerequisite(s): SPAN 507, and/or consent of instructor.

SPAN 509. Teaching Culture with Technology
3 Credits (3)
Strategies and techniques for enhancing the teaching of culture using emerging technologies. Course is taught in Spanish. Co/
Prerequisite(s): SPAN 507, and/or consent of instructor.

SPAN 510. Assessing the National Standards
3 Credits (3)
Analysis of the National Standards for Foreign Language Learning (the 5 Cs) in the 21st Century. Course will also cover the Integrated Performance Assessment as applied to the national standards. Other assessments will be reviewed to evaluate effectiveness in all levels of Spanish language classrooms.

SPAN 512. Contemporary Spanish-American Poetry
3 Credits (3)
Readings and interpretation of Spanish-American poetry from the 20th century to the present.

SPAN 514. Coyolxauhqui: La literatura chicana femenil
3 Credits (3)
This course is designed to introduce students to Chicano Studies through the exploration of literature and cultural representations. Students will examine the history of Chican@s and discuss contemporary issues affecting their life, work, and expressions. The study of cultural representations such as Coyolxauhqui, La Malinche, La Virgen de Guadalupe, La Llorona, La Maqui-Loca, and La Chican@ Queer through a feminist perspective will allow a closer look at the work done by Chicana writers, poets, and artists who share a locus of enunciation. Most importantly, this course helps situating the individual experiences in relationship and connection to other Chican@s in the world.
Learning Outcomes
1. Become familiar with the main theoretical and pedagogical aspects of Chican@ Studies through a feminist perspective.
2. Reflect on the diversity of Chican@ scholars.
3. Observe the uniqueness in Chican@ Studies as compared to other fields.
4. Critically examine current research areas involving the interdisciplinary field.
5. Explore innovative theoretical research in history, politics and cultural topics.

SPAN 520. Adv. The Art of Storytelling
3 Credits (3)
The study of the genesis of storytelling and its structure, learning how and why to apply oral storytelling in our personal and professional lives, and practicing the art of storytelling in front of an audience.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the terms and concepts of storytelling and the significance of this skill in creating personal and national narratives.
5. Students will learn how to write and present original oral stories, myths, and other forms of oral storytelling for a public audience.

SPAN 521. Advanced Culture and Literature of New Mexico
3 Credits (3)
The advanced study of the development and flourishing of New Mexican culture and literature.

SPAN 522. Adv. Cultural Production of Hispanic Revolutions and Wars
3 Credits (3)
The study of Hispanic literature, art, and film dealing with revolutionary movements and wars.
Learning Outcomes
1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community.
2. Students will improve their critical thinking skills through deep-level readings and engaged dialogue.
3. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects.
4. Students will develop comprehension of the basic terms and concepts of revolutions and wars as they relate to literary production and other modes of cultural expression.
5. Students will learn about various revolutions and wars throughout Spain and Latin America and how they have helped form regional and national identities, especially through a cultural production lens

SPAN 523. Colonial Legacy: Representations in Chican@ Literature & Culture
3 Credits (3)
The course offers an overview of the research surrounding the legacy of colonial practices. Presents key concepts in colonial studies (colonialism, colonies, colonization, enclosures, exploitation, settlements), along with the ideologies of colonialism, to build the theoretical framework that will help analyze our colonial legacy through the exploration of Chican@ literature and cultural representations of writers, poets, and artists. Students will reflect on their own colonial/postcolonial ideologies and practices. The course helps situate the individual experiences in relationship and connection to others in the world.
Learning Outcomes
1. Become familiar with the main theoretical and pedagogical aspects of colonial studies.
2. Reflect, observe and explore the colonial practices and approaches.
3. Critically examine current research areas involving the interdisciplinary field.
4. Explore innovative theoretical research in history, politics, literature and culture.

SPAN 528. Advanced U.S. Latino Culture and Literature
3 Credits (3)
The advanced study of major works by Latino writers in the U.S.

SPAN 540. Introduccion a la Linguistica
3 Credits (3)
Introduces students to the foundational topics of linguistic study with particular reference given to the Spanish language: properties of language and communication, morphology, syntax, phonetics, phonology, language variation and change.
Prerequisite(s): Eligibility to take graduate level courses.

SPAN 542. Adv. Formation of Hispanic National Identities
3 Credits (3)

Study of seminal texts on the formation of Hispanic national identities and counternarratives against homogenous notions of nationhood.

Learning Outcomes

1. Improve critical thinking skills through deep-level readings and class discussions.
2. Strengthen academic research and writing skills through high-level research and writing projects.
3. Understand how Hispanic identities were formed through various narrative practices and how that informs media representations of Hispanic people and culture.
4. Analyze how Hispanic identities were formed and with what motivations.
5. Assess national narratives and counter-narratives to understand their political-social worlds better.

SPAN 544. Adv. Body Studies
3 Credits (3)
Interdisciplinary study of the body in Hispanic societies and others and its associated political meaning.

Learning Outcomes

1. Improve critical thinking skills through deep-level readings and class discussions.
2. Strengthen academic research and writing skills through high-level research and writing projects.
3. Understand how the Hispanic body became a cultural and political object and how it is changing by the means of new media.
4. Analyze how the understanding of the Hispanic body has changed throughout history and how local politics affect it.
5. Learn how the body has served as the locus of culture and the principle of social interaction and politics.

SPAN 545. Advanced Dialectos del Espanol
3 Credits (3)
Advanced research of Spanish dialects including their formal characteristics, historical formation and regional variation.

SPAN 546. Adv. Speculative Fiction
3 Credits (3)
Study of Hispanic speculative fiction and its related utopian/dystopian societies.

Learning Outcomes

1. Improve critical thinking skills through deep-level readings and class discussions.
2. Strengthen academic research and writing skills through high-level research and writing projects.
3. Understand how social anxieties produced a Hispanic literary corpus to deal with the past, the present, and the future.
4. Analyze and compare how genre fiction challenges or supports hegemonic national discourses.
5. Learn how speculative fiction serves as an expression of social desires.

SPAN 547. Advanced Hispanic Film
3 Credits (3)
Advanced study of major films from Spain and Spanish-America.
Restricted to: Main campus only.

SPAN 548. Advanced U.S.-Hispanic Film
3 Credits (3)
Advanced study of major films about and/or by Hispanics of the U.S.
Restricted to: Main campus only.

SPAN 550. Advanced Chicana and Chicano Studies
3 Credits (3)
Multidisciplinary examination of issues that have historically affected/influenced the Chicana/o community regionally, in the borderlands, and beyond borders.

Learning Outcomes

1. Students will become better equipped to teach this material at the high school or community college levels.
2. Students will become better equipped to attend a PhD program in a related field.
3. Students will gain access to a more diverse curriculum which broaden their educational and cultural perspectives.
4. Students will be able to develop their scholarship on a more creative level.
5. Students will strengthen their academic writing, which will help in their graduate studies and/or post-graduate careers.

SPAN 551. Advanced Hispanic Cultures
3 Credits (3)
Advanced study on Hispanic cultures of the U.S., Spanish-America and/or Spain. Selected topic to be identified by subtitle. Taught with SPAN 451. May be repeated up to 6 credits.

SPAN 558. Bilinguismo
3 Credits (3)
Examines the topics of bilingualism from a psycholinguistic perspective including the development of the bilingual brain, lexical acquisition, retrieval and storage, and experimental techniques in measuring language competence.
Prerequisite(s): SPAN 540 or consent of instructor.

SPAN 561. Advanced Spanish Phonetics
3 Credits (3)
Advanced study of Spanish phonetics, including basic dialectal variation and comparisons with English.

SPAN 562. Advanced Spanish Phonology
3 Credits (3)
An advanced formal examination of the sound system of Spanish including formal characterizations, dialectal variation and laboratory data. May be repeated up to 3 credits.
Prerequisite(s): SPAN 561 or consent of instructor.

SPAN 563. Advanced Study in Mexican Literature
3 Credits (3)
Mexican literature from the Pre-Columbian period to the present.

SPAN 564. Advanced Post-Modern Hispanic Literature
3 Credits (3)
The advanced study of Post-Modern experimental literary genres, from Post-boom to the present.

SPAN 566. Contemporary Spanish-American Novel
3 Credits (3)
The Spanish-American novel from the 20th century to the present.

SPAN 567. Advanced Study in Chicano Literature
3 Credits (3)
Study of all genres of Chicano literature.

SPAN 570. Advanced Study in Technical Translation
3 Credits (3)
Translation of a variety of non-literary texts from English to Spanish and from Spanish to English. Course is taught in Spanish.

SPAN 573. Advanced Study in Creative Writing
3 Credits (3)

Advanced creative writing in Spanish.

SPAN 574. Advanced Pragmatics
3 Credits (3)
The study of theory and pragmatic notions such as implicatures, presuppositions, deixis, speech acts, and politeness.
Prerequisite(s): SPAN 540 or consent of instructor.

SPAN 576. Advanced Semantics
3 Credits (3)
The investigation of language from a semantic-pragmatic perspective and the use of formal logic to communicate meaning.
Prerequisite(s): SPAN 540 or consent of instructor.

SPAN 580. Research Methodology in Spanish Linguistics
3 Credits (3)
Study and practical application of techniques in linguistic research.

SPAN 583. Advanced Study in Spanish-American Women Writers
3 Credits (3)
All genres of Spanish-American literature written by women. Research paper required.

SPAN 584. Spanish Morphosyntax
3 Credits (3)
Examination of the morphological and syntactic structure of the Spanish language as well as their interaction. Practical applications are also explored.

SPAN 586. Contemporary Spanish-American Essay
3 Credits (3)
Main currents in the Spanish-American thought from the 20th century to the present.

SPAN 587. Contemporary Spanish-American Short Story
3 Credits (3)
The Spanish-American short story from the 20th century to the present.

SPAN 588. Contemporary Spanish-American Drama
3 Credits (3)
The Spanish-American drama from the 20th century to the present.

SPAN 589. Spanish Sociolinguistics
3 Credits (3)
Relationship between language and society in the Spanish-speaking world.

SPAN 590. Advanced Special Topics
3 Credits (3)
Specific subject to be announced in the Schedule of Classes. May be repeated up to 6 credits.

SPAN 591. Advanced Study in History of the Spanish Language
3 Credits (3)
The development of Spanish from its origins.

SPAN 592. Advanced Structure of Spanish
3 Credits (3)
Advanced study of Spanish linguistics topics such as phonology, morphology, syntax and semantics.

SPAN 594. Theory and Methodology of Spanish Pedagogy
3 Credits (3)
Advanced studies in current theories and methodologies of Spanish language pedagogy. Taught as a practicum.

SPAN 595. Advanced Topics in Applied Spanish Linguistics
3 Credits (3)
Selected topics to be identified by subtitle in the Schedule of Classes. May be repeated for a total of 9 credits under a different subtitle.

SPAN 597. Advanced Strategies for Teaching Spanish for Heritage/Native Speakers
3 Credits (3)
Advanced overview of the main theories, research, pedagogical approaches, assessment and practice concerning the teaching of Spanish to heritage learners and native speakers.

SPAN 598. Independent Reading, Research, and/or Creative Writing
1-3 Credits
Individual study of selected readings and problems; or individual research, either analytical or experimental, or creative writing.

SPAN 599. Master's Thesis
15 Credits
Thesis.

SPED-SPECIAL EDUCATION

SPED 2996. Topics
3 Credits (3)
Offered under various subtitles that indicate the subject matter to be covered. May be repeated up to 9 credits.
Learning Outcomes
1. Varies

SPED 3105. Introduction to Special Education in a Diverse Society
3 Credits (3)
Characteristics, identification, and educational needs of exceptional learners. Attention is given to the various types of programs serving exceptional learners. Designed for all professional personnel who work with exceptional learners. May be repeated up to 3 credits.
Learning Outcomes
1. Discuss historical and current legislation pertaining to exceptional learners and their families and its impact on professional practice in the field.
2. Discuss historical and current legislation pertaining to exceptional learners and their families and its impact on professional practice in the field.
3. Explain the major components of an IEP and its processes, as well as the roles of learners, families and professionals on the team.
4. Discuss the different service delivery models and discuss the principles, practices, and pragmatics of inclusion co-teaching.
5. Analyze the disability categories under (IDEA, 2004), (characteristics, etiology, and diagnostic criteria).
6. Examine educational considerations for exceptional learners (educational approaches [Universal design and differentiated instruction], assistive technology, accommodations/modifications, and related supports and services).
7. Employ culturally responsive evidence-based practices to create family/school/community partnerships to promote academic achievement and prepare students for their post-school transitions.
8. Evaluate and synthesize research literature on a selected topic from current special education research.

SPED 3110. Bilingual/Multicultural Special Education
3 Credits (3)
Introduction to issues related to the provision of services to culturally and linguistically diverse students with exceptionalities.

Learning Outcomes

1. Students will identify implicit and explicit biases.
2. Students will discuss the cultural characteristics of families from culturally and linguistically diverse backgrounds and the barriers of parent engagement in their child's education.
3. Students will identify how privilege, power, and inequities exist in the school system and how it impacts the academic achievement of students from culturally linguistically diverse (CLD) backgrounds.
4. Students will identify culturally relevant strategies to employ in the classroom to meet the individual learner needs of students from culturally and linguistically diverse backgrounds.
5. Students will develop a lesson plan that embeds culturally responsive pedagogy that addresses the individual needs of students from culturally and linguistically diverse backgrounds.

SPED 3120. Elementary Curriculum, Methods, and Materials for Special Education in a Diverse Society
3 Credits (3)

Curriculum theory and development for special education programs. Various teaching methods utilized with elementary exceptional learners and techniques involved in identifying, adapting, and developing materials will be addressed.

Corequisite: EDUC 4310, EDUC 4320, READ 4310.

Learning Outcomes

1. Evaluate historical and current legislation pertaining to exceptional learners and their families and its impact on professional practice in the field.
2. Describe the RTI process and its role in determining eligibility for special education services.
3. Discuss learner diversity (ability, exceptionality, developmental level, learning style, language, gender, ethnicity, etc.) and employ individualized evidence-based culturally responsive instructional practices that build on learners' strengths and interests.
4. Create safe, inclusive, culturally responsive learning environments to engage learners with exceptionalities in meaningful learning activities and social interactions that develop communication, emotional well-being, positive social interactions, and self-determination.
5. Apply classroom management techniques that support learners and focus, on routines, procedures, rules, and positive behavior supports to address behavior.
6. Apply culturally responsive instructional practices to individualize learning for learners with exceptionalities; taking into consideration individual abilities, interests, learning environments, and cultural and linguistic factors in the planning, selection, development, and adaptation of learning experiences for learners with exceptionalities.
7. Design differentiated lesson plans that employ the tenets of universal design.

SPED 4110. Low Incidence Disabilities in a Diverse Society
3 Credits (3)

Examines those disabilities that occur less frequently in the special education population, including hearing loss, visual disorders, autism, and other severe manifestations.

Learning Outcomes

1. Analyze Low Incidence Disabilities (characteristics, etiology, and diagnostic criteria) (IDEIA, 2004).
2. Identify the types of related supports and services—assistive technology, environmental and Instructional accommodations/ modifications, and related services—available to students with low incidence disabilities to maximize participation in inclusive settings.
3. Apply culturally responsive instructional practices to individualize learning for learners with low incidence disabilities, taking into consideration individual abilities, interests, learning environments, and cultural and linguistic factors in the planning, selection, development, and adaptation of learning experiences of learners with low incidence disabilities in inclusive environment.
4. Employ culturally responsive strategies for creating effective family, school, community partnerships.
5. Discuss culturally responsive strategies that promote collaboration between families, schools, and community agencies/organizations during the student's transition planning process.
6. Identify current educational issues impacting students with low incidence disabilities.

SPED 4120. High Incidence Disabilities in a Diverse Society
3 Credits (3)

Examines those areas of disability that most frequently occur in the special education population, including intellectual disabilities, learning disabilities, communication disorders, and behavioral and emotional disorders.

Learning Outcomes

1. Describe and compare the major approaches to identifying, placement, assessing, planning for instruction, and classifying high incidence disabilities.
2. Identify and discuss school-based, sociological, cultural, and economic differences as they relate to etiology and identification of mild disabilities.
3. Describe and critically evaluate classroom instructional practices that can improve the educational success of students with high incidence disabilities.
4. Describe and critically evaluate classroom management practices that can improve the educational success of students with high incidence disabilities.
5. Describe how the educational experiences of persons with mild disabilities is shaped by their cognitive, perceptual, language, academic, and social / emotional characteristics.

SPED 4130. Reading for Elementary Exceptional Learners in a Diverse Society, K-6
3 Credits (3)

Emphasizes reading diagnosis and materials for students with special developmental and learning problems. Taught with SPED 5130. May be repeated up to 3 credits.

Learning Outcomes

1. Evaluate the sources of reading difficulty
2. Evaluate the characteristics exhibited by children with reading difficulties and reading disabilities.
3. Demonstrate how to use non-biased, culturally responsive assessments and progress monitoring data to monitor and evaluate reading performance to drive instruction.
4. Discuss the stages in literacy development and the factors that influence development of student literacy in reading, writing, speaking, viewing, and listening, including phonological, orthographic, semantic, and syntactic processing.
5. Implement research-based reading strategies and instruction to promote the development of print awareness, phonological and phonemic awareness, fluency, vocabulary, spelling, comprehension, reading, and writing for learners with reading difficulties.

6. Evaluate research-based strategies, methods, and commercial programs for different domains of reading.
7. Create a lesson plan and teach an elementary level reading lesson.

SPED 4140. Reading for Elementary Exceptional Learners in a Diverse Society, 7-12
3 Credits (3)
Extends information covered in SPED 5130, which covers grades K 6. Strategies and materials are addressed. May be repeated up to 3 credits.
Learning Outcomes
1. Demonstrate a knowledge of the major component of the reading process.
2. Increase their repertoire of reading instruction procedures which may be used with students of differing reading abilities and from diverse backgrounds at the middle and secondary levels.
3. Increase their knowledge of theory and related discipline-specific learning strategies designed to assist middle and secondary students in reading and learning through research based practices.
4. Participate in discussion of current literacy issues.
5. Explore the presentation of new teaching and learning strategies as they are related to content area literacy.

SPED 4150. Secondary Curriculum, Methods, and Materials for Special Education in a Diverse Society
3 Credits (3)
Curriculum theory and development for elementary special education programs. Various teaching methods utilized with secondary exceptional learners and techniques for identifying, adapting, and developing materials will be addressed. Taught with SPED 5150.
Learning Outcomes
1. Discuss learner diversity (ability, exceptionality, developmental level, learning style, language, gender, ethnicity).
2. Apply effective methods for planning and implementing culturally responsive secondary differentiated content area instruction for exceptional learners in inclusive settings.
3. Identify demands of learning environments of secondary exceptional learners.
4. Identify basic classroom management theories and strategies for individuals with diverse learning needs in secondary environments.
5. Employ culturally responsive evidence-based practices to create family/school/community partnerships to promote academic achievement and prepare students for their post-school transitions.

SPED 4210. Introduction to Assessment of Diverse Exceptional Learners
3 Credits (3)
Theory and use of norm and criterion-referenced instruments and learning theories in the classroom; planning of prescriptive instructional programs. May be repeated up to 3 credits.
Learning Outcomes
1. Compare and contrast the different types of assessment and their purposes.
2. Identify legislation and litigation, which has impacted assessment.
3. Explain the applications and uses of assessments results.
4. Identify widely used (common) measures of psycho-educational assessment and their appropriate application.
5. Identify a variety of techniques for obtaining information regarding students' academic functioning and learning techniques.
6. Identify techniques for assessing students' socio-emotional functioning.
7. Outline the process for identifying exceptional learners and subsequent educational planning utilizing learning theories.
8. Analyze and identify assessment strategies for specific populations (Culturally and Linguistically Diverse, Preschool, Elementary School, etc.)
9. Integrate information gathered through comprehensive assessment procedures into a whole picture of the student's areas of strength, weakness and needs.

SPED 4220. Classroom Management for Diverse Learners
3 Credits (3)
Behavior-change strategies for exceptional learners. May be repeated up to 3 credits.
Learning Outcomes
1. Plan the organization of a classroom illustrating optimum use of instructional resources (computers, books, writing materials, reference material, manipulatives, creative constructive materials, etc.) that facilitates efficiency and effectiveness of access, use, maintenance, and storage of such resources.
2. Manage student progress data electronically for visual representation of performance for individual students and whole class averages.
3. Design the organization of the physical aspects of a classroom (furniture, areas, etc) for ease of transition, use, safety and traffic flow based on effective designs presented in the literature.
4. Establish classroom procedures and expectation (rules) to promote a positive, effective and efficient learning environment.
5. Construct the organization of a classroom schedule/time management plan that includes various content areas, instructional strategies, grouping strategies, levels of energy use, etc. Within large blocks of time or for an entire day school day.
6. Demonstrate knowledge and skill of affective domain-based theoretical models for (1) setting and managing the emotional tone of a classroom, (2) managing the psycho-social atmosphere of the classroom and individual students, and (3) managing motivation of students to succeed in learning academic content, social skills, self-responsibility skills, and inter-relationship skills with other class members.
7. Analyze a given classroom situation for legal, ethical and professional issues and concerns, by applying legal, ethical, and professional reactions to the situation and provide resolutions to align the classroom legally, ethically, and professionally. This will include all legal bases (state and federal) involving all students, including students with disabilities, ESL and at-risk students.
8. Observe, analyze and document student behavior to match an appropriate intervention strategy to change behavior in a desired direction. This will also include the successful implementation of behavior management strategies for entire classes, small groups, and individual students along with development and maintenance of electronic data collection graphing and analysis.

SPED 4310. Introduction to Autism
3 Credits (3)
This course will provide an overview of autism spectrum disorders as a triad of impairments, including historical and theoretical perspectives, assessment issues, characteristics of autism, intervention programs, and family issues. Taught with SPED 5310 and SPED 6310. May be repeated up to 3 credits.
Learning Outcomes
1. Analyze Autism Spectrum Disorders ASD (characteristics, etiology, co-morbid conditions, differential diagnosis).

2. Describe the criteria used to screen and diagnose ASD.
3. Examine evidence-based practices used to effectively support students with ASD in accessing general education and grade level standards (classroom structure, differentiated instruction, peer mediated supports, structured teaching, and emotional supports).
4. Describe strategies related to promoting a successful transition from school to adult life for individuals with ASD.
5. Examine the strategies for effective collaboration and communication with families of children with ASD and key stakeholders for the purpose of information sharing and collaborative planning with families.
6. Identify and investigate current educational issues impacting students with ASD.

SPED 4320. Behavior and Autism
3 Credits (3)
This course will cover the first of the triad of impairments. Students will gain an understanding of the behaviors of children with autism. Students will examine several behavior management philosophies and research based interventions and how they can be applied in the educational setting. Attention will also be given to play skills. The family perspective and participation in the proactive behavior management process will be incorporated throughout the course. Taught with SPED 532 with differentiated assignments. May be repeated up to 3 credits.
Prerequisite/Corequisite: SPED 4310 or SPED 5310 or SPED 6310.
Learning Outcomes
1. Explain the definition of Autism Spectrum Disorder (ASD) and associated characteristics of students with ASD as measured by required readings, discussions, and article reviews.
2. Explain behavior impairments and characteristics associated with students with ASD as measured by required readings, discussions, and article reviews
3. Explain Applied Behavior Analysis strategies as measured by completion of required paper(s) summarizing peer-reviewed journal article related to diversity, behavior management interventions, and/or behavior analysis.
4. Explain information related to individuals with ASD and behavior challenges as measured by participation in online chat with instructor or group power point presentation.
5. Discuss evidence-based treatment approaches that are useful in improving behavior management skills of students with ASD as measured by participation in required readings and discussions

SPED 4330. Social Skills and Autism
3 Credits (3)
This course will cover the second of the triad of impairments. As a blend of researched based models and evidenced based practical applications, students will gain an understanding of the social skill deficits often associated with autism spectrum disorders. Review a variety of social cognition theories and explore effective social skill interventions for children functioning at a variety of levels along the autism spectrum. Taught with SPED 5330 and SPED 6330 with differentiated assignments. May be repeated up to 3 credits.
Prerequisite/Corequisite: SPED 4310 or SPED 5310 or SPED 6310.
Learning Outcomes
1. Analyze Autism Spectrum Disorders ASD (definition, characteristics, etiology).
2. Evaluate Social Skills characteristics and difficulties often associated with ASD.
3. Appraise current tools and strategies used to assess Social Skills problems in children with ASD.
4. Use assessment results to identify the Social Skills needs of children with ASD
5. Analyze the types of evidence-based practices used to address the Social Skills needs of children with ASD.
6. Design an intervention plan to address the Social Skills needs of a child with ASD.
7. Incorporate family preferences and values into the educational process of students with ASD.
8. Employ data collection procedures to evaluate the effectiveness of evidence-based practices for students with ASD.

SPED 4340. Communication and Autism
3 Credits (3)
This course will cover the third of the triad of impairments. Students will gain an overview of communication characteristics and difficulties often associated with autism spectrum disorders. Review current tools and strategies used to assess speech, language, and interaction skills. Use assessment results to identify needs and implement appropriate interventions. Explore a variety of intervention strategies aimed at building receptive, expressive, and pragmatic language of children functioning at a variety of levels along the autism spectrum. Taught with SPED 5340 and SPED 640 with differentiated assignments. May be repeated up to 3 credits.
Prerequisite: SPED 4310 or SPED 5310 or SPED 6310.
Learning Outcomes
1. Analyze Autism Spectrum Disorders ASD (definition, characteristics, etiology).
2. Evaluate communication characteristics and difficulties often associated with ASD.
3. Appraise current tools and strategies used to assess communication problems in children with ASD.
4. Analyze the types of interventions used to address the communication needs of children with ASD.
5. Design an intervention plan to address the communication needs of a child with ASD.
6. Employ data collection procedures to evaluate the effectiveness of research-based interventions for students with ASD.
7. Incorporate family preferences and values into the educational process of students with ASD.

SPED 4810. Early Childhood SPED Student Teaching
9 Credits (9P)
Synthesis of knowledge and skills appropriate to teaching in PreK - 3rd grade educational settings. Restricted to: TEP-ECED majors. Grading (S/U, Audit). Students must be Admitted into student teaching.
Corequisite: ECED 4810.
Learning Outcomes
1. Varies.

SPED 4811. Practicum in Education, Equity and Cultural Diversity
3 Credits (3)
This is a supervised experience in providing special education services to local preK-12 students. In the context of the public school classroom, teacher candidates are guided to apply content knowledge from the seminar meetings and from prior coursework. Restricted to: SPED majors.
Prerequisite: SPED 3105 and SPED 3120 or consent of instructor.

Learning Outcomes

1. Candidates demonstrate an understanding of the critical concepts and principles in their discipline and of the pedagogical content knowledge necessary to engage students' learning of concepts and principles in the discipline.
2. Candidates create and implement learning experiences that motivate K-8 students, establish a positive learning environment, and support K-8 students' understanding of the central concepts and principles in the content discipline.
3. Candidates design, adapt, and select a variety of valid and reliable assessments and employ analytical skills necessary to inform ongoing planning and instruction, as well as to understand, and help students understand their own, progress and growth.
4. Candidates engage students in reasoning and collaborative problem solving related authentic local, state, national, and global issues, incorporating new technologies and instructional tools appropriate to such tasks.
5. Candidates design and implement appropriate and challenging learning experiences, based on an understanding of how children learn and develop and they ensure inclusive learning environments that encourage and help all K-8 students reach their full potential across a range of learner goals.
6. Candidates work with K-8 students and families to create classroom cultures that support individual and collaborative learning and encourage positive social interaction, engagement in learning, and independence.
7. Candidates build strong relationships with students, families, colleagues, other professionals, and community members, so that all are communicating effectively and collaborating for student growth, development, and well-being.
8. Candidates reflect on their personal biases and access resources that deepen their own understanding of cultural, ethnic, gender, sexual orientation, language, and learning differences to build stronger relationships and to adapt practice to meet the needs of each learner.
9. Candidates use research and evidence to continually evaluate and improve their practice, particularly the effects of their choices and actions on others, and they adapt their teaching to meet the needs of each learner.

SPED 4820. Student Teaching SPED
9 Credits (9)

Supervised teaching in a special education classroom and participation in a required seminar. Students must be admitted to student teaching program in order to enroll. Restricted to: SPED majors.

Prerequisite: SPED 4811.

Learning Outcomes

1. The teacher candidate understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.
2. The teacher candidate uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.
3. The teacher candidate works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.

SPED 4830. Special Education/Elementary Student Teaching Seminar
3 Credits (3)

Discussion of elementary Special Education school issues related to student teaching.

Prerequisite: SPED 4811.

Corequisite: SPED 4820.

Learning Outcomes

1. The teacher candidate understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.
2. The teacher candidate uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.
3. The teacher candidate works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.
4. The teacher candidate understands the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make these aspects of the discipline accessible and meaningful for learners to assure mastery of the content.
5. The teacher candidate understands how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.
6. The teacher candidate understands and uses multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher's and learner's decision making.
7. The teacher candidate plans instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.
8. The teacher candidate understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.
9. The teacher candidate engages in ongoing professional learning and uses evidence to continually evaluate his/her practice, particularly the effects of his/her choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner. 1
10. The teacher candidate seeks appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.

SPED 4840. Special Education/ Secondary Student Teaching Seminar
3 Credits (3)

Discussion of secondary school issues related to student teaching.

Prerequisite: SPED 4821.

Corequisite: SPED 4820.

Learning Outcomes

1. The teacher candidate understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social,

emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.
2. The teacher candidate uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.
3. The teacher candidate works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.
4. The teacher candidate understands the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make these aspects of the discipline accessible and meaningful for learners to assure mastery of the content.
5. The teacher candidate understands how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.
6. The teacher candidate understands and uses multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher's and learner's decision making.
7. The teacher candidate plans instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.
8. The teacher candidate understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.
9. The teacher candidate engages in ongoing professional learning and uses evidence to continually evaluate his/her practice, particularly the effects of his/her choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner. 1
10. The teacher candidate seeks appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.

SPED 4992. Directed Study courses in Special Education
1-3 Credits (1-3)
Each course shall be identified by a qualifying subtitle. A maximum of 3 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits.
Learning Outcomes
1. Varies

SPED 4996. Topics
3 Credits (3)
Offered under various subtitles which indicate the subject matter to be covered. May be repeated up to 9 credits.
Learning Outcomes
1. Varies

SPED 5105. Introduction to Special Education in a Diverse Society
3 Credits (3)
This course introduces the field of special education to regular educators. May be repeated up to 3 credits.
Learning Outcomes
1. Discuss historical and current legislation pertaining to exceptional learners and their families and its impact on professional practice in the field.
2. Discuss historical and current legislation pertaining to exceptional learners and their families and its impact on professional practice in the field.
3. Explain the major components of an IEP and its processes, as well as the roles of learners, families and professionals on the team.
4. Discuss the different service delivery models and discuss the principles, practices, and pragmatics of inclusion co-teaching.
5. Analyze the disability categories under (IDEA, 2004), (characteristics, etiology, and diagnostic criteria).
6. Examine educational considerations for exceptional learners (educational approaches [Universal design and differentiated instruction], assistive technology, accommodations/modifications, and related supports and services).
7. Employ culturally responsive evidence-based practices to create family/school/community partnerships to promote academic achievement and prepare students for their post-school transitions.
8. Evaluate and synthesize research literature on a selected topic from current special education research.

SPED 5110. Low Incidence Disabilities in a Diverse Society
3 Credits (3)
Examines those disabilities that occur less frequently in the special education population, including hearing loss, visual disorders, autism, and other severe manifestations. Taught with SPED 6110 with differentiated assignments. May be repeated up to 3 credits.
Learning Outcomes
1. Analyze Low Incidence Disabilities (characteristics, etiology, and diagnostic criteria) (IDEIA, 2004).
2. Identify the types of related supports and services—assistive technology, environmental and Instructional accommodations/modifications, and related services—available to students with low incidence disabilities to maximize participation in inclusive settings.
3. Apply culturally responsive instructional practices to individualize learning for learners with low incidence disabilities, taking into consideration individual abilities, interests, learning environments, and cultural and linguistic factors in the planning, selection, development, and adaptation of learning experiences of learners with low incidence disabilities in inclusive environment.
4. Employ culturally responsive strategies for creating effective family, school, community partnerships.
5. Discuss culturally responsive strategies that promote collaboration between families, schools, and community agencies/organizations during the student's transition planning process.
6. Identify current educational issues impacting students with low incidence disabilities.

SPED 5120. High Incidence Disabilities in a Diverse Society
3 Credits (3)
Examines those areas of disability that most frequently occur in the special education population, including intellectual disabilities, learning disabilities, communication disorders, and behavioral and emotional disorders. May be repeated up to 3 credits.
Learning Outcomes
1. Describe and compare the major approaches to identifying, placement, assessing, planning for instruction, and classifying high incidence disabilities.

2. Identify and discuss school-based, sociological, cultural, and economic differences as they relate to etiology and identification of mild disabilities.
3. Describe and critically evaluate classroom instructional practices that can improve the educational success of students with high incidence disabilities.
4. Describe and critically evaluate classroom management practices that can improve the educational success of students with high incidence disabilities.
5. Describe how the educational experiences of persons with mild disabilities is shaped by their cognitive, perceptual, language, academic, and social / emotional characteristics.

SPED 5130. Reading for Elementary Exceptional Learners in a Diverse Society, K-6
3 Credits (3)
Emphasizes reading diagnosis and materials for students with special developmental and learning problems. Taught with SPED 4130. May be repeated up to 3 credits.

Learning Outcomes

1. Evaluate the sources of reading difficulty
2. Evaluate the characteristics exhibited by children with reading difficulties and reading disabilities.
3. Demonstrate how to use non-biased, culturally responsive assessments and progress monitoring data to monitor and evaluate reading performance to drive instruction.
4. Discuss the stages in literacy development and the factors that influence development of student literacy in reading, writing, speaking, viewing, and listening, including phonological, orthographic, semantic, and syntactic processing.
5. Implement research-based reading strategies and instruction to promote the development of print awareness, phonological and phonemic awareness, fluency, vocabulary, spelling, comprehension, reading, and writing for learners with reading difficulties.
6. Evaluate research-based strategies, methods, and commercial programs for different domains of reading.
7. Create a lesson plan and teach an elementary level reading lesson.

SPED 5140. Reading for Secondary Exceptional Learners in a Diverse Society, 7-12
3 Credits (3)
Extends information covered in SPED 5130, which covers grades K 6. Strategies and materials are addressed. Taught with SPED 4140. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate a knowledge of the major component of the reading process.
2. Increase their repertoire of reading instruction procedures which may be used with students of differing reading abilities and from diverse backgrounds at the middle and secondary levels.
3. Increase their knowledge of theory and related discipline-specific learning strategies designed to assist middle and secondary students in reading and learning through research based practices.
4. Participate in discussion of current literacy issues.
5. Explore the presentation of new teaching and learning strategies as they are related to content area literacy.

SPED 5150. Curriculum, Methods, and Materials for Secondary Special Education
3 Credits (3)
Curriculum theory and development for elementary special education programs. Various teaching methods utilized with secondary exceptional learners and techniques for identifying, adapting, and developing materials will be addressed. May be repeated up to 3 credits.

SPED 5160. Technology and Exceptionality in a Diverse Society
3 Credits (3)
This class will address the unique educational needs of learners with exceptionalities, and will provide information and practice in addressing those needs through the use of technology-based interventions. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate familiarity in variety of assistive technology devices and services that are abailable for students with diverse range of disabilities
2. Demonstrate an understanding of functional approaches to the assessment of assistive technology needs.
3. Describe and implement inter disciplinary approaches to the assessment, selection and the use of technolgy to meet the educational and transitional demands of individuals with diverse range of disabilities.
4. Identify and describe the function of the range of assistive technology devices and services in diverse settings.
5. Demonstrate an understanding of the legal obligations of different entities in providing training and services that are relevant to assistive technologies.

SPED 5210. Introduction to Assessment of Diverse Exceptional Learners
3 Credits (3)
Required for students seeking licensure at graduate level. Theory and use of norm-and criterion-referenced instruments and learning theories in the classroom; planning of prescriptive instructional programs with differentiated assignments for graduate students. Restricted to: SPED majors.

SPED 5220. Classroom Management for Diverse Learners
3 Credits (3)
Behavior-change strategies for exceptional learners. Taught with SPED 4220 with differentiated assignments for graduate students. May be repeated up to 3 credits.

SPED 5230. Advanced Curriculum for Diverse Exceptional Learners
3 Credits (3)
Strategies for developing curricula appropriate to handicapped and gifted learners. May be repeated up to 3 credits.

Learning Outcomes

1. Evaluate historical and current legislation pertaining to exceptional learners and their families and its impact on professional practice in the field.
2. Describe the RTI process and its role in determining eligibility for special education services.
3. Discuss learner diversity (ability, exceptionality, developmental level, learning style, language, gender, ethnicity, etc.) and employ individualized evidence-based culturally responsive instructional practices that build on learners' strengths and interests.
4. Create safe, inclusive, culturally responsive learning environments to engage learners with exceptionalities in meaningful learning activities and social interactions that develop communication, emotional well-being, positive social interactions, and self-determination.
5. Apply classroom management techniques that support learners and focus, on routines, procedures, rules, and positive behavior supports to address behavior.

6. Apply culturally responsive instructional practices to individualize learning for learners with exceptionalities; taking into consideration individual abilities, interests, learning environments, and cultural and linguistic factors in the planning, selection, development, and adaptation of learning experiences for learners with exceptionalities.
7. Design differentiated lesson plans that employ the tenets of universal design.

SPED 5310. Introduction to Autism
3 Credits (3)
This course will provide an overview of autism spectrum disorders as a triad of impairments, including historical and theoretical perspectives, assessment issues, characteristics of autism, intervention programs, and family issues. Taught with SPED 4310 and SPED 6310. Differentiated Assignments. May be repeated up to 3 credits.
Learning Outcomes
1. Analyze Autism Spectrum Disorders ASD (characteristics, etiology, co-morbid conditions, differential diagnosis).
2. Describe the criteria used to screen and diagnose ASD.
3. Examine evidence-based practices used to effectively support students with ASD in accessing general education and grade level standards (classroom structure, differentiated instruction, peer mediated supports, structured teaching, and emotional supports).
4. Describe strategies related to promoting a successful transition from school to adult life for individuals with ASD.
5. Examine the strategies for effective collaboration and communication with families of children with ASD and key stakeholders for the purpose of information sharing and collaborative planning with families.
6. Identify and investigate current educational issues impacting students with ASD.

SPED 5320. Behavior and Autism
3 Credits (3)
This course will cover the first of the triad of impairments. Students will gain an understanding of the behaviors of children with autism. Students will examine several behavior management philosophies and research based interventions and how they can be applied in the educational setting. Attention will also be given to play skills. The family perspective and participation in the proactive behavior management process will be incorporated throughout the course. Taught with SPED 4320 and SPED 6320 with differentitated assignments. May be repeated up to 3 credits.
Prerequisite: SPED 4310 or SPED 5310 or SPED 6310.
Learning Outcomes
1. Explain the definition of Autism Spectrum Disorder (ASD) and associated characteristics of students with ASD as measured by required readings, discussions, and article reviews.
2. Explain behavior impairments and characteristics associated with students with ASD as measured by required readings, discussions, and article reviews
3. Explain Applied Behavior Analysis strategies as measured by completion of required paper(s) summarizing peer-reviewed journal article related to diversity, behavior management interventions, and/or behavior analysis.
4. Explain information related to individuals with ASD and behavior challenges as measured by participation in online chat with instructor or group power point presentation.
5. Discuss evidence-based treatment approaches that are useful in improving behavior management skills of students with ASD as measured by participation in required readings and discussions

SPED 5330. Social Skills and Autism
3 Credits (3)
This course will cover the second of the triad of impairments. As a blend of researched based models and evidenced based practical applications, students will gain an understanding of the social skill deficits often associated with autism spectrum disorders. Review a variety of social cognition theories and explore effective social skill interventions for children functioning at a variety of levels along the autism spectrum. Taught with SPED 4330 and SPED 6330 with differentiated assignments. May be repeated up to 3 credits.
Prerequisite: SPED 4310 or SPED 5310 or SPED 6310.
Learning Outcomes
1. Understand and explore the foundations of TESOL instruction.
2. Analyze the sociocultural theory of teaching English as a second/foreign language.
3. Demonstrate an understanding of culturally responsive pedagogy in language teaching and academic achievement.
4. Evaluate principles of best practices instruction and applications of TESOL methods.
5. Explore assessment issues and concepts related to English Language Learners.
6. Examine the impact of polices, national laws, school and community partnerships, and personal professional development on TESOL instruction.
7. Develop, select, and implement second language teaching methods.

SPED 5340. Communication and Autism
3 Credits (3)
This course will cover the third of the triad of impairments. Students will gain an overview of communication characteristics and difficulties often associated with autism spectrum disorders. Review current tools and strategies used to assess speech, language, and interaction skills. Use assessment results to identify needs and implement appropriate interventions. Explore a variety of intervention strategies aimed at building receptive, expressive, and pragmatic language of children functioning at a variety of levels along the autism spectrum. Taught with SPED 4340 and SPED 6340 with differentiated assignments. May be repeated up to 3 credits.
Prerequisite: SPED 4310 or SPED 5310 or SPED 6310.
Learning Outcomes
1. Analyze Autism Spectrum Disorders ASD (definition, characteristics, etiology).
2. Evaluate communication characteristics and difficulties often associated with ASD.
3. Appraise current tools and strategies used to assess communication problems in children with ASD.
4. Analyze the types of interventions used to address the communication needs of children with ASD.
5. Design an intervention plan to address the communication needs of a child with ASD.
6. Employ data collection procedures to evaluate the effectiveness of research-based interventions for students with ASD.
7. Incorporate family preferences and values into the educational process of students with ASD.

SPED 5405. Foundations of Visual Impairment
3 Credits (3)
This course provides an overview of the history and theory of teaching students with visual impairments, including those with additional disabilities. The impact of educational, legislative, and societal trends on the psychosocial adjustment, quality of life, and post-school outcomes of individuals with visual impairments is explored. May be repeated up to 3 credits.

Learning Outcomes

1. Differentiate between the impact that visual impairment (both congenital and adventitious) has on a child's/youth's cognitive, language, communication, motor, social-emotional, and autonomous development.
2. Predict the impact that familial, societal, cultural, and professional attitudes have on the self-esteem/self-identity of a child/youth who has a visual impairment and propose culturally responsive strategies to combat low self-esteem/lack of self-acceptance.
3. Identify appropriate educational adaptations, including universal design for learning principles, for teaching students with visual impairments based on predominant sensory channel(s).
4. Describe the prevalence and incidence of visual impairment, educational and legal classifications, service delivery options and regulations, and the roles of educational staff.
5. Analyze how historical foundations shape current issues and trends in the education of students who are visually impaired.
6. Locate sources of specialized materials, service networks, consumer/parent organizations, and professional associations and publications.

SPED 5410. Functional Implications of Low Vision
3 Credits (3)
This course examines the structure and function of the visual system in relation to associated diseases and syndromes with an emphasis on measuring functional vision and determining appropriate educational adaptations. Consent of Instructor required. May be repeated up to 3 credits.
Prerequisite: SPED 5405.

Learning Outcomes

1. Use basic terminology to describe the structure and functions of the visual system and describe how the visual system typically develops.
2. Identify the etiology and characteristics of the most common eye conditions and their impact on the development and education of individuals who have these conditions.
3. Describe effects of medications on the visual system and on visual performance, Select, adapt, and use appropriate instruments for assessing functional vision, Follow legal, ethical, and technical procedures while conducting vision screenings or functional vision evaluations in order to determine educational services (including eligibility) and supports.
4. Interpret the results of vision screenings, eye reports, and functional vision evaluations in ways that help students, families and other members of the educational team understand the impact the visual impairment has on learning, experience, and social-emotional well-being.
5. Select individualized strategies for the enhancement of visual/sensory efficiency (including the use of environmental modifications, print material adaptations, optical aids, and non-optical aids) based on performance/assessment data

SPED 5420. Strategies for Teaching Students with Visual and Multiple Impairments
3 Credits (3)
This course defines the roles and responsibilities of the teacher of students with visual impairments as part of the transdisciplinary team that serves students with visual impairments and additional disabilities. Emphasis is on assessment, curricula (both academic and functional), communication, behavior management, assistive technologies, inclusion, transition, and independent living. Consent of Instructor required. May be repeated up to 3 credits.
Prerequisite: SPED 5410.

Learning Outcomes

1. Describe the impact that a concomitant visual impairment and additional disability has on a child's/youth's cognitive, language, communication, motor, social-emotional, autonomous, and sensory development.
2. Recommend appropriate educational and environmental adaptations, including access technologies, for students with concomitant disabilities (including a visual impairment) related to the core curriculum (especially literacy) that are based on their unique needs, which transcend the effects of each individual disability.
3. Recommend appropriate educational and environmental adaptations, including access technologies, for students with concomitant disabilities (including a visual impairment) related to the expanded core curriculum that are based on their unique needs, which transcend the effects of each individual disability.
4. Choose specialized assessment tools appropriate for learners with visual impairments and additional disabilities.
5. Summarize special considerations related to eligibility determination, educational placement, and service delivery models for students with visual impairments and additional disabilities.
6. Describe special considerations related to effective collaboration with educators, related service providers, educational assistants, community agencies, and families of students with visual impairments and additional disabilities

SPED 5430. Braille I: Literacy for Students with Visual Impairments
3 Credits (3)
This course facilitates an in depth study of the Uncontracted and Contracted Literary Braille codes as well as methods of teaching pre-braille, braille reading, and braille writing skills to tactual learners. Consent of Instructor required. May be repeated up to 3 credits.
Prerequisite: SPED 5450.

Learning Outcomes

1. Transcribe print content into Unified English Braille following appropriate formatting rules.
2. Read, interline, and proof materials transcribed in Unified English Braille.
3. Read, interline, and proof materials produced in English Braille American Edition.
4. Transcribe, print content into a foreign language using the appropriate braille code.
5. Read, interline, and proof materials produced in foreign language braille.
6. Transcribe a simple score in music braille.
7. Read and interline a simple score in music braille.
8. Produce braille materials using various tools, including a Perkins Brailler, slate and stylus, and six-key keyboard entry.

9. Delineate the ways that congenital and adventitious visual impairments impact literacy and the unique instructional strategies used with each of these groups. 1
10. Identify pre-braille activities that develop essential tactual, motor, and reading readiness skills. 1
11. Compare language arts and braille curricula/assessments for different types of tactual learners. 1
12. Identify sources for obtaining braille resources, services and supports

SPED 5440. Braille II: Numeracy for Students with Visual Impairments
3 Credits (3)
This course facilitates an indepth study of the Nemeth Braille Code for Mathematics and Science Notation as well as instructional strategies for using the abacus and developing numeracy. Specialized braile codes for computers, music, and foreign languages will be introduced. Consent of Instructor required. May be repeated up to 3 credits.
Prerequisite: SPED 5430.
Learning Outcomes
1. Transcribe mathematical and scientific notation into Nemeth Braille following appropriate rules.
2. Read, and proof materials transcribed in Nemeth Braille
3. Transcribe, print content into a foreign language using the appropriate braille code.
4. Read, interline, and proof materials produced in foreign language braille.
5. Transcribe a simple score in music braille.
6. Read and interline a simple score in music braille.
7. Produce braille materials, including tactile graphics, using various tools, including a Perkins Brailler, six-key keyboard entry, braille translation software, and tactile graphics.
8. Create different task analysis on computational steps for solving problems with the Cranmer abacus using both the counting and indirect methods for beginning abacus users and aligning them to numeracy standards.
9. Delineate the ways that visual impairment impacts literacy and numeracy and describe adapted instructional and assessment materials and resources that make math meaningfully accessible. 1
10. Delineate the ways that visual impairment impacts scientific understandings and describe adapted instructional and assessment materials and resources that make science and social studies meaningfully accessible. 1
11. Delineate the ways that visual impairment impacts understanding of health and sexuality and describe adapted instructional and assessment materials and resources that make health and sex education meaningfully accessible

SPED 5450. Strategies for Teaching Students with Visual Impairments
3 Credits (3)
This course covers individualized educational programming in both the core and expanded core curriculums for children and youth with visual impairments with an emphasis on assessment, curricular adaptions, IFSP/IEP/ITP planning, and evidence-based practices. Restricted to: SPED majors. Consent of Instructor required. May be repeated up to 3 credits.
Prerequisite: SPED 5410.
Learning Outcomes
1. The learner will analyze core curriculum standards and benchmarks in order to determine necessary instruction in the expanded core curriculum so that learners with visual impairments can meaningfully participate in the common core curriculum.
2. The learner will describe professional roles and ethical responsibilities of the teacher of students with visual impairments in relation to effective collaboration with all members of the educational team (particularly families, para educators, and general educators).
3. The learner will select, adapt, and use appropriate assessments for determining effective and efficient primary and secondary learning modalities, literacy media, and access technologies needed for reading and writing.
4. The learner will follow legal, ethical, and technical procedures while conducting learning media assessments and access technology evaluations, reporting findings, and making recommendations regarding necessary educational services and supports.
5. The learner will demonstrate the procurement and use of different access technologies needed to make educational materials and learning activities accessible to learners with visual impairments

SPED 5460. Introduction to Orientation and Mobility
3 Credits (3)
This course provides an overview of the history and theory of formalized orientation and mobility instruction as it relates to the ability to live independently. The impact of visual impairment and concomittant impairments on the development of spatial concepts and motor skills in relation to independent locomotion is emphasized. Topics covered include mobility aids; navigation, familiarization, and protective techniques; structured pre-cane assessment and instruction; the development and use of tactual maps; and the relationship of orientation and mobility to other areas of the expanded core curriculum. Consent of Instructor required. Restricted to: SPED,EDUC majors. Consent of Instructor required. May be repeated up to 3 credits.
Prerequisite: SPED 5420.
Learning Outcomes
1. Describe components of orientation and mobility, the role of the certified orientation and mobility specialist, and the role of the teacher of students with visual impairments/developmental vision specialist in teaching travel skills to students who are blind and visually impaired, including those with additional disabilities.
2. Describe significant historical events and legal provisions related to the formalized profession of orientation and mobility and how this affects the provision of orientation and mobility services.
3. Identify the pros, cons, and prerequisite skills related to different modes of mobility and use of different mobility aids and transportation systems.
4. Describe the impact of impaired vision on cognitive, motor, language, social, and self-help skills and effective interventions that promotes the development of independent locomotion and personal autonomy.
5. Execute (and teach the execution of) basic orientation and mobility techniques under conditions that simulate various degrees of visual and additional impairments using all available sensory information (with and without optical aids) in a variety of environments.
6. Task analyze and adapt activities of daily living to allow individuals with visual impairments to lead productive and healthy lifestyles.
7. Identify sources of adapted products and specialized assessments related to the Expanded Core Curriculum that facilitate participation in home, work, and community activities for employment, self-care, and leisure

SPED 5470. Beginning Orientation and Mobility
3 Credits (3)
This course provides an overview of the profession of orientation and mobility and how sensory, motor, and psychosocial function affects

movement and spatial orientation. Consent of Instructor required. Restricted to: SPED majors. May be repeated up to 3 credits.
Prerequisite: SPED 5460.

Learning Outcomes

1. Describe how perception and movement develops and is used to enhance safe and independent travel
2. Describe how a traveler is able to acquire, maintain and improve orientation
3. Describe the most common functional mobility problems for students with low vision and what a COMS should consider when providing OM instruction to students with low vision.
4. Describe how development impacts movement and describe issues that impact gait and posture. Describe ways to support and improve sensorimotor development.
5. Describe the psychosocial factors that impact behavior as one learns how to travel and describe ways to teach travelers to deal with
6. Describe the fundamentals of hearing including principles of sound, audition, localization and traffic sounds. Describe ways to develop and improve orientation using hearing
7. Describe the origins of the OM profession and its progression into the present, how OM services are provided around the world and the fundamentals of research in the profession.
8. Evaluate and synthesize literature (publications, research literature) on a selected topic of their choice

SPED 5480. Intermediate Orientation and Mobility
3 Credits (3)

This course focuses on strategies and methods for conducting assessments and appropriately sequencing skill acquisition for learners across the lifespan who may or may not have additional disabilities. Adaptive technology and other aids that assist with travel in a variety of environmental conditions using different mobility systems will also be covered. Consent of Instructor required. Restricted to: SPED majors. May be repeated up to 3 credits.
Prerequisite: SPED 5470.

Learning Outcomes

1. Determine how to modify orientation and mobility instruction, depending on the age of the students, in the following ways: A) describe ways to teach OM to very young children; B) describe ways to teach OM to school age children; C) describe ways to teach OM to adults; and D) describe ways to teach OM to older adults.
2. Demonstrate an understanding of mobility systems and adaptations used by blind and visually impaired travelers in the following ways: A) describe how adaptive technology is used in travel; B) describe how dog guides are used in travel; C) describe orientation aids that can be used for students with vision loss; D) describe issues around environmental accessibility for student with vision loss; and E) describe how to teach OM in adverse weather conditions
3. Demonstrate understanding of how to teach OM to students who have different disabilities in the following ways: A) describe ways to teach OM to learners with vision and hearing loss; B) describe ways to teach OM to learners with vision, physical and health impairments; C) describe ways to teach OM to learners with cognitive impairments and vision loss; D) describe ways to teach OM to learners with cortical visual impairments; and E) describe how to teach travel skills to learners with nonvisual disabilities
4. Conduct an OM assessment and teach OM in the following ways: A) describe the components of a comprehensive OM assessment; B) describe creative ways to provide OM instruction; C) describe theories and best practices for teaching orientation and mobility; and D) describe ways to teach concepts creatively

SPED 5490. Advanced Orientation and Mobility
3 Credits (3)

This course focuses on the development and monitoring of cane skills needed for safe and efficient travel in indoor, residential, and business districts, including the use of public transportation systems. Development, administration, and supervision of orientation and mobility services is also covered. Consent of Instructor required. Restricted to: SPED majors. May be repeated up to 3 credits.
Prerequisite: SPED 5480.

Learning Outcomes

1. Use orientation and mobility techniques to travel independently, safely and efficiently in a variety of environments including indoor, residential, small business and business areas while blindfolded or under low vision simulator.
2. Provide appropriate and safe orientation and mobility instruction to fellow students, who are blindfolded or wearing low vision simulators, while traveling in indoor, residential, small business and business areas
3. Describe modifications to traditional OM techniques for diverse learners of various ages with different degrees of visual functioning and with a variety of additional disabilities
4. Use public transportation while blindfolded or under low vision simulatorand provide instruction to fellow students who are blindfolded or wearing low vision simulators in the use of public transportation
5. Critically analyze one's teaching and monitoring through self-observation and reflective practices

SPED 5810. Student Teaching SPED
6 Credits (6)

Culminating course required for graduate level students seeking initial licensure. Students must have completed a Bachelor's degree and be admitted to student teaching program to enroll. Restricted to: SPED majors.
Prerequisite: SPED 5811.

Learning Outcomes

1. The teacher candidate understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.
2. The teacher candidate uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.
3. The teacher candidate works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.

SPED 5811. Field Experience in Education, Equity & Cultural Diversity
3 Credits (3)

This is a supervised experience in providing special education services to local preK-12 students. In the context of the public school classroom, teacher candidates are guided to apply content knowledge from the seminar meetings and from prior coursework. This experience is designed for both the practicing general education classroom teacher pursuing special education licensure and for graduate teacher candidates pursuing initial special education licensure. Restricted to: SPED majors.

Prerequisite: SPED 3105 and SPED 3120, or SPED 5105 and SPED 5230, or consent of instructor.

Learning Outcomes

1. Learners will demonstrate critical thinking skills and critical reflection and use current special education research to make and evaluate instructional decisions across the full range of learning tasks (including identifying appropriate learning objectives, selecting methods and materials, assessing student progress in relation to learning objectives, making classroom management decisions, and evaluating the results of decisions and implementation of lessons).
2. Learners will create access to grade level general education curriculum for a broad range of students with diverse learning needs. This will be accomplished by using grade level standards and extended standards (as appropriate), following the requirements expressed in IEP's, and designing and implementing appropriate instruction that addresses students' needs, learning styles, motivation, and cultural and linguistic differences. Universal design, differentiation, accommodation, and modification will be used to address diverse learning needs.
3. Learners will further develop, refine, and demonstrate the dispositions necessary to enter student teaching, with the ultimate goal of entering and advancing the teaching profession. This includes a) building rapport, positive communication, and a cooperative work environment with students, families, teachers, supervisors, instructors, educational/instructional assistants, service providers, and others in the school community b) demonstrating respectful and responsive attitudes toward individuals with exceptionalities from diverse backgrounds, as well as their families and service providers c) demonstrating responsible task performance d) adhering to the CEC code of ethics and university/site policies and procedures.
4. Learners will select and use appropriate technology to support student learning.
5. Learners will apply knowledge of the historical background and current laws and procedures within the field of special education to contextualize, explain, and evaluate special education services.

SPED 5820. Masters Degree Seminar
3 Credits (3)

Capstone review of current issues in special education. Each student will participate in a practice comprehensive oral exam. May be repeated up to 3 credits.

Learning Outcomes

1. Varies

SPED 5830. Special Education/Elementary Student Teaching Seminar
3 Credits (3)

Discussion of elementary Special Education school issues related to student teaching.

Prerequisite: SPED 5811.

Corequisite: SPED 5810.

Learning Outcomes

1. The teacher candidate understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.
2. The teacher candidate uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.
3. The teacher candidate works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.

SPED 5840. Special Education/Secondary Student Teaching Seminar
3 Credits (3)

Discussion of secondary Special Education school issues related to student teaching.

Prerequisite: SPED 5811.

Corequisite: SPED 5810.

Learning Outcomes

1. The teacher candidate understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.
2. The teacher candidate uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.
3. The teacher candidate works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.

SPED 5850. Current Research in Special Education
3 Credits (3)

Current investigations and research techniques. May be repeated up to 3 credits.

Learning Outcomes

1. Evaluate current research in special Education.
2. Read and evaluate original research articles published in peer reviewed academic journals.
3. Describe the elements of research.
4. Analyze the designs, methods, and applications of quantitative research in special education
5. Analyze the designs, methods, and applications of qualitative research in special education
6. Examine ethical issues and guidelines for conducting special education research.
7. Evaluate the elements of a research proposal.

SPED 5860. Current Issues in Special Education for Teaching in Culturally Responsive Society
3 Credits (3)

Theoretical and empirical bases for special education practices. Skill development in critical thinking, reading, and writing in relation to contemporary problems. Taught with SPED 6860. May be repeated up to 3 credits.

Learning Outcomes

1. Students will learn several concepts, issues, and theories in contemporary special education in order to be a more intelligent consumer of information about special education.
2. Students will analyze, evaluate, and make decisions concerning complex contemporary issues in special education.
3. Students will demonstrate communications skills, both written and oral, in order to enhance their effectiveness in expressing their view on the issues related to special education.
4. Students will examine issues related to the human experience as it relates to diversity and a culturally and linguistically diverse world.

5. Students will debate the pros and cons of current special education issues

SPED 5870. Early Childhood SPED Student Teaching
6 Credits (6)
A student teaching experience designed for students studying early childhood special education. Restricted to TEP-ECED majors. Students must be admitted to student teaching to enroll. May be repeated up to 9 credits.
Learning Outcomes
1. Our mission is to serve the people of New Mexico through education, research, extension education, and public service with specific emphasis on innovative practices, overcoming barriers to learning, international activities, technology, and literacy for the diverse populations of New Mexico, surrounding states and border communities.

SPED 5990. Practicum in Reading Disabilities
3 Credits (3)
Supervised experience in assessing a student with reading disability, developing and intervention plan, and implementing and monitoring the interventions across time. May be repeated up to 3 credits.
Learning Outcomes
1. Varies

SPED 5991. Special Research Problems
1-3 Credits (1-3)
Individual investigation either analytical or experimental. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

SPED 5996. Topics in Special Education
1-3 Credits (1-3)
Offered under various subtitles which indicate the subject matter to be covered. Maximum of 6 credits, 3 credits per semester. May be repeated up to 6 credits.
Learning Outcomes
1. Varies

SPED 5999. Master's Thesis
1-15 Credits (1-15)
Thesis. May be repeated up to 88 credits.
Learning Outcomes
1. Varies

SPED 6110. Low Incidence Disabilities
3 Credits (3)
Examines those disabilities that occur less frequently in the special education population, including hearing loss, visual disorders, autism, and other severe manifestations. Taught with SPED 5110 with differentiated assignments. May be repeated up to 3 credits.
Learning Outcomes
1. Analyze Low Incidence Disabilities (characteristics, etiology, and diagnostic criteria) (IDEIA, 2004).
2. Identify the types of related supports and services—assistive technology, environmental and Instructional accommodations/ modifications, and related services—available to students with low incidence disabilities to maximize participation in inclusive settings.
3. Apply culturally responsive instructional practices to individualize learning for learners with low incidence disabilities, taking into consideration individual abilities, interests, learning environments, and cultural and linguistic factors in the planning, selection, development, and adaptation of learning experiences of learners with low incidence disabilities in inclusive environment.
4. Employ culturally responsive strategies for creating effective family, school, community partnerships.
5. Discuss culturally responsive strategies that promote collaboration between families, schools, and community agencies/organizations during the student's transition planning process.
6. Identify current educational issues impacting students with low incidence disabilities.

SPED 6120. High Incidence Disabilities in a Diverse Society
3 Credits (3)
Examines those areas of disability that most frequently occur in the special education population, including mental retardation, learning disabilities, communication disorders, and behavioral and emotional disorders. Taught with SPED 5120. Master's Degree. Restricted to SPED and C D majors. May be repeated up to 3 credits.
Learning Outcomes
1. Describe and compare the major approaches to identifying, placement, assessing, planning for instruction, and classifying high incidence disabilities.
2. Identify and discuss school-based, sociological, cultural, and economic differences as they relate to etiology and identification of mild disabilities.
3. Describe and critically evaluate classroom instructional practices that can improve the educational success of students with high incidence disabilities.
4. Describe and critically evaluate classroom management practices that can improve the educational success of students with high incidence disabilities.
5. Describe how the educational experiences of persons with mild disabilities is shaped by their cognitive, perceptual, language, academic, and social / emotional characteristics.

SPED 6160. Technology and Exceptionality in a Diverse Society
3 Credits (3)
This class will address the unique educational needs of learners with exceptionalities, and will provide information and practice in addressing those needs through the use of technology-based interventions. Taught with SPED 5160.
Learning Outcomes
1. Carry out effective practicum practices for using technology with diverse learners.

SPED 6170. School Intervention and Organization in a Diverse Society
3 Credits (3)
Introduces public school organization and laws and the psycho-sociological perspective of education. Curriculum and theory, teaching methods and materials will be presented and operationalized through a psycho-educational point of view. May be repeated up to 3 credits.
Learning Outcomes
1. Understand and implement effective interventions in a variety of classroom and organizational settings.

SPED 6310. Introduction to Autism
3 Credits (3)
This course will provide an overview of autism spectrum disorders as a triad of impairments, including historical and theoretical perspectives, assessment issues, characteristics of autism, intervention programs, and

family issues. Differentiated Assignments.Taught with SPED 5310 and SPED 4310. May be repeated up to 3 credits.

Learning Outcomes

1. Analyze Autism Spectrum Disorders ASD (characteristics, etiology, co-morbid conditions, differential diagnosis).
2. Describe the criteria used to screen and diagnose ASD.
3. Examine evidence-based practices used to effectively support students with ASD in accessing general education and grade level standards (classroom structure, differentiated instruction, peer mediated supports, structured teaching, and emotional supports).
4. Describe strategies related to promoting a successful transition from school to adult life for individuals with ASD.
5. Examine the strategies for effective collaboration and communication with families of children with ASD and key stakeholders for the purpose of information sharing and collaborative planning with families.
6. Identify and investigate current educational issues impacting students with ASD.

SPED 6330. Social Skills and Autism
3 Credits (3)

This course will cover the second of the triad of impairments. As a blend of researched based models and evidenced based practical applications, students will gain an understanding of the social skill deficits often associated with autism spectrum disorders. Review a variety of social cognition theories and explore effective social skill interventions for children functioning at a variety of levels along the autism spectrum. Taught with SPED 4330 and SPED 5330 with differentiated assignments. May be repeated up to 3 credits.

Prerequisite/Corequisite: SPED 4310 or SPED 5310 or SPED 6310.

Learning Outcomes

1. Analyze Autism Spectrum Disorders ASD (definition, characteristics, etiology).
2. Evaluate Social Skills characteristics and difficulties often associated with ASD.
3. Appraise current tools and strategies used to assess Social Skills problems in children with ASD.
4. Use assessment results to identify the Social Skills needs of children with ASD
5. Analyze the types of evidence-based practices used to address the Social Skills needs of children with ASD.
6. Design an intervention plan to address the Social Skills needs of a child with ASD.
7. Incorporate family preferences and values into the educational process of students with ASD.
8. Employ data collection procedures to evaluate the effectiveness of evidence-based practices for students with ASD.

SPED 6340. Communication and Autism
3 Credits (3)

This course will cover the third of the triad of impairments. Students will gain an overview of communication characteristics and difficulties often associated with autism spectrum disorders. Review current tools and strategies used to assess speech, language, and interaction skills. Use assessment results to identify needs and implement appropriate interventions. Explore a variety of intervention strategies aimed at building receptive, expressive, and pragmatic language of children functioning at a variety of levels along the autism spectrum. Taught with SPED 4340 and SPED 5340 and differentiated assignments. May be repeated up to 3 credits.

Prerequisite: SPED 4310 or SPED 5310 or SPED 6310.

Learning Outcomes

1. Analyze Autism Spectrum Disorders ASD (definition, characteristics, etiology).
2. Evaluate communication characteristics and difficulties often associated with ASD.
3. Appraise current tools and strategies used to assess communication problems in children with ASD.
4. Analyze the types of interventions used to address the communication needs of children with ASD.
5. Design an intervention plan to address the communication needs of a child with ASD.
6. Employ data collection procedures to evaluate the effectiveness of research-based interventions for students with ASD.
7. Incorporate family preferences and values into the educational process of students with ASD.

SPED 6810. Doctoral Seminar
1-4 Credits (1-4)

The seminar will engage doctoral students in scholarly dialogue and production. It will assist in preparing them for future careers in leadership roles. May be repeated up to 4 credits.

Learning Outcomes

1. Varies

SPED 6830. Current Research in Special Education
3 Credits (3)

Required for students seeking the Ed.D./Ph.D. M.A. degree. Restricted to majors. May be repeated up to 3 credits.

Learning Outcomes

1. Evaluate current research in special Education.
2. Read and evaluate original research articles published in peer reviewed academic journals.
3. Describe the elements of research.
4. Analyze the designs, methods, and applications of quantitative research in special education
5. Analyze the designs, methods, and applications of qualitative research in special education
6. Examine ethical issues and guidelines for conducting special education research.
7. Evaluate the elements of a research proposal.

SPED 6840. Current Issues in Special Education for Teaching in a Culturally Responsive Society
3 Credits (3)

Required for students seeking the Ed.D./Ph.D. May be repeated up to 3 credits.

SPED 6991. Doctoral Research
1-15 Credits (1-15)

Research. May be repeated up to 88 credits.

Learning Outcomes

1. Varies

SPED 6996. Selected Topics in Special Education
1-6 Credits (1-6)

Offered under various subtitles which indicate the subject matter to be covered. Maximum of 6 credits, 3 credits per semester. May be repeated up to 6 credits.

Learning Outcomes
1. Varies

SPED 6997. Independent Study Topics in Special Education
1-6 Credits (1-6)
A problem and seminar course for those pursuing an advanced graduate degree. Each course to bear an appropriate subtitle. May be repeated up to 99 credits.
Learning Outcomes
1. Varies

SPED 6998. Internship in Special Education
1-6 Credits (1-6)
Each course bears a qualifying subtitle. Maximum of 6 credits per semester. May be repeated up to 99 credits.

SPED 7000. Dissertation
1-9 Credits (1-9)
Credit may be earned by students who have successfully completed their doctoral comprehensive exams and presented their dissertation proposals to their committees. At least 18 credits are required during the course of dissertation study. May be repeated up to 24 credits.
Learning Outcomes
1. Varies

SPHS-SPEECH & HEARING SCIENCE

SPHS 2110. Introduction to Communication Disorders
3 Credits (3)
This introductory course provides an overview of common speech, language, and hearing disorders in children and adults including etiologies, characteristics, prevention, identification, assessment and intervention. The course provides an overview of the field of speech-language pathology and audiology. May be repeated up to 3 credits.
Learning Outcomes
1. Describe normal human communication anatomy and processes as they relate to speech and language production.
2. Describe the nature of speech, language, and hearing disorders and differences.
3. Describe the principles of prevention, assessment and intervention of communication disorders.
4. List requirements for licensure, certification, and other relevant professional credentials.
5. Exhibit basic knowledge of contemporary professional issues in speech-language pathology.
6. List possible psychosocial implications of various communication disorders.
7. Identify cultural, educational, legal, and ethical issues related to communication disorders.
8. Describe the scope of practice of speech-language pathologists and audiologists.

SPHS 3110V. Autism Spectrum Disorders - a Lifespan Perspective
3 Credits (3)
This course will introduce students to concepts related to autism spectrum disorder across the lifespan. Diagnostic criteria, etiologies, assessment, and intervention will be explored from a historical perspective. May be repeated up to 6 credits.
Learning Outcomes
1. Summarize the diagnostic criteria for autism spectrum disorder as presented in the DSM-5-TR and provide examples of its core features.
2. Discuss how to individualize an autism assessment based on an individual's developmental level (e.g., chronological age, language skills), including the specific materials/assessment(s) used.
3. Describe the continuum of autism intervention (discrete to naturalistic) and the pros and cons of methods on the continuum.
4. Describe specific issues for autistic individuals across the lifespan and how intervention/supports may be individualized to their needs.

SPHS 4510. Phonetics
3 Credits (3)
This course introduces you to articulatory and acoustic phonetics as well as transcription. In this course, you will gain the ability to recognize and describe phonetic symbols. You will learn to transcribe American English using the International Phonetic Alphabet (IPA). By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.
Prerequisite: B or better in SPHS 2110; Cumulative GPA of 3.0 or better.
Learning Outcomes
1. Students will be able to identify articulatory, acoustic and perceptual characteristics of speech sounds.
2. Students will be able to utilize the International Phonetic Alphabet (IPA) to transcribe speech sounds in single words, phrases, and connected speech.
3. Students will be able to classify speech sounds into natural classes, and describe the phonological organization of speech sounds, including prosodic organization.
4. Students will be able to identify common phonological processes during language acquisition and in varieties of English.
5. Students will be able to recognize phonological processes in disordered speech.

SPHS 4520. Audiology
3 Credits (3)
This course is an introductory course to the science and profession of Audiology. Simply stated, Audiology is the clinical profession that deals with hearing and balance disorders (Gelfand, 2009). By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.
Prerequisite: B or better in SPHS 2110, and a minimum GPA of 3.0 or better.
Learning Outcomes
1. Recall aspects of the history of the profession of Audiology.
2. Explain the key concepts related to sound.
3. Identify the anatomical structures of the auditory system and their respective function to hearing.
4. Explain the tests performed during a comprehensive hearing assessment.
5. Demonstrate the protocols used during hearing assessments.
6. Classify audiometric test results.

SPHS 4610. Language Acquisition
3 Credits (3)
This course introduces students to the study of the development of language, speech, and communication. Includes language sampling. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.
Prerequisite: B or better in SPHS 2110 Introduction to Communication Disorders; Cumulative GPA of 3.0 or higher.

Learning Outcomes

1. Describe the development of phonology, semantics, morphology, syntax, and pragmatics.
2. Describe biological, cognitive, social aspects of language acquisition.
3. Evaluate the current methods for studying language acquisition and critically evaluate their contributions to our understanding of how children learn language.
4. Compare and contrast current theories of language acquisition in relation to the available data and to each other.
5. Apply basic observational methods to draw conclusions about a child's level of language knowledge.

SPHS 4620. Speech and Hearing Science
3 Credits (3)

This course will introduce you to the field of speech and hearing science, including basic acoustics, the acoustics of speech sounds (consonants and vowels), and speech perception. You will examine the acoustic properties of speech sounds using acoustic analysis software (Praat). By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.

Prerequisite: B or better in SPHS 2110, C- or better in SPHS 4510, SPHS 4520; and minimum 3.0 GPA.

Learning Outcomes

1. Students will describe concepts of basic acoustic physics such as simple harmonic motion, complex waveforms, and resonances.
2. Students will correlate the acoustic properties of the sound source in human speech with characteristics of vocal fold function.
3. Students will describe and measure the acoustic characteristics of vowels and correlate these characteristics to the articulatory parameters of tongue height, tongue advancement, and lip rounding.
4. Students will describe and measure the acoustic properties of the consonant like approximants, nasals, fricatives, stops, and affricates.
5. Students will describe basic human hearing and psychoacoustic properties and understand and describe important theories of speech perception.

SPHS 4710. Speech Disorders Across the Lifespan
3 Credits (3)

This course explores the bases, etiologies, and clinical management of disabilities specific to articulation, phonology, voice, resonance, motor speech, stuttering, and cluttering disorders. Building upon fundamental theories and knowledge regarding communication, we will review characteristics of various speech disabilities along with evidence-based methods of assessment and treatment. Throughout the course, we will critically examine and reflect upon the importance of identities specific to race, gender, language, socioeconomic status, and culture as it pertains to communication and the provision of clinical services. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.

Prerequisite: A grade of B or better in SPHS 2110, SPHS 4510, SPHS 4610 and minimum GPA of 3.0.

Learning Outcomes

1. Describe diverse etiologies of speech disorders and compare/contrast assessment procedures (ASHA Standard III-B).
2. Define and compare/contrast the classification for a variety of speech disorders (ASHA Standard III-C).
3. Differentiate between a speech disorder vs a difference that can be attributed to culturally and linguistically different groups (ASHA Standard III-D).
4. Describe evidence-based treatment; evaluate treatment-efficacy evidence for a variety of speech disorders (ASHA Standard III-D).

SPHS 4715. Language Disorders Across the Life Span
3 Credits (3)

In this course, we will learn about developmental and acquired language disorders, including assessment and intervention. We will explore the bases, symptoms, etiologies, and treatment of language disorders. This course includes a short review of normal language acquisition. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.

Prerequisite: Grade of B or better in SPHS 2110 and SPHS 4610, minimum cumulative GPA of 3.0.

Learning Outcomes

1. Describe diverse etiologies of language disorders and compare/contrast assessment procedures (ASHA Standard III-B).
2. Define and compare/contrast the classification for a variety of language disorders (ASHA Standard III-C).
3. Differentiate between a disorder vs a difference that can be attributed to culturally and linguistically different groups (ASHA Standard III-D).
4. Describe evidence-based treatment; evaluate treatment-efficacy evidence for a variety of language disorders (ASHA Standard III-D).

SPHS 4720. Anatomy and Physiology of Speech Mechanisms
3 Credits (3)

In this course, we will delve into the intricate mechanisms that enable human speech. From the complexities of vocal fold vibrations to the nervous system processes involved in speech production, we will explore how the human body orchestrates the art of communication. In this course, you will gain a comprehensive understanding of the biological foundations that shape our ability to speak. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.

Prerequisite: B or better in SPHS 2110, and minimum 3.0 GPA.

Learning Outcomes

1. Students will recognize key anatomical structures associated with speech swallowing.
2. Students will be able to explain the physiological function of systems involved in speech swallowing.
3. Students will be able to evaluate the functional integrity of systems involved in speech swallowing.
4. Students will classify speech swallowing symptoms according to their associated clinical syndromes.

SPHS 4810. Clinical Methods and Procedures
3 Credits (3)

Clinical Methods and Procedures in Speech-Language Pathology is designed to provide the undergraduate Communication Disorders major with an introduction to clinical methods, clinical oral and written reporting, and clinical observation skills. May be repeated up to 6 credits. Must have completed SPHS 4510, SPHS 4520, SPHS 4620, SPHS 4610; and have a minimum GPA of 3.0.

Prerequisite: B or better in SPHS 2110.

Learning Outcomes

1. Articulate the scope of practice and the roles and responsibilities of Speech-Language Pathologists (SLP), Speech-Language Pathology Assistants (SLPAs), and graduate clinicians.
2. Use basic professional terminology specific to the field of Speech-Language Pathology.
3. Apply principles and therapeutic techniques to oral and written clinical reporting.

4. Identify on- and off-target behaviors, procedures, data collection, and maintenance strategies.
5. Summarize basic procedures for comprehensive clinical assessments.
6. Complete 25 of the 25 American Speech-Language-Hearing Association (ASHA) clock hours of required supervised clinical observation of speech, language, and hearing services.
7. Identify factors to consider when serving culturally and linguistically diverse patient populations.
8. Recognize the ASHA Code of Ethics.

SPHS 4820. Neural Bases of Communication Disorders
3 Credits (3)
This course will cover the neurological bases for speech, language, and hearing. We will explore topics on neuroanatomy and neurophysiology of sensory and motor systems. Specific topics include Central Nervous System development, the structure and function of brain cells, and organization and function of the brain and spinal cord. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.
Prerequisite: B or better in SPHS 2110, must have taken SPHS 4720 and 3.0 GPA or better.
Learning Outcomes
1. Explain foundational principles of human neuroscience, including neuronal signaling, embryology, neuroplasticity, sensation/perception, and motor function.
2. Describe and identify the organization and function of major neural structures and pathways involved in speech, language, swallowing, and hearing processes.
3. Evaluate current research on the neural underpinnings of language and speech processing.
4. Interpret clinical case studies and neurological assessment results to hypothesize the likely site and nature of neural damage affecting communication.

SPHS 4830. Aural Rehabilitation
3 Credits (3)
This course introduces you to the theories and procedures used to provide aural/audiological rehabilitation to children and adults who have hearing loss and to provide concomitant services to their family members. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.
Prerequisite: B or better in SPHS 2110, SPHS 4520, and 3.0 GPA or higher.
Learning Outcomes
1. Knowledge and understanding of basic concepts and components of aural/audiological rehabilitation.
2. Understanding of assessment procedures for determining aural rehabilitation needs, including means for assessing hearing status, auditory and audiovisual speech recognition, hearing-related disabilities, and conversational fluency.
3. Knowledge about the importance of auditory and visual cues in spoken communication.
4. Knowledge about how hearing loss affects conversational fluency.
5. Knowledge about auditory and speechreading training and communication strategies training.
6. Knowledge about counseling, psychosocial support, and assertiveness training.
7. Understanding how to develop and implement aural rehabilitation plans for children, adults, and their family members.
8. Procedures for developing and implementing auditory training for the pediatric population.
9. Knowledge about the challenges hearing loss poses for acquiring speech and language and learning to read and related assessments and interventions. 1
10. Define and use the appropriate terminology when discussing hard of hearing and deafness 1
11. Describe the effects of hearing impairment on various aspects of life (cognitive, educational, occupational, and psycho-social aspects in all age ranges). 1
12. Identify the communication needs and develop a basic understanding of common intervention options including communication strategies, auditory training, speech reading, hearing aids, assistive devices, and cochlear implantation. 1
13. Be acquainted with the relevant public laws.

SPHS 5010. Phonetics
3 Credits (3)
This course introduces you to articulatory and acoustic phonetics as well as transcription. In this course, you will gain the ability to recognize and describe phonetic symbols. You will learn to transcribe American English using the International Phonetic Alphabet (IPA). By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.
Learning Outcomes
1. Students will be able to identify articulatory, acoustic and perceptual characteristics of speech sounds.
2. Students will be able to utilize the International Phonetic Alphabet (IPA) to transcribe speech sounds in single words, phrases, and connected speech.
3. Students will be able to classify speech sounds into natural classes, and describe the phonological organization of speech sounds, including prosodic organization.
4. Students will be able to identify common phonological processes during language acquisition and in varieties of English.
5. Students will be able to recognize phonological processes in disordered speech.

SPHS 5015. Audiology
3 Credits (3)
This course is an introductory course to the science and profession of Audiology. Simply stated, Audiology is the clinical profession that deals with hearing and balance disorders (Gelfand, 2009). By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.
Learning Outcomes
1. Recall aspects of the history of the profession of Audiology.
2. Explain the key concepts related to sound.
3. Identify the anatomical structures of the auditory system and their respective function to hearing.
4. Explain the tests performed during a comprehensive hearing assessment.
5. Demonstrate the protocols used during hearing assessments.
6. Classify audiometric test results.

SPHS 5020. Language Acquisition
3 Credits (3)
This course introduces students to the study of the development of language, speech, and communication. Includes language sampling. By

the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.

Learning Outcomes

1. Describe the development of phonology, semantics, morphology, syntax, and pragmatics.
2. Describe biological, cognitive, social aspects of language acquisition.
3. Evaluate the current methods for studying language acquisition and critically evaluate their contributions to our understanding of how children learn language.
4. Compare and contrast current theories of language acquisition in relation to the available data and to each other.
5. Apply basic observational methods to draw conclusions about a child's level of language knowledge.

SPHS 5025. Language Disorders Across the Life Span
3 Credits (3)

In this course, we will learn about developmental and acquired language disorders, including assessment and intervention. We will explore the bases, symptoms, etiologies, and treatment of language disorders. This course includes a short review of normal language acquisition. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.

Learning Outcomes

1. Describe diverse etiologies of language disorders and compare/contrast assessment procedures (ASHA Standard III-B).
2. Define and compare/contrast the classification for a variety of language disorders (ASHA Standard III-C).
3. Differentiate between a disorder vs a difference that can be attributed to culturally and linguistically different groups (ASHA Standard III-D).
4. Describe evidence-based treatment; evaluate treatment-efficacy evidence for a variety of language disorders (ASHA Standard III-D).

SPHS 5030. Anatomy and Physiology of Speech Mechanisms
3 Credits (3)

In this course, we will delve into the intricate mechanisms that enable human speech. From the complexities of vocal fold vibrations to the nervous system processes involved in speech production, we will explore how the human body orchestrates the art of communication. In this course, you will gain a comprehensive understanding of the biological foundations that shape our ability to speak. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.

Learning Outcomes

1. Students will recognize key anatomical structures associated with speech swallowing.
2. Students will be able to explain the physiological function of systems involved in speech swallowing.
3. Students will be able to evaluate the functional integrity of systems involved in speech swallowing.
4. Students will classify speech swallowing symptoms according to their associated clinical syndromes.

SPHS 5035. Speech and Hearing Science
3 Credits (3)

This course will introduce you to the field of speech and hearing science, including basic acoustics, the acoustics of speech sounds (consonants and vowels), and speech perception. You will examine the acoustic properties of speech sounds using acoustic analysis software (Praat). By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.

Learning Outcomes

1. Students will describe concepts of basic acoustic physics such as simple harmonic motion, complex waveforms, and resonances.
2. Students will correlate the acoustic properties of the sound source in human speech with characteristics of vocal fold function.
3. Students will describe and measure the acoustic characteristics of vowels and correlate these characteristics to the articulatory parameters of tongue height, tongue advancement, and lip rounding.
4. Students will describe and measure the acoustic properties of the consonant like approximants, nasals, fricatives, stops, and affricates.
5. Students will describe basic human hearing and psychoacoustic properties and understand and describe important theories of speech perception.

SPHS 5040. Speech Disorders Across the Lifespan
3 Credits (3)

This course explores the bases, etiologies, and clinical management of disabilities specific to articulation, phonology, voice, resonance, motor speech, stuttering, and cluttering disorders. Building upon fundamental theories and knowledge regarding communication, we will review characteristics of various speech disabilities along with evidence-based methods of assessment and treatment. Throughout the course, we will critically examine and reflect upon the importance of identities specific to race, gender, language, socioeconomic status, and culture as it pertains to communication and the provision of clinical services. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.

Learning Outcomes

1. Describe diverse etiologies of speech disorders and compare/contrast assessment procedures (ASHA Standard III-B).
2. Define and compare/contrast the classification for a variety of speech disorders (ASHA Standard III-C).
3. Differentiate between a speech disorder vs a difference that can be attributed to culturally and linguistically different groups (ASHA Standard III-D).
4. Describe evidence-based treatment; evaluate treatment-efficacy evidence for a variety of speech disorders (ASHA Standard III-D).

SPHS 5045. Clinical Methods and Procedures
3 Credits (3)

Clinical Methods and Procedures in Speech-Language Pathology is designed to provide the undergraduate Communication Disorders major with an introduction to clinical methods, clinical oral and written reporting, and clinical observation skills. May be repeated up to 6 credits.

Learning Outcomes

1. Articulate the scope of practice and the roles and responsibilities of Speech-Language Pathologists (SLP), Speech-Language Pathology Assistants (SLPAs), and graduate clinicians.
2. Use basic professional terminology specific to the field of Speech-Language Pathology.
3. Apply principles and therapeutic techniques to oral and written clinical reporting.
4. Identify on- and off-target behaviors, procedures, data collection, and maintenance strategies.
5. Summarize basic procedures for comprehensive clinical assessments.
6. Complete 25 of the 25 American Speech-Language-Hearing Association (ASHA) clock hours of required supervised clinical observation of speech, language, and hearing services.

7. Identify factors to consider when serving culturally and linguistically diverse patient populations.
8. Recognize the ASHA Code of Ethics.

SPHS 5050. Neural Bases of Communication Disorders
3 Credits (3)
This course will cover the neurological bases for speech, language, and hearing. We will explore topics on neuroanatomy and neurophysiology of sensory and motor systems. Specific topics include Central Nervous System development, the structure and function of brain cells, and organization and function of the brain and spinal cord. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.
Learning Outcomes
1. Explain foundational principles of human neuroscience, including neuronal signaling, embryology, neuroplasticity, sensation/perception, and motor function.
2. Describe and identify the organization and function of major neural structures and pathways involved in speech, language, swallowing, and hearing processes.
3. Evaluate current research on the neural underpinnings of language and speech processing.
4. Interpret clinical case studies and neurological assessment results to hypothesize the likely site and nature of neural damage affecting communication.

SPHS 5055. Aural Rehabilitation
3 Credits (3)
This course introduces you to the theories and procedures used to provide aural/audiological rehabilitation to children and adults who have hearing loss and to provide concomitant services to their family members. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.
Learning Outcomes
1. Knowledge and understanding of basic concepts and components of aural/audiological rehabilitation.
2. Understanding of assessment procedures for determining aural rehabilitation needs, including means for assessing hearing status, auditory and audiovisual speech recognition, hearing-related disabilities, and conversational fluency.
3. Knowledge about the importance of auditory and visual cues in spoken communication.
4. Knowledge about how hearing loss affects conversational fluency.
5. Knowledge about auditory and speechreading training and communication strategies training.
6. Knowledge about counseling, psychosocial support, and assertiveness training.
7. Understanding how to develop and implement aural rehabilitation plans for children, adults, and their family members.
8. Procedures for developing and implementing auditory training for the pediatric population.
9. Knowledge about the challenges hearing loss poses for acquiring speech and language and learning to read and related assessments and interventions. 1
10. Define and use the appropriate terminology when discussing hard of hearing and deafness. 1
11. Describe the effects of hearing impairment on various aspects of life (cognitive, educational, occupational, and psycho-social aspects in all age ranges). 1
12. Identify the communication needs and develop a basic understanding of common intervention options including communication strategies, auditory training, speech reading, hearing aids, assistive devices, and cochlear implantation. 1
13. Be acquainted with the relevant public laws.

SPHS 5110. Research Methods
3 Credits (3)
This course focuses on introduction to basic research methodology in CSD. The course presents information pertaining to research design and statistical analyses used in speech-language pathology with special consideration of the role of research in evidence-based practice. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.
Learning Outcomes
1. Students will demonstrate understanding of the concepts of research ethics and integrity including protection of human subjects.
2. Students will comprehend of concepts of evidence-based practice.
3. Students will locate, use, and critically evaluate library and online sources that support the investigation of research questions pertinent to speech-language and hearing science.
4. Students will interpret basic single variable and two-variable statistical procedures appropriate for single and group designs.
5. Students will read and critically evaluate pertinent research.

SPHS 5120. Assessment of Communication Disorders
3 Credits (3)
Diagnostic theories and management of communication disorders using standardized and descriptive methodology. Includes the practice of interviewing, testing, and oral and written reporting. Restricted to: C DS,C D majors. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.
Learning Outcomes
1. Demonstrate knowledge of testing statistics and basic concepts in psychometric assessment.
2. Formulate, implement and summarize one complete successful and efficient assessments: including pre-planning meeting, interview design and implementation, administration of instruments, analysis and integration of results and report writing.
3. Review, summarize and critique one assessment tool for design, use, interpretation and cultural/linguistic inclusivity to classmates.
4. Given case study information, students will be able to: choose an appropriate instrument from assessment tools reviewed; develop an assessment plan for a client; write a report and develop treatment goals.

SPHS 5130. Pediatric Language and Disorders
3 Credits (3)
Normal communication development of neonates, infants, toddlers, and preschoolers; etiologies, and treatment of cognitive, linguistic and social elements of communication problems in family systems. Restricted to: C DS,C D majors. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.
Learning Outcomes
1. Demonstrate a working knowledge of the major theories of language acquisition and theoretical perspectives of disorders.
2. Demonstrate an understanding of the aspects related to dialect and second language acquisition of English.
3. Demonstrate knowledge of the core principles of language assessment for the pediatric population (zero-five year old).

4. Summarize and interpret content material relating to pediatric language development/disorders.

SPHS 5140. Speech Sound Disorders
3 Credits (3)
The purpose of this course is to provide graduate students with the knowledge necessary to effectively assess and provide intervention for individuals with speech sound disorders. The content of this course includes the anatomical, linguistic, cultural, and physiological basis of speech sound production; speech sound disorders of differing etiologies; phonetic transcription; culturally sensitive assessment and treatment approaches; appraisal of evidence-based treatment approaches; and discussion of power, privilege, and positionality in the field of speech, language and hearing sciences. Video examples and hands-on learning experiences will be provided to bolster student learning. Students will demonstrate their understanding through multiple modalities. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.
Learning Outcomes
1. Identify the impact of anatomical, motor, sensory, cognitive-linguistic, and social factors in speech acquisition associated with typical and atypical development.
2. Transcribe American English speech using the International Phonetic Alphabet and identify the presence of phonological processes.
3. Identify and implement components of a comprehensive, culturally sensitive evaluation for a child with a suspected speech sound disorder.
4. Describe different treatment approaches, generate developmentally appropriate treatment goals, and design activities for a child with a speech sound disorder.
5. Analyze and interpret current and foundational research in the area of speech sound disorders.

SPHS 5210. School Age Language and Disorders
3 Credits (3)
This course will discuss normal communication-learning development of elementary, secondary, and postsecondary students; etiologies, diagnosis, and treatment of interpersonal communication and language-based academic disorders. Restricted to: C DS,C D majors. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.
Learning Outcomes
1. Demonstrate a working knowledge of legislation governing service provision in the schools (IDEIA, NCLB) and implementation practices (IEP, five-hundred-four plan, RtI).
2. Demonstrate knowledge of normal language development of school-age children.
3. Demonstrate understanding of language disorders relevant to school-age children.
4. Demonstrate knowledge of evidence-based intervention methodologies for the treatment of language disorders in the school-aged population.

SPHS 5220. Adult Neurogenic Language Disorders
3 Credits (3)
Of the estimated 800,000 strokes that occur each year in the United States, more than one-third result in chronic aphasia or right-hemisphere disorder. Individuals with aphasia and right-hemisphere disorder following stroke report that their communicative difficulties contribute to feelings of social isolation and reduced functional autonomy, which together result in negative long-term mental health outcomes and reduced quality of life. Speech-language therapy may help to alleviate these hardships, and the skills that you learn in this course will prepare you to do so. As we progress through this course, we'll work to explore the neuropathological underpinnings of aphasia and RHD, while learning more about how such impairments may be assessed and treated. Restricted to: C DS,C D majors. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.
Learning Outcomes
1. Characterize aphasia and its sub-types based on lesion data and behavioral profiles.
2. Specify standardized and non-standardized measures to evaluate clients with aphasia.
3. Describe principles and techniques to maximize linguistic recovery in individuals with aphasia.
4. Describe the etiology and patterns of recovery associated with aphasia and right-hemisphere disorder.
5. Describe cognitive processes and systems, including language, attention, memory, and executive function, and their relationship to adult neurogenic language disorders.
6. Apply theoretical perspectives of language, cognition, and neurological function as they relate to adult neurogenic language disorders.

SPHS 5230. Fluency Disorders
3 Credits (3)
This course explores theories, perspectives, advocacy, and clinical management relating to children and adults who stutter and/or clutter. We will discuss theoretical perspectives relating to topics such as etiology, persistence, disability, and identity through the evaluation of peer-reviewed research as well as the insights and lived experiences of people who stutter. You will learn about assessment practices, intervention strategies, and counseling principles specific to individuals who stutter and/or clutter. Restricted to: C DS,C D majors. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.
Learning Outcomes
1. Identify terminology and theories associated with stuttering, cluttering, and typical disfluency.
2. Label, describe and discern typical from atypical disfluency across speakers of one or more languages.
3. Describe and practice using the variety of evidence-based assessment measures and intervention strategies appropriate for individuals who stutter and/or clutter.
4. Demonstrate an understanding of the lived experiences and intersecting identities (culture, gender, race, socioeconomic status) of people who stutter and/or clutter and their family members.
5. Design an advocacy project on behalf of the stuttering and/or cluttering community that may be implemented at the local, regional, national, or international level.

SPHS 5310. Introduction to Augmentative and Alternatice Communication
3 Credits (3)
Assessment and intervention for children and adults with developmental disabilities; Alternative communication strategies and systems for individuals with severe speech and/or language impairments. Restricted to: C DS,C D majors. May be repeated up to 3 credits.
Prerequisite: Graduate standing; overall GPA of 3.0.

Learning Outcomes

1. Understand and consider physical and psycho-social, linguistic, and cognitive characteristics of AAC users.
2. Describe assessment methods to determine the best fit of AAC systems to meet the needs of AAC users.
3. Understand how to provide training in the use of various AAC systems for AAC users, their families, and caregivers and educators.

SPHS 5320. Cognitive Communication Disorders
3 Credits (3)

What does it mean to be human? And what are the contents and functions of the human mind? Central to the human experience is cognition—the brain functions that allow us to reason, remember, attend, and communicate. While cognitive processes occur automatically for most people, those with neurological pathologies (such as dementia or traumatic brain injury) often experience cognitive impairments. In this course, we'll work to explore the nature of human cognition, the brain networks that support it, the underlying pathologies that lead to cognitive impairment, and how such impairments may be assessed and treated. Restricted to: C DS,C D majors. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.

Learning Outcomes

1. Describe dementing diseases and how they affect cognitive-communicative functioning.
2. Specify standardized and non-standardized measures to evaluate clients with dementia.
3. Describe principles and techniques to maximize communicative functioning of individuals with dementia.
4. Describe the epidemiology and etiology of traumatic brain injury.
5. Specify the relationships between the mechanisms of traumatic brain injury and the nature and severity of cognitive-communicative impairments.
6. Specify appropriate diagnostic and treatment methods for individuals with different severity levels of traumatic brain injury.
7. Describe cognitive processes and systems, including attention, memory, and executive function, and their relationship to cognitive communication disorders.

SPHS 5330. Dysphagia
3 Credits (3)

Study of the anatomy and physiology of swallowing and upper aerodigestive systems. Review of the bases and etiologies of child and adult swallowing disorders, including diagnosis, assessment, and treatment. Restricted to: C DS,C D majors. May be repeated up to 3 credits.

Prerequisite: A course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

Learning Outcomes

1. Define the anatomy and physiology of normal swallowing and causes of abnormal swallow in the pediatric to geriatric age ranges.
2. Define dysphagia team components.
3. Describe protocol for clinical and instrumental dysphagia evaluation.
4. Describe dysphagia diagnosis and treatment.

SPHS 5335. Swallowing and its Disorders in the Pediatric Population
2 Credits

This class is an introduction to swallowing disorders, normal and abnormal swallow function for the pediatric population. The primary focus of instruction will include normal and impaired swallow function, evaluation and treatment. Your instruction will include lecture, videos, small group discussion, and occasional labs. Of note, this is an introductory course to build a strong foundation of pediatric dysphagia. Your internships, fellowships and professional careers will help build upon this foundation. May be repeated up to 2 credits.

Prerequisite/Corequisite: SPHS 5330.

Learning Outcomes

1. Students will be able to define the anatomy and physiology of normal swallowing and causes of abnormal swallow in the pediatric population.
2. Students will be able to define dysphagia team components and describe protocol for clinical dysphagia evaluation in infants and children.
3. Students will demonstrate knowledge of dysphagia diagnosis and treatment as well as demonstrate ability to document diagnostic findings for the pediatric population.
4. Students will be able to explain indications and methods of non-oral nutrition and ethical considerations when working with pediatric clients from different cultural backgrounds.

SPHS 5340. Motor Speech Disorders
3 Credits (3)

The course will explore role of the central and peripheral motor systems in speech production and speech disorders related to abnormalities in these motor systems. We will emphasize the clinical characteristics, etiologies, neurological bases, and pathologies, assessment, and clinical management of the dysarthrias and apraxia of speech across the lifespan. Students will be able to recognize, assess, and serve the multiple needs of clients with dysarthria and apraxia. Restricted to: C DS,C D majors. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.

Learning Outcomes

1. Analyze the neurological and physiological mechanisms underlying motor speech disorders, differentiating between dysarthria types (flaccid, spastic, unilateral upper motor neuron, ataxic, hypokinetic hyperkinetic mixed dysarthria and apraxia of speech).
2. Apply evidence-based assessment techniques to diagnose motor speech disorders across diverse clinical populations.
3. Develop individualized treatment plans incorporating motor learning principles and augmentative communication strategies for individuals with motor speech disorders.
4. Critique current research on motor speech disorders to determine best practices for clinical decision-making.
5. Synthesize patient data, interdisciplinary input, and clinical observations to formulate differential diagnoses and prognostic outcomes for individuals with motor speech disorders.
6. Justify the selection of treatment approaches for motor speech disorders based on current theories of neuroplasticity and motor learning.

SPHS 5350. Voice Disorders/Head and Neck Anomalies
3 Credits (3)

In this course, you will review the laryngeal and respiratory anatomy and physiology necessary for normal voice production. The course will further introduce you to the etiology of different voice disorders of structural, neurological, and psychogenic origin, including phonotraumatic behaviors. We will discuss the assessment and differential diagnosis of these voice disorders and you will have an opportunity to synthesize this knowledge by researching treatment protocols that adequately meet the needs of clients with different voice disorders. Restricted to: C DS,C D

majors. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.

Learning Outcomes

1. Students will be able to recognize and describe relevant anatomy and physiology of normal voice production including laryngeal and respiratory anatomy and physiology.
2. Students will be able to identify and discuss structural/organic voice disorders.
3. Students will be able to identify and differentially diagnose functional voice disorders.
4. Students will be able to rate different degrees of voice quality and voice characteristics using perceptual rating scales.
5. Students will be able to explain and demonstrate selected therapy techniques for functionally and structurally based voice disorders.

SPHS 5360. Communication Disorders in Neurodiverse Populations
3 Credits (3)

This course is primarily aimed at providing meaningful foundations for the application of evidence-based intervention designs that enhance the development of communication skills for individuals with Autism Spectrum Disorders across the lifespan. May be repeated up to 6 credits.

Learning Outcomes

1. Identify and implement evidence-based interventions for individuals with ASD across a range of ages and abilities
2. Evaluate several evidence-based interventions and determine the best fit based on a client scenario
3. Discuss key features of evidence-based interventions for individuals with ASD
4. Implement evidenced communication interventions with individuals with ASD

SPHS 5410. Professional Issues and Multicultural Practices in Communication Disorders
3 Credits (3)

This course examines professional ethics and issues, reviews regulations and requirements for professional practice, provides an overview and discusses cultural considerations for studying, assessing and treating communication and swallowing disorders in culturally and linguistically diverse (CLD) populations. Restricted to: C DS,C D majors. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.

Learning Outcomes

1. Demonstrate use of ASHA code of ethics to interpret specific situations and determine whether they have followed the code.
2. Demonstrate knowledge of professional issues that affect speech-language pathology: may include but are not limited to trends in professional practice; academic program accreditation standards; ASHA practice policies and guidelines; cultural competency and patient centered care; educational legal requirements or policies; and reimbursement procedures.
3. Demonstrate knowledge of appropriate ASHA certification and state licensure requirements.

SPHS 5510. Advanced Spanish Morpho-Syntax for Education Professionals
3 Credits (3)

This class has been designed for Heritage Speakers of Spanish who work in educational settings. It will cover the essential linguistic theory and fundamental structures of the Spanish language. This includes, but is not limited to, verb morphology, morphosyntactic and syntactic structures. The main goal of this course is to determine what usages fall within the norms of an individual's speech community, or if there are elements that fall outside those norms. Students have to be fluent in Spanish as course will be conducted in Spanish.

SPHS 5520. Best Practices in Bilingual/Multicultural Assessment for Practitioners
3 Credits (3)

The purpose of this course is to provide future speech-language pathologists, educational diagnosticians and special educators with a foundation for evaluating the linguistic, cognitive and academic skills of students from any cultural linguistic background. The course covers a review of the literature on best practices for working with interpreters during assessments. Practitioners will be expected to gather qualitative information about cultural/linguistic and educational histories of school-age children and integrate those results with the results of standardized tests. Restricted to: C DS,C D majors. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 6 credits.

Learning Outcomes

1. Students will be able to summarize cross-cultural differences in communication styles of various cultural groups, and analyze and critically evaluate how these differences impact speech-language services.
2. Students will be able to identify cultural and linguistic variables that may impact speech-language pathology services to members of specific culturally and linguistically diverse (CLD) groups.
3. Students will be able to use culturally and linguistically appropriate assessment tools and practice for diagnosing and distinguishing language disorder vs language difference, describe potential limitations of standardized tests with CLD clients and explain how to use alternative, nonstandardized methods for nonbiased assessment.
4. Students will learn to use culturally and linguistically appropriate intervention strategies for CLD children with speech-language disorders.

SPHS 5988. Clinical Education
1 Credit (1)

This course will provide students with the knowledge base necessary to initiate and successfully complete clinical practicum in Communication Disorders. This course will complement SPHS 5990 (Clinical Practicum) during the first fall and spring semester of the the graduate program. Students will be introduced to current knowledge of the principles and methods of prevention, assessment, and intervention for persons with communication and swallowing disorders, including standards of ethical conduct and interprofessional education. Restricted to: C DS,C D majors. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 4 credits.

Prerequisite/Corequisite: SPHS 5990.

Learning Outcomes

1. Students will recognize treatment strategies used in various clinical settings to work with clients and their families from various cultural backgrounds.
2. Students will understand the importance of ethical and confidential service delivery, including HIPAA and the ASHA Code of Ethics.
3. Students will be able to identify characteristics of professional communication, including report writing, clinical documentation, and the creation of short and long-term clinical goals.
4. Students will demonstrate understanding of critical elements of professional verbal communication with clients, their families, and other professionals.

SPHS 5989. Externship in Communication Disorders
3-9 Credits (3-9)
Students will engage in diagnostic and therapeutic contact with individuals who exhibit speech, language, communication, feeding and/or swallowing disorders. Students will be supervised by licensed Speech-Language Pathologists at the designated setting. The experience will include treatment planning, goal and report writing, patient/parent/family counseling and education, and any additional tasks required. Restricted to: C DS majors. By the time of graduation, all SPHS courses need to be passed with a B or better. May be repeated up to 15 credits.
Prerequisite: Completion of a minimum of 8 credits of SPHS 5990 with a grade of B or better.
Learning Outcomes
1. Students will demonstrate the skills necessary to plan and execute an assessment of clients with communication and swallowing disorders at varying severity levels while under the direction of a certified SLP.
2. Students will demonstrate the skills necessary to plan and implement the treatment of clients with communication and swallowing disorders at varying severity levels while under the direction of a certified SLP.
3. Students will demonstrate the principles and methods of identifying and preventing communication swallowing disorders.

SPHS 5990. Practicum in Speech-Language Pathology
1-4 Credits (1-4)
Students will have the opportunity to engage in diagnostic and therapeutic contact with individuals who exhibit speech, language and feeding/swallowing disorders. The experience will include treatment planning, report writing, and patient/parent counseling. Students will be assigned to clients in the ERG Speech and Hearing Center, and may also be assigned to outside mini-externship sites. All students will be supervised by licensed Speech-Language Pathologists. Restricted to: C DS,C D majors. May be repeated up to 15 credits.
Prerequisite: Good standing in the graduate school; a course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.
Learning Outcomes
1. Students will be able to explain a variety of therapeutic approaches, and how to apply these approaches to different communication disorders.
2. Students will be able to select appropriate methods of assessment and treatment based on client presentation.
3. Students will collect clinical data and analyze the data to determine appropriate treatment goals.
4. Students will create and implement treatment plans to target treatment goals.

SPHS 5996. Special Topics
1-9 Credits (1-9)
Individual and/or group study of special topics identified by subtitle. Restricted to: C DS majors. May be repeated up to 9 credits.
Prerequisite: Prior arrangement with faculty; a course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.
Learning Outcomes
1. Varies

SPHS 5999. Master's Thesis
1-15 Credits (1-15)
This is a thesis course and will require you to work with your thesis advisor independently to complete a thesis that meets the requirements of the Graduate School. May be repeated up to 15 credits.
Learning Outcomes
1. Formulate research question(s) by (a) identifying a specific focus of research and (b) reviewing the current literature to identify gaps in the research.
2. Implement an appropriate research method (experimental research project, literature review) – including, as appropriate, IRB approval, data collection, and data analysis – that (a) is aligned with standard procedures in the field, (b) sufficiently addresses the question(s) posed, and (c) is feasible given the time and resources available.
3. Prepare a thesis that meets the standards set by the thesis advisor, the committee, and the Graduate School.

SPMD-SPORTS MEDICINE

SPMD 1110. Introduction to Athletic Training
3 Credits (3)
Introduction to the principles of athletic training. May be repeated up to 3 credits.
Learning Outcomes
1. Understand the historical development of athletic training and sports medicine.
2. Understand the knowledge and experiences needed to become a Certified Athletic Trainer.
3. Understand the specific responsibilities and duties of an athletic trainer.
4. Understand the diverse jobs settings within the profession of athletic training.
5. Understand the relationship between the athletic trainer and the sports medicine team.
6. Understand some of the general and specific injuries and medical conditions that occur in athletics;their causes, signs and symptoms, treatments, rehabilitation, and prevention.
7. Understand some of the contemporary issues and problems facing the athletic training profession.

SPMD 1120. Medical Terminology
3 Credits (3)
Study of the structure of medical language with emphasis on sports medicine-related terminology. To include analysis and interpretation of medical documentation. Restricted to: Las Cruces campus only.
Learning Outcomes
1. Master the fundamentals of word analysis, including the separation of terms into word roots or combining forms, common prefixes, and suffixes.
2. Differentiate types of medical terms and the relationships among terms.
3. Develop a proficiency in the use of physiological and anatomical terms as reflected in medical documents.
4. Master the terms, words, phrases, and symbols that describe the human body in its various states of health and disease, including essential anatomical terms.

SPMD 1190. Clinical Practicum I
2 Credits (2)
Introduction to the clinical aspects of the athletic training education program. Must maintain at least 3.0 GPA. May be repeated up to 4 credits.
Learning Outcomes
1. The Athletic Training Program application procedures.
2. The ability to perform selected taping and wrapping techniques.

3. Knowledge of HIPAA guidelines, pre-participation physical examinations, environmental illnesses, the history of Athletic Training and its governing bodies, Evidence Based Practice and its implications in the field of athletic training, evaluation procedures for the injured athlete, NMSU AT program and its affiliated clinical sites.
4. Proper documentation for the athletic training environment including SOAP notes.

SPMD 1195. Clinical Practicum II
3 Credits (3)
Athletic training related content and psycho-motor skills are introduced, enhanced, and assessed in the classroom and clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses while providing increased depth of understanding and clinical practice. Must maintain a 3.0 GPA. May be repeated up to 3 credits.
Learning Outcomes
1. Demonstrate knowledge and skill in emergency situation prevention, recognition, and management.
2. Demonstrate proficiency in basic skills of musculoskeletal injury recognition and management.
3. Demonstrate competency in basic pre-participation exam skills, including but not limited to taking vital signs.
4. Demonstrate competency in wound care and first aid.

SPMD 1310. Introduction to Kinesiology
3 Credits (3)
An introduction to the field of Kinesiology which will explore areas such as exercise physiology, sport and exercise psychology, motor behavior, biomechanics, strength and conditioning, exercise prescription, as well as professional and graduate programs, and allied health and applied careers opportunities.
Learning Outcomes

SPMD 1350. Social Foundations of Physical Activity
3 Credits (3)
Historical and cultural foundations and vocational, scientific, and educational data on careers in health education, physical education, and recreation.
Learning Outcomes
1. Improve students' knowledge of foundations of physical education. (Research) (Standard 4 j, k, l, m, o, p)
2. Improve students' abilities to analyze current physical activity issues based on historical, philosophical, sociological, and psychological perspectives. (Research) (Standard 4 l, m, e, g)
3. Improve students' knowledge of and ability to critically analyze how gender, race, social class, sexual orientation, and ability issues affect physical education and performance programs. (Research, Diversity) (Standard 4j, k, l, m, o; Standard 2 d, g, j, f, k)
4. Improve students' knowledge of forces influencing the development of physical education programs. In particular, attitudes, values, and beliefs about gender, race, social class, sexual orientation, and ability, etc. (Diversity, Practitioners, Reflection, Pedagogy) (Standard 1 a, b, h, l; Standard 4 j, k, l, m, o; Standard 2 a, d, g, j, f, k)
5. Improve students' knowledge of strategies for becoming an advocate in the school and/or community to promote a variety of physical activity opportunities. (Practitioners) (Standard 2 m, n; Standard 3 n, o, p, q, r; Standard 10 d, j, p
6. Improve students' knowledge of current educational issues and trends. In particular, socio-cultural issues that affect educational, fitness, and sports settings. (Diversity, Research) (Standard 4 j, k, l, m,o, p Standard 9 a, c, e, f m, n)
7. Improve students' knowledge of how students' learning is influenced by individual experiences, talents, and prior learning, including language and family/community values and conditions. (Diversity, Research) (Standard 1 b, h, l; Standard 2 d, g, j, k, m, n, o; Standard 3 l)
8. Improve students' knowledge of the impact of international changes on the content of physical education, fitness, and sports programs. (Research) (Standard 4 j, k, l, m, o, p)
9. Improve students' ability to critically analyze how gender, race, sexuality and social class issues affect how we view the body, and how these views can affect students' health and participation in physical education, fitness, and sports programs. (Diversity, Reflection) (Standard 2 d, g, j, f, k, m, o) 1
10. Improve students' ability to become critically aware of how their feelings, beliefs, and values in relation to gender, race, social class, sexual orientation, and ability issues will affect their abilities to work as professionals in the fields of physical education, sport, or fitness. (Diversity, Reflection) (Standard 2d, g, j, f, k, m, o Standard 9 e, d, g, l, m) 1
11. Improve students' knowledge of and ability to critically analyze cultural stereotypes of diverse populations of people. (Diversity) (Standard 2 d, g, j, f, k, m, o) 1
12. Improve students' knowledge of how cultural stereotypes influence the development of physical education, fitness and sport programs. (Research, Diversity) (Standard 2 d, g, j, f, k, m, o; Standard 4 j, k, m, o, p, q Standard 8 p) 1
13. Improve students' knowledge of how groups influence individuals, and how individuals influence groups in a democratic society. (Diversity) (Standard 2 d, g, j, f, k, m, o; Standard 4 m, p;) 1
14. Improve students' abilities to communicate in ways that demonstrate sensitivity to all learners. (Diversity, Effectiveness) (Standard 1 d, h, l; Standard 2 d, g, j, f, k, m, o) 1
15. Students will demonstrate through writing the ability to apply the issues discussed in class to their specific fields in ways that benefit society. (Evaluation) (Standard 9 e, g, l, m) 1
16. Students will improve their ability to take the content from readings and present it in thought provoking ways to their classmates. (Research, Evaluation, Reflection) (Standard 9 e, g, l, m; Standard 10 a, d, h, n) 1
17. Writing proficiency is required for a passing grade in this course. (Standard 4 l) 1
18. Improve students' abilities to use computers and other technologies to communicate, network, and/or foster inquiry. (Standard 10 g) 1
19. Consult professional literature, colleagues, and other resources to develop as a professional.(Standard 10 e, f, h, l, n, r)

SPMD 2210. Anatomy and Physiology I
3 Credits (3)
Detailed study of the structure and function of the human musculoskeletal, cardiovascular, respiratory, and peripheral nervous systems. Designed specifically for students interested in allied health professions.
Learning Outcomes
1. The student will learn and identify bones, connective tissue, joints and muscular structures of the human body.
2. The student will study joints and associated structures of the body.
3. The student will learn about skeletal muscle, origins, insertions, and actions.

4. The student will learn about the fundamentals of the nervous system and associated structures.
5. The student will learn about smooth and cardiac muscle and their association actions.
6. The student will learn the structures associated with the cardiovascular system (heart and blood vessels).
7. The student will learn the location of all visceral organs.
8. Evaluation of knowledge is determined through practical identification of anatomical structures via written opened ended exams.

SPMD 2210L. Anatomy and Physiology Laboratory
1 Credit (1P)
Students will engage in activities designed to enhance appreciation of the anatomical structures related to the content areas for SPMD 2210. Restricted to Las Cruces campus only.
Learning Outcomes
1. The student will learn and identify bones, connective tissue, joints and muscular structures of the human body.
2. The student will study joints and associated structures of the body.
3. The student will learn about skeletal muscle, origins, insertions, and actions.
4. The student will learn about the fundamentals of the nervous system and associated structures.
5. The student will learn about smooth and cardiac muscle and their association actions.
6. The student will learn the structures associated with the cardiovascular system (heart and blood vessels).
7. The student will learn the location of all visceral organs.
8. Evaluation of knowledge is determined through practical identification of anatomical structures via written opened ended exams.

SPMD 2225. Anatomy and Physiology II
3 Credits (3)
This course is the second of two that serve as an introduction to human anatomy and physiology for any student interested in allied health and/or kinesiology. The course entails describing, explaining, and analyzing structure and function from the submicroscopic to the organismal level with emphasis on specific cellular, tissue, and organ structure and physiology, and organ system structure and function# specifically the endocrine, urinary, digestive, integumentary, renal, central nervous, and reproductive systems. Additionally, an analysis of these concepts is included: fluid and electrolyte balance, pregnancy, growth and development from zygote to newborn, and heredity.
Prerequisite: SPMD 2210 or BIOL 2210.
Learning Outcomes
1. Identify and describe the major anatomical features of the endocrine, lymphatic, digestive, integumentary, renal, urinary, and reproductive systems.
2. Analyze the physiological roles of the endocrine, lymphatic, digestive, urinary, central nervous, immune, and reproductive systems in maintaining homeostasis in the human body.
3. Explain how fluid and electrolyte balance is maintained in the human body.
4. Compare and contrast the anatomy and physiology of male and female reproductive systems.
5. Describe pregnancy from conception to parturition including human growth and development from zygote to newborn.
6. Explain heredity and genetic control.

SPMD 2225L. Anatomy and Physiology II Lab
1 Credit (1)
This is the second in a series of two laboratory courses designed to introduce laboratory practices and techniques for human anatomy and physiology, from the basic cell structure through the organ system level# specifically the endocrine, digestive, lymphatic, respiratory, urinary, and reproductive systems.
Prerequisites: SPMD 2210; SPMD 2210L; or BIOL 2210; BIOL 2210L.
Learning Outcomes
1. Apply the scientific method correctly.
2. Collect, analyze, and interpret scientific data.
3. Use laboratory equipment correctly and safely.
4. Identify the anatomical components of human tissues, organs, and organ systems using models, diagrams, illustrations, or cadaver specimens.
5. Describe the functional characteristics of human tissues, organs, and organ systems using models, diagrams, illustrations, or cadaver specimens.
6. Analyze the physiological processes of the endocrine, lymphatic, respiratory, digestive, urinary, and reproductive systems.
7. Analyze the physiological processes of fluid and electrolyte balance and acid base balance in the human body.
8. Analyze heredity and genetic control.

SPMD 2250. Fitness for Health and Sport
3 Credits (3)
A study of the fitness needs for health enhancement and sport participation.
Learning Outcomes
1. Recognize the importance of incorporating positive fitness/wellness habits within one's lifestyle in terms of enhancing longevity, disease prevention, and overall quality of life.
2. Examine various physiological benefits and adaptations to such factors as muscular strength, muscular endurance, cardiovascular fitness, flexibility, and body composition when certain stimuli are applied to each. Assessment of these characteristics will be witnessed primarily in practical experiences within the course's laboratory settings.
3. Identify current trends and/or health patterns within society in regards to scientific findings, declination in health habits, and increases in health ailments.
4. Compare various nutritional concepts, specifically proper dietary habits and their impact on weight management aspects.
5. Describe the role physical activity and sport specific training play on competitive athletic performance.

SPMD 2310. Career Preparation
1 Credit (1)
From concept to implementation: Career exploration, setting up degree plans, finding graduate programs, developing professional resumes, writing letters of application, seeking letters of recommendation, and interview preparation.
Learning Outcomes
1. Career opportunities within human movement and allied health fields
2. Chose both a primary and secondary career of their interest

3. Search for appropriate graduate schools to match their career choices
4. Create a plan by aligning their undergraduate curriculum with their career choices
5. Explore additional education (dual majors, minors, and certifications specific to their chosen field)
6. Study and create a professional resume
7. Create a curriculum vita as a historical reference for future job prospects
8. Write a professional letter of application for jobs and school applications
9. Learn how to seek "outstanding' letters of recommendation 1
10. Study appropriate interview protocol 1
11. Practice interviews (one on one, panel and group)

SPMD 3050. Therapeutic Modalities
4 Credits (4)
The physiological effects, indications, contraindication, dosage, and maintenance of therapeutic modalities related to the treatment of athletic or activity-related injuries. May be repeated up to 4 credits.
Prerequisite: SPMD 2210 or BIOL 2210; 2.75 GPA.
Learning Outcomes
1. Demonstrate proper assessment techniques to identify appropriate therapeutic modalities for the treatment of injury and illnesses.
2. Design treatment plans based upon sound clinical assessment and appropriate selection of modalities that address the physiological and psychological needs of the patient.
3. Demonstrate competence with the application of a wide variety of modalities including patient preparation, modality application and modification based upon clinical findings using principles of evidence based practice.
4. Perform appropriate documentation of treatments to include patient history, evaluation, treatment goals, expectations and treatment outcomes.
5. Demonstrate competence with the collection and analysis of baseline and post-treatment data to evaluate and interpret treatment outcomes based upon principles of evidence-based practice.

SPMD 3110. Racquet Sports
2 Credits (2)
Knowledge and skills related to the racquet sports of tennis, badminton, and pickleball with emphasis on developmental strategies and skill performance that influences pedagogical content knowledge. Administrative issues will be addressed.

SPMD 3120. Theory and Technique of Lifelong Outdoor Leisure Activities
2 Credits (2)
Knowledge and skills related to lifelong outdoor leisure activities, including the examination of environmental science and awareness, kinesiology, and fundamental motor skills.

SPMD 3130. Theory and Technique of Sports and Games
2 Credits (2)
Knowledge and skills related to team sports and games, with emphasis on developmental strategies and skill performance that influence pedagogical content knowledge. Administrative issues will also be addressed.

SPMD 3140. Designing Student Centered Afterschool Physical Activity Clubs
3 Credits (3)
Knowledge, skills and field based practical application for creating student centered and student designed after school physical activity clubs.

SPMD 3150. Theory and Technique of Dance and Rhythms
2 Credits (2)
Knowledge and skills related to dance and rhythms, with emphasis on the analysis of dance elements and its role in physical education.

SPMD 3160. Elementary School Physical Education
3 Credits (2+2P)
Methods for teaching physical education at the elementary level. Primary focus on creating a learning environment for the acquisition and enhancement of developmentally appropriate locomotor, manipulative, and nonmanipulative skills. Field experience included. Consent of Instructor required.
Prerequisite: GPA of 2.5.
Learning Outcomes
1. Improve your knowledge of K-5 physical education content, disciplinary concepts, and tools of inquiry related to the development of a physically educated person.
2. Improve your knowledge of and ability to plan instruction based on curriculum goals/objectives and students' experiences.
3. Improve your ability to design and teach developmentally appropriate K-5 physical education curriculum for diverse learners.
4. Improve your knowledge of, and ability to, teach a variety of manipulative, nonmanipulative and locomotor skills and concepts.
5. Improve your ability to teach using a variety of strategies such as cooperative learning, problem-based learning, direct instruction that facilitate learning.
6. Improve your ability to plan effective units/lessons to insure equity and sensitivity to the needs of students with diverse characteristics, including, critically analyzing content/curriculum in light of broad goals for education and b) structuring a safe, educational environment that facilitates learning for all students.
7. Improve your knowledge of and ability to help individuals work productively and cooperatively with others.
8. Improve your ability to create an equitable learning climate in which individual differences are respected and be able to model, teach, and integrate multicultural awareness, acceptance, and appreciation.
9. Improve your knowledge of and ability to incorporate critical thinking, problem solving and creative exploration into your lessons. 1
10. Improve your knowledge of professional literature, research, organizations, and other technological resources for continuing professional development. 1
11. Improve your knowledge of and ability to use appropriate professional behavior. 1
12. Improve your ability to model appropriate verbal and written communications. 1
13. Improve your ability to encourage students to recognize, question, and interpret ideas from a variety of perspectives.

SPMD 3240. Research Methods in Kinesiology
3 Credits (3)
This course will provide you with a foundational understanding of research methods. Specifically, the course is designed to prepare you to critically read, understand, and evaluate research; retrieve scholarly articles; and develop research-related skills for future graduate education and/or professional work in kinesiology.

Learning Outcomes

1. Research a topic of interest using scholarly sources.
2. Identify a research problem based on relevant literature.
3. Compare research methods in various kinesiology subdisciplines.
4. Discuss ethical issues in research.
5. Design a research methodology to answer a kinesiology question.

SPMD 3250. Introduction to Exercise Science: Exercise Physiology and Biomechanics
3 Credits (3)
This course serves to provide a broad introduction to both the physiology of exercise and the mechanics of human movement. The conceptual framework of the course will allow for the development of a broad knowledge base regarding these concepts and the latter portions of the course will focus on real world application of the concepts.
Learning Outcomes

1. Students will learn a basic introduction to both exercise physiology and biomechanics and describe physiological systems and their relationship to exercise.
2. Explain how different forces affect human movement.
3. Evaluate current research in exercise physiology and biomechanics.
4. Apply exercise science concepts to real-world examples.
5. Integrate exercise science concepts into a physical activity lesson.

SPMD 3310. Lifetime Activities
2 Credits (2)
Knowledge and skills related to the lifetime activities of swimming, weight training, and other fitness promoting activities with emphasis on learning progressions.
Prerequisite: GPA 2.5.
Learning Outcomes

1. All course objectives are linked to the InTASC Teaching Standards
2. Improve your ability to design and teach developmentally appropriate fitness lesson plans for diverse learners (e.g. aerobics, yoga, strength training). (Standard 7 a, b, c, l, j Standard 8 a, b, d)
3. Improve your ability to modify instructions, lesson plans and tasks based on students' strengths and needs. (Standard 1 b, Standard 3 e, Standard 7 b, c, i, j, l, Standard 8 a, b, d)
4. Improve your knowledge of, and ability to teach a variety fitness content (Standard 7 a, g, h, k, l, n)
5. Improve your ability to plan effective lesson plans to insure equity and sensitivity to students with diverse characteristics. This includes structuring a safe, educational environment that facilitates learning for all students. (Standard 3, e, Standard 7 q, i)
6. Improve your ability to use self-assessment and peer-assessment to reflect on your teaching and plan for adaptations/adjustments (Standard 8 b, d, Standard 9 g).
7. Improve your ability to evaluate and modify instructional resources and curriculum to better meet the needs of their students. (Standard 4 f, Standard 7 g, Standard 8 a)

SPMD 3350. Inferential Statistics in Sport and Exercise Science
3 Credits (3)
Statistical concepts and methods basic to experiential research to include normal distribution, z-tests, t-tests, analysis of variance and regression analysis. An understanding of sport and exercise science theory is required for students enrolling in this course.
Learning Outcomes

1. Express mathematical information symbolically, visually, numerically, and verbally.
2. Employ quantitative methods, such as arithmetic, algebra, geometry, or statistics to solve problems.
3. Evaluate mathematical results for reasonableness.
4. Employ technology to organize, analyze, and present statistical information.
5. Interpret and draw inferences from mathematical models such as formulas, graphs, tables, and schematics.
6. Critically evaluate statistical outcomes for their practical significance.

SPMD 3410. Exercise Physiology
3 Credits (3)
Basic physiological principles as they apply to exercise and fitness programs. Laboratory experiences included. Requires 2.75 GPA.
Prerequisite: SPMD 2210 or BIOL 2210; GPA 2.75.
Learning Outcomes

1. Describe the structure and function of skeletal muscle.
2. Illustrate physiological responses and adaptations to acute bout of exercise as well as to exercise training.
3. Describe the structure and function of the cardiorespiratory system.
4. Describe age and sex considerations in sport and exercise.
5. Demonstrate effects of physical activity for health and fitness.
6. Explain the intervention strategies for athletic success.
7. Describe the laboratory procedures used to study the human body system.

SPMD 3410L. Exercise Physiology Lab
1 Credit (1P)
Laboratory experiments emphasizing the understanding of fundamental physiological mechanisms, regulating responses, and adaptation to exercise. Basic analytical methodologies pertaining to the energy, muscular and circulatorespiratory systems. Includes factors affecting physiological performance capacities and experimental basis of exercise assessment and training.
Prerequisite: SPMD 2210, SPMD 2210L.
Corequisite: SPMD 3410.
Learning Outcomes

1. Develop basic skills and competencies in clinical and experimental laboratory assessment techniques. Emphasis is placed on a healthy population with introductory concepts for special populations.
2. Understand the theory behind basic tests used in the exercise physiology laboratory.

SPMD 3450. Biomechanics
3 Credits (3)
The application of anatomical, mechanical and electrical concepts to better understand the fundamental nature of human movement.
Prerequisite: SPMD 2210 or BIOL 2210, and GPA of 2.75.
Learning Outcomes

1. Understand how human motion is generated using basic anatomical, kinematic, and kinetic concepts, laws, and principles.
2. Demonstrate an understanding of linear and angular motion.
3. Describe human motion using appropriate, well-defined terminology.
4. Demonstrate an understanding of how the body is affected by forces.
5. Utilize kinematic and kinetic concepts to solve computational and practical problems.

SPMD 3450L. Biomechanics Laboratory
1 Credit (1)
This course serves to provide an introduction to human movement and its analysis. The conceptual framework of the course will allow for the

application of anatomical, mechanical, and electrical concepts in order to better understand the fundamental nature of movement.
Prerequisite: SPMD 2210 or BIOL 2210, GPA 2.75.
Corequisite: SPMD 3450.
Learning Outcomes
1. Utilize kinematic and kinetic concepts to solve computational and practical problems.
2. Gain exposure to the various data collection and analysis tools in biomechanics.
3. Apply conceptual biomechanics knowledge to biomechanics datasets.
4. Collaborate in student teams to develop a biomechanics research proposal.

SPMD 3550. Psychology of Sport
3 Credits (3)
Development of coaching techniques to enhance sport performance based on understanding and use of psychological principles.
Prerequisite: GPA 2.75.
Learning Outcomes
1. Identify psychological characteristics associated with peak performance.
2. Recognize and define the psychological constructs including, but not limited to, confidence, motivation, stress/anxiety, and arousal.
3. Understand how personal factors and situational factors can affect human performance.
4. Describe and explain factors practitioners should consider when diagnosing, designing, and implementing a mental training intervention.
5. Read, evaluate, and apply sport psychology literature.

SPMD 3610. Health and Exercise Psychology
3 Credits (3)
The course examines the reciprocal relationship among physical activity, exercise behavior, and psychological determinants associated with adopting and maintaining an exercise program. Topics include theories of behavioral change, exercise psychology interventions, the benefits/pitfalls of exercise, and psychological factors influencing patient rehabilitation.
Prerequisite: GPA 2.75.
Learning Outcomes
1. Describe and compare various theories for explaining health and exercise behaviors.
2. Define key constructs prevalent in motivating clients to maintain or enhance health and exercise behaviors.
3. Describe and explain relationships between various antecedents of exercise and exercise as well as between exercise and various outcomes.
4. Apply health and exercise psychology constructs, such as motivation, mental health, and personality, to realistic scenarios to help promote health and exercise behaviors.

SPMD 3650V. Motor Development
3 Credits (3)
Covers development of motor skills from infancy through maturity. Focus on the principles of motor development, early motor behavior, stage theory, and assessment. Field experiences will augment lecture and readings.
Prerequisite: GPA 2.5.
Learning Outcomes
1. Define and discuss key terms, concepts, and theories related to lifespan motor development.
2. Analyze the various constraints that surround the development of motor skills and discuss how they contribute to the resulting motor skill behavior.
3. Explain key processes, sequences, factors, and milestones related to various stages of motor development across the life span.
4. Apply theoretical knowledge in a real-world setting through structured field observations of children at various lifespan and developmental stages.
5. Understand basic biomechanical processes as they apply to developmental change.
6. Describe the qualitative as well as quantitative changes that occur in fundamental motor skills (walking, running, jumping, hopping, throwing, kicking, catching, and striking).
7. Assess developmental levels of fundamental motor skills on video and in real-world settings.
8. Identify motor development phenomena that are universal while applying concepts of environmental and sociocultural constraints that contribute to individual variability in motor development.

SPMD 3710. Motor Learning
3 Credits (3)
An examination of the theoretical foundations and related literature that underline the learning, performing, and retention of motor skills with implications for effective teaching and coaching.
Prerequisite: GPA 2.5.
Learning Outcomes
1. Assess functional differences between motor skill types.
2. Compare motor control theories and how they control human movement.
3. Critically evaluate current research in motor learning.
4. Recommend strategies to improve motor learning in both therapy and sport settings.
5. Facilitate a practical example of motor learning over time.

SPMD 4015. Therapeutic Exercise
3 Credits (3)
The physiological effects, indications, contraindications, dosage, and maintenance of therapeutic modalities related to the treatment of athletic or activity-related injuries. Must maintain a 3.0 GPA. May be repeated up to 3 credits.
Learning Outcomes
1. Apply appropriate clinical reasoning to the selection of therapeutic exercises based upon evidence-based practice guidelines, relevant physical findings, indications, contradictions and precautions.
2. Demonstrate appropriate application of therapeutic exercises and techniques including selection, application, patient instruction, and documentation.
3. Design an individualized therapeutic exercise program incorporating appropriate modifications for tissue repair timelines, physiological and psychological factors, and any additional clinical findings.
4. Demonstrate effective assessment skills to determine safe levels of physical activity for patients.

SPMD 4095. Clinical Practicum VII
3 Credits (3)
Athletic training psycho-motor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and

proficiencies previously instructed in didactic courses. Students may complete a general medical rotation as part of this course. Must maintain 3.0 GPA. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes

1. Be prepared to sit for the Board of Certification (BOC) examination.
2. Confidently understand the BOC exam format, and method of delivery.
3. Meet the requirements to maintain certification, including evidence based practice requirements and continuing education units and their reporting cycles.
4. Demonstrate competence in in the following educational content areas for the practice of Athletic Training: evidence-based practice, prevention and health promotion, clinical examination and diagnosis, acute care of injury and illness, therapeutic interventions, psychosocial strategies and referral, healthcare administration, professional development and responsibility.

SPMD 4210. Advanced Exercise Physiology
3 Credits (3)

Detailed study of the integrated response of neuromuscular, cardiovascular, and respiratory systems to acute and chronic exercise, nutrition, and environmental conditions with a strong emphasis on laboratory experiences.

Prerequisite: SPMD 3410 and GPA of 2.75 or consent of instructor.

Learning Outcomes

1. Fundamental concepts about nutrition and it application to human performance
2. Advanced understanding of nutrition and its association with human bioenergetics
3. Human bioenergetics and its responsibility for performance enhancement and outcomes
4. Energy transfer and expenditure under various physical and environmental conditions
5. Pulmonary and cardiovascular responses to exercise
6. Cardiovascular and cellular adaptations to altitude

SPMD 4250. Principles of Strength and Conditioning
3 Credits (3)

Application of research, theory, and methods of high-intensity, resistive overload training. Performance-specific topics include management, nutrition. Requires SPMD 2210 and SPMD 3410; GPA of 2.75.

Prerequisite: SPMD 3410; SPMD 2210 or BIOL 2210; GPA 2.75.

Learning Outcomes

1. Students will examine both applied and theory-based strength conditioning concepts by applying designated guidelines set forth by the National Strength and Conditioning Association (NSCA).
2. Students will discuss various acute and chronic human performance adaptations by examining practical examples involving (but not limited to) musculoskeletal adaptation, muscular power output, speed and agility characteristics, plyometric training, body composition characteristics, and cardiovascular characteristics, among many others.
3. Students will recognize strength and conditioning adaptations regarding specific groups, such as youth, female, and elderly populations by contrasting various case studies that feature these populations.
4. Students will examine the administration of human performance testing/assessments on subjects of various skill-levels, experience, and athletic backgrounds, while understanding reliability and validity concerns of said assessments, accomplishing this by participating in practical-based performance testing featured in the course's lab component.
5. Students will analyze strength and conditioning testing results in order to properly prescribe a complete exercise regimen for an individual, based on their sport- or fitness-specific goals, accomplishing this primarily through the course's capstone final project.
6. Students will examine the practicality of strength training towards today's athlete as well as how proper periodization implementation affects this mode of activity, accomplishing this by applying both traditional and undulated periodization guidelines.
7. This course will prepare students to sit for the NSCA's Certified Strength Conditioning Specialist (CSCS) exam by relying upon human performance guidelines set forth by the NSCA along with implementing published study resources provided by the NSCA.

SPMD 4250L. Principles of Strength and Conditioning Laboratory
1 Credit (2P)

An applied examination of the theory, principles, rules and regulations associated with various strength and conditioning exercises to include but not limited to Olympic lifting, powerlifting, bodybuilding, plyometrics, speed, agility and speed-endurance development. Lab required for Kinesiology majors.

Prerequisite: SPMD 2210 or BIOL 2210, and SPMD 3410; GPA 2.75.

Corequisite: SPMD 4250.

Learning Outcomes

1. Students will examine commonly relied upon human performance testing practices towards various exercise science-based concepts by applying guidelines set forth by the National Strength and Conditioning Association (NSCA).
2. Students will assess various physiological adaptations by conducting performance tests that target muscular power output, speed, agility, anaerobic capacity, aerobic capacity, vertical jumping, plyometric training, and non-traditional training modes (among numerous others).
3. Students will demonstrate proficiency towards proper administration of human performance assessments by effectively conducting, instructing, and demonstrating said assessments and physical capabilities.
4. Students will properly evaluate and interpret human performance testing results by documenting their own performance test results as well their peers' and applying these data to set norms commonly relied upon by professionals in the field.
5. Students will value the importance of effective and efficient training methodologies based on the varying needs of today's physically active population, accomplished by examining the role physical activity and sport-specific training play on competitive athletic performance.
6. Students will use this lab to prepare and sit for the NSCA's Certified Strength Conditioning Specialist (CSCS) exam by relying upon human performance guidelines set forth by the NSCA along with implementing published study resources provided by the NSCA.

SPMD 4350. Exercise Testing and Prescription
3 Credits (3)

This combined lecture and lab class introduces students to the scientific basis for and principles of exercise testing and prescription. The focus is on basic approaches to exercise testing and prescription for healthy adults, while application to some special populations with chronic disease will be discussed.

Prerequisite: SPMD 2210 or BIOL 2210; SPMD 3410; GPA 2.75.

Learning Outcomes

1. Students will examine the application and procedures of both fitness and clinical based exercise tests commonly used in the Kinesiology field by participating in practical lab sessions conducted within this course.
2. Students will examine appropriate exercise prescription principles designed for healthy adults by applying published ACSM guidelines to various hypothetical subjects and case studies used in this course.
3. Students will analyze appropriate exercise programming strategies used by today's practitioners by studying such concepts as established physical activity (PA) minimums and defined lifestyle risks for cardiovascular disease (CVD).
4. Students will compare various pre-participation measures for exercise by utilizing such instruments as the PAR-Q and ACSM Algorithm screening tools.
5. This course will prepare students to sit for ACSM's credential-based exams by relying upon exercise prescription guidelines set forth by ACSM along with implementing published study resources provided by ACSM.

SPMD 4410. Exercise for Special Populations
3 Credits (3)

Fundamentals of kinesiology adapted for adults with various diseases and disabilities. Focus will be on the application of exercise assessment and prescription for selected conditions.

Prerequisite: SPMD 3410 or consent of instructor; GPA of 2.75.

Learning Outcomes

1. To develop an understanding of the pathophysiology of various cardiovascular, pulmonary, metabolic, skeletal muscle, orthopedic, and mental diseases.
2. To provide a medical perspective in the treatment and management of individuals with these conditions in which exercise therapy may be beneficial.
3. To provide a sound understanding of exercise testing and prescription for a variety of chronic disease states.
4. To be able to assess, interpret, and evaluate case studies of diseased individuals and to develop comprehensive rehabilitation programs based on this information.
5. To develop the ability to articulate / present information of various diseases / conditions in a professional manner both formally and in a one on one setting.

SPMD 4450. Pathophysiology and Human Function(s)
3 Credits (3)

Students will discuss basic concepts of pathophysiology such as inflammation & repair, infectious diseases, neoplasms, and diseases of specific physiological systems. In addition, students will discuss a variety of case studies, and in so doing will be able to relate pathophysiologic conditions to symptoms, activity restrictions and disability.

Prerequisite: SPMD 2210 or BIOL 2210; SPMD 2210L or BIOL 2210L; SPMD 3410; GPA 2.75.

Learning Outcomes

1. Students will develop knowledge about basic neurophysiological function of the central and peripheral nervous system
2. Individuals will develop knowledge about motor control theory and assessment of human movement.
3. Students will demonstrate their knowledge about the control processes of both gross and fine motor skills.
4. Students will apply knowledge of sensory physiology to the relationship with human performance.
5. Individuals will develop and improve their ability to communicate complex theories and physiological processes through both oral and written work.

SPMD 4510. Neurophysiology and Human Function
3 Credits (3)

Students will be introduced to a comprehensive study of the human nervous system. Fundamental structures of the central and peripheral nervous system will be discussed to understand the physiology of the brain and rest of the nervous system. This course will also enhance the understanding how sensory information reaches the brain and how information is processed, leading to effective action. In addition, students will be introduced to the basic concepts regarding neurodynamics, neurological mechanisms of pain, and pathophysiology of neurologic disorders/conditions, with emphasis placed on recognition, pathophysiologic signs/symptoms, assessment, and management of selected conditions.

Prerequisite: SPMD 2210 or BIOL 2210; SPMD 2210L or BIOL 2210L; SPMD 3410; and GPA of 2.75.

Learning Outcomes

1. Identify and describe the organization of the central and peripheral nervous systems, the structure and function of neurons and glia, and the anatomy of the brain and its internal and external structures.
2. Develop knowledge about the basic neurophysiological function of the central and peripheral nervous systems.
3. Describe the neurobiology and pathways of the special senses.
4. Identify and analyze major neurological disorders and mental health disorders and describe their clinical presentations.
5. Describe and understand the clinical examination process relevant to neurological injury, illness, and disease.

SPMD 4520. Adapted Physical Education
3 Credits (3)

Selection and scope of corrective activities in posture and body mechanics, and the adaptation of movement activities for the exceptional student.

Learning Outcomes

1. Students will learn to implement principles of inclusion into the practice of physical education.

SPMD 4530. Methods of Teaching Secondary Physical Education
6 Credits (6)

Theoretical and practical applications of curriculum, pedagogy and assessment for teaching secondary physical education. Provides the students opportunities to develop curriculum, teach, and assess student learning through a supervised practicum in both middle and high school physical education settings. Consent of Instructor required.

Prerequisite: SPMD 3160.

Learning Outcomes

1. Improve your knowledge of 6-12 physical education content, disciplinary concepts, and tools of inquiry related to the development of a physically educated person.
2. Improve your knowledge of and ability to plan instruction based on curriculum goals/objectives and students' experiences.
3. Improve your ability to design and teach developmentally appropriate 6-12 physical education curriculum for diverse learners.
4. Improve your knowledge of, or ability to, teach a variety of skills and concepts a Student-Centered Inquiry as Curriculum approach.
5. Improve your ability to teach using a variety of strategies such as cooperative learning, problem-based learning, direct instruction,

divergent convergent discovery, that facilitate student learning across difference.

6. Improve your ability to plan effective units/lessons to insure equity and sensitivity to the needs of students with diverse characteristics: this includes a) critically analyzing content/curriculum in light of broad goals for education and b) structuring a safe, educational environment that facilitates learning for all students.
7. Improve your knowledge of and ability to help individuals work productively and cooperatively with others to produce quality work.
8. Improve your ability to create an equitable learning climate in which individual differences are respected and be able to model, teach, and integrate multicultural awareness, acceptance, and appreciation.
9. Improve your knowledge of and ability to incorporate inquiry, critical thinking, problem solving and creative exploration into your lessons. 1
10. Improve your knowledge of professional literature, research, organizations, and other technological resources for continuing professional development. 1
11. Improve your knowledge of and ability to use appropriate professional behavior. 1
12. Improve your ability to model appropriate verbal and written communications. 1
13. Improve your ability to encourage students to recognize, question, and interpret health related ideas from a variety of perspectives. 1
14. Improve your ability to reflect on your teaching in relation to sound educational philosophy, social, moral and other educational issues, theoretical knowledge, research, and your personal beliefs and values. 1
15. Improve your ability to design and implement formal and informal practical assessments with students as a way to check for student learning. 1
16. Use a variety of formal and informal assessment techniques to assess learner performance, provide feedback, and communicate learner progress.

SPMD 4540. Psychology of Coaching in Sport
3 Credits (3)
This course is designed to focus on major topics and theories dealing with the social-psychological factors affecting the performance of athletes and teams, with practical suggestions for enhancing the effectiveness of teachers and coaches. The course will also focus on team and group dynamics that influence physical performance.
Prerequisite: SPMD 3550 or SPMD 3610.
Learning Outcomes

1. Examine current literature and popular media to consider the influence of coaching behaviors on human performance in sport and non-sport activities.
2. Compare coaching from a psychological perspective to current understandings in motor learning.
3. Evaluate coaching behavior using evidence-based sources and measurement tools.
4. Develop a coaching portfolio for a sport program of choice.

SPMD 4550. Exploring Extreme Human Performance
3 Credits (3)
A reading, writing and documentary based course studying human's quest and the related sacrifices associated with participating in extreme performance activities such as the Olympics, wakeboarding, snowboarding, military special forces, ultra-run events, marathons, etc. Consent of Instructor required.
Prerequisite: Consent of instructor and GPA 2.75.

SPMD 4610. Research Seminar
3 Credits (3P)
Capstone course for Kinesiology/Pre-Health minors. Consent of Instructor required.
Prerequisite: GPA 2.75.
Learning Outcomes

1. The Student Learning Outcomes are dependent on instructor and specific direction of course with individual group of students, similar to an independent study/research/practicum experience

SPMD 4620. Nutrition and Metabolism of Sport
3 Credits (3)
This course addresses the aspects of nutrition that are related to exercise performance. Emphasis will be placed on the bioenergetics systems, the components of nutrition, nutritional and body composition assessments, ergogenic aids, and diet modifications for physically active individuals and athletes.
Prerequisite: SPMD 2210, SPMD 3410.
Learning Outcomes

1. Describe the metabolism of macronutrients and micronutrients.
2. Clarify the effects of high and low-carbohydrate diets on exercise performance.
3. Explain the potential athletic benefits of manipulating fat content in our diet.
4. Discuss increasing protein intake to promote exercise adaptations.
5. Explain specific physiological functions of micronutrients.
6. Specify fluid intake recommendations before, during, and after exercise.
7. Calculate macronutrient recommendations for endurance athletes, strength/power athletes, and team sport athletes.
8. Provide nutritional recommendations for special populations of athletes.
9. Recommend nutrition strategies related to weight management goals . 1
10. Discuss the benefits and challenges of unique body composition assessments. 1
11. Provide macronutrient recommendations within a periodized training program. 1
12. Compare and contrast the ergogenic benefits of popular dietary supplements.

SPMD 4805. Emergency Response
2 Credits (2)
Comprehensive approach to the identification of risk factors, preparation of emergency action plans, and recognition and care of emergency medical conditions including those that may lead to sudden death. This is a hybrid course combining online instructional components and clinical skills experience including clinical safety (blood-borne pathogens, ECC, first-aid, etc), and on-field emergency management. Consent of Instructor required.
Learning Outcomes

1. Identify the individuals involved in the Emergency Response Team
2. Construct the components of an effective Emergency Action Plan.
3. Assess the scene and patient during an emergency situation.
4. Demonstrate proper universal precautions and wound care.
5. Demonstrate effective Cardiopulmonary Resuscitation, AED use.
6. Demonstrate effective Rescue Breathing Airway Management techniques.

7. Demonstrate effective splinting techniques.
8. Demonstrate understanding of the techniques utilized in cervical stabilization
9. Identify components of acute care for general medical and orthopedic emergencies

SPMD 4997. Problems
1-3 Credits (1-3)
Independent study in either Kinesiology and/or Athletic Training May be repeated up to 9 credits.
Learning Outcomes
1. Varies

SPMD 4998. Internship
6 Credits (6P)
A part-time internship in an approved wellness, fitness, athletic, recreation, research lab or other program as agreed upon by the internship supervisor. The student will gain experience in all phases of management and operation. This is a 6-hour internship which can be repeated for an additional 6-credit hours at the same or a different location allowing the student to gain one or multiple field experiences. Field instructor supervision will oversee the students performance. This internship may require relocation to a site outside of the Las Cruces area.
Learning Outcomes
1. Students will apply their academic program didactic knowledge, skills and abilities at a professional site gaining hands-on learning experiences under the supervision of a practicing professional
2. Students will learn in a working environment such that the internship becomes the capstone of their undergraduate education allowing them practical experience in a career field of their choice.

SPMD 5005. Foundations of Athletic Training
3 Credits (3)
This course provides an introduction to clinical decision making and covers standard techniques and procedures for the evaluation and diagnosis of musculoskeletal injuries and common illnesses, injury prevention concepts, documentation and management. Consent of Instructor required.
Learning Outcomes
1. Demonstration of clinical decision making skills
2. Articulation of standard techniques and procedures for evaluation and diagnosis
3. Produce standardized documentation of clinical findings.

SPMD 5010. Clinical & Functional Anatomy in Athletic Training
3 Credits (3)
This course allows students to develop applied knowledge and hands-on skills for future athletic training practitioners. Emphasizes skills for identifying musculoskeletal structures visually and via palpation, and then assessing their function. Use of anatomical and live human models to develop and demonstrate skills. Acceptance into the MSAT program.
Learning Outcomes
1. Demonstrate knowledge of human musculoskeletal structures and function.
2. Identification of boney landmarks for assessment of musculoskeletal conditions.
3. Demonstrate appropriate palpation of muscles, bones and joints for musculoskeletal assessment.
4. Demonstrate knowledge of actions, origins, insertions and innervations of the major muscle groups of the human body.
5. Demonstrate appropriate techniques for assessment of functional movements.

SPMD 5015. Behavioral Health, Wellness, and Prevention
3 Credits (3)
Exploration of models of patient care delivery in athletic training, behavioral health, wellness and prevention principles as they apply to an athletic or physically active population.
Learning Outcomes
1. Identify, refer and give support to athletes/patients with behavioral health conditions.
2. Collaborate with other healthcare providers to provide appropriate interventions for behavioral health and overall wellness.
3. Develop and implement strategies to mitigate risks associated with long-term health conditions across the lifespan including patient education.
4. Demonstrate competent communication and patient education strategies within a variety of behavioral health and wellness scenarios.
5. Articulate the importance and key components of a mental health emergency action plan.
6. Explore and analyze the impact of group identification including the intersectionality of multiple identities on health disparities, patient care and patient outcomes.

SPMD 5020. Graduate Athletic Training Research I
1-3 Credits (1-3)
Advanced research topics in athletic training. Students will explore research and evidence based practices within the field of athletic training. Students will work under the direct supervision of a Commission on Accreditation of Athletic Training Education (CAATE) accredited Athletic Training Program faculty member. Students should be prepared to further explore research topics within a specific discipline with the intent of disseminating and sharing information with the athletic training community. topics previously covered in SPMD 5310 (Graduate Athletic Training Seminar I) Students may engage in teaching and research opportunities in unique areas May be repeated up to 3 credits.
Learning Outcomes
1. Demonstrate increased knowledge within the designated topic areas identified for the semester.
2. Demonstrate increased skill in assessing and conducting research for the athletic training community

SPMD 5025. Graduate Athletic Training I
1-3 Credits (1-3)
Advanced clinical experiences and education in athletic training. Students will examine topics in athletic training in conjunction with faculty members within the Commission on the Accreditation of Athletic Training Education (CAATE) Athletic Training Program at New Mexico State University . Assessment of Athletic Training Program clinical proficiencies as described by the National Athletic Trainers' Association Education Council. May be repeated up to 3 credits.
Learning Outcomes
1. Demonstrate increased knowledge within the designated topic areas identified for the semester.
2. Demonstrate increased skill in teaching or academic preparation techniques as identified for the semester.

SPMD 5030. Graduate Athletic Training II
3 Credits (3)

Advanced clinical experiences and education in athletic training. Assessment of Athletic Training Program clinical proficiencies as described by the National Athletic Trainers' Association Education Council. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate increased knowledge within the designated topic areas identified for the semester.
2. Demonstrate increased skill in teaching or academic preparation techniques as identified for the semester.

SPMD 5050. Clinical Education I
3 Credits (3)

Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice. Consent of Instructor required.

Learning Outcomes

1. Demonstrate basic evaluation, taping, bracing and emergency care skills.
2. Select and properly fit protective equipment for a variety of injury and sport scenarios.
3. Demonstrate proper equipment removal for emergency care of the injured athlete.
4. Perform a pre-participation examination including physical evaluation, documentation and referral if needed.

SPMD 5120. Lower Extremity Injury Evaluation + Lab
4 Credits (4)

This course provides a comprehensive approach to the pathomechanics, clinical examination, diagnosis, role of clinical outcome measures and appropriate medical referral and treatment of orthopedic injuries and other conditions to the lower extremity. Consent of Instructor required.

Learning Outcomes

1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the lower extremity
2. Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient.
3. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries.
4. Determine and apply therapeutic interventions designed to maximize the patient's participation and health-related quality of life.
5. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries.

SPMD 5150. Clinical Education II
3 Credits (3)

Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.

Prerequisite: SPMD 5050.

Learning Outcomes

1. Students will become effective practitioners in the field of Athletic Training and Sports Medicine by utilizing critical thinking strategies based in evidence based practice theories combined with pedagogical knowledge of the concepts in Athletic Training.
2. Students will utilize their clinical experience and knowledge of injury evaluation to enhance their athletic training skills working with an athletic population under the supervision of a preceptor.

SPMD 5180. Therapeutic Interventions I
4 Credits (3+1P)

Stud of physical rehabilitation theory and techniques used as therapeutic intervention for orthopedic injuries and conditions.

Learning Outcomes

1. Demonstrate appropriate application techniques for therapeutic modalities to include thermal, electrical, ultrasound and mechanical therapeutic modalities.
2. Demonstrate proper clinical assessment techniques to establish treatment and rehabilitation plans for a variety of orthopedic injuries and conditions including proper documentation procedures.
3. Demonstrate knowledge of the physiological and pathological processes of trauma, wound healing and tissue repair and their role/ implications within the therapeutic intervention process.

SPMD 5205. Evidence Based Practice
2 Credits (2)

This course investigates the concepts of evidence based practice as it relates to musculoskeletal assessment, diagnosis and therapeutic interventions with a primary focus on clinician- and patient-oriented outcome measures and appropriate referral decisions. Students will explore primary literature focused on clinical questions related to a comprehensive approach to injury evaluation.

Learning Outcomes

1. Define evidence-based practice as it relates to athletic training clinical practice.
2. Explain the role of evidence in the clinical decision-making process.
3. Describe and differentiate the types of quantitative and qualitative research, research components, and levels of research evidence.
4. Describe a systematic approach (eg, five step approach) to create and answer a clinical question through review and application of existing research.
5. Develop a relevant clinical question using a pre-defined question format (eg, PICO= Patients, Intervention, Comparison, Outcomes; PIO = Patients, Intervention, Outcomes).

SPMD 5220. Upper Extremity Injury Evaluation + Lab
4 Credits (3+1P)

This course provides a comprehensive approach to the pathomechanics, clinical examination, diagnosis, role of clinical outcome measures and appropriate medical referral and treatment of orthopedic injuries and other conditions to the upper extremity. Consent of Instructor required.

Learning Outcomes

1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the upper extremity
2. Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient.
3. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries.
4. Determine a therapeutic intervention designed to maximize the patient's participation and health-related quality of life.
5. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries and optimize their patient's overall health and quality of life.

SPMD 5250. Immersive Clinical Experience
3 Credits (3P)

Integration of clinical competencies during an immersive, supervised, field based experience in athletic training to link theory into practice. May be repeated up to 6 credits.

Prerequisite: SPMD 5150.

Learning Outcomes

1. Students will be proficient in the day to day operations of an athletic training room.
2. This immersive experience will prepare students for future employment as a full-time athletic trainers.
3. Students will demonstrate skills in all aspects of athletic training including patient-centered care, clinical examination, diagnosis and intervention, prevention, health promotion and wellness and healthcare administration.

SPMD 5280. Therapeutic Interventions II
4 Credits (3+1P)
A detailed study of the physiological effects, indications, contraindication, dosage, and maintenance of modern therapeutic devices related to the treatment and rehabilitation of orthopedic injuries and conditions.
Prerequisite: SPMD 5180.
Learning Outcomes

1. Demonstrate proper clinical assessment techniques to establish treatment and rehabilitation plans for a variety of orthopedic injuries and conditions including proper documentation procedures.
2. Demonstrate knowledge of the physiological and pathological processes of trauma, wound healing and tissue repair and their role/implications within the therapeutic intervention process.
3. Design treatment plans based upon sound clinical assessment and appropriate selection of modalities that address the physiological and psychological needs of the patient.
4. Demonstrate competence with the collection and analysis of baseline and post-treatment data to evaluate and interpret treatment outcomes based upon principles of evidence-based practice.
5. Demonstrate competence with the application of a wide variety of modalities including patient preparation, modality application and modification based upon clinical findings using principles of evidence based practice.

SPMD 5310. Inferential Statistics in Sports and Exercise Science
3 Credits (3)
This course serves to provide an introduction to statistical analyses. The conceptual framework of the course will allow for the application of a variety of statistical concepts in order to better understand the nature of data associated with scientific literature publications. Consent of Instructor required for registration.
Learning Outcomes

1. Exhibit an understanding of basic statistical concepts and techniques that are consistent with contemporary and valid research in the field of exercise science.
2. Effectively organize data and accurately calculate appropriate statistics for specific research applications.
3. Exhibit an understanding of specific factors that affect validity, reliability and subjectivity of various data gathering techniques.
4. Exhibit knowledge of how to analyze and interpret data using current appropriate technology (SPSS).
5. Interpret performance and fitness data in order to make appropriate and relevant conclusions.
6. Select an appropriate statistical test upon being presented with a data set, interpret the statistical test, and present the results in APA format.

SPMD 5350. Principles of Strength and Conditioning
3 Credits (3)
Application of research, theory, and methods of high-intensity, resistance training. Performance-specific topics include management, nutrition, exercise prescription, periodization, lifting techniques, testing, and evaluation. Course will emphasize standards set forth by the National Strength and Conditioning Association preparing students interested in sitting for the NSCA certification examinations. Consent of Instructor
Learning Outcomes

1. Understanding of general physiology and its responses to acute and chronic exercise
2. Understanding of cardiovascular effects of exercise, training and sport
3. Understanding of strength training affects on special populations such as youth, women and the elderly
4. Understanding of musculoskeletal changes from exercise, training and sport
5. Practicality and application of power and strength training
6. Comprehension of training programs and how they pertain to different training aspects
7. Demonstrate principles of plyometrics and training
8. Understand and demonstrate principles of periodization

SPMD 5370. Research Methods in Kinesiology
3 Credits (3)
This course will provide students with graduate-level understanding of research methods. Specifically, the course is designed to prepare students to critically read, understand, and evaluate research; retrieve scholarly articles; and develop research-related skills for further graduate education and professional work. Students will be trained to become scientific thinkers rather than anecdotal thinkers.
Learning Outcomes

1. Be able to accurately identify a research problem.
2. Conduct a literature search and summarize literature to develop a research problem.
3. Develop a hypothesis and research statement appropriate to their specific research interests.
4. Determine an appropriate study design/method to test the hypothesis.
5. Demonstrate understanding of measurement concepts such as validity, reliability, scales of measurement, field tests, and laboratory tests.
6. Interpret statistical analyses, tables, and summaries presented in research.
7. Understand research ethics.
8. Use written and verbal forms for reporting research.

SPMD 5410. Biomechanics
3 Credits (3)
The application biomechanical analysis of human movement as it relates to human performance through the use of anatomical, mechanical and electrical concepts. Consent of Instructor
Learning Outcomes

1. The student will be able to competently assess physical anatomy, analyze linear and angular forces, examine gait, understand the relationships between kinetics and kinematics, understand how muscle and bone architecture impact human movement, and be familiar with the utilization of various data collection methods used in evaluating and improving human movement.

SPMD 5450. Exercise for Special Populations
3 Credits (3)

Fundamentals of kinesiology adapted for adults with various diseases and disabilities. Focus will be on the application of exercise assessment and prescription for selected conditions. Consent of Instructor

Learning Outcomes

1. To develop an understanding of the pathophysiology of various cardiovascular, pulmonary, metabolic, skeletal muscle, orthopedic, and mental diseases.
2. To provide a medical perspective in the treatment and management of individuals with these conditions in which exercise therapy may be beneficial.
3. To provide a sound understanding of exercise testing and prescription for a variety of chronic disease states.
4. To be able to assess, interpret, and evaluate case studies of diseased individuals and to develop comprehensive rehabilitation programs based on this information.
5. To develop the ability to articulate / present information of various diseases / conditions in a professional manner both formally and in a one on one setting.

SPMD 5510. Psychology of Sport
3 Credits (3)

Development of coaching techniques to enhance sport performance based on understanding and use of psychological principles. Consent of Instructor

Learning Outcomes

1. Identify psychological characteristics associated with peak performance
2. Describe and explain factors practitioners should consider when diagnosing, designing, and implementing a mental training intervention.
3. Recognize and define the psychological constructs of –for example but not limited to—concentration, confidence, motivation, stress/anxiety, and arousal.
4. Understand how personality attributes and the environment affect human performance and injury rehabilitation.

SPMD 5550. Skill Acquisition and Performance
3 Credits (3)

Behavioral and physiological examination factors that influence the acquisition and performance of motor skills. Consent of Instructor

Learning Outcomes

1. Describe and explain the principles and processes underlying skilled performance
2. Know the factors to consider when diagnosing, designing, and assessing learning experiences
3. Understand the elements of an effective instructional plan for skill acquisition

SPMD 5575. Advanced Motor Development
3 Credits (3)

Advanced coverage of motor development topics including: Theoretical perspectives of motor development; the sequential, age-related, continuous process of physical growth and maturation; changes in movement behavior from infancy to older adulthood; external influences on development of motor skills; research approaches in motor development. Consent of Instructor

Learning Outcomes

1. Describe the historical progression of motor development within the broader field of kinesiology
2. Explain the various theories and foundational concepts of motor development
3. Understand and apply the processes (social, cognitive, perceptual) involved in motor skill development throughout the lifespan (infancy, childhood, adolescence, adulthood)
4. Identify procedures and methodologies used to assess various aspects of motor development
5. Interpret the supporting literature and research related to the fundamental principles of motor development
6. Apply and transfer the knowledge gained to develop a research proposal to enhance understanding of a motor development topic of interest

SPMD 6005. Athletic Training Research I
2 Credits (2)

Instruction and development of research skills through the study of published reports and readings in athletic training and related fields. Consent of Instructor required.

Learning Outcomes

1. Describe a systematic approach (eg, five step approach) to create and answer a clinical question through review and application of existing research.
2. Develop skill in utilizing multiple scales for critical appraisal of literature and research studies.
3. Develop a relevant clinical question utilizing a predefined question format and conduct a literature review on the subject.
4. Describe multiple forms of research, research and literature resources and the differences between narrative reviews, systematic reviews and meta analyses.
5. Describe and apply concepts of diagnostic accuracy and clinical prediction rules as they pertain to patient centered care and evidence based practice.

SPMD 6010. Organization and Administration in Athletic Training
3 Credits (3)

Organization and administration of athletic training services including management, leadership, financial, human resources, facility, information technology and risk management.

Learning Outcomes

1. Students will employ values consistent with the NATA code of ethics for all health care administration actions.
2. Demonstrate knowledge of legal, ethical and risk management concepts in athletic training and health care administration.
3. Demonstrate mastery of a variety of health care management concepts.
4. Demonstrate comprehension of fiscal management strategies, resource management and facility design as it relates to athletic training.

SPMD 6020. Evaluation of the Head, Neck, Spine and Torso
3 Credits (3)

This course provides a comprehensive approach to the pathomechanics, clinical examination, diagnosis, role of clinical outcome measures and appropriate medical referral and treatment of orthopedic injuries and other conditions to the head, neck and spine.

Prerequisite: SPMD 5220.

Learning Outcomes

1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the head, neck, spine and torso.

2. Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient.
3. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries and illnesses.
4. Determine a therapeutic intervention designed to maximize the patient's participation and health-related quality of life.
5. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries and optimize their patients' overall health and quality of life.

SPMD 6050. Clinical Education III
3 Credits (3)
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.
Prerequisite: SPMD 5150.
Learning Outcomes
1. Students will become effective practitioners in the field of Athletic Training and Sports Medicine by utilizing critical thinking strategies based in evidence based practice theories combined with pedagogical knowledge of the concepts in Athletic Training.
2. Students will utilize their clinical experience and knowledge of injury evaluation to enhance their athletic training skills working with an athletic population under the supervision of a preceptor.

SPMD 6110. Professional Preparation
3 Credits (3)
Knowledge and skills for successful pursuit of athletic training credentials, employment and continuing professional competency; emphasis on current topics and issues contributing to the professional preparation of athletic training. Student must be enrolled in their final semester of the MSAT program to enroll in this course.
Learning Outcomes
1. Students will create a profile with the Board of Certification (BOC) in preparation for their BOC Examination
2. Students will analyze their individual strengths and weaknesses through practice examinations in order to prepare for a successful challenge of the BOC Examination
3. Students will demonstrate knowledge of basic human resources policies and procedures and the hiring process for athletic trainers.
4. Students will self-assess professional competence and create professional development plans according to personal and professional goals and requirements

SPMD 6150. Clinical Education IV
3 Credits (3)
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.
Prerequisite: SPMD 6050.
Learning Outcomes
1. Students will become effective practitioners in the field of Athletic Training and Sports Medicine by utilizing critical thinking strategies based in evidence based practice theories combined with pedagogical knowledge of the concepts in Athletic Training.
2. Students will utilize their clinical experience and knowledge of injury evaluation to enhance their athletic training skills working with an athletic population under the supervision of a preceptor.
3. Students will demonstrate professional behaviors congruent with the ethical standards of the profession of athletic training.
4. Students will develop, implement, and revise policies that pertain to prevention, preparedness, and response to medical emergencies and other critical incidents.

SPMD 6280. General Medical Conditions & Therapeutic Medications
4 Credits (3+1P)
Pathophysiology, assessment, and appropriate intervention and referral for general medical conditions and disabilities; common diagnostic tests and imaging assessment tools; commonly used therapeutic medications.
Prerequisite: SPMD 5280.
Learning Outcomes
1. Recognition of general medical conditions including emergent physical and psychological conditions for intervention, referral or return to play criteria as appropriate.
2. Demonstrate proper clinical examination techniques for the assessment of general medical conditions including signs and symptoms of catastrophic and emergent conditions.
3. Demonstrate knowledge of common therapeutic medications and the general medical conditions they treat within the fields of athletic training and sports medicine.
4. Demonstrate knowledge of the principles of pharmacology, including pharmacokinetics and pharmacodynamics, as they relate to the fields of athletic training and sports medicine.
5. Demonstrate knowledge of federal, state and local laws, regulations and procedures for proper storage, disposal, transportation, dispensing and documentation dealing with prescription and non-prescription medications.

SPMD 6310. The Social Construction of the Body
3 Credits (3)
This course will explore how people's health and physical activity experiences and choices are often shaped by cultural narratives and expectations of the male and female body. Designed for graduate students in allied health and physical activity professions

SPMD 6350. Advanced Exercise Physiology
3 Credits (3)
Detailed study of the integrated response of neuromuscular, cardiovascular and respiratory systems to acute and chronic exercise, nutrition and environmental conditions with a strong emphasis on laboratory experience. Consent of Instructor
Learning Outcomes
1. Fundamental concepts about nutrition and it application to human performance
2. Advanced understanding of nutrition and its association with human bioenergetics
3. Human bioenergetics and its responsibility for performance enhancement and outcomes
4. Energy transfer and expenditure under various physical and environmental conditions
5. Pulmonary and cardiovascular responses to exercise
6. Cardiovascular and cellular adaptations to altitude

SPMD 6410. Cardiovascular Physiology
3 Credits (3)
This graduate level course provides an in-depth study of cardiovascular structure and function. The course assumes that students have a strong background in human physiology. Topics include, but are not limited to: cellular structure of the heart and vascular system; cardiac function, including electrophysiology of the heart; vascular function; neurohumoral control of the heart and circulation, organ blood flow, exchange function

of the microcirculation; the impact of common cardiovascular diseases on cardiovascular structure and function, and cardiovascular adaptations to chronic exercise. Consent of Instructor

Learning Outcomes

1. The student will demonstrate a comprehensive knowledge cardiovascular structure and function
2. The student will be able to relate common cardiovascular pathophysiology to cardiovascular functional impairments and physical functional limitations.
3. The student will be able to discuss chronic exercise training adaptations on the cardiovascular system and their value as a treatment strategy for cardiovascular diseases.

SPMD 6450. Skeletal Muscle: Structure and Function
3 Credits (3)
Basic muscle morphology and physiology with molecular and cellular adaptations in skeletal muscle as consequences to varying exercise regimens. Consent of Instructor

Learning Outcomes

1. To gain knowledge of the structure and function of skeletal muscle
2. To gain knowledge related to the skeletal muscle in reference to cellular and molecular responses and adaptions to exercise
3. To understand laboratory procedures used to study muscle metabolism
4. To develop ability to scientifically critique published papers and present them in a professional manner

SPMD 6510. Designing Resistance Training Program
3 Credits (3)
Detailed study of the physiological concepts associated with designing resistance-training programs for children, women, seniors, athletic performance and rehabilitation. Consent of Instructor

Learning Outcomes

1. Fundamental components associated with resistance training and exercise prescription
2. Compare and contrast isometric, dynamic, variable, isokinetic, eccentric, concentric resistance training
3. Design programs guided by a needs analysis
4. Demonstrate appropriate techniques and implement systems for training
5. Study physiological adaptations of resistance training for women, children, seniors, athletics and rehabilitation
6. Understand anatomical and physiological changes associated with detraining
7. Integrate components and concepts of resistance training for program design (periodization)
8. Explore alternative training programs

SPMD 6710. Project
1-12 Credits (1-12)
Selected projects for doctoral students. May be repeated up to 12 credits.

Learning Outcomes

1. Students will develop research skills through the work on projects with faculty members.

SPMD 6750. Kinesiology Research
1-3 Credits (1-3)
Research to be conducted under the direction of a Kinesiology faculty member May be repeated up to 15 credits.

SPMD 6996. Special Topics
1-3 Credits (1-3)
Offered under various subtitles that indicate the subject matter. May be repeated up to 9 credits.

Learning Outcomes

1. Varies

SPMD 6999. Capstone Project
1,3 Credits (1,3)
Students will prepare an individualized capstone project and prepare for the board exams.
Prerequisite: SPMD 5205.

Learning Outcomes

1. Utilize evidence-based research and data from the field of athletic training to create a scholarly capstone project.
2. Disseminate communicate project findings to appropriate stakeholders by various presentation methods.
3. Advocate for the profession of athletic training via the capstone project.

SPMD 7000. Doctoral Dissertation
1-18 Credits (1-18)
Doctoral Dissertation hours to be conducted under the direction of a Kinesiology Faculty. May be repeated up to 18 credits.

Learning Outcomes

1. Varies

STAT-STATISTICS

STAT 3110. Statistics for Engineers and Scientists
3 Credits (3)
Modern probability and statistics with applications to the engineering sciences.
Prerequisite: C - or better in MATH 1521G or MATH 1521H.

Learning Outcomes

1. Apply probability concepts and statistical methods to analyze data relevant to engineering and scientific problems.
2. Interpret descriptive statistics, probability distributions, and inferential techniques in context-specific applications.
3. Construct confidence intervals and perform hypothesis tests to support decision-making in engineering contexts.
4. Use statistical software and tools to model, visualize, and communicate results from experimental and observational data.

STAT 4210. Probability: Theory and Applications
3 Credits (3)
Basic probability distributions including binomial, normal; random variables, expectation; laws of large numbers; central limit theorem.
Prerequisite(s): C- or better in MATH 2530G and C- or better in at least one-3000 level MATH or STAT course.

Learning Outcomes

1. Be able to compute discrete probabilities using combinatorial methods.
2. Understand and use conditional probability, independence and Bayes' Formula to compute probabilities.
3. Demonstrate understanding and use of discrete and continuous random variables including Bernoulli, Binomial, Poisson, Geometric, Normal, Exponential and Gamma.
4. Understand joint and conditional probability distributions and use them to compute probabilities.

5. Learn about basic limit theorems such as the Central Limit Theorem and the Laws of Large Numbers.

STAT 4220. Statistics: Theory and Applications
3 Credits (3)
Point and interval estimation; sufficiency; hypothesis testing; regression; analysis of variance; chi-square tests.
Prerequisite: C- or better in STAT 4210.
Learning Outcomes
1. Explain and apply the principles of point and interval estimation, including properties such as unbiasedness and consistency.
2. Analyze statistical models using concepts of sufficiency and likelihood to support inference procedures.
3. Conduct and interpret hypothesis tests, including those based on regression, ANOVA, and chi-square methods.
4. Evaluate the appropriateness of statistical techniques for real-world data and communicate results effectively in applied contexts.

STAT 5210. Probability: Theory and Applications
3 Credits (3)
Same as STAT 4210 with additional work for graduate students.
Learning Outcomes
1. Be able to compute discrete probabilities using combinatorial methods.
2. Understand and use conditional probability, independence and Bayes' Formula to compute probabilities.
3. Demonstrate understanding and use of discrete and continuous random variables including Bernoulli, Binomial, Poisson, Geometric, Normal, Exponential and Gamma.
4. Understand joint and conditional probability distributions and use them to compute probabilities.
5. Learn about basic limit theorems such as the Central Limit Theorem and the Laws of Large Numbers.

STAT 5220. Statistics: Theory and Applications
3 Credits (3)
Same as STAT 4220 with additional work for graduate students.
Learning Outcomes
1. Explain and apply the principles of point and interval estimation, including properties such as unbiasedness and consistency.
2. Analyze statistical models using concepts of sufficiency and likelihood to support inference procedures.
3. Conduct and interpret hypothesis tests, including those based on regression, ANOVA, and chi-square methods.
4. Evaluate the appropriateness of statistical techniques for real-world data and communicate results effectively in applied contexts.

STAT 5230. Elementary Stochastic Processes
3 Credits (3)
Markov chains, Poisson processes, Brownian motion, branching processes, and queuing processes, with applications to the physical, biological, and social sciences.
Prerequisite: STAT 5210 or consent of instructor.
Learning Outcomes
1. Apply conditional expectation and generating functions to analyze simple stochastic processes.
2. Describe and distinguish among key stochastic processes (Markov chains, Poisson processes).
3. Apply stochastic models to evaluate problems in the physical, biological, and social sciences.
4. Evaluate the long-term behavior of stochastic processes using transition probabilities and limiting distributions.
5. Analyze the Brownian motion process and its fundamental properties.

STAT 5310. Foundations of Probability
3 Credits (3)
Probability spaces, expectation and conditional expectation, limit theorems and laws of large numbers.
Prerequisite: MATH 5460.
Learning Outcomes
1. Define an abstract probability space via measure theory, regarding expectation as abstract integration and study its properties such as linearity and monotonicity.
2. Study the convergence of random variables and Weak and Strong Laws of Large Numbers.
3. Compare and employ almost sure convergence, convergence in probability, convergence in Lp, and convergence in distribution to analyze the behavior of sequences of random variables.
4. Define the weak convergence of probability measures, apply it to characterize the weak convergence on the set of real numbers, and study Central Limit Theorems.
5. Introduce the concept of stochastic process, define martingales and study the martin-gale convergence theorems.

STAT 5320. Advanced Topics in Stochastic Processes
3 Credits (3)
Markov processes, martingales, Brownian motion, the Ito calculus, stochastic differential equations.
Prerequisite: STAT 5310.
Learning Outcomes
1. Analyze the structure and behavior of continuous-time Markov processes and martingales.
2. Derive the fundamental properties of Brownian motion and explain its role in stochastic modeling.
3. Apply Ito calculus to solve stochastic differential equations in theoretical contexts.
4. Formulate stochastic differential equations from applied problems.
5. Explain and apply the Feynman-Kac formula, the martingale problem, and the Girsanov formula.
6. Evaluate stochastic models arising in various disciplines.
7. Interpret the solutions of stochastic models using advanced probability theory.

STAT 5330. Continuous Multivariate Analysis
3 Credits (3)
Theory and applications of the multivariate normal distribution.
Prerequisite: STAT 5220, or consent of instructor.
Learning Outcomes
1. Explain the theoretical foundations and properties of the multivariate normal distribution.
2. Apply principal component analysis and linear discriminant analysis to solve multivariate problems.
3. Evaluate the structure and relationships among multiple continuous variables using matrix-based statistical methods.
4. Interpret results from multivariate analyses in real-world applications.
5. Communicate findings from multivariate analyses clearly in a written report.

STAT 5335. Linear Models
3 Credits (3)

Core topics include distribution of quadratic forms, theory of regression, analysis of variance and covariance in linear models. Advanced topics chosen from random and mixed linear models, generalized linear, growth curve, and nonlinear models, quartile and copula regression. May be repeated up to 6 credits.
Prerequisite: STAT 5330.
Learning Outcomes

1. Analyze linear models using the distribution of quadratic forms and the theory of least squares estimation.
2. Apply regression, ANOVA, and ANCOVA models to determine relationships among variables.
3. Evaluate the assumptions and limitations of linear modeling frameworks (random and mixed effects models).
4. Explain the theory behind generalized linear models, nonlinear models, and quantile regression.
5. Assess the applicability of advanced modeling techniques to complex data sets.

STAT 5340. Advanced Theory of Statistics I
3 Credits (3)
Testing hypotheses, probability and sufficiency, uniformly most powerful tests, unbiasedness, invariance, and minimax principle.
Prerequisite: STAT 5220 or consent of instructor.
Learning Outcomes

1. Explain foundational concepts in statistical inference (hypothesis testing, sufficiency).
2. Construct statistical tests using criteria such as unbiasedness and invariance.
3. Analyze the properties of statistical tests using the minimax principle.
4. Apply the Neyman-Pearson lemma to derive uniformly most powerful (UMP) tests.
5. Evaluate the theoretical properties of statistical procedures.
6. Justify the use of statistical procedures in complex inference problems based on theoretical properties.

STAT 5345. Advanced Theory of Statistics II
3 Credits (3)
Estimation of parameters; unbiased estimators; equivariance; Bayes properties; large sample theory and optimality.
Prerequisite: STAT 5340 or consent of instructor.
Learning Outcomes

1. Analyze methods for estimating parameters and their properties (unbiased, consistent, efficient).
2. Apply the principles of equivariance to construct and evaluate estimators.
3. Construct and evaluate Bayes estimators in various contexts.
4. Evaluate estimators using large sample theory and asymptotic optimality criteria.
5. Compare classical and Bayesian approaches to estimation.
6. Justify the selection of estimation methods based on theoretical and practical considerations.

STAT 5348. Topics in Probability and Statistics
3 Credits
Topics in modern probability and statistics. The material covered will reflect current research topics in the field and may vary each time the course is offered. To be taken up to 3 times. May be repeated up to 9 credits.
Learning Outcomes

1. Gain knowledge of advanced methods in the areas of probability and statistics.
2. Develop potential to explore literature in the areas of of probability and statistics.
3. Develop potential to conduct supervised research in the areas of of probability and statistics.

SUR-SURVEYING

SUR 143. Civil Drafting Fundamentals
3 Credits (2+2P)
Introduction to drafting in the field of Civil Engineering. Drawings, projects, and terminologies related to topographic, contour drawings, plan and profiles, and street/highway layout. Restricted to Community Colleges only. Taught with E T 143 and DRFT 143.
Prerequisite: DRFT 109.
Learning Outcomes

1. Use appropriate drafting/technical terminology.
2. Identify of the different types of Civil Engineering work drawing plan sets.
3. Understanding and the use of the terminologies used in the industry.
4. Use AutoCAD Civil 3D.
5. Enter appropriate data into AutoCAD software in order to retrieve necessary outcomes.
6. Plot/Print different types of civil engineering working plans.
7. Read, interpret and understand engineering drawings.
8. Define and understand the different types of engineering drawings.

SUR 222. Introduction to Geomatics
3 Credits (2+3P)
Theory and practice of geomatics as applied to plane surveying in the areas of linear measurements, angle measurements, area determination, differential and trigonometric leveling, and topographic mapping.
Prerequisite: A grade of C- or better in both, E T 109 and (MATH 1250G or higher).
Learning Outcomes

1. Perform basic distance and angular measurements.
2. Evaluate the quality of collected measurements.
3. Utilize a measuring tape.
4. Determine a plumb line.
5. Set up a level line.
6. Set up a tripod and total station.
7. Utilize a plumb rod.
8. Understand the role of surveying in civil engineering and construction-related fields.
9. Understand new technologies is surveying.

SUR 285. Precise Digital Mapping
3 Credits (3)
Photogrammetric Mapping Principles, digital sensor including optical cameras, terrestrial, surveying control, IMU & GPS integration, stereo photography, analytical triangulation, orthorectification, precision and accuracy of measurement systems, sUAS (Small Unmanned Aerial Vehicles) data collection project fight/pre planning, introduction to laser scanning systems.
Learning Outcomes

1. Understand the basic principles of photogrammetry.
2. Perform photo measurements and computation.

3. Be able to design aerial surveying projects.
4. Define the basic principles of analytical photogrammetry.
5. Explain the different steps in aerial triangulation.

SUR 292. Legal Principles and Boundary Law I
3 Credits (3)
Fundamentals of real property law; principles of land description; survey evidence and procedure in boundary determination, order of importance of conflicting elements; liability, ethical and professional principles in boundary surveying; NM professional practice act; NM Minimum Standards, contemporary issues in boundary determination.
Prerequisite: C- or better in SUR 222.
Learning Outcomes
1. Demonstrate an understanding of surveying boundary laws.
2. Describe procedures for locating real property boundaries.
3. Read, interpret, and write legal descriptions of real property.
4. Perform legal research of case and statutory law.
5. Communicate research findings through written and oral presentations.

SUR 312. Public Land Survey System Boundaries
3 Credits (3)
Fundamentals of the U.S. Public Land Survey System; rules for the survey of the public lands, field surveys; the rectangular system, corners, monuments, evidence; dependent and independent resurveys, corner restoration; plats and field notes, patents.
Prerequisite: A grade of C- or better in SUR 222.
Learning Outcomes
1. Understand how the USPLSS was developed and used.
2. Develop the ability to locate and identify USPLSS survey monuments.
3. Recognize the need for restoring lost corners and apply proportionate methods.
4. Perform computations for simple PLSS section subdivisions.
5. Demonstrate an ability to read, write and interpret USPLSS legal descriptions.

SUR 315. Advanced Mapping Technologies
2 Credits (2)
Advanced applications of airborne sUAS (Small Unmanned Aerial Vehicles) in 3D data acquisition, sensor specifications, selection, and platform compatibility. Principles of lidar data collection, airborne and terrestrial. LiDAR data processing including registration, modeling, and analysis. Point cloud principles, processing, and applications. DEMs principles, processing and analysis. Principles and applications of GPR in surveying.
Prerequisite: SUR 285 and Junior Standing.
Corequisite: SUR 315L.
Learning Outcomes
1. Identify the basic principles and applications of advanced mapping technologies.
2. Compare and contrast different UAS-based aerial surveying techniques for 3D data acquisition principles and applications of Ground Penetrating Radar (GPR).
3. Process, analyze, and interpret point clouds and DEMs.
4. Recognize the principles of terrestrial LiDAR data collection.
5. Explain the principles and applications of Ground Penetrating Radar (GPR).

SUR 315L. Advanced Mapping Technologies Lab
1 Credit (1P)
Hands-on application of using optical and LiDAR UASs in surveying and mapping. Design and conduct UAV surveys, including flight planning and pre-planning with an understanding of sensor limitations, control point configuration, and FAA regulations and restrictions. Applications of terrestrial scanners in collecting accurate 3D models. Process, analyze, and visualize different types of point clouds.
Prerequisite: SUR 285.
Corequisite: SUR 315.
Learning Outcomes
1. Identify lab safety, workflow overview, and liability considerations.
2. Apply UAS technologies in surveying and mapping projects through hands-on flight operations.
3. Develop 3D point clouds for surveying, engineering, and mapping applications.

SUR 328. Construction Surveying & Automation Technologies
3 Credits (2+3P)
Construction Surveying Principles: conventional and machine controlled. Layout alignments, grades, various infrastructure, buildings. Understand error identification, common quality control checks and blunder identification. Alignments and station/off set, types of construction layout of infrastructure: roads, bridges, utilities (including subsurface), buildings, industrial; reading and interpreting construction plans, data management, horizontal, vertical and spiral curves, slope staking, machine control basics, applications and data managements. Use of electronic files and liability issues. Layout alignments, grades, various infrastructure, buildings. Ability to understand data integration in automated machine control, work flow processes.
Prerequisite: A grade of C- or better in both, (SUR 222 or DRFT 222) and (ENGR 190 or MATH 1511G or MATH 1511H).
Learning Outcomes
1. Acquire the ability to answer test questions on professional surveying exams.
2. Develop the ability to appropriately collect, analyze, interpret and apply surveying and surveying-related data.
3. Develop the ability to recognize, analyze, and solve surveying and surveying-related problems.
4. Develop the ability to work on teams.

SUR 328L. Construction Surveying & Automation Technologies Lab
1 Credit (1P)
Hands-on application of surveying equipment such as GNSS and total stations to perform construction stakeout for different types of construction layouts, including buildings, horizontal and vertical alignments. Reading and interpreting construction plans. Integrating machine-controlled surveys in different applications.
Prerequisite: A grade of C- or better in both, (SUR 222 or DRFT 222) and (ENGR 190 or MATH 1511G or MATH 1511H).
Corequisite: SUR 328.
Learning Outcomes
1. Identify lab safety, workflow overview, and liability considerations.
2. Apply surveying technologies in construction stakeout.
3. Recognize different forms of construction plans.

SUR 351. Spatial Data Adjustment I
3 Credits (3)
Theory of random error in observations/measurements. Use of statistics in spatial data analysis, statistical testing, advanced data structures. Emphasis on computer based problem solving and programming to solve spatial data problems.

Prerequisite: A grade of C- or better in the following: (SUR 222 or DRFT 222) and (A ST 311G or MATH 1350G) and (ENGR 190 or MATH 1511G or MATH 1511H).

Learning Outcomes

1. Acquire the ability to answer questions on professional surveying exams.
2. Acquire a sound and fundamental understanding of the mathematical principles underlying surveying measurements and computations.
3. Develop the ability to appropriately analyze, interpret, and apply survey and survey-related data.
4. Develop the ability to recognize, analyze, and solve survey and survey-related problems.

SUR 361. Geodesy/Geodetic Control Surveying
3 Credits (3)

Horizontal and vertical control network design and consideration. Understand ellipsoid, geoid, horizontal and vertical datum, coordinates, precise leveling, astronomic, establishment of state plane zones, understanding reporting. Transform data between geodetic Latitude/Longitude, state plane, ground data, perform geodetic computations, ability to design GPS networks utilizing CORS stations, network adjustments. Perform a control survey, process data, adjust network, and prepare control report with Meta-data.

Prerequisite: A grade of C- or better in the following: (SUR 222 or DRFT 222) and (ENGR 190 or MATH 1511G or MATH 1511H).

Learning Outcomes

1. Define the different coordinate systems and geometric models used to represent the shape of the Earth.
2. Be able to perform surveying computations on the sphere and ellipsoid.
3. Distinguish between the different map projections systems.
4. Explain the effects of gravity in survey measurements, especially in precise leveling.
5. Outline how earth motions affect surveying measurements and the different time systems.
6. Explicitly indicate which of the student outcomes listed in Criterion III or any other outcomes are addressed by the course.

SUR 401. Ethics and Professionalism in Surveying and Mapping
3 Credits (3)

Ethics as applied to the surveying profession. Includes case studies and problems. May be repeated up to 3 credits.

Learning Outcomes

1. An ability to communicate effectively with a range of audiences.
2. An ability to understand ethical and professional responsibilities and the impact of technical and/or scientific solutions in global, economic, environmental, and societal contexts.

SUR 412. Advanced Topics in Boundary Surveying
3 Credits (2+3P)

Advanced land boundary topics including water boundaries, mineral claims, Spanish and Mexican land grants, state and national boundaries. May be repeated up to 3 credits.

Prerequisite: A grade of C- or better in SUR 312.

Learning Outcomes

1. Identify land boundary topics

SUR 440. Geomatics Laboratories
2 Credits (6P)

Layout alignments, grades, various infrastructure, buildings. Performing GNSS surveys including RTK, rapid-static, static data collection and processing. Laser scanning and photogrammetric data collection and processing. Surveying applications in the U.S. Public Land Survey System (PLSS).

Prerequisite: A grade of C- or better in, SUR361, (SUR 222 or DRFT 222) and (MATH 1435 or MATH 1511G).

Prerequisite/Corequisite: SUR 328 and SUR 461.

Learning Outcomes

1. An ability to develop and conduct experiments or test hypotheses, analyze and interpret data and use scientific judgment to draw conclusions.
2. An ability to communicate effectively with a range of audiences.
3. An ability to function effectively on teams that establish goals, plan tasks, meet deadlines, and analyze risk and uncertainty.

SUR 450. Senior Project
3 Credits (3)

Research project prepared by student. Includes class presentation. Students will learn how to research after the end of their formal education. Students must be in Senior Standing to enroll.

Learning Outcomes

1. An ability to identify, formulate, and solve broadly defined technical or scientific problems by applying knowledge of mathematics and science and/or technical topics to areas relevant to the discipline.
2. An ability to formulate or design a system, process, procedure or program to meet desired needs.
3. An ability to develop and conduct experiments or test hypotheses, analyze and interpret data and use scientific judgment to draw conclusions.
4. An ability to communicate effectively with a range of audiences.

SUR 451. Spatial Data Adjustment II
3 Credits (3)

Rigorous analysis of the theory of observations as applied to spatial data, application of least squares adjustments, ability to perform statistical analysis to determine accuracy of final product, constrained/free geospatial data integration, error ellipses, and pre-analysis of spatial data acquisition procedures.

Prerequisite: A grade of C- or better in SUR 351.

Learning Outcomes

1. Understand the theory of least squares as applied to survey measurements
2. Understand the relevance of weighting survey observations
3. Be able to adjust vertical, horizontal and 3D networks by least squares
4. Be able to transform coordinates between similar coordinate systems
5. Be able to analyze survey errors and detect survey blunders

SUR 452. Surveying Practicum
3 Credits (3)

Surveying practice under the direction of a licensed, professional land surveyor requiring an approved number of hours. Planned work between the student and the surveyor should be designed to be part of a project that integrates spatial data. An individualized syllabus should be developed collaboratively with the industrial partner and approved by the geomatics faculty. The final deliverable must be certified by the licensed professional land surveyor. A written report by the student is required. Credit is given to past work experience in cases where students can demonstrate that requirements for the practicum are met and should be approved by geomatics faculty.

Learning Outcomes

1. Demonstrate a level of technical competency, based upon completing the requirements of a geomatics technology curriculum.
2. Students are expected to successfully and professional complete a "real" project. Additionally, student work is employed to assess most of the program's outcomes for program assess.

SUR 461. GNSS Positioning
2 Credits (2)
Logistics of GNSS data collection, the GPS signal, codes and biases, error sources, differences between relative and autonomous GNSS positioning, code phase carrier phase, DGPS static and RTK surveys. Geodetic and GPS standards and specifications GNSS data processing, network adjustments, and evaluation of spatial data accuracy practical applications of GNSS.
Prerequisite: A grade of C- or better in SUR 361.
Corequisite: SUR 461L.
Learning Outcomes

1. Outline the relationship of geodesy to satellite positioning systems.
2. Describe the procedure of GNSS surveys.
3. Differentiate between different GNSS surveying techniques.
4. Identify GPS standards and specifications.

SUR 461L. GNSS Positioning Lab
1 Credit (1P)
Hands-on experience using different types of surveying-grade GNSS equipment in collected geospatial data for surveying and engineering applications. Mastering field procedures, understanding equipment functionality, and learning to process and evaluate real-world GNSS data. May be repeated up to 3 credits.
Prerequisite: A grade of C- or better in SUR 361.
Corequisite: SUR 461.
Learning Outcomes

1. Identify lab safety, workflow overview, and liability considerations.
2. Conduct different types of GNSS surveys for mapping and engineering applications.
3. Assess the quality and reliability of spatial data collected by different GNSS surveying techniques.

SUR 464. Legal Principles and Boundary Law II
3 Credits (3)
Advanced boundary determination, evaluation of written and field evidence. Advanced application of PLSS subdivision, special surveys (water, mineral, and reservations), NM Standards, and laws. Preparation of boundary survey plats and reports. ALTA/NSPS Surveys and Standards.
Prerequisite: A grade of C- or better in both, SUR 292 and SUR 312.
Learning Outcomes

1. Application of the rules of evidence as concerning to boundary surveys.
2. Demonstrate understanding between original, resurveys, and retracements.
3. Acquire the ability to perform advanced section subdivisions.
4. Understand the issues of professional liability and ethical practice.

SUR 485. Emerging Techniques in Geospatial Technologies
3 Credits (3)
Hydrographic, Altimetry, Space borne Imaging Systems, Mobile Mapping Systems, Mining and Agriculture Surveying Principles, Ranging technologies and applications such as LiDAR, SAR, and Bathymetry. Principles of terrestrial & airborne laser scanning, point cloud data management & extraction, scan registration and processing, and advanced ranging data acquisition systems. Consent of Instructor required.
Prerequisite(s): Senior standing.
Learning Outcomes

1. Outline the different techniques in mapping seabed.
2. Describe the procedure of LIDAR mapping.
3. Outline the remote sensing technologies used in mapping.
4. Recognize the UAV mapping technologies.
5. Produce surveying products from new technologies in geomatics.

TBGD-TRANSBORDER & GLOBAL HUMAN DYNAMICS

TBGD 5110. Introduction to Transborder and Global Human Dynamics
3 Credits (3)
Overview of current theories, concepts and issues concerning transborder and global humani dynamids. introduction to key debates and areas of inquiry.
Learning Outcomes

1. Develop knowledge of current interdisciplinary scholarship and debates regarding theories, concepts and issues in the study of transborder and global human dynamics
2. Develop skills in critical analysis of key debates and in the oral and written presentation.

TBGD 6991. Research Design in Transborder and Global Human Dynamics
1-6 Credits (1-6)
Development of individual research projects through critical reflection on debates concerning culturally appropriate methodologies, collaborative work with community partners, and the responsible conduct of reaearch with regard to transborder and global human dynamics.
Learning Outcomes

1. Develop individual research project through identification of main research questions, methods of data collection and analysis, significance to the broader field of transborder and global human dynamics and goals for application of findings in society.
2. Develop skills in the Responsible Conduct of Research and completion of proposals for IRB approval.
3. Develop appreciation for conducting research in collaboration with community partners to address societal needs.

TBGD 6998. Fieldwork and Community Engagement in Transborder and Global Human Dynamics
1-6 Credits (1-6)
Implementation of research projects through field work, individually or in direct collaboration with community partners.
Learning Outcomes

1. Completion of projects designed to collect date individually and /or in collaboration with community partners using a Community-Based patricipatory Research (SCBPR) framework.
2. Dissemination of findings to the scholarly community as well as community partners and the general public.

TBGD 7000. Dissertation
1-18 Credits (1-18)
Completion of major research project on a significant aspect of transborder and global human dynamics. Dissemination of findings in

academic and community forums. Students must have approval of from their doctoral committee to enroll.

Learning Outcomes

1. Completion of a significant and in-depth research project in the area of transborder and global human dynamics.
2. Presentation of findings in academic conferences.
3. Preparation of publishable work from the dissertation research.
4. Dissemination of findings in alternative formats for community partners and the general public.

TCEN-ENVIRONMENTAL/ENERGY TECH

TCEN 101. Energy for the Next Generation
3 Credits (2+2P)

This course will survey a broad range of sources of energy, types of energy, energy storage, and the forms of energy. Students will be exposed to theory in the classroom, laboratory exercises, and field trips to provide them with a solid foundation for all subsequent energy related environmental courses. Crosslisted with: OETS 101.

Prerequisite(s)/Corequisite(s): OETS 118 or MATH 1215. Restricted to: Community Colleges only.

Learning Outcomes

1. Analyze cost comparisons for different types of energy applications to assess their relative value.
2. Apply energy consumption analysis techniques to accurately evaluate energy usage.
3. Identify safety hazards and demonstrate compliance with relevant safety regulations.
4. Collaborate effectively as a team.
5. Apply course-specific calculations accurately to solve problems and make informed decisions.

TCEN 105. Building Analyst I
3 Credits (2+2P)

This course is designed to provide the foundational knowledge and expertise necessary for the energy auditor and home performance contractor. Crosslisted with: OETS 105. Restricted to: Community Colleges only.

Learning Outcomes

1. Express technical information through oral communication.
2. Explain technical information through written communication.
3. Interpret information and instructions.
4. Work effectively as a team.
5. Demonstrate an understanding of sustainable and alternative building practices (i.e., LEED/Green).
6. Demonstrate how related industry theories apply to real world settings.
7. Evaluate mechanical processes found in building trades.
8. Locate data and information utilizing various sources.
9. Interpret information and instructions. 1
10. Determine the appropriate ethical action that should occur in a given circumstance. 1
11. Differentiate between situational and the other various theories of ethics.

TCEN 106. Building Analyst II
3 Credits (2+2P)

Designed to prepare the student for the BPI Building Analyst Certification. This course will walk the student through the hands-on process of conducting visual building inspections, diagnostic testing, identifying improvement opportunities, documenting a home's performance and preparing a scope of work. Crosslisted with: OETS106.

Prerequisite(s)/Corequisite(s): TCEN 105 or OETS 105. Restricted to: Community Colleges only.

Learning Outcomes

1. Describe sustainable and alternative building practices (i.e., LEED/Green).
2. Formulate how current changes can create future issues within a structure.
3. Assess environmental problems arising from conventional building practices.
4. Evaluate mechanical processes found in building trades.
5. Work effectively as a team.
6. Demonstrate an understanding of sustainable and alternative building practices (i.e.,LEED/Green).
7. Present technical information through oral communication.
8. Determine the appropriate ethical action that should occur in a given circumstance.
9. Identify appropriate governing bodies and associated regulations.

TCEN 110. Photovoltaic Application
4 Credits (3+2P)

This course will provide an introduction to Photovoltaic (PV) installation. The course will provide instruction on site selection, prep, installation, and maintenance for photovoltaic applications. Students that complete the course and have the opportunity to take the entry level exam with the North American Board of Certified Energy Practitioners (NABCEP) en route to becoming Certified Installers. Restricted to: Community Colleges only. May be repeated up to 4 credits.

Prerequisite/Corequisite: TCEN 101.

Learning Outcomes

1. Write a detailed analysis using a 6-step problem solving approach to an equipment or process problem
2. Categorize and document system malfunctions, which will be discussed during the pass-down period in a production environment
3. Organize relevant training material to be discussed during teamwork training sessions
4. Identify safety hazards associated with electro-mechanical industrial production systems
5. Use a systematic approach to troubleshoot, identify, and perform corrective maintenance procedures in a system
6. Identify the subsystems of an industrial system and their function
7. Demonstrate the startup, operation, and power down programming sequences for an automated system
8. Apply automated troubleshooting programs to locate / identify fault in a production system
9. Evaluate real time statistical process control data (SPC) to determine (+ -) control limit corrections in a production environment 1
10. Identify personal areas in which student may be able to strengthen student’s professional skills 1
11. Assess personal “development” paths, which will ensure a constant advancement through evolving technology careers 1
12. Demonstrate required skills for changing or creating and evaluating real time statistical process control (SPC) data associated with an industrial production process/program

TCEN 111. Basic Electrical Principles I, DC Circuits
4 Credits (3+2P)
Course begins with the basics of electricity and DC circuits. Includes categorization of material properties within conductors, semiconductors, and insulators. Gradual progression tackles more complex topics like DC circuit analysis of series and parallel circuits, including Kirchhoff's laws, Thevenin's & Norton's theorems, and superposition. Finally DC combination circuits, magnetism and electromagnetism, generators and motors are covered. Emphasis on safety throughout. May be repeated up to 4 credits.
Prerequisite(s)/Corequisite(s): OETS 104 or MATH 1215. Restricted to Community Colleges campuses only.

TCEN 112. PV Power Generation Design Fundamentals
3 Credits (2+2P)
A study of photo voltaic design basics, photo voltaic (PV) Cells, modules, and system components; electrical circuits; grid-tied/grid-interactive PV system design and sizing for use on homes; solar electric products and applications; and understanding energy conversion from sunlight to electricity, and working with solar conversion equipment. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): TCEN 111 and (OETS 104 or MATH 1215). Restricted to Community Colleges campuses only.

TCEN 113. OSHA 10 Hour Construction Hazard Identifications
1 Credit
Intended for entry-level participants to provide instruction on a variety of construction safety and health standards. Topics include Introduction to OSHA, Electrical, Ladder, Excavation, Scaffold, and Forklift Hazards, Fall Protection, Materials Handling, Personnel Protective Equipment and Confined Space Entry Hazards. Meets OSHA 10-Hour Requirements.

TCEN 115. Wind Power Generation Design Fundamentals
3 Credits (2+2P)
Course covers wind turbine module descriptions and functions and wind system installation, operation, and troubleshooting. Additional topics include wind energy harvesting and the conversion process from the generator system to electricity. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): TCEN 111 and (OETS 104 or MATH 1215). Restricted to Community Colleges campuses only.

TCEN 121. Basic Electrical Principles II, AC Circuits
4 Credits (3+2P)
Course begins with an overview of the primary components of AC circuits, such as resistors, inductors, rectifiers, transformers and capacitors, and then gradually introduces new, more complicated topics like applying AC principles in power generation and generators, motors, parallel and combination circuits, troubleshooting and evaluation of circuit conditions. May be repeated up to 4 credits.
Prerequisite(s)/Corequisite(s): TCEN 111 and (OETS 104 or MATH 1215). Restricted to Community Colleges campuses only.

TCEN 156. Building Envelope
3 Credits (2+2P)
Designed to prepare the student for the BPI Building Envelope Certification. This course will provide the principles behind building performance testing and the purpose of completing a comprehensive energy audit. Through lecture and subsequent field training, the student will learn how to use building diagnostics to develop a prescriptive plan for enhancing comfort, health & safety, building durability, and energy savings. The student will learn how to outline the follow-up process required after completion of the retrofit. Crosslisted with: OETS156. Restricted to: Community Colleges only. Campus restriction updated to reflect description of community colleges only.
Prerequisite(s): Grade of C- or better in TCEN 106 or OETS 106.

Learning Outcomes
1. Apply oral communication skills to effectively present technical information.
2. Apply written communication skills to effectively present technical information.
3. Demonstrate the correct identification and safe use of hand tools and/or power tools for a specific application.
4. Collaborate effectively as a team.
5. Employ various sources to locate data and information.
6. Analyze and interpret information and instructions.
7. Differentiate between situational ethics and other various theories of ethics.
8. Identify relevant governing bodies and associated regulations.
9. Describe sustainable and alternative building practices (e.g., LEED/Green). 1
10. Apply related industry theories to real-world settings. 1
11. Evaluate mechanical processes in building trades. 1
12. Assess environmental problems resulting from conventional building practices.

TCEN 205. NEC for Alternative Energy
4 Credits (2+4P)
This hands-on course will cover the National Electrical Code specifics concerning photovoltaic installation. Also code compliant wiring of basic electrical systems will be covered. Existing installations will be visited and studied. Restricted to Community College campuses only. May be repeated up to 4 credits.
Prerequisite: TCEN 101 and ELT 105.
Learning Outcomes
1. Identify all code sections relevant to the different types of Alternative energy systems.
2. Locate problems in alternative energy sources and provide solutions to correct them.
3. Student will have a basic understanding of different types of renewable energy and how to apply the NEC to each type of renewable energy source.
4. Explain what types of renewable energies work best for different geographical locations.
5. Students will also gain hands on experience working with solar photovoltaics, wind turbines and solar thermal panels.
6. Effectively present technical information through written communication
7. Accurately perform course specific calculations
8. Work effectively as a team
9. Locate data and information utilizing the NEC and other various sources 1
10. Interpret information and instructions 1
11. Identify appropriate governing bodies and associated regulations 1
12. Assess cost comparisons for different types of energy applications 1
13. Accurately perform energy production analysis

TCEN 220. Cooperative Experience
1-3 Credits (1-3)
Supervised cooperative work program. Student is employed in an approved occupation and supervised and rated by the employer and instructor. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s)/Corequisite(s): MAT 235. Prerequisite(s): TCEN 180. Restricted to: TCEN majors. Graded: S/U Grading (S/U, Audit). Restricted to: Community Colleges only.

TCEN 221. Roofing Materials and Methods
3 Credits (2+2P)
Covers application techniques and estimation of asphalt and wood roofing products and accesories including gutters and flashing. Presents roof penetration, roof loading issues, and energy system installation requirements for mounting photo voltaic or solar thermal systems.
Prerequisite(s): TCEN 112.

TCEN 222. Photo Voltaic Grid Tie Installation
4 Credits (3+2P)
This is a more advanced course culminating in a PV system-to-grid connection. This course includes gathering site specific data, design, wire type and sizing specific to project, installation of all solar modules and balance of system (BOS)components, and grounding and bonding of system components, all in accordance with the latest NEC. Upon project design approval a system will be commissioned for the grid. Decommissioning will commence after measurements and troubleshooting as directed by the instructor. May be repeated up to 4 credits.
Prerequisite(s)/Corequisite(s): TCEN 121 and TCEN 223. Prerequisite(s): TCEN 111 and TCEN 112. Restricted to Community Colleges campuses only.

TCEN 223. National Electric Code Principles in Relation to Photo Voltaic
2 Credits (2+1P)
Focuses on all sections of the National Electrical Code and local code requirements applicable to photo voltaic electrical installation. A partial list of areas covered is chapters one through four and section 690, "Solar Photovoltaic Systems" of the National Electrical Code.
Prerequisite: TCEN 112.
Prerequisite/Corequisite: TCEN 222.
Learning Outcomes
1. Identify the requirements for safe and practical solar PV installations.
2. Accurately reference, read, and interpret NEC code as it relates to PV installations (Code 690).
3. Present a compelling case of when the PV electricity market will reach "grid¬ parity."

TCEN 224. Field Experience
1-3 Credits (1-3)
Student will collaborate with instructor in proposing, defining, implementing, and analyzing outcomes of a project in the Environmental and Energy fields of study. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: TCEN majors. Restricted to: Community Colleges only.

TCEN 246. Building Weatherization & Auditor Fundamentals
3 Credits (3)
Course provides information on how to locate air leaks and identify heat losses or gains through specific testing. Students will learn how to inspect and evaluate building envelopes, mechanical systems, and ventilation systems to determine the safety and energy consumption for each system. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.
Prerequisite(s): TCEN 113 and OETS 104.
Corequisite(s): TCEN 221.

TCEN 251. Advanced Photo Voltaic On/Off Grid Installation
3 Credits (2+2P)
Photo Voltaic advanced topics to include panel racking and installation, battery storage, charge controllers, mechanical integration of arrays on buildings, and key elements involved in choosing a mounting system. May be repeated up to 3 credits.
Prerequisite(s)/Corequisite(s): TCEN 222. Restricted to Community Colleges campuses only.

TCEN 252. NABCEP Entry-Level Exam Review
2 Credits (2)
Course presents knowledge, key terms, and concepts of photovoltaic systems and solar hot water systems as related to the NABCEP Entry-level exam. This exam is for those wanting to enter the workforce in either solar thermal or solar PV. Scheduling and taking the exam is the responsibility of the student. Consent of Instructor required. Restricted to Community Colleges campuses
Prerequisite(s): TCEN 222.
Learning Outcomes
1. Analyze photovoltaic markets and application trends
2. Complete practice questions for the NABCEP PV Associate Exam
3. Develop a practice of safe work environment as it relates to the installation and maintenance of photovoltaic systems according to OSHA standards
4. Apply electrical concepts to the operation and maintenance of photovoltaic systems and related equipment
5. Apply solar energy fundamentals, i.e. photovoltaic module essentials, system components, system sizing principles, system electrical design, system mechanical design, performance analysis, maintenance, and troubleshooting
6. Pass the NABCEP PV Associate exam with at least 70 percentile.

TCEN 254. Renewable Energy Internship
2 Credits (2)
Student will receive industry-related renewable energy experiences at an approved industry location. Typical areas of hands-on practices will be installing solar PV, solar hot-water systems, or wind energy systems. May be repeated up to 6 credits. Consent of Instructor required. Restricted to Community Colleges campuses only.
Prerequisite(s): TCEN 112 and 113 and 222.

THEA-THEATER

THEA 1110G. Introduction to Theatre
3 Credits (3)
This course provides an introduction to the study of theatre. Students will examine various components that comprise theatre, such as acting, directing, playwriting, dramaturgy, scenic and costume design, stagecraft, spectatorship, history, theory, and criticism.
Learning Outcomes
1. Define and discuss basic theater terms and concepts.
2. Discuss the fundamental elements of theatre, and the ways in which theatre differs from other art forms.
3. Analyze and critique the elements of a live theatrical production.
4. Identify and describe the roles of various theatre artists including actors, directors, playwrights, dramaturges, and designers.

THEA 1210G. Acting for Non-Majors
3 Credits (3)
This class gives non-majors experience in the depth and craft of the actor's art. Students will learn various terms, techniques, and practices of acting and will demonstrate their understanding in class. Through exercises and improvisations, partnered scenes, and group work, students will be better able to appreciate the work of others as they learn techniques of performing. May be repeated up to 3 credits.

Learning Outcomes

1. Develop fundamental physical, vocal, analytical, and imaginative skills for acting for the stage.
2. Apply fundamental techniques of voice and movement for the stage.
3. Apply principles of play text analysis to understand story, character, and meaning.
4. Gain a better understanding of an actor's approach to goals, tactics, and obstacles.
5. Engage in character creation and development while preparing and performing monologues and scenes.
6. Learn a common vocabulary to help discuss the process of acting.
7. Employ collaborative methods of work with a partner and in groups.
8. Observe and evaluate acting skills of other actors.
9. Increase verbal and physical communication skills which are applicable in any field. 1
10. Develop personal and social responsibility via group work, research and self-reflection. 1
11. Increase confidence and self-esteem via continuous presentations with supportive feedback.

THEA 1221. Beginning Acting
3 Credits (3)
Basic understanding of self-expression through a variety of physical exercises, improvisation, and character study, culminating in scene or monologue work. Restricted to: THTR majors.
Learning Outcomes

1. Apply a common vocabulary that serves as a foundation in acting for the theatre major and minor.
2. Communicate effectively in front of an audience, applying learned concepts while exercising freedom and control of voice, body, and imagination.
3. Analyze the written character and live performance.
4. Provide objective feedback to your classmate's work as well as your own, that supports a greater understanding of our craft while building trust within the collaborative ensemble.

THEA 1222. Stage Movement
3 Credits (3)
Physical techniques for the actor to develop kinesthetic awareness and skills in characterization, archetypes, and stage combat. Restricted to: THTR majors.
Learning Outcomes

1. To provide fundamental training in a variety of movement techniques which can be applied to both theatrical performance and physical communication in everyday life.
2. Observation and critical skills will be advanced through class participation and outside assignments
3. Class exercises are aimed at guiding participants to uncover their own creative expression, while working with efficient, healthy body alignment

THEA 1223. The Art of Theatre
3 Credits (3)
This course introduces the variety and scope of theatre professions, the value and goals of the theatre major and an analysis of the art form from script to stage. Restricted to: Required for THTR majors majors.
Learning Outcomes

1. An overview of the history of theatre in the Western world
2. A general understanding of the artistic roles and functions within the theatre industry (including within NMSU Theatre as a model)
3. A strong preparation for independent in-depth script analysis and theatre critique

THEA 1310. Introduction to Costuming
3 Credits (3)
This course introduces students to basic skills generally used in creating costumes for theatre. During the semester students will be introduced to the costume shop, equipment, supplies, and processes. They will learn the process of sewing a garment and running a stage production.
Prerequisite(s)/Corequisite(s): THEA 1310L. Restricted to: THTR majors.
Learning Outcomes

1. Demonstrate basic hand and machine sewing skills.
2. Use basic costume craft tools and techniques.
3. Analyze fabric selection for the stage.
4. Draft and use patterns.
5. Take body measurements for patterning and construct a costume from those measurements.
6. Combine interpersonal communication skills with costume construction skills.
7. Analyze a script for costume design purposes.
8. Build a garment.

THEA 1310L. Costume Craft Lab
1 Credit (1)
Class members will assist in construction for productions in a studio environment.
Prerequisite(s)/Corequisite(s): THEA 1310.
Learning Outcomes

1. This laboratory class compliments THEA 1310: Costume Crafts.
2. It gives the student an opportunity to put into practice the skills learned in THEA 1310 as well as be introduced to and participate in the day-to-day operations of the Costume Shop.

THEA 1415. Running Crew I
2 Credits (1+2P)
Students learn about backstage and front of house production positions and work on a technical aspect of a product in a rehearsal and performance environment.
Learning Outcomes

1. Students will learn one, or more, of the basic technical elements of theatrical crew work.

THEA 2310. Stagecraft
3 Credits (3)
Student will explore basic skills for scenic designers and techniques of set construction for the stage, including building scenery, rigging, painting and properties.
Prerequisite(s)/Corequisite(s): THEA 2310L.
Learning Outcomes

1. Demonstrate a range of technical skills, which will qualify them to assist in the basic technical production of a play.
2. Demonstrate and apply how to safely and competently use hand tools, power tools, electrical, and electronic stage equipment.
3. Analyze the technical aspects of a play in performance.
4. Read and construct scenery from ground plans, elevations, and drawings.

5. Analyze a script from the perspective of a designer, artistic, and/ or technical director.

THEA 2310L. Stagecraft Laboratory
1 Credit (1)
Class members will assist with construction for productions in a studio environment.
Prerequisite(s)/Corequisite(s): THEA 2310.
Learning Outcomes
1. History of scenic design and the development of present day stage design.
2. How to create and interpret basic scenic ground plans, elevations, and detail drawings.
3. To construct basic scenic structures to include flats and platforms.
4. Various techniques of scenic painting and decorating.
5. The installations of theatre lighting instruments and sound equipment.

THEA 2340. Introduction to Design
3 Credits (3)
Introduction into our visual world via the language of designers, focusing on collaboration, creative thinking and presentation skills. The varied design professions in theatre and the performing arts will be explored. Restricted to: Required of all THTR Majors.
Learning Outcomes
1. Apply design vocabulary and descriptions when speaking about design.
2. Identify design tools and make choices about where to use them.
3. Apply the foundation information in understanding how design tools work.
4. Apply correct terminology in assessing design and script analysis.
5. Read and understand some of the design documents commonly used in the industry.

THEA 2415. Running Crew II
1 Credit (1)
Students learn about backstage and front of house production positions and work on a technical aspect of a product in a rehearsal and performance environment.
Learning Outcomes
1. To provide students with “hands on” experience participating in being a member of a running crew on a theatrical production.
2. Students will learn one, or more, of the basic technical elements of theatrical crew work.

THEA 2421. Vocal Production for the Actor
3 Credits (3)
Exploration and development of the actor's vocal instrument, including relaxation, projection, diction and articulation.
Learning Outcomes
1. Apply concepts of alignment, relaxation, breath support, resonance, projection, and articulation for your personal and professional benefit.
2. Refine vocal 'problem solving' which will carry into your personal and professional life.
3. Apply vocal concepts to a variety of text in order to understand and appreciate your voice and its capabilities, both intellectually and sensorially.
4. Apply the vocal/speech tools consciously and behavior-ally, as an aid in the search for musicality of the voice in conjunction with truth and believability.

THEA 2993. Theatre Workshop I
0.5 Credits (.5)
Required for all freshman and sophomore theatre majors, this course coordinates all processes within Theatre Arts, providing a forum for discussion and feedback. May be repeated up to 4 credits. Restricted to Las Cruces campus only.
Learning Outcomes
1. This lab course is designed to create community via group meetings with your peers while providing a platform for our guest artists to present information regarding our profession.
2. As time allows, group discussions and sharing will further the sense of community and collaboration with your peers.
3. This forum also provides an opportunity to discuss and provide feedback for each production in the ASTC season.

THEA 2996. Theatre Topics
1-3 Credits (1-3)
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 9 credits.
Learning Outcomes
1. Varies

THEA 300. Theatre Workshop II
0.5 Credits (.5)
Required for all junior and senior theatre majors, this course coordinates all processes within Theatre Arts, providing a forum for discussion and feedback. May be repeated up to 4 credits. Restricted to Las Cruces campus only.

THEA 303. Theatre History I
3 Credits (3)
History of theatre and drama from ancient Greece to the English Renaissance.

THEA 304. Theatre History II
3 Credits (3)
History of theatre and drama from the Restoration to the 20th century.
Prerequisite: THEA 303 or Permission of Instructor.
Learning Outcomes
1. To gain the ability to analyze and interpret various texts from varied time periods.
2. To connect historical knowledge of theatre to contemporary situations.
3. To understand how theatre of the past influences theatre of the present.

THEA 305. Advanced Vocal Production
3 Credits (.3)
Advanced exploration and development of the actor's vocal instrument. May be repeated up to 3 credits.
Prerequisite(s): THEA 2421.

THEA 306. Script Analysis
3 Credits (3)
This class is designed to give you tools and specific processes to help you read and break down a text, so that you can make it come alive for audiences in the varied genres of theatre, film and animation.

Learning Outcomes

1. Determine the dramatic structure of a script
2. Write an analysis of a script for production
3. Verbally communicate an analysis of a script for production
4. Analyze a script from a specific perspective such as actor, director, designer, animator, etc.

THEA 307V. Society in Style: Fashion, History and Culture
3 Credits (3)
History of clothing for theatrical purposes, origins and evolution of period clothing in relation to social, political, and aesthetic factors of different periods.
Learning Outcomes

1. Students will be able to connect changes in clothing styles, applicable to the stage, to various social, political, historical, and cultural contexts.
2. Students will be able to analyze a theatrical or film script for what style of clothing would be appropriate in order to stage the text.
3. Students will present creative projects, based on research, thereby enhancing their analytical and practical design skills.

THEA 308. Creative Writing: Playwriting
3 Credits (3)
Technique of one-act playwriting, and analysis of dramatic structure. Crosslisted with: ENGL 308
Prerequisite(s): ENGL 1110G.

THEA 310. Styles in Acting
3 Credits (3)
Analysis of differing styles of acting through scene work representing various time periods and genres. Consent of Instructor required. May be repeated up to 3 credits.
Prerequisite: THEA 1221 or THEA 1210 with a C- or better.

THEA 311. Acting for Film and Television
3 Credits (3)
Specific techniques of acting for the camera are explored via hands-on experiential learning and an introduction to the business of the TV/Film industry.
Learning Outcomes

1. To understand the acting techniques needed for film and TV work.
2. To understand the differences between acting for live theatre and acting for the camera.
3. To self-reflect on individual performances in order to further grow in the art.

THEA 313. Improvisation
3 Credits (3)
Long and/or short form improvisation techniques in addition to a variety of exercises exploring terminology, character work and the elements of comedy.
Prerequisite(s): THEA 1210 or THEA 1221.

THEA 315. Theatre in New York City
3 Credits (3)
Students are introduced to the professional world of theatre via productions, speakers, and tours during this travel course. May be repeated up to 6 credits.
Learning Outcomes

1. To gain insight into professional theatre by viewing and reviewing Broadway productions in NYC.
2. To receive information about the business of theatre via guests who are theatre professionals.
3. To become familiar with job opportunities backstage via guided tours of professional theatre spaces in New York.

THEA 317. Musical Theatre
3 Credits (3)
Acting class focused on developing and refining skills necessary for performing in musicals. May be repeated up to 9 credits.
Prerequisite(s): THEA 1221 or THEA 1210 with a C- or better.

THEA 323. American Drama
3 Credits (3)
Masterworks of American drama from the 20th century to the present. Crosslisted with: ENGL 323.

THEA 324. Singing for Musical Theatre
3 Credits (3)
Students will gain an understanding of stronger vocal health, aural skills, and rehearsal practice strategies as they work on musical theatre singing techniques and performances including solos, duets and small groups, and a final public showcase.
Learning Outcomes

1. The ability to practice strong vocal habits in order to independently maintain vocal health.
2. Identify and utilize proper vocal warm-up techniques.
3. Display an improved level of music reading and aural awareness.
4. Analyze and break down a piece of theatrical music into components for focused learning.
5. Perform pieces of music theatre both individually and in a group with increased ease

THEA 330. Special Topics: Variable
3 Credits (3)
Specific subjects to be announced in the Schedule of Classes.
Learning Outcomes

1. To gain knowledge and/or skill in a specialty area of theatre

THEA 334. Introduction to Stage Makeup
3 Credits (3)
Basic principles of stage makeup: straight, character, and specialty. Includes study of various products, methods of application, and the effects of lighting on makeup.

THEA 337. Independent Study
1-3 Credits (1-3)
Students propose and design their own course not covered through regular course offerings under the guidance of faculty. Consent of Instructor required. May be repeated up to 6 credits.

THEA 341. Scene Painting
3 Credits (3)
Use of historical painting techniques in a project-driven classroom. Projects include 2-D and 3-D work, color mixing and theory, painting scenery, and the use of paint for effects.
Prerequisite(s): THEA 2310.

THEA 343. Costume Patterning
3 Credits (3)
Basic techniques in the production of flat patterns for modern and period silhouettes including some draping techniques. Consent of Instructor required. May be repeated up to 3 credits.
Learning Outcomes

1. Advanced training in costume design; the ability to create an original pattern in order to be able to make a costume item that is original

THEA 345. Costume Practicum
1 Credit (1)
A practical course intended to provide students additional experience and greater responsibility within the workings of the Costume Shop. May be repeated up to 1 credits.
Prerequisite(s): THEA 1310.

THEA 346. Scenic Practicum
1 Credit (1)
A practical course intended to provide students additional experience and greater responsibility within the workings of the Scene Shop. May be repeated up to 2 credits. Graded: S/U Grading (S/U, Audit).
Prerequisite(s): THEA 2310.

THEA 347. Lighting Practicum
1 Credit (1)
A practical course intended to provide students hands-on experience executing theatrical lighting.

THEA 348. Running Crew III
1 Credit (1)
Students will work on a technical aspect of a production in a rehearsal and performance environment. May be repeated up to 1 credit.
Prerequisite: THEA 1310,THEA 1415, and THEA 2415.
Learning Outcomes
1. To gain practical experience via work on a production.

THEA 349. Running Crew IV
1 Credit
Students will work on a technical aspect of a production in a rehearsal and performance environment.
Prerequisite(s): THEA 1415.

THEA 352. Costume Design
3 Credits (3)
Basic principles of costume design, including script analysis, principles of design, drawing and painting. May be repeated up to 3 credits.
Prerequisite: THEA 2340.
Learning Outcomes
1. To analyze a text in order to make appropriate design decisions.
2. To understand the principles of costume design and be able to communicate designs via various methods.

THEA 353. Scene Design
3 Credits (3)
Design for the performing arts. Basic design skills and projects to exercise those skills, history of design in the theatre and the designer's role in the production process. Final project includes a finished scene design.
Prerequisite: THEA 2310 and 2340 or consent of instructor.
Learning Outcomes
1. Gain the ability to communicate a set design via various means.
2. To understand the designer's role in the production process.
3. To communicate design ideas to collaborators.

THEA 354. Sound Design
3 Credits (3)
Hands-on training in theatrical sound design and implementation.
Prerequisite: THEA 2340.
Learning Outcomes
1. To understand the design elements of theatre sound.
2. To work with software in order to create sound for theatre.

THEA 355. Lighting Design
3 Credits (3)
Basic aspects of theatre lighting, including electricity, color theory, history, and types of lighting instruments.
Prerequisite: THEA 2340.
Learning Outcomes
1. To understand lighting equipment and how it functions.
2. To be able to create lighting using elements of design such as color theory.

THEA 356. Theatre Production
1-3 Credits
Participation in the production of theatrical performances by stage managing, acting, designing, dramaturgy, or directing. May be repeated for a maximum of 6 credits. Graded S/U.

THEA 357. Computer Scenographics
3 Credits (3)
Project-oriented course teaching basic computer modeling skills. Projects focus on the creation of communication tools designers use in the theatrical process. Students will develop portfolios of completed projects. Consent of instructor required. May be repeated up to 3 credits.
Prerequisite: THEA 2340 and THEA 352, THEA 353, or THEA 355.
Learning Outcomes
1. To gain the ability to draft via computer programs.
2. To create a portfolio of design projects.
3. To gain the ability to communicate using various design tools.

THEA 366. Summer Theatre
1-3 Credits
Experience in professional or academic summer theatre. May be repeated for a maximum of 3 credits. Graded: S/U. Restricted to THTR majors.
Prerequisite(s): Consent of department head.

THEA 384. Stage Management
3 Credits (3)
Study of stage management techniques and their application to play production. A working knowledge of union rules, and the procedure to facilitate these through proper communication skills.

THEA 395. Directing I
3 Credits (3)
Study and application of basic stage directing techniques.
Prerequisite(s): THEA 1210 or THEA 1221.

THEA 408. Shakespeare I
3 Credits (3)
Study in Shakespeare's early poems and plays. Repeatable for up to six credits under different subtitles.
Learning Outcomes
1. Analyze Shakespeare's poetry using the methods of close reading
2. Demonstrate ability to read and develop persuasive literary-critical interpretations of Shakespeare's poems and plays;
3. Demonstrate skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material;
4. Work effectively in small groups to interpret a scene through performance

THEA 409. Shakespeare II
3 Credits (3)
Study in Shakespeare's later plays. ENGL 408 is not a prerequisite. Repeatable for up to six credits under different subtitles. Crosslisted with ENGL 409.

Learning Outcomes

1. Analyze Shakespeare's poetry using the methods of close reading;
2. Demonstrate ability to read and develop persuasive literary-critical interpretations of Shakespeare's poems and plays;
3. Demonstrate skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material;
4. Work effectively in small groups to interpret a scene through performance.

THEA 410. Advanced Acting: Contemporary Methods
3 Credits (3)
Acting techniques will be explored focusing on current trends in the profession, from Stanislavski, to Hagen to Meisner. Restricted to: THTR majors.
Prerequisite: THEA 1210 or THEA 1221.

THEA 414. Collaborative Theatre-Making
3 Credits (3)
This course introduces students to the techniques, skills and practice of the collaborative creation of new theatrical material. May be repeated up to 6 credits.
Learning Outcomes

1. Students will be introduced to research methods which allow for the creation of original theatrical work.
2. Students will be assigned teams and will learn the collaborative process, from the sharing of research to clear communication skills.
3. Students will be able to present original work, via a directed rehearsal process with peers.

THEA 417. Musical Theatre II
3 Credits (3)
A continuation of THEA 317, allowing for more advanced musical theatre techniques.
Prerequisite(s): THEA 317.

THEA 430. Special Topics
1-3 Credits
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 9 credits.

THEA 435. Directed Reading
1-3 Credits
Directed individualized studies. May be repeated for a maximum of 3 credits.

THEA 439. Senior Seminar
3 Credits (3)
Course preparing students for professions in and related to the theatre. Restricted to: THTR majors.

THEA 450. The Michael Chekhov Acting Intensive
3 Credits (3)
An intensive overview of the performance techniques attributed to Michael Chekhov, applied to theatrical scenes and presentations. May be repeated up to 6 credits. Consent of Instructor required.

THEA 535. Directed Study
1-3 Credits (1-3)
For the highly motivated student. Independent projects and individual guidance. Graduate standing and consent of instructor required. May be repeated up to 6 credits.

TOX-TOXICOLOGY

TOX 361. Basic Toxicology
3 Credits (3)
Introduction to the principles of toxicology, discussion of toxic agents, environmental problems, testing procedures, and regulations. Prior course work in biology and chemistry recommended.
Prerequisite: CHEM 2120 or CHEM 313 or ANSC 1170 and BIOL 2610G or BIOL 2110G.
Learning Outcomes

1. Learn how toxins are absorbed, distributed, metabolized, and excreted from living systems.
2. Demonstrate how metabolism can appreciably alter the toxicity of compounds as well as dictate the resultant toxicity with an emphasis on target organ(s).
3. Explain the specific mechanism(s) of actions of toxins targeting the liver, lung, kidney, and nervous systems.
4. Delineate how certain toxins induce cancer and/or promote the development of cancer.
5. Understand how and why certain plants and animals are poisonous and venomous, specifically linking discreet chemicals or complex mixtures to the resultant toxic manifestation.

TOX 461. Toxicology I
3 Credits (3)
Introduction to principles of toxicology. Crosslisted with: TOX 361.
Prerequisite(s): (CHEM 1226 or CHEM 1225G) and (BIOL 2610G or BIOL 2110G).

TOX 598. Special Research Programs
1-3 Credits
Individual investigations, either analytical or experimental. Graded S/U.

UNIV-UNIVERSITY STUDIES

UNIV 300. Preparing for the Graduate Record Examination
1 Credit (1)
Preparation for taking the Graduate Record Examination including review, test taking strategies and practice for the verbal, quantitative and analytical sections. Graded S/U.

UNIV 350. Peer Education
3 Credits (3)
Overview of college student development theory and its application to college student learning and peer education. Supervised experience as a peer educator with training in structured group facilitation.
Prerequisite: consent of instructor.

UNIV 361. NMSU Gospel Choir
1 Credit (1)
Students will gain performance experience and exposure to urban contemporary gospel music. Open to all majors. May be taken for unlimited credit.

UNIV 395. Independent Study
1-3 Credits
Individualized projects related to the field of learning assistance. May be repeated for a maximum of 3 credits.

UNIV 450. Faculty Led International Travel
1-3 Credits (1-3)
This is an intensive Faculty Led International Program and earns an additional credit(s) for participation the FLiP. May be repeated up to 3 credits.

Learning Outcomes
1. Varies

UNIV 495. Independant Study
1-3 Credits (1-3)
Individualized projects related to the field of learning assistance. Taught with UNIV 395.

WATR-WATER UTILITIES

WATR 120. Introduction to Water Systems
3 Credits (3)
Introduction to and theory of groundwater sources, production, treatment, and distribution.
Learning Outcomes
1. Effectively present technical information through oral communication.
2. Effectively work as a team.
3. Identify appropriate process changes for different water processes.

WATR 130. Wastewater Collection and Basic Treatment Systems
3 Credits (3)
Introduction to wastewater characteristics, collection, and basic treatment operations.
Learning Outcomes
1. Effectively present technical information through oral and written communication.
2. Identify appropriate process changes for different water processes.

WATR 140. Applied Water and Wastewater Math I
3 Credits (3)
Introduction to basic water and wastewater mathematics, flows through distribution networks and collection systems, and fundamentals of flow measurement.
Prerequisite: CCDM 114 N with a C- or better, or equivalent.
Learning Outcomes
1. Apply problem solving techniques to solve math problems and career related technical problems.
2. Apply estimation techniques to solve problems and check answers for reasonableness.
3. Analyze and solve problems using basic technical tools and techniques.
4. Demonstrate the ability to work as a member of a team to solve problems and complete projects.
5. Display the positive attitude and good work habits necessary for successful employment.

WATR 160. Systems Maintenance
4 Credits (2+4P)
Basic tools, equipment, maintenance schedules, chlorinator trouble-shooting, and chlorine safety. Hands-on training with valves, pumps, meters and chlorination equipment. May be repeated up to 4 credits.
Learning Outcomes
1. Effectively work as part of a team.
2. Identify cause(s) of mechanical/equipment/system failure.
3. Identify corrective actions for mechanical/equipment/system failure.

WATR 175. Programmable Logic Controllers
2 Credits (2)
This course will introduce students to electrical safety, theory, and the function, operations, programming and troubleshooting of the PLC controlling common electrical components utilized in control circuits associated with the water and wastewater industry.
Learning Outcomes
1. Identify corrective actions for equipment failure.
2. Utilize knowledge to develop a treatment facility schematic/design.
3. Identify the sampling points for data collection.
4. Perform operational duties safely.

WATR 180. Water Chemistry
3 Credits (3)
Basic chemistry with applications to water and wastewater analysis.
Prerequisite: CCDM 114 N grade of C- or better, or consent of instructor.
Learning Outcomes
1. Apply critical thinking (includes communicating effectively, applying numerical information appropriately, problem solving effectively and demonstrating appropriate technical skills).
2. Identify information/data required to complete calculations.
3. Use mathematics and problem-solving techniques to analyze and find answers to work- related technical problems.

WATR 182. Water Chemistry Analysis
1 Credit (3P)
Beginning water and wastewater laboratory analysis including gravimetric, volumetric, and quality control techniques.
Prerequisite: Grade of C- or better in CCDM 114 N or equivalent, or consent of instructor.
Learning Outcomes
1. Students will be able to use written communication to effectively present technical information.
2. Students will be able to conduct appropriate lab analysis.

WATR 190. Water and Wastewater Microbiology
3 Credits (3)
Overview of microorganisms associated with water and wastewater. Growth and reproduction, energy production, and methods of counting.
Prerequisite: Grade of C- or better in WATR 130 and WATR 180, or consent of instructor.
Learning Outcomes
1. Effectively present technical information through oral and written communication.
2. Effectively work as part of a team.
3. Evaluate treatment processes utilizing collected or given data.
4. Identify appropriate process control changes for different treatment processes based on process evaluation.
5. Identify correct operational parameters for treatment processes.
6. Identify sampling points for data collection from treatment processes.
7. Integrate multiple, related concepts to determine appropriate operational response.

WATR 192. Water and Wastewater Microbiological Analysis
1 Credit (3P)
Introduction to water and wastewater treatment operational tests such as BODs, solids testing, activated sludge control tests, use of microscope, and bacteriological techniques.
Prerequisite: Grade of C- or better in WATR 130 and WATR 182, or consent of instructor.
Learning Outcomes
1. Identify information/data required to complete calculations and accurately perform them.

2. Identify correct operational parameters for treatment processes.
3. Identify sampling points for data collection from treatment processes.
4. Demonstrate correct/accurate laboratory technique.
5. Perform appropriate lab analyses with acceptable accuracy.
6. Perform operational/laboratory duties safely.

WATR 200. Internship
3-5 Credits
On-the-job training/work experience with municipalities or industries, working in water or wastewater treatment plants, high purity water plants, industrial waste plants, distribution systems, or wastewater collection systems. May be repeated up to 5 credits.
Learning Outcomes
1. Be able to successfully perform on the job duties of a Water or Waste Water technician.
2. Be able to evaluate treatment processes utilizing collected or given data.
3. Be able to successfully work as part of a water or waste water operations team.
4. Demonstrate knowledge of applicable regulations.

WATR 220. Water Treatment Systems
3 Credits (3)
Theory of water systems operation including surface water treatment, fluoridation, sodium zeolite softening, corrosion control, iron removal, various filtration methods, and overview of SDWA.
Prerequisite: Grade of C- or better in WATR 180 and WATR 182, or consent of instructor.
Learning Outcomes
1. Effectively present technical information through written and oral communication.
2. Evaluate treatment processes utilizing collected or given data.
3. Identify appropriate process control changes for different treatment processes based on process evaluation.
4. Identify information/data required to complete calculations and accurately perform them.
5. Identify correct operational parameters for treatment processes.
6. Identify sampling points for data collection from treatment processes.
7. Demonstrate knowledge of applicable regulations and their application.
8. Integrate multiple, related concepts to determine appropriate operational response.

WATR 222. Water Systems Operation
1 Credit (3P)
Operations of various water treatment systems including surface water treatment, sodium zeolite softeners, and various filtration methods.
Prerequisite: C- or better in WATR 220, or consent of instructor.
Learning Outcomes
1. Effectively present technical information through written and oral communication.
2. Evaluate treatment processes utilizing collected or given data.
3. Identify appropriate process control changes for different treatment processes based on process evaluation.
4. Identify information/data required to complete calculations and accurately perform them.
5. Identify correct operational parameters for treatment processes.
6. Identify sampling points for data collection from treatment processes.
7. Demonstrate knowledge of applicable regulations and their application.
8. Integrate multiple, related concepts to determine appropriate operational response.

WATR 230. Advanced Wastewater Treatment
4 Credits (4)
Calculations and operations involved in wastewater and water reclamation plants.
Prerequisite: Grade of C- or better in WATR 140, WATR 190, and WATR 192, or consent of instructor.
Learning Outcomes
1. Students will be able to use written communication to effectively present technical information.
2. Students will be able to conduct appropriate lab analysis.

WATR 232. Wastewater Systems Operations
1 Credit (3P)
Operation of pretreatment, primary, and biological treatment units.
Prerequisite: Grace of C- or better in WATR 230, or consent of instructor.
Learning Outcomes
1. Effectively present technical information through written and oral communication.
2. Evaluate treatment processes utilizing collected or given data.
3. Identify appropriate process control changes for different treatment processes based on process evaluation.
4. Evaluate invalid labs analysis to determine corrective actions.
5. Identify information/data required to complete calculations and accurately perform them.
6. Identify correct operational parameters for treatment processes.
7. Identify sampling points for data collection from treatment processes.
8. Demonstrate correct/accurate laboratory technique.
9. Perform appropriate lab analysis with acceptable accuracy. 1
10. Perform appropriate process control changes for various treatment processes. 1
11. Perform operational/laboratory duties safely. 1
12. Demonstrate knowledge of applicable regulations and their application. 1
13. Integrate multiple, related concepts to determine appropriate operational response.

WATR 240. Advanced Water and Wastewater Math II
3 Credits (2+2P)
Advanced water and wastewater mathematics. Flow measurement. Systems head and pump curves. May be repeated up to 3 credits.
Prerequisite: Grade of C- or better in WATR 140.
Learning Outcomes
1. Identify information/data required to complete calculations and accurately perform them.
2. Use written communication to effectively present technical information.

WATR 250. Municipal Systems Management
4 Credits (4)
Management of water utility systems including laws, finance, records, and safety.

Prerequisite: Grade of C- or better in WATR 120 and WATR 130.
Learning Outcomes
1. Effectively work as a team leader.
2. Evaluate responsibilities of utility management.
3. Identify appropriate planning, organization, and recordkeeping.
4. Evaluate appropriate practices for interviewing, hiring, supervising, and disciplining employees.
5. Evaluate and identify the development of policies and procedures for dealing with harassment, grievances, and violence in the workplace.
6. Implement effective oral and written communication, including formal and informal public relations.
7. Identify and implement assessing the financial strength and stability of a water/wastewater utility, budgeting and fund capital improvements.

WATR 270. Special Topics
1-4 Credits
Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

WATR 275. Certification Review
3 Credits (3)
Review of water and wastewater plant operations and laws in preparation for state certification exams. Restricted to Community Colleges campuses only.
Prerequisite: WATR 120, WATR 130, WATR 140, WATR 160.
Learning Outcomes
1. Identify appropriate process changes for different wastewater processes.
2. Identify appropriate process changes for different water processes.
3. Identify corrective actions for equipment failure.
4. Identify analytical data required to complete process control calculations.
5. Accurately complete water process control calculations.
6. Accurately complete wastewater process control calculations.
7. Evaluate operational problems.
8. Identify the sampling points for data collection.

WATR 285. High Purity Water Treatment Systems
3 Credits (3)
Principles of high purity water production including microfiltration, ultra-filtration, reverse osmosis, and deionization.
Prerequisite: Grade of C- or better in WATR 220.
Learning Outcomes
1. Effectively present technical information through oral and written communication.
2. Evaluate treatment processes utilizing collected or given data.
3. Identify appropriate process control changes for different treatment processes bason on process evaluation.
4. Identify information/data required to complete calculations and accurately perform them.
5. Identify correct operational parameters for treatment processes.
6. Identify sampling points for data collection from treatment processes.
7. Integrate multiple, related concepts to determine appropriate operational response.

WATR 287. Advanced Water Chemistry Analysis
3 Credits (6P)
Sampling techniques, analysis, and evaluation of potable water contaminants using gravimetric, volumetric, spectrophotometric, and other instrumentation methods.
Prerequisite/Corequisite: WATR 285. Restricted to Community Colleges campuses only.
Learning Outcomes
1. Evaluate invalid labs analysis to determine corrective actions.
2. Identify information/data required to complete calculations.
3. Accurately perform calculations.
4. Demonstrate correct/accurate laboratory technique.
5. Demonstrate correct/accurate laboratory technique.
6. Perform operational/laboratory duties safely.

WATR 290. Advanced Wastewater Microbiology and Chemistry
3 Credits (3)
Covers NPDES permits and DMR calculations and reporting; 503 sludge regs, including pathogen and vector attraction reduction and pollutants; wetlands, composting, and wastewater treatment ponds microbiology; activated sludge bulking and foaming microbiology and treatment; and use of selector to remove nutrients and prevent the growth of filamentous bacteria.
Prerequisite: Grade of C- or better in WATR 190 and WATR 192.
Learning Outcomes
1. Effectively present technical information through oral and written communication.
2. Evaluate treatment processes utilizing collected or given data.
3. Identify appropriate process control changes for different treatment processes based on process evaluation.
4. Identify cause(s) of mechanical/equipment/system failure and identify the corrective actions to take.
5. Identify information/data required to complete calculations and accurately perform them.
6. Identify correct operational parameters for treatment processes.
7. Identify sampling points for data collection from treatment processes.
8. Demonstrate knowledge of applicable regulations and their application.
9. Integrate multiple, related concepts to determine appropriate operational response.

WATR 292. Advanced Wastewater Analysis
3 Credits (6P)
Covers sampling techniques, analysis, and evaluation of wastewater contaminants using gravimetric, volumetric, spectrophotometric, and other instrumentation methods.
Prerequisite: Grade of C- or better in WATR 190 and WATR 192.
Learning Outcomes
1. Perform titrations and document the necessary quality control.
2. Perform microbiological analysis and document the necessary quality control.
3. Perform spectrophotometric analysis and document the necessary quality control.
4. Perform BOD/COD analysis and document the necessary quality control.
5. Complete performance evaluation samples satisfactorily.
6. Effectively present technical information through oral and written communication.
7. Identify information/data required to complete calculations and accurately perform calculations.

8. Demonstrate knowledge of applicable regulations and their application.

WELD-WELDING TECHNOLOGY

WELD 1110. Introduction to Welding Fundamentals
3 Credits (2+2P)
This course focuses on the fundamental techniques employed in the welding field. It is a laboratory approach to understanding and building skills in welding related areas including shop safety, hand and portable power tool usage, and welding.
Learning Outcomes
1. Demonstrate knowledge of basic welding processes.
2. Demonstrate shop safety including the proper use of welding hand and machine tools.
3. Practice and demonstrate SMAW with various electrodes in all positions.

WELD 1120. Print Reading for Welders
3 Credits (3)
Provides students with the knowledge to read and interpret prints and welding symbols and transfer this knowledge to the workplace with layout tools and measuring instruments.
Learning Outcomes
1. Identify, read and follow AWS welding symbols.
2. Demonstrate the ability to interpret orthographic and isometric drawings.
3. Demonstrate the ability to read/interpret pipe welding drawing and schematics.
4. Demonstrate proficiency in the mathematics utilized in welding and fabrication.

WELD 1130. SMAW (Shielded Metal Arc Welding) I
6 Credits (3+6P)
This course will cover introductory theory and practical applications of structural plate welding, welding safety, handheld torch cutting operations and equipment set up. The development of student skills using the Shielded Metal Arc Welding process in all positions will be stressed. The standards of this course are set by the American Welding Society and utilized in both classroom study and laboratory work.
Learning Outcomes
1. Perform welds on various joints in all positions.
2. Perform welds on various joints in all positions.
3. Demonstrate proficiency in identification of electrode classification and proper storage.
4. Identify SMAW power sources and their characteristics.
5. Maintain, use, and safely operate SMAW equipment.

WELD 1140. GMAW-Gas Metal Arc Welding I
3 Credits (2+2P)
Introduces Gas Metal Arc Welding (GMAW) short circuit welding safety, machine set up and shutdown procedures. Topics include personal protective equipment (PPE), GMAW uses, advantages and disadvantages, constant voltage (CV) power source, polarity, electrode types, shielding gasses, and weld discontinuities and defects identification and corrective practices. Lab exercises will include various joints in all positions.
Learning Outcomes
1. Demonstrate the ability to safely operate the Gas Metal Arc Welding equipment.
2. Demonstrate Gas Metal Arc Welding theory and application.
3. Demonstrate the ability to perform Gas Metal Arc Welding on various joints in all positions.
4. Demonstrate the ability to fabricate assigned projects while applying proper tolerance to finished projects.

WELD 1155. GTAW-Gas Tungsten Arc Welding I
3 Credits (2+2P)
A basic course designed to provide the student with the ability to setup, maintain and operate Gas Tungsten Arc Welding (GTAW) equipment safely. Develop skills to weld structural joints to bend tests standards utilizing various metals. Weld quality will be measured in accordance with American Welding Society standards.
Learning Outcomes
1. Demonstrate the ability set up GTAW equipment for use, inspect equipment prior to use, perform minor maintenance, and identify potential hazards.
2. Demonstrate the ability to perform GTAW on various base metals in all positions.
3. Demonstrate the understanding of basic metallurgical differences in various base and filler metals.
4. Demonstrate an understanding of welding currents and power sources.

WELD 1171. Layout and Fabrication
3 Credits (1+4P)
This class is an introduction to general layout and fabrication techniques as related to structural welding. Emphasis will be on construction of small projects to tolerances using prints. A variety of welding processes will be used in all positions.
Prerequisites: WELD 1130, WELD 1120, WELD 1140, and OETS 104 or OETS 118.
Learning Outcomes
1. Demonstrate the ability to fabricate projects.
2. Use shop drawing and/or prints to create projects and develop the bill of materials for the project.
3. Demonstrate ability to properly follow WPS (Welding Procedure Specification) during fabrication.

WELD 1191. Welded Art
3 Credits (1+4P)
Students explore the possibilities of welded art.
Prerequisite: WELD 1110.
Learning Outcomes
1. Demonstrate knowledge of the different forms of welded art.

WELD 1210. Flux Cored Arc Welding
3 Credits (2+2P)
Principles of flux cored arc welding (FCAW) terminology, safety procedures, and equipment set-up. Students will practice welding structural joints in all positions using the FCAW process.
Learning Outcomes
1. Demonstrate the set up of FCAW equipment.
2. Demonstrate safe operations of FCAW equipment.
3. Demonstrate minor repairs/maintenance of equipment.
4. Perform FCAW welds to minimum required specifications.

WELD 1220. Pipe Welding I
3 Credits (2+2P)
Stresses the theory and practical application of pipe welding in the 1-G and 2-G positions. This course will develop skills in the fit-up and technique of welding pipe, using electrodes and various Welding process.

Prerequisite(s): WELD 1130, WELD 1140, and WELD 1155, or consent of instructor.

Learning Outcomes

1. Demonstrate an understanding of 1-G and 2-G pipe welding using a variety of pipe sizes.
2. Demonstrate the ability to produce destructive test samples to AWS and/or API standards.
3. Demonstrate the ability to prepare, fit and tack pipe to specifications, getting pipe ready to weld.
4. Demonstrate knowledge of appropriate pipe fitting terminology and calculations.

WELD 1310. Metallurgy
3 Credits (3)

This course includes a study of ferrous and nonferrous metals from ore to the finished products. Emphasis is placed on metal alloys, heat-treating, hard surfacing, welding techniques, forging, foundry processes, and mechanical properties of metal including hardness, machinability, and ductility. Technical terms used in the various phases of metallurgy, from early history to present.

Prerequisites: WELD 1130 or consent of instructor.

Learning Outcomes

1. Describe metals and alloys commonly used in industry.
2. Describe mechanical properties of metals including stresses and failures.
3. Describe the metalworking processes of casting, forming, and machining.
4. Describe the two basic processes, and state the four major purposes of heat treatment.

WELD 2130. SMAW (Shielded Metal Arc Welding) II
6 Credits (3+6P)

Reviews and builds upon SMAW-1 skills. Students will learn joint design and AWS standards for welder qualification testing. Continuation of WELD 1130. May be repeated up to 6 credits.

Prerequisite: WELD 1130.

Learning Outcomes

1. Meet AWS acceptance criteria for weld quality and destructive tests (bend test).

WELD 2155. GTAW-Gas Tungsten Arc Welding II
3 Credits (2+2P)

A continuation of GTAW I. This course is designed to provide the student with the ability to setup, maintain and operate Gas Tungsten Arc Welding (GTAW) equipment safely. Develop skills to weld structural joints to bend tests standards utilizing various metals. Weld quality will be measured in accordance with American Welding Society standards.

Prerequisite: WELD 1155 or consent of instructor.

Learning Outcomes

1. Demonstrate the ability to perform increasingly complex welds.
2. Demonstrate the ability set up GTAW equipment for use, inspect equipment prior to use, perform minor maintenance, and identify potential hazards.
3. Demonstrate the ability to perform GTAW on various base metals in all positions.
4. Demonstrate the understanding of basic metallurgical differences in various base and filler metals.
5. Demonstrate an understanding of welding currents and power sources.

WELD 2220. Pipe Welding II
3 Credits (2+2P)

Stresses the theory and practical application of 5-G and 6-G pipe welding. This course will develop skills in the technique of pipe welding, using various Welding processes.

Prerequisite: WELD 2120.

Learning Outcomes

1. Demonstrate an understanding of 5-G and 6-G pipe welding using a variety of pipe sizes.
2. Demonstrate the ability to produce destructive test samples to AWS and/or API standards.
3. Demonstrate the ability to prepare, fit and tack pipe to specifications, getting pipe ready to weld.
4. Demonstrate knowledge of appropriate pipe fitting terminology and calculations.

WELD 2290. Welder Qualifications
6 Credits (3+6P)

Laboratory and classroom instruction on AWS and ASME Welder Performance Qualification Tests. All position plate and pipe techniques and tests for SMAW, GMAW, GTAW, FCAW, and SAW. Nondestructive and destructive examination methods, and basics of welding codes. Restricted to Welding majors.

Prerequisites: OETS 104 or OETS 118; and WELD 1130, WELD 1120, WELD 1310, WELD 1140, WELD 1155, WELD 1210 and WELD 2155 or consent of instructor.

Learning Outcomes

1. Pass the AWS and ASME Welder Performance Qualification Tests in all processes and all positions.
2. Recognize the role of welding inspection and testing in industry.
3. Identify essential information for welding procedure and performance qualification.
4. Identify essential welding and inspection information from Welding Procedure Specifications (WPS's).
5. Identify essential welding and inspection information from AWS D1 1, Structural Welding Code — Steel.
6. Identify essential welding and inspection information from ASME, Boiler and Pressure Vessel Code - Section IX.
7. Describe the basic principles of non-destructive testing methods.

WELD 2995. Cooperative Education in Welding
1-6 Credits

Supervised cooperative work program. Student is employed in an approved occupation and supervised and rated by the employer and instructor. Student will meet in a weekly class. May be repeated up to 6 credits.

Learning Outcomes

1. Varies.

WELD 2996. Topics in Welding
1-6 Credits

Individual studies in areas of welding technology. May be repeated up to 12 credits.

Learning Outcomes

1. Varies.

WELD 2997. Independent Study
1-4 Credits

Individual Studies related to Welding.

Learning Outcomes
1. Varies.

WSAM-WATER SCIENCE & MGT

WSAM 470. Environmental Impacts of Land Use and Contaminant Remediation
3 Credits (3)
The course will cover the integrated assessment of soil erosion, contaminant transport in soil and water, and contaminant remediation from site scale to watershed scales. Understanding of the controlling factors for each type land use impact will be gained through the use of risk assessment, case studies, and computer modeling. Case studies will illustrate the processes under various environmental applications. This course will also cover the application of solute transport principles and methods for the remediation of contaminated soil and groundwater. It will also discuss the contaminated site characterization, monitoring, and remediation design. Discussions of innovative methodologies will be supported with case studies.
Learning Outcomes
1. Apply knowledge of mathematics, science, and engineering to identify, formulate, and solve environmental problems.
2. Function on multidisciplinary teams and exhibit professional and ethical responsibility and communicate findings effectively.
3. Recognize the need for, and an ability to engage in, life-long learning.
4. Describe contemporary land-use impact and cleanup issues.
5. Use the techniques, skills, and modern environmental science and engineering tools necessary for current industry practice.

WSAM 550. Special Topics
1-4 Credits (1-4)
Specific subjects to be announced in the Schedule of Classes. May be repeated up to 9 credits.
Learning Outcomes
1. Readings, discussions, and/or field and laboratory investigation of selected problems.

WSAM 551. Earth Data Retrieval
3 Credits (3)
This course covers topics related to identifying sources, preprocessing, utilizing earth data that can be used to monitor some hydrological and water related variables, vegetation growth and related biophysical properties. The course focuses on developing students' skills on how to handle and analyze high-level large amounts of research data in different formats (i.e. .hdf). The course highlights the use of remote sensing and land surface models-based (NLDAS) earth observation datasets (e.g. NDVI, LST, Ta, and ET). The course uses some open-source tools including Python, API as well as MATLAB. Crosslisted with: RGSC 551.
Learning Outcomes
1. Identify, retrieve, and visualize earth observation datasets that are relevant to individual research activities.
2. Understand the nature and formats of earth observation data.
3. Handle, process, and conduct quantitative analysis of earth observation datasets using python, MATLAB, and cloud computing (GEE).
4. Development of qualitative reasoning and analytical thinking skills to address research questions related to earth observation datasets.

WSAM 575. Climate Studies, Water and Society
3 Credits (3)
The course provides a brief description of the Earth's climate system, an in-depth review and methodologies used to investigate climate change and variability, evidence of climate change on natural systems (water availability) vulnerability of human systems (e.g. agriculture) to climate change, and mitigation and adaptation strategies.
Learning Outcomes
1. Know, identify, and interrogate Earth's climate observation datasets.
2. Evaluate and understand Earth's climate systems.
3. Conduct meaningful investigations, prediction, and inferencing.
4. Critical thinking about climate change impacts on human and natural resources.

WSAM 585. Land Cover Analysis for Natural Resources
3 Credits (3)
This course is designed to help students understand, manipulate and extract Earth Observation (EO) data and to conduct land cover analysis related to natural resources including water and vegetation. The course provides and highlights means to identify and access EO data in different formats, extract meaningful information, and to help students developing critical thinking skills. The course introduces tools such as python and ArcGIS Pro to handle different data formats (e.g. hdf) efficiently; develop and present creative maps. The course provides basic information about how to conduct land use, land cover change analysis, mapping vegetation, water related variables and plant and animal distribution analysis. Crosslisted with: RGSC 585.
Learning Outcomes
1. Identify sources of and obtain land cover GIS data.
2. Handle GIS data in different formats.
3. Extract meaningful information.
4. Development of qualitative reasoning and analytical thinking skills to address research questions related to natural resources.

WSAM 589. Landscape Hydrology Modeling
3 Credits (3)
The course "Landscape Hydrology Modeling" offers topics related to the physical hydrological processes that occur at different spatial and temporal scales in terms of understanding, quantitative evaluation, modeling, and visualization. It addresses precipitation, runoff, infiltration, and evaporation, as well as understanding impact of land use change on these processes. The course highlights and provide training on the use of hydrological modeling tools including WMS software, HydroVIS and ArcGIS software to help students understand, model, manipulate, and visualize hydrological data processes. The course offers hands-on learning experience on the use of these tools.
Learning Outcomes
1. Identify the different components of a landscape scale hydrologic system and quantitatively evaluate the associated physical processes including precipitation, runoff, streamflow, infiltration, evapotranspiration.
2. Retrieve and visualize a hydrologic system data along with the associated datasets.
3. Be able to model hydrological processes within a watershed and understand the streamflow generation process and the effect of vegetation and topography on streamflow generation.
4. Gain knowledge about, and be able to use, some of the available tools that can be used in spatial and temporal hydrological process modeling.

WSAM 590. System Dynamics
3 Credits (3)

This course takes a system dynamics approach to the study of economics and natural resources management. We will examine some of the example theories such as Solow-Swan model and endogenous growth theories as well as the tragedy of the commons, using system dynamics tools to uncover the feedback and explicitly examine its impact on the dynamic behavior of the system. Through these examples, we will learn how to develop, validate, and use system dynamics models for policy design and analysis.

Learning Outcomes

1. Identify common generic structures and behavioral modes in socioeconomic and ecological systems.
2. Define important feedback theories that explain the behavioral modes in socioeconomic and ecological systems.
3. Implement the system dynamics method to translate the feedback theories into dynamic simulation models.

WSAM 595. Hands-On Transboundary Aquifer and Community System Convergence Seminar
1 Credit (1)

An opportunity for graduate researchers to build partnerships with their colleagues in the IWR cohort and with our expert collaborators. Graduate researchers present their research methods, share lessons from their research activities, and report on experiences in the field and in the IWR program. An opportunity for academic, industry, and stakeholder project partners to share career development and research convergence insight with the cohort. May be repeated up to 18 credits.

Learning Outcomes

1. Students will learn about natural and social science convergence.
2. Convergence tool skill-building.
3. Students will learn how to lead the coordination of international, multidisciplinary research collaboration.

WSAM 598. Internship
1-9 Credits (1-9)

Out-of-classroom learning experiences to gain relevant education, experience, and expertise. Field-based learning providing transformative education and hands-on training. May be repeated up to 18 credits.

Learning Outcomes

1. Gain the experience necessary to engage confidently in community-centered hydrologic and social science approaches to water research.
2. Students will learn how to lead the coordination of international, cross-disciplinary research collaboration.
3. Gain experience applying academic and research knowledge in professional capacities.
4. Develop cross-sector communication skillsets.

WSAM 599. Masters Thesis
1-15 Credits (1-15)

Thesis. May be repeated up to 88 credits. Consent of Instructor required. Restricted to: Water and Science Management majors. Thesis/Dissertation Grading.

WSAM 600. Doctoral Research
1-15 Credits (1-15)

Assigned credit for research preformed. May be repeated up to 15 credits. Consent of Instructor required.

Learning Outcomes

1. Identify appropriate research methodologies.
2. Reflect on their own research, identifying lessons learned, strengths, and ways to improve.
3. Communicate confidently and constructively with faculty advisors.

WSAM 605. Arid Land Water Resources
3 Credits (2+2P)

The course will cover various issues of relevance to water resources and water supply management within the Southwest US and other semiarid and arid regions. Discussions may include development and sustainability, climate change and drought, socioeconomic and cultural, and transboundary issues. May be repeated up to 3 credits. Crosslisted with: ENVS 605.

WSAM 610. Water and Sustainable Economic Development
3 Credits (3)

For graduate students in the Water Science and Management or other research degree programs, use the water economics literature as a model for student research leading to an M.S. thesis or Ph.D. dissertation.

WSAM 700. Doctoral Dissertation
1-15 Credits (1-15)

Dissertation for Water Sciences and Management Majors May be repeated up to 88 credits. Restricted to: Water Sciences and Management majors. Thesis/Dissertation Grading.

NOTICE OF NON-DISCRIMINATION

New Mexico State University (NMSU) is dedicated to providing equal opportunities in our employment and learning environments. NMSU does not discriminate on the basis of age, ancestry, color, disability, gender identity, genetic information, national origin, race, religion, retaliation, serious medical condition, sex (including pregnancy), sexual orientation, spousal affiliation, or protected veteran status in its programs and activities as required by equal opportunity regulations and laws and university policy and rules.

NMSU's Office of Institutional Equity (OIE) is responsible for compliance with state and federal equal employment opportunity laws and regulations. If you believe you have been treated in a manner inconsistent with equal opportunity, contact the Office of Institutional Equity.

NMSU has designated the Executive Director of OIE as the Title IX Coordinator and is responsible for ensuring compliance with Title IX and other state and federal laws addressing sexual and gender-based harassment, including sexual assault, sexual exploitation, sexual intimidation, dating and domestic violence, stalking, and other forms of sexual violence based on sex, gender, sexual orientation, or gender identity.

NMSU recognizes that individuals with disabilities are entitled to access, support and, when appropriate, reasonable accommodation. The Executive Director of OIE is also assigned to coordinate compliance with the Americans with Disabilities Act (“ADA”), Section 504 of the Rehabilitation Act, and other state and federal laws that prohibit discrimination on the basis of disability in admission, treatment and/or access to its programs and activities.

Inquiries regarding equal employment opportunity, Title IX, and/or ADA/Section 504 should be directed to:

Office of Institutional Equity

Executive Director

Title IX Coordinator and ADA

O'Loughlin House

Las Cruces, NM 88003

(575) 646-3635

Website: equity.nmsu.edu

Email: equity@nmsu.edu

OIE's Deputy Director can be contacted at the O'Loughlin House or by telephone (575) 646-3635.

Complaints of discrimination, harassment, sexual violence, and retaliation may be directed to the Office of Institutional Equity at equity@nmsu.edu. Complaints may also be filed with the United States Department of Education, Office for Civil Rights at https://ocrportal.hhs.gov/ocr/smartscreen/main.jsf, the U.S. Equal Employment Opportunity Commission, and/or New Mexico Human Rights Bureau.

Equal Opportunity/Affirmative Action Statement

New Mexico State University, in compliance with applicable laws and in furtherance of its commitment to fostering an environment that welcomes and embraces diversity, does not discriminate on the basis of age, ancestry, color, disability, gender identity, genetic information, national origin, race, religion, retaliation, serious medical condition, sex (including pregnancy), sexual orientation, spousal affiliation, or protected veteran status in its programs and activities, including employment, admissions, and educational programs and activities. Inquiries may be directed to the Executive Director, Title IX and Section 504 Coordinator, Office of Institutional Equity, P.O. Box 30001, 1130 E. University Avenue, Las Cruces, NM 88003; 575-646-3635; equity@nmsu.edu.

NMSU is committed to providing reasonable accommodations to qualified individuals with disabilities upon request. To request an accommodation, students should contact Student Accessibility Services on their campus or on Main Campus at Corbett Center Student Union, Room 2008, Las Cruces, NM 88003; 575-646-6840 or sas@nmsu.edu. Employees requiring accommodation should contact the Office of Institutional Equity, O'Loughlin House, 1130 E. University Avenue, Las Cruces, NM 88003; 575-646-3635 or equity@nmsu.edu.

ELAD-EDUCATIONAL LEADERSHIP ADMINISTRATION 1784
Electrical and Computer Engineering 1087
Electrical Engineering - Bachelor of Science in Electrical Engineering . 1109
Electrical Engineering - Master of Engineering in Electrical Engineering 151
Electrical Engineering - Master of Science in Electrical Engineering 153
Electrical Engineering - Undergraduate Minor 1130
Electrical Engineering (Artificial Intelligence, Machine Learning, & Data Science) - Bachelor of Science in Electrical Engineering 1111
Electrical Engineering (Communications and Signal Processing) - Bachelor of Science in Electrical Engineering 1114
Electrical Engineering (Computers and Microelectronics) - Bachelor of Science in Electrical Engineering 1116
Electrical Engineering (Controls & Robotics) - Bachelor of Science in Electrical Engineering 1119
Electrical Engineering (Electromagnetics and Photonics) - Bachelor of Science in Electrical Engineering 1121
Electrical Engineering (Power) - Bachelor of Science in Electrical Engineering 1124
Electrical Engineering (Space Systems) - Bachelor of Science in Electrical Engineering 1127
Electrical Engineering Technology - Bachelor of Science in Engineering Technology 1178
Elementary Education Alternative Licensure - Graduate Certificate 247

Elementary Education (Language Arts K-8) - Bachelor of Science in Education 1423
Elementary Education (Math K-8) - Bachelor of Science in Education . 1425
Elementary Education (Science K-8) - Bachelor of Science in Education 1427
Elementary Education (Social Studies K-8) - Bachelor of Science in Education 1428
ELT - ELECTRONICS TECHNOLOGY 1791
ELTR-ELECTRICAL 1794
Engineering (Chemical Engineering) - Doctor of Philosophy 219
Engineering (Civil Engineering) - Doctor of Philosophy 220
Engineering (Electrical Engineering) - Doctor of Philosophy 221
Engineering (Industrial Engineering) - Doctor of Philosophy 223
Engineering (Mechanical Engineering) - Doctor of Philosophy 224
Engineering Physics 1130
Engineering Physics (Aerospace) - Bachelor of Science in Engineering Physics 1141
Engineering Physics (Chemical) - Bachelor of Science in Engineering Physics 1143
Engineering Physics (Electrical) - Bachelor of Science in Engineering Physics 1145
Engineering Physics (Mechanical) - Bachelor of Science in Engineering Physics 1147
Engineering Technology and Surveying Engineering 1149
ENGL-ENGLISH 1796
English 711
English - Bachelor of Arts 732
English - Master of Arts 156
English - Undergraduate Minor 740
English (Creative Writing) - Bachelor of Arts 730
English (Literature, Language and Culture) - Bachelor of Arts 734
English (Rhetoric, Digital Media and Professional Communication) - Bachelor of Arts 736
ENGR-ENGINEERING 1809
Enterprise Systems - Undergraduate Minor 986
Entomology - Undergraduate Minor 397
Entomology, Plant Pathology and Weed Science 380
ENTR-ENTREPRENEURSHIP AND INNOVATION 1812
Entrepreneurship - Undergraduate Minor 1017
Entrepreneurship - Undergraduate Minor 1211
ENVE-ENVIRONMENTAL ENGINEERING 1812
Environmental Engineering - Master of Science in Environmental Engineering 158
Environmental Engineering - Undergraduate Minor 1086
Environmental Science - Bachelor of Science in Environmental Science 460
Environmental Science - Undergraduate Minor 476
ENVS-ENVIRONMENTAL SCIENCE 1814
EPWS-ETMLGY/PLNT PTHLGY/WD SCI 1816
Ethics - Undergraduate Minor 917
Exercise Science - Undergraduate Minor 1316
Experimental Psychology - Doctor of Philosophy 225
Experimental Psychology - Master of Arts 159

F

Family and Consumer Sciences 397
Family and Consumer Sciences (Couples, Marriage and Family Therapy) - Master of Science 159
Family and Consumer Sciences Education - Bachelor of Science in Family and Consumer Sciences 414
Family and Consumer Sciences (Food Science and Technology) - Master of Science 159
Family and Consumer Sciences (Hotel, Restaurant and Tourism Management) - Master of Science 160
Fashion Merchandising & Design - Undergraduate Minor 425
Fashion Merchandising and Design - Bachelor of Science in Family and Consumer Sciences 415
FCSC-FAMILY & CONSUMER SCI 1822
FCST-FAMILY AND CHILD STUDIES 1823
FDMA-FILM & DIGITAL MEDIA ARTS 1829
Finance 1005
Finance - Bachelor of Business Administration 1011
Finance - Graduate Certificate 248
Finance - Undergraduate Minor 1017
Finance (Financial Analyst) - Bachelor of Business Administration ... 1013
Finance (Risk Management and Insurance) - Bachelor of Business Administration 1014
Financial Aid & Scholarship Services 75
Fine Arts - Master of Fine Arts 162
FIRE-FIRE INVESTIGATION 1844
Fish, Wildlife and Conservation Ecology 426
Fish, Wildlife and Conservation Ecology - Graduate Minor 255
Fish, Wildlife and Conservation Ecology - Master of Science 162
Fisheries and Wildlife Science (Aquatic Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology 437
Fisheries and Wildlife Science (Wildlife Ecology and Management) - Bachelor of Science in Fish, Wildlife and Conservation Ecology 440
Food Science - Doctor of Philosophy 225
Food Science - Undergraduate Minor 425
Food Science and Technology (Science, Technology and Engineering) - Bachelor of Science in Food Science and Technology 418
Food Studies - Graduate Minor 256

Forensic Science - Undergraduate Minor 704
FREN-FRENCH 1849
French - Undergraduate Minor 836
FSTE-FOOD SCIENCE & TECHNOLOGY 1852
FWCE-FISH,WILDLF,CONSERV ECOL 1857
FYEX-FIRST YEAR EXPERIENCE 1865

G

G S-GRADUATE STUDIES 1867
Gender & Sexuality Studies - Undergraduate Minor 740
Gender and Sexuality Studies - Bachelor of Arts 738
Gender and Sexuality Studies - Graduate Minor 256
GENE-GENETICS 1868
General Agriculture - Bachelor of Science in Agriculture 395
General Business - Bachelor of Business Administration 1023
General Business (Entrepreneurship) - Bachelor of Business Administration 1025
General Education & Viewing a Wider World Courses 262
Genetics and Biotechnology - Bachelor of Science in Genetics 462
Genetics and Biotechnology - Bachelor of Science in Genetics 577
Genetics and Biotechnology - Undergraduate Minor 476
Genetics and Biotechnology - Undergraduate Minor 582
GEOG-GEOGRAPHY 1869
Geographic Information Science and Technology - Graduate Minor 257
Geographic Information Systems - Undergraduate Minor 763
Geography 742
Geography - Doctor of Philosophy 226
Geography - Master of Applied Geography 163
Geography - Undergraduate Minor 763
Geography (Environmental Studies) - Bachelor of Science 757
Geography (Geographic Information Science & Tech) - Bachelor of Science 760
GEOL-GEOLOGY 1881
Geological Sciences 764
Geology - Master of Science 166
Geology - Undergraduate Minor 776
Geology (Earth and Environmental Sciences) - Bachelor of Science 768
Geology (Earth Science Education) - Bachelor of Science 771
Geology (Geological Sciences) - Bachelor of Science 773
Geomatics - Bachelor of Science in Geomatics 1180
Geomatics - Undergraduate Minor 1198
Geotechnical Engineering - Undergraduate Minor 1086
German - Undergraduate Minor 837
Gerontology - Graduate Minor 257
Gerontology - Undergraduate Minor 1363
GNDR-WOMEN'S STUDIES 1885
GPHY-GEOPHYSICS 1889
GREX-GRAD CROSS UNIV EXCH 1889
GRMN-GERMAN 1889

H

Health Equity Sciences - Doctor of Philosophy 228
HESC - HEALTH EQUITY SCIENCES 1891
HIST-HISTORY 1893
History 777
History - Bachelor of Arts 790
History - Graduate Minor 257
History - Master of Arts 166
History - Undergraduate Minor 792
History (Public History) - Master of Arts 167
HLED-HEALTH EDUCATION 1906
HMRT-HUMAN RIGHTS 1906
HMSV-HUMAN SERVICES 1908
HNRS-HONORS 1908
Horse Management - Undergraduate Minor 379
HORT-HORTICULTURE 1918
Horticulture - Bachelor of Science in Agriculture 464
Horticulture - Master of Science 168
Horticulture - Undergraduate Minor 477
Horticulture (Turfgrass Science and Management) - Bachelor of Science in Agriculture 467
HOST-HOSPITALITY AND TOURISM 1922
Hotel, Restaurant and Tourism Management - Bachelor of Science 489
Hotel, Restaurant and Tourism Management - Undergraduate Minor 491
HRTM-HOTEL/RESTRNT/TOURISM MGT 1926
Human Animal Interaction - Undergraduate Minor 379
Human Biology - Undergraduate Minor 582
Human Nutrition and Dietetic Science (Nutrition Education) - Bachelor of Science in Family and Consumer Sciences 419
Human Nutrition and Dietetic Science (Pre-Dietetics/Dietetics) - Bachelor of Science in Family and Consumer Sciences 422
Human Resource Management - Undergraduate Minor 1032
Human Rights - Undergraduate Minor 705
Humanities and Social Sciences 57
HVAC-HEATING/AC/REFRIGERATION 1936

I

I B-INTERNATIONAL BUSINESS 1938
I E-INDUSTRIAL ENGINEERING 1939

ICT-INFO &COMMUNICATION TECH 1947
Individualized Studies - Bachelor of Individualized Studies 792
Individualized Studies (Pre-Pharmacy) - Bachelor of Individualized Studies 793
Industrial Engineering 1199
Industrial Engineering - Bachelor of Science in Industrial Engineering 1209
Industrial Engineering - Master of Engineering in Industrial Engineering 169
Industrial Engineering - Master of Science in Industrial Engineering ... 170
Information and Communication Technology - Bachelor of Information and Communication Technology 1182
Information and Communication Technology (Cyber Defense) - Bachelor of Information and Communication Technology 1185
Information and Communication Technology (Network Technologies) - Bachelor of Information Communication Technology 1189
Information and Communication Technology (Software Development) - Bachelor of Information and Communication Technology 1192
Information Security Technology - Undergraduate Minor 1198
Information Systems - Bachelor of Business Administration 983
Information Systems - Graduate Minor 257
Information Systems - Undergraduate Minor 986
INST-INSTRUMENT & CONT TECH 1951
Integrated Behavioral Health Care - Graduate Minor 258
Interior Spaces - Undergraduate Minor 425
International Business - Bachelor of Business Administration 1002
International Business - Undergraduate Minor 1005
International Relations - Undergraduate Minor 947
International Students 68
International Studies - Undergraduate Minor 837
INTR-INTERDISCIPLINARY STUDIES 1952

J

JAPN-JAPANESE 1952
JOUR-JOURNALISM 1953
Journalism and Media Studies 795
Journalism and Media Studies - Bachelor of Arts 801
Journalism and Media Studies - Undergraduate Minor 805
Justice, Political Philosophy, and Law - Bachelor of Arts 914
Justice, Poltical Philosophy, and Law - Undergraduate Minor 917

K

Kinesiology 1283
Kinesiology - Doctor of Philosophy 229
Kinesiology (Exercise Science) - Bachelor of Science in Kinesiology .. 1308
Kinesiology (Performance Psychology) - Bachelor of Science in Kinestiology 1311
Kinesiology (Physical Education) - Bachelor of Science in Kinestiology 1314

L

L SC-LIBRARY SCIENCE 1959
LANG-LANGUAGE 1960
Languages and Linguistics 806
Languages (French) - Bachelor of Arts 826
Languages (German) - Bachelor of Arts 828
Languages (Spanish) - Bachelor of Arts 831
Las Cruces Academic Catalog 13
Latin American Studies - Supplemental Major 838
Law and Society - Supplemental Major 948
Law and Society - Undergraduate Supplemental Major 705
LAWE-LAW ENFORCEMENT 1960
Leadership in Agricultural Communications - Undergraduate Minor 343
Lean Manufacturing and Analytics - Undergraduate Minor 1211
LIBR-LIBRARY SCIENCE 1962
Life Sciences 57
LING-LINGUISTICS 1962
Linguistics - Bachelor of Arts 833
Linguistics - Supplemental Major 839
Linguistics - Undergraduate Minor 837
Literature - Undergraduate Minor 741
Livestock Production - Undergraduate Minor 379

M

M E-MECHANICAL ENGINEERING 1963
Management 1017
Management - Undergraduate Minor 1033
Management (Human Resource Management) - Bachelor of Business Administration 1027
Management (Project & Supply Chain Management) - Bachelor of Business Administration 1029
Management (Small Business Management & Entrepreneurship) - Bachelor of Business Administration 1031
Manufacturing - Undergraduate Minor 1198
Marketing 1033
Marketing - Undergraduate Minor 1049
Marketing (Advertising) - Bachelor of Business Administration 1042
Marketing (PGA Golf Management) - Bachelor of Business Administration 1043
Marketing (Professional Selling) - Bachelor of Business Administration 1045
Marketing (Strategic Marketing) - Bachelor of Business Administration 1047

MAT-AUTOMATION & MANUFACTURING 1970
Materials Engineering - Graduate Minor 259
Materials Engineering - Undergraduate Minor 1072
MATH-MATHEMATICS 1971
Mathematical Sciences 840
Mathematics - Doctor of Philosophy 230
Mathematics - Graduate Minor 259
Mathematics - Master of Science 172
Mathematics - Undergraduate Minor 871
Mathematics (Actuarial Science and Insurance) - Bachelor of Science . 857
Mathematics (Applied Mathematics) - Bachelor of Science 859
Mathematics (Computational Mathematics) - Bachelor of Science 861
Mathematics (Foundations) - Bachelor of Science 863
Mathematics (General Mathematics) - Bachelor of Science 864
Mathematics (Physics) - Bachelor of Science 866
Mathematics (Probability and Statistics) - Bachelor of Science 867
Mathematics (Secondary Mathematics Education) - Bachelor of Science 869
Meat Science - Undergraduate Minor 425
Mechanical Engineering - Bachelor of Science in Mechanical Engineering 1226
Mechanical Engineering - Master of Engineering in Mechanical Engineering 173
Mechanical Engineering - Master of Science in Mechanical Engineering 174
Mechanical Engineering - Undergraduate Minor 1228
Mechanical Engineering and Aerospace Engineering 1213
Mechanical Engineering Technology - Bachelor of Science in Engineering Technology 1195
Medical Anthropology - Undergraduate Minor 525
Medieval and Early Modern Studies - Undergraduate Minor 741
MGMT-MANAGEMENT 1983
Microbiology - Bachelor of Science 579
Microbiology - Undergraduate Minor 583
Military and Veterans Programs (MVP) 63
Military Science 872
Military Science - Undergraduate Minor 878
MKTG-MARKETING 1988
MLSL-MILITARY SCIENCE 1996
MOLB-MOLECULAR BIOLOGY 2001
Molecular Biology - Doctor of Philosophy 231
Molecular Biology - Graduate Minor 259
Molecular Biology - Master of Science 175
Molecular Biology & Interdisciplinary Life Sciences 878
Molecular Biology- Undergraduate Minor 880
MPA-MCJ Program - Dual Degree 176
MUSC-MUSIC 2002
Museum Conservation - Undergraduate Minor 549
Museum Studies - Graduate Certificate 248
Music 880
Music - Bachelor of Arts 896
Music - Undergraduate Minor 911
Music (Collaborative Piano) - Master of Music 176
Music (Conducting) - Master of Music 177
Music Education (K12 Instrumental) - Bachelor of Music Education ... 907
Music Education (K12 Vocal) - Bachelor of Music Education 909
Music (Instrumental Performance) - Bachelor of Music 901
Music (Music Education) - Master of Music 177
Music Pedagogy and Performance - Graduate Certificate 249
Music Performance - Graduate Certificate 249
Music (Performance) - Master of Music 178
Music (Piano Performance) - Bachelor of Music 903
Music (Pre-Speech Language Pathology) - Bachelor of Arts 898
Music (Theatre) - Bachelor of Arts 899
Music (Vocal Performance) - Bachelor of Music 905

N

Native American Studies - Graduate Minor 260
Native American Studies - Undergraduate Minor 1245
Natural Resource Economics - Undergraduate Minor 357
Natural Resource Economics and Policy - Bachelor of Science in Agriculture 354
NATV-NATIVE AMERICAN STUDIES 2016
NAV-NAVAJO 2018
NGEC-NATURAL GAS ENGINE COMP 2018
NMNC-NEW MEXICO NURSING EDUCATION CONSORTIUM 2019
NMSU - Online 1476
Notice of Non-Discrimination 2207
Nuclear Chemical Engineering - Undergraduate Minor 1073
NURS-NURSING 2022
Nursing 1316
Nursing - Bachelor of Science in Nursing 1346
Nursing Practice (Nurse Anesthesiology) - Doctor of Nursing Practice . 232
NUTR-NUTRITION 2045
Nutrition - Undergraduate Minor 426

O

OECS-COMPUTER TECHNOLOGY 2052

OETS-TECHNICAL STUDIES 2053
Online Teaching and Learning - Graduate Certificate .....

P

Pest Management - Undergraduate Minor 397
PHED-PHYSICAL EDUCATION 2054
PHIL-PHILOSOPHY 2055
Philosophy 911
Philosophy - Bachelor of Arts 915
Philosophy - Undergraduate Minor 918
PHLS-PUBLIC HEALTH SCIENCES 2058
PHYS-PHYSICS 2068
Physical Sciences and Engineering 57
Physics 918
Physics - Bachelor of Arts 931
Physics - Bachelor of Science 933
Physics - Doctor of Philosophy 233
Physics - Graduate Minor 260
Physics - Master of Science 179
Physics - Undergraduate Minor 935
PL-S-PARALEGAL SERVICES 2079
Plant and Environmental Science - Doctor of Philosophy 233
Plant and Environmental Science - Master of Science 180
Plant and Environmental Sciences 443
Plant Pathology - Undergraduate Minor 397
PLEN-PLANT,ENVRMTL SCIENCES 2081
Political Science - Bachelor of Arts 945
Political Science - Master of Arts 180
Political Science - Undergraduate Minor 948
Political Science, Public Law and Administration 936
Political Theory - Undergraduate Minor 948
POLS-POLITICAL SCIENCE 2083
PORT-PORTUGUESE 2091
Pre-Health - Undergraduate Minor 1233
Pre-Law in Intellectual Property - Undergraduate Minor 1073
Pre-Medicine Studies- Undergraduate Minor 1073
Prebusiness - Associate in Prebusiness 972
Principal Licensure - Graduate Certificate 249
Professional Selling - Undergraduate Minor 1049
Programs A-Z 14
PSYC-PSYCHOLOGY 2092
Psychology 949
Psychology - Bachelor of Arts 955
Psychology - Graduate Minor 260
Psychology - Undergraduate Minor 958
Public Administration - Master of Public Administration 181
Public Administration - Undergraduate Minor 948
Public Health - Bachelor of Public Health 1361
Public Health - Graduate Certificate 249
Public Health - Undergraduate Minor 1363
Public Health (Health Behavior and Health Promotion) - Master of Public Health 182
Public Health (Health Management, Administration & Policy) - Master of Public Health 184
Public Health Sciences 1349
Public History and Public Administration - Dual M.A. Degree 185
Public Law - Undergraduate Minor 948
Public Utility Regulation and Economics - Graduate Certificate 250

R

RADT-RADIOLOGIC TECHNOLOGY 2097
Ranch Management - Undergraduate Minor 380
Range Science - Bachelor of Science in Agriculture 377
Range Science - Doctor of Philosophy 234
Range Science - Graduate Minor 260
Range Science - Master of Science 185
Range Science - Undergraduate Minor 380
READ-READING 2102
Reading - Specialist in Education 244
Recognition of Academic Achievement 1488
Religious Studies - Undergraduate Minor 526
Renewable Energy Technologies - Undergraduate Minor 1199
RESP - RESPIRATORY THERAPY 2105
RGSC-RANGE SCIENCE 2108
Rhetoric and Professional Communication - Doctor of Philosophy 234
Rhetoric and Professional Communication - Undergraduate Minor 742
Risk Management and Insurance - Undergraduate Minor 1017
RXPP-PRESCRIP PRIV PRAC PSYCH 2113

S

School of Hotel, Restaurant and Tourism Management 477
School of Teacher Preparation, Administration and Leadership (TPAL) 1363
School Psychology - Doctor of Philosophy 235
School Psychology - Specialist in Education 244
School Social Work: Special Education Related Services - Graduate Certificate 250
Secondary Education - Undergraduate Minor 1450

Secondary Education Alternative Licensure - Graduate Certificate 251
Secondary Education (Secondary Education General Science) - Bachelor of Science in Education 1429
Secondary Education (Secondary Education Language Arts) - Bachelor of Science in Education 1432
Secondary Education (Secondary Education Math) - Bachelor of Science in Education 1434
Secondary Education (Secondary Education Social Studies) - Bachelor of Science in Education 1437
Security Studies - Graduate Minor 261
SIGN-SIGN LANGUAGE 2115
SMET-SCIENCE/MATH/ENG/TECH 2117
SOCI-SOCIOLOGY 2117
Social Media Management - Undergraduate Minor 805
Social Work 1451
Social Work - Bachelor of Social Work 1461
Social Work - Master of Social Work (Full-Time) 187
Social Work - Master of Social Work (Full-Time Advanced) 188
Social Work - Master of Social Work (Part-Time) 189
Sociology 1463
Sociology - Bachelor of Arts 1474
Sociology - Graduate Minor 261
Sociology - Master of Arts 190
Sociology - Undergraduate Minor 1476
Software Development - Undergraduate Minor 670
Soil Science - Undergraduate Minor 477
Soil Science (Environment and Resource Management) - Bachelor of Science in Agriculture 470
Soil Science (Soil and Water Science) - Bachelor of Science in Agriculture 472
Soil Science (Soils) - Bachelor of Science in Agriculture 474
SOIL-SOIL 2127
SOWK-SOCIAL WORK 2129
SPAN-SPANISH 2138
Spanish - Master of Arts 191
Spanish - Undergraduate Minor 838
Spanish Counseling - Graduate Minor 261
Special Education - Graduate Minor 262
Special Education - Master of Arts 193
Special Education (Elementary Education) - Bachelor of Science in Education 1439
Special Education (Secondary Education) - Bachelor of Science in Education 1441
SPED-SPECIAL EDUCATION 2150
SPHS-SPEECH & HEARING SCIENCE 2164
SPMD-SPORTS MEDICINE 2172
Sports Communication - Undergraduate Minor 620
STAT-STATISTICS 2186
Strategic Communications - Undergraduate Minor 805
Structural Engineering - Undergraduate Minor 1087
Student Resources 1480
Supply Chain and Operations Research Analytics - Undergraduate Minor 1212
SUR-SURVEYING 2188
Sustainability - Graduate Certificate 251
Sustainablility- Undergraduate Minor 526
Systems Engineering - Graduate Certificate 252
Systems Engineering - Undergraduate Minor 1212

T

TBGD-TRANSBORDER & GLOBAL HUMAN DYNAMICS 2191
TCEN-ENVIRONMENTAL/ENERGY TECH 2192
Teacher Education 58
